TECHNICAL MEMORANDUM

To: Gabe Hungerford
TC LA MF Development, Inc.
2221 Rosecrans Avenue, Suite 200
El Segundo, California 90245

From: Jacob Biewer, M.S., Assistant Project Paleontologist; Heather Clifford, M.S., Senior Paleontologist

Date: September 2, 2025

Re: **Paleontological Resources Assessment for the 195 East Hillcrest Drive Mixed-Use Project, City of Thousand Oaks, Ventura County, California**

INTRODUCTION

SWCA Environmental Consultants (SWCA) conducted a paleontological resources assessment in support of the proposed 195 East Hillcrest Drive Mixed-Use Project (project) in the city of Thousand Oaks, Ventura County, California. The study included a review of geologic maps, scientific literature, fossil locality records from the Natural History Museum of Los Angeles (NHMLA) and the University of California, Museum of Paleontology (UCMP) online collections database, and other relevant information. The purpose of the study was to determine the potential of the project to impact scientifically significant paleontological resources and to provide recommendations for mitigation to reduce any potential impacts to less-than-significant levels pursuant to the California Environmental Quality Act (CEQA).

The study was conducted in accordance with the City of Thousand Oaks (City) General Plan Program Environmental Impact Report (EIR) mitigation measure (MM) PAL-1: Retention of Qualified Professional Paleontologist (City of Thousand Oaks 2023a). It follows the guidelines of the Society of Vertebrate Paleontology (SVP) and *Best Practices in Mitigation Paleontology* (Murphey et al. 2019; SVP 2010). The City is the CEQA lead agency for the project.

SWCA assistant project paleontologist Jake Biewer, M.S., conducted the background research and authored this technical memorandum (memo). SWCA senior lead paleontologist Heather Clifford, M.S., provided quality assurance/quality control (QA/QC) of the memo. Figures were generated by SWCA assistant staff geospatial scientist Michelle Alvarado. Copies of the memo are on file in SWCA's Pasadena office.

PROJECT LOCATION AND DESCRIPTION

The proposed project is located at 195, 275, and 325 East Hillcrest Drive (Assessor's Parcel Number 669-0-021-255) in the city of Thousand Oaks, California (Figure A-1 in Attachment A). The project area totals approximately 8.21 acres and contains three commercial office buildings with associated parking and landscaping. It is within Section 9, Township 1 North, Range 19 West (San Bernardino Base and

Meridian) of the U.S. Geological Survey (USGS) Thousand Oaks, California, 7.5-minute quadrangle (Figure A-2) (USGS 1981). The project area is bounded by East Hillcrest Drive to the south, Lang Creek to the west, an unnamed driveway to the east, and an assisted living facility to the north (Figure A-3).

The proposed project involves the demolition of two of the commercial office buildings and construction of a mixed-use development. The development will consist of a five-story building that contains 297 residential units and 438 parking spaces. The existing single-level commercial building will provide 11,207 square feet of retail space with 52 surface parking spaces. Based on the current cut-and-fill plan, the ground surface in some areas of the site may be excavated up to 5 feet; however, excavations on the order of 15 feet may be required for the foundational elements of the proposed buildings.

PROFESSIONAL STANDARDS

The SVP has established standard guidelines that outline professional protocols and practices for conducting paleontological resources assessments and surveys; monitoring and mitigation; data and fossil recovery; sampling procedures; and specimen preparation, identification, analysis, and curation (SVP 2010). Most practicing professional mitigation paleontologists in California adhere closely to the SVP's assessment, mitigation, and monitoring requirements as specifically provided in its standard guidelines. Most state regulatory agencies with paleontological laws, ordinances, regulations, and standards accept and use the professional standards set forth by the SVP.

Scientific Significance

Numerous paleontological studies have developed criteria for the assessment of scientific significance for fossil discoveries (e.g., Eisentraut and Cooper 2002; Murphey et al. 2019; Scott and Springer 2003). In general, these studies assess fossils as significant if one or more of the following criteria apply:

1. The fossils provide information on the evolutionary relationships and developmental trends among organisms, living or extinct.
2. The fossils provide data useful in determining the age(s) of the rock unit or sedimentary stratum, including data important in determining the depositional history of the region and the timing of geologic events therein.
3. The fossils provide data regarding the development of biological communities or interaction between paleobotanical and paleozoological biotas.
4. The fossils demonstrate unusual or spectacular circumstances in the history of life.
5. The fossils are in short supply and/or are in danger of being depleted or destroyed by the elements, vandalism, or commercial exploitation and are not found in other geographic locations.

As defined by the SVP, scientifically significant paleontological resources are

> fossils and fossiliferous deposits, here defined as consisting of identifiable vertebrate fossils, large or small, uncommon invertebrate, plant, and trace fossils, and other data that provide taphonomic, taxonomic, phylogenetic, paleoecologic, stratigraphic, and/or biochronologic information. Paleontological resources are considered to be older than recorded human history and/or older than middle Holocene (i.e., older than about [4,200 years ago (Cohen et al. 2024)]). (SVP 2010:11)

Geologic units known to preserve significant fossils or fossil localities are likely to contain additional undiscovered and potentially significant fossils and are generally considered sensitive for paleontological resources throughout their areal and stratigraphic extent.

Paleontological Potential

Paleontological potential is defined as the potential for a geologic unit to produce scientifically significant fossils. This is determined by rock type, history of the geologic unit in producing significant fossils, and fossil localities recorded from that unit. Paleontological potential is derived from the known fossil data collected from the entire geologic unit, not just from a specific survey. The potential ranking provides the basis for determining which mitigation measures or recommendations, if any, are appropriate for a particular project.

In *Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources* (SVP 2010:1–2), the SVP defines four categories of paleontological potential for rock units: high, low, undetermined, and no potential:

> **High Potential**. Rock units from which vertebrate or significant invertebrate, plant, or trace fossils have been recovered are considered to have a high potential for containing additional significant paleontological resources. Rocks units classified as having high potential for producing paleontological resources include, but are not limited to, sedimentary formations and some volcaniclastic formations (e.g., ash or tephra), and some low-grade metamorphic rocks which contain significant paleontological resources anywhere within their geographical extent, and sedimentary rock units temporally or lithologically suitable for the preservation of fossils (e.g., middle Holocene and older, fine-grained fluvial sandstone, argillaceous and carbonate-rich paleosols, cross-bedded point bar sandstone, fine-grained marine sandstone, etc.). Paleontological potential consists of both a) the potential for yielding abundant or significant vertebrate fossils or for yielding a few significant fossils, large or small, vertebrate, invertebrate, plant, or trace fossils and b) the importance of recovered evidence for new and significant taxonomic, phylogenetic, paleoecologic, taphonomic, biochronologic, or stratigraphic data. Rock units that contain potentially datable organic remains older than late Holocene, including deposits associated with animal nests or middens, and rock units that may contain new vertebrate deposits, traces, or trackways are also classified as having high potential.
>
> **Low Potential**. Reports in the paleontological literature or field surveys by a qualified professional paleontologist may allow determination that some rock units have low potential for yielding significant fossils. Such rock units will be poorly represented by fossil specimens in institutional collections or based on general scientific consensus only preserve fossils in rare circumstances and the presence of fossils is the exception not the rule, e.g., basalt flows or recent colluvium. Rock units with low potential typically will not require impact mitigation measures to protect fossils.
>
> **Undetermined Potential**. Rock units for which little information is available concerning their paleontological content, geologic age, and depositional environment are considered to have undetermined potential. Further study is necessary to determine whether these rock units have high or low potential to contain significant paleontological resources. A field survey by a qualified professional paleontologist to specifically determine the paleontological resource potential of these rock units is required before a Paleontological Resources Impact Mitigation Program (PRIMP) can be developed. In cases where no subsurface data are available, paleontological potential can sometimes be determined by strategic excavations into subsurface stratigraphy.
>
> **No Potential**. Some rock units have no potential to contain significant paleontological resources, for instance high-grade metamorphic rocks (such as gneisses and schists) and plutonic igneous rocks (such as granites and diorites). Rock units with no potential require no protection or impact mitigation measures relative to paleontological resources.

REGULATORY SETTING

Paleontological resources are limited, nonrenewable resources of scientific, cultural, and educational value and are afforded protection under state and local laws and regulations.

State Regulations

California Environmental Quality Act

CEQA is the principal statute governing environmental review of projects occurring in the state of California and is codified at California Public Resources Code (PRC) Section 21000 et seq. CEQA requires lead agencies to determine whether a proposed project would have a significant effect on the environment, including significant effects on paleontological resources. The State CEQA Guidelines for the implementation of CEQA (Title 14, Chapter 3, California Code of Regulations 15000 et seq.) define procedures, types of activities, persons, and public agencies required to comply with CEQA. Section VII(f) of the Environmental Checklist (State CEQA Guidelines: Appendix G) asks whether a project would directly or indirectly destroy a unique paleontological resource and result in impacts to the environment.

Public Resources Code Section 5097.5

Requirements for paleontological resources management are included in PRC Division 5, Chapter 1.7, Section 5097.5, which states:

> No person shall knowingly and willfully excavate upon, or remove, destroy, injure or deface any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, or any other archaeological, paleontological or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over such lands. Violation of this section is a misdemeanor.

This statute prohibits the removal, without permission, of any paleontological site or feature from land under the jurisdiction of the state or any city, county, district, authority, or public corporation, or any agency thereof. Consequently, local agencies are required to comply with PRC Section 5097.5 for their own activities, including construction and maintenance, as well as for permit actions (e.g., encroachment permits) undertaken by others. PRC Section 5097.5 also establishes the removal of paleontological resources as a misdemeanor and requires reasonable mitigation of adverse impacts to paleontological resources from developments on public (state, county, city, and district) land.

Local Requirements

City of Thousand Oaks

Chapter 7, the Conservation Element of the *Thousand Oaks General Plan 2045* (City of Thousand Oaks 2023b), includes the following goal and policies to preserve paleontological resources:

> **Goal C-11:** Protect historical and culturally significant resources, which contribute to the community's sense of identity.
>
> > **Policy 11.2**: **Cultural resource preservation.** Require that new development preserve or mitigate impacts to significant historic, archaeological, and paleontological resources.

> **Policy 11.7: Resource stakeholder engagement.** Decisions pertaining to the disposition of archaeological, paleontological, historical, and cultural resources shall be made in concert with recognized public agencies, groups or individuals having jurisdiction, expertise, or interest in these matters, including but not limited to the State Office of Historic Preservation, Ventura County Cultural Heritage Board, and local Native American organizations, and affected property owners.

Project-Specific Requirements

The following mitigation was adopted as part of the City's General Plan Program EIR to reduce potential impacts to paleontological resources to a less-than-significant level (City of Thousand Oaks 2023a):

> **PAL-1 Retention of Qualified Professional Paleontologist.** Prior to submittal of a discretionary development application in areas underlain by high or undetermined sensitivity geologic units (i.e., Quaternary older alluvium, Monterey Formation, Lower Monterey Formation, Sandstone of Lindero Canyon, Conglomerate of Lindero Canyon, Upper Topanga Formation, sandstone, Upper Topanga Formation, clay shale and siltstone, Upper Topanga Formation, sandstone, Upper Topanga Formation, clay shale and siltstone, Conejo Volcanics, basaltic sandstone and siltstone, Lower Topanga Formation, sandstone, Lower Topanga Formation, clay shale, Sespe Formation, Llajas Formation, sandstone, Llajas Formation, claystone and siltstone, Santa Susana Formation, sandstone, Santa Susana Formation, claystone and siltstone, Santa Susana Formation, Simi Conglomerate Member, Chatsworth Formation, sandstone, Chatsworth Formation, clay shale), the City shall require a Qualified Professional Paleontologist [as defined by the SVP (2010)] to be retained by the project applicant to determine the project's potential to significantly impact paleontological resources according to SVP (2010) standards. If necessary, the Qualified Professional Paleontologist shall recommend mitigation measures to reduce potential impacts to paleontological resources to a less-than-significant level. These measures may include, but not be limited to, implementation of a Worker Environmental Awareness Program, on-site paleontological monitoring, and fossil salvage, if applicable. The City shall review and approve the Qualified Professional Paleontologist's findings and recommendation. All recommendations shall be incorporated into the project plans prior to issuance of a grading permit.

METHODS

Literature Review

SWCA reviewed geologic maps and relevant geological and paleontological literature to determine which geologic units are present in the project site and whether fossils have been recovered from those geologic units elsewhere in the region. SWCA also reviewed geotechnical data relevant to the project site. The geologic mapping used in this analysis is from Campbell et al. (2016) at a scale of 1:100,000. As geologic units may extend over large geographic areas and contain similar lithologies and fossils, the literature review includes areas beyond the project site. The results of this literature review include a discussion of the geology and paleontological potential of the geologic units in the project site.

Locality Records Search

The purpose of a locality records search is to establish the status and extent of previously recorded paleontological resources within and adjacent to the study area for a given project. This search provides another line of inquiry to assist in determining paleontological potential of geologic units as not all information regarding fossil collections has been documented and published. For this project, SWCA reviewed the results of a recent record search of the project site that was conducted by NHMLA staff in June 2025 (Bell 2025). SWCA supplemented these data with information obtained from an online

collections database of fossil locality records maintained by the University of California Museum of Paleontology (UCMP) at the University of California, Berkeley.

RESULTS

Literature Review

Regional Geology

The project site is within the Transverse Ranges Geomorphic Province, a 250-mile-long east-west-trending structural block that extends about 250 miles from the Pacific on the west to the eastern San Bernardino Mountains (Campbell et al. 2016). This province is characterized by mountains and valleys that trend in a west-east direction, in contrast with north-south trending ranges to the north and to the south, as shaped by the San Andreas Fault (Campbell et al. 2016). It contains pre-Cenozoic (more than 66 million years ago [Ma]) igneous and metamorphic rocks covered by Cenozoic (less than 66 Ma) sedimentary and volcanic deposits, most notably very thick accumulations of marine sediments from the Miocene and Pliocene (Campbell et al. 2016). Specifically, the project site is in Conejo Valley north of the Santa Monica Mountains, which is surrounded by exposures of the Conejo Volcanics, an igneous rock sequence from the Miocene Epoch (Taliaferro 1924). Alluvial sedimentary deposits accumulated in the local valleys and are composed of clasts derived from the igneous deposits of the surrounding Conejo Hills (Yerkes and Campbell 1995).

Local Geology and Paleontology

According to geologic mapping by Campbell et al. (2016), the surface of the project site is mapped entirely with young alluvium, unit 1 (Figure A-4). Although not mapped by Campbell et al. (2016), the geotechnical report prepared for the project indicated that artificial fill was present at the surface of the project site from previous development and that bedrock of the Modelo Formation was present at depth (Geotechnologies, Inc. 2024). These geologic units and their paleontological sensitivities are described in more detail below. Dates for the geologic time intervals used in this memo are derived from the *International Chronostratigraphic Chart* prepared by the International Commission on Stratigraphy (Cohen et al. 2024).

ARTIFICIAL FILL

Artificial fill consists of sediments that have been removed from one location and transported to another location by human activity rather than by natural means. The transportation distance can vary from a few feet to many miles, and composition is dependent on the source and purpose. The geotechnical report prepared for the project noted artificial fill from the surface to a depth of approximately 2 feet below ground surface (bgs) (Geotechnologies, Inc. 2024). Whereas artificial fill may contain fossils, these remains will likely be out of stratigraphic context and are no longer considered scientifically significant. Therefore, artificial fill is considered to have no paleontological potential.

QUATERNARY YOUNG ALLUVIUM, UNIT 1

The Quaternary (geologic period from 2.6 Ma to present that includes both the Pleistocene [2.6 Ma to 11,700 years ago] and Holocene [11,700 years ago to present] epochs) young alluvium, unit 1 (Qya_1) is late Pleistocene in age (11,700–129,000 years ago) and consists of unconsolidated, silt, sand, and gravel deposited by streams on flood plains (Campbell et al. 2016). Pleistocene alluvial deposits have a rich fossil history in Southern California (Jefferson 1991a, 1991b; McDonald and Jefferson 2008; Miller 1971; Reynolds and Reynolds 1991; Springer et al. 2009). The most common Pleistocene terrestrial mammal fossils include the bones of mammoth, bison, deer, and small mammals, but other taxa,

including horse, lion, cheetah, wolf, camel, antelope, peccary, mastodon, and giant ground sloth, have been reported (Graham and Lundelius 1994), as well as reptiles, snakes, frogs, and salamanders (Hudson and Brattstrom 1977). In addition to being used to compare and contrast the Pleistocene and today in Southern California, this abundant fossil record has been vital in studies of extinction (e.g., Barnosky et al. 2004; Sandom et al. 2014; Scott 2010), ecology (e.g., Connin et al. 1998), and climate change (e.g., Roy et al. 1996). There is a potential to find additional fossils from this geologic unit; therefore, the young alluvium, unit 1 has high paleontological potential.

LATE TO MIDDLE MIOCENE MODELO FORMATION

The marine Modelo Formation (Tm) is late to middle Miocene (5.333–15.98 Ma) in age and consists of thin-bedded mudstone, diatomaceous clay shale or siltstone, with interbeds of very fine-grained to coarse-grained sandstone (Campbell et al. 2016). Boring logs in the geotechnical report prepared for the project show that bedrock of the Modelo Formation was encountered beginning at depths between 9.5 and 18 feet bgs (Geotechnologies, Inc. 2024). The Modelo Formation is coeval with and shares a depositional environment with the Monterey Formation and its beds have sometimes been referred to as Monterey (Rumelhart and Ingersoll 1997).

Deposits of the Modelo Formation from the Santa Monica Mountains have yielded fossil invertebrates, including gastropods, bivalves, and sand dollars, marine vertebrate remains of whale, sea lion, shark, and fish, as well as remains of terrestrial vertebrates and plants including horse and plane tree (Hoots 1931). As stated above, the Modelo is often referred to as Monterey, thus similar fossils to those found in the Monterey Formation may be found in the Modelo Formation. The Monterey Formation in California has produced diatoms, foraminifera, molluscs, fish, whales, desmostylians, birds, and very rarely land mammals and land plants, which would have washed in from shore (Bramlette 1946). In Southern California, the formation has yielded abundant fish remains (Jordan and Gilbert 1919; Popov and Takeuchi 2011), as well as many well preserved and notable marine mammal remains of desmostylians (Barnes 2013; Barnes and Aranda-Manteca 1997), dolphins (Barnes 1985), and true porpoise (Fajardo-Mellor et al. 2006). Because marine invertebrates and marine vertebrates are known from the unit, including marine mammals, the Modelo Formation has high paleontological potential.

MUSEUM RECORDS SEARCH

The NHMLA results indicate that no fossil localities have been recorded within the proposed project site. However, fossil localities have been documented in the vicinity of the project (Bell 2025). These localities derive from similar sedimentary deposits that may occur in the proposed project site. Table 1 lists the closest known localities to the project site.

SWCA reviewed the online museum collections records maintained by the UCMP on August 27, 2025. The search revealed that the museum has no records of fossil localities within the vicinity of the project site (UCMP 2025).

IMPACT ANALYSIS AND RECOMMENDATIONS

The project would involve excavations to depths of approximately 15 feet for the construction of the proposed buildings. Geologic mapping indicates the project site contains young alluvium, unit 1 (Qya_1) at and near the surface that is late Pleistocene in age. The geotechnical report prepared for the project noted artificial fill in the project site from the surface to depths of 2 feet bgs, with Modelo Formation present at depths of 9.5 to 18 feet bgs and deeper (Geotechnologies, Inc. 2024). Whereas artificial fill may contain fossils, these fossils are out of stratigraphic context and are not important for scientific study. Thus, artificial fill has no paleontological potential. Pleistocene sedimentary deposits have a rich fossil history

Table 1. Paleontological fossil localities reported in the project vicinity.

Locality Number	Location	Geologic Unit	Taxa	Depth
LACM VP 1680	Conejo Valley (1 mile northwest of Newbury Park)	Unknown unit (Pleistocene, silty clay member)	Mammoth (*Mammuthus*); horse family (Equidae)	14-15 feet bgs
LACM VP 7660	The Lakes at Thousand Oaks (Thousand Oaks Boulevard and South Conejo School Road)	Unknown unit (Quaternary, surface float)	Mastodon (*Mammut americanum*)	Surface (stream bed)
LACM VP 3213	South of Ventura Freeway along South Westlake Boulevard	Unknown unit (Pleistocene, alluvial sediments)	Ground sloth (*Paramylodon*) and other vertebrates	Unknown
LACM VP 7924	Oak Park (within elevated area just east of Lindero Canyon)	Monterey Formation (Miocene, yellow shale sandstone)	Fish (*Eclipes*, Clupeidae); unspecified plants	Unknown
LACM VP 4965, 4966	Just north of Thousand Oaks Boulevard at intersection with La Baya Drive	Modelo Formation (Miocene, punky diatomaceous shale)	Baleen whales (Cetotheriidae)	Surface

in Southern California (Jefferson 1991a, 1991b; McDonald and Jefferson 2008; Miller 1971; Reynolds and Reynolds 1991; Springer et al. 2009). Therefore, the young alluvium, unit 1 (Qya_1) has high paleontological potential. The Modelo Formation (Tm) is known for marine invertebrates and marine vertebrates, especially marine mammals (Barnes 1985, 2013; Barnes and Aranda-Manteca 1997; Bramlette 1946; Fajardo-Mellor et al. 2006; Hoots 1931; Jordan and Gilbert 1919; Popov and Takeuchi 2011). Therefore, the Modelo Formation has high paleontological potential.

The UCMP records indicate no fossil localities have been identified within the vicinity of the project site; however, the NHMLA has identified five fossil localities within the vicinity of the project site. The fossils were identified on the surface and to a depth of at least 15 feet bgs from Quaternary sedimentary deposits and the Miocene Modelo Formation. Proposed excavation for the project would extend below artificial fill into naturally deposited geologic units mapped at the surface and at depth. As such, ground-disturbing activities associated with the project have the potential to impact sediments of the young alluvium, unit 1 (Qya_1) and the Modelo Formation (Tm) and any scientifically significant paleontological resources they may contain.

To address the potential for significant impacts to unique paleontological resources during ground-disturbing activities for the project, and in accordance with MM PAL-1 from the City's General Plan Program EIR (City of Thousand Oaks 2023a), SWCA recommends the following mitigation measures should be implemented by a Qualified Professional Paleontologist (who meets the SVP [2010] qualifications for Principal Investigator or Project Paleontologist) to reduce potential impacts to paleontological resources to a less-than-significant level. The measures below have been developed in accordance with, and incorporates the performance standards of, the SVP (2010) and best practices in mitigation paleontology (Murphey et al. 2019):

a) **Conduct Worker Environmental Awareness Training.** A Qualified Paleontologist shall develop worker environmental awareness program (WEAP) training to educate the construction crew on the legal requirements for preserving fossil resources, as well as the procedures to follow in the event of a fossil discovery. This training program shall be presented by the Qualified Paleontologist (or their representative) to the crew prior to any ground-disturbing activities.

b) **Monitor for Paleontological Resources.** Spot-check paleontological monitoring shall occur during ground-disturbing activities that occur within sediments designated as young alluvium, unit 1 (Qya_1) to determine if the underlying Modelo Formation (Tm) is present. If the Modelo Formation is encountered, monitoring should transition to full-time during ground disturbing activities in the Modelo Formation. Monitoring shall not be required when ground-disturbing

activities would occur only within previously disturbed sediments and/or artificial fill, regardless of depth. Monitoring shall be conducted by a qualified paleontological monitor who meets the standards of the SVP and who shall be supervised by the Qualified Paleontologist. The Qualified Paleontologist may periodically inspect construction activities and increase, decrease, or cease monitoring in response to subsurface conditions, as appropriate.

c) **Prepare a Paleontological Resources Monitoring Report.** At the conclusion of ground-disturbing activities, the Qualified Paleontologist shall prepare a final monitoring report that documents the methods and results of the monitoring efforts, treatment of paleontological resources, results of specimen processing, analysis, and research, and final curation arrangements, as applicable. The report shall be completed after the completion of paleontological monitoring for the project. If paleontological resources are curated, the final monitoring report and any associated data pertinent to the curated specimen(s) should be submitted to the designated repository. A copy of the final monitoring report shall be filed with the City.

d) **Treat Fossil Discoveries.** In the event of a fossil discovery, whether by the qualified paleontological monitor or a member of the construction crew, the qualified paleontological monitor shall have the authority to temporarily divert construction activity, and all work shall cease in a 50-foot radius of the discovery. The Qualified Paleontologist will evaluate the scientific significance of the find and, if appropriate, collect the fossil specimen(s) and all associated data. Paleontological monitors shall record pertinent geological information and collect sediment from the fossil localities. Recovered fossils shall be prepared to the point of curation, identified by qualified experts, listed in a database to facilitate analysis, and deposited in a designated paleontological curation facility. The Qualified Paleontologist shall obtain a curatorial arrangement with an accredited repository and scientifically significant fossils may be donated to this institution.

By implementing the General Plan Program EIR PAL-1 recommended mitigation measures identified above, project impacts to scientifically significant paleontological resources would be reduced to a less-than-significant level as required by CEQA and all pertinent local polices and regulations.

Re: CITADEL Project No. 0096.1057.0
Phase I Environmental Site Assessment Report
195, 275, and 325 East Hillcrest Drive
Thousand Oaks, California 91360

Dear Mr. Parker:

Enclosed please find Citadel EHS's Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for TC LA MF Development, Inc., in accordance with Citadel's Proposal 0096.1057.P, dated April 11, 2024, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,
CITADEL EHS

Mark Drollinger, M.Eng., CSP

Citadel EHS (Citadel) was contracted by TC LA MF Development, Inc. (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 195, 275, and 325

[1] Such surveys and sampling are recommended to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

East Hillcrest Drive, in the City of Thousand Oaks, Ventura County, California; hereinafter referred to as the "Site."

Current Site Conditions

The Site consists of two two-story commercial office buildings and one single-story multi-tenant commercial building totaling approximately 106,130 square feet (SF); asphalt-paved parking areas; and associated landscaping. The address for the two-story structure in the north portion of the Site is 325 East Hillcrest Drive; the address for the two-story structure in the central portion of the Site is 275 East Hillcrest Drive; and the address for the single-story structure in the southwest portion of the Site is 195 East Hillcrest Drive. Two water features are located near the entrances of each of the two-story buildings. Access to the Site parking areas is near the along the southern boundary of the Site along East Hillcrest Drive. At the time of the Site reconnaissance, the Site was occupied by various commercial office tenants including engineering firms, insurance companies, law firms, massage therapists, mental health clinics, and a dentist.

Stationary equipment at the Site include two hydraulic elevators, water pumps, and two pad-mounted transformers. In general, the Site appeared to be well maintained.

Site History

A review of historical sources showed that the Site was undeveloped and/or agricultural land as early as 1900. An intermittent stream was located in the west portion of the Site. The stream did not appear to be within Site boundaries by 1950. According to information provided by the Client, the Site was developed with the three current commercial office structures in 1981. Historical occupants of all three structures include various commercial office tenants, dental offices, and various medical offices since 1985.

While the Site appeared to previously be developed for agricultural use, it has since been redeveloped for commercial use. The majority of the Site has been hardscaped with the current structures and surface parking lot limiting occupant exposure to the subsurface. It is likely that any agricultural chemicals were removed during the grading and redevelopment process; thus, the previous agricultural use is not expected to represent an environmental concern.

Previous Environmental Reports

Citadel reviewed the following environmental reports:

- Partner Engineering and Science Inc. (Partner) performed a Phase I ESA at the Site in May 2015. At the time of the report, the Site was developed in its current configuration with two two-story commercial buildings and one single-story commercial building. The report identified previous agricultural use as a business environmental risk but concluded that the assessment revealed no evidence of RECs in connection with the property and no further investigation was recommended at that time.

- Partner prepared a Property Condition Report for the Site in May 2015. The report assessed topography and building improvements, building structure, exterior envelope, mechanical and electrical systems, interior elements, a code review, American Disability Association (ADA) compliance, and natural hazard information. The Site was determined to be in overall good condition for its age and usage.

- Partner performed a Phase I ESA for the Site in April 2022. At the time of the report the Site was developed in its current configuration. The report identified previous agricultural use as a business environmental risk but concluded that the assessment revealed no

evidence of RECs in connection with the property and no further investigation was recommended at that time.

Environmental Databases

The Site as 195 East Hillcrest Drive was identified on the Hazardous Waste Tracking System (HWTS) database and the HAZNET database due to generating other organic solids in 2005. The Site as 275 East Hillcrest Drive was identified on the HWTS database and the Ventura County Medical Waste Program as a small quantity medical waste generator, likely associated with biohazardous and sharps waste. The presence of the Site on these databases reflects proper disposal of hazardous waste. Based on the lack of documented spills or leaks and proper disposal of hazardous waste, these listings are not expected to represent an environmental concern.

Vapor Encroachment Condition

Citadel reviewed information provided by Environmental Data Resources Inc (EDR) regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Mr. Cleaners, located at 386 North Moorpark Road, is listed as a Cleanup Program Site (CPS). According to EDR, the property is approximately 598 feet west and downgradient of the Site and was historically occupied by Mr. Cleaners from 1972 to 1990. The structure that housed the former Mr. Cleaners was demolished in the mid-1990s and replaced with the current structure occupied by Best Buy. Assessments conducted in 2001 identified maximum concentration of tetrachloroethylene (PCE) in soil vapor at 223.7 micrograms per liter (µg/L) and in soil at 232 micrograms per kilogram (µg/kg). PCE was not detected above the maximum contaminant level (MCL) of 5.0 µg/L during the two years of groundwater monitoring.

Soil remediation was never conducted since the investigation was conducted after construction of the current Best Buy structure. However, the Los Angeles Regional Water Quality Control Board (LARWQCB) concluded that the residual volatile organic compound (VOC) concentrations did not pose a threat to groundwater quality and that the residual contamination must be assessed if redevelopment or change in operations occurred. The case was completed and closed by the LARWQCB on December 19, 2003. While EDR identifies the property as 598 feet west of the Site, the property is located approximately 245 feet northwest and downgradient of the Site. Based on case closure, distance, and downgradient location, this former release is not expected to represent an environmental concern.

EDR did not identify any listings on the Historical Gas Station database or the Dry Cleaners database within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-21, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the (1) presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions

that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An historical recognized environmental condition, or HREC, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was not identified. No evidence for designating the Site as a REC, HREC, or CREC from reviews of historic documents and present Site conditions was found.

NON-ASTM SCOPE CONSIDERATIONS

The current Site buildings were constructed prior to bans using asbestos-containing building materials (ACBMs), lead-based paint (LBP), and polychlorinated biphenyls (PCBs) in electrical equipment came into effect in 1989, 1978, and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs, LBP, or PCBs at the Site.

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Ventura County is Zone 1, which indicates an average indoor concentration greater than 4.0 pCi/L of air. In a survey, 236 tests were performed within the 91360 zip code for the presence of radon. Of these, 15 tests were found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

A potable well was not observed on-Site and the Site does lie within a known or potential flood zone or wetlands.

ESA SHELF LIFE

Date of ESA Report: July 3, 2024

Date of Site Inspection: June 19, 2024

Date Interview was performed: June 19, 2024

Date Records Review was performed: June 20, 2023

Date Lien Search was performed: June 7, 2024

1.0 INTRODUCTION

Citadel EHS (Citadel) was contracted by TC LA MF Development, Inc. (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 195, 275, and 325 East Hillcrest Drive, in the City of Thousand Oaks, Ventura County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is TC LA MF Development, Inc.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by TC LA MF Development, Inc. Citadel recognizes that this report is to be used exclusively by TC LA MF Development, Inc. and its successors, lenders, and assigns. It is a report upon which TC LA MF Development, Inc. and its successors, lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of TC LA MF Development, Inc., their lenders and assigns (Client) solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-21 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.

- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.

- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

- Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.

- Prepared a Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The irregular-shaped Site is located approximately 0.26 mile north of the US 101 Freeway, locally referred to as the Ventura Freeway. The Site is bounded by an assisted living facility to the north; an apartment complex and medical offices to the east; East Hillcrest Drive to the south; and an apartment complex and grocery store to the west. The general Site vicinity is occupied by residential and commercial properties.

According to the U.S. Geological Survey (USGS) Thousand Oaks Quadrangle (7.5 Minute Series), dated 2022, the Site is at an elevation of approximately 744 feet above mean sea level (AMSL) and appears to slope to the southwest. The Site is located at approximate coordinates of 34° 10' 55.50" North Latitude and 118° 52' 18.17" West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the County of Ventura Assessor's Parcel Maps, the Site is comprised of one parcel legally identified as Assessor's Parcel Number (APN) 669-0-021-255. The Site encompasses approximately 8.22 acres of land.

The Site consists of two two-story commercial office buildings and one single-story multi-tenant commercial building totaling approximately 106,130 square feet (SF); asphalt-paved parking areas; and associated landscaping. The address for the two-story structure in the north portion of the Site is 325 East Hillcrest Drive; the address for the two-story structure in the central portion of the Site is 275 East Hillcrest Drive; and the address for the single-story structure in the southwest portion of the Site is 195 East Hillcrest Drive. Two water features are located near the entrances of each of the two-story buildings. Access to the Site parking areas is near the along the southern boundary of the Site along East Hillcrest Drive. At the time of the Site reconnaissance, the Site was occupied by various commercial office tenants including engineering firms, insurance companies, law firms, massage therapists, mental health clinics, and a dentist.

Stationary equipment at the Site include two hydraulic elevators, water pumps, and two pad-mounted transformers. In general, the Site appeared to be well maintained.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

The immediately surrounding properties of the Site consist of the following:

Direction from Site	Address – Tenant/Use
North	405 Hodencamp Road – Atria Hillcrest, an assisted living facility 240 Brazil Street – Multi-family residence
East	351 Hodencamp Road – Eaves Apartment Complex 365 East Hillcrest Drive – Kaiser Permanente Medical Offices
South	220 to 290 East Hillcrest Drive – Multi-family residences 190 East Hillcrest Drive – Hillcrest Royale Retirement Residence
West	25 East Hillcrest Drive – Grocery Outlet 130 Brazil Street – Conejo Future Apartments

2.4 UTILITIES

Electrical service is supplied to the Site by Southern California Edison. Gas service is supplied by the Southern California Gas Company. General rubbish (non-hazardous) is removed from the Site on a regular basis by a contracted waste hauler.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Based upon the North American Datum (NAD) of 1983, the Site is at an elevation of approximately 744 feet AMSL.

The Site is identified on the geologic map of Thousand Oaks quadrangle, California (Dibblee and Ehrenspeck, 1993) as being Holocene aged surficial sediments (Qa). The surficial sediments are described as unconsolidated detrital sediments and undissected to partly dissected alluvial gravel, sand, and clay of valley areas The United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey identifies the Site soils as Calleguas and Sorrento complex. The Calleguas soils are described as well drained very channery loam and bedrock with high runoff. The Sorrento soils are described as well drained silty clay loam with medium runoff.

USGS Topographic Map	Thousand Oaks Quadrangle
Groundwater Basin	Conejo Groundwater Basin – Conejo Subbasin
Nearest Surface Water to Site	Lang Creek (concrete channel), approximately 25 feet north of the Site
Gradient Direction (Source)	Southwest (GeoTracker, topographic maps)
Estimated Depth to Groundwater (Source)	18.71 to 20.05 feet below ground surface (bgs), approximately 450 feet southwest of the Site (GeoTracker/Delta, 2009)
Nearest Wetland to Site (Source)	Lang Creek, approximately 25 feet north of the Site (National Wetlands Inventory)
Nearest 100 or 500-year Flood Zone	The north and west portions of the Site are partially located within 100- and 500-year flood zones (Federal Emergency Management Agency)

4.0 SITE RECONNAISSANCE

Citadel representative Mr. Kyle Johnston conducted the Phase I ESA reconnaissance on June 20, 2024. Mr. Johnston was accompanied by Mr. Bruce Burton, a Senior Associate at Trammell Crow Company. The Site reconnaissance consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Ms. Shirley Lee served as the Project Manager and reviewed this Phase I ESA. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 SITE RECONNAISSANCE FINDINGS

Yes	No	Observation
	X	Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)
X		Identified Hazardous Materials
X		Polychlorinated Biphenyls (PCBs) – Electric or Mechanical Equipment Likely to Contain Fluids
X		Radioactive Man-Made Materials
X		Pits, Ponds, and Lagoons
	X	Septic Tanks and Cesspools
X		Wells, Cisterns, Sumps, and Drains
	X	Wastewater or Grease Interceptors
	X	Interior Stains or Corrosion
	X	Strong, Pungent, or Noxious Odors
	X	Pools of Liquid
	X	Stained Soil or Pavement
	X	Stressed Vegetation
	X	Other

The above-identified observed items are further discussed below.

IDENTIFIED HAZARDOUS MATERIALS

Routine janitorial and maintenance supplies were observed in containers sized for commercial use and properly stored with no signs of staining or leaking. The hazardous materials observed are not expected to represent a significant environmental concern.

A dental practice with an x-ray machine was observed at the Site. The x-ray machine appeared to be digital and did not generate hazardous waste. The practice reportedly utilized an amalgam separator connected to sinks to catch particles prior to their entrance to the sewer system; however, the separator could not be observed at the time of the inspection due to business operations. The use of the separator and x-ray machine are not expected to represent an environmental concern.

POLYCHLORINATED BIPHENYLS

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture

and sale of PCB-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 16 feet (40 Code of Federal Regulations 761.30: "Fire Rule").

One pad-mounted transformer was observed between 275 and 325 East Hillcrest Drive and one pad-mounted transformer was observed east of 195 East Hillcrest Drive. Two hydraulic elevator equipment were observed at the Site; the equipment was located on the first floor of the 275 and 325 East Hillcrest Drive buildings.

The observed equipment appeared to be in working order with no signs of staining or leaking. The equipment observed are not expected to represent a significant environmental concern.

RADIOACTIVE MAN-MADE MATERIALS

Many public and private office buildings in the United States have self-luminescent tritium exit signs that contain radioactive materials. While these do not constitute a recognized environmental condition, the exit signs must be properly identified to ensure proper handling and disposal practices.

PITS, PONDS, AND LAGOONS

Two water features designed to look like small rivers and ponds were located outside of the main entrance of the 275 and 325 East Hillcrest Drive buildings. Two water pumps associated with the water features were observed near the 275 and 325 East Hillcrest buildings. The water features and pumps are maintained on a monthly basis by an outside maintenance company. No hazardous materials storage or staining was observed in the vicinity of the water features. The water features are not expected to represent an environmental concern.

WELLS, CISTERNS, SUMPS, AND DRAINS

Several storm drains were observed in the parking area of the Site. Additionally, mop sinks and break room and bathroom floor drains were located within the Site buildings. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for water runoff, the presence of the drains is not expected to represent a significant environmental concern.

4.2 NON-ASTM SERVICES

ASBESTOS CONTAINING MATERIALS

The EPA issued a final rule under Section 6 of Toxic Substances Control Act (TSCA) banning most asbestos-containing building materials (ACBMs) in 1989. The ban on ACBMs was vacated in 1991 allowing some building materials to continue to contain asbestos. The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities.

Building materials, coatings, and/or finishes containing asbestos may be present in any structure regardless of the date of construction. In accordance with NESHAPS and local air pollution control district regulations, all suspect materials, finishes, and coatings that will be impacted by renovation or demolition regardless of the date of construction are required to be surveyed for the presence of asbestos by State-licensed asbestos consultants.

A survey for asbestos-containing materials was not requested or conducted as part of this Phase I ESA.

LEAD-BASED/LEAD-CONTAINING PAINTS

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has greater than or equal to one milligram per square centimeter (mg/cm^2) (5,000 microgram per gram (µg/g) or 5,000 parts per million (ppm)) of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm^2 to 2.0 mg/cm^2. In 2009, the US Consumer Product Safety Commission (16 Code of Federal Regulations CFR 1303) banned paint containing more than 0.009% (90 ppm) lead for residential use. Buildings built before 1978 are much more likely to have LBP; however, all commercial structures regardless of the date of construction likely contain lead-based or lead-containing glazings, varnishes, stains, coatings, paints, and primers. Such materials that will be impacted by renovation, repair, or demolition should be tested beforehand and the results disclosed to trades or staff that will be doing such work. All associated waste streams should be accurately characterized for proper disposal requirements.

A survey for lead containing materials was not requested or conducted as part of this Phase I ESA.

POLYCHLORINATED BIPHENYLS

Polychlorinated biphenyls (PCBs) were an ingredient added to a variety of building materials during manufacture, most notably, but not limited to, caulking, putty, and glazing, particularly around windows, door frames, and building joints. Building materials containing PCBs were used in many buildings in the 1950s through the 1970s, and potentially before the 1950s. There are significant regulations regarding the removal of these materials during demolition and/or renovation, both from an environmental protection standpoint as well as an occupational health and safety standpoint. In addition, under the Toxic Substances Control Act (TSCA), building materials that contain PCBs at or above 50 ppm are considered an "unauthorized use" of PCBs, and removal can be compelled under TSCA. The presence of PCBs may have the potential to impact a property's future land use. Based on the construction date for the Site building, building materials containing PCBs may have been used in the construction of the Site building.

A survey for PCBs is beyond the required scope of ASTM E1527-21 and was not specifically requested or conducted as part of this Phase I ESA.

DRINKING WATER

The Site is supplied with municipal drinking water by the Calleguas Municipal Water District. An assessment of lead in drinking water was not requested or conducted as part of this Phase I ESA.

RADON

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Ventura County is Zone 1, which indicates an average indoor concentration greater than 4.0 pCi/L of air. In a survey, 236 tests were performed within the 91360 zip code for the presence of radon. Of these, 15 tests were found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

METHANE

The Site is not located within a known or designated methane zone.

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Data Resources Inc. (EDR). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1938, 1947, 1954, 1959	Undeveloped and/or agricultural land with a stream traversing the Site in a northeast-southwest trajectory	**North:** Undeveloped and/or agricultural land **East:** Undeveloped land and/or agricultural land **South:** Multiple residential structures appear developed further south **West:** Undeveloped and/or agricultural land; a residential structure appears developed further west
1967	Relatively unchanged; the previously identified stream is no longer shown within the Site boundaries	**North:** The current multi-family residential structures appear developed to the northwest **East:** Relatively unchanged **South:** The previously identified residential structures appear to have been demolished and replaced with multiple commercial structures **West:** Three of the current commercial structures appear developed further west
1978	Relatively unchanged	**North:** The current multi-family residential structures appear developed further northeast **East:** Relatively unchanged **South:** East Hillcrest Drive appears developed **West:** Portions of the current apartment complex appear developed; the current commercial structure and surface parking lot appear developed; the portions of the adjoining river appear paved
1985	The three current commercial structures and surface parking lot appear developed	**North:** Relatively unchanged **East:** A road connecting the Site to a main road further east appear developed **South:** Relatively unchanged **West:** The remaining portions of the current apartment complex appear developed
1989	Relatively unchanged	**North:** The current commercial structure appears developed **East:** Relatively unchanged **South:** The previously identified commercial structures appear to have been demolished; Boardwalk Avenue appears developed and the current commercial structure west of Boardwalk Avenue appears developed **West:** Relatively unchanged
1994	Relatively unchanged	**North:** Relatively unchanged **East:** The current commercial structure, apartment complex, and associated road network appear developed **South:** Relatively unchanged **West:** Relatively unchanged
2002, 2005, 2009, 2012, 2016, 2020	Relatively unchanged	**North:** Relatively unchanged **East:** Relatively unchanged **South:** The current multi-family residential structure east of Boardwalk Avenue appears developed **West:** Relatively unchanged

Copies of the Aerial Photographs provided by EDR can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. In addition, Citadel requested to review permits with the Ventura County Building Department (VCBD). Records for 195 East Hillcrest Drive included various tenant improvement permits for tenant suites from 1981 to 2023. Building permits for 275 East Hillcrest Drive included various tenant improvement permits for tenant suites from 1981 to 2018 and a permit to change out a boiler, air compressor, and two water pumps in 2009. Building permits for 325 East Hillcrest Drive included various tenant improvement permits for tenant suites from 1981 to 2022 and a permit to change out a boiler, air compressor, and two water pumps in 2009.

According to information provided by the Client, the Site structures were built in 1981.

A copy of the EDR Building Permit Report is included as Appendix D.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site.

A copy of the EDR Sanborn Map Report is included as Appendix E.

5.4 CITY PARCEL PROFILE REPORT

A parcel profile report was not available for the Site.

5.5 HISTORICAL CITY DIRECTORIES

City directories were researched by EDR in order to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched city directory listings from 1920 through 2020 (non-inclusive) and provided their search results to Citadel for review. The following table summarizes information provided by the city directory search.

Dates(s)	Occupant Listed
195 EAST HILLCREST DRIVE	
1985, 1986, 1992, 1993, 1995, 2000, 2002, 2005, 2010, 2014, 2017, 2020	Various commercial office tenants including mortgage companies, title companies, insurance companies, physical therapists, staffing services and spa
275 EAST HILLCREST DRIVE	
1985, 1986, 1992, 1993, 1995, 2000, 2002, 2005, 2010, 2014, 2017, 2020	Various commercial office tenants including mortgage companies, title companies, insurance companies, staffing companies, engineering firms, law offices, and a dentist
325 EAST HILLCREST DRIVE	
1985, 1986, 1992, 1993, 1995, 2000, 2002, 2005, 2010, 2014, 2017, 2020	Various commercial office tenants including employment services, financial services, mortgage companies, law firms, insurance companies, and union offices

The following table summarized information of the adjoining/adjacent properties provided by the city directory search.

Dates(s)	Occupant Listed
405 HODENCAMP ROAD – ADJOINING PROPERTY TO THE NORTH	
2020	Hillcrest Inn
351 HODENCAMP ROAD – ADJOINING PROPERTY TO THE EAST	
1995, 2000	Oakcrest Apartments
2002, 2005, 2010	Oakwood Apartments
2014, 2017, 2020	Eaves Apartments
365 EAST HILLCREST DRIVE – ADJOINING PROPERTY TO THE EAST	
2000, 2002, 2005, 2010, 2014, 2020	Kaiser Permanente
190 EAST HILLCREST DRIVE – ADJACENT PROPERTY TO THE SOUTH	
1992, 1993, 1995, 2000, 2002, 2005, 2010, 2020	Hillcrest Royal Retirement Home
220 EAST HILLCREST DRIVE – ADJACENT PROPERTY TO THE SOUTH	
2002, 2005, 2010, 2014, 2017, 2020	Residences
230 EAST HILLCREST DRIVE – ADJACENT PROPERTY TO THE SOUTH	
2005, 2010, 2014, 2017	Residences
250 EAST HILLCREST DRIVE – ADJACENT PROPERTY TO THE SOUTH	
2000, 2010, 2014, 2017	Residences
290 EAST HILLCREST DRIVE – ADJACENT PROPERTY TO THE SOUTH	
2005, 2014, 2017	Residences
25 EAST HILLCREST DRIVE – ADJOINING PROPERTY TO THE WEST	
1975, 1980, 1985, 1986, 1995	Builders Emporium
2000, 2002, 2010, 2014, 2020	Office Depot
130 BRAZIL STREET – ADJOINING PROPERTY TO THE WEST	
1980, 1985, 1986, 1992, 1993, 1995, 2002, 2005, 2010, 2013, 2017, 2020	Conejo Future Apartments

A copy of the EDR City Directory Abstract is included as Appendix F.

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

Citadel reviewed the *Phase I Environmental Site Assessment Report, Stone Creek Professional Offices, 195, 275, and 325 East Hillcrest Drive,* prepared by Partner Engineering and Science, Inc., dated May 18, 2015.

> Partner Engineering and Science Inc. (Partner) performed a Phase I ESA at the Site in May 2015. At the time of the report, the Site was developed in its current configuration with two two-story commercial buildings and one single-story commercial building. The Site was identified on multiple regulatory databases, which were determined not to represent a significant environmental concern. The report identified previous agricultural use as a business environmental risk but concluded

> that the assessment revealed no evidence of recognized environmental conditions (RECs) in connection with the property and no further investigation was recommended at that time.

Citadel reviewed the *Property Condition Report, Stone Creek Professional Offices, 195, 275, and 325 East Hillcrest Drive,* prepared by Partner Engineering and Science, Inc., dated May 18, 2015.

> Partner prepared a Property Condition Report for the Site in May 2015. The report assessed topography and building improvements, building structure, exterior envelope, mechanical and electrical systems, interior elements, a code review, American Disability Association (ADA) compliance, and natural hazard information. The Site was determined to be in overall good condition for its age and usage.

Citadel reviewed the *Phase I Environmental Site Assessment Report, Stone Creek Professional Offices, 195, 275, and 325 East Hillcrest Drive,* prepared by Partner Engineering and Science, Inc., dated April 22, 2022.

> Partner performed a Phase I ESA for the Site in April 2022. At the time of the report, the Site was developed in its current configuration. The Site was identified on multiple regulatory databases, which were determined to not represent a significant environmental concern. The Site was identified as Wesco Infrastructures Inc. and 2.75 tons of total organic solids were reported for disposal in 2005. A release of gasoline from a loose vehicle fuel line was reported in 1994 and a release of less than 20 gallons of hydraulic fluid was reported in 2005. Both spills were reported to the Ventura County Fire Department, who provided oversight and cleanup. The report identified previous agricultural use as a business environmental risk but concluded that the assessment revealed no evidence of RECs in connection with the property and no further investigation was recommended at that time.

No reports are included in Appendix G.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. Below are brief descriptions of observations made from the topographic maps of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1900, 1903, 1921	Undeveloped land; an intermittent stream is shown traversing the Site in a northeast-southwest trajectory	**North:** Undeveloped land; a road appears developed further north **East:** Undeveloped land **South:** Undeveloped land; an intermittent stream and road appear further south **West:** Undeveloped land; a road appears developed further west

Dates(s)	Site Description	Surrounding Area Descriptions
1943, 1947	Relatively unchanged	**North:** Small structures and an unimproved road appear developed further north **East:** Relatively unchanged **South:** Multiple small structures, likely residential, appear developed further south along a road in the location of the current East Thousand Oaks Boulevard **West:** Small structures and a road appear developed further west
1950, 1951, 1952	The stream no longer appears within Site boundaries	**North:** Relatively unchanged; the unimproved road is no longer shown **East:** Relatively unchanged **South:** Additional small structures appear developed **West:** Relatively unchanged
1967	Relatively unchanged	**North:** Small structures and the current road network appear developed; shading indicative of urban development **East:** Relatively unchanged **South:** Shading indicative of urban development **West:** Multiple large commercial structures appear developed
1981	Relatively unchanged	**North:** Relatively unchanged **East:** Relatively unchanged **South:** East Hillcrest Drive appears developed **West:** Relatively unchanged
2012, 2015, 2018, 2022	Structures are not depicted on this map	Structures are not depicted on this map

Copies of the historical topographic maps provided by EDR are included as Appendix H.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Geological Energy Management Division (CalGEM) Online Mapping System (COMS) shows that there is an oil well approximately 0.79 mile north of the Site. The oil well is identified by API 0411105558. According to COMS, the well operator for the well is listed as Conejo Oil Syndicate and the status for the well is plugged. The well was drilled to a depth of 900 feet in July 1921 and was abandoned in September 1921.

5.9 INTERVIEWS

Citadel interviewed Mr. Bruce Burton during the Site reconnaissance. Mr. Burton was not aware of any historic or current environmental concerns or hazards at the Site. Mr. Andrew Parker, as authorized representative of TC LA MF Development, Inc., provided information regarding the User Questionnaire by providing the previous environmental reports.

5.10 ENVIRONMENTAL LIEN

Citadel contracted with EDR to perform an Environmental Lien Search for the Site. The Environmental Lien Search report reviewed did not identify any current environmental liens or other activity and use limitations (AUL) for the Site. A deed dated October 26, 2011, was included in the report. The deed granted the title from 501 Thousand Oaks, LLC, Successor by merger to Signature Thousand Oaks, LLC to 501 Thousand Oaks, LLC.

A copy of the environmental lien and AUL search can be found in Appendix I.

5.11 SUMMARY OF SITE HISTORY

A review of historical sources showed that the Site was undeveloped and/or agricultural land as early as 1900. An intermittent stream was located in the west portion of the Site. The stream did not appear to be within Site boundaries by 1950. According to information provided by the Client, the Site was developed with the three current commercial office structures in 1981. Historical occupants of all three structures include various commercial office tenants, dental offices, and various medical offices since 1985.

While the Site appeared to previously be developed for agricultural use, it has since been redeveloped for commercial use. The majority of the Site has been hardscaped with the current structures and surface parking lot limiting occupant exposure to the subsurface. It is likely that any agricultural chemicals were removed during the grading and redevelopment process; thus, the previous agricultural use is not expected to represent an environmental concern.

The following provides a brief history of the adjoining/adjacent properties:

- The properties to the north appeared to be undeveloped and/or agricultural land as early as 1900. The area remained relatively unchanged until the current multi-family residential structure was developed by 1967. The current commercial structure was developed by 1989. Historical occupants of the multi-family residential structure include residences since 1967. Historical occupants of the commercial structure include an assisted living facility since 2011.
- The property to the east appeared to be undeveloped and/or agricultural land as early as 1900. The area remained relatively unchanged until a road and surface parking lot connecting the Site to a road further east appeared developed. The road and parking lot appeared to have been demolished by 1989 and replaced with the current apartment complex and commercial structure by 1994. Historical occupants of the apartment complex include Oakcrest Apartments from 1995 to 2000, Oakwood Apartments from 2002 to 2010, and Eaves Apartments since 2014. Historical occupants of the commercial structure include Kaiser Permanente since 2000.
- The properties to the south appeared to be undeveloped land as early as 1900. Multiple residential structures, likely associated with the surrounding agricultural use, appeared developed by 1938. The previously identified residential structures appeared to have been demolished and replaced with multiple commercial structures by 1967. East Hillcrest Drive appeared developed by 1978. The previously identified commercial structures appeared to have been demolished by 1989. At this time, Boardwalk Avenue appeared developed and the current commercial structure west of Boardwalk Avenue appeared developed. The current multi-family residential structures appeared developed east of Boardwalk Avenue by 2002. Historical occupants of the commercial

structure include Hillcrest Royal Retirement Home since 1992. Historical occupants of the multi-family residential structures include residences since 2002.

- The properties to the west appeared to be undeveloped and/or agricultural land as early as 1900. The area remained relatively unchanged until the current commercial structure and surface parking lot and portions of the current apartment complex appeared developed by 1978. The remaining structures of the current apartment complex appeared developed by 1985. Historical occupants of the commercial structure include Builders Emporium from 1975 to 1995 and Office Depot from 2000 to 2020. Historical occupants of the apartment complex include Conejo Future Apartments since 1980.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford, Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into five columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; the fourth column lists the number of listings identified on the database within the specified distance of the Site; and the fifth column indicates if the sites identified are potential environmental concerns to the Site.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
National Priorities List	1 mile	No	0	
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	0	
Delisted National Priorities List	1 mile	No	0	
CERCLIS Sites	½ mile	No	0	
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0	
RCRA Non-Corrective Action TSD Facilities	½ mile	No	0	
State/Tribal Voluntary Cleanup Sites	½ mile	No	1	No
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	42	No, see discussion below

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0	
Historic CORTESE List	½ mile	No	18	No, see discussion below
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0	
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0	
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0	
RCRA Large Quantity Generators	¼ mile	No	1	No
RCRA Small Quantity Generators	¼ mile	No	6	No, see discussion below
RCRA Non Generators	¼ mile	No	168	No, see discussion below
State/Tribal Registered Storage Tank Sites	¼ mile	No	13	No, see discussion below
HIST UST	¼ mile	No	10	No, see discussion below
CA FID UST	¼ mile	No	3	No, see discussion below
SWEEPS UST	¼ mile	No	6	No, see discussion below
Facility Index System (FINDS)	Site	No	0	
HAZNET	Site	Yes	1	No, see discussion below
Orphan	N/A	No	2	No

A brief discussion of select facilities and their database listings are included following the table. The full report provided by EDR and reviewed by Citadel can be found in Appendix J.

Site Name	Wesco Infrastructures Inc.
Database(s)	HWTS, HAZNET
Address	195 Hillcrest Drive
Distance/Direction	Target Property
Comments	The Site was identified on the Hazardous Waste Tracking System (HWTS) database, which is the Department of Toxic Substances Control's (DTSC) data repository for hazardous waste identification and manifest information. The Site was identified on this database and the HAZNET database due to generating other organic solids in 2005. The presence of the Site on these databases reflects proper disposal of hazardous waste. Based on the lack of documented spills or leaks and proper disposal of hazardous waste, these listings are not expected to represent an environmental concern.

Site Name	Steven Chin DDS
Database(s)	HWTS, MED WASTE VENTURA
Address	275 East Hillcrest Drive, Suite 152
Distance/Direction	Target Property

Comments	The Site was identified on the HWTS database and the Ventura County Medical Waste Program as a small quantity medical waste generator, likely associated with biohazardous and sharps waste. The presence of the Site on this database reflects proper disposal of hazardous waste. Based on the lack of documented spills or leaks and proper disposal of hazardous waste, these listings are not expected to represent an environmental concern.

Site Name	Kone Elevator Florence Janss
Database(s)	RCRA NONGEN/NLR, E MANIFEST
Address	190 Brazil Street
Distance/Direction	125 feet west and downgradient of the Site
Comments	This property was identified as a RCRA NON-Generator in 2019 and on the e-Manifest database for generating and disposing eight 55-gallon drums containing approximately 2,800 pounds of other organic solids in 2019. While EDR identified the property as 125 feet west of the Site, the property adjoins the Site to the west. Based on the lack of reported spills or leaks and proper disposal of hazardous waste, these listings are not expected to represent an environmental concern.

Site Name	Kaiser Permanente
Database(s)	CERS HAZWASTE, VENTURA CO. BWT, MED WASTE VENTURA, RCRA NONGEN/NLR, E MANIFEST
Address	365 East Hillcrest Drive
Distance/Direction	195 feet southeast and upgradient of the Site
Comments	This property was identified on several databases as a medical office generating hazardous waste and a RCRA Non-Generator in 1993. Violations identified on the California Environmental Reporting System (CERS) database from 2017 to 2021 include failure to properly label hazardous waste and paperwork violations. Violations have returned to compliance. Hazardous waste generated include photochemical waste from 1993 to 1994; other inorganic solid waste in 1994; metal sludge from 1995 to 1998; pharmaceutical waste from 2014 to 2017; off specification, aged, or surplus organics from 2019 to 2024; unspecified organic liquid mixture from 2021 to 2024; and other organic solids from 2022 to 2024. While EDR identifies this property as 195 feet southeast of the Site, the property adjoins the Site to the east. Based on the lack of reported spills or leaks, distance, these listings are not expected to represent an environmental concern.

Site Name	Office Depot, Agora Realty
Database(s)	RCRA NONGEN/NLR, E MANIFEST
Address	25 East Hillcrest Drive
Distance/Direction	253 feet west-southwest and downgradient of the Site
Comments	This property was identified as a RCRA Non-Generator in 2021 and on the e-Manifest database for generating and disposing one pound of off-specification, aged, or surplus organics in 2019 and approximately 40 cubic yards of asbestos-containing waste in 2021. While EDR identifies this property as 253 feet west-southwest of the Site, the property adjoins the Site to the west. Based on the lack of reported spills or leaks, and proper disposal of hazardous waste, these listings are not expected to represent an environmental concern.

Site Name	Shell SS Moorpark, Moorcrest Oil, Inc., Shell Oil, Shell Thousand Oaks, Alliance Gas Station
Database(s)	LUST, CORTESE, UST FINDER RELEASE, RCRA NONGEN/NLR, E MANIFEST, CERS TANKS, VENTURA CO. BWT, HWTS, HAZNET, CERS, SWEEPS UST, HIST CORTESE, UST, EDR HIST AUTO
Address	172 North Moorpark Road
Distance/Direction	495 feet west-southwest and downgradient of the Site
Comments	This property was identified as a RCRA Non-Generator in 2018 and 2019; and on the HWTS and HAZNET database for generating waste and mixed oil in 2005 and 2007, unspecified aqueous solution in 2007 and 2019, and tank bottom waste in 2012, 2019, and 2020. The property was identified on CERS as a chemical storage facility, underground storage tank facility, and a LUST Cleanup Site. According to GeoTracker, an unauthorized release of waste oil impacting groundwater was discovered during the removal of three 12,000-gallon gasoline USTs and one 550-gallon waste oil UST in October 2002. Remedial efforts included the excavation of approximately 1,753 cubic yards of contaminated soil from 2002 to 2005 and dewatering of contaminated groundwater in 2005. A soil vapor extraction (SVE) feasibility test was conducted in 2005; however, it was determined that SVE was not the most cost-effective remedial approach. Groundwater monitoring was conducted from 2002 through 2009. During that time, groundwater contaminant concentrations declined significantly. Significant concentrations of contaminants of concern were not detected in the nearest groundwater monitoring well to the Site during the final groundwater monitoring event. The Ventura County Environmental Health Department (VCEHD) provided regulatory oversight and issued case closure on December 1, 2009. Based on case closure under regulatory oversight, distance, and downgradient location, this former release is not expected to represent an environmental concern.

Maps showing the location of these facilities and additional information are provided in the Government Records Report in Appendix J.

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater

or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Mr. Cleaners, located at 386 North Moorpark Road, is listed as a Cleanup Program Site (CPS). According to EDR, the property is approximately 598 feet west and downgradient of the Site and was historically occupied by Mr. Cleaners from 1972 to 1990. The structure that housed the former Mr. Cleaners was demolished in the mid-1990s and replaced with the current structure occupied by Best Buy. A limited soil vapor survey conducted in May 2001 consisted of collecting soil vapor samples at six feet bgs from 15 boring locations and soil samples from five, 10, and 15 feet from one boring location. Tetrachloroethylene (PCE) was detected in soil vapor at a maximum concentration of 223.7 micrograms per liter (µg/L) and in the 10-foot soil sample at a concentration of 7.0 micrograms per kilogram (µg/kg). Additional assessment conducted in November 2001 identified PCE concentrations in soil at a maximum concentration of 232 µg/kg; chlorinated volatile organic compounds (VOCs) were not detected in the groundwater samples. PCE was not detected above the maximum contaminant level (MCL) of 5.0 µg/L during the two years of groundwater monitoring.

Soil remediation was never conducted since the investigation was conducted after construction of the current Best Buy structure. However, the Los Angeles Regional Water Quality Control Board (LARWQCB) concluded that the residual VOC concentrations did not pose a threat to groundwater quality and that the residual contamination must be assessed if redevelopment or change in operations occurred. The case was completed and closed by the LARWQCB on

December 19, 2003. While EDR identifies the property as 598 feet west of the Site, the property is located approximately 245 feet northwest and downgradient of the Site. Based on case closure, distance, and downgradient location, this former release is not expected to represent an environmental concern.

EDR did not identify any listings on the Historical Gas Station database or the Dry Cleaners database within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

A copy of the vapor encroachment screen provided by EDR is included as Appendix K.

6.3 REGULATORY AGENCIES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the Site.

BUILDING DEPARTMENT

Citadel contacted the Ventura County Building Department for information regarding the Site in order to identify historical tenants and property use. Please see Section 5.2 for further discussion.

DEPARTMENT OF ENVIRONMENTAL HEALTH

The County of Ventura Resource Management Agency (RMA) Environmental Health department (EHD) is the local Certified Unified Program Agency (CUPA) for the census designated place of Santa Rosa Valley, and provides regulatory oversight for six statewide environmental programs including hazardous materials business plans, hazardous waste, tiered permitting, underground storage tanks, aboveground petroleum storage tanks and California Accidental Release Prevention Program. (Cal ARP). Citadel reviewed the RMA online resource database for information regarding the Site. The Site was not identified on any lists.

CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

The California EPA (CalEPA) Regulated Site Portal combines data of environmentally regulated sites and facilities in California into a single, searchable database. The portal provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. Citadel reviewed the Site Portal Profile for the Site addresses 195, 275, and 325 East Hillcrest Drive. The Site was not identified in the database.

AIR QUALITY MANAGEMENT DISTRICT

Citadel reviewed information available on-line through the Ventura County Air Pollution Control Districts Facility Info System (FIS) database. The Site was not identified on the database.

REGIONAL WATER QUALITY CONTROL BOARD

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies

to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. According to GeoTracker, Mr. Cleaners, located at 386 North Moorpark Road, approximately 300 feet west and downgradient of the Site, is listed as a CPS. This case is discussed above in Section 6.2. The former cleaner was located approximately 245 feet northwest and downgradient of the Site. The case was completed and closed by the LARWQCB on December 19, 2003. Based on case closure, distance, and downgradient location, this former release is not expected to represent an environmental concern.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

- Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation and the Phase I ESA was performed in compliance with all appropriate inquiry, published in 40 CFR 312.

8.0 FINDINGS

Citadel EHS (Citadel) was contracted by TC LA MF Development, Inc. (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 195, 275, and 325 East Hillcrest Drive, in the City of Thousand Oaks, Ventura County, California; hereinafter referred to as the "Site."

Current Site Conditions

The Site consists of two two-story commercial office buildings and one single-story multi-tenant commercial building totaling approximately 106,130 SF; asphalt-paved parking areas; and associated landscaping. The address for the two-story structure in the north portion of the Site is 325 East Hillcrest Drive; the address for the two-story structure in the central portion of the Site is 275 East Hillcrest Drive; and the address for the single-story structure in the southwest portion of the Site is 195 East Hillcrest Drive. Two water features are located near the entrances of each of the two-story buildings. Access to the Site parking areas is near the along the southern boundary of the Site along East Hillcrest Drive. At the time of the Site reconnaissance, the Site was occupied by various commercial office tenants including engineering firms, insurance companies, law firms, massage therapists, mental health clinics, and a dentist.

Stationary equipment at the Site include two hydraulic elevators, water pumps, and two pad-mounted transformers. In general, the Site appeared to be well maintained.

Site History

A review of historical sources showed that the Site was undeveloped and/or agricultural land as early as 1900. An intermittent stream was located in the west portion of the Site. The stream did not appear to be within Site boundaries by 1950. According to information provided by the Client, the Site was developed with the three current commercial office structures in 1981. Historical occupants of all three structures include various commercial office tenants, dental offices, and various medical offices since 1985.

While the Site appeared to previously be developed for agricultural use, it has since been redeveloped for commercial use. The majority of the Site has been hardscaped with the current structures and surface parking lot limiting occupant exposure to the subsurface. It is likely that any agricultural chemicals were removed during the grading and redevelopment process; thus, the previous agricultural use is not expected to represent an environmental concern.

Previous Environmental Reports

Citadel reviewed the following environmental reports:

- Partner performed a Phase I ESA at the Site in May 2015. At the time of the report, the Site was developed in its current configuration with two two-story commercial buildings and one single-story commercial building. The report identified previous agricultural use as a business environmental risk but concluded that the assessment revealed no evidence of RECs in connection with the property and no further investigation was recommended at that time.

- Partner prepared a Property Condition Report for the Site in May 2015. The report assessed topography and building improvements, building structure, exterior envelope, mechanical and electrical systems, interior elements, a code review, ADA compliance, and natural hazard information. The Site was determined to be in overall good condition for its age and usage.

- Partner performed a Phase I ESA for the Site in April 2022. At the time of the report the Site was developed in its current configuration. The report identified previous agricultural use as a business environmental risk but concluded that the assessment revealed no evidence of RECs in connection with the property and no further investigation was recommended at that time.

Environmental Databases

The Site as 195 East Hillcrest Drive was identified on the HWTS database and the HAZNET database due to generating other organic solids in 2005. The Site as 275 East Hillcrest Drive was identified on the HWTS database and the Ventura County Medical Waste Program as a small quantity medical waste generator, likely associated with biohazardous and sharps waste. The presence of the Site on these databases reflects proper disposal of hazardous waste. Based on the lack of documented spills or leaks and proper disposal of hazardous waste, these listings are not expected to represent an environmental concern.

Vapor Encroachment Condition

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no

historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. Mr. Cleaners, located at 386 North Moorpark Road, is listed as a CPS. According to EDR, the property is approximately 598 feet west and downgradient of the Site and was historically occupied by Mr. Cleaners from 1972 to 1990. The structure that housed the former Mr. Cleaners was demolished in the mid-1990s and replaced with the current structure occupied by Best Buy. Assessments conducted in 2001 identified maximum concentration of PCE in soil vapor at 223.7 µg/L and in soil at 232 µg/kg. PCE was not detected above the MCL of 5.0 µg/L during the two years of groundwater monitoring.

Soil remediation was never conducted since the investigation was conducted after construction of the current Best Buy structure. However, the LARWQCB concluded that the residual VOC concentrations did not pose a threat to groundwater quality and that the residual contamination must be assessed if redevelopment or change in operations occurred. The case was completed and closed by the LARWQCB on December 19, 2003. While EDR identifies the property as 598 feet west of the Site, the property is located approximately 245 feet northwest and downgradient of the Site. Based on case closure, distance, and downgradient location, this former release is not expected to represent an environmental concern.

EDR did not identify any listings on the Historical Gas Station database or the Dry Cleaners database within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-21, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the (1) presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An historical recognized environmental condition, or HREC, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or

likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether a VEC can be rules out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was not identified. No evidence for designating the Site as a REC, HREC, or CREC from reviews of historic documents and present Site conditions was found.

Citadel recommends that the tenant follow best management practices, in conformance with all appropriate current regulations, in regards to potential use of regulated hazardous materials and/or waste generated during everyday operations.

The current Site buildings were constructed prior to bans using ACBMs, LBP, and PCBs in electrical equipment came into effect in 1989, 1978, and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs, LBP, or PCBs at the Site.

Prior to renovation or demolition of building components, particularly roofing materials, Citadel recommends that the Client perform a survey for ACBMs, LBP, and PCBs. Such surveys should be performed to identify if ACBMs, LBP, or PCBs are present and to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

11.0 DISCLAIMER

The services performed by Citadel Environmental Services, Inc. ("Citadel"), d.b.a. Citadel EHS, in connection with this Report were performed in accordance with generally and currently accepted engineering practices and principles; provided, however, Citadel completed such services as directed by the Client and the recommendations described in this Report are therefore limited in purpose and scope. The procedures and methodologies used by Citadel in its performance of services, and the recommendations contained herein, are not intended to

meet the requirements under any specific laws or regulatory guidelines unless expressly set forth in the Proposal.

The recommendations and conclusions set forth in this Report are based on information and data available to Citadel during the course of its performance of the services. Citadel relied on the information and data provided by or on behalf of Client, including, if applicable, historical and present operations, conditions and test data, and Citadel assumed all such information and data was correct and complete. Citadel shall not be liable for any damages or losses resulting from inaccuracies of, or omissions from, information or data provided by or on behalf of the Client, any interested third-parties, or any federal, state, county, or local governmental authority, or otherwise available in the public domain.

The information contained in this Report and conclusions resulting therefrom are based solely on information available to Citadel at the time of its performance of services, and from observations and perceived conditions and materials existing on the date of Citadel's limited survey of the site, if applicable. Citadel disclaims any inaccuracy in the Report as a result of any part or parcel of property to which Citadel was not provided access, or which was concealed, including, but not limited to, wall cavities/chases, ceiling plenums, below floor finishes, crawlspaces, below grade, beneath existing structures, or behind electrical panels.

The findings and recommendations presented in this Report are based upon observations of present conditions and may not necessarily indicate future conditions. No conclusions should be construed or inferred other than those expressly stated in this Report. EXCEPT FOR ANY WARRANTIES EXPRESSLY SET FORTH IN THE PROPOSAL OR OTHER WRITTEN AGREEMENT BETWEEN CITADEL AND CLIENT, CITADEL MAKES NO WARRANTIES HEREUNDER WITH RESPECT TO ANY INFORMATION CONTAINED IN THIS REPORT, EXPRESS OR IMPLIED, AND CITADEL HEREBY DISCLAIMS ALL OTHER WARRANTIES.

All testing and remediation methods have reliability limitations and no method nor number of sampling locations can guarantee that a hazard will be discovered if contamination or other evidence of the hazard is not encountered within the performance of the services as authorized. Reliability of testing or remediation varies according to the sampling frequency and other service variables that were selected by Client. Citadel shall not be at fault or liable for any such limitations.

The information and opinions rendered in this report are exclusively for use and reliance by the Client. The information contained herein may not be used, disclosed, or copied without written permission of the Client and may not be relied upon without the written permission of Citadel.

13.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I ESA of the property located at 195, 275, and 325 East Thousand Oaks Boulevard, in the City of Thousand Oaks, Ventura County, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-21 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

EXPERIENCE

With over **35 years** of experience in environmental engineering, compliance, permitting and management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations; and with local agencies, fire departments and public works. Mr. Drollinger has provided environmental engineering, assessment and compliance, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

ROLE

As Director of Environmental Geology & Engineering, Mr. Drollinger's primary responsibility includes developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; litigation support; and coordinating tasks with multi-discipline project teams.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments.

EDUCATION

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama, and a M.Eng. in Advanced Safety Engineering and Management, University of Alabama, Birmingham.

Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Society of Safety Engineers, Board of Certified Safety Professionals, Institute of Hazardous Materials Management, Institute of Industrial Engineers and International Facilities Management Association.

ROLE

As a Staff Specialist, Mr. Johnston provides support and technical writing expertise to assist in the completion of environmental and environmental compliance-related projects awarded to the Engineering and Environmental Sciences Department. He is able to complete all assigned projects so that the client is satisfied with the finished work product and the working relationship. His assignments include a combination of field-based activities in a number of varying environments and office-based activities.

EDUCATION

Mr. Johnston holds a Bachelor of Arts in Environmental Business from the University of Redlands; with a minor in Spatial Studies. Mr. Johnston also holds a 40-hour HAZWOPER General Site Worker Certification.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Certified Sanborn® Map Report

06/13/24

Site Name:	Client Name:
195 East Hillcrest Drive	Citadel EHS
195 East Hillcrest Drive	1725 Victory Boulevard
Thousand Oaks, CA 91360	Glendale, CA 91201
EDR Inquiry # 7681085.3	Contact: Kyle Johnston

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Citadel EHS were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 30CB-484E-9153

PO # NA

Project 0096.1057.0

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 30CB-484E-9153

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Citadel EHS (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Stone Creek Professional Offices
195, 275, and 325 East Hillcrest Drive
Thousand Oaks, California 91360
Partner Project No. 15-138774.1

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (619) 757-1119 or MLambson@partneresi.com.

Sincerely,

Mark Lambson

Mark Lambson
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by SIMA Management Corporation for the property located at 195, 275, and 325 East Hillcrest Drive in the City of Thousand Oaks, Ventura County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide SIMA Management Corporation with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the north side of East Hillcrest Drive within a mixed commercial and residential area of Ventura County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Addresses:	195, 275, and 325 East Hillcrest Drive, Thousand Oaks, California
Property Use:	Office
Land Acreage (Ac):	8.22 Ac
Number of Buildings:	Three
Number of Floors:	Two buildings with two floors (275 & 325 East Hillcrest Drive) and one building with one floor (195 East Hillcrest Drive)
Gross Building Area (SF):	108,635 Total SF (per Ventura County Assessor)
Net Rentable Area (SF):	Unknown
Date of Construction:	1983
Assessor's Parcel Number (APN):	669-0-021-255
Type of Construction:	Wood-Framed
Current Tenants:	46 office/administrative tenants:

195 East Hillcrest Drive Building:

Site Assessment Performed By:	Emilie Moore of Partner	
Site Assessment Conducted On:	May 11, 2015	

The subject property is currently occupied by 46 office/administrative tenants for commercial use. Onsite operations consist of administrative, counseling, and medical (non-surgical) activities. In addition to the current structures, the subject property is also improved with asphalt-paved parking areas, decorative water features, trash dumpster enclosures, and associated landscaping.

According to available historical sources, the subject property was formerly undeveloped as early as 1938; developed agriculturally in the 1940s; vacant land from the 1950s until the 1970s; and developed with the present-day office buildings in 1983. Tenants on the subject property have included various office/administrative tenants (no past or present tenants of concern).

The immediately surrounding properties consist of apartments and assisted living to the north and northwest; apartments and a retirement residence to the south across East Hillcrest Drive; apartments and a medical/office building to the east; and apartments and Office Depot to the west across Lang Creek drainage canal.

According to groundwater monitoring data available from the Regional Water Quality Control Board (RWQCB) GeoTracker website for a nearby site (Janss Car Wash at 467 North Moorpark Road) located approximately 0.4-mile northwest of the subject property, groundwater in the vicinity of the subject property is inferred to be approximately 24-35 feet below ground surface (bgs) and flows toward the south.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 195, 275, and 325 East Hillcrest Drive in the City of Thousand Oaks, Ventura County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 195, 275, and 325 East Hillcrest Drive in the City of Thousand Oaks, Ventura County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

SIMA Management Corporation engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of SIMA Management

Corporation. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at http://www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to the Ventura County Environmental Health Division (VCEHD) and the Ventura County Fire Department (VCFD) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 20% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (office), this limited method of survey is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, California is located on the north side of East Hillcrest Drive. According to the Ventura County Assessor and online research, the subject property is legally described as "Map Number 42, PM 22, Lot 1," and ownership is currently vested in 501 Thousand Oaks, LLC c/o SIMA Management Corporation since 2002.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by 46 office/administrative tenants for commercial use. Onsite operations consist of administrative, counseling, and medical (non-surgical) activities. The subject property consists of two two-story buildings and one one-story building. In addition to the current structures, the subject property is also improved with asphalt-paved parking areas, decorative water features, trash dumpster enclosures, and associated landscaping.

The subject property is designated for commercial development by the City of Thousand Oaks.

The subject property was identified as a Ventura County Medical Waste Generator (Med Waste Ventura) and an EDR Historical Auto Station site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Ventura County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties	
North:	Apartments (270 Brazil Street) and an assisted living facility (405 Hodencamp Road)
South:	East Hillcrest Drive beyond which is a retirement residence (190 East Hillcrest Drive) and apartments (220-290 East Hillcrest Drive)
East:	Apartments (351 Hodencamp Road) and a medical/office building (365 East Hillcrest Drive)
West:	Lang Creek drainage canal beyond which is Office Depot (25 East Hillcrest Drive) and apartments (130-190 Brazil Street)

No adjacent properties were identified in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Thousand Oaks, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 800 feet above mean sea level (MSL). The contour lines in

the area of the subject property indicate the area is sloping gently toward the south. No specific subject property features are depicted on the 2013 map.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the south. The nearest surface water in the vicinity of the subject property is Land Creek drainage canal located adjacent to the west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Thousand Oaks Department of Public Works (TODPW) serves the subject property vicinity. According to a representative of the TODPW, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Thousand Oaks are surface water from the California Water Project.

According to groundwater monitoring data available from the RWQCB GeoTracker website for a nearby site (Janss Car Wash at 467 North Moorpark Road) located approximately 0.4-mile northwest of the subject property, groundwater in the vicinity of the subject property is inferred to be approximately 24-35 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Pacific Border physiographic province of the State of California. Information concerning the geology of the subject property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The subject property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, and commonly metamorphosed marine and continental sediments.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Gilroy clay loam. The Gilroy series consists of moderately deep, well drained soils that formed in material weathered from basic igneous and metamorphic rocks. Slopes range from 15 to 30 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06111C0986E, dated January 20, 2010, the eastern portion of the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains. However, the western portion of the subject property (abutting Lang Creek drainage canal) appears to be located in Zone AE, an area subject to inundation by the 1% annual chance flood. The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1938	Aerial Photograph	Undeveloped/Native land
1940s	Aerial Photographs	Agricultural
1950s-1970s	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations, Sanborn Maps	Vacant Land
1983-Present	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations	Developed with the present-day commercial office buildings and parking

Tenants on the subject property have included various office/administrative tenants (no past or present tenants of concern). No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on May 4, 2015. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date: 1938	***Scale: 1"=500'***
Subject Property:	Undeveloped/native land
North:	Undeveloped/native land
South:	Undeveloped/native land
East:	Undeveloped/native land
West:	Undeveloped/native land beyond Lang Creek

Date: 1947	***Scale: 1"=500'***
Subject Property:	Agricultural land
North:	Mostly undeveloped/native land
South:	Agricultural land
East:	Agricultural land
West:	Agricultural land and vacant land beyond Lang Creek

Date: 1954, 1959	***Scale: 1"=500'***
Subject Property:	Vacant land
North:	Vacant land
South:	Vacant land
East:	Vacant land
West:	Agricultural land beyond Lang Creek

Date: 1967	***Scale: 1"=500'***
Subject Property:	Cleared, vacant land with dirt paths bisecting the property
North:	A small parcel of vacant land followed by what appears to be residential structures
South:	Cleared, vacant land
East:	Cleared, vacant land
West:	Lang Creek followed by vacant land and the present-day Office Depot/commercial

Date: 1977	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	Appears to be developed with additional residential buildings
South:	East Hillcrest Drive followed by a small parcel of vacant land and what appear to be residential buildings and parking
East:	No significant changes visible
West:	No significant changes visible

Date: 1985	***Scale: 1"=500'***
Subject Property:	Developed with the present-day office building and parking areas
North:	No significant changes visible
South:	No significant changes visible
East:	Developed with vacant land and a paved access driveway
West:	Developed with the present-day residential and commercial structures

Date: 1994	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	Developed with the present-day senior living facility and residences
South:	East Hillcrest Drive followed by a parcel of vacant land and the present-day senior living facility
East:	Developed with the present-day office/medical building and residences
West:	No significant changes visible

Date: 2005, 2009, 2010, 2012	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	East Hillcrest Drive followed by the present-day residential structures and senior living facility
East:	No significant changes visible
West:	No significant changes visible

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on April 29, 2015. Sanborn map coverage was not available for the subject property.

A copy of the Sanborn Maps No Coverage Letter is included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from Haines and Sherman Directories on May 11, 2105 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 195, 275, and 325 East Hillcrest Drive (Subject Property)	
Year(s)	**Occupant Listed**
1962	No Listing
1967	No Listing
1972	No Listing
1983	No Listing
1988	Various office/professional tenants (195, 275, and 325 East Hillcrest Drive)
1993	Various office/professional tenants (195, 275, and 325 East Hillcrest Drive)
1998	Various office/professional tenants (195, 275, and 325 East Hillcrest Drive)

Based on the city directory review, no environmentally sensitive listings were identified for the subject property address(es).

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
1962	No Listing
1967	No Listing
1972	No Listing
1983	CW Driver Inc. (365 East Hillcrest Drive), Conejo Future Apartments and Residential (130-190 Brazil Street)
1988	CA Exceptional Bread & La Petite Boulangerie (222 East Hillcrest Drive), Conejo Future Apartments and Residential (130-190 Brazil Street), Amer Senior Inns, Hillcrest Inn, and J Ray Construction (405 Hodencamp Road)
1993	Hillcrest Roy Apartments (190 East Hillcrest Drive), Conejo Future Apartments and Residential (130-190 Brazil Street), Amer Senior Inns & Hillcrest Inn (405 Hodencamp Road)
1998	Hillcrest Royale Retirement Living (190 East Hillcrest Drive), Residential (220-290 {evens} East Hillcrest Drive), Kaiser Med & Pharmacy (365 East Hillcrest Drive), Conejo Future Apartments and Residential (130-190 Brazil Street), Oakcrest Apartments (351 Hodencamp Road)

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are not included in Appendix B of this report.

3.4 Historical Topographic Maps

Historical topographic maps were not available at the time of the assessment. The historical use of the subject property was researched through other standard historical sources.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	Ventura County Environmental Health Division (VCEHD)
Point of Contact:	N/A
Agency Address:	800 South Victoria, Suite 800, Ventura, California
Agency Phone Number:	(805) 654-2813
Date of Contact:	May 4, 2015
Method of Communication:	Faxed Request/Telephone Follow-Up
Summary of Communication:	As of the date of this report, Partner has not received a response from the VCEHD for inclusion in this report.

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	Ventura County Fire Department (VCFD)
Agency Address:	165 Durley Road, Camarillo, California
Agency Phone Number:	(805) 389-9710
Date of Contact:	May 4, 2015
Method of Communication:	Faxed Request/ Telephone Follow-Up
Summary of Communication:	As of the date of this report, Partner has not received a response from the VCFD for inclusion in this report.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Ventura County Air Pollution Control District (VCAPCD)
Source:	Facility Info System (http://www.vcapcd.org/FI.htm)
Agency Address:	669 County Square Drive, Ventura, California
Agency Phone Number:	(805) 645-1400
Date of Contact:	May 4, 2015
Method of Communication:	Online
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the VCAPCD.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	Online
Agency Address:	http://geotracker.waterboards.ca.gov
Date of Contact:	May 4, 2015
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Source:	Envirostor (http://www.envirostor.dtsc.ca.gov/public/) and the Hazardous Waste Tracking System (http://hwts.dtsc.ca.gov/report_search.cfm?id=5)
Date of Contact:	May 4, 2015
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with Envirostor. According to the HWTS records reviewed, there are six permits on file for the subject property, as summarized below:

Tenant	Address	Permit Status	HAZMAT Generation/Notes
Wesco Infrastructures Inc.	195 Hillcrest Drive	Inactive as of April 13, 2006	Generator of 2.75 tons of unknown waste in 2005 – no violations
Steven I. Chin DDS	275 Hillcrest Drive	Inactive as of June 30, 2014	Generator of unknown quantity and type of hazardous waste – no violations
1x Ventura County Fire Protection District (2 permits)	325 Hillcrest Drive	Inactive as of October 25, 2000	Generator of unknown quantity and type of hazardous waste – no violations
County of	325 Hillcrest	Inactive as	Generator of 00.2-

Regulatory Agency Data				
	Ventura CEO Risk HMAP	Drive	of July 28, 2005	0.6 tons of unknown waste in 1993 and 2004, and 0.29 tons of ignitable waste in 1993 – no violations
	Ventura County Fire Station 30	325 Hillcrest Drive	Active as of October 4, 1994	Generator of 0.8 tons of benzene in 1995, between 0.04 and 0.2 tons of ignitable waste between 2005 and 2009, and 0.04-0.08 tons of unknown waste in 2005 and 2007 - no violations on record

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	Thousand Oaks Building Department (TOBD)
Point of Contact:	N/A
Agency Address:	2100 Thousand Oaks Blvd, Thousand Oaks, California
Agency Phone Number:	(805) 449-2500
Date of Contact:	May 4, 2015
Method of Communication:	Online
Summary of Communication:	Records were available for review, as further discussed in the following table.

Building Records Reviewed for 195, 275, and 325 East Hillcrest Drive (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
1981	Signature Thousand Oaks LLC	Application for a new building permit for an office building at 275 East Hillcrest Drive
1981	Thousand Oaks Financial Plaza	Application for a new building permit for an office building at 325 East Hillcrest Drive
1982	Thousand Oaks Financial Plaza	Application for a new building permit for an office building at 195 East Hillcrest Drive

A copy of pertinent documents is included in Appendix B of this report.

4.1.7 Planning Department

Regulatory Agency Data	
Name of Agency:	Thousand Oaks Planning Division (TOPD)
Agency Address:	2100 Thousand Oaks Blvd, Thousand Oaks, California
Agency Phone Number:	(805) 449-2500
Date of Contact:	May 4, 2015
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is zoned C-3 for commercial development by the City of Thousand Oaks.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Source:	http://maps.conservation.ca.gov/doggr/index.html
Date of Contact:	May 4, 2015
Method of Communication:	Online
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Ventura County Assessor (County)
Source:	http://assessor.countyofventura.org/index.html
Agency Address:	800 South Victoria, Ventura, California
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 669-0-021-255 and is currently situated on an 8.22 acre lot.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	***Y***	N	N
EDR US Hist Cleaners	Varies	N	N	N
Ventura County Medical Waste Generator		***Y***	N	N

4.2.2 Subject Property Listings

The subject property is identified as a Ventura County Medical Waste Generator and an EDR Historical Auto Station site in the regulatory database report, as discussed below:

- The subject property, identified as Steven I. Chin DDS at 275 East Hillcrest Avenue, Suite 152, is listed as a Ventura County small quantity generator of medical waste and is identified by facility ID FA0007799. There are no releases of violations associated with this listing. Based on the small quantity generator status and the nature of the waste, this listing is not expected to represent a significant environmental concern.

- The subject property, identified All Mobile Lube/Tony's Body Shop/Mobile Lube & Oil X at 275 East Hillcrest Drive, is listed as an EDR Historical Auto Station site in 2001, 2002, 2003, and 2004. Based on historical sources reviewed, the subject property has been developed with the current office buildings since 1983, and was formerly undeveloped and agricultural land as early as 1938. Partner believes that the listings represent the office address of tenants who owned car repair/auto body businesses and does not indicate that actual vehicle maintenance activities or auto body repair was taking place on the subject property. Based on this information, the listing is not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent properties are not identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern to the subject property are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from SIMA Management Corporation (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
Environmental Pre-Survey Questionnaire	**X**		**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other				**X**

5.1 Interviews

5.1.1 Interview with Owner

The subject property owner was not available to be interviewed at the time of this assessment.

5.1.2 Interview with Report User

Mr. Weslie Ching, subject property report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Ching, the subject property was developed in the 1980s for commercial office use. Mr. Ching further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

5.1.3 Interview with Key Site Manager

Mr. Miguel Gongora, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Gongora, the subject property was developed in the 1980s for commercial office use. Mr. Gongora further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Emilie Moore
Site Assessment Conducted On:	May 11, 2015

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 195, 275, and 325 East Hillcrest Drive (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Miguel Gongora	Key Site Manager	(805) 558-6876	Yes*

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located in the parking area on the subject property. An independent solid waste disposal contractor, Waste Management, removes solid waste from the subject property. According to property personnel, only household/office trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Thousand Oaks services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface

impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison and The Gas Company. Partner notes that the natural gas supply is only connected in 275 and 325 East Hillcrest Drive. There is no natural gas supply within 195 East Hillcrest Drive. Hot water in 195 East Hillcrest Drive is provided by electric "insta-hot" heater located beneath the bathroom sinks. Hot water in 275 and 325 East Hillcrest Drive is provided by individual natural gas boiler units.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Two pad-mounted transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Partner contacted a customer service representative of [Southern California Edison, who confirmed that they maintain ownership and operational responsibility for the transformers and that the units do not contain PCBs. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Additionally, the subject property 275 and 325 East Hillcrest Drive buildings are equipped with one hydraulic passenger elevator per building. The hydraulic fluid contained within elevator systems can potentially contain polychlorinated biphenyls (PCBs). The elevator equipment rooms were inspected by Partner, and the equipment appeared to be in good condition. Based on the good condition of the elevator equipment, the elevators are not expected to represent significant environmental concerns.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid, apart from decorative water features, were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1983. As such, an asbestos evaluation was not required by the scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good
Drop-Down Ceiling Tiles	Throughout Building Interior	Yes	Good
Stucco	Throughout Building Exterior	Yes	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings, it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 1. Based upon the commercial nature of the subject property, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Thousand Oaks Department of Public Works serves the subject property vicinity. According to a representative of the department, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Thousand Oaks are surface water from the California Water Project. According to the City of Thousand Oaks and the 2014 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

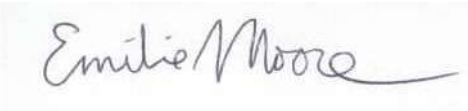
An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes

that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 195, 275, and 325 East Hillcrest Drive in the City of Thousand Oaks, Ventura County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.



- This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 195, 275, and 325 East Hillcrest Drive in the City of Thousand Oaks, Ventura County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thousand Oaks, California
Partner Project No. 15-138774.1

Dear Weslie Ching:

Partner Engineering and Science, Inc. is pleased to provide the results of the assessment performed on the above-referenced property. At a minimum, this assessment was performed in general conformance with the scope and limitations as set forth by ASTM E2018-08 "Standard Guide for Property Condition Assessments: Baseline Property Condition Assessment Process" and as specified in the agreed contract that initiated this work. Specific requirements or deviations from the minimum ASTM standard are described herein. The findings are detailed in the attached property condition report.

The purpose of this assessment is to describe the primary systems and components of the subject property, to identify conspicuous defects or material deferred maintenance, and to present an opinion of costs to remedy to observed conditions. In addition, this report identifies systems or components that are anticipated to reach the end of their expected useful life during the specified evaluation period and includes an opinion of cost for future capital replacements.

This assessment was performed utilizing methods and procedures consistent with good commercial or customary practices designed to conform to acceptable industry standards. The independent conclusions represent Partner's best professional judgment based upon existing conditions and the information and data available to us during the course of this assignment.

We appreciate the opportunity to provide these assessment services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Mark Lambson at (619) 757-1119.

Sincerely,

Partner Engineering and Science, Inc.

1.0 EXECUTIVE SUMMARY AND PROPERTY DESCRIPTION

Partner Engineering and Science, Inc. (Partner) has performed a property condition assessment (PCA) of the parcel and improvements defined in the following table, hereafter referenced as the subject property.

1.1 Property Description

Property Name	Stone Creek Professional Offices
Address	195, 275, and 325 E. Hillcrest Drive Thousand Oaks, California 91360
Property Use	Commercial Office
Number of Buildings	Three
Parcel Size (Acres)	Approximately 8.22 acres
Approximate Percentage of Parcel Occupied by Improvements	20%
Parking Area	Asphalt pavement
Parking Space Count	354
ADA Parking Count	12 spaces designated as accessible, of which 7 are van accessible.

1.2 Building Description

Building Identifier	Building 195
Address	195 E. Hillcrest Drive
Number of Tenant Spaces	Seven
Stories or Floors	One story
Gross Building Area (SF)	9,980
Net Rentable Area (SF)	9,847
Year Built	1981
Foundation / Substructure	Individual spread column footings, continuous spread wall footings.
Superstructure	Wood beams and columns, wood stud framing.
Façade	Stucco, wood panels, and brick masonry.
Roof Covering	Pitched roofs are covered with clay tiles. Low sloping roofs are covered with A single ply membrane.

Heating and Cooling System	Rooftop electric package HVAC units.
Number of Elevators, Type	None present.
Fire Suppression	Handheld fire extinguishers.

Building Identifier	Building 275
Address	275 E. Hillcrest Drive.
Number of Tenant Spaces	22
Stories or Floors	Two stories
Gross Building Area (SF)	48,124
Net Rentable Area (SF)	39,115
Year Built	1981
Foundation / Substructure	Individual spread column footings, continuous spread wall footings.
Superstructure	Steel beams and columns, wood stud framing.
Façade	Stucco, brick veneer, and aluminum frame ribbon windows.
Roof Covering	Pitched roofs are covered with clay tiles. Low sloping roofs are covered with single ply membrane with asphalt shingles up the parapet wall.
Heating and Cooling System	Rooftop mounted package HVAC units.
Heating System	Gas fired water heater.
Cooling System	Electric roof top package HVAC unit.
Number of Elevators, Type	One, hydraulic.
Fire Suppression	Handheld fire extinguishers.

Building Identifier	Building 325
Address	325 East Hillcrest Drive.
Number of Tenant Spaces	30
Stories or Floors	Two stories
Gross Building Area (SF)	52,032
Net Rentable Area (SF)	41,582
Year Built	1981
Foundation / Substructure	Individual spread column footings, continuous spread wall footings.

Superstructure	Steel beams and columns, wood stud framing.
Façade	Stucco, brick veneer, and aluminum frame ribbon windows.
Roof Covering	Pitched roofs are covered with clay tiles. Low sloping roofs are covered with single ply membrane with asphalt shingles up the parapet wall.
Heating and Cooling System	Rooftop mounted package HVAC units.
Heating System	Gas fired water heater.
Cooling System	Electric roof top package HVAC units.
Number of Elevators, Type	One, hydraulic.
Fire Suppression	Handheld fire extinguishers.

1.3 Project Team

Project Manager/Reviewer	Mario Cano
Project Assessor:	Christy Kim, AIA, CASp

1.4 Overall Condition

Based on observations made during the walk-through survey, the subject property appears to be in good condition for its age and usage.

No recent or planned capital improvements were reported by property management.

The detailed observations of reviewed systems are presented in the following Sections of this report, with tabulated opinions of cost presented in the Appendices.

1.5 Immediate Repair Items

ASTM E2018 requires the identification of physical deficiencies and inclusion of an opinion of cost to address those items that require immediate action as a result of the following: Material existing or potential unsafe conditions, material building code or fire code violations, or conditions, that if left uncorrected, have the potential to result in, or contribute to, critical element or system failure within one year or may result in a significant increase in remedial cost. The identified items, if any, are listed in Table 1 – Immediate Repairs and Deferred Maintenance Cost Opinion.

1.6 Replacement Reserve Items

This report includes an evaluation of the remaining useful life of the building systems and appurtenances associated with the subject property. The length of the evaluation period is specified by the Client. Items that represent a capital expenditure and are anticipated to reach the end of their useful life within the evaluation period are identified in Table 2 - Capital Replacement Reserve Cost Opinion.

Factors that may affect the age and condition of a system include, but are not limited to, the frequency of use, exposure to environmental elements, quality of construction and installation, and amount of maintenance provided. Based on these factors, a system may have an effective age that is greater or less than its actual chronological age. Routine maintenance costs are not included as part of this assessment. Building systems and appurtenances are expected to exceed the evaluation period, or are a tenant responsibility to maintain and replace, are omitted from Table 2.

2.0 RECONNAISSANCE, REGULATORY AND DOCUMENT REVIEW

2.1 Site Reconnaissance

Date:	May 1, 3015
Weather:	Sunny, 85 degrees
Escort:	Miguel Gongora with SIMA Services

2.1.1 Property Personnel Interviewed/Contacted

In addition to the above-referenced escort, the following personnel associated with the subject property were interviewed as part of the preparation of this report. Information obtained from the interviews is incorporated into the appropriate Sections of this report.

Individual	Position or Title	Contact Number/Email
Mr. Neil Parker	Maintenance Engineer	(805) 253-6316
Ms. Weslie Ching	Property Manager	(805) 965-1616

2.1.2 Limiting Conditions

In addition, the performance of this assessment was limited by the following condition(s):

- Observed tenant units were selected by the property escort. The observed conditions are presumed to be indicative of areas throughout the subject property.
- The pitched roofs could not be safely accessed. Therefore, these roofs were observed from ground level, or from the low-sloped roofs.

2.2 Regulatory Compliance Inquiry

Building Codes	City of Thousand Oaks Code Compliance Department/ https://c2g.toaks.org/Click2GovBP/selectpermit.html		
Contact:	Mr. Mike Hines	Telephone:	(805) 449-2303
Findings:	☒ No Violations	☐ Violations	☐ Awaiting response
	According to Mr. Hines, there are no violations reported for the properties.		
Fire or Life Safety	Ventura County Fire Department		
Contact:	Ms. Kolina MacRury http://fire.countyofventura.org/ Public Records/Public Record Request.aspx	Telephone:	(805) 383-4718
Findings:	☒ No Violations	☐ Violations	☐ Awaiting response

	According to Ms. MacRury, Custodian of Records Office, Ventura County Fire Department, there are no records found for the properties.		
Zoning	City of Thousand Oaks Planning Division		
Contact:	Mr. Steve Barragan	Telephone:	(805) 449-2338
Findings:	☒ No Violations	☐ Violations	☐ Awaiting response
	According to Mr. Barragan, there are no violations reported for the properties. The subject property was reported to be compliant with current zoning regulations. The subject properties are zoned C-3 (Commercial).		

The information provided on this list does not constitute a detailed regulatory-compliance investigation. If possible, Partner confirmed the provided information with on-site observations. Information that is received within 30 days of the site visit will be forwarded upon receipt.

2.3 Document Review

Partner reviewed the following documents as part of this assessment. Information obtained from the documents is incorporated into the appropriate Sections of this report. If available, copies of the referenced documents are included in the appendices.

- Assessor Parcel Number 669-0-021-255
- Previous PCA prepared by Professional Service Industries, Inc., dated November 5, 2001, prepared for Bank Of America, N.A.,
- Previous Structural Evaluation prepared by LI &Associates, Inc. dated October 16, 1994, prepared for The Carlson Company,
- Rent Roll, dated May 2015
- Stonecreek Brochure, dated April 2014
- ALTA Survey, prepared by PSOMAS, dated September 22, 1997, prepared for SIGMA Management Group.

3.0 TOPOGRAPHY AND IMPROVEMENTS

3.1 Topography and Storm Drainage

Item	Description
Topography:	Moderately sloped from east to west.
Storm water collection:	Surface sheet flow to concrete drainage swales which discharge to curb inlets and area drains.
Storm water discharge:	Discharges to municipal storm water system and drainage channel along the northwest side of the property.

Survey Condition and Analysis

Topography was observed to be in good overall condition. No significant areas of erosion were observed. Routine maintenance is anticipated during the evaluation period.

Slopes and grade elevations appear to be adequate for proper drainage and connections to the main sewer lines.

No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed.

3.2 Retaining Walls

Item	Description
Type:	Concrete masonry.
Location:	Retaining walls are located along the perimeters of Buildings 275 and 325.

Survey Condition and Analysis

The retaining walls appeared to be in average condition. Minor cracking was observed at isolated locations which should be addressed by building operations and maintenance. Staining from landscaping was observed at the retaining walls which should be cleaned, also as part of building operations and maintenance.

A large crack exists at the retaining wall south of Building 325. It appears as though embedded steel is corroded, expanding, and causing the cracks. This wall should be repaired. An opinion of cost is included in Table 1.

3.3 Landscaping and Irrigation

Item	Description
Landscaping components:	Trees, shrubs, ground cover.
Location:	Building perimeters, landscaped islands in parking areas, and property perimeter.
Irrigation system:	Pop up automatic and drip irrigation system.

Survey Condition and Analysis

Tree branches are in contact with building façades and roofs of all three buildings. Tree trimming is recommended. See Table 1 for an opinion of cost. Routine maintenance is anticipated during the evaluation period.

Although the sprinkler system was not tested, components are reported to be in proper working order based on the overall good appearance of the landscaping. Routine maintenance is anticipated during the evaluation period.

3.4 Drive Lanes and Parking

Item	Description
Access locations:	The site is accessed by a two ingress/egress drives off of East Hillcrest Drive.
Parking type:	Surface lots.
Parking location:	Throughout the subject property.
Standard-size spaces:	9'-wide x 18'-long.
ADA spaces:	A total of 12 designated ADA accessible spaces are provided, seven of which are designated van accessible spaces.
Pavement type:	Asphalt
Curbing:	On site curbing consists of 6" high cast in place concrete curbing.

Survey Condition and Analysis

The pavement was noted to be alligatored (cracked) in many locations, with longitudinal cracks throughout. Based on EUL and apparent condition, the asphalt surfaces should be resealed and striped periodically during the evaluation period. Mill and overlay of alligatored pavement or larger cracks, and crack sealing smaller cracks should be completed prior to resealing the pavement. An opinion of cost is included in Table 1 for repairs and 2 for periodic resealing and restriping.

Isolated locations of damaged curbing was noted near Buildings 275 and 325. Curb repair is recommended as an Immediate Repair work item. An opinion of cost is included in Table 1.

3.5 Pedestrian Pavement

Item	Description
Sidewalks:	Concrete and stone paved sidewalks are provided around building perimeters. Municipal sidewalks are provided along the frontage street.
Ramps:	Cast in place concrete ramp exists on the north side of Building 325.
Grade-level stairs:	Cast in place concrete stairs exist at Buildings 275 and 325.
Handrails:	Painted steel handrails.

Survey Condition and Analysis

Walkways at Buildings 275 and 325 appeared to be in good overall condition. Routine maintenance is anticipated during the evaluation period.

Several cracks were noted at the sidewalk of Building 195. The cracks do not appear to be a tripping hazard at this time; although, repair of the cracks is recommended early in the evaluation period. See Table 2 for an opinion of cost.

Handrails are in generally good condition. Routine maintenance is anticipated during the evaluation period.

3.6 Fences, Gates, Walls

Item	Description
Fences:	None present
Gates:	None present
Walls:	A low concrete masonry wall is provided along the south side of Building 195.

Survey Condition and Analysis

Observed sections of the wall appeared to be in good condition. Routine maintenance is anticipated during the evaluation period.

3.7 Exterior Lighting

Item	Description
Fixtures:	Exterior façade and pole mounted HID light fixtures.
Location:	Site lighting is located throughout the parking areas and property perimeters. Light fixtures surface-mounted to the buildings.

Survey Condition and Analysis

Periodic installation of replacement bulbs and/or fixtures can be conducted on an as-needed basis as part of routine maintenance.

3.8 Signage

Item	Description
Sign type:	Painted metal building address signage. Stone masonry monument sign with façade mounted metal letters. Painted wood directional signage.
Sign location:	Signs are mounted to the exterior facades. The monument sign is located at the west vehicular entrance drive. Directional signage is provided to guide visitors to each building.
Sign lighting:	None noted.
Address indicators:	Painted metal address indication signs were observed at all building entrances.
Tenant-specific signage:	Façade mounted illuminated signs and vinyl adhered numerals and letters.

Survey Condition and Analysis

No significant issues noted. Sign painting or replacement can be conducted on an as-needed basis as part of routine maintenance.

3.9 Refuse Transfer Areas

Item	Description
Location:	West of Building 195 and 325.
Collection device:	Dumpster
Enclosure:	Concrete masonry walls with a chain link gate.

Survey Condition and Analysis

No significant issues noted. Maintenance and replacement of the dumpster is the contractor's responsibility.

3.10 Additional Site Improvements or Amenities

Item	Description
Type:	Seating areas, ponds and fountains.
Location:	Seating areas exist south of Building 325. Fountains exist throughout the property.

Survey Condition and Analysis

No significant issues noted. Maintenance or replacement of the site amenities can be conducted on an as-needed basis as part of routine maintenance.

3.11 Utility Service

Utility	Provider	
Domestic water:	City of Thousand Oaks	Water service is provided from East Hillcrest Drive. A backflow preventer is provided at the southeast of Building 275.
Sanitary sewer:	City of Thousand Oaks	Sanitary Sewer service is provided from East Hillcrest Drive.
Electric:	Southern California Edison	Utility-owned transformers are located between Buildings 275 and 325 and at the east side of Building 195. Service is provided below grade to the main electrical rooms located within each of the buildings.
Natural gas:	The Gas Company	Natural gas is provided through a gas meter located at the exteriors of Building 275 and 325. Building 195 is not provided with gas.

Survey Condition and Analysis

No significant issues noted. Provided services are reported to be adequate.

4.0 BUILDING STRUCTURE

4.1 Foundation/Substructure

Item	Description
Type:	Individual spread footings at columns, continuous spread footings at walls.

Survey Condition and Analysis

No significant issues noted or anticipated, however, the foundations should be monitored for signs of deterioration and/or failure during the evaluation period.

4.2 Superstructure

Item	Description
Walls:	Building 195: Wood framed. Building 275 and 325: Steel beams and columns and wood frame.
Floor decking:	Plywood
Roof decking:	Plywood

Survey Condition and Analysis

No significant issues noted, the structural components should be monitored for signs of deterioration and/or failure during the evaluation period.

5.0 EXTERIOR ENVELOPE

5.1 Roofing

Structure or Section	Roof Type	Roof Area	Installation Date	Warranty
Building 195	Single ply and clay tile	10,000 (approximate)	2008/09 (approximate)	Not provided
Building 275	Single Ply, asphalt shingles at parapet walls, and clay tile	24,000 (approximate)	2008/09 (approximate)	Not provided
Building 325	Single ply and clay tile	26,000 (approximate)	2008/09 (approximate)	Not provided

Item	Description
Type:	Pitched roofs are covered with clay tiles. Low sloping roofs are covered with a single ply membrane. Parapet walls on Building 275 are covered with asphalt shingles.
Installation date:	Reportedly 2008/09 (approximate).
Approximate area:	60,000 sf.
Warranty:	Not provided.
Parapets:	8’ (approximate).
Flashing:	Sheet metal counter flashing, parapet cap, and termination bars.
Drainage:	Gradual slopes to internal roof drains and leaders.
Roof-mounted items:	Equipment curbs, satellite dishes.
Expansion joints	None present.

Survey Condition and Analysis

Roofing of all three buildings was reportedly replaced in approximately 2008 or 2009. Observed roofing areas appeared to be in good overall condition. However, stains were noted around the drains and debris from trees have gathered at the drains. In addition, soiled clay roof tiles are causing streaks on the exterior facades of all buildings. Debris should be removed and the clay

tiles should be cleaned as an immediate repair work item. See Table 1 for an opinion of cost. Otherwise, routine maintenance is anticipated during the evaluation period.

Based on the age of the asphalt shingles at the parapet walls of Building 275, replacement is anticipated during the evaluation period. A cost is included in Table 2.

Routine maintenance of the single-ply roofs is anticipated during the evaluation period.

No significant parapet or flashing issues were noted. Drainage issues were not observed. Routine maintenance is anticipated during the evaluation period.

5.2 Exterior Walls, Windows, and Doors

Item	Description
Wall structure :	Buildings 275 and 325: Stucco and brick masonry cladding, dark anodized aluminum frame windows, column cladding at building corners. Building 195: Stucco, brick masonry cladding, and wood panels and trim.
Wall finishes:	Painted or stained.
Windows:	Single pane, tinted, dark anodized aluminum ribbon windows.
Doors:	Buildings 275 and 325: Full-pane storefront system with secured opening. Building 195: Solid wood doors set in wooden frames with glazing at the top half.
Sealants:	Flexible sealants and gaskets.

Survey Condition and Analysis

For the walls areas that were observed, no significant wall structure issues were noted. Repainting of exterior painted surfaces should be completed in the early evaluation period and every five years thereafter. However, this work is considered to be voluntary and cosmetic. Therefore, no costs for this work are included in the cost tables.

Observed windows appeared to be in good condition. Only reported cracks were due to birds flying into the windows and cracking the glazing. The glazing for these windows have been replaced. Loose gaskets were observed at various locations, which should be replaced as part of routine maintenance. Several windows at Building 275 have been wet sealed. Other than poor workmanship, the wet seal appeared to be in good condition. Based on age, window sealant replacements can be anticipated during the evaluation period. See Table 2 for an opinion of cost.

The elevator equipment room door and frame at Building 325 is corroding at the base. This door should be scraped of rust and repainted. This can be completed under routine maintenance.

Aluminum cladding at the corner columns of Buildings 275 and 325 were observed to be chalking and pitted at select locations. This cladding should be refinished, although due to the isolated locations, it can be completed as part of routine maintenance.

The walls on the north side of Building 195 are stained and causing organic growth below the through wall drain outlets. These drains should be extended to discharge at grade to prevent staining of the exterior wall. Stains should be cleaned prior to repainting. A cost has been included in Table 1.

Observed doors appeared to be in good condition. At the time of our visit, the after-hours security operator was being repaired at Building 275. Routine maintenance is anticipated during the evaluation period.

Sealant was observed to be in good condition. Small holes were noted at the soffits of Building 195 which should be sealed. This can be completed as part of routine maintenance. Routine maintenance is anticipated during the evaluation period.

5.3 Stairs, Balconies, Fire Escapes and Terraces

Item	Description
Interior stairs:	Buildings 275 and 325: Three sets of interior egress stairs are provided at the two building ends and at the center of each building. Stair enclosures are constructed of painted gypsum board. Painted wood handrails are provided. Building 195: None present
Exterior stairs:	Buildings 275 and 325: Cast in place concrete exterior stairs are provided on the south side of Building 325 and on the north side of Building 275. Painted steel handrails are provided at each stair. Building 195: Stained wood stairs with wood handrails are provided on the north side of the building at the secondary egress door to the tenant suites.
Balconies:	None present
Fire escapes:	None present
Terraces:	None present

Survey Condition and Analysis

No significant stair issues were noted concerning the concrete stairs. Routine maintenance is anticipated during the evaluation period. Minor damage to treads and nosings was observed, and should be repaired. Due to the limited scope and low estimated cost, these issues can be addressed as part of routine maintenance.

The wood framed stairs at Building 195 were noted to be in fair condition, and should be repaired where damaged. Upon completion of the repair work, the stairs need to be re-stained. A cost has been included in Table 2.

Handrails at the ramp on the north side of Building 325 are core drilled and the recessed are accumulating water causing corrosion at the base of the guardrail. These recesses should be filled to prevent water accumulation. This can be completed as part of routine maintenance.

6.0 MECHANICAL AND ELECTRICAL SYSTEMS

6.1 Heating, Ventilation and Air Conditioning

Item	Description
Heating system:	Building 275 and 325: Heating is provided by a rooftop mounted package HVAC unit. A roof mounted boiler provides hot water for the heating coils of the HVAC unit. Building 195 is heated by 10 rooftop package HVAC units.
Cooling system:	Building 275 ad 325: Cooling is provided by a combination of York and Trane rooftop package HVAC units. Smaller tenant-owned condensers components of a split HVAC system are also roof mounted. Building 195: Cooling is provided by rooftop mounted package HVAC units
Ventilation system:	Restrooms are vented at the roof level by exhaust fans.
Temperature control:	Temperature is controlled by local thermostats located within the tenant spaces and along the common area corridors.

Survey Condition and Analysis

Seven of the ten rooftop HVAC units serving Building 195 are original to the building. The other three were reportedly installed in 2009, 2014 and 2015. Based on age, EUL and observation condition, replacement of the seven older units is anticipated during the evaluation period. An opinion of cost is included in Table 2.

Rooftop units at Building 275 and 325 are approximately six or seven years old. Based on age, EUL and observed condition, replacement is not anticipated during the evaluation period. Routine maintenance is anticipated during the evaluation period.

Based on the nameplate, boilers are approximately seven years old and appear to be in good condition. With routine maintenance, the boilers should last beyond the evaluation period.

No significant ventilation system issues were noted. Routine maintenance is anticipated during the evaluation period. Temperature Control systems appear to be in good condition.

6.2 Domestic Water and Sewer Systems

Item	Description
General description:	Domestic water service is provided off of Hillcrest Drive at the southwest corner of Building 275. The plumbing system serves building restrooms and tenant-specific plumbing needs.
Hot water:	Domestic hot water is provided by small electric water heaters located within parapet voids, and reportedly within individual tenant spaces.
Piping:	Domestic water piping is copper. Sanitary piping was observed to be cast iron; although, plastic piping is also reportedly provided.

Item	Description
Backflow prevention:	Backflow preventers are supplied on the domestic water system and irrigation system.

Survey Condition and Analysis

No significant issues were noted. Routine maintenance is anticipated during the evaluation period.

Routine maintenance of the backflow prevention system is anticipated during the evaluation period.

6.3 Electrical Supply and Gas Distribution

Item	Description
Transformer type and location:	Pad mounted utility-owned transformers are located on the east side of Building 195 and between Buildings 275 and 325 on the east side.
Provided voltage:	Building 195: 120/208 volt, 3 phase, 4 wire Building 275 and 325: 277/480, 3 phase, 4 wire
Provided amperage:	Building 195: 600 Building 275: 800 Building 325: 1,200
Observed wiring:	Copper branch wiring
Emergency power:	None provided
Lighting systems:	In general, lighting within tenant spaces is provided by the tenant and varies from fluorescent troffer lights to architectural strip lights. Fluorescent lights are used for general illumination within service/exit corridors. Recessed incandescent can lights are used in the lobby areas. Pole-mounted and façade mounted HID lights illuminate the property exteriors and parking areas.
System overload protection:	Circuit breakers.
Ground-fault protection:	GFCI outlets were noted in the restrooms adjacent to the sinks.
Gas supply:	Gas service is provided from the south side of Building 275 and north side of Building 325. No gas is provided at Building 195.
Gas piping:	Galvanized steel.

Survey Condition and Analysis

Electric service appeared to be in good condition and appears to be adequate for the building's needs. No significant issues were noted with the wiring or protective devices. Infrared scan was recently performed. However, the results of the scan was not provided. Periodic infrared scans is

recommended during the evaluation period as a routine maintenance work item. Otherwise routine maintenance is anticipated during the evaluation period.

The building's interior lighting systems appeared to be in good condition, and are typically the responsibility of the tenant. Exterior lighting also appeared to be in good condition, with routine maintenance is anticipated during the evaluation period.

No significant issues were observed with the building's gas distribution system. Routine maintenance is anticipated during the evaluation period.

6.4 Vertical Conveyances

Item	Description
Elevators:	There are two hydraulic passenger elevators; one in Building 275 and one in Building 325. The passenger elevators are rated at 2,150 and 2,500 pounds, respectively. Elevator machine rooms are located at the lower level adjacent to the elevator shafts. No elevators are present at Building 195.
Escalators:	None present.
Inspections and testing:	October and September 2014.
Maintenance records:	Reportedly, the elevators are regularly maintained by Republic Elevator Company. A service log was noted in the elevator machine room. The last service date was noted as 2015 with no month or date provided.

Survey Condition and Analysis

Elevators are maintained by an outside contractor, and appeared to be in good operating condition. The elevators are original to the building and based on their age and Partner's conservative estimate, a full modernization is recommended during the evaluation period. This will including replacing the pump tank, control valve, and pump and motor. An opinion of cost is included in Table 2.

6.5 Life Safety Systems

Item	Description
Fire sprinkler systems:	None present
Fire pumps:	None present
Emergency lighting/signage	Emergency lighting is provided within tenant areas, corridors and stairwells.
Stairwell pressurization	None present

Item	Description
Smoke management	Fusible link-actuated rated doors in corridors
Water storage:	None present
Fire alarm system:	Smoke alarms are provided in the common area corridors and tenant suites.
Security systems:	Camera monitoring system is provided. After hours door alarms and secured entry is provided. The cameras are monitored off-site.
Fire extinguishers:	Handheld fire extinguishers are located in cabinets along corridors and within tenant suites.

Survey Condition and Analysis

Smoke alarm and security systems appeared to be operational with no significant issues noted. Routine maintenance is anticipated during the evaluation period.

7.0 INTERIOR ELEMENTS

7.1 Common Areas

Item	Description
Type and location:	Double-loaded corridors, restrooms, and elevator lobbies at Building 275 and 325.
Flooring:	Carpeted corridors, durable tile in lobbies.
Wall & Ceiling Finishes:	Fabric wall covering. Suspended acoustical ceiling panels.
Furnishings:	None present
Restrooms	Two restrooms per floor; with tile finished flooring and walls. The restrooms are of the multi-user type.

Survey Condition and Analysis

Normal wear and tear of common area carpets was observed. Replacement of flooring and wall finishes is anticipated during the evaluation period. However, this work is considered to be voluntary and cosmetic. Therefore, no costs for this work are included in the cost tables.

No significant interior finish issues were observed. Wall painting is anticipated during the evaluation period. However, this work is considered to be voluntary and cosmetic. Therefore, no costs for this work are included in the cost tables.

Common area restrooms are in good condition. Repainting of walls and ceilings is anticipated during the evaluation period. However, this work is considered to be voluntary and cosmetic. Therefore, no costs for this work are included in the cost tables.

7.2 Tenant Areas

Item	Description
Offices:	Offices are accessed from the common area corridors running along ground and second floors of Buildings 275 and 325. Tenants are accessed from the exterior grade at Building 195. Finishes vary; although, generally include painted gypsum board walls, carpeted flooring, and acoustical ceiling panels.
Full floor tenant lobbies:	None present
Restrooms:	Restrooms are provided within tenant suites at Building 195. Restroom finishes vary; although, generally consist of ceramic tiled floors, and wainscot walls, and painted gypsum board ceilings. Restrooms are typically single user restrooms.
Warehouse:	None present

Item	Description
Showroom:	None present.

Survey Condition and Analysis

Interior finishes within tenant spaces are the responsibility of the tenant, as such no costs are included in this report.

8.0 CODE REVIEW

Item	Description
Code classification:	According to information provided on the building permits, the project was constructed under Community Shopping Center Zoning. General construction is V-N for the three buildings.
Certificates of Occupancy / Building Permits:	The following building permits have been made available. Building 195: Dated April 28, 1982 Buildings 275 and 325: Dated November 16, 1981

9.0 AMERICANS WITH DISABILITIES ACT COMPLIANCE

Item	Description
General discussion	The Americans with Disabilities Act (ADA) of 1990 prohibits discrimination against people with disabilities in employment, transportation, public accommodation, communications, and governmental activities. Title III of the ADA covers the private sector. It requires that a wide range of public accommodations in the private sector remove physical, communications and procedural barriers to access by people with disabilities. Title III addresses the widespread exclusion of people with disabilities from the routine activities of everyday life which most Americans take for granted. Title III covers sales, rental and service establishments, as well as educational institutions, recreation facilities and service centers. Buildings 275 and 325, based on the operations observed, do not appear to fall into the category of a "public accommodation", and are considered to be in the category of "commercial facility". Therefore, retroactive compliance with ADA is not mandatory for the site, unless alterations are made, or the use of the subject property changes to that which is classified as a "public accommodation". Building 195 appears to fall in the category of "public accommodation" and is required to remove barriers where it is readily achievable to do so.
Exterior routes:	An accessible route is not provided from the public right of way to the buildings. Designated accessible routes are provided from parking spaces and between tenant spaces.
Ramps:	A ramp is provided on the north side of Building 325. Painted metal handrails are provided.
Doorways:	Doorways are typically single or double leaf and provide a minimum clear opening of 32".
Alarm systems:	Horns and strobes were not noted in the corridors or restrooms.
Restrooms:	Common area restrooms are provided on each floor with a set of men's and women's at Buildings 275 and 325. Building 195 does not have common area restrooms.
Elevators:	Elevators are provided in Buildings 275 and 325. Elevators are equipped with push button cab controls, jamb signage, braille lettering, and audile and visible signals.
Interior circulation:	An accessible route is provided throughout the buildings.

Survey Condition and Analysis

A designated accessible route is not provided from the public right of way to the buildings. As Building 195 is a public accommodation, an accessible route should be constructed from the public right of way. An opinion of cost is included in Table 1.

The fire extinguishers at Building 195 protrude into the designated accessible route along the front sidewalk. These fire extinguishers should be relocated or installed in recessed cabinets. This can be completed as part of building operations and maintenance; therefore, no cost is included.

Curbing is damaged creating an uneven slope along accessible route leading to Building 325, north side. Curbing should be repaired. An opinion of cost is included in Table 1.

Doorway widths, hardware and push-pull pressures appear to meet ADA requirements.

There are currently no audible and visible alarms in the common areas. Audible visible alarms should be installed if there be an alteration or tenant improvement that triggers compliance. No cost has been included for this work item.

Tenant signage in the common area corridors of Buildings 275 and 325 are mounted too high. Signage should be lowered if there is an alteration or tenant improvement that triggers compliance. No cost has been included for this item.

The flush valve in the designated accessible restroom stalls at Buildings 275 and 325 were noted to be on the wrong side of the toilet. The flush control valve should be relocated if there is an alteration or tenant improvement that triggers compliance.

Missing van accessible parking pole signage was noted at the designated van accessible spaces. Van signage should be provided as an Immediate Repair work item. See Table 1 for an opinion of cost.

There is no curb ramp to provide an accessible route from the designated accessible parking space at Building 195 to the entrances. A curb ramp should be constructed. An opinion of cost is included in Table 1.

There was no audible sound at the elevator of Building 325 at the time of our visit. An audible sound should be installed if there be an alteration or tenant improvement that triggers compliance.

10.0 NATURAL HAZARD INFORMATION

Item	Description
General Discussion	Partner reviewed readily-available materials to obtain the following information. Determination of site-specific conditions is not within the scope of this report and may require additional investigation. Seismic zone classification is interpreted from the Seismic Zone Map, published in the Uniform Building Code 1997, Volume 2, Table 16.2.
Flood Map:	Community Panel Number 06111C0986E, dated January 20, 2010
Flood Zone:	Zone AE – Special flood hazard areas subject to inundation by the 1% annual chance flood and Zone X – Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.
Seismic Zone:	Partner performed a review of the seismic zone map, published in the Uniform Building Code 1997, Volume 2, Table 16.2. According to the map, the subject property appears to be located in Seismic Zone 4, an area with a high probability of damaging ground motion.
Wind Zone:	Partner performed a review of the Wind Zone Map, published by the Federal Emergency Management Agency. According to the map, the subject property appears to be located in Wind Zone I an area with design winds speeds up to 130 miles per hour. The subject property does not appear to be located in a special wind region.

11.0 PURPOSE AND SCOPE

11.1 Purpose

The purpose of this property condition assessment (PCA) is evaluating the general overall physical condition of the subject property and to observe and document readily-visible material and building system defects that might significantly affect the value of the subject property, and determine if conditions exist which may have a significant impact on the continued operation of the facility during the evaluation period.

11.2 User Reliance

Partner was engaged by SIMA Corporation (the Client) to perform this assessment. The engagement agreement specifically states the scope and purpose of the assessment, as well as the contractual obligations and limitations of both parties. This report and the information therein, are for the exclusive use of the Client. This report has no other purpose and may not be relied upon, or used, by any other person or entity without the written consent of Partner. Third parties that obtain this report, or the information therein, shall have no rights of recourse or recovery against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, the Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this report shall constitute acceptance of, and commitment to, these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

11.3 Scope of Work

This assessment was performed in general conformance with the scope and limitations as set forth by ASTM E2018-08 "Standard Guide for Property Condition Assessments: Baseline Property Condition Assessment Process" (the Standard) and as specified in the agreed contract that initiated this work.

This assessment was performed utilizing methods and procedures consistent with good commercial or customary practices designed to conform to acceptable industry standards. The independent conclusions represent Partner's best professional judgment based upon existing conditions and the information and data available to us during the course of this assignment.

11.4 Out of Scope Considerations

- *Utilities:* Operating conditions of any systems or accessing manholes or utility pits.
- *Structural Frame and Building Envelope:* Entering of crawl or confined space areas (however, the field observer should observe conditions to the extent easily visible from the point of access to the crawl or confined space areas), determination of previous substructure flooding or water penetration unless easily visible or if such information is provided.
- *Roofs:* Walking on pitched roofs, or any roof areas that appear to be unsafe, or roofs with no built-in access, or determining any roofing design criteria.

- *Plumbing:* Determining adequate pressure and flow rate, fixture unit values and counts, verifying pipe sizes, or verifying the point of discharge for underground systems.
- *Heating:* Observation of flue connections, interiors of chimneys, flues or boiler stacks, or tenant owned or *maintained* equipment.
- *Air conditioning & Ventilation:* Process-related equipment or condition of tenant owned/ maintained equipment.
- *Electrical:* Removing of electrical panel and device covers, except if removed by building staff, EMF issues, electrical testing, or operating any electrical devices. Process related equipment or tenant-owned equipment.
- *Vertical Transportation:* Examining of cables, sheaves, controllers, motors, inspection tags, or entering elevator/ escalator pits or shafts.
- *Life Safety/ Fire Protection:* Determining *NFPA* hazard classifications, classifying, or testing fire rating of assemblies.
- *Interior Elements:* Operating appliances or fixtures, determining or reporting STC (Sound Transmission Class) ratings, and flammability issues/regulations.
- *Activity Exclusions*- These activities listed below generally are excluded from or otherwise represent limitations to the scope of a PCA prepared in accordance with this guide (ASTM 2018-08). These should not be construed as all-inclusive or imply that any exclusion not specifically identified is a PCA requirement under this guide.
    - Removing or relocating materials, furniture, storage containers, personal effects, debris material or finishes that obstruct access or visibility;
    - Conducting exploratory probing or testing of materials, dismantling or operating of equipment or appliances;
    - Preparing engineering calculations to determine any system's, component's or equipment's adequacy or compliance with any specific or commonly accepted design requirements or building codes, or preparing designs or specifications to remedy any physical deficiencies;
    - Taking measurements or quantities to establish or confirm any information provided by the owner or user;
    - Reporting on the presence or absence of pests or insects unless evidence of such presence is readily apparent during the field observer's walk-through survey or such information is provided to the consultant;
    - Reporting on the condition of subterranean or concealed conditions as well as items or systems that are not permanently installed or are tenant-owned and maintained;
    - Entering or accessing any area deemed by the field observer to pose a threat to the safety of any individual or to the integrity of any building system or material;
    - Providing an opinion on the operation of any system or component that is shut down as the field observer will not operate any system or piece of equipment;

- Evaluating any acoustical or insulating characteristics;
- Providing an opinion on matters regarding security and protection of occupants or users from unauthorized access;
- Operating or witnessing the operation of lighting or any other system controlled by a timer, operated by the maintenance staff or operated by service companies;
- Providing an environmental assessment or opinion on the presence of any environmental issues such as asbestos, hazardous wastes, toxic materials, the location and presence of designated wetlands, IAQ, etc. unless specifically defined within the agreed scope.

11.5 Cost Evaluation Methodology

Estimates are based on construction costs developed by construction resources such as Marshall & Swift, RS Means, Partner's experience with past costs for similar projects, city cost indexes, consulting with local specialty contractors, client provided information, and assumptions regarding future economic conditions. Actual costs may differ from Partner's opinions. Actual cost estimates are determined by many factors including but not limited to: choice and availability of materials, choice and availability of a qualified contractor, regional climate zone, quality of existing materials, site compatibility, and access to the subject property and buildings. Opinion of costs are based solely on material replacement and do not account for soft costs.

Items included in the replacement reserve table are determined based upon the estimated useful life (EUL) of a system or component, the apparent effective age (EA) of the system, and the remaining useful life (RUL) of that system. Factors that may affect the age and condition of a system include, but are not limited to, the frequency of use, exposure to environmental elements, quality of construction and installation, and amount of maintenance provided. Based on these factors, a system may have an effective age that is greater or less than its actual chronological age.

11.6 Descriptive Qualifiers

The following definitions and terminology are used in this report regarding the physical condition of the project, and the estimated life expectancies/age of the components and systems.

Excellent	New or like new condition.
Good	Well maintained, may exceed expected useful life. No immediate or potential concerns.
Average	Satisfactory, some signs of wear and possible minor immediate repairs. Component/s condition consistent with their expected useful life.
Fair	Marginally satisfactory. Some immediate repairs required. Components/Systems at or near the end of their useful life.
Poor	Immediate concerns, major replacements, and/or significant attention required.

Unless stated otherwise in this report, the systems reviewed are considered to be in good condition and their performance appears to be satisfactory.

11.7 Deviation from ASTM E2018-08

Deviations from the baseline assessment established by the Standard should be identified in the PCR. The deviations listed below are part of the Partner standard operating procedures or were specified in the Client's scope of work.

- The Standard establishes that opinions of probable costs that are either individually or in the aggregate less than a threshold amount of $3,000 for like items are to be omitted from the PCR. Partner includes items above a threshold of $1,000 in order to present a more comprehensive report.
- This PCR includes wind and seismic zone information that is not required by the Standard.
- This PCR includes an opinion of costs for anticipated capital expenditures for an evaluation period defined by the Client. The costs are presented in Table 2 – Capital Replacement Reserve Cost Opinion.

12.0 LIMITATIONS

The assessment performed by Partner is based upon the guidelines set forth by the ASTM Standard current to the issuance of this report and subject to the limitations stated therein. Our review of the subject property consisted of a visual assessment of the site, the structure(s) and the accessible interior spaces. Any technical analyses made are based on the appearance of the improvements at the time of this assessment and the evaluator's judgment of the physical condition of the subject property components, their ages and their expected useful life (EUL).

Information regarding the subject property is obtained from a site walk-through survey, local government agency records review, interviews and client-, tenant- or property owner-provided documents. No material sampling, invasive or destructive investigations, equipment or system testing was performed. The observations and related comments within this report are limited in nature and should not be inferred as a full and comprehensive survey of the building components and systems.

Information regarding operations, conditions, and test data provided by the Client, property owner, or their respective representatives has been assumed to be factual and complete. Information obtained from readily-available sources, including internet research and interview of municipal officials or representatives is assumed to be factual and complete. No warranty is expressed or implied, except that the services rendered have been performed in accordance with generally-accepted practices applicable at the time and location of the study

The actual performance of systems and components may vary from a reasonably expected standard and will be affected by circumstances that occur after the date of the evaluation. Partner's assessments, analyses and opinions expressed within this report are not representations regarding either the design integrity or the structural soundness of the project.

The report does not identify minor, inexpensive repairs or maintenance items, which are clearly part of the subject property owner's current operating budget so long as these items appear to be addressed on a regular basis. The report does identify infrequently occurring maintenance items of significant cost, such as exterior painting, roofing, deferred maintenance and repairs and replacements that normally involve major expense or outside contracting.

The assessment of the roof, façade and substructure contained herein cannot specifically state that these items are free of leaks and/or water intrusion and should not be interpreted as such. Comments made with respect to the condition of the systems are limited to visual observation and information provided by the designated site contacts and/or on-site representatives and their contractors/vendors. The evaluation of these systems did not include any sampling and/or testing. A more extensive evaluation may be required if a comprehensive report on the condition of these systems is required.

Performance of a comprehensive building, fire or zoning code review is outside of the scope of work for this PCR. Information provided within this report is based on readily-available information or interview of municipal officials.

ADA Exclusion

This PCR is not a comprehensive Americans with Disabilities Act review. Partner performed visual observations of the accessible parking spaces, accessible routes to building entrances, and

interior publicly-accessible areas; tenant areas are excluded. No measurements or counts were taken. This PCR does not present an audit of all components specified in federal, state or local accessibility regulations. Instead, this review noted general design components such as routes of travel, door hardware, plumbing amenities, elevator controls and signals, basic emergency alarm components and signage.

Subject: Phase I Environmental Site Assessment
Stone Creek Professional Offices
195, 275, and 325 East Hillcrest Drive
Thousand Oaks, California 91360
Partner Project No. 22-365517.1

Dear Mr. Burnes:

Partner Engineering and Science, Inc. (Partner) is pleased to provide this *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 and E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at 619-925-9672 or MLambson@partneresi.com.

Sincerely,

Mark Lambson

Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13 and E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by 501 Thousand Oaks, LLC for the property located at 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, Ventura County, California (the "subject property").

Property Description

The subject property is located on the north side of East Hillcrest Drive and approximately 540 feet east of North Moorpark Road within a mixed commercial and residential area of Ventura County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address(es):	195, 275, and 325 East Hillcrest Drive, Thousand Oaks, California
Property Use:	Office
Land Acreage (Ac):	8.22 Ac
Number of Buildings:	3
Number of Floors:	Two buildings with two floors (275, 325 East Hillcrest Drive) and one building with one floor (195 East Hillcrest Drive)
Gross Building Area (SF):	108,635 SF (Total)
Date of Construction:	1981, 1982
Assessor's Parcel Number (APN):	669-0-021-255
Type of Construction:	Brick/Wood-framed
Current Tenants:	Office tenants: Travel Agencies, Home Care Services, Massage Spas, Accounting Agencies, Mortgage Companies, Property Management Companies, Primary Care Doctors, Insurance Services
Site Assessment Performed By:	Courtney Dumas of Partner
Site Assessment Conducted On:	April 14, 2022
Regulatory Radius Report Date:	April 6, 2022
Lien Search Date:	NA
Report Date:	April 25, 2022
FOIAs Date:	April 2022

The subject property is currently occupied by office and administrative tenants for commercial use. Onsite operations consist of offices and commercial suites. In addition to the current structures, the subject property is improved with paved parking areas and associated landscaping.

According to available historical sources, the subject property was formerly undeveloped as early as 1900; developed with agricultural land between 1947 and circa 1967; was unimproved land from 1976 to 1980; and developed with the current structures in 1981 and 1982.

Tenants on the subject property have included various commercial uses (1985-Present) including, but not limited to, mortgage/financial companies, attorneys/law offices, insurance agencies, loan services, travel services, computer services, CPAs, banks, development companies, real estate services, and dentists.

The adjoining properties are tabulated below:

Adjoining Properties	
North:	Atria Hillcrest Retirement Community (405 Hodencamp Road) and a multi-tenant residential building (270 Brazil Street)
Northeast:	Eaves Thousand Oaks Apartments (351 Hodencamp Road)
East:	Kaiser Permanente Medical Center (365 East Hillcrest Drive)
Southeast:	East Hillcrest Drive beyond which is a multi-tenant residential building (350, 360, 380 East Hillcrest Drive)
South:	East Hillcrest Drive beyond which are multi-tenant residential buildings (220, 230, 250, 270, and 290 East Hillcrest Drive)
Southwest:	East Hillcrest Drive beyond which is the Hillcrest Royale Retirement facility (190 East Hillcrest Drive) and a multi-tenant commercial building (80 East Hillcrest Drive)
West:	Lang Creek drainage canal beyond which are Multi-tenant commercial buildings (25 East Hillcrest Drive; and 390 North Moorpark Road) and multi-family residential buildings (190 Brazil Street)
Northwest:	Lang Creek drainage canal beyond which are Multi-family residential buildings (130, 140, and 150 Brazil Street)

According to a previous subsurface investigation conducted on a nearby property (172 Moorpark Road; GeoTracker Case #T0611192874), the depth to groundwater in the vicinity of the subject property is approximately 20 feet below ground surface (bgs) and groundwater flow is toward the southwest.

Findings and Opinions

Recognized Environmental Condition

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A *controlled recognized environmental condition (CREC)* refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A *Business Environmental Risks (BER)* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, Ventura County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, BERs, CRECs, or HRECs in connection with the subject property; however, BERs were identified.

Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, Ventura County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13 and E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-13 and E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal

or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

501 Thousand Oaks, LLC engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of 501 Thousand Oaks, LLC. Either

verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13 and E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was unable to determine the property use at strict 5-year intervals, which constitutes a data gap. Information concerning historical use of the subject property was unavailable from 1900 to 1943, and 1957 to 1976. Except for recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner submitted Freedom of Information Act (FOIA) requests to Ventura County Fire Department (VCFD) and Ventura County Air Pollution Control District (VCAPCD) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjoining properties. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other resources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 10% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (office), this limited method of survey is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, California is located on the north side of East Hillcrest Drive and approximately 540 feet east of North Moorpark Road. According to the Ventura County Assessor, the subject property is legally described as Block 021 and Parcel 25. According to the Thousand Oaks Building Division, ownership is currently vested in 501 Thousand Oaks LLC since at least 2002.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by office and administrative tenants for commercial use. Onsite operations consist of offices and commercial suites. The subject property consists of one one-story building located on the southwest portion of the property and two, two-story buildings located on the central and north portions of the property. In addition to the current structures, the subject property is improved with paved parking areas and associated landscaping. The subject property is designated for residential, commercial development by the City of Thousand Oaks.

The subject property was identified as a Hazardous Waste Manifest (HAZNET) and Ventura County Hazardous Material Release site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjoining Properties

The subject property is located within a mixed commercial and residential area of Ventura County. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties as defined in ASTM E1527-13 and E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

Adjoining Properties	
North:	Atria Hillcrest Retirement Community (405 Hodencamp Road) and a multi-tenant residential building (270 Brazil Street)
Northeast:	Eaves Thousand Oaks Apartments (351 Hodencamp Road)
East:	Kaiser Permanente Medical Center (365 East Hillcrest Drive)
Southeast:	East Hillcrest Drive beyond which is a multi-tenant residential building (350, 360, 380 East Hillcrest Drive)
South:	East Hillcrest Drive beyond which are multi-tenant residential buildings (220, 230, 250, 270, and 290 East Hillcrest Drive)
Southwest:	East Hillcrest Drive beyond which is the Hillcrest Royale Retirement facility (190 East Hillcrest Drive) and a multi-tenant commercial building (80 East Hillcrest Drive)
West:	Lang Creek drainage canal beyond which are commercial buildings (25 East Hillcrest Dr; and 390 North Moorpark Rd) and multi-family residential buildings (190 Brazil St)
Northwest:	Lang Creek drainage canal beyond which are Multi-family residential buildings (130, 140, and 150 Brazil Street)

The adjoining property to the east is identified as a California Environmental Reporting System Hazardous Waste (CERS HAZ), Ventura County Certified Unified Program Agency (CUPA), Facility Registry Service/ Facility Index (FINDS/FRS), HAZNET, and Resource Conservation and Recovery Act (RCRA) Non-Generator site; the adjoining property to the southwest is identified as RCRA Non-Generator site; and the adjoining properties to the west are identified as CERS HAZ, Delisted County Records, HAZR Ventura, Ventura County CUPA, and RCRA Non-Generator sites in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The 2022 United States Geological Survey (USGS) *Thousand Oaks, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 740 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the south.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

While under natural and undisturbed conditions shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity. Topographic map interpretation suggests the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the southwest.

According to a previous subsurface investigation conducted on a nearby property (172 Moorpark Road; GeoTracker Case #T0611192874), the depth of groundwater in the vicinity of the subject property is approximately 20 feet below ground surface (bgs).

The nearest surface water to the subject property is the Lang Creek drainage canal located adjacent to the west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Thousand Oaks Department of Public Works serves the subject property vicinity. The sources of public water for Thousand Oaks are mainly imported water from Northern California through the Metropolitan Water District and a small quantity (2%) is from the Calleguas Lake Bard Water Filtration Facility and Reservoir.

2.4.3 Geology/Soils

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as the Sorrento silty clay loam. The Sorrento series consists of very deep, well drained, silty clay loam, with a moderately high permeability. These soils formed in alluvium and alluvial fan deposits derived from sedimentary rock of Quaternary age. Slopes range from 2 to 9 percent.

The subject property is situated within the Pacific Border Physiographic Province of the State of California. The shallow subsurface beneath the subject property consists of surficial alluvial sediments of Quaternary

age. The Quaternary alluvium comprises the underlying stratigraphy and consists mostly of clay, sand and gravel deposited in stream channel, point bar, and fluvial environments.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06111C0986E, dated January 20, 2010, the western portion of the subject property appears to be located in Zone AE, defined as areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. The eastern portion appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Years	**Resource**	**Description/Use**
1900-1943	Aerial Photographs, Topographic Maps	Unimproved land
1947-1967	Aerial Photographs, Topographic Maps	Agricultural land
1976-1980	Aerial Photographs, Topographic Maps	Unimproved land
1981	Building Records, Topographic Maps	Two structures present for commercial use
1982-Present	Aerial Photographs, Building Records, City Directories, Topographic Maps	Three structures and an outbuilding present for commercial use

Tenants on the subject property include various commercial uses (1985-Present) including, but not limited to, mortgage/financial companies, attorneys/law offices, insurance agencies, loan services, travel services, computer services, CPAs, banks, development companies, real estate services, and dentists. No potential environmental concerns were identified in association with the use of the subject property.

The subject property parcel was historically used for agricultural purposes. There is the potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by structures that minimize direct contact to any potential remaining contaminants in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the potential former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS). The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

Date: 1936		***Scale: 1"=500'***
Subject Property:	Undeveloped (grassland)	
North:	Undeveloped	
Northeast:	Undeveloped	
East:	Undeveloped	
Southeast:	Undeveloped	
South:	Undeveloped	
Southwest:	Undeveloped	
West:	Undeveloped	
Northwest:	Undeveloped	

Date: 1947, 1954, 1959	***Scale: 1"=500'***
Subject Property:	Agricultural land
North:	Undeveloped
Northeast	Undeveloped
East:	Agricultural land
Southeast	Agricultural land
South:	Agricultural land

Based on the city directory review, no environmentally sensitive listings were identified for the adjoining property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Risk Information Services (ERIS). The following inferred uses of the subject property and adjoining properties interpreted from topographic maps in Appendix B and are tabulated below:

Date: 1900, 1921, 1943, 1950, 1952	
Subject Property:	Unimproved land
North:	Unimproved land
Northeast:	Unimproved land
East:	Unimproved land
South:	Unimproved land
Southwest:	Unimproved land
West:	Unimproved land
Northwest:	Unimproved land

Date: 1967	
Subject Property:	No significant changes depicted
North:	Area is shade to represent urban development; no structures are depicted
Northeast:	No significant changes depicted
East:	No significant changes depicted
Southeast:	No significant changes depicted
South:	No significant changes depicted
Southwest:	No significant changes depicted
West:	Developed with a structure across the Lang Creek drainage canal
Northwest:	No significant changes depicted

Date: 1981	
Subject Property:	No significant changes depicted
North:	Two structures are depicted across the Lang Creek drainage canal
Northeast:	No significant changes depicted
East:	No significant changes depicted
Southeast:	No significant changes depicted
South:	No significant changes depicted
Southwest:	No significant changes depicted
West:	No significant changes depicted
Northwest:	No significant changes depicted

Date: 2015, 2018, 2021	
Subject Property:	Area is shade to represent urban development; no structures are depicted
North:	Area is shade to represent urban development; no structures are depicted
Northeast:	Area is shade to represent urban development; no structures are depicted
East:	Area is shade to represent urban development; no structures are depicted
Southeast:	Area is shade to represent urban development; no structures are depicted
South:	Area is shade to represent urban development; no structures are depicted
Southwest:	Area is shade to represent urban development; no structures are depicted
West:	Area is shade to represent urban development; no structures are depicted
Northwest:	Area is shade to represent urban development; no structures are depicted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Environmental Protection Agency (CalEPA)
Point of Contact:	Michelle Hutzel
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(916) 323-2515
Date of Contact:	April 21, 2022
Method of Communication:	Online

Summary of Communication:

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the CalEPA.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	County of Ventura Resource Management Agency (CVRMA)
Point of Contact:	Environmental Health Division
Agency Address:	800 South Victoria Avenue, Ventura, California
Agency Phone Number:	(805) 654-2494
Date of Contact:	April 21, 2022
Method of Communication:	Online

Summary of Communication:

According to records reviewed, an unknown amount of gasoline spill from a loose vehicle fuel line on September 27, 1994, in the parking lot at 275 East Hillcrest Drive. The spill was reported to the Ventura County Fire Department, who was dispatched to cleanup the spill with absorbent material.

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	Ventura County Fire Department (VCFD)
Point of Contact:	John Spykerman
Agency Address:	165 Durley Avenue, Camarillo, California
Agency Phone Number:	(805) 389-9710
Date of Contact:	April 21, 2022
Method of Communication:	Online

Summary of Communication:

As of the date of this report, Partner has not received a response from the VCFD for inclusion in this report.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Ventura County Air Pollution Control District (VCAPCD)
Point of Contact:	Nancy Mendoza
Agency Address:	4567 Telephone Road, 2nd Floor, Ventura, California
Agency Phone Number:	(805) 303-4005
Date of Contact:	April 21, 2022
Method of Communication:	Email

Summary of Communication:

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	Region 4 – Los Angeles
Agency Address:	320 West Fourth Street, Suite 200, Los Angeles, California
Agency Phone Number:	(213) 576-6600
Date of Contact:	April 22, 2022
Method of Communication:	Online

Summary of Communication:

No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	Daniel Knight
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(916) 323-7811
Date of Contact:	April 21, 2022
Method of Communication:	Online

Summary of Communication:

According to the Hazardous Waste Tracking System (HWTS) records reviewed, the subject property identified as Wesco Infrastructures Inc (195 East Hillcrest Drive) was reported to the agency for disposal of 2.75 tons of total organic solids in 2005. The subject property was also listed as active between 2006 and 2014 under Steven I Chin DDS (275 East Hillcrest Drive), but no wastes or quantities are reported. The subject property was not identified in the DTSC EnviroStor online database.

4.1.7 Building Department

Regulatory Agency Data	
Name of Agency:	Thousand Oaks Building Division (TOBD)
Point of Contact:	Building Permits
Agency Address:	2100 Thousand Oaks Boulevard, Thousand Oaks, California
Agency Phone Number:	(805) 449-2500
Date of Contact:	April 21, 2022
Method of Communication:	Online
Summary of Communication:	

Records were available for review, as further discussed in the following table.

Building Records Reviewed for 195, 275, and 325 East Hillcrest Drive (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
1981	Signature Thousand Oaks, LLC	New Building Permit for a two-story and 46,681 square foot office building (275 East Hillcrest)
1981	Thousand Oaks Financial Plaza	New Building Permit for a 50,595 square foot office building (325 East Hillcrest)
1982	Confederation Life Insurance Co	Building Permit for a 1,410 square foot build-out (275 East Hillcrest)
1982	Thousand Oaks Financial Plaza	New Building Permit for a one-story and 13,400 square foot office building (195 East Hillcrest)

4.1.8 Planning Department

Regulatory Agency Data	
Name of Agency:	Thousand Oaks Planning Division (TOPD)
Point of Contact:	General Plan
Agency Address:	2100 Thousand Oaks Boulevard, Thousand Oaks, California
Agency Phone Number:	(805) 449-2323
Date of Contact:	April 21, 2022
Method of Communication:	Online
Summary of Communication:	

According to records reviewed, the subject property is zoned for commercial development by the City of Thousand Oaks. Adjoining properties are zoned for commercial and residential development.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Geologic Energy Management Division (CalGEM)
Point of Contact:	Uduak-Joe Ntuk
Agency Address:	801 K Street, MS 24-01, Sacramento, California
Agency Phone Number:	(916) 445-9686
Date of Contact:	April 21, 2022
Method of Communication:	Online
Summary of Communication:	

According to CalGEM, no oil or gas wells are located on or adjoining to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Ventura County Assessor (VCA)
Point of Contact:	Dan Goodwin
Agency Address:	800 South Victoria Avenue, Ventura, California
Agency Phone Number:	(805) 654-2181
Date of Contact:	April 21, 2022
Method of Communication:	Online

Summary of Communication:

According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 669-0-021-255. The current buildings were constructed in 1983 and total approximately 108,635 square feet on an 8.22 acre lot. No records regarding property ownership were on file with the VCA.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

The regulatory database report provided by Environmental Risk Information Services (ERIS) documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM E1527-13 and E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources. The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

The following table lists the number of sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Radius Report Data

Database	AMSD Radius (mile)	Listings Identified		Surrounding Area Sites of Concern
		Subject Property	Adjoining Properties	
Federal NPL	1.00	N	N	N
Delisted NPL Site	0.50	N	N	N
Federal SEMS Site	0.50	N	N	N
Federal SEMS-ARCHIVE	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N

Radius Report Data

Database	AMSD Radius (mile)	Listings Identified		Surrounding Area Sites of Concern
		Subject Property	Adjoining Properties	
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	N	N	N/A
Federal IC/EC Registries	Subject Property	N	N/A	N/A
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	N	N	N/A
State/Tribal IC/EC Registries	Subject and Adjoining	N	N	N/A
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.125	**Y**	**Y**	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
State/Tribal Hazardous Waste Site (CERS HAZ, HAZNET)	0.125	**Y**	**Y**	N
Ventura County Certified Unified Program Agency (CUPA)	0.25	N	**Y**	N
Facility Registry Service/ Facility Index (FINDS/FRS)	Subject and Adjoining	N	**Y**	N/A
RCRA Non-Generator	0.25	N	**Y**	N

4.2.2 Subject Property Listings

The subject property is identified as a Hazardous Waste Manifest (HAZNET) and Ventura County Hazardous Material Release (HAZR Ventura) site in the regulatory database report, as discussed below:

- The subject property, identified as Steven I Chin DDS and Wesco Infrastructures Inc at 195, 275, and 325 East Hillcrest Drive, was included as a HAZNET listing for off-site disposal of other organic solids in 2005, as well as an active listing from 2006 to 2014, as discussed above in Section 4.1.6.

  The HAZR Ventura listings identifies a release of an unknown amount of gasoline from a loose vehicle fuel line on September 27, 1994, in the parking lot. A second HAZR Ventura listing identifies a release of less than 20 gallons of hydraulic fluid on October 14, 2005, which reportedly impacted soil only and did not enter the storm drain. Both spills were reported to the Ventura County Fire Department, who completed the cleanup. Based on the small quantity of these spills and the regulatory cleanup oversight, these listings are not expected to represent a significant environmental concern.

The ERIS report also identifies the VCFS #30 Ventura County Historic Leaking Underground Fuel Tank (HLUFT) site at the subject property; however, this facility is associated with the Fire Station located at 195 West Hillcrest Drive located approximately 0.60-miles northwest of the subject property. Therefore, this listing does not represent a significant environmental concern.

4.2.3 Adjoining Property Listings

The adjoining property to the east is identified as a California Environmental Reporting System Hazardous Waste (CERS HAZ), Ventura County Certified Unified Program Agency (CUPA), Facility Registry Service/ Facility Index (FINDS/FRS), HAZNET, and Resource Conservation and Recovery Act (RCRA) Non-Generator site in the regulatory database report, as discussed below:

- The property, identified as Kaiser Permanente at 365 East Hillcrest, is located adjoining to the east of the subject property. This property was listed in the HAZNET database due to off-site disposal of photochemicals/ photoprocessing waste from 1993 to 1994, other inorganic solid waste from 1994 to 1997, and metal sludge from 1995 to 1998.

  This facility is also listed in the CERS HAZ database as a hazardous waste generator and chemical storage facility. Compliance evaluation inspections were completed in 2017 and 2021 by the Ventura County Environmental Health, which identified violations related to improper recordkeeping, improper hazardous waste labeling, and emergency preparedness. The facility has since returned to compliance. The NAICS Code in the FINDS/FRS database is "general medical and surgical hospitals". In addition, the property was identified as a RCRA Non-Generator in 1993, but no wastes are reported.

  Based on the nature of this property as a medical facility, and the regulatory oversight, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjoining property to the southwest is identified as RCRA Non-Generator site in the regulatory database report, as discussed below:

- The property, identified as Community Conscience at 80 East Hillcrest Drive, is located adjoining southwest of the subject property. This property was listed as a RCRA Non-Generator in 2021. No wastes are listed and no violations are reported. Based on the Non-Generator status, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjoining property to the west is identified as a CERS HAZ, Delisted County Records, HAZR Ventura, and RCRA Non-Generator site in the regulatory database report, as discussed below:

- The property, identified as Agora Realty & Management, Office Depot #886, at 25 East Hillcrest Drive, is located adjoining to the west of the subject property. This facility is listed in the CERS HAZ database as a hazardous waste generator and chemical storage facility. Compliance evaluation inspections were completed in 2017, 2018, 2019, and 2021 by the Ventura County Environmental Health. A violation was reported in 2017 related to improper hazardous waste

manifest reporting. The facility has since returned to compliance, and the three subsequent inspections did not report any violations.

This facility was also listed in the HAZR Ventura due to a 500 gallon sewage release from root intrusion into a city wastewater line in June 2014. A city crew cleaned up the release and repaired the line with oversight by the Ventura County Environmental Health. A second HAZR Ventura listing was reported in February 1996 due to two gallons of gasoline that leaked from a vehicle in a parking lot. The Ventura County Fire Department oversaw the cleanup. The property was also identified as a RCRA Non-Generator in 2016 and 2021. No wastes or violations are reported in connection with the RCRA listings.

Based on the cleanup of the releases, the small quantity of petroleum released, and the regulatory oversight, these listings are not expected to represent a significant environmental concern.

The adjoining property to the west is identified as a Ventura County CUPA, HAZR Ventura, and Resource Conservation and Recovery Act (RCRA) Non-Generator site in the regulatory database report, as discussed below:

- The property, identified as Best Buy Store #112 at 390 North Moorpark Road, is located adjoining to the west of the subject property. This site reported a release six gallons of sewage from a blocked pipe in January 2016. The release was reported to the lead agency (Ventura Environmental Health) and was cleaned up by a city crew. The property was also identified as a RCRA Non-Generator in 2017. No wastes or violations are reported in connection with the RCRA listing. Based on the spill cleanup and Non-Generator status, this listing is not expected to represent a significant environmental concern.

The adjoining property to the west is identified as a RCRA Non-Generator site in the regulatory database report, as discussed below:

- The property, identified as Kone Elevator Florence Janss at 190 Brazil Street, is located adjoining west of the subject property. This property was listed as a RCRA Non-Generator in 2019. No wastes are listed and no violations are reported. Based on the Non-Generator status and lack of a reported a release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Surrounding Area Listings of Concern to Subject Property

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Unplottable Listings

No unplottable listings are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13 and E1527-21, Partner requested the following site information from 501 Thousand Oaks, LLC (User of this report).

User Responsibilities		
Item	**Provided By User**	**Not Provided By User**
AAI User Questionnaire		**X**
Title Records, Environmental Liens, and AULs		**X**
Specialized Knowledge		**X**
Actual Knowledge		**X**
Valuation Reduction for Environmental Issues		**X**
Identification of Key Site Manager	**X**	
Reason for Performing Phase I ESA	**X**	
Prior Environmental Reports		**X**
Other		**X**

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2002, identified as 501 Thousand Oaks LLC, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is not the owner, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Ms. Carmen Raymond, key site manager, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Ms. Raymond stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

5.1.4 Interviews with Past Owners, Operators, and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Courtney Dumas
Site Assessment Conducted On:	April 14, 2022

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 195, 275, and 325 East Hillcrest Drive (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Carmen Raymond	Key Site Manager /Facilities Manager	(805) 965-1616	No
Miguel Gongora	Maintenance Supervisor	(805) 558-6876	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located throughout the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Thousand Oaks services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

No septic systems were observed on the subject property during the Partner site reconnaissance.

6.1.3 Stormwater and Surface Water Drainage

Stormwater is removed from the subject property primarily by sheet flow action across the paved surfaces towards stormwater drains located throughout the subject property and in the public right of way. Site stormwater drains from roofs, landscaped areas, and paved areas and is directed to the public right of way, and to on-site stormwater drains. On-site stormwater drains discharge to a municipal owned and maintained storm sewer system.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison, and Southern California Gas.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Subject Property

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)-Containing Items

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance included observations of indoor and outdoor transformers and other hydraulic equipment that may contain PCBs as tabulated below:

Transformers and Hydraulic Equipment				
Type of Equipment	**Location**	**Number**	**PCB Containing**	**Concern**
Pad-Mounted Transformers	Various	2	Unknown	N
Hydraulic Elevators	Buildings 275 and 325	2	Unlikely	N

The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the age and good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Partner also identified two hydraulic elevators on the subject property. Based on the age and good condition of this equipment, the presence of this equipment is not expected to represent a significant environmental concern.

6.2.5 Strong, Pungent, or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps, and Clarifiers

No drains, sumps, or clarifiers, other than those associated with stormwater removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds, and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-Scope ASTM Considerations

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1981 and 1982. As such, an asbestos evaluation was not required by the Client's scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Ceiling Panels	Throughout Building Exterior	Yes	Good

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings, it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 1. Based upon the commercial nature of the subject property, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Thousand Oaks Department of Public Works serves the subject property vicinity. The sources of public water for the City of Thousand Oaks are mainly imported surface water from Northern California through the Metropolitan Water District and a small quantity (2%) is from the Calleguas Lake Bard Water Filtration Facility and Reservoir. According to the 2021 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.3.6 Wetlands

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property.

6.4 Adjoining Property Reconnaissance

The adjoining property reconnaissance consisted of observing the adjoining properties from the subject property premises. No items of environmental concern were identified on the adjoining properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

Potential for Vapor Encroachment to Impact the Subject Property	
Area of Concern	**Likely or Known VEC to Subject Property**
Subject Property Existing Operations or Conditions	None identified that impact the subject property.
Historical Uses of the Subject Property	None identified that impact the subject property.
Adjoining Property Operations or Existing Conditions	None identified that impact the subject property.
Historical Uses of Adjoining Properties or Nearby Properties	None identified that impact the subject property.
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD	None identified that impact the subject property.

Based on the findings of the limited non-intrusive vapor screening, vapor intrusion is unlikely to be an issue of concern in connection with the existing structures on the subject property. As such, no further assessment is recommended.

8.0 FINDINGS AND CONCLUSIONS

Findings and Opinions

Recognized Environmental Condition

A *recognized environmental condition (REC)* refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A *controlled recognized environmental condition (CREC)* refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A *historical recognized environmental condition (HREC)* refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A *Business Environmental Risks (BER)* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill

material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 of 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, Ventura County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, BERs, CRECs, or HRECs in connection with the subject property; however, BERs were identified.

Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 195, 275, and 325 East Hillcrest Drive in Thousand Oaks, Ventura County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel number and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and the most current publicly available date
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/22/2024 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 36 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 6 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 12 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 01/22/2024 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 168 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 01/26/2024 has revealed that there is 1 HWTS site within approximately 0.001 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 23 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 101 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
ALLIANCE GAS STATION	172 N MOORPARK RD	WSW 0 - 1/8 (0.094 mi.)	C23	112

MONGEON DONALD W	215 THOUSAND OAKS	SSW 0 - 1/8 (0.119 mi.)	E82	348

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist

EXECUTIVE SUMMARY

Cleaner site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MR CLEANER	386 MOORPARK ROAD	W 0 - 1/8 (0.113 mi.)	H79	345

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 2 records.

Site Name	Database(s)
LINCOLN OAKS CLEANERS	DRYCLEANERS, EMI
MOBIL OIL SS #11-GYO	LUST
