PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Ball Road Development
1200 South Anaheim Boulevard
Anaheim, California 92805

Report Date: February 5, 2020
Partner Project No. 19-266733.1

Prepared for:

Greenlaw Partners
18301 Von Karman Avenue, Suite 250
Irvine, California 92612

PARTNER
Engineering and Science, Inc.

February 5, 2020

Mr. Derek Meddings
Greenlaw Partners
18301 Von Karman Avenue, Suite 250
Irvine, California 92612

Subject: Phase I Environmental Site Assessment
Ball Road Development
1200 South Anaheim Boulevard
Anaheim, California 92805
Partner Project No. 19-266733.1

Dear Mr. Meddings:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (619) 925-9672.

Sincerely,

Mark Lambson
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Greenlaw Partners for the property located at 1200 South Anaheim Boulevard in Anaheim, Orange County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Greenlaw Partners with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the south side of East Ball Road, east side of South Anaheim Boulevard, and west side of South Claudina Street within a mixed commercial and residential area of Anaheim. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	1200 South Anaheim Boulevard, Anaheim, California
Additional Addresses:	1234, 1280, 1300 and 1354 South Anaheim Boulevard 1213, 1227 South Claudina Street 200 East Ball Road
Property Use:	Commercial/Industrial
Land Acreage (Ac):	13.15 Ac
Number of Buildings:	Nine
Number of Floors:	One
Gross Building Area (SF):	86,540 SF
Date of Construction:	1959-1983
Assessor's Parcel Number (APN):	082-461-23, -24, -25, -29, -31, -34, -38, -39
Type of Construction:	Wood-Framed
Current Tenants:	Anaheim Resort Transportation (1354 South Anaheim Boulevard, 200 East Ball Road) Impulse Automotive Group (1300 South Anaheim Boulevard) Uprite Construction (1280 South Anaheim Boulevard) Vacant building (1234 South Anaheim Boulevard) SoCal Autohaus & Auto Buyers (1200 South Anaheim Boulevard) Vacant building (1213 South Claudina Street) Vacant building (1227 South Claudina Street)
Site Assessment Performed By:	Alexandra LaBouff of Partner
Site Assessment Conducted On:	January 22, 2020

The subject property consists of nine one-story buildings occupied by four onsite tenants and three vacant buildings. The subject property is currently occupied by Anaheim Resort Transportation, Impulse Automotive Group, Uprite Construction, and SoCal Autohaus & Auto Buyers for used auto sales, auto repair, bus repair, and bus parking. In addition to the current structures, the subject property is also improved with various paved parking lots and minimal landscaping.

According to available historical sources, the subject property was formerly agricultural land (orchards) with two apparent rural residences from at least 1938 to 1953. Between 1959 and 1963, the subject

property was developed with two of the present-day structures originally used as a bank (1234 South Anaheim Boulevard) and an automobile dealership (1354 South Anaheim Boulevard). By 1972, all of the subject property parcels had been developed with the current commercial and/or industrial structures, except the 1280 South Anaheim parcel. By 1983, all of the present-day structures had been developed. Tenants on the subject property have included various automotive dealership and repair businesses (1966-2014).

The immediately surrounding properties consist of various commercial structures and a residential structure to the north across East Ball Road; 7-Eleven to the northwest across the intersection of East Ball Road and South Anaheim Boulevard; MJ Design and an office building to the south; various industrial structures directly east and across South Claudina Street; Arrow Building Supply to the southeast; and Burger King, El Super grocery, residential, retail and My Next Auto dealer to the west across South Anaheim Boulevard.

According to previous subsurface investigation data collected from the California Water Resources Control Board for a nearby property (1240 South Claudina Street and Case #SL188033849), the depth to groundwater in the vicinity of the subject property is inferred to be approximately 79 feet below ground surface (bgs) and groundwater flow is inferred to be toward the southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Three areas of the subject property have historically been used for automotive dealership and/or automotive repair and auto body/collision operations: 1200 South Anaheim Boulevard, 1280-1300 South Anaheim Boulevard, and 1354 South Anaheim Boulevard. These three locations are discussed below.

  The 1200 South Anaheim Boulevard parcel of the subject property has operated as an auto repair facility since at least 1964. The regulatory database report identified a former subject property tenant, McPeek Chrysler Plymouth at 1200 South Anaheim Boulevard, as the location of a waste oil UST. No records were found for this address at the Orange County Health Care Agency (OCHCA), and the date of installation, capacity, location, and disposition of the UST are not known. This facility was listed as producing the following hazardous wastes in the DTSC Hazardous Waste Tracking System (HWTS) database: aqueous solution with organic residues >10% (1995-2000), aqueous solution with organic residues <10% (1998 to 2004), unspecified aqueous solution (1993-1995), unspecified solvent mixture (1993 to 1997), oil/water separation sludge (1995-2004), other organic solids (2001-2007), and unspecified sludge waste (2008). During the onsite reconnaissance, Partner observed significant staining in the auto repair bays. An in-ground hydraulic lift was observed, and evidence of additional former in-ground lifts was observed. Based on the assumed date of installation, there is a potential for PCBs to have been present in the hydraulic fluid used in current and/or former lifts. Considering the duration of auto

repair operations, significant staining observed, and the lack of information regarding the UST's location and disposition, the current and former operations at 1200 South Anaheim Boulevard represent a REC.

The 1354 South Anaheim Boulevard parcel operated as an automobile dealership with automotive repair and collision operations from at least 1959 to 2005. Later uses included automotive wrecking (2005 to 2014) and bus repair (2014-present). The following wastes were reported to have been generated at this address in the DTSC's HWTS database: oil/water separation sludge (2014), other organic solids (2015-2016), unspecified oil-containing waste (2008), off-specification, aged or surplus organics (2008), other organic solids (2008). It was listed in the database report as generating small quantities of hazardous waste in 1993. The site received no violations during a fire department inspection in 1992. OCHCA records did not reveal evidence of USTs at this address. During the onsite reconnaissance, Partner observed five 55-gallon drums and a 275-gallon tote of waste oil, three 275-gallon containers and four 55-gallon containers of new oil, a 55-gallon drum of gasoline, two 55-gallon drums of used oil filters, five 55-gallon drums of antifreeze, eight used car batteries, a parts washer, one 55-gallon drum of oily absorbent, nine empty 55-gallon drums, two 55-gallon drums of used aerosol cans. Partner observed two waste oil ASTs at 1354 South Anaheim Boulevard. Significant staining was observed in the vicinity of the ASTs. Although evidence of underground storage tanks and in-ground lifts were not observed during the site reconnaissance, there is a potential for previously unknown USTs or other subsurface features to be encountered during future redevelopment activities due to the long history of vehicle repair operations. A catch basin was observed to have staining around its opening. The reported oil/water separator sludge waste indicates the potential for a clarifier to be present. Based on the duration of these operations, and the staining observed, the potential for impacts from the current and former automotive-related operations cannot be ruled out and are considered a REC.

The 1280-1300 South Anaheim Street property operated as an automobile dealership and/or automotive repair and collision operations from at least 1964 to present. According to records reviewed, a 550-gallon waste oil UST and a 280-gallon waste oil UST were removed from the "back lot" of 1300 South Anaheim Street on December 7, 1989. Petroleum Industry Consultants prepared a Tank Removal Excavation Report on April 25, 1988 for Harden Oldsmobile. According to the report, one soil sample was previously collected below the 280-gallon tank. The sample was analyzed for TPH and halogenated volatile organics. Analytical results included 8,500 ppm TPH and halogenated volatile organics below the laboratory detection limits. As further investigation, the UST pit was excavated to nine feet below ground surface, and five additional soil samples were taken. The samples were analyzed for TPH and purgeable halocarbons. All five samples were non-detect for TPH and halogenated VOCs. Contaminated soil removed from the tank pit was stockpiled. The stockpiled soil was not yet transported offsite at the time of completion of the report.

In a letter from OCHCA dated January 20, 1990, OCHCA determined that waste oil, xylene and trichloroethene contaminated soil were present on the subject property. OCHCA required that the

site delineate the extent of contamination in soil and groundwater, and to determine the potential of vapor migration.

Petroleum Industry Consultants prepared a Tank Removal Excavation Report dated February 6, 1990, which documented the removal of a 550-gallon waste oil UST and a 280-gallon waste oil UST from two separate pits on December 4, 1989. Two soil samples were taken from below the 550-gallon UST, and one was collected from beneath the 280-gallon UST. The soil sample collected from the 280-gallon UST pit contained 276 ppm TPH and non-detectable benzene, toluene, ethylbenzene, xylenes (BTEX), and non-detectable halogenated VOCs, and no further action was required by the OCHCA. Elevated levels of TPH were found below the 550-gallon tank including TPH concentrations of 10,100 and 11,000 ppm, 23.9 ppm xylene and 10 ppb trichloroethene. Excavation and deeper sampling were subsequently conducted on January 23, 1990 at the 550-gallon UST pit. Excavation proceeded to a depth of 10 feet bgs, until field evidence (odor) of waste oil was no longer observed. Six soil samples were taken from the bottom and walls of the excavation. The highest concentration of TPH detected in the soil samples was 540 ppm, and purgeable aromatics and trichloroethene were non-detectable. Based on a leaching potential analysis, TPH was below allowable levels and no further action was required by the OCHCA.

On September 5, 1990, the OCHCA issued the responsible party, Walt Cadman, a no further action letter for the 280-gallon and 550-gallon waste oil USTs. However, Partner notes that soil vapor sampling was not previously required to be evaluated. If redevelopment activities are proposed, sampling to evaluate soil vapor conditions related to the former waste oil USTs would be warranted.

In addition, the regulatory database indicates that a 2,000- to 2,500-gallon unleaded gasoline UST was installed at the 1300 South Anaheim Boulevard address in 1964. The location and current disposition of this UST are not known. In the absence of closure or sampling records for this UST, it is considered a REC.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.
- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint (LBP) are present. Readily visible suspect ACMs and painted surfaces were observed in good condition. Prior to the disturbance of any suspect ACM or LBP at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired or removed, a licensed abatement contractor should be consulted.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1200 South Anaheim Boulevard in Anaheim, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- A limited subsurface investigation should be conducted in order to determine the presence or absence of soil, soil vapor, and/or groundwater contamination due to the historical use of the subject property.
- Prior to redevelopment of the property, the in-ground hydraulic lift should be properly removed from the subject property. Confirmatory sampling would be necessary to determine the current conditions of soil and/or groundwater due to the use of current and former hydraulic lifts at the subject property.

- Prior to the disturbance of any suspect ACM or LBP at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired or removed, a licensed abatement contractor should be consulted.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 1200 South Anaheim Boulevard in Anaheim, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject

property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Greenlaw Partners engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Greenlaw Partners. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action

against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner observed approximately 90% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (vacant buildings), this limited method of survey is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was obstructed due to parked cars, and excessive storage. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 1200 South Anaheim Boulevard in Anaheim, California is located on the south side of East Ball Road, east side of South Anaheim Boulevard, and west side of South Claudina Street. According to the Orange County Assessor, the subject property is legally described as APN 082-461-23, -24, -25, -29, -31, -34, -38, -39.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property consists of nine one-story buildings occupied by four onsite tenants and three vacant buildings. The subject property is currently occupied by Anaheim Resort Transportation, Impulse Automotive Group, Uprite Construction, and SoCal Autohaus & Auto Buyers for used auto sales, auto repair, bus repair, and bus parking. In addition to the current structures, the subject property is also improved with various paved parking lots and minimal landscaping.

The subject property is designated C-G for general commercial development and I for industrial development by the City of Anaheim.

The subject property was identified as a Historical Underground Storage Tank (UST), Facility and Manifest Data (HAZNET), Resource Conservation and Recovery Act Non Generator / No Longer Regulated (RCRA NonGen/NLR), Leaking UST (LUST), CalEPA Regulated Site Hazardous (CERS HAZ) WASTE, Statewide Environmental Evaluation and Planning System (SWEEPS) UST, CA Facility Inventory Database (FID) UST, RCRA Small Quantity Generator (-SQG), Facility Index System (FINDS), Enforcement & Compliance History Information (ECHO), Emissions Inventory Data (EMI), Historical Hazardous Waste & Substance Site List (CORTESE), CERS site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Orange County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties	
North:	Shoe City (101 East Ball Road), Notary Public (105 East Ball Road), Vacant commercial (125 East Ball Road), Residential (201 East Ball Road), BPS Supply Group (215 East Ball Road), Vacant commercial (231 East Ball Road), Ollin Stone (301 East Ball Road) across East Ball Road
Northwest:	7-Eleven (107 West Ball Road) across the intersection of East Ball Road and South Anaheim Boulevard
South:	M&J Design Furniture (1303 South Claudina Street) and Various offices (1360 South Anaheim Boulevard)
East:	Grainger Industrial Supply (310 East Ball Road), Anacom Medtek (1240 South Claudina Street), Traffic Management (1244 South Claudina Street) across South Claudina Street and OEM Rims (1315 South Claudina Street), Mettler Electronics Corp (1333 South Claudina

Street)

Southeast: Arrow Building Supply (1335 South Claudina Street)

West: Burger King (1201 South Anaheim Boulevard), Retail (1213-1219 South Anaheim Boulevard), El Super (1221 South Anaheim Boulevard), Residential (1311-1331 South Anaheim Boulevard), Retail (1341-1349 South Anaheim Boulevard), and My Next Auto dealer (100 West Winston Road) across South Anaheim Boulevard

The adjacent properties are identified in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Anaheim, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 152 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the southwest.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the southwest. The nearest surface water in the vicinity of the subject property is the Santa Ana River located approximately 1.94 miles east of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by Anaheim Public Utilities serves the subject property vicinity. According to the 2016 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Anaheim are surface water from the Colorado River and Northern California and groundwater from local wells.

According to previous subsurface investigation data collected from the California Water Resources Control Board for a nearby property (1240 South Claudina Street and Case #SL188033849), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 79 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property lies within the Orange County Coastal Plain area of the Los Angeles Basin. The plain consists of predominantly alluvial basin-fill material deposited by meandering tributaries of the Santa Ana River system. Surficial geology in the subject property vicinity consists of recent alluvium of gravel, sand, silty sand, and clayey silt with an average thickness of 200 feet. This recent alluvium is underlain by the upper Pleistocene Lakewood Formation, which averages 500 feet in thickness and consists of alternating stratigraphic zones of coarse-grained sand and clayey silt. The estimated depth to bedrock is more than 200 feet.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as San Emigdio fine sandy loam. The San Emigdio component makes up 85 percent of the map unit. Slopes are zero to two percent. The parent material consists of alluvium derived from sedimentary rock. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about zero percent. This component is in the R019XD029CA loamy ecological site. Non-irrigated land capability classification is 3c. Irrigated land capability classification is 1. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed three percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06059C0133J, dated December 3, 2009, the subject property appears to be located in Zone X, an area with a 0.2 percent annual chance of flood.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1938-1953	Aerial Photographs, Topographic Maps	Agricultural land (orchards) with two apparent rural residences
1959-1963	Aerial Photographs, City Directories, Topographic Maps, Regulatory Agency Records	Two of the current commercial structures have been developed (1234 and 1354 South Anaheim), with the remainder of the property occupied by orchards and undeveloped land
1972-1977	Aerial Photographs, City Directories, Topographic Maps, Regulatory Agency Records	All of the current commercial structures have been developed except 1280 South Anaheim
1983-Present	Aerial Photographs, City Directories, Topographic Maps, Regulatory Agency Records	Current commercial structures

Tenants on the subject property include various auto dealerships industrial businesses (1966-2014). For a complete list of former tenants, please refer to section 3.3.

Three areas of the subject property have historically been used for automotive dealership and/or automotive repair and auto body/collision operations: 1200 South Anaheim Boulevard, 1280-1300 South Anaheim Boulevard, and 1354 South Anaheim Boulevard. The current and historical automotive repair operations, including the use of hydraulic lifts and USTs, is considered a REC. These facilities are discussed further in Sections 4.1.1 and 4.2.2.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on December 18, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	***1938, 1947, 1953***	***Scale:***	***1"=500'***
Subject Property:	Appears to be agricultural land		
North:	Appears to be agricultural land across a road		
South:	Appears to be agricultural land		
East:	Appears to be agricultural land		
West:	Appears to be agricultural land across a road		

Date:	***1963***	***Scale:***	***1"=500'***
Subject Property:	Appears to be a commercial structure on the center west portion, with a parking lot in the center, agricultural land on the east and center portion, and an additional commercial structure on the south portion with a parking lot		
North:	Appears to be five commercial structures on the east portion, across East Ball Road, and a gas station to the northwest across an intersection		

Date: 1963	*Scale: 1"=500'*
South:	Appears to be a commercial structure on the west portion and a commercial structure on the east portion
East:	No significant changes visible
West:	Appears to be a gas station on the north portion, a parking lot on the center portion, six commercial structures and a gas station on the south portion, across Anaheim Boulevard

Date: 1972, 1977	*Scale: 1"=500'*
Subject Property:	Appears to be nine commercial structures, and parking areas throughout
North:	No significant changes visible
South:	No significant changes visible
East:	Appears to be vacant land on the north portion, four commercial structures on the south portion and an additional commercial structure to the southeast
West:	No significant changes visible

Date: 1987, 1990, 1995, 2005, 2009, 2012, 2016	*Scale: 1"=500'*
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	No significant changes visible
East:	Appears to be two commercial structures on the north portion, four commercial structures on the south portion and an additional commercial structure to the southeast
West:	No significant changes visible

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on December 18, 2019. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on December 18, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for the Subject Property	
Year(s)	**Occupant Listed**
1966	McPeek Chrysler Plymouth (1200 S Anaheim Boulevard); Hardin Oldsmobile (1300 S Anaheim Boulevard); McClures Lincoln Mercury, McClures Anaheim Continental, Mercury Comet, McClure Leasing Company (1354 S Anaheim Boulevard); United California Bank Orange County Branch Offices Artesia, South Anaheim Office (1234 South Anaheim Boulevard); Xerox Corp (1227 South Claudina Way)
1970	McPeek Chrysler, Service Dept (1200 S Anaheim Boulevard); Hardin Oldsmobile (1300 S Anaheim Boulevard); Mercury Cougar (1354 S Anaheim Boulevard); United California Bank Anaheim offices, South Anaheim Office (1234 South Anaheim Boulevard); Xerox Corp (1227 South Claudina Street)
1975	McPeek Chrysler Plymouth (1200 S Anaheim Boulevard); Hardin Oldsmobile (1300 S Anaheim

City Directory Search for the Subject Property

Year(s)	Occupant Listed
	Boulevard); Anaheim Datsun (1354 S Anaheim Boulevard); South Anaheim Industrial Office (1234 South Anaheim Boulevard)
1980	Hardin Honda, Oldsmobile (1300 S Anaheim Boulevard) Main Ofc (1354 S Anaheim Boulevard); Mal L Z (200 East Ball Road)
1986	Hardin Oldsmobile, Honda (1300 S Anaheim Boulevard); Main Ofc, Anaheim Nissan Datsun (1354 S Anaheim Boulevard); South Anaheim Industrial Office (1234 South Anaheim Boulevard)
1991	McPeek Chrysler Plymouth (1200 S Anaheim Boulevard); Hardin Honda, Oldsmobile (1300 S Anaheim Boulevard); Main Oic Leasing & Fleet Ofc, Trucks, Anaheim Nissan (1354 S Anaheim Boulevard); Day & Night Banking, South Anaheim Industrial Office (1234 South Anaheim Boulevard)
1995	McPeek Chrysler Plymouth (1200 S Anaheim Boulevard); Hardin Honda, Hardin Oldsmobile, GMC Trucks, Suzuki (1300 S Anaheim Boulevard); WW Auto Parts, Gaynors Imports, Professional Benz & Beemer (1354 S Anaheim Boulevard); Bryant Universal Roofing Inc (1227 Claudina Street); Bryant Universal Roofing Inc (1227 South Claudina Street)
2005	McPeeks Dodge of Anaheim (1200 S Anaheim Boulevard); Hardin Buick Pontiac GMC, Orange Blue Towing, Able Auto Glass, Warda Ihab Ahmed Abo (1300 S Anaheim Boulevard); Professional Auto Wrecking, Mercedes Benz Independent Service, BMW Professional Service Center, RKPR Enterprises, Apro Autos, WW Auto Parts, Shawn Varble Professional (1354 S Anaheim Boulevard); San Fernando Marble & Granite (1234 South Anaheim Boulevard); Ambassador Bus Sales (1280 S Anaheim Boulevard)
2010	Anaheim Auto Finance (1200 S Anaheim Boulevard); Pacific Coast Auto Fincl, Orange Blue Towing, Jordacity, Massive Dollar Plus USA, Hardin Buick Pontiac GMC, Premium Wheels USA (1300 S Anaheim Boulevard); Professional Auto Wrecking (1354 S Anaheim Boulevard); Anaheim Transportation Network (1280 S Anaheim Boulevard); Webcor Builders (1227 South Claudina Street)
2014	Anaheim Auto Finance, Rudys Auto Garage, Pro Lube, Star Auto Smog (1200 S Anaheim Boulevard); Get-n-wet, Jordacity, Hardin Buick Pontiac, GMC, Orange Blue Towing, Bobs Motor Home Rentals, Sand & Sea Toys, Recreational Resales, Andys Automotive (1300 S Anaheim Boulevard); Anaheim Resort Transit, Professional Auto Wrecking (1354 S Anaheim Boulevard); Anaheim Transportation Network (1280 S Anaheim Boulevard); Green Clean Water & Waste Services (1227 South Claudina Street)

According to the city directory review and other historical resources, the subject property has been occupied by various automotive related businesses, including auto dealerships and auto repair operations, from at least 1959 to present. For more information regarding the historical operations at the subject property, please refer to section 3.0.

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1955	Johnson Chase Service (107 West Ball Road)
1961	Stake 5 Vrosh Al Service (107 West Ball Road); Bell Pipe & Supply Co (215 East Ball Road)
1966	Daves Mobil Service (107 West Ball Road); Johnson Jack Chevron Service (1201 South Anaheim Boulevard); Market Basket (1221 South Anaheim Boulevard); Bell Pipe & Supply Co (215 East Ball Road)
1970	Franks Mobil Service (107 West Ball Road); Uhaul Co Dealer, Johnsons Jack Chevron (1201 South Anaheim Boulevard); AAA Uhaul Co Dir, Uhaul Co (1201 South Anaheim Boulevard);

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
	Market Basket (1221 South Anaheim Boulevard); Bell Pipe & Supply Co (215 East Ball Road)
1975	M&C Mobil Service Center (107 West Ball Road); Johns Chevron Standard Station, Anaheim Rentals (1201 South Anaheim Boulevard); Bell Pipe & Supply Co (215 East Ball Road)
1980	Saids Mobile (107 West Ball Road)
1986	LA Liquidators (1221 South Anaheim Boulevard)
1991	Burger King (1201 South Anaheim Boulevard); Freedom Furniture Clearance Warehouse (1221 South Anaheim Boulevard); Bell Pipe & Supply Co (215 East Ball Road)
1995	Burger King (1201 South Anaheim Boulevard); Best Furniture Warehouse (1221 South Anaheim Boulevard)
2005	7-Eleven (107 West Ball Road); N&A Restaurants (1201 South Anaheim Boulevard); Number 1 Design Nails, B&A Investments, Bayshore Financial, Fiesta Mexicana (1221 South Anaheim Boulevard); Y&W Enterprises (101 East Ball Road); Bell Pipe & Supply Co (215 East Ball Road)
2010	7-Eleven (107 West Ball Road); N&A Restaurants (1201 South Anaheim Boulevard); Tulare & 1st Fresno, La Mexicana Market (1221 South Anaheim Boulevard); Hau-en Ying (101 East Ball Road); Cashback Payday Advance (105 East Ball Road); Bell Pipe & Supply Co (215 East Ball Road)
2014	7-Eleven (107 West Ball Road); N&A Restaurants (1201 South Anaheim Boulevard); El Super, Fred Loya Insurance (1221 South Anaheim Boulevard); Hau-en Ying (101 East Ball Road); SR22 Car Insurance (105 East Ball Road); Bell Pipe & Supply Co (215 East Ball Road)

According to the city directory review, the adjacent properties have been occupied by gas stations and various industrial businesses. For more information regarding the adjacent property operations, please refer to section 4.2.3.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on December 18, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1896, 1898	
Subject Property:	Depicted as undeveloped land in a rural area
North:	Depicted as undeveloped land across a road
South:	Depicted as undeveloped land in a rural area
East:	Depicted as undeveloped land in a rural area
West:	Depicted as undeveloped land in a rural area

Date: 1901, 1902	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	Depicted as a rail road, beyond which is undeveloped land
West:	No significant changes depicted

Date:	***1935, 1942, 1949, 1950***
Subject Property:	Depicted as four structures on the west portion and agricultural land on the remaining portions
North:	Depicted as a structure across a road on the west portion and a structure across an intersection on the northwest portion
South:	Depicted as agricultural land
East:	Depicted as agricultural land
West:	Depicted as a structure and agricultural land across a road

Date:	***1965***
Subject Property:	Depicted as the current nine commercial structures
North:	Shaded to depict urban development across a road
South:	Depicted as two commercial structures
East:	Depicted as agricultural land
West:	Shaded to depict urban development across a road

Date:	***1972, 1981***
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	Depicted as two commercial structures
West:	No significant changes depicted

The current US topographic map (2012) is a graphic representation of The National Map digital data. Some features depicted on traditional topographic maps, such as pipelines and buildings, are absent because suitable data is not currently available.

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	Orange County Health Care Agency (OCHCA)
Point of Contact:	N/A
Agency Address:	1241 East Dyer Road, Santa Ana, California 92705
Agency Phone Number:	(714) 433-6000
Date of Contact:	December 24, 2019
Method of Communication:	Email
Summary of Communication:	

According to records reviewed, a 550-gallon waste oil UST and a 280-gallon waste oil UST were removed from the "back lot" of 1300 South Anaheim Street on December 7, 1989.

Petroleum Industry Consultants prepared a Tank Removal Excavation Report on April 25, 1988 for Harden Oldsmobile. According to the report, one soil sample was previously collected below the 280-gallon tank. The sample was analyzed for TPH and halogenated volatile organics. Analytical results included 8,500 ppm TPH and non-detect halogenated volatile organics. As further investigation, the UST pit was excavated to nine feet below ground surface, and five additional soil samples were taken. The samples were analyzed for TPH and purgeable halocarbons. All five samples were non-detect for TPH and halogenated VOCs. Contaminated soil removed from the tank pit was stockpiled. The stockpiled soil was not yet transported offsite at the time of completion of the report.

In a letter from OCHCA dated January 20, 1990, OCHCA determined that waste oil, xylene and trichloroethene contaminated soil were present on the subject property. OCHCA required that the site delineate the extent of contamination in soil and groundwater, and to determine the potential of vapor migration.

Petroleum Industry Consultants prepared a Tank Removal Excavation Report on February 6, 1990. A 550 gallon and a 280 gallon waste oil tanks were removed from two separate pits. Three soil samples were taken from below the tanks. Elevated levels of TPH were found below the 550-gallon tank including TPH above 10,000 ppm, 23.9 ppm xylene and 10 ppb trichloroethene. samples taken from the 280-gallon UST pit included 276 ppm TPH and non-detect BTXE. Excavation and deeper sampling were subsequently conducted on January 23, 1990. Six samples were taken during excavation. The highest concentration of TPH detected was 540 ppm, and purgeable aromatics and trichloroethene were non detect. Based on a leaching potential analysis, TPH was below allowable levels and no further action was required by the OCHCA.

On September 5, 1990, the OCHCA issued the responsible party, Walt Cadman, a no further action letter. The letter confirmed the completion of the site investigation and remediation action. The letter did not relieve liability due to the past, present or future operations at the property. The letter did not relieve responsibility of any previously unidentified conditions at the site. According to the letter, any proposed use of the site may require further site characterization.

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	Anaheim Fire Department (AFD)
Point of Contact:	N/A
Agency Address:	201 South Anaheim Boulevard, Anaheim, California 92805
Agency Phone Number:	(714) 765-4049
Date of Contact:	December 9, 2019
Method of Communication:	Email
Summary of Communication:	As of the date of this report, Partner has not received a response from the AFD for inclusion in this report.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	South Coast Air Quality Management District (AQMD)
Point of Contact:	N/A
Agency Address:	21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number:	(909) 396-2000
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the following subject property tenants were listed in the database:

Professional Benz & Beemer (1354 South Anaheim Boulevard) received a permit to operate a CFC-12 Recycling machine in 1996.

Hardin Oldsmobile (1300 South Anaheim Boulevard) received a permit to operate a CFC-12 Recovery machine in 1992, a photo resist developer in 1988, a spray booth with paint and solvent in 1984 and in 1964.

Sherwood Automotive Group (1300 South Anaheim Boulevard) was rejected applications to operate a drying oven, and two spray booth with paint and solvent in 2007.

Anaheim Nissan (1354 South Anaheim Boulevard) received a permit to operate a spray booth with paint and solvent in 1975, a service station dispensing gasoline in 1985, and an amine regeneration machine in 1985.

Pacific Bell Mobile Telephone Center was listed in the database with no permits or violations listed.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Santa Ana Regional Water Quality Control Board (RWQCB)
Point of Contact:	N/A
Agency Address:	3737 Main Street, Suite 500, Riverside California 92501
Agency Phone Number:	(951) 782-4130
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property, identified as Hardin Oldsmobile at 1300 Anaheim Boulevard, reported a release of waste oil, motor or lubricating oil on March 24, 1988. The release reportedly affected soil only, was remediated via excavation, and the case was closed on August 4, 1988. For more information regarding this leaking UST, please refer to section 4.1.1

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	N/A
Agency Address:	9211 Oakdale Avenue, Chatsworth, California
Agency Phone Number:	(818) 717-6500
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	The following subject property addresses were listed as producing hazardous waste

1200 South Anaheim Boulevard

The following hazardous waste was listed under the tenant name McPeeks Dodge of Anaheim
Aqueous solution with organic residues >10%: 2.85 tons in 1995, 5.63 tons in 1996, 4.52 tons in 1997, 6.06 tons in 1998, 4.06 tons in 1999, 3.19 tons in 2000
Aqueous solution with organic residues <10%: 0.017 tons in 1998, 1.15 tons in 1999, 0.42 tons in 2000, 0.798 tons in 2004
Unspecified aqueous solution: 1.61 tons in 1993, 5.22 tons in 1994, 2.91 tons in 1995,
Unspecified solvent mixture: 0.36 tons in 1993, 0.04 tons in 1995, 0.12 tons in 1996, 0.144 tons in 1997
Oil/water separation sludge: 0.417 tons in 1995, 0.73 tons in 1997, 0.05 tons in 2001, 0.05 tons in 2002, 0.05 tons in 2004
Other organic solids: 0.05 tons in 2001, 0.05 tons in 2002, 0.05 tons in 2004, 0.02 tons in 2007
Unspecified sludge waste: 0.166 tons in 2008
The tenant Anaheim Auto Finance was listed in the database with no hazardous waste tonnage reported.
The tenant Reyes Auto Repair was listed in the database with no hazardous waste tonnage reported.
The tenant Evelyn Edwards was listed in the database with no hazardous waste tonnage reported.

1213 South Claudina Street

The following hazardous waste was listed under the tenant name Pacific Bell Telephone Co., DBA AT&T
Off-specification, aged or surplus organics: 0.082 tons in 2006
Asbestos containing waste: 0.35 tons in 2006

Polychlorinated biphenyls: 0.66 tons in 2006
The following hazardous waste was listed under the tenant name AT&T
Other inorganic solid waste: 0.03 tons in 2013
Unspecified aqueous solution: 0.0042 tons in 2013
Off-specification, aged or surplus organics: 0.0033 tons in 2013
The tenant Pacific Bell was listed in the database with no hazardous waste tonnage reported.

1227 South Claudina Street
The following hazardous waste was listed under the tenant name Paramount Builders Supply, LLC
Off-specification, aged or surplus inorganics: 0.45 tons in 2012
Off-specification, aged or surplus organics: 0.05 tons in 2012
Aqueous solution with organic residues: 0.21 tons in 2014
Unspecified aqueous solution: 0.21 tons in 2014
The following hazardous waste was listed under the tenant name Webdor Builders and Webcor Builders
Unspecified aqueous solution: 1.63 tons in 2006
Off-specification, aged or surplus organics: 0.08 tons in 2006, 0.72 tons in 2007
Off-specification, aged or surplus inorganics: 1.45 tons in 2009
Waste oil and mixed oil: 0.209 tons in 2009
The tenant Green Clean Water & Waste Services Inc was listed in the database with no hazardous waste tonnage reported
The tenant Bryant Universal Roofing was listed in the database with no hazardous waste tonnage reported

1280 South Anaheim Boulevard
The following hazardous waste was listed under the tenant name Danny Mendoza
Off-specification, aged or surplus organics: 0.18 tons in 2004
The following hazardous waste was listed under the tenant name MV Public Transportation
Off-specification, aged or surplus organics: 0.105 tons in 2010, 0.09 tons in 2011, 0.06 tons in 2012
Unspecified organic liquid mixture: 0.187 tons in 2010
Other organic solids: 0.21 tons in 2010, 0.125 tons in 2011, 0.09 tons in 2012
The following hazardous waste was listed under the tenant name Ambassador Bus Sales Inc
Unspecified aqueous solution: 0.126 tons in 2003, 0.336 tons in 2004
Waste oil and mixed oil: 0.209 tons in 2002, 0.209 tons in 2003, 1.23 tons in 2004
Unspecified organic liquid mixture: 0.187 tons in 2003
The following hazardous waste was listed under the tenant name Anaheim Resort Transit Orange
Oil/water separation sludge: 4.17 tons in 2014
Other organic solids: 0.072 tons in 2013, 0.06 tons in 2014

1300 South Anaheim Boulevard
The tenant Maximo Lopez was listed in the database with no hazardous waste tonnage reported.
The tenant Andy's Auto Repair was listed in the database with no hazardous waste tonnage reported.
The following hazardous waste was listed under the tenant name Anaheim Redevelopment Agency:
Unknown: 0.688 tons in 2007
Other organic solids: 0.1 tons in 2007
The tenant Recreational Resales/Sand & Sea Toyz/Get n Dirty/Rentertoyz was listed in the database with no hazardous waste tonnage reported.
The tenant Andy's Auto was listed in the database with no hazardous waste tonnage reported.
The following hazardous waste was listed under the tenant name Anaheim Chevrolet:
Oil/water separation sludge: 3.33 tons in 2007

The following hazardous waste was listed under the tenant name Hardin Oldsmobile & Honda:
Aqueous solution with organic residues: 0.458 tons in 1995, 1.98 tons in 1996, 0.45 tons in 1997,
Unspecified Aqueous solution: 2.1 tons in 1995, 1.39 tons in 1998
Unspecified solvent mixture: 1.89 tons in 1993,
Oil/water separation sludge: 3.84 tons in 1998, 5.004 tons in 2000
Unspecified oil-containing waste: 0.22 tons in 1998
Off-specification, aged or surplus organics: 0.7 tons in 1998
Organic liquids with metals: 0.06 tons in 1998
Unspecified organic liquid mixture: 3.34 tons in 1995, 3.92 tons in 1996, 4.7 tons in 1997, 4.65 tons in 1998, 3.315 tons in 1999, 2.21 tons in 2000
Other organic solids: 0.8 tons in 1998, 0.185 tons in 2002, 0.16 tons in 2003, 0.17 tons in 2004
Oxygenated solvents: 0.28 tons in 2000
The tenant Bobs Motor Home Rentals was listed in the database with no hazardous waste tonnage reported.
The tenant Max Tires was listed in the database with no hazardous waste tonnage reported.
The tenant Cheno's Auto Repair was listed in the database with no hazardous waste tonnage reported

1354 South Anaheim Boulevard
The following hazardous waste was listed under the tenant name Anaheim Resort Transportation
Oil/water separation sludge: 0.83 tons in 2014
Other organic solids: 0.04 tons in 2015, 0.037 tons in 2016
The following hazardous waste was listed under the tenant name Farmers & Merchants Trust Co
Unspecified oil-containing waste: 2.08 tons in 2008
Off-specification, aged or surplus organics: 0.01 tons in 2008
Other organic solids: 0.32 tons in 2008
The tenant Gaynors Imports was listed in the database with no hazardous waste tonnage reported.
The tenant Donnell Automotive Group LLC DBA SC Auto Resale was listed in the database with no hazardous waste tonnage reported.
The tenant Schneider Motors was listed in the database with no hazardous waste tonnage reported.

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	Anaheim Building Department (ABD)
Point of Contact:	N/A
Agency Address:	200 Anaheim Blvd # 145, Anaheim, CA 92805
Agency Phone Number:	(714) 765-5139
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	Records were available for review, as further discussed in the following table.

Building Records Reviewed for 1200 South Anaheim Boulevard (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
12/31/63	Chrysler Corp.	Permit for a new car sales structure
1/3/64	Chrysler Corp.	Permit for a new car repair structure
2/18/64	Chrysler Corp	Sewer connection permit
7/7/65	McPeek Plymouth	Install sun screen

Regulatory Agency Data		
2/8/66	McPeek Plymouth	Install a fence
3/30/66	McPeek Plymouth	Install lighting
10/23/67	McPeek Plymouth	New car prep structure
5/25/95	Pao-yeh Lin	Relocate sign
11/22/95	Pao-yeh Lin	Relocate light fixtures
2/15/96	Pao-yeh Lin	Add foundation for parking lot lights
12/09/97	Pao-yeh Lin	Remove and replace roofing
1/6/05	Myung Kim	Install sign

Building Records Reviewed for 1280-1300 South Anaheim Boulevard (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
10/19/79	Hardin Honda	Permit for new HVAC system
4/9/80	Hardin Oldsmobile	Plumbing permit
9/11/80	Construct building	Construct auto show room
9/19/83	Hardin Honda	Add service shop, canopy, detail shop
3/5/84	Hardin Oldsmobile	Electrical permit
7/27/87	Hardin Honda	Permit for new HVAC
8/6/93	Hardin Oldsmobile	Add office building
9/9/93	N/A	New HVAC permit
6/16/09	Anaheim Redevelopment	Remove and reroof; connect electrical motor to propane gas dispenser
6/22/09	Anaheim Redevelopment	Tenant improvements

Building Records Reviewed for 1354 South Anaheim Boulevard (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
9/24/59	Marcellus	New auto agency building
12/8/59	RW MacCullin	Permit to construct building for air conditioning
1/3/63	McClure Anaheim	Permit to erect a sign
5/2/64	McClure	Construct car sales office
4/19/65	McClure	Add waiting room
8/17/65	Gladys Furie	Add auto parts storage
9/12/67	McClure's Lincoln	Permit to erect a sign
7/18/72	McClure's Lincoln	Plumbing permit
1/7/75	Anaheim Datsun	New HVAC permit
9/17/75	Anaheim Datsun	New awning
5/5/10	Glady's Furie Trust	Reroof
6/24/10	N/A	Tenant improvements
5/9/13	Atn Asset Holding Company	Tenant improvements
7/26/13	Atn Asset Holding Company	Tenant improvements
10/31/13	Atn Asset Holding Company	Tenant improvements
3/13/14	Atn Asset Holding Company	Plumbing permit
4/2/14	Atn Asset Holding Company	Electrical permit, relocate propane tank
6/18/15	N/A	Tenant improvements, replace liquified natural gas fueler

5/17/04	Wotka	Tenant improvement permit to office space

4.1.7 Planning Department

Regulatory Agency Data	
Name of Agency:	Anaheim Planning Department (APD)
Point of Contact:	N/A
Agency Address:	200 Anaheim Blvd # 145, Anaheim, CA 92805
Agency Phone Number:	(714) 765-5139
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is zoned C-G for commercial development by the City of Anaheim.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	N/A
Agency Address:	4800 Stockdale Highway, Bakersfield, California 93309
Agency Phone Number:	(916) 322-1080
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	According to DOGGR, the subject property is located within the oil/gas field identified as ABD. However, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Orange County Assessor (OCA)
Point of Contact:	N/A
Agency Address:	11 Civic Center Plaza, Santa Ana, California 92701
Agency Phone Number:	(714) 834-2727
Date of Contact:	December 26, 2019
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 082-461-23, -24, -25, -29, -31, -34, -38, -39. The current buildings were constructed in 1963-1964 and total approximately 86,540 square feet on a 13.15-acre lot.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N

4.2.2 Subject Property Listings

The subject property is identified as a Historical Underground Storage Tank (UST), Facility and Manifest Data (HAZNET), Resource Conservation and Recovery Act Non Generator / No Longer Regulated (RCRA NonGen/NLR), Leaking UST (LUST), CalEPA Regulated Site Hazardous (CERS HAZ) WASTE, Statewide Environmental Evaluation and Planning System (SWEEPS) UST, CA Facility Inventory Database (FID) UST, RCRA Small Quantity Generator (-SQG), Facility Index System (FINDS), Enforcement & Compliance History Information (ECHO), Emissions Inventory Data (EMI), Historical Hazardous Waste & Substance Site List (CORTESE), CERS site in the regulatory database report, as discussed below:

- The subject property, identified as McPeek Chrysler Plymouth at 1200 South Anaheim Boulevard, was listed as having a waste oil UST. The date of installation and the capacity were not listed. The tenant was also listed as producing 0.166 tons of unspecified sludge waste in 2008, 0.02 tons of organic solids in 2007, 0.05 tons of organic solids and 0.79 tons of aqueous solution with organic residues in 2004, and 0.05 tons of organic solids in 2002
- The subject property, identified as Green Clean Water & Waste Services Inc at 1227 South Claudina Street, was listed as no longer generating hazardous waste in 2015.
- The subject property, identified as Recreational Resales at 1300 South Anaheim Boulevard, was listed as no longer generating hazardous waste in 2018. The former tenant of the same address, Hardin Oldsmobile & Honda, reported a release of waste oil on March 24, 1988. The release was listed as affecting soil only, and the case was closed on August 4, 1988. Hardin also reported a

release of waste oil, xylene and other solvents on December 4, 1989. The release was listed as affecting soil only, and the case was closed on September 5, 1990. This address was listed as having a 2,000- to 2,500-gallon regular unleaded gas UST installed in 1964, a 150- to 280-gallon waste oil UST installed in 1964, and a 500- to 550-gallon waste oil UST installed in 1982. Hardin was listed as generating air emissions in 1987, 1990, 1993, 1995, 1996, 1997, 1998, 1999, 2000, 2001 and no longer generating hazardous waste in 2000. Hardin was listed as producing 0.175 tons of organic solids in 2004, 0.16 tons of organic solids in 2003, and 0.185 tons of organic solids in 2002. The former tenant at the same address, Sand & Sea Toyz received a violation during a fire department inspection in 2017, and received no violations during an inspection in 2014. For more information regarding the former releases at 1300 South Anaheim Boulevard, please refer to section 4.1.1.

- The subject property, identified as Quality Motorcars at 1354 South Anaheim Boulevard, was listed as generating small quantities of hazardous waste in 1993. The site received no violations during a fire department inspection in 1992.

4.2.3 Adjacent Property Listings

The adjacent property to the east is identified as a RCRA NonGen/NLR, CERS Hazardous WASTE, HAZNET, CERS, and Historical UST site in the regulatory database report, as discussed below:

- The property identified as Anacom General Corp. at 1240 South Claudina Street is located adjacent to the east of the subject property. This site was listed as no longer generating hazardous waste in 1994. The site was listed as producing 0.11 tons of waste oil in 2017, 0.03 tons of off-specification organics in 2017, 0.1 tons of organic solids in 2012, 0.01 tons of organic solids in 2010, and 0.11 tons of waste oil in 2010. The site received a violation during a fire department inspection in 2014, 2016, and 2018. The property, identified as Athletic Shoe Assembly, was listed as having a historical 2,000-gallon UST installed in 1981. The contents of the UST were not listed. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the south is identified as a CERS Hazardous Waste, EMI, CERS, RCRA-SQG, ICIS, and US AIRS site in the regulatory database report, as discussed below:

- The property identified as Texture Design Furniture at 1303 South Claudina Street is located adjacent to the south of the subject property. This site was listed as producing air emissions in 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2012, 2013, 2014, 2015, 2016, and 2017. The site received a violation during a fire department inspection in 2016, 2017, and received no violations in 2018. The site was listed as generating small quantities of hazardous waste in 1999. The site was listed as producing air emissions in 1987, 1990, 1997, 2000, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016 Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the north is identified as a Historical UST, CA FID UST, CERS, UST, SWEEPS UST, and RCRA NonGen/NLR site in the regulatory database report, as discussed below:

- The property identified as Bell Pipe & Supply Company and BPS Supply Group at 215 East Ball Road is located adjacent to the north of the subject property. This site was listed as having two historical USTs installed in 1980: 10,000-gallon unleaded gasoline and 10,000-gallon regular gasoline. The site received violations during fire department inspections in 2018, 2017, and 2015. The site was also listed as having a 10,000-gallon regular unleaded gasoline UST installed in 1988, and a 10,000-gallon premium gas UST installed in 1988. The site was listed as no longer generating hazardous waste in 2018. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the east is identified as a CPS-SLIC, CERS, Historical UST, Orange County Industrial Site, UST, LUST, HAZNET, RCRA-SQG, FINDS, ECHO, and Historical CORTESE site in the regulatory database report, as discussed below:

- The property identified as Aeroscientific Corporation/SMTEK International Inc, Formerly DDL Electronics at 1244 South Claudina Street is located adjacent to the east of the subject property. This site reported a release of dichloroethene (DCE), tetrachloroethylene (PCE), trichloroethylene (TCE), and chromium in 1992, which reportedly impacted soil and groundwater. Historical operations at the facility have included the design, manufacturing, and testing of electronic circuit boards and several sources of contamination were identified. In November 1995, the TCE concentrations in MW-5, the facility's farthest downgradient monitoring point, was 11,000 µg/L, indicating that a significant mass of TCE had migrated from the soil into the groundwater and was moving off-site. The initial on-site remediation, which consisted of operating a soil vapor extraction (SVE) system for removal of VOCs form the soil, was conducted from 1995 to 1998. The SVE system resumed operation in June 2006, continuing until September 2007. Data from MW-5 in 2013 indicated that the SVE system was largely successful in removing VOCs from the facility, thereby minimizing the further migration of contaminants into the groundwater. A Remedial Action Plan for the contaminants in groundwater was submitted in August of 2016 and a work plan for additional groundwater characterization was approved on December 1, 2016. The closest monitoring well to the subject property (MW5) is located 171 feet southeast of 1227 South Claudina Street and 385 feet east of 1300 South Anaheim Boulevard. Based on the relative distance to the subject property and inferred direction of groundwater flow, this listing is not expected to represent a significant environmental concern and it is unlikely that additional review of records for this site would alter the findings of this assessment.

The adjacent property to the south is identified as a RCRA-SQG, FINDS and ECHO site in the regulatory database report, as discussed below:

- The property identified as Koch, H & Sons at 1360 South Anaheim Boulevard is located adjacent to the south of the subject property. This site was listed as producing small quantities of hazardous waste in 1996. Based on the lack of a documented release, this listing is not expected

to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the east is identified as a RCRA NonGen/NLR, CERS Hazardous Waste, HAZNET and CERS site in the regulatory database report, as discussed below:

- The property identified as WW Grainger at 310 East Ball Road is located adjacent to the east of the subject property. This site was listed as generating 0.05 tons of unspecified solvent mixture in 2014, 0.059 tons of unspecified solvent mixture in 2011, and no longer generating hazardous waste in 2010. The site received a violation during a fire department inspection in 2017 and 2014. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the west is identified as a Historical UST, RCRA NonGen/NLR, EDR Historical Auto site in the regulatory database report, as discussed below:

- The property identified as Anaheim Datsun, Auto District, Bills Douglas Service at 100 Winston Road is located adjacent to the west of the subject property. This site was listed as a historical gas station from 1969 to 1971. The site was listed as having two 8,000-gallon gasoline USTs. The site was listed as no longer generating hazardous waste in 2018. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the northwest is identified as a LUST, Historical CORTESE, RCRA NonGen/NLR, EDR Historical Auto, Historical UST, UST, SWEEPS UST, CERS Hazardous Waste, CERS TANKS, CA FID UST, and CERS site in the regulatory database report, as discussed below:

- The property identified as 7-Eleven at 107 West Ball Road is located adjacent to the northwest of the subject property. This site reported a release of gasoline on August 7, 1995, which reportedly impacted soil only. Regulatory closure was obtained on July 28, 1997. The site also reported a second release of gasoline on May 18, 2006, which reportedly impacted soil only. Regulatory closure was obtained on August 15, 2008. The boundary of the property is approximately 103 feet northwest of the subject property boundary. Based on the lack of a documented release to groundwater, relative distance to the subject property and inferred direction of groundwater flow, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the west is identified as an EDR Historical Auto site in the regulatory database report, as discussed below:

- The property identified as Johns Chevron Service at 1201 South Anaheim Boulevard is located adjacent to the west of the subject property. This site was listed as a previous gas station facility from 1969 to 1983. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the west is identified as a CERS Hazardous Waste, HAZNET, CERS, RCRA NonGen/NLR site in the regulatory database report, as discussed below:

- The property identified as El Super at 1221 South Anaheim Boulevard is located adjacent to the west of the subject property. This site was listed as producing 0.015 tons of alkaline solution in 2016, 0.04 tons of off-specification organics in 2016, 0.004 tons of off-specification organics in 2014, and 0.0015 tons of off-specification organics in 2013. The site received a violation during a fire-department inspection in 2014, 2016, and no violation in 2019. The site was listed as no longer generating hazardous waste in 2013. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

The adjacent property to the east is identified as a RCRA NonGen/NLR site in the regulatory database report, as discussed below:

- The property identified as Mettler Electronics Corp at 1333 South Claudina Street is located adjacent to the east of the subject property. This site was listed as no longer generating hazardous waste in 1998. Based on the lack of a documented release, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Greenlaw Partners (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		**X**		
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a prospective purchaser, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

A key site manager was available to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

The User did not have specialized knowledge of environmental conditions associated with the subject property at the time of the assessment.

5.2.3 Actual Knowledge of the User

The User was not aware of environmental liens and/or AULs encumbering the subject property or in connection with the subject property at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

The User was not aware of any reductions in property value due to environmental issues.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Alexandra LaBouff
Site Assessment Conducted On:	December 20, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 1200 South Anaheim Boulevard (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
David Ortega	Key Site Manager	(714) 563-5287	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

Environmental concerns were identified during the onsite reconnaissance the storage, use, and generation of hazardous substances as further discussed in Sections 6.1 and 6.2.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located throughout the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Anaheim services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Anaheim Public Utilities and Southern California Gas Company.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite					
Substance	**Container Size**	**Location**	**Nature of Use**	**Disposal Method**	
Waste Oil	5x 55-gallon drum, 1x275-gallon tote	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
New Oil	3x275-gallon containers, 4x55-gallon	1354 S Anaheim Boulevard	Bus repair	N/A	
Gasoline	1x55-gallon drum	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Used oil filters	2x55-gallon drums	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Antifreeze	5x55-gallon	1354 S Anaheim Boulevard	Bus repair	N/A	
Used car batteries	8	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Parts washer degreaser	1x55-gallon drum	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Oily absorbent	1x55-gallon drums	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Empty drums	9x55-gallons	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Used aerosol cans	2x55-gallon	1354 S Anaheim Boulevard	Bus repair	Transported regularly	off-site
Waste oil	12x55-gallon	1300 S Anaheim	Auto repair	Transported	off-site

Hazardous Substances and/or Petroleum Products Noted Onsite					
Substance	**Container Size**	**Location**	**Nature of Use**	**Disposal Method**	
		Blvd		regularly	
Used oil filters	5x55-gallon	1300 S Anaheim Blvd	Auto repair	Transported regularly	off-site
Parts washer	Two	1300 S Anaheim Blvd	Auto repair	Transported regularly	off-site
Empty drums	4x55-gallon	1300 S Anaheim Blvd	Auto repair	Transported regularly	off-site
Used oil filters	1x25-gallon	1200 S Anaheim Blvd	Auto repair	Transported regularly	off-site
Lubricating oil	Various retail gallon containers	1200 S Anaheim Blvd	Auto repair	N/A	
Waste oil	4x55-gallon drums, 1x275-gallon tote	1200 S Anaheim Blvd	Auto repair	Transported regularly	off-site
Empty drums	2x55-gallon	1200 S Anaheim Blvd	Auto repair	Transported regularly	off-site

The materials were found to be improperly labeled and stored at the time of the assessment with signs of leaks, stains, and spills. Secondary containment is not provided. Based on the duration of operations and significant staining observed, the current and former auto repair operations at the subject property represent a REC. For more information regarding former subsurface investigations at 1300 South Anaheim Boulevard, please refer to section 4.1.1.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Partner observed two waste oil ASTs at 1354 South Anaheim Boulevard. Significant staining was observed in the vicinity of the ASTs. Based on the duration of operations and significant staining observed, the current and former operations at 1354 South Anaheim Boulevard represent a REC.

A waste oil tank is referenced in the regulatory database for the 1200 South Anaheim Boulevard address. No records were found for this address at the Orange County Health Care Agency (OCHCA), and the date of installation, capacity, location, and disposition of the UST are not known. Therefore, this UST represents a REC.

According to records reviewed, a 550-gallon waste oil UST and a 280-gallon waste oil UST were removed from the "back lot" of 1300 South Anaheim Street on December 7, 1989. Regulatory closure for these USTs was issued in 1988 and 1990; however, Partner notes that sampling of soil vapor was not conducted or required at that time. In addition, the regulatory database indicates that a 2,000- to 2,500-gallon unleaded gasoline UST was installed at the 1300 South Anaheim Boulevard address in 1964. The location and current disposition of this UST are not known. In the absence of closure or sampling records for this UST, it is considered a REC. For more information regarding former subsurface investigations at 1300 South Anaheim Boulevard, please refer to section 4.1.1.

6.2.3 Evidence of Releases

Partner observed significant staining in the hazardous waste storage areas of 1300 and 1354 South Anaheim Boulevard. Based on the duration of operations and significant staining observed, the current and former auto repair operations represent a REC. For more information regarding former subsurface investigations at 1300 South Anaheim Boulevard, please refer to section 4.1.1.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

Partner observed four portable lifts 1354 South Anaheim Boulevard, eight aboveground lifts at 1300 South Anaheim Boulevard and two aboveground lifts and one in-ground lift at 1200 South Anaheim Boulevard. No staining or leakage was observed in the vicinity of the lifts.

No other potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

Partner observed a catch basin at 1354 South Anaheim Boulevard and was formerly used to treat wastewater streams generated from the bus repair operations. Bus repair operations are no longer in the area of this catch basin. The installation date of the catch basin is not known.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

Partner observed evidence of former in-ground lifts at 1200 South Anaheim Boulevard. The site contact was not aware of sampling done at the time of removal.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. Construction materials including, but not limited to, thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building and that have not been appropriately tested may be considered "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed beginning in 1959 and may have asbestos containing materials (ACMs: materials containing >1% asbestiform components determined by the EPA 600/R-93/116 Method using Polarized Light Microscopy) present. The table below outlines suspect ACM that is generally found in buildings of this age:

Suspect ACM
Drywall Systems
Vinyl Floor Tiles/Mastic
Acoustical Ceiling Panels
Stucco

Based on the dates of construction of the subject property buildings, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property buildings (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 3. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by Anaheim Public Utilities serves the subject property vicinity. According to the 2016 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Anaheim are surface water from the Colorado River and Northern California and groundwater from local wells. According to the City of Anaheim and the 2019 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. With the exception of the item discussed below, no items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

6.4.1 ASTs/USTs for Hazardous Substances or Petroleum Products

Partner observed a 7-Eleven gas station adjacent to the northwest of the subject property. Please refer to section 4.2.3 for more information regarding this property.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Three areas of the subject property have historically been used for automotive dealership and/or automotive repair and auto body/collision operations: 1200 South Anaheim Boulevard, 1280-1300 South Anaheim Boulevard, and 1354 South Anaheim Boulevard. These three locations are discussed below.

  The 1200 South Anaheim Boulevard parcel of the subject property has operated as an auto repair facility since at least 1964. The regulatory database report identified a former subject property tenant, McPeek Chrysler Plymouth at 1200 South Anaheim Boulevard, as the location of a waste oil UST. No records were found for this address at the Orange County Health Care Agency (OCHCA), and the date of installation, capacity, location, and disposition of the UST are not known. This facility was listed as producing the following hazardous wastes in the DTSC Hazardous Waste Tracking System (HWTS) database: aqueous solution with organic residues >10% (1995-2000), aqueous solution with organic residues <10% (1998 to 2004), unspecified aqueous solution (1993-1995), unspecified solvent mixture (1993 to 1997), oil/water separation sludge (1995-2004), other organic solids (2001-2007), and unspecified sludge waste (2008). During the onsite reconnaissance, Partner observed significant staining in the auto repair bays. An in-ground hydraulic lift was observed, and evidence of additional former in-ground lifts was observed. Based on the assumed date of installation, there is a potential for PCBs to have been present in the hydraulic fluid used in current and/or former lifts. Considering the duration of auto repair operations, significant staining observed, and the lack of information regarding the UST's location and disposition, the current and former operations at 1200 South Anaheim Boulevard represent a REC.

  The 1354 South Anaheim Boulevard parcel operated as an automobile dealership with automotive repair and collision operations from at least 1959 to 2005. Later uses included automotive wrecking (2005 to 2014) and bus repair (2014-present). The following wastes were reported to have been generated at this address in the DTSC's HWTS database: oil/water separation sludge (2014), other organic solids (2015-2016), unspecified oil-containing waste (2008), off-specification, aged or surplus organics (2008), other organic solids (2008). It was listed in the database report as generating small quantities of hazardous waste in 1993. The site received no violations during a fire department inspection in 1992. OCHCA records did not reveal evidence of USTs at this address. During the onsite reconnaissance, Partner observed five 55-gallon drums and a 275-gallon tote of waste oil, three 275-gallon containers and four 55-gallon containers of new oil, a 55-gallon drum of gasoline, two 55-gallon drums of used oil filters, five 55-gallon drums of antifreeze, eight used car batteries, a parts washer, one 55-gallon drum of oily

absorbent, nine empty 55-gallon drums, two 55-gallon drums of used aerosol cans. Partner observed two waste oil ASTs at 1354 South Anaheim Boulevard. Significant staining was observed in the vicinity of the ASTs. Although evidence of underground storage tanks and in-ground lifts were not observed during the site reconnaissance, there is a potential for previously unknown USTs or other subsurface features to be encountered during future redevelopment activities due to the long history of vehicle repair operations. A catch basin was observed to have staining around its opening. The reported oil/water separator sludge waste indicates the potential for a clarifier to be present. Based on the duration of these operations, and the staining observed, the potential for impacts from the current and former automotive-related operations cannot be ruled out and are considered a REC.

The 1280-1300 South Anaheim Street property operated as an automobile dealership and/or automotive repair and collision operations from at least 1964 to present. According to records reviewed, a 550-gallon waste oil UST and a 280-gallon waste oil UST were removed from the "back lot" of 1300 South Anaheim Street on December 7, 1989. Petroleum Industry Consultants prepared a Tank Removal Excavation Report on April 25, 1988 for Harden Oldsmobile. According to the report, one soil sample was previously collected below the 280-gallon tank. The sample was analyzed for TPH and halogenated volatile organics. Analytical results included 8,500 ppm TPH and halogenated volatile organics below the laboratory detection limits. As further investigation, the UST pit was excavated to nine feet below ground surface, and five additional soil samples were taken. The samples were analyzed for TPH and purgeable halocarbons. All five samples were non-detect for TPH and halogenated VOCs. Contaminated soil removed from the tank pit was stockpiled. The stockpiled soil was not yet transported offsite at the time of completion of the report.

In a letter from OCHCA dated January 20, 1990, OCHCA determined that waste oil, xylene and trichloroethene contaminated soil were present on the subject property. OCHCA required that the site delineate the extent of contamination in soil and groundwater, and to determine the potential of vapor migration.

Petroleum Industry Consultants prepared a Tank Removal Excavation Report dated February 6, 1990, which documented the removal of a 550-gallon waste oil UST and a 280-gallon waste oil UST from two separate pits on December 4, 1989. Two soil samples were taken from below the 550-gallon UST, and one was collected from beneath the 280-gallon UST. The soil sample collected from the 280-gallon UST pit contained 276 ppm TPH and non-detectable benzene, toluene, ethylbenzene, xylenes (BTEX), and non-detectable halogenated VOCs, and no further action was required by the OCHCA. Elevated levels of TPH were found below the 550-gallon tank including TPH concentrations of 10,100 and 11,000 ppm, 23.9 ppm xylene and 10 ppb trichloroethene. Excavation and deeper sampling were subsequently conducted on January 23, 1990 at the 550-gallon UST pit. Excavation proceeded to a depth of 10 feet bgs, until field evidence (odor) of waste oil was no longer observed. Six soil samples were taken from the bottom and walls of the excavation. The highest concentration of TPH detected in the soil samples was 540 ppm, and purgeable aromatics and trichloroethene were non-detectable. Based on a leaching potential analysis, TPH was below allowable levels and no further action was

required by the OCHCA.

On September 5, 1990, the OCHCA issued the responsible party, Walt Cadman, a no further action letter for the 280-gallon and 550-gallon waste oil USTs. However, Partner notes that soil vapor sampling was not previously required to be evaluated. If redevelopment activities are proposed, sampling to evaluate soil vapor conditions related to the former waste oil USTs would be warranted.

In addition, the regulatory database indicates that a 2,000- to 2,500-gallon unleaded gasoline UST was installed at the 1300 South Anaheim Boulevard address in 1964. The location and current disposition of this UST are not known. In the absence of closure or sampling records for this UST, it is considered a REC.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

- Due to the age of the subject property buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint (LBP) are present. Readily visible suspect ACMs and painted surfaces were observed in good condition. Prior to the disturbance of any suspect ACM or LBP at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired or removed, a licensed abatement contractor should be consulted.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1200 South Anaheim Boulevard in Anaheim, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- A limited subsurface investigation should be conducted in order to determine the presence or absence of soil, soil vapor, and/or groundwater contamination due to the historical use of the subject property.
- Prior to redevelopment of the property, the in-ground hydraulic lift should be properly removed from the subject property. Confirmatory sampling would be necessary to determine the current conditions of soil and/or groundwater due to the use of current and former hydraulic lifts at the subject property.
- Prior to the disturbance of any suspect ACM or LBP at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired or removed, a licensed abatement contractor should be consulted.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 1200 South Anaheim Boulevard in Anaheim, Orange County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

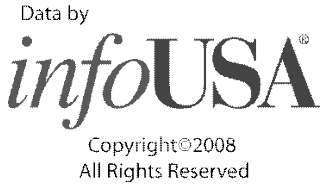

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0154-4BBC-A873

Subject: Remedial Action at 1300 S. Anaheim, Anaheim, CA

Dear Mr. Hardin:

This is in response to your request for a confirmation of the completion of this remediation project. With the provision that the results obtained during the site investigation were accurate and representative of existing conditions, it is the position of this office that remediation of soil contamination has been completed.

It should be pointed out that this letter does not relieve you of any responsibilities under the California Health and Safety Code if additional or previously unidentified contamination is discovered at the subject site.

If you have any questions regarding this matter, please contact Paul Brewer at (714) 834-8414.

Very truly yours,

John J. Hills

INSTRUCTIONS

EMERGENCY
Indicate whether emergency response personnel and equipment were involved at any time. If so, a Hazardous Material Incident Report should be filed with the State Office of Emergency Services (OES) at 2800 Meadowview Road, Sacramento, CA 95832. Copies of the OES report form may be obtained at your local underground storage tank permitting agency. Indicate whether the OES report has been filed as of the date of this report.

LOCAL AGENCY ONLY
To avoid duplicate notification pursuant to Health and Safety Code Section 25180.7, a designated government employee should sign and date the form in this block. A signature here does not mean that the leak has been determined to pose a significant threat to human health or safety, only that notification procedures have been followed if required.

REPORTED BY
Enter your name, telephone number, and address. Indicate which party you represent and provide company or agency name.

RESPONSIBLE PARTY
Enter name, telephone number, contact person, and address of the party responsible for the leak. The responsible party would normally be the tank owner.

SITE LOCATION
Enter information regarding the tank facility and surrounding area. At a minimum, you must provide the facility name and full address.

IMPLEMENTING AGENCIES
Enter names of the local agency and Regional Water Quality Control Board involved.

SUBSTANCES INVOLVED
Enter the name and quantity lost of the hazardous substance involved. Room is provided for information on two substances if appropriate. If more than two substances leaked, list the two of most concern for cleanup.

DISCOVERY/ABATEMENT
Provide information regarding the discovery and abatement of the leak.

SOURCE/CAUSE
Indicate source(s) of leak. Provide details on tank age; capacity and material if known. Check box(es) indicating cause of leak.

CASE TYPE
Indicate the case type category for this leak. Check one box only. Case type is based on the most sensitive resource affected. For example, if both soil and ground water have been affected, case type will be "Ground Water". Indicate "Drinking Water" only if one or more municipal or domestic water wells have actually been affected. A "Ground Water" designation does not imply that the affected water cannot be, or is not, used for drinking water, but only that water wells have not yet been affected. It is understood that case type may change upon further investigation.

CURRENT STATUS
Indicate the category which best describes the current status of the case. Check one box only. The response should be relative to the case type. For example, if case type is "Ground Water", then "Current Status" should refer to the status of the ground water investigation or cleanup, as opposed to that of soil.

IMPORTANT: THE INFORMATION PROVIDED ON THIS FORM IS INTENDED FOR GENERAL STATISTICAL PURPOSES ONLY AND IS NOT TO BE CONSTRUED AS REPRESENTING THE OFFICIAL POSITION OF ANY GOVERNMENTAL AGENCY

REMEDIAL ACTION
Indicate which actions have been used to cleanup or remediate the leak. Descriptions of options follow:

Cap Site - install horizontal impermeable layer to reduce rainfall infiltration.
Containment Barrier - install vertical dike to block horizontal movement of contaminant.
Excavate and Dispose - remove contaminated soil and dispose in approved site.
Excavate and Treat - remove contaminated soil and treat (includes spreading or land farming).
Remove Free Product - remove floating product from water table.
Pump and Treat Groundwater - generally employed to remove dissolved contaminants.
Enhanced Biodegradation - use of any available technology to promote bacterial decomposition of contaminants.
Replace Supply - provide alternative water supply to affected parties.
Treatment at Hookup - install water treatment devices at each dwelling or other place of use.
No Action Required - incident is minor, requiring no remedial action.

COMMENTS - Use this space to elaborate on any aspects of the incident.
SIGNATURE - Sign the form in the space provided.
DISTRIBUTION

If the form is completed by the tank owner or his agent, retain the last copy and forward the remaining copies in tact to your local tank permitting agency for distribution.

1. Original - Local Tank Permitting Agency
2. State Water Resources Control Board, Division of Water Quality, Underground Tank Program, P. O. Box 100, Sacramento, CA 95801
3. Regional Water Quality Control Board

WASTE MANAGEMENT SECTION

MG — 5/22/88 — 88-128
Plan Reviewed By — Date — Plan #

This approval shall not be construed to permit the violation of any law, nor does it prevent further corrections of errors found on the plans. Plans must be resubmitted for approval if any additional changes are made by the applicant.

In addition to this approval, all applicable permits required by the local fire department, building department, and the Air Quality Management District must be obtained.

Underground tank installation, removal, and repair inspections are required and must be scheduled 48 hours in advance. Telephone (714) 834-8175.

A copy of these approved plans must be available at the site at all times.

All piping associated with underground storage tanks shall be removed and properly disposed of.

INTRODUCTION

Representatives from Hardin Oldsmobile contracted with Deep, Inc. to remove from their property two (2) underground storage tanks (see Figure 1; Site Location Map). Tank removal operations were conducted on Monday, December 4, 1989. Upon excavation, one (1) 550 gallon and one (1) 280 gallon waste oil tank, were uncovered and removed from separate tank pits. In accordance with Orange County Health Care Agency (O.C.H.C.A) permit 89PC416, three (3) soil samples (1-1, 1-2, 2-1) were recovered from under the tanks and quantitatively analyzed to document the subsurface soil conditions. Because samples 1-1 and 1-2 recovered from below the 550 gallon tank measured elevated total petroleum hydrocarbon (TPH) concentrations, excavation/deeper sampling operations were conducted Friday, January 23, 1990. Slightly elevated tph concentrations were also detected in sample 2-1 recovered from below the 280 gallon tank. However, a leaching potential analysis (Appendix A) was conducted and no further action was required by Orange County (Appendix A).

Petroleum Industry Consultants (PIC) was contracted (in-house job #E1485) to provide a geologist on site to: 1) conduct a visual inspection of lithology; 2) recover the specified soil samples, 3) oversee subsequent laboratory testing of all soil samples; and 4) prepare this geologic report of tank removal and excavation operations. This report documents the field procedures and test results for soil samples recovered during the tank removal/excavation operations and laboratory evaluation of this tank pit site.

PROCEDURE

Tank pit excavation was completed the afternoon of December 4,1989. A backhoe was used to remove soil from above and beside the two waste oil tanks (see Figure 2; Site Sketch Map). Both tanks were certified as rinsed and clean by a marine chemist from Environmental Services (#492-1,492-2). Approval to proceed with tank removal operations was obtained from on-site fire inspector Jeff Binder. The tanks were loaded onto trucks by a backhoe and transported to an appropriate tank disposal site. An identification tag attached to the 280 gallon tank indicated that it was assigned U.L. #H839587. No other identification data was available. To facilitate transport and visual inspection for structural integrity, the sides and bottom of each tank were scraped to remove excess soil. Both tanks appeared in good condition, exhibiting some rust but no obvious holes or cracks. However, there was some field evidence (odor and discoloration) of oil contamination in tank pit soil. After the tanks had been removed from the tank pits, PIC environmental geologist, Mr. Matt Naftaly, recovered three (3) soil samples (1-1, 1-2, and 2-1) from beneath the tanks at a depth of 2 feet below tank bottom. Sampling was conducted under the supervision of on-site Orange County Health Inspector Terry Goewert. The samples were collected in glass jars, sealed with teflon lined lids and Orange County evidence tape, placed on ice, and transported to Terra Tech Labs, Inc. for specified testing and analysis (see Appendix B; Chain of Custody). Tank removal and soil sampling operations were completed by 2:00 p.m. and the representative from PIC was

released from the site.

Because elevated TPH concentrations were measured in samples 1-1 and 1-2 (see Appendix C for laboratory results), Matt Naftaly returned to the site January 23, 1989 to assist with excavation of petroleum contaminated soil from the larger, southern tank pit. Contaminated soil was excavated from the bottom and sides of the pit using a backhoe. Excavation proceeded to a depth of 10 feet below surface at which depth field evidence (odor) of waste oil contamination was no longer present. Sample X1 was recovered from the bottom of the tank pit and given immediately to the onsite Enseco-CRL mobile laboratory for tph analysis. Because the sample exhibited a background tph concentration of 3 ppm., O.C.H.C.A. inspector Mike O' Donald was contacted to witness final sampling. Two additional samples X2 and X3 were recovered from the bottom of the tank pit under the supervision of Mr. O'Donald. Samples X4 and X5 were recovered from the east wall of the tank pit at a depth of 5 feet and 10 feet, respectively. Sample X6 was recovered from the north wall of the excavation pit at a depth of less than one foot below surface (Figure 2A: excavation sketch map). The six soil samples were placed in glass jars, sealed with teflon lined lids and given immediately to the mobile laboratory for quantitative analyses (appendix B).

GEOLOGY

A visual inspection of the stratigraphy exposed along the sides and bottom of the excavation pit revealed that the predominant soil type from ground surface to a depth of 10 feet consists of fine grained, moist, moderately cohesive, mica-rich silt. The backfill material in the pit consisted of native soil.

The elevation of the tank pit site is approximately 149 feet above sea level; the surrounding topography slopes gently to the southwest (Figure 1; Area Topographic Map). The groundwater contour map published by the Orange county Water District shows the most likely direction of groundwater flow to be southwesterly as well (see Figure 3: Groundwater Contour Map). Depth to the first principal aquifer beneath the site is approximately 129 feet below surface; perched zones may occur at shallower depths.

LABORATORY RESULTS AND CONCLUSIONS

All three of the soil samples recovered during tank removal operations December 4, 1989 were transported to Terra Tech Laboratories, 16371 Gothard Street, Suite G, Huntington Beach for quantitative analysis of tph via EPA method 418.1, purgeable aromatics via EPA method 8020, and purgeable halocarbons via EPA method 8010. Samples 1-1 and 1-2, recovered from below the 550 gallon tank, measured elevated tph concentrations of 11000 ppm and 10100 ppm, respectively. All other contaminants were not detected except for xylene (23.9 ppm in 1-2) and trichloroethene

(10 ppb in 1-1). Sample 2-1, recovered from below the 280 gallon tank, measured a tph concentration of 276 ppm. No other contaminants were detected (see Appendix C; Laboratory Results). The six soil samples recovered during excavation, January 23, 1990, were given directly to the on-site Enseco -CRL Mobile Laboratory. All of the samples were tested for tph via EPA method 418.1. Samples X2, X3, and X6 were tested for purgeable aromatics via EPA method 8020. Samples X2 and X3 were tested for trichloroethene via EPA method 8010. All of the samples exhibited tph concentrations below 10 ppm except for X6 which measured a tph concentration of 540 ppm. All other tests measured non-detectable concentrations of the targeted contaminants.

Laboratory results and field evidence indicate that all significant soil contamination has been removed from the tank pit. Although sample X6 measured an elevated tph concentration (540ppm), it was below the "allowable levels" established by leaching potential analysis (1000 ppm). The contaminated soil excavated from the tank pit (approximately 15 cy) was stockpiled at the site and covered with plastic. The client is considering disposal and treatment options. After abatement of excavated soil, PIC recommends that no further action be required for site closure.

This report is proprietary and confidential, to be delivered to, and intended for the exclusive use of, the above named client only. Petroleum Industry Consultants, Inc. assumes no responsibility nor liability for the reliance herein or use hereof by anyone other than the above named client. In addition,

all of the lab work cited in this report was prepared under the supervision of Lisa Newcombe-Dierl of Terra Tech Laboratories, Huntington Beach, and Bill Jeong of Enseco - CRL, Garden Grove and are solely responsible for the contents and conclusions of the laboratory data.

Should you have any questions or comments regarding the procedures or results outlined in this report, please do not hesitate to call us at 714/842-6331.

Respectfully submitted,

APPENDIX A:

LEACHING POTENTIAL ANALYSIS

Table 2-2
Leaching Potential Analysis for Diesel
Using Total Petroleum Hydrocarbons(TPH)
and Benzene, Toluene, Xylene and Ethylbenzene (BTX&E)

The following table was designed to permit estimating the concentrations of TPH and BTX&E that can be left in place without threatening ground water. Three levels of TPH and BTX&E concentrations were derived (from modeling) for sites which fall into catagories of low, medium or high leaching potential. To use the table, find the appropriate description for each of the features. Score each feature using the weighting system shown at the top of each column. Sum the points for each column and total them. Match the total points to the allowable BTX&E and TPH levels.

SITE FEATURE	SCORE 10 PTS IF CONDITION IS MET		SCORE 9 PTS IF CONDITION IS MET		SCORE 5 PTS IF CONDITION IS MET	
Minimum Depth to Ground Water from the Soil Sample (feet)	10	>100		51-100		25-50\1
Fractures in subsurface (applies to foothills or mountain areas)	10	None		Unknown		Present
Average Annual Precipitation (inches)		<10	9	10-25		26-40\2
Man-made conduits which increase vertical migration of leachate		None	9	Unknown		Present
Unique site features: recharge area, coarse soil, nearby wells, etc		None	9	At least one		More than one
COLUMN TOTALS→TOTAL PTS	20	+	27	+	0	= 47
RANGE OF TOTAL POINTS	49pts or more		41 - 48 pts		40pts or less	
MAXIMUM ALLOWABLE B/T/X/E LEVELS (PPM)	1/50/50/50		.3/.3/1/1		NA\3	
MAXIMUM ALLOWABLE TPH LEVELS (PPM)	10000		1000		100	

\1 If depth is greater than 5 ft. but less than 25 ft., score 0 points. If depth is 5 ft. or less, this table should not be used.
\2 If precipitation is over 40 inches, score 0 points.
\3 Levels for BTX&E are not applicable at a TPH concentration of 100ppm

Re: Hardin Oldsmobile and Honda
1300 South Anaheim Boulevard
Anahiem, California

Dear Mr. O'Donald:

Petroleum Industry Consultant's, Inc. (PIC) has been contracted to assist Deep, Inc. with site assessment/remediation obligations at the referenced property. As you know, two waste oil underground storage tanks (550 gallon and 280 gallon capacities) were removed from separate tank pits December 4, 1989. Samples recovered from below the 550 gallon tank exhibited total petroleum hydrocarbon (tph) concentrations greater than 10,000 ppm. A sample recovered from below the 280 gallon tank exhibited a tph concentration of 276 ppm with non-detectable btxe and purgeable halocarbons as tested by EPA methods 418.1, 8020, and 8010, respectively (see laboratory results attached).

The client intends to excavate contaminated soil from the 550 gallon tank pit. Because the contaminant levels encountered below the 280 gallon tank were relatively low, PIC has conducted a leaching potential analysis (attached). Data for the analysis was obtained from the attached groundwater contour and topographic maps. The analysis indicates that the allowable contaminant concentrations at the site are 1000 ppm tph and .3 ppm, .3 ppm, 1 ppm, and 1 ppm for b, t, e, and x, respectively. Therefore, PIC recommends that the client be granted closure on the 280 gallon tank pit without imposing additional assessment/remedial obligations.

If the attached analysis is acceptable please advise PIC at

1/17/90
Received phone call from Mike O'Donald @ 8:45 a.m. He advised he concurred/agreed with this report and recommendations. He has accepted recommendation for 280 gallon tank to take no further action. He wants to be advised prior to excavation of 550 gal. pit

your earliest convenience. You will be notified a minimum of 48 hours prior to commencement of proposed excavation operations.

Matt Naftaly

SUBJECT: Notification of Responsibility for Reimbursement for Costs Incurred in Administering the Underground Storage Tank Cleanup Program for Hardin Olds/Honda, 1300 S. Anaheim Blvd., Anaheim, CA - O.C.H.C.A. Case #90UT1

The purpose of this letter is to inform responsible parties that the Orange County Health Care Agency has entered into an agreement with the State of California to oversee the cleanup of contaminated sites resulting from the unauthorized release of hazardous substances from underground storage tanks. The cleanup of these sites is necessary to protect the public and environment from unnecessary exposure to hazardous chemicals.

The above subject site was placed in the Local Oversight Program (formerly Pilot Program) prior to January 1, 1991. Our records indicate that you did not receive a Notice of Reimbursement from this Agency that would require you to reimburse the State Water Resources Control Board for all costs incurred by any and all State and local agencies while overseeing the cleanup of your site.

The cleanup program developed by Orange County is funded by State and Federal monies and is subject to the Reimbursement requirements associated with the use of these funds. In order to comply with the reimbursement requirement, it will be necessary to account for all time and materials expended by County staff at each cleanup site. On a routine basis, site specific amounts detailing the time and expenses expended for each site will be provided to the State. The state will then invoice the responsible party for all direct and indirect costs associated with the cleanup of the site.

For your information, please find the attached Notice of Reimbursement. This is your formal notification concerning reimbursement requirements for the responsible party. If any of the information contained in the Notice of Reimbursement is incorrect, or if you have any questions regarding the reimbursement requirements, please contact the Underground Storage Tank Cleanup Program at (714) 667-3700.

Subject: Remedial Action At 1300 South Anaheim Blvd. Anaheim, CA - O.C.H.C.A. Case #90UT1

Dear Mr. Cadman:

This letter confirms the completion of site investigation and remedial action at the above site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Michael O'Donnell at (714) 667-3715.

Very truly yours,

Livio F. Davanzo, Ph.D., R.E.A.

Case: I.D.: 900T1

SUMMARY SITE CLOSURE RATIONALE

Facility Name: Hardin Olds Resources affected: X Soil ___ Groundwater

Address: 1300 S. Anaheim Blvd, Anaheim

Current Land Use Commercial Future Land Use Same?

Current Adjacent Land Use: ? Future Adjacent Use ?

Resources affected: X Soil ___ Groundwater

Highest Initial/Final Concentrations (mg/kg) of Each Contaminant in Soil:

(Name)	(Conc.)	(Name)	(Conc.)
TPH-waste oil	11,000 / 540	Trichloroethene	.010 / ND
Xylene	23.9 / ND	BTE (benzene, toluene, ethylbenzene)	ND / ND

Extent of Contamination (Lateral And Vertical) - Areal 10 x 10 x Vertical 10

Soil Type: Silt and Sand Deepest Boring N/A

Depth To Groundwater: 110 Ft. (___ Measured By Borings, X Estimated)

Hydrogeologic Conditions: X Forebay ___ Pressure Zone

___ Hills ___ Near O.C.W.D. Recharge Zones

Special Conditions: None

Describe Cleanup Efforts: Two waste oil tanks were removed 12-4-89. One tank had 276 TPH (ppm) and ND 8010 and ND BTXE in the bottom of the excavation. The other tank had 11,000 ppm TPH, 23.6 ppm Xylenes, and .010 ppm trichloroethene in the bottom of the excavation; after further excavation, the bottom of excavation sample here had 540 ppm TPH and ND BTXE + ND 8010.

Rationale For Closure: According to the LUFT manual LPA, ~~for~~ bottom of excavation samples below 1000 ppm TPH can be left in place for this site; the highest level now in the excavation is 540 ppm TPH. Excavated soil was disposed of offsite to the Southern Sanitation system landfill in Yuma, Arizona.

15. Special Handling Instructions and Additional Information
WEAR APPROVED SAFETY GEAR
NOTE: GENERATOR SIGNED AS TRANSPORTER.

16.
GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.
If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

Received by: (Signature) Date Time

The delivery of samples and the signature on this chain of custody form constitutes authorization to perform the analyses specified above under the Enseco Terms and Conditions, unless a contract or purchase order has been executed and is cited above.

Relinquished by: (Signature) Date Time

Received for Laboratory by: Dot Kammer

Date RECEIVED Time: 1/20/90 As Sampled

Date ACCEPTED Time:

Method of Shipment:

Special Instructions:

SAMPLE DISPOSITION:
1. Storage time requested:_____days
(Samples will be stored for 30 days without additional charges; thereafter storage charges will be billed at the published rates.)
2. Sample to be returned to client: Y N
(Enseco will dispose of unreturned samples at no extra charge. Disposal will be by incineration wherever possible; otherwise, as appropriate, according to legal requirements.)

DISTRIBUTION: White with report, Yellow to Enseco, Pink to Courier, Gold to Sample Control

Table 2-2
Leaching Potential Analysis for Diesel
Using Total Petroleum Hydrocarbons(TPH)
and Benzene, Toluene, Xylene and Ethylbenzene (BTX&E)

The following table was designed to permit estimating the concentrations of TPH and BTX&E that can be left in place without threatening ground water. Three levels of TPH and BTX&E concentrations were derived (from modeling) for sites which fall into catagories of low, medium or high leaching potential. To use the table, find the appropriate description for each of the features. Score each feature using the weighting system shown at the top of each column. Sum the points for each column and total them. Match the total points to the allowable BTX&E and TPH levels.

SITE FEATURE	SCORE	SCORE 10 PTS IF CONDITION IS MET	SCORE	SCORE 9 PTS IF CONDITION IS MET	SCORE	SCORE 5 PTS IF CONDITION IS MET
Minimum Depth to Ground Water from the Soil Sample (feet)	10	>100		51-100		25-50\1
Fractures in subsurface (applies to foothills or mountain areas)	10	None		Unknown		Present
Average Annual Precipitation (inches)		<10	9	10-25		26-40\2
Man-made conduits which increase vertical migration of leachate		None	9	Unknown		Present
Unique site features: recharge area, coarse soil, nearby wells, etc		None	9	At least one		More than one
COLUMN TOTALS→TOTAL PTS	20	+	27	+	0	= 47
RANGE OF TOTAL POINTS	49pts or more		41 - 48 pts		40pts or less	
MAXIMUM ALLOWABLE B/T/X/E LEVELS (PPM)	1/50/50/50		.3/.3/1/1		NA\3	
MAXIMUM ALLOWABLE TPH LEVELS (PPM)	10000		1000		100	

\1 If depth is greater than 5 ft. but less than 25 ft., score 0 points. If depth is 5 ft. or less, this table should not be used.
\2 If precipitation is over 40 inches, score 0 points.
\3 Levels for BTX&E are not applicable at a TPH concentration of 100ppm

Re: Hardin Oldsmobile and Honda
1300 South Anaheim Boulevard
Anahiem, California

Dear Mr. O'Donald:

Petroleum Industry Consultant's, Inc. (PIC) has been contracted to assist Deep, Inc. with site assessment/remediation obligations at the referenced property. As you know, two waste oil underground storage tanks (550 gallon and 280 gallon capacities) were removed from separate tank pits December 4, 1989. Samples recovered from below the 550 gallon tank exhibited total petroleum hydrocarbon (tph) concentrations greater than 10,000 ppm. A sample recovered from below the 280 gallon tank exhibited a tph concentration of 276 ppm with non-detectable btxe and purgeable halocarbons as tested by EPA methods 418.1, 8020, and 8010, respectively (see laboratory results attached).

The client intends to excavate contaminated soil from the 550 gallon tank pit. Because the contaminant levels encountered below the 280 gallon tank were relatively low, PIC has conducted a leaching potential analysis (attached). Data for the analysis was obtained from the attached groundwater contour and topographic maps. The analysis indicates that the allowable contaminant concentrations at the site are 1000 ppm tph and .3 ppm, .3 ppm, 1 ppm, and 1 ppm for b, t, e, and x, respectively. Therefore, PIC recommends that the client be granted closure on the 280 gallon tank pit without imposing additional assessment/remedial obligations.

If the attached analysis is acceptable please advise PIC at

your earliest convenience. You will be notified a minimum of 48 hours prior to commencement of proposed excavation operations.

Victor and Dennis Hardin
Hardin Olds/Honda
1300 S. Anaheim
Anaheim, CA. 92805

Subject: Soil Contamination Located at 1300 S. Anaheim Blvd., Anaheim, O.C.H.A. Lust Site # 90UT1.

Dear Victor and Dennis:

Based on inspections and field tests conducted on December 4, 1990 it has been determined that waste oil, xylene, and trichloroethene contaminated soil are present at the subject location.

This Agency is authorized to enforce the State Hazardous Waste and Underground Storage Tank Laws and Regulations and, under contract with the State Water Resources Control Board, is responsible for oversight of cleanup of soil and groundwater contamination resulting from unauthorized releases from underground storage tanks. By this letter, you are directed to conduct an investigation to assess the extent and significance of contamination at the site specified in the subject above.

The objective of this site investigation is to provide sufficient information to evaluate 1) the sensitivity of the site, 2) the potential threat of exposure to humans, 3) remedial actions and/or alternative mitigation strategies.

At a minimum this investigation should include:

1. A clear delineation of the nature and extent of soil and groundwater contamination.

2. A hydrogeological characterization including depth to groundwater, and, if groundwater is contaminated, site specific determination of groundwater gradient.

3. The proximity to wells and surrounding land uses; and future use of the site itself.

4. The potential impacts of contamination to public health and the environment, including the potential for contaminant vapor migration and human exposure by inhalation.

Please note that clearance of site investigation, remediation or other mitigation activities by any other agency does not constitute clearance from the Orange County Health Care Agency. The California Health and Safety Code, Section 25298 (c)(4) requires that a person closing an underground storage tank demonstrate to the Orange County Health Care Agency that there is no significant soil contamination. Significant contamination should include excess lifetime cancer risk due to inhalation of vapors from volatile contaminants, both inside and outside buildings. A risk assessment of vapor exposure must be completed and approved by this Agency for all projects involving a change in land use.

The California Code of Regulations, Title 23, Subchapter 16, Section 2652 requires that the following information be reported to the local agency every three (3) months until cleanup is complete:

1. The results of all investigations completed at that time to determine the extent of soil or groundwater or surface water contamination due to the release.

2. Method of cleanup implemented to date, proposed cleanup actions, and approximate cost of actions taken to date.

3. Method and location of disposal of the released hazardous substance and any contaminated soils or groundwater or surface water (indicate whether a hazardous waste manifest(s) is utilized).

Violation of these requirements are subject to a civil penalty of up to Five Thousand Dollars ($5,000.00) per day.

Guidelines providing further information relating to site assessment and the site investigation objectives are available upon request. Although not required, an initial workplan or study design may be submitted to this Agency for review and comment. Please note that for sites with possible or confirmed groundwater contamination, copies of all correspondence, work plans, and reports should be routinely courtesy copied to the appropriate Regional Water Quality Control Board. If you have any questions, please contact me at (714) 667-3715.

Very truly yours,

Michael O'Donnell

Table 2-2
Leaching Potential Analysis for Diesel
Using Total Petroleum Hydrocarbons(TPH)
and Benzene, Toluene, Xylene and Ethylbenzene (BTX&E)

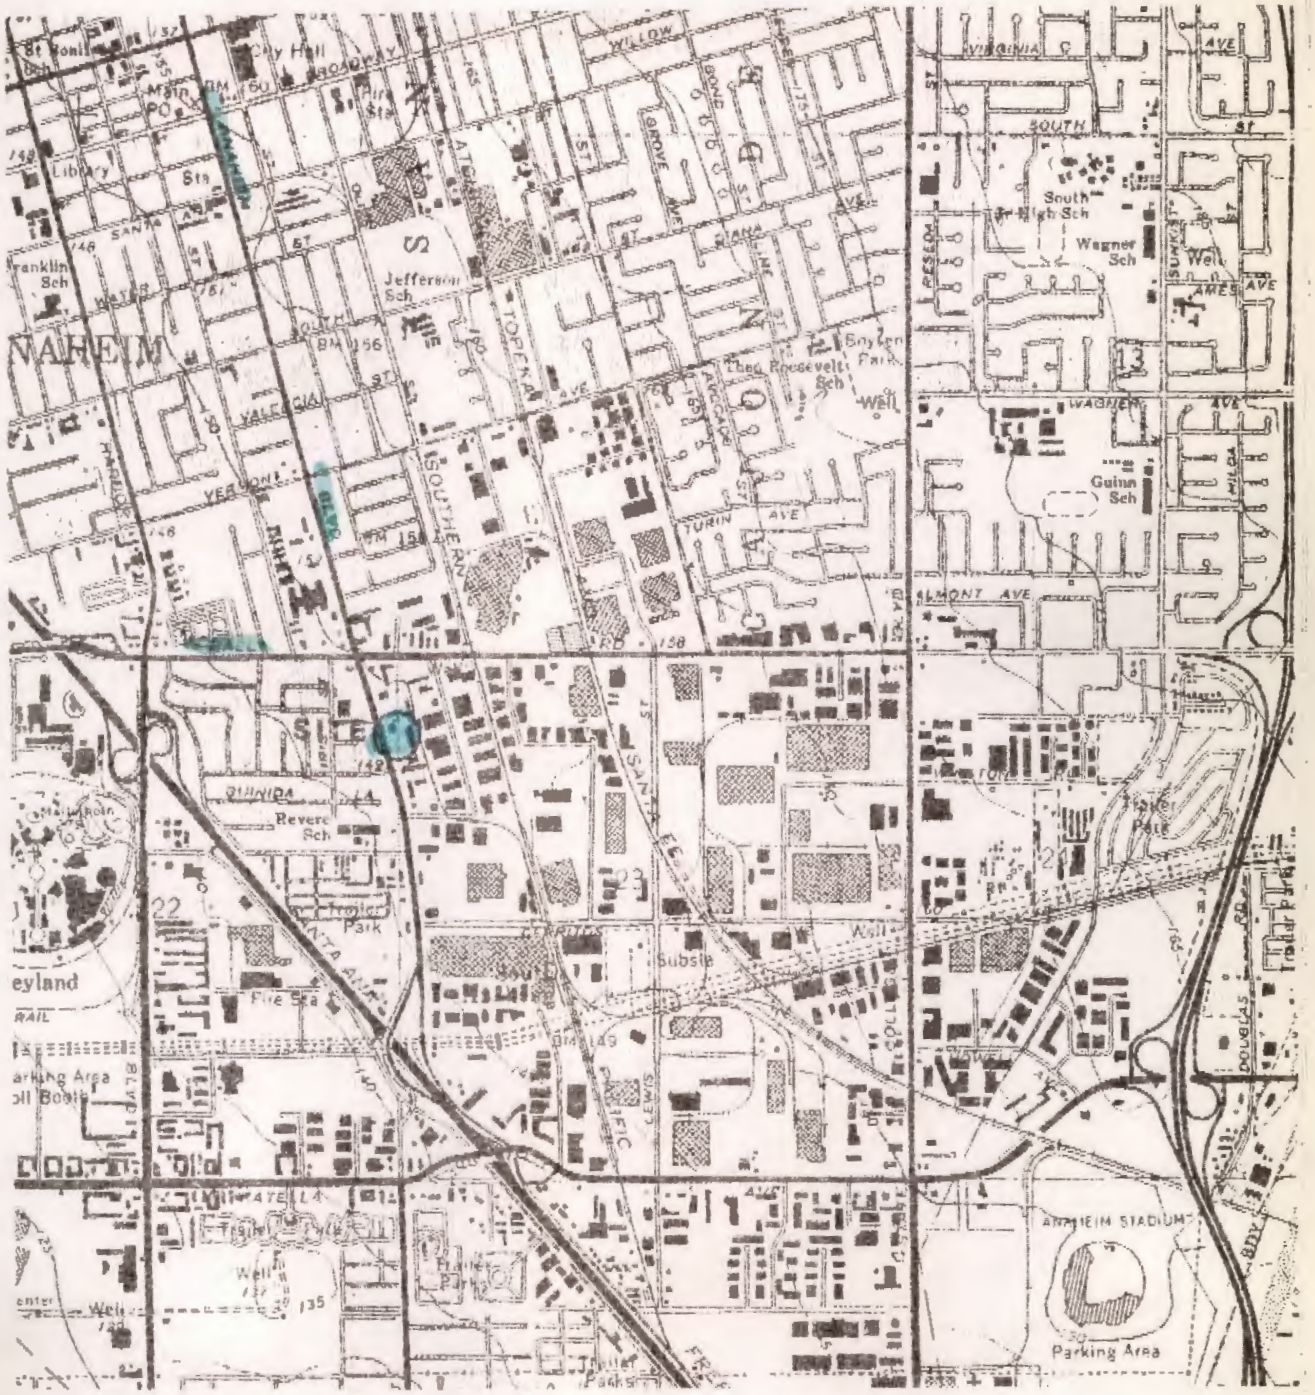

The following table was designed to permit estimating the concentrations of TPH and BTX&E that can be left in place without threatening ground water. Three levels of TPH and BTX&E concentrations were derived (from modeling) for sites which fall into catagories of low, medium or high leaching potential. To use the table, find the appropriate description for each of the features. Score each feature using the weighting system shown at the top of each column. Sum the points for each column and total them. Match the total points to the allowable BTX&E and TPH levels.

SITE FEATURE	SCORE	SCORE 10 PTS IF CONDITION IS MET	SCORE	SCORE 9 PTS IF CONDITION IS MET	SCORE	SCORE 5 PTS IF CONDITION IS MET
Minimum Depth to Ground Water from the Soil Sample (feet)	10	>100		51-100		25-50\1
Fractures in subsurface (applies to foothills or mountain areas)	10	None		Unknown		Present
Average Annual Precipitation (inches)		<10	9	10-25		26-40\2
Man-made conduits which increase vertical migration of leachate		None	9	Unknown		Present
Unique site features: recharge area, coarse soil, nearby wells, etc		None	9	At least one	5	More than one
COLUMN TOTALS→TOTAL PTS	20	+	27	+	0	= 47
RANGE OF TOTAL POINTS	49pts or more		41 - 48 pts		40pts or less	
MAXIMUM ALLOWABLE B/T/X/E LEVELS (PPM)	1/50/50/50		.3/.3/1/1		NA\3	
MAXIMUM ALLOWABLE TPH LEVELS (PPM)	10000		1000		100	

47 - 5 = 42

\1 If depth is greater than 5 ft. but less than 25 ft., score 0 points. If depth is 5 ft. or less, this table should not be used.
\2 If precipitation is over 40 inches, score 0 points.
\3 Levels for BTX&E are not applicable at a TPH concentration of 100ppm

Fire Depart. personnel on-site: Jeff Binder, Ron Keenan

Ambient air readings on field instrument: - not applicable, no gastechs available

Proposition 65 required:

Other information:

There exists one more tank here - a 2,000 gal unlead fuel tank. It is not permitted. What is remaining is for Hardin Oils to demonstrate that they can correctly do monitoring alt. #5. Currently they are sticking the tank 1 to 2 times/week.

ITEM NO.

Both tanks in 1988. Mr Cadman, (service manager) said indicated that the company felt that there had been an overspill problem in the past there. Soil samples taken from the excavation (2ft below fuel end + north end of Tank) were greyish/brownish + easily ~~unpacked~~ compacted. The soil had a slight oil oder.

Note: There were no operating gastechs available, so I was not able to take any readings.

No apparent ~~foo~~ waste oil was noticed at the edge of the excavation. Due to the small size of the tank, plus the tank top was only 2ft below grade, the excavation was relatively small.

TANK #2 (Hardin Honda) Excavation was 6-8 ft. deep. Soil was loose + silty/sandy. No apparent discoloration or contamination was observed. One sample was taken 8ft below the tank. Samples were signed off to Matt Noftaly of PIC. Tanks to be taken to HMR for recycling

Former SMTEK Facility
1240 and 1244 South Claudina Street, Anaheim, California
Global ID# SL188033849; PCA# 1880300

Dear Ms. Gee:

Haley & Aldrich, Inc. (Haley & Aldrich) is submitting this Annual 2019 Groundwater Monitoring Report on behalf of CTS Corporation and The Bradmore Group for the Former SMTEK Facility at 1240 and 1244 South Claudina Street in Anaheim, California (Site; Figure 1). Groundwater gauging and sampling was performed in September 2018 and March 2019 in accordance with the Revised Proposed Modifications to Groundwater Monitoring and Reporting Program (Haley & Aldrich, 2015) that was approved by the California Regional Water Quality Control Board, Santa Ana Region (SARWQCB) and in accordance with the approved Work Plan for Additional Groundwater Characterization dated 1 December 2016. This monitoring program also incorporates the SARWQCB recommendations provided in emails dated 15 July 2015 and 8 June 2018. Supplemental hexavalent chromium, total chromium, copper, and lead groundwater data were also collected in response to the SARWQCB's letter dated 31 January 2019. Please do not hesitate to contact the undersigned with questions.

Sincerely yours,
HALEY & ALDRICH, INC.

1. Introduction

Haley & Aldrich, Inc. (Haley & Aldrich) prepared this annual report on behalf of CTS Corporation (CTS) to summarize groundwater monitoring activities performed during the annual reporting period from 1 April 2018 through 31 March 2019 at the Former SMTEK International, Inc. (SMTEK) Facility at 1240 and 1244 South Claudina Street in Anaheim, California (Site; Figure 1). CTS acquired SMTEK in 2004. The Bradmore Group, a real estate property management and investment company, owns the properties.

Groundwater gauging and sampling was performed in accordance with Revised Proposed Modifications to Groundwater Monitoring and Reporting Program (Haley & Aldrich, 2015), which the California Regional Water Quality Control Board, Santa Ana Region (SARWQCB) approved on 15 July 2015 and in accordance with the approved Work Plan for Additional Groundwater Characterization dated 1 December 2016 (Haley & Aldrich, 2016). A reduction in monitoring frequency from quarterly to semi-annual was approved by the SARWQCB in their "Former SMTEK Facility, Anaheim, CA - Comments on Requests for Extension and Monitoring Frequency Reduction" email dated 8 June 2018.

Site investigation results have indicated that groundwater underneath the Site contains volatile organic compounds (VOCs), primarily trichloroethene (TCE). The SARWQCB requested additional assessment of hexavalent chromium [Cr (VI)] in their letter dated 31 January 2019.

This report has been prepared for the exclusive use of CTS and The Bradmore Group in connection with the former SMTEK Facility located at 1240 and 1244 South Claudina Street in Anaheim, California. The observations and conclusions described in this report are based solely on the sources of information referenced in this report. Any additional information that becomes available concerning this Site should be provided to Haley & Aldrich so that our conclusions and recommendations may be reviewed and modified as necessary.

2. Groundwater Monitoring and Sampling Activities

2.1 GROUNDWATER MONITORING PROGRAM

The Site's current groundwater monitoring network consists of five conventional monitoring wells (MW-1 through MW-5) and four sets of continuous multi-channel tubing (CMT) wells (CMT-1 through 4), which are screened at various intervals in an unconfined sandy water bearing zone up to 145 feet below ground surface (bgs). Groundwater has historically fluctuated between approximately 80 and 100 feet bgs. The CMT wells each have three separate screen intervals (designated as "s" for shallow, "m" for middle, and "d" for deep). Table 1 summarizes well construction details and Figure 2 shows well locations. Haley & Aldrich retained Blaine Tech Services, Inc. (Blaine Tech) to gauge and sample the monitoring wells during the reporting period.

2.2 ACTIVITIES CONDUCTED THIS PERIOD

The following activities occurred during the reporting period and included the collection and analysis of groundwater samples from monitoring wells as described below:

- Semi-annual groundwater sampling and analysis of VOCs at all Site monitoring wells (MW-1 through MW-5 and CMT-1 through CMT-4) in September 2018 and March 2019 in accordance with the approved groundwater monitoring program;
- Semi-annual groundwater sampling and analysis of hexavalent chromium (Cr [VI]) at monitoring well MW-5 during the September 2018 and March 2019 events;
- Semi-annual groundwater gauging of all Site monitoring wells (MW-1 through MW-5 and CMT-1 through CMT-4) in September 2018 and March 2019.
- Depth-discrete groundwater grab sampling and analysis of Cr (VI) and dissolved chromium, copper, and lead in MW-1, MW-2, and MW-5 concurrent with the March 2019 event as part of a supplemental Cr (VI) evaluation per the SARWQCB's request; and
- The September 2018 groundwater elevation gauging and analytical results transmitted to the SARWQCB via email in accordance with the approved groundwater monitoring program.

2.3 GROUNDWATER MONITORING ACTIVITIES

Blaine Tech measured groundwater levels from the surveyed point on the top of each well casing to the nearest 0.01 foot using an electrostatic water-level indicator. The depth to water measurement was subtracted from the elevation of the surveyed point on each well casing to calculate the elevation of the potentiometric surface in feet relative to the North American Vertical Datum of 1988 (NAVD88). Depth to groundwater measurements were recorded on field logs and are included in Appendix A and summarized in Table 2.

Each well was purged and sampled following low flow/minimal drawdown sampling procedures. Monitoring wells MW-1 through MW-5 were purged using a low flow bladder pump and CMT wells CMT-1 through CMT-4 were sampled using a Solinst double valve pump that is designed specifically for the CMT wells. Water quality parameters, including dissolved oxygen, oxidation-reduction potential, temperature, pH, specific electrical conductance, and turbidity were monitored in the field using a multi-probe meter and recorded during purging and prior to sampling each well. Groundwater samples were

collected after field parameters had stabilized to within 10 percent of each consecutive reading. Table 3 includes the collected field parameters and Appendix A includes copies of field purging logs.

Groundwater samples were collected in laboratory-provided containers and placed on ice in coolers and transported under standard chain-of-custody procedures to a California-certified laboratory for analysis.

All non-dedicated sampling equipment that was in-contact with groundwater was decontaminated after each use with de-ionized water and non-phosphate soap, followed by a potable water rinse and finally with de-ionized water.

Depth-discrete groundwater samples collected as part of the supplemental Cr (VI) evaluation were collected using HydraSleeve™ no-purge groundwater samplers. Details of this work are provided in the "Work Plan for Additional Soil and Groundwater Investigation for Hexavalent Chromium, Former SMTEK Facility, 1240 and 1244 South Claudina Street" submitted to the SARWQCB by Haley & Aldrich on 30 April 2019.

2.4 LABORATORY ANALYSIS

Groundwater samples were sent to American Environmental Testing Laboratory (AETL), a California State Environmental Laboratory Accreditation Program-certified laboratory located in Burbank, California. Appendix B includes the laboratory reports. All samples were analyzed for VOCs by United States Environmental Protection Agency (EPA) Method 8260B, and samples collected at MW-5 were also analyzed for Cr (VI) by EPA Method 7199.

As part of the supplemental Cr (VI) evaluation, the March 2019 MW-5 low-flow groundwater sample was also analyzed for dissolved chromium, copper, and lead by EPA Method 200.7. The depth-discrete HydraSleeve™ samples collected at MW-1, MW-2, and MW-5 were analyzed for Cr (IV) by EPA Method 7199 and dissolved chromium, copper, and lead by EPA Method 200.7.

Field quality control samples, including trip blanks and an equipment blank, were analyzed for VOCs by EPA Method 8260B, and the equipment blank was also analyzed for Cr (VI) by EPA Method 7199.

2.5 WASTE DISPOSAL

Purged groundwater produced during the groundwater sampling activities was stored in one U.S. Department of Transportation (DOT)-approved 55-gallon drum during each sampling event. The drum was appropriately sealed, labeled, and stored on-Site pending profiling and proper disposal by a qualified waste hauler.

3. Groundwater Monitoring and Analytical Testing

3.1 GROUNDWATER GAUGING AND POTENTIOMETRIC SURFACE ELEVATIONS

Groundwater levels were gauged in September 2018 and March 2019. Table 2 summarizes the current and historical depth to groundwater and elevation data. Figures 3A and 3B present potentiometric surface contours and groundwater gradient for September 2018 and March 2019 gauging events, respectively.

In September 2018, depth to groundwater ranged from 84.49 feet bgs (67.64 feet NAVD88) to 86.36 feet bgs (68.39 feet NAVD88) and elevations of the potentiometric surface ranged from 67.64 feet NAVD88 at MW-5 up to 68.39 feet NAVD88 at MW-3 as shown on Figure 3A. During the March 2019 event water levels increased slightly and depth to groundwater ranged from 83.92 feet bgs (68.21 feet NAVD88) to 85.97 feet bgs (67.94 feet NAVD88) and elevations of the potentiometric surface ranged from 68.21 feet NAVD88 at MW-5 up to 69.15 feet NAVD88 at MW-3 as shown on Figure 3B. The shallow ("s") screened CMT wells were dry because the water table has remained below the depth of the screen intervals (85 to 85.35 feet bgs) during the reporting period.

The potentiometric surface elevation contours indicate that groundwater gradient at the Site is to the west-southwest at approximately 0.0025 foot per foot (ft/ft) in September 2018 and 0.0028 ft/ft in March 2019. The gradient is consistent with those observed in previous monitoring events. The potentiometric surface elevations in March 2019 have increased by an average of 2.3 feet compared to March 2018.

3.2 ANALYTICAL RESULTS IN GROUNDWATER

The laboratory analytical results for VOCs in groundwater are discussed below and summarized in Table 4. Analytical results for supplemental samples analyzed for Cr (VI), Cr, Cu, and Pb are presented in Table 5. Figures 4 and 5 present the September 2018 and March 2019 analytical results for TCE; middle zone isoconcentration contours are presented on Figure 4 and deep zone isoconcentration contours are presented on Figure 5. Appendix B includes the laboratory analytical reports. Appendix C presents historical analytical data. Appendix D includes groundwater elevation and concentration versus time trend charts.

The supplemental Cr (VI) evaluation laboratory analytical results are discussed under a separate cover as part of the "Work Plan for Additional Soil and Groundwater Investigation for Hexavalent Chromium" submitted to the SARWQCB by Haley & Aldrich on 30 April 2019.

Laboratory analytical results during the reporting period primarily included reported concentrations of TCE, tetrachloroethene (PCE), and cis-1,2-dichlorothene (cDCE). The following observations were made during the groundwater sampling period and described by zone.

3.2.1 Shallow Zone

The groundwater potentiometric surface was just below the shallow screen for CMT-1s, CMT-2s, CMT-3s, and CMT-4s. The screens were dry and no groundwater sample was collected. These wells have been dry since 2013.

3.2.2 Middle Zone

TCE was reported above the maximum contaminant level (MCL) for drinking water of 5 micrograms per liter (µg/L) in all middle zone wells during the September 2019 and March 2019 sampling events. During the September 2018 sampling event, concentrations of TCE in the middle zone ranged from 6.29 µg/L in CMT-3m to 1,310 µg/L in MW-2. During the March 2019 sampling event, concentrations of TCE in the middle zone ranged from 12.9 µg/L in MW-5 to 1,200 µg/L in CMT-1m. Historically at the Site, when groundwater elevations have increased, concentrations of TCE have also increased. Over the past year, water levels have increased an average of 2.3 feet and an increase of TCE has been observed in most middle sand groundwater wells.

PCE was reported slightly above the MCL of 5 µg/L in MW-2 during the September 2018 event and in CMT-1M and CMT-4M during the March 2019 event. Reported concentrations of PCE in the middle zone ranged from 2.02 µg/L in CMT-3m to 8.49 µg/L in CMT-MW-2 in September 2018. Reported concentrations of PCE in the middle zone ranged from 1.06 µg/L in CMT-2m to 8.97 µg/L in CMT-1m during the March 2019 event.

cDCE was reported above the MCL of 6 µg/L in monitoring wells CMT-1m, CMT-2m, CMT-3m, and CMT-4m during the September 2018 and March 2019 sampling events. Reported concentrations of cDCE in the middle zone ranged from 1.45 µg/L in MW-2 to 346 µg/L in CMT-2M during the September 2018 event. Reported concentrations of cDCE in the middle zone ranged from 1.63 µg/L in MW-1 to 408 µg/L in CMT-1M during the March 2019 event. Fall 2017 was the first year cDCE has been reported at the Site since 2008.

Hexavalent chromium, which was analyzed in MW-5, was reported above the total chromium MCL of 50 µg/L in September 2018 (1,000 µg/L) but below the MCL in March 2019 (44.1 µg/L). Additional discussion of Cr (VI) is presented under a separate cover as part of the "Work Plan for Additional Soil and Groundwater Investigation for Hexavalent Chromium" submitted to the SARWQCB by Haley & Aldrich on 30 April 2019.

3.2.3 Deep Zone

TCE was reported above the MCL of 5 µg/L in all deep zone wells during the September 2018 and March 2019 events. During the September 2018 sampling event, concentrations of TCE ranged from 6.25 µg/L in CMT-3d to 111 µg/L in MW-4. During the March 2019 sampling event, concentrations of TCE ranged from 123 µg/L in MW-4 to 545 µg/L in CMT-1d. During previous monitoring events, when groundwater elevations have increased at the Site, concentrations of TCE have been observed to increase, generally. Over the past year, water levels have increased an average of 2.3 feet and an increase of TCE has been observed in most deep zone groundwater wells.

PCE was reported slightly above the MCL of 5 µg/L in CMT-4d during the September 2018 event and in CMT-1d and CMT-4d during the March 2019 event. Reported concentrations of PCE in the deep zone ranged from 1.7 µg/L in CMT-2d to 14.7 µg/L in CMT-4d in September 2018. Reported concentrations of PCE in the deep zone ranged from 2.06 µg/L in CMT-2d to 8.06 µg/L in CMT-4d during the March 2019 event.

cDCE was reported above the MCL of 6 µg/L in monitoring wells CMT-1d, CMT-2d, CMT-3d, and CMT-4d during the September 2018 and March 2019 events. During the September 2018 event, reported concentrations of cDCE in deep zone wells ranged from 0.63 µg/L in MW-4 to 35.3 µg/L in CMT-1d. Concentrations of cDCE in deeper sand ranged from 0.710 µg/L in MW-4 to 691 µg/L in CMT-1d during the March 2019 event. Fall 2017 was the first year cDCE has been reported at the Site since 2008.

3.3 LABORATORY QUALITY ASSURANCE/QUALITY CONTROL

Haley & Aldrich applied the existing laboratory Quality Assurance/Quality Control (QA/QC) program to increase confidence levels in the data obtained and minimize the likelihood of judgments made from potentially erroneous data. QA refers to management of actions designed to maintain and correctly represent the precision, accuracy, and completeness of the data developed for the project. QC refers to accepted formal procedures and activities specifically designed to collect data that are reliable and consistent for the Site conditions.

During the sampling event, daily trip blank samples were included in the coolers to check for potential cross-contamination during sample transportation and daily equipment blanks were collected to check for potential cross-contamination. Field duplicates were collected at a rate of 10 percent of primary samples. Two field duplicate samples were collected in September 2018 (CMT-4D and MW-4). Field duplicate samples were inadvertently not collected in March 2019. The precision of groundwater sample analytical results was evaluated by calculating the relative percent difference (RPD) between the primary and duplicate sample analytical results. The results of the QA/QC are as follows:

- The laboratory reported the analytical results to be within acceptable percent recoveries, with no results exceeding the laboratory-established control limits;
- Reportable levels of VOCs were not detected in the trip blank samples;
- Reportable levels of VOCs and hexavalent chromium were not detected in the equipment blanks; and
- RPD values of analytical results for primary/duplicate sample pairs collected in September 2018 were within the acceptable range (+/-30 percent).

Therefore, data collected during this reporting period meet the QA/QC objectives and additional data qualification is not warranted.

4. Summary

The following is a summary of observations during this reporting period:

- The groundwater gradient is consistent with previous monitoring events. Water levels have increased by an average of 2.3 feet since March 2018.
- Groundwater samples could not be collected from the shallow CMT wells because they were dry. These wells have been dry since 2013.
- Laboratory analytical results during the reporting period primarily included reported concentrations of TCE, PCE, and cDCE.
- TCE was reported above the MCL for drinking water of 5 µg/L in all wells during the September 2018 and March 2019 sampling events. The maximum TCE concentration was reported at MW-2 (1,310 µg/L) in the middle zone and at CMT-1d (545 µg/L) in the deep zone during the reporting period. Historically at the Site, when groundwater elevations have increased, concentrations of TCE have also increased. Over the past year, water levels have increased an average of 2.3 feet and an increase of TCE has been observed in most middle and deep sand groundwater wells.
- PCE was reported slightly above the MCL of 5 µg/L in three middle zone wells and two deep zone wells during the reporting period. The maximum PCE concentrations were reported at CMT-1m (8.97 µg/L) in the middle zone and in CMT-4d (14.7 µg/L) in the deep zone during the reporting period.
- cDCE was reported above the MCL of 6 µg/L in four middle zone wells and four deep zone wells during the reporting period. The maximum cDCE concentration was reported at CMT-1m (406 µg/L) in the middle zone and at CMT-1d (691 µg/L) in the deep zone during the reporting period. Last year was the first year cDCE has been reported at the Site since 2008.
- Cr (VI) was reported above the total chromium MCL of 50 µg/L in MW-5 during the September 2018 event but below the MCL during the March 2018 event. A work plan for supplemental assessment of Cr (VI) in soil and groundwater was submitted to the SARWQCB by Haley & Aldrich on 30 April 2019.

5. Schedule

The following groundwater monitoring related activities are scheduled for the upcoming reporting period from 1 April 2019 through 31 March 2020:

- Semi-annual groundwater monitoring in September 2019 and March 2020.
- Groundwater levels in the shallow screen of the CMT wells will be monitored during implementation of the SARWQCB-approved Groundwater Assessment and Revised Remediation Pilot Test Work Plan (Haley & Aldrich, 2018). If groundwater levels increase and saturate the CMT shallow screens, a groundwater sample will be collected and analyzed for VOCs and Cr (VI).
- Installation and monitoring of an upgradient monitoring well in accordance with the SARWQCB-approved Groundwater Assessment and Revised Remediation Pilot Test Work Plan (Haley & Aldrich, 2018) pending receipt of access from the property owner. Discuss the results of the upgradient groundwater assessment with the SARWQCB to establish which pilot test scenario will be conducted.
- Transmittal of semi-annual groundwater monitoring data in October 2019, within 30 days following the end of the quarter.
- Submittal of the Annual Groundwater Monitoring Report to the SARWQCB by 30 April 2020.

Notes:
ft NAVD88 = feet relative to the North American Vertical Datum of 1988
ft bTOC = feet below top of casing
CMT intervals are designated as follows: s for shallow, m for middle, and d for deep.
- = not available, well was dry
X = unable to gauge well, well sounder would not go down CMT channel

Notes:

1. Samples analyzed by EPA Method 8260B for volatile organic compounds.
2. Samples analyzed by EPA Method 8260 SIM for 1,4-dioxane
3. Samples analyzed by EPA Method 218.6, 7196A, or 7199 for hexavalent chromium.
4. Table only shows constituents that have been detected at least once in groundwater samples.
5. CMT intervals are designated as follows: "s" for shallow, "m" for middle and "d" for deep.
6. *Italicized* samples and results indicate supplemental groundwater depth-discrete samples collected as part of an additional chromium VI investigation.

Abbreviations:

< - Analyte not detected above laboratory reporting limit.

BOLD - concentration greater than MCL

MCLs - Maximum Contaminant Levels.

NS - Not scheduled for sampling or not available.

µg/l - micrograms per liter.

DUP - duplicate sample.

TABLE 5

SUMMARY OF SUPPLEMENTAL HEXAVALENT CHROMIUM ANALYTICAL DATA - MARCH 2019
FORMER SMTEK FACILITY
ANAHEIM, CALIFORNIA

		Inorganic Compounds			
		Chromium, Dissolved	Copper, Dissolved	Lead, Dissolved	Chromium VI (Hexavalent)
Screening Levels/MCLs:		50	1000	15	50
Units:		ug/L	ug/L	ug/L	ug/L
MW-1					
03/19/2019	101 (ft)	< 50	< 50	< 100	< 2
MW-2					
03/19/2019	93 (ft)	< 50	< 50	< 100	7.54
MW-5					
03/19/2019	102 (ft)*	42.7 J	< 50	< 100	44.1
03/19/2019	88 (ft)	**1310**	< 50	< 100	**1240**
03/19/2019	93 (ft)	**1060**	< 50	< 100	**1050**
03/19/2019	98 (ft)	**378**	< 50	< 100	**370**
03/19/2019	103 (ft)	**295**	< 50	< 100	**290**

Notes:

1. Samples analyzed by EPA Method E200.7 for chromium, copper, and lead.
2. Samples analyzed by EPA Method 7199 for hexavalent chromium.
3. Samples were collected using a depth-discrete HydraSleeve™ sampler with the exception of MW-5 at 102 ft* which was collected using low flow sampling.

Abbreviations:

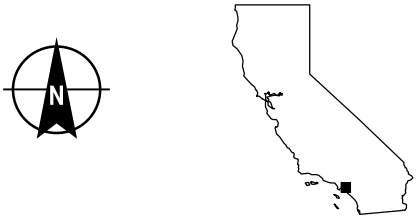

< - Analyte not detected above laboratory reporting limit.
BOLD - concentration greater than MCL
MCLs - Maximum Contaminant Levels.
ug/l - micrograms per liter.

FEES:
- Photocopies $0.20 per page
- Color Copies $0.45 per page
- Laserfiche $1.00 per page
- Records copied on CD $10 per CD for the initial record series and $1.00 per additional records series

Please note that HMS site maps are not provided and that chemical locations, financial information and personal phone numbers will be redacted/removed from all records. If items listed above are necessary for review, a certified release of information letter from the business must be presented with your request. Most HMS records are maintained in Laserfiche and have a five year retention length after they become obsolete. For UST records (prior to 1991) and HW and TP records (prior to 2001), contact Orange County Health Care Agency, Environmental Health at 714-433-6022. For UST Clean-up Information, contact the City of Anaheim Public Utilities Department at 714-765-4238. To review Anaheim Fire & Rescue records in person, call 714-765-4040 to make an appointment.

I understand that I will be notified within ten (10) calendar days from receipt of this public records request. If production of records is requested, an estimated cost will be provided to me and I agree that I will be required to submit payment for duplication costs (and mailing) prior to the production of the requested documents. If arrangements for payment and production are not made within twenty (20) days of the date of the City's response, I understand that a new request may have to be submitted.

☐ I wish to inspect City records (**not applicable for Fire Incident Reports) ☒ I will pick-up records ☐ Please mail records

Signature of Requestor: Alexandra LaBouff

For office use only: Record searches are retained for the current fiscal year, plus two prior fiscal years. Destruction date for documents contained in this request is 6/30/_____.

REQUEST FOR PUBLIC RECORDS

Requestor Information: **Date:** December 18, 2019

Company Name: Partner Engineering and Science			**Address(es):**
Contact Name: Alexandra LaBouff			
Address: 2154 Torrance Boulevard			
City, State, Zip: Torrance, California 90501			
☐ **Phone:** 310-483-1789	☐ **Fax:**	☑ **Email:** alabouff@partneresi.com	

Please check box to indicate the preferred method of contact in the event of questions

Fire Incident Report **

☐ Fire Incident # (if known) A_____ Date of Incident: ____/____/____ Approximate Time: _____

Location of Incident (specific address or cross streets): 1234 S Anaheim Blvd, 1213 S Claudina St, 200 E Ball Road

If the incident involved a vehicle, the following information must be completed:

Vehicle Make:_____ Vehicle Model:_____ Vehicle Year:_____

Hazardous Materials Section / Certified Unified Program Agency (CUPA)

- ☒ Chemical Inventory
- ☒ Inspection Reports
- ☐ Risk Management Plan
- ☒ Hazardous Waste (HW) Generator Information
- ☒ Underground Storage Tank (UST) CUPA Information
- ☒ CUPA Consolidated Permit
- ☒ Investigation Reports/Complaints
- ☒ Correspondence/Referrals
- ☐ On-site Treatment (TP) Information
- ☐ Business Emergency Plan
- ☐ List of all USTs in Anaheim
- ☐ List of all ASTs in Anaheim

Life Safety Section

- ☐ Inspection Worksheet
- ☐ Correction Notice/Second/Final Notice
- ☐ 5-year Sprinkler Report
- ☐ Complaints
- ☐ Fire Code Permits
- ☐ Private Hydrant Test Report
- ☐ 850 Forms
- ☐ Correspondence
- ☐ Other

FEES:

Photocopies	Color Copies	Laserfiche	Records copied on CD
$0.20 per page	$0.45 per page	$1.00 per page	$10 per CD for the initial record series and $1.00 per additional records series

Please note that HMS site maps are not provided and that chemical locations, financial information and personal phone numbers will be redacted/removed from all records. If items listed above are necessary for review, a certified release of information letter from the business must be presented with your request. Most HMS records are maintained in Laserfiche and have a five year retention length after they become obsolete. For UST records (prior to 1991) and HW and TP records (prior to 2001), contact Orange County Health Care Agency, Environmental Health at 714-433-6022. The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

No Records Found

Non California Manifest Total Tonnage

No Records Found

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 12/18/2019 at 1:50:34 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 20 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are 22 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 4 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 11 UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 07/29/2019 has revealed that there is 1 VCP

site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 7 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Longitude:	-117.903878688812
Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	1880300
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI
Site History:	Historical operations at the site included the design, manufacturing and testing of electronic circuit boards. Since 1992, various investigation and remediation activities have taken place at the site. Several on-site contaminant source areas were identified, and a groundwater monitoring network was installed. In November 1995, the TCE concentration in monitoring well MW-5, the sites farthest downgradient monitoring point, was 11,000 micrograms per liter (a%g/L), indicating that a significant mass of TCE had migrated from the soil into the groundwater, and was moving off-site. The initial on-site remediation, which consisted of operating a soil vapor

SMTEK INTERNATIONAL INC FORMERLY DDL ELECTRONICS (Continued) **S106483877**

extraction (SVE) system for removal of VOCs from the soil, was conducted from 1995 to 1998. However, groundwater analytical results from monitoring well MW-5 indicated that TCE was still migrating from the on-site soils and into the groundwater. The SVE system resumed operation in June 2006, continuing until September 2007. Data from MW-5 now indicate that the SVE system has been largely successful in removing VOCs from the on-site source areas, thereby minimizing the further migration of contaminants into the groundwater. Between 1998 and 2006, there was no remedial action or containment in place to prevent the off-site migration of the dissolved TCE plume. Therefore, K/J proposed an off-site investigation to assess the lateral extent of the impacts to groundwater, as a result of SMTEKs past discharges of TCE. The off-site investigation was conducted on June 20, 2008, and consisted of three CPT borings (B1, B2, B3) that were advanced to groundwater on South Claudina Street, adjacent to, and downgradient of, the site. Boring location B1 is approximately sixty feet downgradient of MW-5. B2 is upgradient of MW-5, and B3 is cross-gradient from MW-5. All of the sampling points are downgradient of the sites former contaminant source areas, where SVE has been conducted. TCE was detected in the groundwater samples from all three of the borings, with 23 a%g/L in B1, 9.1 a%g/L in B2 and 4.6 a%g/L in B3. A fourth boring location was proposed farther downgradient, on private property, but the property owner denied access for the investigation. Addittional groundwater sampling was conducted in the off-Site downgradient areas at 8 locations. Low concentrations of TCE was detected in all locations. Board staff has not requested further sampling in the off-Site locations. However, the monitring well in the source area continues to show high concentrations of TCE. IN November 2009, a confirmation sampling work plan was submitted to the RB. A meeting in regards to the off-site groundwater issue between the RB and the RP and his consultant was scheduled. Soil vapor assessment at the 1244 building has been completed. It was determined that there is no health risk for any tenant in taht building.
Off-site downgradient groundwater investigation results indicate low concentrations of PCE in the groundwater.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

DICO COMPANY (Continued) **1000324885**

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violation Date: 02-12-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after

7 - ELEVEN FOOD STORES (Continued) **S101589327**

	October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 04/29/2019. See Inspection Report for details

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

KANSTUL MUSICAL INSTRUMENTS IN (Continued) **1000159679**

corrective action activities required under RCRA.

FINDS:

Registry ID: 110002851290

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Phase 1
Completed Date:	07/07/2000
Comments:	Phase I - Pursuant to an agreement between the Department of Toxic Substances Control (DTSC) and the California Department of Education, DTSC's Site Mitigation Program completed review of a Phase I Environmental Assessment and has determined that a Preliminary Endangerment Assessment (PEA) is required. The PEA will be conducted under DTSC's oversight pursuant to an agreement between DTSC and the Anaheim City School District (ACSD). Any subsequent cleanup activities (if needed) after the PEA would be conducted pursuant to an agreement with DTSC and ACSD.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	10/31/2001
Comments:	DTSC approved the Preliminary Endangerment Assessment (PEA). Based on the information presented in the PEA, neither an actual a potential release of hazardous material, nor the presence of naturally occurring hazardous material indicated at the site pose threat to human health or the environment under any land use. Therefore, DTSC concurred that no further environmental investigation or cleanup was required at this site, and approved the PEA.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/31/2001
Comments: DTSC approved the Preliminary Endangerment Assessment (PEA). Based on the information presented in the PEA, neither an actual a potential release of hazardous material, nor the presence of naturally occurring hazardous material indicated at the site pose threat to human health or the environment under any land use. Therefore, DTSC concurred that no further environmental investigation or cleanup was required at this site, and approved the PEA.

TRANSLINE TECHNOLOGY INCORPORATED (Continued) **S113076636**

Violation Division:	Anaheim City Fire Department
Violation Program:	PBR
Violation Source:	CERS
Site ID:	77503
Site Name:	TRANSLINE TECHNOLOGY INC
Violation Date:	11-01-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 11/28/2018. NTC LETTER 2018
Violation Division:	Anaheim City Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	77503
Site Name:	TRANSLINE TECHNOLOGY INC
Violation Date:	04-16-2015
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Address:	601 E BALL RD
City,State,Zip:	ANAHEIM, CA 92805
Site ID:	534375
CERS ID:	722933
CERS Description:	Industrial Facility Storm Water

Violations:

Site ID:	534375
Site Name:	International Paper Anaheim
Violation Date:	08-01-2011
Citation:	2014-0057-DWQ - Industrial General Permit

INTERNATIONAL PAPER ANAHEIM (Continued) **S119085603**

Violation Description: SW - Deficient BMP Implementation
Violation Notes: Large neglected accumulations of cardboard bits and fibers on roof and on ground on west and north sides of building and on northern area of east side of building. Unattended spills of ink powder and starch found.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-01-2011
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: hot and sunny. Contact would not allow photos. Housekeeping along building's entire west and north sides, and north portion of east side is poor; numerous bits of scrap paper litter these areas. On roof, found an area roughly 40X80-feet covered in scrap paper up to 1-foot deep north of the cyclones. Many other areas of roof-top collection pipes have further piles of paper and paper fibers. One area has several layers of caked paper fibers. East side of building has the starch tank and heated wax tanks. Spilled wax was found on ground and coating the tanks; liquid at ambient temperature. One spill was a small liquid pool of wax; most everything was a heavy greasy coating on the tanks and surrounding ground. Starch tank has a small spill of starch powder under the transfer pipe. Found an unattended dry ink powder spill on ground by roll-off by fire tank and an open bucket of liquid ink nearby. Contact reports they have a full-time custodian to clean and that the cyclones have "hicups". Accuracy of SWPPP drainage is questionable; one roof drain found to go underground. At end of inspection, Contact stated photos would not be allowed during follow-up inspection.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Case Development Inspection
Eval Date: 11-17-2011
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather: mostly cloudy and cool. Contact allowed photos. Stockpile of excess scrap metal on S-side is significantly reduced. Groundlevel cyclone area is heavily littered with paper fiber but most of previously-observed scrap bits are gone; rooftop cyclones are similarly improved. Paper bits still litter finished product stockpile; discussed sweeping these areas as the stock is rotated. Some litter still on ground below N loading dock; Contact reported that this area will be cleaned by end of day. Agreed with Contact that housekeeping is significantly improved, but still lags behind similar operators; agreed to wait for storm water sample results to confirm effectiveness.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002779823

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

AIRKINETICS, INC. (Continued) **1019327119**

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 552

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 5788.1

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 552

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR

AIRKINETICS, INC. (Continued) **1019327119**

MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 552

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FINDS:

Registry ID: 110002778904

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

HERTZ PENSKE TRUCK LEASING INC (Continued) **1000423707**

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002639501

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002639477

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002767621

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110000783484

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 161
. Waste name: Fluid-cracking catalyst (FCC) waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 722
. Waste name: Liquids with cadmium > 100 mg/l

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003

SUPERIOR PLATING (Continued) **1000473118**

. Waste name: REACTIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 917.4

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 8458.7

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 8900.8

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF

Registry ID: 110002815204

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of

SUPERIOR PLATING (Continued) **1000473118**

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019

Next Scheduled EDR Contact: 01/13/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BALL ROAD DEVELOPMENT
1200 SOUTH ANAHEIM BOULEVARD
ANAHEIM, CA 92805

TARGET PROPERTY COORDINATES

Latitude (North):	33.817568 - 33° 49' 3.24''
Longitude (West):	117.907201 - 117° 54' 25.92''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	416040.1
UTM Y (Meters):	3742104.8
Elevation:	152 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641294 ANAHEIM, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

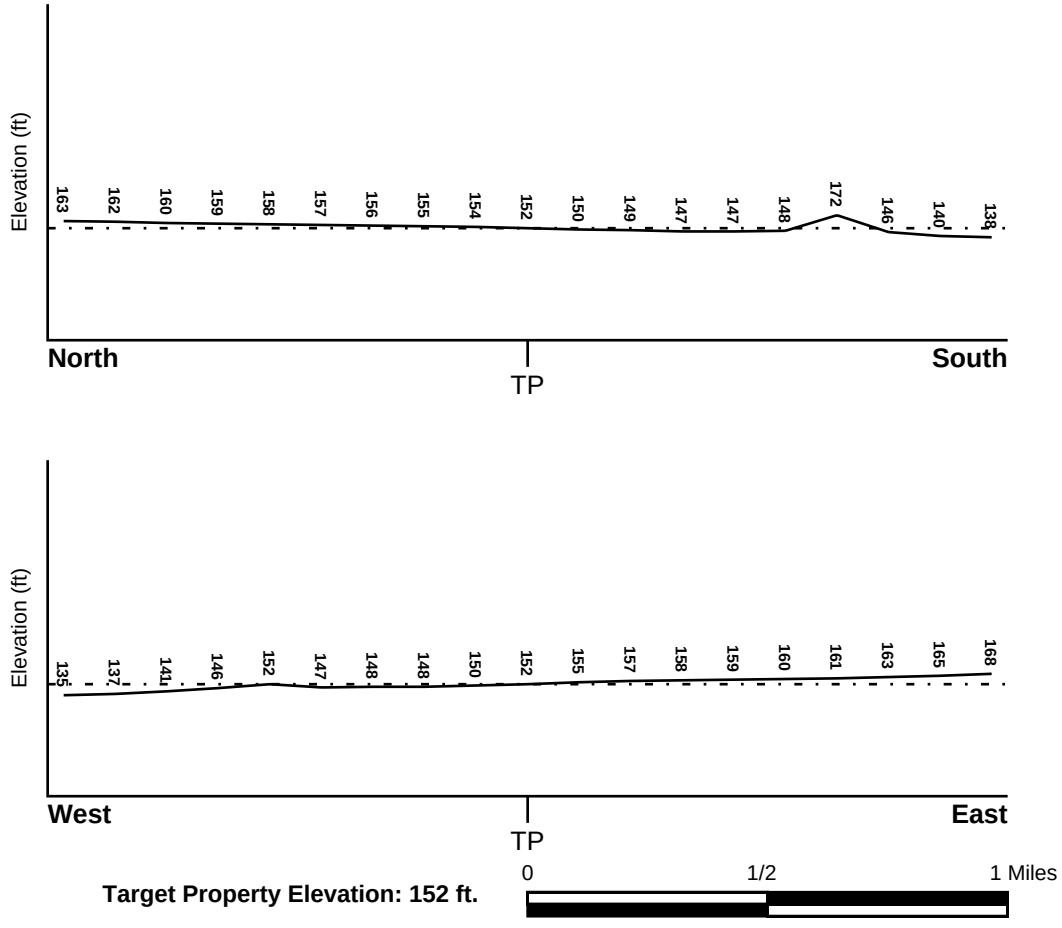

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 152 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0133J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06059C0014E	FEMA Q3 Flood data
06059C0021E	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ANAHEIM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SE
Site Name:	ITASCO
Site EPA ID Number:	CAD982359879
Groundwater Flow Direction:	S IN THE TALBERT AQUIFER.
Inferred Depth to Water:	approximately 100 feet.
Hydraulic Connection:	The site area is characterized by discontinuous clay layers within the upper 100 feet of the subsurface. The Talbert aquifer underlies these clay layers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
2	16 inches	40 inches	stratified sand to sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
3	40 inches	46 inches	silt loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6
4	46 inches	59 inches	stratified sandy clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	40 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 14	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	40 inches	44 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 14	Max: 8.4 Min: 7.9
4	44 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 14	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX D: QUALIFICATIONS/INSURANCE

Alexandra LaBouff
Staff Scientist

Education

Bachelor of Science, Environmental Science and Management, Emphasis in Ecology, Biodiversity and Conservation, University of California

Highlights

3 years of experience in the environmental consulting field
Phase I Environmental Site Assessments (ESA)
Transaction Screen Assessments
Environmental Desktop Reports

Experience Summary

Ms. LaBouff is a Staff Scientist at Partner Engineering and Science, Inc. (Partner) and has experience performing thorough environmental site inspections of properties including auto repair facilities, current and historical dry cleaners, industrial facilities, commercial and apartment complexes. She is currently expanding on previous Phase I ESA experience to include industrial sites, gas stations, and much more. Ms. LaBouff writes detail oriented technical reports in a timely manner and coordinates with agencies to obtain and review building permits, underground storage tank records and subsurface investigations.

Project Experience

Industrial Building, Vernon, California. A current truck repair company which was formerly part of the larger Bethlehem Steel Company; a steel fabrication plant.

Chiu Chou Lee Customs Service, Santa Fe Spring, California. An industrial building currently used as a warehouse and office, which was previously used by Ashland Chemical Company and has ongoing groundwater remediation.

Active Gas Station, Lomita, California. An active gas station with former generations of underground storage tanks, and leaks associated with the former and current USTs.

Former Gasoline Station, Garden Grove, California. A current vacant bank with former leaking underground storage tanks associated with the gas station.

Current Dry Cleaner, Los Angeles, California. A strip commercial property with an active dry-cleaning tenant, who currently and historically used tetrachloroethylene.

Project Manager

PARTNER Engineering and Science, Inc.

Education

B.S., Environmental Science, California State University, Chico

Registrations

OSHA 40-Hour HAZWOPER
AHERA Building Inspector training
California Department of Health Services/USEPA Lead Inspector/Assessor training

Summary of Professional Experience

Ms. Vosovic has more than 14 years of experience in the environmental consulting field and has worked in various disciplines, including environmental due diligence, NEPA compliance, lead-based paint and asbestos assessment, and LUST monitoring and reporting. Ms. Vosovic has performed hundreds of Phase I ESAs. She has also served as senior reviewer for NEPA compliance documents, with thousands of reports reviewed. She has tracked and managed the regulatory compliance for hundreds of microwave sites for a major telecommunications carrier.

Ms. Vosovic is well versed in EPA's All Appropriate Inquiry and ASTM E1527-13. She is knowledgeable in due diligence reporting standards, including Fannie Mae DUS, Freddie Mac, and HUD. Ms. Vosovic has conducted Phase I ESAs on a wide range of properties. Site assessment experience includes agricultural properties, semiconductor manufacturing facilities, fueling and automobile repair facilities, chemical distribution facilities, landfills, oil well fields, telecommunications sites, and shopping centers with dry cleaning facilities. She has scoped projects, mentored field personnel, identified environmental risks, and regularly provides detailed reports within demanding deadlines.

Ms. Vosovic is responsible for conducting all aspects of Phase I Environmental Site Assessments including proposal writing, staffing projects, client liaison, site reconnaissance and record reviews. Ms. Vosovic also provides management and QA/QC review of Phase I ESAs and Transaction Screens, and is focused on providing exemplary client service. Ms. Vosovic is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. Ms. Vosovic displays excellent technical writing and editing skills, attention to detail, and excels at providing concise, logical conclusions and recommendations.

Project experience for Ms. Vosovic includes the following:

- Provided senior review for thousands of NEPA Screening Reports, Environmental Assessments, Section 106 Reports, SHPO consultation packets, NEPA Audit Reports, and

other related documents for various telecommunications industry clients. NEPA Technical Manager for multiple telecommunications industry clients in the western United States. Served as the primary point of contact with multiple state and federal agencies.

- Assisted in subsurface investigations at heavily industrialized and commercially developed properties. Subsurface investigations included the installation of soil borings, characterization of soils, and subsequent sampling of soil and groundwater. Oversaw geophysical surveys.

- Evaluated proposed microwave installations, LTE installations and underlying support structures for compliance with environmental, FAA, and FCC regulations. Tracked and managed over 700 microwave sites in two markets. Worked closely with the client, construction managers, turf vendors, engineers, and RF safety engineers to obtain and track regulatory compliance documentation.

- Managed a database and scheduled quarterly reporting for 45 leaking underground storage tank (LUST) cases under regulatory direction. Prepared Groundwater Monitoring Reports, NPDES Quarterly Reports, Subsurface Investigation Reports, Remediation Work Plans, Sensitive Receptor Surveys, and UST Cleanup Fund submittals. Collected soil and groundwater samples for laboratory analysis.

- Performed regulatory compliance audits for a major telecommunications carrier. Provided solutions and established protocols for ensuring compliance.

- Laboratory Instructor for Introductory Geology and Environmental Science courses at California State University, Chico.

Education

Bachelor of Arts, Public Administration & Economics, San Diego State University
Executive MBA Program, 2000-2003

Highlights

Over 20 years of experience in the environmental and engineering consulting industry
Property Condition Assessments (PCAs)
Fannie Mae, Freddie Mac, and HUD due diligence

Experience Summary

Mr. Lambson is a true veteran of the commercial real estate services industry. He has over 20 years of experience managing and performing environmental and engineering consulting projects on a national level. Mr. Lambson serves as a Principal for Partner and is located in Partner's San Diego County office. Mr. Lambson currently provides client management and consulting to a nationwide client base and specializes in advising "equity" clients during the acquisition phase of commercial property transactions in the U.S., Mexico, and Canada.

Mr. Lambson has assisted clients on over 10,000 commercial real estate transactions throughout his career. His due diligence resume includes experience at all levels, and includes advising REITs, developers, property managers, retail companies, commercial real estate brokers, mortgage brokers, attorneys, lenders, universities, and real estate investment groups with the following nationwide services:

- Property Condition Assessments (PCAs)
- Individual Building System Inspections for Roof, Mechanical Electrical Plumbing (MEP), Elevator, Structure, Façade, and ADA/Accessibility
- Phase I Environmental Site Assessments (ESAs)
- Phase II Subsurface Investigations (Soil and groundwater sampling and analysis)
- Phase III Environmental Remediation Services
- Asbestos, Lead, Radon, Mold Sampling
- Seismic and Structural Assessments (PMLs)
- Energy Audits, Benchmarking, AB1103 Energy Disclosure, and LEED-related services
- Hydrology, Water Conservation and Efficiency
- Fannie Mae / Freddie Mac / HUD Due Diligence
- Geotechnical and Soils Reports
- Zoning Reports
- ALTA Surveys

Building Sciences

Property Condition Assessment, MEP Report, Roof Report, Elevator Report, Structural and Seismic Assessment for a high-profile Class A office campus acquisition in the San Francisco Bay Area

ADA Compliance and Accessibility Reviews for a national bank branch portfolio

Fannie Mae Property Condition / Physical Needs Assessment services for a 5400-unit multifamily portfolio in Nevada

Environmental Assessments
Phase I and Phase II Environmental Assessments for a 75-acre aerospace facility in the Northwest United States

Over 500 Phase I Environmental Site Assessments for a national fast-food chain

Environmental consulting for over 1 million acres of desert land in California, Nevada, and Arizona

Land Surveys
ALTA Surveys for 2400-unit apartment portfolio in the Midwest

Multi-Site Portfolios
113-site office portfolio acquisition for a national REIT

122-site hotel portfolio for a national lending institution

55-site hotel portfolio acquisition for a private investment group

68-site healthcare portfolio acquisition for a national REIT

50-site country club/golf course acquisition for a private investment group

Energy and Water Efficiency
Energy & Water consulting for a national property owner that operates and manages 30 retail and office centers on the West Coast and Texas
