As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Joseph Hardin, Santa Monica, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Julia Berkowitz, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Laura Herndon, Burbank, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Charles Heinrichs, Yreka, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Raquel Narvios, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Jon Benneian, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Melodi Gulsen, Fullerton, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Anna Narbutovskih, Guerneville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Frances Blythe, Dixon, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Edward Cavasian, Palo Alto, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kurt Cruger, Long Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Janice Nakamura, Antelope, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Daren Black, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kaylah Sterling, Emeryville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Bonnie Pannell, Crockett, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Deborah Lee Chill, Yucaipa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Theresa Corrigan, Sacramento, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Claudia Smith, Roseville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Geraldine Card, Exeter, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Jenny Valenzuela, La Quinta, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lisa Lynch, Elk Grove, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Judith Kramp, Redwood City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Guy Johnson, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**paula thompson, Oceanside, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. **Jayne Cerny, Inverness, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Michael Grant White, Alameda, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Shawn Burn, San Luis Obispo, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Steven Velasco, Costa Mesa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Wendy Stock, Berkeley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**John Crahan, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Susan Beil, Camarillo, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Randall Parker, Long Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Gail Berkeley, Santa Barbara, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Shannon Montoya, Rohnert Park, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Ara Johnson, Felton, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Linda Knight, Santa Rosa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. **William Henzel, San Jose, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kris Osward, Sonora, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Elizabeth Adan, Carmichael, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Mha Atma Khalsa, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Alison Hill, Lafayette, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Yolanda WarnerGalina, Yreka, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Dorit Grunberger, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jere Wilkerson, Avila Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Alexis Grone, Oceanside, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lilith Rogers, Sebastopol, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**D. Rowe, Santa Monica, CA**

As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Justin Truong, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jane Nachazel-Ruck, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Nicole Heslip, San Anselmo, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Shelley Abbate, Union City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lisa Matheus, Newhall, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**John Callegari, Petaluma, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Tony Grijalva, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jeannette Ralston, Half Moon Bay, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Amanda Heske, Junction, TX**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Sharon Paltin, Laytonville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kim Waterson, Orange, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Lisa Salazar, Shasta Lake, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**teresa mcgrath, Portland, OR**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Luz Cobarrubias, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**JOYCE KOLASA, Springville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Alison Bonn, Culver City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Victoria Bennett, San Diego, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Catharine Krupp, San Luis Obispo, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Gillian Anderson, Santa Rosa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Andrea Kevech, Belmont, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Martin Henderson, Goleta, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lola Bice, Monterey, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Judith Nicolaidis, San Diego, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jeanne McCarry, San Jose, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Divine Salas, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**CHRISTINE L PORTER, Chico, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Rev. Victotia Humphrey, Vallejo, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**APRIL Burchardt, Orland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **leland bellot, Placentia, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Joann Lapolla, San Diego, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Barbara Rohr, Orleans, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**John Spaventa, Monterey, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lynda Daniels, Carlsbad, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Gilda Harger, Mill Valley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Deborah St. Onge, Poway, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Shan Albert, Studio City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Margaret Lynwood, Walnut Creek, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lacey Wozny, Kansas City, MO**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Dan Ouellet, Alameda, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Nora Privitera, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Karen Kirschling, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Nancy Berman, Kensington, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kevin O'Brien, Laguna Woods, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Linda A, San Clemente, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**SUSUN GODWIN, Long Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lisabette Brinkman, Santa Barbara, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Audrey Lee, Lodi, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Pamela Murphy, Ojai, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Ronald Dow, Moorpark, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Deborah Votek, Glen Ellen, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Christopher Evans, Berkeley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Barry Schwartz, Napa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Michael Denton, San Leandro, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Rashid Patch, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. **Carol Lane, Concord, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Yvonne Greenen, Palo Alto, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jill Dahlman, Rancho Cordova, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jerid Anderson, Santa Maria, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Douglas Bender, Redondo Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Ruth Felix, Walnut Creek, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Cyndi Houck, Santa Rosa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Shannon Patty, Jurupa Valley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Sheilah Fish, Moraga, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Mark Lozano, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Micki Meredith, Cazadero, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Helen Cameron, Berkeley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Debbie Woods, Rohnert Park, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Debra Nichols, Palmdale, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Stephanie Nunez, Van Nuys, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Richard Entenman, Berkeley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Walter Ramsey, Oakley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Betty Winholtz, Morro Bay, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Ken Wilson, Santa Rosa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lisa Braun Glazer, La Jolla, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Koning-Bastiaan Hilda, Palm Springs, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Hank Ramírez, San Diego, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Linda Bresnan, Portola Valley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Greg C, Santa Ana, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Daniel McKeighen, Rocklin, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**patricia reynolds, Irvine, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Sara Bakker, Denair, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Margaret Hodges, Panama City Beach, FL**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Ediverto Galvez, Panorama City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Diana Zdenek, Orange, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Dan And Lilly Kittredge, La Mesa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**FRANCESCA BOLOGNINI, Cambria, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Brett Bell, Tujunga, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Bianca Molgora, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**S Hellen, Long Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Allen Luke, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Natalia Spornik, Studio City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Brenda Thompson, La Mesa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Doris Overmyer, San Rafael, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Hunter Wallof, Soulsbyville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Don Faia, Aptos, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Aa Cc, Glendale, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Rick Moffat, Beverly Hills, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Charlene Elgart, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Heidi Dietz, Alameda, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Sara Templeton, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**James Rego, Fairfield, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Andrea Pino, Redondo Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Diane Rosas, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Lisa Allowitz-Thompson, Tahoe Vista, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. **dana bordegaray, Morro Bay, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Larry Essman, Yucaipa, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Pamela Overholtzer, Menifee, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Arthur Manoogian, San Clemente, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Dianne Christ, San Marcos, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**wendy wilke, Fresno, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Pamela Reed, Vallejo, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Elijah L., Huntington Park, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Ryan Acebo, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Tom Nash, Rohnert Park, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Sue Hall, Castro Valley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Heidi Behnke, Spring Valley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**JACOB HUSKEY, Santa Cruz, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**E.Muriel Gravina, Palo Alto, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Andrew Donahue, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Amy Longanecker, San Diego, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Jimmie Yonemoto, San Jose, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Nicole Slaton, Davis, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Sandy Commons, Sacramento, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**James DiViccaro, Daly City, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Amanda Love, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Jinah Yoon, San Jose, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Robin Karp, San Diego, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Donna Babao, Marysville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Leslie Brandon, Tehachapi, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Stacy Nisperos, Fullerton, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Rebecca Boyer, El Sobrante, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Bill Lundeen, Fort Bragg, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**J. Barry Gurdin, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Ron Schiera, San Clemente, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**James Lindgren, Cerritos, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Vanessa Warheit, El Cerrito, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Katherine Wiese, Ridgefield, WA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**molly mendez, Oakley, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Sheila Carnegie, San Rafael, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Virginia Collins, San Leandro, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Richard Watson, Long Beach, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**william mora, San Francisco, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Andrew Rigrod, Encino, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Amy Wolfberg, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. **Kalpana Pot, Los Angeles, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**R Jeremiah Maller, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Furthermore, the proposed expansion could harm endangered species and water quality in the San

Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kathleen Schlecht, Salinas, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Todd Hack, Chula Vista, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Carol Barrette, Alameda, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Kevin Pierson, Roseville, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**CALVIN JUNG, Burbank, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**JOHN FERNANDES, San Leandro, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts

will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Colleen Bergh, Santa Ana, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay. I urge you to redo the analysis and recirculate a new Draft Environmental Impact Report that fully considers the negative impacts of this proposed expansion on our region and the health and well-being of West Oakland residents.

**Caephren McKenna, Oakland, CA**
As a local resident, I am writing to express continuing concern about the Port of Oakland's plan to widen the Turning Basins in the Oakland Harbor. Inviting more megaships into Oakland will have a detrimental effect on our region by worsening air pollution and increasing truck traffic. Those impacts will reverberate through neighboring communities, negatively impacting the health and well-being of residents. In particular, this action will disproportionately affect low-income communities and communities of color in West Oakland that are already burdened by environmental injustice. Furthermore, the proposed expansion could harm endangered species and water quality in the San Francisco Bay. This could have long-lasting impacts on the ecosystem and the overall health of the Bay.
