At the time of the April 20, 2021 Site reconnaissance, the Site comprised an approximate 11.1-acre area of the 21.98-acre parcel owned by KMS Industries, Inc (Figure 3). The Site was leased by Reiter Affiliated Companies for organic raspberry production. The Site contained (approximately) a 0.3-acre Residence, 0.25-acre Tenant Storage Yard, a 0.45-acre Junk Vehicle Storage Area, a 1.1-acre Farm Equipment Storage and Parking Area, and a 0.3-acre Farm Yard. The remaining 8.7 acres of the Site was occupied by areas of organic raspberry production with access roads. The Residence area contained an unmaintained swimming pool, yard, parking area and garage, and tool shed. The Junk Vehicle Storage Area contained approximately 30 junk vehicles. A trailer, motor home, two storage containers, utility truck, and vehicles were located in the Tenant Storage Area. The Farm Equipment Storage and Vehicle Parking Area contained agricultural equipment including fertilizer tanks, a storage container, shade structure parts, tarps, wood, and motorized equipment. The storage container contained various equipment including an air compressor, hoe shovel, pallet jack, hoses, and plastic trash containers, twenty-one 50 pound bags of "Ultra Fines" (a gypsum based agricultural product), a pallet of bags of citric acid anhydrous (an agricultural product), a folding table and chairs, two wooden pallets. Three cylindrical steel ASTs containing diesel fuel, red diesel fuel, and gasoline were observed in the Farm Equipment Storage and Vehicle Parking Area in the northeastern corner of the Site. The two diesel ASTs are approximately 300s gallon capacity and the gasoline AST is approximately 500s gallon capacity. The ASTs are within individual steel containment bins.

The portion of the Site maintained by Reiter Affiliated Companies (8.7-acre organic raspberry farm, 1.1-acre Farm Equipment Storage and Vehicle Parking Area, a 0.3-acre Farm Yard) appeared to be well-maintained. The organic raspberry farm is watered and maintained daily. The grounds were clean and well-kept. Some small areas of fuel surface soil staining were observed adjacent to the west side of the three fuel ASTs in the Farm Equipment Storage and Parking Area.

The Residence area was generally well maintained. Minor housekeeping issues observed in the Residence area included fertilizers, paint, and cleaning products found throughout the home and storage area, the lack of maintenance for the pool, and the haphazardly stored items (old paint, fertilizer product, equipment, etc.) in the wood shed. Due to the age of the residential structures, there is a potential that ACBMs and LBP are present in the building materials and LBP chips may be present in the surface soil surrounding the residential structures. The residence is connected to a septic system and potable water is provided by the onsite groundwater production well (well 26G1). The location of the septic system appurtenances (leach field and septic tank) were not disclosed by the property owner to Tetra Tech.

No storage drums or USTs were observed at the Site. Dirt roads line the edges of the Site and separate rows of raspberries. Electricity is provided to the Site from SCE. The Site is not connected to natural gas. Water for crop irrigation at the Site is provided by one agricultural groundwater well owned by KMS Industries (Well 26F2). Solid waste disposal is performed by Harrison Industries. The Site is adjacent to an organic raspberry production farm on its southwestern side, Rio Del Valle Middle School on its northern side, residential buildings on its northeastern side, and commercial buildings on its southern side. Two pole-mounted electrical transformers are within the Site boundary, and one pole-mounted transformer exists on the Site's northeastern side along North Rose Avenue. Two high volume water transmission pipelines (one operated by the City of Oxnard and one operated by the UWCD) are located 30 and 40 feet northwest of the Site beneath North Rose Avenue. Another high volume water transmission pipeline runs along the Site's southern boundary, along Collins Street. The Site is not located in an oil field. The nearest oil field is the Santa Clara Avenue Field, located approximately 1 mile southeast of the Site. There are no known active or abandoned oil wells on Site. The "McGrath-McCormick 1", located approximately 500 feet

northeast of the Site, is the oil well closest to the Site. The "McGrath-McCormick 1" oil well is a dry (non-oil producing) well that was drilled and abandoned in 1959.

7.2 RECS

Based on the information discussed in this Phase I ESA and Tetra Tech's understanding of current regulatory guidelines and judgment, the following six RECs have been identified for the Site. These RECs might pose a risk to future Site occupants (students, teachers, and school district employees).

7.2.1 REC 1: Potential Former Agricultural Pesticide Application

Potential impacts to surface and near surface soil at the Site from former pesticide applications associated with former agricultural land use practices is a REC for the Site. Because the Site was used for agricultural production from at least 1927 to the present, there is a potential that OCPs and arsenic-based pesticides were formerly applied to crops at the Site. Therefore, there is a potential that the Site surface and near surface soil is impacted with OCPs and arsenic from former pesticide application.

7.2.2 REC 2: Potential Bunker Oil Releases from Potential Former Smudge Pot Frost Abatement

The review of historical aerial photographs of the Site area indicates that the Site contained orchards for citrus fruit production for most of the time between at least 1947 through 1978. Smudge pots fueled with bunker oil and similar petroleum products were commonly used for frost abatement in orchards throughout California during this time period. There is a potential that bunker oil and/or similar petroleum products were released from smudge pots formerly used at the Site to surface and near surface soil. These types of petroleum products can persist over time and if released, may still be present at the Site in surface and near surface soil. This presents a REC for the Site.

7.2.3 REC 3: Hydrocarbon and Potentially Toxic Metals Releases to Surface Soil From Junk Vehicles Formerly Stored at the Site

Stained surface soils were observed beneath and adjacent to the junk vehicles stored at the Site in the Junk Vehicle Storage Area. This presents a REC for the Site.

7.2.4 REC 4: Hydrocarbon Releases to Surface Soil From the Two Diesel Fuel and One Gasoline ASTs at the Site

Stained surface soils were observed adjacent to the west side of the two diesel fuel and one gasoline storage ASTs at the Site in the Farm Equipment Storage and Vehicle Parking Area. This presents a REC for the Site.

7.2.5 REC 5: PCB-Containing Transformers

Two electrical power poles with pole-mounted transformers exist at the Site and one pole-mounted transformer exists along the Site's northwestern boundary. Both are located near the central area of the Site, near the northern boundary. It is unknown exactly when these transformers were installed. Because the review of the historical aerial photographs indicate that pole-mounted transformers have been at this location since it at least 1959 when the first residential building was observed, there is a potential that transformers containing PCBS maybe have been formerly used at this location. Consequently, there is a

risk dielectric fluids containing PCBs may have been released to the surface and near surface soils beneath the transformers. This presents a REC for the Site.

7.2.6 REC 6: Hazardous Pipelines

CCR Title 5, Section 14010(h) requires that new school sites shall not be located or within 1,500 feet of the easement of an aboveground or underground pipeline that can pose a safety hazard as determined by a risk analysis study, conducted by a competent professional. Hazardous pipelines are defined as:

- Pipelines carrying chemical products, natural gas, and other hydrocarbon products that are operating at a pressure of 80 psi or higher; and

- High-volume water lines, which are defined as water lines 12 inches or greater in diameter and include open aqueducts of comparable and greater volume handling capacity.

Three hazardous pipelines as defined by CCR Title 5, Section 14010(h) were identified within 1,500 feet of the Site:

- The City of Oxnard maintains a 16-inch diameter steel water pipeline routed north-south beneath North Rose Avenue approximately 30 feet northwest of the Site (Figure 2) (Appendix D); and

- The UWCD maintains a 42-inch cement-mortar lined steel water pipeline beneath North Rose Avenue approximately 40 feet northwest of the Site (Figure 2) (Appendix D).

- The City of Oxnard maintains a 12-inch diameter PVC water pipeline beneath Collins Street approximately 10 feet south of the Site (Figure 2) (Appendix D).

These three pipelines present a REC for the Site.

7.3 *DE MINIMIS* CONDITIONS

Based on the information discussed in this Phase I ESA and Tetra Tech's understanding of current regulatory guidelines and judgment, the following four *de minimis* conditions have been identified for the Site.

- Due to the age of the residential structures, there is a potential that ACBMs are present in the building materials in the Residence area structures.

- Due to the age of the residential structures, there is a potential that LBP in the building materials in the Residence area structures and LBP chips may be present in the surface soil surrounding the Residence area structures.

- The residence is connected to a septic system. The location of the septic system appurtenances (leach field and septic tank) were not disclosed by the property owner to Tetra Tech.

- The minor housekeeping issues observed in the Residence area included fertilizers, paint, and cleaning products found throughout the home and storage area, and the haphazardly stored items (old paint, fertilizer product, equipment, etc.) in the wood shed.

- THIS PAGE INTENTIONALLY LEFT BLANK

8.0 RECOMMENDATIONS

In the professional opinion of Tetra Tech, an appropriate level of inquiry has been made into the previous ownership and uses of the Site consistent with good commercial and customary practice with the intent to minimize environmental liability.

8.1 RECS

Based on the information cited in this assessment and Tetra Tech's understanding of current regulatory guidelines and judgment, it is Tetra Tech's recommendation that a Phase II ESA be performed to evaluate RECs 1 through 5 as described in Section 7.0 as part of the pre-acquisition due diligence process. Because the eastern 5.4 acres of the Site will become part of Rio Del Valle Middle School in the future, the Phase II ESA field work sampling program should be planned and performed in accordance with DTSC guidelines for completing a Preliminary Environmental Assessment (PEA) including the *Preliminary Endangerment Guidance Manual* (DTSC January 1994, Revised October 2015) (PEA Guidance Manual) and the *Interim Guidance for Sampling Agricultural Properties (Third Revision)* (DTSC 2008) (Agricultural Fields Guidance). Based on Tetra Tech's experience performing similar prescreening assessments for other K-12 school sites, performing the Phase II ESA field work sampling program in accordance with DTSC guidelines for completing a PEA will facilitate using the Phase II ESA results in a PEA if one is deemed necessary by DTSC in the future. Tetra Tech will prepare a draft version of Phase II ESA report for review by the RSD and Sage. The Phase II ESA report will document the findings and conclusions with recommendations for additional assessment or remedial actions, if necessary. A final Phase II ESA report will be prepared and submitted to the RSD and Sage following review and approval of the draft Phase II ESA report by RSD and Sage.

To evaluate the potential risks posed by REC 6, a hazardous pipeline assessment should be conducted in accordance with the *Guidance Protocol for School Site Pipeline Risk Analysis* (California Department of Education [CDE] 2007). The evaluation of potentially hazardous pipelines within 1,500 feet of the Site is not required under ASTM Standard Practice E1527-13 (ASTM 2013) but will be required by CDE under CCR Title 5, Section 14010(h) if the Site is developed as a K-12 school. Tetra Tech recommends that the RSD wait until the Site is developed as a K-12 school to complete the hazardous pipeline assessment.

8.2 *DE MINIMUS* CONDITIONS

Based on the information cited in this assessment and Tetra Tech's understanding of current regulatory guidelines and judgment, it is Tetra Tech's recommendation that following actions be taken to address the four *de minimus* conditions noted at the Site:

- The Site residence structures (the house and attached garage) should surveyed for ACBMs and LBP prior to being renovated for District offices. Renovations to the Site residence structures to remedy potentially hazardous conditions posed by ACBMs and LBP in the Site residence structures may be recommended depending on the results of the ACBM and LBP surveys.

- Prior to being renovated for District offices, the surface soil around the Site residence structures (the house and attached garage) should be assessed for potential lead from LBP chips in the soils. Surface soil samples should be collected and analyzed for total lead from the surface soils surrounding the Site residential structures. A housekeeping surface soil removal action may be recommended depending on the results of the surface soil assessment.

- The Site residence will be connected to the City of Oxnard sewer main on Collins Street in the future and the Site residence septic system will no longer be needed. The location of the Site residence septic system appurtenances should be identified. The Site residence septic system should be properly decommissioned under the regulatory oversight of in accordance with the requirements of the Ventura County Environmental Health Division.

- A survey should be performed of the materials stored in the residence, garage, and wood shed include the fertilizers, paint, and cleaning products found throughout the residence and garage, and the haphazardly stored items (old paint, fertilizer product, equipment, etc.) in the wood shed. Following completion of the survey, these materials should be properly removed and disposed of offsite. The wooden storage shed is in bad condition and should be demolished and removed from the Site.

9.0 DISCLAIMER

This report was compiled based partially on information supplied to Tetra Tech from outside sources and other information that is in the public domain. The conclusions and recommendations herein are based solely on the information Tetra Tech obtained in compiling the report. Documentation for the statements made in the report is on file at Tetra Tech's office in Santa Barbara, California. Tetra Tech makes no warranty as to the accuracy of statements made by others which may be contained in the report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report, except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Since the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. Tetra Tech does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or the fulfillment of client's obligation under federal, state, or local laws or any modifications or changes to such laws.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the AAI in conformance with the standards and practices set forth in 40 CFR Part 312.

None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from records examined.

Respectfully submitted,

TETRA TECH

Santa Barbara, CA 93111
Contact: Jim Steele

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source
2016	1"=500'	Flight Year: 2016	USDA/NAIP
2012	1"=500'	Flight Year: 2012	USDA/NAIP
2009	1"=500'	Flight Year: 2009	USDA/NAIP
2005	1"=500'	Flight Year: 2005	USDA/NAIP
1994	1"=500'	Acquisition Date: September 03, 1994	USGS/DOQQ
1985	1"=500'	Flight Date: August 06, 1985	USDA
1978	1"=500'	Flight Date: September 21, 1978	USDA
1967	1"=500'	Flight Date: August 13, 1967	USGS

Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

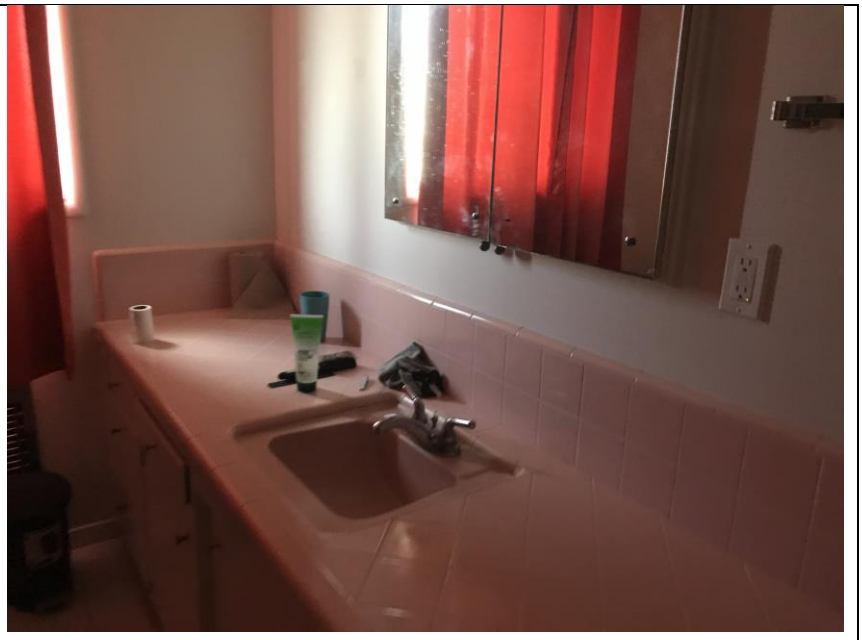

Photograph 7 **Description:** The residential home has an older style kitchen with an electric stove. Some burn marks were visible on the wall behind the stove.	

Photograph 8 **Description:** Wood beams cover the ceiling in the main room area of the residence.	

Photograph 9 **Description:** A fireplace in the residence.	

Photograph 10 **Description:** Other rooms in the building have plaster ceilings instead of wood.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photograph 11 **Description:** Ceramic tile in one of the two bathrooms.	

Photograph 12 **Description:** Some house hold cleaners in the kitchen cabinet.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photograph 13 **Description:** Oxidizer was found in one of the laundry cabinets.	

Photograph 14 **Description:** A view of the residence water heater cabinet.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photograph 15 **Description:** The heater for the residence central heating system.		

Photograph 16 **Description:** A box of fertilizer containers on the front step of the residence.		

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photograph 17 **Description**: The residence garage showing a few buckets of paint and various chemical cleaners stored inside.	
Photograph 18 **Description:** The pool in the residence's backyard is poorly maintained.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photograph 19 **Description:** A view of the back of the residence (looking north east).	
Photograph 20 **Description:** A view of the private domestic well 26F2 used for agricultural irrigation.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photograph 21 **Description:** A view of the private domestic well 26G1 used for potable water.	
Photograph 22 **Description:** Raspberry row crop production directly south of the residential area.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 23 **Description:** View of the southern section of the Junk Vehicle Storage Area on the eastern side of the residence.	

Photo: 24 **Description:** A car in the Junk Vehicle Storage Area full of metal scraps.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 25 **Description:** More metal scraps in the Junk Vehicle Storage Area.	
Photo: 26 **Description:** Another view of the eastern edge of the Junk Vehicle Storage Area.	

Photo: 27 **Description:** A large truck in the Junk Vehicle Storage Area.	

Photo: 28 **Description:** A boat and more cars in the Tennant Storage Area adjacent to the Residence Area.	

Photo: 29 **Description:** A trailer camper in the Tennant Storage Area.	

Photo: 30 **Description:** Piles of wood observed in the Junk Vehicle Storage Area.	

Photo: 31 **Description:** A few spots of oil observed within the Junk Vehicle Storage Area.	

Photo: 32 **Description:** A few more spots of oil observed near the Junk Vehicle Storage Area.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 33 **Description:** Miscellaneous items bordering the Tennant Storage Area.	
Photo: 34 **Description:** View of the Site's northern boundary, bordering Rio Del Valle Junior High School.	

Photo: 35 **Description:** Another view of the Site's northern boundary next to Rio Del Valle Junior High School.	

Photo: 36 **Description:** Metal shade support frame parts stored in the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Photo: 37 **Description:** More miscellaneous pieces of equipment in the north corner of the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Photo: 38 **Description:** Black tarps and wood stored in the north corner of the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Photo: 39 **Description:** Tarps stored in the north corner of the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Photo: 40 **Description:** A view of the 1,000 liter (264 gallon) organic liquid fertilizer storage containers (totes) stored in the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

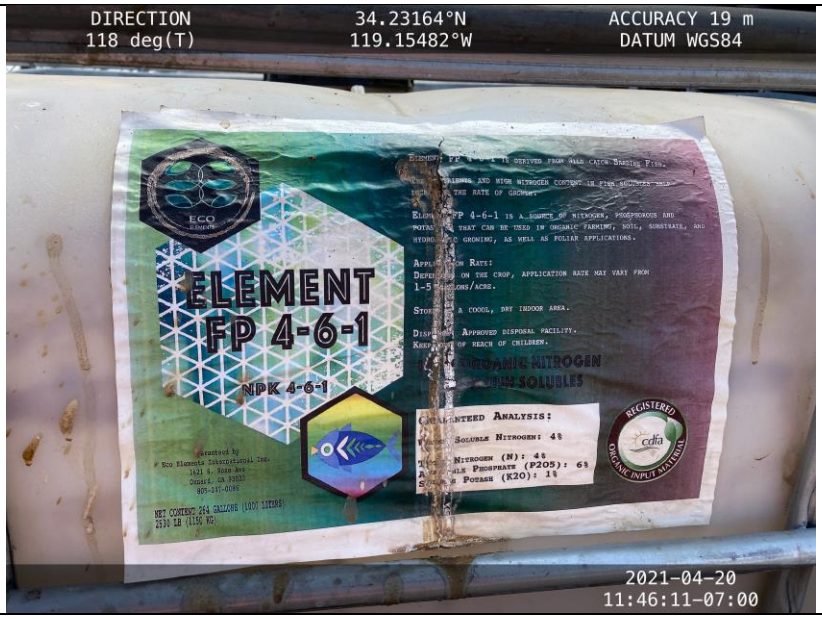

Photo: 41 **Description:** Close up view of a 1,000 liter tote.	

Photo: 42 **Description:** Some water spillage at the base of the organic liquid fertilizer totes.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 43 **Description:** Large trash roll off bin in the north-eastern section of the Site.	

Photo: 44 **Description:** Large shipping container used by Reiter Affiliated Companies in the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 45 **Description:** View of farming equipment stored inside the Reiter Affiliated Companies shipping container.	

Photo: 46 **Description:** Bags of gypsum stored inside the Reiter Affiliated Companies shipping container.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 47 **Description:** Three above ground storage tanks (ASTs) adjacent to the Reiter Affiliated Companies shipping container. The two white ASTs are 300 gallon capacity and store diesel (red and regular). The rust colored AST is a 500 gasoline storage tank.	

Photo: 48 **Description:** Close up view of the red diesel AST.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 49 **Description:** Close up view of the 500 gallon gasoline tank AST.	

Photo: 50 **Description:** Stained soil from fuel spills at the base of the AST secondary containment tanks.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 51 **Description:** Stained soil from fuel spills at the base of the AST secondary containment tanks.	

Photo: 52 **Description:** A car battery was observed next to one of the cars in the Junk Vehicle Storage Area..	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 53 **Description:** An electrical panel located near the private domestic wells.	
Photo: 54 **Description:** 1,000 liter water totes in the Farm Equipment Storge and Vehicle Parking Area of the Site.	

Photo: 55 **Description:** A pole mounted electrical transformers at the northeast corner of the Junk Vehicle Storage Area of the Site.	

Photo: 56 **Description:** Tag on the powerline pole at the northeast corner of the Junk Vehicle Storage Area of the Site.	

Photo: 57 **Description:** The pole mounted electrical transformer located in the Farm Yard area of the Site.		

Photo: 58 **Description:** The tag on the powerline pole of the pole mounted electrical transformer located in the Farm Yard area of the Site.		

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

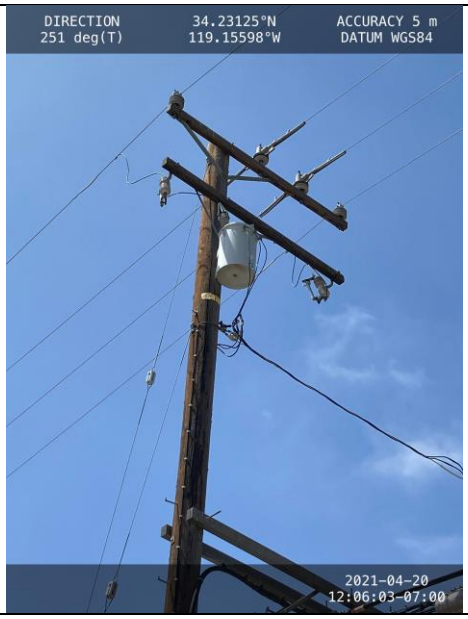

Photo: 59 **Description:** The pole mounted electrical transformer located on Site's western boundary on North Rose Avenue.	

Photo: 60 **Description:** The tag on the powerline pole of the pole mounted electrical transformer located on Site's western boundary on North Rose Avenue.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 61 **Description:** A view of neighborhood across North Rose Avenue along the Site's northwestern boundary.	

Photo: 62 **Description:** A view southwest along the Site's northwestern boundary.	

Photo: 63 **Description:** A view of Collins Street and an automobile dealership at the Site's southwestern boundary.	

Photo: 64 **Description:** A view to the northwest along Collins Street along the Site's southwestern boundary.	

Appendix C
Site Reconnaissance Photographs
Phase I Environmental Site Assessment
Rio Del Valle Middle School Expansion Project
2600 North Rose Avenue
Oxnard, CA 93036

Photo: 65 **Description:** View of the dirt road and irrigation ditch along the Site's southwestern boundary.	

Photo: 66 **Description:** View of a row of raspberry plantings that are present throughout the majority of the Site.

STATE OF CALIFORNIA
DEPARTMENT OF NATURAL RESOURCES

DIVISION OF OIL AND GAS

LOG OF OIL OR GAS WELL

FIELD _____ COMPANY SHELL OIL COMPANY

Sec. 26, T. 2N, R. 22W, S.B. B. & M., Elevation 95' Well No. ~~XXXX~~-SHODGRASS # 1

In compliance with the provisions of Chapter 718, Statutes of 1915, as amended, the information given herewith is a complete and correct record of the present condition of the well and all work done thereon, so far as can be determined from all available records.

Signed W. Holmes

Date JANUARY 29, 1930. Title AGENT (President, Secretary or Agent)

The summary on this page is for the ORIGINAL condition of the well

OIL SANDS

1st sand from _____ to _____ 4th sand from _____ to _____
2d sand from _____ to _____ 5th sand from _____ to _____
3d sand from _____ to _____ 6th sand from _____ to _____

IMPORTANT WATER SANDS

1st sand from _____ to _____ 3d sand from _____ to _____
2d sand from _____ to _____ 4th sand from _____ to _____

CASING RECORD

Size of Casing	Where Landed	Where Cut	Weight Per Foot	Threads Per Inch	Kind of Shoe	Make of Casing	Cemented Yes	Cemented No	Cemented Number of Sacks
13-3/8"	132'		48#	8		Pittsburg Seamless	Yes		100
	2-1/2" Tubing landed at 1530'.								

CEMENTING OR OTHER SHUT-OFF RECORD

Casing, Size	Sacks	Time Set	Method	Test and Result (Give water level and bailing results)
				No tests.
				This well was drilled as a core hole for geological
				purposes only.

PLUGS AND ADAPTERS

Heaving Plug—Material _____ Length _____ Where set _____

Adapters —Material _____ Size _____

TOOLS

Rotary Tools were used from _____ ft. to _____ ft.

Cable Tools were used from _____ ft. to _____ ft.

PERFORATIONS

State clearly whether a machine was used or casing was drilled in shop

From	To	Size of Holes	Number of Rows	Holes Per Foot	Machine—Shop
ft.	ft.				
ft.	ft.				
ft.	ft.				
ft.	ft.				
ft.	ft.				

Well did not produce

[illegible] barrels of oil per day.

The gravity of oil was _____ degrees Baumé. Water in oil amounted to _____ per cent.

NAMES OF DRILLERS — NAMES OF TOOL DRESSERS

Urtasun, J.R., Sadler, C.H., Hart, C.M.

Date drilling started APRIL 9, 1928. Date well was completed APRIL 26, 1928.

FORMATIONS PENETRATED BY WELL

DEPTH TO Top of Formation	DEPTH TO Bottom of Formation	Thickness	Name of Formation
0	15	15	Sand and boulders
15	83	68	Sand and gravel
83	103	20	Gravel and boulders
103	110	15	Core # 1 - recovered 1' gravel and boulders
110	133	15	Core # 2 - missed; gravel and boulders
133	143	10	Core # 3 - recovered 1' sand and boulders.
143	163	20	Core # 4 - recovered 1' sand and boulders
163	187	24	Gravel and boulders
187	192	5	Clay
192	197	5	Core # 5 - recovered 6" shale
197	216	19	Core # 6 - recovered 2' sandy shale sand and gravel
216	232	16	Core # 7 - missed; sand and gravel
232	246	14	Core # 8 - recovered 2' sand and gravel streaks clay
246	262	16	Core # 9 - recovered 2' sandy clay streaks of gravel
262	277	15	Core # 10 - missed; sand and gravel
277	292	15	Core # 11 - recovered 2' sandy clay streaks of sand
292	305	13	Core # 12 - recovered 6' sandy clay streaks of sand
305	320	15	Core # 13 - recovered 2' sand and gravel
320	328	8	Core # 14 - recovered 5' sand streaks clay
328	348	20	Core # 15 - missed sand streaks clay
348	358	10	Core # 16 - recovered 4' sand and sandy shale with streaks of clay
358	373	15	Core # 17 - missed sand, gravel boulders
373	388	15	Core # 18 - missed sand, gravel boulders
388	405	17	Sand gravel and boulders
405	456	51	Sand, gravel and boulders
456	462	6	Sandy shale
462	474	12	Core # 19 - recovered 1' sandy shale, gravel and boulders
474	508	34	Sand, gravel and boulders
508	513	5	Sand with streaks of clay
513	530	17	Core # 20 - recovered 1' sand with streaks of clay
530	545	15	Core # 21 - recovered 2' gravel and streaks of shale
545	560	15	Core # 22 - recovered 13' shale and sandy shale
560	575	15	Core # 23 - recovered 13' shale and sandy shale
575	590	15	Core # 24 - recovered 5' sandy blue shale
590	605	15	Core # 25 - recovered 7' sandy blue shale and sand

Date JANUARY 29, 1930. Title AGENT
President, Secretary or Agent

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reason for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

LOCATION 1800' from south east corner of lot 92 Rancho Santa Clara Del Norte along southerly property line, thence northerly at right angles 100'.

ELEVATION 95'

17" HOLE Spudded with rotary April 9, 1928 and drilled 17" rotary hole from surface to 197' by April 11th 1928.

CEMENTED second hand 13-3/8" Pittsburg 68# A. P. I. 8 thread seamless casing at 192' with 100 sax treated Santa Cruz Oil Well Cement Perkins method April 11th.

12" HOLE Located top plug at 177' April 13th. Cleaned out cement and drilled 12" rotary hole to 1530' by April 25th. Landed 2-1/2" tubing at 1550' April 26, 1928.

HISTORY OF ABANDONMENT

Filled hole with heavy mud April 26, 1928.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin

VENTURA Cal. APRIL 21st. 1926

MR. C. C. TOLS

Deputy State Oil and Gas Supervisor

SANTA PAULA Cal.

DEAR SIR:

In compliance with Section 16, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to abandon well No. SHOESTRASS # 1, Sec. 27, T. 2N R. 22W, S.B. B. & M., Oil Field, VENTURA County, commencing work on the 26TH. day of APRIL 19 26

The present condition of the well is as follows:

13-3/8" casing cemented at 192'.
2-1/2" tubing landed at 1530'.
Total depth 1530'.

The proposed work is as follows:

Fill hole with heavy mud.

JANUARY 29, 1930.
Owing to oversight this notice to abandon was not made until this date. The notice has been dated back to April 21st. 1926.

Report on Proposed Operations

No. P 2-1979

Santa Paula, Cal. April 16, 1928

Mr. W. W. Craddock,
Ventura, Cal.

Agent for Shell Company of California Company

PROSPECT WELL

DEAR SIR:

Your proposal to drill Well No. Snodgrass 1,
Section 27, T. 2 N., R. 22 W., S.B. B. & M., — Oil Field, Ventura County,
dated Apr. 9 1928, received Apr. 10 1928, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"The well is 1800' from S.E. corner of Lot #92, Rancho Santa Clara Del Norte, along Southerly property line, thence Northerly at right angles 100'.

The elevation of the derrick floor above sea level is 95 feet.

We estimate that the first productive oil or gas sand should be encountered at a depth of about -------feet, more or less."

PROPOSAL:

"We propose to use the following strings of casing, either landing or cementing them as here indicated:

Size of csg.	Wt. per ft.	New or S.H.	Depth	Landed or Cemented

THIS WELL BEING DRILLED FOR GEOLOGIC INFORMATION ONLY

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:

This office has no data to determine the depth at which oil or gas bearing formations may be encountered at this location.

Kindly notify this office as follows:

1. When and if oil or gas bearing formations are noted in drilling.
2. To witness a test of shut-off on any water string set in the well.

cc - Mr. Wm. Reinhardt (2)

MR. C. C. THOMS

Deputy State Oil and Gas Supervisor

SANTA PAULA Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of drilling well number SNODGRASS 1, Section 26 27, T. 2N, R. 22W, SB. & M., XXXXXXX Oil Field, VENTURA County.

The well is feet N. or S., and feet E. or W. from SEE LOCATION BELOW
(Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is 95 feet.

We propose to use the following strings of casing, either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lb. Per Foot	New or Second Hand	Depth	Landed or Cemented
THIS WELL BEING	DRILLED FOR GEOLOGIC INFORMATION ONLY			

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing.

We estimate that the first productive oil or gas sand should be encountered at a depth of about feet, more or less.

Respectfully yours

REPORT OF CORRECTION OR CANCELLATION

Santa Paula California

June 29 1959

MR. Carl B Bowden
P O Box 670
Santa Paula California
Union Oil Company of California

Dear Sir

In accordance with records on file in this office

the following change pertaining to your well No. "McGrath-McCormick" 1,
Sec. 26, T. 2N, R. 22W, S.B. B. & M., — field,
Ventura County, District No. 2, is being made in our records:

☒ The corrected location is 1200.14' NW'ly alg. lot line from NE cor of lot #88, Rancho Santa Clara del Norte; thence, 752.69' SW'ly at right angles.

☐ The corrected elevation is

☐ Report No. , dated , has been corrected as follows:

☐ Your notice to (Drill, abandon, etc.) dated ,
and our report No. P , issued in answer thereto, are hereby cancelled inasmuch as the work will not be done. If you have a drilling bond on file covering this notice it will be returned. No request for such return is necessary.

SANTA PAULA, CALIFORNIA

Date 1959	Depth	Drilled	REMARKS
4-23	940	940	Spudded at 11:30 P.M., April 23, 1959. Drilled 12-1/4" hole.
4-24	1620	680	Drilled 12-1/4" hole to 1000'. Drilled 9-7/8" hole to 1620'. Ran Welex electric log at 1620'. Reran 12-1/4" bit and opened 9-7/8" hole to 1227'. Opened 12-1/4" hole to 18-5/8" to 497'. Hit boulder. Reran 12-1/4" bit and shoved boulder to 1227'. Opened 12-1/4" hole to 18-5/8" to 1227' with 18-5/8" Smith 6-point hole opener.
4-25	1620	---	Ran 13-3/8" 48# H-40 casing to 1230'. Cemented through Baker guide shoe with 750 equivalent sax 1:1 Diamix and 300 sax construction cement. Last 150 sax treated 2% $CaCl_2$. Had good cement returns to surface. C.I.P. 12:00 Noon. Landed 13-3/8" casing on 12" S-900 Shaffer base. Tested base with 1500 psi. Installed B.O.E.
4-26	3960	2340	Tested B.O.E. with 1000 psi. Tested Kelly stop with 750 psi. Drilled 9-7/8" hole.
4-27 thru 5-4	7215	3255	Drilled 9-7/8" hole. Mud: 78 - 53 - 7 cc - 2/32 - 1% - 1400 psi.
5-5 thru 5-12	9133	1918	Drilled 9-7/8" hole. Mud: 76 - 57 - 7.2 cc - 2/32 - 1% - 1500 psi.
5-13 thru 5-20	10896	1763	Drilled 9-7/8" hole. Mud: 78 - 60 - 6.2 cc - 2/32 - 3% - 1500 psi.
5-21 and 5-22	11058 T.D.	162	Ran electric log, dipmeter, and sidewall sampler at 11058'. Left six sidewall sample cases in hole. Plugged with 30 sax at 2700': Hung 4-1/2" open-end drill pipe at 2700'. Pumped in 30 sax Colton construction cement treated with 3% $CaCl_2$ at 118#/cu.ft. C.I.P. 1:05 A.M. Stood cemented 3 hours. Plugged with 120 sax at 2600': Hung 4-1/2" open-end drill pipe at 2600'. Pumped in 120 sax Colton construction cement treated with 2% $CaCl_2$ at 120#/cu.ft. C.I.P. 5:25 A.M.
5-23	11058 T.D.		Found top of cement at 2361'. Witnessed and approved by Division of Oil and Gas.

MEMORANDUM OF TELEPHONE OR PERSONAL CONVERSATION

Operator Union Oil Co. of Cal. Well No. McGrath - McCormick #1

~~Field~~ Ventura Co. Sec, 26 T. 2N R. 22W, S.B. B. & M.

A ~~personal~~ telephone conversation was held, concerning the above well, with Mr. Carl Erdmiger for the above operator on 5/21/1959, at 4:30 P.M.

Details of the conversation were as follows:

Total depth - 11,200±

Casing record - 13 3/8" Cem 1230

Oil or gas showings - None

Results of tests - None

Stratigraphic markers -

Geologic age at bottom - Eocene

Base of fresh water - Unknown. Deeper than 1620'

Operator proposes the following work: Abandon

1- Mud pg. w/100' cement at fresh/salt interface to be determined by electric log measurements.

2- pg. w/c. 1270-1210'

3- pg w/c. 10' @ surf.

Additional requirements outlined:

Test of W.S.O. to be witnessed by D.O.G. at _____ by Operator at ____

Plugs to be located by D.O.G. at all plugs by Operator at _____

Notice to be filed immediately - (X) Yes ( ) Not necessary

Other data - _____

Special Report on Operations Witnessed

No. T 259-152

Mr. Carl B Bowden
P O Box 670
Santa Paula California
Agent for Union Oil Company of California

Santa Paula
May 26 1959 Calif.

DEAR SIR:

Operations at well No. "McGrath-McCormick" 1, Sec. 26, T. 2N, R. 22W, S.B. B & M.
Field, in Ventura County, were witnessed on May 23, 1959. Mr. C. H. Schultz representative of the supervisor was present from 8:50 a.m. to 9:30 a.m. There were also present V. H. McDowell and William Eklund, drilling foremen.

Present condition of well: 13 3/8" cem. 1230' T.D. 11058'. Plugged with cement 2700' - 2645'± and 2600' - 2361'.

The operations were performed for the purpose of plugging the hole in the process of abandonment.

Mr. Eklund reported:

1. The 9 7/8" hole was drilled from 5250' to 11,058' (total depth).
2. No commercial oil or gas shows were encountered in drilling the well.
3. The hole was left full of 78 lb. drilling fluid.
4. On May 23, 1959, 30 sacks of cement was pumped into the hole through 4½"drill pipe hanging at 2700' (calculated to fill to 2645'±).
5. On May 23, 1959, 120 sacks of cement was pumped into the hole through 4½" drill pipe hanging at 2600' filling to 2361'.

The engineer noted:

That the cement plug at the reported depth of 2361' supported 9 points of the weight of the drill pipe.

THE PLUGGING OPERATIONS AS REPORTED AND WITNESSED ARE APPROVED.

DEAR SIR:

Operations at well No. "McGrath-McCormick" 1, Sec. 26, T. 2N, R. 22W, S.B. B & M.
Field, in Ventura County, were witnessed on May 23, 1959. Mr. C. H. Schultz, representative of the supervisor was present from 3:30 p.m. to 4:10 p.m. There were also present V. H. McDowell and William Eklund, Drilling Foremen

Present condition of well: 13 3/8" cem. 1230'. T.D. 11,058'. Plugged with cement 2700'-2645', 2600'-2361' and 1250'-1202'.

The operations were performed for the purpose of plugging the hole in the process of abandonment.

Mr. Eklund reported: that on May 23, 1959, 100 sacks of cement was pumped into the hole through 4 1/2" drill pipe hanging at 1250', filling to 1202'.

The Engineer noted that the cement plug at the reported depth of 1202' supported 4 points of the weight of the drill pipe.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 1202' ARE APPROVED.

On June 8, 1959 Mr. William Lewis reported by telephone:

1. The hole was bridged with paper sacks 43' below the cellar floor
2. On June 3, 1959 a total of 96 cu ft. of sand and cement was dumped into the hole, setting the 13⅜" casing to the cellar floor, which is 8' below ground level.
3. A ½" steel plate was welded on the casing head.

Agent for Union Oil Company of California

Santa Paula Calif.
May 26 1959

DEAR SIR:

Your proposal to abandon Well No. "McGrath-McCormick" 1,

Section 26, T. 2N, R. 22W, S.B. B. & M., - Field, Ventura County,

dated May 22, 1959 received May 26, 1959, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:
"THE PRESENT CONDITION OF THE WELL IS:
1. Total Depth: 11,058'
2. Complete casing record, including plugs:
13-3/8" C 1230

3. Last Produced: Never produced

ADDITIONAL DATA FOR DRY HOLE
4. Oil or Gas showings and results of tests: None
5. Stratigraphic markers and depths:

6. Geologic age at bottom: Sespe
7. Base of fresh water sands: 2550' "

PROPOSAL:
"THE PROPOSED WORK IS
1. Plug at 2600' with 100 sax.
2. Division of Oil & Gas to witness location of top of plug which must be above 2550'.
3. Plug at 1250' with 60 sax.
4. Division of Oil & Gas to witness location of top of plug which must be above 1210'.
5. Plug from 10' to surface with cement. Division of Oil & Gas to witness placement of plug."

DECISION:
THE PROPOSAL IS APPROVED.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin; one copy only

Santa Paula Calif. May 22 19 59

DIVISION OF OIL AND GAS

In compliance with Division 3, Public Resources Code, notice is hereby given that it is our intention to abandon

Well No. McGrath-McCormick No. 1, Sec. 26, T. 2N,

R. 22W, S.B. B. & M., El Rio Field, Ventura County,

commencing work on May 22 19 59.

THE PRESENT CONDITION OF THE WELL IS:

1. Total Depth: 11,058'

2. Complete casing record, including plugs:

13-3/8" C 1230

3. Last Produced Never produced
(Date) (Oil, B/D) (Water, B/D)

ADDITIONAL DATA FOR DRY HOLE

4. Oil or Gas showings and results of tests:

None

5. Stratigraphic markers and depths:

6. Geologic age at bottom: Sespe

7. Base of fresh water sands: 2550'

THE PROPOSED WORK IS

1. Plug at 2600' with 100 sax.
2. Division of Oil and Gas to witness location of top of plug which must be above 2550'.
3. Plug at 1250' with 60 sax.
4. Division of Oil and Gas to witness location of top of plug which must be above 1210'.
5. Plug from 10' to surface with cement. Division of Oil and Gas to witness placement of plug.

Special Report on Operations Witnessed

No. T 259-124

Mr. Carl B Bowden
P O Box 670
Santa Paula California

Santa Paula, Calif.
April 29, 1959

Agent for Union Oil Company of California

DEAR SIR:

Operations at well No. "McGrath-McCormick" 1, Sec. 26, T. 2N, R. 22W, S.B. B & M.
Field, in Ventura County, were witnessed on April 28, 1959. Mr. C. H. Schults, representative of the supervisor was present from 1:25 p.m. to 1:35 p.m. There were also present V. H. McDowell, drilling foreman and James Sailor, driller.

Present condition of well: 13 3/8" cem. 1230'. (Present depth) 5250'.

The operations were performed for the purpose of inspecting blowout prevention equipment and installation.

Mr. - - - reported:

THE BLOWOUT PREVENTION EQUIPMENT AND INSTALLATION ARE APPROVED.

DIVISION OF OIL AND GAS

REPORT ON PROPOSED OPERATIONS

No. P 259-153

Mr. C E Smith
P O Box 670
Santa Paula California
Agent for Union Oil Company of California

Santa Paula Calif.
April 15 1959

DEAR SIR:

Your proposal to drill Well No. "McGrath-McCormick" 1

Section 26, T. 2N, R. 22W, S.B. B. & M., — Field, Ventura County,

dated Apr. 13, 1959, received Apr. 15, 1959, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"Legal description of mineral right lease, consisting of approx. 390 acres, is as follows: (see attached map).
Do mineral and surface leases coincide? Yes.
Location of Well: Approximately 1200 feet Northwesterly along lot line from NE cor. of Lot #88, Rancho Santa Clara del Norte: thence, 700 feet Southwesterly at right angles Sec. 26, T2N, R22W, S. B. B. & M., or approx: 200' S., 300' W., fr. N.E. Cor. Sec. 26.
Elevation of ground above sea level 94 feet ground datum.
All depth measurements taken from top of rotary table which is 10± feet above ground."

PROPOSAL:

"Size of Casing

PROPOSED CASING PROGRAM

Inches A.P.I.	Weight	Grade and Type	Top	Bottom	Cementing Depths
13-3/8"	48#	H-40	Surface	1000'	1000'

Intended zone or zones of completion: Sespe (Name)

Estimated total depth 11,000'
It is understood that if changes in this plan become necessary we are to notify you before running casing."

DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The 13 3/8" casing shall be cemented with sufficient cement to fill all of the space back of the casing.
2. The hole is, at all times, kept full of drilling fluid of proper weight and quality to prevent blowuts.
3. Adequate blowout prevention equipment shall be installed and maintained ready for use at all times.
4. Any hole penetrating an oil or gas zone, to be sidetracked, shall be plugged with cement insofar as possible.
5. A SUPPLEMENTARY NOTICE SHALL BE FILED prior to running any additional casing into the hole. OTHER requirements may be outlined at that time.

E. H. MUSSER, State Oil and Gas Supervisor

By Continued, Deputy

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Universal Transverse Mercator (UTM) zone 11. The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

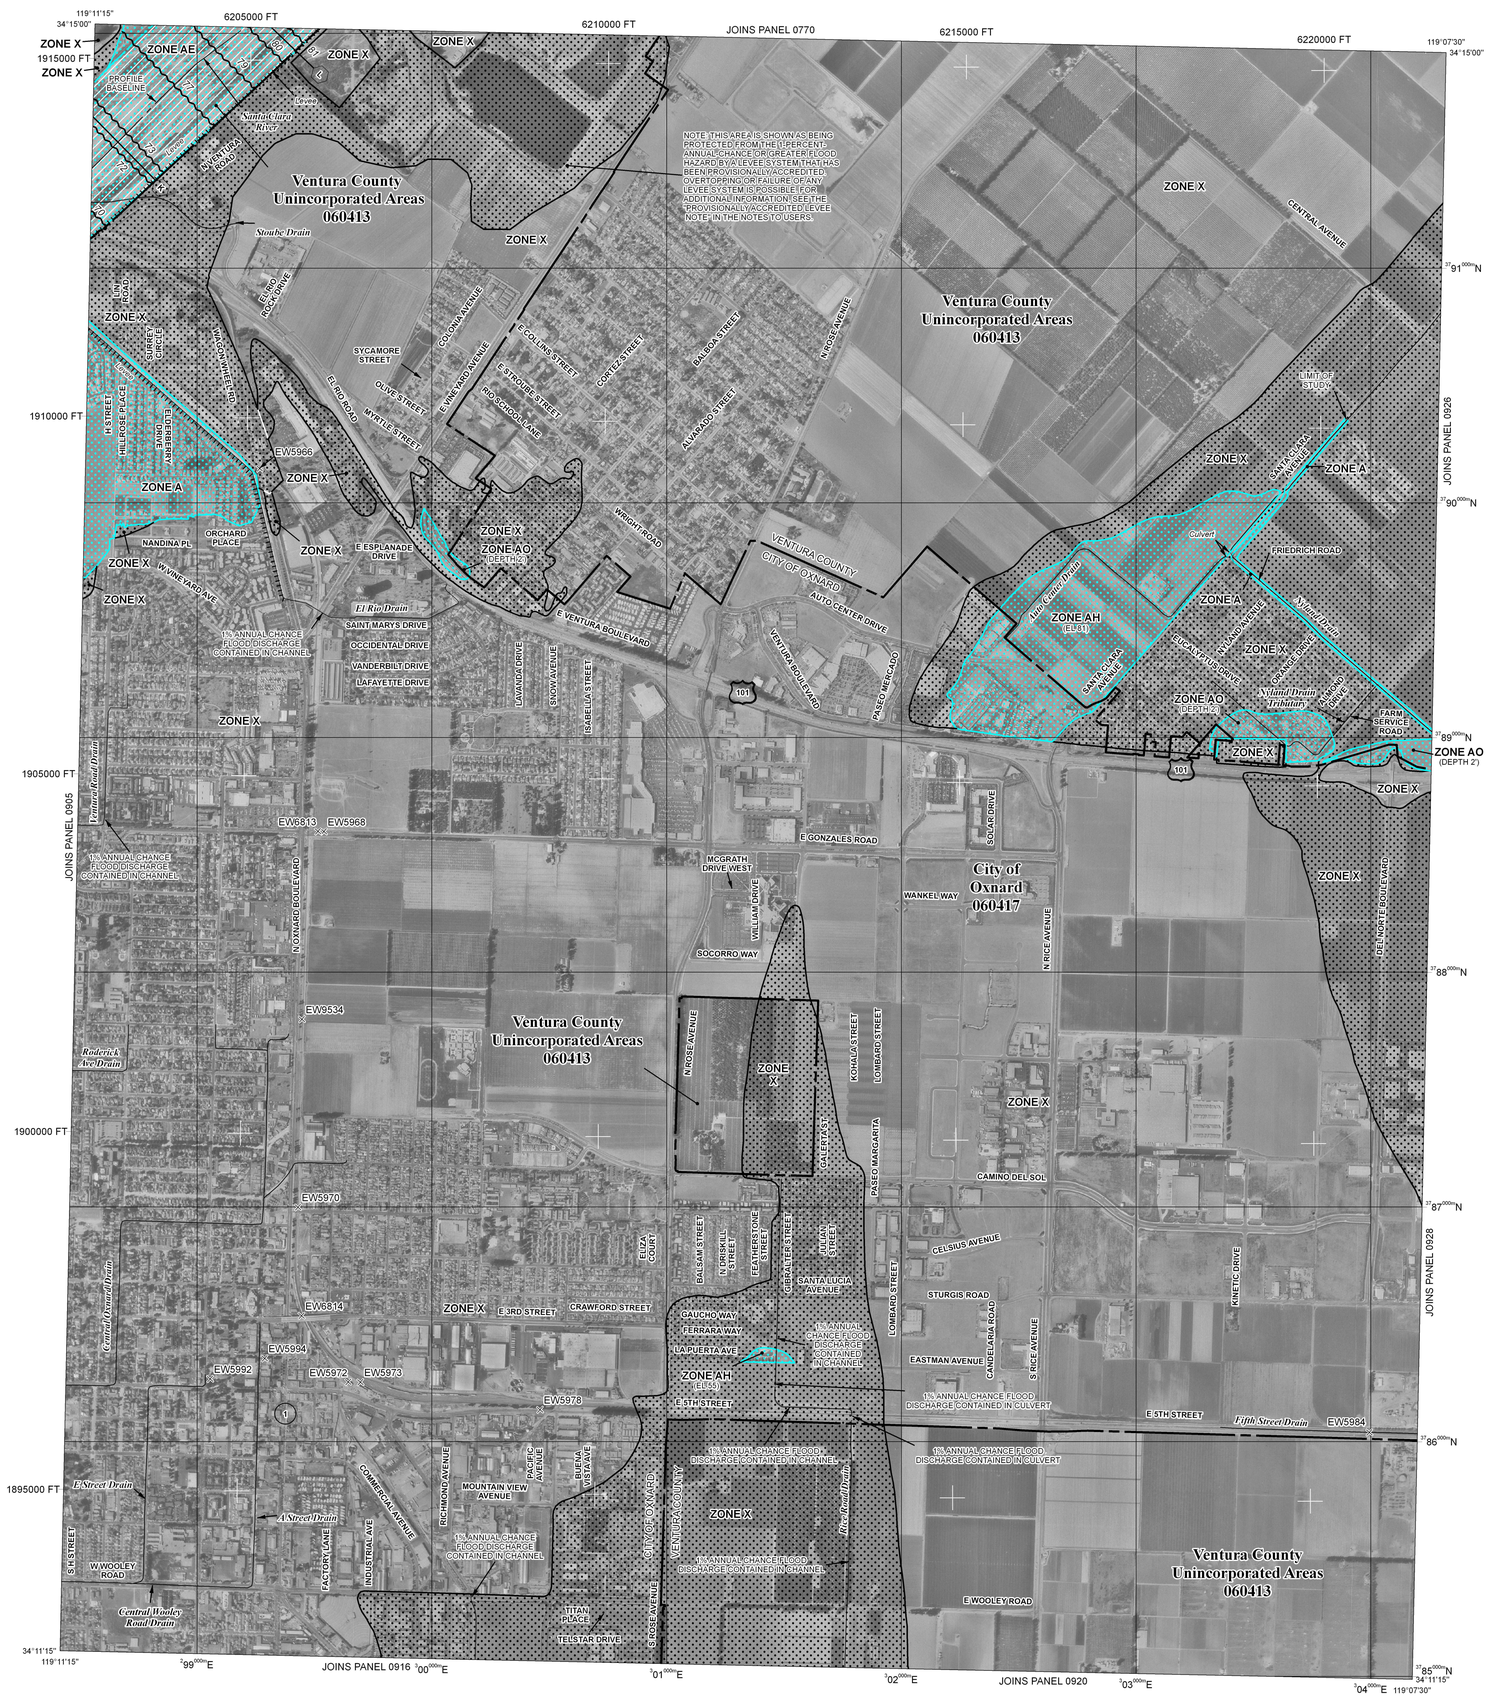
Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

Spatial Reference System Division
National Geodetic Survey, NOAA
Silver Spring Metro Center
1315 East-West Highway
Silver Spring, Maryland 20910
(301) 713-3191

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov.

Base map information shown on this FIRM was derived from U.S. Geological Survey Digital Orthophoto Quadrangles produced at a scale of 1:12,000 from photography dated 1994 or later.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to confirm to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.



Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://www.mcs.fema.gov.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov.

Provisionally Accredited Levee Notes to Users: Check with your local community to obtain more information, such as the estimated level of protection provided (which may exceed the 1-percent-annual-chance level) and Emergency Action Plan, on the levee system(s) shown as providing protection for areas on this panel. To maintain accreditation, the levee owner or community is required to submit the data and documentation necessary to comply with Section 65.10 of the NFIP regulations by December 1, 2009. If the community or owner does not provide the necessary data and documentation or if the data and documentation provided indicate the levee system does not comply with Section 65.10 requirements, FEMA will revise the flood hazard and risk information for this area to reflect de-accreditation of the levee system. To mitigate flood risk in residual risk areas, property owners and residents are encouraged to consider flood insurance and floodproofing or other protective measures. For more information on flood insurance, interested parties should visit the FEMA Website at http://www.fema.gov/business/nfip/index.shtm.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X — Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X — Areas determined to be outside the 0.2% annual chance floodplain.

ZONE D — Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

- 1% annual chance floodplain boundary
- 0.2% annual chance floodplain boundary
- Floodway boundary
- Zone D boundary
- CBRS and OPA boundary
- Boundary dividing Special Flood Hazard Area Zones and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
- 513 — Base Flood Elevation line and value; elevation in feet*
- (EL 987) — Base Flood Elevation value where uniform within zone; elevation in feet*

* Referenced to the North American Vertical Datum of 1988

- A — A — Cross section line
- 23 — — — 23 — Transect line
- 87°07'45", 32°22'30" — Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
- 2976000mN — 1000-meter Universal Transverse Mercator grid values, zone 11
- 600000 FT — 5000-foot grid ticks: California State Plane coordinate system, zone V (FIPSZONE 0405), Lambert Conformal Conic projection
- DX5510 × — Bench mark (see explanation in Notes to Users section of this FIRM panel)
- ●M1.5 — River Mile

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

2600 NORTH ROSE AVENUE
OXNARD, CA 93036

COORDINATES

Latitude (North):	34.2307640 - 34° 13' 50.75''
Longitude (West):	119.1544060 - 119° 9' 15.86''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	301563.1
UTM Y (Meters):	3789647.2
Elevation:	92 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that

there are 14 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

VISTA FORD OF OXNARD (Continued) **1004675402**

generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste Code: D001

BUNNIN BUICK-GMC, INC. (Continued) **1025865536**

Waste Description: IGNITABLE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.
Violation Notes:	Returned to compliance on 07/17/2014. Maintenance records to aboveground storage tanks are not available. Ensure overfill alarms are tested annually by qualified professional and maintain these documents as well as all maintenance records available. This includes corrosion protection.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/30/2020
Date Data Arrived at EDR: 01/14/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020

Next Scheduled EDR Contact: 07/12/2021
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020
Date Data Arrived at EDR: 10/20/2020
Date Made Active in Reports: 11/02/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

RIO DEL VALLE MIDDLE SCHOOL EXPANSION PHASE I ESA
2600 NORTH ROSE AVENUE
OXNARD, CA 93036

TARGET PROPERTY COORDINATES

Latitude (North):	34.230764 - 34° 13' 50.75''
Longitude (West):	119.154406 - 119° 9' 15.86''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	301563.1
UTM Y (Meters):	3789647.2
Elevation:	92 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5619402 OXNARD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

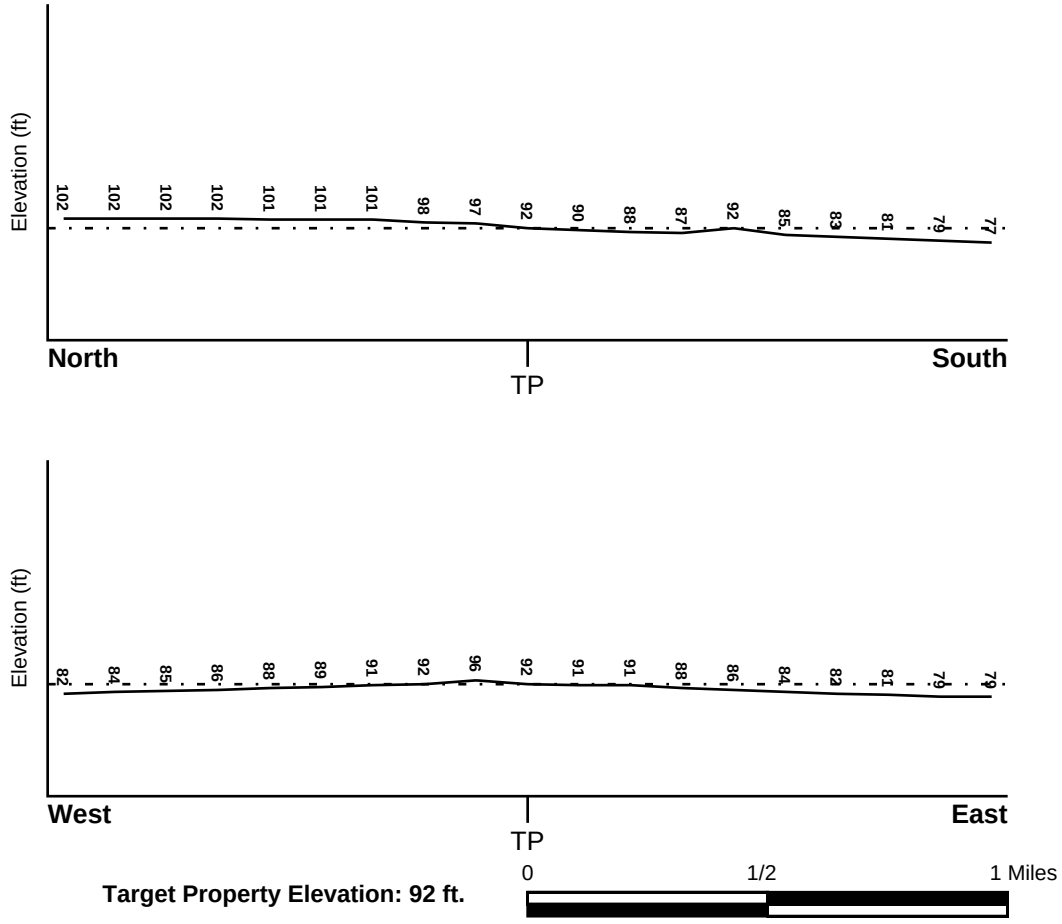
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06111C0910E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OXNARD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: PICO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9
2	14 inches	53 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9
3	53 inches	59 inches	stratified gravelly sand to gravelly loamy coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: CAMARILLO

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	24 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	24 inches	50 inches	stratified sandy loam to sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
3	50 inches	79 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: ANACAPA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	35 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	35 inches	59 inches	stratified coarse sandy loam to loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	7 inches	59 inches	stratified sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

Soil Map ID: 5

Soil Component Name: HUENEME

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	16 inches	59 inches	stratified sandy loam to silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

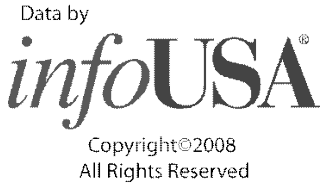
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILDFAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Tetra Tech, Inc. on Apr 08, 2021.

TARGET PROPERTY

2600 North Rose Avenue
Oxnard, CA 93036

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

LEGAL DESCRIPTION

EXHIBIT "A"

Parcel 1:

A portion of Lot 88 of Rancho Santa Clara del Norte Subdivision, in the County of Ventura, State of California, as per Map recorded in Book 3, Page 26 of Maps, in the office of the County Recorder of said County, described as follows:

Beginning at the Southeast corner of Lot 88 of said Rancho Santa Clara del Norte Subdivision, said point a 4 x 4 post scribed 67, 88, and 89, thence;

North 39° 36' 15" East 336.56 feet to the true point of beginning, said point 1.07 feet North 67° 03' 15" West of a 3/4th inch iron pipe; thence,

1st: North 67° 03' 15" West 1048.81 feet to a point, said point a 1 1/2 inch pipe tagged L.S. 2483; thence,

2nd: North 23° 46' 45" East 468.15 feet to a point, said point a 2 inch iron pipe; thence,

3rd: South 50° 26' 45" East 1132.38 feet to a point, said point a 2 inch iron pipe tagged RE 4825; thence,

4th: South 39° 36' 15" West 150.36 feet to the true point of beginning of said parcel.

EXCEPT therefrom an undivided one-half interest in and to the oil, mineral and petroleum substances lying in, on or under said land, for a period of 20 years from and after date hereof, as reserved in deed recorded August 14, 1955, in Book 1281, Page 486 of Official Records.

EXCEPT the interest as reserved in deed recorded August 7, 1989, as Document No. 89-123697 of Official Records, which recited as follows:

"Reserving and excepting therefrom an undivided one-half interest in and to the oil, mineral and petroleum substances lying in, on or under said land, for a period of 20 years from and after date hereof".

Parcel 2:

Part of Lots 88 and 89 as the same are designated and delineated upon that certain map entitled "Map of Rancho Santa Clara del Norte, Ventura County, California", in the County of Ventura, State of California, as per Map recorded in Book 3, Page 26 of Miscellaneous Records (Maps), in the office of the County Recorder of said County, described as follows:

Beginning at a point in the centerline of Ditch Road from which a point at the Southwest corner of lands conveyed by Leopolde Schiappa Pictia to Heinrich Maulhardt, by deed recorded in Book 63, page 158 of Official Records, bears North 23° 50' East 783.56 feet distant to the true point of beginning; thence from the true point of beginning as follows,

1st: South 67° 03' 00" East 2112.35; thence,

2nd: South 39° 55' 20" West 503.60 feet; thence,

3rd: North 67° 03' 00" West 1975.59 feet; thence,

4th: North 23° 50' 00" East 482.57 feet to the true point of beginning.

EXCEPT therefrom the interest in and West 40 feet of said land conveyed to Ventura County for public road and/or highway purposes, by deed recorded July 10, 1934, in Book 430, Page 43 of Official Records.

APN: 144-110-030 and 055

F CHECKLIST FOR PHASE I SITE VISIT

PHASE I ENVIRONMENTAL SITE ASSESSMENT CHECKLIST

Project Name: Proposed Rio School District Bus Parking and Future Facilities Phase I Environmental Assessment

Address: 10-Acre Portion of Assessor's Parcel No. 144-0-110-590 at 2600 North Rose Avenue, Ventura County, California

General Site Description: Berry Farm/Residence/Storage-Parking Lot Yard

I. Pre-arrival Background Information

1. **Current Owner(s):** KMS Industries, Inc.
   Owner Since: _____
2. **Current Occupants:** Reiter Affiliated Companies (berry farm) and _____ (residence)
   Occupant Since: _____
3. **Year Buildings Constructed :** Between 1953 and 1959.
4. **Site Zoning:** Agricultural Exclusive, 40 acre minimum,/Mineral Resource Protection (AE -40 ac/MRP)
5. **Land Use(s):** Berry Farm/Residence/Storage Yard

II. Site Observations:

A. Lot/Property Observations:

1. **Current Groundcover (%):** **Estimated from aerial photograph review.**
   84% berries, 2% residential (house, yard, pool), 14% bare ground (parking/storage)

Any concrete staining, soil staining or stressed vegetation? Some soil staining visible in the junk yard - oil spots from cars, next to ASTs & water tanks - spillage likely

2. **Is there any evidence of pesticide/herbicide use, storage or disposal on the property?** yes
   If yes, describe: fertilizers, and organic based pesticide/herbicide use

Have any pesticides/herbicides been used on the property at any time?* organic based

3. **Are there any electrical transformers or capacitors on the property?** Yes
   If yes, location: just south of the eastern storage area & on the northern edge of the property
   Evidence of leaks? no
   Have they been tested for PCBs*? unsure
   Transformers owned by utility company, owner, or tenant?* Utility Company, Southern California Edison

* Indicates question that requires follow-up during site owner/occupant interview.

JRS

4a. Are there any visible aboveground or underground storage tanks on the property? yes - no underground

If yes, location: northwest corner of site, next to large shipping container

Currently in use? yes

Contents: red diesel + gas

Size (gallons): 300

Evidence of leaks? none

When was the tank installed?* ~~2015~~ 2016

Is there a permit for the tank? If so, who is the listed owner?* yes - MacValley Oil Co

Have any leak tests been performed?* ~~likely~~ yes

If not in use, has the tank been "abandoned"? Documentation?* n/a

4b. Is there any evidence that an AST or UST has been removed from the site?

If yes, describe: none

When was the tank removed?*

Documentation?*

5. Are there any visible storage drums on the property? If yes, how many? about 50

If yes, location: water fertilizer containers, northwest corner of site

Describe size and contents (if known):

Evidence of spills/leaks? a few spills adjacent to the containers

Are they stored in a bermed area (any secondary containment)?

6. Any evidence of solid waste disposal on the property? none

If yes, location:

Describe:

Evidence of any hazardous materials?

7. Are there any ponds, pits, sumps, or ditches on the property? yes

If yes, location: there is a pool in the residence backyard

Describe:

Evidence of any hazardous materials? no

8. Describe the general air quality at the site: good

Are there activities on the site which produce air emissions (painting, printing, venting, exhaust): No JRS

If yes, describe:

Are the emissions monitored or permitted?*

Documentation?*

9. Are there any curb cuts, footings, or other signs of former buildings on the property? No

If yes, location:

When was the former building built/demolished?*

* Indicates question that requires follow-up during site owner/occupant interview.

B. Buildings

1. Are buildings present on site? Yes, a single story residence with attached garage.

If yes, when was it built Between 1953 and 1959

Approx. building square footage from aerial photos

2,820 ft^2

Please provide any available plans for the buildings and site. None available. JRS

2. Are there any cracks or openings (drains or sumps) on the first floor? no cracks or sumps

If yes, location: only shower & sink drains

Are they connected to storm drains, sewer lines or discharged into the ground?

shower, no storm drains, Site on Septic System JRS

Is there any evidence of spills or stains on the ground? none

Is there a possibility of hazardous waste spills or leaks?* no, only household cleaners inside

3. Are there painted surfaces on the exterior or interior of the building? Yes

Evidence of lead based paint? Based on the age of construction, yes.

If yes, location: On structure walls, cielings JRS

When were the walls painted?* Several times, At construction and after JRS

Have they been tested for lead?* No JRS

4. Are there any electrical transformers or capacitors inside the building? no

If yes, location:

Evidence of leaks?

Have they been tested for PCBs?*

Transformers owned by utility company, owner, or tenant?*

5. Is there any evidence of the presence of asbestos? Based on the age of construction, yes

If yes, location: floor tiles (9x9), May be in ducts, roofing materials JRS

Friable?

If no evidence of asbestos, but the building was built before 1979, has an asbestos survey been completed?*

6. Are there any chemicals or drums stored or used in the building?

If yes, location: paint in the garage, fertilizer

Evidence of leaks/spills? No

If drums, secondary containment? NA JRS

Have there been any documented leaks or spills of hazardous materials*? unknown

If yes, describe and list documentation: NA JRS

* Indicates question that requires follow-up during site owner/occupant interview.

III. Surrounding Properties

1. Describe generally the current use(s) of the adjacent properties (%):

Residential: ~20%	**Agricultural:** ~20%	**Industrial:**
Office:	**Commercial:** 60% (school + car dealership)	**Manufacturing:**
Other (specify)		

Describe any adjacent propertied used for industrial, manufacturing, or refining purposes:

adjacent areas include: - car dealerships & school for commercial, Residences on west side of North Rose Avenue. JRS

Do they pose a possible threat to groundwater or air quality at the site? no

If yes, explain:

Checklist completed by: Paige Sawaya

Date: 4/20/21

Checked by: James R Steele James R. Steele

Date: 4/21/21

Notes:

* Indicates question that requires follow-up during site owner/occupant interview.

G PROPERTY OWNNER/OCCUPANT QUESTIONNAIRE

PHASE I ENVIRONMENTAL SITE ASSESSMENT
OWNER/OCCUPANT QUESTIONNAIRE

Name of Site: : Proposed Rio School District Bus Parking and Future Facilities Phase I Environmental Assessment	**Tetra Tech Project Number:** 112G-SBA-T41363
Description of Project: Phase I Environmental Site Assessment	**Location of Project:** 10-Acre Portion of Assessor's Parcel No. 144-0-110-590 at 600 North Rose Avenue, Ventura County, California

This information is intended to assist the Environmental Professional conducting the Phase I Environmental Site Assessment in obtaining information indicating Recognized Environmental Conditions in connection with the property.

STRUCTURES AND OTHER IMPROVEMENTS
1. Are any structures present on the property? If so, please identify the type, size and age. *(for example: "one single-story wood-frame residence built in 1974" or "one 75,00 sq. ft. concrete warehouse built in 1993")*
Single story home. Built year and sq. footage unknown as we just rent from landowner.
2. Are any roads present on the property? Paved or unpaved?
Paved road to enter from Rose Ave.
3. Is there a heating or cooling system in place? What type of fuel is used? *(for example: "in-building HVAC system" or "central heat and AC" or "a propane tank is used for heating system")*
Heating system
4. What is the source for potable water? Public water system or Private domestic well? Domestic well
5. What type of sewage disposal system is in use? Public sewer or on-site septic tank system? Septic tank, location unknown

6. Indicate the solid waste (trash) disposal provider, if any.
City of Oxnard/Harrison
7. Indicate the electrical utility provider, if any.
Edison
8. Indicate the natural gas provider, if any.
Home does not have gas, all electrical.
9. Are any wells present at the property? *(such as water wells, groundwater monitoring wells, oil wells, dry wells, abandoned or destroyed wells)*
Yes, 2 well. domestic and for farming
10. Are there any drains or ditches on the property for stormwater or wastewater disposal?
Yes, far west perimeter side of the property.
PETROLEUM PRODUCTS AND HAZARDOUS MATERIALS
11. Has the property or any adjoining property ever been used for any of the following? *gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo-developing lab, junkyard or landfill, or as a waste treatment, storage, processing or recycling facility* Please identify the use, if any.
No
12. Are petroleum products, hazardous materials or other chemicals used or stored on-site? Identify. *(Typically, only large amounts of such items are of concern. Normal household chemicals are not generally kept in amounts that would pose a hazard. Items of concern would include damaged automotive batteries, pesticides, paints, fuels, lubricants, solvents, photoprocessing wastes and other chemicals)*
Gas/Diesel Tank for farming operations. 500 gl.

13. Are there or have there ever been any aboveground or underground storage tanks on the property?
(Please identify number, size, contents and location on the property, and provide recent inspections/test records)

Fertilizer tanks above ground 250gl. But rotate as use is needed and are not fixed containers

OTHER ITEMS OF CONCERN

14. Are there any stained walls, flooring or soil on the property? Any evidence of water damage or mold growth?

No

15. Has fill dirt been brought onto the property that originated from an off-site source? If so, is the origin of the dirt known? Was the fill dirt tested for possible contamination?

Not to knowledge

16. Have any petroleum products, hazardous substances, tires, batteries or other waste materials been dumped, buried or burned on the property?

No

17. Are there any transformers, capacitors or hydraulic equipment on the site for which records exist indicating the presence of polychlorinated biphenyls (PCBs)?
(PCB use was generally phased out in the mid 1970s)

No

18. Are you aware of any other conditions at the site which might pose a concern, such as the presence of lead-based paint or asbestos-containing building materials?

No

19. Are you aware of any pending, threatened or past litigation or administrative proceedings regarding hazardous substances or petroleum products related to the property?

No

In addition to the responses above, please provide copies of any of the following Helpful Documents, if available:

••Environmental Site Assessment Reports (**including** previous Phase I ESA reports, subsurface investigation reports, Asbestos and Lead-based Paint Survey reports)
•Environmental Compliance Audit Reports
•Environmental Permits (for example, solid waste disposal permits, hazardous waste disposal permits, etc.)
•Registrations for underground or aboveground storage tanks
•Material Safety Data Sheets
•Community Right-to-Know
•Safety Plans, Spill Prevention Plans, etc.
•Reports regarding hydrogeologic conditions on the property or surrounding area
•Notices or correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
•Hazardous waste generator notices or reports
•Risk Assessments
•Recorded Activity and Use Limitations

H USER QUESTIONNAIRE

URGENT and CONFIDENTIAL

USER QUESTIONNAIRE for PHASE I ESA

AS REQUIRED by ASTM Standard E1527-05

Site Name:. Rio Del Valle Middle School Expansion Project South Parcel
Address: 2600 North Rose Avenue, Oxnard, California 93036

Completed By: Mr. Wael Saleh, Assistant Superintendent Business Services, Rio School District

The person who will use the Phase One should provide the following information. Please fill in this form to the best of your ability, explaining any Yes answers on a separate sheet of paper. Without these answers, our report would have to note that the Phase One is incomplete, and your Landowner Liability Protections could be at risk.

1. **Environmental Cleanup Liens.** ASTM requires the User to check for environmental liens that may be filed or recorded against the subject property under federal, tribal, state or local law. Such liens might be listed in the "exceptions to coverage" in the property's title insurance commitment or policy. Failure to check for these liens could put your Landowner Liability Protections at risk.

   Have you checked for these environmental cleanup liens? ☐ Yes ☒ No
   Are you aware of any such liens against the subject property? ☐ Yes ☒ No

2. **Activity and Use Limitations (AULs).** These include engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place at the site or filed under federal, tribal, state or local law. The title commitment or policy might also list AULs.

   Are you aware of any possible AULs involving the subject site? ☐ Yes ☒ No

3. **Specialized Knowledge.** This involves personal knowledge or experience related to the subject property or nearby properties. For example, if you are involved in the same line of business as the current or former occupants of the property or an adjoining property, you would probably know of any chemicals, oil, degreasers, gasoline, or other hazardous substances commonly used in that type of business.

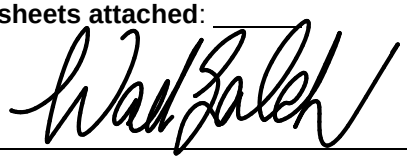
   Do you have any specialized knowledge that might indicate the past or present use or release of such substances on the subject or nearby properties? ☐ Yes ☒ No

4. **Fair Market Value (FMV).** A purchase price significantly below FMV may indicate an environmental problem. Please note that this question does not require an appraisal of the property. If the price is significantly below FMV, the User should consider whether it might be because contamination may be present at the property.

   Is the purchase price significantly below fair market value? ☐ Yes ☒ No

5. **Obvious Indicators.** This involves past or present spills, stains, releases, cleanups, etc. on or near the site.

   Do you know of any obvious indicators of possible contamination on or near the site? ☐ Yes ☒ No



6. **Common Knowledge.** Please use a separate sheet if necessary.

   Describe the past uses of the property: **Agricultural land use.**

   Describe any specific chemicals that may have been present at the property: **I have no knowledge of chemicals that may have been present at the property.**

   Describe any other information that may help us identify possible contamination: **I have no knowledge of possible contamination at the property.**

# of separate sheets attached: _____

Your Signature  **Date** 11/30/2021

Explain Yes answers on a separate sheet.

1.0 INTRODUCTION

1.1 BACKGROUND

This report presents the findings of a Phase II Environmental Site Assessment (ESA) prepared by Tetra Tech for the Rio School District (RSD) to evaluate Ten-Acre Portion of Assessor's Parcel No. (APN) 144-0-110-225 in the Oxnard planning area of Ventura County, California (hereinafter referred to as the Site). Sage Realty (Sage) is coordinating this project for RSD. The Site location is shown on Figure 1.

The current owner of the Site is KMS Industries, Inc. The Site is leased by Reiter Affiliated Companies for berry production and is currently used for the production of berries. Information provided by the RSD and Ventura County Assessor's office indicates that the Site is a 10-acre portion of APN 144-0-110-225, a 92.53-acre lot. The Site is bounded by North Rose Avenue on the northwest, land developed in berry cultivation on APN 144-0-110-225 on the northeast and southeast, and the RSD's Rio del Valle Middle School on the southwest (Figure 2).

The Phase II ESA was performed as part of the due diligence efforts required to support development of the Site by the RSD. It is our understanding that the RSD proposes to initially develop the Site for maintenance, operations, and transportation (MOT) facilities. School site expansion may be performed in approximately 10 years.

Tetra Tech completed a Phase I ESA for the Site (Tetra Tech 2020). The Phase I ESA identified four recognized environmental concerns (RECs) for the Site. REC 1 is for potential former agricultural pesticide application (specifically organochlorine pesticides (OCPs) and arsenic pesticides). REC 2 is for potential bunker oil releases from potential former smudge pot frost abatement practices. REC 3 is for polychlorinated biphenyl (PCB)-containing transformers (three pole-mounted electrical transformers are located along the southwest Site boundary). REC 4 is for hazardous pipelines within 1,500 feet of the Site (two high volume water transmission pipelines are buried beneath North Rose Avenue). Tetra Tech recommended that a Phase II ESA be performed to evaluate RECs 1, 2, and 3 as part of the pre-acquisition due diligence process. Because the Site may become part of a K-12 school in the future, the Phase II ESA field work sampling program should be planned and performed in accordance with California Department of Toxic Substances Control (DTSC) guidelines. A hazardous pipeline assessment should be conducted in accordance with the California Department of Education (CDE) guidelines in *Guidance Protocol for School Site Pipeline Risk Analysis* (CDE 2007) to evaluate REC 4. The hazardous pipeline assessment is not required under ASTM Standard Practice E1527-13 (ASTM 2013) but will be required by CDE if the Site is developed as a K-12 school. Tetra Tech recommended that the RSD wait until the Site is developed as a K-12 school to complete the hazardous pipeline assessment to address REC 4.

This Phase II ESA was completed to further assess RECs 1, 2, and 3 that were identified in the Phase I ESA (Tetra Tech 2020).

1.2 DESIGNATED CONTACT PERSONS

The primary designated contact persons for Tetra Tech are Messrs. James (Jim) Steele and Randy Westhaus. Jim Steele is the Project Manager and Randy Westhaus is Tetra Tech's California Schools Director. Their contact information is:

James R. Steele, P.G., C.E.G., C.Hg.
Tetra Tech, Inc.
5383 Hollister Avenue, Suite 130

Santa Barbara, CA 93111
Phone (805) 681-6302
Email: jim.steele@tetratech.com

Randy Westhaus, P.E.
Tetra Tech, Inc.
5383 Hollister Avenue, Suite 130
Santa Barbara, CA 93111
Phone (805) 455-0603 (805)
Email: randy.westhaus@tetratech.com

The designated contact person for the RSD is Mr. Wael Saleh. Mr. Saleh is the Assistant Superintendent/Chief Business Official for the RSD. The contact information for Mr. Saleh is:

Mr. Wael Saleh, C.P.A., M.B.A.
Assistant Superintendent/Chief Business Official
Rio School District

Phone: 485-6302, Ext. 2130
Oxnard, California 93036
wsaleh@rioschools.org

2.0 SITE DESCRIPTION

2.1 SITE LOCATION/DESCRIPTION

The Site is located on a 10-acre parallelogram-shaped portion of APN 144-0-110-225, a 92.53-acre parcel in the Oxnard planning area of Ventura County, California (Figures 1 and 2). The geographic coordinates of the Site are approximately Latitude 34° 14' 2.39" North, Longitude 119° 9' 10.61" West (Google Earth 2019). Surface elevations at the Site are approximately 90 feet above mean sea level (amsl) (United States Geological Survey [USGS] 2018).

At the time of the October 9, 2020 field sampling event, the Site comprised an approximate 10-acre area of the 92.53-acre parcel owned by KMS Industries, Inc. and was leased by Reiter Affiliated Companies for raspberry production. The entire Site was planted in organic raspberries under shade structures.

2.2 SITE VICINITY CHARACTERISTICS

The Site is located in an area developed primarily for residential and agricultural land use situated in the El Rio/Del Norte General Plan Area of Ventura County (Ventura County 2011). (Figures 1 and 2). The Ventura County zoning for Site and adjacent areas is shown on Figure 2 (Ventura County 2019; Ventura County Resource Management Agency Planning Division 2020). The Site and areas adjacent to the Site on the northeast and southeast are developed for agricultural production and the area on North Rose Avenue northwest of the Site are zoned AE-40 ac/MRP (Agricultural Exclusive minimum 40-acre lot/Mineral Resources Protection). The lot adjacent to the southwest of the Site occupied by the RSD's Rio del Valle Middle School is zoned RE-20,000 square ft (Rural Exclusive 20,000-square foot minimum lot). The area adjacent to the south corner of the Site on North Rose Avenue is zoned RE-20 ac (Rural Exclusive 20-acre minimum lot). The areas across North Rose Avenue from the Site are largely developed in residential housing are zoned RE-10,000 square ft (Rural Exclusive 10,000-square foot minimum lot) and RE-20,000 square ft (Rural Exclusive 20,000-square foot minimum lot).

2.3 ADJACENT RESIDENTIAL AND COMMERCIAL AREAS

North Rose Avenue is located immediately adjacent to the northwestern Site boundary. The area across North Rose Avenue from the Site is largely developed in residential land use except for the water production well and water storage tank facility owned and operated by the Vineyard Avenue Estates Water Mutual Company at the corner of North Rose Avenue and Corsicana Drive (Kadah 2020). The groundwater production well (OH Well # 14), owned and operated by the United Water Conservation District (UWCD), is located immediately adjacent to the southwest corner of the Site (Kadah 2020). Rio del Valle Middle School is located adjacent to southwest Site boundary. The areas northeast and southeast of the Site are being used for raspberry production by Reiter Affiliated Companies (Figure 2). The UWCD El Rio Spreading Grounds are located approximately 0.25 to 1.0 mile north of the Site on the northwest side of North Rose Avenue. Water is diverted from the Santa Clara River to the El Rio Spreading Grounds to recharge the underlying aquifers (refer to Section 3.3.1).

THIS PAGE INTENTIONALLY LEFT BLANK

3.0 PHYSICAL SETTING AND CONDITIONS

The Site is depicted on the Oxnard, California Quadrangle USGS 7.5-minute topographic series map (USGS 2018) (Figure 1). The geographic coordinates of the Site are approximately Latitude 34° 14' 2.39" north, Longitude 119° 9' 10.61" west. The EDR report indicates that the Site elevation is approximately 97 feet amsl (EDR 2020).

3.1 REGIONAL GEOLOGY

The Site is located in Ventura County on the Oxnard Plain of the central Ventura Basin within the Western Transverse Ranges geomorphic province of California. This geomorphic province is distinguished by the prevailing east-west linear trend of its geologic structure and geomorphology in contrast to the predominant northwest-southeast trend of the geomorphic features within most other provinces of the state. The province is bounded by major faults, including the San Andreas Fault zone in the northeast, the Big Pine fault in the north and the Malibu Coast fault in the south. Most of the faults in Ventura County are reverse faults which dip north, including the Pine Mountain, Red Mountain, San Cayetano, Santa Susana, Simi, Ventura and Malibu Coast faults (Norris and Webb 1990).

The Ventura Basin is large synclinal structure situated between the Santa Ynez Range and Topa Mountains on the north, the Channel Islands and Santa Monica Mountains on the south, the San Gabriel Fault on the east, and extending to the western end of the Santa Barbara Channel (Norris and Webb 1990). Structure in the Oxnard Plain is characterized by a series of broadly folded west-trending and east-northeast–trending anticlines and synclines associated with thrust and reverse faults that formed in the Saugus Formation and may have also deformed the overlying older alluvium (California Department of Conservation, California Geologic Survey [CGS] 2002).

3.2 LOCAL GEOLOGY

Locally, the Site is situated in the Oxnard Plain sub-province. Lithologic units of sedimentary origin underlying the nearly flat Oxnard Plain are approximately 45,000 feet in thickness and consist of Upper Cretaceous, Tertiary, and Quaternary-age units which have been deposited on a pre-Upper Cretaceous base of igneous and/or metamorphic rock. Unconsolidated Holocene (last 11,000 years) sediments beneath the Site were deposited during the post-glacial period in marine, lagoonal, lacustrine, fluvial-flood plain, deltaic and eolian environments, including the pre-historic delta of the ancient Santa Clara River and Calleguas Creek and reach a depth of approximately 900 feet beneath the Oxnard Plain (Turner and Mukae 1975).

3.3 HYDROLOGY

3.3.1 Hydrogeology

The Site is situated at the eastern edge of the Oxnard Forebay basin, a subbasin of the larger Santa Clara-Calleguas groundwater basin. The Oxnard Forebay is an important groundwater recharge area for valuable resources of groundwater in aquifers underlying the Oxnard Plain. The unconsolidated sediments beneath the Oxnard Forebay and the project site are composed of both continental and marine deposits of Tertiary and Quaternary age. They contain multiple aquifers of coarse grain sediments with intervening fine grain aquitards. Aquifers have been grouped into an Upper Aquifer System (UAS) and a Lower Aquifer System (LAS) based on changes in geologic structure and separated in many areas by regional layers of low permeability clay. The UAS sediments are relatively flat lying and extend to approximately 400 feet beneath the Site. The sediments in the LAS are more structurally complex, resulting from folding and faulting. In the Oxnard Forebay, alluvial sediments in the subsurface are predominantly coarse grain sands

and gravels. Fine grain sediments, such as silts and clays, that can act as confining layers are generally absent or discontinuous. This condition allows for direct recharge of the UAS from the surface and some recharge of the LAS from the UAS in the subsurface (Fox Canyon Ground Water Management Agency 2017; Turner and Mukae 1975).

The first encountered groundwater beneath the Site is in the UAS. Review of potentiometric maps for the UAS from 1972 through 2016 indicate that the depth to groundwater ranged from approximately 33 feet below ground surface (bgs) to 133 feet bgs during that time period (Fox Canyon Groundwater Management Agency 2015). The most recent groundwater elevation data for fall 2016 indicates that the first encountered groundwater in the Site area was at approximately -36 feet below mean sea level (msl) or approximately 133 feet bgs (Fox Canyon Groundwater Management Agency 2019). The depth to the highest known historical groundwater level in the Site area is approximately 20 feet bgs (CGS 2002).

3.3.2 Flood Zoning

According to the U.S. Department of Homeland Security Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map No. 06111C0910E, the Site is not located in a flood hazard area (FEMA 2020).

3.3.3 Wetlands

The EDR report indicates that the Site area is covered in the National Wetlands Inventory prepared by the U.S. Fish and Wildlife Service (USFWS) (EDR 2020). The U.S. Fish and Wildlife Service maintains the National Wetlands Inventory (NWI), a geographic information system (GIS)-based relational database of wetlands that have been mapped throughout the country. Based on the information provided in the EDR Report and review of the USFWS map for the area surrounding the Site, the nearest wetland is the UWCD El Rio Spreading Grounds, located 0.25 to 1 mile north of the Site (USFWS 2020).

3.3.4 Asbestos Containing Rocks

Tetra Tech has reviewed available topographic and geologic maps for the Site area and *A General Location Guide for Ultramafic Rocks in California – Areas More Likely to Contain Naturally Occurring Asbestos* (CDMG 2000) for potential sources of naturally occurring asbestos (NOA) and believes the risk for NOA at the Site is low. The nearest sources of NOA are approximately 40 miles northwest of the Site in the Santa Ynez River Watershed located in Santa Barbara County.

4.0 PHASE II ESA FIELD ASSESSMENT

4.1 RATIONALE

Tetra Tech implemented the field sampling in accordance with the following DTSC guidance documents:

- *Preliminary Endangerment Guidance Manual* (DTSC January 1994, Revised October 2015) (PEA Guidance Manual), and
- *Interim Guidance for Sampling Agricultural Properties (Third Revision)* (DTSC 2008) (Agricultural Fields Guidance).

For properties such as the Site where agricultural row crop production was performed between 1950 and 1974, the Agricultural Fields Guidance (DTSC 2008) recommends assessment of shallow subsurface soil for OCPs and arsenic. In addition, smudge pots containing fuel oil were likely formerly used at the Site for frost abatement. Therefore, soil sampling was performed to assess the potential impacts to Site soils from former commercial pesticide application (OCPs and arsenic), and from fuel oil used in smudge pots for former frost abatement practices (semivolatile organic compounds [SVOCs], polyaromatic hydrocarbons [PAHs], and diesel fuel range total petroleum hydrocarbons (TPHd) and crude oil range total petroleum hydrocarbons (TPHc).

Soil sampling was also performed to assess the potential release of PCBs to Site soils from the pole-mounted electrical transformers formerly located at the southwest Site boundary along North Rose Avenue.

4.2 SITE HEALTH AND SAFETY

A Site-Specific Health and Safety Plan (SSHSP) was prepared for the Phase II ESA. The SSHSP is required by law to perform work at sites where workers may be exposed to hazardous waste and/or materials. The SSHSP was prepared in accordance with Code of Federal Regulations (CFR) Section 1910.120, California Administrative Code (CAC), Title 8, and the Tetra Tech Corporate *Health and Safety Manual* (Tetra Tech 2011). The SSHSP included a Site location map and a map showing the most direct route to the nearest emergency care center, the identity of the Site Health and Safety Officer, lists of the chemicals, materials, equipment, physical conditions that pose a threat or hazard, and the level of protection that will provide for proper worker safety. Proof of valid and current Occupational Safety and Health Administration (OSHA) training certifications is required for all Site workers. The SSHSP also described the procedures and practices that were followed during field activities, including safety monitoring and field decontamination. All fieldwork was performed in accordance with the SSHSP.

4.3 SOIL SAMPLE COLLECTION AND SAMPLE ANALYSIS SCHEDULE

The surface soil sample analysis schedule is presented in Table 1 and the surface soil sample locations are shown on Figure 3. Tetra Tech collected soil samples using hand sampling techniques at 20 locations in the 10-acre Site in an equal-spaced grid pattern to assess potential pesticide and fuel oil in surface soils. Soil samples were also collected at one location to assess potential PCBs in surface soils beneath a long-term pole mounted transformer location. The soil sample analyses were performed by BC Laboratories, Inc. (BC), a California State Certified laboratory.

4.3.1 Assessment of Potential Impacts to Soil from Past Agricultural Land Use

Assessment of Potential OCPs and Arsenic in Soil. Based on rationale recommended in the PEA Guidance Manual (DTSC 2015) and Agricultural Fields Guidance (DTSC 2008), Tetra Tech collected soil

samples using hand sampling techniques at 20 locations (sample locations SS-1 through SS-20) in the 10-acre Site in an equal-spaced grid pattern (Figure 3 and Table 2). At each location, a surface soil sample was collected at depths of 0 to 0.5 feet bgs. The twenty discrete surface soil samples were collected and combined into five composite samples and one duplicate composite sample by the analytical laboratory for OCP analysis using United States Environmental Protection Agency (EPA) method 8081A (Table 1). Surface soil samples SS-1 through SS-4 were combined into composite sample Comp 1 and duplicated sample Comp DUP 1. Surface soil samples SS-5 through SS-8 were combined into composite sample Comp 2. Surface soil samples SS-9 through SS-12 were combined into composite sample Comp 3. Surface soil samples SS-13 through SS-16 were combined into composite sample Comp 4. Surface soil samples SS-17 through SS-20 were combined into composite sample Comp 5. As required by the Agricultural Fields Guidance document, five discrete surface soil samples (samples SS-1, SS-5, SS-10, SS-16, and SS-20) and one duplicate soil sample from sample SS-5 (6 soil samples total) were collected for arsenic analysis using EPA method 6010B within the OCP sampling grid (Table 3).

Assessment of Potential Smudge Pot Fuel Oil in Soil. To assess the Site for potential impacts to soil from smudge pot fuel oil, Tetra Tech collected surface soil samples using hand sampling techniques at depths of 0 to 0.5 feet bgs at 10 locations across the Site within the OCP sampling grid. Ten discrete surface soil samples (samples SS-1, SS-3, SS-5, SS-7, SS-9, SS-11, SS-13, SS-15, SS-17, and SS-19) and two duplicate soil samples at sample locations SS-5 and SS-17 (12 soil samples total) were collected and analyzed for SVOCs using EPA method 8270C, PAHs using EPA method 8310, and TPHd and TPHc using EPA method 8015B within the OCP sampling grid (Tables 4, 5, and 6).

4.3.2 Assessment of Potential PCB Impacts to Soil

To assess the Site for potential impacts to soil from PCBs that may have been released from the pole-mounted electrical transformer located on the southwestern Site boundary, Tetra Tech collected surface soil samples at a single location (sample location SS-21) using hand sampling techniques at depths of 0 to 0.5 feet bgs from beneath the power pole (Figure 3). One discrete surface soil sample (Sample SS-21) and one duplicate soil sample (two soil samples total) were collected and analyzed for PCBs using EPA method 8081 (Table 3).

4.4 SOIL SAMPLE ANALYSIS RESULTS

4.4.1 Analytical Results for Organochlorine Pesticides

The OCP sample results are included in Appendix A, summarized in Table 2, and the sample locations are shown on Figure 3. Low concentrations of OCPs were detected in all five surface soil composite samples and the composite duplicate sample. The OCPs 4,4'-DDD (DDD), 4,4'-DDE (DDE), 4,4'-DDT (DDT), and dieldrin were detected in all the composite samples. For each OCPs detected at concentrations above the laboratory method detection limit (MDL), the maximum detected concentration occurred in the following samples:

- DDD was detected at a maximum concentration of 0.024 milligrams per kilogram (mg/kg) in composite sample Comp 2;
- DDE was detected at a maximum concentration of 0.27 mg/kg in composite sample Comp 2;
- DDT was detected at a maximum concentration of 0.049 mg/kg in composite sample Comp 2; and

- Dieldrin was detected at a maximum concentration of 0.052 mg/kg in the composite sample Comp 2.

No other OCPs were detected at concentrations above the laboratory MDLs, which are less than their respective U.S. EPA RSLs (U.S. EPA 2020).

With the exception of dieldrin, none of the OCPs were detected at concentrations that exceeded their respective U.S. Environmental Protection Agency (U.S. EPA) Regional Screening Levels (RSLs) (U.S. EPA 2020) for residential soil (Table 2). The dieldrin concentration in composite sample Comp 2 (0.052 mg/kg) exceeded the U.S. EPA RSL for dieldrin of 0.034 mg/kg. In general, low concentrations of OCPs were detected at similar levels in each composite sample, supporting the agricultural use scenario determined from the review of past Site uses.

4.4.2 Analytical Results for Arsenic

The arsenic sample results are included in Appendix A, summarized in Table 3, the sample locations are shown on Figure 3. Arsenic concentrations in the soil samples ranged from 3.0 mg/kg in sample SS-16 to 4.8 mg/kg in sample DUP-1, the duplicate sample for sample SS-5. These sample results are below the DTSC arsenic screening value for soil at California School Sites (DTSC-ASL) of 12 mg/kg (DTSC 2008).

4.4.3 Analytical Results for SVOCs

The SVOC sample results are included in Appendix A, summarized in Table 4, and the sample locations are shown on Figure 3. SVOCs were detected in the following soil samples:

- Bis(2-Ethylhexyl)phthalate was detected in sample SS-3 at 0.036 mg/kg as compared to the U.S. EPA RSL of 39 mg/kg (U.S. EPA 2020);

- DDD was detected in samples SS-3 at 0.0068 mg/kg, SS-5 at 0.025 mg/kg, DUP 1, the duplicate sample for sample SS-5 at 0.021 mg/kg, SS-7 at 0.012 mg/kg, SS-9 at 0.021 mg/kg, SS-11 at 0.01 mg/kg, SS-13 at 0.0084 mg/kg, SS-17 at 0.008 mg/kg, and DUP 2, the duplicate sample for sample SS-17 at 0.0074 mg/kg as compared to the U.S. EPA RSL of 1.9 mg/kg mg/kg (U.S. EPA 2020);

- DDE was detected in samples SS-3 at 0.06 mg/kg, SS-5 at 0.21 mg/kg, DUP 1, the duplicate sample for sample SS-5 at 0.17 mg/kg, SS-7 at 0.089 mg/kg, SS-9 at 0.17 mg/kg, SS-11 at 0.085 mg/kg, SS-13 at 0.10 mg/kg, SS-15 at 0.063 mg/kg, SS-17 at 0.081 mg/kg, DUP 2, the duplicate sample for sample SS-17 at 0.087 mg/kg, and SS-19 at 0.081 mg/kg as compared to the U.S. EPA RSL of 2.0 mg/kg (U.S. EPA 2020);

- DDT was detected in samples SS-3 at 0.0093 mg/kg and SS-5 at 0.014 mg/kg as compared to the U.S. EPA RSL of 1.9 mg/kg mg/kg (U.S. EPA 2020); and

- Dieldrin was detected in sample SS-3 at 0.021 mg/kg as compared to the U.S. EPA RSL of 0.034 mg/kg (U.S. EPA 2020).

No other SVOCs in the EPA Method 8270C list were detected at concentrations above their laboratory MDLs, which were less than less than their respective U.S. EPA RSLs (U.S. EPA 2020).

4.4.4 Analytical Results for PAHs

The PAH sample results are included in Appendix A, summarized in Table 5, and the sample locations are shown on Figure 3. PAHs were detected in the following soil samples:

- Fluoranthene was detected in samples SS-1 at 0.00068 mg/kg, SS-17 at 0.00067 mg/kg, and SS-19 at 0.0011 mg/kg as compared to the U.S. EPA RSL of 2,400 mg/kg (U.S. EPA 2020);

- Phenanthrene was detected in samples SS-19 at 0.00091 mg/kg, there is no screening level for phenanthrene; and

- Pyrene was detected in samples SS-1 at 0.00071 mg/kg, SS-17 at 0.00078 mg/kg, and SS-19 at 0.0011 mg/kg as compared to the U.S. EPA RSL of 1,800 mg/kg (U.S. EPA 2020).

No other PAHs in the EPA 8270 Method SIM list were detected at concentrations above their laboratory MDLs, which were less than less than their respective U.S. EPA RSLs (U.S. EPA 2020).

4.4.5 Analytical Results for TPHd and TPHc

The TPHd and TPHc sample results are included in Appendix A, summarized in Table 6, and the sample locations are shown on Figure 3. Figure 4 presents a hits map that shows the sample results at the sample locations. THPd and TPHc were detected in nine of the ten of the surface soil samples collected at Site and the two duplicate surface soil samples collected for TPHd and TPHc assessment as follows:

- TPHd was detected in samples SS-1 at 4,800 mg/kg, SS-3 at 2,000 mg/kg, SS-5 at 3,200 mg/kg, DUP 1, the duplicate sample for sample SS-5 at 1,400 mg/kg, SS-7 at 3,300 mg/kg, SS-9 at 3,100 mg/kg, SS-11 at 4,100 mg/kg, SS-13 at 2,000 mg/kg, SS-17 at 170,000,000 mg/kg, DUP 2, the duplicate sample for sample SS-17 at 870,000 mg/kg, and SS-19 at 17 mg/kg as compared to the San Francisco Bay Regional Water Quality Control Board (SFRWQCB) Tier 1 Environmental Screening Level (ESL) (SFRWQCB 2019) for residential soil of 260 mg/kg;

- TPHc was detected in samples SS-1 at 35,000 mg/kg, SS-3 at 25,000 mg/kg, SS-5 at 19,000 mg/kg, DUP 1, the duplicate sample for sample SS-5 at 23,000 mg/kg, SS-7 at 28,000 mg/kg, SS-9 at 26,000 mg/kg, SS-11 at 28,000 mg/kg, SS-13 at 24,000 mg/kg, SS-17 at 15,000,000 mg/kg, DUP 2, the duplicate sample for sample SS-17 at 670,000 mg/kg, and SS-19 at 81,000 mg/kg as compared to the SFRWQCB Tier 1 ESL for residential soil of 1,600 mg/kg (SFRWQCB 2019); and

- TPHd and TPHc were not detected in surface soil sample SS-15.

TPHd was detected in samples SS-1, SS-3, SS-5, DUP 1, SS-7, SS-9, SS-11, and SS-13 at concentrations exceeding the SFRWQCB Tier 1 ESL for residential soil of 260 mg/kg by one order of magnitude. In samples SS-17 and DUP 2, the TPHd concentrations exceeded the SFRWQCB Tier 1 ESL for residential soil of 260 mg/kg by six and three orders of magnitude, respectively (SFRWQCB 2019).

TPHc was detected in samples SS-1, SS-3, SS-5, DUP 1, SS-7, SS-9, SS-11, SS-13, and SS-19 at concentrations exceeding the SFRWQCB Tier 1 ESL for residential soil of 1,600 mg/kg by one order of magnitude. In samples SS-17 and DUP 2, the TPHc concentrations exceeded the SFRWQCB Tier 1 ESL for residential soil of 1,600 mg/kg by nine and four orders of magnitude, respectively (SFRWQCB 2019).

4.4.6 Analytical Results for PCBs

The PCB sample results are included in Appendix A, are summarized in Table 4, and the sample location is shown on Figure 3. The PCB aroclor 1260 concentrations in the soil samples SS-21 and DUP 3, the duplicate sample for samples SS-21 were 0.0083 mg/kg and 0.0070 mg/kg, respectively (Table 3) as compared to the U.S. EPA RSL of 0.24 mg/kg (U.S. EPA 2020). No other PCB aroclors were detected in samples SS-21-0 and DUP 3. All of the soil sample results for PCBs were less than their U.S. EPA RSL (U.S. EPA 2020).

THIS PAGE INTENTIONALLY LEFT BLANK

5.0 CONCLUSIONS

5.1 GENERAL SITE CONDITIONS

The Site is owned by KMS Industries, Inc., is leased by Reiter Affiliated Companies, and is currently used for the production of organic raspberries. The grounds were clean and well-kept. No buildings exist on Site. Additionally, no chemical products, storage drums, aboveground storage tanks (ASTs) or underground storage tanks (USTs) exist on Site. Dirt roads line the southern and western sides of the Site and separate rows of raspberries. No utilities currently are connected to the Site. Utilities serving the Site area are electricity (Southern California Edison) and natural gas (the Southern California Gas Company). Water for crop irrigation at the Site is provided by five groundwater wells owned by KMS Industries, Inc. Solid waste disposal is performed by Harrison Industries. The Site is adjacent to other areas currently being used for organic raspberry production on the northeast and southeast sides. Three pole-mounted electrical transformers are adjacent to the Site's southwest corner. A groundwater production well operated by the UWCD is located adjacent to the southern corner of the Site. The Rio del Valle Middle School is located adjacent to the southwestern Site boundary. Two high volume water transmission pipelines (one operated by the City of Oxnard and one operated by the UWCD) are located 30 and 40 feet, respectively northwest of the Site beneath North Rose Avenue. A groundwater production and treatment facility operated by the Vineyard Avenue Estates Water Mutual Company is located northwest of the Site across North Rose. The Site is not located in an oil field. The nearest oil field is the Santa Clara Avenue Field, located approximately 0.5 to 1 mile southeast of the Site. There are no known active or abandoned oil wells on Site. The "McGrath-McCormick 1", located approximately 500 feet northeast of the Site, is the oil well closest to the Site. The "McGrath-McCormick 1" oil well is a dry (non-oil producing) well that was drilled and abandoned in 1959.

5.2 PHASE II ESA RESULTS

This Phase II ESA was completed to further assess RECs 1, 2, and 3 that were identified in the Phase I ESA (Tetra Tech 2020) as follows:

- REC 1, potential impacts to surface and near surface soil at the Site from former pesticide applications associated with former agricultural land use practices, specifically OCPs and arsenic;
- REC 2, potential bunker oil releases from potential former smudge pot frost abatement, specifically, SVOCs, PAHs, TPHd, and TPHc; and
- REC 3, PCBs potentially released to surface soils beneath a long-term pole mounted electrical transformer location.

Based on review of the Phase II ESA surface soil sample results the Site appears to have been slightly impacted by OCPs and significantly impacted by TPHd, and TPHc from past agricultural production activities. The surface soil sample results for arsenic, SVOCs, PAHs, and PCBs did not yield results with concentrations above relevant screening levels. The sample results OCPs, THPd, TPHc, and arsenic are summarized below.

OCPs were detected in all five of the composite surface soil samples and the composite duplicate surface soil sample (Table 2). The OCPs DDD, DDT, and DDE were detected at concentrations below their respective screening levels. Dieldrin was detected in one sample at a concentration of 0.052 mg/kg, slightly above the screening level of 0.034 mg/kg. No other OCPs were identified in the composite surface soil sample results from the Site.

The Site surface soils appear to have been significantly impacted by TPHd and TPHc, potentially from smudge pot fuel (Table 6 and Figure 4). TPHd was detected in seven of the ten surface soil samples and one duplicate surface soil sample at concentrations exceeding the SFRWQCB Tier 1 ESL for residential soil of 260 mg/kg by one order of magnitude. In one sample the TPHd concentrations exceeded the SFRWQCB Tier 1 ESL for residential soil by six and another by and three orders of magnitude (SFRWQCB 2019). TPHc was detected in eight of the ten surface soil samples and one duplicate sample at concentrations exceeding the SFRWQCB Tier 1 ESL for residential soil of 1,600 mg/kg by one order of magnitude. In samples SS-17 and DUP 2, the TPHc concentrations exceeded the SFRWQCB Tier 1 ESL for residential soil of 1,600 mg/kg by nine and four orders of magnitude, respectively (SFRWQCB 2019). As shown on Figure 4, the elevated TPHd and TPHc in surface soil appears to be fairly evenly distributed across most of the Site.

Arsenic was detected in the five surface soil samples and duplicate surface soil sample collected to assess arsenic at the site at concentrations ranging from 3.0 mg/kg to 4.8 mg/kg (Table 3). Arsenic was not detected at concentrations above the DTSC-ASL of 12 mg/kg (DTSC 2008). No significant impacts to the Site from arsenic in surface soil were identified.

6.0 RECOMMENDATIONS

The findings of this Phase II ESA indicate that Site surface soils have been slightly impacted by OCPs and significantly impacted by TPHd and TPHc. The surface soil sample results indicate that the OCP dieldrin is present within the Comp 2 sample group at 0.052 mg/kg, which slightly exceeds the screening level (0.034 mg/kg). TPHd and TPHc appear to be present throughout most of the Site at concentrations that significantly exceed SFRWQCB screening levels.

For development of the Site as a MOT facility, Tetra Tech recommends that the RSD enter the Site into the DTSC Voluntary Cleanup Program (VCP) and perform additional assessment to evaluate the lateral and vertical extent of dieldrin at concentrations exceeding the screening level and the lateral and vertical extent of TPHd and TPHc at concentrations exceeding the screening levels. The assessment data will be used to develop appropriate regulatory clearance prior to developing the Site as a MOT facility. The DTSC VCP is a streamlined program designed to protect human health, clean up the environment, and get property back to productive use. Entities entering into VCP agreements will be able to restore properties quickly and efficiently, rather than having their projects compete for DTSC's limited resources with other low-priority hazardous waste sites. A remedy for the impacted soil at the Site will be developed following completion of the additional assessment through the DTSC VCP.

If the Site or portion of the Site is developed as a K-12 school facility, it is Tetra Tech's recommendation that a Preliminary Environmental Assessment (PEA) be performed under DTSC oversight to further evaluate the RECs posed by the areas of the Site that are slightly impacted by OCPs and significantly impacted by TPHd and TPHc. The assessment data and findings from this Phase II ESA and from the recommended work to be performed under the DTSC VCP should be incorporated into the PEA. A hazardous pipeline assessment should also be conducted in accordance with the *Guidance Protocol for School Site Pipeline Risk Analysis* (CDE 2007) as part of the PEA to evaluate potential hazards posed by the two high-volume water transmission pipelines beneath North Rose Avenue within 1,500 feet of the Site.

Notes:

a - Only the detected sample results are listed.

b - non carcinogenic

c - carcinogenic

d - Residential Soil Screening Level is the USEPA Region 9 Soil RSLs (USEPA 2020) as recommended by DTSC HHRA Note 3 (DTSC 2020).

e - The compound-specific MDLs and PQLs for analytes that were not detected are presented with the laboratory reports in Appendix A.

MDL - method detection limit

ND - not detected

PQL - practical quantitation limit

SL - Screening Level

SVOC - Semivlotile Organic Compound

The analytical results in red font are J-flagged, where concentration of the analyte detected is between MDL and PQL.

The analyte concentrations in bold font exceed their relevant screening level.

CLIENT/PROJECT INFORMATION

Client: Rio School District
Project Name: Rio School District Rose Avenue MOT Facility
Groundwater Area: NA
Project Manager: Jim Steele
Phone Number: 805 895-4120
Email Address: jim.steele@tetratech.com
Project Number: 112G-SBA-T40972-1

LABORATORY

Lab Name: BC Laboratories, Inc.
Lab Contact: Alin Repede
Email: alin.repede@bclabs.com
Address: 4464 McGrath St.
Unit 105
City: Ventura State: CA
Postal Code: 93003
Phone Number: (805) 815-7966
Quote Number:
PO Number: 112G-SBA-T40972-1

SPECIAL INSTRUCTIONS/COMMENTS

Soil aliquots from the following 20 samples will be combined as follows into six composite samples for OCP analysis via method EPA 8081:
Samples Comp Dup: 1A, 1B, 1C, and 1D into composite sample Comp Dup 1.
Samples: SS-1, SS-2, SS-3, and SS-4 into composite sample Comp 1.
Samples: SS-5, SS-6, SS-7, and SS-8 into composite sample Comp 2.
Samples SS-9, SS-10, SS-11, and SS-12 into composite sample Comp 3.
Samples SS-13, SS-14, SS-15, and SS-16 into composite sample Comp 4. Samples SS-17, SS-18, SS-19, and SS-20 into composite sample Comp 5.

SAMPLERS

Sampler's Name: Paige Segoya
Sampler's Signature:
Sampler 2:

SAMPLE DETAILS

Sample Identification	Date	Time (24hr)	Matrix	Sample Type (D=Discrete, C=Comp)	Number of Containers	ANALYSIS	EPA 8081 (OCPs)	EPA 6010B (Total Arsenic)	EPA 8015B TPH (C12-C40)	EPA 8270C (SVOCs)	EPA 8270C - SIM (PNAs)	EPA 8082 (PCBs)	Remarks	Filtered	Preserative
							N None	N None	N None	N None	N None	N None			
SS-16 -27	10/9/2020	1211	S	C/D	2		X	X					Combine aliquot into Comp 4 for OCP analysis / Arsenic for discrete sample analysis

1.0 INTRODUCTION

1.1 BACKGROUND

This report presents the findings of a Phase II Environmental Site Assessment (ESA) Addendum prepared by Tetra Tech for the Rio School District (RSD) to evaluate Ten-Acre Portion of Assessor's Parcel No. (APN) 144-0-110-225 in the Oxnard planning area of Ventura County, California (hereinafter referred to as the Site). Sage Realty (Sage) is coordinating this project for RSD. The Site location is shown on Figure 1. This Phase II ESA Addendum was performed for RSD as part of the due diligence efforts required to support the purchase of this property by the RSD.

The Site was recently acquired by the RSD from KMS Industries, Inc. The Site is leased by Reiter Affiliated Companies for berry production and is currently used for the production of berries. Information provided by the RSD and Ventura County Assessor's office indicates that the Site is a 10-acre portion of APN 144-0-110-225, a 92.53-acre lot. The Site is bounded by North Rose Avenue on the northwest, land developed in berry cultivation on APN 144-0-110-225 on the northeast and southeast, and the RSD's Rio del Valle Middle School on the southwest (Figure 2).

Tetra Tech completed a Phase II ESA (Tetra Tech 2020b) for the Site to assess three recognized environmental concerns (RECs) identified in the Phase I ESA completed in September 2020 (Tetra Tech 2020a). Based on review of the Phase II ESA surface soil sample results, the Site appears to have been slightly impacted by organochlorine pesticides (OCPs) (specifically dieldrin) and significantly impacted by diesel range total petroleum hydrocarbons (TPHd), and crude oil range total petroleum hydrocarbons (TPHc) from past agricultural production activities. The surface soil sample results for arsenic, other fuel oil related compounds, and polychlorinated biphenyls (PCBs) did not show concentrations above relevant screening levels. The surface soils of the MOT facility (the Site) is significantly impacted by TPHd, and TPHc, and slightly impacted by OCPs (specifically dieldrin).

The Phase II ESA Addendum was completed to gather additional data to define the vertical and lateral extent of OCP and TPHd and TPHc impacted soil at the Site identified in Phase II ESA and a perform human health risk screening evaluation of the Site. The Phase II ESA Addendum was performed as part of the due diligence efforts required to support development of the Site by the RSD. It is our understanding that the RSD proposes to continue utilizing the site for agricultural production until future plans are determined. No utility expansion is proposed.

1.2 DESIGNATED CONTACT PERSONS

The primary designated contact persons for Tetra Tech are Messrs. James (Jim) Steele and Randy Westhaus. Jim Steele is the Project Manager and Randy Westhaus is Tetra Tech's California Schools Director. Their contact information is:

James R. Steele, P.G., C.E.G., C.Hg.
Tetra Tech, Inc.
5383 Hollister Avenue, Suite 130
Santa Barbara, CA 93111
Phone (805) 681-6302
Email: jim.steele@tetratech.com

Randy Westhaus, P.E.
Tetra Tech, Inc.

5383 Hollister Avenue, Suite 130
Santa Barbara, CA 93111
Phone (805) 455-0603
Email: randy.westhaus@tetratech.com

The designated contact person for the RSD is Mr. Wael Saleh. Mr. Saleh is the Assistant Superintendent/Chief Business Official for the RSD. The contact information for Mr. Saleh is:

Mr. Wael Saleh, C.P.A., M.B.A.
Assistant Superintendent/Chief Business Official
Rio School District
1800 Solar Drive
Phone: 485-6302, Ext. 2130
Oxnard, California 93030
wsaleh@rioschools.org

2.0 SITE DESCRIPTION

2.1 SITE LOCATION/DESCRIPTION

The Site is located on a 10-acre parallelogram-shaped portion of APN 144-0-110-225, a 92.53-acre parcel in the Oxnard planning area of Ventura County, California (Figures 1 and 2). The geographic coordinates of the Site are approximately Latitude 34° 14' 2.39" North, Longitude 119° 9' 10.61" West (Google Earth 2019). Surface elevations at the Site are approximately 90 feet above mean sea level (amsl) (United States Geological Survey [USGS] 2018).

At the time of the December 4, 2020 field sampling event, the Site comprised an approximate 10-acre area of the 92.53-acre parcel owned by KMS Industries, Inc. and was leased by Reiter Affiliated Companies for raspberry production. Most of the Site was planted in organic raspberries under shade structures.

2.2 SITE VICINITY CHARACTERISTICS

The Site is located in an area developed primarily for residential and agricultural land use situated in the El Rio/Del Norte General Plan Area of Ventura County (Ventura County 2011). (Figures 1 and 2). The Ventura County zoning for Site and adjacent areas is shown on Figure 2 (Ventura County 2019; Ventura County Resource Management Agency Planning Division 2020). The Site and areas adjacent to the Site on the northeast and southeast are developed for agricultural production and the area on North Rose Avenue northwest of the Site are zoned AE-40 ac/MRP (Agricultural Exclusive minimum 40-acre lot/Mineral Resources Protection). The lot adjacent to the southwest of the Site occupied by the RSD's Rio del Valle Middle School is zoned RE-20,000 square ft (Rural Exclusive 20,000-square foot minimum lot). The area adjacent to the south corner of the Site on North Rose Avenue is zoned RE-20 ac (Rural Exclusive 20-acre minimum lot). The areas across North Rose Avenue from the Site are largely developed in residential housing are zoned RE-10,000 square ft (Rural Exclusive 10,000-square foot minimum lot) and RE-20,000 square ft (Rural Exclusive 20,000-square foot minimum lot).

2.3 ADJACENT RESIDENTIAL AND COMMERCIAL AREAS
