Malibu Vineyards Industrial Parkway Project
SCH# 2022080056
Kern County

Dear Ms. Slayton:

The Division of Safety of Dams (DSOD) has reviewed the Draft Environmental Impact Report for the Malibu Vineyards, LP's Malibu Vineyards Industrial Parkway Project, submitted by the Kern County Planning and Natural Resources Department (Department), which described the proposed project that includes the construction of retention basins.

As defined in sections 6002 and 6003, Division 3, of the California Water Code, dams 25 feet or higher with a storage capacity of more than 15 acre-feet, and dams higher than 6 feet with a storage capacity of 50 acre-feet or more are subject to State jurisdiction. The dam height is the vertical distance measured from the maximum possible water storage level to the downstream toe of the barrier.

Insufficient information is provided in the environmental assessment report to make an accurate jurisdictional determination with regards to the proposed construction work related to the proposed basins. Malibu Vineyards, LP needs to submit design drawings for the proposed enlargement of the existing basin so that DSOD can make a jurisdictional determination.

If the proposed work is subject to State jurisdiction, a construction application, together with plans, specifications, and the appropriate filing fee must be filed with DSOD for this project. All dam safety related issues must be resolved prior to approval of the application, and the work must be performed under the direction of a Civil Engineer registered in California. Melissa Pi, our Acting Design Engineering Branch Manager, is responsible for the application process and can be reached at (916) 820-7788.

Ms. Slayton
