RE: Phase I Environmental Site Assessment 2022
Vacant Property
5512 and 5656 Knudsen Drive
APN 365-020-30 and a Portion of 365-020-28
Bakersfield, California 93308

Dear Mr. Doctor:

Krazan & Associates, Inc., (Krazan) completed a Phase I Environmental Site Assessment at the referenced site, summarized in a report dated April 13, 2022. We appreciate the opportunity to serve your environmental due diligence needs. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-13.

If you have any questions regarding the information presented in this report, please call me at (559) 348-2200.

Respectfully Submitted,
KRAZAN & ASSOCIATES, INC.

Jason R. Paul, PG 7557
Environmental Regional Manager

1.0 EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has conducted a Phase I Environmental Site Assessment (ESA) of the Vacant Property associated with Kern County Assessor's Parcel Number (APN) 365-020-30 and a portion of APN 365-020-28 located at 5512 and 5656 Knudsen Drive in Bakersfield, California 93308 (subject site). It is incumbent upon the user to read this Phase I ESA report in its entirety. If not otherwise defined within the text of this report, please refer to the Glossary of Terms Section following the References Section for definitions of terms and acronyms utilized within this Phase I ESA report. Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* This Phase I ESA constitutes all appropriate inquiry (AAI) designed to identify recognized environmental conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by ASTM E 1527-13.

ASTM E 1527-13 Section 1.1.1 *Recognized Environmental Conditions* – In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

Krazan's findings of this Phase I ESA revealed no or the following evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-13.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-13, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum*

products. As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections,* or *LLPs*): that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

2.2 Scope of Work

The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents, c) a review of historical aerial photographs, a review of pertinent building permit records, cross-reference directories, historical Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR). The scope of work for this Phase I ESA conforms to ASTM E 1527-13. Krazan was provided written authorization to conduct the Phase I ESA by Mr. Steven Doctor with C&SD Construction, Inc. on March 17, 2022, in Krazan's March 17, 2022 Proposal/Cost Estimate No. P22-137, Project No. 024-20002 Change Order No. 1.

3.0 SITE DESCRIPTION

The subject site is located east of Knudsen Drive and approximately 125 feet to the south of Olive Drive in the City of Bakersfield, Kern County, California. The subject site consists of an irregular-shaped parcel measuring approximately 7.78 acres which is associated with Kern County Assessor's Parcel Number 365-020-30 and a portion of 365-020-28. The subject site is currently vacant land which is associated with parcel addresses of 5512 and 5656 Knudsen Drive. The subject site was utilized for agricultural purposes from at least 1937 until at least 1973, with a small outbuilding apparently associated with a northern adjacent rural residence present in the northwestern portion of the subject site during this time interval. The subject site appears to have been uncultivated vacant land from at least 1984 until the present.

General property information and property use are summarized in the following table. Refer to Figures No. 1 – 3 following the Reference Section.

Subject Site Information Summary

Current Owner:	Lundy Family Trust (365-020-28) Carosella Trust (365-020-30)
Assessor's Parcel Numbers:	365-020-30 and a portion of 365-020-28
Address:	5512 and 5656 Knudsen Drive Bakersfield, California 93308
Historical Address:	None Identified
General Location:	East of Knudsen Drive and approximately 125 feet to the south of Olive Drive
Acreage:	7.78 acres (approximately)
Existing Use:	Vacant land
Number of Buildings:	None
Original Construction Date:	N/A
Proposed Use:	Commercial – Medical Facility
Topographic Map:	U.S. Geological Survey, 7.5-minute Oildale, California topographic quadrangle map, dated 1954
Topographic Map Location:	Northwestern quarter of Section 14 and Northeastern Quarter of Section 15, Township 29 South, Range 27E, San Bernardino Baseline and Meridian
Latitude/Longitude:	35.410605° / –119.057633°
Topography:	Relatively flat, approximately 430 feet above mean sea level
Approximate Depth to Groundwater:	90 to 110 feet below ground surface (bgs), State of California Regional Water Quality Control Board (RWQCB), Geotracker Database, environmental investigation/remediation site located adjacent to the north of the subject site (1990 data)
Regional Groundwater Flow Direction:	North-northwest, RWQCB, Geotracker Database, environmental investigation/remediation site located adjacent to the north of the subject site (1990 data)

3.1 Geology and Hydrogeology

The subject site is located within the southern portion of the Great Valley Geomorphic Province of California. The San Joaquin Valley is approximately 400 miles long and averages 50 miles wide The San Joaquin Valley, which comprises the southern portion of the Great Valley of California, has been filled with several thousand feet of sedimentary deposits. Sediments in the eastern valley, derived from the erosion of the Sierra Nevada, have been deposited by major to minor west-flowing drainages and their tributaries. Near-surface sediments are dominated by sands and silty sands with lesser silts, minor clays, and gravel. The sedimentary deposits in the region form large coalescing alluvial fans with gentle slopes. Soil types underlying the area is Kimberlina and Milham. Data obtained from an environmental investigation site located adjacent to the north of the subject site indicates that groundwater in the area of the subject site was first encountered at a depth of approximately 90 to 110 feet bgs in 1990. However, more recent data suggests that groundwater in the subject site area is currently first encountered at a depth of approximately 160 feet bgs. Groundwater monitoring conducted at the northern adjacent site indicates that the groundwater flow direction in the vicinity of the subject site is toward the north-northwest.

4.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Mr. Bill Vick, Krazan's Environmental Professional, on March 31, 2022. Krazan's Environmental Professional was unaccompanied during the site reconnaissance. The objective of the site reconnaissance is to obtain information to assist in assessment of the likelihood of the presence of recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

4.1 Observations

The following table summarizes conditions encountered during our site reconnaissance. A discussion of observed conditions is presented following the table. Refer to the Site Map (Figure No. 2) and color photographs following the text for the locations of items discussed in this section of the report.

Summary of Site Reconnaissance

Feature	Observed	Not Observed
Structures (existing)		X
Evidence of Past Uses (foundations, debris)	X	
Hazardous Substances and/or Petroleum Products (including containers)		X
Aboveground Storage Tanks (ASTs)		X
Underground Storage Tanks (USTs) or Evidence of USTs		X
Evidence of Underground Pipelines		X
Strong, Pungent, or Noxious Odors		X
Pools of Liquid Likely to be Hazardous Materials or Petroleum Products		X
Drums		X
Unidentified Substance Containers		X
Potential Polychlorinated Biphenyl (PCB)-Containing Equipment		X
Subsurface Hydraulic Equipment		X
Heating/Ventilation/Air conditioning (HVAC)		X
Stains or Corrosion on Floors, Walls, or Ceilings		X
Floor Drains, Sumps, or Oil/Water Clarifiers		X
Storm Drains		X
Pits, Ponds, or Lagoons		X
Stormwater Retention Basin/Stormwater Catchment	X	
Stained Soil and/or Pavement		X
Soil Piles		X
Stressed Vegetation		X
Waste or Wastewater (including stormwater) Discharges to Surface/ Surface Waters	X	
Wells (irrigation, domestic, dry, injection, abandoned, monitoring wells)		X
Septic Systems		X

The subject site comprises approximately 7.78 acres of vacant land associated with Kern County APN 365-020-28 and a portion of 365-020-30.

- The subject site was observed to be relatively flat, vacant land sparsely covered with native vegetation (See Photographs No. 1 - No. 7). A shallow depression with appeared to be a rough-cut stormwater catchment was observed in the northeastern portion of the subject site (See Photograph No. 8), and a stormwater retention basin was observed adjacent to the south of the western portion of the subject site (See Photograph No. 9). The northern portion of the stormwater retention basin is located on/near the southern boundary of the subject site. The base of the shallow depression and the base of the stormwater retention basin were damp from recent rainfall. No odors, surface staining, stressed vegetation, or other obvious evidence of the presence of hazardous materials were noted in association with these two features. Additionally, a bare utility pole and several large pieces of concrete were observed in the northeastern portion of the subject site (See Photograph No. 10). No structures were observed on the subject site.

- Discarded materials apparently associated with transients, including clothing, food wrappers, and beverage containers, were observed along the northern boundary of the subject site. No obvious evidence of illegal dumping or surface waste disposal was observed on the subject site, and no hazardous materials were observed among the discarded materials and debris.

- During the visual observations of the subject site, no hazardous materials or hazardous waste were observed. Exposed surface soils did not exhibit obvious signs `of discoloration. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the areas observed. No indications of former structures, such as foundations, were observed on the subject site.

- No pole- or pad-mounted electrical transformers were observed on the subject site.

- No high-voltage, tower-mounted electrical transmission lines were observed on or within 100 feet of the subject site.

4.2 Utilities

Based on Krazan's research, the following table summarizes companies/municipalities that currently provide utility services to the subject site:

Municipal Service / Utility Providers

Service / Utility	Provider
Electricity	Southern California Edison
Natural Gas	Southern California Gas Company
Potable Water	California Water Service
Sanitary Sewer	North of the River Sanitary District

Water / Wells

Krazan's research indicates that no potable water has been historically supplied to the subject site. However, the water purveyor for the subject site vicinity is the California Water Service. California Water Service's water quality monitoring is an on-going program with water samples obtained on a regular basis. It is the responsibility of the California Water Service to provide customers with potable water in

compliance with the California State Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public.

Sewer / Septic Systems

Krazan's research indicates that no sewage disposal systems have historically serviced the subject site. The municipal sewer service provider to the subject site vicinity is the North of the River Sanitary District.

4.3 Adjacent Streets and Property Usage

The following table summarizes the current adjacent roads and adjacent property uses observed during the site reconnaissance.

Adjacent Streets and Property Use

Direction	Adjacent Street	Adjacent Property Use
North	Landco Drive (unpaved, named road)	Commercial – 7-Eleven & gas station, Taco Bell restaurant, Chevron Food Mart & gas station Partially paved access road
South	None	Vacant land
East	None	Vacant land
West	Knudsen Drive	Commercial – express car wash Fire Department – Olive Drive Fire Training Center

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials are stored at the adjacent properties except for the 7-Eleven and Chevron gasoline stations located adjacent to the north of the subject site. Please refer to Section 6.4 of this report for a discussion of regulatory records for the 7-Eleven and Chevron gasoline stations.

4.4 ASTM Non-Scope Considerations

According to ASTM E 1527-13, environmental issues or conditions that are outside the scope of the Phase I ESA practice (non-scope considerations) are sometimes evident at assessed properties. Some substances may be present at those properties in quantities and under conditions that may lead to contamination of the assessed parcel or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601[14]). ASTM non-scope considerations are discussed below.

Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Public Health (CDPH) maintains a statewide database of radon results in designated geographic areas. Radon detection devices are placed

in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4.0 pico Curies per liter (pCi/L).

The US EPA has prepared a map to assist National, State and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Therefore, the available data suggests that the potential for radon to adversely impact the subject site appears to be low.

Environmental Non-Compliance Issues

No obvious material environmental non-compliance issues were identified in connection with the subject site in the process of preparing this report.

Activity and Use Limitations

No environmental activity and use limitations were identified in connection with the subject site in the process of preparing this report.

Wetlands

As defined by the U.S. EPA and the Department of Army, Corps of Engineers, wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Jurisdictional wetlands are regulated under Section 404 of the Clean Water Act (1972, 1977, and 1987, and also the 1985 and 1990 Farm Bills), and are important for protection of aquatic waterfowl and species, water purification, and flood control. According to current Corps of Engineers information, three basic criteria are currently used to define wetlands:

- Wetland hydrology - areas exhibiting surface or near-surface saturation or inundation at some point in time (greater than 12.5 percent of growing season defined on basis of frost-free days) during an average rainfall year.

- Hydrophilic vegetation - frequency of occurrence of wetland indicator plants (plant life growing in water, soil, or substrate that is periodically deficient in oxygen as a result of excessive water content).

- Hydric soil - landscape patterns identified by saturation, flooding, or ponding long enough during the growing season (generally seven days) which develop characteristic color changes in the upper part of the soil as a result of anaerobic conditions.

Based on Krazan's reconnaissance of the subject site, evidence was not apparent to suggest that the site contained a wetland. Furthermore, according to the U. S. Fish & Wildlife Service (USFWS) National Wetlands Inventory available via the USFWS Internet website, the subject site does not contain a designated wetland. Therefore, at this time, regulations pertaining to wetlands do not appear to impact the subject site.

5.0 USER-PROVIDED INFORMATION

A review of user-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site.

5.1 Title Report

During Krazan's previous Phase I ESA of the subject site, a Preliminary Title Report (PTR) dated December 30, 2019, prepared for the subject site by Stewart Title, was provided to Krazan by C&SD Construction, Inc., the Phase I ESA User. The subject site PTR was reviewed to identify potential deed restrictions, environmental liens or activity and use limitations (AULs) which may have occurred on or exist in connection with the subject site. Krazan's review of the PTR indicated no deed restrictions, environmental liens or AULs for the subject site as of December 30, 2019. However, as quoted from the subject site PTR, "It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land." The absence of a Final Title Report or Environmental Lien Search represents a data gap. Please refer to Appendix A within Krazan's January 21, 2020 Phase I ESA included as Appendix B of this report for a copy of the PTR.

5.2 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

1. Environmental cleanup liens that are filed or recorded against the site.

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.

3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.

5. Commonly known or *reasonably ascertainable* information about the *property*.

6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.

7. The reason for preparation of this Phase I ESA.

On March 21, 2022, a completed Phase I ESA user questionnaire was received from Mr. Steven Doctor, with C&SD Construction, Krazan's client and the Phase I ESA User. Please refer to Appendix A for a copy of the completed Phase I ESA user questionnaire.

According to the questionnaire responses, Mr. Doctor, to the best of his knowledge as the user of this Phase I ESA, was not aware of any environmental cleanup liens and activity or land use limitations which have been filed or recorded against the subject site; and Mr. Doctor has no specialized knowledge or experience of the prior nature of the business or chemical utilization on the subject site. Mr. Doctor indicated that the subject site was vacant land historically. Mr. Doctor indicated that he did not have knowledge of the past or current presence of specific chemicals or hazardous materials, unauthorized spills or chemical releases or of any environmental cleanups in connection with the subject site, other than that contained in a limited soils investigation performed by Krazan in August 2018. Mr. Doctor indicated that he is not aware of any obvious indications pointing to the presence or likely presence of contamination of the subject property. Mr. Doctor stated that the purchase price of the subject site reasonably reflects fair market value. Additionally, Mr. Doctor indicated that the reason for preparation of this Phase I ESA is related to purchase due diligence and a bank loan.

6.0 SITE USAGE SURVEY

The property usage survey included assessing property history, and reviewing local, state, and federal regulatory agency records.

6.1 Site History

A review of a previous environmental assessments, historical aerial photographs, historical USGS topographic quadrangle maps, City of Bakersfield Development Services Department records, and reasonably ascertainable cross-reference directories, a search for Sanborn Fire Insurance Maps (SFIMs), and a Phase I ESA interview were utilized to assess the history of the subject site.

Previous Environmental Assessment

Krazan was provided a previous environmental assessment of the subject site entitled *Phase I Environmental Site Assessment (ESA) Report, Vacant Land on Knudsen Drive, Bakersfield, California* dated prepared by ENCON Technologies, Inc. (ENCON) dated October 31, 2017. The site reconnaissance for the ENCON report was conducted on October 30, 2017, at which time the subject site was vacant land. No hazardous materials or hazardous waste were observed in association with the subject site and no evidence of environmental concerns were identified in connection with the adjacent properties. ENCON concluded that their assessment revealed no evidence of RECs in connection with the subject property, however, ENCON did state that the possible historical use of pesticides on the subject site was an historical REC (HREC) as well as a Business Environmental Risk (BER). Given the historical agricultural use of the subject site, ENCON recommended shallow soil testing for organochlorine pesticides (OCPs) if the subject site is redeveloped for mixed use, residential, and other high sensitivity uses such as health or childcare services. ENCON further recommended that a Soil Management Plan should be developed for soil grading and off-site soil disposal that included environmental inspections and testing by a licensed hazardous waste contractor, as well as dust suppression, fencing and/or erosion controls during disturbance of soils at the subject site to prevent worker health exposure.

At the request of C&SD Construction, Inc., Krazan conducted a shallow soil sampling assessment on the subject site in August 2018, the results of which are presented in a report entitled *Limited Soil Assessment for Organochlorine Pesticides, Knudsen Drive Property (6 Acres), Bakersfield, CA 93308,* dated August 8, 2018. Krazan collected 24 discrete soil samples at depths from ground surface to 0.5 feet bgs. The 24 discrete samples were composited into six 4-part composite samples and submitted for laboratory analysis of organochlorine pesticides. Analysis of the six composite soil samples revealed that none of the organochlorine pesticides were present above their respective laboratory reporting limits with the exception of low concentrations of 4-4-dichlorodiphenyldichloroethene (4,4-DDE) which was reported at a maximum concentration of 0.10 milligrams per kilogram (mg/kg), a concentration well below the residential land use Environmental Screening Level (ESL) for 4,4-DDE of 1.8 mg/kg. Based on the analytical results obtained from the composite soil analyses, Krazan concluded that OCPs are not present at concentrations that pose a threat to human health or the environment and no further action was recommended. Please refer to

Appendix C of Krazan's January 21, 2020 Phase I ESA report which is included as Appendix B of this report for a copy of Krazan's August 8, 2018 limited soil assessment report.

Krazan conducted an environmental assessment of the subject site entitled *Phase I Environmental Site Assessment, Vacant Property, Knudsen Drive, Bakersfield, California 93308* dated January 21, 2020. The site reconnaissance for this report was conducted on January 13, 2020; at which time the subject site was vacant land. No hazardous materials or hazardous waste were observed in association with the subject site and no evidence of environmental concerns were identified in connection with the adjacent properties. Historical uses of the subject site were determined to be consistent with those identified during the course of the current assessment as discussed in Section 6.1 of this report. No recognized environmental conditions were identified in connection with the subject site. Please refer to Appendix B for a copy of Krazan's January 21, 2020 Phase I ESA report.

Aerial Photograph Interpretation

Historical aerial photographs dated 1937, 1942, 1952, 1956, 1968, 1973, 1984, 1994, 2006, 2009, 2012, and 2016 were reviewed to assess the history of the subject site. These photographs were obtained from Environmental Data Resources, Inc. (EDR) and via the internet at Google Earth™. The aerial photograph summary is provided in the following table. Please refer to Appendix C for historical aerial photograph coverage of the subject site.

Summary of Aerial Photograph Review

Year/Scale	Site Use	Site and Adjacent Property Observation
1937 1" = 500'	Agricultural/ Outbuildings	The northwestern portion of the subject site appears to be occupied by two small outbuildings and an exterior storage area associated with a rural residence located adjacent to the north and west of the subject site. The remainder of the subject site appears to be utilized for agricultural purposes. The northern adjacent property appears to be occupied by a rural residence, including a dwelling, a barn, and outbuildings and agricultural land. Additional outbuildings apparently associated with the northern adjacent rural residence are visible adjacent to the west of the northern portion of the subject site. The remainder of the western adjacent property appears to be utilized for agricultural purposes. The southern adjacent property appears to be utilized for agricultural purposes. The eastern adjacent property appears to be occupied by agricultural land and vacant land/pasture.
1942 1" = 500'	Agricultural/ Outbuildings	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1937 aerial photograph except: 1) a rectangular feature consistent with a small outbuilding or stacks of baled hay is visible in the central portion of the subject site, and 2) all of the eastern adjacent property appears to be cultivated.

Summary of Aerial Photograph Review (continued)

Year/Scale	Site Use	Site and Adjacent Property Observation
1952 1" = 500'	Agricultural/ Outbuildings	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1942 aerial photograph except: 1) the rectangular feature previously noted in the central portion of the subject site in the 1942 aerial photograph is no longer visible, and 2) an apparent wastewater treatment plant has been developed 400 feet to the south of the subject site.
1956 1" = 500'	Agricultural/ Outbuildings	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1952 aerial photograph.
1968 1" = 500'	Agricultural/ Outbuildings	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1956 aerial photograph except: 1) two commercial buildings consistent with gasoline stations have been developed adjacent to the north of the subject site, and 2) Highway 99 on- and off-ramps have been developed adjacent to the northeast of the subject site.
1973 1" = 500'	Agricultural/ Outbuildings	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1968 aerial photograph.
1984 1" = 500'	Vacant Land	The subject site appears to be vacant land with no visible on-site structures. Conditions on the adjacent properties appear similar to those noted in the 1973 aerial photograph except: 1) the outbuildings previously noted adjacent to the northwest of the subject site are no longer present, 2) the southern and eastern adjacent properties appear to be uncultivated vacant land, and 3) the western adjacent property appears to be occupied by commercial buildings.
1994 1" = 500'	Vacant Land	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1984 aerial photograph except: 1) trails crisscross the subject site and a portion of the subject site appears to be supporting relatively lush vegetation, 2) the gasoline station previously noted adjacent to the north of the western portion of the subject site is no longer present, and 3) the existing Fire Department facility has been developed on the western adjacent property.
2006 1" = 500'	Vacant Land	Conditions on the subject site and the adjacent properties appear similar to those noted in the 1994 aerial photograph except: 1) a gasoline station has been developed adjacent to the north of the western portion of the subject site, 2) Knudsen Drive has been developed adjacent to the west of the subject site, and 3) the wastewater treatment plant previously noted 400 feet to the south of the subject site is no longer present. The former wastewater treatment plant facility has been redeveloped with a commercial storage facility.
2009, 2012, 2016 1" = 500'	Vacant Land	Conditions on the subject site and the adjacent properties appear similar to those noted in the 2006 aerial photograph.

Historical Topographic Maps

Historical topographic maps dated 1906, 1910, 1912, 1930, 1935, 1942, 1947, 1954, 1968, 1973, 1978, 2012, 2015, and 2018 were reviewed to assess the history of the subject site. The topographic maps were obtained from Environmental Data Resources, Inc. The subject site and the southern and eastern adjacent

properties are depicted as vacant land in the listed 1906 through 1978 topographic maps. An apparent wastewater treatment plant is depicted 400 feet to the south of the subject site in the 1954, 1968, 1973 and 1978 topographic maps. The western adjacent property is depicted as vacant land in the listed 1906 through 1978 topographic maps; however, three structures are depicted to the west-northwest of the subject site in the 1906, 1910, and 1912 topographic maps. The northern adjacent property is occupied by one to three structures in the 1930 through1978 topographic maps. A structure is present on the north side of Olive Avenue at least 300 feet to the north of the subject site in the 1906, 1910 and 1912 topographic maps. The 2012, 2015, and 2018 topographic maps depict the existing surface streets proximate to the subject site; however, structures are not depicted on these topographic maps. Please refer to Appendix D for copies of the historical topographic maps provided by EDR for the subject site.

City of Bakersfield Development Services Department

On March 21, 2022, a building permit records request was submitted to the City of Bakersfield Development Services Department (CBDSD) for the subject site addresses of 5512 and 5656 Knudsen Drive and for the subject site APNs of 365-020-28 and -30. According to a representative of the City of Bakersfield Development Services Department, no building permit records are on file with the CBDSD for the referenced subject site addresses/APNs. Consequently, no permits for items of potential environmental concern such as underground storage tanks, septic systems, or previous structures/features are on file with the City of Bakersfield Development Services Department for the subject site.

City Directories

Krazan contracted with EDR to provide a review of available cross-reference directories dated 1922 through 2017 for the subject site addresses of 5512 and 5656 Knudsen Avenue and the adjacent Olive Avenue properties utilizing approximately five-year intervals. A summary of cross-reference directory information is presented in the following table. Please refer to Appendix E for a copy of the EDR City Directory Report.

Haines Criss-Cross and/or Polk Guide Directory Summary

Address	Owner/Occupant	Years
Subject Site		
5512 Knudsen Drive	Address Not Listed	1922 to 2017
5656 Knudsen Drive	Address Not Listed	1922 to 2017
Adjacent Properties		
North – 5121 Olive Drive	Address Not Listed	1922 to 2017
North – 5201 Olive Drive	Address Not Listed Standard Stations – gas station Riley Chevron Various Gasoline Stations	1922 to 1965 1970 1975 to 1995 1999 to 2017
North – 5203 Olive Drive	Address Not Listed 7-11 Food Stores	1922 to 1995 1999 to 2017

Krazan's review of cross-reference directories indicates that the subject site addresses of 5512 and 5656 Knudsen Drive were not listed in any of the cross-reference directories reviewed. Information obtained from review of cross-reference directories is consistent with that obtained from other sources during the course of this assessment indicating that the subject site has not been developed with any structures or occupied by any businesses/inhabitants. Krazan's review of cross-reference directories did not reveal any evidence of an environmental concern relative to the current or former occupants of the adjacent properties except for the gasoline stations located adjacent to the north of the subject site at 5201 and 5213 Olive Drive. Please refer to Section 6.4 of this report for a discussion of regulatory records for the 5201 and 5213 Olive Drive addresses.

Additionally, a dry cleaner was listed in the subject site vicinity at 5301 Olive Drive in the 1999, 2002 and 2004 directories. However, this address is not listed in the EDR regulatory agency database or the Geotracker database as a hazardous materials release site. Based on the absence of a documented release of hazardous materials to the subsurface on file with the regulatory agencies and the location of this address 200 feet distant, there is currently no evidence to suggest that the reported presence of a dry cleaner 200 feet distant circa 1999 to 2004 represents an environmental concern in connection with the subject site.

Sanborn Fire Insurance Maps

Krazan reviews Sanborn Fire Insurance Maps (SFIMs) to evaluate prior land use of the subject site and the adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. Krazan contracted with EDR to provide copies of available SFIMs for the subject site and the adjacent properties as far back as 1867. EDR's search of SFIMs revealed no coverage for the subject site and the adjacent properties. Please refer to Appendix F for a copy of the EDR SFIM *No Maps Available* Report.

6.2 Interviews

Krazan conducts interviews with the owner of the subject site, a key site manager, subject site occupants, and/or the previous owners/occupants of the subject site. The interviews are designed to provide pertinent information regarding potential environmental impacts associated with the subject site.

Subject Site Owner – An interview was conducted with Mr. Steve Doctor, a representative of the owner of the subject site, via his completion of an environmental questionnaire. According to questionnaire responses, Mr. Doctor indicated that he has been familiar with the subject site for the past three years. Mr. Doctor indicated that the subject site is currently vacant land which has not been developed with any

structures previously. Mr. Doctor indicated that the subject site has been vacant land without any occupants historically.

According to Mr. Doctor, to the best of his knowledge, no use, storage, or disposal of hazardous materials; no existing or former ASTs or USTs; no hazardous materials spills, no environmental cleanups, no on-site treatment and/or discharge of waste; no environmental liens, AULs, engineering or institutional controls, no on-site leach fields, dry wells, sumps, or disposal ponds (other than a stormwater retention pond); no buried materials; no monitoring, domestic, or irrigation wells; or any items of environmental concern are associated with the subject site. Mr. Doctor indicated that he is not aware of any obvious indications pointing to the presence or likely presence of contamination of the subject property. Please refer to Appendix G for a copy of the environmental questionnaire completed by Mr. Doctor.

Additionally, during Krazan's previous January 21, 2020 Phase I ESA of the subject site, a completed environmental questionnaire was received from Mr. Tom Carosella, one of the owners of the subject site. Mr. Carosella stated that he had been familiar with the subject site for the past 16 years. Mr. Carosella indicated that the subject site was vacant land and he indicated that the subject site was "open ground" historically. Mr. Carosella was not aware of any use of environmentally persistent herbicides or pesticides at the subject site. According to Mr. Carosella, to the best of his knowledge, no use, storage, or disposal of hazardous materials; no existing or former USTs; no on-site treatment and/or discharge of waste; no environmental liens, AULs, engineering or institutional controls, no on-site leach fields, dry wells, sumps, or disposal ponds; no buried materials; no monitoring or domestic wells; or any items of environmental concern were associated with the subject site. Mr. Carosella indicated that he had no knowledge of the planned use/development of the subject site.

Previous Subject Site Owners/Occupants – An interview with a previous owner/occupant of the subject site was not conducted as access to these contacts were not secured. Therefore, the information that would have been obtained was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner and/or occupant constitutes a data gap.

6.3 Agricultural Chemicals

Review of historical aerial photographs indicates that the subject site was utilized for agricultural purposes from at least 1937 until at least 1973. Given the time frame in which with subject site was utilized for agricultural purposes, the potential exists that environmentally persistent pesticides/herbicides were historically applied to crops grown on the subject site. However, a shallow soil sampling assessment on

the subject site conducted by Krazan in August 2018 revealed that the trace concentration of the 4,4-DDE identified through composite soil sampling was well below the residential land use Environmental Screening Level (ESL) for 4,4-DDE and thus relative to organochlorine pesticide impact was suitable for unrestricted land use. Please refer to Section 6.1 of this report for additional discussion of the shallow soil assessment conducted by Krazan.

6.4 Regulatory Agency Interface

A review of regulatory agency records was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses.

Regulatory records are reviewed based on the following criteria: 1) properties with known soils and/or groundwater releases considered to represent the potential for impact to the subject site that are located within 1,760 feet of the subject site for constituents of concern impacts or 528 feet of the subject site for petroleum hydrocarbon impacts; 2) properties that are adjacent or in proximity to the subject site included within the EDR regulatory database report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

Kern County Public Health Services Department

The Kern County Public Health Services Department (KCPHSD) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities located in unincorporated areas of Kern County. On March 21, 2022, the Kern County Public Health Services Department was contacted regarding potential hazardous materials records, including AST, UST, leaking underground storage tank (LUST), hazardous materials business plan (HMBP), hazardous material release, environmental cleanup/site mitigation and/or hazardous waste generator records, for the subject site addresses of 5512 and 5656 Knudsen Drive and for the subject site APNs of 365-030-28 and -30. According to a representative of the Kern County Public Health Services Department, no hazardous materials records are on file with the KCEHSD for the referenced subject site addresses or APNs.

City of Bakersfield Fire Department

The City of Bakersfield Fire Department (CBFD) is the lead regulatory agency or Certified Unified Program Agency for hazardous materials handling facilities located in the City of Bakersfield. On March 21, 2022, the City of Bakersfield Department was contacted regarding potential hazardous materials records, including AST, UST, leaking underground storage tank (LUST), hazardous materials business plan (HMBP), hazardous materials spill/release incident, environmental cleanup/site mitigation and/or hazardous waste generator records, for the subject site addresses of 5512 and 5656 Knudsen Drive and for

the subject site APNs of 365-030-28 and -30. According to a representative of the City of Bakersfield Fire Department, no hazardous materials records are on file with the CBFD for the referenced subject site addresses or APNs.

Additionally, according to the California Environmental Reporting System (CERS) database available via the CalEPA Regulated Site Portal at the CalEPA website, no HMBP chemical inventory records and no CUPA compliance evaluation inspection records are included in the database for the southern, eastern, or western adjacent properties suggesting that hazardous materials are not stored in reportable quantity and that hazardous waste is not generated in reportable quantity at these properties. However, records included in the CERS database for three facilities located adjacent to the north of the subject site which are discussed below.

The Spot Food Mart #4 — adjacent to the north
5201 Olive Drive
According to records on file with the CBFD, The Spot Food Mart occupant of the 5201 Olive Drive address maintains permits with the CBFD for the operation of underground storage tanks, for the storage of hazardous materials, and as a small quantity hazardous waste generator. According to information on file with the CBFD as contained in the CERS database, a HMBP was submitted for The Food Spot on July 7, 2021. Krazan's March 30, 2022 review of the CERS database indicated that seven chemicals/hazardous materials are used/stored at this property in reportable quantity, including: 1) regular unleaded gasoline (9,000 to 11,999 gallons), 2) premium unleaded gasoline (9,000 to 11,999 gallons), 3) diesel fuel (9,000 to 11,999 gallons), 4) propane (60 to 119 gallons), 5) carbon dioxide (100 to 499 pounds), 6) and two types of non-RCRA hazardous waste solids (0 to 99 pounds and 100 to 499 pounds). An underground storage tank compliance evaluation inspection conducted by the CUPA on August 8, 2021 revealed four violations for which it is unclear if corrective action has been implemented, including violations related to incomplete secondary containment testing and failure to provide annual and tri-annual system testing results to the CUPA. Hazardous materials release response plan (HMRRP) and hazardous waste generator (HWG) compliance evaluation inspections of this facility conducted by the CBFD on January 27, 2021 revealed only one minor violation for failure to submit or review a HMBP to the CERS database annually which was corrected in a timely manner. Krazan's review of records on file with the CBFD as contained in the CERS database for this northern adjacent property revealed no evidence of a documented release of hazardous materials or hazardous waste to the subsurface other than a historical leaking UST investigation which is discussed in the following section of this report.

7-Eleven #32257 — adjacent to the north
5203 Olive Drive
According to records on file with the CBFD, the 7-Eleven occupant of the 5201 Olive Drive address maintains permits with the CBFD for the operation of underground storage tanks, for the storage of hazardous materials, and as a small quantity hazardous waste generator. According to information on file with the CBFD as contained in the CERS database, a HMBP was submitted for 7-Eleven on January 12, 2022. Krazan's March 30, 2022 review of the CERS database indicated that three chemicals/hazardous materials are used/stored at this property in reportable quantity, including: 1) gasoline (12,000 to 59,999 gallons), 2) carbon dioxide (12 to 59 gallons), and 3) waste absorbent and waste dispenser fuel filters

(100 to 499 pounds). Underground storage tank, HMRRP, and HWG compliance evaluation inspections of this facility conducted by the CUPA on September 30, 2021 revealed no violations, suggesting that this facility was compliant with all CUPA requirements as of that date. Krazan's review of records on file with the CBFD as contained in the CERS database for this northern adjacent property revealed no evidence of a documented release of hazardous materials or hazardous waste to the subsurface other than a historical leaking UST investigation which is discussed in the following section of this report.

Taco Bell Store 17751 adjacent to the north
5121 Olive Drive
According to records on file with the CBFD, the Taco Bell occupant of the 5121 Olive Drive address maintains a permit with the CBFD for the storage of hazardous materials. Krazan's June 18, 2019 review of the CERS database indicated that carbon dioxide (12 to 59 gallons) is the only hazardous material used/stored at this property in reportable quantity. A HMRRP compliance evaluation inspection of this facility conducted by the CUPA on January 8, 2019 revealed no violations. According to information on file with the CBFD as contained in the CERS database, a HMBP was submitted for Taco Bell on April 13, 2021. Krazan's review of records on file with the CBFD as contained in the CERS database for this northern adjacent property revealed no evidence of a documented release of hazardous materials or hazardous waste to the subsurface.

State of California Regional Water Quality Control Board - Geotracker

Krazan's March 29, 2022 review of the State of California Regional Water Quality Control Board (RWQCB) Geotracker database available via the RWQCB Internet Website indicated that no cleanup sites including LUST sites, cleanup program sites, land disposal sites, or military sites are listed for the subject site. However, two closed LUST site are listed adjacent to the subject site which are discussed below.

Chevron Station adjacent to the north
5201 Olive Drive
According to records on file with the RWQCB, hydrocarbon-impacted soil was discovered under a dispenser island during the installation of upgrade equipment on November 6, 2002 at the Chevron station located adjacent to the north of the subject site at 5201 Olive Drive. Approximately five cubic yards of soil was removed from the impacted area and soil confirmation samples were collected from the base and sidewalls of the excavation at a depth of approximately 15 feet bgs. Additionally, two soil borings were advanced to a depth of 25 feet below ground surface to confirm that the soil removal action was successful. Analysis of soil samples at 5-foot intervals indicated the concentrations of gasoline-range total petroleum hydrocarbons (TPH-g), benzene, toluene, ethylbenzene, and xylenes (BTEX), and fuel oxygenates to be below their respective laboratory reporting limits except for TPH-g in one sample. Analysis of one of the samples collected at 10 feet bgs revealed a TPH-g concentration of 0.38 milligrams per kilogram (mg/kg). However, based on an estimated depth to groundwater of 160 feet bgs and an absence of a detectable impact at 15 feet bgs, it was concluded that groundwater was not impacted by this fuel release. This fuel release was granted case closure status by the oversight regulatory agencies on November 22, 2004. Based on the apparently effective soil removal remediation, the absence of a groundwater impact, and the regulatory agency closure status, there is currently no evidence to suggest that the fuel dispenser release at the Chevron Station site represents an environmental concern in connection with the subject site.

Exxon Service Station adjacent to the north
5213 Olive Drive

According to records on file with the RWQCB, leaking USTs and/or leaking fuel dispenser product lines resulted in petroleum hydrocarbon impacts to subsurface soil and groundwater at the former Exxon Service Station located adjacent to the north of the subject site. Environmental investigation of the petroleum hydrocarbon release at this facility, including analysis of soil and groundwater samples, revealed the only significant impact to be limited to the northern dispenser island in the northwestern portion of the property. Remediation included limited soil removal and soil vapor extraction (SVE), with SVE estimated to have removed 1,600 gallons of petroleum hydrocarbons. Groundwater monitoring was conducted intermittently at this site, with groundwater reported to be first encountered at a depth of 90 to 110 feet bgs in 1990. The groundwater flow direction was reported to be toward the north-northwest, thereby placing this LUST site hydraulically downgradient of the subject site.

Environmental investigation of the former Exxon Station LUST site indicates that the concentrations of the primary constituents of concern (COCs), including TPH-g and BTEX constituents, decreased significantly with distance from the release source, although residual concentrations remained in soil and groundwater at this property at the time of closure. However, groundwater monitoring results indicated a decreasing trend in contaminant concentrations and this LUST site was granted case closure status on October 10, 1996. Based on the reportedly effective remediation implemented at this site, the regulatory agency closure status, the location of the fuel release and greatest impact at this property hydraulically downgradient of the subject site and at least 150 feet distant, and the 25-year time interval in which natural degradation of residual contaminants has potentially been occurring, there is currently no evidence to suggest that this facility represents an environmental concern in connection with the subject site.

Additionally, two closed LUST sites are listed in the subject site vicinity, and pertinent environmental risk factors for these release sites as related to the subject site are summarized in the following table:

Proximate Geotracker Release Site Listings

Site Name/Address	Distance From Subject Site/ Groundwater Flow Direction	COCs / (Media Impacted)	Investigation Status (Potential to Impact Subject Site)
Shell Service Station 5212 Olive Drive	360 feet to the north / (North-Northwest) – Downgradient of subject site	Gasoline / (Soil Only Impact)	LUST – Closed 10/23/91 (Low)
Texaco Station 5300 Olive Drive	370 feet to the north-northwest / (North-northwest) – Downgradient of the subject site	Gasoline / (Soil & Groundwater)	LUST - Closed 3/22/94 (Low)

Based on Krazan's review of information contained in the RWQCB Geotracker database, coupled with information pertaining to site location and local hydrogeology, there is no evidence to suggest that any of the above-listed sites currently represent an environmental concern in connection with the subject site.

State of California Environmental Protection Agency

Krazan's March 29, 2022 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control (DTSC) Envirostor database available via the DTSC's Internet Website indicated that no records of cleanup sites including State response sites, voluntary cleanup sites, school cleanup sites, or military or school evaluation sites are listed for the subject site or the adjacent properties. One school evaluation site is located in the subject site vicinity, and pertinent environmental risk factors for this release site as related to the subject site are summarized in the following table:

Proximate Envirostor Release Site Listings

Site Name/Address	Distance From Subject Site/ Groundwater Flow Direction	COCs / (Media Impacted)	Investigation Status (Potential to Impact Subject Site)
Carter Tract Site	475 feet to the south-southwest /	Suspected Metals & Organochlorine Pesticides /	School Site No Further Action Required (4/10/03)
Moraga Court/Victor Street	(North-northwest) – Cross-gradient of the subject site	(Soil Suspected)	(Low)

Based on Krazan's review of information contained in the DTSC Envirostor database, coupled with information pertaining to site location and local hydrogeology, there is no evidence that either of the above-listed sites currently represent an environmental concern in connection with the subject site.

Additionally, no Federal Superfund – National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site.

State of California Office of Emergency Services – Spills Database

Krazan's March 30, 2022 review of the State of California Office of Emergency Services (Cal OES) Spill Reports database, available via the Cal OES website indicated that no hazardous materials spill reports are included in the Cal OES Spill Reports database for the subject site addresses of 5512 and 5656 Knudsen Drive.

California Department of Conservation, California Geologic Energy Management Division

Krazan's March 21, 2022 review of the State of California Department of Conservation, California Geologic Energy Management Division (CalGEM) Online Mapping System indicated that no plugged and abandoned or producing oil wells are located on the subject site or within a 200-foot radius of the subject site.

U.S. Department of Transportation – Pipeline & Hazardous Materials Safety Administration

Krazan's March 30, 2022 review of the U.S. Department of Transportation – Pipeline & Hazardous Materials Safety Administration (PHMSA) National Pipeline Mapping System database available via the U.S. Department of Transportation website indicated that no gas transmission pipelines or hazardous liquid pipelines are located on the subject site.

Local Area Tribal Records

No Indian reservations, USTs on Indian land, or LUSTs on Indian land were reported on the subject site, adjacent properties, or vicinity properties in the EDR-provided government database report.

6.5 Regulatory Agency Lists Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. Refer to the following table for a summary of the listed properties considered to have the potential to impact the subject site located within the specified ASTM Search Radii. The actual distances of the listed properties (which are summarized below) are based on observations during Krazan's site reconnaissance. No EDR-listed unmapped (non-geocoded) sites were determined to be located on or adjacent to the subject site. Please refer to the Appendix H for a copy of the EDR Radius Map report.

Listed Properties

MAP FINDINGS SUMMARY

Database	Search Distance (Miles)	Target Property	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted

NOTES:
TP = Target Property
NR = Not Requested at this Search Distance
Sites may be listed in more than one database

The subject site addresses/location were not listed in the EDR regulatory database report.

Hazardous Materials Migration in Soils and/or Groundwater

EDR-listed facilities are located adjacent to the subject site. According to the EDR database report, Taco Bell #5121 (5121 Olive Drive), 7-11 #32257 (5203 Olive Drive), and Chevron #9-9702 (5201 Olive Drive) are listed as CERS sites located within a 175-foot radius of the subject site. However, during Krazan's site reconnaissance, these facilities were observed to be located adjacent to the north of the subject site. Hazardous materials records for these facilities are included in the CERS database. CERS database records for these facilities were previously discussed in Section 6.4 of this report.

Additionally, 5001 Olive Drive is listed as a historical UST site variably listed as being located from 91 to 156 to the north-northeast of the subject site. Information contained in the EDR report and available via Geotracker indicates that two 500-gallon fuel USTs were associated with a "waste treatment plant" and a sanitary district located at 5001 Olive Drive which is likely the former wastewater treatment plant previously located 400 feet to the south of the subject site. Review of historical aerial photographs did not reveal the presence of any structures with the 400-foot strip of vacant land between the wastewater treatment plant and the subject site, and it is therefore unlikely that any USTs were located within this strip of vacant land or the historically vacant subject site. It thus appears likely that the referenced USTs were located at the former wastewater treatment plant which may have been addressed as 5001 Olive Drive historically. Based on these considerations and the absence of any documentation of a fuel release to the subsurface contained in the EDR report or the Geotracker database, there is no evidence to suggest that the two USTs referenced at the 5001 Olive Drive address represent an environmental concern in connection with the subject site.

Facilities which are listed as sites with documented releases of hazardous materials to the subsurface are located within the subject site vicinity, including: 1) Chevron Station #9-99702 (5201 Olive Drive), 2) former Exxon Station (5213 Olive Drive), 3) Shell Station (5212 Olive Drive), and 4) Texaco Station (5300 Olive Drive). Hazardous materials records for these four closed LUST sites are on file with the RWQCB. RWQCB records for these facilities were previously discussed in Section 6.4 of this report.

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials or petroleum products are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site via groundwater migration is unlikely. In general, potentially hazardous materials released from facilities located generally hydraulically upgradient within subject site vicinity, or in a hydraulically cross-gradient direction in proximity to the site, may have a reasonable potential of migrating to the subject site via groundwater flow. This opinion is based on the assumption that non-vaporous hazardous materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. However, the potential for migration of volatile hazardous materials may include movement within soils, groundwater flow or potentially omni-directionally if present in a vaporous state.

Hazardous Materials Migration in Vapor

Hazardous materials or petroleum product vapors which may have the potential to migrate into the subsurface of the subject site may be caused by the release of vapors from contaminated soil or groundwater either on or in the vicinity of the subject site from current or historical uses of the subject site and/or adjacent or vicinity properties. Current or past land uses such as gasoline stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Constituent of concern vapors are capable of migrating great distances omni-directionally along subsurface conduits such as pipelines, utility lines, sewer and stormwater lines, and building foundations.

Based on Krazan's observations and review of State and local regulatory agency records and the EDR regulatory database report, no listings of concern related to potential vapor migration were determined to be associated with the subject site, adjacent properties, or properties located within the subject site vicinity. Review of vicinity properties listed by EDR as release sites within the applicable search radii suggests that

these properties do not represent a significant potential for vapor migration in connection with the subject site. The rationale supporting this opinion includes the following:

- None of the reported sites were in close proximity to the subject site.
- Relevant sites had undergone investigation and remediation sufficient to receive regulatory agency closure.
- Sites with reported releases of minor quantities of COCs or COCs of limited volatility impacting soil only were considered of minimal concern.
- The lateral migration of the COCs in groundwater is reported to be limited and COCs were not detected in groundwater samples collected downgradient of the release and several hundred feet upgradient of the subject site.
- Sites with reported releases of COCs including volatile organic compounds (VOCs) were either of sufficient distance or hydraulically down- or cross-gradient from the subject site such that they do not appear to represent a significant potential for vapor migration on the subject site.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites or vicinity properties in the EDR Report.

7.0 DISCUSSION OF FINDINGS

Summary of Conclusions

Apparent Evidence of RECs or PAOCs	Not Noted	Noted
Historical Uses	X	
Current Uses	X	
Adjacent or Vicinity Property Uses	X	

Historical Uses

Based on Krazan's review of previous environmental assessments, historical aerial photographs, historical topographic maps, and historical cross-reference directories, a site reconnaissance, contacts with the local regulatory agencies, and an interview with a representative of the owner of the subject site, there is no evidence that recognized environmental conditions exist in connection with the historical uses of the subject site.

Current Uses

Based on Krazan's site reconnaissance, contacts with local regulatory agencies, and an interview with a representative of the owner of the subject site, there is no evidence that recognized environmental conditions exist in connection with the current uses of the subject site.

Adjacent or Vicinity Property Uses:

Based on Krazan's field observations, review of the EDR government database report, and consultation with local regulatory agencies, there is no evidence that recognized environmental conditions exist in connection with the subject site from adjacent property uses.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-13 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

The following is a summary of data gaps encountered in the process of preparing this report including an observation as to the presumed significance of that data gap to the conclusions of this assessment:

- Absence of Final Title Report or Environmental Lien Search (Section 5.1)

  A Final Title Report or Environmental Lien Search was not provided by the Phase I ESA user, therefore, a preliminary title report with attendant limitations was utilized in preparation of this report. Taken in consideration with the available information obtained in the course of preparing this report in connection with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a Final Title Report or Environmental Lien Search are unknown.

- Absence of Interview with Previous Property Owner/Occupant (Section 6.1)

  A Phase I ESA interview with the previous owner/occupant of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner and/or occupant constitutes a data gap. Taken in consideration with the available information obtained in the course of preparing this report in connection with professional experience, there is no evidence to suggest that this data gap might

alter the conclusions of this assessment. However, the contents of an interview with a previous property owner/occupant are unknown.

8.0 CONCLUSIONS/OPINIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* guidance documents. Any deviations from this practice were previously described in this report. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-13.

9.0 RELIANCE

This report was prepared solely for use by Client and should not be provided to any other person or entity without Krazan & Associates' prior written consent. No party other than Client may rely on this report without Krazan & Associates' express prior written consent. Reliance rights for third parties will only be in effect once requested by Client and authorized by Krazan & Associates with authorization granted by way of a Reliance Letter. The Reliance Letter will require that the relying party(ies) agree to be bound to the terms and conditions of the agreement between Client and Krazan & Associates as if originally issued to the relying party(ies), or as so stipulated in the Reliance Letter.

10.0 LIMITATIONS

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historical uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry as stated in the ASTM Standard E 1527-13.

11.0 QUALIFICATIONS

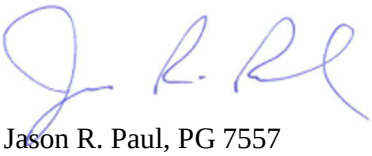

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental assessor with oversight from the undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-13 guidance, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

William Vick, PhD
Environmental Professional

Jason R. Paul, PG 7557
Environmental Regional Manager

GLOSSARY OF TERMS

Subject Site: The real property being investigated under this Phase I ESA.

Adjacent Properties: Properties which are contiguous with the subject site, or would be contiguous except for a street, road, or other public thoroughfare.

Subject Site Vicinity: Properties located within a 500-foot radius of the subject site.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The EP may be an independent contractor or an employee of the user.

User: The party seeking to use Practice E 1527 to complete an environmental site assessment of the subject site. A user may include, without limitation, a potential purchaser of the subject site, a potential tenant of the subject site, an owner of the subject site, a lender, or a property manager.

Recognized Environmental Condition (REC): In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a CREC. The "control" is represented by the restriction that the property use remain commercial. A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report and as an REC in the conclusions section. A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release an HREC, the environmental professional must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been change in the regulatory criteria). If the EP considers the past release to be an REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

GLOSSARY OF TERMS (continued)

Potential Area of Concern (PAOC): A term adopted to provide an alternative designation to the REC and HREC for a range of environmental issues related to current subject site uses, historical subject site uses, or from adjacent and/or vicinity property uses. The PAOC is utilized to emphasize full disclosure and provide the user with conclusions and recommendations related to potential environmental issues in connection with the subject site based on Krazan's professional experience in cases where official documentation or other evidence may be absent in order to identify an REC or HREC, thereby aiding the user's considerations of environmental due diligence risk tolerance.

Migrate/migration: For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM E 2600-10 guidance; however, nothing in the E 1527-13 practice should be construed to require application of the E 2600-10 standard to achieve compliance with AAI.

De minimis condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Condition determined to be *de minimis conditions* are not RECS or CRECs.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews.

Data Failure: A failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Introduction

"In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001 (the 'Brownfields Amendments'), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that 'all appropriate inquiry' is not completed"- American Society for Testing and Materials (ASTM) E1527-05 Appendix X3: User Questionnaire

1. Are you aware of any environmental cleanup liens against the subject site that are filed or recorded under federal, tribal, state, or local law?

NONE

2. Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

NO

3. As the user of the Phase I Environmental Site Assessment (ESA), do you have any specialized knowledge or experience related to the subject site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject site or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

4. Does the purchase price being paid for the subject site reasonably reflect the fair market value of the subject site? (Yes) No

   A. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject site?

5. Are you aware of commonly known or reasonably ascertainable information about the subject site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

A. Do you know the past uses of the subject site? If so, briefly explain.

NO – VACANT

B. Do you know of specific chemicals that are present or once were present at the subject site? If so, briefly explain.

NO - A limited soils investigation was performed by Bill Cooper w/ Kleinfelder dated Aug 8, 2018

C. Do you know of spills or other chemical releases that have taken place at the subject site? If so, briefly explain.

NO

D. Do you know of any environmental cleanups that have taken place at the subject site? If so, briefly explain.

NO

6. As the user of the Phase I ESA, based on your knowledge and experience related to the subject site, are there any obvious indicators that point to the presence or likely presence of contamination at the subject site?

NO

7. What is the reason for preparation of this Phase I ESA? (Property purchase/sale; bank loan; proposed development; etc.)

purchase due diligence, bank loan,

I, the user of this Phase I ESA (or authorized representative of the User), do hereby attest that I have carefully considered the questions herein and have presented answers to the best of my knowledge and ability based upon the Responsibilities of the User as required within ASTM E1527-05 guidance.

RE: Phase I Environmental Site Assessment
Vacant Property
Knudsen Drive
Bakersfield, California 93308

Dear Mr. Doctor:

Krazan & Associates, Inc., (Krazan) completed a Phase I Environmental Site Assessment (ESA) at the referenced site summarized in a report dated January 21, 2020. We appreciate the opportunity to serve your environmental due diligence needs. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in conjunction with the subject site as defined by ASTM E 1527-13.

If you have any questions regarding the information presented in this report, please call me at (559) 348-2200.

Respectfully Submitted,
KRAZAN & ASSOCIATES, INC.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
VACANT PROPERTY
KNUDSEN DRIVE
BAKERSFIELD, CALIFORNIA 93308

1.0 EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has conducted a Phase I Environmental Site Assessment (ESA) of the vacant property located on Knudsen Drive in Bakersfield, California 93308 (subject site). It is incumbent upon the user to read this Phase I ESA report in its entirety. If not otherwise defined within the text of this report, please refer to the Glossary of Terms Section following the References Section for definitions of terms and acronyms utilized within this Phase I ESA report. Krazan performed this assessment in conformance with American Society for Testing and Materials (ASTM) E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessments Process*. The Phase I ESA constitutes appropriate inquiry designed to identify obvious recognized environmental conditions as defined by ASTM E 1527-13 in connection with the previous and current uses and ownership of the subject site.

ASTM E 1527-13 Section 1.1.1 *Recognized Environmental Conditions* – In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) in conjunction with the subject site as defined by ASTM E 1527-13.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-13, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products.* As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections,* or *LLPs*): that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

2.2 Scope of Work

The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents c) a review of historical aerial photographs, historical Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR). The scope of work for this Phase I ESA conforms to ASTM E 1527-13. Krazan was provided written authorization to conduct the Phase I ESA by Mr. Steven Doctor with C&SD Construction, Inc. (C&SD) on January 9, 2020 in Krazan's January 9, 2020 Proposal/Cost Estimate No. P20-005.

3.0 SITE DESCRIPTION

The subject site is located at on Knudsen Drive within the City of Bakersfield, California. The subject site consists of two (2) parcels measuring a total of 7.78 with the associated Kern County Assessor's Parcel Number (APN) of 365-020-030 and a portion of APN 365-020-28. The subject site property is located on the east side of Knudsen Drive and is currently vacant land.

General property information and property use are summarized in the following Table I. Refer to Figures No. 1 – 4 following the Reference Section.

TABLE I
Subject Site Information Summary

Current Owner:	Carosella TR
Assessor's Parcel Numbers:	365-020-030 and a Portion of 365-020-28
Addressees:	None
Historical Addresses:	None
General Location:	East Side of Knudsen Drive approximately 260 feet south of Olive Drive
Acreage:	7.78 (according to the current property owner)
Existing Use:	Vacant Land
Number of Structures (Including Buildings and Dwellings):	None
Original Construction Date:	NA
Proposed Use:	Commercial – Medical Clinic for Veterans Administration
Topographic Map:	U.S. Geological Survey, 7.5 minute Oildale, California topographic quadrangle map, dated 1954, Photorevised 1968
Topographic Map Location:	Northwestern quarter of Section 14 and Northeastern Quarter of Section 15, Township 29 South, Range 27E, San Bernardino Baseline and Meridian
Latitude/Longitude:	35.4097650°/ –119.0575970°
Topography:	Slopes to the southwest, approximately 431 feet above mean sea level
Approximate Depth to Groundwater:	155 feet below ground surface (bgs), State of California Groundwater Interactive Map, Fall 2017
Regional Groundwater Flow Direction:	West-Northwest

3.1 Geology and Hydrogeology

The subject site is located within the southern portion of the Great Valley Geomorphic Province of California. The San Joaquin Valley is approximately 400 miles long and averages 50 miles wide The San Joaquin Valley, which comprises the southern portion of the Great Valley of California, has been filled with several thousand feet of sedimentary deposits. Sediments in the eastern valley, derived from the erosion of the Sierra Nevada, have been deposited by major to minor west-flowing drainages and their tributaries. Near-surface sediments are dominated by sands and silty sands with lesser silts, minor clays, and gravel. The sedimentary deposits in the region form large coalescing alluvial fans with gentle slopes. Soil types underlying the area is Kimberlina and Milham. Groundwater in the site vicinity is approximately 155 feet bgs and the groundwater flow direction is estimated to be towards the west-northwest.

4.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Mr. William Cooper, Krazan's Environmental Professional, on January 13, 2020. Krazan's Environmental Professional was unaccompanied during the site reconnaissance. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

4.1 Observations

The following Table II summarizes conditions encountered during our site reconnaissance. A discussion of visual observations follows Table II. Refer to the Site Map (Figure No. 3) and color photographs following the text for the locations of items discussed in this section of the report.

TABLE II
Summary of Site Reconnaissance

Feature	Observed	Not Observed
Structures (existing)		X
Evidence of Past Uses *(Power Pole and Concrete Rubble)*	X	
Hazardous Substances and/or Petroleum Products (including containers)		X
Aboveground Storage Tanks (ASTs)		X
Underground Storage Tanks (USTs) or Evidence of USTs		X
Evidence of Underground Pipelines		X
Strong, Pungent, or Noxious Odors		X
Pools of Liquid Likely to be Hazardous Materials or Petroleum Products		X
Drums		X
Unidentified Substance Containers		X
Potential Polychlorinated Biphenyl (PCB)-Containing Equipment		X
Subsurface Hydraulic Equipment		X
Heating/Ventilation/Air conditioning (HVAC)		X
Stains or Corrosion on Floors, Walls, or Ceilings		X
Floor Drains, Sumps, or Oil/Water Clarifiers		X
Storm Drains		X
Pits, Ponds, or Lagoons		X
Stormwater Basin (*Fenced Basin within the southwestern corner*)	X	
Stained Soil and/or Pavement		X
Soil Piles		X
Stressed Vegetation		X
Railroad tracks/spurs		X
Waste or Wastewater Discharges to Surface		X
Wells (irrigation, domestic, dry, oil wells, monitoring wells)		X
Septic Systems		X

The subject site comprises an approximately 7.78-acre portion of Kern County APNs 365-020-28 and -30. Refer to Figure No. 3, Site Map, for locations of the following referenced on-site features:

- The subject site was observed to be vacant land predominantly covered with weeds and grasses. Large pieces of concrete rubble were observed on the surface within the northern-central part of the subject site. The concrete rubble is adjacent to a power pole that is absent electrical lines.

- A small stormwater basin is located within the southwestern corner of the subject site. No indications of staining, dumping, or stressed vegetation was noted in association with observable portions of the basin. No other significant features were observed on the subject site.

- During the visual observations of the subject site, exposed surface soils did not exhibit obvious signs of discoloration. No hazardous materials/wastes were observed at the subject site. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs were noted within the areas observed. No indications of former structure foundations were observed on the subject site.

4.2 Utilities

Based on Krazan's research, no utilities are currently supplied to the subject site. The following Table III summarizes companies/municipalities that currently provide utility services to the area of the subject site:

TABLE III
Municipal Service / Utility Providers

Service / Utility	Provider	Connection Date
Electricity	Pacific Gas & Electric Company (PG&E)	N/A
Natural Gas	PG&E	N/A
Potable Water	California Water Service (CWS)	N/A
Sanitary Sewer	North of the River Sanitation District	N/A
Solid Waste Removal	Not identified	N/A

Potable Water Source

The water purveyor for the area of the subject site is California Water Service (CWS). CWS's water quality monitoring is an on-going program with water samples obtained on a regular basis. It is the responsibility of CWS to provide customers with potable water in compliance with the California State Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public. CWS's 2018 Consumer Confidence Report posted on CWS's website indicates that water provided by CWS is in compliance with the California State Maximum Contaminant Levels (MCLs) for primary drinking water.

Sewage Disposal System

The municipal sewer service provider to the subject site area is North of the River Sanitation District (NORSD). NORSD was contacted regarding sewer service for the subject site. According to a representative of NORSD, sewer service can provided to the subject site by NORSD upon development.

4.3 Adjacent Streets and Property Usage

The following Table IV summarizes the current adjacent roads and adjacent property uses observed during the site reconnaissance.

TABLE IV
Adjacent Streets and Property Use

Direction	Adjacent Street	Adjacent Property Use (Address)
North	None	Commercial 7-Eleven Store and Gas Station (5203 Olive Drive); Taco Bell Restaurant (5121 Olive Drive); and Chevron Gas Station (5201 Olive Drive)
South	None	Vacant
East	None	Vacant
West	Knudsen Drive	Commercial Spa Express (5725 Knudson Drive)

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials are stored at the adjacent properties, with the exception of the 7-Eleven and Chevron Gasoline Stations (refer to Section 6.4 for a discussion of these properties).

4.4 ASTM Non-Scope Considerations

According to ASTM E 1527-13, there may be environmental issues or conditions at the subject site that are outside the scope of the Phase I ESA practice (non-scope considerations). Some substances may be present at the subject site in quantities and under conditions that may lead to contamination of the subject site or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601[14]). ASTM non-scope considerations are discussed below.

Asbestos-Containing Materials

Asbestos is a group of naturally occurring mineral fibers that have been used commonly in a variety of building construction materials for insulation and as a fire-retardant. Because of its fiber strength and heat resistant properties, asbestos has been used for a wide range of manufactured goods, mostly in building materials, vehicle brakes, and heat-resistant fabrics, packaging, gaskets, and coatings. When

asbestos-containing materials (ACMs) are damaged or disturbed by repair, remodeling, or demolition activities, microscopic asbestos fibers may become airborne and can be inhaled into the lungs, where they can cause significant health problems. No structures are located on the subject site. Therefore, ACMs are not considered an on-site environmental concern at this time.

Lead-Based Paint

Although lead-based paint (LBP) was banned in 1978, many building constructed prior to 1978 have paint that contains lead. Lead from paint, chips, and dust can pose serious health hazards if not addressed properly. No structures are located on the subject site. Therefore, LBP is not considered an on-site environmental concern at this time.

Mold and Moisture Intrusion

A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce spores to reproduce, just as plants produce seeds. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth. Moisture control is the key to mold control. Molds need both food and water to survive; since molds can digest most things, water is the factor that limits mold growth. No structures are currently located on the subject site. Therefore, microbial growth and moisture intrusion are not considered an on-site environmental concern at this time.

Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Health Services (CDHS) maintains a statewide database of radon results in designated geographic areas. Radon detection devices are placed in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4.0 pico Curies per liter (pCi/L). The US EPA has prepared a map to assist National, State and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is

important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Therefore, the available data suggests that the potential for radon to adversely impact the subject site appears to be low.

Wetlands

As defined by the U.S. EPA and the Department of Army, Corps of Engineers, wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Jurisdictional wetlands are regulated under Section 404 of the Clean Water Act (1972, 1977, and 1987, and also the 1985 and 1990 Farm Bills), and are important for protection of aquatic waterfowl and species, water purification, and flood control. According to current Corps of Engineers information, three basic criteria are currently used to define wetlands:

- Wetland hydrology - areas exhibiting surface or near-surface saturation or inundation at some point in time (greater than 12.5 percent of growing season defined on basis of frost-free days) during an average rainfall year.

- Hydrophilic vegetation - frequency of occurrence of wetland indicator plants (plant life growing in water, soil, or substrate that is periodically deficient in oxygen as a result of excessive water content).

- Hydric soil - landscape patterns identified by saturation, flooding, or ponding long enough during the growing season (generally seven days) which develop characteristic color changes in the upper part of the soil as a result of anaerobic conditions.

Based on Krazan's reconnaissance of the subject site, evidence was not apparent to suggest that the site contained a wetland. Furthermore, according to the U. S. Fish & Wildlife Service (USFWS) National Wetlands Inventory available via the USFWS Internet website, the subject site does not contain a designated wetland. Therefore, at this time, regulations pertaining to wetlands do not appear to impact the subject site.

Environmental Non-Compliance Issues

No obvious material non-compliance issues were identified in connection with the subject site in the process of preparing this report.

Activity and Use Limitations

No activity and use limitations were identified in connection with the subject site in the process of preparing this report.

5.0 USER-PROVIDED INFORMATION

A review of user-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site. A Final Title Report or Environmental Lien Search were not provided to or prepared by Krazan in conjunction with this assessment.

5.1 Preliminary Title Report

A Preliminary Title Report (PTR) dated December 30, 2019, prepared for the subject site by Stewart Title, was provided to Krazan by C&SD Construction, Inc., the Phase I ESA User. The subject site PTR was reviewed to identify potential deed restrictions, environmental liens or activity and use limitations (AULs) which may have occurred on or exist in connection with the subject site. Krazan's review of the PTR indicated no deed restrictions, environmental liens or AULs for the subject site. However, as quoted from the subject site PTR, "It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land." The absence of a Final Title Report or Environmental Lien Search represents a data gap. Please refer to Appendix A for a copy of the PTR.

5.2 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

1. Environmental cleanup liens that are filed or recorded against the site. The client declined to have a lien search performed.

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.

3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.

5. Commonly known or *reasonably ascertainable* information about the *property*.

6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.

7. The reason for preparation of this Phase I ESA.

A completed Phase I ESA User Questionnaire was received from Mr. Steven Doctor with C&SD Construction, Inc., the Phase I ESA user. Please refer to Appendix B for a copy of the completed Phase I ESA user questionnaire.

According to the questionnaire response dated January 21, 2020, Mr. Doctor, to the best of his knowledge as the user of this Phase I ESA, was not aware of any environmental cleanup liens and activity or land use limitations which have been filed or recorded against the subject site; and Mr. Doctor has no specialized knowledge or experience of the prior nature of the business or chemical utilization on the subject site. Mr. Doctor indicated that he did not have knowledge of the past or current presence of specific chemicals or hazardous materials, unauthorized spills or chemical releases or of any environmental cleanup liens in connection with the subject site. Mr. Doctor stated that the purchase price of the subject site reasonably reflects fair market value. Additionally, Mr. Doctor indicated that the reason for preparation of this Phase I ESA is related to a proposed development of the subject site.

6.0 SITE USAGE SURVEY

The property usage survey included assessing property history, and reviewing local, state, and federal regulatory agency records.

6.1 Site History

A review of historical aerial photographs, a USGS topographic quadrangle map, reasonably ascertainable city directories, a search for historical Sanborn Fire Insurance Maps (SFIMs), review of previous Phase I ESA Report and Phase II Soil Sampling Report for the subject property and regulatory agency files were utilized to assess the history of the subject site.

Previous Environmental Site Assessment Report – October 2017

Krazan was provided a previous environmental assessment of the subject site entitled *Phase I Environmental Site Assessment (ESA) Report, Vacant Land on Knudsen Drive, Bakersfield, California* dated October 31, 2017 prepared by ENCON Technologies, Inc. (ENCON) for C&SD Construction, Inc. Please refer to Appendix C for a copy of the Phase I ESA report.

Krazan's review of the October 31, 2017 ESA indicates that the subject site was historically used for agricultural land from 1937 to at least 1973 and has been vacant land from at least 1984 through 2017. The adjacent properties included agricultural, commercial and residential properties.

On October 30, 2017, ENCON conducted a site reconnaissance of the subject site. According to ENCON, the site reconnaissance revealed no potential environmental concerns. ENCON did not identify the presence of USTs, ASTs, septic systems, PCBs, sumps, clarifiers, drains, pits, ponds, lagoons, ACMs, LBP, or any additional environmental hazards.

ENCON did discuss two (2) fueling stations located adjacent to the north of the subject site including a 7-Eleven Store at 5203 Olive Drive and a Chevron Station located at 5201 Olive Drive. According to ENCON, their review of available information indicated there were no reports of notices of violations and no active/ongoing remediation was reported by the State Regional Water Quality Control Board.

ENCON concluded that their assessment revealed no evidence of RECs in connection with the subject property, however, ENCON did state that the possible historical use of pesticides on the subject site was a Historical REC (HREC) as well as a Business Environmental Risk (BER). Based on the presence of the HREC and BER, ENCON recommended shallow soil testing for organochlorine pesticides (OCPs) be conducted if the subject site is redeveloped for mixed use or residential and other high sensitivity uses such as health or childcare services. ENCON further recommended that a Soil Management Plan should be developed for soil grading and off-site soil disposal that included environmental inspections and testing by a licensed hazardous waste contractor, as well as dust suppression, fencing and/or erosion controls during disturbance of soils at the subject site to prevent worker health exposure.

Limited Soil Assessment for Organochlorine Pesticides – August 2018

In August 2018, at the request of C&SD Construction, Inc., Krazan conducted a shallow soil sampling assessment on the subject site. Krazan collected 24 discrete soil samples at depths from ground

surface to six (6) inches bgs. The 24 samples were composited into six (6), four (4)-part composite samples (C-1A through C-6A) and submitted for laboratory analysis of OCPs.

The results for the six (6) shallow composite soil samples were reported as not detected (ND) above the laboratory reporting limits (RLs) with the exception of low concentrations of 4-4-DDE reported at a maximum concentration of 0.10 milligrams per kilogram (mg/kg) which is well below the Residential Screening Level of 1.4 mg/kg. Based on the analytical results, Krazan concluded that OCPs are not present at concentrations that pose a threat to human health or the environment and no further action was recommended. Please refer to Appendix C for a copy of Krazan's August 8, 2018 report.

Aerial Photograph Interpretation

Historical aerial photographs dated 1937, 1952, 1968, 1973, 1984, 1994, 2009, and 2018 were reviewed to assess the history of the subject site. These photographs were obtained from Environmental Data Resources, Inc. (EDR) and Google Earth™. Aerial photograph coverage for the years between 1952 and 1968 was not reasonably available or ascertainable. The aerial photograph summary is provided in the following Table V. Please refer to Appendix D for a copy of the historical aerial photographs.

TABLE V
Summary of Aerial Photograph Review

Year/Scale	Site Use	Site and Adjacent Property Observation
1937 1" = 500'	Agricultural with a Few Farm Buildings	The subject site appears to be mostly agricultural with a few out-buildings in the northwest corner that are part of a farm operation to the north of the subject site. The adjacent property use appears to be primarily agricultural and vacant land. The surrounding property use also appears to be mostly agricultural and vacant land.
1952 1" = 500'	Agricultural with a Few Farm Buildings	Conditions on the subject site and adjacent properties appear relatively similar to those noted in the 1937 aerial photograph with the exception that a small aboveground tank operation located adjacent to the south and some residential development is now present to the northeast in the surrounding properties. The State Route 99 freeway is now present to the east and north of the subject site.
1968 1" = 500'	Agricultural with a Few Farm Buildings	Conditions on the subject site and adjacent properties appear relatively similar to those noted in the 1952 aerial photograph with the exception that more residential and commercial development is present in the surrounding properties. A possible gasoline station appears to be located adjacent to the north of the subject site. The State Route 99 freeway has expanded to include off-ramps for Olive Drive to the north.
1973 1" = 500'	Agricultural with a Few Farm Buildings	Conditions on the subject site and adjacent properties appear relatively similar to those noted in the 1968 aerial photograph.

TABLE V (continued)
Summary of Aerial Photograph Review

Year/Scale	Site Use	Site and Adjacent Property Observation
1984 1" = 500'	Vacant Land	Conditions on the subject site and adjacent properties appear relatively similar to those noted in the 1973 aerial photograph with the exception that the subject site now appears to be vacant land. A commercial center is now present adjacent to the east of the subject site.
1994 1" = 500'	Vacant Land	Conditions on the subject site and adjacent properties appear relatively similar to those noted in the 1984 aerial photograph with the exception that more residential commercial development is present in the adjacent and surrounding properties.
2009 1" = 500'	Vacant Land	Conditions on the subject site and adjacent properties appear relatively similar to those noted in the 1994 aerial photograph with the exception that the AST farm to the south is now gone and some storage appears to be present on the subject site near the south boundary.
2019 Not to Scale	Vacant Land	The subject site property and adjacent property land use appears to be consistent with current vacant land use. The surrounding property land use is also consistent with current land use.

USGS Topographic Quadrangle Map

Krazan's review of the USGS, 7.5 minute, Oildale, California topographic quadrangle map dated 1953, photorevised 1969, indicates that the subject site is undeveloped land (Refer to Figure No. 4).

City of Bakersfield Building Division

On January 13, 2020, the City of Bakersfield Building Department was contacted for information regarding building permit records for the subject site. According to a representative with the CBBD, the subject site has not been assigned an address and no permits have been issued for the subject site

City Directories

On January 13, 2020, reasonably ascertainable Haines Criss-Cross Directories (HCCDs) and/or Polk Guide Directories (PGDs) dated 1940 through 2012 were reviewed utilizing approximately one (1)- to five (5)-year intervals at the Kern County-Beale Memorial Public Library located in Bakersfield, California for the subject site location on Knudsen Drive. According to Krazan's review of available directories, the subject site location is not listed.

Sanborn Fire Insurance Maps

Krazan reviews SFIMs to evaluate prior land use of the subject site and the adjacent properties. HFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. Krazan's research did not reveal SFIM coverage for

the subject site area. Please refer to Appendix E for a copy of the Notice of No Sanborn Map Coverage.

6.2 Interviews

A completed Phase I ESA Owner Questionnaire dated January 20, 2020 was received from Mr. Tom Carosella, co-owner of the subject site. Please refer to Appendix B for a copy of the completed Phase I ESA owner questionnaire.

Mr. Carosella stated that he has been familiar with the subject site for the past 16 years and that the subject site has historically been open ground. Mr. Carosella was not aware of any historical use of environmentally persistent herbicides/pesticides at the subject site.

According to Mr. Carosella, to the best of his knowledge, no use, storage, or disposal of hazardous materials; no existing or former USTs; no on-site treatment and/or discharge of waste; no environmental liens, AULs, engineering or institutional controls, no on-site leach fields, dry wells, sumps, or disposal ponds; no buried materials; no monitoring or domestic wells; or any items of environmental concern are associated with the subject site. Mr. Carosella indicated that was aware that the land use of the subject site would change, but did not indicate what would be the future plans for site development.

Previous Subject Site Owners/Occupants

An interview with a previous owner/occupant of the subject site was not reasonably ascertainable.

6.3 Agricultural Chemicals

Historical data indicates the subject site was utilized for agricultural purposes from at least 1937 to the at least 1973. However, based on the analytical results of the August 2018 Phase II soil sampling for pesticides documented in Section 6.1, the use, storage, and application of agricultural chemicals at the subject site do not appear to represent an environmental concern.

6.4 Regulatory Agency Interface

A review of regulatory agency records was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses.

Regulatory records are reviewed based on the following criteria: 1) properties with known soils and/or groundwater releases considered to represent the potential for impact to the subject site that are located

within 1,760 feet of the subject site for constituents of concern impacts or 528 feet of the subject site for petroleum hydrocarbon impacts; 2) properties that are adjacent or in proximity to the subject site included within the EDR regulatory database report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

Kern County Department of Environmental Health Services

The Kern County Department of Environmental Health Services (KCDEHS) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities in Kern County. The properties located adjacent to the north of the subject site are located within an unincorporated part of the City of Bakersfield and are regulated by KCDEHS and/or the Regional Water Quality Control Board. Records for two northern-adjacent case-closed LUST sites and two vicinity case-closed LUST sites are discussed below in detail under the State of California Regional Water Quality Control Board section.

City of Bakersfield Fire Department

The City of Bakersfield Fire Department (CBFD) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities in the City of Bakersfield. On January 13, 2020, Krazan reviewed available records via the internet at www.bakersfieldcity.us for potential records associated with USTs, hazardous materials business plans (HMBPs), or hazardous materials incident reports for the subject site. Based on Krazan's review of available files, no records were found on file with the CBFD for the subject site. The subject site is located within the City of Bakersfield and adjacent properties to the north are located within an unincorporated part of the city.

State of California Regional Water Quality Control Board - GeoTracker

Krazan's review of the State of California Regional Water Quality Control Board (RWQCB) GeoTracker database available via the RWQCB Internet Website indicated that no sites, including LUST sites, cleanup program sites, land disposal sites, or military sites, are listed for the subject site. Two (2) adjacent case-closed leaking UST sites and two (2) vicinity case-closed leaking UST sites are identified by GeoTracker. These facilities are discussed below:

Chevron Station — approximately 180 feet to the north
5201 Olive Drive

The Chevron Station is located approximately 180 feet to the north of the subject site. According to records on file with Kern County Environmental Health Services Department (KCEHD), hydrocarbon-impacted soil was discovered under a dispenser island during the installation of upgrade equipment on November 6, 2002. Approximately five (5) cubic yards of soil was removed from the impacted area on the same day. Subsequent confirmation soil sampling indicated that the soil removal

action successfully removed any threat to groundwater. A Remedial Action Completion Certifications letter dated November 22, 2004 was issued by the KCEHD. Based on the small area of impacted soil and apparently successful remedial action, there is no evidence that the Chevron Station site represents a significant environmental concern in conjunction with the subject site.

Former Exxon Service Station — approximately 180 feet to the north
5213 Olive Drive
The former Exxon Service Chevron Station is located approximately 180 feet to the north of the subject site. According to records on GeoTracker, a Remedial Action Certification dated October 10, 1996 was issued by the KCEHD. No other records or site history were present on GeoTracker for this site. This site is further discussed below in Section 6.5. Based upon review of Google Earth, the location of the former Exxon Station is the same as for the current Chevron Station discussed above, even though the addresses are different.

Shell Station — approximately 370 feet to the north
5212 Olive Drive
The Shell Service Station is located approximately 370 feet to the north of the subject site. According to records on GeoTracker, the Shell site was given a Case Closure letter dated October 23, 1991, although no copy of the letter was available. No other records or site history were present on GeoTracker for this site. This site is further discussed below in Section 6.5.

Former Texaco Service Station — approximately 400 feet to the north
5300 Olive Drive
The former Texaco Service Station is located approximately 400 feet to the north of the subject site. According to records on file with GeoTracker/KCDEHS, three (3), 10,000-gallon gasoline-fuel USTs and associated dispensers and product lines and one (1), 200-gallon waste-oil UST were removed from this facility in 1991. During removal, gasoline and gasoline constituents, including benzene, were determined to have impacted soil in association with dispensers/product lines. Impacted soil was excavated and disposed to the Laidlaw disposal facility in Buttonwillow. Three (3) groundwater-monitoring wells and four vapor-extraction wells were subsequently installed at this facility. Groundwater was found between 90 and 114 feet below ground surface and groundwater flow was to the northeast. Upon the successful completion of remediation of soil and groundwater in 1994, the KCDEHS issued closure of this facility with no further action required. Upon completion of remediation, gasoline and benzene were reported as not-detected (ND) in soil, and at concentrations of less than one (1) part per billion in groundwater. Based on the Case Closure Summary, this facility meets requirement of the Regional Water Quality Control Board for public health and beneficial uses of groundwater. Given the distance and hydraulically downgradient location of this facility with respect to the subject site, and the successful completion of remediation which includes the absence of significant impacts to soil and groundwater for gasoline and VOCs, there is no evidence that this facility represents a significant environmental concern in conjunction with the subject site.

California Environmental Protection Agency, Department of Toxic Substances Control

Krazan's review of the State of California Department of Toxic Substances Control (DTSC) Envirostor database available via the DTSC's Internet Website indicated that no State response sites,

voluntary cleanup sites, school cleanup sites, or military sites are listed for the subject site, the adjacent properties, or properties located within 500 feet of the subject site. Additionally, no Federal Superfund – National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site.

California Department of Conservation, Division of Oil, Gas & Geothermal Resources - DOMS

Krazan's review of the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) Online Mapping System (DOMS) indicated that no oil wells are located on the subject site.

Local Area Tribal Records

No Indian reservations, USTs on Indian land, or LUSTs on Indian land were reported on the subject site, adjacent properties, or vicinity properties in the EDR-provided government database report.

6.5 Regulatory Agency Lists Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. Please refer to the following Table VI for a summary of the listed properties considered to have the potential to impact the subject site located within the specified ASTM Search Radii. The actual distances of the listed properties (which are summarized below) are based on observations during Krazan's site reconnaissance. No EDR-listed unmapped (non geocoded) sites were determined to be located on or adjacent to the subject site. Please refer to Appendix F for a copy of the EDR Radius Map report.

NOTES:

TP = Target Property

NR = Not Requested at this Search Distance

Sites may be listed in more than one database

The subject site address/location was not listed in the EDR regulatory database report.

The following facilities were listed in proximity to the subject site:

Chevron Station approximately 180 feet to the north
5201 Olive Drive
The Chevron Station is located approximately 180 feet to the north of the subject site and was previously discussed in Section 6.4 (GeoTracker). According to records on file with the KCEHD, hydrocarbon-impacted soil was discovered under a dispenser island during the installation of upgrade equipment on November 6, 2002. Approximately five (5) cubic yards of soil was removed from the impacted area on the same day. Subsequent confirmation soil sampling indicated that the soil removal action successfully removed any threat to groundwater. A Remedial Action Completion Certifications letter dated November 22, 2004 was issued by the KCEHD. Based on the small area of impacted soil and apparently successful remedial action, there is no evidence that the Chevron Station site represents a significant environmental concern in conjunction with the subject site.

Former Exxon Service Station approximately 180 feet to the north
5213 Olive Drive
The former Exxon Service Chevron Station is located approximately 180 feet to the north of the subject site. According to records on GeoTracker, a Remedial Action Certification dated October 10, 1996 was issued by the KCEHD. According to the Case Closure Summary dated August 12, 1996 prepared by the KCEHD, three (3) 8,000-gallon gasoline USTs were removed in October 1990. Soil sampling during the UST removal activities confirmed that significant gasoline contamination existed only in the north dispenser area. A vapor extraction system operated at the Exxon site from June 1991 through December 1993 and removed an estimated 1,662 gallons of hydrocarbons. Groundwater was initially only minimally impacted and by the time the case was closed in October 1996, the gasoline constituents in groundwater were negligible. The KCEHD prepared a Remedial Action Completion Certification dated October 10, 1996. Based on the case closure status, depth to groundwater of approximately 150 feet bgs and the minimal hydrocarbon impact to groundwater, there is no evidence that the former Exxon Service Station site represents a significant environmental concern in conjunction with the subject site.

Shell Station approximately 370 feet to the north
5212 Olive Drive
The Shell Service Station is located approximately 370 feet to the north of the subject site. According to records on GeoTracker, the Shell site was given a Case Closure letter dated October 23, 1991, although no copy of the letter was available. According to EDR, the case was soil only. Based on the case closure status, soil-only impact and the fact that natural attenuation would have occurred over the nearly 30-year period since the site subsurface was impacted, there is no evidence that the Shell Service Station site represents a significant environmental concern in conjunction with the subject site.

Former Texaco Service Station approximately 400 feet to the north
5300 Olive Drive
The former Texaco Service Station is located approximately 400 feet to the north of the subject site. According to records on file with GeoTracker/KCDEHS, three (3),

> 10,000-gallon gasoline-fuel USTs and associated dispensers and product lines, and one (1), 200-gallon waste-oil UST were removed from this facility in 1991. During removal, gasoline and gasoline constituents, including benzene, were determined to have impacted soil in association with dispensers/product lines. Impacted soil was excavated and disposed to the Laidlaw disposal facility in Buttonwillow. Three (3) groundwater-monitoring wells and four vapor-extraction wells were subsequently installed at this facility. Groundwater was found between 90 and 114 feet below ground surface and groundwater flow was to the northeast. Upon the successful completion of remediation of soil and groundwater in 1994, the KCDEHS issued closure of this facility with no further action required. Upon completion of remediation, gasoline and benzene were reported as not-detected (ND) in soil, and at concentrations of less than one (1) part per billion in groundwater. Based on the Case Closure Summary, this facility meets requirement of the Regional Water Quality Control Board for public health and beneficial uses of groundwater. Given the distance and hydraulically downgradient location of this facility with respect to the subject site, and the successful completion of remediation which includes the absence of significant impacts to soil and groundwater for gasoline and VOCs, there is no evidence that this facility represents a significant environmental concern in conjunction with the subject site.

Additionally, according to the EDR report, one (1) dry cleaner site (One Hour Martinizing) was listed as being within 252 feet of the subject site. There was no record of a release or any regulatory issue associated with the cleaner's site. In addition, six (6) "EDR Historical Auto Station" and one (1) EDR "Hist Cleaners" sites are located within 1/8 mile of the subject site. Four (4) of the Historical Auto Stations are current stations and have already been discussed. The remaining two (2) Historical Auto Stations are located at 5301 Olive Drive (Casey Gabriel G) and 5206 Olive Drive (Smith S Howard Rich). The 5301 Olive Drive address appears to be now be occupied by an office building and the 5206 Olive Drive no longer appears to be a valid address based on review of Google Earth. No records of unauthorized releases of hazardous materials are contained in the EDR database report for any of the Historical Auto Station or Historical Cleaner site addresses and the site address are not listed as release sites in the RWQCB GeoTracker database. Based on the absence of records related to documented releases of hazardous materials to the subsurface on file with the local regulatory agencies for any of the Historical Auto Station or Historical Cleaners sites, there is no material evidence to suggest that the reported Historical Auto Stations and Historical Cleaners sites currently represent a significant environmental concern in connection with the subject site.

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials or petroleum products are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site via groundwater migration is unlikely. In general, potentially hazardous materials released from facilities located approximately hydraulically upgradient

within subject site vicinity, or in a hydraulically cross-gradient direction in proximity to the site, may have a reasonable potential of migrating to the subject site via groundwater flow. This opinion is based on the assumption that non-vaporous hazardous materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. However, the potential for migration of volatile hazardous materials may include movement within soils, groundwater flow or potentially omni-directionally if present in a vaporous state.

Hazardous Materials Migration in Vapor

Hazardous materials or volatile constituent vapors which may have the potential to migrate into the subsurface of the subject site may be caused by the release of vapors from contaminated soil or groundwater either on or in the vicinity of the subject site from current or historical uses of the subject site and/or adjacent or vicinity properties. Current or past land uses such as gasoline stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Constituent of concern vapors are capable of migrating great distances omni-directionally along subsurface conduits such as pipelines, utility lines, sewer and stormwater lines, and building foundations.

Based on review of information contained in the EDR report and other site records, there are no known sites that pose a currently known significant potential for VOC-vapor migration on the subject site. Based on Krazan's observations and review of State and local regulatory agency records and the EDR regulatory database report, review of the remaining vicinity properties listed by EDR as release sites within the applicable search radii suggests that these properties do not represent a significant potential for vapor migration in conjunction with the subject site. The rationale supporting this opinion includes the following:

- Most of the reported sites were not in close proximity to the subject site.
- Relevant sites had undergone investigation and remediation sufficient to receive regulatory agency closure.
- Sites with reported releases of minor quantities of COCs or COCs of limited volatility impacting soil only were considered of minimal concern.
- Sites with reported releases of COCs including VOCs were either of sufficient distance or hydraulically down- or cross-gradient from the subject site such that they do not appear to represent a significant potential for vapor migration on the subject site.

- There are numerous sites with USTs in the area of the subject site, however, none of the sites not already discussed have any reported releases.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites, or vicinity properties in the EDR Report.

7.0 DISCUSSION OF FINDINGS

TABLE VII
Summary of Conclusions

Apparent Evidence of RECs/PAOCs From:	Not Noted	Noted
Historical Uses	X	
Current Uses	X	
Adjacent or Vicinity Property Uses	X	

Historical Uses

Based on Krazan's review of historical aerial photographs and Sanborn Fire Insurance Maps, a site reconnaissance, and contacts with the local regulatory agencies and the owner of the subject site, there is no evidence that RECs exist in connection with the historical uses of the subject site.

Current Uses

Based on Krazan's site reconnaissance, contacts with local regulatory agencies, and an interview with the user of the subject site, there is no evidence that RECs exist in connection with the current uses of the subject site.

Adjacent or Vicinity Property Uses:

Based on Krazan's field observations, review of the EDR government database report, and consultation with local regulatory agencies, there is no evidence that RECs exist in connection with the subject site from adjacent or vicinity property.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-13 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this

practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap. The following is a summary of data gaps encountered in the process of preparing this report including an observation as to the presumed significance of that data gap to the conclusions of this assessment:

- Absence of Interview with Previous Property Owners/Occupants (Section 6.2)

  A Phase I ESA interview with the previous owners/occupants of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner and/or occupant constitutes a data gap. Taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, it is unlikely that this data gap might alter the conclusions of this assessment. However, the contents of an interview with a previous property owner/occupant are unknown.

- Absence of a Final title Report or Environmental Lien Search

  A Final Title Report or Environmental Lien Search were not provided by the Phase I ESA user. Consequently, a data gap exists based upon ASTM guidance. Taken into consideration with available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a Final Title Report or Environmental Lien Search are unknown.

8.0 CONCLUSIONS/OPINIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* guidance documents. Any deviations from this practice were previously described in this report. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in conjunction with the subject site as defined by ASTM E 1527-13.

9.0 RELIANCE

This report was prepared solely for use by Client and should not be provided to any other person or entity without Krazan & Associates' prior written consent. No party other than Client may rely on this report without Krazan & Associates' express prior written consent. Reliance rights for third parties will only be in effect once requested by Client and authorized by Krazan & Associates with authorization granted by way of a Reliance Letter. The Reliance Letter will require that the relying party(ies) agree to be bound to the terms and conditions of the agreement between Client and Krazan & Associates as if originally issued to the relying party(ies), or as so stipulated in the Reliance Letter.

10.0 LIMITATIONS

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historical uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan. Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry as stated in the ASTM Standard E 1527-13.

11.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental assessor with oversight from the undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-13 guidance, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

Michael H. Bowery, PG 5027
Senior Manager

Arthur C. Farkas, REA
Environmental Professional

GLOSSARY OF TERMS

Subject Site: The real property being investigated under this Phase I ESA.

Adjacent Properties: Properties which are contiguous with the subject site, or would be contiguous except for a street, road, or other public thoroughfare.

Subject Site Vicinity: Properties located within a 500-foot radius of the subject site.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The EP may be an independent contractor or an employee of the user.

User: The party seeking to use Practice E 1527 to complete an environmental site assessment of the subject site. A user may include, without limitation, a potential purchaser of the subject site, a potential tenant of the subject site, an owner of the subject site, a lender, or a property manager.

Recognized Environmental Condition (REC): In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a CREC. The "control" is represented by the restriction that the property use remain commercial. A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report and as an REC in the conclusions section. A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release an HREC, the environmental professional must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been change in the regulatory criteria). If the EP considers the past release to be an REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

GLOSSARY OF TERMS (continued)

Potential Area of Concern (PAOC): A term adopted to provide an alternative designation to the REC and HREC for a range of environmental issues related to current subject site uses, historical subject site uses, or from adjacent and/or vicinity property uses. The PAOC is utilized to emphasize full disclosure and provide the User with conclusions and recommendations related to potential environmental issues in connection with the subject site based on Krazan's professional experience in cases where official documentation or other evidence may be absent in order to identify an REC or HREC, thereby aiding the User's considerations of environmental due diligence risk tolerance.

Migrate/migration: For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM E 2600-10 guidance; however, nothing in the E 1527-13 practice should be construed to require application of the E 2600-10 standard to achieve compliance with AAI.

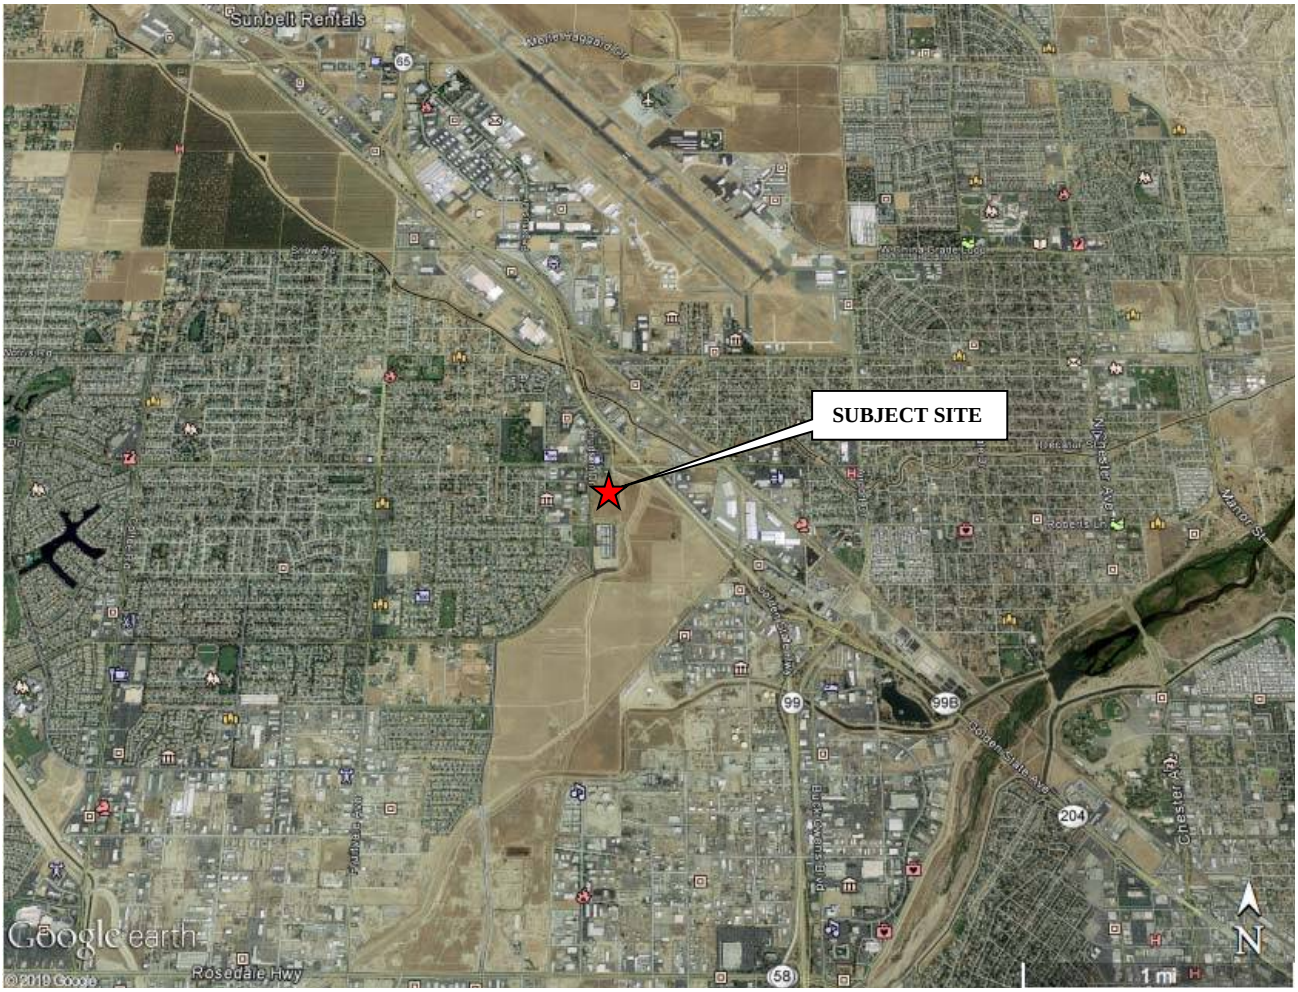

De minimis condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Condition determined to be *de minimis conditions* are not RECS or CRECs.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews.

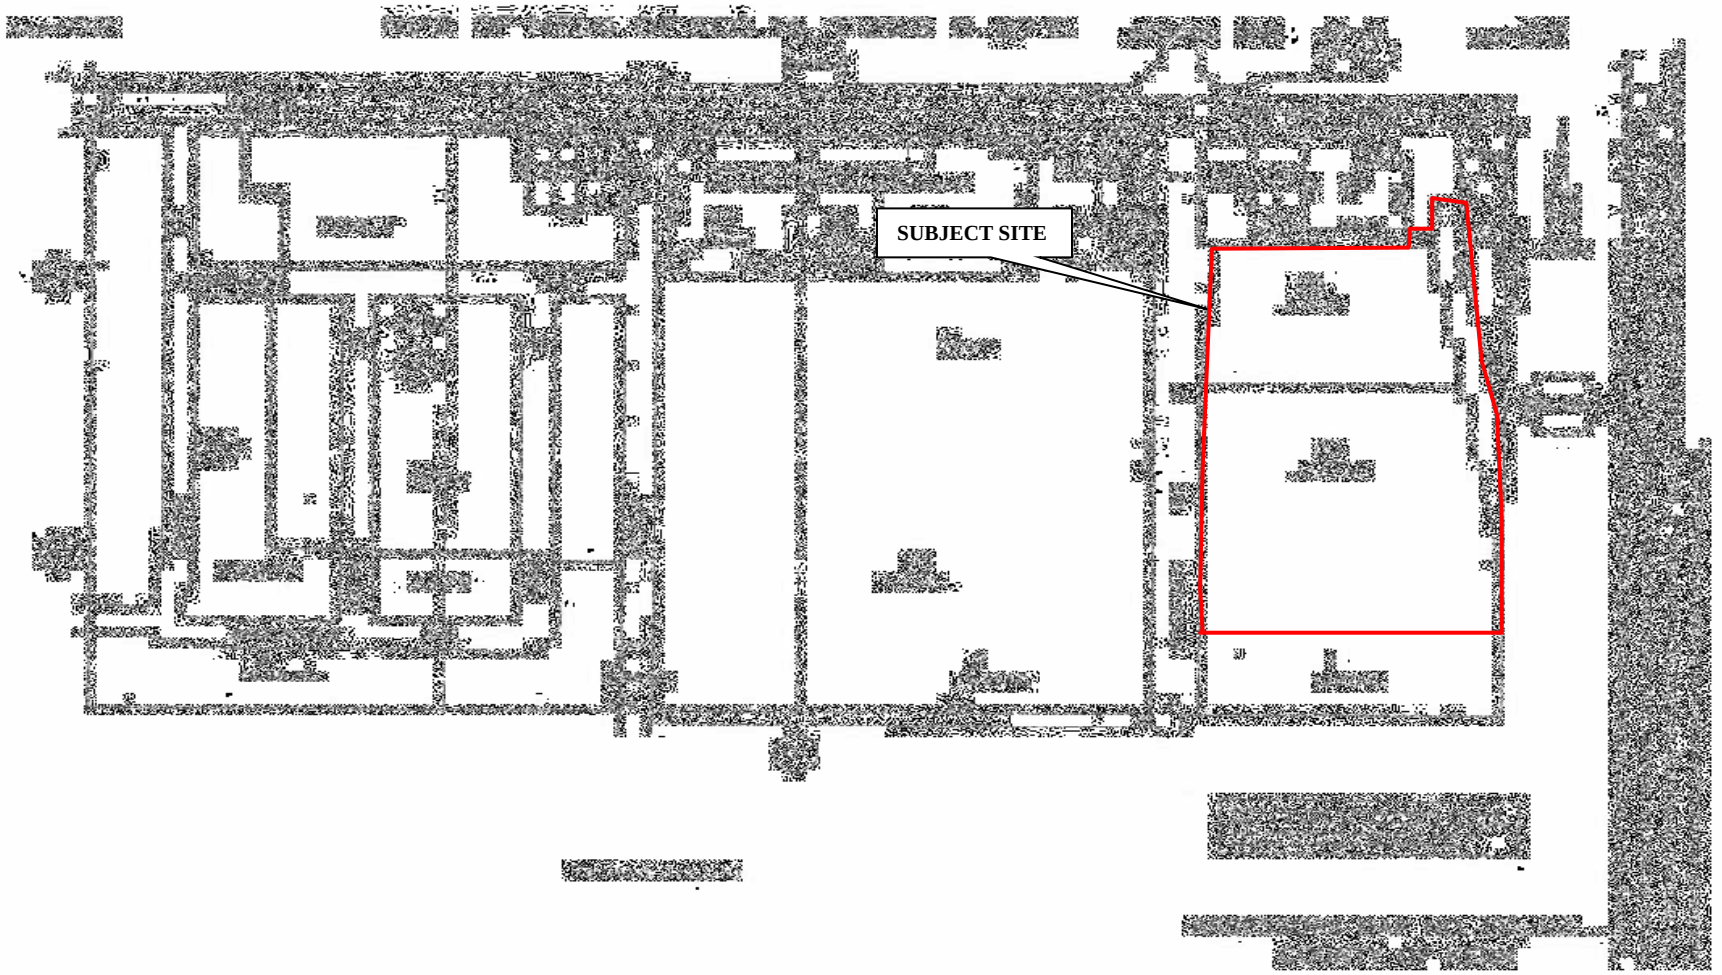

Data Failure: A failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

PRELIMINARY REPORT

Order No.	:	01180-289485
Title Unit No.	:	7733
Your File No.	:	
Buyer/Borrower Name	:	Shane Astani and Steven Doctor
Seller Name	:	The Carosella Trust, Lundy Family Trust, Thomas Carosella, Lisa M. Carosella, James C. Lundy, and Tianna T. Lundy

Property Address: Apn 365-020-30, Bakersfield, CA
Apn 365-020-28, CA

In response to the above referenced application for a Policy of Title Insurance, Stewart Title of California, Inc. hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Stewart Title Guaranty Company Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referenced to as an Exception on Schedule B or not excluded from coverage pursuant to the printed Schedules, Conditions, and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on covered Risks of said policy or policies are set forth in Exhibit A attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limits of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters, which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report, (and any supplements or amendments thereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance a binder or commitment should be requested.

Dated as of December 30, 2019 at 7:30 a.m.

Update No. 3

Robert Good, Title Officer

PRELIMINARY REPORT

The form of Policy of Title Insurance contemplated by this report is:

☒ CLTA Standard Coverage Policy

☐ CLTA/ALTA Homeowners Policy

☐ 2006 ALTA Owner's Policy

☒ 2006 ALTA Loan Policy

☐ ALTA Short Form Residential Loan Policy

☐

SCHEDULE A

The estate or interest in the land hereinafter described or referred to covered by this report is:

A Fee

Title to said estate or interest at the date hereof is vested in:

Thomas Carosella and Lisa M. Carosella, Trustees of the Carosella Trust, dated October 29, 2014, as to an undivided 50% interest, as to Parcel 1 and 100% interest as to Parcel 2

and

James C. Lundy and Tianna T. Lundy, Trustees of The Lundy Family Trust dated September 18, 2008, as to an undivided 50% interest, as to Parcel 1

LEGAL DESCRIPTION

The land referred to herein is situated in the State of California, County of Kern, City of Bakersfield and described as follows:

Parcel 1:

All that portion of Lot 1 as shown on the sales map of lands of the Kern County Land Company filed April 8, 1892 in the Office of the Kern County Recorder, also being a portion of the Northeast quarter of Section 15, Township 29 South, Range 27 East, Mount Diablo Base and Meridian, County of Kern, State of California, as shown as Parcel B of a Certificate of Compliance recorded July 17, 1990 in Book 6407, Page 459, described as follows:

Commencing at the Northeast corner of said Section 15, thence North 89° 10' 32" West along the North line of said Section 15 and the center line of Olive Drive, 663.86 feet to a point on the Northerly prolongation of the Westerly line of said Lot 1; thence South 00° 13' 29" West along said West line, 292.17 feet to the true point of beginning; thence departing from said West line, South 89° 10' 32" East parallel with the North line of said Section 15, 477.59 feet to a point on the Westerly right of way line of Landco Drive as shown on the map or proposed County Road 3199 (6-1A 3199 MI) on file in the Office of the Kern County Surveyor, said point also being the beginning of a non-tangent curve concave Easterly having a radius of 1855.00 feet from which point a radial bears North 84° 19' 54" East; thence Northerly along said Westerly line and said curve through a central angle of 5° 15' 19" an arc length of 170.14 feet to a point of cusp and to a point on the South right of way line of the access road shown on State Highway Map filed in Book 2, Page 14, in the Office of the Kern County Surveyor, said point also being the beginning of a non-tangent curve concave Northeasterly having a radius of 110.00 feet from which point a radial bears North 69° 48' 25" East; thence along said South right of way line of the access road, Southeasterly along said curve through a central angle of 74° 23' 19" an arc distance of 142.82 feet to the beginning of a non-tangent curve Easterly having a radius of 1745.00 feet from which point a radial lines bears North 87° 12' 23" East, said curve being in the East right of way line of said Landco Drive; thence Southerly along said Easterly right of way line and said curve through a central angle of 7° 51' 44", an arc distance of 239.45 feet; thence South 10° 39' 21" East, continuing along said Easterly right of way line 287.12 feet to a point on the East line of said Section 15 and the East line of said Lot 1; thence departing from said East right of way line South 00° 15' 53" West, along said East lines, 614.00 feet to the Southeast corner of said Lot 1; thence departing from said East lines, North 89° 10' 28" West along the South line of said Lot 1, 662.94 feet to the Southwest corner of said Lot 1; thence departing from said South line, North 00° 13' 29" East, along the West line of said Lot 1, 1033.54 feet to the true point of beginning.

Also excepting therefrom that portion as deeded to the State of California in deed dated June 11, 1990 and recorded December 4, 1990 in Book 6460, Page 2213, of Official Records, Document No. 075229.

Also excepting therefrom that portion as deeded to the City of Bakersfield, a Municipal corporation by that certain grant deed recorded December 28, 2004 as Instr. # 0204320775, of Official Records and re-recorded January 30, 2014 as Instr. # 0214010987, of Official Records.

Except therefrom all oil, gas and hydrocarbon substances and minerals as reserved in deeds recorded June 11, 2003 as Instr. # 0203114063 and March 7, 2006 as Instr. # 0206054328, of Official Records.

Parcel 2:

That portion of Lot 1 in the N.E. 1/4 of Section 15, T. 29 S., R. 27 E., M.D.M., as shown on the Sales Map of Lands of the Kern County Land Company filed April 8, 1892 in the Office of the Kern County Recorder described as:

A strip of land 300 feet in width lying southerly of and contiguous to the following described line:

Commencing for reference at the northeast corner of said section;

Thence (1), along the north line of said Section, N. 89° 10'32" W., 663.86 feet to the northerly prolongation of the west line of said Lot 1;

Thence (2), along said northerly prolongation and said west line, S. 00°13'29" W., 292.17 feet to the TRUE POINT OF BEGINNING of the line to be described;

Thence (3), parallel with the north line of said section, S. 89°10'32" E., 533 feet, more or less, to the centerline of Landco Drive as shown on the map of Proposed County Road 3199 (6-IA 3199 MI) on file in the Office of the Kern County Surveyor.

The sidelines of said strip of land shall be prolonged or shortened so as to begin in said west line and end in said centerline.

EXCEPTING THEREFROM all oil, oil rights, minerals, mineral rights, natural gas, natural gas rights, and other hydrocarbons by whatsoever name known that may be within or under the parcel of land hereinabove described, together with the perpetual right of drilling, mining, exploring and operating therefor and removing the same from said land or any other land, including the right to whipstock or directionally drill and mine from lands other than those hereinabove described oil or gas wells, tunnels and shafts into, through or across the subsurface of the land hereinabove described, and to bottom such whipstock or directionally drilled wells, tunnels and shafts under and beneath or beyond the exterior limits thereof, and to redrill, retunnel, equip, maintain, repair,, deepen, and operate any such wells or mines, without, however the right to drill, mine, explore and operate through the surface or the upper 100 feet of the subsurface of the land hereinabove described or otherwise in such manner as to endanger the safety of any highway that may be constructed on said lands.

(End of Legal Description)

APN: 365-020-30-00 and 365-020-28-00

THE MAP CONNECTED HEREWITH IS BEING PROVIDED AS A COURTESY AND FOR INFORMATIONAL PURPOSES ONLY; THIS MAP SHOULD NOT BE RELIED UPON. FURTHERMORE, THE PARCELS SET OUT ON THIS MAP MAY NOT COMPLY WITH LOCAL SUBDIVISION OR BUILDING ORDINANCES. STEWART ASSUMES NO LIABILITY, RESPONSIBILITY OR INDEMNIFICATION RELATED TO THE MAPS NOR ANY MATTERS CONCERNING THE CONTENTS OF OR ACCURACY OF THE MAP.

SCHEDULE B

At the date hereof, exceptions to coverage in addition to the printed exceptions and exclusions contained in said policy or policies would be as follows:

Taxes:

A. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes, to be levied for the fiscal year 2020 – 2021.

B. General and Special City and/or County taxes, including any personal property taxes and any assessments collected with taxes, for the fiscal year 2019 - 2020:

1st Installment	: $1,696.77 Paid
2nd Installment	: $1,696.77 Open
Parcel No.	: 365-020-28-00
Code Area	: 001-869

Said Matter Affects: Parcel 1

C. General and Special City and/or County taxes, including any personal property taxes and any assessments collected with taxes, for the fiscal year 2019 - 2020:

1st Installment	: $2,061.71 Paid
2nd Installment	: $2,061.70 Open
Parcel No.	: 365-020-30-00
Code Area	: 001-869

Said Matter Affects: Parcel 2

D. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Chapter 3.5 (commencing with Section 75) of the revenue and taxation code of the State of California.

E. Assessments, if any, for Community Facility Districts affecting said land which may exist by virtue of assessment maps or notices filed by said districts. Said assessments are collected with the County Taxes.

Exceptions:

1. Water rights, claims or title to water in or under said land, whether or not shown by the public records.

2. Minerals of whatsoever kind, subsurface and surface substances, including but not limited to coal, lignite, oil, gas, uranium, clay, rock, sand and gravel in, on, under and that may be produced from the Land, together with all rights, privileges, and immunities relating thereto, whether or not appearing in the Public Records or listed in Schedule B. The Company makes no representation as to the present ownership of any such interests. There may be leases, grants, exceptions or reservations of interests that are not listed.

3. An easement for erect poles and string electrical transmission wires and rights incidental thereto in favor of Kern County Land Company, a corporation as set forth in a document recorded in Book 80, Page 299, of Deeds, affects the South half of said Lot 1.

4. Rights of the public in and to that portion of the herein described land lying within: Ladco Drive.

5. An easement for ingress, egress and road purposes and rights incidental thereto in favor of the public in general and County of Kern as set forth in a document recorded April 18, 1984 as Instrument No. 041470, in Book 5650, Page 1733, of Official Records, affects portion of said land.

6. An irrevocable offer to dedicate real property recorded April 18, 1984 as Instrument No. 041470, in Book 5650 and Page 1733, of Official Records, wherein a portion of said land was offered for dedication to public use for ingress, egress and road purposes, which affects portion of said land.

7. An easement for drainage and rights incidental thereto in favor of County of Kern as set forth in a document recorded May 6, 1987 as Instrument No. 056128 in Book 6001, Page 882, of Official Records, affects portion of said land.

8. An irrevocable offer to dedicate real property recorded May 6, 1987 as Instrument No. 056128, in Book 6001, Page 882, of Official Records, wherein a portion of said land was offered for dedication to public use for drainage purposes, which affects portion of said land.

9. An easement for permanent easement and rights incidental thereto in favor of North of River Sanitary District No. 1 as set forth in a document recorded April 1, 1998 as Instr. # 019840993, of Official Records, affects the South 10 feet of the North half of the Northeast quarter of Section 15.

10. An easement for construction easement and rights incidental thereto in favor of North of River Sanitary District No. 1 as set forth in a document recorded April 1, 1998 as Instr. # 019840993, of Official Records, affects the North 20 feet of the South 30 feet of the Northeast half of the Northeast quarter of said Section 15.

11. An easement for (as therein provided) and rights incidental thereto as set forth in a document recorded September 11, 2007 as Instr. # 0207187416, of Official Records, affects said land.

    Sub terms and provisions as contained in the above mentioned easement.

12. The matters contained in an instrument entitled "Grant of Easement" dated December 30, 2014, by and between Thomas Carosella and Lisa M. Carosella, as Trustees of the Carosella Trust, dated October 29, 2014, James C. Lundy and Tianna T. Lundy, as Trustees of the Lundy Family Trust dated September 18, 2008 and Wal-Mart Stores, Inc., a Delaware Corporation upon the terms therein provided recorded December 30, 2014 as Instrument No. 000214162594 of Official Records.

13. Any invalidity or defect in the title of the vestees in the event that the trust referred to in the vesting portion of Schedule A is invalid or fails to grant sufficient powers to the trustee(s) or in the event there is a lack of compliance with the terms and provisions of the trust instrument.

14. Any lien, or claim of lien, for services, labor or materials arising by reason of any work of improvement now in progress or recently completed, as disclosed by an inspection.

    typist/ zd

(End of Exceptions)

NOTES AND REQUIREMENTS

For transactions where Stewart Title of California, Inc. is not the settlement/closing agent, a signed and dated copy of the attached "Acknowledgment of Receipt, Understanding and Approval of Affiliated Business Arrangement Disclosure Statement and STG Privacy Notice for Stewart Title Companies", will be required prior to recording.

A. There are no conveyances affecting said land, recorded with the County Recorder within 24 months of the date of this report.

B. If title is to be insured in the trustee(s) of a trust or their act is to be insured, we will require a full copy of the trust agreement and any amendments thereto. In certain situations the Company may accept a Trust Certificate, pursuant to Section 18100.5 of the California Probate Code in lieu of the trust agreement. The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

   Said Matter Affects: The Carosella Trust, dated October 29, 2014
   The Lundy Family Trust dated September 18, 2008

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title of California, Inc. via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title of California, Inc.. Stewart Title of California, Inc. may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title of California, Inc. shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title of California, Inc.. Such benefits shall be deemed additional compensation to Stewart Title of California, Inc. for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.

EXHIBIT "A"

LEGAL DESCRIPTION

Order No.: 01180-289485
Escrow No.: 01180-289485

The land referred to herein is situated in the State of California, County of Kern, City of Bakersfield and described as follows:

Parcel 1:

All that portion of Lot 1 as shown on the sales map of lands of the Kern County Land Company filed April 8, 1892 in the Office of the Kern County Recorder, also being a portion of the Northeast quarter of Section 15, Township 29 South, Range 27 East, Mount Diablo Base and Meridian, County of Kern, State of California, as shown as Parcel B of a Certificate of Compliance recorded July 17, 1990 in Book 6407, Page 459, described as follows:

Commencing at the Northeast corner of said Section 15, thence North 89° 10' 32" West along the North line of said Section 15 and the center line of Olive Drive, 663.86 feet to a point on the Northerly prolongation of the Westerly line of said Lot 1; thence South 00° 13' 29" West along said West line, 292.17 feet to the true point of beginning; thence departing from said West line, South 89° 10' 32" East parallel with the North line of said Section 15, 477.59 feet to a point on the Westerly right of way line of Landco Drive as shown on the map or proposed County Road 3199 (6-1A 3199 MI) on file in the Office of the Kern County Surveyor, said point also being the beginning of a non-tangent curve concave Easterly having a radius of 1855.00 feet from which point a radial bears North 84° 19' 54" East; thence Northerly along said Westerly line and said curve through a central angle of 5° 15' 19" an arc length of 170.14 feet to a point of cusp and to a point on the South right of way line of the access road shown on State Highway Map filed in Book 2, Page 14, in the Office of the Kern County Surveyor, said point also being the beginning of a non-tangent curve concave Northeasterly having a radius of 110.00 feet from which point a radial bears North 69° 48' 25" East; thence along said South right of way line of the access road, Southeasterly along said curve through a central angle of 74° 23' 19" an arc distance of 142.82 feet to the beginning of a non-tangent curve Easterly having a radius of 1745.00 feet from which point a radial lines bears North 87° 12' 23" East, said curve being in the East right of way line of said Landco Drive; thence Southerly along said Easterly right of way line and said curve through a central angle of 7° 51' 44", an arc distance of 239.45 feet; thence South 10° 39' 21" East, continuing along said Easterly right of way line 287.12 feet to a point on the East line of said Section 15 and the East line of said Lot 1; thence departing from said East right of way line South 00° 15' 53" West, along said East lines, 614.00 feet to the Southeast corner of said Lot 1; thence departing from said East lines, North 89° 10' 28" West along the South line of said Lot 1, 662.94 feet to the Southwest corner of said Lot 1; thence departing from said South line, North 00° 13' 29" East, along the West line of said Lot 1, 1033.54 feet to the true point of beginning.

Also excepting therefrom that portion as deeded to the State of California in deed dated June 11, 1990 and recorded December 4, 1990 in Book 6460, Page 2213, of Official Records, Document No. 075229.

Also excepting therefrom that portion as deeded to the City of Bakersfield, a Municipal corporation by that certain grant deed recorded December 28, 2004 as Instr. # 0204320775, of Official Records and re-recorded January 30, 2014 as Instr. # 0214010987, of Official Records.

Except therefrom all oil, gas and hydrocarbon substances and minerals as reserved in deeds recorded June 11, 2003 as Instr. # 0203114063 and March 7, 2006 as Instr. # 0206054328, of Official Records.

Parcel 2:

That portion of Lot 1 in the N.E. 1/4 of Section 15, T. 29 S., R. 27 E., M.D.M., as shown on the Sales Map of Lands of the Kern County Land Company filed April 8, 1892 in the Office of the Kern County Recorder described as:

A strip of land 300 feet in width lying southerly of and contiguous to the following described line:

Commencing for reference at the northeast corner of said section;

Thence (1), along the north line of said Section, N. 89° 10'32" W., 663.86 feet to the northerly prolongation of the west line of said Lot 1;

Thence (2), along said northerly prolongation and said west line, S. 00°13'29" W., 292.17 feet to the TRUE POINT OF BEGINNING of the line to be described;

Thence (3), parallel with the north line of said section, S. 89°10'32" E., 533 feet, more or less, to the centerline of Landco Drive as shown on the map of Proposed County Road 3199 (6-IA 3199 MI) on file in the Office of the Kern County Surveyor.

The sidelines of said strip of land shall be prolonged or shortened so as to begin in said west line and end in said centerline.

EXCEPTING THEREFROM all oil, oil rights, minerals, mineral rights, natural gas, natural gas rights, and other hydrocarbons by whatsoever name known that may be within or under the parcel of land hereinabove described, together with the perpetual right of drilling, mining, exploring and operating therefor and removing the same from said land or any other land, including the right to whipstock or directionally drill and mine from lands other than those hereinabove described oil or gas wells, tunnels and shafts into, through or across the subsurface of the land hereinabove described, and to bottom such whipstock or directionally drilled wells, tunnels and shafts under and beneath or beyond the exterior limits thereof, and to redrill, retunnel, equip, maintain, repair,, deepen, and operate any such wells or mines, without, however the right to drill, mine, explore and operate through the surface or the upper 100 feet of the subsurface of the land hereinabove described or otherwise in such manner as to endanger the safety of any highway that may be constructed on said lands.

CALIFORNIA LAND TITLE ASSOCIATION

STANDARD COVERAGE POLICY – 1990
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.

4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.

5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.

6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.

3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.

4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division;
   f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.

4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.

5. Failure to pay value for Your Title.

6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.

7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy.

8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.

9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
* For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1% of Policy Amount or $2,500.00 (whichever is less)	$5,000.00

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.

5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.

6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

PART I

This policy does not insure against loss or damage (and the company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   (b) Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

3. Easements, liens or encumbrances, or claims thereof, which are not shown by the Public Records.

4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

5. (a) unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

6. Any lien or right to a lien for services, labor or material not shown by the public records.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.

5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.

3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.

4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.

5. (a) unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (04-02-15)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys fees or expenses which arise by reason of:

1. a. Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions or location of any improvement now or hereafter erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.

3. Defects, liens, encumbrances, adverse claims or other matters:

   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting In no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.

5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.

6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.

8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.

9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is

   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

10 Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.

11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

WARNING: THIS DOCUMENT MUST BE COMPLETED IN ITS ENTIRETY (1 THROUGH 9, BELOW MUST BE FILLED IN) FOR IT TO BE ACCEPTED BY . IF THIS IS NOT COMPLETED WILL REQUIRE A COMPLETE COPY OF THE TRUST, WITH A SIGNED AND ACKNOWLEDGED AFFIDAVIT.

TRUSTEE CERTIFICATE

(California Probate Code Section 18100.5)

I/(We) * _____
(Name of Trustee(s))

OWNER'S AFFIDAVIT

File/Order Number: 01180-289485
Address/Location: Apn 365-020-30, Bakersfield, CA
Apn 365-020-28, CA
APN: 365-020-30 and 365-020-28

The undersigned, ("Affiant") makes the following statement/representations to benefit Stewart Title of California, Inc. and title insurer Stewart Title Guaranty Company (collectively "Stewart Title"):

1. Affiant owns and holds title to property as described in Schedule A of the above mentioned Preliminary Report, Proforma or Title Commitment issued in connection with the above referenced Title Order Number (the “Property”).

2. The Affiant’s possession of the property has been peaceful and undisturbed and title thereto has never been disputed, questioned or rejected, nor title insurance refused. Other than the Affiant, there are no parties entitled to possession of the property other than the following: **(If none, please state "none")**
   _____

3. There are no leases, licenses, options, rights of first refusal, or contracts to sell, affecting the Property, except the following: **(If none, please state "none")**
   _____

4. No proceedings in bankruptcy or receivership have been instituted by or against the Affiant.

5. All assessments by a management, common area, building maintenance or homeowner association, if any, are paid current and outstanding assessments are not yet due and payable.

6. There are no pending repairs/improvements for the Property and no work has been done, services rendered or materials furnished within the last year, except the following: **(If none, please state "none")**
   _____

7. Affiant is not aware of the existence of any of the following:
   a. Improvements encroaching into any easements or boundary lines of the Property.
   b. Adjoining property improvements encroaching onto the Property.
   c. Liens against the Property and/or judgments or tax liens against Affiant, except those described in the above Preliminary Report, Proforma or Title Commitment issued in connection with the above referenced Title Order Number.
   d. Outstanding claims or persons entitled to claims for mechanics’ or materialman liens against the Property.
   e. Pending repairs/improvements to the adjacent street(s).
   f. Pending litigation of any sort, involving the Property.
   g. Recent improvements completed or being made to any common area located within the subdivision in which the Property is located.
   h. Violations of any covenants, conditions and/or restrictions recorded and imposed on the Property.

8. There are no financial obligations secured by trust deeds, mortgages, financing statements, security agreements or otherwise, against the Property, except as set forth in the Preliminary Report, Proforma and/or Title Commitment and the following obligations and amounts: **(If none, please state "none")**

Creditor	Approximate Balance

9. There are no oil, gas, geothermal and/or mineral leases, licenses, options, rights of first refusal, and/or contracts to sell, affecting the mineral rights associated with the Property, or other parties currently in possession, of the of said interests on the Property, except the following: **(If none, please state "none")**
   _____

10. There has been no harvesting or production of any oil, gas, geothermal or other minerals from or on the Property, with the exception of the following: **(If none, please state "none")**
   _____

11. There are no unpaid utility type bills including but not limited to bills for water, sewer, hazardous waste, recycling, storm drain and/or rubbish and there are no liens related to such utilities from or on the Property, with the exception of the following: **(If none, please state "none")**
   _____

This Owner's Affidavit and Indemnity is made for the purpose of inducing Stewart Title to provide certain insurance coverage to a purchaser and/or lender, and the representations contained herein are material to such insurance coverage. The undersigned hereby indemnifies and holds Stewart Title harmless from any loss or damage, liability, costs, expenses and attorneys' fees which may be incurred or sustained under policies of title insurance to the extent any representations contained herein are inaccurate, incorrect or misrepresented.

By signing below (in the presence of a Notary Public), I/we affirm that I/we have read and responded to all statements above before signing and any blanks are to be understood as "None" if not specifically stated.

STG Privacy Notice
Stewart Title Companies

WHAT DO THE STEWART TITLE COMPANIES DO WITH YOUR PERSONAL INFORMATION?

Federal and applicable state law and regulations give consumers the right to limit some but not all sharing. Federal and applicable state law regulations also require us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand how we use your personal information. This privacy notice is distributed on behalf of the Stewart Title Guaranty Company and its title affiliates (the Stewart Title Companies), pursuant to Title V of the Gramm-Leach-Bliley Act (GLBA).

The types of personal information we collect and share depend on the product or service that you have sought through us. This information can include social security numbers and driver's license number.

All financial companies, such as the Stewart Title Companies, need to share customers' personal information to run their everyday business—to process transactions and maintain customer accounts. In the section below, we list the reasons that we can share customers' personal information; the reasons that we choose to share; and whether you can limit this sharing.

Reasons we can share your personal information.	Do we share	Can you limit this sharing?
For our everyday business purposes— to process your transactions and maintain your account. This may include running the business and managing customer accounts, such as processing transactions, mailing, and auditing services, and responding to court orders and legal investigations.	Yes	No
For our marketing purposes— to offer our products and services to you.	Yes	No
For joint marketing with other financial companies	No	We don't share
For our affiliates' everyday business purposes— information about your transactions and experiences. Affiliates are companies related by common ownership or control. They can be financial and non-financial companies. *Our affiliates may include companies with a Stewart name; financial companies, such as Stewart Title Company*	Yes	No
For our affiliates' everyday business purposes— information about your creditworthiness.	No	We don't share
For our affiliates to market to you — For your convenience, Stewart has developed a means for you to opt out from its affiliates marketing even though such mechanism is not legally required.	Yes	Yes, send your first and last name, the email address used in your transaction, your Stewart file number and the Stewart office location that is handling your transaction by email to optout@stewart.com or fax to 1-800-335-9591.
For non-affiliates to market to you. Non-affiliates are companies not related by common ownership or control. They can be financial and non-financial companies.	No	We don't share

We may disclose your personal information to our affiliates or to non-affiliates as permitted by law. If you request a transaction with a non-affiliate, such as a third party insurance company, we will disclose your personal information to that non-affiliate. [We do not control their subsequent use of information, and suggest you refer to their privacy notices.]

SHARING PRACTICES

How often do the Stewart Title Companies notify me about their practices?	We must notify you about our sharing practices when you request a transaction.
How do the Stewart Title Companies protect my personal information?	To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer, file, and building safeguards.
How do the Stewart Title Companies collect my personal information?	We collect your personal information, for example, when you ▪ request insurance-related services ▪ provide such information to us We also collect your personal information from others, such as the real estate agent or lender involved in your transaction, credit reporting agencies, affiliates or other companies.
What sharing can I limit?	Although federal and state law give you the right to limit sharing (e.g., opt out) in certain instances, we do not share your personal information in those instances.

Contact us: If you have any questions about this privacy notice, please contact us at: **Stewart Title Guaranty Company, 1980 Post Oak Blvd., Privacy Officer, Houston, Texas 77056**

Order No. 01180-289485

AVAILABLE DISCOUNTS DISCLOSURE STATEMENT

This is to give you notice that Stewart Title of California, Inc. (“Stewart Title”) is pleased to inform you that upon proper qualification, there are premium discounts available upon the purchase of title insurance covering improved property with a one to four family residential dwelling.

Such discounts apply to and include:

Property located within an area proclaimed a state or federal disaster area;

Property purchased from a foreclosing beneficiary or successful bidder at a foreclosure sale;

Property being refinanced.

Please talk with your escrow or title officer to determine your qualification for any of these discounts.

Date: 1/21/20_____ Phone:619-787-6270_____

Introduction

"In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001 (the 'Brownfields Amendments'), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that 'all appropriate inquiry' is not completed"- American Society for Testing and Materials (ASTM) E1527-13 Appendix X3: User Questionnaire

1. Are you aware of any environmental cleanup liens against the subject site that are filed or recorded under federal, tribal, state, or local law?
None_____
_____
_____
_____
_____

2. Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
None_____
_____
_____
_____
_____

3. As the user of the Phase I Environmental Site Assessment (ESA), do you have any specialized knowledge or experience related to the subject site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject site or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
No_____
_____
_____
_____
_____

4. Does the purchase price being paid for the subject site reasonably reflect the fair market value of the subject site? Yes

A. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject site?
_____
_____
_____
_____

5. Are you aware of commonly known or reasonably ascertainable information about the subject site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

A. Do you know the past uses of the subject site? If so, briefly explain.
No

B. Do you know of specific chemicals that are present or once were present at the subject site? If so, briefly explain.
No

C. Do you know of spills or other chemical releases that have taken place at the subject site? If so, briefly explain.
No

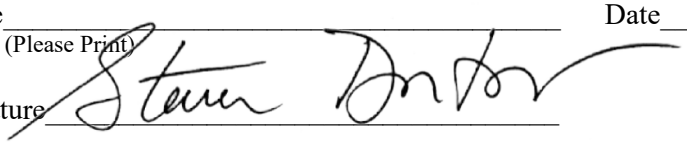

D. Do you know of any environmental cleanups that have taken place at the subject site? If so, briefly explain.
No

6. As the user of the Phase I ESA, based on your knowledge and experience related to the subject site, are there any obvious indicators that point to the presence or likely presence of contamination at the subject site?
None

7. What is the reason for preparation of this Phase I ESA? (Property purchase/sale; bank loan; proposed development; etc.)
Development

I, the user of this Phase I ESA (or authorized representative of the User), do hereby attest that I have carefully considered the questions herein and have presented answers to the best of my knowledge and ability based upon the Responsibilities of the User as required within ASTM E1527-13 guidance.

Name: Tom Carosella Company:
Date: 1/20/2020 Phone: 661 203-2692

Site Address: Knudsen Dr., south of Olive Dr., see attached Lot B 7.78 acres

How are you associated with the subject site? co-owner

How long have you been associated with the subject site? 16 years

Do you have any commonly known, reasonably ascertainable, or specialized knowledge or experience related to the subject site or nearby properties? yes

What is the subject site currently used for? open ground

Are there structures on the subject site? no How Many?

Do you know of historical uses of the subject site? no

Do you know of any previous structures on the subject site? no

Does any maintenance, repair, or manufacturing activities take place at the subject site (currently or historically)?
not to my knowledge.

Do you know of any chemicals or hazardous materials being used, stored or discharged on the subject site? (list any chemicals / hazardous materials)
no

Are agricultural chemicals (pesticides/herbicides) stored, applied, or mixed/formulated on the subject site? (please provide approximate storage/mixing locations)
no

Are you aware of the historical use of persistent pesticides/herbicides (such as DDT) at the subject site?
no

Is hazardous waste generated at the subject site? Hauled off-site? By whom? no

Any hazardous waste treatment or disposal at the subject site?

Do you have any current or past knowledge of the presence or underground or aboveground storage tanks being located on the subject site? (if yes, please provide info including no., size, contents, and locations)

NO

Do you have any current or past knowledge of subsurface automotive repair related features (i.e. sumps, oil/water clarifiers, automotive hydraulic hoists etc)?

NO

Are you aware of any environmental cleanups or hazardous materials releases/spills at the subject site?

NO

Do you know of any Institutional Controls (Env. Cleanup Liens) or Engineering Controls (slurry walls or vapor barriers) filed or recorded against the subject site? NO

Municipal Utility Providers at the subject site:

Potable Water: Yes No Provided by whom?

Sewer: Yes No Provided by whom?

Electricity: Yes No Provided by whom?

Natural Gas: Yes No Provided by whom?

Solid Waste (garbage): Yes No Provided by whom?

Has fuel oil been utilized at the subject site for heating purposes? NO

Are there currently or were there historically any septic systems? Yes No
If yes, how many? Not to my knowledge

Are there currently or were there historically any water wells located on the subject site? Yes No
If yes, how many? Not to my knowledge

Are there currently or were there historically any dry wells located on the subject site? Yes (No)

Are there currently or were there historically any monitoring wells located on the subject site? Yes (No)

Do you know of any buried materials such as garbage dumps or burn pits on the subject site? NO

Are there any drainage or disposal ponds located on the subject site? * a street runoff sump.

* The City of Bakersfield has a temporary easement for

Are you aware of, or have you been notified of, any contamination issues to soil or groundwater either at the subject site or in the vicinity of the subject site? NO

What is the purpose of the Phase I? for potential buyer of this property

If purchase price has been established, does it reasonably reflect fair market value? yes

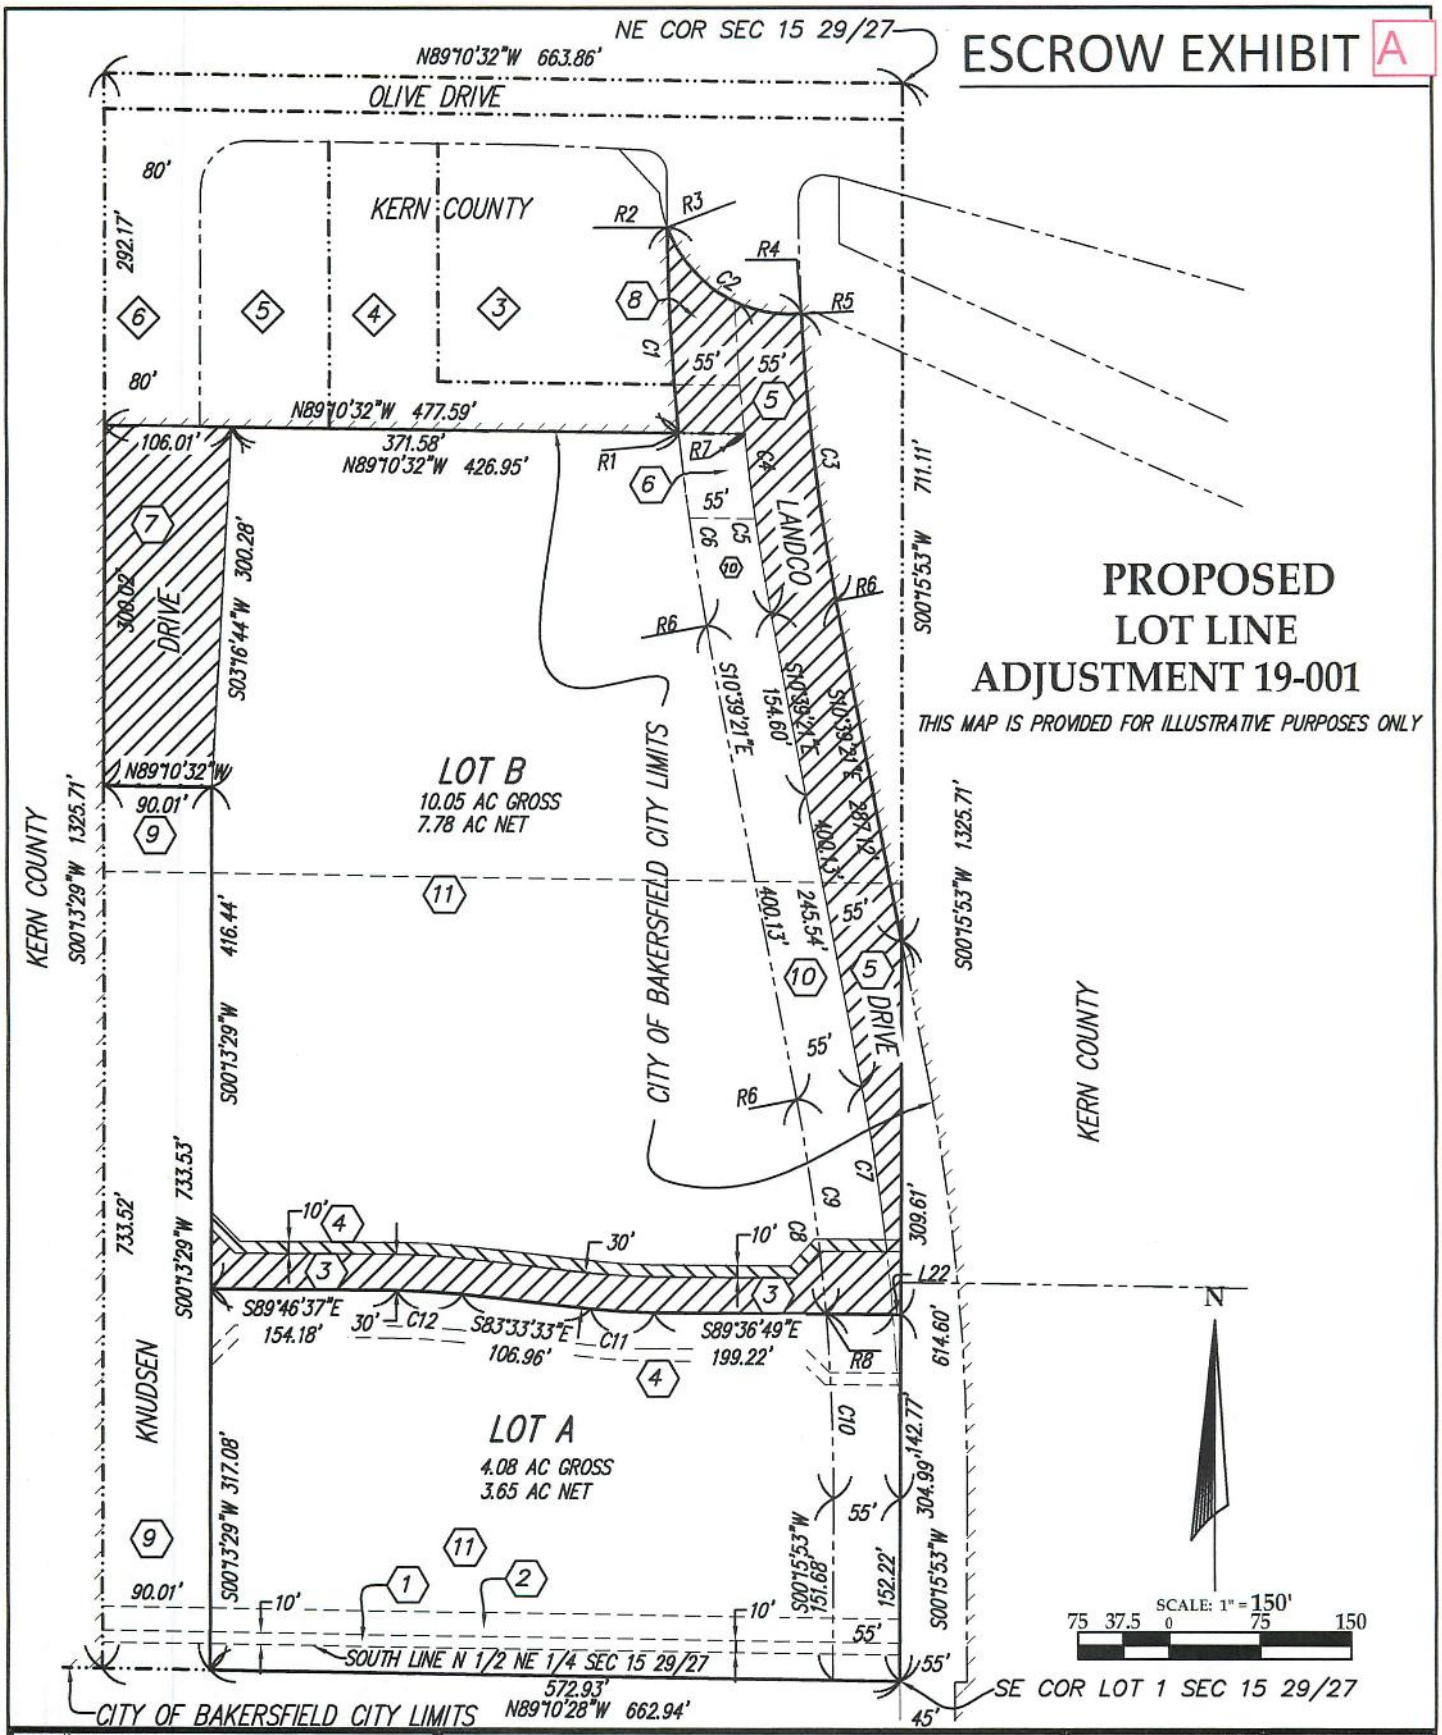

Are there any proposed changes in the uses of the subject site? yes

Knowledge of Previous Owner(s) and Phone Number? Gene Borel & Caltrans

RE: Limited Soil Assessment for Organochlorine Pesticides
Knudsen Drive Property (6 acres)
Bakersfield, CA 93308

Dear Mr. Doctor;
Pursuant to your request, Krazan & Associates, Inc. (Krazan) conducted a Limited Soil Assessment at the above-referenced property. The assessment included collection and analysis of shallow soil samples, from the surface to 6" below ground surface, for Organochlorine Pesticides at the above-reference approximately 6-acre subject site.

The following summarizes the field investigation and methodology:

- For the purpose of this investigation, the 6-acre subject site is divided into six (6) one-acre portions (refer to Site Map Figure 1). These one-acre portions are denoted as Area 1 thru Area 6. On August 3, 20108, Krazan's professional geologist, William Cooper, conducted the soil sampling at the subject site. Four samples were collected from each area in a four-point grid-like pattern (four shallow soil samples were collected from each one-acre portion area).
- Samples were collected using a slide-hammer-sampling tool, equipped with a 1½" x 6" clean stainless-steel metal sleeve. A total of 24 soil samples S-1 thru S-24 were collected from the subject site.
- Equal volumes of soil (approximately 100 grams) from each of the four-point samples from each one-acre area portion were combined as a composite sample for analysis of OCPs. The six composite samples representing the six one-acre area portions were denoted and labeled as Composite Area 1 (C-A1) thru Composite Area 6 (C-A6).
- The six composite samples, C-A1, C-A2, C-A3, C-A4, C-A5 and C-A6 were placed in clean laboratory jars. Samples were sealed and labeled with the name and number of the project, sampler's initials, sample number, and the date and time at which the samples were obtained. The six composite samples were placed within a thermal chests chilled to 4 degrees Celsius.
- The composite samples were transported within the chilled thermal chests under chain-of-custody form to Sierra Analytical Labs, a state-certified laboratory, for rush analyses of Organochlorine Pesticides by U.S. EPA Method 8081A.
- This Letter Report of Findings summarizes field work and presents the laboratory analysis and site maps.

The following summarizes the laboratory results of the analyses of the six composite soil samples for Organochlorine Pesticides in shallow soil:

The results for the Composite shallow soil samples (C-A1 thru C-A6) are summarized in Table I below and the complete laboratory report is included in Attachment A. In summary, only trace concentrations of the organochlorine pesticide analyte 4,4'-DDE were detected in the six composite soil samples. The six composite soil samples were reported with 4,4'-DDE concentrations in the range from 0.10 mg/kg to 0.08 mg/kg. These concentrations are well below regulatory screening levels, including the U.S. EPA Regional Screening Level (RSL) for Residential Use at 1.4 milligrams per kilogram (mg/kg) for 4,4'-DDE; and well below the industrial/commercial RSL for 4,4'-DDE at 5.1 mg/kg. No other organochlorine pesticide analytes were detected at concentrations above the laboratory reporting limits. Laboratory reporting limits met environmental screening levels established by the U.S. EPA for all of the Organochlorine Pesticide Analytes.

TABLE I
LIMITED SOIL ASSESSMENT
Knudsen Drive Property

Sample ID#	Sample Location	Sample Date	Organochlorine Pesticides (OCPs) Reported in milligram per kilogram (mg/kg)			All Other OCPs mg/kg
			DDE	DDT	DDD	
U.S. EPA Regional Screening Levels for Residential Soil (mg/kg)			(1.4)	(1.7)	(2.0)	>RL
Laboratory Reporting Limit (RL)			0.002	0.003	0.003	0.02 to 0.04
C-1A	Northwest	8/3/18	**0.011**	ND	ND	ND
C-2A	Northeast	8/3/18	**0.017**	ND	ND	ND
C-3A	Southern-Central	8/3/18	**0.10**	ND	ND	ND
C-4A	Northern-Central	8/3/18	**0.050**	ND	ND	ND
C-5A	Southeast	8/3/18	**0.080**	ND	ND	ND
C-6A	Northeast	8/3/18	**0.022**	ND	ND	ND

ND = Not detected at or above Laboratory reporting limits.
DDE = 4,4' – DDE; DDT = 4,4'-DDT; DDD = 4,4'-DDD. ** = Varies-See Laboratory Reports.

EPA Method 8081A List of Organochlorine Pesticides:
Aldrin, HCH-alpha, HCH-beta, HCH-delta, HCH-gamma (Lindane), Chlordane, 4,4 - DDD, 4,4 - DDE, 4,4 - DDT, Dieldrin, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin aldehyde, Endrin ketone, Heptachlor, Heptachlor epoxide, Methoxychlor, Toxaphene.

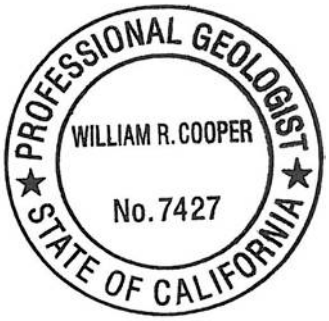

Conclusions and Recommendations

Based on the lack of significant concentrations of Organochlorine Pesticides (above RSLs) in the six composite shallow soil samples that represent the six-acre subject site, Krazan concludes that organochlorine pesticides are not present at concentrations that pose a threat to human health or the environment and recommends no further investigation of the subject site in association with these constituents of concern.

We appreciate the opportunity to be of service to you. If you have any questions or if I can be of further assistance please feel free to contact me at 661-837-9200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

William R. Cooper, P.G. No. 7427
Environmental Project Manager

RE:NA

Work Order No.: 1808038

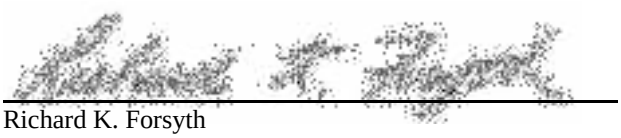

Attached are the results of the analyses for samples received by the laboratory on 08/06/18 10:30.

The samples were received by Sierra Analytical Labs, Inc. with a chain of custody record attached or completed at the submittal of the samples.

The analyses were performed according to the prescribed method as outlined by EPA, Standard Methods, and A.S.T.M.

The remaining portions of the samples will be disposed of within 30 days from the date of this report.
If you require any additional retaining time, please advise us.

Sincerely,

Richard K. Forsyth

Laboratory Director

Sierra Analytical Labs, Inc. is certified by the California Department of Health Services (DOHS),
Environmental Laboratory Accredidation Program (ELAP) No. 2320.

EXECUTIVE SUMMARY

1.0 Introduction

ENCON Technologies Inc., Environmental & Engineering Services (ENCON), was retained by C & SD Construction, Inc., Project Client and Potential Buyer, to perform a Phase I Environmental Site Assessment (Phase I ESA) in conformance with the scope and limitations of ASTM Practice E1527-13 and the USEPA Standards and Practices for "All Appropriate Inquires" (AAI, 40 CFR Part 312) for the vacant industrial, M2 zoned land, generally described as APN 365-020-030 and a portion of APN: 365-020-28, located on Knudsen Drive, south of Olive Drive in Bakersfield, California. The site vicinity map is shown in Figure 1.

This Phase I ESA Report presents the review of the historical site and government records and data, historical hazardous material uses by these properties, and site inspections conducted by ENCON environmental staff. This report describes the research and evaluation methods used in the evaluation of the environmental conditions of the subject property and the findings, conclusions and recommendations developed by ENCON are presented in this Phase I ESA Report for planning purposes. The Phase I environmental site assessment site inspections, record review, and site evaluation were conducted by ENCON staff, under the direction of Mr. G. Joseph Scatoloni, Senior Environmental Professional and Registered Environmental Assessor II, #20150.

The purpose of the Phase I ESA is to assist the Property Owner/Buyer and/or lender to qualify for the innocent landowner or innocent purchaser defense under the federal Superfund statue and it is also intended to provide reliable, early information of the environmental conditions of the subject property and the possible need for additional, more extensive investigation or mitigation, to enable the property to be used for the intended purpose of the potential buyer and minimize any contingent environmental liabilities in the future. Specifically, the Phase I ESA is designed to recognize and catalog those concerns or problems that the environmental and safety professional observe and/or suspect which deserve further investigation or mitigation. Therefore, a major purpose of the Phase I ESA is to evaluate and establish the elements and need for more intrusive investigation, specifically a Phase II ESA Investigation Sampling and Analysis Plan.

The conclusions and recommendations provided in this Phase I ESA Report reflect the professional judgments made by the ENCON Phase I Site Environmental Assessment Team based on site observations and a review of available agency and other historical records, including information provided by the property owner or representative and others. Precise information about actual site contamination can only be obtained through a separate and subsequent level of intrusive investigations, employed in a Phase II Environmental Site Assessment that would involve sampling of building surfaces and/or subsurface soils and groundwater to determine the presence, or absence, of contaminated site conditions.

2.0 Subject Property Description and History

The Subject Site is approximately 6.92 acres of vacant land, generally described as APN 365-020-030 and a portion of APN: 365-020-28. Refer to Exhibit A for Legal Site Description. The Subject Site is located in a mixed commercial and industrial area of Bakersfield, California, located on Knudsen Drive, south of Olive Drive and west of Highway 99. The Subject Site appeared to be in good condition with no indication of industrial or agricultural use, and is currently vacant land. Refer to Attachment A for Site Walk Photos. The subject property site map is shown in Figure 2.

Based on a review of the aerial photographs provided by Environmental Data Resources, Inc. (EDR), the Site has been vacant land since about 1983. Prior to that time, from about 1937 through 1973, it appears that the Site was rough graded for possibly farming/agricultural purposes, but no other indications that the Subject Site was used for agricultural purposes were identified in this Phase I report. Refer to Exhibit C for aerial photographs. Agricultural uses typically involve the use and storage of hazardous materials, such as herbicides, pesticides, and insecticides, in order to grow crops and eliminate damaging insects at the Property. The possible use of these agricultural chemical are considered a potential Historical Recognized Environmental Concern (HREC), as well as a Business Environmental Risk (BER), due to potential contamination from organochlorine pesticide residues, such as DDT. The pesticide DDT was commonly used in agricultural areas for insect control through 1972, at which time it was banned in the United States due to its harmful nature to the environment.

3.0 Neighboring Property Summary and Findings

As part of this Phase I ESA, ENCON reviewed the EDR Radius Map Report for off-site properties within 1/8 of a mile of the Subject Site that may present a Vapor Encroachment Concern (VEC) to the Site. Based on the list of neighboring sites, there are four (4) locations, within 200 feet of the Subject Site, which warranted further review. Three (3) of the sites are active UST sites, located as follows: two (2) sites are located adjacent to the Subject Site to the north (7-Eleven Store located at 5203 Olive Drive and Chevron fueling station located at 5201 Olive Drive), and the third is located across Knudsen Drive, northwest of the Subject Site (Auto Spa Express Wash, located at 5725 Knudsen Drive). Upon further review of these sites, there are no reports of notices of violation (NOV) for these locations, and no active / ongoing remediation is reported by the State Regional Water Quality Control Board (SRWQCB).

The forth site, a former Exxon service station, located at 5213 Olive Drive and adjacent to the Subject Site to the north, is listed as a closed LUST site by EDR and the SRWQCB. EDR describes LUST sites as locations classified as leaking underground storage tanks, which have, or have the potential to impact the water quality in California, and are regulated by the SRWQCB. Upon further review of this site, the LUST case was closed in October 1996 by the Regional Board, who confirmed that the required site investigations and remedial actions for the USTs had been completed and the site was granted no further action as related to the UST release. No other information was available from the SRWQCB for this location. Refer to Exhibit D for SRWQCB reports and Case Closure Summary.

Based on ENCON's review of these off-site adjacent locations, no notices of violation (NOV) or on-going active remediation are reported by the local agencies, or through the State Regional Water Quality Control Board for these four (4) locations. Therefore, it is ENCON's professional opinion that these off-site locations do not pose an environmental off-site encroachment concern for the Subject Site, and no further investigations are necessary at this time in regards to these off-site locations.

4.0 Conclusions and Recommendations

ENCON has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM E1527-13, US EPA AAI for the Subject Site vacant land property generally described as APN 365-020-030 and a portion of APN: 365-020-28, located on Knudsen Drive in Bakersfield, California. ENCON completed the Phase I ESA review of local and regional government environmental records, historical tenant survey, site reconnaissance by an environmental professional, and an evaluation of the evidence collected during the site assessment. This Phase I ESA Report reflects the professional judgments made by the ENCON Phase I Environmental Site Assessment Team based on site observations and a review of available agency and other historical records, including information provided by the property or representative, and others.

In conducting the Phase I ESA, ENCON completed the review of local and regional government environmental records, historical tenant survey, site reconnaissance by an environmental professional, and an evaluation of the evidence collected during the site assessment. The Phase I ESA report confirmed that the Subject Site has been vacant land since about 1983 through the present time, 2017 and no evidence recognized environmental concerns (RECs) associated with any uses or dumping of hazardous wastes at the Subject Property. Prior to that time, however, from about 1937 through 1973, it appears that the Site was graded for possible farming/agricultural purposes although there was no evidence found in the EDR records of subsequent actual agricultural uses of the Subject Site in the past.

Agricultural uses typically involve the use and storage of hazardous materials, such as herbicides, pesticides, and insecticides, in order to maintain the crops and eliminate damaging insects at the Property. The possible use of these agricultural chemical are considered a potential Historical Recognized Environmental Concern (HREC), as well as a Business Environmental Risk (BER), due to potential contamination from organochlorine pesticide residues, such as DDT. The pesticide DDT was commonly used in agricultural areas for insect control through 1972, at which time it was banned in the United States due to its harmful nature to the environment.

Therefore, although these potential historical agricultural chemical uses have not been confirmed at the Site, they do present a potential low environmental risk to the surficial soil for the current industrial vacant land use or redevelopment. In addition, if the Site is redeveloped in the future for mixed –use, or residential and / or other high sensitivity uses, such as health or child care services, further herbicides, pesticides, and insecticides shallow soil assessments is warranted to confirm the presence, or absence of potential pesticides and herbicide chemical residues in soils at the Site. In addition, a Soil Management Plan should be developed for soil grading and off-site soil disposal that includes environmental soil inspections and testing by a licensed hazardous waste contractor, as well as dust suppression, fencing and / or erosion controls during any disturbance of the soils at the Site to prevent human worker health exposure.

1.0 INTRODUCTION

1.1 Subject Property and Client

ENCON Technologies Inc., Environmental & Engineering Services (ENCON), was retained by C & SD Construction, Inc., Project Client and Potential Buyer, to perform a Phase I Environmental Site Assessment (Phase I ESA) in conformance with the scope and limitations of ASTM Practice E1527-13 and the USEPA Standards and Practices for "All Appropriate Inquires" (AAI, 40 CFR Part 312) for the vacant industrial zoned land located on Knudsen Drive, south of Olive Drive. The site vicinity map is shown in Figure 1. The Phase I environmental site assessment site inspections, record review, and site evaluation were conducted by ENCON staff, under the direction of Mr. G. Joseph Scatoloni, Senior Environmental Professional and Registered Environmental Professional, #20150.

The Subject Site is approximately 6.92 acres of vacant land, generally described as APN 365-020-030 and a portion of APN: 365-020-28. Refer to Exhibit A for Legal Site Description. The Subject Site is located in a mixed commercial and industrial area of Bakersfield, California, located on Knudsen Drive, south of Olive Drive and west of Highway 99. The Subject Site appeared to be in good condition with no indication of industrial or agricultural use, and is currently vacant land. Refer to Attachment A for Site Walk Photos. The subject property site map is shown in Figure 2.

Based on a review of the aerial photographs provided by Environmental Data Resources, Inc. (EDR), the Site has been vacant land since about 1983. Prior to that time, from about 1937 through 1973, it appears that the Site was rough graded for possibly farming/agricultural purposes, but no other indications that the Subject Site was used for agricultural purposes were identified in this Phase I report. Refer to Exhibit C for aerial photographs. Agricultural uses typically involve the use and storage of hazardous materials, such as herbicides, pesticides, and insecticides, in order to grow crops and eliminate damaging insects at the Property. The possible use of these agricultural chemical are considered a potential Historical Recognized Environmental Concern (HREC), as well as a Business Environmental Risk (BER), due to potential contamination from organochlorine pesticide residues, such as DDT. The pesticide DDT was commonly used in agricultural areas for insect control through 1972, at which time it was banned in the United States due to its harmful nature to the environment.

1.2 Phase I Environmental Site Assessment Methods

The Client has requested this Phase I Environmental Site Assessment for real estate transaction purposes. The purpose of the Phase I ESA report is to identify all known and suspected Recognized Environmental Conditions (RECs) in connection with subject property. A REC is defined as the presence, or likely presence, of any hazardous or California regulated substances to include petroleum products in, on, or present at the subject property due to past or present releases into the structures on the property or into the ground, groundwater, or surface water associated with the property under conditions indicative of a past or current unauthorized release to the environment or pose a material threat of a future release to the environment. Hazardous material releases that do not present a material risk to the public or the environment and generally would not be subject to regulatory enforcement or are identified as *de minmis conditions* and not classified as a REC, which requires intrusive further investigation.

The E-1527-13 ASTM Standard has developed various categories of Recognized Environmental Conditions (RECs) in connection with the subject property environmental assessment to include: a) Controlled Recognized Environmental Conditions (CRECs) and b) Historical Recognized Environmental Conditions (HRECs) as well as c) Vapor Intrusion Conditions (VICs) and Vapor Encroachment Conditions (VECs) (ASTM E-2600-08).

a) Controlled Recognized Environmental Conditions (CRECs) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority which may have allowed hazardous substances to remain in place subject to the implementation of required institutional or engineering controls or restricted use (NFA with conditions, low-threat site closure, or risk based closures)

b) Historical Recognized Environmental Conditions (HRECs) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority without subjecting the property to any controls or limitations or restrictions. (NFA with no conditions, change in regulatory criteria or sampling methods or analysis)

c) Vapor Intrusion Conditions (VICs) and/or Vapor Encroachment Conditions (VECs) is a REC resulting from the presence or likely presence of any chemicals of concern (COCs) in the indoor air environment of an existing or planned building stricture on a property caused by the release of volatile organic compound (VOCs) vapors from contaminated soil or groundwater either on the property (VICs) or within close proximity to the property (VECs), at concentrations that present or may present an unacceptable health risk to the occupants or tenants

1.3 Phase I Environmental Site Assessment Purpose

Under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, or "Superfund"), owners of property where hazardous substances have been released, including deposited or disposed of, are strictly liable for the costs of response and cleanup. This liability generally extends to landowners who have or received title after the release has occurred, unless the landowner can demonstrate that at the time of acquisition or leasing, he had no knowledge or reason to know of the release or disposal.

Such an "innocent landowner" or "innocent purchaser" must meet certain statutory requirements and bears the burden of proof in establishing this defense. Specifically, the landowner must demonstrate that prior to the sale or acquisition or leasing, he undertook "all appropriate inquiry into the previous ownership and uses of the property consistent with good industrial customary practice in effort to minimize liability".[1] As a result of this potential contingent liability, essentially all non-residential real estate transactions now include a Phase I Environmental Site Assessment and a Phase II Environmental Site Assessment, as needed to complete the environmental site assessment evaluation.

The American Society for Testing and Materials (ASTM) has published a standard defining recommended elements to be included in a Phase I assessment. No legal standard currently exist, however, defining a site assessment. According to the ASTM standard[2], the goal of the Phase I ESA is to identify recognized site environmental conditions which may suggest or indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws.[3]

The purpose of a Phase I ESA is to assist the owner, purchaser or lender qualify for the innocent landowner defense by providing reliable, early information on the environmental condition of the property and the possible need for additional evaluations and investigations, referred to as a Phase II. For reference purposes, Phase I involves non intrusive investigation methods which are designed to identify the most common contamination sources and conditions while the Phase II is designed to verify the presence, or absence of the contamination and characterize the nature and extent of the contamination using the Phase I findings. Phase III covers the actual site mitigation and/or remediation (cleanup) based on the information derived in the Phase II investigation.

A Phase I ESA entails non intrusive research to identify areas of potentially significant liability for the current or prospective owner or operator. The conditions identified in the Phase I which suggest possible onsite contamination are described in the Phase I ESA report and the client is notified that further investigations may be warranted to confirm the existence, or absence, of the suspected contamination. Therefore, one of the primary purposes of the Phase I ESA is to evaluate the need for more intrusive Phase II investigations.

The Phase I findings and recommendations reflect the professional judgments made by the assessment team based on observations of the site and a thorough review of available agency and other historical records. The Phase I Environmental Site Assessment conducted at this property has been performed to meet the ASTM 1527-13 standard.

1.4 Phase I Environmental Site Assessment Major Elements

Phase I ESA Record Research - A Phase I Environmental Site Assessment is comprised of five (5) primary elements: (1) review of available government records and associated databases for evidence of possible environmental contamination; (2) site reconnaissance through a site walk of the property; (3) limited interview with current owners and/or occupants of the property as well as with various appropriate local government agency representatives; (4) review of available historical tenant and aerial maps to define past uses of the site; and (5) an evaluation of the evidence obtained during the site assessment.

A review of the available records was conducted using government databases by Environmental Data Resource, Inc. (EDR) radius maps, historical tenant survey, the Regional Water Quality Control Board (RWQCB) Geotracker files, San Joaquin Valley Air Pollution Control District (APCD) files, and Department of Toxic Substances Control (DTSC) EnviroStor files.

1.5 Environmental Site Assessment Limitations and Exceptions

Consistent with customary Phase I practice and the ASTM 2013 standard, the Subject Site environmental assessment included a preliminary site walk inspection, but the potential presence of lead or contamination in the groundwater, nor was the quality of the property's drinking water evaluated in this Phase I environmental site assessment. No land survey of the property was made by ENCON or environmental liens or restriction were researched or presented in this Phase I ESA. Any statement of dimensions, capacities, quantities or distances should be considered as approximate in this assessment and the report.

ENCON assumed that there are no hidden, or latent environmental conditions or defects in or of the property, subsoil, structures, other than those noted herein. No responsibility for such conditions or for their repair is assumed by ENCON. In addition, information, estimates, and opinion furnished to ENCON and contained in this report were assumed to be provided from reliable sources believed to be true and correct. Therefore, ENCON assumes no further responsibility for the accuracy of this information since no independent investigation was conducted to substantiate this information.

A Phase I Environmental Site Assessment is not an audit. Although such a compliance audit may sometimes be useful in connection with step-out/step-in or acquisition of a commercial or industrial property, an audit involves an extensive review and scrutiny or current and past records as well as a more expanded agency review effort.

2.0 EXISITING SITE DESCRIPTION

2.1 Legal Site Descriptions

The Subject Site is approximately 6.92 acres of vacant land, generally described as APN 365-020-030 and a portion of APN: 365-020-28. Refer to Exhibit A for Legal Site Description. The Subject Site is located in a mixed commercial and industrial area of Bakersfield, California, located on Knudsen Drive, south of Olive Drive and west of Highway 99. The Subject Site appeared to be in good condition with no indication of industrial or agricultural use, and is currently vacant land. Refer to Attachment A for Site Walk Photos.

2.2 Subject Site Historical Usage

The EDR City Directory Historical Tenant Report Survey researches historical business directories to assist in evaluating the Subject Site based on based activities at the property. Based on the City Directory Report, provided in Exhibit B, EDR researched records from 1922 through 2012 for the Subject Site and no records were available, indicating that the Site located at Knudsen Drive in Bakersfield, California has been used as vacant land, with no legal address, throughout the history of the property.

Based on ENCON's review of the aerial photographs provided by EDR, the Site has been vacant land since about 1983. Prior to that time, from about 1937 through 1973, it appears that the Site was rough graded for possibly farming/agricultural purposes, but no other indications that the Subject Site was used for agricultural purposes were identified in this Phase I report. Refer to Exhibit C for aerial photographs. Agricultural uses typically involve the use and storage of hazardous materials, such as herbicides, pesticides, and insecticides, in order to grow crops and eliminate damaging insects at the Property. The possible use of these agricultural chemical are considered a potential Historical Recognized Environmental Concern (HREC), as well as a Business Environmental Risk (BER), due to potential contamination from organochlorine pesticide residues, such as DDT. The pesticide DDT was commonly used in agricultural areas for insect control through 1972, at which time it was banned in the United States due to its harmful nature to the environment.

2.3 Site Plan

A site plan of the present general layout of the subject site structures is shown in Figure 2.

3.0 ENVIRONMENTAL SETTING

The Site is located within the San Joaquin Valley (Bertoldi, Johnston, and Evenson 1991). According to the United States Geological Survey (USGS) 7.5-minute Oildale, California quadrangle, the elevation at the Site is approximately 445 feet above mean sea level. The topography at and in the vicinity of the Site is relatively flat and level, sloping gently downward to the southwest at about 20 feet per mile (USGS 2015). The ground surface at the Site is unpaved. (AECOM, 2017).

3.1 Geology

The Site lies within the southern portion of the Great Valley Geomorphic Province of California. The valley is approximately 400 miles long and averages 50 miles wide. The valley has been filled with a thick sequence of marine and non-marine sediments dating from the late Jurassic to the Holocene periods. The uppermost strata of the Great Valley represent, for the most part, the alluvial, flood, and delta plains of the Sacramento and San Joaquin Rivers and their tributaries (Miller, Green, and Davis 1971).

The valley deposits are derived from the Coast Ranges to the west and the Sierra Nevada to the east. Granitic and metamorphic rocks outcrop along the eastern and southeastern flanks of the valley. Marine sedimentary rocks outcrop along most of the western, southwestern, and southern flanks; and volcanic rocks and deposits outcrop along the northeastern flanks of the valley. The valley geomorphology includes dissected uplands, low alluvial plains and fans, river flood plains and channels, and overflow lands and lake bottoms (Miller, Green, and Davis 1971).

Soils in the vicinity of the Site are generally classified as Milham sandy loam, an alluvium derived from igneous and sedimentary rock that is well drained (USDA 2017). Lithologies encountered in the area consisted of interbedded silt, sand, and gravel and minor amounts of clay (Geosyntec, 2011).

3.2 Hydrology

The Site is located within the Kern River Hydrographic Unit of the Tulare Lake Hydrographic Subregion of the Central Valley aquifer system (Bertoldi, Johnston, and Evenson 1991). Reportedly, groundwater in the vicinity of the Site occurs at approximately 252 to 268 feet below ground surface (bgs) and appears to flow in a generally westward direction (AECOM, 2017). Contour maps published by the Department of Water Resources (2011) indicate the regional groundwater flow direction within the unconfined and semi-confined aquifers in the vicinity of the Site is likely toward the west.

Groundwater recharge is influenced by precipitation in the mountains surrounding the Central Valley and from streams entering the valley. The natural pattern of groundwater movement and recharge has been altered by water development, such as pumping from wells (Bertoldi, Johnston, and Evenson 1991).

4.0 INFORMATION FROM SITE RECONNAISSANCE

4.1 General Site Walk Description

A site walk was conducted by G. Joseph Scatoloni, REA II and Senior Environmental Engineer, on October 30, 2017. The property was made available by the Project Client, Steven Doctor. See Attachment A for photos taken during site walk.

4.2 Environmental Field Reconnaissance

Property Address:	Knudsen Drive, south of Olive Drive APN: 365-020-30 and a portion of APN: 365-020-28
City:	Bakersfield
County:	Kern
State:	California 93309
Prepared for:	Project Client & Potential Buyer (C & SD Construction, Inc.)
Property Is:	_x_ Vacant land, ____ Vacant property, ____ Improved, ____ Occupied
Type Is:	____ Residential, ____ Commercial, _x_ Industrial (light),

GENERAL FIELD OBSERVATIONS

Were there any physical signs of the following observed on the subject property?

Use: yes, no or none, unknown (UK).

No	Underground Storage Tanks?
None	Evidence of former USTs?
No	Above Ground Tanks?
No	Vent Pipes?
None	Fill Ports?
None	Water Wells, Monitoring Wells, or Borings?
None	55-Gallon Drums Containing Hazardous Materials?
None	Containers?
None	Paint Spray Booths or Painting Enclosures
No	Open Trash?
No	Discarded Batteries?
No	3-Stage Clarifier?
No	Septic Tank?
No	Streams, Lakes or Ponds?
No	Pits, Ponds or Lagoons for Waste Treatment or Storage

No	Oil Stained Soil, Concrete, or Drains?
No	Chemically Etched and Damaged Concrete?
No	Surface Conditions, Asphalt or Concrete
No	Chemical Odors Detected?
No	Vegetation Damage, Showing Distressed or Dying Vegetation?
No	Oily Sheen on Water in Sumps,
None	Uneven Settling or Unexplainable Grade Changes?
No	Abandoned Pits, Ponds, or Lagoons?
No	Old Electric Transformers, Electric Devices, Light Ballasts or Hydraulic Fixtures
None	Pesticide or Herbicide Containers or any noticeable pesticide odors?
No	Suspected Lead Paint Hazard
No	Suspected Asbestos Containing Material
None	Visual Signs of Mold and/or Water Damage
NA	Radon Screening Been Conducted?
	If so, Explain.

NEIGHBORING ADJACENT PROPERTIES

No	Any evidence of neighboring adjacent properties engaged in storing, transporting or producing waste, chemicals or hazardous materials?
No	Any activities of adjacent properties may pose potential environmental risks to the subject property?
Yes	Adjoining or close proximity neighboring properties used as a gasoline station, motor repair, commercial printing, dry cleaner, photo developing lab or landfill?

There are two (2) fueling sites located to the north, adjacent to the Subject Site, including a 7-Eleven Store with fueling located at 5203 Olive Drive, and a Chevron fueling station located at 5201 Olive Drive. ENCON reviewed the available information for these two locations, and there are no reports of notices of violation (NOV) for these locations, and no active / ongoing remediation is reported by the State Regional Water Quality Control Board (SRWQCB).

5.0 HISTORICAL SITE RESEARCH AND USAGE

5.1 Historical Site Usage Overview

The State and local CUPA regulatory agency files were reviewed for the Subject Site from the San Joaquin Valley Air Pollution Control District, State Regional Water Quality Control Board, and the Department of Toxic Substances Control. In addition, public record reports and documents were requested from EDR included: Sanborn Maps and Aerial Photos for review by ENCON. These files and documents are presented in the following sections. Refer to Exhibit C and Exhibit D for additional detail information.

5.2 San Joaquin Valley Air Pollution Control District File Review

Permit files were requested for the subject site through San Joaquin Valley's Air Pollution Control District (APCD). There were no air emission related permits available for the Subject Site located on Knudsen Drive in Bakersfield, California.

5.3 Department of Toxic Substances Control Hazardous Waste Disposal

The historical hazardous waste disposal records were requested from the State of California EPA Department of Toxic Substances Control (DTSC) for the Subject Site located at Knudsen Drive, south of Olive Drive, in Bakersfield, California. No hazardous waste disposal records were found for the Subject Site.

5.4 CalEPA Geotracker and DTSC Envirostor File Review

The Subject Site located on Knudsen Drive in Bakersfield, California was not reported on any State regulatory list as a LUST, permitted UST facility, or DTSC Cleanup site on Geotracker or Envirostor public files. Refer to Exhibit D for CalEPA Geotracker and DTSC Envirostor File Review Map for the site location and surrounding areas.

5.4 Certified Sanborn Map Report Summary

A Certified Sanborn® Map Report was prepared on October 26, 2017 by EDR. The Sanborn Library was searched by EDR and maps covering the subject and neighboring properties to Knudsen Drive, south of Olive Drive. The area is unmapped. Refer to Exhibit C for Sanborn® Map Report.

5.5 Historical Aerial Map Report

The EDR Historical Aerial Photo Package is a screening tool designed to assist the environmental professional in evaluating the targeted and neighboring properties over the period of 1937 through 2012. Refer to Exhibit C for aerial photos for 1937, 1942, 1952, 1956, 1968, 1973, 1984, 1994, 2002, 2005, 2009, 2010, and 2012. The following observations were made from the aerial photos:

1937 to 1973 – The Subject Site appears to be possible agricultural / farming land, which is indicated by the suspected crop rows shown in the photographs. The surrounding properties appear to be agricultural and commercial in nature.

1984 to 1994 – The Subject Site appears to be vacant land with no indication of any building structures or land use during this time. The surrounding area shows signs of development to residential and commercial in nature.

2005 to 2012 – The Subject Site remains vacant, with some development shown to the south of the Site. The surrounding area remains about the same, residential and commercial.

6.0 INTERVIEWS

No property representatives were made available during this Phase I Environmental Site Assessment.

7.0 REGULATORY GOVERNMENT AGENCY RESEARCH

7.1 Database Information Research Method and Approach

ENCON contracted with Environmental Data Resources (EDR) to review databases maintained by the federal, state, and local regulatory agencies for the subject property generally described as APN 365-020-030 and a portion of APN: 365-020-28, located on Knudsen Drive, south of Olive Drive in Bakersfield, California. This review was designed to identify facilities and properties recently or currently under investigation for environmental contamination within a specific radius of the subject site. Additionally, this search noted any reported hazardous waste sites, landfills, Superfund sites, or businesses generating or treating hazardous wastes within the radius area. Finally, records of spills and other types of releases of hazardous materials were reviewed for properties within a smaller radius. Refer to Exhibit E for government file research reports.

ENCON does not assert to the completeness or accuracy of the database report. ENCON's review is therefore only as current and accurate as that provided in the database report and this may not cover all known or potential hazardous waste or contaminated sites. Further, there may be errors in the data base information reported for a site resulting from a number of different operations involved in processing the search. These errors could result in a site being included in the database due to a similar street name as a street within the search radius, when in fact the site is outside the search distance for the report. Additionally, a site within the search area may be omitted resulting from errors in the data entry phase of the search process. While ENCON does periodically spot check review the database reports against other available information from other agencies and field inspections to improve quality assurance and control, the accuracy and completeness of each report can not be guaranteed by ENCON.

Therefore, the following information is a tabulation and interpretation of this provided in data, based on a careful evaluation of the database reports, maps, knowledge of the area and region, and professional judgment about the potential environmental conditions. A complete copy of the regulatory agency database search report is provided in this report, refer to Exhibit E. The site information map, contained in the database report, illustrates the location of the subject site relative to the listed properties that are discussed and reviewed in the following section.

In each case, the radius distance from the subject site was chosen on the basis of the potential hazard that identified neighboring properties could pose to the subject property, the type of information provided, and the extent of overlap with other, more extensive databases. The resulting database search provided information that meets or exceeds the ASTM requirements. The data of the most recent update for each database is noted parenthetically below, following a description of the database. The name, address, status, and distance from the subject site for each site identified by the database are also given.

The results are organized by listings cited that were identified on a particular database. Since some of the sites appear on more than one database, these sites may be listed more than once. A summary of the environmental conditions of these sites are described below and in the following manner; according to closest proximity to the subject site and the topographic gradient (upgradient, cross-gradient, and down-gradient). The Subject Site is summarized initially followed by the adjacent sites. The database detailed information is provided in Exhibit E and specific page number is noted in the following summary sheets for reference purposes.

This information is presented to aid in the assessment of potential impact to the subject site from groundwater contamination. This groundwater information is based on the best available hydrogeology data and that the direction of groundwater flow in the shallow aquifer generally follows the topography in the general area.

7.2 Subject Site Findings

The government record review for the property located on Knudsen Drive, south of Olive Drive in Bakersfield, California was not listed on any government environmental databases associated with reported hazardous chemical material or waste uses or releases to the environment or regulatory corrective actions. Therefore, the government records suggest that the subject property land uses have not adversely affected the subject site and no contingent environmental conditions exist at this time from the past and current usage of the subject property. Refer to Exhibit E for the EDR Radius Map Report.

7.3 Adjacent and Neighboring Properties Summary

Based on a review of the EDR Radius Map for potential environmental risk sites within 1/8 mile of the Subject Site, there are ten (10) facilities listed with regulatory cleanup actions resulting from unauthorized releases of hazardous materials that may pose a risk to the subject property. This list includes, but is not limited to, multiple underground storage tank (UST) sites, historical UST sites, historical automotive sites, and RCRA-Small Quantity Generators (SQG) sites.

Based on the list of neighboring sites, there are four (4) locations, within 200 feet of the Subject Site, which warranted further review. Three (3) of the sites are active UST sites, located as follows: two (2) sites are located adjacent to the Subject Site to the north (7-Eleven Store located at 5203 Olive Drive and Chevron fueling station located at 5201 Olive Drive), and the third is located across Knudsen Drive, northwest of the Subject Site (Auto Spa Express Wash, located at 5725 Knudsen Drive). Upon further review of these sites, there are no reports of notices of violation (NOV) for these locations, and no active / ongoing remediation is reported by the State Regional Water Quality Control Board (SRWQCB).

The forth site, former Exxon service station located at 5213 Olive Drive, and adjacent to the Subject Site to the north, is listed as a closed LUST site by EDR and the SRWQCB. EDR describes LUST sites as locations classified as leaking underground storage tanks, which have, or have the potential to impact the water quality in California, and are regulated by the SRWQCB. Upon further review of this site, three (3) 8,000 gallon USTs and one (1) 550 gallon waste oil tank were removed by October 1990 and three (3) groundwater monitoring wells were installed at the site. In addition, vapor extraction remediation was performed from 1991 through December 1993 to remove the petroleum hydrocarbons found in the soils at the site. Based on the case closure summary, the LUST case was closed in October 1996 by the Regional Board, who confirmed that the required site investigations and remedial actions for the USTs had been completed and the site was granted no further action as related to the LUST release. Refer to Exhibit D for SRWQCB reports and Case Closure Summary.

Based on ENCON's review of these off-site adjacent locations, there are no notices of violation (NOV) or on-going active remediation required at any of these four (4) locations. Therefore, it is ENCON's professional opinion that these off-site locations do not pose an environmental off-site encroachment concern for the Subject Site, and no further investigations are necessary at this time in regards to these off-site locations.

8.0 CONCLUSIONS AND RECOMMENDATIONS

ENCON completed the Phase I ESA review of local and regional government environmental records, historical tenant survey, site reconnaissance by an environmental professional, and an evaluation of the evidence collected during the site assessment. The Phase I ESA report confirmed that the Subject Site has been vacant land since about 1983 through the present time, 2017 and no evidence recognized environmental concerns (RECs) associated with any uses or dumping of hazardous wastes at the Subject Property. Prior to that time, however, from about 1937 through 1973, it appears that the Site was graded for possible farming/agricultural purposes although there was no evidence found in the EDR records of subsequent actual agricultural uses of the Subject Site in the past.

Agricultural uses typically involve the use and storage of hazardous materials, such as herbicides, pesticides, and insecticides, in order to maintain the crops and eliminate damaging insects at the Property. The possible use of these agricultural chemical are considered a potential Historical Recognized Environmental Concern (HREC), as well as a Business Environmental Risk (BER), due to potential contamination from organochlorine pesticide residues, such as DDT. The pesticide DDT was commonly used in agricultural areas for insect control through 1972, at which time it was banned in the United States due to its harmful nature to the environment.

Therefore, although these potential historical agricultural chemical uses have not been confirmed at the Site, they do present a potential low environmental risk to the surficial soil for the current industrial vacant land use or redevelopment. In addition, if the Site is redeveloped in the future for mixed –use, or residential and / or other high sensitivity uses, such as health or child care services, further herbicides, pesticides, and insecticides shallow soil assessments is warranted to confirm the presence, or absence of potential pesticides and herbicide chemical residues in soils at the Site. In addition, a Soil Management Plan should be developed for soil grading and off-site soil disposal that includes environmental soil inspections and testing by a licensed hazardous waste contractor, as well as dust suppression, fencing and / or erosion controls during any disturbance of the soils at the Site to prevent human worker health exposure.

9.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Mr. G. Joseph Scatoloni, REA II & Senior Environmental Manager, performed the Phase I Environmental Site Assessment. Mr. Scatoloni has over 24 years background and experience in environmental site assessment and compliance commercial and industrial projects, including environmental CalEPA and ASTM regulations, regulatory review, investigations, and remediation, and site compliance audits. He is a Registered Environmental Assessor II, REA 20150, by the Environmental Assessment Association, Sacramento, California as well as a Registered Environmental Property Assessor and Registered Environmental Professional, REPA 783394.

The ENCON REA Team is comprised of environmental experts in understanding and applying the federal, state, and local regulatory guidelines in California and other western states to commercial and industrial site financial and real estate transactions for both financial institutions and private transactions. The ENCON REA Team is comprised of G. Joseph Scatoloni, Environmental Professional, Pete Babij, California Professional Geologist, and environmental research assistants, Tiffany Rivera, Elizabeth Bartley, and Teri Morrell and all of the project management is conducted by Mr. Scatoloni.

The ENCON REA Team has managed and participated in numerous projects requiring specific knowledge and interpretation of hazardous waste and chemical material management, chemical process engineering, regulatory compliance, permitting, subsurface soil and groundwater investigation, and remedial actions as well as health and safety codes. Mr. Scatoloni has experience as an environmental compliance evaluator, performing facility industrial and commercial site environmental assessments and audits.

The ENCON REA Team has performed Phase I Environmental Site Assessments for USEPA, CalEPA reporting, waste treatment permitting, EPA Wells Investigation Program, property transfer, site and service station closures, underground storage tank removals, client due diligence, and beneficial use of property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ENCON Technologies Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

REMEDIAL ACTION COMPLETION CERTIFICATION

Mr. William Davies
Davies Oil Company
P.O. Box 80067
Bakersfield, CA 93306

SUBJECT: UNDERGROUND STORAGE TANK (UST) CASE
Location: 5213 Olive Drive, Bakersfield, CA
Known As: Former Exxon Service Station
Site No.: 050062

Dear Mr. Davies:

This letter confirms the completion of site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Enclosed is the Case Closure Summary for the referenced site for your records.

Based on the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721 (e). (If a change in land use is proposed, the owner must promptly notify this agency.)

Please telephone Dolores Gough at (805) 862-8728, if you have any questions regarding this matter.

Sincerely,

Steve McCalley, Director
Environmental Health Services Department

VII. Additional Comments, Data, etc.

A phase II assessment was conducted at the site in October 1989 in order to determine site conditions prior to sale of the property. The property is the location of a former Exxon Service station. The station had four underground storage tanks, three 8,000-gal gasoline and one 550-gal waste oil tanks.

The phase II assessment results indicated the presence of petroleum hydrocarbon contamination by the north dispenser area. Based on these results, additional subsurface soil sampling was conducted. In addition, one groundwater well was installed and sampled and the results showed groundwater was impacted by elevated levels of gasoline constituents. An existing domestic well on the southwest corner of the property was also sampled. The results did not indicate any evidence of contamination. This well was subsequently abandoned.

In October, 1990, all the underground tanks on site were removed. Soil sampling during the tank removal activities confirmed significant gasoline contamination exists only at the north dispenser area. The soils beneath the site consist of various grain sizes of sand. From surface to 40 bgs, the soil consists of fine to medium grain size sand and gravelly sand from 30 to 90 feet.

A vapor extraction system was operated at the site from June 1991 to December 1993. Approximately 1087 gallons of petroleum hydrocarbons were removed from the start of operation to January 1992. Another 535 gallons were removed from December 1992 to December 1993. No information on how much was removed between January 1992 to December 1992 is available in our files. During this time, two additional groundwater wells (MW-2 and 3) were also installed. The water table also dropped causing the first well (MW-1) to become dry. MW-3 was monitored for a year but was abandoned following three consective "clean" results.

A confirmatory boring was drilled in March of this year and the results showed only one sample (at 50') had elevated levels of petroleum hydrocarbons. MW-2 has been monitored on a regular basis and the results indicate a decreasing trend in the contamination levels. Based on these results, closure was requested. This Department concurs with closing the case.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 4

RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

JEFFERS TRUCKING	5800 STATE RD	NNE 1/8 - 1/4 (0.191 mi.)	D43	59

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 11 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 15 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 8 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

FINDS:

Registry ID: 110002934451

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/30/2017
Date Data Arrived at EDR: 06/08/2017
Date Made Active in Reports: 09/15/2017

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017

Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/11/2017

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/11/2017

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Longitude (West):	119.057605 - 119° 3' 27.38"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	313163.2
UTM Y (Meters):	3920230.8
Elevation:	431 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5639503 OILDALE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

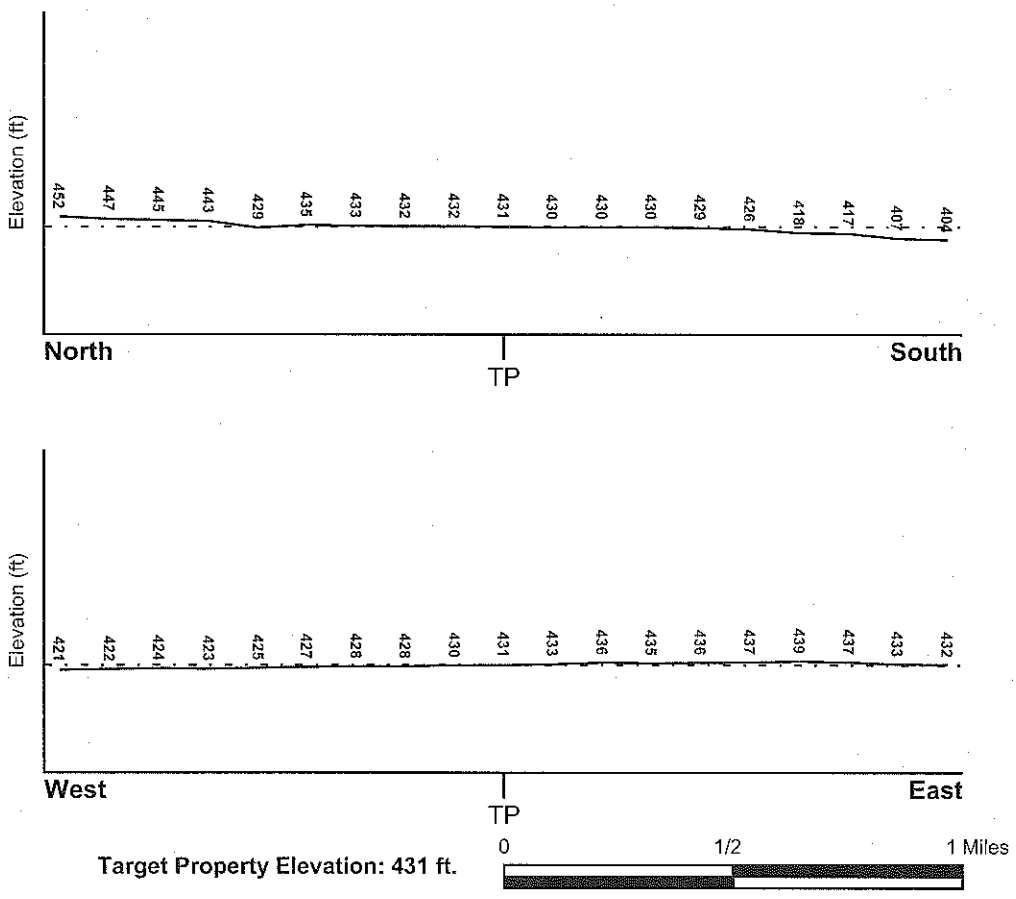

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06029C1825E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06029C1818E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OILDALE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: KIMBERLINA

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	9 inches	44 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
3	44 inches	70 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: KIMBERLINA

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 6.6

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Project Vacant Property

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8017-4852-BF43

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Krazan & Associates, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 10 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 16 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 8 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 19 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

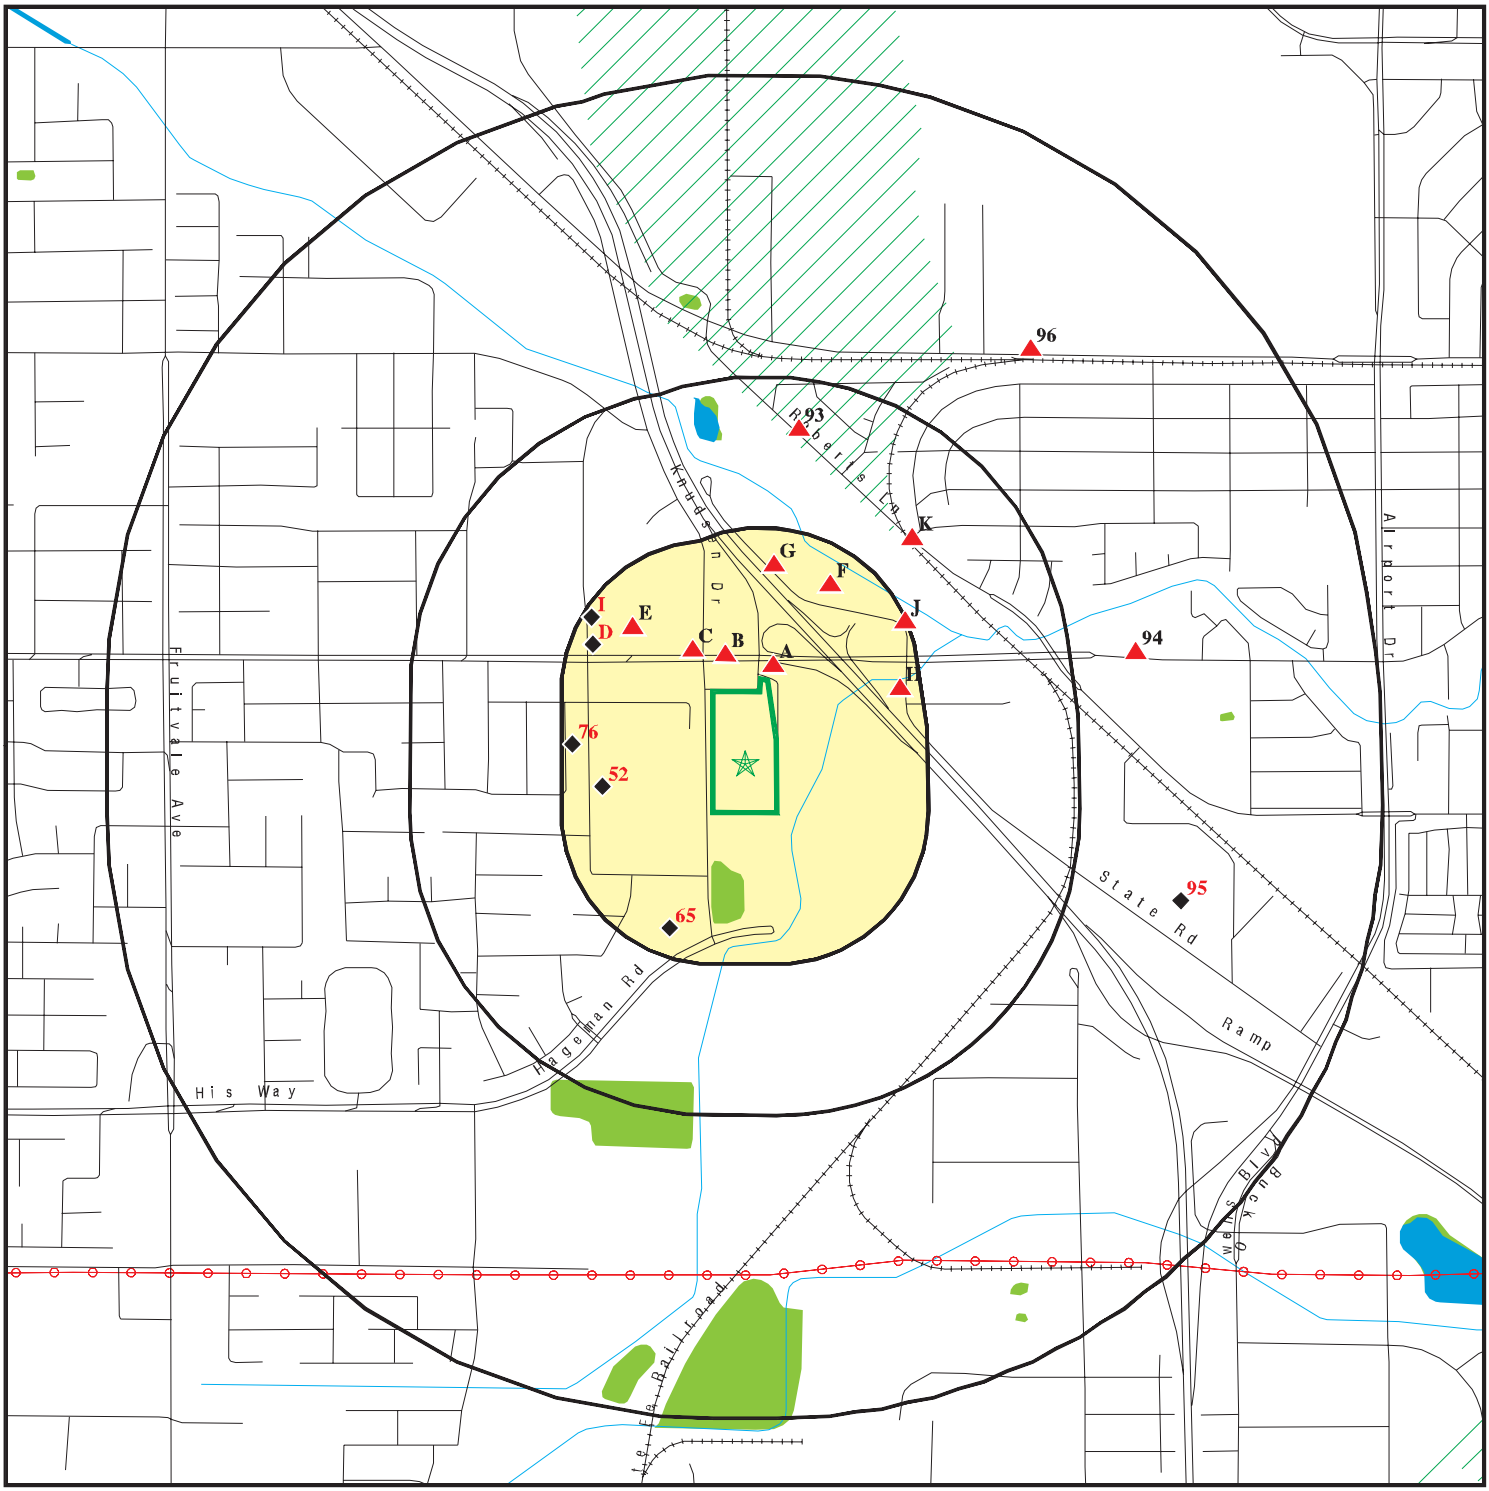

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Violations:

Site ID:	157797
Site Name:	The Spot Food Mart #4
Violation Date:	01-15-2019
Citation:	HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description:	Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the

THE SPOT FOOD MART #4 (Continued) **S121747789**

	owner/operator of a leak.
Violation Notes:	Sensor L-9 (91 STP sump sensor) was tampered and raised about 2-3 feet and kept on top of turbine, to prevent it from detecting the gasoline leakage from the piping into the sump. There was about 100 gallons of gasoline in the sump and the sensor was prevented from getting into alarm by raising above the liquid in the sump. Immediately cease all sensor tampering. Develop and implement training program for employees on how to address fuel alarms.
Violation Division:	Kern County Env Health Services Department
Violation Program:	UST
Violation Source:	CERS
Site ID:	157797
Site Name:	The Spot Food Mart #4
Violation Date:	01-08-2015
Citation:	HSC 6.7 25291 - California Health and Safety Code, Chapter 6.7, Section(s) 25291
Violation Description:	Failure to maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid.
Violation Notes:	Returned to compliance on 01/08/2015. OBSERVATION: Liquid was observed in the 91 and Diesel STP sumps, Diesel Fill sump and UDC 1/2. CORRECTIVE ACTION: Service technician removed the liquid from the 91 and Diesel STP sumps, Diesel Fill sump and UDC 1/2 during the inspection. NO FURTHER ACTION IS REQUIRED.

Violation Date:	01-13-2014
Citation:	23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)
Violation Description:	Failure to comply with one or more of the following: maintain the spill bucket in good condition, containment free of debris/liquid, and/or to remove the contents of the spill bucket when a release/leak/spill was observed.
Violation Notes:	Returned to compliance on 01/13/2014. OBSERVATION: Liquid was observed in the 87 spill bucket. The 91 spill bucket was leaking and failed testing. CORRECTIVE ACTION: Service technician removed the liquid from the 87 spill bucket during the inspection. The 91 spill bucket was replaced and retested during the inspection. The 91 spill bucket passed. NO FURTHER ACTION IS REQUIRED.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DOLLAR TREE #1255 (Continued) **S124437374**

Violation Description: Failure to complete and/or submit an annotated site map if required by CUPA.
Violation Notes: Returned to compliance on 09/19/2013. OBSERVATION: The on site site map does not have the helium in the warehouse on it. CORRECTIVE ACTION: A complete site map with the location of all hazardous materials on it needs to be kept on site and needs to be uploaded onto CERS.
Violation Division: Kern County Env Health Services Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 428915
Site Name: Dollar Tree #1255
Violation Date: 08-30-2013
Citation: HSC 6.95 25504(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(c)
Violation Description: Failure to include an adequate training program in the business plan, which is reasonable and appropriate for the size of the business and the nature of the hazardous material handled.
Violation Notes: Returned to compliance on 09/19/2013. OBSERVATION: An Employee Training Plan could not be found on CERS. CORRECTIVE ACTION: An Employee Training Plan needs to be uploaded onto CERS.
Violation Division: Kern County Env Health Services Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 428915
Site Name: Dollar Tree #1255
Violation Date: 08-30-2013
Citation: HSC 6.95 25504(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(a)
Violation Description: Failure to complete and/or submit hazardous material inventory forms for all reportable hazardous materials on site.
Violation Notes: Returned to compliance on 09/19/2013. OBSERVATION: Helium is not listed on the hazardous materials inventory on the California Environmental Reporting System (CERS). CORRECTIVE ACTION: Helium needs to be added onto the hazardous materials inventory on CERS.
Violation Division: Kern County Env Health Services Department
Violation Program: HMRRP
Violation Source: CERS

Violation Date:	04-24-2017
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 05/09/2017. Observation: Review of California Environmental Reporting System (CERS) indicates that the last submittal of the Hazardous Materials Inventory was done on March 3, 2016. The facility failed to annually review and electronically certify that the Hazardous Materials Business Plan (HMBP) was complete and accurate on or before March 2, 2017. Corrective Action: Immediately review the CERS and electronically certify that the Hazardous Materials Business Plan (HMBP) is complete and accurate.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

UST SAN FRANCISCO: Underground Storage Tank Information

Underground storage tank sites located in San Francisco county.

Date of Government Version: 08/01/2019
Date Data Arrived at EDR: 08/02/2019
Date Made Active in Reports: 10/08/2019
Number of Days to Update: 67

Source: Department of Public Health
Telephone: 415-252-3920
Last EDR Contact: 01/07/2020
Next Scheduled EDR Contact: 02/17/2020
Data Release Frequency: Quarterly

SAN JOAQUIN COUNTY:

UST SAN JOAQUIN: San Joaquin Co. UST
A listing of underground storage tank locations in San Joaquin county.

Date of Government Version: 06/22/2018
Date Data Arrived at EDR: 06/26/2018
Date Made Active in Reports: 07/11/2018
Number of Days to Update: 15

Source: Environmental Health Department
Telephone: N/A
Last EDR Contact: 12/11/2019
Next Scheduled EDR Contact: 03/30/2020
Data Release Frequency: Semi-Annually

SAN LUIS OBISPO COUNTY:

CUPA SAN LUIS OBISPO: CUPA Facility List
Cupa Facility List.

Date of Government Version: 08/14/2019
Date Data Arrived at EDR: 08/20/2019
Date Made Active in Reports: 10/18/2019
Number of Days to Update: 59

Source: San Luis Obispo County Public Health Department
Telephone: 805-781-5596
Last EDR Contact: 12/11/2019
Next Scheduled EDR Contact: 03/02/2020
Data Release Frequency: Varies

SAN MATEO COUNTY:

BI SAN MATEO: Business Inventory
List includes Hazardous Materials Business Plan, hazardous waste generators, and underground storage tanks.

Date of Government Version: 09/03/2019
Date Data Arrived at EDR: 09/09/2019
Date Made Active in Reports: 11/05/2019
Number of Days to Update: 57

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019
Date Data Arrived at EDR: 05/14/2019
Date Made Active in Reports: 08/05/2019
Number of Days to Update: 83

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VACANT PROPERTY
NOT REPORTED
BAKERSFIELD, CA 93308

TARGET PROPERTY COORDINATES

Latitude (North):	35.409765 - 35° 24' 35.15''
Longitude (West):	119.057597 - 119° 3' 27.35''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	313164.0
UTM Y (Meters):	3920231.5
Elevation:	431 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5639503 OILDALE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

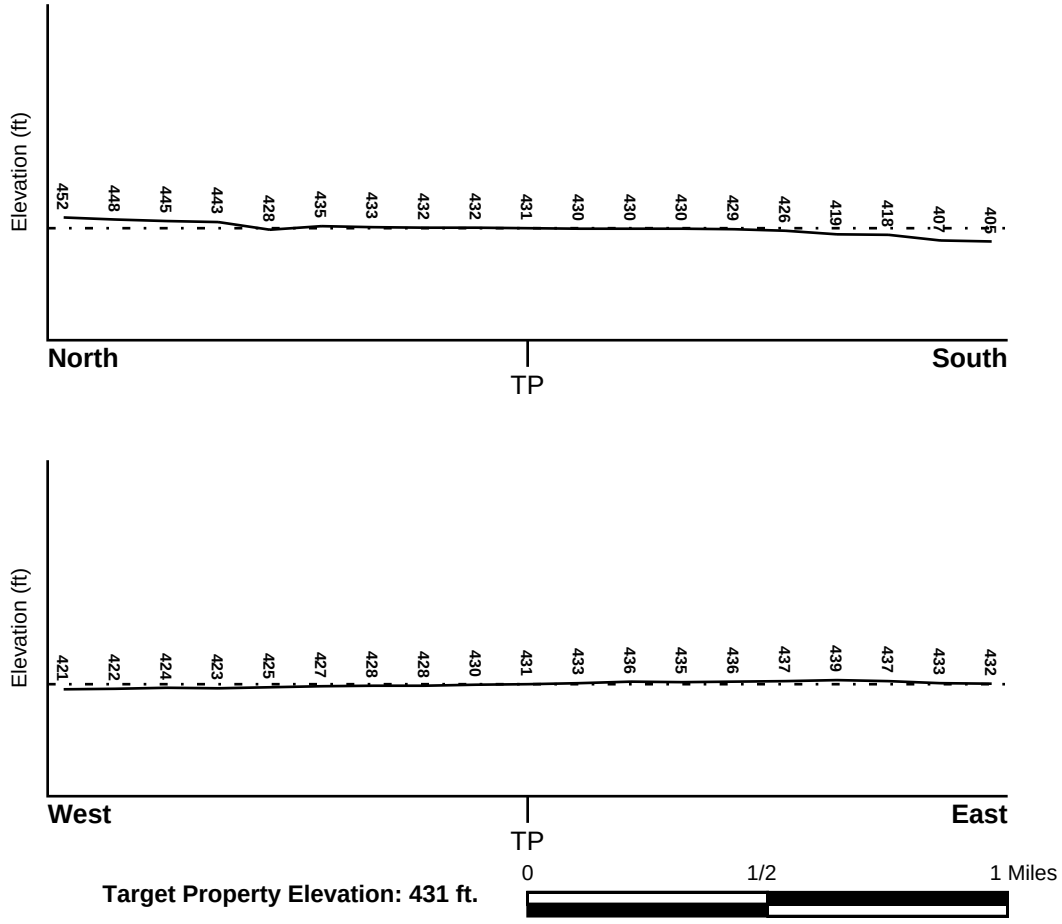

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06029C1825E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06029C1818E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OILDALE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: KIMBERLINA

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	9 inches	44 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	44 inches	70 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: KIMBERLINA

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	9 inches	44 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	44 inches	70 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: MILHAM

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	9 inches	48 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	48 inches	59 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

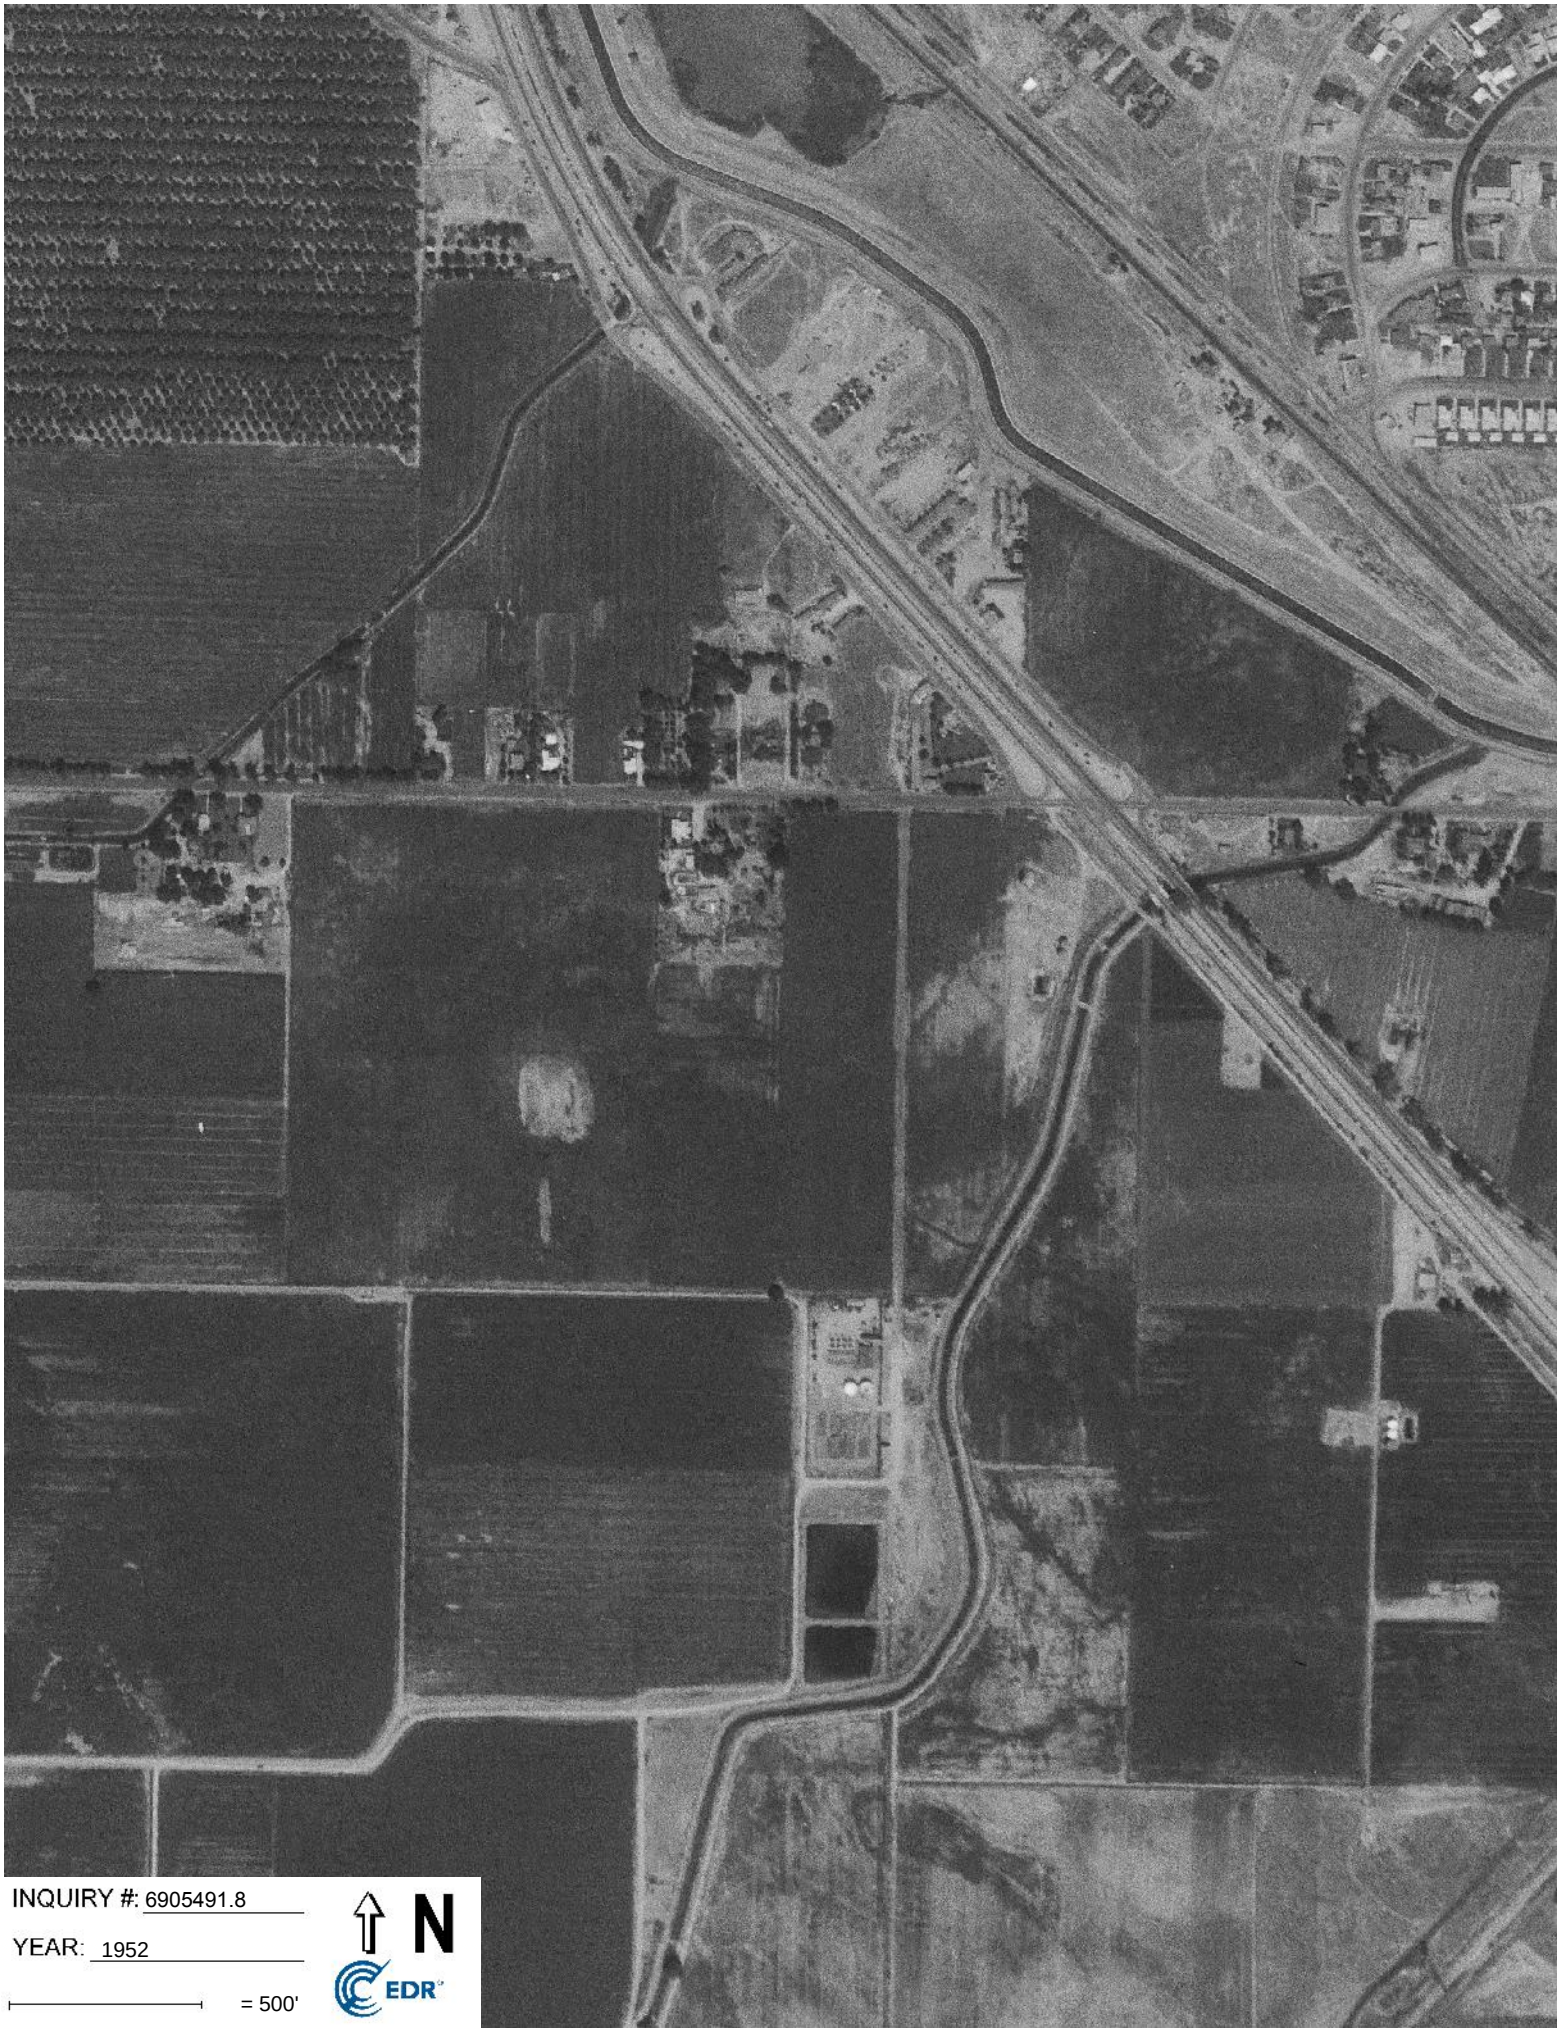

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Contact: Bill Vick

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Krazan & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

PHASE I ENVIRONMENTAL SITE ASSESSMENT
PROPERTY OWNER INTERVIEW QUESTIONNAIRE

Date: March 21, 2022 Krazan Project Manager: Bill Vick

Project No: 024-20002-22 Project Name: Vacant Property

Site Address: 5512 & 5656 Knudsen Drive, Bakersfield, California; APN 365-220-30 and A Portion of 365-220-28

Interview With: Steve Doctor

Telephone No: 619 787 6270 Fax No:

Knowledge of Previous Owner(s) and Phone Number?

How are you associated with the subject property? Property Owner / Property Owner's Representative

How long have you been associated with the subject property? 3 years

What is the subject property currently used for? VACANT

Are there structures on the subject property? NO How Many?

Do you know of any previous structures on the subject property? NO

Do you have knowledge of the presence of underground storage tanks being located on the subject property either historically or currently? NO

Do you have knowledge of the presence of aboveground storage tanks being located on the subject property either historically or currently? NO

Do you have knowledge of the presence of imported soil on the subject property? If so, please indicate the origin/location of the imported soil. NO

Do you know of any chemicals, hazardous materials, and/or environmentally persistent pesticides/herbicides being used, stored or discharged on the subject property? NO

Do you know of any buried materials such as garbage dumps or burn pits located on the subject property? NO

Do you know of any septic systems located on the subject property (current or historical)? **Yes** **No** ✓
If yes, how many currently? If yes, how many historically?

Do you know of any water wells located on the subject property (current or historical)? **Yes** **No** ✓
If yes, how many currently? If yes, how many historically?

Do you know of any dry wells located on the subject property (current or historical)? **Yes** **No** ✓

Do you know of any environmental monitoring wells located on the subject property (current or historical)? Yes No✓

Do you know of any drainage or disposal ponds located on the subject property? ✓ storm water pond

Is the subject property connected to municipal water and sewer systems? NO

Do you know of obvious indications pointing to the presence or likely presence of contamination of the subject property? NO

Do you have any concerns about adjacent property usage such as gasoline stations, industrial uses, or USTs/ASTs on adjacent properties? NO

Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state, or local law? NO

Please list previous commercial and/or industrial (non-residential) tenants/occupants of the subject site/on-site buildings: vacant land

Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law? NO

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business? NO

Does the purchase price being paid for the subject property reasonably reflect the fair market value of the subject property? (Yes) No

Do you know the past uses of the subject property? If so, briefly explain. vacant land

Do you have knowledge of the current or historical presence of vehicle repair-related features (i.e., sumps, oil/water clarifiers, subsurface hydraulic vehicle hoists, etc.)?
If so, briefly explain. NO

Do you know of specific chemicals that are present or once were present at the subject property?
If so, briefly explain. NO

Do you know of spills or other chemical releases that have taken place at the subject property?

If so, briefly explain.

NO

Are you aware of, or have you been notified of, any contamination issues to soil or groundwater either at the subject site or in the vicinity of the subject site?

If so, briefly explain.

NO

What is the reason for preparation of this Phase I ESA? (Property purchase/sale; bank loan; proposed development; etc.)

property purchase

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 18 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/25/2021 has revealed that there is 1 SCH

site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 18 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 24 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Violation Date:	01-15-2019
Citation:	HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description:	Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the

THE SPOT FOOD MART #4 (Continued) **S121747789**

	owner/operator of a leak.
Violation Notes:	Returned to compliance on 05/10/2019. Sensor L-9 (91 STP sump sensor) was tampered and raised about 2-3 feet and kept on top of turbine, to prevent it from detecting the gasoline leakage from the piping into the sump. There was about 100 gallons of gasoline in the sump and the sensor was prevented from getting into alarm by raising above the liquid in the sump. Immediately cease all sensor tampering. Develop and implement training program for employees on how to address fuel alarms.

Violation Date:	01-13-2014
Citation:	23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)
Violation Description:	Failure to comply with one or more of the following: maintain the spill bucket in good condition, containment free of debris/liquid, and/or to remove the contents of the spill bucket when a release/leak/spill was observed.
Violation Notes:	Returned to compliance on 01/13/2014. OBSERVATION: Liquid was observed in the 87 spill bucket. The 91 spill bucket was leaking and failed testing. CORRECTIVE ACTION: Service technician removed the liquid from the 87 spill bucket during the inspection. The 91 spill bucket was replaced and retested during the inspection. The 91 spill bucket passed. NO FURTHER ACTION IS REQUIRED.

Violation Date:	01-15-2019
Citation:	23 CCR 16 2712 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712
Violation Description:	Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system.
Violation Notes:	Returned to compliance on 05/10/2020. Facility operator failed to take appropriate follow-up action on the monitoring system alarms. Alarm history report revealed that sensor L-9 failed testing during the annual monitoring certification on 1/22/2018. is still not functioning. This failure was addressed by the UST technician performing annual monitoring certification/designated operator in in the report, but the operator failed to take any appropriate follow-up action. You are required to immediately respond to all the alarms. Alarm logs along with the appropriate follow-up actions should be maintained at the facility. You are required to maintain written monitoring and maintenance records on site, for a period of 3 years. You are required to develop and implement training program for employees on how to address fuel alarms.

Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 07/28/2020. Observation: According to several Designated Underground Storage Tank Operator Visual Inspection Reports, the Overfill Prevention Equipment Inspection has not been conducted. Corrective Action: A certified service technician must conduct the Overfill Prevention Inspection. Send a copy of the Overfill Prevention Equipment Inspection Report to hazmat@kerncounty.com and maintain a copy on site.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: OBSERVATION: The Owner/Operator has failed to have the Overfill Prevention Equipment Inspection conducted by a certified service technician. CORRECTIVE ACTION: Immediately schedule testing for the Overfill Prevention Equipment with a certified tester. Notify Kern County Environmental Health of scheduled testing and submit testing reports via the online portal at https://phweb.co.kern.ca.us/EH_UST_Portal_Public/login.aspx and maintain a copy of the test result on site for a minimum of three years

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Site Name: Dollar Tree #01255
Violation Date: 03-11-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 04/10/2020. OBSERVATION: The Primary Emergency Contact and Secondary Emergency Contact reported in California Environmental Reporting System (CERS) are third party firms and have limited knowledge of the facility. The Primary Emergency Contact and Secondary Emergency Contact must be contacts from the facility (i.e. who should first responders contact if an emergency occurs at the facility). CORRECTIVE ACTION: Correct the Primary Emergency Contact and the Secondary Emergency Contact on the Business Owner/Operator page in CERS and resubmit all elements once corrections have been made.
Violation Division: Kern County Env Health Services Department

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-02-2020
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	The Environmental Contact for the facility should not be a third party waste hauler. Please correct the Environmental Contact information on the Business Owner/Operator Identification page in the California Environmental Reporting System (CERS) to a facility/business representative. Please check box 8 under section I. Employee Training on the Emergency Response/Contingency Plan to satisfy reporting requirements. Please discard the old plan from CERS, upload the new/corrected plan into CERS, and resubmit with all other elements once all corrections have been made.

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	387891
Site Name:	BILLS HOT OIL SERVICE INC
Violation Date:	06-03-2013
Citation:	HSC 6.95 25504(b) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(b)
Violation Description:	Failure to include adequate emergency response procedures in the business plan for a release or threatened release.
Violation Notes:	Returned to compliance on 07/17/2013. A copy of the business plan which includes the contingency plan, site map, and training plan was not available at the time of inspection on site. It was suggested at the time of inspection to keep a copy in the trailer at least, and a copy in each truck if the facility is often unmanned. This must be also uploaded onto CERS.
Violation Division:	Kern County Env Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	387891
Site Name:	BILLS HOT OIL SERVICE INC
Violation Date:	06-23-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 06/28/2017. Observation: Review of California Environmental Reporting System (CERS) indicates that last annual review and certification of the Hazardous Materials Business Plan (HMBP) was submitted to CERS on 1/20/2015. The annually review and electronically certification is overdue on 1/19/2016. Corrective Action: Immediately update the Hazardous Materials Business Plan (HMBP) and electronically certify that the Hazardous Materials Business Plan (HMBP) is complete, accurate, and up-to-date.
Violation Division:	Kern County Env Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS,

Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes:	Returned to compliance on 03/17/2021. OBSERVATION: The Environmental Contact information listed on the Business Owner/Operator Identification page in the California Environmental Reporting System (CERS) is incorrect; the person listed no longer works for this company. CORRECTIVE ACTION: Correct the Environmental Contact information and the certification on the Business Owner/Operator Identification page in CERS and resubmit all elements once all corrections have been made.
Violation Division:	Kern County Env Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	391524
Site Name:	DOLE ENTERPRISE INC - STATE RD
Violation Date:	04-24-2017
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 05/09/2017. Observation: Review of California Environmental Reporting System (CERS) indicates that the last submittal of the Hazardous Materials Inventory was done on March 3, 2016. The facility failed to annually review and electronically certify that the Hazardous Materials Business Plan (HMBP) was complete and accurate on or before March 2, 2017. Corrective Action: Immediately review the CERS and electronically certify that the Hazardous Materials Business Plan (HMBP) is complete and accurate.
Violation Division:	Kern County Env Health Services Department

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 30222
Site Name: FIRE DEPARTMENT - HQ
Violation Date: 12-15-2020
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to describe in the SPCC Plan facility security measures including: 1. How access to the oil handling, processing, and storage areas is secured and controlled. 2. How master flow and drain valves are secured. 3. How unauthorized access to starter controls on oil pumps is prevented. 4. How out-of-service and loading/unloading connections of oil pipelines is secured. 5. The appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges.
Violation Notes: OBSERVATION: Table G-6 "Implementation and Description of Security Measures" of the SPCC plan is incomplete; the description provided only covers the security measures for the fuel registers and not for the other applicable containers. CORRECTIVE ACTION: Complete Table G-6 "Implementation and Description of Security Measures" of the SPCC plan with a description of security for all applicable containers (i.e. automatic fences, camera system along property fence line, alarms, etc.). Send the completed and certified SPCC plan to teaneyd@kerncounty.com once all corrections have been made.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to ensure loading/unloading rack drainage flows to catchment basin or treatment facility designed to handle discharges, or use a quick drainage system when a tank car or tank truck loading/unloading rack is present at the facility. The containment system must be designed to hold at least the maximum capacity of any single compartment of a tank car or tank truck loaded or unloaded at the facility.
Violation Notes:	Returned to compliance on 07/03/2019. Provide an adequate secondary containment to all the 55-gallon drums containing petroleum products and motor oil tanks. Submit a photo of drum within the containment so we can clear this violation.

Violation Date:	12-15-2020
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes:	OBSERVATION: Table G-5 "Inspections, Testing, Recordkeeping and Personnel Training" of the SPCC plan is incomplete/incorrect. According to facility personnel, tank inspections are conducted weekly, however, page 5 of the SPCC plan clearly states that inspections are to be conducted and documented daily. CORRECTIVE ACTION: Complete "Table G-5 Inspections, Testing, Recordkeeping and Personnel Training" of the SPCC plan by checking the first box regarding the implementation of an inspection and/or testing program. Correct the inspection description to indicate weekly documented inspections rather than daily documented inspection. Send the completed and certified SPCC plan to teaneyd@kerncounty.com once all corrections have been made.

OLIVE DRIVE AMPM (Continued) **S121780603**

Violation Source:	CERS,
Site ID:	420404
Site Name:	OLIVE DRIVE AMPM
Violation Date:	03-10-2021
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 04/01/2021. OBSERVATION: The 91- Premium Fill Spill Container failed the Hydrostatic test. CORRECTIVE ACTION: Replace the 91- Premium Spill Container, retest, and submit passing reports to Kern County Environmental Health via the on-line portal at https://phweb.kerncounty.com/EH_UST_Portal_Public/login.aspx.
Violation Division:	Kern County Env Health Services Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	420404
Site Name:	OLIVE DRIVE AMPM
Violation Date:	03-26-2019
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 06/07/2019. 87 and 91 Line leak detectors failed to detect release of 3.0 gallons per hour. Replace and retest the line leak detector.
Violation Division:	Kern County Env Health Services Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	420404

Violation Date:	03-10-2021
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or

OLIVE DRIVE AMPM (Continued) **S121780603**

debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: OBSERVATION: Several Designated Underground Storage Tank Operator Visual Inspection (DO) reports were not reviewed or signed by the UST owner or operator. Several DO reports indicate a presence of liquid/sludge in the 1/2 and 3/4 Under Dispenser Containments; the DO reports indicate that these issues were not properly addressed following the previous inspection report. CORRECTIVE ACTION: The UST owner or operator must review all DO reports, make arrangements to resolve any issues noted by the DO, complete Section V- "Owner/Operator Description of Follow-up Actions", and sign Section VI- "Owner/Operator Acknowledgment of Inspection Results".

Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.075

Year: 2015
Gepaid: CAL000404851
TSD EPA ID: CAL000282598
CA Waste Code: 221 - Waste oil and mixed oil
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 1.045

Year: 2015
Gepaid: CAL000404851
TSD EPA ID: CAD980675276
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 67.424

Year: 2015
Gepaid: CAL000404851
TSD EPA ID: CAD028409019
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 2.5625

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/28/2022
Date Data Arrived at EDR: 03/02/2022
Date Made Active in Reports: 03/17/2022

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/28/2022

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PROPOSED COMMERCIAL PROPERTY
5656 KNUDSEN DRIVE
BAKERSFIELD, CA 93308

TARGET PROPERTY COORDINATES

Latitude (North):	35.410605 - 35ˆ 24’ 38.18’’
Longitude (West):	119.057633 - 119ˆ 3’ 27.48’’
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	313162.7
UTM Y (Meters):	3920324.8
Elevation:	431 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	11998695 OILDALE, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

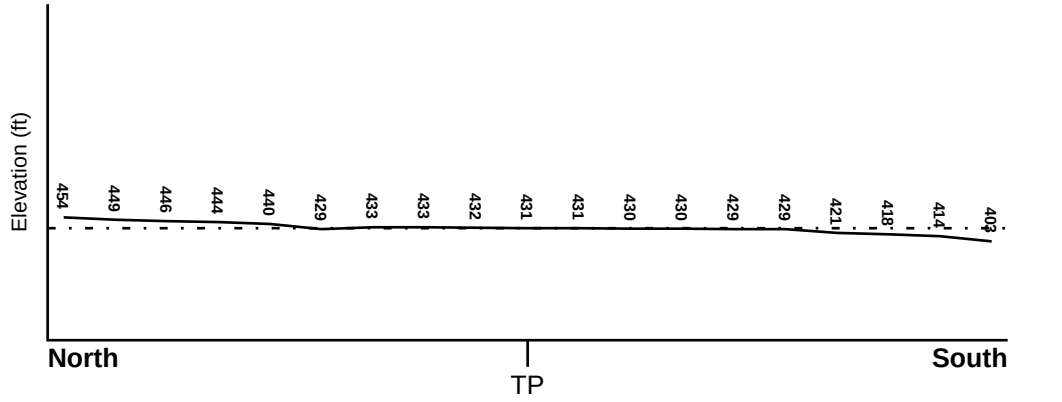

TOPOGRAPHIC INFORMATION

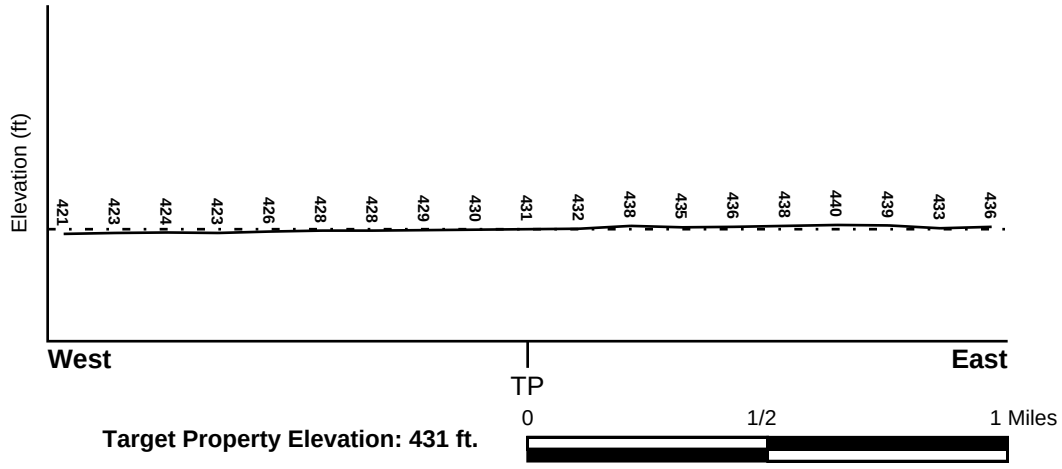

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 431 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06029C1825E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06029C1818E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OILDALE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: KIMBERLINA

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	9 inches	44 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	44 inches	70 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: KIMBERLINA

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	9 inches	44 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	44 inches	70 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: MILHAM

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	9 inches	48 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	48 inches	59 inches		Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
