SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 07/13/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 01/13/2022
Date of Next Scheduled Update: 04/18/2022

RCRA-LQG: RCRA - Large Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-8895
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 12/17/2021
Date of Next Scheduled Update: 04/04/2022

CA EMI: Emissions Inventory Data
Source: California Air Resources Board
Telephone: 916-322-2990
Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

Date of Government Version: 12/31/2019
Database Release Frequency: Varies
Date of Last EDR Contact: 12/17/2021
Date of Next Scheduled Update: 03/28/2022

CA WDS: Waste Discharge System
Source: State Water Resources Control Board
Telephone: 916-341-5227
Sites which have been issued waste discharge requirements.

Date of Government Version: 06/19/2007
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 11/15/2021
Date of Next Scheduled Update: 02/28/2022

CA AST: Aboveground Petroleum Storage Tank Facilities
Source: California Environmental Protection Agency
Telephone: 916-327-5092
A listing of aboveground storage tank petroleum storage tank locations.

Date of Government Version: 07/06/2016
Database Release Frequency: Varies
Date of Last EDR Contact: 12/08/2021
Date of Next Scheduled Update: 03/28/2022

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 01/07/2022
Date of Next Scheduled Update: 04/18/2022

CA HMS LOS ANGELES: HMS: Street Number List
Source: Department of Public Works
Telephone: 626-458-3517
Industrial Waste and Underground Storage Tank Sites.

Date of Government Version: 10/14/2021
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 01/13/2022
Date of Next Scheduled Update: 04/18/2022

NY MANIFEST: Facility and Manifest Data
Source: Department of Environmental Conservation
Telephone: 518-402-8651
Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 01/01/2019
Database Release Frequency: Quarterly
Date of Last EDR Contact: 10/29/2021
Date of Next Scheduled Update: 02/07/2022

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases.

Section 1: Facility Detail Reports . . . . . Page 3

All available detailed information from databases where sites are identified.

Section 2: Databases and Update Information. . . . . Page 32

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 07/13/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 01/13/2022
Date of Next Scheduled Update: 04/18/2022

CA CERS: CERS
Source: California Environmental Protection Agency
Telephone: 916-323-2514
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

Date of Government Version: 10/18/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 01/19/2022
Date of Next Scheduled Update: 05/02/2022

CA CERS HAZ WASTE: CERS HAZ WASTE
Source: CalEPA
Telephone: 916-323-2514
List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 10/18/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 01/19/2022
Date of Next Scheduled Update: 05/02/2022

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 01/07/2022
Date of Next Scheduled Update: 04/18/2022

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases.

Section 1: Facility Detail Reports . . . . . Page 3

All available detailed information from databases where sites are identified.

Section 2: Databases and Update Information. . . . . Page 26

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 375156
Site Name: Coast Iron and Steel Company
Violation Date: 11-07-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/01/2017. Observed 2-55 gallon drums of used oil and 1-55 gallon drum of non-empty aerosol cans without proper labeling. Provide documentation indicating drums of hazardous waste have been labeled properly.
Violation Division: Santa Fe Springs Fire-Rescue
Violation Program: HW
Violation Source: CERS

Site ID: 375156
Site Name: Coast Iron and Steel Company
Violation Date: 11-07-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 12/01/2017. I observed 2-55 gallon drums of used oil and 1-55 gallon drum of aerosol cans that were not closed. Provide documentation indicating 2-55 gallon drums of used oil and 1-55 gallon drum of aerosol cans have been closed.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HMS LOS ANGELES: HMS: Street Number List
Source: Department of Public Works
Telephone: 626-458-3517
Industrial Waste and Underground Storage Tank Sites.

Date of Government Version: 07/08/2021
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 09/30/2021
Date of Next Scheduled Update: 01/17/2022

CA HIST UST: Hazardous Substance Storage Container Database
Source: State Water Resources Control Board
Telephone: 916-341-5851
The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 07/26/2001
Date of Next Scheduled Update: Not reported

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 04/08/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 09/30/2021
Date of Next Scheduled Update: 01/17/2022

CA WDS: Waste Discharge System
Source: State Water Resources Control Board
Telephone: 916-341-5227
Sites which have been issued waste discharge requirements.

Date of Government Version: 06/19/2007
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 08/10/2021
Date of Next Scheduled Update: 11/29/2021

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 07/09/2021
Date of Next Scheduled Update: 10/18/2021

CA NPDES: NPDES Permits Listing
Source: State Water Resources Control Board
Telephone: 916-445-9379
A listing of NPDES permits, including stormwater.

Date of Government Version: 05/10/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 08/13/2021
Date of Next Scheduled Update: 11/22/2021

ECHO: Enforcement & Compliance History Information
Source: Environmental Protection Agency
Telephone: 202-564-2280
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 06/26/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 07/01/2021
Date of Next Scheduled Update: 10/18/2021

RCRA-SQG: RCRA - Small Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-8895
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/22/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 09/15/2021
Date of Next Scheduled Update: 01/03/2022

CA CERS: CERS
Source: California Environmental Protection Agency
Telephone: 916-323-2514
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

Date of Government Version: 04/19/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 07/15/2021
Date of Next Scheduled Update: 11/01/2021

CA CIWQS: California Integrated Water Quality System
Source: State Water Resources Control Board
Telephone: 866-794-4977
The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

Date of Government Version: 05/19/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 08/31/2021
Date of Next Scheduled Update: 12/13/2021

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 05/05/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 08/31/2021
Date of Next Scheduled Update: 12/13/2021

CA CERS HAZ WASTE: CERS HAZ WASTE
Source: CalEPA
Telephone: 916-323-2514
List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/19/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 07/15/2021
Date of Next Scheduled Update: 11/01/2021

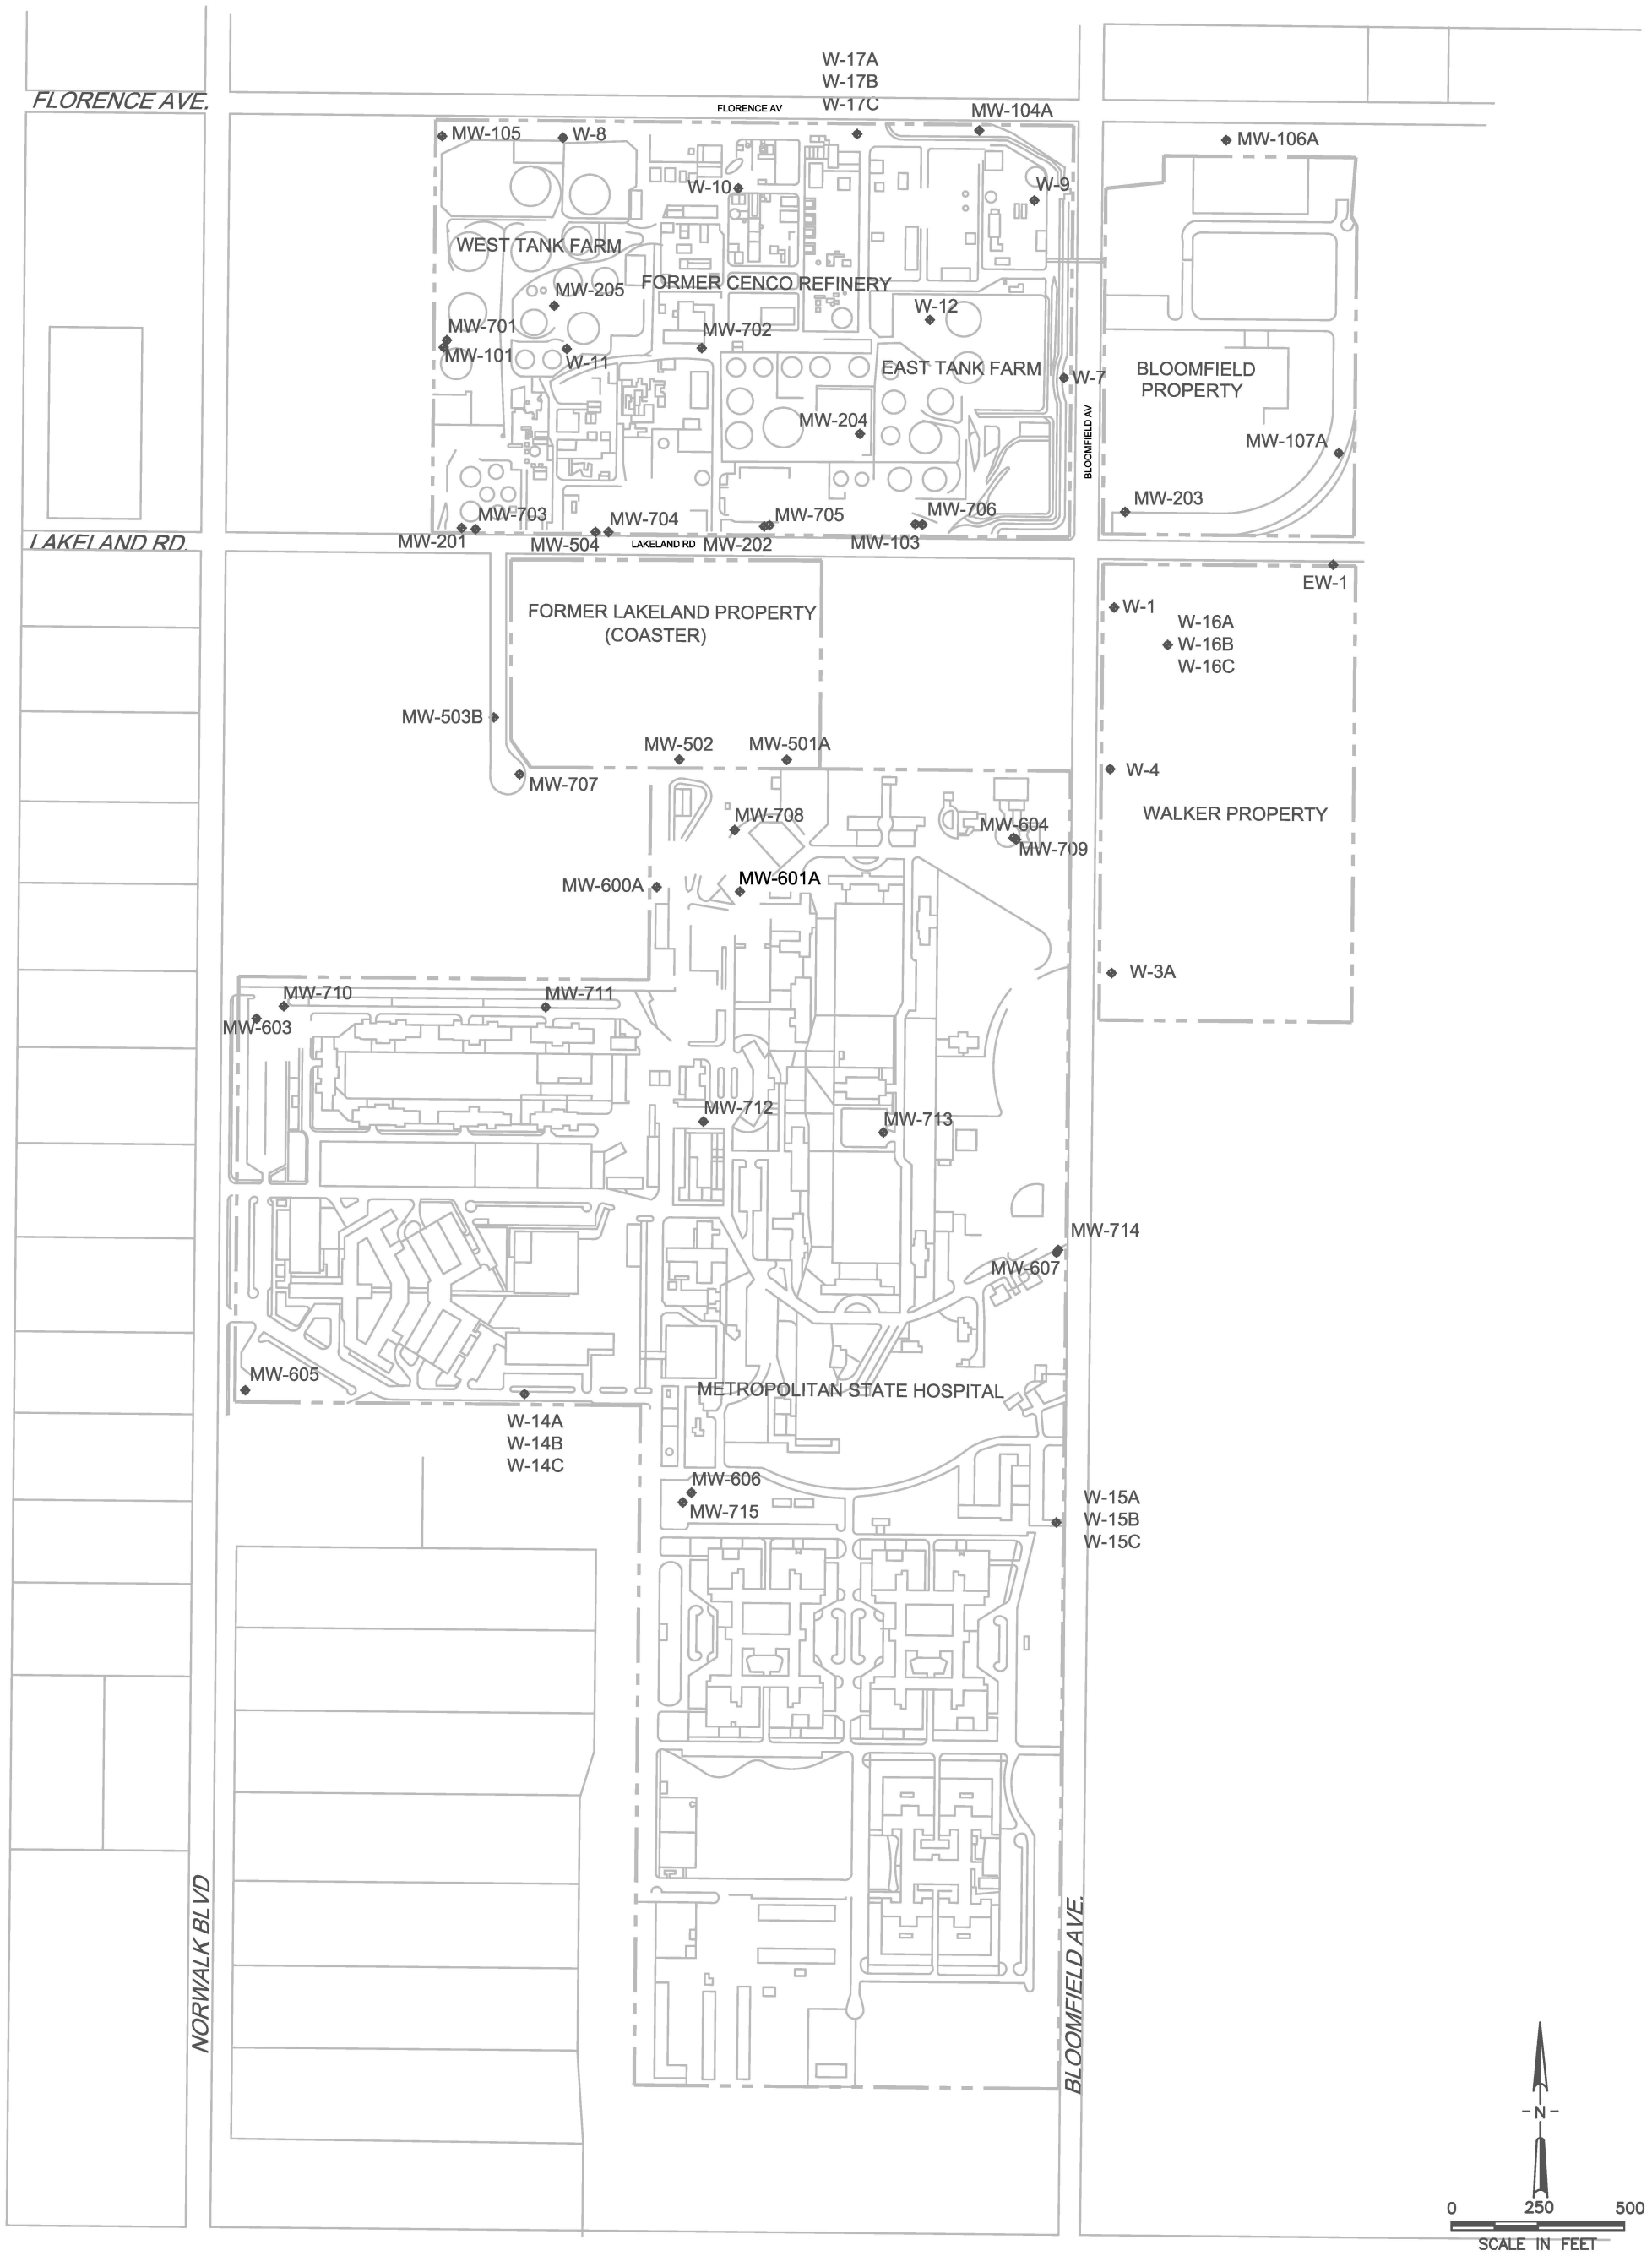
Community



EJSCREEN EJ Indexes

Eleven primary environmental justice (EJ) indexes of EJSCREEN, EPA's screening tool for EJ concerns. EPA uses these indexes to identify geographic areas that may warrant further consideration or analysis for potential EJ concerns. The index values below are for the Census block group in which the facility is located. Note that use of these indexes does not designate an area as an "EJ community" or "EJ facility." EJSCREEN provides screening level indicators, not a determination of the existence or absence of EJ concerns. For more information, see the EJSCREEN home page.

Demographic Profile of Surrounding Area (1 Mile)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 U.S. Census and 2014 - 2018 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. EPA's spatial processing methodology considers the overlap between the selected radii and the census blocks (for U.S. Census demographics) and census block groups (for ACS demographics) in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary.

No demographic profile information provided for this facility.

Industrial Environmental Association, Member (2018 to Present)

Professional Experience

Mr. Rauzon has more than 16 years of environmental services experience, all with SCS. Fluent in Spanish, Mr. Rauzon is an SCS Project Manager with a diverse background in biological and environmental sciences, and regularly performs environmental assessments and compliance audits at sites in the U.S. and in Latin America. He has technical and management experience with soil, soil vapor, and groundwater investigations at industrial, commercial, landfill, greenfield, and residential properties. He has extensive experience with environmental laws and regulations in both the U.S. and Mexico. His work experience includes all project phases, from development of cost estimates for various site assessment and cleanup programs to implementing remediation programs and interfacing with regulatory agencies. His experience with and understanding of these issues led to his appointment as a National Partner in Environmental Due Diligence in 2021.

Selected projects in which he has participated are described below.

Environmental Management

Due Diligence Assessments of Properties Prior to Real Estate Transfer of Properties in California, Arizona, New Jersey, Mexico, Puerto Rico, and the Dominican Republic. Mr. Rauzon has completed numerous due diligence assessments of properties prior to acquisition, disposition, or loan financing by investment banks, insurance companies, corporations, non-profit entities, real

estate developers, and private parties. Projects have included Phase I assessments that meet federal All Appropriate Investigation (AAI) regulations, American Society for Testing and Materials (ASTM) standards, and client-specific guidelines; inspections for asbestos and lead-based paint; Phase II investigations; preparation of abatement and remediation cost estimates; and regulatory agency coordination. These projects frequently involve review of previous environmental reports and investigation of current and past on-site operations, regulatory agency records searches, evaluation of historical property use information, identification of nearby potentially contaminated sites, and development of appropriate conclusions about environmental risks. Investigations involve preparation of work plans, soil boring and subsequent sampling, groundwater well installation and sampling, soil gas probe installation and sampling, precision mapping, evaluation of contaminants in accordance with regulatory requirements or generally accepted guidelines, preparation of investigation report, and analysis of applicable remedial alternatives. Mr. Rauzon has served as the Project Manager for sites that have received regulatory closure from various regulatory agencies.

Planning, Coordinating, and Supervising Remedial Actions That Included Excavation, Transport, and Disposal of Contaminated Soils and Water. Investigations involve preparation of Remedial Action Plans (RAPs), direction of fieldwork, oversight of confirmatory sampling, and interfacing with regulatory agencies.

Groundwater Monitoring and Reporting for Simi Valley Landfill and Recycling Center, Simi Valley, CA. Mr. Rauzon is a key team member for the sampling and monitoring of 10 groundwater wells and 5 leachate locations to evaluate potential releases from waste units affecting groundwater at Simi Valley Landfill. He also prepares the annual leachate control system's effectiveness reports and documents results of resampling of groundwater wells based on initial statistical indications of a release.

The Characterization of Hazardous Waste Materials. These projects include collection of soil and/or liquid samples to profile the waste materials, interpretation of laboratory results, and evaluation of disposal/recycling options to minimize the costs and liabilities to clients associated with the removal of wastes.

Assessment and Certification of Hazardous Waste Tank Systems. These investigations involve working with a Professional Engineer to complete field inspections of hazardous waste tanks, associated ancillary equipment, leak-detection systems, and secondary containment devices, as well as interfacing with regulatory agencies.

Project Management

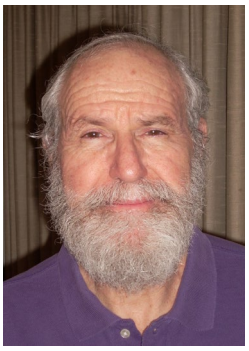
Project Manager for Environmental Due Diligence Assessment and Health and Safety Program Review of Six Geothermal Power Plants Located in California, Nevada, New Mexico, and Utah. SCS services included time-sensitive field inspection, environmental document and permit review, and preparation of environmental risk evaluation reports. Mr. Rauzon reviewed and assessed plant health and safety plans and procedures; facility response plans; incident reports; and arrangements for plant selection, appointment, and management of support contractors. SCS provided support consulting services in the successful client plant acquisition and integration support.

Project Manager for Due Diligence Investigations at Dry Mill and Biofuel Distillery Plant, Madera, CA. SCS services included Phase I environmental assessment and Phase II soil, soil vapor, and groundwater investigation to support client's acquisition of an ethanol production plant at which a lumber mill was historically located. SCS provided additional consulting services related to remediation cost analysis and management of ongoing environmental issues.

Project Manager for Due Diligence Investigation of a Portfolio With More Than 300 Industrial Sites Throughout Mexico. SCS services included conducting Phase I and Phase II environmental assessments within the strict timeline of the $1.2 billion industrial real estate transaction. Subsequent to the closing of the deal, SCS provided ongoing consulting services to facilitate integration and management of various facilities with ongoing environmental issues.

Project Manager for Hazardous Materials Consulting Services in Support of the State Route 91 Corridor Improvement Project in Orange and Riverside Counties, CA. SCS services included sampling and inventory of potentially hazardous materials associated with more than 25 bridges along the SR-91 and I-15 freeways; environmental assessments on properties within the proposed freeway expansion area; and soil testing for herbicides, pesticides, and fungicides on several land parcels.

Project Manager for Investigation and Remediation of Industrial Facility Located in Fontana, CA. SCS conducted a series of environmental assessments, investigations, and remedial activities that provided sufficient information to identify environmental issues and business risks, and facilitate the client's successful purchase of property. A number of recognized environmental conditions, including releases of coal tar, solvents, heavy metals, and total petroleum hydrocarbons, were identified. Project activities conducted during the acquisition and redevelopment of the property included shallow and deep soil and soil vapor investigations; installation of groundwater monitoring wells and subsequent groundwater sampling; subsequent remedial excavation under San Bernardino County Fire Department (SBCFD) oversight to obtain closure; and excavation and off-site disposition of contaminated soil.



Health and Safety

Mr. Rauzon has participated in a certified health and safety program in compliance with OSHA Standard 29 CFR 1910.120. He is knowledgeable in incident response operations, team functions, personnel safety, and field equipment. He is able to recognize and evaluate potential chemical and physical hazards and associated risks in field operations; discuss and use personal protective equipment (PPE), such as respiratory protection and protective clothing; use and interpret direct-reading instruments; and examine and establish Standard Operating Safety Guidelines to ensure safe and effective response operations.

Professional Experience

Dr. Lister has over 40 years of professional experience in geology and hydrogeology. His experience includes groundwater investigations at active and inactive industrial facilities; active, inactive, and planned solid waste disposal sites; and state and federal Superfund sites.

Projects in which Dr. Lister has participated include the following:

- Investigation of vadose and saturated zone contamination at industrial and commercial sites throughout Southern California, including Remedial Investigations (RI) and Feasibility Studies (FS).

- Permitting, facility investigations, corrective measures studies, closure design, and implementation at industrial facilities under various state regulations and the Resource Conservation and Recovery Act (RCRA).

- Investigations of surface and groundwater quality at landfills, including design of groundwater monitoring systems, direction of well drilling and installation, sampling and analysis, interpretation of data, and preparation of reports.

- Design of groundwater and vadose zone treatment systems, including determination of subsurface properties by means of aquifer pump tests, vapor extraction tests, and laboratory tests; determination of well location and spacing by means of capture zone analysis; preparation of remedial action plans, including specifications for extraction, injection, and air sparging wells; determination of emplacement reagents and volumes; and preparation of operations, maintenance, and test programs.

- Studies of proposed sites for new/expanded landfills and other waste management facilities, including hydrogeological assessments of sites for protection of water quality. Work has included installation of monitoring wells, groundwater sampling on a local and regional basis, conducting aquifer tests, and descriptions of groundwater regimes for environmental evaluation and permitting.

- Research into state-of-the-art groundwater investigation techniques and management of field investigative projects, resulting in the preparation of journal articles, reports, and guidance documents on the practical application of applicable techniques.

- Investigation of groundwater flow patterns in relation to migration of hydrocarbons, including regional subsurface studies of variations in permeability and porosity, potential migration pathways, and geochemical and geophysical indications of migration.

- Permitting, investigation, remediation, and closure activities conducted with oversight by various local and state agencies such as Regional Water Quality Control Boards (RWQCBs) and the Department of Toxic Substances Control (DTSC) in California. Projects have also been conducted with U.S. Environmental Protection Agency (U.S. EPA) oversight.

- Litigation support, including research and report preparation, advising legal counsel, and expert testimony.

Prior to joining SCS, Dr. Lister was District Geologist for Pennzoil Exploration and Production Company. He was in charge of petroleum exploration in Eastern Texas, Northern Louisiana, Arkansas, Mississippi, Alabama, Florida, and Georgia. He managed a drilling budget which averaged $2 million per year, and directed a team of eight geologists.

Dr. Lister has also obtained experience in various aspects of stratigraphy, geochemistry, structural geology, basin analysis, clastic and carbonate sedimentology, reservoir engineering, and tectonics. In addition to his work throughout California and the Gulf Coast, he has been involved in projects in Arizona, Utah, Nevada, Kansas, New York, South Korea, British Columbia, Bermuda, the Bahamas, and Mexico.

Dr. Lister's project experience is summarized below.

RCRA Facility Investigation and Corrective Action, Vernon, CA. As Project Manager, Dr. Lister participated in a RCRA investigation, which included soil, soil vapor, and groundwater aspects, at the former Norris Industries facility occupying approximately 16 acres. He prepared a Current Conditions Report, a Corrective Measures Study, and an Implementation Plan for the project. In addition, an off-site regional issues investigation, community relations tasks, health risk assessment, and closeout activities for an aerospace manufacturing tenant were conducted. Oversight of demolition activities related to property redevelopment, including sampling of various media, implementation of a soil management plan, and preparation of technical memoranda have been completed. Post-corrective action monitoring is ongoing.

Indoor Air, Vadose Zone, and Groundwater Investigation at Former Zinc Plating Facility, Long Beach, CA. As Technical Advisor, Dr. Lister oversaw the construction of soil borings and vapor wells; air, soil, soil vapor, and groundwater sampling and analysis; spatial distribution modeling; health risk assessment; community outreach; corrective measures study; and report preparation, all conducted with oversight by DTSC. The project also included the assessment of a large light non-aqueous phase

liquid plume sourced from an off-site region, which involved the removal of liquids and recovery testing activities, along with monthly well gauging, sampling and analysis of product and groundwater, and a forensic evaluation. In addition, subslab depressurization testing was conducted to provide design input for a building protection system that has now been constructed.

Long Beach Transit Maintenance Facility Remediation for Groundwater Impacts, Long Beach, CA. Former fueling operations resulted in groundwater impacts. As Project Manager, Dr. Lister conducted groundwater monitoring and reporting; design, permitting, and implementation of in situ groundwater remediation; and other remediation efforts. Remediation was conducted in proximity to active underground tanks and piping requiring historical research, extensive geophysical surveying, and additional measures to protect subsurface structures.

Former Dry Cleaner, Shopping Center, Anaheim, CA. Dr. Lister prepared and implemented workplans for on- and off-site soil, soil vapor, and groundwater investigations under DTSC oversight related to a release of chlorinated solvents from a former dry cleaning facility. Soil vapor extraction pilot testing was conducted and a full scale extraction system designed. In addition to workplans, documents prepared include a Remedial Investigation/Feasibility Study, the Removal Action Workplan, and the Removal Action Design Document.

Groundwater Monitoring and Preparation and Implementation of a Remedial Action Plan, Long Beach, CA. Dr. Lister managed a project at a former underground storage tank (UST) site that had previously undergone partial remediation. Confirmation groundwater sampling was conducted, followed by submittal of a Remedial Action Plan (RAP) that was subsequently approved by the Los Angeles RWQCB. Under permit, groundwater remediation, consisting of injection of oxidizing reagents to breakdown fuel hydrocarbons, is being conducted.

Site Investigation of Former Underground Storage Tank Site, Long Beach, CA. Under the Los Angeles RWQCB, Dr. Lister managed on-site soil, soil vapor, and groundwater assessment. Drilling and sampling was conducted within an operating grocery store.

Former Dry Cleaner, Shopping Center, Los Gatos, CA. Dr. Lister prepared and implemented workplans for soil, soil vapor, indoor air, sewer line, and groundwater investigations under the San Francisco RWQCB at a former dry cleaner tenant space. Reports of results were submitted and the investigation is ongoing.

Regional Medical Center, Long Beach, CA. As Project Manager, Dr. Lister prepared and implemented workplans for soil, soil vapor, and methane gas investigations under DTSC in one portion of a large hospital complex. This more recent site investigation builds on earlier work conducted by Dr. Lister and other SCS staff in the hospital complex, concerned with former oil field and waste disposal operations at the site.

Soil and Groundwater Evaluation of Former Industrial Facility, El Segundo, CA. As Technical Advisor, Dr. Lister contributed to efforts for the collection of soil, soil vapor, and groundwater samples as part of a study to determine if the site was suitable for redevelopment as an agricultural testing laboratory. Regional impacts were assessed and recommendations were given for the building design. As a result, a regulatory agency closure was obtained to allow redevelopment activities to proceed.

Shopping Center Subsurface Investigation and Remediation, Rolling Hills Estates, CA. Two shopping center suites were historically occupied by dry cleaning operations that resulted in contaminated soil. As Technical Manager, Dr. Lister oversaw site evaluation and design and

operation of two soil vapor extraction systems. Regulatory agency closure was received after rebound testing and confirmatory sampling efforts.

Remediation of Contaminated Groundwater, Morgan Hill, CA. A municipal vehicle maintenance yard and fueling facility had been impacted by fuel hydrocarbons which included the organic compound methyl tertiary butyl ether (MTBE). As Senior Technical Advisor, Dr. Lister assisted in the characterization and remediation of contaminated groundwater. Activities included the installation and sampling of groundwater wells, aquifer pump tests, soil vapor extraction pilot testing, and design of vapor and groundwater treatment systems.

Remedial Investigation/Feasibility Study (RI/FS) and RAP for Former Wood Treating Facility, Port of Long Beach, CA. As Technical Manager, Dr. Lister contributed to a cone penetrometer and temporary groundwater monitoring well study, which included the use of ultraviolet-induced fluorescence to determine locations of permanent monitoring stations. In addition, two aquifers underlying the site were evaluated by installing 14 groundwater monitoring wells.

Soil and Groundwater Investigation, Pomona, CA. As Project Manager, Dr. Lister oversaw a soil and groundwater investigation for several properties, including a former manufactured gas plant, a UST site, a bulk petroleum storage and distribution facility, and a solvent bending and distribution site. Contaminants of concern included polyaromatic hydrocarbons, petroleum hydrocarbons, chlorinated solvents, and trace metals. Bulk soil and vapor samples were collected and analyzed, groundwater monitoring wells were installed, and downhole (wireline) geophysical surveys were run. Groundwater was characterized stratigraphically and geochemically. Hydrogeological models derived from the study resulted in litigation support involving numerous potential responsible parties. Potential fate and transport scenarios were developed. All work was performed under the oversight of the DTSC.

Los Angeles Unified School District (LAUSD), Multiple Remediation Projects, Los Angeles, CA. As Technical Manager, Dr. Lister contributed to several new school projects for the LAUSD. Projects included the preparation of a RAP report, remediation oversight, confirmation sampling, a Remedial Action Completion Report (RACR), soil and soil vapor investigation and monitoring, a petroleum well assessment, and well abandonment. In addition, several school projects involved characterization of soil for disposal or reuse purposes.

Kaiser Ventures, Brownfields Remediation Operation, Fontana, CA. In 1995, Dr. Lister managed a multi-phase program at the former 1,100-acre Kaiser Steel plant, consisting of a RI/FS, laboratory treatability studies, risk assessments, remedial action plans, hydrogeological studies, and closure documentation under the oversight of the DTSC. Remediation at the former iron and steel production facilities, comprised of a 500-acre Operable Unit No. 2, was completed and signed off by the DTSC after 6 months of intensive efforts. Today, the Brownfields site has been redeveloped into the Auto Club Speedway of California.

RCRA Facility Assessment (RFA) of Former Pesticide Storage and Disposal Site, Pico Rivera, CA. The Los Angeles County-owned site had been used for rodent and other bait formulation for over 60 years, which included the use of strychnine, thallium compounds, warfarin, and additional poisons. The site was also used for the collection and storage of dry materials, in addition to a tank disposal of waste liquid pesticides produced by the public. Based on review of historical sources, a list of over 200 pesticides was compiled and analyzed. RFA activities included soil sampling, groundwater well construction and sampling, sample analysis, waste removal, and closure of a septic system used for disposal of pesticide container rinsings. A health risk assessment (HRA) was conducted. Long-term monitoring demonstrated no impacts to the groundwater and SESOIL modeling was used to demonstrate the lack of potential mobility of soil contaminants. Class 2 RCRA permit modifications were completed, closure activities were conducted, and a closure certification report was submitted.

Former Die Cast Products Facility, Los Angeles, CA. Dr. Lister provided consulting services to the client and counsel with the aim of receiving soil closure from the Los Angeles RWQCB for this site with chlorinated solvent impacts from activities conducted by the previous site owner/Responsible Party (RP). Activities have included review of documents, cost estimating for mitigation, and attending meetings with RWQCB staff and RP counsel.

Groundwater Investigation of Former Spartan Paint and Lacquer Facility, Downey, CA. Site operations included manufactured coatings and two separate clusters of USTs. As Project Manager, Dr. Lister oversaw the groundwater investigation and upgrading of the remediation system that is under oversight of the Los Angeles RWQCB.

Environmental Assessment of Tuxford Landfill, Sun Valley, CA. A pre-purchase environmental assessment of the property, located in the San Fernando Valley groundwater Superfund area, was conducted and post-purchase groundwater monitoring is ongoing. As Project Manager, Dr. Lister collected historical information, reviewed the regional hydrogeology, and assessed potential risks. Landfill gas evaluation was also conducted by SCS. The U.S. EPA is providing oversight.

Aquifer Exemption Assessment of Midway-Sunset Oil Field, Kern County, CA. Dr. Lister was Technical Advisor for aquifer exemption assessment for a portion of the oil field.

Investigation and Remediation, Santa Monica, CA. Historical research revealed that the site was previously occupied by dry cleaning operations and an auto repair business. As Project Manager, Dr. Lister successfully installed and operated the soil vapor extraction cleanup of the subsurface contamination, and obtained closure within a few months of system startup.

Site Investigation for Former Paint Manufacturing Facility, Monrovia, CA. As Project Manager, Dr. Lister assisted in the preparation of the corrective measures study and remedial action plan in conjunction with the proposed site redevelopment.

Removal Action for Mercury-Containing Soil at Hospital Laboratory, Fontana, CA. As Project Manager, Dr. Lister provided oversight of a removal action to address mercury-containing soil under the facility. A removal action plan, health and safety plan, and final report were prepared.

City of Carson, Environmental Assessment at Cal-Compact Landfill, Carson, CA. As Project Manager, Dr. Lister collaborated with the City of Carson to explore possible locations for a potential football stadium. Planning efforts included considering alternative site development plans while incorporating current and future construction within the fill area.

City of Chino Hills, Hydrogeological Assessment, Chino Hills, CA. As Technical Advisor, Dr. Lister provided oversight for the hydrogeological assessment of a land parcel undergoing conversion as part of an underground electrical transmission system.

Soil and Groundwater Studies and Remedial Design at Former Dry Cleaning Facility, Torrance, CA. As Technical Manager, Dr. Lister oversaw the installation of seven groundwater monitoring wells and four soil vapor extraction wells. In addition, he coordinated soil removal in the immediate vicinity of the former dry cleaning machine and solvent storage area. In addition, an indoor air health risk assessment was conducted.

Multi-Year Groundwater Monitoring of Landfills, Northern and Southern California. As Technical Advisor, Dr. Lister managed several projects involving data collection, evaluation monitoring, engineering feasibility studies, and corrective action planning. Additionally, he conducted groundwater geochemical studies related to the influence of landfill gas and adsorptive/desorbtive

influences on migration of substances contained within native aquifer materials. Locations in Southern California for the multi-year groundwater monitoring included El Sobrante, Simi Valley, Lancaster, Antelope Valley, and Bradley Landfills. Northern California locations included Altamont, Anderson, Redwood, and Tri-Cities Landfills.

Site Investigation and Remediation for Dry Cleaning Facility, Goleta, CA. As Project Manager, Dr. Lister conducted the site investigation and remediation of dry cleaning operations located in a regional shopping center. He spearheaded investigation efforts focused on determining the extent of impacts to multiple groundwater zones, while incorporating feasible remediation approaches. An in situ soil vapor extraction system was designed, permitted, installed, and operated.

Groundwater Monitoring of Landfills, Ventura County, CA. As Technical Advisor, Dr. Lister is providing oversight and guidance regarding groundwater monitoring and reporting at multiple County landfills. Landfills monitored include Bailard, Coastal/Santa Clara, Ozena, Tierra Rejada, and Toland Road Landfills.

RCRA Closure of Former Aerospace Manufacturing Facility, Van Nuys, CA. As Project Manager, Dr. Lister implemented investigation of nine waste treatment and storage facilities on a 54-acre site. Site-wide investigations were also conducted involving soil and soil vapor sampling and groundwater monitoring. Remedial actions included the removal of diesel-impacted soil, lead abatement and building demolition, and soil vapor extraction. Groundwater investigations involved the installation of 23 on- and off-site wells.

Remedial Investigation, Design, and Construction at Thermal Airport, Riverside County, CA. The Thermal Airport partially occupied pesticide-impacted land requiring remedial action. To delineate areas, Dr. Lister managed the soil sampling and analysis along with a health risk assessment. Under the oversight of the RWQCB, the design and construction involved a composite soil/synthetic membrane cap to isolate areas affected by the contaminated soil from further potential receptors. The construction was carried out on a rapid turnaround basis, with SCS acting as the general contractor; groundwater monitoring wells were observed prior to abandonment.

Investigation and Remedial Action Plan, Santa Barbara, CA. Approximately 15 acres of land were occupied by three dry cleaning facilities, a former vehicle maintenance area, and several thousand feet of sewer main. As Project Manager, Dr. Lister oversaw soil and groundwater sampling and analysis, aquifer testing, fault studies, and preparation of documents. Contaminants of concern included chlorinated solvents, petroleum fuel additives, and fluorocarbons.

University of California Los Angeles (UCLA), Subsurface Impacts Assessment, Los Angeles, CA. Due to a sewer line break at UCLA, Dr. Lister conducted a subsurface impacts assessment as Project Manager. Activities included soil sampling, laboratory analysis, and data assessment on a rapid turnaround basis.

Environmental Impacts Assessment of Former Oil Field Waste Treatment Facility, Long Beach, CA. As Technical Manager, Dr. Lister assisted in determining feasible remedial alternatives of the environmental impacts for this site. Data from former waste ponds and from the locations of above-ground storage tanks were assessed to determine and evaluate remediation scenarios.

Remedial Action and Hydrogeological Study of Former Oil Production Facility, Los Angeles, CA. In support of closure for this site, which was located on a public beach, Dr. Lister coordinated the excavation of impacted soil, managed the installation and monitoring of groundwater and vapor wells, and conducted a natural attenuation study.

Hydrogeological Tasks of Former Beacon Oil Refinery, Hanford, CA. As Task Manager, Dr. Lister oversaw the installation of 10 groundwater monitoring wells, in addition to semi-annual monitoring of the new and preexisting wells.

Air Sparge Pilot Testing of Golden Eagle Refinery, Carson, CA. As Task Manager, Dr. Lister conducted pilot testing of an air sparge system at this site. Groundwater remediation was implemented to determine concept effectiveness, radius of influence, air injection pressures and flow rates, in addition to other parameters for the scale-up design. Dr. Lister also provided his expertise in the efforts to expedite the free product recovery and vapor extraction design.

Soil and Groundwater Investigation of Existing Service Station, Venice, CA. This location included multiple historical underground tanks that resulted in environmental impacts on soil and groundwater. As Project Manager, Dr. Lister conducted soil remediation, which involved in situ vapor extraction and has been completed; the site has been closed. Groundwater monitoring was also implemented.

Groundwater Monitoring of Multiple Landfills, Placer County, CA. As Technical Advisor for a multi-site groundwater monitoring program, Dr. Lister conducted monitoring well evaluation and new well design, assessment of hydrogeology and groundwater geochemistry, groundwater flow and transport mapping, statistical analysis, and quality control review. Landfills have included the active Western Placer Regional Landfill and inactive Loomis, Meadow Vista, Forest Hill, and Eastern Regional Landfills.

Soil Assessment and Groundwater Monitoring of Former Nursery, Norwalk, CA. As Project Manager, Dr. Lister provided soil assessment, well installation, groundwater monitoring, permitting, and remediation design.

City of Pomona, Perchlorate Investigation, Pomona, CA. As Project Manager, Dr. Lister assisted the City of Pomona in examining water monitoring records and conducting a regional study to determine potential contributors to perchlorate in the groundwater. The project was located in part of the Chino groundwater basin underlying the eastern portion of the city. Dr. Lister reviewed regional groundwater flow patterns, developed conceptual models, assessed historical data, and identified several historical sites that may have released perchlorate.

RI/FS and Removal Actions of Angeles Chemical Facility, Santa Fe Springs, CA. As Project Manager, Dr. Lister performed RI/FS and removal under the oversight of the DTSC. The site contained 35 USTs holding various chemicals. A number of groundwater and vadose zone wells were installed and a soil vapor extraction system designed, in addition to assessment of the plume migration potential.

Remedial Investigation and Remediation, Puente Valley Well Investigation Program (Part of the San Gabriel Valley Superfund Site), Los Angeles County, CA. Dr. Lister performed remedial investigation and remediation associated with the Puente Valley Well Investigation Program. He managed multiple phases of soil, soil vapor, and groundwater sampling. In addition, a soil vapor extraction system was installed and operated to address soil impacts due to chlorinated hydrocarbons.

Hydrogeological Assessment and Remedial Design, Crescent City, CA. As Project Manager, Dr. Lister managed the hydrogeological assessment and remedial design for the treatment of groundwater at the Del Norte Superfund site. Activities included the installation of wells and aquifer testing while assessing remedial alternatives.

California Environmental Quality Act (CEQA) Compliance for Eagle Mountain, Riverside County, CA. As Task Manager, Dr. Lister oversaw the geological and hydrogeological aspects of the landfill permitting CEQA compliance for a proposed 100-year-life and rail-haul landfill known as the Eagle Mountain project. He developed a hydrogeological model of the site, which included fractured bedrock and alluvial elements.

Hydrogeological Assessment and Groundwater Monitoring, San Diego, CA. As Project Manager, Dr. Lister led the hydrogeological assessment, groundwater monitoring and water injection system design, and water treatment design for the Morena Boulevard sewer interceptor construction. He assessed the potential for gasoline plume migration under natural conditions and under the influence of construction dewatering. Subsequently, a remedial design was instituted to control contaminant plume migration and treat pumped groundwater prior to discharge.

CEQA Compliance of Prima Deshecha Landfill, Orange County, CA. As Project Manager, Dr. Lister oversaw activities for hydrogeological, topographical, and public safety in compliance with CEQA standards and the expansion design.

Feasibility Study and Conceptual Design of Nanji Island Landfill, Seoul, South Korea. As Project Manager, Dr. Lister's technical oversight was utilized for a feasibility study and conceptual design of landfill closure for Nanji Island Landfill, the principal municipal solid waste facility in Seoul, South Korea. Tasks included conducting an intensive week-long session in Seoul for Daewoo Engineers, to develop concepts and determine final closure design recommendations.

Metropolitan Water District of Southern California, Groundwater Monitoring System Design and Compliance, Southern California. As Project Manager, Dr. Lister oversaw the groundwater monitoring system design and permit compliance for a drinking water treatment sludge monofill.

Geological and Hydrogeological Siting for Landfill, Imperial County, CA. As Task Manager, Dr. Lister provided geological and hydrogeological aspects of siting for a rail-haul landfill at a mine site in the Cargo Muchacho Mountains.

Design of Monitoring Systems for Landfill Closure, Southern California, CA. As Project Manager, Dr. Lister contributed to closure activities for several landfills in Southern California. Closure activities included the design of monitoring systems at several waste management units, including the North Chollas Landfill in San Diego, Maxson Street Landfill in Oceanside, the Kaiser Tailings Ponds in Riverside County, Duck Pond Landfill in National City, and Miller Way Landfill in South Gate.

County of San Diego, Expanded North County Landfill Siting Study, County of San Diego, CA. As Project Manager, Dr. Lister conducted landfill siting studies to identify and rank sites, based on geological, hydrogeological, and engineering criteria.

Groundwater Monitoring of West Miramar Landfill, San Diego, CA. As Task Manager, Dr. Lister designed a groundwater monitoring system for expansion of West Miramar Landfill.

Landfill Remedial Action Plan/Response Plan, Commerce, CA. SCS was tasked with updating corrective actions proposed for two adjacent landfills, and converting an existing Remedial Action Plan to a Response Plan. Oversight for this redevelopment project, which involves landfill clean closure, is being provided by the Los Angeles RWQCB.

Permit Compliance of Imperial County Sanitary Landfill, CA. As Project Manager, Dr. Lister oversaw the preparation of Report of Waste Discharge, Periodic Site Review, Report of Disposal Site Information, Water SWAT Proposal, and CEQA documents.

Author of major portions of a state-of-the-art review of hazardous waste disposal, entitled "Industrial Waste Disposal in the 1950s," for the California State Attorney General. This study included investigation and comparison of contemporary siting studies carried out at the Stringfellow, Omar Rendering, Otay Mesa, Palos Verdes, and BKK (West Covina) Class I sites, with particular reference to evaluation of pre-siting hydrogeological studies.

Author of groundwater monitoring section of Procedural Guidance Manual for Sanitary Landfills, prepared by SCS for the California Waste Management Board (now CalRecycle).

H&P Project: SCS111021-L4
Client Project: 12300 Lakeland Rd

Dear Justin Rauzon:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 11/10/2021-11/11/2021which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Lisa Eminhizer
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP and the National Environmental Laboratory Accreditation Conference (NELAC) for the fields of proficiency and analytes listed on those certificates. H& P is approved as an Environmental Testing Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs for the fields of proficiency and analytes included in the certification process and to the extent offered by the accreditation agency . Unless otherwise noted, accreditation certificate numbers, expiration of certificates, and scope of accreditation can be found at: www.handpmg.com/about/certifications. Fields of services and analytes contained in this report that are not listed on the certificates should be considered uncertified or unavailable for certification.

SCS Engineers - Long Beach	Project: SCS111021-L4	
3900 Kilroy Airport Way, Suite 100	Project Number: 12300 Lakeland Rd	Reported:
Long Beach, CA 90806-6816	Project Manager: Justin Rauzon	19-Nov-21 16:05

Notes and Definitions

S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QL-1L	The LCS and/or LCSD recoveries fell below the established control specifications for this analyte. Any result for this compound is qualified and should be considered biased low.
LCC	Leak Check Compound
ND	Analyte NOT DETECTED at or above the reporting limit
MDL	Method Detection Limit
%REC	Percent Recovery
RPD	Relative Percent Difference

All soil results are reported in wet weight.

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs through PJLA, accreditation number 69070 for EPA Method TO-15, EPA Method 8260B and H&P 8260SV.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743 & 2745.

H&P is approved by the State of Louisiana Department of Environmental Quality under the National Environmental Laboratory Accreditation Conference (NELAC) certification number 04138

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

Re: 01221236.00

Project No. : 01221236.00

Work Order: P111027

Dear Justin Rauzon

Enclosed are the results of analyses for samples received by our laboratory on 11/10/2021. The contents of this report apply to the sample(s) analyzed in accordance with the chain-of-custody document supplied with the sample(s).

No duplication of this report is allowed, except in its entirety. Please do not hesitate to call if you have any questions and thank you very much for using Performance Analytical Laboratories for your analytical needs.

Regards,

Marycarol Valenzuela
Project Manager

Notes and Definitions

Item	Definition
QM-01	Spike recovery for this QC sample is outside of established control limits due to sample matrix interference.
QM-06	Due to noted non-homogeneity of the QC sample matrix, the MS/MSD did not provide reliable results for accuracy and precision. Sample results for the QC batch were accepted based on LCS/LCSD percent recoveries and RPD values.
QM-11	MS and/or MSD was not within limits due to non-homogeneity of the sample matrix.
Dry	Sample results reported on a dry weight basis.
ND	Analyte NOT DETECTED at or above the reporting limit.
RPD	Relative Percent Difference
%REC	Percent Recovery
Source	Sample that was matrix spiked or duplicated.
(R)	Re-run for dilution or confirmation.
