Notice of Preparation of an Environmental Impact Report and Public Scoping Meeting

RE: Graham Hill Water Treatment Plant Facility Improvements Project

To Interested Persons and Agencies:

The City of Santa Cruz (City) as the Lead Agency for the Graham Hill Water Treatment Plant (GHWTP) Facility Improvements Project (Proposed Project) has issued this Notice of Preparation (NOP) pursuant to the California Environmental Quality Act (CEQA) to notify interested persons and agencies that an Environmental Impact Report (EIR) for the Proposed Project will be prepared. The EIR will evaluate potential environmental impacts of the Proposed Project. The purpose of this NOP is to provide an opportunity for interested persons and agencies to comment on the scope and proposed content of the EIR.

The NOP provides information about the public review and comment period, proposed project location (page 4), purpose and need (page 5), project description (page 7), and probable environmental effects (page 8) of the Proposed Project, and is posted on the City's website at: https://www.cityofsantacruz.com/government/city-departments/water/online-reports/environmental-documents.

Written comments are requested from interested persons and agencies regarding the scope and evaluation of potential environmental issues associated with the Proposed Project. Written comments are due within 30 days of the receipt of this notice, as provided by state law. As such, a 30-day public review and scoping period is established from **June 27, 2022 to July 26, 2022**. Written comments may be submitted by postal mail or email. All comments should indicate a contact person, if applicable.

All written comments are requested to be received by 5:00 p.m. on July 26, 2022, and should be sent to the following address:

Jessica Martinez-McKinney, Associate Planner II
City of Santa Cruz Water Department
212 Locust Street, Suite C
Santa Cruz, CA 95060
Email: jmartinezmckinney@cityofsantacruz.com

Scoping Meeting

Two virtual (online) public scoping meetings (webinars) regarding the Proposed Project and EIR will be held. The webinars will each cover the same material. All interested persons and public agencies are invited to attend either (or both) of these meetings to learn more about the Proposed Project and the scope and proposed content of the EIR. This webinar will also include a brief overview of the CEQA environmental process and allow time for questions about the CEQA process and Proposed Project.

Date:	July 19, 2022
Time:	3:30-4:30 PM and 5:30-6:30 PM *Interested parties are invited to attend either (or both), the same content will be covered during each webinar.*
Zoom Links (same info for both meetings)	**Zoom Link:** https://us06web.zoom.us/j/87403686774 **Webinar ID:** 874 0368 6774
Dial In/Code:	iPhone one-tap: US: +12532158782,,87403686774# or +13462487799,,87403686774#
Telephone (for higher quality, dial a number based on your current location):	Telephone: US: +1 253 215 8782 or +1 346 248 7799 or +1 720 707 2699 or +1 301 715 8592 or +1 312 626 6799 or +1 646 558 8656 or 877 853 5247 (Toll Free) or 888 788 0099 (Toll Free) or 833 548 0276 (Toll Free) or 833 548 0282 (Toll Free)
International numbers available:	https://us06web.zoom.us/u/kfhF7tgAp

Agency Review and Comment

The EIR will be used in the planning and decision-making process by the City for approval of the Proposed Project. Other public agencies may need to use the EIR when considering permit issuance or other approvals for the Proposed Project, if any are required. Agencies are requested to respond with written comments regarding the proposed scope and content of the EIR as it relates to the agency's area of statutory responsibility and area of concern and expertise.

Comments received from State of California agencies should address (1) whether the agency will be a Responsible Agency or a Trustee Agency for the Proposed Project, and (2) if the agency is a Responsible Agency, any significant environmental issues and reasonable alternatives and mitigation measures that the Responsible Agency will need the City to have explored in the EIR analysis. We will also need the name, address, telephone number, and email address of the contact person for your agency.

Public agencies that may be expected to use the EIR in their decision-making processes (including ministerial actions) as Responsible or Trustee Agencies include but are not limited to:

- **State Water Resources Control Board, Division of Drinking Water**. Responsible Agency for issuing a Domestic Water Supply Permit Amendment.

- **State Water Resources Control Board, Division of Financial Assistance.** Responsible Agency if the Proposed Project obtains financing through the Drinking Water State Revolving Fund (SRF) Program. The EIR will include federal cross-cutting documentation if funding is pursued.

- **California Department of Fish and Wildlife (CDFW).** Trustee Agency for projects that may affect fish, wildlife, or their habitat and potentially a Responsible Agency for issuing a Lake and Streambed Alteration Agreement should construction activities result in fill of waters of the state if the Proposed Project impacts the San Lorenzo River due to storm drain modifications. State-listed endangered plant species that have potential to occur in the biological study area (BSA) include Santa Cruz wallflower, Santa Cruz tarplant, and San Francisco popcornflower. State-listed endangered animal species that have potential to occur in the BSA include coho salmon (in the San Lorenzo River). Potential for these endangered plant and animal species to occur in the BSA is considered low.

- **California Central Coast Regional Water Quality Control Board.** Responsible Agency for approval of a Clean Water Act Section 401 Water Quality Certification Permit in areas of impacts to waters or wetlands of the U.S., if the Proposed Project impacts the San Lorenzo River due to storm drain modifications. Also, the Regional Water Quality Control Board would oversee the City's Notice of Intent to Comply with the National Pollutant Discharge Elimination System Construction General Permit.

- **Monterey Bay Air Resources District**. Responsibility Agency for Authority to Construct and Permit to Operate for any new generators or other stationary sources.

- **County of Santa Cruz, Department of Public Works Sanitation Division.** Responsible Agency for issuing a Sewer Connection Permit and Wastewater Discharge permit if the Proposed Project connects to the County sewer main in Graham Hill Road. County of Santa Cruz would allow issue an encroachment permit for any work in Graham Hill Road.

- **Local Agency Formation Commission of Santa Cruz County.** Responsible Agency for LAFCO Extraterritorial Service authorization to receive a single service from County Sanitation if the Proposed Project connects to the County sewer main in Graham Hill Road.

In addition to state and local agencies, the CEQA document may also be used by the following federal agencies during their environmental review (under the National Environmental Policy Act [NEPA]) for consideration of permits on the Proposed Project:

- **U.S. Army Corps of Engineers**. Federal agency that may issue a Clean Water Act Section 404 permit should construction activities result in fill of waters of the U.S. (i.e., if the Proposed Project impacts the San Lorenzo River due to storm drain modifications).

- **U.S. Environmental Protection Agency.** Federal agency that may administer and provide funding for the Proposed Project through the Water Infrastructure Finance and Innovation Act

(WIFIA) loan program. The EIR will include federal cross-cutting documentation if funding is pursued.

- **U.S. Fish and Wildlife Service.** Federal agency that consults under Section 7 of the Endangered Species Act for projects that impact sensitive species of fish, wildlife, or their habitat. The City currently has two Incidental Take Permits for federally listed species that could cover the Proposed Project.
- **National Marine Fisheries Service.** Federal agency that consults under Section 7 of the Endangered Species Act for projects that impact U.S. fisheries. This may be required if the Proposed Project impacts the San Lorenzo River due to storm drain modifications.

Proposed Project Location

The Proposed Project would primarily be constructed at the City's existing GHWTP, located within Santa Cruz City limits. Additionally, the Proposed Project is anticipated to involve activities outside of the GHWTP for the purposes of temporary construction staging and potential utility and traffic safety improvements. These activities would occur in both City and County of Santa Cruz jurisdictions. The Proposed Project is anticipated to be located at four locations, which together constitute the Project site. The Proposed Project locations include:

- The approximately 14.88-acre primary Project site consisting of:
    - The approximately 12.4-acre City-owned GHWTP parcel located at 715 Graham Hill Road in Santa Cruz, CA 95060 on Assessor Parcel Number (APN): 060-141-05;
    - The approximately 0.18-acre, 550-linear-foot utility corridor between the GHWTP parcel and the San Lorenzo River via Ocean Street Extension and a 15-foot right-of-way on APN: 060-151-05;
    - Approximately 2.3-acres, 1,620 linear feet of the Graham Hill Road public right-of-way between just north of Mosswood Court and just south of Lyle Way;
- The approximately 5.14-acre staging area for the Proposed Project (Mt. Hermon Road Staging Area) located at the northern intersection of Graham Hill Road and Mt. Hermon Road, in Felton, CA at APN: 071-201-43; and
- The approximately 1.86-acre staging area for the Proposed Project (Ocean Street Extension Staging Area) located at 1941 Ocean Street Extension at APN: 008-031-16.
- The alternate sanitary sewer lateral improvement area from the southwest corner of the GHWTP parcel at Ocean Street Extension and along Ocean Street Extension for approximately 4,500 linear feet to the City Public Works Department maintained sanitary sewer connection at Graham Hill Road.

Figure 1 - Project Site and Vicinity shows the Proposed Project location and **Figure 2 - Existing GHWTP Site Layout** provides the existing facilities at the GHWTP.

The GHWTP is located in an area of single-family residential land uses on the northern, eastern, and southern perimeters. The western perimeter slopes down toward the San Lorenzo River and is an area of scattered residential dwellings. A narrow extension of the GHWTP extends from the otherwise rectangular parcel from the southwest corner down to Ocean Street Extension. This vegetated extension

is a corridor for several different types of utilities. The site is characterized by a mix of industrial development for the purpose of water treatment, open space and vegetation. The site is generally accessed from the south on Graham Hill Road via Ocean Street off of State Route 1 (locally referred to as Highway 1) but can also be accessed from the north on Graham Hill Road via Sims Road or Mount Hermon Road off of State Route 17 (locally referred to as Highway 17).

The Mt. Hermon Road Staging Area is located adjacent to heavily forested open space, as well as commercial and low/very low-density residential land uses. The Ocean Street Extension Staging Area is located adjacent to a crematorium and low/very low-density residential land uses, off of Ocean Street Extension.

Purpose and Need for the Proposed Project

The GHWTP is a conventional[1] water treatment plant that is a critical component of the drinking water system. It is the City's only surface water treatment plant and treats over 95% of the water served to its customers. The GHWTP treats local surface waters from multiple sources: the San Lorenzo River (at the Tait Diversion, Felton Diversion[2], and Tait Wells[3]), Majors Creek, Laguna Creek, Reggiardo Creek (by way of Laguna Creek Diversion), Liddell Spring, and Newell Creek (from the Loch Lomond Reservoir). The City selects its water source and blend for treatment based on multiple variables including demands, source water availability, and source water quality. These selections vary seasonally.

For drinking water utilities that rely on surface water sources, water treatment is a critically important public health protection function, and utilities must maintain treatment standards at all times without failure. The science of water treatment and treatment standards that utilities need to plan for and comply with continuously evolves. While surface water treatment plants are designed for standards at the time of construction and are often considered "state of the art," once constructed these water treatment plants can experience challenges to consistently meet changed regulations and/or changed source water conditions, as is the case for the GHWTP.

The GHWTP was originally constructed and placed into service in 1960. In the late 1960s the facility was expanded, and in the 1980s the mechanical, electrical and chemical equipment and control systems were modernized. The majority of the regulations impacting the operation and performance standards of the GHWTP began to emerge after those investments in 1989 with the passage of the Environmental Protection Agency Surface Water Treatment Rule, which was later augmented with a number of additional rules through the 2000s. During this time multiple major drinking water regulations affecting surface water treatment and distribution system water quality were developed and promulgated. Despite its original age, the GHWTP has adapted to operate and comply with these new regulations; however, a changing climate presents a new set of challenges that when combined

[1] Conventional water treatment is a method of treating raw water through a combination of coagulation, flocculation, sedimentation, filtration, and disinfection to achieve safe drinking water.

[2] At the time of the NOP release the City pumps water from the San Lorenzo River at the Felton Diversion to Loch Lomond Reservoir for storage before being treated at the GHWTP. Pending approval by the State Water Board the City may in the future have the flexibility to divert directly from San Lorenzo River from the Felton Diversion to the GHWTP under the Santa Cruz Water Rights Project.

[3] The Tait wells refers to three groundwater wells under the direct influence of surface water near the Tait Diversion.

with the GHWTP's aging infrastructure and treatment processes, requires a more comprehensive upgrade. Specifically, the City expects that future source water quality could become more impaired, while standards become more stringent. Future source water conditions could be impacted by the City's increased reliance on winter streamflows, rainfall patterns that involve more intense rain events, increases in wildfires, and more frequent droughts that all impact both how much water is available for treatment and the treatability of source water, as well as increases in contaminants of emerging concerns.

The Proposed Project is needed to provide the community with a resilient surface water treatment plant that will meet the regulatory and climate change challenges of the 21st century. The Proposed Project includes both upgrades to address aging infrastructure such as buildings and treatment basins that do not meet modern seismic standards and the water treatment process to provide reliable and efficient performance to meet existing and reasonably foreseeable regulations. The upgraded water treatment process will include the flexibility to adapt the treatment process to meet a wide range of potential future regulations and future source water quality conditions.

Existing GHWTP Facilities

The GHWTP has a rated capacity of 24 million gallons per day (mgd), and since 2012 maximum daily demands have typically ranged from approximately 9 to 12 mgd. The existing GHWTP has an entrance access road off of Graham Hill Road with a security gate; internal access roads; operations building; filtration basins and filter gallery building; emergency back-up generator; electrical building, water quality laboratory, multi-use trailers and outbuildings for equipment/supply storage; three water treatment trains composed of carbon contact basins and flocculation/sedimentation basins; two flash mixing units; chemical storage facilities and chemical feed systems; concrete tanks for wash water, solids storage, reclaimed water and filtered water; lamella plate settler clarification system; pump stations; air compressors; pipelines, storm drains, and electrical systems; "heating, ventilation and air conditioning" (HVAC), "supervisory control and data acquisition" (SCADA) infrastructure, and "programmable logic controller" (PLC) units; and perimeter fencing. Prominent existing site features are labeled on **Figure 2**.

Previous and Current GHWTP Improvements

The GHWTP has undergone several improvements since its commissioning. Most notably, the GHWTP was expanded in 1968 with the addition of a third sedimentation basin and two additional filters. The GHWTP was then modernized in 1986 with the addition of flocculators and tube settlers and new chemical handling equipment. Since that time, investments into the GHWTP have focused on upgrades to the filters, addition of a lamella clarifier, in-kind repairs and replacements, seismic upgrades to the filter basins, and other minor improvements. Recent operational maintenance includes replacement of the tube settlers and the flocculators. Additionally, the replacement of three of the four on-site concrete tanks is underway and is scheduled for completion in Fall 2024, in advance of the Proposed Project (refer to **Figure 2**, which shows the Concrete Tanks and Pad [Under Construction]).[4]

While these investments have enabled GHWTP to adapt to changing source water conditions and regulatory treatment standards, due to the age and characteristics of the GHWTP infrastructure, additional upgrades and modernization are necessary to facilitate the GHWTP's ability to efficiently

[4] The Graham Hill Water Treatment Plan Concrete Tanks Replacement Project is scheduled for completion in Fall 2024, Graham Hill Water Treatment Plant Concrete Tanks Replacement Project.

adapt to future regulatory requirements, to meet water supply needs, and to account for future source water conditions.

Description of the Project

The Proposed Project consists of improvements at the GHWTP to address aging infrastructure and to provide for efficiently and reliably meeting future water quality objectives and water supply needs. At the time of this NOP the Proposed Project is still at a conceptual level of design, which includes a wide range of technical studies, evaluations, and inspections to define the placement and scope of the Proposed Project improvements. As the design process progresses the Proposed Project buildings and facilities will be sized and configured within the GHWTP site appropriately, based on the information collected during the early design phase and as informed by comments received during scoping.

The Proposed Project includes the following:

- **New Water Treatment and Related Processes.** New water treatment and related processes would rehabilitate, replace or augment the existing treatment systems at the GHWTP. The proposed treatment processes would allow the City to reliably and efficiently meet existing and reasonably foreseeable regulations even with source water that is more difficult to treat as described in the Purpose and Need section. The Proposed Project would include solids dewatering to allow for more efficient separation and disposal of solids that are removed from the raw water during the treatment process. Upgrades to the chemical feed systems would also be included as well as a replacement washwater supply tank, a new ozone contactor, pre-treatment processes, granular activated carbon contactors, and recycled water clarifiers. Space would also be reserved for a UV disinfection system and other additional treatment processes, if needed in the future. The design capacity of the Proposed Project would be approximately 18 mgd (net), a decrease from the 24 mgd capacity of the existing treatment plant.
- **New and Upgraded Buildings.** The Proposed Project would include new and upgraded buildings including a new administration building and/or operations building, new maintenance building, HVAC improvements, replacement or upgrade of the filter gallery building, and new ozone, solids dewatering, and chemical storage facilities.
- **Infrastructure and Site Improvements.** The Proposed Project would include infrastructure and site improvements including piping and storm water management improvements; electrical, and SCADA improvements; vehicular access improvements; landscaping improvements; and may include fencing and site security.
- **Removal of Existing Facilities.** The Proposed Project would include demolition of some existing buildings, water treatment facilities (e.g. sedimentation basins), and infrastructure, as needed to address facilities beyond their useful life or to accommodate new facilities.

Figure 3 - Proposed Project Development Areas provides a conceptual illustration of the locations in the Proposed Project that are being considered for development. The areas shown in the *Known Development Envelope* would be prioritized for development and permanent facilities. The *Optional Development Envelope – Low Priority* is the area that could be developed but that would be less desirable because of location, topography, or other factors. Since the GHWTP is a geographically constrained site, the *Optional Development Envelope – Low Priority* portion of the Proposed Project is being retained in the event that the *Known Development Envelope* is insufficient in accommodating

the necessary improvements. Specific activities, buildings, or facilities, if any, that would be placed in the *Optional Development Envelope - Low Priority Area* are not defined or known at this time. However, should activities or development be needed in the *Optional Development Envelope - Low Priority Area* those developments and activities would be described and disclosed in the Draft EIR (anticipated schedule is described below). **Figure 3** also illustrates a *Traffic and Utility Improvements Area,* which could include infrastructure and site improvements including piping and storm drain system improvements; electrical, and SCADA improvements; vehicular access improvements; landscaping improvements; and site security. While not indicated on **Figure 3**, the existing fencing may be improved or replaced along the perimeter of the GHWTP as a part of the Proposed Project.

The two staging areas (Mt. Hermon Road Staging Area and Ocean Street Extension Staging Area) that would be used during construction of the Proposed Project are shown in **Figure 1.** In addition, locations within the GHWTP may also be may also be used for temporary staging, laydown of equipment and/or storage during construction.

Proposed Project Schedule

Design of the Proposed Project is expected to continue through 2024. Milestones are anticipated to include conceptual design (up to 30%) through early 2023 and detailed design (30-100%) through 2024. The Draft EIR is expected to be released for public review and comment in 2023 with City Council consideration of the Final EIR and Project approval in 2024.

The Proposed Project construction is anticipated to commence in phases over a four-year period (from 2024 through 2028) while maintaining ongoing operations. As the only surface water treatment plant servicing the City's water service area, the construction sequencing would maintain a continuously operating water treatment plant that produces potable water in accordance with all local, state, and federal permit requirements.

Construction would typically occur during normal weekday work hours, between 8 AM and 5 PM, with potential work outside of those hours or on weekends on an as-needed basis with prior City Water Department Director approval.

The City has identified standard construction practices that would be implemented by the City and/ or its contractors during construction activities to provide erosion and air quality controls, water quality and habitat protection, inadvertent discovery of cultural resources, construction noise practices, and fire safety measures. In addition to the standard construction practices, the Proposed Project would also implement the applicable avoidance and minimization measures from the City's two Habitat Conservation Plans and associated Incidental Take Permits under Section 10(A)(1)(B) of the Endangered Species Act. Traffic controls would be in place for construction activities on Proposed Project roadways. These practices, measures, and controls will be described in the EIR.

Probable Environmental Effects of the Proposed Project

After completing a preliminary review of the Proposed Project, as described in Section 15060(d) of the CEQA Guidelines, the City has determined that an EIR should be prepared to assess the potentially significant environmental impacts of the Proposed Project. Preparation of an Initial Study is not anticipated.

The EIR will address environmental impacts (as detailed in Appendix G: Environmental Checklist Form of the CEQA Statute and Guidelines) of the Proposed Project's construction and operation activities, and

will propose mitigation measures to address significant impacts that are identified. The following describes the anticipated environmental issues that will be addressed in the EIR.

- **Aesthetics.** Impacts related to aesthetics could result from construction and operation of the Proposed Project. Specifically, the new buildings and facilities will be assessed to determine the potential for impacts to: (1) scenic vistas (2) scenic resources along a scenic highway or designated scenic roadway; (3) existing visual character or quality including through scale incompatibility (or conflicts with applicable scenic quality regulations); and (4) day or nighttime views due to new sources of substantial light and glare. A field survey, which would visually document existing views from the Proposed Project site and to the Proposed Project site from publicly accessible vantage points in the surrounding area, will be conducted and 3-dimensional (3D) photo-simulations of the Proposed Project will be prepared from key public view locations to inform the EIR analysis. The Proposed Project area is largely shielded from public view due to surrounding topography, mature vegetation, and residential development. There are no known scenic vistas identified in the City and County general plans that would likely be impacted by the Proposed Project; however, the EIR will include an evaluation of potential impact on scenic vistas. Graham Hill Road is not a designated scenic roadway (City of Santa Cruz 2012).[5] However, Highway 9 (0.25 miles to the west) and Highway 17 (0.75 miles to the east) are eligible State Scenic Highways (Caltrans 2019). Potential impacts of the Proposed Project on eligible scenic highways and existing visual character and quality will be assessed in the EIR.
- **Air Quality and Greenhouse Gas Emissions.** Impacts of the Proposed Project related to air quality and greenhouse gas emissions could result from temporary and short-term construction activities as well as longer-term operational activities. Operational air quality impacts and greenhouse gas emissions would include but not be limited to mobile sources, area sources, natural gas usage, electrical generation (e.g., backup generator), water supply, ozone, wastewater, and solid waste disposal. The Proposed Project is located in the North Central Coast Air Basin. The North Central Coast Air Basin is designated as non-attainment for state coarse particulate matter (PM_{10}) standards. The Air Basin is designated as unclassified or attainment for all other state and federal standards.[6] Both construction and operational emissions of criteria pollutants and greenhouse gases will be estimated using the California Emissions Estimator Model emissions model and compared to the Monterey Bay Air Resources District emissions-based thresholds to assess potential impacts. Construction and operational health risks assessments will also be prepared to assess the effects of diesel emissions from construction equipment and from delivery and hauling trucks during operations. Impacts related to objectionable odors could also result from Proposed Project components and will be evaluated in the EIR.
- **Biological Resources.** Potential impacts on biological resources could result from construction near existing waterways, such as San Lorenzo River, and sensitive habitat areas. Potential direct and indirect impacts to sensitive vegetation communities, special-status plant (e.g., Ben

[5] City of Santa Cruz 2030 General Plan, adopted June 2012 as amended through October 2019. City of Santa Cruz 2030 General Plan.

[6] CARB. 2021. "Maps of State and Federal Area Designations." https://ww2.arb.ca.gov/resources/documents/maps-state-and-federal-area-designations. Accessed May 12, 2022, and EPA. 2021. "EPA Region 9 Air Quality Maps and Geographic Information." June 10, 2021. https://www3.epa.gov/region9/air/maps/index.html. Accessed May 12, 2022.

Lomond spineflower) and wildlife species (e.g., Mt. Hermon June beetle), and jurisdictional aquatic resources associated with both construction and operation of the Proposed Project will be assessed. A general biological survey of the study area, habitat assessments for special-status plants and wildlife, review of available biological resources evaluations and studies from recent projects in the vicinity, and focused special-status plant surveys will be completed to support the EIR analysis. Results of the literature review and general biological survey, habitat assessments, and focused special-status plant surveys over two seasons (spring and summer) will be incorporated into a biological resources existing conditions technical report that will support the preparation of the EIR. An arborist report will also be prepared to support the EIR analysis. This section will also include discussion of applicable Habitat Conservation Plans (HCPs).

- **Cultural and Tribal Cultural Resources.** Potential impacts to cultural and tribal cultural resources could occur during ground-disturbing construction activities. Cultural and tribal cultural resources include: historic resources including both historic built environment resources (e.g., buildings) and historic resources of an archaeological nature; unique archeological resources; human remains; and tribal cultural resources. The Proposed Project will be evaluated under all applicable federal, state, and local significance criteria. If cultural or tribal cultural resources are found on the Project site or have the potential to be inadvertently discovered during construction, potential impacts from proposed modifications under the Proposed Project will be assessed and mitigation will be recommended, if warranted. A cultural resources inventory and evaluation report (that includes a records search, background research, summary of prior cultural reports that overlap with the Area of Potential Effect (APE), tribal outreach, and a pedestrian survey) is being prepared by archaeologists and architectural historians to support the EIR analysis.

- **Energy.** A temporary increase in the consumption of energy would be required during construction and an increase in the use of power may be required for operations of the new facilities. The impact analysis will assess if the Proposed Project would result in potentially significant environmental impacts due to wasteful, inefficient, or unnecessary consumption of energy resources during Project construction or operation, or conflict with or obstruct a state or local plan for renewable energy or energy efficiency.

- **Geology and Soils.** Construction of the Proposed Project could result in site-specific impacts on or from local geology and soils conditions. Potential impacts related to geologic, seismic, and soils constraints will be assessed based on existing information available for the area as well as information provided in Proposed Project specific geotechnical and soils studies. Potential impacts to paleontological resources will also be evaluated based on a paleontological records search through the Natural History Museum of Los Angeles County (LACM) to determine the location of any previously recorded fossil discoveries.

- **Hazards and Hazardous Materials.** Construction of the Proposed Project could result in potential impacts related to hazards and hazardous materials, which will be evaluated in the EIR. Specifically, the hazardous materials analysis will include: the potential to encounter contaminated soils during construction based on a regulatory records review; the potential for hazardous materials release associated with transport, use, and disposal of hazardous materials during construction; and the potential for hazardous emissions or hazardous materials use during construction and operations. Building materials studies related to the

potential for lead and asbestos in existing buildings will be used to characterize the conditions of existing buildings planned for demolition.

- **Hydrology and Water Quality.** Construction of the Proposed Project could result in potential impacts related to hydrology and water quality, which will be evaluated in the EIR. This includes temporary and permanent impacts to hydrology and water quality. The Proposed Project would include piping and storm drain system improvements, to address aging stormwater facilities and a possible increase in impervious surfaces, as well as to comply with the City's Phase 2 National Pollutant Discharge Elimination System (NPDES) Permit. The impact analysis will address the adequacy of the proposed improvements in reducing stormwater runoff and water quality impacts to adjacent parcels and downstream water bodies. The impact analysis will also address temporary impacts to water quality during construction.
- **Land Use and Planning.** Potential land use and planning impacts of the Proposed Project will be assessed in the EIR. The analysis will address impacts related to the potential for physically dividing an established community or causing a significant environmental impact due to conflicts with land use plans, policies, and regulations adopted for the purpose of avoiding or mitigating environmental effects. Given that the GHWTP already exists, the Proposed Project would not be expected to result in the potential for physically dividing an established community. The City and County general plans and zoning ordinances will be considered in the analysis of potential conflicts with land use plans, policies, and regulations, as relevant to the Proposed Project.
- **Noise and Vibration.** Construction and operation of the Proposed Project could result in noise and vibration impacts. Potential construction-period noise and vibration impacts to sensitive receivers (e.g., residents) in the vicinity of the Proposed Project will be assessed with modeling based on noise measurements taken at the site and review of construction phases and equipment usage. Operational noise associated with new equipment and processes on the site will also be evaluated. An existing noise conditions report based on long-term and short-term noise measurements will be prepared to document the existing ambient noise levels at the Project site.
- **Transportation.** Construction and operation of the Proposed Project could result in transportation impacts. Construction-related vehicle trips will be estimated and temporary construction-related traffic at the Project site and the staging areas will be evaluated to identify any hazardous conditions on roadways or inadequacies in emergency access that may result during construction of the Proposed Project. Similarly, for operations, the new daily and peak hour trips generated for the Proposed Project will also be estimated and a traffic analysis will be conducted along Graham Hill Road and the Project site driveway, to determine whether potential traffic hazards, such as increased vehicular queueing or hazards to pedestrian and bicycle traffic, could occur. Traffic counts will be collected on Graham Hill Road to support this analysis.

  An appropriate vehicle miles traveled (VMT) evaluation will be conducted and the results of this will be described in the EIR. VMT is the new transportation metric for evaluating changes in project vehicle trips developed in response to Senate Bill 743 and the associated revisions to the CEQA Guidelines that became effective December 2018.
- **Utilities.** The Proposed Project has the potential to result in impacts related to utilities. The EIR will address: the potential impacts on the environment of any required new utility

improvements; the adequacy of the wastewater treatment infrastructure including the capacity of existing sewer lines to serve the Proposed Project; the adequacy of the solid waste capacity of local landfills to serve the Proposed Project, and the compliance of the Proposed Project to meet solid waste reduction goals. While EIRs also typically assess the sufficiency of water supplies to serve a proposed project and other future development, in this case, the Proposed Project will not demand water supply but rather will provide water supply. Therefore, the Proposed Project would not be expected to have a significant adverse impact on water supply.

- **Wildfire.** Construction of the Proposed Project has the potential to exacerbate wildfire risks or interfere with an emergency evaluation plan, which will be evaluated in the EIR. The Proposed Project is located in a Local Responsibility Area (LRA) designated as a LRA Moderate Fire Hazard Severity Zone for wildlife fires (CALFIRE 2007).[7] The analysis will focus on the potential for construction or operation activities of the Proposed Project to impair an emergency response or evacuation plan, exacerbate wildfire risks, and expose people to risks due to postfire effects. The section will also discuss the Proposed Project's consistency with the 2020 City of Santa Cruz Water Department Emergency Response Plan, 2018 City of Santa Cruz Emergency Operations Plan and the 2021 Santa Cruz County Operational Area Management Plan, which directs City and County officials during major emergencies, such as a wildfire.[8]
- **Impacts Not Found Significant.** The EIR will explain why other effects were determined to not be potentially significant and were not discussed in detail in the EIR. For example, the Proposed Project would not occur in an area of agriculture use or protected farmland; therefore, no significant agricultural resource impacts are anticipated. Similarly, no significant impacts are anticipated for population and housing and mineral resources.
- **Other Sections.** The EIR will include additional topics as required by the CEQA Guidelines including growth inducement, cumulative impacts, and alternatives.
    - The Proposed Project would not expand the City's service area and would not increase the plant's capacity. The Proposed Project would support efficiencies in delivering water to meet water supply needs in the existing service area. The potential for growth-inducing impacts to result will be examined.
    - The EIR will address whether the Proposed Project could result in cumulative impacts that are significant when combined with the impacts of other City projects or projects occurring in the area at the same time.
    - The EIR will describe and evaluate a reasonable range of alternatives to the Proposed Project. The alternatives would feasibly attain most of the Proposed Project's basic objectives while simultaneously avoiding or substantially lessening any significant effects of the Proposed Project. The "No Project" alternative will also be evaluated as required by CEQA.

Subject: RE: comments on Graham Hill Water Treatment Plant Facility Improvements Project

Good Morning Casey -

Thank you for reaching out regarding the Graham Hill Water Treatment Plant Facility Improvements Project and for participating in the public scoping process. This email confirms receipt of your comment.

Comments received during this public scoping period will help inform the scope and proposed content of the EIR, which is anticipated to be released next year.

Regards,

Jessica Martinez-McKinney (she/her)

Subject: comments on Graham Hill Water Treatment Plant Facility Improvements Project

Greetings Mx Martinez-McKinney,

My family and I are residents at 130 Mosswood Ct, just up the road from the Water Treatment Plant, and have lived in the area for over 7 years. We frequently drive up and down Graham Hill Road for school, work, errands, etc.

I don't have too many comments about the project, actually. The work that's been done at the Plant over the last few years has not been too disruptive and has been handled well. I trust that the work to be done is necessary, helpful over the long term, and will be handled in consideration of local residents as much as possible.

I *DO* want to ask that you consider allowing public access to the "Pipeline Corridor" as a connector for pedestrians and cyclists between Ocean St Extension and Graham Hill Road.

As you know, Graham Hill Road is treacherous for pedestrians and cyclists, especially at its southernmost, most windy and steep part. The portion of Graham Hill Road north of the Plant is straighter, less steep, has better visibility, and is a viable connection to the southern boundary of Henry Cowell State Park.

The Pipeline Corridor and Plant property is the only existing connection between Ocean St Extension and a safe portion of Graham Hill Road. It would serve all Santa Cruz County residents, especially residents on and adjacent to Graham Hill Road, to have access to this portion of public property.

Please consider adding pedestrian and bicycle services to the Pipeline Corridor and the Water Treatment Plan as part of this project.

Thank you for your consideration,

Casey KirkHart

Subject: Graham Hill Water Treatment Plant Facility Improvements Project, Notice of Preparation of a Draft Environmental Impact Report, SCH No. 2022060566, Santa Cruz County

Dear Ms. Martinez-McKinney:

The California Department of Fish and Wildlife (CDFW) reviewed the Notice of Preparation (NOP) of a draft Environmental Impact Report (EIR) from the City of Santa Cruz Water Department (City) for the Graham Hill Water Treatment Plant Facility Improvements Project (Project) pursuant to the California Environmental Quality Act (CEQA) and CEQA Guidelines.[1]

CDFW is providing the City, as the lead agency, with specific detail about the scope and content of the environmental information related to CDFW's area of statutory responsibility that must be included in the EIR (Cal. Code Regs., tit. 14, § 15082, subd. (b)).

CDFW ROLE

CDFW is a **Trustee Agency** with responsibility under CEQA pursuant to CEQA Guidelines § 15386 for commenting on projects that could impact fish, plant, and wildlife resources. CDFW is also considered a **Responsible Agency** if a project would require discretionary approval, such as permits issued under the California Endangered Species Act (CESA) or Native Plant Protection Act (NPPA), a Lake and Streambed Alteration (LSA) Agreement, or other provisions of the Fish and Game Code that afford protection to the state's fish and wildlife trust resources.

PROJECT DESCRIPTION AND LOCATION

The Project consists of improvements to the Graham Hill Water Treatment Plant Facility which would include the following: 1) construction of new water treatment and related processes to replace or augment the existing treatment systems; 2) construction of new and upgraded buildings such as a new administrative building, new maintenance

[1] CEQA is codified in the California Public Resources Code in Section 21000 et seq. The "CEQA Guidelines" are found in Title 14 of the California Code of Regulations, commencing with Section 15000.

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

building, and other building improvements; 3) infrastructure and site improvements such as storm water management improvements; and 4) demolition of some existing buildings and water treatment facilities. The Project is currently in the design phase, and Project construction is expected over a four-year period from 2024 through 2028.

The Project is located at the City's existing Graham Hill Water Treatment Plant at 715 Graham Hill Road in Santa Cruz, CA 95060, Assessor's Parcel Number (APN) 060-141-05. The Project also includes two staging areas, one located at the northern intersection of Graham Hill Road and Mt. Hermon Road, in Felton, CA at APN 071-201-43, and the other located 1941 Ocean Street Extension at APN 008-031-16.

The CEQA Guidelines require that the EIR incorporate a full project description, including reasonably foreseeable future phases of the Project, that contains sufficient information to evaluate and review the Project's environmental impact (CEQA Guidelines, §§ 15124 & 15378). Please include a complete description of the following Project components in the Project description, as applicable:

- Footprints of permanent Project features and temporarily impacted areas, such as staging areas and access routes.

- Area and plans for any proposed buildings/structures, ground disturbing activities, fencing, paving, stationary machinery, landscaping, and stormwater systems.

- Operational features of the Project, including level of anticipated human presence (describe seasonal or daily peaks in activity, if relevant), artificial lighting/light reflection, noise, traffic generation, and other features.

- Construction schedule, activities, equipment, and crew sizes.

REGULATORY REQUIREMENTS

California Endangered Species Act and Native Plant Protection Act

Please be advised that a CESA Incidental Take Permit (ITP) must be obtained if the Project has the potential to result in take[2] of plants or animals listed under CESA or NPPA, either during construction or over the life of the Project. If the Project will impact CESA or NPPA listed species, including but not limited to those identified in **Attachment 1: Special-Status Species from the CNDDB within a 5-mile Radius of the Project Site,** early consultation with CDFW is encouraged, as significant modification to the Project and mitigation measures may be required to obtain an ITP.

[2] Take is defined in Fish and Game Code section 86 as hunt, pursue, catch, capture, or kill, or attempt any of those activities.

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

Issuance of an ITP is subject to CEQA documentation; the CEQA document must specify impacts, mitigation measures, and a mitigation monitoring and reporting program.

CEQA requires a Mandatory Finding of Significance if a Project is likely to substantially restrict the range or reduce the population of a threatened or endangered species (Pub. Resources Code, §§ 21001, subd. (c), 21083; CEQA Guidelines, §§ 15380, 15064, & 15065). Impacts must be avoided or mitigated to less-than-significant levels unless the CEQA Lead Agency makes and supports Findings of Overriding Consideration (FOC). The Lead Agency's FOC does not eliminate the Project proponent's obligation to comply with CESA.

Lake and Streambed Alteration

CDFW requires an LSA Notification, pursuant to Fish and Game Code section 1600 et seq., for Project activities affecting lakes or streams and associated riparian habitat. Notification is required for any activity that may substantially divert or obstruct the natural flow; change or use material from the bed, channel, or bank (including associated riparian or wetland resources); or deposit or dispose of material where it may pass into a river, lake, or stream. Work within ephemeral streams, drainage ditches, washes, watercourses with a subsurface flow, and floodplains are generally subject to notification requirements. In addition, infrastructure installed beneath such aquatic features, such as through hydraulic directional drilling, is also generally subject to notification requirements. **The Project site is adjacent to the San Lorenzo River. Any impacts to San Lorenzo River or associated riparian habitat would likely require an LSA Notification.** CDFW, as a responsible agency under CEQA, will consider the EIR for the Project. CDFW may not execute a final LSA Agreement until it has complied with CEQA as the responsible agency.

Nesting Birds

CDFW has authority over actions that may disturb or destroy active nest sites or take birds. Fish and Game Code sections 3503, 3503.5, and 3513 protect birds, their eggs, and nests. Migratory birds are also protected under the federal Migratory Bird Treaty Act.

Fully Protected Species

Fully Protected species, including those listed in **Attachment 1**, may not be taken or possessed at any time (Fish & G. Code, §§ 3511, 4700, 5050, & 5515).

ENVIRONMENTAL SETTING

A site-specific analysis prepared by a qualified biologist should provide sufficient information regarding the environmental setting ("baseline") to understand the Project's,

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

and its alternative's (if applicable), potentially significant impacts on the environment (CEQA Guidelines, §§ 15125 & 15360).

CDFW recommends that a site-specific analysis provide baseline habitat assessments for special-status plant, fish, and wildlife species located and potentially located within the Project area and surrounding lands, including but not limited to all rare, threatened, or endangered species (CEQA Guidelines, § 15380). These documents should describe aquatic habitats, such as wetlands, vernal pools, and/or waters of the U.S. or State, and any sensitive natural communities[3] or riparian habitat occurring on or adjacent to the Project site, and any stream or wetland set back distances the city or county may require. Fully protected, threatened or endangered, and other special-status species and sensitive natural communities that are known to occur, or have the potential to occur in or near the Project area, include but are not limited to, those listed in **Attachment 1**.

Habitat descriptions and the potential for species occurrence should include information from multiple sources, such as aerial imagery; historical and recent survey data; field reconnaissance; scientific literature and reports; the U.S. Fish and Wildlife Service's (USFWS) Information, Planning, and Consultation System; findings from positive occurrence databases such as the California Natural Diversity Database (CNDDB); the California Aquatic Resource Inventory (CARI); and sensitive natural community information available through the Vegetation Classification and Mapping Program (VegCAMP). Based on the data and information from the habitat assessment, site-specific analysis should adequately assess which special-status species are likely to occur on or near the Project site, and whether they could be impacted by the Project.

CDFW recommends that prior to Project implementation, surveys be conducted for special-status species with potential to occur, following recommended survey protocols[4] if available.

Botanical surveys[5] for special-status plant species, including those with a California Rare Plant Rank[6], must be conducted during the appropriate season, including the blooming period for all species potentially impacted by the Project within the Project area and adjacent habitats that may be indirectly impacted by, for example, changes to hydrology, and require the identification of reference populations. More than one year of surveys may be necessary given environmental conditions.

---

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

IMPACT ANALYSIS AND MITIGATION MEASURES

A site-specific analysis should discuss all direct and indirect impacts (temporary and permanent), including reasonably foreseeable impacts, that may occur with implementation of the Project (CEQA Guidelines, §§ 15126, 15126.2, & 15358). This includes evaluating and describing impacts such as:

- Encroachments into riparian habitats, drainage ditches, wetlands, or other sensitive areas.
- Potential for impacts to special-status species or sensitive natural communities.
- Loss or modification of breeding, nesting, dispersal, and foraging habitat, including vegetation removal, alteration of soils and hydrology, and removal of habitat structural features (e.g., snags, rock outcrops, overhanging banks).
- Permanent and temporary habitat disturbances associated with ground disturbance, noise, lighting, reflection, air pollution, traffic, or human presence.
- Obstruction of movement corridors, fish passage, or access to water sources and other core habitat features.

A site-specific analysis should also identify reasonably foreseeable future projects in the Project vicinity, disclose any cumulative impacts associated with these projects, determine the significance of each cumulative impact, and assess the significance of the Project's contribution to the impact (CEQA Guidelines, § 15355). Although a project's impacts may be less-than-significant individually, its contributions to a cumulative impact may be considerable; a contribution to a significant cumulative impact, e.g., reduction of habitat for a special-status species, should be considered cumulatively considerable.

Based on the comprehensive analysis of the direct, indirect, and cumulative impacts of the Project, the CEQA Guidelines direct the Lead Agency to consider and describe all feasible mitigation measures to avoid potentially significant impacts in the EIR, which CDFW recommends is supported by a site-specific analysis, and mitigate potentially significant impacts of the Project on the environment (CEQA Guidelines, §§ 15021, 15063, 15071, 15126.4 & 15370). This includes a discussion of impact avoidance and minimization measures for special-status species, which are recommended to be developed in early consultation with CDFW, USFWS, and the National Marine Fisheries Service. Project-specific measures should be incorporated as enforceable Project conditions to reduce impacts to biological resources to less-than-significant levels.

Fully protected species such as those listed in **Attachment 1**, may not be taken or possessed at any time (Fish & G. Code, §§ 3511, 4700, 5050, & 5515). Therefore, the

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

EIR supported by a site-specific analysis should include measures to ensure complete avoidance of these species.

COMMENTS AND RECOMMENDATIONS

CDFW offers the following comments and recommendations to assist the City in adequately identifying and/or mitigating the Project's significant, or potentially significant, direct, and indirect impacts on biological resources.

COMMENT 1: Impervious surfaces

Issue: The Project could increase impervious surfaces at the Project site with the addition of roads and buildings. Impervious surfaces, stormwater systems, and storm drain outfalls have the potential to significantly affect fish and wildlife resources by altering the hydrograph of natural streamflow patterns via concentrated run-off.

Evidence the impact would be significant: Urbanization (e.g., impervious surfaces, stormwater systems, storm drain outfalls) can modify natural streamflow patterns by increasing the magnitude and frequency of high flow events and storm flows (Hollis 1975, Konrad and Booth 2005).

Recommendations to minimize significant impacts: CDFW recommends that storm runoff be dispersed rather than concentrated to a stormwater outfall or other receiving waters. CDFW recommends implementation of low impact development (LID) and the use of bioswales and bioretention features to intercept storm runoff. CDFW also recommends incorporating permeable surfaces throughout the Project to allow stormwater to percolate in the ground and prevent stream hydromodification (see https://www.usgs.gov/science/evaluating-potential-benefits-permeable-pavement-quantity-and-quality-stormwater-runoff?qt-science_center_objects=0#qt-science_center_objects

COMMENT 2: Artificial Lighting

Issue: With the addition of buildings on the site, the Project has the potential to increase artificial lighting. Artificial lighting often results in light pollution, which has the potential to significantly and adversely affect fish and wildlife.

Evidence the impact would be significant: Night lighting can disrupt the circadian rhythms of many wildlife species. Many species use photoperiod cues for communication such as bird song (Miller, 2006), determining when to begin foraging (Stone et al., 2009), behavior thermoregulation (Beiswenger, 1977), and migration (Longcore and Rich, 2004).

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

Recommendations to minimize significant impacts: CDFW recommends eliminating all non-essential artificial lighting. If artificial lighting is necessary, CDFW recommends avoiding or limiting the use of artificial lights during the hours of dawn and dusk, when many wildlife species are most active. CDFW also recommends that outdoor lighting be shielded, cast downward, and does not spill over onto other properties or upwards into the night sky (see the International Dark-Sky Association standards at http://darksky.org/) and limited to warm light colors with an output temperature of 2700 kelvin or less.

COMMENT 3: Riparian Setbacks

Issue: With the development of new buildings and infrastructure near the San Lorenzo River, the Project has the potential to encroach into the riparian zone. Encroachment in the riparian zone can negatively impact sensitive riparian species and can lead to increased pollutants and deleterious materials entering the stream.

Evidence the impact would be significant: An estimated 2 to 7 percent of California's riparian habitat remains intact and has not been converted to other land uses (Katibah 1984, Dawdy 1989). Riparian buffers help keep pollutants from entering adjacent waters through a combination of processes including dilution, sequestration by plants and microbes, biodegradation, chemical degradation, volatilization, and entrapment within soil particles. Narrow riparian buffers are considerably less effective in minimizing the effects of adjacent development than wider buffers (Castelle et al. 1992, Brosofske et al. 1997, Dong et al. 1998, Kiffney et al. 2003, Moore et al. 2005). Riparian trees and vegetation, and associated floodplains, provide many essential benefits to stream and aquatic species habitat (Moyle 2002, CDFW 2007), including thermal protection, cover, and large woody debris. Development adjacent to the riparian zone can result in fragmentation of riparian habitat and decreases in native species abundance and biodiversity (Davies et al. 2001, Hansen et al. 2005, CDFW 2007).

Recommendation: CDFW recommends that the Project establish and the EIR incorporate a riparian buffer zone to limit development and vegetation clearing to outside of the riparian area. CDFW is available to coordinate with the City to determine appropriate site-specific riparian buffers to reduce impacts to sensitive species and riparian habitat to less-than-significant. At a minimum, CDFW recommends a 50-foot riparian buffer as measured from the top of streambank to the nearest Project infrastructure.

ENVIRONMENTAL DATA

CEQA requires that information developed in EIRs and negative declarations be incorporated into a database which may be used to make subsequent or supplemental environmental determinations (Pub. Resources Code, § 21003, subd. (e)). Accordingly,

DocuSign Envelope ID: F7B8B2B1-0B1F-47BB-9078-D86029CE76EF

please report any special-status species and natural communities detected during Project surveys to CNDDB. The CNNDB online field survey form and other methods for submitting data can be found at the following link: https://wildlife.ca.gov/Data/CNDDB/Submitting-Data. The types of information reported to CNDDB can be found at the following link: https://wildlife.ca.gov/Data/CNDDB/Plantsand-Animals.

FILING FEES

CDFW anticipates that the Project will have an impact on fish and/or wildlife, and assessment of filing fees is necessary (Fish & G. Code, § 711.4; Pub. Resources Code, § 21089). Fees are payable upon filing of the Notice of Determination by the Lead Agency and serve to help defray the cost of environmental review by CDFW.

CONCLUSION

CDFW appreciates the opportunity to comment on the NOP to assist the City in identifying and mitigating Project impacts on biological resources. If you have any questions, please contact Ms. Serena Stumpf, Environmental Scientist, at (707) 337-1364 or Serena.Stumpf@wildlife.ca.gov; or Mr. Wesley Stokes, Senior Environmental Scientist (Supervisory), at Wesley.Stokes@wildlife.ca.gov.

Sincerely,

4 July 2022

Dear Ms. Heidi Luckenbach, P. E.

Thank you for sending *Our Water Our Future.*

It is a difficult to read and understand. I doubt many read it to the end.

The notice is a nightmare of written English. The department needs help in writing reports in plain English. Many basic rules of writing are ignored. I will mention just one.

1. Use fewer words. The salutation: "Notice of a preparation of an" we already know it's a notice and dispense with what follows, anyway, what is a "Scoping Meeting". Why not just: "Graham Hill Water Treatment Plant Improvements Project." That heading tells us everything we need to know about the notice. Do we need "To interested Persons and Agencies"? The next paragraph continues in the same vein: there is needless repetition.

The notice continues in this way to the end. I recommend the Department buy Harold Evans's book, *Do I Make Myself Clear*, published in 2016. The book is an easy read and is full of advice about writing notices like yours. One example is the rewriting the Social Security Act in plain English.

Unfortunately, Ms. Luckenbach, you are not alone in your writing style.

Yours sincerely,

Colin A Mackenzie

Colin A. Mackenzie.

Graham Hill Water Treatment Plant Facility Improvements Project

Written Comments on the Scope of the Environmental Impact Report (EIR)

(please print)

Please see origin e-mail for comments.

Please note: Comments, including personal information, become public information and may be released to interested parties if requested.

TIPS ON HOW TO COMMENT

- Read the Notice of Preparation
- Comment on the following:
  - Environmental issues that should be studied
  - Nature and extent of potential environmental impacts
  - Methods of analysis
  - Measures that could reduce environmental impacts
  - Alternatives that could avoid or reduce impacts

Public Review Period Ends: Tuesday, July 26, 2022, 5:00 P.M.

To ensure that comments will be considered during the scoping period, the City of Santa Cruz Water Department must receive written comments by the close of the public scoping period (**5:00 PM on Tuesday, July 26, 2022**). There will be additional opportunities to comment on the Draft EIR for the project during the Draft EIR public review period.

Please send by mail or email to the address below.

Send comments to:

Jessica Martinez-McKinney, Associate Planner II
City of Santa Cruz Water Department
212 Locust Street, Suite C
Santa Cruz, CA 95060
jmartinezmckinney@cityofsantacruz.com (please use subject line "FIP Scoping Comments")

Please note that your address, phone number, e-mail address, or other personal identifying information in your comment, is part of your entire comment. Comments—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Solar and Battery Storage: Given that "an increase in the use of power may be required for operations of the new facilities." Incorporation of solar power and battery storage into the design of the new and revised facilities will reduce the environmental impact including: Allow the elimination of the current diesel-powered emergency generator, eliminating the noise, smoke, fuel, and fire exposures the current generator presents. Such an arrangement will also aid in carbon neutrality, eliminate fuel supply chain vulnerabilities, reduce grid loading, and offset electrical power costs and demand charges. The solar installation is best configured to provide peak performance in the afternoon during peak power pricing. The panels themselves can shade equipment and provide some level of noise attenuation. If ground mount panels are considered, we would not object to their placement opposite our property line. (Reverse NIMBY)

Wildfire Resiliency:
Though the draft indicated that: "Project is located in a Local Responsibility Area (LRA) designated as a LRA Moderate Fire Hazard Severity Zone for wildlife fires (CALFIRE 2007)" This exposure is more severe than it would appear from this description, our homeowner's policy canceled due to wildfire exposure.

There are two levels of wildfire exposure at the water treatment plant.

1. *Direct radiant heat* exposure from grass, brush and woodland adjacent the treatment plant buildings and equipment, and neighboring properties. This exposure is aggravated by downslopes which extend flame lengths.
2. *Ember attack* from hot brands landing on and in buildings and other combustible loading both at water treatment plant and neighbors. Ember attack is from fuels close enough to yield glowing brands.

These hazards are best addressed with a reduced fuel zone between buildings and denser woodland exposure. The reduced fuel zone can range from 15 to 510 ft depending on the topography, fuel loading and structure combustibility. 510 ft applies to downslope woodland exposure to combustible buildings. The finished product of a reduced fuel zone will look more like a park than dense foliage, and can be accomplished with the removal of non-native species such as acacia and broom. Selective thinning of natives to separate tree canopies, and the continued mowing of grasses to reduce surface fuels.
Include neighbors in the selective thinning to both maintain screening and break up the canopy in areas that improve sight lines.

Noise Isolation:

Noise is divided into two categories from the report: “short-term construction activities as well as longer-term operational activities”. The operational noise consists of operating equipment. A third category is intermittent operations such as trash collection.

The water treatment plant staff has done a good job of limiting construction activity to business hours and these are of course temporary disruptions necessary to complete plant upgrades. The second category of noise is the background noise from the operation of the plant. It is our hope that the temporary disruptions associated with construction yield ongoing benefits in the reduction of normal plant operation background noise.

The lamella clarifier is one example. A good portion of the noise generated is from the fan intake, this could perhaps be reduced with a longer intake.

This is just one example we can identify; I am sure there are others that make lesser but collective contributions.

A third category of noise is short term from operations such as garbage collection, anything that can be done to isolate this noise will also be appreciated.

Fencing:
The fencing between our property and the water treatment plant no longer provides secure separation between the properties due to several factors. Currently a pedestrian can access the water treatment property by merely stepping over the fence. We would like to work with water treatment plant to replace our common fencing with fencing that will provide the necessary security as well as meeting the requirements for pool fencing. We would like to develop an arrangement that is essentially transparent (perhaps black chain link) but also provides some separation to limit the travel of gophers between our yard and the water treatment plant.

Lighting:
There are occasional lights which cast a good portion of their light up vs. down. If shrouds can be provided it will improve dark skies when in use.

Sewer:
The homes on Mosswood Court are on pit type septic systems. As these systems are no longer allowed provisions for downhill flow connection of sewers will facilitate sewage disposal and mitigate any environmental concerns these adjacent systems may present.

Re: 2022060566, Graham Hill Water Treatment Plant Facility Improvements Project, Santa Cruz County

Dear Ms. Martinez-McKinney:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

a. A brief description of the project.

b. The lead agency contact information.

c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).

d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

a. Alternatives to the project.

b. Recommended mitigation measures.

c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

a. Type of environmental review necessary.

b. Significance of the tribal cultural resources.

c. Significance of the project's impacts on tribal cultural resources.

d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

a. Whether the proposed project has a significant impact on an identified tribal cultural resource.

b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.
3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:
    a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
    b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (https://ohp.parks.ca.gov/?page_id=30331) for an archaeological records search. The records search will determine:
    a. If part or all of the APE has been previously surveyed for cultural resources.
    b. If any known cultural resources have already been recorded on or adjacent to the APE.
    c. If the probability is low, moderate, or high that cultural resources are located in the APE.
    d. If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
    a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
    b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
   a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
   b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
   a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
   b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
   c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Cody.Campagne@nahc.ca.gov.

Sincerely,

Cody Campagne

Appendix B

Treatment Goals for the Proposed Project

Treatment Goals for Proposed Project

The current Graham Hill Water Treatment Plant (GHWTP) is a conventional surface water treatment facility with traditional coagulation, flocculation, sedimentation, and granular multi-media filtration. The facility currently meets all drinking water quality standards and regulatory requirements. The GHWTP Facility Improvements Project (Proposed Project) will improve the reliability of the GHWTP in meeting current and potential future water quality requirements and improve the ability of the GHWTP to treat more variable and challenging source water quality conditions influenced by climate change, and needed for implementation of the City's Water Supply Augmentation Strategy.

Table 1 presents a summary of GHWTP treated water quality parameters, and the major regulatory requirements and Proposed Project treatment goals for the GHWTP (AECOM/W.M. Lyles Co. 2022). The table identifies the treatment goals that the Proposed Project must meet. During acceptance testing the design-builder must demonstrate compliance with these treatment goals. These treatment goals are a contractual obligation, and the Proposed Project must meet or exceed (do better) than the listed goals. The ave, min, 90th, and max columns present a summary of existing GHWTP treated water quality from 2018 to 2021, as documented in AECOM/WML's comprehensive assessment of GHWTP water quality (AECOM/W.M. Lyles Co. 2022). The existing treatment performance (ave/min/max/90) is provided as a comparison to the Proposed Project goals.

Table 1. GHWTP Treated Water Quality and Treatment Goals* (continued)

Constituent[(a)]	Units[(a)]	Regulatory MCL/ SMCL	Ave	Min	90th percentile	Max	Treated Water Performance Goal*
Hardness	mg/L as $CaCO_3$	< 300	161	122	175	192	—
Total Dissolved Solids (TDS)	mg/L	500	266	250	278	280	—
Conductivity	uS/cm	—	429	320	455	480	—
Acrylamide	mg/L	Total dose of 1.0	—	—	—	—	<80% MCL
Future Contaminants of Emerging Concern	—	varies	—	—	—	—	Maximize removal

Source: AECOM and W.M. Lyles Co. 2022.

Notes:

* This is not an exhaustive list. Performance objectives include all Primary and Secondary Maximum Contaminant Levels, whether listed herein or not.

(a) Definitions: MCL = Maximum Contaminant Level; SMCL = Secondary Maximum Contaminant Level; ave = average; min = minimum; and max = maximum; CFE = computational fluid dynamics; IFE = individual filter water effluent; ^{o}C = degrees Celsius; cm^{-1} = ultraviolet (UV) absorbance per centimeter; µg/L = micrograms per liter; mg/L = milligrams per liter; NTU = nephelometric turbidity units; s.u. = standard units; uS/cm = microsiemens/centimeter; HAA = haloacetic acids (disinfection by-products); HAA5 = group of five haloacetic acids (disinfection by-products); HAA9 = group of nine haloacetic acids (disinfection by-products); TTHM = total trihalomethanes; $CaCO_3$ = calcium carbonate; and UV = ultraviolet.

(b) TTHM and HAA values from quarterly distribution system compliance sampling (not location running annual average ([LRAA]) dating 4th Q 2012 to 3rd Q 2021.

(c) Limit/treated water objective is the LRAA measured in the distribution system.

(d) Distribution system TTHMs and HAAs are also influenced by treated water from Beltz Water Treatment Plant.

7.4. Health & Equity Measures

7.5. Evaluation Scorecard

7.6. Health & Equity Custom Measures

8. User Changes to Default Data

1. Basic Project Information

1.1. Basic Project Information

Data Field	Value
Project Name	GHWTP FIP Construction
Construction Start Date	11/12/2024
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	1.80
Precipitation (days)	2.40
Location	715 Graham Hill Rd, Santa Cruz, CA 95060, USA
County	Santa Cruz
City	Santa Cruz
Air District	Monterey Bay ARD
Air Basin	North Central Coast
TAZ	3110
EDFZ	6
Electric Utility	Pacific Gas & Electric Company
Gas Utility	Pacific Gas & Electric
App Version	2022.1.1.20

1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
Industrial Park	62.6	1000sqft	2.25	62,606	0.00	0.00	—	GHWTP

Other Asphalt Surfaces	1.75	Acre	1.75	0.00	0.00	0.00	—	Parking/Roads
Road Widening	1.02	Mile	1.85	0.00	0.00	—	—	Sewer Replacement
Road Widening	0.24	Mile	0.43	0.00	0.00	—	—	Storm Drain Replacement

1.3. User-Selected Emission Reduction Measures by Emissions Sector

Sector	#	Measure Title
Construction	C-5	Use Advanced Engine Tiers

2. Emissions Summary

2.1. Construction Emissions Compared Against Thresholds

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	6.83	annual days of extreme heat
Extreme Precipitation	18.0	annual days with precipitation above 20 mm
Sea Level Rise	0.00	meters of inundation depth
Wildfire	5.04	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A

Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—

AQ-Ozone	14.9
AQ-PM	3.16
AQ-DPM	13.8
Drinking Water	68.6
Lead Risk Housing	60.7
Pesticides	15.7
Toxic Releases	14.7
Traffic	21.2
Effect Indicators	—
CleanUp Sites	75.6
Groundwater	83.3
Haz Waste Facilities/Generators	62.5
Impaired Water Bodies	90.1
Solid Waste	0.00
Sensitive Population	—
Asthma	5.77
Cardio-vascular	9.73
Low Birth Weights	64.5
Socioeconomic Factor Indicators	—
Education	21.4
Housing	11.2
Linguistic	5.64
Poverty	31.3
Unemployment	79.7

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	80.76478891
Employed	73.95098165
Median HI	64.7760811
Education	—

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	22.0
Healthy Places Index Score for Project Location (b)	86.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Information provided by City
Construction: Construction Phases	Overall schedule provided by City. Included the future UV building and the off-site sewer and storm drain replacements to be conservative.
Construction: Trips and VMT	Default vehicle trips rounded up to nearest even number and added vendor trips for water trucks during site preparation and grading phases
Construction: On-Road Fugitive Dust	Project and surrounding roads are paved. Adjusted % of travel on paved roads accordingly.
Construction: Dust From Material Movement	Material Import/Export based on information from the City

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	6.83	annual days of extreme heat
Extreme Precipitation	18.0	annual days with precipitation above 20 mm
Sea Level Rise	0.00	meters of inundation depth
Wildfire	5.04	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider different increments of sea level rise coupled with extreme storm events. Users may select from four model simulations to view the range in potential inundation depth for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 50 meters (m) by 50 m, or about 164 feet (ft) by 164 ft.

Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A

Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	14.9
AQ-PM	3.16
AQ-DPM	13.8
Drinking Water	68.6
Lead Risk Housing	60.7
Pesticides	15.7
Toxic Releases	14.7
Traffic	21.2

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	22.0
Healthy Places Index Score for Project Location (b)	86.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Information provided by City. Separated operations/filter building (general light industry) and the rest of GHWTP (industrial park) to model workers and trucks, respectively
Construction: Construction Phases	Overall schedule provided by City. Included the future UV building and the off-site sewer and storm drain replacements to be conservative.
Construction: Trips and VMT	Default vehicle trips rounded up to nearest even number and added vendor trips for water trucks during grading phases
Construction: On-Road Fugitive Dust	Project and surrounding roads are paved. Adjusted % of travel on paved roads accordingly.
Operations: Fleet Mix	Adjusted fleet mix to only anticipated employee vehicles (i.e., LDA, LDT, MDV) and 3 and 4-axle trucks (MHDT and HHDT)

Operations: Road Dust	All roads assumed to be paved
Operations: Vehicle Data	Trip rates based on anticipated truck and worker annual average, including 514 annual truck trips (chem delivery, GAC, and sludge removal) and 15 daily employees. Average truck trip length includes GAC truck to Compton
Operations: Energy Use	GHGs from electricity were estimated in a spreadsheet model. No natural gas would be consumed with the project.
Operations: Water and Waste Water	Project would increase water use by up to 121,000 gpd for facility processes. Other indoor/outdoor water would be the same as for the existing scenario and not included in the modeling.
Operations: Solid Waste	Municipal solid waste anticipated to be the same as for existing and not included in modeling. Process solid waste GHGs estimated in a spreadsheet model.
Operations: Off-Road Equipment	1 propane forklift and 1 extendable forklift anticipated, with infrequent usage of the forklifts

GHWTP FIP Project Operations - Max Day Detailed Report

Table of Contents

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	6.83	annual days of extreme heat
Extreme Precipitation	18.0	annual days with precipitation above 20 mm
Sea Level Rise	0.00	meters of inundation depth
Wildfire	5.04	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider different increments of sea level rise coupled with extreme storm events. Users may select from four model simulations to view the range in potential inundation depth for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 50 meters (m) by 50 m, or about 164 feet (ft) by 164 ft.

Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A

Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	14.9
AQ-PM	3.16
AQ-DPM	13.8
Drinking Water	68.6
Lead Risk Housing	60.7
Pesticides	15.7
Toxic Releases	14.7
Traffic	21.2
Effect Indicators	—
CleanUp Sites	75.6
Groundwater	83.3
Haz Waste Facilities/Generators	62.5
Impaired Water Bodies	90.1
Solid Waste	0.00

Sensitive Population	—
Asthma	5.77
Cardio-vascular	9.73
Low Birth Weights	64.5
Socioeconomic Factor Indicators	—
Education	21.4
Housing	11.2
Linguistic	5.64
Poverty	31.3
Unemployment	79.7

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	80.76478891
Employed	73.95098165
Median HI	64.7760811
Education	—
Bachelor's or higher	75.15719235

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	22.0
Healthy Places Index Score for Project Location (b)	86.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Information provided by City. Separated operations/filter building (general light industry) and the rest of GHWTP (industrial park) to model workers and trucks, respectively
Construction: Construction Phases	Overall schedule provided by City. Included the future UV building and the off-site sewer and storm drain replacements to be conservative.
Construction: Trips and VMT	Default vehicle trips rounded up to nearest even number and added vendor trips for water trucks during grading phases
Construction: On-Road Fugitive Dust	Project and surrounding roads are paved. Adjusted % of travel on paved roads accordingly.
Operations: Fleet Mix	Adjusted fleet mix to only anticipated employee vehicles (i.e., LDA, LDT, MDV) and 3 and 4-axle trucks (MHDT and HHDT)

Operations: Road Dust	All roads assumed to be paved
Operations: Vehicle Data	Trip rates based on anticipated truck and worker max day, assuming 3 trucks (chem delivery, GAC, and sludge removal) and 15 employees for worst case. Average truck trip length includes GAC truck to Compton
Operations: Energy Use	GHGs from electricity were estimated in a spreadsheet model. No natural gas would be consumed with the project.
Operations: Water and Waste Water	Project would increase water use by up to 121,000 gpd for facility processes. Other indoor/outdoor water would be the same as for the existing scenario and not included in the modeling.
Operations: Solid Waste	Municipal solid waste anticipated to be the same as for existing and not included in modeling. Process solid waste GHGs estimated in a spreadsheet model.
Operations: Off-Road Equipment	1 propane forklift and 1 extendable forklift anticipated, with infrequent usage of the forklifts

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	6.83	annual days of extreme heat
Extreme Precipitation	18.0	annual days with precipitation above 20 mm
Sea Level Rise	0.00	meters of inundation depth
Wildfire	5.04	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider different increments of sea level rise coupled with extreme storm events. Users may select from four model simulations to view the range in potential inundation depth for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 50 meters (m) by 50 m, or about 164 feet (ft) by 164 ft.
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	14.9
AQ-PM	3.16
AQ-DPM	13.8
Drinking Water	68.6
Lead Risk Housing	60.7
Pesticides	15.7
Toxic Releases	14.7
Traffic	21.2
Effect Indicators	—
CleanUp Sites	75.6
Groundwater	83.3
Haz Waste Facilities/Generators	62.5
Impaired Water Bodies	90.1
Solid Waste	0.00
Sensitive Population	—
Asthma	5.77
Cardio-vascular	9.73

Low Birth Weights	64.5
Socioeconomic Factor Indicators	—
Education	21.4
Housing	11.2
Linguistic	5.64
Poverty	31.3
Unemployment	79.7

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	80.76478891
Employed	73.95098165
Median HI	64.7760811
Education	—
Bachelor's or higher	75.15719235
High school enrollment	100
Preschool enrollment	65.09688182
Transportation	—
Auto Access	97.49775439
Active commuting	70.4478378
Social	—
2-parent households	61.56807391

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	22.0

Healthy Places Index Score for Project Location (b)	86.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Information provided by City. Separated operations/filter building (general light industry) and the rest of GHWTP (industrial park) to model workers and trucks, respectively
Construction: Construction Phases	Overall schedule provided by City. Included the future UV building and the off-site sewer and storm drain replacements to be conservative.
Construction: Trips and VMT	Default vehicle trips rounded up to nearest even number and added vendor trips for water trucks during grading phases
Construction: On-Road Fugitive Dust	Project and surrounding roads are paved. Adjusted % of travel on paved roads accordingly.
Operations: Fleet Mix	Adjusted fleet mix to only anticipated employee vehicles (i.e., LDA, LDT, MDV) and 3-axle trucks (MHDT)
Operations: Road Dust	All roads assumed to be paved
Operations: Vehicle Data	Trip rates based on anticipated truck and worker annual average based on information provided by the City.
Operations: Energy Use	GHGs from electricity were estimated in a spreadsheet model. Existing natural gas consumption provided by City.

Operations: Water and Waste Water	Not included in the existing modeling.
Operations: Solid Waste	Municipal solid waste anticipated to be the same as for existing and not included in modeling.
Operations: Off-Road Equipment	1 propane forklift at existing facility

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	6.83	annual days of extreme heat
Extreme Precipitation	18.0	annual days with precipitation above 20 mm
Sea Level Rise	0.00	meters of inundation depth
Wildfire	5.04	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider different increments of sea level rise coupled with extreme storm events. Users may select from four model simulations to view the range in potential inundation depth for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 50 meters (m) by 50 m, or about 164 feet (ft) by 164 ft.
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	14.9
AQ-PM	3.16
AQ-DPM	13.8
Drinking Water	68.6
Lead Risk Housing	60.7
Pesticides	15.7
Toxic Releases	14.7
Traffic	21.2

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	22.0

Healthy Places Index Score for Project Location (b)	86.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Information provided by City. Separated operations/filter building (general light industry) and the rest of GHWTP (industrial park) to model workers and trucks, respectively
Construction: Construction Phases	Overall schedule provided by City. Included the future UV building and the off-site sewer and storm drain replacements to be conservative.
Construction: Trips and VMT	Default vehicle trips rounded up to nearest even number and added vendor trips for water trucks during grading phases
Construction: On-Road Fugitive Dust	Project and surrounding roads are paved. Adjusted % of travel on paved roads accordingly.
Operations: Fleet Mix	Adjusted fleet mix to only anticipated employee vehicles (i.e., LDA, LDT, MDV) and 3-axle trucks (MHDT)
Operations: Road Dust	All roads assumed to be paved
Operations: Vehicle Data	Trip rates based on truck and worker vehicles during worst case day based on information provided by the City.
Operations: Energy Use	GHGs from electricity were estimated in a spreadsheet model. Existing natural gas consumption provided by City.

Operations: Water and Waste Water	Not included in the existing modeling.
Operations: Solid Waste	Municipal solid waste anticipated to be the same as for existing and not included in modeling.
Operations: Off-Road Equipment	1 propane forklift at existing facility

[a] California Air Resources Board, the California Climate Action Registry, ICLEI-Local Governments for Sustainability and The Climate Registry, Local

[b] CARB, 2010, Table 9.7 Default Decomposable Anaerobic Fraction (DANF)of the TDOC per waste type.

[c] California Integrated Waste Management Board, 2018 Facility-Based Characterization of Solid Waste in California, May 15, 2020, Table 4.

Solid Waste GHGs

$G = DOC \times DANF \times C \times A$

G =	generation mass of carbon (short ton carbon per short ton of waste)
DOC =	degradable organic carbon fraction (%)
DANF =	degradable anaerobic fraction (%)
C =	waste stream composition (%)
A =	anaerobic carbon fraction (0.5)

For sludge only:

DOC =	0.050
DANF =	0.500
C =	1
A =	0.5
G =	0.0125 short ton carbon per short ton waste

And

$E_{CH4} = T \times G \times [C \times (1 - D) + (1 - C) \times (1 - Ox)] \times R \times UC$

$E_{CO2} = T \times G \times [C \times D + (1 - C) \times Ox + 1] \times R \times UC$

Where

E_{CH4} = CH4 emissions (MT/year)

E_{CO2} =	CO2 emissions (MT/year)
T =	short tons of waste generated by the project (ton/yr)
G =	generation mass of carbon (short ton carbon per short ton of waste)
C =	collection efficiency of landfill gas (75%)
D =	destruction efficiency of landfill gas (98%)
Ox =	oxidation efficiency (10%)
R =	ratio of molecular weights for CO2 and carbon (44g CO2/ 12g carbon) and (16g CH4/ 12g carbon)
UC =	unit conversion from sort tons to MT (0.907185 MT/short ton)

GHWTP FIP solid waste off-haule

2,123	CY per year based on average flows
1,910.70	tons per year

GHG Emissions for Sludge:

E_{CH4} =	8.25	MT/year CH4
E_{CO2} =	136.20	MT/year CO2
Total GHGs	342.47	MT/year CO2e

*Accounts for default capture vs no capture % in CalEEMod

5.18.2.2. Mitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	6.83	annual days of extreme heat
Extreme Precipitation	18.0	annual days with precipitation above 20 mm
Sea Level Rise	0.00	meters of inundation depth
Wildfire	5.04	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A

Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—

AQ-Ozone	14.9
AQ-PM	3.16
AQ-DPM	13.8
Drinking Water	68.6
Lead Risk Housing	60.7
Pesticides	15.7

Unemployment	79.7

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	80.76478891
Employed	73.95098165
Median HI	64.7760811
Education	—
Bachelor's or higher	75.15719235
High school enrollment	100
Preschool enrollment	65.09688182
Transportation	—
Auto Access	97.49775439
Active commuting	70.4478378

2016 Voting	91.0

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	22.0
Healthy Places Index Score for Project Location (b)	86.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Information provided by City
Construction: Construction Phases	Overall schedule provided by City. Included the future UV building and the off-site sewer and storm drain replacements to be conservative.
Construction: Trips and VMT	Default vehicle trips rounded up to nearest even number and added vendor trips for water trucks during site preparation and grading phases. Diesel trucks modeled only for HRA. Truck trip length = 0.25 miles to account for onsite/passby truck travel
Construction: On-Road Fugitive Dust	Project and surrounding roads are paved. Adjusted % of travel on paved roads accordingly.
Construction: Dust From Material Movement	Material Import/Export based on information from the City
