**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Dear Mr. Broussard,

I am writing concerning the projected casino project by the Koi Nation located in Sonoma County, California.

I would like to voice opposition to this project because of the way it will affect the environment and culture of the surrounding area. The biggest concerns are those of noise, light and exhaust pollution along with wastewater run-off and water usage of this project. Wildlife in the area will be affected with these changes in their environment. There are residential neighborhoods and a park located right across the street from this proposed project and with an increase in traffic, there is more potential for pedestrians being victims of accidents.

In doing some research, I found that the historic and cultural home of the Koi Nation is on an island in Clearlake, CA and that they are suing the City of Clearlake for wanting to build a hotel on cultural land. This should indicate where their historical home is and it is 53 miles from the proposed casino project.

The other item I am concerned about is that they have contracted with another tribe located in Oklahoma to manage this operation. I assume that the Choctaw nation will receive most of the money that will be made at this casino and not the Koi Nation or the county of Sonoma or state of California.

There are already two large casinos here in Sonoma County and they are not located near established neighborhoods. Another casino that will create more addiction to gambling is not needed here.

For these many reasons, I would respectfully ask that this proposal be rejected. Please see the video at the link that will describe and give a broader insight to the area in which this project would like to be completed: <https://www.ourcommunitymatters2.com/>

Thank you for your attention to this request.

Sincerely,  
Laura Wilson

Dear Sir:

As 50+ year neighbors to the proposed Koi Nation Casino, I appreciate their initiative; however, another sight would be more appropriate. I agree with other tribes that Koi never had a presence in Sonoma County. Our concerns are traffic, infrastructure, ambiance in our rural neighborhood, green space that was very important only a few years ago, and it would be directly across from a church and not far ( approximately 1/2 mile) from two elementary schools.

We appreciate your consideration of our concerns.

Sincerely,

Ron and Debbie Wheeler

Subject: Koi Nation Shiloh Resort and Casino Project

Dear Ms. Dutschke and Mr. Broussard

I have written to you in the past to point out the many reasons why a casino in our Windsor neighborhood is an unthinkable idea. It can only be that you don't realize what surrounds these 65 acres. It is not an uninhabited area or open space. It is surrounded by residential family homes, a local park where children play soccer and baseball, a regional park where we hike, have picnics and people can bring horses. Then more houses and another residential home development with a school. Finally, we come down Old Redwood Hwy (which is just a narrow road, one lane each way) with several more homes, a trailer park (with elderly people), and a church. All of the streets are narrow one lane each way streets. Does that sound like a place to put a casino and hotel? Plus there are already two casinos in Sonoma County. They are 15 minutes in each direction.

Our town, in the last 6 years has had terrible wildfires threaten our community. Twice we have been evacuated and if it wasn't for brave firemen from all over the nation who came to our aid our whole town would have been lost in 2019. As you are aware, during these wildfires or any emergency, evacuation of a community is very difficult already. Shiloh Road is one of two main routes for leaving town.

A casino in Windsor would be a huge drain on our quality of life (environmental impact, traffic and emergencies) our financial expenditures (roads, police, fire department) and our natural resources (water, creeks, wells). I know the Town of Windsor has detailed the negative effects that this casino would have on our town and the Environmental Assessment has not addressed these items.

The Koi tribe is not from Sonoma County. We support our Pomo tribes who are from Sonoma County. The Koi need to find another location for their Casino. Preferable, in Clearlake where they originated or in an area that is not near families, schools, parks and churches.

Please help the Koi find another area for their tribe.

Sincerely,

Catherine Ernst  
Concerned Citizen

NOI Comments

Koi Nation Fee-to-Trust and Casino Project

I am opposed to any casino project on the Shiloh property. There are huge problems with the site that include the noise, traffic, more crime, the environmental issues (creek erosion, creek wildlife corridor, storm water runoff and waste water plan) and a large reduction of neighbor's property values. There should be no casino allowed in neighborhoods. This is right across the street from an existing neighborhood and a child's baseball field. There are other neighborhoods nearby and the casino will substantially lower the quality of life for many people. **A 24 hour business that serves alcohol and provides entertainment is not compatible within a residential neighborhood.**

A main issue is the safety of the nearby residents. Crime will go up. Loud noise and lights will harm everyday life. There will be more accidents with a major increase in traffic with new projects already underway.

Please reject this ill-suited project-it is wrong for the area!

Thank you,

Pat Warren

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

To whom it may concern,

My name is Sandra Nieto and I've been a Windsor resident for over 33 years.

- I'm writing this email against the proposed Koi casino in Windsor. First, This is not raurel area as noted in press releases. There is a subdivision of homes just across the street on Shiloh and a new 4 story apartment complex at the corner. There are homes that butt up to this property and a trailer park within walking distance. There will also be an additional apartment complex less than a quarter mile and a proposed senior living. With the continued growth in this area, Windsor/Sonoma County hasn't kept up with the addition demand on traffic or parking. Shiloh Rd goes from one lane to two lanes and back to one to go over the overpass for the 101 highway. This causes a bigger bottle neck issue, than it does today. The impact on the environment doesn't warrant an addition of another casino.
- Secondly, the proposed location butts up to Shiloh regional park which burned in both the Tubbs and Kincaid fires. The addition traffic from a casino would be putting the lives of residents and visitors in this area in harms way.
- Thirdly, water and sewer are an issue in the area. Windsor can't add this parcel onto an already strand system. Additionally, greater traffic equals higher crime. Lastly, the area does not need another casino, currently we have two within 15 minutes of this location. Both of these casino are bussing in gamblers from the Bay Area to stay in business. Our society doesn't need to create areas for people addicted to gambling. I'm strongly oppose having the second largest casino in California in my small town of Windsor. It will put the nail in the coffin of me continuing to be a resident of this state.

Sincerely,

Sandra Nieto

Windsor Resident

April 7, 2024

Amy Dutschke, Regional Director  
Bureau of Indian Affairs, Pacific Regional Office  
2800 Cottage Way  
Sacramento, CA 95825

Dear Ms. Dutschke,

I live in the Oak Park Neighborhood and my house is directly across the street from this proposed project, less than 50 feet away. Since the impact on the environment of a residential neighborhood is not being considered in this environmental review, I will discuss some of the many other issues that were addressed so poorly in the EA and that will hopefully, be investigated by a company that analyzes complete data in a transparent manner.

The traffic study of the EA was not a serious study, measuring traffic on a Sunday in January. It failed to take into consideration traffic during the work week, it failed to consider all the additional traffic that will be generated by the current high density housing project, on the corner of East Shiloh and Old Redwood Highway, "*Shiloh Terrace Affordable Housing*" nearly completed, consisting of 134 additional units, with 384 total bedrooms, and 141 on-site parking spaces. This project only allows for 1 and a half parking spaces per unit which will add more overflow parking to the surrounding streets which are already impacted by the *Windsor "Redwood Apartments"* and "*Esposi Park Apartments*" overflow parking. Currently this overflow parking takes up street parking on Redwood Hwy and up the dirt median along East Shiloh Road and onto Gridley Drive in the Oak Park Neighborhood.

Additionally, the "*Shiloh Crossing*" project is under construction on the corner of Hembree and Shiloh Road, a heavily trafficked intersection. This will add 173 additional apartment units and their traffic onto Shiloh Road impacting this intersection and the Highway 101 interchange. Directly across the street "*Clearwater at Windsor*", a Senior Housing project, will be built adding 290 more units including memory care, assisted living, affordable apartments, as well as 25,000 square feet of commercial space. Additional cars would include staff, customers, visitors, and residents.

These are only three of the current projects impacting the Shiloh/Old Redwood Highway traffic. Projects will be ongoing as required by the State of California required housing plan quotas.

The solutions offered for traffic remediation in the EA are grossly inadequate and would cause round-the-clock gridlock and completely unsafe conditions for the residents of the entire area. There is no traffic mitigation for a project like this one. This is the wrong location for any casino, hotel, or entertainment complex.

Wildland fire risk was only addressed from the perspective of someone who wants this project. A qualified currently active fire chief with a differing opinion was not consulted. The retiree's opinion included in the EA did not take into consideration the lives of the community living here every day nor the facts encountered here during both the Tubbs and Kincaid fires. With the ever-increasing housing density in this area required by the State of California the traffic and road congestion will only become worse. The BIA would be wise to take the lives of potential casino/hotel guests into consideration as well. The evacuation plan outlined in the previous EA was ludicrous. All customers will be joining the other 50,000 plus residents on the limited and gridlock evacuation routes. There is no guarantee of advance warning for evacuation. Having lived through two serious wildfires here, evacuation is already gridlock and there is no shelter in place. High winds move these fires swiftly through curb and gutter neighborhoods. Traffic will impact the already difficult evacuation routes.

The intensely high-water usage proposed by this project will empty the wells of all neighbors who will not be able to afford to dig ever deeper wells. We know this already from Graton Rancheria as all their neighbors' wells are dry or the water quality has become unusable. This problem is expanding ever outward from Graton Rancheria. Currently well owners in Sebastopol are now impacted by the severe loss of groundwater being used by Graton Rancheria. Santa Rosa City has a water policy in place that affects all current residents which requires them to only use the amount of water that can be restored during the rainy season. It appears that the Koi Nation does not intend to be held to the resident's standard and will use up all the water for this project as they are exempt from the laws the rest of us must follow. Additionally, if Graton Rancheria is any example of what will come, once the land is granted to the Koi Tribe, and they are allowed to build a casino of any size, they will continue to expand without any restrictions using ever more water, bringing ever more traffic, pollution and ending any type of evacuation from this area during a crisis.

Taken all together, the traffic impact, the fire evacuation routes and the emptying of the aquifer, this project is unfeasible and dangerous. I urge the BIA to (3) A NO ACTION ALTERNATIVE.

**SUBJECT:** NOI Comments  
Koi Nation Fee-to-Trust and Casino Project

**FROM:** William V. McCormick, CEG  
5811 Faught Road  
Santa Rosa, CA 95403

Dear Ms. Dutschke:

One again I find it hard to believe that I am actually obligated to respond to such a preposterous land development proposal as this one put forward by the Koi tribe for a casino and resort at the border of the Town of Windsor, within Sonoma County. My property is bounded by Shiloh and Faught Rd, immediately east of this project. I am a local, licensed, Certified Engineering Geologist (CEG) who has spent the last 38 years evaluating the engineering and environmental feasibility of proposed development projects in Northern California, and I must say I have never seen such a ludicrous development proposal such as this one; ***a casino in a residential neighborhood is almost comedic....however, in my case it is an on-going tragedy.*** I spent 11 years opposing the fee-to-trust development on the western edge of Windsor with another tribe, only to find that even though I moved to the other side of town, I now have to defend my rights and way of life again!

From a professional perspective, I can't say that I have ever read a more flawed, incomplete and down-right unprofessional environmental document than the EA that was produced for this ludicrous development by Acorn Environmental. Clearly this firm is a paid advocate for the Koi tribe and their conduct and work product is subject to further scrutiny and professional investigation. This out-of-town firm clearly has no understanding of the local conditions and has produced this document using desktop study procedure, outdated data and no true field ground-truthing. Miraculously, all issues are deemed to be less than significant, to the public. This clearly shows that the EA was written only to the benefit of the Koi tribe and WITHOUT consideration to the surrounding neighbors or current environmental reality. This study is so flawed that it never even defines what the phrase less than significant means, and to whom. In order to accurately point out the numerous flaws of this 217-page study, it would take another 217-page letter.

***The flawed nature of the EA was clearly demonstrated in letters by neighbors, Sonoma County Native American Tribes and local government officials that the BIA has found it necessary to issue a NOI and the requirement for a formal EIS for this land and project.*** For sanity sake, I will reiterate only a few examples that clearly demonstrate why the Fee-to-Trust should not be considered for acceptance and that the only project that is acceptable is Alternative D – No Action Alternative.

## **TRAFFIC**

The provided traffic study is extremely flawed and incomplete. First of all, new traffic volumes will increase by up to 16,000 cars a day, within a residential neighborhood with **NO mitigations whatsoever proposed.** We cannot accept or be forced to accept such a degradation to our way of living. This amount of traffic will severely decrease the safety of our neighborhood.

In addition to this, the previously presented traffic study is completely flawed because it does not even consider traffic generated from the major intersection of Shiloh and Faught Rd; the corner I live on. Casino patrons will try to go around the traffic created on Old Redwood Highway at the main entrance, for the Faught Road/Shiloh back entry. For us who live here, we all know that Shiloh road is a part-time drag strip already....adding 16,000 cars to this will result in many injuries, death, property damage and overall degradation to our current peace and lifestyle with endless, 24-hour traffic noise. ***Let's be clear...there is NO practical or theoretical traffic solution than can reduce traffic impacts to a less than significant rating.***

## **WATER SUPPLY**

The EA claims that daily groundwater use needs on the site will be 170,000+ gallon per day and require additional wells to be drilled. This will severely affect neighboring supply wells with typical yields of only 10 to 20 gallons per minute and will cause a drawdown effect, possibly drying up adjacent domestic wells. This will also limit firefighting efforts in this wildfire hazard zone. ***Commercial use wells by the casino project will permanently overtax existing well and groundwater supplies for all citizens that rely on well water.***

## **WASTEWATER**

This category is especially disturbing. The previous EA estimates up to 400,000 gallons of waste per day. The proposed on-site system will include pipes under Pruitt Creek, the need for up to 16 million gallons of onsite storage and/or discharge into Pruitt Creek...which would permanently damage the existing creek environment. There will be so much excess sewage water that the EA states that up to 11 acres of offsite irrigation is possible, if they can find someone willing to take it...if not, the excess will be pumped into Pruitt Creek. ***We cannot allow Pruitt Creek to become a sewage canal.***

The proposed plans call for an on-site sewage treatment plant which will use hazardous chemicals for treatment which would be environmentally disastrous if spills were to occur.

What's most important here is that private sewage treatment plants on tribal lands are not subject to local operating guidelines, inspections or oversight. In addition, all waste biosolids would have to be continually trucked offsite to some other disposal site, presenting additional commercial traffic and potential environmental hazards for Sonoma County citizens.

***\*If this casino is permitted, the Town of Windsor will be bordered by TWO UNREGULATED WASTEWATER TREATMENT PLANTS.***

### **OTHER UNMITIGATABLE ISSUES**

There are many other unmitigable issues associated with having a casino in this neighborhood. It has been proven that areas surrounding casinos experience a sharp and lasting increase in **criminal activity**. Even though my property is located somewhat in a rural setting, I have had prostitutes and drug users use my driveway and vineyard access for their business. ***Criminal activity will increase exponentially with the Casino making our neighborhood unsafe.*** The tribe erroneously assumes that Sonoma County Sheriffs and Fire will service the project.

There is no way to eliminate new **NOISE** associated with traffic access to the site from patrons and deliveries, parking for over 5,000 cars and general **24-HOUR-A-DAY** operation of the casino itself. Other forms of **POLLUTION** will be car exhaust and light pollution. ***All of these factors will permanently damage our peace and SEVERELY reduce the VALUE of our properties.***

### **SUMMARY**

In a nutshell, this proposal to take this land into Fee-to-Trust status and permit a casino in a residential neighborhood is absolutely ludicrous and since there are numerous issues that cannot be adequately mitigated, any future environmental study will be flawed and unacceptable. Let me summarize the fatal flaws for this project:

- NO additional environmental study can adequately characterize the overwhelming negative effects to the neighborhood and Sonoma County Citizens and **WILL BE A WASTE OF TIME.**
- The tribe has not presented mitigating factors for critical issues
- There is no definition of Less than Significant and this implication for all issues clearly ignores the concerns of neighbors and Sonoma County citizens
- The proposed development is opposed by every civic organization and the overwhelmingly majority of Sonoma County citizens.
- The proposed development is opposed by existing Tribes that originate from Sonoma County
- We already have two casinos in Sonoma County, we don't need a third

**What is completely omitted from the previous EA document and will most likely be omitted in future studies is the description and acknowledgment of the permanent damage to the existing residential and agricultural culture that exists in this area.**

No credence is given to forever changing the lives of the current residents, which far outnumber the 90 Koi members who would be the beneficiaries of residential neighborhood destruction. ***Clearly none of the Koi would live in this neighborhood once the casino is built. I would also like to point out that NEVER has permission been granted in the past for a tribal casino more than 15 miles from their native origins nor has a casino EVER been permitted next to a residential neighborhood...***this policy should not be changed!

I have one final comment that needs to be taken into consideration by the BIA. This current process of **RESERVATION SHOPPING** at will needs to cease, and the Federal Government needs to find other more positive ways to assist tribal communities that doesn't destroy the lives of others in the process and is not based on a monopoly of casino greed. Where is it written in BIA policy that the only way for Tribes to become financially self-supporting is by granting Fee-to-Trust land specifically for casino building. Tribal rights should not be more important than all other citizens' rights. We are all **US Citizens** and one group should not be allowed to infringe upon the rights of others for selfish means, especially since the citizens that could be negatively and permanently affected have lived here for many decades.

In closing, I implore the BIA to reject any future EIS studies and considering granting Fee-to-Trust for the Koi Nation on this Parcel of land, and only consider **Alternative D- No Action Alternative**. **I also strongly encourage you to guide the Koi Nation into finding fee-to-trust land opportunities outside of Sonoma County.**

Respectfully submitted,

William V. McCormick, CEG

Neighborhood Resident

Subject: [EXTERNAL] NOI Comments, Koi Nation Fee-to-Trust and Casino Project

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

To Whom It May Concern,

In response to the BIA request for public comments for development of an Environmental Impact Statement, I propose that all issues and concerns raised during the review of the EA be thoroughly addressed. The information presented in the EA was shockingly deficient, often based on outdated information and superficial reference to website information. It should be noted that there is no local support for the Casino Project, not from the nearby residents, the Windsor Town Council, Sonoma County Board of Supervisors, nor the other Sonoma County tribes. (I notice that all support the Koi Project cites is from tribes not in or near Sonoma County.)

Contrary to comments made by the tribe's Chickasaw representative during the public hearing in response to the Environmental Assessment, the parcel under Fee-to-Trust consideration for construction of the Casino Project is NOT in a commercial zone. No other commercial properties are adjacent to the parcel, but residential neighborhoods, a church and a Windsor park containing sports fields used by children and adults currently border 3 sides of the parcel. In fact, the parcel under consideration is zoned as Intensive Agricultural by the County of Sonoma. The project is wholly unsuited for this agricultural location.

The biggest concern I have personally is the effect of such a project in the event of another devastating wildfire, which is more likely than not. The EA's response to this concern was not only impractical, but also insulting to the residents in the immediate area of Shiloh Rd., Faught Rd., Chalk Hill Rd., and Shiloh Ridge. Several thousands of these residents would likely have to use Shiloh Rd. as their only evacuation route. Given the past history of local wildfires in 2017 and 2019 alone, there is no way that 2-lane country Shiloh Rd. can accommodate the 7,000+ cars that will be evacuating to Highway 101.

I am not opposed to tribal self-sufficiency, self-determination and economic development. Nor am I opposed in general to gaming. However, this is not the right location for a casino and resort. Additionally, these are not the Koi ancestral lands; in fact, the tribe is currently involved in a dispute with Lake County regarding their ancestral lands in that county. Their position in that dispute is contradictory to their claim that Sonoma County constitutes their historical lands. They cannot have it both ways.

Their claim to Sonoma County land is unfair to the existing Sonoma County tribes, all of whom are allied in their opposition.

I urge you to deny the Fee-to-Trust proposal from this tribe that has a recorded history of reservation-shopping. I am open to consideration of an alternate, non-gaming project, but prefer a no-action alternative. The tribe has already begun removing the existing vineyards, and the Koi Casino is already shown on Google maps. I'm not sure if these are tactics employed to demoralize or intimidate the local residents and others, but it seems disingenuous of the tribe to claim they want local support.

I request that my personal identifying information be withheld from public review.

Sincerely,

[REDACTED]

**Subject:** [EXTERNAL] NOI Comments, KOI Nation Fee-To-Trust, and Casino Project

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

I am writing to let you know my strong opposition to the proposed casino project in our community. As someone who has dedicated their career to law enforcement, I have witnessed firsthand the detrimental effects that casinos can have on communities. The issues associated with this project are numerous and deeply concerning, and I would like you to carefully consider the implications before moving forward.

First and foremost, the proposed casino project fails to adequately address the significant environmental impacts it would have on our area. From increased air and light pollution to the potential disruption of wildlife corridors, the project poses a serious threat to the delicate ecosystem surrounding us. Furthermore, the proposed extraction of 400 thousand gallons of water daily, coupled with the construction of on-site sewage treatment facilities, raises serious concerns about the sustainability of our water resources and the potential for contamination.

Additionally, the proposed location of the casino, accessed by a two-lane rural road already at capacity, would exacerbate existing traffic issues and pose a danger to residents. With hundreds of new apartments planned along the same route, the influx of daily traffic would further strain our infrastructure and negatively impact the quality of life for current residents.

Moreover, the social implications of the casino cannot be overlooked. Casinos are known to attract crime, including theft, prostitution, and addiction, which place an increased burden on our public services and pose a threat to community safety. While the tribes may offer "crime mitigation" funds, these measures are often insufficient to offset the damage caused by the presence of a casino in our midst.

In addition to these concerns, I am troubled by the apparent disregard for the historical and cultural significance of the proposed site, which was not inhabited by the Koi tribe. The Koi tribe historically resided in Lake County. It is deeply troubling that this location is being exploited to undermine the financial stability of neighboring communities.

In conclusion, I implore you to thoroughly consider the long-term consequences of the proposed casino project on our community and take decisive action to address these concerns. Our collective well-being and the future of our area depend on it.

Thank you for your attention to this matter.

Sincerely,

**Subject:** [EXTERNAL] NOI Comments, Koi Nation Fee-to-Trust and Casino Project

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

To Whom It May Concern:

I believe the Koi Nation resort and casino project proposed for 68 acres of primarily agricultural land adjacent to Windsor, CA, would be detrimental to the land, to surrounding resources and to established rural and semi-rural neighborhoods. The establishment of such a massive business would forever diminish the character, peace and beauty of southeast Windsor.

This business would cause a huge influx of traffic and congestion. Nearby infrastructure for Highway 101 was designed for 1960s-era traffic and is already strained by daily backups. The property itself is surrounded by two-lane rural byways where even sidewalks are rare. More traffic brings more exhaust and poorer air quality.

Paving over much of the project area, which would be inevitable, would increase runoff into adjacent creeks and raise the risk of downstream flooding.

Residents from all over Sonoma County value nearby Shiloh Ranch Regional Park as one of the area's gems. I worry about the impact to the park from nearby construction, air and water pollution and visual degradation.

I do not object to the Koi Nation developing a sustaining business for itself but I do not think this Windsor project is being pursued in a proper or desirable location. Compare this project to the Graton Casino in Rohnert Park, which is actually much larger, but it was located in an area far from residential neighborhoods. The Graton band of Pomo also located its project within that tribe's established historical territory while the Koi band is known to have traditionally occupied areas far to the northeast in what is now Lake County.

**Subject:** [EXTERNAL] KOI NATION SHILOH RESORT & CASINO PROJECT WINDSOR CA

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

To Whom it May Concern:

This is my written strong opposition of the proposed Koi Nation Shiloh Resort and Casino in the area at Old Redwood Highway/East Shiloh Road in Windsor. I am a 30-year resident of Sonoma County. I have raised my 3 children in the vicinity of this proposed project and I currently reside in close proximity of this project.

The proposed location of the casino is not conducive to the character of this part of Windsor. Located in close proximity are established neighborhoods, agriculture, churches, parks, playgrounds and baseball fields all of which will suffer tremendously by the proposed casino project.

The small 2 lane Old Redwood Highway as well as East Shiloh Road could not handle any excess traffic that would be brought on by this project. In addition to traffic congestion the environmental impact to this area brought by traffic, noise, air quality, visual resources and destruction of established agricultural land, the area is set up for an impact to residents, their children and the overall "culture" this area currently holds. As seen in the previous years of catastrophic wild fires in this area, these roads could not possibly handle more congestion especially in the event of future fires or other catastrophic events. Expansion of the Shiloh Rd/ East Shiloh Road could not possibly accommodate the projected traffic increase that would impact this neighborhood road. There is lack of adequate circulation to and from this project that would create a domino effect to surrounding roads and neighborhoods.

This particular Koi nation has no known or significant connection to this land or the Town of Windsor. This tribe should investigate land or locations in the vicinity of their origin. In addition, the ignorance of local zoning and building restriction only causes the current area to decrease land and property values for all those in the surrounding areas.

This neighborhood is not the location for a proposed casino . Not even a "resort" with high-end projections. This is a neighborhood with families. These families take walks, play ball, shop, attend school and attend churches in this area.

A proposed casino will increase traffic, crime, decrease the current green space and jeopardize emergency time to respond to any future emergencies in the area. The project jeopardizes land and biological resources. There is direct negative impact on public services, utilities and overall socioeconomics.

There are other areas more conducive to this type of business. Please keep our Town of

Windsor a family community—the reason we chose to live here in the first place.

Thank you for your consideration,

Chad Broussard Environmental Protection Specialist

Dear Mr. Broussard,

I am writing to express my strong opposition to the approach taken to support the proposed new Shiloh Resort and Casino.

When members of the Koi Nation of Northern California consider the introduction of a casino, they have sought guidance from consultants to conduct various studies. In this scenario, a consultant, commissioned and funded by entities supportive of the casino's establishment, meticulously crafts a report aimed at bolstering the case for casino development. This tailored study strategically presents biased information favoring the interests of those financing the consultancy. Through selective data interpretation and emphasis on potential economic benefits, such as job creation and revenue generation, the consultant aims to sway public opinion and decision-makers in favor of the casino project. By framing the narrative to downplay or overlook potential negative impacts, such as increased traffic congestion or problem gambling, the consultant endeavors to create a persuasive argument that aligns with the agenda of their benefactors. This orchestrated effort to present a one-sided view of the proposal underscores the influence of vested interests in shaping public perception and policy decisions regarding the casino's introduction.

Empirical evidence reveals the community will face a myriad of compounding factors, as illustrated below, which necessitate the denial of yet another casino in Sonoma County.

1.

1. Traffic Congestion: There is currently no infrastructure in place, nor planned, nor even close to being funded, to accommodate the increased traffic that will

occur traveling to or around the proposed casino location. This will strain local infrastructure and create inconvenience for residents.

2. 2.

3. Crime Concerns: Increased crime associated with casinos, including theft, fraud, and organized crime activities, are commonly understood issues. Therefore, *the study must include full disclosure* of the number and nature of the Graton Casino and River Rock Casino calls over the past 5 years from the Sonoma County Sheriff's Department and associated data from the City of Rohnert Park Police Department. Respectfully, The Bureau of Indian Affairs must consider this as a formal Public Records Access Request through the Freedom of Information Act, whereby such information is promptly and made reasonably available to the public.

4. 3.

5. Problem Gambling: The presence of another casino will undoubtedly contribute to problem gambling behaviors in our community, leading to financial hardship, family disruptions, and depression.

6. 4.

7. Impact on Local Businesses: Casinos will draw customers away from existing local businesses, especially smaller establishments. This will lead to economic challenges for nearby retailers, restaurants, and entertainment venues.

8. 5.

9. Impact on Family Well Being.: In the gaming industry, it's said to never gamble with "scared money." Scared money is what is referred to when a person uses their money to gamble...that in fact was supposed to go to paying the rent, covering a child's nutritional needs at school, or having funds to pay for a medical emergency. Gambling institutions turn a blind eye to such problems! In fact, they multiply and magnify such hardships and stresses by installing personal ATM machines right in the casinos.

10.6.

11. Social Disruption: The introduction of a third casino will inevitably change the social fabric of the community, leading to disruptions in community cohesion, values, and norms. This will heighten the concerns of residents who value their community's identity and sense of belonging.

12.7.

13. Negative Image: Communities fear that the presence of a casino will tarnish their reputation or negatively impact their brand image. This concern will be particularly relevant for areas seeking to promote themselves as family-friendly or culturally rich destinations.

Thank you for allowing me to participate in this process.

Sincerely, Gene Clark, 1036 Elsbree Lane, Windsor, CA 95492

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Dear Mr. Broussard, Environmental Protection Specialist, BIA,  
I am writing to voice my concern and dismay that consideration would be afforded to the southeastern Pomo Koi Nation of Lake County to build a proposed casino and resort in the ancestral territory of the southern Pomo, and the Federated Indians of Graton Rancheria. For years Koi has tried to build a casino in Oakland, in Vallejo and now in Windsor. They have no valid claim to this area, and in fact their own records and media (<https://www.pbssocal.org/shows/kvie-viewfinder/episodes/saving-sacred-hj7xzd>) declare and affirm their ancestral ties to Lake County, about 60 miles away.

I am part Coast Miwok, Southern Pomo and Mishewal Wappo, and an enrolled citizen of the Federated Indians of Graton Rancheria, and as a fellow Indigenous person I am well aware of the injustices Indian people, including my family and ancestors, have had to endure, but two wrongs don't make a right in this case; it would be wrong to allow Koi Nation to usurp our Sonoma County homeland in this way.

The five Sonoma County tribes: Federated Indians of Graton Rancheria, Dry Creek Pomo, Mishewal Wappo, Cloverdale Pomo, and Kashia Pomo all oppose Koi's mistaken assertion that they have a place to advance their economic development here. Their efforts have been refused in the other counties they have audaciously attempted this operation, and they should indeed be turned down again because they are out of line. The overwhelming majority of neighbors, Sonoma County residents and governmental leaders oppose this project based on, but not limited to, legitimate environmental, social, traffic, public safety, and tribal issues. Thank you for considering.

Respectfully,  
Yana Fawn Ross  
Santa Rosa, California

Subject: [EXTERNAL] NOI comments Koi nation fee-to-trust casino project

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Hello,

I'm writing to express opposition to the proposed Koi casino in Sonoma County. It would be a decimation of natural resources to help out of state tribal entities profit from our local resources, and there are many adverse environmental impacts should this project come to fruition.

Most notably, the roads infrastructure cannot sustain the expected increase in traffic to the location - neither the highways or surface roads are capable of handling this volume. Additionally, this region has been impacted by wildfires multiple times over the years, requiring evacuation of neighborhoods and entire towns. Adding this volume of vehicles and additional traffic to an evacuation would put local residents lives at risk.

Given the immediate proximity to a high volume of residential neighborhoods, schools, and churches, bringing in such traffic for activities such as gambling will adversely impact the local neighborhoods. I am concerned that the casino will cause an increase in violent and non violent crime to the surrounding areas.

For many years, California has suffered under drought conditions with water restrictions, etc. Only recently have we started to replenish water tables with only two years of sufficient rain. There is not enough water to sustain the anticipated 400,000 gallon DAILY use for this casino. The drain on local environmental resources is too significant to overlook.

Please save the water, save the land, save our local communities, our infrastructure, and our economy by saying no to this casino.

**Please redact any personally identifiable information from this message before distribution.**

If you need any additional information from me, please reach out.

Signed,

concerned resident of Windsor, [REDACTED]

NOI Comments, Koi Nation Fee-Trust and Casino Project:  
Option 3: No ACTION

Amy Dutschke, Regional Director  
Bureau of Indian Affairs  
Pacific Regional Office  
2800 Cottage Way  
Sacramento, CA 95825

c/o Chad Broussard  
Environmental Protection Specialist  
Bureau of Indian Affairs, Pacific Region

Dear Director Dutschke,

I am writing as a resident, an environmental health consultant and senior who moved to the unincorporated area of Sonoma County, where the proposed Koi Casino project is being considered, after a bone marrow transplant in 2014. Only one photo/map in the Environmental Assessment shows our neighborhood even though we are 1.2 to 2 miles away from the proposed casino project. Our neighborhood is called Larkfield-Wikiup and is made up of young families and seniors (like myself). I moved here from the "City" because it is peaceful and *quiet*. People walk their dogs on the sidewalkless streets, there is wildlife, there is a regional park (Shiloh-directly across from the proposed casino not shown in pictures or maps) where we can enjoy nature year-round. Many people bike ride for pleasure and competition because of the *quiet streets and calm surroundings*. Because the EA omits photos of our neighborhood it leads the reviewer to believe that there will be no impact on the several thousand people in this neighborhood and the 10,000 people who live in the "Larkfield-Wikiup" neighborhood at large.

The proposed casino will change the character of and harm the health and well-being of individuals, our community and the neighboring communities north and west of the proposed casino. It will also harm the Regional Park and wildlife east of the proposed casino. It will exacerbate climate change locally and beyond, it will endanger the water supply and system.

**I searched the CFR and located CFR Title 25 Chapter 1 Subchapter N Part 292 and found:**

To satisfy the requirements of [§ 292.16\(f\)](#), an application must contain the following information on detrimental impacts of the proposed gaming establishment: (below a-g) and § 292.18 poses the question: What information must an application contain on detrimental impacts to the surrounding community? I answer this question below.

(a) Information regarding environmental impacts and plans for mitigating adverse impacts, including an Environmental Assessment (EA), an Environmental Impact Statement (EIS), or other information required by the National Environmental Policy Act (NEPA);

(b) Anticipated impacts on the social structure, infrastructure, services, housing, community character, and land use patterns of the surrounding community;

- (c) Anticipated impacts on the economic development, income, and employment of the surrounding community;
- (d) Anticipated costs of impacts to the surrounding community and identification of sources of revenue to mitigate them;
- (e) Anticipated cost, if any, to the surrounding community of treatment programs for compulsive gambling attributable to the proposed gaming establishment;
- (f) If a nearby Indian tribe has a significant historical connection to the land, then the impact on that tribe's traditional cultural connection to the land; and
- (g) Any other information that may provide a basis for a Secretarial Determination whether the proposed gaming establishment would or would not be detrimental to the surrounding community, including memoranda of understanding and inter-governmental agreements with affected local governments

I have not worked with these regulations previously so I will address what has not been adequately described in the EA and items required in a-g.

- (a) The EA was very incomplete. It lacks data and in many instances it is completely unrealistic. The list of topics in the EA does not include **Climate Change** (which is a relatively newly accepted environmental concern and apparently is not yet part of EA ES reviews). What is the projected tonnage of CO2 and GHGs generated/day? How large is the projected carbon footprint? A carbon footprint in tons should be part of this assessment/study.

Sonoma County like other parts of California and the US has been and continues to be significantly affected by Climate Change. Increasing temperatures and earlier spring & summer with accompanying drought which have impacted our **temperatures, air quality** and our **water supply**. Climate change has brought flooding in winter and **unpredictable high winds** in both winter and summer. The summer winds have resulted in catastrophic fires throughout the state but specifically in the area of the proposed casino project.

A 1.2M sq ft building, with a 200-400 (different #s on KOI website than in EA) hotel, with 5-7 (again differing #s) restaurants *and* a parking lot for over 5,000 (visitors and staff) cars will create a giant heat island warming the site and neighborhoods nearby. It will require immeasurable amounts of electricity and gas – largely from fossil fuels. Gas for the restaurants is inevitably released during cooking and is a known GreenHouseGas. 24/7 casino lighting, air conditioning, 5,500 automobiles as well as trucks will also contribute to GHGs.

Extreme heat is a danger to the health of seniors and children. The proposed site is across from a Senior Mobile Home park and a Windsor City recreational park for children and families. There is no prediction regarding dangerous the heat effect that this project will create. Currently the agricultural land has served as a cooling break for the area and absorbs CO2 as well as works as a fire break.

**Fire:** The Wikiup and Oak Park neighborhoods (north and south of the project) have been evacuated for fire twice in the past seven years. Trying to evacuate from a life-threatening fast-moving fire on the two-lane Redwood Hwy and onto the gridlocked HWY 101 is extremely anxiety producing. In the Tubbs fire we had less than 15 minutes to leave, it took an hour to travel half a mile and cross over HWY 101 at Shiloh (which was closed at the closest exit because the fire was heading toward our Mark West exit and in fact crossed the HWY and burned an entire subdivision

of 1,000 homes killing 2 people) onto the 2 lane River Road also blocked. Luckily, we had friends in Sebastopol to go to, but then were evacuated from there so we went to a supermarket parking lot and tried to find a place to stay. There were thousands of people with no place to go who set up at the fairground. Imagine a fire **or earthquake** (the proposed casino is close to a fault line – we had an earthquake 2 years ago that broke our water pipe with 5,000+ cars and 10,000 people trying to escape and to find a safe place none of us knowing where to go. We were out of our smoke damaged home for over a week the fire stopped 8 houses away.

During the Tubbs fire, emergency services were so overwhelmed that staff in a nursing home lined all the patients up for transport and then staff fled for their lives leaving the patients to burn to death.

The proposed mitigation: is completely unrealistic. The suggestion that 12 traffic “attendants” attempting to direct 4-8,000 *panicked* visitors in 4,310 visitor vehicles (not counting employee vehicles) away from a *hot fast-moving fire* (which the Tubbs fire was – as well as Paradise and Malibu fires) will be able to evacuate traffic and not flee themselves is totally unrealistic as is the projection that all will be evacuated in 2.2 hours and the suggestion that “other traffic will be relatively light” is preposterous. This does not consider the thousands of people in the neighborhoods north and south or the senior trailer park west of the proposed project who are also evacuating. The proposed 12 staff (like those in the nursing home) will flee for their life. Most of us in surrounding neighborhoods – near the proposed project have had our fire insurance not renewed and have had to pay high premium through a state insurance program because the risk of fire is so great. If their insurance was not canceled, it will be if the casino project goes forward. The existing vineyard acted as a firebreak in the 2021 Kincaid fire which tinged the vineyards at the top east border for which those of us to the south of the proposed project were grateful. Fire insurance does not reimburse for loss of life, only property. This proposal minimizes the value of human life. One cigarette or marijuana butt tossed out a car window into the dry grass or leaves along the road – not just along the border of the project – but along the road in the neighborhoods or into Shiloh Regional Park will be the end of our lives for thousands of us.

From a health perspective, extreme heat is a danger especially for seniors and the neighborhoods (and Colonial trailer park) that surround the proposed project are home to countless seniors. Air pollution caused by cars and trucks especially in hot weather will exacerbate any pulmonary conditions. Smoke from fires can be deadly for people with pulmonary conditions. Anxiety about fire already causes sleepless nights during warm summer nights and the casino project will only make these worse. Our quality of life will be harmed and there is no mitigating that.

**Water supply:** Larkfield Wikiup relies on well water and is the most expensive water in the state. Rationing has been implemented the past three years charging much higher rates when watering on the wrong day and above the gallons/person limits set by Cal American Water. I have been saving water from the sink and shower to water the garden and flush toilets for over 5 years as have many neighbors.

Cal American Water gets the water from nearby wells relying on aquifers. The aquifers do not only supply the casino project areas, they supply all of us! The state of California passed “Sustainable Groundwater Manageable Act” (SGMA) was passed in 2014 and requires that by 2042 each area of California that uses ground water to replace what is used. Sonoma County wells are on “the Santa Rosa Plains” and is in the process of planning to replace the ground water that it draws out. California has proposed implementing water rationing.

It seems unrealistic to assume that our water table and aquifers are limitless, and 400,000 (includes the so-called treated water) gallons proposed to be used by the casino project will only

make water more scarce and costly. Wastewater processing does not belong between neighborhoods and the possible danger to Pruitt creek cannot be mitigated.

### **Solid waste – landfill:**

Sonoma County like other counties in California is working toward a “zero waste” goal. It is unconscionable that 5,000 – 10,000 people each day will not create a solid waste disaster. All of our individual efforts to reduce, reuse and recycle will be made meaningless. Keep the casino garbage out of our county! **Hazardous waste** – there is a special facility for hazardous waste however it’s much better to prevent it by not needing it to begin with.

### **Light and Noise:**

A casino will light up the night and will eliminate the night sky we cherish gazing at. It will confuse navigation that wildlife require for protection in and near Shiloh Regional Park. Noise in the neighborhoods will create a citylike environment that many of us moved here to avoid.

Traffic noise from HWY 101 will be much louder with 4,000-5,000 additional cars and trucks traveling 24/7. Speeding hotrods will disrupt our quiet neighborhoods and the park. Noise from daily delivery and refuse trucks, and water filtration pumps and systems 24/7 will be disruptive, not to mention noise from the casino itself. We will be unable to sleep with doors and windows open during warm temperatures. The **sound of sirens** from emergency vehicles, which are rare in our quiet neighborhoods will be frequent and unpleasant given an anticipated need for law enforcement and emergency response presence.

### **Regional Park**

Shiloh Regional Park, on the hill adjacent to the east side of the project is home to many wildlife and has wonderful hiking trails. Hiking with views of the “neighborhood casino” will ruin this important natural resource for families.

### **Traffic:**

The traffic evaluation in the EA is inaccurate, it was not performed between Cal Trans “car pool hours” of 7am-9am and 3pm-5pm when there is gridlock on HWY 101 and River Road. An additional 5,000+ vehicles will negatively impact drive times, safety and air quality. Traffic danger along Shiloh near Esposito Park where kids play softball and people walk dogs will increase and is an unacceptable risk. Walking in our Wikiup neighborhood and over to Shiloh Regional Park is one of the nicest parts of living here. Cars taking the “backroad” to avoid traffic or law enforcement will add both danger (especially to kids near San Miguel School 1.2 miles away) and noise to our neighborhoods. There are many bicycle riders who enjoy traffic free neighborhoods for pleasure and competition.

- (b) Anticipated impacts on the social structure, infrastructure, services, housing, community character, and land use patterns of the surrounding community are significant and not addressed in the EA. As described, the two neighborhoods north and south of the proposed project are made up of quiet family homes. The increased traffic and water use will dramatically and negatively impact our neighborhood. Emergency services will be drawn away from those they currently serve and those who pay the taxes that support the services. A casino does NOT fit the quaint small town, safe, outdoor character of the proposed site. Sonoma County is working to build enough affordable housing for the existing workforce, we do not need to add 1,100 employees and families to the lack of affordable housing burden.

- (c) Anticipated impacts on the economic development, income, and employment of the surrounding community; the hospitality industry unless it is unionized does not pay a living wage giving the cost of living in Sonoma County because of this there is a shortage of hospitality workers.
- (d) Anticipated costs of impacts to the surrounding community and identification of sources of revenue to mitigate them; This was not addressed. Windsor police will respond to problems in Windsor, the casino project is in unincorporated Sonoma County and must rely on an increasingly stretched Sheriff department. The cost of law enforcement according to other casino locations will be significant. In addition, how do you quantify (no less mitigate) the health and well-being effects of increased fear of crime, inebriation and accidents for community members in adjacent neighborhoods.
- (e) Anticipated cost, if any, to the surrounding community of treatment programs for compulsive gambling attributable to the proposed gaming establishment; are not addressed. County mental health budgets are challenged, and gamblers who hit rock bottom have nowhere to go. The homeless population continues to increase. There is only one GA meeting in the county (although that is not a cost). The county should not have to bear the cost financially or morally of addictions created and perpetuated by casinos.
- (f) If a nearby Indian tribe has a significant historical connection to the land, then the impact on that tribe's traditional cultural connection to the land; The KOI tribe nor the Oklahoma Chickasaw nation have **no historical connection to this land**.
- (g) There is no question that this project will have a detrimental effect on the lives and health of residents in the community, the community itself, the immediate environment and the larger Sonoma County environment from of climate change, heat, air pollution, traffic, accidents, infrastructure deterioration, and crime. The project does not belong in such close proximity to neighborhoods and parks.

Lastly, It is my understanding that the "Fee to Trust" issue is not yet decided. The two exceptions in that allow this land transfer are described in the "two-part determination" process where the Secretary of the Interior consults with the tribal applicant, the state where the land is located, local governments, and other nearby tribes. **They all need to agree** on two things:

1. That a casino on this land is in the best interest of your tribe, and
2. That a casino or gaming business won't hurt the community around it.

This proposed project WILL hurt the community around it.

**I urge approval of number (3) the NO-ACTION alternative.** The danger of fire from cigarettes on nearby roads can't be underscored. Our communities need the agricultural land to act as a firebreak, to absorb CO2. We need to keep Shiloh Regional Park as a precious natural resource with beautiful views and wildlife, and we need to eliminate added dangerous traffic on HWY 101, Redwood Rd and on the backroads through our Wikiup neighborhoods.

Sincerely,

Catherine Dodd PhD, RN

**Subject:** [EXTERNAL] NOI Comments, Koi Nation Fee-To-Trust and Casino Project.

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Dear Mr. Broussard,

I am writing to provide objection to the proposed Koi Nation Shiloh Resort and Casino Project.

If completed, the project would bring tens of thousands of visitors to the area daily. This will result in a significant increase in traffic congestion, noise, and air pollution, 24/7 artificial light to the surrounding area threatening the natural environment of migratory birds. The proposed project is surrounded by residential and agricultural sections with a community/family park directly across Shiloh Road and an elementary school a mile away.

The size and dominance of the proposed gambling casino and resort at this location will adversely impact the landscape, residential life, and community activities of the whole surrounding area. It will overwhelm the resources of the public, including the diminishing residential water supply, road maintenance, emergency/wildfire evacuation routes and resources for fighting fires and managing crime.

Local air pollution and public health

In addition to greenhouse gas pollution, please study the possibility of local air pollution and public health impacts from increased vehicle traffic on neighborhood roads and highways, as well as the impacts from idling vehicles (including construction, delivery, and passenger vehicles).

The EPA has found that people who live, work, or attend school near major roads appear to have an increased incidence and severity of health problems associated with air pollution exposures related to roadway traffic. It is likely that a project of this size will have a measurable impact on air pollution in nearby neighborhoods. Please assess the possibility that there will be a public health impact due to an increase in particulate matter, air toxics, and NOx, as well as any other foreseeable air pollutant.

Water demands and drought:

California is in the midst of a 1200-year drought. Sonoma County is under mandatory water use restriction and the reality if supplies worsening with global warming is inevitable. Please consider what the water demands, both now and in the future, would be for a resort project of this size vs a

residential development on the same site. The proposed project will decimate the local water table, heavily impacting local water resources for the surrounding community, the community cannot withstand the loss of water supply caused by this project.

**Pressure on local fire/police/emergency responders' capabilities:**

This property, and the whole surrounding area is subject to intense and fast-moving wildfires, not only would visitors to a casino resort be at risk, but the whole community would also be threatened by having the designated escape/evacuation routes overwhelmed and in complete gridlock, with emergency vehicles unable to operate. All roads leading to and from the designated property are only two lanes. For residents in the immediate area and the hills above, Shiloh Road is the main, and in some cases, the only escape route out.

This project, in this location threatens the community with a high potential to greatly contribute to more loss of life and homes.

**Community safety**

Please consider how many thousands of families and individuals live in the actual Area of Potential Effect (APE). The APE is far greater than the project site and extends for miles in all directions. A project of this scope will bring an unprecedented adverse element to the greater surrounding area resulting in unintended consequences for the entire community.

The APE includes Windsor and NE Santa Rosa, Mark West, Fulton, and Wikiup/Larkfield, the inflow of tens of thousands of visitors daily into area will increase rates of crime and traffic accidents in the surrounding areas. Consider police/fire statistics from casinos in Northern California that identify casino resorts in particular that are built in locations surrounded by long-established communities of residential neighborhoods, areas intended and zoned for residential/ agricultural use only and not commercial use.

**Decline in property values:**

The expected decline in property values is both during construction of the project, and in the long term. Homes and housing units impacted by the direct visibility of the large buildings, parking lots, and bright lights, and the flux of vehicles to/from the casino resort -plus the noise of the increased vehicular traffic and entertainment - will most likely experience a decline in property values and quality of life. The 24/7 presence will significantly decrease the desirability of buying into the area and lower current residents ability to rest at night and to use and enjoy their outdoor living spaces.

There are areas in Sonoma County more appropriate for a high volume 24/7 casino business. Please study alternative sites for this project as it is not an environmentally sound project for this location and threatens the well-being of thousands of members of the local community.

The proposed site would be better suited and welcomed as a residential development by the Koi Nation to serve its people with an

affordable residential community where all families would be able to thrive and continue to enjoy living in the area. \_

Thank you for your consideration.

Thanks

Marc Chandler

Dear Ms. Dutschke, and Mr. Broussard,

I am taking one more opportunity to address the Koi Nation proposal to build a casino in our residential neighborhood on East Shiloh Rd. Santa Rosa, CA

I have written several letters to Chad Broussard as well as contacted the Koi Nation representative to express my serious concerns. I also participated in the zoom meeting a couple months ago.

This 65 acres is located in the middle of a rural, residential, agricultural designated portion of Sonoma County. That in and of itself is reason to reject all the scenarios of this ill fitting project. I have asked that a representative of BIA come and see the site "chosen" by the Oklahoma gaming interests in order to assist the "90" Koi Nation members in forging a better life. It's inconceivable that anyone would find this site appropriate on a purely physical level let alone community level.

The Koi Nation certainly deserves redress for previous actions by others, but they are not from this area. They are Lake County based historically and there's lots of land there that won't disrupt quiet neighborhoods and native species. Wildfires and water also play a part in my serious concerns as well. I know you must know this recent history of evacuations and destruction from two wildfires over the past 4 years. My neighbors and I have private wells and are justifiably worried about a 700 deep well and the proposed sewage treatment plant. Too big a deal and risk so gambling can occur. And let me restate its the Oklahoma gaming powers that will reap the lions share of this project. What do they care about impact to our community?

Please let us address your agency and the Koi Nation members and their representatives in person. We would appreciate hearing how this site was chosen and thoughtful dialogue over why not Lake County. All I have heard is that the move to Sonoma County is a given but I haven't heard why. We already have two large casinos along the 101 corridor.

(Call me, I would love to show you the site and our perspective on the above. The video with Peter Coyote (who I admire) showing how great this will be is deceiving as to impact and scale. I hope you have seen the video by Our Community Matters).

Thank you for your time and consideration,

Debra Avanche

## HIDING A FIVE-STORY HOTEL IN A VINEYARD: Further evidence that the Koi have endeavored to deceive our neighborhood with misleading images of their proposed casino and resort.

April 8, 2024.

**SUMMARY.** The Koi have presented arguments for creating a gambling casino, event center, spa and hotel to host thousands of people, replacing a vineyard in our neighborhood inhabited by no one. In their EA, they attempt to convince our neighborhood that this development will have no significant impact on our environment, our lives, or our safety. The Koi's arguments in their EA are disingenuous and specious. Here I address the Koi's assertions in the EA about:

- the appearance of the planned development;
- the Koi's opaque process of assigning significance to impactful changes created by their project.

The Koi Nation has misrepresented the safety and benign nature of their planned project. They present voluminous "analyses" which give the false impression that they are seeking the truth about the impact of their casino. They have misrepresented the appearance of the development with deceptive photographs which attempt to hide the casino, resort, hotel, etc. in a vineyard. Conclusion: the Koi have produced an EA which gives the appearance diligent analysis, but is actually deception.

I strongly support the efforts of indigenous peoples over the world to assert their rights as individuals and groups. I believe that the United States created a shameful record of genocide, taking of indigenous lands, and destruction of the culture of the first citizens of America. Further, I believe that these people demonstrated a spiritual connection with the land of which they were the custodians. In contrast, I believe that they were confronted with white settlers supported by the United States Government who plundered indigenous lands by mining, logging, and extermination of wildlife. I believe that American indigenous peoples have suffered from systematic racism in the same way as

African Americans. And they have a right to expect support for their livelihood from the government of the United States.

Still, I am opposed to the Koi casino enterprise, which would ruin our peaceful residential neighborhood.

**THE KOI MISREPRESENT THE SIZE OF THE CASINO.** In Figure 1 above, the Koi's conception of what their proposed casino-resort-event center would look like is compared with an actual photograph of the site in which a scale model of the project (based on the site plan and description) is inserted. In the EA, the Koi present Figure 3-13.2 (their post-development illustration of the project), which is shown on the left. The right-hand image is a composite of a recent photograph, made with a 50 mm lens. A 50 mm lens is generally considered to capture a view equivalent to what the unaided eye sees. If one is familiar with the view of the site as one proceeds eastward on Shiloh, the right-hand image looks realistic. The left-hand image is strangely distorted (probably attributable to use of a wide-angle lens) so that everything recedes into the background to the extent that the Mayacamas Mountains are not visible. The distortion is enough that East Shiloh appears nearly parallel to Old Redwood Highway (ORH). (The streets actually intersect at a 60 degree angle.)

Figure 2 shows the image upon which the composite was constructed. Notice that is an accurate image, with respect to the land. The Mayacamas are clearly visible.

**Figure 2.** Normal, typical view from the corner of ORH and Shiloh East, looking eastward.

Figure 3 shows an early stage in the construction of a scale model of the project. It was built on the site plan furnished by the Koi in their EA (Figure 2.1-1)

**Figure 3.** Building the scale model on the site map with SolidWorks 3D CAD (computer assisted drafting / design) software.

In the following figure, the complete SolidWorks virtual solid model of the project is shown in Blender 2.90, which was used to create a photorealistic model of the project with realistic surface textures and colors. In Blender, a scene was created with the model and naturalistic lighting and shadow simulating the Sun and other light sources. Blender is very similar to Pixar, the software used to produce modern animated movies. SolidWorks is a typical 3D solid CAD program, which mechanical engineers and mechanical designers use for product design.

**Figure 4.** Photorealistic scene of the project created in Blender.

The construction and visualization of this project is well within the capability of an architect, or even an architectural drafter. I am surprised that the architects serving the Koi did not undertake such a project. As it is, it appears that the Koi are not interested in the truth; they have opted to deceive with manipulated photographs which deviate from the truth.

**THE KOI EMPLOY AN OPAQUE AND WORTHLESS PROCESS FOR ASSIGNING SIGNIFICANCE TO A RANGE OF IMPACTS CREATED BY THEIR PROPOSED PROJECT.** In Section 3.13.3 of the EA, impacts on visual appearance, quiet, and darkness are addressed. The EA concludes that “visual impacts . . . would be less than significant. Impacts are partially identified, but assignment of significance occurs by an unknown process. Thus, it has no value. It appears that the Koi’s judgement is essentially arbitrary. In an extreme case, the impact of the water treatment facility is deemed of no significance. Nowhere in their narrative do they seem to be aware that waste treatment plants which process sewage are well known for their emission of foul smells. I have visited several waste treatment plants around the Bar Area: they all stink! It is obvious why these plants are sited far from population centers, not in a residential neighborhood.

For a fair determination of the impact of this project, the Koi need to prepare a truthful EIS. I look forward to this.

Walter Bruszewski

**Subject:** [EXTERNAL] NOI Comments, KOI Nation Fee-Trust and Casino Project Attn: Amy Dutschke

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Dear Mr. Chad Broussard and Ms. Amy Dustschke,

I hope this letter finds you well. My name is Michael Higgins, and I am writing to you today to express my deep concerns about the proposed KOI Nation Casino project in Windsor, CA. Specifically, I wish to address the environmental, traffic, and wildfire risks associated with this development.

First and foremost, the construction and operation of a large-scale project such as the KOI Nation Casino inevitably pose significant environmental challenges. The disruption of natural habitats, increased traffic congestion, and potential pollution from the construction phase alone can have lasting effects on the delicate balance of our local ecosystem. As residents of the immediate area, we have a responsibility to protect and preserve our natural environment for current and future generations.

Additionally, the introduction of a major attraction like the casino will undoubtedly exacerbate existing traffic issues in the area. I understand that this will be 1.2 million square feet of buildings bringing 27,000 to 57,000 visitors per day. That effectively doubles or triples Windsor's current population of 25,271.

Windsor already faces congestion challenges, particularly during peak tourist seasons and events. The influx of visitors drawn to the casino will only further strain our roads and infrastructure, leading to increased traffic congestion, longer commute times, and heightened safety concerns for residents and visitors alike. All of this being proposed in residential neighborhoods.

Furthermore, Windsor and its surrounding areas are highly susceptible to wildfires, especially during the dry summer months. The construction and operation of the casino bring with them increased human activity and potential ignition sources, significantly elevating the risk of wildfires in our community. It is imperative that we take proactive measures to address these wildfire risks and ensure the safety and well-being of our residents.

Thank you for considering these critical issues.

Sincerely,

Michael and Kathleen Higgins

RE: Proposed Casino at 222 E.Shiloh Rd., Sonoma County, CA 95403

**NO CASINO HERE:** Robert N. Cipolla and Gail C. Cipolla, husband and wife, oppose the concept of creating a gambling casino, of any size, on the 68.6 acre property proposed by the Koi nation. We agree with the detailed 10 page assessment of Anne Gray, dated April 7, 2024, in its entirety. It is not necessary for us to repeat the specifics contained therein.

**SOLIDARITY WITH TRIBES:** Gail C. Cipolla is a member of the Yankton Sioux Tribe of South Dakota, and her mother grew up on the reservation. Gail and I are respectful of her ancestral history and particularly supportive of legitimate efforts of tribes to reclaim land taken from them by force, whether by military or legislative process. The purchase of this land, by the Koi nation, does not qualify as an effort of restoration.

**FIRE LOSS:** We are survivors of the October 2017 Tubbs Fire, where we lost the Larkfield home we now live in, as did 5,300 others in Sonoma and Napa counties at that time. I

would unlikely be able to write words which could come close to the experience of that disaster. Our home and community were obliterated then we experienced a grueling rebuilding process, which some have still not completed. All of the resources that were needed in the rebuilding effort were subject to the low supply and the high demand of that time, meaning cost and availability of materials and labor skyrocketed as insurance companies attempted to diminish claim amounts at the same time. Enough about that.

**FIRST EVACUATION:** On October 23, 2019, as we were about one month away from moving into our rebuilt home, the Kincade Fire started near Geyserville, 22 miles north of our rebuild project. Authorities evacuated 186,000 residents, including us from the Windsor CA home at which we were then living and our son, his wife, two children and their cat and dog. Gail and I drove to our son's north Windsor home, contrary to evacuation orders, to help them and escape together. Together we headed south to the expected safety of our newly constructed, solar powered, battery backed up home, which wouldn't be affected by the gas and electricity shut-offs that the evacuation and fire-fighting efforts required.

**TRAVELING DURING FIRE:** Normally, it takes us about 9 minutes to travel the six mile distance from our son's Windsor home to ours. That day it took us 90 minutes to drive down the Old Redwood Highway, past the proposed Koi Casino site on Shiloh Road, to our 250 Darbster Place address in Larkfield. There were no beds, no furniture, nor carpets or window coverings, but at least we felt safe to unload food, sleeping bags, the dog, cat and people to spend the night. The fire came within

a quarter mile of our son's Windsor home, causing smoke damage and considerable remediation efforts to remove the smokey smell, while our home was untouched.

**SECOND EVACUATION:** Even though our Larkfield home was not directly threatened, this time, we were ordered to evacuate from there, the same day we arrived and unloaded. Our home is near a major intersection of Mark West Springs Road and Old Redwood Highway, and next to Sutter Hospital, an essential community resource. At that location were placed fire trucks, tanker trucks, personnel carriers, police vehicles, semi-truck and trailers with bulldozers and other heavy equipment, as well as all the personnel needed to operate the equipment and staff the fire fighting crews.

**CONCLUSION:** From our experience, and those of the 186,000 other citizens whose homes were evacuated, as well as all those involved in the evacuations and fire fighting efforts, it is CHAOS! No one wants to do it again but evacuation will be required of those living in our location, in a future time, in a significantly more populated area than the historic fires we have already experienced. The location chosen to propose a casino which will make any future evacuation efforts significantly more difficult is not well considered. During the 2017 Tubbs Fire fighting efforts both Highway 101 and Old Redwood Highway were closed. If that happened again, how would you plan an evacuation?

Bob and Gail Cipolla  
250 Darbster Place

RE: NOI Comments, Koi Nation Fee-to-Trust & Casino Project

Dear Administrator,

I am writing to voice my strong opposition to the proposed casino from the Koi Nation off Shiloh Road in unincorporated Sonoma County adjacent to the Town of Windsor, California.

The Koi Tribe from Lake County (not Sonoma County) has purchased vineyard acreage adjacent to a series of single- family homes, parks, schools, a church, and other nearby residential neighborhoods. The proposal of a large casino complex including restaurants and a hotel will have a negative impact on our local environment adding traffic congestion, infrastructure strain, lack of emergency access especially during fires, disturbance of wildlife habitat, lack of water supply especially during drought conditions and much more.

While I understand that tribal land developments are not held to CEQA standards, the surrounding areas are. We have red tailed hawks, barn owls, foxes, coyotes, bobcats, mountain lions, deer, endangered wildflowers and salamanders and many more forms of wildlife. The building of the casino would significantly destroy their habitat and feeding grounds. The current land is a vineyard of which the wildlife can roam freely. There is also a regional park right across from the proposed development that is used by bike riders, hikers and horse back riders. The parking is already overfilled on the small street adjacent and across the street from the proposed casino.

Water is always a huge focus. During drought years our community has had to regulate use of water based on hours and days of the week. The casino leaders are proposing setting up their own wells and wastewater systems. This will affect the aquifers in the area and many of the residential homeowners that are on wells adjacent to the property. Their wells could go dry as a result of a well water system placed on the casino property.

Fire has been a huge issue since 2017. The lack of roadways to support evacuation or residential areas in a timely manner has been a major challenge taking up to 8 hours to evacuate only 15,000 people. The Kincaid Fire came down close to the proposed casino. Imagine trying to evacuate hotel and casino guests along with the residential neighbors before the fire reaches the property. We don't have the infrastructure to support this project including street structure and utilities, and first responder personnel.

Safety is a major concern. There are several elementary and two high schools within a seven mile area of the proposed casino. Human Trafficking, Drugs, and Sex crimes along with other crimes are known to increase near or at casinos, a rate of 6.7% higher than expected based on a study by Thompson, Gazel and Rickman (1996). Do you want to expose our youth to those possible crimes including underage drinking? On the northeast corner of Old Redwood Hwy and Shiloh Road there is Esposti Park. It is a local park for our youth and adult athletes to play teeball, baseball, soccer, and for families to host family parties. Many bicycle enthusiasts park their cars in the adjacent parking lot as a start off point for their

bike rides which usually last a full day as they tour the beautiful backroads. I am concerned for the safety of our town's children with a park so close to the adjacent proposed casino. This is a residential area. Not a commercial area.

Lastly, the stress that a casino brings to the mental wellness of people that are living in a quiet neighborhood must be considered. Mental health is very important and although not "environmental" in nature it is a condition that risks the well-being of an individual. This area is quiet, residential, with parks and trails and bike trails, soccer and baseball fields directly adjacent to a casino that will exude the opposite, a transient population seeking the solace of gambling, drinking, and entertainment.

For these environmental reasons I strongly oppose the development of the proposed casino. If the casino was directly adjacent to Highway 101 it would be in a more appropriate development area. The current property is again in a quiet, residential, non-commercial area and not environmentally sustainable. Thank you for your time and consideration.

Sincerely,  
Mary Euphrat

Kind regards,  
Paul and Stephanie Browning  
**One attachment** • Scanned by Gmail

Dear Chad Broussard, Environmental Protection Specialist, Amy Dutschke, Region Director of the Bureau of Indian Affairs and other BIA officials,

Topic: NOI Comments, Koi Nation Fee-to-Trust and Casino Project

I am once again writing in opposition to the Koi Nations attempt to build a casino at 222 East Shiloh Road in unincorporated Sonoma County, abutting the Town of Windsor and next to my current home of over 25 years. **I strongly support Option D, no project.**

My home sits directly adjacent to the proposed casino. As you can see by the pictures, this development will have a profound effect on my family's quality of life. The hotel portion of this project will look directly into the windows of our home. Based on the supplied information, the hotel portion of this project, will be roughly 85 feet from my home. The main entrance to the casino will be roughly 95 feet from my home as well. On the colored aerial map the blue dot is my home and the other picture looks out from my family room to where the hotel and casino will be.

In referring to the aerial photo above, the proposed casino will be constructed among family homes (yellow), churches (blue), parks (green), Esposti Park which hosts T-ball and Little League baseball games during the week and on weekends is highlighted in green across the street from the proposed casino and schools (orange/green). This would be the first full scale casino ever allowed to be built in the state of California that would be constructed among ***an already existing community***. There is no such precedence at this time.

The Environmental Assessment report is far from impartial and factual. I would go as far as to say it is purposely misleading and written with the explicit intent of falsifying information to gain approval of the Bureau of Indian Affairs. The contracted party was only looking out for the interests of the Koi Nation which I am sure is what they paid for.

There are so many false or fabricated points made in the Environmental Assessment, here are just a few as it is overwhelming to try and speak to each and every one of them:

**Noise:** the EA states that there will be limited if any increases in noise. How can this be? 222 East Shiloh Road is all vineyards with one residence. The only noticeable noise generated from this property is the occasional spraying in the spring and harvest in the fall, which this year lasted only one night. The proposed casino will employ over 1,000 people and will generate thousands of car trips per day which will extend to all hours of every night. This will result in an endless increase in noise at all hours. It will be impossible for us to keep our windows open, all night during the summer, this added noise that will be created by cars, buses and delivery trucks. From 9 PM to 6 AM there is virtually zero traffic on East Shiloh Rd., if built the traffic will be exponential at all hours of the day and night. The noise will be life changing for us. And to add to this, as I work from home 50% of the time, the noise generated during the construction phase would be intolerable.

**Traffic:** the same principles regarding noise will extend to traffic. The property currently generates almost zero traffic. The EA states it will only marginally increase, this is incredibly deceptive. For all intents and purposes, East Shiloh road only sees traffic from the residences in the Mayacama development and those visiting Shiloh Regional Park. With over 5,100 parking spaces for both cars and buses, as well as ongoing delivery trucks, the anticipated impact will be overwhelming. The stretch of Shiloh Road from Interstate 101 to the proposed casino entrance will be one of the heaviest travelled roads, Interstate or Highway in the entire county. Every casino patron, employee and vendor/supplier will have to pass by homes, churches and youth ball fields.

**Crime:** my neighbors and I have experienced zero crime over the last 25 years. The EA report suggests very little if any additional violent crime will be seen. I find this incredibly hard to believe. By putting a casino amongst neighborhoods, the inevitable crime that this type of establishment will draw will spill into our streets. Here is a list of just a few of the reported crimes generated by the Graton casino in Rohnert Park. Please keep in mind, there are no residential neighborhoods close to this property so at the very least, the communities were buffered, that will not be the case with the Koi's proposal. This is in addition to knowing there will be an increased likelihood of drunk driving taking place on the roads in our neighborhood.

- <https://www.kron4.com/news/bay-area/bus-driver-arrested-on-dui-charges-at-graton-casino/>
- Here is a posting from the Sonoma County Sheriff's office from just 2 weeks ago

**Wildfire Evacuation:** over the last 6 years we have lived through 2 devastating fires, Tubbs and Kincaid. Both of these fires required the surrounding communities to evacuate which caused gridlock and panic. In both instances, the fires burned down to and across Faught Rd. making it completely impassible, for the Tubbs fire south at Shiloh Rd. and the Kincaid fire north at Shiloh Rd. Please see the map below. If a mass evacuation of the community and casino were required, people exiting the casino and heading west would effectively create a roadblock while entering Shiloh Rd. while backing up traffic onto Faught Rd. and into the Mayacama development. This would have the potential of repeating what happened in Maui with gridlock resulting in people burning to death in their vehicles while trying to escape. The EA states that a potential evacuation would be handled by having an individual(s) direct traffic at the entrance of the casino at Shiloh Road. Based on what we experienced during past evacuations, there is nothing one, two or even three people could do to prevent a complete blockage of vehicles that could result in people attempting to flee on foot. The links below are to videos from the Tubbs fire, the last 20 seconds of the helicopter video is of Wikiup Dr. area less than 3/4 mile from the proposed casino site and then the second video is from Vista Grande Drive less than one mile from the proposed casino. A fire in this area could have catastrophic consequences. The EA's suggestion that a few casino employees could direct traffic to avoid gridlock in such a firestorm is ridiculous.

- <https://www.youtube.com/watch?v=zmAmxkTdElo>
- [https://www.youtube.com/watch?v=f2QXrR\\_zmvM](https://www.youtube.com/watch?v=f2QXrR_zmvM)

Here is an estimated amount of time it would take to evacuate the casino and the surrounding area taken directly from the EA. The Tubbs Fire, fueled by 65 mph winds traveled over 12 miles in less than 2 ½ hours. If a fire were to start closer to this area with similar conditions, the results would be catastrophic due to the roads being blocked by fleeing patrons and residents.

- At the signalized exit onto Old Redwood Highway, the exiting would be less efficient due to the signal itself and a higher proportion of other traffic using the signalized intersection. At a service rate of about 800 vehicles per hour, it would take about two hours and 45 minutes to handle all the traffic at this location.

**Property Values:** the EA did not use apples to apples examples of casino impacts on property values. In those examples only a few existing homes were already located near the preexisting tribal lands were used for comparative analysis. 99% of all homes were built after the casino was already in operation. Those examples do not even remotely come close representing established communities like those that surround the property at 222 East Shiloh Rd. How can anyone think a casino and what goes with it would not affect my property value vs. the existing vineyard? Additionally, there is no account given to the expenses current homeowners would incur if they made the decision that living next to a casino and the impacts brought by it would cost. After calculating in 6% realty fees, thousands of dollars in both inspection reports, appraisals and closing costs, the cost to relocate would be \$70,000 or more. This amount would be enough to prevent a family from being able to purchase a similar home in Windsor or the surrounding areas.

**Koi's claim that the property is part of their ancestral home range:** it is a well know fact that the Koi tribe does not call any part of Sonoma County home. Their ancestral home is in Lake County. This is proven by their August 2023 lawsuit against the City of Clearlake because a sports complex was going to be built on what they consider is a major cultural site next to the city. Their claim was also supported by a local Attorney General in their case. This is the Koi's third attempt to seek property outside of their indigenous lands. Please see the supporting information.

- <https://oag.ca.gov/news/press-releases/attorney-general-bonta-files-amicus-brief-supporting-koi-nation-lawsuit-against>
- <https://www.pressdemocrat.com/article/news/koi-nation-sues-city-of-clearlake-over-development-of-sports-complex/>
- The Koi Nation should be encouraged to seek a viable alternative in their true ancestral home range of Lake County

I would like to add a few additional items in relation to the Koi Nations proposed casino project.

- Over the last 2 years as I have conducted business travel attending meetings, seminars and tradeshow, several of these events have been hosted at tribal gaming facilities in California, Oregon and Washington. Given my personal situation I have paid close attention when attending these events to the surrounding areas where these gaming facilities have been located. I am specifically referring to The Ilani (Washington State), Spirit Mountain Casino (Oregon), Rolling Hills Casino and Resort) and Thunder Valley Casino (California). What is abundantly clear is that NOT one of these properties is amongst any type of residential development. There is zero residential on entrance or surrounding these facilities. By allowing this property to be taken into trust and thus allowing a casino to be built, it is setting a precedent of allowing large scale gaming facilities to be build in the middle of **preexisting** family neighborhoods.

Ilani:

Spirit Mountain Casino:

Rolling Hills Casino and Resort:

## Thunder Valley Casino:

- With spring, the youth baseball league's season has now started with games being played at Esposti Park (directly across the street from the proposed property, see my attached map, highlighted in green). Last weekend was the first round of T-ball games. I couldn't help but think of the dangers that this mass influx of traffic could have on 5-6 years old being directly in this vicinity, there were kids everywhere. Also, it would be naïve to believe that at least a few of these drivers will not be inebriated to at least certain extent.
- The previous Environmental Assessment reads like a paid advertisement in support of the Koi Nations attempts to push this project through. There are so many inaccuracies and borderline lies that only those who live in this area can recognize. When looking at the number of parking spaces, stated number of employees and anticipated customer visits, the claims of minimal traffic and noise impacts can only be determined as factually untrue. How can you increase traffic by 50 times or more and claim the additional noise will be minimal? Especially considering this will be operating 24/7. The light and noise created at night will be exponential to what it currently is, it is currently zero as it is a vineyard. I would hope that all decision makers would make a personal/physical visit to the location to truly recognize just how detrimental this development would mean to our community.
- Based on the fact that the Koi Nation's ancestral home is NOT in Sonoma County but in Lake County (they continue to litigate against the City of Clearlake because of development on what the Koi claim is one of their cultural sites) I do not support allowing them to take any Sonoma County land into trust. However, if acquiring property in Sonoma County was deemed acceptable (which it shouldn't be), there are other much more appropriate locations such as the former Oluf farm (40 acres) at the corner of Conde and west Shiloh Rd, the old residence and barn was recently bulldozed. It is light industrial/commercial with no residential in the immediate area with direct freeway access. See map:

- Wildfire safety issues. Given the congestion a facility of this type and size will cause. There is the real possibility of mass casualties in the event of another evacuation is needed. In October 2017, the Tubbs fire killed 22 individuals unable to evacuate quickly enough, one death being only ½ of a mile from the proposed property. Other similar events would include the Paradise fire with 85 deaths in 2019 and the Maui fire with 101 deaths just last year. Residents located directly east will be caught in a bottleneck.

It is very obvious that the Koi Nation directed the consulting firm that put the EA together to paint a picture favoring the construction of the casino and gloss over any negative effects. It is long, in some cases confusing and reads like a paid advertisement. There are too many false details to list in the EA report.

It is no accident that both United States Senators, both surrounding United States House of Representatives members, Sonoma County Board of Supervisors, Town of Windsor officials, historically based local Indian tribes and many others, have spoken out against the Koi Nations efforts, in addition to hundreds of community members. The only local supporter has been the Northern California Carpenters Union who obviously have entered into a lucrative agreement with the Koi Nation. The opposition has been broad and comprehensive.

For all of these reasons, I am asking you to decide option D, **NO Project.**

Thank you for your time and consideration,

Paul and Stephanie Browning

To whom it may concern,

We would like to voice our concerns regarding the proposed Koi Nation Casino. We live in the Oak Park neighborhood directly across from the proposed space. We are concerned with the noise, lights, traffic, and public safety. We have two elementary schools, two parks, 2 churches and residential homes directly surrounding this space and it is of grave concern that a casino would bring unwanted theft, property destruction and a multitude of other safety concerns for our children, young adults and elderly alike. We are also very concerned with the extra traffic and all the extra cars that will be traveling on an already well traveled road. We are in an area that doesn't need another casino, but aside from that in a space that is in a residential area.

We are overwhelmingly against this project moving forward.

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

To Whom it May Concern,

I would like to thank the BIA for the determination to require an Environmental Impact Statement to further analyze the effects of the proposed development of the Koi Nation Casino project.

As a resident of the Town of Windsor, I have many concerns related to the impacts on our town's "family-friendly" environment which prompted my decision to relocate to Windsor, California from Virginia four years ago.

This casino project, due to its size and location will have many significant impacts on the residents and visitors to our local community, and does not fit the General Plans, visions or land use plans of the town, or the county, because its location is directly adjacent to neighborhoods, shops and parks used by residents on a daily basis.

Traffic and mitigations: The casino project is not in the Town and no impact fees would be provided to the Town of Windsor. Given the size and scope of the proposed casino/hotel/entertainment facility, the mitigation actions for the casino project proposed on Shiloh Road and the interchange are inadequate to avoid significant negative impacts to the transportation network of the proposed casino and should be required to be mitigated by the developer of the project before the casino opens. In addition, **the traffic analysis should consider the impacts of large events in addition to typical daily operations and needed improvements should be built and paid for by the project developer.**

As previously pointed out by Town and County officials, the Project Site is currently developed with a vineyard and, in recent wildfire events, vineyard sites have served as buffers to developed urban areas and have been used as staging areas for firefighting activities. The Casino Project would replace a wildfire mitigating resource with a development of combustible materials (vehicles, structures, landscaping). Currently, some Windsor residents are being denied home and fire liability insurance because the insurance companies feel there are insufficient mitigations to protect from major fire events. **Removal of fire buffers to build large projects will only worsen the situation and increase the fire risk.**

The Town of Windsor, City of Santa Rosa, and the County of Sonoma have insufficient funds for housing, education and socioeconomic supports to accommodate such a project. Along with many environmental consideration, this is not a proper location for the Koi tribe to build a casino/hotel and entertainment facility.

Thank you for your consideration.

Amy Dutschke, Regional Director  
Bureau of Indian Affairs  
Pacific Regional Office  
2800 Cottage Way  
Sacramento, CA 95825

c/o Chad Broussard  
Environmental Protection Specialist  
Bureau of Indian Affairs, Pacific Region  
Dear Director Dutschke,

I am writing as a frequent visitor to the Windsor and Santa Rosa area. I have a dear older friend and mentor who lives in a home off Pleasant and Faught Road at the intersection of Windsor and Healdsburg. I have assisted her when she has had to evacuate from fires in Sonoma County (2017 and 2019) and in 2019, she almost lost her home, and her cats.

I am very concerned about the proposed casino on a number of levels (gambling/excessive alcohol/cigarette smoking) but I am particularly concerned about the adverse environmental dangers posed by the proposed casino. I am also concerned about the safety of the people who live in this lovely area, and the visitors who come to Sonoma County to safely enjoy the outdoors, the food, and the farms.

This mega casino (more than double the size of Graton) will have a major carbon footprint at a time when we are concerned about climate change, as evidenced by the hotter summers and the frequency of fires in this area.

The proposed footprint for the casino will overwhelm a lovely rural/residential community. The estimated ten million annual visitors and over a thousand employees will generate car-induced pollution and congestion. I have observed Old Redwood highway in rain and sun, and it is not equipped for heavy use. Neither is Faught Road, which is winding and two small lanes, one going north and one going south. There are bicyclists, agriculture, horse trailers, and hikers using that road, but it is not designed for major traffic.

The casino will require large parking lots and those will create heat island for neighborhood across Shilo and increase temperatures in the area. Right now, the parks, trees, and fields help absorb heat.

This is a quiet residential and rural area, not designed for a around-the-clock casino. The power requirements for operation will disrupt the residents, and will also be unreliable given the frequency of wind-generated red-flag warnings and outages. The around-the-clock lighting will also disrupt the night sky and affect wildlife navigation systems necessary for protection.

The fire danger should not be underestimated. This is concern is based on actual experiences in this area of Sonoma County. Even in years when there is average rain (2023) by late summer, grasses and brush is dry, winds are increased, and fire is a real threat. There will be extreme crowding on the small and limited routes in the event of a fire, and in an evacuation, there is substantial risk to visitors and residents alike.

This Spa/Casino with 6 restaurants will compound water shortage and if/when they drill more wells it will jeopardize the water table. This area continues to try to balance water resources and conservation, and this casino will throw that balance way off.

This proposed casino will not benefit the community and will stress a finely balanced and delicate part of northern California. The environmental impacts of this proposal endangers the health and well-being of residents and places them at risk from environmental hazards. It is not worth the risk.

Mary Foley, RN

RE: NOI Comments KOI Nation Fee-Trust and Casino Project: Request option "no action"

My name is Phil Essner and I live in the Wikiup neighborhood of unincorporated Sonoma County approximately 4 miles from the proposed Casino Project. I manage property and own a Tree Service and have lived here with my family for 25 years. I work all over Sonoma County.

Over the past 10 years, I have witnessed traffic in both directions on HWY 101 gridlock especially during rush hour and despite the carpool lanes. The last thing we need is to add an estimated 4,000+/day cars onto Old Redwood Highway and Highway 101. This is especially true should there be a need to evacuate any part of the county. My family has been evacuated twice in the last 7 years. I know many families who lost their homes in the recent fires and some who lost loved ones.

Sonoma County continues to suffer from drought as climate change causes hotter and hotter temperatures during the summer months. High winds during these heat waves make stopping fires almost impossible. Fire crews from all over California have come to our aid despite that thousands of people have lost their homes and many their lives.

Water is very precious, much of my work is helping clients both fireproof their homes and help make their landscape drought resistant. The projected water use of the casino 400,000 gallons/day (with 179,000 being waste water treated on site) will jeopardize our aquifer.

This is not the right location for a casino of any size particularly one of over a million square feet with a hotel, spa and entertainment venue with a projected visitor attendance plus employees requiring 5,000 parking spaces. The proposed area is between three neighborhoods: directly across Shiloh road to the north is the Oak Park Neighborhood within the Windsor town limit lines, to the South 1.4 miles away is the Wikiup neighborhood where I live and across to the south is a senior trailer park neighborhood. Adding thousands of people and traffic to our quiet calm neighborhoods some of whom might toss a cigarette out the window is irresponsible. The traffic, the noise, the light, and the questionable activities that casinos bring are not part of what characterizes our quiet safe community.

I urge the BIA to take NO ACTION and not move forward with a casino or facility of any type. The rural fire break between Wikiup and the town of Windsor adjacent to a Regional park is part of our community for walkers, bicyclists, and hikers. Don't replace that with yet another casino. Don't jeopardize our fire safety.

**Subject:** [EXTERNAL] Proposed Koi Nation Shiloh Casino

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

I have many questions and need more information about this casino.

#There are currently two casino's within 30 minutes of each other currently on the 101 corridor

#Is the proposed site federal land or a private purchase (I recognize the land was taken from the Koi nation)

#The Koi nation has joined with an outside investment group and what are the details and expected income and costs for this venture

#Wouldn't purchasing land closer to the original Koi land make more sense or is the 101 corridor the real draw

#I noticed that River Rock and Graton tried to choose an more industrial and River Rock more rural location, the proposed site is right in between two residential communities

#Two major fires since 2017 affected Shiloh area and I personally sat for 3 hours to go two miles in 2017 trying to evacuate from the fire. What are the fire mitigation and traffic control plans if the freeway is shut down.

#Insurance companies are canceling homeowner policies until some more negotiation is done with the major companies

#Casino's bring in potential tax revenue but what of the liability for more security, police, and infrastructure

# Finally what happens to Shiloh regional park down the road. I would like to protect these open site area.

# What about water and pollution for such a project?

These are just a few of the concerns but the main concern I have is what a casino brings in good and bad and is that what the people currently living in this area want? Just because you can build a Casino what determines that you should. Can a local ballot measure be possible to find out the thoughts and feelings of the community it affects most. The Koi nation has been wronged in the removal of their land, but I have always been taught two wrongs do not make it right.

Thank you for your time and consideration.  
Scott

Mr. Chad Broussard  
Bureau of Indian Affairs,  
Pacific Region 2800 Cottage Way  
Sacramento, CA 95825

RE: EIS for the proposed KOI Nation Casino and Resort Project on Shiloh Rd. Windsor

My wife and I are longtime residents of the Town of Windsor, CA and we have lived in our home at 6267 Lockwood Dr. Windsor in the Oak Creek subdivision since January 1984. Our home is approximately 2,584 feet (.49 miles) from the proposed Koi Nation Casino project on Shiloh Road so we have a vested interest in the environmental impacts of this venture. I'm providing the following comments regarding the proposed EIS to be performed for the above project.

In my profession as a senior commercial credit office at a major national commercial bank, I've had the opportunity to review many environmental impact reports and traffic studies over the years and I find the following areas need to be addressed:

- A. The high risk of harm or death to individuals in the event of a fire evacuation because of traffic congestion.
- B. What are the proposed mitigations to this risk because of the increased traffic the casino will create?
- C. The safety impacts to the many bicyclists who use Shiloh Road and Old Redwood Hwy as these are the major North-South and East-West arteries utilized by the many bicyclists touring/riding in this section of Sonoma County
- D. Address the health and wellbeing impacts to individuals from noise, air pollution and light pollution that will be generated at and around the casino.
- E. A detailed study of the Endangered California Tiger Salamander needs to be performed for the proposed parcel.

**Traffic Study:**

- In regards to the traffic study, a tribal casino Sky River Casino Elk Grove, CA was utilized as a comparable in the Environmental Assessment. Sonoma

County is a major tourist destination as compared to Elk Grove and in all likelihood more people would be drawn to the Koi Nation Casino as a result of the desirable tourist opportunity Sonoma County affords which could lead to more customer visits than as indicated in the traffic studies. The comparable in the assessment doesn't address that there are numerous mentions by surrounding residents of noise impacts and lack of parking in the surrounding area caused by the casino.

The traffic impacts between the Sky River Casino location and the Shiloh Road Casino location are night and day and this needs to be addressed fully. Access to the Sky River Casino in Elk Grove is via a 6 lane divided thoroughfare/hwy with median divider and turn lanes. Access to the proposed Shiloh Road Casino is via a two lane (one in each direction) East-West non divided road known as Shiloh Road or by North-South road known as Old Redwood Hwy which is also a 2 lane "one lane in each direction" road also. The town of Windsor has no plans to widen Shiloh Road until at least 2040 and in order to do so they would need to impose eminent domain on many properties on Shiloh Road just to increase the road by 2 lanes. Similar action would be need to be taken to increase the size of Old Redwood Hwy. It should be noted that every major/large Indian Casino in the Northern California sector has access to their casinos with 4 to 6 lane roadways, whereas the Shiloh Road Casino would be only 2 lanes "one in each direction". Why is it that all of these large casinos have great access to their casinos when they are in remote areas? Because traffic to the casinos demands it. No stop light control would mitigate this negative impact and major traffic jams would be inevitable.

It should be noted that the Elk Grove Casino is the only major newly constructed comparable sized casino of the 42 operating Indian casinos in the Northern California sector that is near residential homes. These homes are separated by a major 6 lane thoroughfare and vacant land. The nearby homes appeared to have been recently constructed during or post construction of the casino so those homeowners chose to move there knowing a casino was there or was to be constructed there. This is not the same situation as the Shiloh Road proposed casino where nearby "across the street" homes have existed years before. Every other major Northern California casino plus the many smaller casinos are all located in remote areas and a remote distance from any residential dwellings except for a couple small casinos with tribal homes nearby but not directly across from their casino. Note: San Pablo Lytton Casino is not referenced as a casino built next to homes because the casino building's footprint was previously there prior to it becoming a casino and its surrounding homes were already impacted by the previous on Indian use.

- The traffic study took place during the wet month of January 2022 when you would historically find less cars and bicycles on the road and that study doesn't take into account the additional traffic count that will be created by the nearly completed 134 unit apartment complex at the corner of Shiloh Rd and Old Redwood Hwy opening later in 2024 and the under-construction of the

174 unit apartment complex at the corner of Shiloh Rd and Hembre Lane opening in 2025. **See exhibit #1 attached.** These two new projects alone will create an additional 7 household trips per day, 0.7 per peak hour per ITE Trip Generation reports for apartments, condos & townhouses. The traffic on Shiloh Rd, which would be the main access point to the proposed casino, is already backed up on many weekdays, late mornings to late afternoons from Old Redwood Hwy to Hwy 101 on-ramps on Shiloh Rd in both directions. When these two new apartment complexes are fully occupied, they will both negatively add to the traffic impacts to Old Redwood Hwy and Shiloh Rd with their primary ingress and egress points from the apartment complexes coming onto Shiloh Rd. Adding 1,104 daily trips from these two apartment complexes where their access and egress to these complexes comes directly onto Shiloh Road, will create major traffic jams and backups and potentially backups on the freeway off-ramp on Hwy 101 making for an extremely dangerous situation for drivers. The traffic study should measure the cars coming off of the freeway including the number of cars coming from the new apartments and the proposed casino.

- Since the Town of Windsor has no immediate plans to widen Shiloh Rd from its current configuration, Shiloh Rd would not be capable of handling the added vehicle count in a safe manner coming from the two new apartment complexes and the proposed casino. Adding additional stop lights or adjusting the timing on the stoplights on Shiloh Road in this very short stretch of roadway from Hwy 101 to Old Redwood Hwy will only compound the traffic backup issue on Shiloh Rd for those trying to enter onto Shiloh Road or for those driving on Shiloh Rd. In any traffic study, vehicle counts would need to be taken on Old Redwood Hwy also, near the intersection of Old Redwood Hwy and Shiloh Road to obtain a good understanding of the traffic patterns on both roads and the potential impacts. A traffic study of at least one week in duration should be required to obtain a good understanding of our traffic patterns on both roads.

#### **Safety Issues to Bicyclists:**

- Shiloh Road is also one of the major bicycle routes used by all of the road cyclists who ride and tour around Sonoma County and I did not see any mention of the impacts to bicycle riders. On any given day in the Spring, Summer and Fall months and even on nice days in the winter, there are a substantial number of road bike cyclists who utilize Shiloh Rd as a means to get from the west side of Hwy 101 to the east side of Hwy 101. Most cyclists ride the back roads of West Sonoma County and East Sonoma County because they offer some of the most dynamic and scenic riding opportunities in the area and Shiloh Rd is the main artery for this crossing. With the addition of the two new apartment complexes let alone the addition of the proposed casino, Shiloh Rd will become very dangerous for bicycle riders with vehicles trying to exit and enter the two new apartment complexes. With the current emphasis to put more people on bicycles and get them out of their automobiles, bicycling impacts need to be taken seriously into consideration

with any approval for a casino. The traffic study needs to address the safety impacts to bicyclists on Shiloh Road and on Old Redwood Hwy.

**Fire Evacuation and safety Impacts:**

- All of the above traffic impacts lead to my biggest concern and that is evacuation in the **event of major fires**. Since 2017, we've had to evacuate our home twice "2017 & 2019" and been under evacuation orders 4 separate times from different fires. I've attached **exhibit 2** for the two fires we had to evacuate to show how close the fires came and the direction of the fires. This exhibit also shows the number of homes, limited road and evacuation points for over 6000 plus homes to be evacuated on this side of Windsor. With global warming and drought conditions California is experiencing on a more regular basis, this concern cannot be overlooked and brushed under the carpet like it was in the report.

You would have to have lived here and experience being evacuated to understand my concern. Cars were backed up to a crawl in both directions on Old Redwood Hwy and Shiloh Road trying to get out of the area and this happened without the added pressure of 134 new apartment units at the corner of Shiloh Rd and Old Redwood Hwy and 174 apartment units at the corner of Shiloh Rd and Hembre Lane. If and when another fire occurs, it will come from the direction of the hills behind us and behind the proposed casino and the primary way out to safety would be on Shiloh Rd. driving to the west towards Hwy 101.

To burden our area with the expected 11,213 daily trips to the proposed casino per the EA report would at least be equal to a minimum of 1,000 additional cars trying to evacuate onto Shiloh Rd and Old Redwood Hwy which would cause a total disaster for these two small 2 lane roadways. We don't want our area to be another Paradise, California or Santa Rosa, CA where many people died because they couldn't get out of the area fast enough because of the fast-moving fires. If the proposed casino is approved and another fire like the ones we've had in the past in Windsor area occur again, this expected disaster will lay at the hands of the Bureau of Indian Affairs for approving such a project. The EIS needs to address fully the impact of fire and evacuation of residents without loss of life

**Noise, Light and Air Pollution:**

I could go on and on why it doesn't make environment sense to build a casino in the proposed area especially when it comes to noise, light and air pollution. Just go park near the front or rear entrance to the Graton Casino in Rohnert for 24 hours and see if that is the type of noise or night light exposure you would want 24/7 as a homeowner living near or right across the street from this proposed casino. I live ½ mile from Home Depot/Walmart shopping area and on most nights, I can hear the noise of trucks' "beep beep" from backing up and a casino would just add to this noise and more so because of the 24/7 nature of casino operations. It's a known fact the Indian Casinos daily bus in many customers to earn revenue and these busses run night and day. Nobody in their right mind would ask to live next the noise, vibration,

light and air pollution this casino will create so why should we be subject to these impacts?

There's no mention of the health effects coming from automobile, diesel bus and commercial trucks' road noise. There are many major medical health studies that have come out over past few years that indicate the road noise over 45 decibels from motor vehicles increase the likelihood of stroke by 27% for people over 65 years old who live near noisy roadways and increase risk of ischemic heart disease with daytime noise levels of 55-60 decibels and above. The existing traffic study indicates common traffic noise levels of 78db which is well above these health effect levels. Epidemiological studies have shown that traffic noise increases the frequency of arterial diseases, hypertension and vascular dysfunctions in people. Why should the folks living near the proposed casino be subjected to this noise 24/7? The EIS needs to address these impacts to nearby residents' health.

Since the Casino will have diesel busses and diesel trucks coming to the area 24/7 and right near residential homes on both Shiloh Road and Old Redwood Hwy, the diesel and gasoline particulate matter needs to be measured and calculated for the exposure to these residents. Residents exposed to diesel exhaust on a continued basis face the risk of health effects ranging from irritation of the eyes and nose, headaches and nausea, to respiratory disease and lung cancer per California OEHHA. The EIS should address these environmental impacts to a person's health.

Light pollution from the casino is another area that needs to be addressed by the EIS. If you've gone to any major Indian casino, they put out a substantial amount of light pollution to the surrounding area. Research suggests that artificial light at night can negatively affect human health, increasing risks for obesity, depression, sleep disorders, diabetes, breast cancer and more per the American Medical Association. The EIS needs to address this environmental impact regarding how the massive lights coming from this proposed casino will impact the health of the residential neighbors and the abundant wildlife in this area.

#### **California Tiger Salamander Endangered Species:**

The California Tiger Salamander is listed as an endangered species on the EPA's endangered species list. **"See exhibit # 3"**. The subject casino parcel lies in the potential range of the Salamander's living territory per the US Department of Interior Fish and Wildlife Service. **"See exhibit #4"**. The California Tiger Salamanders potentially live in this area because the subject parcel has seasonal vernal pools and an area that typically floods next to Old Redwood Hwy coming from the seasonal creek located on the property. These particular salamanders are typically found in the winter months when they come above ground to mate. They actually have been found in nearby residential swimming pools following winter storms so we know they live in this area. The construction of the casino and resort would pave over a substantial portion of the subject property which in all likelihood would destroy the endangered California Tiger Salamander's habitat. The EIS needs to include a winter study of the property to

determine the extent of endangered California Tiger Salamander habitat in the subject area.

I'm not opposed to Native Americans having the ability to be self-supporting but there are numerous other locations that could have been chosen in and around their home territory of Clear Lake, CA. There is plenty of space in Lake County or more remote areas of Sonoma County where you won't be putting the neighboring community at risk, creating major traffic and pollution impacts that would greatly affect those of us living in this community and destroy an endangered species habitat.

# U.S. Environmental Protection Agency *Endangered Species Facts*

## California Tiger Salamander

*Ambystoma californiense*

### Description and Ecology

**Status** Santa Barbara Distinct Population Segment (DPS), Threatened, listed January 19, 2000. Sonoma DPS, Endangered, listed July 22, 2002. Central California DPS, Threatened, listed August 4, 2004.

**Critical Habitat** Designated for Santa Barbara DPS 2004, Sonoma DPS 2005, and Central California DPS 2005.

**Appearance** The California tiger salamander is now considered to be a distinct species within the more widespread *Ambystoma tigrinum* complex. Like other members of the complex it is a fairly large and stocky salamander. Adult males are about 8.0 inches in length, females are about 6.8 inches in length, and snout-vent length for both is about 3.6 inches. The salamander's head is large and rounded and its wide mouth appears to smile. Small eyes protrude from the head; its dark irises appear large. All California tiger salamanders have some amount of dots or bars in pale yellow or white against the black background of its back, sides, legs and tail. Their bellies may be white, pale yellow, or a variegated pattern of white, pale yellow and black.

**Range** The range of the California tiger salamander is limited to the grasslands and foothills (to elevations of 1,500 feet) of central California and does not overlap the range of any other species of tiger salamander. Along the coast ranges, it occurs in southern San Mateo County south to central San Luis Obispo, and also in the vicinity of northwestern Santa Barbara County. The Santa Barbara population is considered a separate DPS and is "endangered." The population in Sonoma County is also considered a separate DPS and is "endangered." That these two populations have been classified as separate DPSs means that there has been little genetic exchange with the Central California DPS for some time. In the Central Valley and the surrounding Sierra Nevada foothills the California tiger salamander occurs from northern Yolo County southward to northwestern Kern County and northern Tulare County.

Critical habitat has been designated in Yolo, Solano,

*California tiger salamander from Alameda County*  
© Gary Nafis, californiantigers.com

The California tiger salamander is both an endangered species and a threatened species.

Endangered species are plants and animals that are in immediate danger of becoming extinct.

Threatened species are plants and animals whose population numbers are so low that they may become endangered in the future.

The U.S. Environmental Protection Agency's (EPA) Endangered Species Protection Program (ESPP) will help ensure that pesticide use does not jeopardize the survival of listed species.

Sacramento, San Joaquin, Amador, Calaveras, Stanislaus, Merced, Madera, Alameda, Fresno, Tulare, Santa Clara, San Benito, Monterey, Kern and San Luis Obispo counties.

**Habitat** Salamanders of the genus *Ambystoma* are referred to as mole salamanders because of their use of burrows for hibernation and shelter or, as in the case of the California tiger salamander, aestivation and shelter during the warm, dry months of summer and autumn. Because California tiger salamanders dig poorly, the burrows of small mammals are essential. Their dependence upon the upland burrows of California ground squirrels and Botta's pocket gopher is called a commensal relationship: it neither helps nor harms the burrowing mammals, but is of great benefit to the salamanders. Because the ground squirrel and pocket gopher tunnels collapse within 18 months of abandonment, the ongoing co-location with these animals is critical for the survival of California tiger salamanders that spend the majority of their life in upland habitat. This habitat is usually grassland or oak savannah, and sometimes oak woodland.

California tiger salamanders exhibit a biphasic life cycle and as a result require two distinct habitats. At the onset of the winter rains, these salamanders will emerge from their burrows to feed and migrate as far as one mile to their wetland breeding ponds. These are vernal pools or seasonal ponds within the grasslands or oak savannah, or even stock ponds that mimic seasonal ponds. In years of "normal" amounts of rainfall these ponds will retain water long enough for salamanders to complete their larval stage and metamorphose, but not long enough, as in the case of permanent ponds, to be habitable by major predators such as fish and bullfrogs. Within that range of water retention, larvae develop faster in smaller, more rapidly drying ponds. However, the longer larvae remain in the pond, the larger they will be and the more likely they are to survive and reproduce. It is estimated that during the life of an average female California tiger salamander, just 11 of her offspring will reach metamorphosis. Other estimates further suggest that

# California Tiger Salamander

only 5 percent of juveniles survive to become breeding adults.

Adult California tiger salamanders have been found as far as 1.3 miles from their breeding pond; most remain closer. One study located 95 percent of the salamanders within 2,100 feet of their breeding pond in Solano County.

**Biology and Behavior** Following metamorphosis in late spring or early summer, juvenile salamanders migrate into the uplands and settle into animal burrows. Like adults they will leave their burrows to feed on insects and worms during nights of high humidity, and return to the burrow before morning. Eventually, they will aestivate there until the onset of the next rainy season.

It will take two or more (as much as 4 to 6) years for California tiger salamander larvae to reach maturity. Like other adults, they will then leave their burrows as the rainy season begins and migrate to the breeding pond, most often their natal pond. Males will go first and stay longest. Females will leave the pond shortly after laying their eggs. They attach the eggs singly, or in groups of two or four, to twigs, grass and plant stems, boards, rocks and debris. In 10 to 14 days the eggs hatch.

Salamander larvae look very little like the adults. They are yellowish-gray with a broad dorsal fin extending well onto the back. The head is large and broad with feathery gills on each side. They are among the top predators of the seasonal pond system. During the first six weeks they eat zooplankton, small crustaceans and aquatic insects and then switch to larger prey such as the small tadpoles of Pacific treefrogs and California red-legged frogs. They will remain in the pond for 3-6 months depending on the season. In seasons of drought many of the ponds may not be able to retain larvae fully to a critical body size that would enable metamorphosis. In extreme droughts, a seasonal pond that fails to fill means there will be no breeding season.

Bureau of Indian Affairs

Re: Shiloh Resort and Casino

Dear Mr. Broussard,

I have nothing against Native Americans and their search for economic development. I have Cherokee blood – my great grandmother collected checks from Standard Oil for reparations for the displacement of native peoples in Oklahoma.

I do object to your proposal to develop subject property. The site is adjacent to residential neighborhoods, which include children, and in close proximity to a well frequented regional park, neither of which have anything in common with a casino use. I reside approximately 1.5 miles south of the backside of your site and most days walk the designated “Scenic Corridor” of Faught Road where there are other walkers, joggers, and cyclists on a consistent basis. The sunset view from Faught Road is one of the most beautiful in the County of Sonoma.

I always understood that the Native American held a strong philosophy of “stewardship of the land.” If this is true, could you not uphold these values now?

Please do not destroy our local beauty.

Respectfully,

Lori Barber

**Subject:** [EXTERNAL] NOI Comments, Koi Nation Fee-To-Trust and Casino Project

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Dear Mr. Broussard,

I am writing to provide objection to the proposed Koi Nation Shiloh Resort and Casino Project.

If this project goes forward, it will bring tens of thousands of visitors to the area daily, resulting in a significant increase in traffic congestion, noise, and air pollution, artificial light to the surrounding area threatening the natural environment of migratory birds. The proposed project is surrounded by residential and agricultural sections with a community park directly across Shiloh Road, and an elementary school a mile away. The size of the proposed project at this location will adversely impact the landscape, residential life, and community activities of the whole surrounding area. It will overwhelm the resources of the public, including the diminishing residential water supply, road maintenance, emergency/wildfire evacuation routes and resources for fighting fires and managing crime.

In addition to greenhouse gas pollution, please study the possibility of local air pollution and public health impacts from increased vehicle traffic on neighborhood roads and highways, as well as the impacts from idling vehicles, including construction, delivery, and passenger vehicles. The EPA has found that people who live, work, or attend school near major roads appear to have an increased incidence and severity of health problems associated with air pollution exposures related to roadway traffic. It is likely that a project of this size will have a measurable impact on air pollution in nearby neighborhoods. Please assess the possibility that there will be a public health impact due to an increase in particulate matter, air toxics, and NOx, as well as any other foreseeable air pollutant.

California is in the midst of a 1200-year drought. Sonoma County is under mandatory water use restriction and the reality of this worsening with global warming is inevitable. Please consider what the water demands, both now and in the future, would be for a casino and resort of this size vs. a residential development on the same site. The proposed project will decimate the local

water table, heavily impacting local water resources for the surrounding community. The community cannot withstand the loss of water supply caused by this project.

This property, and the whole surrounding area is subject to intense and fast-moving wildfires. Not only would visitors to a casino resort be at risk, but the whole community would also be threatened by having the designated evacuation routes overwhelmed in gridlock, with emergency vehicles unable to operate. All roads leading to and from the designated property are only two lanes. For residents in the immediate area and the hills above, Shiloh Road is the main, and in some cases, the only escape route out. This project in this location threatens the community with a high potential to greatly contribute to more loss of life and homes.

Please consider how many thousands of families and individuals live in the actual Area of Potential Effect (APE). The APE is far greater than the project site and extends for miles in all directions. A project of this scope will bring an unprecedented adverse element to the greater surrounding area resulting in unintended consequences for the entire community. The APE includes Windsor and NE Santa Rosa, Mark West, Fulton, and Wikiup/Larkfield. The inflow of tens of thousands of visitors daily will increase rates of crime and traffic accidents in the surrounding areas. Consider police/fire statistics from casinos in Northern California that identify casino resorts in particular that are built in locations surrounded by long-established communities of residential neighborhoods, areas intended and zoned for residential/ agricultural use only and not commercial use.

The expected decline in property values is both during construction of the project, and in the long term. Homes and housing units impacted by the direct visibility of the large buildings, parking lots, bright lights, and the increase in traffic to/from the casino resort, plus the noise of the entertainment will most likely experience a decline in property values and quality of life. The 24/7 presence will significantly decrease the desirability of buying into the area and lower current residents ability to rest at night and to use and enjoy their outdoor living spaces.

There are areas in Sonoma County more appropriate for a high volume 24/7 casino business. Please study alternative sites for this project as it is not an environmentally sound project for this location and threatens the well-being of thousands of members of the local community. The proposed site would be better suited and welcomed as a residential development by the Koi Nation to serve its people with an affordable residential community where all families would be able to thrive and continue to enjoy living in the area.

Thank you for your consideration.

Dawn Chandler

No Casino!

Bad location period.

Reasons:

1. Impact to already crowded hospitals and shortage of emergency personnel and ambulances
2. Traffic in area already congested without a casino and will get worse once apartment complex opens up on corner of Shiloh and old red hwy
3. Will increase crime and DUI drivers
4. Roads gridlocked during Last evacuations for fires were dangerous. People will lose lives in the event of another major emergency.
5. Wells in danger of drying up for some residents in the area

Koi Nation fee to trust and casino project  
April 8, 2024

I am writing again to express my strict opposition to the proposed casino/land use by the Koi tribe on East Shiloh Road. The previous EA that was performed left me in shock and with one main thought...There is NO WAY that EA was done with boots on the ground. All those pages and no real life assessments were made nor were there accurate statements of real impacts to this area, nature, wildlife, the people and the neighborhoods.

I would like to focus on that human aspect in the immediate proximity of this proposed casino. There is a Mark West School District bus that goes through my neighborhood twice a day, every single weekday during the nine month school year. It enters from Shiloh Road with a left turn on Gridley Drive, makes a right on Chris Street, a right on Mathilda Drive, a right on Lea Street, a left back on Gridley Drive and finally back out to Shiloh Road. I see it on my driveway camera every time that it passes by. This is a grammar school bus! No place for a casino of any size.

Esposti Park is located at the corner of Shiloh Road and Old Redwood Hwy. It is directly across from the proposed casino site. This park is used daily by the community along with baseball, softball and soccer leagues. No place for a casino of any size.

There are two community churches within sight of this proposed casino. One of these churches is across the street from the proposed casino and acts as a food distribution center for people in need. This is run by The Redwood Empire Food Bank. No place for a casino of any size.

Fire danger and evacuation. No assessment would be complete without going door to door and talking with the real people who went through real Hell being evacuated and fearing for their safety while sitting in traffic trying to get to highway 101. The area filling with wind and smoke along with the flow of fire over the Shiloh Ridge is something that this area will never forget. The Koi's response to this is that their employees will stay back in a fire emergency to help with traffic...Pure nonsense and laughable. Except for the fact that people will likely die in their cars. Lahaina, Hawaii. Casino employees are not first responders. Even if they did stay, they couldn't do a single thing about the gridlocked roads. During the Kincaid fire, my daughter left our house on Lea Street and

it took her 20 minutes to go one mile to reach a gridlocked Hwy 101. NO PLACE FOR A CASINO OF ANY SIZE!

Speaking of crowded roads, the area of Shiloh Road and the corner of Shiloh Road and Old Redwood Hwy are already being developed with hundreds of apartments and retail shops. This will increase traffic immensely. These two developments that are on the way to completion will stress the infrastructure even if any widening of roads is proposed/completed. No place for a casino of any size.

I really could go on and on stating facts and real life situations making this proposed land use a disaster that will happen. The ONLY option for this proposed land use is the "no action alternative." That is, the land NOT put into trust for the Koi Nation or any entity looking to put a large establishment there. No Action Alternative is the only way, as anything less will lead to annual applications to build that giant \$\$\$ casino.

This is no place for a casino of any size...Ever.

Signed,  
Cliff Whittemore

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Dear Mr. Broussard,

I would like to go on record as being in complete opposition to the Koi Nation Casino Project referenced above. I live in the immediate vicinity of this proposed project, and am convinced that it would be a disaster for the local neighborhoods, as well as for the county at large. Among the many negative impacts of this project would be:

1. Destruction of the beauty and peace of the pastoral natural environment which drew people to live here.
2. A huge drain on water, power, and other resources and utilities, of which the area is already in short supply. (PG&E is currently having great difficulty providing power for construction projects many times smaller than this which have already been approved.)
3. Air quality impact, along with noise, night light, and a host of other environmental impacts.
4. Tremendous volume of added stress on transportation infrastructure, with thousands and thousands of additional cars and trucks on the few available roads.

There are many more specifics which I could outline here, but suffice it to say for the moment that this proposed project is a wholly inappropriate use for this land. Our area was Ground Zero in Santa Rosa for the 2017 catastrophic Tubbs Fire, and we are not yet fully rebuilt all these years later. The last thing we need or want as we strive to pull our neighborhoods together is the spectre of a huge casino and entertainment complex rising here from the ashes.

Regards,  
Mike Landon

Attention: Chad Broussard

Regarding: NOI Comments, Koi Nation Fee-to-Trust and Casino Project

From: Nina Cote', 5828 Mathilde Drive, Windsor CA 95492

Our community is appreciative that the BIA has decided to perform an Environmental Impact Statement (EIS) for the proposed Koi Nation of Northern California Shiloh Resort and Casion Project.

The Environmental Assessment was significantly lacking in all aspects, was disappointing, and honestly a bit ridiculous. After surviving two fires that devastated the area surrounding the proposed site, I continue to feel that we will perish in the next fire because we won't be able to evacuate our own subdivision which is directly across from the proposed site. There will be thousands of additional cars exiting the proposed casino, many of whom have no idea where they are, or the evacuation routes, competing with the neighboring communities, churches, schools, parks all of which encountered gridlock during the last two events. There is no mitigation possible, but the fact that it was stated in the report that the casino would provide employees to direct traffic was laughable. When people are in survival mode, there is no predicting their behavior, and the unpredictability of fires makes it impossible to implement a way to increase the area population by thousands and not have it irreparably impact the community in the event of any type of emergency. The current vineyard is a fire break that needs to remain available for the surrounding community.

Additional education into our fire seasons. Regardless of the season we can have RED FLAG WARNINGS in in effect whether someone feels it is "so late in the season" and after "all that rain." This is now reality for those of us living in California and especially in Sonoma County. This link below is to an article from the Western Fire Chiefs Association website.

<https://wfca.com/articles/california-fire-season-in-depth-guide/>

The area surrounding the proposed site is already increasing in population with planned housing that is desperately needed in our community. The

infrastructure in this area can't handle any business/recreational facility of the proposed magnitude on the chosen site.

For the past few years, Sonoma County businesses have had significant difficulty recruiting employees and we have watched as more and more businesses have closed due to lack of staffing. This has gotten worse in the past year and the fact that the proposed casino resort says they will need 1000 employees would decimate small businesses who are desperate for employees. I'd also like to know where these 1000 employees will live with the shortage of affordable housing in our community.

[From hiring bonuses to job fairs, inside county's 'unprecedented' effort to fill hundreds of vacancies](#)

In the original report it referenced that there aren't endangered species found on the proposed casino site. A beautiful ecosystem will be permanently harmed. The impact on the large population of wildlife, that may not be considered endangered, but currently populate this agricultural property will be devastating! Our days and nights are filled with the sights and sounds of Coyotes, Foxes, Squirrels, Snakes, Skunks, Owls, Quail, Hawks and many other species of Birds, Frogs, Salamanders and the list goes on. The proposed site and surrounding area who are currently home to these animals will experience displacement, 24x7 lighting, noise, pollution, and increased physical risk due to thousands of additional cars daily. It will impact their nesting and migration habits and more.

Our local indigenous tribes care about the environment, land and living creatures. This is not the same for the Koi Tribe who is only thinking of financial gain by choosing this site. Proposing a mega business in an agricultural area, home to wildlife is wrong!!! This will decimate the beautiful creatures that call that land home.

The physical, emotional health and well being of our community will significantly decline from this proposed large business by being impacted by the additional pollution directly related to running the large buildings, cars, people smoking outside the casino, as well as the noise (that no, dual paneled windows won't help), and 24/7 lighting (we'll no longer see stars).

No casino in California has been built directly across a small two lane road from an existing neighborhood. The only example of a casino this close to a neighborhood is one that the casino was already built and in existence, and then homes were purchased. So, in that example anyone buying a home was conscious of what they were getting into. The danger that is being proposed so close to this community is not appropriate on any level.

All of the other casinos in our area were thoughtfully and appropriately segregated from communities of residential neighborhoods. Our community doesn't need another casino with two others very close by, but especially not on a property zoned for agriculture, scenic view, county separator, protected valley oak trees, flood way and flood plain.

In the past two years we have had flooding in this area. Removing a flood way and floodway increases the risk to flooding into our neighborhoods. I've attached photos from recent storms. Pruitt Creek came right up to the roadway and threatened traffic and homes this year. Once again, the current zoning is appropriate for the area and modifying it would be a travesty.

Up until the past two years, we have been in a severe drought causing mandatory water rationing. The amount of water needed by this mega resort is an abomination. Knowing with climate change we will experience droughts on an increasing magnitude how can building something that will use more water than any of the other community? How can this be justified? We skip showers, have buckets we carry out to water of our plants and the building directly across the street will be using more than any of us!!

I wish the Koi Nation well in their endeavors to gain financial independence, but only in an appropriate location, not here on Shiloh Road.

Sincerely, Nina

Nina Cote'

**Re: NOI Comments, Koi Nation Fee-to-Trust and Casino Project**

To: Chad Broussard  
Bureau of Indian Affairs  
[chad.broussard@bia.gov](mailto:chad.broussard@bia.gov)

Dear Mr. Broussard:

First, could you please send me an email acknowledging receipt of this Comment?

I again ask that the Bureau reject the Koi Nation's effort to build a casino of **any size** in Sonoma County. All proposed options for **"Shiloh Resort & Casino"** at 222 E. Shiloh Road, Santa Rosa, 95403 are unacceptable. I spoke in opposition at the Zoom September 2023 Public Hearing, and sent you a follow-up letter last November.

Sources used for the following information and my understanding of the facts are listed below, and at the end of this letter. As you know, the current proposal will include:

- A 540,000 square foot casino, 400-room hotel and a 2,800-seat event center
- More than 5,000 parking spots hosting up to 57,000 visitors daily
- Two ballrooms and five restaurants
- Additional support and entertainment facilities
- Resort style expansive pool and aquatic/spa center
- Up to 400,000 gallons of water used daily

## **CLIMATE CHANGE IMPACT ON WATER TABLES & THE SUSTAINABLE GROUNDWATER MANAGEMENT ACT (SGMA)**

During the September 2003 Zoom meeting which you hosted, and in reading related resident testimonials thereafter, one common theme emerged regarding the devastating impact the proposed Shiloh Resort & Casino would have on the Santa Rosa Plains water supply. Nearby residents are already seeing their wells dry. And while California is technically no longer in a drought, we would be fools to think severe drought won't return. Moreover, **we are not "water neutral" now** - we are taking out far more than nature gives back. Ao how can we ever get there with massive growth?

Meanwhile, multi-family housing construction in Sonoma County is undergoing a significant boom, supported in part by the state's **Prohousing Designation** program. Under this aggressive housing growth program, cities "selected" for participation must achieve significant housing growth by 2031 or lose general state funding. **Santa Rosa, Windsor, Healdsburg, Rohnert Park and Petaluma** are all in this program, which I will go back to later in this Comment.

Santa Rosa alone is adding almost 4,685 new housing units by 2025 with many already completed, and well before the 2031 deadline. It's also planning for much more high-density housing development to meet county needs, and grow revenue. Developers are exempt from dealing with many infrastructure requirements to support this massive growth. **Demand for Santa Rosa Plains water will increase dramatically as a result.**

In addition to fast-track housing development, think for a moment about water usage to support up to 57,000 daily gaming visitors, a 400-room hotel, five restaurants, a large resort-style pool complex and supporting facilities. **Has the BIA taken into consideration what the impact would be of taking an additional 400,000 gallons of water from our water supply every day?**

Much of Sonoma County uses water from the Santa Rosa Plains. **The Santa Rosa Plains water system is where 222 E. Shiloh Road, Santa Rosa, 94303 gets its water from, and the Santa Rosa Plains are included in the mandated “Sustainable Groundwater Manageable Act” (SGMA).**

This act was passed in 2014 and requires that by 2042 each area of California that uses ground water – like the Santa Rosa Plains -- must enact a plan to replace the ground water that it draws out. This basically requires that communities don’t use more water than nature puts back, using metered systems to determine natural replenishment versus usage. Extensive planning is already underway to meet this state requirement.

Withdrawing an additional 400,000 daily gallons of water from the Santa Rosa Plains will make adhering to the SGMA much more difficult, especially with so much mandated new housing growth in the Santa Rosa Plains that the state is also requiring. **If we are already using more than nature puts back now, how will we become “water neutral”?**

Will the Oklahoma Chickasaw who would fund, build and manage the casino be required to comply with the SGMA? Do they have a plan to address this future requirement? Will they be required to “break even” on the amount of water used versus what nature puts back like others who draw water from the Santa Rosa Plains?

Or would they be exempt from this program? If that’s the case what happens? Do other Santa Rosa Plains water users get a daily 400,000-gallon discount reflecting the Shiloh Resort & Casino usage? Or does the rest of the community need to make up for the massive Shiloh Resort & Casino deficit, putting another strain on water consumption needs.

Moreover it would negate the important SGMA goal – sustainable water usage and environmental protection. What is the responsibility of the Oklahoma Chickasaw Nation here and the small Koi Nation tribe they appear to be using just to get the largest California resort and casino built in Sonoma County? Here is a link to the SGMA program.

<https://water.ca.gov/programs/groundwater-management/sgma-groundwater-management>

## **IMPACT ON AIR QUALITY, NOISE POLLUTION AND AIR TRAVEL VIA CHARLES SCHULZ SONOMA COUNTY AIRPORT (STS)**

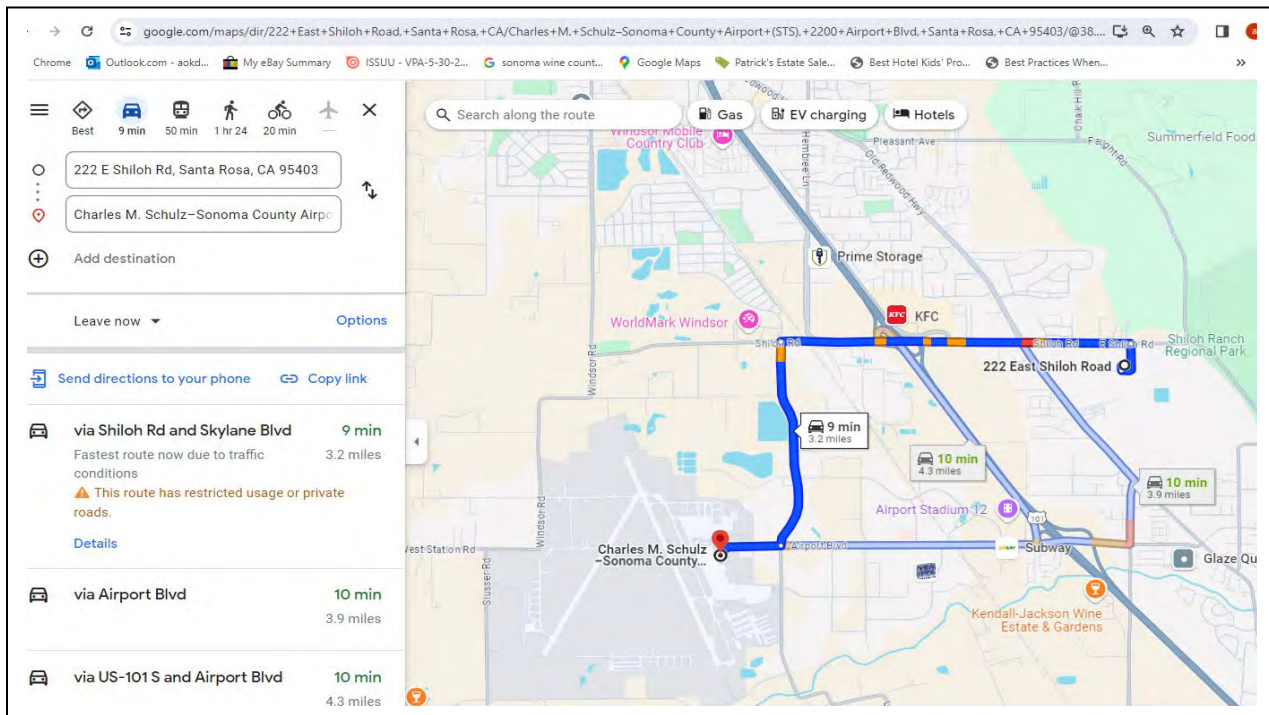

Sonoma County residents are already struggling with air quality and noise pollution caused by the growth of our STS regional airport. Demand for air travel via STS will skyrocket when up to 57,000 daily Shiloh visitors enter the mix. Air and noise pollution from low flying commercial aircraft will worsen.

Moreover, **the ability for area residents to actually use STS will decline sharply as many of those 57,000 casino visitors compete with local residents for seats on crowded planes at our small regional airport.** I use this airport regularly and value the ability to fly directly into Sonoma County versus being required to drive to San Francisco (SFO), Oakland (OAK), San Jose (SJC) or Sacramento (SMF) in order to access air travel.

The most logical alternative is SFO, which is 84 miles or about a 1.5-hour drive away from STS and inaccessible to many. While tourism is key to the Sonoma County economy, adding up to 57,000 daily visitors along with massive housing growth, will overwhelm our community’s ability to afford flying via STS.

The STS airport would be about four miles from the Shiloh Resort & Casino as you can see from the map below. This will also drastically increase road traffic, air, and noise pollution. It would most likely require significant roadway expansion

and improvement – to be paid for by Sonoma County taxpayers, not taxpayers Oklahoma where the Oklahoma Nation Global Gaming Group resides.

## IMPACT OF NEW URGENT STATE MANDATED PROHOUSING COMMUNITY MULTI-FAMILY HOUSING

As mentioned above, there is already a very aggressive housing development program being undertaken in Sonoma County. Have you considered this in your assessment? Have you analyzed what if any Enhanced Infrastructure Financing District funds will apply around the area where the casino would be built to ease congestion? (The Enhanced Infrastructure Financing District, or EIFD, is a special finance district that will use property tax increment revenues from community growth in specifically defined areas to finance public infrastructure and economic development projects of community-wide significance.)

Governor Newsom’s Fiscal Year 2019-20 budget established the **Prohousing Designation Program** help meet California’s goal of adding 2.5 million new homes over the next eight years. **Santa Rosa, Windsor, Healdsburg, Rohnert Park and Petaluma are part of this designated, fast-growth housing program.** According to the City of Santa Rosa:

“In its application, the City outlined multiple pro-housing policies it has enacted or will enact to increase housing production and to improve access to affordable housing. These included streamlining and expediting application and review processes, deferring fees for affordable housing construction, **incentivizing increased housing density**, speeding approvals for accessory dwelling units, **reducing parking requirements for new housing**, and creating an Enhanced Infrastructure Financing District to help support affordable housing development, among many other policies the City has adopted or is pursuing.

One project highlighted in the City’s application that received high marks was adoption of the Southwest Greenway Plan, which will preserve up to 47 acres of parklands and open space and provide **244 multi-family housing units in an underutilized area previously designated for Highway 12 expansion.**

Santa Rosa is on track to create **4,685 units of new housing by 2031**, including 1,919 affordable housing units. With 397 units under construction from June 30, 2022, and later, the City's [2023-2031 Housing Element](https://www.srcity.org/CivicAlerts.aspx?AID=2253#:~:text=Santa%20Rosa%20is%20on%20track,total%20Regional%20Housing%20Needs%20Allocation) accounts for 163% of Santa Rosa's remaining total Regional Housing Needs Allocation. There are **more than two dozen affordable housing developments in the pipeline**, including Caritas Homes - Phase One set to open soon in Downtown Santa Rosa, South Park Commons at the former City-owned Bennett Valley Senior Center site, and The Cannery at Railroad Square. Recently completed affordable housing projects include the Linda Tunis Senior Apartments in Rincon Valley and Laurel at Perennial Park located on Mendocino Avenue at the former Journey's End Mobile Home Park site, among others." Source:

<https://www.srcity.org/CivicAlerts.aspx?AID=2253#:~:text=Santa%20Rosa%20is%20on%20track,total%20Regional%20Housing%20Needs%20Allocation>.

Again, according to Gustavo Velasquez, Department of Housing and Community Development (HCD) Director:

"I'm thrilled that we now have 30 communities that have achieved the Prohousing designation," said HCD Director Gustavo Velasquez. "The cities and counties are leading the way by **reducing unnecessary barriers and red tape** that discourage new housing production, instead they are **signaling to developers that are ready to build more housing faster.**"

(California Department of  
Housing and Community Development, August 7, 2023)

"This isn't hype. If it becomes law, the bill could really revolutionize California cities. As currently written, SB 827 would essentially **exempt all new housing built within half a mile of a train stop or quarter mile of a frequent bus stop from most local zoning rules**. So, if a city had zoned an area for single-family homes, developers could invoke the bill to build multifamily apartment buildings **between four and eight stories high.**"

(Cal Matters June 23, 2020)

One only has to look at the large multi-family housing developments going up all over Santa Rosa now to know there will be major issues going forward with transportation gridlock, parking, community services and water needs; eliminating the "red tape" needed to successfully incorporate new housing into Sonoma County will negatively impact quality of life. Highways, roads, and community services such as grocery stores and medical facilities are not equipped to deal with the **Prohousing Community** requirements, **let alone a third Las Vegas style casino.**

## **SONOMA COUNTY RESIDENTS ARE CONFUSED ON WHERE IS THE SHILOH RESORT & CASINO IS GOING TO BE LOCATED**

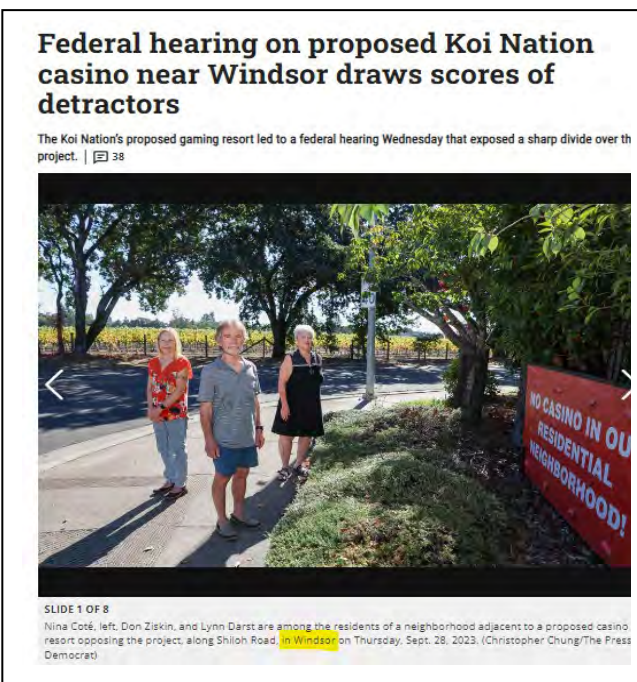

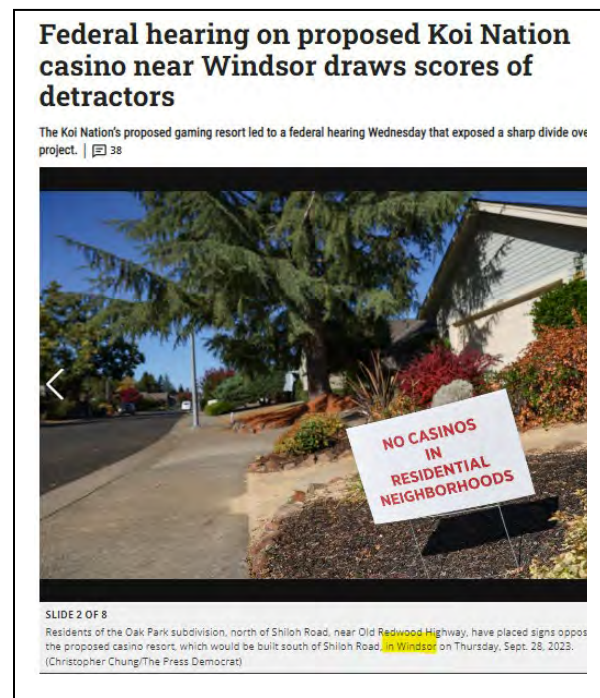

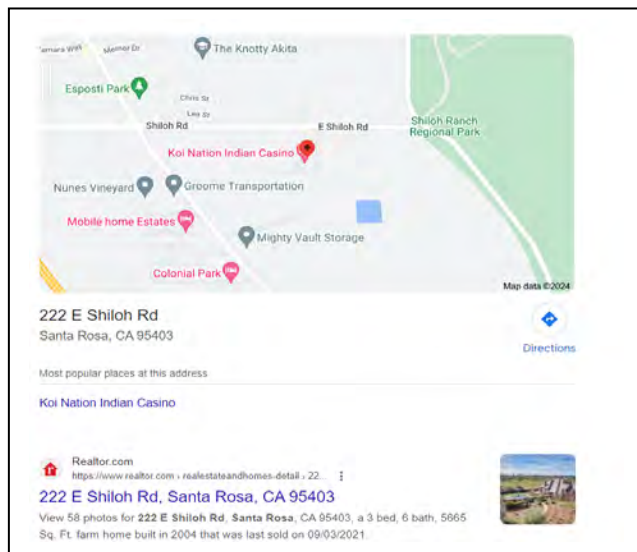

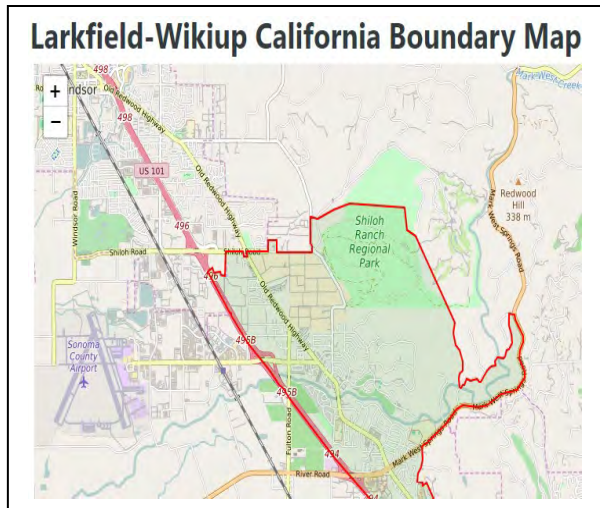

There is confusion within the community as to where the proposed casino will be built. **The Press Democrat insists on telling readers it will be located in Windsor even when corrected.** I asked someone just the other day who reads the Press Democrat daily where it was going to be built and the response was "Windsor up by the Healdsburg border".

The casino is **not going to be located in Windsor as they continue to publish. The address is 222 E. Shiloh Road, Santa Rosa, 95403.** It is in unincorporated Sonoma County within the **Larkfield-Wikiup boundary map** with a Santa Rosa street address. The Press Democrat even changed an April 3, 2024 published Letter to the Editor I wrote. I provided the Santa Rosa address, and they changed it to "Windsor" twice without my permission, then refused to issue a correction. **They are confusing the public which in turn limits the feedback you receive.**

Below are Google Map showing the location and two Press Democrat photos stating it will be in Windsor. **Note:** the Press Democrat has also published that the location would be in unincorporated Sonoma County, and south of Windsor, but also keeps printing "Windsor".

**I am hereby requesting that the BIA publish an announcement in the Press Democrat, with the exact address or request a Press Democrat correction as Sonoma County is being misled with respect to Shiloh's proposed location.**

## PAYING FOR INFRASTRUCTURE IMPROVEMENTS

Federal law makes it clear that the Koi and Chickasaw nations will not be required to fund road, flood and wildfire containment and evacuation “improvements”, or contribute to additional housing requirements needed for staff. Therefore the impact on Sonoma County residents would be enormous as vast changes would be needed to deal with up to 57,000 additional daily visitors to Shiloh Resort & Casino.

What would Sonoma County residents get for this massive investment – up to 1,000 new jobs while the bulk of the revenue and profit goes to the **Oklahoma-based Chickasaw Nation**? This is not practical, fair or advantageous. Especially when you consider the impact on our environment, sustainability and quality of life.

Here is the relevant federal law link regarding funding public projects:

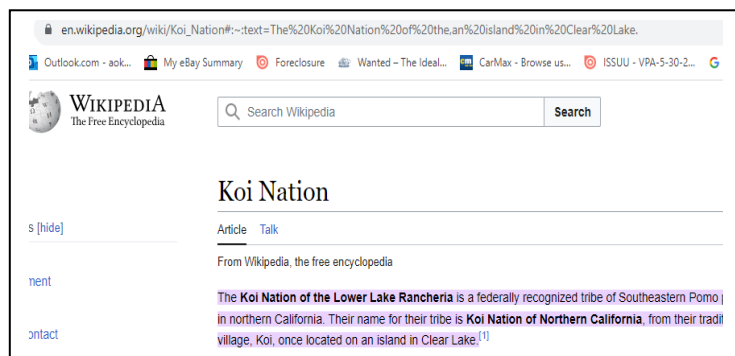

## KOI NATION IS INDIGINOUS TO LAKE NOT SONOMA COUNTY

It is my understanding that the Koi Nation are **indigenous to Lake not Sonoma County** and therefore have **no significant historical connection or inherent rights** to build this casino anywhere in Sonoma County. Their website acknowledges this history (below). ABC News and others also reported that “Five other tribes question Koi Nation's "historical connection" to Sonoma County, saying their ancestors lived 50 miles away in Lake County.” All Sonoma County tribes are strongly against this proposal.

The **Clearlake City Council, in Lake County** approved increasing funding the city will devote to **defending itself against legal challenges involving major park and road projects filed by the Koi Nation**. The reference notes that **“The tribe, whose traditional territory includes the city of Clearlake and Lower Lake...”**. They go on to note that the money is needed because the tribe, **indigenous to Lake County**, approving \$250,000 for legal defense... “after the tribe sued to stop the city’s extension of 18th Avenue as part of a new hotel development at the former Peace Field airport site.” (Lake County News, October 20, 2023)

Yet in 2021, the Koi Nation purchased 68 acres in Sonoma County at 222 E. Shiloh Road, Windsor, for \$12.3 Million. They did not have approval to build the casino before this purchase and are now requesting permission. Is this a version of **"It's easier to ask forgiveness than it is to get permission"**? Why buy the land first? To make it hard for the BIA to say “no”?

***So, which is it? Is the Koi Nation indigenous to Sonoma County? Lake County?***

## LARGE CASINOS ALREADY EXIST IN SONOMA COUNTY ARE ALREADY HAVING PROBLEMS COMPETING

By building the Shiloh Resort & Casino, the biggest in California, Sonoma County will become the Las Vegas of California. Forever changing our cherished rural landscape and sense of community, while creating new crime and safety challenges, and contributing to transportation gridlock for all.

**Just 14 miles, or 15 minutes south** off Highway 101 is the 2013 built **Graton Casino**. It has a:

- 135 square foot casino – 25% the size of one proposed for Windsor
- 200-room hotel, and others built nearby to support it

**In June 2023 Graton began a \$1 Billion expansion** which will add a:

- Second hotel wing with 200 rooms
- 3,500-seat theater for live entertainment
- Rooftop restaurant seating for 480 guests
- 144,000 square feet of gaming space

- Five-level parking structure for 1,500 additional vehicles

Upon completion, **Graton will be the second largest casino in California. The Shiloh Resort & Casino would easily become the largest in the state.** Surrounded by other massive casinos just a few miles away. Also relevant, on March 1, 2023, Sonoma County Supervisors approved the **Dry Creek Rancheria Band of Pomo Indians' new River Rock resort and casino in nearby Geyserville.** (Rendering Below.) **This is only 18 miles or 30 minutes north of Windsor.**

Why are they tearing down their existing facilities to build a bigger new luxury resort and casino? **During the approval process they argued that business *slowed significantly* after Graton opened. They were granted permission for a complete rebuild as they need it to compete and not go out of business!**

This suggests that **Sonoma County cannot sustain *three (or four)* massive casinos requiring high revenue targets for financials to meet expectations.** If this turns out to be the case, it will lead to owner neglect as operating funds diminish. **Sonoma County taxpayers** may in the end need to step in with taxpayer monies to fund basic maintenance and security functions.

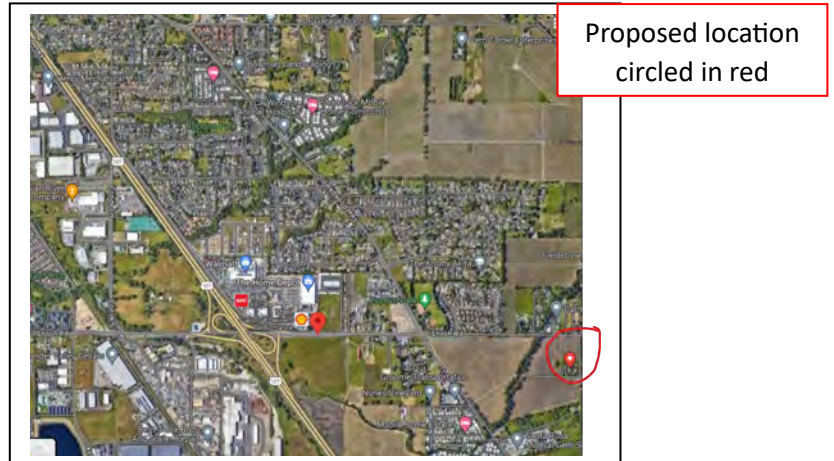

**Twin Pine Casino & Hotel in Middleton, Lake County,** is also just one hour by car from the proposed Windsor site.

The Dry Creek Rancheria Band of Pomo Indians also plan to build a **large casino in Petaluma south of Windsor.** They have delayed it until 2032 but it is still a strong and viable possibility.

Again, just 14 miles from Graton Casino and 18 miles from River Rock Casino, **the proposed Shiloh Casino in Windsor would easily become California's largest casino.** Built in a residential area and location Sonoma County cannot support.

**Sonoma County residents do not need *three* massive Las Vegas style casinos within a 32-mile radius of each other.**

## PROPOSED SHILOH RESORT AND CASINO WOULD BE LOCATED IN THE MIDDLE OF ESTABLISHED RESIDENTIAL NEIGHBORHOODS

The above images show the proposed site abuts established residential communities, and the stores, restaurants, churches and other operations the local community relies on. **This includes about six densely populated mobile home parks, five of which serve senior citizens only;** and seniors often require additional help during evacuations, which adds to the risk associated with putting a major resort/casino in their backyards.

### CURRENT TRAFFIC CONGESTION

The Wal-Mart and Home Depot right off Highway 101 along with other stores and restaurants located there are already destination points for many residents **outside of Windsor**, which also leads to much more traffic.

My understanding from the recent public Zoom hearing is that your transportation study was done in the early morning on a winter day. Have you re-evaluated it during afternoons when schools let out and people leave work? Highway 101 already becomes a parking lot at many busy travel times of the day.

### ADDITIONAL NEW MULTI-FAMILY HOUSING GOING UP AT 295 SHILOH ROAD, WINDSOR

The Corporation for Better Housing and Integrated Community Development received \$40 million in construction financing for Shiloh Crossing, **a 171-unit housing complex**.

The development will have two buildings plus 8,000 square feet of commercial space. The North Building will include 130 apartments, while the South Building will consist of the remaining residential units, administrative offices, community space and two commercial spaces. It will have a swimming pool, community room and bocce court.

The development will be located at **295 Shiloh Road** near Route 101. Just one mile or a 3-minute drive from the proposed new Shiloh Resort & Casino. This development, one of many fast-tracked to deal with California's housing shortage, will also add to traffic congestion, slow wildfire evacuation efforts and pull from depleted water reserves.

### IMPACT ON RESIDENTIAL PROPERTY VALUES

Can you please tell me what the impact will be on residential property values all around the proposed site in Windsor, and Santa Rosa, including those who reside in the Larkfield-Wikiup boundary map? How much property value will be lost when the biggest casino in California moves in next door? How will this impact current residents?

Proposed locations for the new casino and 171 new multi-family housing circled in red; 1 mile apart.

## ALREADY STRESSED WILDFIRE EVACUATION ROUTES

It is also quite easy to see from the above map that the proposed casino would hamper wildfire evacuations as evacuees travel west on narrow roads to get to Highway 101. It is also unrealistic in my view to **expect casino employees to risk their lives trying to evacuate patrons as the road traffic quickly comes to a standstill and a death trap.**

Here is a snip from the Koi's Proposal Appendix N – Wildfire Evacuation Memorandum. Many assumptions and conclusions in this Addendum are debatable, and it also shows clearly that significant public infrastructure improvements would be required for any extra degree of mitigation when wildfire strikes.

If the Koi Nation's proposal is approved the BIA will share the blame should more wildfires lead to death due to an inability to flee, and destruction that would not have happened if the proposed site was left as is. The BIA knows locating the largest casino in California at this location – **or anywhere in Sonoma County** - will add significant wildfire evacuation hurdles.

## SONOMA COUNTY BOARD OF SUPERVISORS UNANIMOUSLY OPPOSES THE KOI NATION PROPOSAL

There has been great Sonoma County opposition to the Koi Nation plan. In April, 2022, the "Sonoma County Board of Supervisors unanimously passed a resolution opposing the Koi Nation's proposed casino and resort outside Windsor while discounting the tribe's historical ties to the county". (CDC Gaming Reports, April 6, 2022). Many other groups also oppose this new development.

### Elements of Mitigation Plan

The following mitigation measures are recommended to achieve a safe, efficient and organized site evacuation:

- **Trained on-site personnel will direct roughly half of the 4,310 vehicles** from the rear of the site to each of the two access points (the east Shiloh Road access point and the signalized Old Redwood Highway access point.) Thus, each access point connecting to adjacent public streets would handle about 2,155 vehicles.
- The two-lane two-way loop road serving the 4,310 vehicles should be converted to two outbound lanes during evacuation. However, only a single lane of traffic would enter the single westbound lane on Shiloh Road, so the extra outbound lane would be for storage of vehicles that would be directed onto the westbound lanes of Shiloh Road by **two on-site attendants** to keep traffic flowing.
- To accommodate any opposite flow emergency vehicles, the loop road should be designed with at least one paved shoulder wide enough to handle in-bound traffic during evacuation. This design should be available at all three access points.
- The Old Redwood Highway access point will be signalized and it also only has a single receiving lane on southbound Old Redwood Highway. All evacuation traffic should be directed to the south. This exit should also have two outbound lanes but only one vehicle at a time can use the outbound lane at the signal. **Two attendants** will be necessary to direct traffic.
- At the signalized exit near the entry area, also only a single lane can exit onto Shiloh Road. There would be two westbound receiving lanes at this location allowing both the vehicles exiting from the entry area and the other evacuating vehicles from the east access point to have their own westbound lane approaching the signalized intersection of Shiloh Road and Old Redwood Highway. To keep traffic flowing smoothly, **two attendants** should be present at this location.
- There should be at least six traffic attendants to direct the 4,310 vehicles exiting the garage and surface parking areas. In addition, at least two attendants would be needed at each of the three casino parking lot exit points. **A total of 12 persons** would be needed during evacuation. These traffic attendants should be specially trained employees of the casino.
- It is assumed that the approximate 2,155 vehicles exiting the site on the east Shiloh Road access point would have a maximum service rate of about 1,000 vehicles per hour. This is a typical rate assumed in urban areas and assumes that other traffic will be present, although at this location other traffic should be relatively light. This exit can therefore handle the exiting evacuating traffic in 2.2 hours or about two hours and twelve minutes.

The Koi Nation (and the Press Democrat) also indicated that a **Letter of Intent with Sonoma County Firefighters** equaled an endorsement. I checked with this firefighter organization directly; they have NOT endorsed the proposed casino.

## SUMMARY

Sonoma County is already being over-built without regard to water requirements, air quality, noise and road transport needs. Threats from wildfires and required evacuation infrastructure are easier to overlook when the drought abates, but severe drought due to climate change is predicted, along with future wildfires. The land and water impact of adding this casino to our county and its long-term impact on our fragile environment - already being fast-tracked to build more densely populated housing - should not be brushed aside.

I urge you to deny the Koi Nation Shiloh Resort & Casino **in any form anywhere in Sonoma County.**

Sincerely

Anne Gray

"NOI Comments, Koi Nation Fee-to-trust and Casino Project"

I am a resident that has lived in the area across the street from this proposed nightmare of a casino project for 38 years . I have experienced continued increase of busyness in this area and oppose any type of casino project on this proposed property! This casino resort plan is not acceptable to our community on any level !

For starters ,this is a community with residential homes, churches, schools, recreational parks, a rural county park with creeks and wildlife that stretch to the creek on this property and vineyard agricultural. Daily traffic and noise is already at it's maximum with more recent high density /low income and senior / memory care housing added and planned on Shiloh Road . Fire evacuation and ER services will also be even more impacted with this current increase of population . Area flooding is a current and continuous problem . This casino project would be a negative impact on this already strained community. This project would bring an added appx 4 times the influx of traffic on Old Redwood Hwy and Shiloh Road ! This traffic would undoubtedly include a population of impaired driving ,drugs , violence and individual bad behavior (prostitution and sex criminal histories). This project would cause the existing community to experience even more difficult Emergency services, evacuation, poor air quality , more increased noise , increased area flooding and ground water depletion and contamination ( many in this rural area have ground water wells) . This peaceful beautiful area and community needs to be available for my grandchildren to enjoy! This area does not deserve the abuse of a casino resort project with constant in and out traffic of people that don't care about it's quality of life .

The Koi nation needs to stay in their own Lake County area for land trust plans and development . Sonoma County has enough casinos .

Respectfully,  
Richard Abend

**"NOI Comments, Koi Nation Fee-to-trust and Casino Project"**

Amy Dutschke Regional Director,

I am a resident that was raised and lived in the area across the street from this proposed nightmare of a casino project for 38 years. I have experienced continued increase of busyness in this area and oppose any type of casino project on this proposed property! This casino resort plan is not acceptable to our community on any level!

For starters, this is a community with residential homes, churches, schools, recreational parks, baseball park, a rural county park with creeks and wildlife that stretch to the creek on this property and vineyard agricultural. Daily traffic and noise are already at its maximum with more recent high density /low income and senior / memory care housing added and planned on Shiloh Road. Fire evacuation and ER services will also be even more impacted with this current increase of population. Area flooding is a current and continuous problem.

This casino project would be a negative impact on this already strained community. This project would bring an added appx 4 times the influx of traffic on Old Redwood Hwy and Shiloh Road! This traffic would undoubtedly include a population of impaired driving, crime, narcotics use, violence, narcotics sales and prostitution. The regional park which families currently use will be flooded with people using narcotics/ selling narcotics, and homeless encampments. My husband is a police officer for Rohnert Park and that is the behavior that takes place at the Graton Casino leaching out into the surrounding areas of Rohnert Park. The difference is that the Rohnert Park casino is surrounded by businesses not residential housing. All around this proposed casino are residential and low-income housing. People in low-income housing are struggling enough they do not need the influence of increased crime, drugs and prostitution around their families. This project would cause the existing community to experience even more difficult Emergency services, evacuation, poor air quality, more increased noise, increased area flooding and ground water depletion and contamination (many in this rural area have ground water wells). This peaceful beautiful area and community needs to be safe for my children and other families to enjoy! This area does not deserve the abuse of a casino resort project with constant in and out traffic of people that don't care about its quality of life.

NOI Comments, Koi Nation Fee-to Trust and Casino Project

The Windsor Community knows many of the impacts Alternate A and B will have on our Town and there are yet some impacts we can only speculate on. What concerns me most is that the Casino project will be the impact to the Shiloh area, which was the subject to a September 4, 2001 Shiloh Road Village Vision Plan. I have been an elected Windsor Council Member since 1994 and know the time, effort and money allocated to this section of Shiloh Road encompassing the vision plan area which terminates at the Koi project. The Town took on the visioning project because it became apparent that this area was going to become a focal point for growth and development. The Town desired to provide a guide to the growth and development through this visioning process with the clear goal of providing a livable and vibrant residential community with walkability and sustainability in the forefront.

Over 20 years have passed since the Plan's adoption and development is currently occurring with two large multi-family apartments under construction on the north side of Shiloh totaling over 300 units combined. The Vision Plan

acknowledged a guiding principle of safe movement of traffic. Since 2001, the need to enhance pedestrian and bicycle access and safety has become imperative. Reduction of climate warming is a priority, and which means Shiloh Road must be adapted to accommodate modes of transportation in addition to the car. The Koi project Alternatives A & B will create such additional auto traffic that it will basically eliminate people's choice of walking or biking to shopping which is available in the Shiloh Center which serves all shopping needs.

The Koi's choice of a casino/hotel project in Alternative A and somewhat in Alternative B, is replica of the Graton Tribe's Casino and Hotel in Rohnert Park, just 15 miles to the south. From review, the project and the current casino are very similar in size and the uses. What is different is the access. The Koi project is not situated in an area such as the Graton Casino/Resort. While the Graton facility is adjacent to Highway 101 with Wilford Ave., a four-lane road basically serving the Graton facility, the Koi project would utilize Shiloh Road, currently two lanes, for access with Shiloh Road currently serving our industrial park, golf course and thousands of residential properties on our west side of Town. On the project or east side of the highway, Shiloh Road serves Walmart/Home Depo Shopping Center, as well as the entire southern portion of the Town of Windsor. The impacts are not comparable and the highway 101 overpass is not capable of handling the traffic generated by the Koi Project.

What the Town desires of Shiloh Road is a boulevard consisting of mixed-use development, small businesses on ground floor levels with housing, two to three stories above, parking behind the buildings, wide sidewalks and safe bike lanes along the street, two lanes, one each direction with landscaped islands for pedestrian safety and limited turning lanes and crosswalks of shorter distances for safety and efficient traffic movement. This design is specifically for the livability of the Shiloh community. The Koi Casino project, Alternates A and B, will make this vision unattainable and render those of our

future Shiloh community not having the benefits that the Town of Windsor has stood to provide, a community that it's residents love.

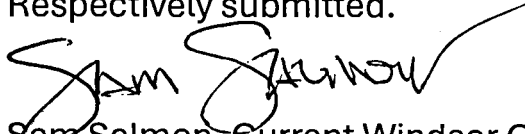

There has been concern regarding the same environmental consultant performing the EIS who submitted the EA with conclusions of no impacts that could not be mitigated. As an elected representative, I am held to a level of impartiality that includes prohibition of bias. Is it not understood that the consultant who provided the conclusions in the EA would be inclined to find that their conclusions were justified through a deeper EIS investigation? Certainly, any conclusions made in the EIS which appear to be made to justify prior determinations will be scrutinized.

Finally, the Koi's are known in their community in Lake County as involved and concerned citizens and residents. The Tribal leaders who I have met are genuine and concerned. It is the scope of their project Alternates A and B which raises the issue of the Town of Windsor's capacity to deal with their potential impacts. As I have stated at the beginning of these comments, the Town's goals are to continue building our community as a safe and welcoming place to live and to be grateful for living here. Our plans in the Shiloh Road corridor are for just that. The Koi Tribe is said to constitute 92 members. While I certainly understand the Department's goals in providing our indigenous people compensation for their terrible losses of their lands and the atrocities afflicted, it would seem a 600-million-dollar project financed by the Chickasaw Nation of Oklahoma is a too much. The burden placed upon the Town of Windsor is beyond its capacity. The 68 acres is adjacent to the Town and Town services will be used because of the project's location and the location of Town services and facilities.

Finally, there may be alternative sites or specifically an alternative site on the northwest corner of Shiloh Road and Highway 101. There are three undeveloped adjoining parcels totaling about the equal acreage of the current Koi project, two currently for sale and one taken off the market in the past year. The parcels are zoned commercial for the most part and are in our light industrial zoned area of Town. Impacts of traffic and cohesiveness of development would seem to be much more mitigatable. Almost direct

freeway access as well as complete visibility from the freeway would lead to a more successful project. This acreage is adjacent to the Town's newly created Beverage District and a project such as the Koi's could benefit the town while still retaining it's sovereignty and providing for the benefit of our indigenous people.

Respectively submitted.

A handwritten signature in black ink, appearing to read "Sam Salmon", with a large, sweeping flourish extending from the end of the name.

Sam Salmon, Current Windsor Council Member and past Mayor

Comments: to Koi Nation Fee-to-Trust and Casino Project

Dear Ms Amy Dutschke:

Since moving here in 1989, I've witnessed Windsor's traffic challenges, particularly during events like the Ironman race. Adjustments were made, but the recent low-cost housing construction has exacerbated congestion. Traffic at Shiloh and Old Redwood, and Hembree and Shiloh intersections are common, especially the post-3 pm commuter hours. Proximity to the freeway often results in gridlock, and flooding has occasionally forced detours from our usual exits.

The prospect of a new casino intensifies my concerns. It could lead to traffic scenarios similar to those near Coddington or Costco in Santa Rosa, with potential freeway backups. Unlike retail stores like Home Depot and Walmart, a casino's traffic impact is less predictable and harder to manage. The city's roundabout plan at Old Redwood and Shiloh seems incompatible with the added casino traffic.

I'm also concerned about having casino traffic in the event of a natural disaster such as a fire. There have been multiple times we have had to evacuate and if there was a casino down the road it may make it difficult to leave. With two major casinos already in the county, a third seems unnecessary, especially near residential areas with children. Casinos should be situated away from dense housing to mitigate traffic surges from events and promotions.

As Windsor braces for more traffic from a new apartment complex, I urge reconsideration of adding another high-traffic establishment like a casino. Our community's past experiences should guide future planning to preserve Windsor as a worthwhile and comfortable place to live.

Re: Koi Nation Shiloh Resort and Casino Project

Dear Ms. Dutschke,  
I am a resident of Windsor CA and am strongly opposed to the to the proposed Koi Resort and Casino. I feel it would be environmentally devastating to our community.. This casino would drastically affect the towns and area's limited water supply. It would greatly affect our traffic especially on the Old Redwood Hwy which many of us seniors use to get to our doctors and hospitals in Santa Rosa. We have a large senior population that avoids driving on the Freeway and this proposed casino is right off Old Redwood Hwy. It's also proposed in a residential community. It will affect the property values, parking and noise in that residential community.

We are always being threatened with rolling power blackouts and have already been asked to limit our power use to specific times. Presumably they will be using an exorbitant amount of power for a casino etc.

With regard to water we are encouraged to tear up our lawns and conserve water use. There are restrictions for both our homes and businesses. This proposed resort and casino would require both a heavy use of power and water which are already in limited supply.

This casino would have an extreme negative impact on our daily lives in this community!

I strongly oppose this Koi Casino Resort and Casino Project!

Thank you for your considerations of my comments.

Sincerely,

RE: NOI Comments, Fee-to-Trust and Casino Project

2024 APR 10 PM 4:06  
PACIFIC REGIONAL OFFICE  
BUREAU OF INDIAN AFFAIRS

Dear Ms. Dutschke:

I have lived in the Town of Windsor for 28 years, approximately 3 miles from the proposed Koi Shiloh Resort project. This letter is to once again voice my extreme opposition to this project, which would destroy the quality of life and safety in our town. In addition to the quality of life concerns in this proposed residential area such as traffic and noise as well as environmental impacts, I would like to emphasize the following two serious safety concerns.

- **Wildfire Evacuation** – I have lived through the evacuations of both the Tubbs Fire and the Kincade Fire and know first-hand how dangerous this situation is. We live in an area surrounded by extreme, very high and high wildfire risk. This project would replace the vineyard, which is a natural fire break, with a casino, hotel, spa, event center that would increase the fire risk. We are aware that another wildfire in our area is when, not if, and we know the tragic consequences of inadequate evacuation routes from the Paradise Fire and the Maui Fire. Adding a project of this size to our already stressed two lane roads would very likely cause gridlock and a real potential for loss of life robbing us of our peace of mind and will cause constant fear for our safety in our own homes. The EA is faulty in the assumption that we will have adequate warning to evacuate the casino property prior to evacuating the Town of Windsor.
- **Crime** – The proposed mitigation to address this issue by staffing up the police department in response to the increased crime is not acceptable. The proposed location of the casino project is right across the street from neighborhoods with families and retired people. The knowledge that police are available to respond after a dui accident or worse occurs will not alleviate the impact and fear of these crimes in our community.

The proposed site is not in a commercial area. It is in an agricultural, residential area where families and retired live, children go to school and play in the park, wildlife live, and we all enjoy the incredible natural beauty of this area. The proposed location is absolutely **not** the right location for this project.

I wholeheartedly request that you implement **Alternative D, no action**.

Sincerely,

Bruce DeCrona  
1206 Eagle Drive  
Windsor, CA 95492

*also, it seem that anyone who supports this doesn't live anywhere around here. I invite them to come see for themselves what a poor & inappropriate location it is.*

RE: NOI Comments, Koi Nation Fee-to-Trust & Casino Project

Dear Administrator,

I am writing to voice my strong opposition to the proposed casino from the Koi Nation off Shiloh Road in unincorporated Sonoma County adjacent to the Town of Windsor, California.

The Koi Tribe from Lake County (not Sonoma County) has purchased vineyard acreage adjacent to a series of single- family homes, parks, schools, a church, and other nearby residential neighborhoods. The proposal of a large casino complex including restaurants and a hotel will have a negative impact on our local environment adding traffic congestion, infrastructure strain, lack of emergency access especially during fires, disturbance of wildlife habitat, lack of water supply especially during drought conditions and much more.

While I understand that tribal land developments are not held to CEQA standards, the surrounding areas are. We have red tailed hawks, barn owls, foxes, coyotes, bobcats, mountain lions, deer, endangered wildflowers and salamanders and many more forms of wildlife. The building of the casino would significantly destroy their habitat and feeding grounds. The current land is a vineyard of which the wildlife can roam freely. There is also a regional park right across from the proposed development that is used by bike riders, hikers and horse back riders. The parking is already overfilled on the small street adjacent and across the street from the proposed casino.

Water is always a huge focus. During drought years our community has had to regulate use of water based on hours and days of the week. The casino leaders are proposing setting up their own wells and wastewater systems. This will affect the aquifers in the area and many of the residential homeowners that are on wells adjacent to the property. Their wells could go dry as a result of a well water system placed on the casino property.

Fire has been a huge issue since 2017. The lack of roadways to support evacuation or residential areas in a timely manner has been a major challenge taking up to 8 hours to evacuate only 15,000 people. The Kincaid Fire came down close to the proposed casino. Imagine trying to evacuate hotel and casino guests along with the residential neighbors before the fire reaches the property. We don't have the infrastructure to support this project including street structure and utilities, and first responder personnel.

Safety is a major concern. There are several elementary and two high schools within a seven mile area of the proposed casino. Human Trafficking, Drugs, and Sex crimes along with other crimes are known to increase near or at casinos, a rate of 6.7% higher than expected based on a study by Thompson, Gazel and Rickman (1996). Do you want to expose our youth to those possible crimes including underage drinking? On the northeast corner of Old Redwood Hwy and Shiloh Road there is Esposti Park. It is a local park for our youth and adult athletes to play teeball, baseball, soccer, and for families to host family parties. Many bicycle enthusiasts park their cars

in the adjacent parking lot as a start off point for their bike rides which usually last a full day as they tour the beautiful backroads. I am concerned for the safety of our town's children with a park so close to the adjacent proposed casino. This is a residential area. Not a commercial area.

Lastly, the stress that a casino brings to the mental wellness of people that are living in a quiet neighborhood must be considered. Mental health is very important and although not "environmental" in nature it is a condition that risks the well-being of an individual. This area is quiet, residential, with parks and trails and bike trails, soccer and baseball fields directly adjacent to a casino that will exude the opposite, a transient population seeking the solace of gambling, drinking, and entertainment.

For these environmental reasons I strongly oppose the development of the proposed casino. If the casino was directly adjacent to Highway 101 it would be in a more appropriate development area. The current property is again in a quiet, residential, non-commercial area and not environmentally sustainable. Thank you for your time and consideration.

Sincerely,  
Mary Euphrat

**Re: NOI Comments, Koi Nation Fee-to-Trust and Casino Project,**

This correspondence includes comments and concerns for evaluation by the BIA/BLM in the Environmental Impact Statement (EIS) regarding the Koi Tribe Casino application; and the impact the Koi Casino Resort will have on the local community. I will not repeat the several topics addressed in my original letter concerning the Environmental Assessment (EA). It is my understanding they are already part of the analysis. I will address changed circumstances concerning Traffic and Circulation since last year. Before doing that I would like to make a few preliminary comments.

According to the current design for the proposed Casino Report, the driveway entrance to the casino will be 45 feet from the two closest homes; and an entire street will have bedroom windows (also 45 feet away) facing the proposed casino. To local residents watching rows of existing, healthy grape vines being ripped out and surveyors making measurements, it feels as if the casino is a foregone conclusion. This is despite unwavering opposition from residents, local, state, and federal elected officials, and numerous organizations.

The Koi have not reached out to the local community and have published false information giving the indication they have widespread support for their application. Recently they claimed the Sonoma County Fire District and Santa Rosa City Council Member and former mayor Tom Schwedholm supported the project. In fact, they did not. (see attached correspondence).

I would also like to restate my concern over the neutrality of Acorn Environmental who prepared the EA and will apparently be doing the EIS.

Acorn Environmental is a company that is, and has been, utilized by other tribes applying for Fee to Trust Applications in efforts to acquiring land for gaming purposes. Their website identifies Fee-to-Trust Applications, NEPA Compliance for Fee-to-Trust and Two-Part Determinations and Tribal-State Compact Environmental Analysis as areas of specialty. The EA previously prepared in this matter glossed over and minimally analyzed the concerns expressed in the scoping comments preceding the report. This was evident during the comments from callers at the public

forum. While not questioning their qualifications or professionalism, they are making many subjective assumptions and reaching subjective determinations. The NEPA procedure should incorporate some safeguards to verify neutral professional analysis. Acorn consistently concluded that essentially all concerns raised in the scoping questions last year were determined to be insignificant after their evaluation. Examples of their common conclusions are:

Groundwater- cumulative impacts to groundwater would be less than significant.

Carbon Monoxide Hot Spot Analysis - Cumulative impacts to CO levels resulting from Alternative A would be less than significant.

Transportation and Circulation. - Thus, mitigation would reduce cumulative impacts to a less-than-significant level.

### **Transportation and Circulation/ Fire/Evacuation**

Since the round of scoping for the EA, there has been significant development in the immediate area. There are 3 projects approved and/or under construction between the Highway 101 Shiloh offramp and Old Redwood Highway that will result in over 500 residential units in addition to retail ground floor ventures. The EA did not incorporate the increased traffic and circulation coming from these developments; and the impact they will have in addition to the proposed Koi Casino. The area has already seen a significant increase in traffic since the preparation of the EA. During busy hours traffic on eastbound Old Redwood Highway backs up to the freeway. The additional daily trips to and from the casino will result in constant traffic congestion.

The EA study was done over two winter days and the traffic during that time of year was not representative of conditions on E. Shiloh Road. During spring and summer months the park is full of young children playing baseball/softball as well as other groups utilizing the park. Several bike riding groups meet at the park for rides on Wednesdays and on weekends. The park parking lot during the weekends is full, with overflow parking on E. Shiloh Road and Old Redwood Highway. There will also be significant increased demand for street parking for the 131 units nearly completed catty-corner to the proposed site (at the intersection Old Redwood Highway and Shiloh Road). There are an additional 300 residential/senior units plus retail space approved or under construction between Old Redwood Highway and the 101 freeway.. The conclusions of the TIS concerning the impact the casino project will have on traffic circulation did not incorporate these actual conditions. The EIS should conduct a new traffic study, during spring/summer months to evaluate how the 500 plus units as well as parkgoers will impact the community.

Most importantly to residents who have been through multiple evacuations, it is concerning that the only time evacuation is mentioned is in Appendix N which calls for the Koi to coordinate with emergency evacuation and traffic experts to develop a project-specific evacuation plan. No specific plan is referenced nor is the increase in residential and retail space incorporated. The infrastructure of the area cannot sustain this increase in housing and retail and the proposed casino resort.

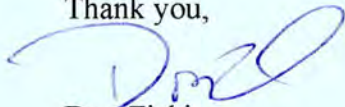

How will the addition of 500 plus residential units and commercial retail businesses on Shiloh Road impact traffic in addition to the casino traffic.

What will be the impact of the loss of available street parking from the casino project and new development to local residents and park users.

How will the traffic signals at Gridley and the Shiloh casino entrance impact residents of Oak Park?

In lieu of suggesting "an alternative project be investigated, it is critical that alternatives A, B and C be rejected and that alternative D - No Action be adopted. A, B and C all bring the same issues, albeit at different levels. It is unprecedented for a casino resort of this size to be developed in a residential neighborhood. From a precedent standpoint, allowing this project by an out of county tribe, funded by an out of state tribe, in a residential neighborhood, would be sanctioning casino development throughout the state.

Thank you,

Don Ziskin

Subject: Koi Nation Shiloh Resort and Casino Project

Dear Ms. Dutschke:

The purpose of this correspondence is to correct certain misinformation being circulated by the Koi Tribe in the media concerning supporters of their application to build the Shiloh Casino. This misinformation causes confusion and alarm as our community continues to oppose this project.

In a recent newspaper article<sup>1</sup> the Koi listed 25 supporters, almost all of which were outside of Sonoma County and the proposed casino site. 18 of the supporters were other Tribes and Rancherias located outside of Sonoma County. The project is opposed by the Sonoma County indigenous tribes, the Sonoma County Board of Supervisors, and the Windsor Town Council. With the exception of the two former Santa Rosa Town Council members listed in the article, virtually all of our local and California government representatives oppose the Shiloh Casino project. The only local agency listed in support was, surprisingly, the Sonoma County Fire District as we had previously only heard negative comments from them in prior communications.

A group of local residents toured the fire ravaged areas surrounding the proposed casino with a Sonoma County fire captain and a representative of former senator Diane Feinstein's office in 2022. At that time the captain expressed considerable concern over the placement of such a large commercial development in a residential area that was fire prone and had already experienced fire. The chief concerns were over evacuation of local residents and casino patrons as well as access to the area by first responders. Following that meeting, Dianne Feinstein generated a letter to the Bureau of Indian Affairs opposing the project.

Being participants in the meeting with Ms. Feinstein's office and the Sonoma County Fire District, it was surprising for us to read that the Sonoma County Fire District was listed as a supporter of this project. In response to the article, we contacted the Sonoma County Fire Department and spoke with Ron Bush. He advised us that the Sonoma County Fire District is "totally neutral" with reference to the project. They did generate a "letter of intent" in an effort to

---

<sup>1</sup> <https://finance.yahoo.com/news/koi-nation-announces-support-coalition-175400472.html?>

maintain “continuity of service” ... in the event the project does go through. The letter of intent was not a letter of support! The purpose for that letter was to protect taxpayers and the community in the event the project is approved. Identifying the Sonoma County Fire District as a supporter is inaccurate, according to Mr. Bush.

The Koi tribe are currently very active in Lake County, their indigenous homeland, asserting their legal rights as an indigenous tribe. This third attempt to build a casino resort in a neighboring county will have a significant negative impact on the community as was evidenced by the public comments during the public zoom hearing on September 27, 2023, refuting the Environmental Assessment prepared by Acorn Environmental. Our Community Matters joins the others in requesting No Action on this project.

Thank you,

Subject: Koi Nation Shiloh Resort and Casino Project

Dear Ms. Dutschke:

On February 9, 2023, we sent a correspondence to you clarifying information in a newspaper article concerning a list of claimed supporters of the Koi Tribe's casino application (enclosed). As mentioned in that letter there is virtually no support for this project in Sonoma county and the community surrounding the proposed project. In addition to misrepresenting the posture of the Sonoma County Fire District as supporting the casino project, the article listed Tom Schwedhelm, a former Santa Rosa police chief and later a Santa Rosa City Council member as a supporter.

Following the Press Democrat article, I was contacted by mutual friend of mine and Tom Schwedhelm who advised me that Mr. Schwedhelm was not contacted about the article and is not a supporter of the casino project. I thereafter spoke Mr. Schwedhelm personally concerning the article. He stated that he was asked, while a council member by a consultant to meet with the Koi Tribe concerning the project. He and another council member did meet with the Beltran brothers but did not (and does not) "support" the Casino project.

He advised the Koi to reach out to the community and discuss items such as crime mitigation funds and other issues impacting the community.

with correct certain misinformation being circulated by the Koi Tribe in the media concerning supporters of their application to build the Shiloh Casino. This misinformation causes confusion and alarm as our community continues to oppose this project.

In a recent newspaper article<sup>1</sup> the Koi listed 25 supporters, almost all of which were outside of Sonoma County and the proposed casino site. 18 of the supporters were other Tribes and Rancherias located outside of Sonoma County. The project is opposed by the Sonoma County

---

<sup>1</sup> <https://finance.yahoo.com/news/koi-nation-announces-support-coalition-175400472.html?>

indigenous tribes, the Sonoma County Board of Supervisors, and the Windsor Town Council. With the exception of the two former Santa Rosa Town Council members listed in the article, virtually all of our local and California government representatives oppose the Shiloh Casino project. The only local agency listed in support was, surprisingly, the Sonoma County Fire District as we had previously only heard negative comments from them in prior communications.

A group of local residents toured the fire ravaged areas surrounding the proposed casino with a Sonoma County fire captain and a representative of former senator Diane Feinstein's office in 2022. At that time the captain expressed considerable concern over the placement of such a large commercial development in a residential area that was fire prone and had already experienced fire. The chief concerns were over evacuation of local residents and casino patrons as well as access to the area by first responders. Following that meeting, Dianne Feinstein generated a letter to the Bureau of Indian Affairs opposing the project.

Being participants in the meeting with Ms. Feinstein's office and the Sonoma County Fire District, it was surprising for us to read that the Sonoma County Fire District was listed as a supporter of this project. In response to the article, we contacted the Sonoma County Fire Department and spoke with Ron Bush. He advised us that the Sonoma County Fire District is "totally neutral" with reference to the project. They did generate a "letter of intent" in an effort to maintain "continuity of service"... in the event the project does go through. The letter of intent was not a letter of support! The purpose for that letter was to protect taxpayers and the community in the event the project is approved. Identifying the Sonoma County Fire District as a supporter is inaccurate, according to Mr. Bush.

The Koi tribe are currently very active in Lake County, their indigenous homeland, asserting their legal rights as an indigenous tribe. This third attempt to build a casino resort in a neighboring county will have a significant negative impact on the community as was evidenced by the public comments during the public zoom hearing on September 27, 2023, refuting the Environmental Assessment prepared by Acorn Environmental. Our Community Matters joins the others in requesting No Action on this project.

Thank you,

  
Our Community Matters

SUBJECT: NOI Comments  
Koi Nation Fee-to-Trust and Casino Project

FROM: William V. McCormick, CEG  
5811 Faught Road  
Santa Rosa, CA 95403

Dear Ms. Dutschke:

One again I find it hard to believe that I am actually obligated to respond to such a preposterous land development proposal as this one put forward by the Koi tribe for a casino and resort at the border of the Town of Windsor, within Sonoma County. My property is bounded by Shiloh and Faught Rd, immediately east of this project. I am a local, licensed, Certified Engineering Geologist (CEG) who has spent the last 38 years evaluating the engineering and environmental feasibility of proposed development projects in Northern California, and I must say I have never seen such a ludicrous development proposal such as this one; ***a casino in a residential neighborhood is almost comedic....however, in my case it is an on-going tragedy.*** I spent 11 years opposing the fee-to-trust development on the western edge of Windsor with another tribe, only to find that even though I moved to the other side of town, I now have to defend my rights and way of life again!

From a professional perspective, I can't say that I have ever read a more flawed, incomplete and down-right unprofessional environmental document than the EA that was produced for this ludicrous development by Acorn Environmental. Clearly this firm is a paid advocate for the Koi tribe and their conduct and work product is subject to further scrutiny and professional investigation. This out-of-town firm clearly has no understanding of the local conditions and has produced this document using desktop study procedure, outdated data and no true field ground-truthing. Miraculously, all issues are deemed to be less than significant, to the public. This clearly shows that the EA was written only to the benefit of the Koi tribe and WITHOUT consideration to the surrounding neighbors or current environmental reality. This study is so flawed that it never even defines what the phrase less than significant means, and to whom. In order to accurately point out the numerous flaws of this 217-page study, it would take another 217-page letter.

***The flawed nature of the EA was clearly demonstrated in letters by neighbors, Sonoma County Native American Tribes and local government officials that the BIA has found it necessary to issue a NOI and the requirement for a formal EIS for this land and project.*** For sanity sake, I will reiterate only a few examples that clearly demonstrate why the Fee-to-Trust should not be considered for acceptance and that the only project that is acceptable is Alternative D – No Action Alternative.

## **TRAFFIC**

The provided traffic study is extremely flawed and incomplete. First of all, new traffic volumes will increase by up to 16,000 cars a day, within a residential neighborhood with **NO mitigations whatsoever proposed**. We cannot accept or be forced to accept such a degradation to our way of living. This amount of traffic will severely decrease the safety of our neighborhood.

In addition to this, the previously presented traffic study is completely flawed because it does not even consider traffic generated from the major intersection of Shiloh and Faught Rd; the corner I live on. Casino patrons will try to go around the traffic created on Old Redwood Highway at the main entrance, for the Faught Road/Shiloh back entry. For us who live here, we all know that Shiloh road is a part-time drag strip already....adding 16,000 cars to this will result in many injuries, death, property damage and overall degradation to our current peace and lifestyle with endless, 24-hour traffic noise. ***Let's be clear...there is NO practical or theoretical traffic solution than can reduce traffic impacts to a less than significant rating.***

## **WATER SUPPLY**

The EA claims that daily groundwater use needs on the site will be 170,000+ gallon per day and require additional wells to be drilled. This will severely affect neighboring supply wells with typical yields of only 10 to 20 gallons per minute and will cause a drawdown effect, possibly drying up adjacent domestic wells. This will also limit firefighting efforts in this wildfire hazard zone. ***Commercial use wells by the casino project will permanently overtax existing well and groundwater supplies for all citizens that rely on well water.***

## **WASTEWATER**

This category is especially disturbing. The previous EA estimates up to 400,000 gallons of waste per day. The proposed on-site system will include pipes under Pruitt Creek, the need for up to 16 million gallons of onsite storage and/or discharge into Pruitt Creek...which would permanently damage the existing creek environment. There will be so much excess sewage water that the EA states that up to 11 acres of offsite irrigation is possible, if they can find someone willing to take it...if not, the excess will be pumped into Pruitt Creek. ***We cannot allow Pruitt Creek to become a sewage canal.***

The proposed plans call for an on-site sewage treatment plant which will use hazardous chemicals for treatment which would be environmentally disastrous if spills were to occur.

What's most important here is that private sewage treatment plants on tribal lands are not subject to local operating guidelines, inspections or oversight. In addition, all waste biosolids would have to be continually trucked offsite to some other disposal site, presenting additional commercial traffic and potential environmental hazards for Sonoma County citizens.

***\*If this casino is permitted, the Town of Windsor will be bordered by TWO UNREGULATED WASTEWATER TREATMENT PLANTS.***

## **OTHER UNMITIGATABLE ISSUES**

There are many other unmitigable issues associated with having a casino in this neighborhood. It has been proven that areas surrounding casinos experience a sharp and lasting increase in **criminal activity**. Even though my property is located somewhat in a rural setting, I have had prostitutes and drug users use my driveway and vineyard access for their business. ***Criminal activity will increase exponentially with the Casino making our neighborhood unsafe.*** The tribe erroneously assumes that Sonoma County Sheriffs and Fire will service the project.

There is no way to eliminate new **NOISE** associated with traffic access to the site from patrons and deliveries, parking for over 5,000 cars and general **24-HOUR-A-DAY** operation of the casino itself. Other forms of **POLLUTION** will be car exhaust and light pollution. ***All of these factors will permanently damage our peace and SEVERELY reduce the VALUE of our properties.***

## **SUMMARY**

In a nutshell, this proposal to take this land into Fee-to-Trust status and permit a casino in a residential neighborhood is absolutely ludicrous and since there are numerous issues that cannot be adequately mitigated, any future environmental study will be flawed and unacceptable. Let me summarize the fatal flaws for this project:

- NO additional environmental study can adequately characterize the overwhelming negative effects to the neighborhood and Sonoma County Citizens and **WILL BE A WASTE OF TIME.**
- The tribe has not presented mitigating factors for critical issues
- There is no definition of Less than Significant and this implication for all issues clearly ignores the concerns of neighbors and Sonoma County citizens
- The proposed development is opposed by every civic organization and the overwhelmingly majority of Sonoma County citizens.
- The proposed development is opposed by existing Tribes that originate from Sonoma County
- We already have two casinos in Sonoma County, we don't need a third

**What is completely omitted from the previous EA document and will most likely be omitted in future studies is the description and acknowledgment of the permanent damage to the existing residential and agricultural culture that exists in this area.**

No credence is given to forever changing the lives of the current residents, which far outnumber the 90 Koi members who would be the beneficiaries of residential neighborhood destruction. ***Clearly none of the Koi would live in this neighborhood once the casino is built. I would also like to point out that NEVER has permission been granted in the past for a tribal casino more than 15 miles from their native origins nor has a casino EVER been permitted next to a residential neighborhood...***this policy should not be changed!

I have one final comment that needs to be taken into consideration by the BIA. This current process of **RESERVATION SHOPPING** at will needs to cease, and the Federal Government needs to find other more positive ways to assist tribal communities that doesn't destroy the lives of others in the process and is not based on a monopoly of casino greed. Where is it written in BIA policy that the only way for Tribes to become financially self-supporting is by granting Fee-to-Trust land specifically for casino building. Tribal rights should not be more important than all other citizens' rights. We are all **US Citizens** and one group should not be allowed to infringe upon the rights of others for selfish means, especially since the citizens that could be negatively and permanently affected have lived here for many decades.

In closing, I implore the BIA to reject any future EIS studies and considering granting Fee-to-Trust for the Koi Nation on this Parcel of land, and only consider **Alternative D- No Action Alternative**. **I also strongly encourage you to guide the Koi Nation into finding fee-to-trust land opportunities outside of Sonoma County.**

Respectfully submitted,

William V. McCormick, CEG

Neighborhood Resident

## Public Hearing

PUBLIC MEETING  
KOI NATION SHILOH RESORT AND CASINO PROJECT  
September 27, 2023  
6:00 p.m.

Reported by:  
Brooke Silvas  
CSR 10988  
Job No. 1031079

1                   SEPTEMBER 27, 2023; 6:00 P.M.

2

3                   CHAD BROUSSARD:   Okay.   We're going to  
4   go ahead and start the hearing.   We were having  
5   some audio difficulties there for a second.   But I  
6   think we have fixed that.

7                   So good evening.   The Bureau of Indian  
8   Affairs welcomes you to this public hearing for  
9   the proposed Koi Nation fee-to-trust and casino  
10   project environmental assessment, or EA for short.  
11   My name is Chad Broussard.   And I'm an  
12   Environmental Protection Specialist for the  
13   Pacific Regional Office of the Bureau of Indian  
14   Affairs, or BIA for short.   The BIA is the agency  
15   within the United States Department of the  
16   Interior.   I will be your facilitator for this  
17   evening's public hearing.   Here with me are the  
18   representatives from Acorn Environmental, the  
19   BIA's consultant.   This hearing will be closed  
20   captioned for the hearing-impaired.   To activate  
21   this feature, please click on the closed  
22   captioning icon at the bottom of your screen.

23                  The purpose of tonight's hearing is to  
24   facilitate public review and comments on the  
25   Environmental Assessment, or EA, for the proposed

1 fee-to-trust land acquisition in unincorporated  
2 Sonoma County near the Town of Windsor and the  
3 subsequent proposed development of a casino for  
4 the federally recognized Koi Nation. If the BIA  
5 approves the proposed fee-to-trust acquisition, it  
6 will hold the property in trust for the Tribe,  
7 allowing for the development of a gaming facility  
8 on-site. However, the National Environmental  
9 Policy Act, also known as NEPA, requires that the  
10 BIA conduct an environmental review before  
11 deciding whether or not to accept the land into  
12 trust. An EA has been prepared as the first step  
13 in this environmental review. We published the EA  
14 on September 12, 2023. The purpose of this  
15 evening's hearing is to facilitate public review  
16 and comments on the EA. We will consider all  
17 comments received during the public comment  
18 period, which ends on October 27, 2023. After the  
19 close of the comment period, we will review all  
20 comments and decide whether to issue a finding of  
21 No Significant Impact or initiate the  
22 Preparation of an Environmental Impact Statement.

23 If you would like to make a spoken  
24 comment at the hearing tonight, please use the  
25 Zoom raised hand feature. To raise your hand,

1 click the hand symbol at the bottom of your screen  
2 or enter star 9, if joining by phone. This will  
3 place you in line to speak. We will do our best  
4 to take speakers in the order that hands are  
5 raised. When it is your turn to speak, I will  
6 call your name and unmute your connection so you  
7 can give your comment. Everyone will be given 3  
8 minutes to make their remarks to ensure that  
9 everyone has the opportunity to speak. A public  
10 hearing is not the best forum for lengthy  
11 comments, due to the constraints of time. If you  
12 have a lengthy comment, we encourage you to submit  
13 a written letter. Either a hard copy letter, a  
14 paper letter, or you can send your comments in via  
15 e-mail. All comments will receive equal weight,  
16 whether spoken or written. We have a stenographer  
17 here that will record your spoken comments word  
18 for word, so that they can be considered fully as  
19 comments on the record. With that said, please  
20 restate your name for the record before giving  
21 your comment and please speak as clearly as  
22 possible so that the stenographer can understand  
23 and accurately document your words.

24 Please understand that the purpose of  
25 tonight's hearing is not to have a

1 question-and-answer session or a debate of any  
2 kind. We will not respond to questions or engage  
3 in debate. Instead, we are here to listen and  
4 document your comments for the record. We will  
5 then carefully consider your spoken and written  
6 comments received by the close of the comment  
7 period on October 27, 2023, and decide whether to  
8 issue a Finding of No Significant Impact or  
9 initiate the preparation of an Environmental  
10 Impact Statement.

11 Now, we have asked our consultant, Acorn  
12 Environmental, to provide you with a brief  
13 presentation on the Proposed Action, its Purpose  
14 And Need, the alternatives analyzed in the EA, and  
15 also an overview of the NEPA process.

16 ACORN ENVIRONMENTAL: Thank you, and  
17 good evening.

18 As noted, we will be going over the  
19 purpose for this public hearing. In addition, we  
20 will be giving an overview of the environmental  
21 assessment process under the National  
22 Environmental Policy Act, commonly known as NEPA,  
23 the proposed action and alternatives, issues  
24 analyzed in the environmental assessment, and how  
25 to make public comments on the environmental

1     assessment.

2                 The purpose of the hearing tonight is to  
3     obtain public comments and feedback on the  
4     Environmental Assessment, also known as an EA,  
5     prepared for the Koi Nation Shiloh Resort and  
6     Casino Project, which will be referred to as "the  
7     Proposed Project" during this presentation.

8                 It should be noted that public feedback  
9     and input is an integral part of the NEPA Process,  
10    which will be explained in detail later in the  
11    presentation. However, first some background on  
12    the Proposed Action and Proposed Project.

13                NEPA requires federal agencies to take  
14    into account the environmental impact of federal  
15    actions and resulting projects prior to their  
16    implementation.

17                EAs are prepared to determine whether or  
18    not a federal action has the potential to cause  
19    significant environmental effects. In this case,  
20    the Koi Nation of Northern California has  
21    submitted an application to the BIA requesting  
22    that the Department of the Interior take  
23    approximately 68.6 acres, located in Sonoma  
24    County, into federal trust for gaming purposes in  
25    accordance with the Indian Gaming Regulatory Act.

1 This is the proposed federal action being  
2 considered by the BIA.

3 If the property is taken into federal  
4 trust, the Tribe proposes to build a resort  
5 facility that includes a casino, hotel,  
6 ballroom/meeting space, event center, spa, and  
7 associated parking and infrastructure.

8 This slide illustrates the key steps in  
9 the NEPA process for the Proposed Action. To  
10 commence the process, a notice of preparation, or  
11 NOP, was sent to interested parties, the State  
12 Clearinghouse and published in the local  
13 newspaper. The NOP announced the BIA's intent to  
14 prepare an EA, and solicited comments from the  
15 public and agencies on the scope of potential  
16 issues, alternatives, and impacts to be assessed  
17 in the EA.

18 When scoping was concluded, the EA was  
19 prepared. Once the EA was drafted and ready for  
20 public review, a notice of availability was sent  
21 to interested parties in addition to being  
22 published in the newspaper. The notice of  
23 availability kick-started the public comment  
24 process.

25 Once the public comment period ends on

1     October 27, 2023, the comments received are  
2     reviewed and responses are prepared by the BIA.  
3     The BIA will then consider the EA, comments  
4     received, their responses, and decide on one of  
5     two actions: issuance of a Finding of No  
6     Significant Impact, or FONSI, signaling the end of  
7     the NEPA process, or the preparation of an  
8     Environmental Impact Statement, or EIS, another  
9     step in the NEPA process.

10                 As seen on this slide, the components of  
11     the EA are organized into seven chapters. An  
12     overview of the Proposed Project and the  
13     alternatives to the Proposed Project will be shown  
14     on the following slides.

15                 This map shows the location of the  
16     Project Site in unincorporated Sonoma County,  
17     outside of, but adjacent to, the Town of Windsor.

18                 As shown, the Project Site is located  
19     southeast of the intersection of Old Redwood  
20     Highway and Shiloh Road. Regional access is  
21     provided by Highway 101. The Project Site is  
22     currently developed with a residence and operating  
23     vineyard and is bisected by Pruitt Creek. The  
24     site is zoned by the County as Land Intensive  
25     Agriculture and land uses in the immediate

1 surrounding area are a mixture of residential,  
2 agriculture, commercial, and recreation.

3 The EA assesses three development  
4 alternatives within the Project Site, including  
5 the Tribe's Proposed Project, or Alternative A, a  
6 reduced intensity alternative, and a non-gaming  
7 alternative, as well as the No Action Alternative  
8 as required by NEPA. These alternatives will be  
9 described in sequential order, starting with  
10 Alternative A.

11 Alternative A, the Tribe's Proposed  
12 Project, includes the before mentioned transfer of  
13 68.6-acres of land into trust, and subsequent  
14 development by the Tribe of a three-story casino  
15 with amenities in addition to ballrooms/meeting  
16 space and event center, five-story hotel with pool  
17 and spa area, parking garage, and surface parking  
18 lots. Circulation facilities would include two  
19 clear span bridges across Pruitt Creek riparian  
20 area, including a pedestrian bridge and vehicular  
21 bridge. Support facilities would include onsite  
22 wells, a water treatment plant, and wastewater  
23 treatment plant.

24 This figure shows the site plan for the  
25 Proposed Project. As can be seen, the riparian

1 area along Pruitt Creek and some of the existing  
2 vineyards around the perimeter of the Project Site  
3 would be retained, but the onsite residence would  
4 be removed.

5 This slide shows an architectural  
6 rendering of Alternative A from the corner of  
7 Redwood Highway and Shiloh Road.

8 This slide shows additional renderings  
9 of Alternative A from the viewpoints of Shiloh  
10 Road and Old Redwood Highway with retained  
11 vineyard buffer areas in the foreground.

12 Alternative B would be similar to  
13 Alternative A, including the size of the gaming  
14 facility. However, the hotel would be smaller  
15 with fewer guest rooms and the event center would  
16 not be constructed. Less parking would also be  
17 constructed, and the support facilities would be  
18 smaller in size.

19 This figure shows the site plan for  
20 Alternative B. As shown here, the development  
21 components would be in similar positions as  
22 Alternative A. Under this scenario, more of the  
23 existing vineyard would be preserved due to the  
24 lack of the surface parking lot.

25 Under the non-gaming alternative,

1 Alternative C, development would include a hotel  
2 with 200 guest rooms with spa and pool area as  
3 well as a restaurant, winery, and visitor's  
4 center. Alternative C would not include a casino  
5 element. Parking would be reduced in size, and  
6 support facilities would still be similar to  
7 Alternative A and B, but smaller in size.

8 This figure shows the site plan for  
9 Alternative C. Under this alternative, more of the  
10 vineyard would be preserved than would occur under  
11 Alternative A and B.

12 With the last alternative, Alternative  
13 D, the No Action Alternative, no land will be  
14 taken into trust for the benefit of the Tribe and  
15 no change in the current land use of the Project  
16 Site would occur. The BIA would take no action  
17 under this alternative.

18 Section 3 of the EA, titled Affected  
19 Environment and Environmental Consequences,  
20 provides an analysis of the impacts of the project  
21 alternatives associated with the issue areas  
22 listed on this slide, including direct, indirect,  
23 and cumulative effects.

24 Within each environmental issue area  
25 examined in Section 3, the EA provides a

1 description of the regulatory setting, the  
2 affected environment, and the environmental  
3 consequences associated with implementation of  
4 each alternative to an equal level. Mitigation  
5 measures necessary to reduce impacts to less than  
6 significant levels are provided in Section 4.

7           The EA identified a number of Best  
8 Management Practices, known as BMPs, and  
9 mitigation measures to avoid or reduce the  
10 potential adverse environmental effects resulting  
11 from the alternatives. For the sake of brevity,  
12 this presentation only summarizes key BMPs and  
13 mitigation measures identified for Alternative A.  
14 For a full description of the BMPs and mitigation  
15 measures, please refer to Sections 2 and 4 of the  
16 EA.

17           To prevent impacts associated with soil  
18 erosion and water quality, the Tribe would comply  
19 with the National Pollutant Discharge Elimination  
20 System General Construction Permit requirements,  
21 which includes the preparation of a Stormwater  
22 Pollution Prevention Plan, also known as SWPPP.  
23 To ensure effectiveness of the SWPPP, a sampling  
24 and monitoring program would be implemented.  
25 Other measures to reduce impacts to water

1 resources include the Tribe using Low Impact  
2 Development measures for operational stormwater  
3 conveyance, detention, and treatment, and  
4 implementing a groundwater monitoring program to  
5 reduce the impacts to other groundwater wells in  
6 the vicinity of the Project Site.

7 Air Quality effects during construction  
8 would be reduced through the implementation of  
9 fugitive dust and wind erosion prevention measures  
10 and other measures to reduce air pollutant and  
11 greenhouse gas emissions, such as limiting  
12 equipment and vehicle idling time. During  
13 operation, air pollutant and greenhouse gas  
14 emissions would be reduced through building to the  
15 minimum Silver standard of Leadership in Energy  
16 and Environmental Design, better known as LEED,  
17 and minimizing the use of natural gas, providing  
18 EV charging ready parking spaces, and giving  
19 preferential parking to vanpools and carpools.

20 The biological resource analysis  
21 identified potential impacts to habitats and  
22 special-status species. These impacts would be  
23 reduced through conducting pre-construction  
24 surveys for potentially affected special-status  
25 species and nesting birds. Habitat preservation

1 measures include avoiding riparian habitat and  
2 Waters of the U.S. to the maximum extent feasible,  
3 limiting ground disturbance activities near  
4 wetlands during the dry season, and construction  
5 personnel awareness training.

6 While there are no known Cultural  
7 Resources within the project site, there is a  
8 potential for buried resources. Therefore, all  
9 ground disturbing activities within 150 feet of  
10 Pruitt Creek would be monitored by a qualified  
11 archeologist and Native American monitor. In the  
12 event of an inadvertent discovery, work would stop  
13 and the appropriate agency and Tribe would be  
14 notified.

15 A traffic study was prepared to  
16 quantitatively assess the impacts of the  
17 alternatives on the surrounding road network and  
18 included recommended measures to mitigate  
19 identified impacts down to less-than-significant  
20 levels. For Alternative A, these measures include  
21 restriping, adjusting signal timing, and  
22 installation of signals. While the timing for the  
23 off-site roadway improvements is not within the  
24 jurisdiction or control of the Tribe or BIA, the  
25 Tribe shall make good faith efforts to assist with

1 implementation of the opening year mitigation  
2 improvements recommended in the traffic study  
3 prior to opening day. The Tribe shall make fair  
4 share contributions to the cumulative 2040 traffic  
5 mitigation measures. Funding shall be for design  
6 standards consistent with those required for  
7 similar facilities in the region.

8 Water and wastewater services would be  
9 entirely onsite. Therefore, no impacts to public  
10 water or wastewater services will occur. Per  
11 Public Law 280, the Project Site once taken into  
12 trust would fall under the criminal jurisdiction  
13 of the Sonoma County Sheriff's Office after tribal  
14 consent. The Tribe proposes to contract for law  
15 enforcement services to the Project Site from  
16 Sonoma County Sheriff's Office in order to provide  
17 compensation for the services provided. A Letter  
18 of Intent between the Tribe and Sonoma County Fire  
19 District specifies the intention of the Tribe and  
20 Sonoma County Fire District to enter into a  
21 Memorandum of Understanding for the provision of  
22 fire response and emergency medical services to  
23 the Project Site. If a service agreement is not  
24 reached with the Sonoma County Fire District or  
25 other provider, then an onsite fire station would

1 be built, equipped, and staffed to reduce  
2 potential fire service impacts.

3 Noise generated during construction and  
4 operation could negatively affect nearby sensitive  
5 receptors, and therefore mitigation measures are  
6 proposed during construction and operation.  
7 Construction noise reduction measures include  
8 limiting construction hours, equipping mufflers,  
9 and modifying certain construction activities  
10 within 250 feet of sensitive receptors.

11 Operational noise would be reduced through  
12 shielding HVAC systems in addition to the  
13 wastewater treatment plant. To address potential  
14 cumulative noise impacts due to increases in  
15 traffic, the Tribe would make fair share payments  
16 towards sound-reducing pavement on certain  
17 segments on Shiloh Road and Old Redwood Highway,  
18 or, at the request of the homeowner, pay for the  
19 installation of dual pane exterior windows.

20 Measures to reduce the potential for  
21 impacts associated with hazardous materials  
22 include following best management practices for  
23 filling and servicing construction equipment and  
24 vehicles to prevent hazardous materials release or  
25 fire ignition. Other measures would be

1 implemented to further reduce potential fire  
2 hazard impacts. This includes adhering to National  
3 Fire Protection Association standards; developing  
4 an evacuation plan; performing regular testing,  
5 maintenance, and inspections of on-site equipment,  
6 and different forms of vegetation management, such  
7 as onsite vineyard maintenance and developing a  
8 riparian corridor wildfire management plan.

9           An emergency evacuation plan shall be  
10 prepared to complement the County of Sonoma's  
11 Emergency Evacuation Plan and will at a minimum  
12 include, but not be limited to the procedures for  
13 early evacuation of the Project Site unless  
14 specifically directed otherwise by the lead  
15 authority for evacuations, protocols for vehicles  
16 evacuating the site, providing transportation for  
17 visitors and employees that do not have a mode of  
18 transportation on-site, and use of an emergency  
19 notification system. Management and staff at the  
20 casino-resort shall be trained on evacuation  
21 procedures for guests and visitors as part of  
22 their new hire orientation and shall receive  
23 updated evacuation procedures training annually.

24           Finally, best management practices to  
25 address potential effects associated with visual

1 resources include a number of measures to shield  
2 and minimize lighting. This would include fully  
3 or partially shielding outdoor light fixtures and  
4 designing lights to be in accordance with the  
5 International Dark Sky Association's Model  
6 Lighting Ordinance to reduce cast light or glare  
7 on the nearby creek. Other lighting features  
8 include limiting pole-mounted lighting to 25 feet,  
9 using LEDs with cut-off lenses and downcast  
10 illumination where applicable, and not using  
11 strobe lights, spotlights, or flood lights. For  
12 aviation safety, marking and lighting per the  
13 Federal Aviation Administration requirements would  
14 be installed.

15 A hard copy version of the EA can be  
16 reviewed at the Windsor Regional Library, located  
17 at 9291 Old Redwood Hwy #100, Windsor, CA 95492.  
18 A digital copy can be reviewed and downloaded from  
19 the project website at  
20 [www.shilohresortenvironmental.com](http://www.shilohresortenvironmental.com).

21 Written comments on the EA can be mailed  
22 or hand delivered to the Bureau of Indian Affairs  
23 Pacific Regional Office, whose address is shown on  
24 this slide, or you can email comments to  
25 [chad.broussard@bia.gov](mailto:chad.broussard@bia.gov).

1           When submitting written comments, please  
2   include "EA Comments, Koi Nation Shiloh Resort and  
3   Casino" in the email subject line or at the top of  
4   a written comment letter.

5           For further information on anything  
6   mentioned in the presentation today or other  
7   issues, you can contact Mr. Chad Broussard with  
8   the BIA Pacific Regional Office via email. This  
9   slide concludes the presentation.

10          CHAD BROUSSARD: Okay. Thank you for  
11   that presentation. Now we will proceed with  
12   public comments. Remember that all comments will  
13   be limited to three minutes. Also, please  
14   remember to state your name before speaking and  
15   speak as clearly as possible. Also, to best  
16   participate in this hearing process, I offer the  
17   following ground rules and suggestions.

18          First, summarize your main points within  
19   your three-minute public speaking period. Be as  
20   specific as you can and only substantive comments  
21   will be considered for our NEPA process. In other  
22   words, if you tell me that you do not like the  
23   analysis in the EA, but give no specific  
24   rationale, there will be very little to which we  
25   can consider in our review. Second, avoid

1 personal attacks. We understand there may be  
2 strong feelings, pro and con, regarding the  
3 Proposed Project. The best opportunity to state  
4 your views convincingly is through a brief factual  
5 presentation. Third, this hearing is not a  
6 referendum. We are not here to count the number  
7 of people for or against the project. The purpose  
8 of the hearing is to collect comments on the  
9 adequacy or the scope of the EA only. And all  
10 comments will be considered equally, no matter how  
11 many times they're made. Please limit the  
12 substance of your comments accordingly. If  
13 someone ahead of you has made your point, there is  
14 no need to repeat it.

15 Remember to unmute your microphone  
16 before speaking. I will let you know if your  
17 microphone appears to be muted. And then fifth,  
18 we may ask you to adjust your system if audio  
19 feedback noises are heard. Typically these noises  
20 can be eliminated by turning down the volume on  
21 the speakers of your computer. And then finally  
22 offensive language or behavior will not be  
23 tolerated and will result in your immediate  
24 removal from the hearing and possible referral to  
25 the appropriate authorities.

1                   Okay. With that introduction, our first  
2 speaker will be representative vice chairman of  
3 the Koi Nation, Dino Beltran.

4                   DINO BELTRAN: Good evening, everyone.  
5 Welcome to the Bureau of Indian Affairs Public  
6 Comment Hearing on the Koi Nation of Northern  
7 California Shiloh Casino and Resort Project. I'm  
8 the Koi Nation Vice Chairman Dino Beltran. And  
9 I'm joined by Chairman Darren Beltran and Council  
10 Secretary Judy Fast Horse. Our nation is  
11 committed to hearing testimony on our project.  
12 The Department of Interior will analyze all  
13 comments on the Koi's environmental assessment and  
14 will ultimately make the decision on whether the  
15 EA is approved, which we believe is merited. The  
16 Koi Nation believes the project is in the best  
17 interest of the Pomo citizens and will also serve  
18 the local community, Sonoma County, and the region  
19 at large through an economic development  
20 opportunity and government-to-government  
21 partnerships. As a Pomo tribe with thousands of  
22 years of history in the Russian River Valley, we  
23 will continue to protect the environment, be a  
24 good neighbor, and construct our facility in a  
25 manner consistent with best practices, energy

1 conservation, presentation, and local community  
2 standards. We want a resort that the community  
3 can be proud of. Our nation has had a long tragic  
4 history with respect to the U.S. and the  
5 California governments, including forest  
6 displacement, bloody massacres, and a lack of  
7 resources. In this modern age, the Nation can at  
8 long last foster its own self-determination,  
9 cultural revival, and economic self-sufficiency,  
10 laying a foundation for the next generations. We  
11 have partnered on this project with the Chickasaw  
12 Nation, on Oklahoma tribal nation, nationally  
13 respected in the medical, business, and gaming  
14 fields. As part of the federal environmental  
15 process, the Koi Nation has partnered with Acorn  
16 Environmental, a Sacramento-based environmental  
17 consultancy firm whose principals have decades of  
18 experience nationally with successfully approved  
19 environmental assessments for tribal gaming  
20 facilities. Over a dozen experts in the field of  
21 traffic, crime, air quality, jobs, fire safety,  
22 water quality, air quality have provided a  
23 well-documented EA that address any and all  
24 potential impacts and demonstrates that the  
25 project will cause no significant impacts to the

1 environment. We believe our project can co-exist  
2 in a beneficial manner, not only with the large  
3 commercial shopping area just a couple  
4 streetlights away with Home Depot and Walmart, but  
5 also with the local neighborhood. The Koi Nation  
6 is committed to transparency with our project has  
7 a website with information on the nation and the  
8 project. We also have a Facebook page with  
9 important information. Tonight's hearing is not  
10 required by federal law, but the Nation believed  
11 it is important for the public to have the  
12 opportunity to put its views on record. We are  
13 pleased with over 17 Native-American tribal  
14 governments supporting our project, as do labor,  
15 like the Carpenters Union, and hundreds of local  
16 citizens. While we know some of the community  
17 have concerns about the project with respect to  
18 traffic, safety, and fire protection, we believe  
19 these items have been addressed in the EA in a  
20 prudent, comprehensive, and thoughtful way. In  
21 conclusion, and keeping in mind that comments are  
22 limited to three minutes, I appreciate all of the  
23 attendees that have joined together tonight and we  
24 look forward to your comments. Thank you.

25 CHAD BROUSSARD: Thank you, Chairman.

1 The next speaker will be Greg Sarris, Chairman of  
2 the Federated Indians of Graton Rancheria.

3 GREG SARRIS: Thank you, Mr. Broussard,  
4 and all attending tonight. I am Greg Sarris,  
5 chairman of the Federated Indians of Graton  
6 Rancheria, a tribe of over 1500 enrolled citizens  
7 of Coast Miwok and Southern Pomo descent. We  
8 share the borderlands area of Windsor with two  
9 other dry -- Southern Pomo Tribes, Dry Creek and  
10 Lytton. We are opposed to this project for  
11 several reasons. One, of course, is for our  
12 concern for the local citizens. The fire issues  
13 are huge, as you all know. And given an  
14 evacuation of the casino in a fire, which has been  
15 estimated at a two -- two-and-a-half-hour  
16 evacuation of the casino should such a thing have  
17 to happen, a delay for those other citizens trying  
18 to get out. But our main concern tonight is with  
19 our sovereignty, as a sovereign nation. Should  
20 this project go through and this land be deemed  
21 trust land for the Koi Nation, the Federated  
22 Indians of Graton Rancheria and other Southern  
23 Pomo tribes would lose the opportunity to protect  
24 their sacred sites, burial grounds, traditional  
25 plants and species that we have taken care of

1 since the beginning of time, as we like to say.  
2 These things are important to us, and our tribe  
3 now is currently overseeing the sacred sites,  
4 burial grounds, and species of this area. We  
5 don't oppose a restored tribe getting land in a  
6 trust. We, in fact, were a tribe that were  
7 taken -- land was restored and land taken into  
8 trust, but it was in the heart of our aboriginal  
9 territory, seven miles from the original  
10 Rancheria. It is 49 miles from the proposed site  
11 here. 49 miles from their original reservation.  
12 And never, never has a Department of Interior  
13 taken land into trust, restored lands, that far.  
14 Never further than 15 miles from their original  
15 Rancheria. It would set a terrible precedent,  
16 affecting the sovereignty of many federally  
17 recognized tribes, now and in the future. So  
18 please understand and see this. We know from the  
19 documents that we have our histories, our family  
20 histories, that we are -- our language, which is  
21 distinct and different from that of the Eastern  
22 Pomo, of which Koi Nation speaks is very  
23 different. We're different languages, cultures,  
24 and so forth. Those must be respected. And we  
25 must be able to protect them.

1                   Finally, we ask that you give us a  
2   60-day delay in responding with written comments.  
3   We did -- you did not meet with us before, and the  
4   document is very thick. Again, thank you for  
5   hearing me out and taking the time.

6                   CHAD BROUSSARD: Thank you, Chairman.  
7   The next speaker will be Lauren S.

8                   LAUREN S.: Hello. My name is Lauren.  
9   I have a degree in econometrics from California  
10   State University. And I've been in the ag  
11   industry for over 15 years. I live very close to  
12   the proposed site. And I know that Sonoma County  
13   does not have the necessary safety infrastructure  
14   to support a casino and event center with the  
15   capacity of 20,000 people, especially not in the  
16   fire-prone Shiloh area. Sonoma County usually has  
17   only two deputies to cover the entire  
18   unincorporated area of the Sonoma County. This  
19   leads to average response times of up to 30  
20   minutes currently. This unincorporated area runs  
21   from the coast and south to Petaluma. There is  
22   barely enough coverage and long wait times for  
23   emergency response as is. The impact report for  
24   the proposed Shiloh casino admits there will be an  
25   increase in crime whenever there is an increase in

1 people. But the report falsely claims empirical  
2 evidence on an increase in crime with casinos. In  
3 reality, there is a plethora of empirical studies  
4 published in journals shows statistically  
5 significant increase in crime with casinos.  
6 Casinos do not just shift crime from neighboring  
7 regions, but creates crime. We estimate -- this  
8 is a quote from them -- crime-related social costs  
9 in casino communities at \$75 per adult per year.  
10 Their study shows increases in the four to five  
11 years after a casino opens, including at five  
12 years a hundred assaults more per 100,000  
13 population. At three years, over 16 more  
14 robberies per 100,000. And at four years, six and  
15 a half to ten more rapes per 100,000 people. This  
16 data studied -- data and study compares their  
17 findings to high volume sites such as Disney World  
18 and Mall of America. I request that this proposal  
19 be rejected wholesale. At the very minimum, it  
20 must be paused until a truthful and realistic  
21 impact report can be presented to the residents of  
22 Sonoma County, including the results of the  
23 evacuation rate analysis within the county. Thank  
24 you.

25 CHAD BROUSSARD: Thank you for your

1 comment.

2 The next speaker will be Patricia  
3 Kempton.

4 Ms. Kempton, I think you're on mute. If  
5 you can unmute your microphone.

6 PATRICIA KEMPTON: My name is Patricia  
7 Kempton. I live very near -- adjacent. I live on  
8 Shiloh Road. I was here during the 2017 fire and  
9 the other ones. My husband would not evacuate  
10 when everybody else did. We stayed on our  
11 property. I saw cinders up off of Shiloh Mountain  
12 and the area behind us across our property and  
13 some of them are probably the ones that exploded  
14 and landed in Coffey Park and in Fountain Grove  
15 and near the Kaiser hospital on Old Redwood Road.  
16 I don't know that the developers of this property  
17 have any concept of what it was like. We have a  
18 two-lane road. Part of the environment would  
19 be -- in order to get people out, I would assume  
20 they would have to widen the roads maybe to four  
21 lanes. That would mean eminent domain, taking my  
22 home away from me. There's a lot of homes on my  
23 street. Not a lot. But some are within 30 feet  
24 of the actual street. So those homes I suppose if  
25 this project goes through in the environmental

1 impact negates those people's homes and their  
2 rights to live there, they would lose their homes.  
3 I'm concerned we live on a well. And although I  
4 depend on that well not only for the water for my  
5 family and to feed -- to take care of the small  
6 farm crops that we have to feed ourselves, I also  
7 depend on that water, if I had to put out a fire  
8 on my own property and stand my ground against a  
9 fire. We've had several major fires where entire  
10 blocks and blocks and blocks of people were  
11 literally burned out within a matter of an hour  
12 and a half to two hours. To put a huge complex  
13 right in the middle of the path of everything  
14 coming down off of that mountain and fill it with  
15 thousands and thousands of people and expect them  
16 to be able to drive out on these two narrow roads  
17 or even if they were widened is -- I think it is  
18 irresponsible. Also, it may mean if those people  
19 were being evacuated, those of us who live here  
20 may not be able to evacuate and we may perish as a  
21 result. I'm concerned about the eminent domain  
22 that may have to happen to take my property. I'm  
23 concerned about the impact on the water. The  
24 water table here in the community. I'm very  
25 concerned about the fire hazard. I know I can

1 take care of my property. But if 20,000 people  
2 were on the road ahead of me, I would hate to  
3 think that I would burn to death just so the Koi  
4 Tribe can have a casino right across the street  
5 from me. I thank you for your time.

6 CHAD BROUSSARD: Thank you, Ms. Kempton,  
7 for your comments.

8 The next speaker will be Curtis  
9 Ferreira.

10 CURTIS FERREIRA: Hi. My name is Curt  
11 Ferreira. I'm calling in support of the Koi  
12 Nation's proposed resort and casino. This project  
13 will be great for the construction workers and the  
14 community. I strongly urge the BIA to approve  
15 this project. Thank you.

16 CHAD BROUSSARD: Okay. Thank you,  
17 Mr. Ferreira, for your comments.

18 The next speaker will be Francisco  
19 Martinez. Mr. Martinez -- thank you.

20 FRANCISCO MARTINEZ: Hello. Good  
21 evening. My name is Francisco Martinez. And I'm  
22 a field rep with the Carpenters Union. And I just  
23 want to say that these jobs will create maybe over  
24 1500 permanent jobs once fully operational. And  
25 the Koi Nation's partnership with Northern

1 California Carpenters Union is going to bring  
2 hundreds of union jobs to Sonoma County, including  
3 a lot of Sonoma County residents that are members  
4 of the union. So -- and I just want to say this  
5 too. This project's mitigation plans include  
6 provisions for on-site security, a law  
7 enforcement, traffic management, fire mitigations,  
8 and use of readily available on-site water. Okay.  
9 So I encourage you to -- to go forward with this  
10 project. We are really in favor of it. Thank you  
11 so much for your time.

12 CHAD BROUSSARD: Thank you,  
13 Mr. Martinez, for your comments.

14 The next speaker will be Lisa Lellis.

15 Ms. Lellis, I think you might be on  
16 mute. Please unmute your microphone. Lisa  
17 Lellis, are you there?

18 Okay. We're going to go to the next  
19 speaker. And, Ms. Lellis, if you're able to come  
20 back to your computer, please raise your hand  
21 again and we will call you later. So the next  
22 speaker will be Albert Lustre.

23 ALBERT LUSTRE: Good evening. My name  
24 is Albert Lustre with the Carpenters Union  
25 organizing department. I'm calling to fully

1 support this project. This project is going to  
2 bring hundreds of jobs, not just for construction  
3 workers but for the community. It is going to  
4 bring so much revenue. It will help the economy  
5 in the Sonoma area and all around the area. And  
6 it is going to help many, many new apprentices  
7 from our construction background to get into a  
8 construction career and build a career path. I  
9 encourage you to approve the project. And then  
10 let's make this happen. Thank you for your time.

11 CHAD BROUSSARD: Okay. Thank you for  
12 your comment.

13 The next speaker will be William  
14 McCormick.

15 WILLIAM MCCORMICK: Thank you. Bill  
16 McCormick. My property is bounded by Shiloh and  
17 Faught Road, just east of the project. I'm a  
18 licensed certified engineering geology engineer,  
19 who spent the last 30 years evaluating the  
20 feasibility of proposed projects in Northern  
21 California. And I must say I've never seen such a  
22 ludicrous development proposed such as this. A  
23 casino in a residential neighborhood is almost  
24 comedic. However, in my case, it is an ongoing  
25 tragedy. I spent 11 years opposing the

1 fee-to-trust bill on the western side of Windsor  
2 with another tribe, only to find that even though  
3 I moved to the other side of town, I have to  
4 defend my rights and way of life again. When we  
5 talk about some of the negative impacts initial  
6 period of time, the provided traffic study is  
7 extremely flawed and incomplete. First of all,  
8 all new traffic volumes will increase up to 16,000  
9 cars a day without -- within a residential  
10 neighborhood, with no mitigations whatsoever  
11 proposed. We cannot be forced to accept such a  
12 degradation to our way of living. The increased  
13 traffic will impact the safety of our  
14 neighborhood. In addition to this, the present  
15 traffic study is completely flawed because it does  
16 not even consider traffic generated at the  
17 intersection of Shiloh and Faught Road, where I  
18 live. The casino patrons will try to go around  
19 the traffic on Old Redwood Highway at the main  
20 entrance of Shiloh and Faught Road. For us who  
21 live here, we all know that Shiloh Road is a  
22 part-time drag strip already. Adding 16,000 cars  
23 a day to this will result in many injuries, death,  
24 and property damage.

25 The water supply. There's -- 170,000

1 gallons a day. That will drain my well that I  
2 rely on to live.

3 The wastewater. This category is  
4 especially disturbing. The EA -- the proposed  
5 system will include pipes, the need for 16 million  
6 gallons of on-site storage. The creek seems to be  
7 the default in either one of their categories.  
8 The proposed plan calls for on-site which will use  
9 hazardous chemicals and for treatment which would  
10 be environmental disastrous. Not only that, if  
11 this would allow, the Town of Windsor will be  
12 bounded by two unregulated wastewater treatment  
13 plants.

14 In summary, this is ridiculous. I want  
15 to -- I want a personal quote. I did some work  
16 for another tribal member up in Lake County. And  
17 this quote has always stayed with me that he told  
18 me. And I quote, you White people crack me up.  
19 There is only one Pomo nation, but your government  
20 decided to split us into 16 separate groups. And  
21 now you will have to deal with 16 different  
22 casinos instead of one. We should all be treated  
23 equally. And this -- we need to stop this  
24 federally guided reservation shopping from  
25 happening all over Sonoma County. Thank you.

1 CHAD BROUSSARD: Thank you,  
2 Mr. McCormick, for your comments.

3 The next speaker will be Ronald  
4 Calloway.

5 RONALD CALLOWAY: My name is Ronald  
6 Calloway. I'm the recently retired superintendent  
7 of the Mark West School District. The proposed  
8 casino is within the school district. I highly  
9 oppose the casino where it is being placed, as it  
10 is within a mile radius of an elementary school,  
11 San Miguel. Additionally, driving will now take  
12 place not only on -- going up the road, but onto  
13 Faught Road, into the casino, which will directly  
14 impact the elementary school within the district.  
15 I propose housing in that area so that the Mark  
16 West School District can educate the children of  
17 the Koi Nation. We will be proud and give them an  
18 outstanding education. Thank you.

19 CHAD BROUSSARD: Thank you,  
20 Mr. Calloway, for your comments.

21 The next speaker will be Matt Kelly.

22 MATT KELLY: Can you hear me?

23 CHAD BROUSSARD: Yes, I can. Thank you.

24 MATT KELLY: Okay. Good evening. My  
25 name is Matt Kelly. I'm a proud union carpenter.

1 And I'm calling in support of the Koi nation of  
2 the proposed Shiloh casino and resort. What we  
3 see are on the projects aren't held accountable  
4 for the hardworking men and women of the  
5 construction industry are treated on the project.  
6 This project is different. Amazing jobs for  
7 thousands of people working and hundreds of  
8 construction workers will come for this project.  
9 But it will continue to provide careers benefiting  
10 the community as a finished project exists.  
11 Economic impact of this project will be felt on  
12 many different levels, from ground-up construction  
13 to daily operations. I believe the Koi Nation has  
14 done a great job reaching out to the public about  
15 this project. With all of these benefits, I  
16 strongly urge the BIA to approve this project.  
17 Thank you.

18 CHAD BROUSSARD: Okay. Thank you,  
19 Mr. Kelly, for your comments.

20 The next speaker will be Seth Howard.

21 SETH HOWARD: Hi. Can you hear me?

22 CHAD BROUSSARD: Yes, I can. Thank you.

23 SETH HOWARD: Good evening. My name is  
24 Seth Howard. I want to voice my support for this  
25 project. It will create over a thousand permanent

1 jobs and many more jobs that pay well and the  
2 benefits during the construction project. Many  
3 people in the area depend on these types of  
4 construction projects to support their family. It  
5 is in our community's best interest to approve  
6 this project. Thank you.

7 CHAD BROUSSARD: Okay. Thank you,  
8 Mr. Howard, for your comments.

9 The next speaker will be --

10 SETH HOWARD: All done. Yep.

11 CHAD BROUSSARD: The next speaker will  
12 be Josh Ratiani.

13 JOSH RATIANI: I'm Josh Ratiani, pastor  
14 of the Shiloh Neighborhood Church. The casino's  
15 main driveway would be built at the entrance to  
16 our church. I also live on the property, so my  
17 personal home would be less than 100 yards from  
18 the event center. Our mailbox is on Old Redwood  
19 Highway, where the casino entrance would be built.  
20 On page 3-57 of the EA, special attention is given  
21 to socioeconomic conditions. Shiloh Neighborhood  
22 Church is an ethnically diverse church with no  
23 ethnic majority. Over 10 percent are church  
24 members of registered members of Native-American  
25 tribes from California. We provide weekly meeting

1 space for a religious minority group of Jewish  
2 Christians. And we host one of the two Unitarian  
3 churches in Sonoma County. Building the driveway  
4 for the casino at our entrance would increase  
5 noise for all of these groups, as cars would be  
6 accelerating in front of our worship spaces  
7 instead at Shiloh Road. This is not considered in  
8 the noise report. The headlights of thousands of  
9 cars leaving the casino would shine directly onto  
10 the platform of our worship building. Development  
11 would disrupt the culture community of these  
12 minority cultural groups. We also host a food  
13 bank. Each week, over 500 people receive food at  
14 our church. The traffic generated by the casino  
15 would disproportionately affect these impoverished  
16 people. Our church is known in Sonoma County as a  
17 leading church caring for foster children. Many  
18 of the families in our church are foster families.  
19 In fact, the majority of the children in our  
20 church have been in foster care. In addition, we  
21 have hosted mentoring programs for other foster  
22 children for many years, requiring strict  
23 protocols of who is on our property. If the  
24 casino prohibits smoking, drinking, and loitering  
25 on their grounds, what is to prevent these people

1 from crossing the street and disrupting these  
2 at-risk children. While the casino could mitigate  
3 loitering for itself, we cannot afford a security  
4 guard or ground maintenance, as it is done by  
5 volunteers. Our budget for the year is under  
6 \$120,000. We can barely afford to have a pastor  
7 by providing on-site housing, which would become  
8 undesirable. Therefore casino development  
9 threatens the viability of our church's existence.  
10 Lastly, our church hosts recovery groups like  
11 Alcoholics Anonymous. In fact, 2016, we became  
12 the site for Sonoma County's chapter of Gamblers  
13 Anonymous. In 2021, when the casino was proposed,  
14 I thought that choosing this site for the casino  
15 location perhaps the worst location for a casino  
16 in the entire county. Our church is small, but  
17 has a big impact on the neighborhood and the  
18 community at large. Building a casino would  
19 likely remove our church from this community and  
20 affect the well-being of thousands of lives we  
21 benefit. Thank you.

22 CHAD BROUSSARD: Thank you, Mr. Ratiani,  
23 for your comment.

24 The next speaker will be Zachary Vaden.

25 ZACHARY VADEN: Hi. My name is Zachary

1 Vaden. I'm a senior field rep from the office of  
2 Senator Dianne Feinstein. The senator was asked  
3 to give public comment by the county, the local  
4 community, and the local tribes. She has sent a  
5 letter to the department last year in opposition  
6 to the development. It's surprising that we've  
7 gotten this far, given that the senator doesn't  
8 believe that this proposal meets the significant  
9 historical connection to Stanford for a casino  
10 such as this. And she has reiterated time and  
11 time again her concerns for -- her main concerns  
12 when it comes to California now, our fire and  
13 water. And so as my former coworker Dominic  
14 Faria, he went up earlier this year to meet with  
15 local community members who [indiscernible] during  
16 Tubbs Fire in 2017 and the Kincade Fire of 2019.  
17 And looking at the environmental impact report, it  
18 does not look to be where the senator -- that this  
19 would be -- that there is sufficient evacuation  
20 procedure in place for fire. And then the  
21 increased strain on water and wastewater  
22 facilities for the county would be a little bit --  
23 it would just be too much. So that's what I've  
24 got to offer. Thank you.

25 CHAD BROUSSARD: Okay. Thank you,

1 Mr. Vaden, for your comment.

2 The next speaker will be Matthew  
3 Beeston.

4 MATTHEW BEESTON: Are we good now?

5 CHAD BROUSSARD: I can hear you now.  
6 Thank you.

7 MATTHEW BEESTON: Okay. Thank you.

8 Sorry. Good evening. My name is Matthew Beeston.

9 I'm calling in support of the Koi Nation proposed  
10 resort and casino. During construction, this  
11 project will provide jobs and livelihood for  
12 countless skilled trades people. Upon project  
13 completion, this resort will provide ongoing  
14 employment for well over a thousand citizens and  
15 community members within the resort, as well as  
16 mitigation-related employment for community-based  
17 services. Furthermore, with a partnership with  
18 the Chickasaw Nation, we can feel confident that  
19 the project will be built responsibly with  
20 sustainability in mind. Thank you.

21 CHAD BROUSSARD: Okay. Thank you, Mr.  
22 Beeston, for your comment.

23 The next speaker is Giovanni Ottolini.

24 GIOVANNI OTTOLINI: Good evening. My  
25 name is Giovanni Ottolini. And I'm calling to

1 voice my strong support for the Koi Nation's  
2 proposed resort and casino. This project will  
3 create thousands of good-paying construction jobs  
4 and much needed long-term career opportunities for  
5 the local community. As a carpenter, I would like  
6 an opportunity to work on a project close to home  
7 instead of driving an hour away to the city.  
8 Approving this project will be an economical boost  
9 to the Sonoma County residents. I feel the Koi  
10 Nation has done a fantastic job of working with  
11 the community, collaborating with members of the  
12 community to address their concerns, and mitigate  
13 the issues. Given all the positive economic  
14 benefits of this project, I'm respectfully asking  
15 that the BIA approve this project. Thank you for  
16 the opportunity to speak on this.

17 CHAD BROUSSARD: Okay. Thank you for  
18 your comments.

19 The next speaker will be S. Salmon. I  
20 think you may be on mute.

21 SAM SALMON: Yes. Can you hear me?

22 CHAD BROUSSARD: I can hear you now.

23 SAM SALMON: Good evening. I'm Sam  
24 Salmon. As a 20-year Windsor council member  
25 involved in the planning of the town with my

1 entire political career based on city-centered  
2 growth and the preservation of open space, I'm  
3 here to provide testimony in opposition to the  
4 Koi's trust application for the casino hotel  
5 resort on the 68-acre Shiloh Road site identified  
6 as Alternative A and Alternative B in the  
7 Environmental Assessment. The current and  
8 intended use for the property located within the  
9 county -- within the county jurisdiction is  
10 strictly agriculture. The practical use of the  
11 property adjacent is community separator open  
12 space and fire prevention area. And most  
13 importantly, is outside of our voter-mandated  
14 urban boundary. In an adverse environmental  
15 impact that cannot be mitigated is the  
16 conversion from intensive agriculture to intensive  
17 commercial development associated with  
18 Alternatives A and B. The potential for  
19 catastrophic fire event. I refer you to Figure  
20 3.12-2 on page 149 of your environmental  
21 assessment. The map provided by -- the county  
22 wildfire risk index illustrates how the property  
23 is at risk for wildfire. And Alternative A and B  
24 provide the catalyst for catastrophic events that  
25 would affect the town and the surrounding

1 businesses and residents. Just to the east of the  
2 property is the very high number 4 risk area  
3 leading to the high designation number 3 for the  
4 actual property. What we experienced in the  
5 devastating Tubbs Fire is a funneling effect, with  
6 winds up to 41 miles an hour and a fire that fell  
7 more than 12 miles in the first three hours,  
8 ultimately killing 22 people and destroying 5,600  
9 structures. That same funneling effect can be  
10 witnessed in the wildfire risk map in your EA as  
11 provided. Wildfires destroy structures and  
12 killing people are becoming all too common to  
13 ignore the risk that Alternative A and B  
14 represent. No amount of fire personnel and  
15 equipment can provide fail-safe protection. We,  
16 you, the county, and the town must provide  
17 protection to all of our people.

18 I would ask you to offer Alternative C  
19 to the Kois. It would provide -- I think it would  
20 provide an economic opportunity that they deserve.  
21 I believe in reparations to our native and  
22 indigenous peoples. I understand that these  
23 opportunities are your charge. I would ask you to  
24 ask the Kois to look closely at an alternate site  
25 that has just been raised, but not able to be part

1 of this application. That is the 39-acre property  
2 at 895 Shiloh Road. It is in the town of Windsor.  
3 And perhaps Windsor would take a close look at  
4 supporting this land going into trust for a casino  
5 resort as proposed in Alternatives A and B. It  
6 would make a lot sense. Thank you for your time.

7 CHAD BROUSSARD: Thank you, Mr. Salmon,  
8 for your comments.

9 The next speaker will be Anthony  
10 Lavaysse.

11 I think you may be on mute. Unmute your  
12 microphone.

13 ANTHONY LAVAYSEE: Good evening. Can  
14 you hear me now?

15 CHAD BROUSSARD: Yes, I can. Thank you.

16 ANTHONY LAVAYSEE: Thank you. My name  
17 is Anthony Lavaysse. And I'm a 24-year member of  
18 Nor Cal Carpenters. I'm calling to urge your  
19 support for the Koi Nation proposed resort and  
20 casino. I believe the project will provide  
21 much-needed jobs for local construction workers,  
22 while stimulating the economy with minimum impact  
23 to the surrounding environment. The long-term  
24 benefits of this project will be a huge asset to  
25 Sonoma County for years to come. So please, BIA,

1 vote yes to approve this project. Thank you for  
2 letting me speak.

3 CHAD BROUSSARD: Thank you. The next  
4 speaker will be Robin Goble.

5 ROBIN GOBLE: Can you hear me?

6 CHAD BROUSSARD: I can. Thank you.

7 ROBIN GOBLE: My name is Robin Goble.  
8 For decades, Windsor has established urban growth  
9 boundaries and community separators. We have  
10 passed voter initiatives on this so that sprawl  
11 does not occur. What is proposed is the worst  
12 case of sprawl. It is choosing not to be in a  
13 community but adjacent to it. We have already  
14 lost our land use control at our western edge of  
15 town to a sprawling housing project that will  
16 ultimately house a hotel convention center for the  
17 Lytton Nation, who, by the way, refuse to  
18 cooperate with our town in the least. Now, our  
19 28,000-population-sized town is supposed to  
20 accommodate a large casino development on our  
21 eastern border. I cry foul to that.  
22 Interestingly, 40 years ago when I moved here, no  
23 one wanted any part of Windsor. It was known as  
24 poor man's flat. Now that we have developed a  
25 community, Indian nations want to border us

1 without being us. This Koi Nation has its roots  
2 more than two counties away. This is not  
3 historically their land. A casino is not what a  
4 family-friendly Windsor is about. Our public  
5 services will be highly compromised with this  
6 proposed use. Please deny its application and  
7 adopt Alternative D, no action. I ask that as a  
8 former two-time mayor of Windsor. Thank you.

9 CHAD BROUSSARD: Thank you for your  
10 comment.

11 The next speaker will be Richard Kluck.

12 Mr. Kluck, I think your microphone may  
13 be muted. If you're there, can you unmute your  
14 microphone. Richard Kluck, are you there?

15 Okay. We're going to move on to the  
16 next attendee. And, Richard Kluck, if you come  
17 back and want to speak, raise your hand again, and  
18 we will get you in.

19 Next speaker will be William Bridges.

20 WILLIAM BRIDGES: Hello. This is  
21 William Bridges. And I would like to thank you  
22 for taking our comments tonight. I am opposed to  
23 this project. It was alluded to in a scoping  
24 report. And even the leader of the Koi Nation  
25 earlier tonight indicated it is located in a

1 commercial area. It is not a commercial area. It  
2 is in an agriculture -- agricultural and  
3 residential area. Not commercial. Especially  
4 when you look at 5,000 parking spaces being  
5 proposed. Over 5,000. I think it would be better  
6 if this project were in a commercial area. And  
7 what I really am disturbed about, in looking  
8 through the scoping report on page 13, that  
9 alternative was rejected out of hand or rejected  
10 from full analysis. I don't quite understand  
11 that. No real reason was given. No data to  
12 support that conclusion. So I would certainly  
13 support this project if it were in a true  
14 commercial area, such as Sam Salmon indicated  
15 earlier tonight.

16 Also, the impacts on our water supply.  
17 We've been in a drought for many years. And that  
18 is going to continue. The wildfire evacuation  
19 concerns people have voiced. And then the level  
20 of traffic. Again, with a 5,000-parking-space  
21 facility, that's going to generate a huge amount  
22 of traffic. So for these reasons, I'm very  
23 opposed to this project. It's just the wrong  
24 project in the wrong place. So I would like to  
25 thank you for taking our comments tonight.

1 CHAD BROUSSARD: Okay. Thank you,  
2 Mr. Bridges, for your comment.

3 The next commenter will be Jesse  
4 Peralez.

5 JESSE PERALEZ: Good evening, BIA. My  
6 name is Jesse Peralez. And I strongly ask that  
7 you approve this proposed casino and resort for  
8 the Koi Nation. Not only will this provide a lot  
9 of careers for our community, but also a lot of  
10 construction jobs. I am a union carpenter. I  
11 would love to be working on this project. So  
12 please approve this project. I'm in strong  
13 support. Thank you.

14 CHAD BROUSSARD: Okay. Thank you,  
15 Mr. Peralez, for your comment.

16 The next speaker will be Jerry  
17 Santarpia.

18 JERRY SANTARPIA: Hello. Can you hear  
19 me?

20 CHAD BROUSSARD: Yes, we can. Thank  
21 you.

22 JERRY SANTARPIA: Very good. My name is  
23 Jerry. And I'm calling in support of the Koi  
24 Nation proposed resort and casino. Not only will  
25 it create thousands of good-paying construction

1 jobs, but great careers for thousands of local  
2 people in the community. And it will be an  
3 amazing economic boost to Sonoma County and all  
4 surrounding businesses. And especially to the  
5 mall down the block. I mean, hopefully -- I'm  
6 hoping -- it will be great to see it built. I  
7 urge the BIA to approve this project. Thank you.

8 CHAD BROUSSARD: Thank you for your  
9 comment.

10 The next speaker will be SRT Singer.

11 I think you may be on mute. Please  
12 unmute your microphone.

13 Okay. We're going to move to the next  
14 attendee. If you would like to speak later, just  
15 please raise your hand again, and we will put you  
16 in the queue to speak.

17 The next speaker will be Beatrice  
18 Mirelez.

19 BEATRICE MIRELEZ: Good evening. My  
20 name is Beatrice. I'm in full support of the Koi  
21 Nation proposed resort and casino. This will not  
22 only create amazing jobs for thousands of  
23 construction workers in apprenticeship programs,  
24 but it will continue to provide careers for our  
25 local community for years to come. This project

1 will bring an economic boost to Sonoma County. I  
2 believe the Koi Nation has done a great job  
3 reaching out to the public about this project.  
4 With all of these benefits, I strongly urge the  
5 BIA to approve this project. Thank you.

6 CHAD BROUSSARD: Thank you, Ms. Mirelez,  
7 for your comments.

8 The next speaker will be Sidnee Cox.

9 SIDNEE COX: My name is Sidnee Cox. I  
10 live on Leona Court, very close to the proposed  
11 construction of the casino. First of all, I find  
12 it really interesting that most of the callers  
13 that are opposed -- for this project are  
14 construction workers or wanting construction jobs,  
15 which, of course, will be all over once it is  
16 done. So then we have to live with the  
17 consequences. And the other thing is that they're  
18 talking about a thousand employees working at  
19 this. Well, you know, there are other places  
20 where employees can work. So I just want to say  
21 that that's very interesting. This has nothing to  
22 do with the environment or the environmental  
23 impacts. It just has to do with construction jobs  
24 and a thousand employees.

25 And the other thing is twice we have

1    been evacuated in the last few years. It was  
2    very, very hard getting out of our neighborhood.  
3    And that's without the new huge complex of  
4    apartments that have been built right down the  
5    street from us. And my fear is that we're going  
6    to be incinerated in our cars when we're trying to  
7    evacuate. Just like what happened in Maui. I  
8    mean, that just happened, what, a month ago.  
9    You're going to create an extremely dangerous  
10   situation for all neighbors nearby. As well as  
11   the workers and the patrons of the casino project.  
12   The mitigation measures that were outlined, I want  
13   to understand how these mitigation measures are  
14   going to be policed. Who is going to make sure  
15   that all of these mitigation methods will occur?  
16   Even in the best-case scenario. This is  
17   definitely the wrong place. This is definitely  
18   the wrong place for this kind of project. 16,000  
19   cars a day. I mean, you know, our -- it's so  
20   mind-boggling that this is even being considered.  
21   It's like I can't hardly believe it. Anyway, this  
22   talks about the environment. This is an  
23   environmental impact report. Not about  
24   construction jobs or employees. This is about our  
25   environment and what is going to happen and what

1 kind of danger we're all going to be in if this  
2 casino goes through. Thank you.

3 CHAD BROUSSARD: Thank you, Ms. Cox, for  
4 your comments.

5 The next speaker will be Chris Wright.

6 CHRIS WRIGHT: Hi. Can you hear me?

7 CHAD BROUSSARD: Yes, we can. Thank  
8 you.

9 CHRIS WRIGHT: Thank you. My name is  
10 Chris Wright. I'm the chairman for Dry Creek  
11 Rancheria Band of Pomo Indians. We're an  
12 aboriginal tribe, native to the lands in Sonoma  
13 County. We do not come from another place. We  
14 have always been here. I want to say that I  
15 support everything that Greg Sarris, Chairman of  
16 Graton, has already said in this meeting. But  
17 what I really -- this is pretty simple. I see a  
18 lot of people who are opposing it. And some that  
19 are for it. And really I think someone just said  
20 the people that are for it is the union. They're  
21 looking for jobs. This has nothing to do with the  
22 unions or the jobs. This has to do with right and  
23 wrong. The BIA knows it. Everybody knows it.  
24 You know, I think all tribes in Sonoma County  
25 would support Koi in getting land in a trust where

1 they're from, which is Lake County. We all know  
2 Lake County is where they're from. There is no  
3 dispute on that. Everybody can prove it. But,  
4 you know, I think that trying to come into Sonoma  
5 County and say that that is their land is for I  
6 think for the tribes is wrong. Tribe Rancheria  
7 has fought for 20 years with the County and the  
8 State to get to where today. And for a tribe who  
9 is from Lake County to come in and say that is  
10 their aboriginal land is insulting and should not  
11 happen. And so I urge the BIA to turn this  
12 application down. And we as Tribe Rancheria, we  
13 do not support Koi coming into Sonoma County. We  
14 support them going into Lake County, but not here.  
15 And I want to thank you for giving me the  
16 opportunity to speak tonight. Thank you very  
17 much.

18 CHAD BROUSSARD: Thank you, Chairman  
19 Wright, for your comments.

20 The next speaker will be Nick Ratiani.

21 NICK RATIANI: Hi. My name is Rick  
22 Ratiani. I am retired pastor of Shiloh  
23 Neighborhood Church. You heard earlier from our  
24 current pastor, my son. I live in the Wikiup  
25 area. And I attend the church. It is right

1 across Old Redwood Highway from the proposed  
2 casino. For 22 years as a pastor, I would drive  
3 often on Faught Road from where I live in Wikiup  
4 over to the church because it was a beautiful  
5 narrow, windy, bumpy road. I'm terrified about  
6 what will happen with all of the increase of  
7 traffic on that narrow road. It is the back way,  
8 as people have mentioned already. It is the way  
9 that people would take as a shortcut. They will  
10 zoom right past San Miguel School either on the  
11 way to the casino or worse after they've been  
12 drinking, after they have been losing money,  
13 whatever, on the way out. But I'm also concerned  
14 about how that will impact our church, Shiloh  
15 Neighborhood Church. That isn't mentioned in the  
16 environmental assessment. The church sign is  
17 right across Old Redwood Highway from the proposed  
18 main entrance for the casino. It shows one wide  
19 entrance with a stoplight, yes. But we have two  
20 driveways, north and south of our sign. How is  
21 that intersection going to work? Who is going to  
22 pay for those changes? This isn't addressed in  
23 this assessment. The security of our church will  
24 be at risk because as people leave the casino,  
25 however they're feeling, they're going to be

1 facing right into our church, as was mentioned  
2 earlier. We're going to need to put up gates.  
3 Who is going to pay for that? We took them down  
4 years ago because we thought they were  
5 unwelcoming. But who is going to take care of  
6 those kinds of things? Who is going to help us  
7 with fencing to protect the folks on our property?  
8 We partner with the Redwood Empire Food Bank.  
9 Today we fed 542 individuals as they drove through  
10 to pick up their food. As hungry people drive  
11 onto the property to receive the food, they  
12 frequently cause traffic slowdowns on Old Redwood  
13 Highway. I as a volunteer now am in charge of the  
14 parking, the traffic control. I see this. They  
15 exit right where the proposed main entrance for  
16 the casino will be. None of this is addressed in  
17 this thing.

18 I've heard a lot about the job creation.  
19 That's great. But the reality is restaurants and  
20 other service industries are having a hard time  
21 hiring people. We don't need more jobs. We need  
22 more houses. And there are many things not  
23 addressed in this report. So for these and many  
24 other reasons, a casino is wrong for this area.  
25 It is wrong for the Shiloh neighborhood. It is

1 wrong for the Wikiup neighborhood. It will  
2 drastically impact my church, the Shiloh  
3 Neighborhood Church, in many negative ways. So I  
4 do hope you will deny its application. Thank you.

5 CHAD BROUSSARD: Thank you, Mr. Ratiani,  
6 for your comment.

7 The next speaker will be Chris Lamela.

8 CHRIS LAMELA: Can you hear me now?

9 CHAD BROUSSARD: I can.

10 CHRIS LAMELA: Wonderful. Thank you. I  
11 know this has been raised before. Let me  
12 reiterate, if I can. Most people in support of  
13 this are carpenters and construction folks who  
14 support this only for short-term jobs. The EA  
15 speaks to this. The construction may last, what,  
16 three years. After that, the jobs will be gone.  
17 There's no reason to believe that a few jobs for a  
18 short time is worth a terrible, terrible disaster  
19 that this development will bring to our community.  
20 Please, we request that you deny this application.  
21 Thank you for your time.

22 CHAD BROUSSARD: Thank you for your  
23 comment.

24 The next speaker will be Bill Bolster.

25 CHRIS LAMELA: How did I do?

1 BILL BOLSTER: Can you hear me?

2 CHAD BROUSSARD: I can. Thank you.

3 BILL BOLSTER: Okay. My name is Bill  
4 Bolster. I live on Faught Road. I have lived  
5 here for 46 years. When we moved here, there were  
6 trains at night. And soon there will be trains  
7 again. That -- different kinds of trains now.  
8 The smart train. Long-time residents. Two wells  
9 on seven acres. Never had any problems with the  
10 wells. Great water. The last five years, the  
11 water has gone down. One well is basically dry.  
12 And we're limping by on the second. The casino  
13 will increase water usage by pumping water from  
14 the water table. They should not be allowed to --  
15 if this project goes through, they should not be  
16 allowed to do that. They should have to get water  
17 from the County of Sonoma or the City of Windsor  
18 and pay for it and not pump down the water table.  
19 It's crazy. We can't use the water table to  
20 support developments of this size.

21 The second big thing if this goes  
22 through -- and I -- I don't know why it couldn't  
23 be at the location that Sam Salmon proposed. Near  
24 the freeway.

25 Traffic. How the heck are you going to

1 get people in and out of this with Shiloh narrow?  
2 Who is going to pay for widening Shiloh? Who is  
3 going to pay for widening Old Redwood Highway?  
4 For those two reasons, it should be denied or  
5 changed. You can't just walk in and -- and build  
6 a big huge thing like this and forget about the  
7 impact. And people brought up the fire stuff. My  
8 place virtually burned down during the Kincade  
9 Fire. So I lived that. You know, it's -- it's  
10 wrong. This impact report doesn't cover any of  
11 that. Those are my comments.

12 CHAD BROUSSARD: Thank you, Mr. Bolster,  
13 for your comments.

14 The next speaker will be Bob Janes.

15 BOB JANES: Bob Janes. I live on Leona  
16 Court in the Oak Creek -- Oak Park subdivision,  
17 just to the north of the proposed development.  
18 And I have gone through the EA twice. It is a  
19 very complicated, convoluted,  
20 difficult-to-understand document that, frankly, I  
21 think is an embarrassing document. But at any  
22 rate, each of the potential impacts addressed in  
23 that EA -- noise, traffic, pollution, crime, fire  
24 safety -- both pre- and post-construction, are  
25 deemed to have less than significant impacts on

1 the environment and on the people surrounding it.  
2 My wife and I have lived in our home on Leona  
3 Court for 34 years. We have raised our family  
4 here. Common sense tells me that living through  
5 this type of construction, immediately outside of  
6 our subdivision, both preconstruction and  
7 post-construction, would be anything other than  
8 less than significant. So common sense, in my  
9 view, has to prevail here.

10 Secondly, the obvious fire safety issues  
11 of the proposed casino have already been raised  
12 here. So I will not understand that. Very  
13 important issue. But it is a big concern to all  
14 of us who live in that area. I'm opposed to the  
15 project. And I encourage the BIA to do the right  
16 thing and deny it. Thank you very much.

17 CHAD BROUSSARD: Thank you, Mr. Janes,  
18 for your comment.

19 The next speaker will be someone who has  
20 called in. So I don't have a name. Last four of  
21 the phone number is 0154. Are you there? 0154  
22 call-in.

23 CLAUDIA ABEND: Can you hear me?

24 CHAD BROUSSARD: Yes, I can. Thank you.  
25 I can't hear you now. Are you still speaking?

1 CLAUDIA ABEND: What about now?

2 CHAD BROUSSARD: Yes.

3 CLAUDIA ABEND: I guess I wasn't pushing  
4 the right button.

5 I'm Claudia. And my husband and I, we  
6 raised our kids here. We've been here for 37-plus  
7 years. And started out seeing across the street  
8 area is an old prune orchard. And then it went  
9 into -- they mowed down all of the oaks and made  
10 it a vineyard with Kendall-Jackson. So this is --  
11 we kind of get used to this as a -- an agriculture  
12 green area buffer. And it really did help us out  
13 for the fire. This -- we were here for both  
14 fires. It was a bottleneck. Definitely with what  
15 we got took more than two hours for people to go  
16 down the street and get out of here, out of this  
17 area. This is a disaster to come into our  
18 neighborhood. A disaster waiting to happen, for  
19 us and others.

20 Construction jobs, I agree. These  
21 people are just looking at temporary. I mean,  
22 look at Lahaina. Just like the other gal said.  
23 It was a funnel. We don't have an ocean to  
24 retreat to. We have Highway 101. And it would  
25 burn us clear to there. You know, this is just

1 ridiculous. And to think that not even the school  
2 residents around is considered in the impact  
3 report is just disastrous too. We have kids  
4 that -- in these neighborhoods that are  
5 surrounding this proposed project. They ride  
6 buses and they walk to school. And the traffic  
7 for that, I don't care how wide you put the road,  
8 this is dangerous. And you know that people will  
9 come from this resort drunk driving and in  
10 crime -- and crime -- and cause crime around this  
11 area. It is just -- it is just out there.

12                   And then the water. Wells drying.  
13 We're on a well, too. We live behind the Mark  
14 West Neighborhood Church. And I'm totally afraid  
15 of that. That our well would dry up after being  
16 sunk by this casino, all because they want to  
17 build a resort for 400 people to stay. And the --  
18 and the construction workers can work. I mean,  
19 that is just all temporary. We even got a new  
20 development across the street on Shiloh and one  
21 that is being developed close to Walmart. That is  
22 going to increase the traffic to get out of here  
23 terribly. This is not included in the impact  
24 report. And that creek that divides the property,  
25 that is not a buffer for a riparian area or

1 wildlife. That is not a buffer. That casino is  
2 too, too close for any wildlife to reside there.  
3 It is just going to ruin the area for that. Leave  
4 it as a vineyard.

5 CHAD BROUSSARD: Thank you. Your time  
6 is up. Can I ask you to finish up your comments  
7 please.

8 CLAUDIA ABEND: Opposed definitely. And  
9 not only that, going to the creek with extra water  
10 on a higher rain year is going to flood us out.  
11 It has happened before. And this is a high flood  
12 plane area. Very high.

13 CHAD BROUSSARD: Thank you for your  
14 comment. Can I ask you to -- if you're still  
15 there, to restate your name for the record.

16 CLAUDIA ABEND: I'm Claudia Abend.

17 CHAD BROUSSARD: Okay. Thank you very  
18 much for your comment.

19 The next speaker will be Lynda Williams.

20 LYNDA WILLIAMS: Thank you, Mr. Chad  
21 Broussard. My name is Lynda Williams. And I'm  
22 here to speak about the environmental assessment  
23 as a neighbor whose home is less than 40 feet from  
24 this Proposed Project. And I'm not alone. There  
25 are many, many homes in my situation. Let me tell

1 you how this is going to affect me and all of my  
2 neighbors. Reading through this environmental  
3 assessment, it repeatedly states impact less than  
4 significant. Significant is never defined. So  
5 let me just define it for a bit. Widening Shiloh  
6 to four lanes and installing signals eight feet  
7 from residential homes is significant. Increasing  
8 traffic by 95 percent is significant. Using a  
9 minimum of 295,000 gallons of brown water per day  
10 is very significant to folks here whose wells have  
11 already run dry. Listening to all of the  
12 equipment to process sewer, recycle water, run  
13 air-conditioning, and continuous traffic noise and  
14 pollution while inside your home day and night is  
15 significant. Socioeconomic conditions are  
16 significant when the value of our homes is  
17 degraded because this project was built literally  
18 on top of us. And this is not offset by  
19 economics. We already cannot fill job vacancies  
20 in Windsor. All due respect to the Carpenters  
21 Union, construction jobs are temporary.

22 But finally, and most importantly, let  
23 me address the most important issue, which is  
24 evacuation. The next time a wildfire roars  
25 through this area -- not if, but when -- I will be

1     unable to evacuate due to the additional 15,000  
2     cars per day, according to your own assessment.  
3     When the Tubbs Fire and the Kincade Fire came  
4     through here and embers were falling on our homes  
5     and cars and on the roads as we tried to get to  
6     Highway 101, we were gridlocked for hours. As we  
7     know from both fires, as well as other fires like  
8     the Camp Fire and most recently Maui, if we can't  
9     evacuate, we will die in our homes. We will die  
10    trapped in our cars. There is no roadway  
11    mitigation for this threat. All roads lead to  
12    101. It took 60 years to get a third lane added  
13    to 101. And it is still gridlock. The Tubbs Fire  
14    jumped 101 to the south of this, closing 101. The  
15    Kincade Fire jumped 101 to the north of here,  
16    closing 101. And now we're told that  
17    24-hour-a-day, 7-days-a-week casino will be built.  
18    I have to put this on the public record. When the  
19    next fire roars through, people will die.  
20    Possibly even your casino customers. And you were  
21    warned today. And did nothing to prevent it. You  
22    still have the power to prevent this tragedy. Do  
23    not approve this project. This is the wrong  
24    location for this project for any large-scale  
25    enterprise. There is no mitigation.

1 CHAD BROUSSARD: Thank you,  
2 Ms. Williams.

3 LYNDA WILLIAMS: The evacuation route --  
4 I'm almost done. Because there is nowhere to go  
5 from here. Thank you, Mr. Broussard.

6 CHAD BROUSSARD: Okay. Thank you.  
7 Next speaker will be Betsy Mallace.

8 BETSY MALLACE: Hi. My name is Betsy.  
9 While I support the Koi Tribe's need for  
10 self-determination, this parcel is the wrong  
11 location. I'm, therefore, requesting the BIA find  
12 significant unmitigable environmental impacts to  
13 A, B, and C projects listed. I request that they  
14 approve Alternative D. And if not, further extend  
15 the NEPA and continue an Environmental Impact  
16 Statement. This is the wrong location as it is in  
17 a residential neighborhood. This is the wrong  
18 location for any commercial business, especially a  
19 casino. This is the wrong location due to the  
20 adjacency to the church and parks and schools.  
21 These are all unmitigable situations. This is the  
22 wrong location due to the parcel being a working  
23 vineyard which has served during the last two  
24 wildfires as a natural fire break. If that fire  
25 break is gone, as people have said, people will

1     die. This is the wrong location due to two sides  
2     of the project being accessible by only a narrow  
3     tiny two-lane road. One side is the bigger  
4     two-lane road. And on the portside, there is no  
5     accessibility. This is the wrong location due to  
6     no way to mitigate the additional emergency  
7     evacuation it is going to cause. It is currently  
8     not significant. More will make it deadly.

9             The description on the document, the EA  
10    is not accurate and it is not based on the last  
11    two actual current -- last two wildfires. This is  
12    the wrong location due to no significant  
13    mitigation for the current creek and the wildlife  
14    that already exist on this property. This is the  
15    wrong location due to no historical or ancestral  
16    significance to the property. This is further  
17    confirmed by the current litigation by the Koi  
18    Tribe where they're litigating against their  
19    historical remains being disturbed. This is the  
20    wrong location due to the very name of the tribe  
21    of Koi, which is indigenous to Lake County -- to  
22    Clear Lake in Lake County. Please do not approve  
23    any of these listed projects on this application  
24    as their impacts are significant -- are  
25    significant and cannot be mitigated. This is the

1 wrong location for any commercial business,  
2 especially a casino. Please find a way to support  
3 the Koi Tribe on their ancestral land in Lake  
4 County. And I am requesting a 60 -- an additional  
5 60-day extension for public comments for this  
6 project. Thank you for your time.

7 CHAD BROUSSARD: Thank you, Ms. Mallace,  
8 for your comment.

9 The next speaker will be Michael Adler.  
10 Next speaker will be Michael Adler.

11 CAROLYN ADLER: Can you hear me?

12 CHAD BROUSSARD: Yes.

13 CAROLYN ADLER: Hello.

14 CHAD BROUSSARD: Yes, I can hear you.  
15 Thank you.

16 CAROLYN ADLER: All right. Fine. I'm  
17 speaking for Michael Adler. I'm his wife. My  
18 name is Carolyn. And the reason that I wanted to  
19 say something is that I live in this area. I know  
20 what the traffic impacts are going to be. And so  
21 far I agree with everyone who is questioning the  
22 standards that were set to determine that there  
23 would be no significant impact in particular on  
24 traffic in the case of a fire. My husband and I  
25 barely got out alive in the last fire, the Tubbs

1 Fire. And we know what it feels like to have the  
2 fire breathing down your neck, literally, as  
3 you're in your car, trying to get away from it,  
4 and imagining that you're going to burn inside of  
5 your car. We moved to Windsor after this time,  
6 hopefully to be away from the fire potential. We  
7 did not rebuild on our lot. We sold it because we  
8 didn't want to be anywhere near fire potential. I  
9 would like to know what it is that stands for the  
10 standards that say there is going to be no  
11 significant impact in the case of a fire  
12 emergency. I don't know what standards they were  
13 looking at. I just have to believe that they're  
14 just fantasy. There's no way to believe that  
15 there's not going to be a significant impact in  
16 the case of fire trying to get out of here.  
17 Traffic is one of the issues. The other issue is  
18 where does the fire come from? It creates a  
19 tunnel right in this area. We don't have any  
20 buffers if the casino is built. So my point is, I  
21 think that the assessment is just plain wrong.

22 CHAD BROUSSARD: Does that conclude your  
23 comments?

24 CAROLYN ADLER: Yes.

25 CHAD BROUSSARD: Okay. Thank you very

1 much for your comments.

2 The next speaker will be Christie  
3 Wilfey. I apologize if I butchered your name. It  
4 probably won't be the last time. Christie, I  
5 think you may be on mute.

6 CHRISTIE WILFEY: Hi. Good evening.  
7 Thank you. My name is Christie Wilfey. I  
8 appreciate the opportunity to comment tonight. I  
9 want to call in support of this project,  
10 particularly in respect to the jobs. There are  
11 going to be hundreds of good union construction  
12 jobs, as this project is constructed for Sonoma  
13 County, but also 1500 permanent jobs once it's  
14 operational, as well as ongoing economic support  
15 for the county. So I'm supporting this project.  
16 Thank you.

17 CHAD BROUSSARD: Okay. Thank you for  
18 your comment.

19 The next speaker will be  
20 Oswaldo Ocegueda de Horta.

21 Oswaldo, you may have your speaker on --  
22 or your microphone on mute. We can't hear you.  
23 Oswaldo, are you there?

24 Okay. We're going to move on to the  
25 next attendee. If you come back and want to

1 speak, raise your hand, please.

2 Next speaker will be Lilian Fonseca.

3 LILIAN FONSECA: Hi. My name is Lilian  
4 Fonseca. And I have lived in Windsor since 1990.  
5 I raised my family here. I'm a retired educator.  
6 And I love my community. I could go on and say --  
7 repeat all the things that other people said, but  
8 I just want to approach it from a different way.  
9 I'm adamantly opposed to this project. Adamantly.  
10 My support would be for D, for don't build a  
11 casino in Windsor, please. As a grandmother, one  
12 of the only ways we could get my grandson to go to  
13 sleep sometimes is take a drive. Guess what road  
14 we drive? Yeah, we drive down that very exact  
15 road by -- down Shiloh, back around Faught, and  
16 around. That's the only place that we could get  
17 him to go to sleep because there are no bright  
18 lights. The stars are out. The moon is  
19 beautiful. And it is peaceful and calming. That  
20 would be something that we would lose. That makes  
21 my heart break. That makes my heart break. I  
22 also would like to support the statements that  
23 Greg Sarris made. I fully agree with him. I know  
24 that that EPA report, I read it over three times  
25 totally. And it was very vague, very hard to

1    decipher.    The sentences just kept going around  
2    and around.    And it just never really made  
3    complete sense to me.    I question it.    And it also  
4    upsets me because a lot of regular people, normal  
5    people, don't have access to computers and don't  
6    have access to Zoom.    They don't know how to go  
7    through a lengthy report like that.    And they  
8    don't have a voice then.    So that concerns me.    I  
9    think that you should have some town halls or  
10   something if you want to hear from the community.  
11   But just to reiterate, our community will be  
12   impacted.    No matter what the studies stated.    It  
13   will be impacted.    It is inevitable.    And it just  
14   devastates me.    It really gets me deeply, deeply.  
15   Because I just retired from teaching for 30 years.  
16   37 years.    And now I have to worry that my  
17   community is going to be changed into something  
18   that I never dreamed it would come to.    Please  
19   don't build a casino by my house.    There's -- it  
20   is just not the right location.    It is a beautiful  
21   agricultural spot.    Wildlife is there.    The hills  
22   are there.    And I was trapped on the road when I  
23   was trying to evacuate.    So I know what it feels  
24   like for hours.    So thank you.    And I will be  
25   continuing to send my comments.    Thank you.

1 CHAD BROUSSARD: Okay. Thank you,  
2 Ms. Fonseca, for your comments.

3 The next speaker will be Hank Shreeder.

4 HANK SHREEDER: Hi. Can you hear me?

5 CHAD BROUSSARD: Yes, I can. Thank you.

6 HANK SHREEDER: My name is Hank  
7 Shreeder. I'm a retired Sonoma County chief of  
8 police and a resident located near the  
9 construction of the casino. For this particular  
10 issue, I want to focus on some of the  
11 environmental and then we will talk about some of  
12 the other. One, Alternative A and B, the  
13 stormwater alone on creating flooding in the area  
14 and these kinds of things, displaced water from  
15 parking lots, things like that will end up in  
16 Pruitt Creek. The loss of the open space and the  
17 increase in those hazards are also a problem. The  
18 other problem is the impact on Pruitt Creek  
19 itself. Alternative A and B don't really take  
20 into account Pruitt Creek and the aspect that it  
21 actually provides flood prevention and/or wildlife  
22 habitat for the area. The other thing is  
23 wastewater on-site. As a homeowner in the area  
24 and a well owner, I am very concerned about this  
25 issue because our wells are shallow, at best, less

1    than a hundred feet. And wastewater production at  
2    that magnitude for Alternative A and B is  
3    substantial and could impact our wells and our  
4    personal lifestyle as residents in the area. Even  
5    though monitoring is talked about, it doesn't talk  
6    about what happens if you monitor and you actually  
7    produce pollutants in those wells that you have  
8    never seen before after it.

9                   And finally, traffic impact -- not  
10   finally, but traffic impact is also a problem. We  
11   live on two-lane roads in this area. I've been  
12   evacuated twice for fires in this area and seen  
13   fires on Shiloh Park between my house and where  
14   this casino proposal is supposed to be built. The  
15   challenges have not been considered. Also, the  
16   current developments that Windsor has already  
17   approved in the area which will impact traffic and  
18   fire evacuation.

19                   As far as labor goes, they're not  
20   talking about the environment. They're talking  
21   about temporary jobs. And honestly, it doesn't  
22   talk about -- labor doesn't talk about noise  
23   concerns, trucks, and traffic on the roadway.  
24   Finally, from my experience as a former chief of  
25   the police, gaming does have an impact on the

1 community. The churches and schools in the area  
2 are impacted. Crime does increase based on money.  
3 And this is based on moneys that the casinos pay  
4 to police departments to mitigate those issues.  
5 They do it everywhere. DUI, prostitution, drugs,  
6 and traffic accidents will have an impact on our  
7 community. Thank you for my comments.

8 CHAD BROUSSARD: Thank you,  
9 Mr. Shreeder, for your comments.

10 The next speaker will be Joan Chance.

11 Joan Chance, I think you might have your  
12 microphone on mute. Joan Chance. Are you there?

13 Okay. We're going to move on to the  
14 next speaker. Joan, if you would like to speak  
15 later, please raise your hand again.

16 The next speaker will be Eric Chazankin.

17 ERIC CHAZANKIN: Yep. I'm here. Can  
18 you hear me?

19 CHAD BROUSSARD: I can.

20 ERIC CHAZANKIN: My name is Eric  
21 Chazankin. So my family owns a house in Shiloh  
22 Estates, where my mom now lives. And then I have  
23 a house in Windsor, on the other side of the  
24 freeway off of Shiloh Road. I am tasked with  
25 taking care of her. She is 81 years old with

1 Alzheimer's, moderate dementia, and takes a lot of  
2 taking care of. I make multiple trips every day  
3 back and forth on Shiloh Road, right past where  
4 the casino will be. We're talking per this report  
5 473 trips an hour on that road. 7.8 trips per  
6 minute. There is no way that the amount of  
7 mitigation that is set forth in this report could  
8 possibly allow proper access back and forth for  
9 the kind of access that I need to do and the kind  
10 of access that many people need to do. Not only  
11 for day-to-day, but in an emergency. I was there  
12 when these fires started. I was there for the  
13 Tubbs fire. That house up in Shiloh had to be  
14 evacuated multiple times. My mom was not capable  
15 of getting out on her own. I had to go up there,  
16 up that road, past where the casino goes, get her,  
17 and take her back down the road. How would that  
18 have been possible with the casino development  
19 there? The answer is a lot of people would have  
20 died in that situation that did not die. So I  
21 want to make this very personal. When my father  
22 passed on 2018, he made me promise that I would  
23 take care of my mom. She is the widow of a Marine  
24 Corps veteran. I can't fulfill that promise to my  
25 father if you build this casino here. I don't

1 know how you get much more personal than that.

2 I would also like to point out that the  
3 water use portion of the report is flawed and  
4 based on the analysis of water use historically  
5 from 1999 to present. So it fails to take into  
6 account the fires, the droughts, the extreme  
7 problems with water drawdown and the water tables  
8 in wells that have happened during that time.  
9 Instead, it simply uses a historical average,  
10 which is not a proper reflection of the actual  
11 rainfall and water availability in this community  
12 in the present day on the ground.

13 There is no way that the 5,000 parking  
14 capacity that the event center, all of the other  
15 construction could be stated as not government  
16 action and possibly stated to have no significant  
17 impact, as stated -- as alleged in this EIA, which  
18 seems to be a piece of advocacy rather than a  
19 truly impartial study. So an EIS is required  
20 prior to further action. Thank you for listening  
21 to all of us. I appreciate your attention.

22 CHAD BROUSSARD: Yes. Thank you,  
23 Mr. Chazankin, for your comment.

24 The next speaker will be Nina Cote.

25 NINA COTE: Hi. This is Nina Cote.

1 Building a casino resort this close to a  
2 residential neighborhood can't be mitigated. I  
3 feel the proposed mitigations fall severely short.  
4 There has been no casinos built this closely to an  
5 existing residential neighborhood in California,  
6 as stated in the report. All of the report  
7 examples were very different situations. One  
8 entrance is directly across from one of our only  
9 entrance exits into our neighborhood. I have  
10 evacuated twice during wildfires. And there are  
11 no realistic mitigations for wildfire evacuation.  
12 I've been on the road with fire in front of and  
13 beside my car wondering if my family would  
14 survive. Adding even the low estimate of cars  
15 will be pure gridlock, and my family will not even  
16 be able to exit the neighborhood. Having parking  
17 attendants directing traffic as a mitigation is  
18 laughable. The new housing developments along  
19 Shiloh are already adding hundreds, if not  
20 thousands, of additional cars on our already  
21 congested roads. The impact of adding the  
22 thousands of daily vehicles that the casino would  
23 bring is unacceptable. The cycle of day and night  
24 is important for the natural rhythms of all living  
25 things. The light, noise 24/7 means disruption to

1 wildlife and humans. And we will no longer be  
2 able to enjoy the stars at night or have a quiet  
3 sleep environment. The information on water usage  
4 used in the report is from 2011 and before that  
5 time. That's before we experienced severe  
6 long-term droughts and rationing. We have been  
7 rationing water for years due to droughts. The  
8 proposed drilling into our water table for the  
9 extreme amount of water usage for the casino will  
10 put unexpected strain on our water system.

11 Our local businesses have been closing  
12 because they do not have enough staff. So the  
13 arguments that the casino will provide many jobs  
14 falls a bit short when we have local businesses  
15 that are closing. I do find it interesting that  
16 the sole proponents for this casino location are  
17 people that will be financially benefiting. There  
18 has been no collaboration with the community by  
19 the Koi, except for communicating and  
20 collaborating with people that they can  
21 financially compensate in the future.

22 I'm also concerned that I didn't see  
23 anything about schools or churches included or our  
24 wildlife in the report. The report seemed to  
25 focus only on endangered species, but not all of

1 the wildlife that our habitats at that location  
2 and the location close to our neighborhood.

3 CHAD BROUSSARD: Thank you, Ms. Cote,  
4 you're out of time.

5 NINA COTE: I appreciate your time.  
6 Thank you.

7 CHAD BROUSSARD: Thank you very much for  
8 your comment.

9 Okay. Our next speaker will be Rosa  
10 Reynoza.

11 ROSA REYNOZA: Hello. Thank you for  
12 this opportunity to speak. My name is Rosa  
13 Reynoza, the current elected mayor of Windsor.  
14 And I want to start by saying that I do understand  
15 the intentions that the Koi tender. And they're  
16 good intentions and they want to provide for their  
17 tribal members. However, this location for the  
18 project is just not the right one, as others have  
19 mentioned. Some of my greatest concerns is the  
20 proximity of this project to the residential  
21 community. And then the roads and  
22 infrastructures, it is going to take a lot. It is  
23 going to take a lot to build those roads to  
24 support that kind of traffic. That will not be  
25 something easy to take on. And there's definitely

1 other unmitigable impacts. I do want to share  
2 that the council is currently looking at the EA,  
3 the staff. And they're going to prepare an  
4 official comment. And we will bring it to the  
5 town council on October 18th to share with the  
6 residents and also get more feedback from the  
7 residents on that date.

8 But I also want to share with you that  
9 back on April 20th of 2022, the Town of Windsor  
10 adopted a resolution that supported the resolution  
11 by the Board of Supervisors on April 5th, 2022,  
12 opposing the establishment of the casino by the  
13 Koi Nation within the county. We also continue to  
14 stand and support the Sonoma County Board of  
15 Supervisors and the federally recognized Sonoma  
16 County tribes who all agree this is not the proper  
17 place for this project. Thank you for your time.

18 CHAD BROUSSARD: Thank you, Mayor  
19 Reynoza, for your comments.

20 The next speaker will be Noah Starr.

21 NOAH STARR: Good evening,  
22 Mr. Broussard. And thank you for your time. I'm  
23 here to support the project. Specifically for its  
24 potential to create and spur meaningful economic  
25 development across the entire North Bay region,

1 bringing hundreds of good union construction jobs  
2 to Sonoma County during construction, and over  
3 1500 permanent jobs once the project is fully  
4 operational. I also want to salute the tribe for  
5 its predevelopment agreement with the Chickasaw  
6 Nation of Oklahoma. This agreement is going to  
7 ensure that the casino is going to be managed and  
8 operated by a world-class gaming expert with a  
9 proven track record of success. Thank you for  
10 your time.

11 CHAD BROUSSARD: Thank you, Mr. Starr,  
12 for your comment.

13 The next speaker will be Sean Boyd.

14 SEAN BOYD: Good evening. This is Sean  
15 Boyd. And I represent the Chickasaw Nation and  
16 have been working on this project with the Koi  
17 Nation since we met the Koi Nation over 18 months  
18 ago. In our work with tribes across the country  
19 and in the state of Oklahoma, we have a deep  
20 dedication to both the Indian Gaming Regulatory  
21 Act and the support of tribal sovereignty. We  
22 have worked with jurisdiction after jurisdiction  
23 to support the federal standards placed on tribes  
24 so that they may exercise their tribal standards  
25 and their tribal sovereignty. We found in the Koi

1 Nation a deep commitment to this project and a  
2 deep commitment to this federal process. We are  
3 in support of the EA that is before the BIA today.  
4 And we are dedicated to see this process through  
5 the fee-to-trust process, as we have for the past  
6 20 years with over 25 gaming establishments in  
7 multiple jurisdictions. We thank you for your  
8 time. We thank you for your commitment to the  
9 process. We do understand the community concerns.  
10 We work with communities all across our  
11 jurisdictions and we believe that a rising tide  
12 truly does lift all ships. We're thankful for the  
13 opportunity to work through these concerns. And  
14 we believe the Koi Nation is fully committed to  
15 working with the community through their concerns  
16 upon successful completion of a fee-to-trust  
17 process. There will be great time for the Koi  
18 Nation and the Chickasaw Nation and our subsidiary  
19 entity, Global Gaming Solutions, to solve and work  
20 through these challenges, the concerns that have  
21 been voiced today and an ongoing manner. We have  
22 faced those before. And we have a deep regard to  
23 listen and work with the community. From an  
24 environmental standpoint, we believe deeply in  
25 this project and the work before the BIA today.

1 And we thank you for your commitment to this  
2 project.

3 CHAD BROUSSARD: Thank you, Mr. Boyd,  
4 for your comment.

5 The next speaker will be Jeanne Powell.

6 JEANNE POWELL: Hi, Chad. This is  
7 Jeanne Powell.

8 CHAD BROUSSARD: Jeanne, thank you.

9 JEANNE POWELL: Hi. I am a very  
10 fortunate Windsor resident for over 35 years. I  
11 own two properties here at -- in Windsor. One  
12 home that my son and his wife and two  
13 granddaughters live in, which is right next to the  
14 proposed project. I'm greatly concerned about the  
15 possibility of a casino coming to Windsor and  
16 would like to share those concerns. Research has  
17 shown that casinos lead to a number of social  
18 ills, including increased substance abuse, mental  
19 illness, suicide, violent crime -- crime, auto  
20 theft, larceny, and bankruptcy. The last three  
21 all increase by 10 percent in communities that  
22 allowed gambling. Casinos aren't even considered  
23 a particularly good source of tax -- tax revenue.  
24 Studies have shown that Indian casinos cannibalize  
25 business at nearby restaurants and bars. And

1 doing so actually reduce state tax revenue.

2 Lastly, as an RN who has worked at Providence  
3 Santa Rosa Memorial Hospital for over 27 years and  
4 has seen the repercussions of violent crime,  
5 mental illness, and substance abuse, please do not  
6 build a casino in this location. Thank you.

7 CHAD BROUSSARD: Thank you, Ms. Powell,  
8 for your comments.

9 Our next speaker will be Cameron  
10 Barfield.

11 CAMERON BARFIELD: Hi, Mr. Broussard.  
12 Can you hear me?

13 CHAD BROUSSARD: Yes. I can hear you.

14 CAMERON BARFIELD: My name is Cameron  
15 Barfield. And I'm opposed to the Shiloh recent --  
16 Shiloh casino -- casino project. I would like to  
17 address the issues regarding Alternatives A, B,  
18 and C. I live on Matilda Drive, which is a street  
19 that abuts the proposed casino. In fact, if  
20 Alternatives A, B, or C are approved, from my  
21 front yard, I would be looking down the street,  
22 directly at a five-story hotel where there will be  
23 lots of light and noise from drunk, drugged, and  
24 disorderly people that come and leave via cars,  
25 motorcycles, and loud buses at all hours of the

1 night and day. We spent our lives earning enough  
2 money to be able to afford the house we live in in  
3 the setting we believe would stay the same because  
4 it was a vineyard in the county agricultural  
5 preservation program. To be able to move here, we  
6 did not have the benefit of a Bureau of Indian  
7 Affairs giving us a free hand to destroy a  
8 community around us so we can enrich ourselves or  
9 the wealthy Oklahoma Indian corporation that backs  
10 us. If A, B, or C are approved, it would  
11 personally cost us a lot due to loss of property  
12 value, moving costs, and increased property taxes  
13 to move so we can have a home where we can sleep  
14 at night in quiet and beauty and safety. It would  
15 also cost us our network of friends and neighbors  
16 that we have created over the years by being part  
17 of the Oak Park neighborhood, which is right  
18 across the street from the casino. At our age of  
19 68 and 81, we need all of the friends that we can  
20 get.

21 My safety -- main safety concerns have  
22 to do with the congestion on Shiloh Road that will  
23 be created, especially during a fire. And there  
24 will be more fires like the Tubbs Fire of 2017,  
25 where we needed to evacuate fast and could not

1 because of the congestion on Shiloh Road at that  
2 time. Since the Tubbs Fire, there has been lots  
3 of development along Shiloh Road. A 300-unit  
4 apartment complex is currently being under  
5 construction at the corner of East Shiloh Road and  
6 Old Redwood Highway. More development is underway  
7 already right next to Home Depot, further adding  
8 to the construction on Shiloh Road. Your EA  
9 suggestions do not adequately address the fact  
10 that the roads are not adequate enough to evacuate  
11 the people who already live here, much less are  
12 going to be living here on Shiloh Road.

13 CHAD BROUSSARD: Thank you, sir.

14 CAMERON BARFIELD: No amount of --

15 CHAD BROUSSARD: Your time is up.

16 Please wrap up your comments. Okay. Thank you,  
17 Mr. Barfield. I appreciate your comment.

18 Our next speaker will be Riley Ahern.

19 RILEY AHERN: Good evening, everyone.

20 My name is Riley Ahern. And I'm Congressman Jared  
21 Huffman's Sonoma County field representative. I'm  
22 here on behalf of the congressman who wanted me to  
23 share with you that Congressman Huffman continues  
24 to oppose the proposed casino as noted in  
25 correspondence with Representative Mike Thompson

1 to BIA in April of 2022. Thank you.

2 CHAD BROUSSARD: Okay. Thank you for  
3 your comments.

4 The next speaker will be Kristi Selby.

5 KRISTI SELBY: Hi. Can you hear me?

6 CHAD BROUSSARD: Yes, I can. Thank you.

7 KRISTI SELBY: Perfect. I'm writing  
8 on -- or I'm calling in on behalf of myself and my  
9 family. We live in the neighborhood adjacent to  
10 the proposed site. I'm also a nurse at the  
11 hospital two miles away. And, you know, I feel  
12 like there's several issues. One being the park  
13 that this proposed casino is wanting to be right  
14 next to. My kids go there to play. They play  
15 softball. They play baseball at that park. It  
16 would greatly damage the ability to do that  
17 safely. I think that every person who has called  
18 in to want this proposal to go through, with all  
19 due respect to the Koi Nation, to the Tribe in  
20 Oklahoma, they weren't here in 2017 and they  
21 weren't here in 2019 when it took hours for us to  
22 leave our homes. And we almost lost our home.  
23 The fire came right up to our backyard. We almost  
24 lost our home. We almost lost everything. I  
25 don't -- my kids' safety and my kids' lives come

1 before any economic growth or jobs the casino  
2 might bring. Not to mention that the hospital is  
3 already impacted highly. We are at capacity  
4 almost 100 percent of the time. We can't house  
5 the sick people and residents. To add 20,000 more  
6 people to that, being the closest hospital to the  
7 proposed casino, would greatly impact that area as  
8 well. Not to mention, you know, I think we have  
9 all talked about the traffic and the fact that,  
10 you know, our kids -- our kids ride their bikes.  
11 We ride our bikes all over. We walk. The  
12 elementary schools that are within one mile in  
13 Windsor and Mark West, this is just a bad idea.  
14 I've never heard of a casino going in the middle  
15 and being surrounded by residential neighborhoods.  
16 I grew up in the Wikiup area. And now I'm raising  
17 my family in the Windsor area. You know, my  
18 husband is a member of the Pomo tribe. I want the  
19 Koi Nation to have their casino. I don't want  
20 them to have it next door to my home. And we  
21 don't want them to have it when we're already  
22 struggling. It is not if another fire happens,  
23 but when. They are impacting the survival for  
24 thousands of people. And there is no mitigation  
25 for that. And I think the EA is joke. And I

1 think that a third party who has no connections to  
2 the Koi Nation really needs to have another  
3 environmental study. And that's it.

4 CHAD BROUSSARD: Thank you, Ms. Selby,  
5 for your comments.

6 The next speaker will be Monicqua Brown.

7 Monicqua Brown, are you there? I think  
8 you might be on mute.

9 Okay. We're going to go to the next  
10 speaker. If you would like to speak later, please  
11 raise your hand.

12 The next speaker will be Kevin Maxemin.

13 Kevin, I think you might be on mute.

14 KEVIN MAXEMIN: Can you hear me?

15 CHAD BROUSSARD: I can. Thank you.

16 KEVIN MAXEMIN: Okay. My name is Kevin  
17 Maxemin. I'm a homeowner in Sonoma County. I'm  
18 in strong support of this project for the Koi  
19 Nation proposed casino and resort. It will not  
20 only create amazing jobs for thousands of  
21 construction works, but provide careers for local  
22 community for years to come. It will bring an  
23 incredible economic boost for Sonoma County. I  
24 believe the Koi Nation has done a great job  
25 reaching out to the public about the project.

1 With all of the benefits, I strongly urge BIA to  
2 approve this project. That's my time. Thank you  
3 very much, sir.

4 CHAD BROUSSARD: Okay. Thank you,  
5 Mr. Maxemin, for your comments.

6 The next speaker will be Tiffany Wolvek.

7 OGDEN STINSON: Hi. I'm Ogden Stinson.  
8 And I'm the son of Tiffany Wolvek. Can you hear  
9 me?

10 CHAD BROUSSARD: I can. Thank you.

11 OGDEN STINSON: And I go -- and I go San  
12 Miguel, which is part of the Mark West District.  
13 And I'm -- I'm in fifth grade. And I walk to  
14 school. And I'm worried that I could be -- I  
15 could be unsafe if like there's a bunch of cars  
16 coming in. And like right next to where I'm  
17 walking. And I feel that -- and I feel that it  
18 could be unsafe for me and my fellow classmates to  
19 be walking where there are 16,000 cars coming and  
20 going each day. And also the environmental  
21 impacts. Like -- I mean like the -- like  
22 you're -- it's like the -- like 400,000 gallons of  
23 semi-treated wastewater going into Pruitt Creek  
24 each day. I mean, imagine the effect that could  
25 have. It flows into Mark West Creek, which flows

1 into the Russian River. Imagine -- and I swim in  
2 the Russian River all the time. So that's all I  
3 wanted to say. And thank you for your time.

4 CHAD BROUSSARD: Thank you very much for  
5 your comment.

6 Our next speaker will be Mary Ann  
7 Bainbridge-Krause.

8 MARY ANN BAINBRIDGE-KRAUSE: Hi. Can  
9 you hear me?

10 CHAD BROUSSARD: Yes, I can. Thank you.

11 MARY ANN BAINBRIDGE-KRAUSE: Thank you  
12 for taking my call. I had to wait quite a while.  
13 First of all, I want to address something that I  
14 noticed. One other person also mentioned this.  
15 And that is all of the union members calling in  
16 about the great union jobs that this is going to  
17 create. It is pretty obvious that they are  
18 reading from a script, that they were contacted by  
19 their union and told to, hey, you know, call in  
20 tonight in favor of this project. I want to thank  
21 the office of Dianne Feinstein, senator; Sam  
22 Salmon, town council member; Robin Goble,  
23 ex-council member of Windsor and ex-mayor; Rosa  
24 Reynoza, the current mayor of Windsor; the board  
25 of supervisors; Jared Huffman, all of them calling

1 in tonight or representatives calling in tonight  
2 against this project. This is the wrong project  
3 in the wrong location. They are a tribe from Lake  
4 County. They need to build their facility in Lake  
5 County. I support everything that Lynda Williams  
6 and Betsy Mallace stated tonight. I am a 30-year  
7 member resident of Windsor. I love my town. I  
8 don't want to see it destroyed by a casino and a  
9 hotel and a parking garage and all of the cars in  
10 the environment and everything that goes along  
11 with that. Thank you for taking my time. And I  
12 hope the BIA listens to the residents and the  
13 governments represented here tonight of Windsor.  
14 Thank you.

15 CHAD BROUSSARD: Thank you,  
16 Ms. Bainbridge-Krause, for your comment.

17 Our next speaker will be Carlos  
18 Resendez.

19 CARLOS RESENDEZ: Thank you,  
20 Mr. Broussard, for allowing me to speak tonight.  
21 My first thought concerning the project is the  
22 third time shouldn't be the charm. The Koi Tribe  
23 has asked for land in Merritt Island and Oakland  
24 for a casino. So what makes Windsor special?  
25 This proposed project site is not well thought out

1 or well planned. There are only two lanes into  
2 this area. No matter which way you drive. The  
3 amount of construction traffic that is going to  
4 come through and all of the semis and 18-wheelers  
5 and the wide loads are going to detriment these  
6 whole entire infrastructure. In addition, that  
7 large wildlife park right across the way sees  
8 wildlife going into the adjacent area, across the  
9 proposed state. There is no mitigation for the  
10 wildlife staying in their own area. This will  
11 increase road kill along the roads leading into  
12 the casino. The project site itself leads into  
13 the Russian River watershed. Every winter, this  
14 is evident as the entire area ends up under water  
15 by over six inches. Paving this area and reducing  
16 bare ground absorption will greatly impact those  
17 properties and homes directly across from Old  
18 Redwood Highway.

19 As far as the community, the Koi Nation  
20 has failed to live up to their own statements of  
21 being a collaborative partner. They have  
22 [indiscernible] local community groups with the  
23 proposal, but immediately leave and will not allow  
24 for any questions or concerns to be raised by  
25 those who will be impacted by this project. Thank

1     you for your time.

2                   CHAD BROUSSARD:   Thank you for your  
3     comment.

4                   Our next speaker will be Martin  
5     McCormick.

6                   MARTIN McCORMICK:   Can you hear me?

7                   CHAD BROUSSARD:   I can.   Thank you.

8                   MARTIN McCORMICK:   Great.   Great.   Thank  
9     you, Chad.   And, Chad, I hope that you will come  
10    and spend some time with us here in this  
11    community.   You've got to see how beautiful this  
12    land is.   I raised ten children at the end of  
13    Gridley Drive.   I have 14 grandchildren who are  
14    here within our area.   Shiloh is a beautiful  
15    place.   There's an aura about it.   I get up at  
16    5:30 in the morning.   There's the chickens,  
17    there's the hawks, and all of that will be gone if  
18    this casino is built.   This is a place for  
19    children.   Like I said, I've raised ten kids here,  
20    14 grandkids.   They all congregate here.   They  
21    come to Esposti Park.   We walk along Shiloh.   And  
22    I have to tell you that there's an aura about this  
23    place.   It is a spiritual place.   I mean that.  
24    Okay.   And I have raised these kids.   And I have  
25    been here for almost 35 years.   And now it could

1 end. This is the wrong place. I'm a realtor.

2 I'm a former president of the Savings and Loan.

3 And as far as the construction guys are  
4 concerned, guys, this can be built someplace else.

5 Not here. Okay. I'm big with jobs. I'm big with  
6 building. But it is not the right place. Okay.

7 All right. This is a community of beautiful  
8 people. We have a lot of elderly. And I'm going  
9 to tell you something, there is something  
10 special -- special spiritual about Shiloh and  
11 Faught Road. And it is not the place for a  
12 casino, a winery, or a hotel.

13 And so, Chad, I hope you just come and  
14 see it. There's something special here. And so  
15 I'm not opposed to them building someplace else.  
16 This is not the right place. This is family. You  
17 know, this is nature. This is spiritual. I have  
18 to say, again, 35 years. I want you to please  
19 take the time, come and meet us here. We would  
20 love to tell you why this place is special. This  
21 should not be a casino. I'm advocating for all of  
22 us. Please do not approve any of this. Thank  
23 you, Chad.

24 CHAD BROUSSARD: Thank you,  
25 Mr. McCormick, for your comment.

1 Our next speaker will be Jessica Sutton.

2 JESSICA SUTTON: Hello.

3 CHAD BROUSSARD: Yes. I can hear you.

4 JESSICA SUTTON: Okay. Great. Thank  
 5 you for your time. I was interested to hear the  
 6 comment from Mr. Beltrain or Beltran in the  
 7 beginning of the sequence tonight where he said  
 8 the company they hired to do the BIA was well  
 9 known and very successful in helping Indians  
 10 create casinos. Okay. That was interesting to  
 11 hear. What I would say is the BIA study as it  
 12 stands has a serious lack of depth. There is  
 13 no -- there are no metrics. There's no analysis.  
 14 As someone who has been a teacher and a professor  
 15 in college for years, I was reading it. And I  
 16 was -- I was actually chagrined and mollified.  
 17 What is this? There is nothing against to --  
 18 there is nothing to substantiate any of this. The  
 19 best that I can say is that I would hope that the  
 20 BIA would go back and take their job seriously,  
 21 and look at the water, fire, and traffic problems.  
 22 Their analysis was thin and shallow, at best.  
 23 Plus, we already have a lack of affordable  
 24 housing, which we are trying to make up here in  
 25 Sonoma County, especially in Windsor. When I hear

1 these gentlemen who are in the construction  
2 business, I -- of course, everyone needs a job and  
3 we want to support growing families. But I'm so  
4 curious, in a small district in Sonoma County  
5 where there is no housing and we're already  
6 underhoused for the vineyard workers that bring in  
7 a lot of the money for -- where are these houses  
8 going to come -- going to appear for these new  
9 workers that are -- first, the construction  
10 workers, and then the 1500 workers they say are  
11 actually going to work in this casino? There's  
12 just no people to hire now. I would like to ask  
13 that the BIA either redo their study or go to  
14 NEPA. There is no metrics. There's no solid  
15 basis. And I actually want the best for the Koi  
16 Nation. And I feel as though someone has put on  
17 rose-colored glasses for them as a reservation  
18 shock. This is their third try. And I expect  
19 that they're being chaperoned or helped by the  
20 Chickasaw Nation. And I'm sorry because I want  
21 them to succeed. But someone has led them down  
22 the false path. There is no way that we can have  
23 anything in this area of the county without true,  
24 true devastation, whether it be water, lack of  
25 water in water -- water tables, fire, or housing.

1 And I wish the Koi Nation the best. But this is  
2 not the place for their casino. I'm done. Thank  
3 you, sir.

4 CHAD BROUSSARD: Thank you, Ms. Sutton,  
5 for your comments.

6 Our next speaker will be Heidi Jacquin.

7 HEIDI JACQUIN: Hi. Am I on?

8 CHAD BROUSSARD: Yes. I can hear you.

9 HEIDI JACQUIN: Okay. Thank you. So I  
10 have to agree with everyone who is opposing this  
11 project. I think what surprised me the most about  
12 the EA was how thin it was. It looked like  
13 something I could type up in about an hour and a  
14 half. It didn't seem to contemplate any of the  
15 issues that we have that everyone has talked  
16 about. From water wells to fire. You know, we  
17 live in an extreme fire danger area. And I don't  
18 know if anyone has really contemplated that, if  
19 you don't live here and you haven't lived through  
20 it. I lost my home in the Tubbs Fire on a nearby  
21 hill called Redwood Hill. I now live up in Shiloh  
22 Estates. And if you weren't moved by water,  
23 traffic, schools, churches, everything else,  
24 wildlife, the creek, maybe you would be moved by  
25 death and people burning to death in their homes,

1 burning to death in their cars. Because two-lane  
2 roads are not going to evacuate the amount of  
3 people that would need to get out of the casino.  
4 And as someone who is behind the casino, where do  
5 I fit in to get my family out? I think the  
6 residents, we have all lived here a long time.  
7 And it is really scary to think that we could be  
8 trapped in because you have all of those people  
9 filling up the casino to play games and hang out  
10 here. It's very devastating to think about. The  
11 other thing that I read in the EA that made me  
12 laugh out loud was the concept that you were going  
13 to hire people during a fire evacuation. The  
14 employees were going to stand there and usher  
15 people out of your parking lot. And, you know,  
16 let people go one at a time and mitigate traffic.  
17 And after living through the Tubbs Fire, that --  
18 nobody was standing -- the only people standing  
19 and mitigating traffic were the police. Your  
20 employees -- I don't know they're going to make an  
21 hour. \$15, \$22, whatever it is. If fire is  
22 roaring down or on their back, they're not going  
23 to mitigate traffic. They're going to run for the  
24 hills and find their own car. It is not well  
25 thought out. It is very scary. And I can't think

1 of anyone who lives in this area that wants this  
2 project. As for jobs, there's so many jobs  
3 available. I'm sorry. But drive half an hour to  
4 a different job. I love for people to be able to  
5 work. I love economic activity. But this is just  
6 the wrong place and the wrong time. And the last  
7 thing I'll say, when we first -- when my husband  
8 and I first heard about this, I said, it will  
9 never happen. It's an agricultural zone. It is  
10 low-density housing. It's neighborhoods. There's  
11 parks. There's schools. There's churches. It  
12 will never happen. This is never coming here.  
13 And I'm really surprised we have gotten this far.

14 CHAD BROUSSARD: Thank you for your  
15 comment. Your time is up.

16 HEIDI JACQUIN: Thank you.

17 CHAD BROUSSARD: Thank you.

18 Our next speaker will be Lori Thomas.

19 LORI LAIWA THOMAS: Hello?

20 CHAD BROUSSARD: Yes. I can hear you.

21 LORI LAIWA THOMAS: My name is Lori  
22 Laiwa Thomas. And I'm an enrolled citizen of the  
23 Hopland Band of Pomo Indians, just down the road  
24 here. I live here in Santa Rosa. Typically I  
25 support tribal economic development projects, but

1 I cannot support this one. All tribal nations  
2 have ancestral territories and boundaries. And  
3 Koi does not belong in Sonoma County. Bottom  
4 line. They do not belong here. They belong in  
5 Lake County, where my husband is from. He is from  
6 Elem. It is disrespectful to the five Sonoma  
7 County tribes -- Cloverdale, Dry Creek, Kashia,  
8 Lytton, and Graton -- to even think about bringing  
9 economic development here into another tribe's  
10 turf. You just do not do it. Please do not  
11 approve this land and trust proposal. I just  
12 think it is the wrong thing to do. Thank you.

13 CHAD BROUSSARD: Thank you for your  
14 comment.

15 Our next speaker will be Ross Yana.

16 YANA ROSS: Hi there. My name is Yana  
17 Ross. And I'm an enrolled citizen of the  
18 Federated Indians of Graton Rancheria. I am Coast  
19 Miwok, Southern Pomo, and Mishewal-Wappo. I  
20 believe and respect tribal sovereignty and  
21 economic development for all Indian Nations when  
22 they are within traditional aboriginal homeland of  
23 their own. Every tribal nation is indigenous to  
24 someplace in this country. That is a natural  
25 fact. And while Indian people live with a legacy

1 of profound injustice and unfairness, two wrongs  
2 don't make a right. And the Koi Nation belong to  
3 Lake County, not Sonoma County. Please listen to  
4 and respect the unanimous opposition to the Koi's  
5 attempted encroachment from all Sonoma County  
6 tribal nations. My own, Federated Indians of  
7 Graton Rancheria, Kashia Pomo, Lytton Pomo, Dry  
8 Creek Pomo, Cloverdale Pomo, and Mishewal-Wappo.  
9 The Koi are indigenous to Lake County and they  
10 have no jurisdiction and no entitlement to  
11 overstep these traditional and lawful boundaries.  
12 We are just recovering from a critical fire  
13 response and multi-year drought. We have untold  
14 increased development in Sonoma County and we have  
15 enough casino resorts. This project is not smart,  
16 not ethical, or not sustainable. I implore the  
17 BIA to decline this egregious assertion from the  
18 Koi Nation and join all Sonoma County tribal  
19 nations that oppose this proposal. Thank you for  
20 considering and for this public forum. Good  
21 night.

22 CHAD BROUSSARD: Thank you, Ms. Ross,  
23 for your comments.

24 The next speaker will be David George.

25 DAVID GEORGE: Good evening,

1 Mr. Broussard. My name is David George. I live  
2 directly across the street from the site. I back  
3 to a vineyard. I have a vineyard out my front  
4 drive as I drive out, which is the proposed site.  
5 I bought this land because of the agricultural  
6 nature around me. I didn't buy it to drive out  
7 and look at the huge parking structure nor a  
8 65-foot-tall resort. I have concern about the  
9 amount of water that will be taken out of the  
10 groundwater. I know my well will run dry. Not  
11 may, but it will. As far as economic impacts,  
12 your report talks about 2.6 unemployment rate for  
13 Sonoma County, historic low. We have a severe  
14 shortage of workers in this area, whether it is  
15 construction or any other business. The  
16 construction -- the short-term construction jobs,  
17 I have been in the construction industry for 39  
18 years. So I know the industry. And these casinos  
19 are built by general contractors out of Vegas. A  
20 lot of this money that they're talking about that  
21 will be generated here will go back to Vegas.  
22 That general contractor, their subcontractors, and  
23 employees that come out of that area. We have a  
24 shortage of construction industry workers, along  
25 with every other industry here. And we do not

1 have enough to staff that. The rest of the folks  
2 will come out of Sonoma County -- outside of  
3 Sonoma County. Very little is going to stay here.  
4 As far as the ongoing full-time jobs they're  
5 talking about, the 2,220, again, there's a  
6 shortage of workers right now. There's plenty  
7 enough jobs out there that businesses need. And  
8 many businesses have gone out of business here  
9 because of the shortage of lack of workers. The  
10 2.6 percent out of work, if they wanted to work,  
11 there is plenty of jobs for them. They don't want  
12 to work. The Koi Tribe if they build this, that  
13 2,220 workers will be taken from other small  
14 businesses that are hurting for workers currently  
15 and they will go out of business. It is going to  
16 ruin their lives and their family's lives. This  
17 is not a good spot for it. It is bordered by  
18 three residents on three different sides. The  
19 65-story [sic] monstrosity will look down into the  
20 backyard of some of those that are directly across  
21 the street. They will have people peering into  
22 their windows. Their privacy will be ended. This  
23 is not the place for it. They need to put it  
24 somewhere else. The tribal Chairman Beltran  
25 talked about transparency. Where was the

1 transparency when they underhandedly and secretly  
2 bought that property without divulging who they  
3 were and their intent. If they were transparent,  
4 they would have been open on it and divulged their  
5 intent. They have not been transparent or honest.  
6 Please do not allow this project to be built or  
7 any other of their options. It needs to stay as  
8 agricultural land as been zoned.

9 CHAD BROUSSARD: Your time is up. Thank  
10 you very much for your comment.

11 Our next speaker will be Edward Evans.

12 EDWARD EVANS: Hi. Can you hear me?

13 CHAD BROUSSARD: Yes, I can. Thanks.

14 EDWARD EVANS: Thank you very much. My  
15 name is Edward Evans. I'm calling on behalf of  
16 Nor Cal Carpenters Union. [Inaudible] the  
17 environmental impact approve and let the project  
18 go forward. You have heard it before tonight.  
19 The jobs it will create, the apprenticeship  
20 opportunities for folks here in San Mateo -- in  
21 the county, in Sonoma County. Also, I do want  
22 to -- on behalf of labor, I do want to point out  
23 something. People keep harping on the fact that  
24 these construction jobs are temporary, as if -- as  
25 if something -- as if there is something about

1 construction jobs that is less than. Let me tell  
2 you something. Every construction job is  
3 temporary. And good carpenters, good  
4 tradespeople, they make a living out of going from  
5 one temporary job to the next one. As carpenters,  
6 we're always working ourselves out of a job. So  
7 we're looking for this one and we're going to be  
8 looking for others afterwards. So I can't sit  
9 here and let the Carpenters Union and let labor be  
10 told that we don't have the right to advocate for  
11 work in our communities. You're using the -- the  
12 opposition is using the environment as a reason to  
13 kill this project. So therefore, we have the  
14 right -- if you're going to try to do that, you're  
15 going to take work away from us, we have the right  
16 to advocate for the work. So that's my two cents  
17 on it. Thank you very much. Please -- please  
18 push the project forward and approve it. Thank  
19 you.

20 CHAD BROUSSARD: Thank you, Mr. Evans,  
21 for your comments.

22 Our next speaker will be Laura Pierce.

23 LAURA PIERCE: Hi. My name is Laura  
24 Pierce. And I moved to Windsor when I was about  
25 6 years old. So that was over 50 years ago.

1 And -- [indiscernible] the nice family  
2 environment. And somebody had mentioned the word  
3 earlier about disrespect. I do think it is very  
4 disrespectful to all of the people who have lived  
5 here for decades and planned to retire here. I  
6 think there would be a pretty mass exodus. I live  
7 on Tamara. And all my neighbors that I have  
8 talked to have all mentioned probably moving.  
9 Having to move. I have family members that are  
10 buried in the cemetery. I don't want to move.  
11 There's four generations of my family here. But I  
12 also can't see myself -- can't see myself trying  
13 to go to work two and a half miles away and  
14 needing it -- you know, taking 40 minutes to get  
15 there during the construction period. I'm  
16 wondering where these people are going to park.  
17 We already have -- from the housing developments  
18 that are being put up right now, right across from  
19 Esposti Park, there are people who are already  
20 parking all the way down to Tamara. So I'm  
21 wondering where all of these thousand construction  
22 workers are going to park while it is being built.  
23 And Esposti Park is right there. It is supposed  
24 to be used for children and for games and whatnot.  
25 If I -- if I had a child going there right now, I

1 would be pretty upset because I can't even get a  
2 parking spot. And when my kids were at Windsor  
3 High School and I took them to school, it already  
4 took 30 minutes to get there during commute time.  
5 Let alone, you know, the fire that everyone is  
6 talking about. What about the day-to-day effort  
7 to get to work or to get to the freeway mainly  
8 during these construction periods. I think it is  
9 such a disservice to the community. And I really  
10 truly hope that you decline this proposal. Thank  
11 you for your time.

12 CHAD BROUSSARD: Thank you, Ms. Pierce,  
13 for your comment.

14 Our next speaker will be SRT Singer.

15 Singer, are you there? Or you may be on  
16 mute. You can unmute your microphone.

17 Okay. We're going to move on to the  
18 next speaker. Singer, if you would like to speak,  
19 please come back and raise your hand.

20 Next speaker will be Angela Adams.

21 ANGELA ADAMS: Hello. Can you hear me?

22 CHAD BROUSSARD: Yes, I can. Thank you.

23 ANGELA ADAMS: Okay. Good evening. My  
24 name is Angela Adams. And I'm calling in support  
25 of the Koi Nations proposed resort and casino.

1 This will not only create amazing jobs for  
2 thousands of construction workers, but it will  
3 continue to provide careers for our local  
4 communities for years to come. This project will  
5 bring an incredible economic boost to the Sonoma  
6 County. I believe that the Koi Nation has done a  
7 great job reaching out to the public about this  
8 project. With all of these benefits, I strongly  
9 urge the BIA to approve this project. And thank  
10 you for your time and hearing me out. Thank you.

11 CHAD BROUSSARD: Thank you, Ms. Adams,  
12 for your comments.

13 Our next speaker will be Janice Sexton.

14 JANICE SEXTON: I live about 50 feet  
15 from the northern edge of the proposed project in  
16 Oak Park. There are three residential  
17 neighborhoods that surround -- that border this  
18 proposal, as well as two public roads. Both of  
19 those two public roads are two-lane roads. Shiloh  
20 Road is the only evacuation route that some 100  
21 homes across from the project have in case of  
22 wildfires. There have been two such wildfire  
23 evacuations in the past six years. Adding as many  
24 as 15,000 additional vehicles as proposed on any  
25 one day will result in gridlock and an inability

1 to safely evacuate. This applies not only to the  
2 residents, but also to the Tribe's customers,  
3 which they can't -- and employees, which they  
4 couldn't possibly want. I also want to note that  
5 I absolutely support the Sonoma County tribes.  
6 This is just not the right place for a casino.  
7 And as far as the jobs that would be created,  
8 carpenters jobs would be created no matter what  
9 was built. It does not have to be a casino. And  
10 I just wanted to make that point. And thank you  
11 very much.

12 CHAD BROUSSARD: Thank you for your  
13 comment.

14 Our next speaker will be Terri Jenson.

15 TERRI JENSON: Can you hear me?

16 CHAD BROUSSARD: Yes, I can.

17 TERRI JENSON: Okay. My name is Terri  
18 Jensen. I live on Gridley Drive with my husband,  
19 Don. We are directly across the street from where  
20 the proposed casino is planned. We have lived  
21 there for 34 years and raised our family here.  
22 There is really no question that a project of this  
23 magnitude will create jobs and benefit contractors  
24 and unions. But the issue here is not jobs. I  
25 think everybody is just missing the point. The

1 issue, why we're all here tonight, is because of  
2 the profound and permanent impact that this  
3 project will have on the quality of all of our  
4 lives and our environment. And the main issue is  
5 that this proposed site is absolutely without  
6 question the wrong location. And we could go on  
7 and on and talk about all of the different -- the  
8 different issues that were brought up tonight.  
9 The traffic, the noise, the air safety, what have  
10 you. And what we're repeatedly hearing is that  
11 the negative impacts for all of these will be  
12 minimized. But we don't want anything minimized.  
13 [Indiscernible] I have yet to hear an argument  
14 tonight in favor of this project, other than those  
15 who are interested in creating jobs. And I really  
16 would like to [indiscernible] argument for this  
17 besides jobs. Because as the gentleman before me  
18 just said, he will do this job, and it is  
19 temporary. And once he is finished, they will  
20 move on and get another job. But this is our  
21 home. We don't move to another home. This is a  
22 home that we have created for over 30 years. And  
23 when it's -- when that's impacted and the comfort  
24 of our home is taken away from us, we just don't  
25 get to pick up and move like the folks who are

1 looking for another job. And we just feel  
2 strongly about opposing this project. And I know  
3 I probably haven't said anything that hasn't  
4 already been said. But I just couldn't sit here  
5 and listen without voicing my strong opinion about  
6 how both my husband and I feel about opposing  
7 this. But I do want to thank you for allowing us  
8 all to speak and taking the time to listen.

9 CHAD BROUSSARD: Thank you for your  
10 comment.

11 The next speaker will be Debra Avanche.

12 DEBRA AVANCHE: Can you hear me?

13 CHAD BROUSSARD: Yes, I can. Thanks.

14 DEBRA AVANCHE: Thank you. My name is  
15 Debra Avanche. And I live on East Shiloh Road.  
16 I've been here for 33 years. And I raised my kids  
17 and my grandkids here. First of all, I would like  
18 to say that the Koi Nation has been given a raw  
19 deal for decades. It seems appropriate that they  
20 are given recognition as a tribe from Lake County.  
21 The members deserve land and an opportunity to  
22 thrive and to make up for lost time and resources  
23 that they were denied. That being said, I have to  
24 go on record as emphatically opposing this  
25 particular project. I'm not familiar with a

1 history of the BIA approving gaming operations of  
2 this magnitude in the middle of a rural  
3 agricultural designated area. To plot such a  
4 massive project on this land closely surrounded by  
5 a church, mobile home park, baseball/soccer  
6 fields, residential development, and single-family  
7 housing right directly across the two-lane east  
8 Shiloh Road, as well as the beautiful Shiloh  
9 Regional Park, and all of these directly abutting  
10 the Proposed Project. Not to mention the  
11 elementary schools, which I'm appalled wasn't  
12 mentioned in the report. My and my neighbors'  
13 properties are on self-maintained wells. We try  
14 hard to use every drop of water and reuse often.  
15 I divert my laundry largely to buckets which I use  
16 to water my trees and other landscaping. This  
17 project proposes a 700-foot-deep well. So rich  
18 people get to take long leisurely showers at the  
19 hotel while we haul buckets and go without a lawn.  
20 The EA addresses well impact mitigation but says  
21 that we will be fine. When the vineyard went in,  
22 in this area, quite a few years ago, the Pruitt  
23 Creek stopped running year-round. It was running  
24 in the winter when it rained, but not year-round.  
25 So wildfires and timely evacuation are another

1 main concern for me and my family. We would have  
2 a very difficult time getting out in a wildfire  
3 emergency, when we have experienced this twice in  
4 past few years. This environmental assessment  
5 seems to address the different concerns which  
6 would occur and then quickly say it probably won't  
7 be a big deal. Not a big problem. There's  
8 literally nothing about this project that isn't a  
9 very big deal. It is reasonable to find a more  
10 suitable setting for a casino hotel than that is  
11 situated in Lake County in a commercial and  
12 industrial area. I very much oppose this project.  
13 Thank you, Mr. Broussard.

14 CHAD BROUSSARD: Thank you for your  
15 comment.

16 At this time we're going to take a very  
17 short break. We have a stenographer who is  
18 recording every word of this hearing to make sure  
19 that we have an accurate record. And we want to  
20 give her a short break. It is about a 10-minute  
21 break. So we're going to reconvene at about 8:55.  
22 And we will have a timer on the screen that will  
23 show specifically when we're going to reconvene.  
24 So go ahead and start that. And then we will  
25 start right back up again, taking comments when

1 this timer gets down to zero. Thank you,  
2 everyone, for your participation. And we will be  
3 back in just a little over nine minutes to  
4 reconvene the hearing.

5 (A brief recess was taken.)

6 CHAD BROUSSARD: Okay. Thank you for  
7 your patience. We're going to go ahead and  
8 reconvene and start taking comments again.

9 So our next commenter will be Steve  
10 Plamann.

11 STEVE PLAMANN: Okay. You're unmuted.

12 JILL PLAMANN: Hello. I'm actually Jill  
13 Plamann, Steve's wife. Can I speak? Can you hear  
14 me?

15 CHAD BROUSSARD: Yes. Yes, I can.

16 JILL PLAMANN: Thank you. Okay. My  
17 name is Jill. I live close to this development.  
18 I regularly hike in the beautiful Shiloh Park,  
19 which borders this project. I personally witness  
20 the hell flames spewing from this park during the  
21 last two major fires. The fire department worked  
22 tirelessly for days to keep it from reaching the  
23 neighborhoods as it was attempting to lick the  
24 rooftops. It was horrifying. There is no way  
25 this casino won't -- won't impact the safety of

1 our neighborhood and its evacuation efforts.

2 There is no way that we can fill this agricultural  
3 space with a casino development safely. I urge  
4 the BIA to look at this narrow passageway. It's  
5 narrow. We can't survive with a casino here.

6 Thank you for your time.

7 CHAD BROUSSARD: Thank you, Ms. Plamann,  
8 for your comments.

9 Our next speaker will be Pam Bruszewski.  
10 Pam, are you there? You may have your microphone  
11 muted.

12 WALTER BRUSZEWSKI: Hello.

13 CHAD BROUSSARD: Yes. I can hear you.

14 WALTER BRUSZEWSKI: I'm Walter  
15 Bruszewski. And I am speaking for Pam.

16 CHAD BROUSSARD: Okay. Thank you.

17 WALTER BRUSZEWSKI: Okay. Hello. My  
18 name is Walter Bruszewski. I am opposed to the  
19 project. My comments are on fire risk, noise, and  
20 the idea that our neighborhood is at risk of being  
21 made uninhabitable by things that are not local  
22 and known to us. First of all, fire. I live  
23 directly across Shiloh Road from the project site.  
24 My wife and I evacuated during both the Tubbs fire  
25 and the Kincade Fire. We watched trees burn in

1 the Shiloh Regional Park. The Koi and their  
2 consultants who wrote the EEA are either ignorant  
3 of the realities of local wildfires or  
4 disingenuous. The fact that the Koi plan to  
5 create a very large casino, hotel, and performance  
6 venue which will accommodate thousands of people  
7 in a region with a local history of deadly  
8 wildfires. The Koi maintains that there will be  
9 no significant impact on the evacuation of people  
10 living in the neighborhood. On page 3-118, the EA  
11 says, quote, therefore Alternative A would not  
12 significantly impede evacuation traffic as patrons  
13 and staff would be evacuated early before  
14 community-wide evacuation. The EA offers no  
15 support for this claim. It is generally accepted  
16 that recent California wildfires are a  
17 manifestation of global warming. On page 328, the  
18 EA directs the reader to Appendix E for a summary  
19 of potential effects of climate change in the  
20 region. In Appendix E, among the impacts of  
21 climate change, wildfires are not even mentioned.  
22 This represents either considerable ignorance or  
23 just deception.

24 Not local. As the resident who will be  
25 substantially affected by the project, my clear

1 impression is that my neighborhood is now at the  
2 mercy of unknown financially powerful entities.  
3 Who are these entities? First of all, the  
4 Chickasaw Nation. Global Gaming Solutions, LLC.  
5 Another entity is the source of the \$12.3 million  
6 which enabled the Koi to purchase the land.  
7 Thirdly, the Koi Nation, whose geographic base is  
8 Clearlake, not Windsor. In fact, the Koi continue  
9 to litigate against the City of Clearlake on the  
10 basis of claims of Koi cultural artifacts in the  
11 Clearlake region.

12 Finally, I would like to address noise.  
13 The EA claims that the project will have no  
14 significant impact on noise and light pollution.  
15 It claims that proposed mitigations will render  
16 the project benign. How can this be so? How can  
17 a site that is currently inhabited by no one?

18 CHAD BROUSSARD: I'm sorry, but your  
19 time is up.

20 WALTER BRUSZEWSKI: I have one more  
21 word.

22 CHAD BROUSSARD: Okay.

23 WALTER BRUSZEWSKI: Point. Inhabited by  
24 no one, how can that site be no quieter than a  
25 casino and event center with thousands of 24/7

1 visitors.

2 CHAD BROUSSARD: Thank you. Thank you  
3 for your comment.

4 Our next speaker will be Jennifer Klein.  
5 Jennifer Klein. I think you may be on  
6 mute.

7 JENNIFER KLEIN: Can you hear me now?

8 CHAD BROUSSARD: Yes, I can.

9 JENNIFER KLEIN: Can you hear me now?

10 CHAD BROUSSARD: Yes. Thanks.

11 JENNIFER KLEIN: My name is Jennifer  
12 Klein. I'm a chief deputy county counsel with the  
13 County of Sonoma. We are -- well, first, thank  
14 you for holding this meeting. We did request that  
15 you hold community meetings as part of our  
16 comments on the scoping and -- or the notice of  
17 preparation rather. The County is closely  
18 reviewing the EA. So my oral comments here will  
19 be supplemented with written substantive comments.  
20 But I have just a few things that I want to  
21 highlight tonight. One, I want to emphasize that  
22 this NEPA document is the federal government's.  
23 It is to support your decision. And so the  
24 adequacy of it, the comprehensiveness of it, is  
25 essential to your decision. And we believe that

1 an EIS is required. The impacts are significant.  
2 They are not mitigated. And cumulative impacts  
3 really must be examined, something that BIA do not  
4 do. The speakers tonight have highlighted  
5 groundwater, water, water quality, traffic,  
6 aesthetics, noise, air quality. And really the  
7 highlight of tonight, sadly, is the flood and  
8 wildfire evacuation hazards. Wildfires do not  
9 discriminate. That's what Lahaina found when many  
10 native Hawaiians lost their lives there. We are  
11 concerned with native populations. We're  
12 concerned about the citizens of Sonoma, whoever  
13 they are. It is a very important issue to our  
14 community. And it is something that your agency  
15 must consider.

16 Two, I would like to draw your attention  
17 to Section 4, mitigation measures, and the  
18 statement that the mitigation measures are  
19 enforceable. And the basis for that is that they  
20 are either part of the project or required by  
21 federal law or tribal law. So my question is, how  
22 exactly and by whom is that enforceable? May any  
23 of the county citizens enforce tribal law?  
24 Will -- will the federal government insist that  
25 certain elements of this project that are designed

1 to mitigate impacts be built or not built? So I  
2 think you need a lot more detail on what you mean  
3 by enforceable. And I say that because the county  
4 recognizes and understands tribal sovereignty and  
5 the extent of state, local, and federal  
6 jurisdiction. And we know that when this land  
7 goes into trust, we will not have land  
8 jurisdiction or any kind of civil jurisdiction.  
9 There will be public law 280. And we heard the  
10 chairman mention that he tends to reach agreements  
11 with our sheriff. But no indication of any kind  
12 of comprehensive enforceable agreement where the  
13 Tribe waives its sovereign immunity for the  
14 purposes of allowing these types of mitigations to  
15 actually be meaningful and real.

16 CHAD BROUSSARD: Thank you. Your time  
17 is up. Thank you for your comment.

18 Our next speaker will be Carrie Marvin.

19 Carrie Marvin. If you're there, you may  
20 be -- have your microphone on mute. If you could  
21 unmute.

22 CARRIE MARVIN: Here we go. Can you  
23 hear me now?

24 CHAD BROUSSARD: Yes, I can.

25 CARRIE MARVIN: Great. Great. One

1    thing -- everyone said a lot of great things, so I  
2    don't want to rehash everything. But what I would  
3    like to say is I haven't heard every single  
4    speaker, but what I did notice was that the union  
5    people that were calling in, none of them said  
6    that they were local, except one that I heard that  
7    said that they were from Rohnert Park. And no one  
8    else mentioned where they were from. Someone  
9    started to say San -- maybe it was San Mateo. I'm  
10   not sure. So I thought that was interesting. But  
11   they're not local people who are saying -- it  
12   didn't appear to me to be that they were local  
13   people.

14               My other comment is that definitely  
15   concerned about the fire, as everyone else is.  
16   And that is a very, very real thing. And for  
17   people who haven't experienced it, people that are  
18   calling in or the Chickasaw tribe, they haven't  
19   experienced the fires the way we have. It is very  
20   real and very frightening. And to think about the  
21   thousands of people and thousands of cars in  
22   addition in this area trying to escape. And I  
23   also agree with Heidi, whoever she was. But she  
24   was laughing at the people in the parking lot that  
25   were going to guide people out. I mean, you're

1 fleeing for your life. You're not helping people  
2 get out of a parking lot.

3           Anyway, as we all know, this tribe is  
4 not from Windsor. It is a Lake County tribe. And  
5 we are definitely against this. It is the wrong  
6 place to have this venue. So please, please do  
7 not -- do not approve this. Thank you very much.  
8 I appreciate your time.

9           CHAD BROUSSARD: Thank you, Ms. Marvin,  
10 for your comments.

11           Our next speaker will be Walter  
12 Bruszewski.

13           WALTER BRUSZEWSKI: Hello. I already  
14 spoke on my wife's spot.

15           CHAD BROUSSARD: Okay.

16           WALTER BRUSZEWSKI: Okay.

17           CHAD BROUSSARD: Thank you very much for  
18 your comments.

19           WALTER BRUSZEWSKI: Thank you.

20           CHAD BROUSSARD: Our next speaker will  
21 be Paul Fisette.

22           PAUL FISETTE: Hi, Chad. Thank you. My  
23 name is Paul Fisette. I'm a Windsor resident.  
24 I'm raising my family here. And I just want to  
25 speak in objection to this casino being built.

1 There's been a lot of good comments tonight. I  
2 have a few more points. The first being that in  
3 the scoping report and in the presentation made  
4 earlier today, I didn't see any sort of  
5 projections of what this casino is going to look  
6 like at night. This is a five-story hotel,  
7 four-story garage, a three-story casino. And all  
8 of that is going to be lit. And this is being put  
9 directly in a residential area. I haven't seen  
10 any evidence that the mitigation mentioned in the  
11 scoping report is going to reduce the level of  
12 light that is going to be surrounding this casino  
13 and this facility and how that is going to impact  
14 the residents.

15 I also want to speak a little bit about  
16 Pruitt Creek. Now, this is going to have a garage  
17 and parking for approximately 5,000 cars. And  
18 I've looked at the map in your scoping report.  
19 And the parking facility is going to be about  
20 30 feet away from Pruitt Creek. That is  
21 potentially the runoff, the -- from an entire  
22 garage area going directly into the creek during  
23 the rainy season. Not to mention what happens if  
24 that wastewater treatment plant has any issues.  
25 It is all going to go into the creek. And, you

1 know, during the winter, we've had up to  
2 eight inches of rain in one day. That will all  
3 dry -- whatever pollutants go into that creek,  
4 into our watershed, and also directly into the  
5 mobile home park that is less than half a mile  
6 away from this proposed facility. And one of the  
7 things in the scoping report that you're asked to  
8 consider is the impact of this building on  
9 lower-income residents around the area. And I  
10 would propose that -- or I would ask that a lot of  
11 effort be taken to see what kind of impact would  
12 actually occur to the folks that are in the --  
13 folks that are in the mobile home area next to  
14 this proposed casino. How a wastewater treatment  
15 plant will impact them. How the runoff from, you  
16 know, the cars and sort of the -- everything that  
17 is going to be involved in having 20,000 people in  
18 a facility, you know, 60 acres large, is going to  
19 impact these folks.

20 And so, again, I would just say the  
21 folks that have called in today, advocating for  
22 this have been benefiting monetarily. And the  
23 folks objecting to it live here and want to raise  
24 their kids here. Thank you.

25 CHAD BROUSSARD: Thank you, Mr. Fisette,

1 for your comments.

2 Our next speaker will be Lynn Darst.

3 LYNN DARST: You can hear me?

4 CHAD BROUSSARD: Yes, I can. Thank you.

5 LYNN DARST: Okay. My name is Lynn  
6 Darst. I moved to Windsor 24 years ago. I live  
7 in a residential neighborhood closer to the  
8 proposed project. My husband and I selected  
9 Windsor due to the close proximity of businesses  
10 that would suit our needs during the time we age  
11 in place. It has been reported in the press and  
12 mentioned this evening that the estimated amount  
13 of employees for this project would be between  
14 1100 and 2,000. And that it would be a  
15 significant boost to Sonoma County. I strongly  
16 disagree, as it would devastate the businesses and  
17 the towns of Windsor, Santa Rosa, and outlying  
18 towns of Sonoma County where we have experienced a  
19 significant shortage of staff. Businesses have  
20 closed due to lack of staffing. Hours of  
21 operation have been altered due to lack of  
22 staffing. Customer service in many businesses has  
23 been affected due to lack of staffing. The  
24 existing local businesses will suffer greatly. As  
25 a result, we, the residents, will be severely

1 impacted. The now hiring signs are evident  
2 throughout Sonoma County. I support the BIA to  
3 assist the Koi Nation to find property in Lake  
4 County where they can fulfill their dream of  
5 building a casino resort. For many reasons  
6 mentioned this evening, I am highly opposed to the  
7 Proposed Project on East Shiloh Road. Simply put,  
8 it is in the wrong location. Thank you.

9 CHAD BROUSSARD: Thank you, Ms. Darst,  
10 for your comments.

11 Our next speaker will be Debora Fudge.

12 DEBORA FUDGE: Hi. Thank you for  
13 listening to all of us tonight. I'm a 27-year  
14 council member and a six-time mayor. And this  
15 casino proposal is actually adjacent to my council  
16 district. There are a few things that I'm going  
17 to try to bring up that haven't been brought up or  
18 have been -- or I'm going to try to add more  
19 information. The urban growth boundary that  
20 people talk about was voted in by the residents in  
21 1998. And I'm one of the authors of it. The  
22 property that they discussed tonight was actually  
23 purposefully left out of the original town  
24 boundary and the urban growth boundary. So it has  
25 always been proposed to remain viniculture, as it

1 is now. Also, in Windsor, we have a Shiloh Road  
2 Vision Plan. So we have a 20-year plan for this  
3 whole vision -- this whole Shiloh Road. It is  
4 supposed to be a two-lane boulevard with a median  
5 of trees to slow traffic in town, going to and  
6 from 101. This project would ruin and dissolve  
7 our plans for the Shiloh Road area. Also, the  
8 town has proposed a roundabout at Shiloh and Old  
9 Red. I'm not sure what would happen to that  
10 proposal with this project.

11 My primary concern is about fire.  
12 People have talked about it. But I was in the  
13 emergency operations center with the fire chief in  
14 2019 during the Kincade Fire. And on the second  
15 night, the fire captain told me at -- it was at  
16 about 3:00 a.m. He said, we're going to lose all  
17 of Windsor tonight. All 27,000 people who live  
18 here were going to lose everything unless the  
19 fire -- unless the wind direction changed  
20 slightly, which it did. If the fire couldn't be  
21 stopped at Foothill Park, where it was eventually  
22 stopped with 200 fire engines, the fire was going  
23 to march all the way to the ocean. And that's  
24 what the fire captain told me. So the fire that  
25 people are talking about, the danger, cannot be

1 understated.

2 Further, the Lytton Pomo Tribe who built  
3 housing here when they were putting their land  
4 into trust agreed in a senate hearing to no gaming  
5 in Sonoma County in perpetuity, which we really  
6 appreciated. So it is sort of shocking to have  
7 another tribe come and propose a casino, when the  
8 Lytton Pomo graciously agreed to not have any  
9 gaming here in Sonoma County.

10 So this is simply the wrong project in  
11 the wrong location. I think there would be  
12 support in town for the Alternative C.  
13 Somebody -- another council member mentioned a  
14 parcel on the other side of 101 and Shiloh. It is  
15 called the Olufs property. I do know the tribe is  
16 listening. The Sonoma County Tourism Bureau would  
17 like to build a convention center and resort  
18 there. They need a partner. So I would propose  
19 that the tribe work with the Sonoma County Tourism  
20 District to build us a convention center, which I  
21 think everybody could support and help support the  
22 tribe.

23 Thank you for listening to all of our  
24 comments tonight.

25 CHAD BROUSSARD: Thank you, Ms. Fudge,

1 for your comments.

2 Our next speaker will be Amy Ramsey.

3 AMY RAMSEY: Hi, hello. Thank you for  
4 holding this meeting tonight and letting us speak.  
5 I know it is late, so I will keep my comments  
6 brief. I'm speaking on behalf of my family and  
7 also my parents who also live in the community.  
8 We were here for the 2017 and 2019 fires. So I  
9 cannot overstate the challenges that we foresee  
10 with getting out if there were another fire here.  
11 That has been really addressed tonight, so I'll  
12 move on from that.

13 But for every reason that has already  
14 been stated, we strongly oppose this. And, you  
15 know, we would love for an alternative location to  
16 be found that does not have such a horrific impact  
17 on the surrounding community that this will have.  
18 We -- one of the things that I really honed in on  
19 with the -- the report that was submitted -- and  
20 it is a huge report to comb through, but it really  
21 was striking to me that there was nothing in there  
22 that talked about the impact to the value of the  
23 homes for the surrounding area. It wasn't even  
24 addressed. And so I'm -- I'm curious about that  
25 because I'm sure there is data about other casinos

1 and the impact of the residential homes in that  
2 neighborhood.

3 And, you know, there are so many reasons  
4 that we have all gone over tonight that really  
5 show that I think the community that is in the  
6 area where this casino could be built is not in  
7 support of it. And the support seems to be coming  
8 from people that will not have to be there and  
9 deal with the impacts of it for the long haul.  
10 And so I'm really happy to go -- to be able to  
11 speak after the previous city councilperson. And  
12 she did a phenomenal job of talking about the  
13 opportunity for this tribe to find a location in  
14 an area where the community is going to  
15 wholeheartedly and resoundingly support their  
16 efforts. And that's what we hope that you will  
17 all look towards. And we hope that you will vote  
18 against and not allow this to happen in our  
19 community. Thank you.

20 CHAD BROUSSARD: Thank you, Ms. Ramsey,  
21 for your comments.

22 Our next speaker will be Sam Singer.

23 You may be on mute. Unmute your  
24 microphone.

25 SAM SINGER: Oh. Mr. Broussard. Sorry

1 about that.

2 CHAD BROUSSARD: Thank you.

3 SAM SINGER: My name is Sam Singer. I'm  
4 a California native. I've had the honor to know  
5 the Koi leadership for more than a decade. And  
6 I've had the privilege to work with the tribe. I  
7 urge the BIA to approve the Koi Nation resort and  
8 casino and its environmental assessment. I read  
9 the EA, and I believe it to be complete and  
10 thorough. The important fire protections,  
11 wildfire evacuation, water, sewer, traffic,  
12 parking impacts, as well as environmental  
13 mitigations are included in the EA, which I  
14 support. There is no significant impact on the  
15 nearby community as it is a commercial area next  
16 to big-box retailers, including Home Depot and  
17 Walmart, as well as an airport and other  
18 businesses. The Koi project has the support of  
19 nearby retired county sheriff and hundreds of  
20 other local citizens. The Koi lived in this  
21 region for thousands of years. They are a  
22 federally recognized Sonoma-area tribe. The  
23 traditional trade route of their people runs  
24 through the proposed resort and casino site. The  
25 Koi have called Sonoma their tribal headquarters

1 for more than a century. The tribe has fought  
2 hard for economic independence. This proposed  
3 project will employ their members and create jobs  
4 in the community, boost travel and tourism, and  
5 employ hundreds when opened. This will allow the  
6 tribe to keep its tribal customs alive and honor  
7 the spirit of its ancestors as they seek to regain  
8 their sovereign land and build a self-sustaining  
9 future for their members and for future  
10 generations. The Tribe has done an excellent job  
11 of reaching out to the public to inform them about  
12 their plans. The Koi Nation has an agreement with  
13 the Carpenters Union to build a union project.  
14 They have an agreement with the Chickasaw Nation,  
15 the most respected tribe in the gaming world, to  
16 manage the facility. The tribe has always been  
17 respectful and been a good neighbor. 17 other  
18 Native-American tribes support the Koi project and  
19 the EA to approve the Koi casino and resort.

20 I find it a little troubling that some  
21 of the voices this evening keep talking about  
22 being local, that they're local. The Koi Nation  
23 lives, works, and has been in Sonoma for thousands  
24 of years, far longer than the speakers this  
25 evening. I have great respect for them, but they

1 have to keep in mind that there are other people  
2 who live in their community as well. Thank you  
3 for your time.

4 CHAD BROUSSARD: Thank you, Mr. Singer,  
5 for your comments.

6 Our next speaker will be Caroline  
7 Gonsalves.

8 Caroline, are you there?

9 I think you may be on mute. Are you  
10 there?

11 Okay. We're going to move on to the  
12 next speaker. And, Caroline, if you want to sign  
13 back up and raise your hand, we can try to get to  
14 you later.

15 Next speaker will be Richard Boyd.

16 RICHARD BOYD: Thank you for listening  
17 to all of us for all of this time. I'm Richard  
18 Boyd. I live two blocks north of Shiloh Road. I  
19 have many concerns about the proposed casino hotel  
20 on the other side of Shiloh Road. I'll just talk  
21 about two of them. The first is what happens to  
22 the Pruitt Creek when we have another atmospheric  
23 river? The one we had last year turned this quiet  
24 little creek into a river, threatening the  
25 residents and their homes near to it. Consider

1    what happens when we get another atmospheric river  
2    when we now have a vineyard that much of the rain  
3    water soaked up and is now paved over for a  
4    parking lot. Well, all of that will also go into  
5    the creek. And now it will turn it into a raging  
6    river. So the residents who lived there during  
7    the first atmospheric episode will be forced to  
8    leave, evacuate.

9                    The more pressing issue is the fire  
10    evacuation order. This certainly has been talked  
11    about a lot, but I will put a couple extra spins  
12    on it. The past evacuations were entirely  
13    orderly, certainly compared to Coffey Park and  
14    Paradise Fire and certainly Lahaina. But that  
15    depends on the wind. And we were luckier than the  
16    people in those other locations. The number of  
17    people who need to pass through the Shiloh 101  
18    interchange to evacuate, though, will soon  
19    increase dramatically with the completion of the  
20    300-unit apartment complex at Shiloh and Old  
21    Redwood, and a comparable one under construction  
22    at the Home Depot and Walmart lot. All of these  
23    occupants, along with the rest of us who live east  
24    of them, will have to pass through the  
25    Shiloh/Highway 101 interchange in order to

1 evacuate. Now add the 2,000 guests and employees  
2 from the casino hotel complex. It is easy to  
3 imagine that hundreds of people might well die in  
4 their cars, incinerated because they were unable  
5 to pass through crush at Shiloh and 101. It  
6 happened in the Paradise Fire where several people  
7 in their cars wouldn't even be close to what would  
8 happen when the casino hotel patrons were added to  
9 the already existing population trying to flee a  
10 fiery death. Further, widening Shiloh Road won't  
11 have any effect either because you also have the  
12 same log jam at the Shiloh/101 junction. No  
13 significant impact? Any EA that concludes that  
14 surely has zero credibility. Thank you.

15 CHAD BROUSSARD: Thank you, Mr. Boyd,  
16 for your comments.

17 Our next speaker will be Anne Gray.

18 ANNE GRAY: Can you hear me?

19 CHAD BROUSSARD: Yes, we can. Thanks.

20 ANNE GRAY: Okay. I'm Anne Gray. My  
21 family has lived in Santa Rosa for over 35 years.  
22 So I don't live in Windsor, but I do go there at  
23 times. I usually go to Home Depot, right off of  
24 101 and Shiloh. And I have to say that one of the  
25 things that I dread about going there now is the

1 traffic, especially at -- you know, when you're on  
2 Shiloh. I'm always thinking, I can't believe it  
3 is so crowded here and there aren't a lot of  
4 accidents because it sure looks like it is ripe  
5 for it. So the idea of adding even more traffic  
6 in that area is I think a mistake. And therefore,  
7 I oppose the casino.

8 I oppose it for reasons already stated.  
9 And I'm also surprised that so many callers  
10 supported it because it would bring short-term  
11 construction jobs for workers, from what it sounds  
12 like, go from one big construction site to another  
13 and don't -- and it doesn't seem that they live in  
14 the area. But I wanted to add one more thing too.  
15 And that is according to Google Maps, there's  
16 already a casino, a huge one just 14 miles or 17  
17 minutes away from the new proposed site. Graton  
18 Casino is just minutes from the nearby site, right  
19 down 101. And as we all know, it is a huge  
20 casino. I don't think that we need another one so  
21 close.

22 Secondly, Santa Rosa and other areas are  
23 building huge buildings, huge apartment buildings,  
24 et cetera, to deal with the homeless situation and  
25 the lack of housing. And I have heard that 4500

1 more homes or apartments will be added by the end  
2 of 2025 in order to meet State requirements. So  
3 when you look at the environmental impact, do you  
4 consider the impact of adding all that traffic  
5 from the casino to already stressed highways?  
6 101, the major one, is also a very important  
7 critical major evacuation highway. And it too is  
8 stressed. I mean, the Tubbs Fire crossed over 101  
9 from the east to the west and went right into  
10 Coffey Park and other areas. And adding even more  
11 traffic could really hurt an already stressed  
12 evacuation system.

13 I think that this site is a poor site  
14 for this new development. We do not need another  
15 casino right down the road from the one we already  
16 have. And there must be some other sites,  
17 commercial, industrial sites that are better --  
18 are better locations for this new casino. Thank  
19 you.

20 CHAD BROUSSARD: Thank you, Ms. Gray,  
21 for your comment.

22 Our next speaker will be Matthew Prott.

23 MATTHEW PROTT: Can you hear me?

24 CHAD BROUSSARD: Yes, I can. Thank you.

25 MATTHEW PROTT: My name is Matt Prott.

1 I'm a resident of Windsor. I would like to point  
2 out a couple things. First off, the -- I listened  
3 to every comment this evening. Every objection --  
4 excuse me, every proponent of the casino has been  
5 from a builder's standpoint. Mostly it sounds  
6 like the Carpenters Union has asked their members  
7 to call in and advocate for jobs and economic  
8 security. The other -- the only two that have  
9 been fallen under this umbrella are a Mr. Boyd,  
10 who called in, I believe, from Oklahoma,  
11 representing the Chickasaw Nation. He seemed to  
12 advocate for the casino based on a bunch of  
13 talking points. He mentioned that he had  
14 represented 20-some-odd casinos that they have  
15 advocated for. They're a money -- you know,  
16 they're a funder of casinos, such as what we're --  
17 you know, the Shiloh -- the -- his telling point  
18 was a comment saying that the rising tide will  
19 lift all ships. I'm not sure what that means. We  
20 just got a comment also from a Mr. Sam Singer  
21 advocating for the casino. I did a quick Google  
22 search, and he is a media PR representative for  
23 the Koi Nation. We have not heard from any Koi  
24 Nation members at all on this. The only advocates  
25 are construction jobs and outlying lobbyists. We

1 have heard from a lot of local opponents  
2 advocating for -- excuse me, explaining the  
3 common -- the water supply issues, the fire danger  
4 issues, the noise issues, the pollution,  
5 wastewater potential issues, the safety and crime  
6 issues, life potential -- life pollution. My  
7 point is more subjective. I believe that there --  
8 this is an agricultural, very rural area. I  
9 bought my home here 32 years ago for the quality  
10 of life that it provided, which was, you know, a  
11 rural, quiet, serene environment. I believe most  
12 of the local residents probably share that.  
13 There's not a -- in the EA, there's not -- any  
14 kind of measurement of the quality of life that  
15 would be affected by this -- this casino or even  
16 Plan C, the hotel. I believe if it goes -- if the  
17 EA does not address this --

18 CHAD BROUSSARD: Thank you, sir, but  
19 your time is up. So please finish your comments.

20 MATTHEW PROTT: The EA should advocate  
21 or measure the quality of life cost of this  
22 proposal. Thank you.

23 CHAD BROUSSARD: Thank you very much for  
24 your comment.

25 Our next speaker will be Paige Mazzoni.

1                   Paige. Yeah. You may be on mute.

2   Unmute your microphone.

3                   PAIGE MAZZONI: Can you hear me now?

4                   CHAD BROUSSARD: I can. Thank you.

5                   PAIGE MAZZONI: All right. My dog is  
6   excited. So a couple of comments. A lot of them  
7   have already been made. One, if you trace the  
8   history of the Koi Nation, which is pretty easy to  
9   do in local history, they came from Lake County.  
10   That is true. Their trade route was through the  
11   Russian River, which is not here. It is about  
12   seven to eight miles north. Also, as has been  
13   stated, the neighborhood adjacent to this proposed  
14   casino are middle class. They are people who came  
15   here, not a lot of money. They built a lifetime  
16   of value in their homes. This will mitigate that  
17   lifetime of value and do irreparable damage to a  
18   lot of life savings for a lot of people. There  
19   are standards. There are statistics across  
20   studies. Thompson, Gazel & Rickman in 1996 that  
21   showed the introduction of a casino raises crime.  
22   This proposed casino would be within a seven-mile  
23   area of several elementary schools and two high  
24   schools. People who would be highly susceptible  
25   to crime. Traffic in our area has already

1 increased exponentially. We now have another huge  
2 apartment building on the corner of Shiloh and Old  
3 Redwood that has inadequate parking. The parking  
4 in our neighborhood, just north of that, has  
5 already started to be impacted. They're parking  
6 on our streets. You introduce more cars to that.  
7 It already can be a 20-minute exit from our little  
8 neighborhood in Merner, all the way to the  
9 highway. It can be 20 minutes already. It is  
10 going to get worse once that apartment gets  
11 filled. If you add 200 people in a hotel, it is  
12 going to get worse. There is no way -- I  
13 understand that indigenous tribes are not -- they  
14 are not required to follow CEQA, but there are  
15 bobcats, flowers, fox, barn owls, all kinds of  
16 wildlife on that piece of property. We see them  
17 every day in our backyards. They will be damaged  
18 by this. We are all subjected to water  
19 restrictions. We can only water on certain days.  
20 We can't water whenever we want. Our gardens have  
21 died over the last couple of years because of the  
22 city water restrictions. And now you're going to  
23 put a resort where there will be water every day  
24 and it will affect every single one of us because  
25 we already have been affected by water

1 restrictions. And then finally, the escape route  
2 for the fires, those fires came over that hill and  
3 it was very difficult to get out. It was very  
4 fast. There is no way that -- putting this resort  
5 on that road, there is no way to create any kind  
6 of transport out that will actually make it safe  
7 for all of these neighborhoods to get out and to  
8 the freeway. It is basically creating a trap  
9 where people are going to die.

10 So I understand that indigenous tribes  
11 have a right to their land. But this is not their  
12 land. This is a really lovely piece of property.  
13 And it's going to endanger the people in all the  
14 surrounding neighborhoods. So we strongly,  
15 strongly, strongly request that you do not approve  
16 this. Thank you.

17 CHAD BROUSSARD: Thank you for your  
18 comment.

19 Our next speaker will be Aaron Hadzess.

20 AARON HADZESS: Hello. Can you hear me?

21 CHAD BROUSSARD: Yes, I can. Thanks.

22 Are you there? I heard you for a  
23 second. But -- is he dropping off?

24 AARON HADZESS: I'm sorry. Can you hear  
25 me now?

1 CHAD BROUSSARD: Yes, I can.

2 AARON HADZESS: Yes. Yes. I -- I'm a  
3 union carpenter. And I've heard all kinds of  
4 opposition to the project from people who are  
5 against the -- against the project. I just want  
6 to say -- I'm a 21-year member -- I'm sorry --  
7 resident of the Sonoma County. And many times  
8 I've had to drive to San Francisco. And I would  
9 like to work on a project here close to town,  
10 where I live. It is a real detriment to travel  
11 long distances. And it is difficult on my family  
12 life. So it's been brought up that the jobs have  
13 been sort of disparaging by calling them  
14 temporary. In the world of construction, as was  
15 mentioned by a previous caller, I believe,  
16 Mr. Evans, all jobs are temporary nature. You  
17 know, you're building a thing. You start the job,  
18 you build it, and then you build another one. So  
19 that's just I think kind of a common misconception  
20 to a lot of people who don't work in construction.  
21 So in closing, I would just like to say that this  
22 project is about supporting working men and women  
23 in Sonoma County. And I strongly urge the BIA to  
24 support this project and do a -- push it forward  
25 for the good of all working people in Sonoma

1 County. Thank you.

2 CHAD BROUSSARD: Thank you for your  
3 comment.

4 Our next speaker will be Joan Chance.

5 JOAN CHANCE: Hello?

6 CHAD BROUSSARD: Yes. I can hear you.

7 JOAN CHANCE: Oh, great. Okay. My name  
8 is Joan Chance. And we've lived on East Shiloh  
9 Road for over 30 years. I'm speaking tonight  
10 against the development of the casino and what it  
11 could do to our neighborhood. I know you've heard  
12 this before, but it would be hard for anyone to  
13 understand an evacuation unless they have been  
14 through it. And we have done it twice. No matter  
15 how well you're prepared for an evacuation,  
16 gathering last-minute belongings, pets, livestock,  
17 and heading out the door is just the beginning.  
18 It took an hour and a half to get a mile down the  
19 road, just to the freeway. And with the casino  
20 going in, the thousands of cars, people partying  
21 and drinking until all hours, it would be total  
22 gridlock. Not just on Shiloh Road, but when you  
23 hit 101. And I can't imagine the horses burning  
24 up in the trailer. That would just be  
25 devastating. It's just not right.

1                   Anyway, most of us in the immediate area  
2   are on wells. And we're pretty conservative with  
3   our water out here. It sounds like the casino  
4   will be using more water in one day than the  
5   locals will use in a year. When the water drops,  
6   the quality of our water drops as well. This  
7   doesn't seem to be a fixable problem at all.

8                   Anyways, with added noise and lights at  
9   the proposed casino, there would be no more  
10   looking at the stars, no more leaving windows open  
11   on warm summer nights, no more peace and quiet.  
12   The casino would not just be a neighborhood  
13   nuisance, it would endanger our community. A  
14   casino does not belong in a residential  
15   neighborhood. Thank you.

16                  CHAD BROUSSARD: Thank you, Ms. Chance,  
17   for your comments.

18                  Our next speaker will be Gregory Heath.

19                  JANINE HEATH: Hello? Can you hear me?

20                  CHAD BROUSSARD: Yes. Yes, I can.

21   Thank you.

22                  JANINE HEATH: Yeah. This is actually  
23   Janine Heath. I'm a retired RN. I live locally.  
24   And I find it interesting that I'm the third RN to  
25   speak tonight. Because a lot of times, you know,

1 we RNs advocate for communities where we live,  
2 the people in the communities. And I have to say  
3 that in reading the report, I was very upset to  
4 read all of the less than significant impact  
5 results, you know, on the noise, traffic,  
6 economics, crime. I mean, I -- I think that it is  
7 going to be an extreme negative -- extremely  
8 negative impact on quality of life and, in fact,  
9 even threat life itself. So I know, you know, it  
10 is something that all the issues have been  
11 addressed that I wanted to address. But I just  
12 wanted to make that emotional statement, that I  
13 think it is going to have a very significant  
14 negative effect on the community. And that's all  
15 I have to say. Thank you.

16 CHAD BROUSSARD: Thank you for your  
17 comment. Our next speaker is Deena Stapleton.

18 DEANA STAPLETON: Yes. Thank you. My  
19 name is Deena Stapleton. You know, one of my  
20 biggest concerns is the lack of consideration for  
21 increased traffic around San Miguel School on  
22 Faught Road. This is the back way. And it will  
23 be used. I live in the neighborhood directly  
24 across the street. And my two sons attend  
25 San Miguel. I already think of Faught Road as a

1 dangerous road due to fast driving. I do not let  
2 my kids cross the road without supervision. And  
3 I'm deeply concerned about the increased traffic  
4 and speeding and drunk driving and decreased  
5 safety to the kids trying to cross Faught Road to  
6 go to school or just to play in other parts of the  
7 neighborhood. I think the EA needs to assess the  
8 small two-lane road between Faught Road at  
9 San Miguel and Shiloh. It is a skinny road with  
10 ditches on either side. It is tree lined. There  
11 are accidents and deaths on the road. You can see  
12 the flowers and crosses when you drive that way.  
13 And people under the influence will drive on the  
14 road no matter what the law says. And they  
15 will -- it is going to happen. And the road needs  
16 to be assessed for those issues. I'm also  
17 concerned about the light pollution. I'm looking  
18 out my back window right now. It faces the fields  
19 and where this proposed site is. And it is black.  
20 You know, the casino will have a significant  
21 impact on light pollution, not only for the people  
22 and their view, but their circadian rhythms, which  
23 are influenced by the light. I'm also a nurse.  
24 So I have to throw that in there. Also the  
25 nighttime animals. That was not addressed. I so

1 resonated with the gentleman that talked about  
2 just that majestic feeling and aura that this  
3 whole area has. You know, that can't be put into  
4 words. I was literally at Shiloh today and just  
5 was looking west on to this proposed site, and it  
6 brought tears to my eyes knowing that was going to  
7 be lost. So I agree with so many of the other  
8 things that people stated in opposition to this  
9 project. This is the wrong place for this  
10 project. And I oppose it. Thank you for your  
11 time.

12 CHAD BROUSSARD: Thank you,  
13 Ms. Stapleton, for your comments and everyone for  
14 your comments. That concludes our list of  
15 individuals who signed up to share their comments.  
16 And I want to thank everyone for their patience  
17 and their participation in this hearing tonight.  
18 If there are no more comments, this concludes the  
19 BIA's public hearing for the Koi Nation  
20 fee-to-trust and proposed casino project. Thank  
21 you again for your participation and good night.

22 (Public meeting concluded at 9:46 p.m.)

## COURT REPORTER'S CERTIFICATE

STATE OF CALIFORNIA )  
 ) SS.  
COUNTY OF RIVERSIDE )

I, BROOKE SILVAS, a certified shorthand  
reporter for the State of California, do hereby  
certify:

That the said public meeting was taken  
down by me remotely in stenotype at the time and  
place therein stated and thereafter reduced to  
typewriting under my direction, and that the  
deposition transcript is a true and correct record  
of the proceedings here held.

I further certify that I am not of  
counsel or attorney for any of the parties hereto  
or in any way interested in the event of this  
cause and that I am not related to any of the  
parties thereto.

Dated: October 11, 2023
