SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 04/08/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 04/05/2021
Date of Next Scheduled Update: 07/19/2021

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 04/09/2021
Date of Next Scheduled Update: 07/19/2021

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 02/03/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/03/2021
Date of Next Scheduled Update: 06/14/2021

Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE

RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Environmental Interest/Information System:

TSCA SUBMITTER
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
SUPERFUND (NON-NPL)
HAZARDOUS WASTE BIENNIAL REPORTER
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

RCRA-LQG: RCRA - Large Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-8895
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/23/2021
Date of Next Scheduled Update: 07/05/2021

ECHO: Enforcement & Compliance History Information
Source: Environmental Protection Agency
Telephone: 202-564-2280
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 01/02/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 04/06/2021
Date of Next Scheduled Update: 07/19/2021

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 02/03/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/03/2021
Date of Next Scheduled Update: 06/14/2021

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 04/08/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 04/05/2021
Date of Next Scheduled Update: 07/19/2021

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

RCRA-SQG: RCRA - Small Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-8895
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/23/2021
Date of Next Scheduled Update: 07/05/2021

ECHO: Enforcement & Compliance History Information
Source: Environmental Protection Agency
Telephone: 202-564-2280
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 01/02/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 04/06/2021
Date of Next Scheduled Update: 07/19/2021

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 02/03/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/03/2021
Date of Next Scheduled Update: 06/14/2021

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases.

Section 1: Facility Detail Reports . . . . . Page 3

All available detailed information from databases where sites are identified.

Section 2: Databases and Update Information. . . . . Page 5

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 02/03/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/03/2021
Date of Next Scheduled Update: 06/14/2021

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

SUPERFUND (NON-NPL)
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

SUPERFUND (NON-NPL)
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

SECTION 2: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA CERS HAZ WASTE: CERS HAZ WASTE
Source: CalEPA
Telephone: 916-323-2514
List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 01/20/2021
Database Release Frequency: Quarterly
Date of Last EDR Contact: 04/20/2021
Date of Next Scheduled Update: 08/02/2021

CA HWTS: Hazardous Waste Tracking System
Source: Department of Toxic Substances Control
Telephone: 916-324-2444
DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 04/08/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 04/05/2021
Date of Next Scheduled Update: 07/19/2021

CA CERS: CERS
Source: California Environmental Protection Agency
Telephone: 916-323-2514
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

Date of Government Version: 01/20/2021
Database Release Frequency: Varies
Date of Last EDR Contact: 04/20/2021
Date of Next Scheduled Update: 08/02/2021

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Database Release Frequency: Annually
Date of Last EDR Contact: 04/09/2021
Date of Next Scheduled Update: 07/19/2021

Resumes of Project Personnel

J. JUSTIN RAUZON, REPA

Justin Rauzon, REPA

Education

MEM – Environmental Management, Duke University, 2014
BS – Zoology (Double Emphasis: Human and Marine Biology), Brigham Young University, 2004

Professional Licenses

Registered Environmental Property Assessor (REPA), National Registry of Environmental Professionals (No. 485639)

Specialty Certifications

OSHA 40-Hour Health and Safety Training for Hazardous Waste Workers
8-Hour Annual Refresher Training for Hazardous Waste Site Activities
OSHA 16-Hour Initial Asbestos Operations and Maintenance Training
Thermo Scientific Niton XRF Analyzer Operator's Training
First-Aid and CPR Training

Professional Affiliations

National Ground Water Association, Member (2015 to Present)

Professional Experience

Mr. Rauzon has more than 15 years of environmental services experience, all with SCS. Fluent in Spanish, Mr. Rauzon is an SCS Project Manager with a diverse background in biological and environmental sciences, and regularly performs environmental assessments and compliance audits at sites in the U.S. and in Latin America. He has technical and management experience with soil, soil vapor, and groundwater investigations at industrial, commercial, landfill, greenfield, and residential properties. He has extensive experience with environmental laws and regulations in both the U.S. and Mexico. His work experience includes all project phases, from development of cost estimates for various site assessment and cleanup programs to implementing remediation programs and interfacing with regulatory agencies.

Selected projects in which he has participated are described below.

Environmental Management

Due diligence assessments of properties prior to real estate transfer of properties in California, Arizona, New Jersey, Mexico, Puerto Rico, and the Dominican Republic. Mr. Rauzon has completed numerous due diligence assessments of properties prior to acquisition, disposition, or loan financing by investment banks, insurance companies, corporations, non-profit entities, real estate developers, and private parties. Projects have included Phase I assessments that meet federal All Appropriate Investigation (AAI) regulations, American Society for Testing and Materials

(ASTM) standards, and client-specific guidelines; inspections for asbestos and lead-based paint; Phase II investigations; preparation of abatement and remediation cost estimates; and regulatory agency coordination. These projects frequently involve review of previous environmental reports and investigation of current and past on-site operations, regulatory agency records searches, evaluation of historical property use information, identification of nearby potentially contaminated sites, and development of appropriate conclusions about environmental risks. Investigations involve preparation of work plans, soil boring and subsequent sampling, groundwater well installation and sampling, soil gas probe installation and sampling, precision mapping, evaluation of contaminants in accordance with regulatory requirements or generally accepted guidelines, preparation of investigation report, and analysis of applicable remedial alternatives. Mr. Rauzon has served as the Project Manager for sites that have received regulatory closure from various regulatory agencies.

Planning, coordinating, and supervising remedial actions that included excavation, transport, and disposal of contaminated soils and water. Investigations involve preparation of Remedial Action Plans (RAPs), direction of fieldwork, oversight of confirmatory sampling, and interfacing with regulatory agencies.

The characterization of hazardous waste materials. These projects include collection of soil and/or liquid samples to profile the waste materials, interpretation of laboratory results, and evaluation of disposal/recycling options to minimize the costs and liabilities to clients associated with the removal of wastes.

Assessment and certification of hazardous waste tank systems. These investigations involve working with a Professional Engineer to complete field inspections of hazardous waste tanks, associated ancillary equipment, leak-detection systems, and secondary containment devices, as well as interfacing with regulatory agencies.

Project Management

Project Manager for due diligence investigation of a portfolio with more than 300 industrial sites throughout Mexico. SCS services included conducting Phase I and Phase II environmental assessments within the strict timeline of the $1.2 billion industrial real estate transaction. Subsequent to the closing of the deal, SCS provided ongoing consulting services to facilitate integration and management of various facilities with ongoing environmental issues.

Project Manager for hazardous materials consulting services in support of the State Route 91 Corridor Improvement Project in Orange and Riverside Counties, CA. SCS services included sampling and inventory of potentially hazardous materials associated with more than 25 bridges along the SR-91 and I-15 freeways; environmental assessments on properties within the proposed freeway expansion area; and soil testing for herbicides, pesticides, and fungicides on several land parcels.

Project Manager for investigation and remediation of industrial facility located in Fontana, CA. SCS conducted a series of environmental assessments, investigations, and remedial activities that provided sufficient information to identify environmental issues and business risks, and facilitate the client's successful purchase of property. A number of recognized environmental conditions, including releases of coal tar, solvents, heavy metals, and total petroleum hydrocarbons, were identified. Project activities conducted during the acquisition and redevelopment of the property included shallow and deep soil and soil vapor investigations; installation of groundwater monitoring wells and subsequent groundwater sampling; subsequent remedial excavation under San Bernardino County Fire Department (SBCFD) oversight to obtain closure; and excavation and off-site disposition of contaminated soil.

Health and Safety

Mr. Rauzon has participated in a certified health and safety program in compliance with OSHA Standard 29 CFR 1910.120. He is knowledgeable in incident response operations, team functions, personnel safety, and field equipment. He is able to recognize and evaluate potential chemical and physical hazards and associated risks in field operations; discuss and use personal protective equipment (PPE), such as respiratory protection and protective clothing; use and interpret direct-reading instruments; and examine and establish Standard Operating Safety Guidelines to ensure safe and effective response operations.

Professional Experience

Ms. Watkins is a Project Professional with 5 years of experience in environmental remediation and compliance. She is responsible for Phase I and II Environmental Site Assessments (ESAs), multimedia sampling and reporting (soil, groundwater, surface water, sediment, soil vapor, air), as well as compliance monitoring, permitting, document preparation, and proposals. She works directly with our local clients and regulatory agencies, ensuring timeliness of reports and compliance.

Ms. Watkins' previous experience includes field investigations and report production involving groundwater monitoring, perfluorooctanoic acid (PFAS) sample collection, excavation events related to South Coast Air Quality Management District (SCAQMD) Rule 1466 monitoring, preparation of sampling plans for Phase II investigations, stormwater inspections and reporting, and related field activities. She has developed a conceptual site model to request closure for a service station site, and has overseen contractors in a variety of field activities, including Organochlorine pesticides (OCP) testing in school sites, aerially deposited lead surveys, and soil vapor monitoring. She has conducted site investigations related to federal and state hazardous waste; produced reports for review by oversight agencies such as the Regional Water Quality Control Board (RWQCB), CalTrans, and California Department of Toxic Substances Control (DTSC); prepared Phase I ESA reports; and logged and sampled soil using boring techniques that included sonic drilling, hand auger, and direct push equipment. She has also overseen Phase II projects, and coordinated the installation and abandonment of wells, including obtaining permits, contact with subcontractors, and field oversight. She also has expertise in soil vapor well installation and monitoring.

Ms. Watkins is proficient in Microsoft Office, Adobe Illustrator, Adobe Photoshop, Canvas, and gINT.

Recent experience includes:

Phase I ESAs. Ms. Watkins has contributed to Phase I ESAs completed in accordance with various lender, American Society for Testing and Materials (ASTM), or government guidelines. Activities consisted of evaluating current and past on-site operations, generating historical property use information, identifying potentially contaminated sites in the surrounding areas, reviewing previous reports and/or files maintained by regulatory agencies, and developing conclusions regarding the presence of Recognized Environmental Conditions (RECs) and recommendations for further investigation.

Site Investigations. Ms. Watkins has conducted soil gas surveys and soil sampling with precision mapping of sites, installation of soil borings, lithologic logging, collection of soil samples, and

evaluation of subsurface contaminants in soil and groundwater in accordance with regulatory agency requirements or generally accepted guidelines.

Quarterly and Semiannual Groundwater Monitoring Reports. Ms. Watkins has assisted in the preparation of numerous routine monitoring reports for various sites with oversight of various regulatory agencies. Facilities have included various landfills across California as well as manufacturing sites.

Oversight Activities, Various Excavation Sites, CA. Ms. Watkins has served as a field technician for excavation activities at various sites throughout Southern California. Her responsibilities have included ambient air monitoring, confirmation sampling of excavated areas, oversight of truck loading, and implementation of fugitive dust control.

San Onofre Nuclear Generating Station. Ms. Watkins worked with DTSC and the Navy to characterize site conditions through groundwater well installation and monitoring, soil vapor well installation and monitoring, sampling of surface sediments, and waste characterization. Ms. Watkins oversaw the installation of 20 groundwater monitoring wells using sonic drilling techniques.

School Site Investigations. Ms. Watkins has assisted with school site investigations for the Long Beach Unified School District, including methane monitoring, excavation oversight, indoor air monitoring, and confirmation sampling for demolition activities. She worked closely with the Long Beach Unified School District and regulatory agencies to complete assessments and reports.

Lennar Real Estate. Ms. Watkins' experience includes conducting stormwater inspections and implementation of Best Management Practices (BMPs). She has prepared Stormwater Pollution Prevention Plans (SWPPPs) and quarterly as well as annual stormwater reports, and has given presentations regarding the implementation of BMPs.

Geotechnical Investigations. Ms. Watkins has experience in geotechnical investigations, including installing inclinometers at landfill sites and collecting soil samples for compaction testing.

Keck Summer Research, Sutton, AK. Ms. Watkins worked as a research assistant in Sutton, AK, collecting physical and biological samples that were later used to determine the depositional environment of the Chickaloon Formation.

APPENDIX E

Transportation Analysis

MEMORANDUM

TO: Pastor Casanova, T.E., Principal Traffic Engineer, City of Glendale

FROM: Richard Gibson, LEED Green Associate, and Janet Ye, EIT

DATE: August 10, 2021

RE: CEQA Transportation Analysis for the
5426 San Fernando Studios
Glendale, California **Ref:** J1924

Gibson Transportation Consulting, Inc. prepared a California Environmental Quality Act (CEQA) transportation analysis for the 5426 San Fernando Studios development (Project) located at 5426 San Fernando Road (Project Site) in the City of Glendale (City). The methodology and assumptions used in this analysis were established in conjunction with the City. This memorandum summarizes our analysis.

EXECUTIVE SUMMARY

State of California Senate Bill 743 (Steinberg, 2013) (SB 743), made effective in January 2014, required the Governor's Office of Planning and Research (OPR) to change *CEQA Guidelines* (California Code of Regulations, Title 14, Section 15000 and following) (CEQA Guidelines) to shift the focus of transportation impact analysis from driver delay (i.e., level of service) to vehicle miles traveled (VMT), in order to reduce greenhouse gas emissions, create multimodal networks, and promote mixed-use developments.

The City Council adopted updates to the City's *Transportation Impact Analysis Guidelines* (October 30, 2020) (City TIA Guidelines) pursuant to the requirements of SB 743, which states that all development projects within a high-quality transit area (HQTA) are considered to have less than significant transportation impacts and would not require further VMT analysis, consistent with OPR's *Technical Advisory on Evaluating Transportation Impacts in CEQA* (December 2018) and CEQA Guidelines Section 15064.3, subdivision (b)(1), which details the criteria for analyzing transportation impacts for land use projects. However, further VMT analysis is required for development projects that fall under any of the five exclusionary criteria, as further detailed in the City TIA Guidelines.

The Project proposes the development of 420,546 square feet (sf) of studio and support uses in an HQTA. The Project would align with the goals of SB 743 to reduce VMT by placing employment uses in close proximity to transit. In addition, the Project would not fall under any of the five exclusionary criteria that would require further VMT analysis.

Therefore, the Project would not result in a significant CEQA transportation impact.

In addition, the City TIA Guidelines require the consideration of a non-CEQA local transportation analysis to assess the circulation and safety of development projects. The Project meets the screening criteria for a non-CEQA local transportation analysis, which was conducted and is provided in a separate memorandum.

PROJECT DESCRIPTION

The Project would develop 420,546 sf of studio and support (including office) uses along San Fernando Road between Milford Street and California Avenue. The Project includes 234,998 sf of studio space, 185,268 sf of studio office space, and related support facilities. The Project would provide multiple pedestrian entry points for employees and visitors along San Fernando Road, Milford Street, and California Avenue. The Project would provide approximately 551 parking spaces in a three-level, above grade parking structure and various at-grade surface lots and parking aisles throughout the Project Site. Vehicular access to the Project Site would be provided via two driveways on Milford Street, one driveway on California Avenue, and one driveway on San Fernando Road. Figure 1 illustrates the Project's conceptual site plan.

The Project Site is currently occupied with approximately 200,000 sf of warehouse use that would be replaced with the development of the Project.

The Project is anticipated to be completed and operational in Year 2024.

PROJECT LOCATION

Generally, the Project Site is bounded by Milford Street to the north, residential uses to the east, commercial and residential uses and California Avenue to the south, and San Fernando Road to the west. Other nearby uses include residential and industrial uses. The Project Site is approximately 550 feet south of SR 134 and approximately 0.40 miles east of I-5.

The Project is served by multiple bus and shuttle lines operated by the Los Angeles County Metropolitan Transportation Authority (Metro), Los Angeles Department of Transportation, and the Glendale Beeline along San Fernando Road and SR 134. In the Study Area, existing bicycle routes are provided on Doran Street and Broadway.

EXISTING TRANSPORTATION SETTING

The Existing Conditions analysis includes an assessment of the existing public transit service, as well as pedestrian and bicycle circulation, that correspond with the study's 2021 preparation year. The Project's study area, shown in Figure 2, is generally bounded by Fairmont Avenue to the north, Chester Street to the east, Ivy Street to the south, and West San Fernando Road to the west (Study Area).

Existing Roadway System

Primary regional access to the Project Site is provided by SR 134 and I-5. The major arterials providing regional and sub-regional access to the Study Area include San Fernando Road and Concord Street. The following is a brief description of the major streets in the Study Area and their classifications as defined in the Circulation Element of *City of Glendale General Plan* (City of Glendale, Effective May 28, 2015) (General Plan):

- San Fernando Road – San Fernando Road is a classified Major Arterial within the Study Area. It travels in the north-south direction and is located along the western boundary of the Project Site. It generally provides two travel lanes in each direction with a center left-turn lane and left-turn lanes at most intersections. Parking is generally available on the east side of the street within the Study Area.

- Concord Street – Concord Street is a classified Urban Collector. It travels in the north-south direction within the Study Area and is located east of the Project Site. It generally provides one travel lane in each direction. Parking is generally available on both sides of the street within the Study Area.

- Milford Street – Milford Street is a classified Local Street. It travels in the east-west direction within the Study Area and is located along the northern boundary of the Project Site. It generally provides one travel lane in each direction. Parking is generally available on both sides of the street within the Study Area.

- California Avenue – California Avenue is a classified Local Street within the Study Area. It travels in the east-west direction and is located along the southern boundary of the Project Site. It generally provides one travel lane in each direction. Parking is generally available on both sides of the street within the Study Area.

Street classifications in the Study Area are shown in Figure 3.

Existing Transit System

The Project Site is located within an HQTA, as identified by the Southern California Association of Governments, Metro, and the City TIA Guidelines HQTA Map, a copy of which is provided in Attachment A. As detailed in Table 1 and Figure 4, the Project area is served by bus lines operated by Metro and Glendale Beeline, including Metro Local Line 94 and Glendale Beeline Route 12, which travel within the Study Area along San Fernando Road.

Tables 2A and 2B summarize the total available capacity of the transit system that serves the Project Site during the morning and afternoon peak hours, respectively, based on the frequency of service of each line, the standing capacity of each bus, and the average peak hour load in each direction. As shown, based on ridership data from April 2019 provided by Metro, the transit lines within a 0.25-mile walking distance of the Project Site have available capacity for approximately 256 additional riders during the morning peak hour and 207 riders during the afternoon peak hour. No transit capacity data was readily available for Glendale Beeline, though this service would provide additional transit capacity not reported in Tables 2A and 2B.

Existing Bicycle System

Based on *City of Glendale Bicycle Transportation Plan* (September 2012) (Bicycle Transportation Plan), the existing bicycle system in the Study Area consists of a limited coverage of bicycle paths (Class I), bicycle lanes (Class II), and bicycle routes (Class III). Bicycle paths are paved facilities physically separated from vehicle traffic and can be used by bicyclists. Bicycle lanes are a component of street design with dedicated striping and symbols on the roadway surface, separating vehicular traffic from bicycle traffic. Buffered bicycle lanes provide a painted flush buffer zone between a bicycle lane and adjacent travel lane. Bicycle routes are identified as bicycle-friendly streets where motorists and cyclists share the roadway and there is no dedicated striping of a bicycle lane. Bicycle routes are preferably located on Local, Collector, and lower volume Arterial Streets as part of a signed route or bicycle boulevard, which is typically applied on quiet streets such as residential neighborhoods. In the Study Area, existing bicycle routes are provided on Doran Street and Broadway.

Existing Pedestrian Facilities

The walkability of existing facilities is based on the availability of pedestrian routes necessary to accomplish daily tasks without the use of an automobile. These attributes are quantified by Walk Score and assigned a score out of 100 points. Based on proximity to other commercial businesses and cultural facilities, the walkability of the Study Area is approximately 65 points[1].

The Study Area is comprised of employment, industrial, and residential land uses served by transit stops, a bicycle network, and sidewalk system. There are adequate sidewalks lining the streets, crosswalks available at the intersections, and several restaurants and other services within walking distance of the Project Site.

The sidewalks that serve as routes to the Project Site provide proper connectivity and adequate widths for pedestrian crossings at intersections for a comfortable and safe pedestrian environment. The signalized intersection of San Fernando Road & California Avenue provides pedestrian facilities to limit illegal mid-block crossings to the Project Site.

The intersection of San Fernando Road & California Avenue provides pedestrian signals, crosswalk striping, and Americans with Disabilities Act accessible ramps.

Figures 5 and 6 illustrate the existing crosswalk systems and the pedestrian destinations within the Study Area, respectively.

FUTURE IMPROVEMENTS

The analysis of future conditions considered pedestrian, bicycle, transit, roadway, and intersection improvements via capital projects that are reasonably expected to be implemented prior to the buildout of the proposed Project (Year 2024). The City has developed the following plans that

[1] Walk Score (www.walkscore.com) rates the Project Site (5426 San Fernando Road) with a score of 65 out of 100 possible points (scores accessed on June 30, 2021). Walk Score calculates the walkability of specific addresses by taking into account the ease of living in the neighborhood with a reduced reliance on automobile travel, based on available walking routes to nearby amenities, population density, and road metrics (block lengths, intersections density).

identify future improvements to bicycle and pedestrian infrastructure in the area and the financing and timing of such improvements. Figure 7 shows the proposed future pedestrian and bicycle improvements to be provided.

Future Bicycle Improvements

The Bicycle Transportation Plan identifies the City's vision for a more integrated bicycle network throughout the City, including within the Study Area. It proposes bicycle paths on San Fernando Road and bicycle routes on Fairmont Avenue west of Concord Street, and along Concord Street within the Study Area.

Future Pedestrian Improvements

Glendale Citywide Pedestrian Plan (September 2017) (City Pedestrian Plan) outlines specific pedestrian projects for implementation throughout the City. There are no planned pedestrian improvements within the Study Area; therefore, no proposed pedestrian improvements from the City Pedestrian Plan have been assumed as part of the future conditions.

CEQA METHODOLOGY & GUIDELINES

On November 16, 2020, the City Council adopted updates to the City TIA Guidelines pursuant to the requirements of SB 743. In accordance with OPR's *Technical Advisory on Evaluating Transportation Impacts in CEQA* and CEQA Guidelines Section 15064.3, subdivision (b)(1), all development projects within an HQTA are considered to have less than significant transportation impacts, excluding:

1. A project with a floor area ratio (FAR) of less than 0.75
2. A project with more than the required number of parking spaces
3. A project that is inconsistent with the General Plan
4. A project that replaces affordable residential units with fewer, moderate- or high-income residential units
5. A project without transit-supportive uses

For projects not screened out per the criteria above, the City has adopted a local threshold of significance of 15% VMT reduction below the existing citywide average.

PROJECT TRAFFIC

The number of vehicle trips traveling to and from the Project Site is related to the size of development and type of land use proposed. Empirical trip generation studies have demonstrated that studio office uses generally generate lower levels of morning and afternoon peak hour traffic and similar levels of daily traffic as general office uses. For conservative purposes, however, the number of vehicular trips expected to be generated by the studio office component of the Project

were estimated using general office rates published in *Trip Generation Manual, 10th Edition* (Institute of Transportation Engineers, September 2017) based on developments located in "General Urban/Suburban" environments. These rates are based on surveys of similar land uses at sites around the country and are provided as both daily rates and morning and afternoon peak hour rates. The vehicular trips generated by the production support and sound stage components of the Project were estimated based on rates derived from empirical trip generation studies at similar studios in Los Angeles. Additionally, the trips currently generated by the existing uses on the Project Site were also estimated based on the warehouse rates published in *Trip Generation Manual, 10th Edition*, and those trips were then subtracted from the Project trip generation estimates to calculate the net new Project trips traveling to and from the Project Site.

Activities on the Project Site will include the sound stage production on indoor stages. These activities will include pre-production and post-production activities and related administrative functions. The Project Site may operate up to 24 hours per day, with filming activities occurring at any time of the day and any day of the week, including evenings and weekends. Although peak activities at the Project Site may not occur concurrently with typical commuter peak travel periods, this study assessed the worst-case scenario by assuming that the peak Project activities align with commuter peak hours.

The Project Site is located within an HQTA; therefore, per the City TIA Guidelines, a 5% transit/HQTA reduction was applied to account for transit usage and walk-in arrivals from surrounding neighborhoods and adjacent commercial developments. As shown in Table 3, the existing uses with transit/HQTA reductions generate 344 net daily trips, including 47 net morning peak hour trips (36 inbound, 11 outbound) and 49 net afternoon peak hour trips (13 inbound, 36 outbound) and the Project with transit/HQTA reductions generates 3,012 net daily trips, including 254 net new morning peak hour trips (208 inbound, 46 outbound) and 300 net new afternoon peak hour trips (72 inbound, 228 outbound). After accounting for the removal of the existing warehouse use on site, the Project is anticipated to generate a net increase of 2,668 daily trips, including 207 net new morning peak hour trips (172 inbound, 35 outbound) and 251 net new afternoon peak hour trips (59 inbound, 192 outbound), as summarized in Table 3.

SCREENING FOR CEQA TRANSPORTATION ANALYSIS

Table 4 summarizes the Project screening application for the CEQA transportation analyses identified in Section 2.1.2 of the City TIA Guidelines. The Project must meet at least one of the five screening criteria in order to be exempt from conducting a Project-level VMT analysis. As shown, the Project meets Criterion #4:

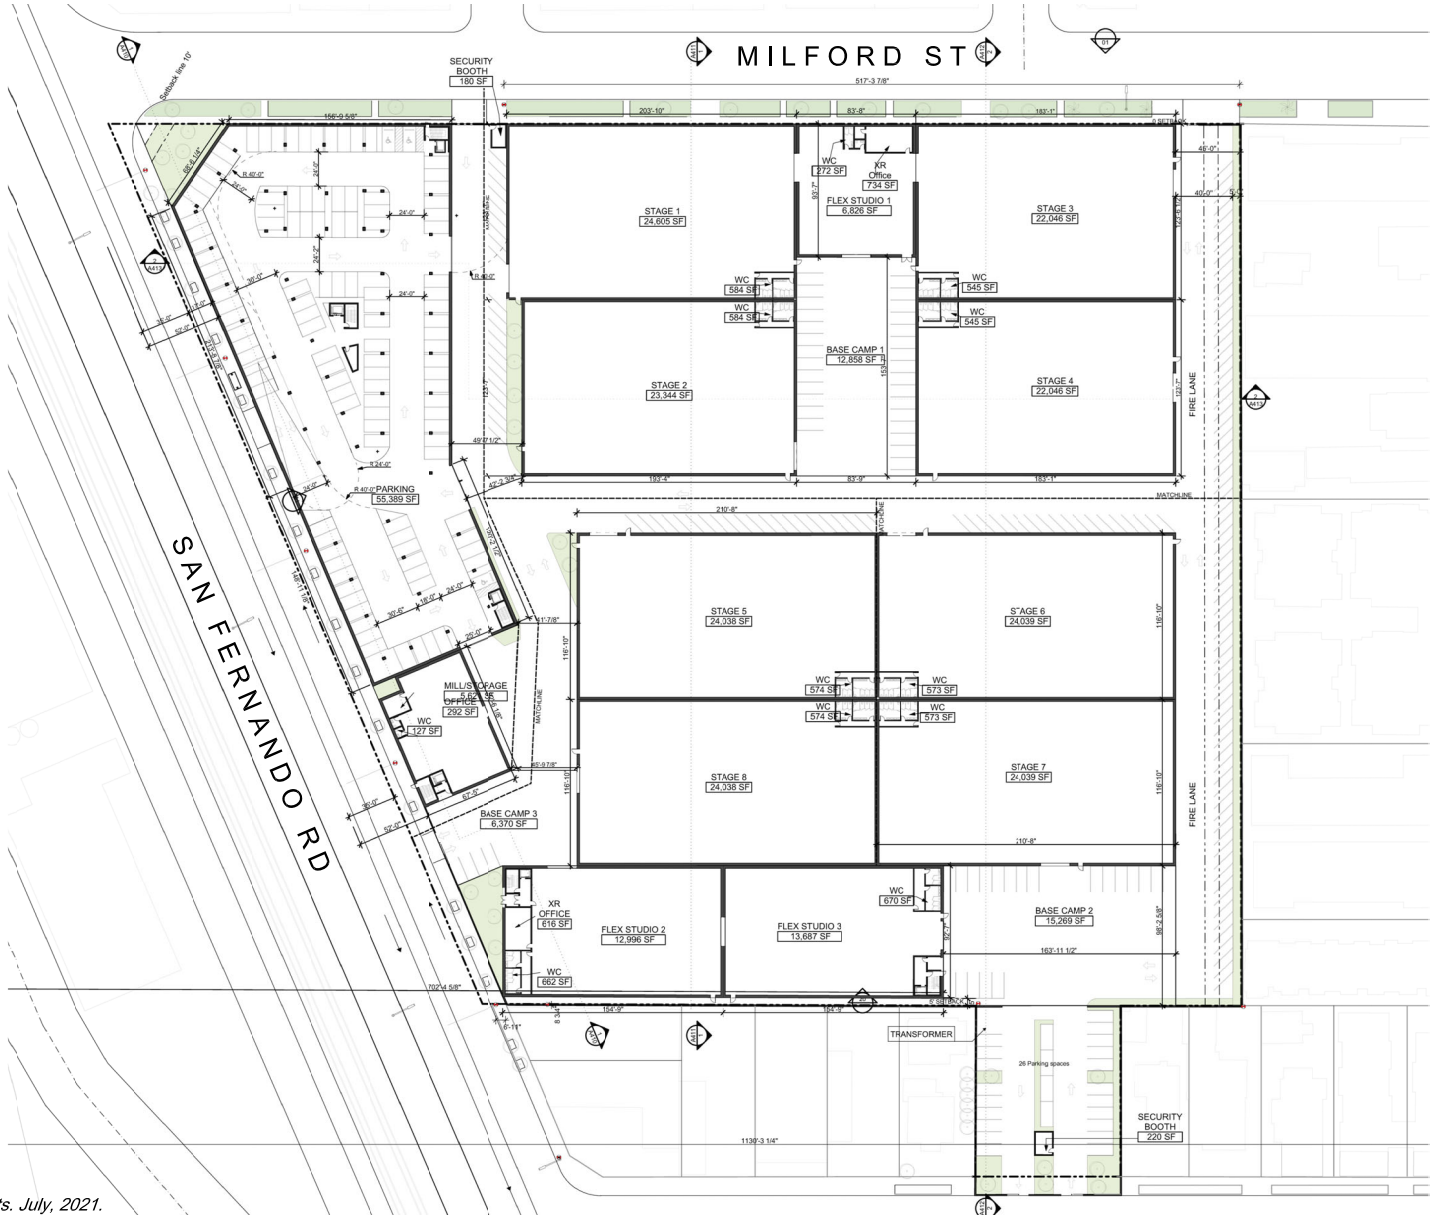
1. The Project is in an HQTA.

2. The Project would have a FAR density of 1.04.

3. Section 30.22.050 of the Glendale Municipal Code (GMC) identifies the off-street parking requirements of various land uses and the required off-street parking ratio for all developments proposed within the City. The off-street parking requirement for the Project was calculated based on the GMC rate for industrial uses. Per Table 30-32-D of the GMC, industrial uses, which include sound stages and support facilities, may provide vehicular parking at a rate of 2.0 spaces per 1,000 sf for the first 25,000 sf of floor area, 1.5 spaces

per 1,000 sf for the second 25,000 sf of floor area, and 1.25 spaces per 1,000 sf for any floor area over 50,000 sf. As detailed in Table 5, the Project would be required to provide 551 parking spaces. With a supply of 551 parking spaces, the Project's proposed parking supply would not exceed the GMC industrial use parking requirement.

4. The General Plan presents a long-term vision for the City's transportation system and balances the region's future mobility needs with economic, environmental, and public health goals. The Project encourages a variety of transportation options and is consistent with the General Plan goals of preserving the quality of life in the City's communities, minimizing congestion, air pollution, and noise associated with motorized vehicles, providing access to service and goods in the City by a variety of transportation modes, and developing land uses that can be supported within the capacity constraints of existing and realistic future infrastructure. The Project would encourage walking, biking and transit usage by providing employment near transit and pedestrian connections from the Project Site to the existing sidewalks along San Fernando Road, Milford Street, and California Avenue. Pedestrian amenities such as street trees would be provided for a safer and more comfortable pedestrian environment. Although the Project may intensify use of existing pedestrian, transit, and bicycle facilities, as well as vehicular traffic using San Fernando Road, Milford Street, and California Avenue, the magnitude of those travel modes are not anticipated to reach a level where any degradation, capacity constraint, or significant conflict would arise. As such, the Project is consistent with the goals contained in the General Plan. The Project's proposed uses are also allowed by-right under both the General Plan and the Project Site's zoning designation. The Project's proposed FAR would also comply with the zoning designation permissible FAR. The Project's use and intensity, therefore, is consistent with the General Plan.

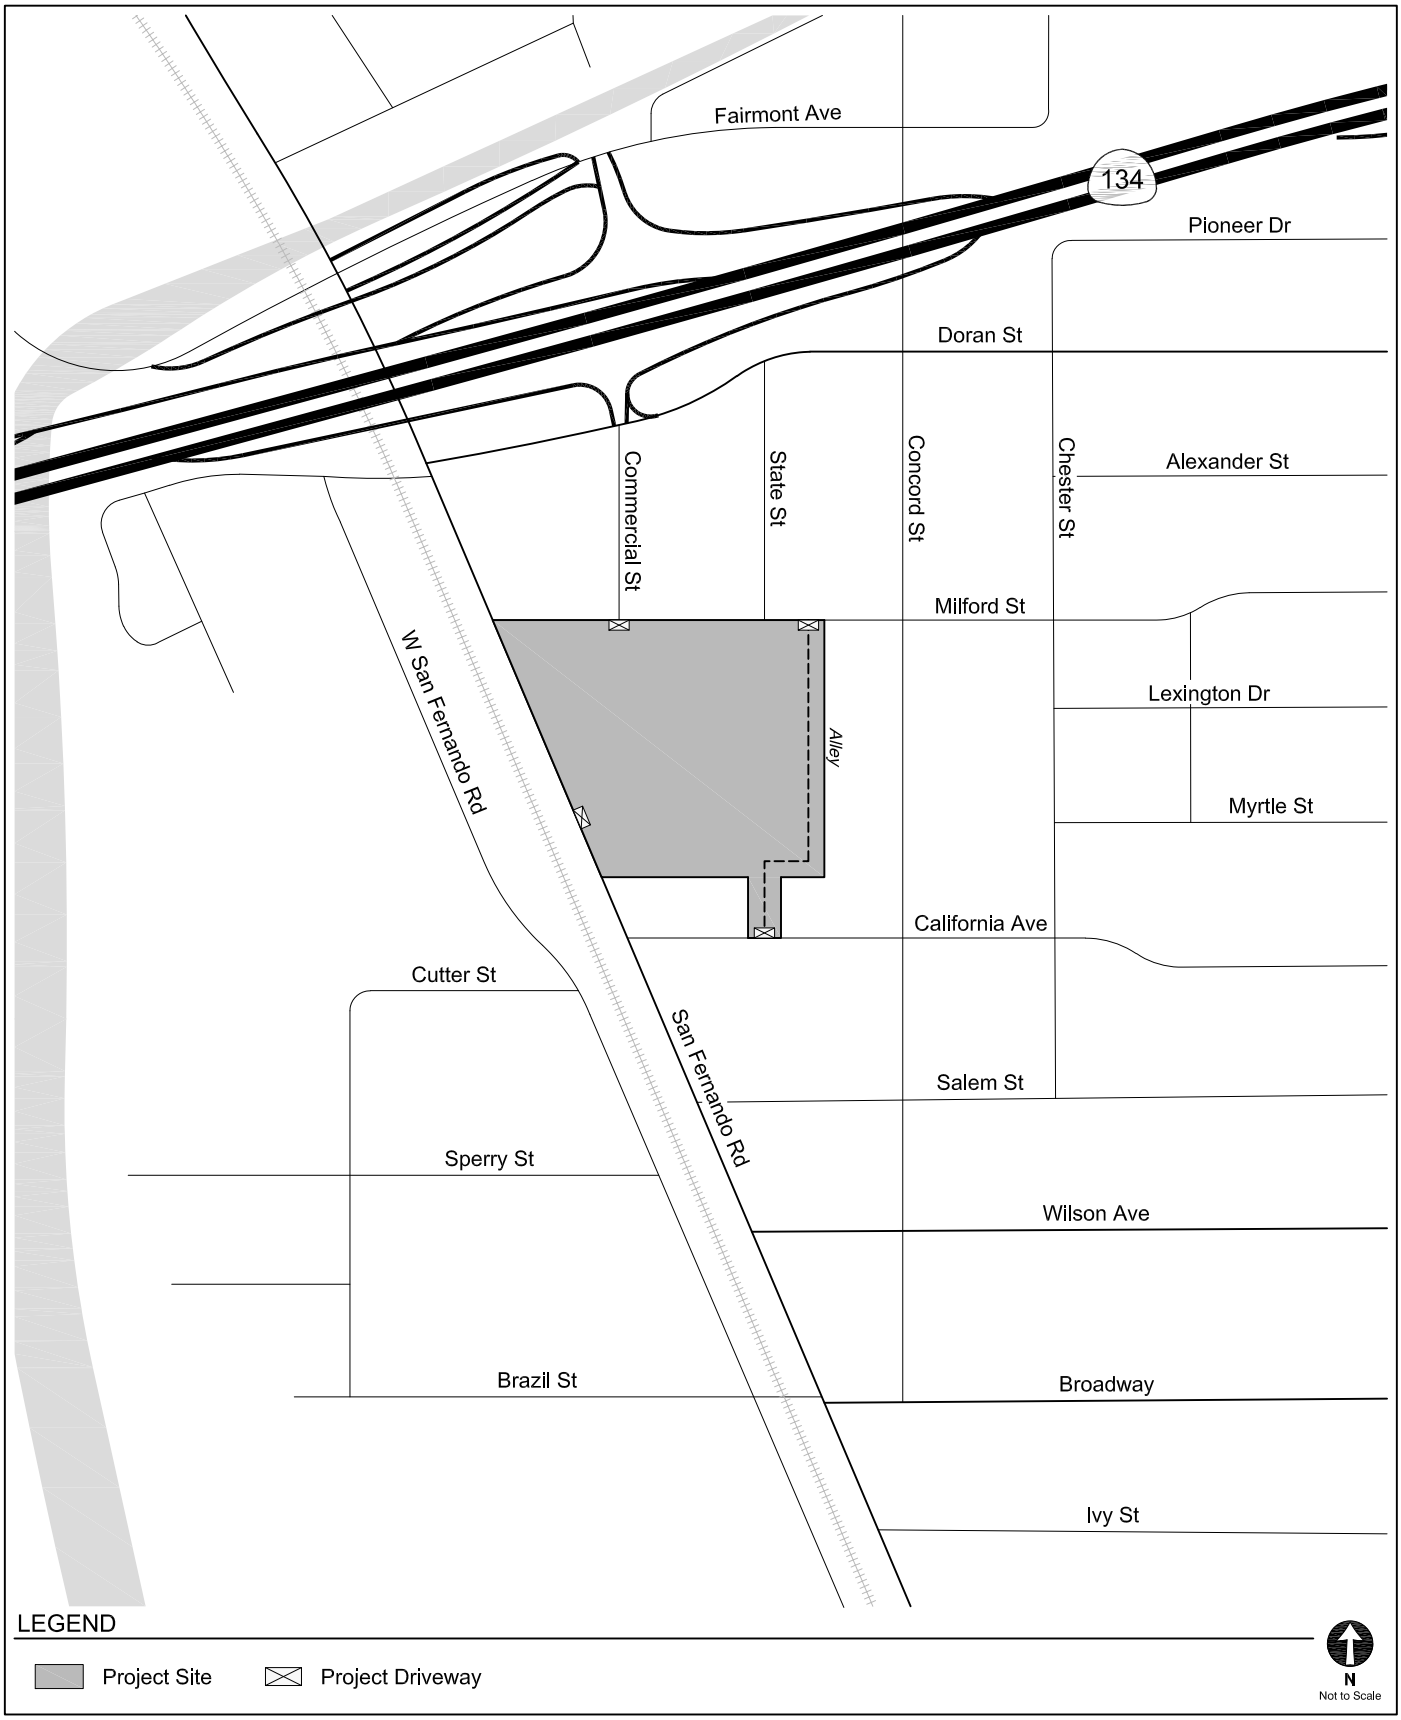


5. The Project would not replace any existing low-income housing as only warehouse uses exist on the Project Site.

6. The Project would contribute to and support the productivity and use of the nearby transit systems by providing employment near transit and retaining existing sidewalks adjacent to the Project Site along San Fernando Road, Milford Street, and California Avenue. The Project also does not propose modifying, removing, or otherwise negatively affecting existing bicycle and pedestrian infrastructure. As described above, the Project would encourage walking, biking and transit usage by providing bicycle parking and pedestrian connections from the Project Site to the existing sidewalks along San Fernando Road, Milford Street, and California Avenue. Pedestrian amenities such as street trees would be provided for a safer and more comfortable pedestrian environment. These measures would promote active transportation modes such as biking and walking.

Based on the above evaluation and as shown in Table 4 and Attachment B, the Project meets the VMT exemption screening criteria for a project located in an HQTA, which qualifies the Project for a VMT analysis exemption. Therefore, no further VMT analysis is required and no significant transportation impact is anticipated with development of the Project.

SUMMARY



The Project is located within an HQTA and would not meet the City's screening criteria requiring further VMT analysis. Therefore, the Project is not anticipated to result in a significant CEQA transportation impact.

Notes:

ksf = 1,000 square feet

[a] Studio Production Office rate based on General Office Building (Land Use 710) rate from *Trip Generation, 10th Edition*, Institute of Transportation Engineers, 2017.

[b] Rate based on empirical rate from *Transportation Study for the NBC Universal Evolution Plan Environmental Impact Report,* Gibson Transportation Consulting, Inc. and Raju Associates, Inc., March 2010.

[c] Per the City of Glendale's *Transportation Impact Analysis Guidelines*, the Project Site is located within an existing High Quality Transit Area (HQTA); therefore, a 5% transit/HQTA reduction is applied to account for transit usafe and walking visitor arrivals from the surrounding neighborhoods and adjacent commercial developments.

[d] Trip generation rate based on the best-fit curve formula listed in the *Trip Generation Manual, 10th Edition* for the Warehousing land use.

Daily - T = 1.58 (X) + 45.54
A.M. Peak Hour - T = 0.12 (X) + 25.32
P.M. Peak Hour - T = 0.12 (X) + 27.82

T = Average Vehicle Trips X = Gross Leasable Area (ksf)

TABLE 4
TRANSPORTATION IMPACT ANALYSIS SCREENING - CEQA ANALYSES

City of Glendale Screening Criteria [a]	**Met by Project**
1. Small Project Consideration	
Does the Project generate fewer than 145 net new daily vehicle trips?	No
Is the Project consistent with the General Plan land use designation?	Yes
VMT Analysis Exempted (All Critera Must Be Met)	**No**
2. Affordable Housing Provision	
Does the Project provide 100% affordable housing?	No
VMT Analysis Exempted	**No**
3. Local-Serving Retail or Public Facility	
Is the Project a retail project (less than 50,000 square feet)?	No
Is the Project a local-serving public facility?	No
VMT Analysis Exempted (All Critera Must Be Met)	**No**
4. High-Quality Transit Area (HQTA)	
Is the project located in an existing high-quality transit area? [b]	Yes [b]
Does the Project have an FAR greater than 0.75?	Yes
Does the Project follow parking guidelines that do not allow parking beyond minimum required by City Municipal Code?	Yes
Is the Project consistent with the General Plan?	Yes
Is the Project not replacing affordable housing?	Yes
Does the Project contain transit-supportive uses?	Yes
VMT Analysis Exempted (All Critera Must Be Met)	**Yes**
5. Low VMT Area	
Is the Project located in a low VMT Area? [c]	No
VMT Analysis Exempted	**No**

Notes:
[a] Screening criteria from the City TIA Guidelines Section 2.1.2, Project Screening .
[b] The Project is located in an existing High Quality Transit Area (HQTA) per City TIA Guidelines Attachment A: High-Quality Transit Area Maps.
[c] Low VMT area shown in City TIA Guidelines Attachment B: Office/Employment Project VMT Screening.

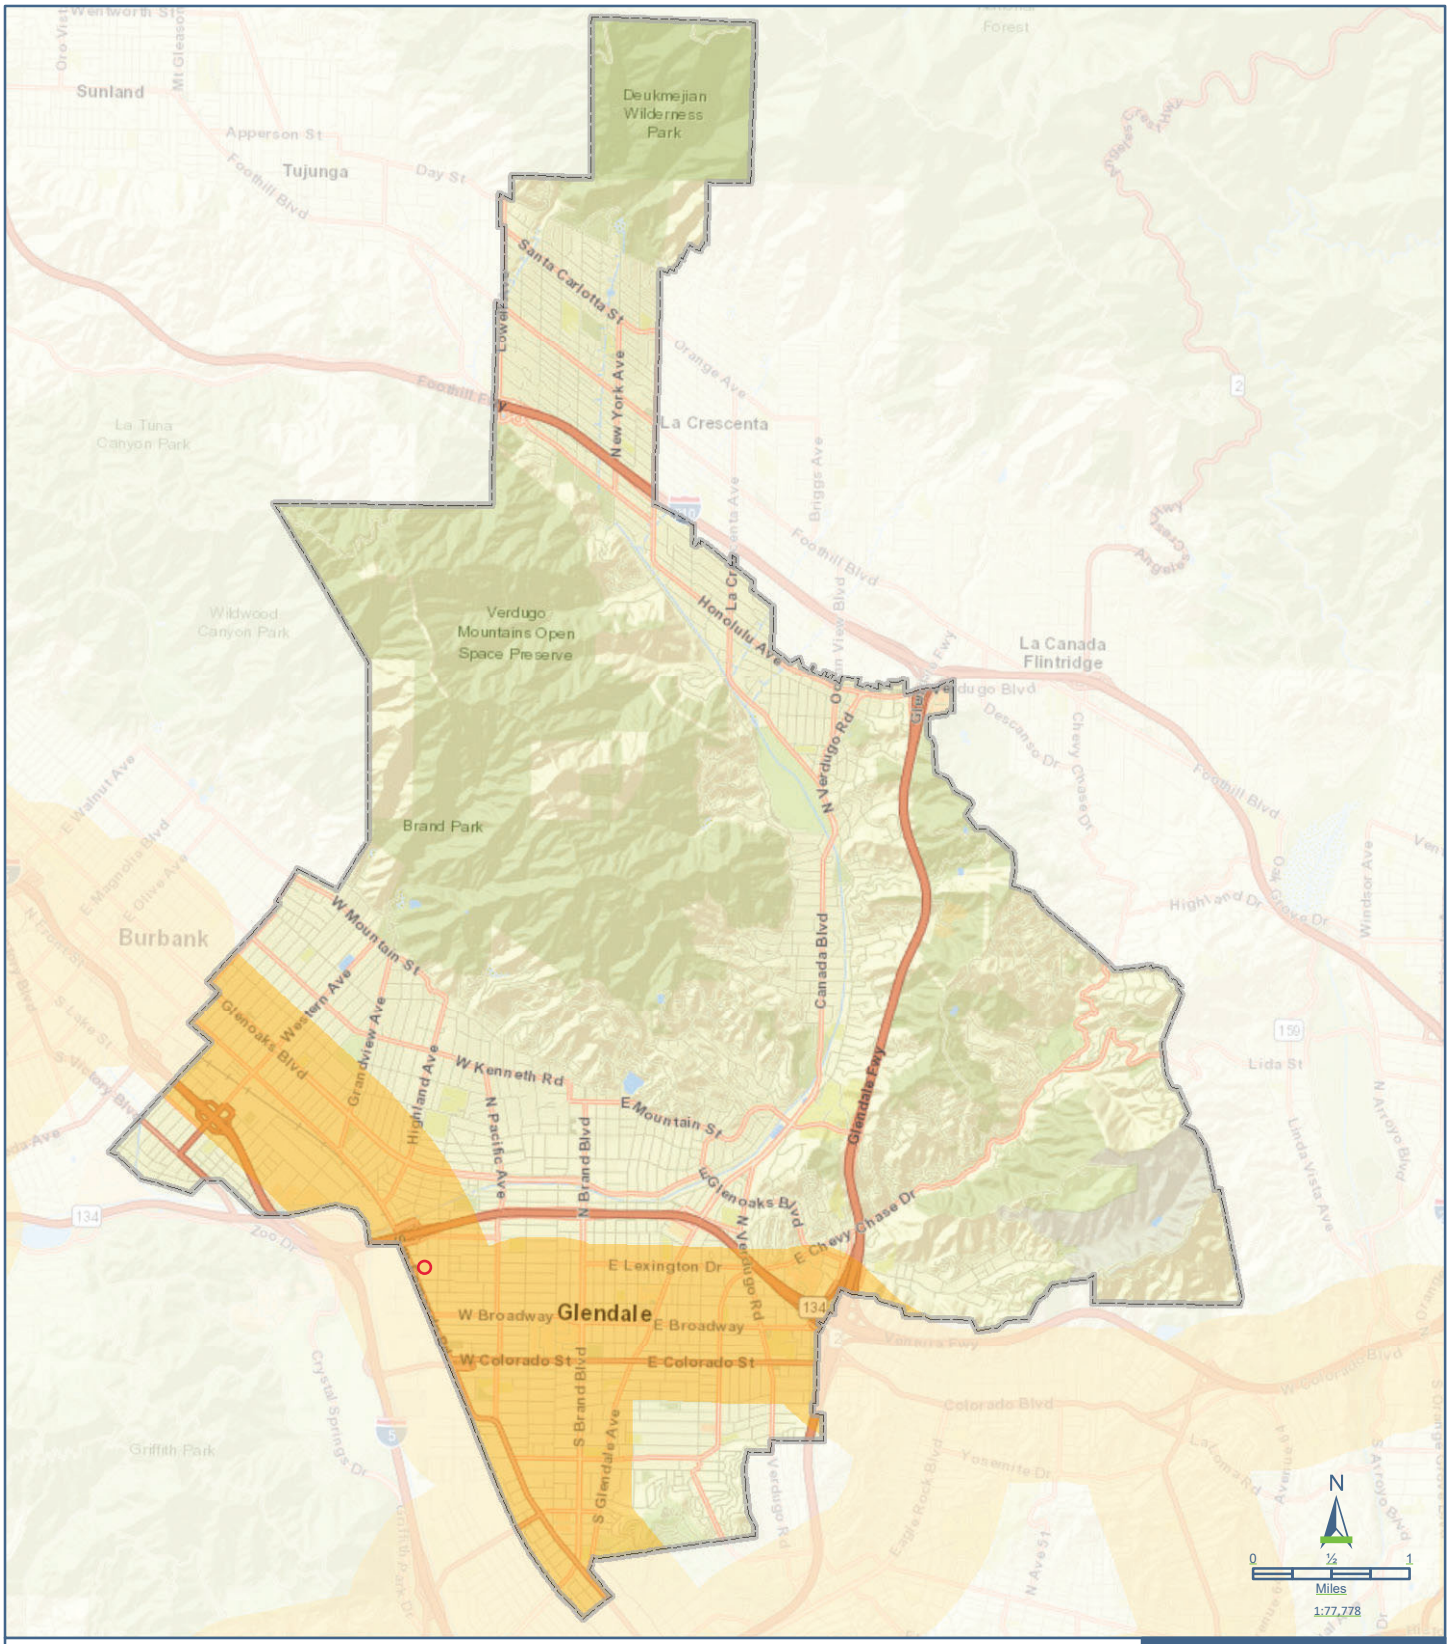

TABLE 5
VEHICLE PARKING CODE REQUIREMENTS

Land Use	Size	Code Requirement [a]	Parking Required
First 25,000 sf of Floor Area	25,000 sf	2.0 space / 1000 sf	50 spaces
Second 25,000 sf of Floor Area	25,000 sf	1.5 space / 1000 sf	38 spaces
Over 50,000 sf of Floor Area	370,546 sf	1.25 space / 1000 sf	463 spaces
		Total Code Parking Required	**551 spaces**

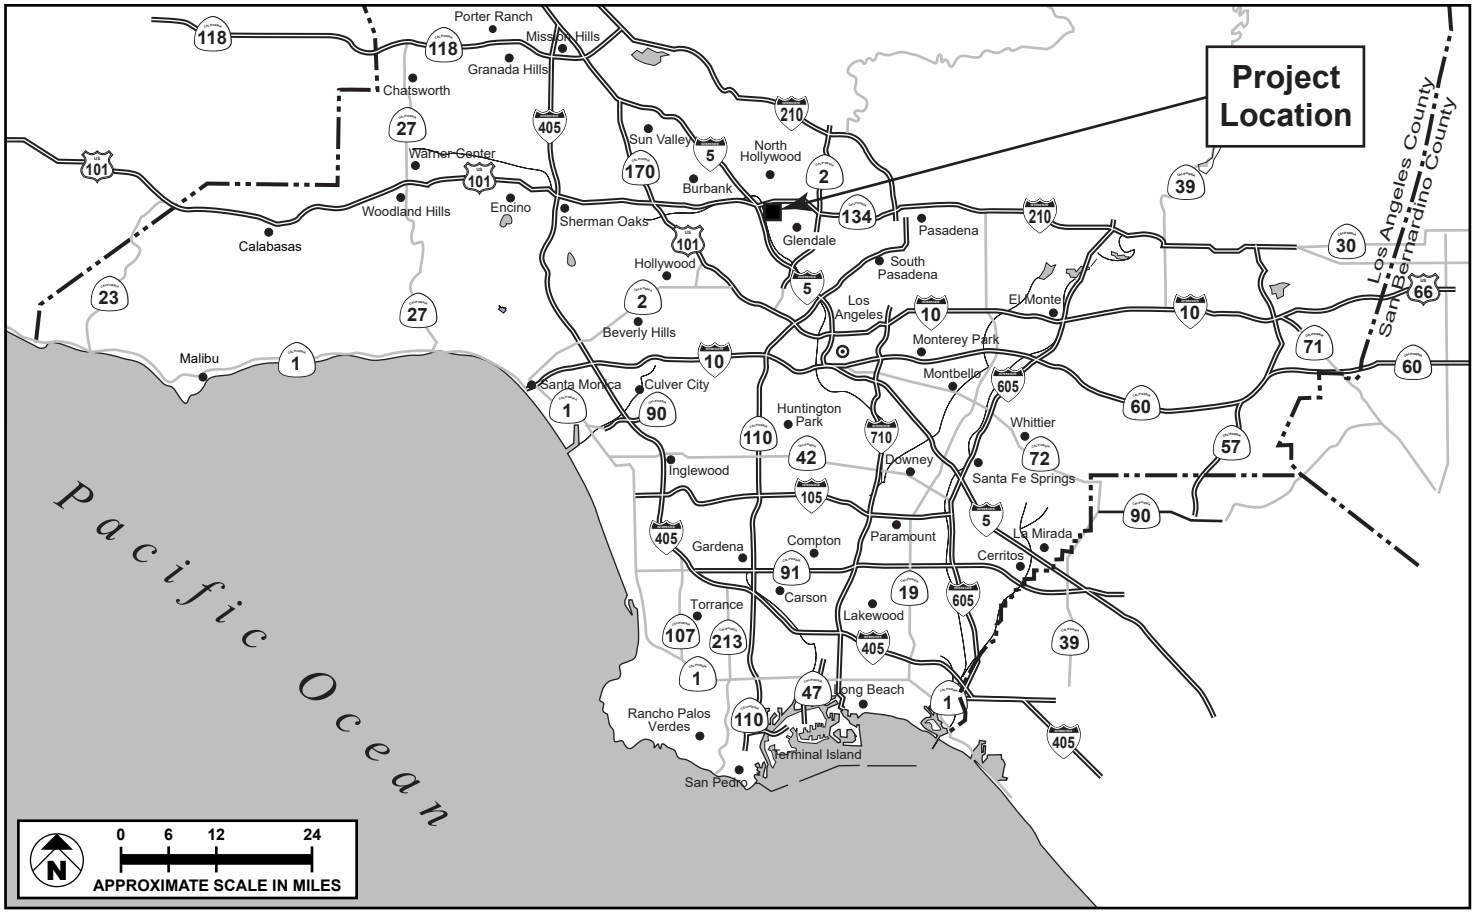
APPENDIX F



Initial Study and Notice of Preparation

INITIAL STUDY CHECKLIST

1.	**Project Title:** San Fernando Soundstage Campus
2.	**Lead Agency Name and Address:** City of Glendale, Community Development Department Planning Division 633 East Broadway, Room 103 Glendale, CA 91206
3.	**Contact Person and Phone Number:** Aileen Babakhani, Planner Tel: (818) 937-8331
4.	**Project Location:** 5426 San Fernando Road & 753 West California Avenue, Glendale, Los Angeles County (APNs: 5638-018-023 and 5638-018-032) See Figure 1, Regional and Local Vicinity Map.
5.	**Project Sponsor's Name and Address:** Griffith Studio Owner, LCC 34 East 51st Street, 2nd floor New York, NY 10022
6.	**General Plan Designation:** Mixed Use
7.	**Zoning:** IMU (Industrial/Commercial Mixed Use)
8.	**Description of the Project:** The project site is currently developed with 10 existing warehouse structures, surface parking, and loading areas. The project would include demolition of the existing structures and surface parking and construction of four (4) buildings containing 10 new production sound stage studios, three flex spaces, ancillary office use, a 385-space four-story (above-grade) parking garage, and 124 surface parking spaces with 12 loading spaces. The four (4) proposed buildings will contain approximately 406,318 square feet of gross floor area. See Figure 2, Site Plan. The Applicant requests the approval of discretionary actions to develop the Project as proposed including variances for the heights of Buildings 1 and 4 to exceed the 50 foot height limit in the IMU zone, the landscape location and tree planting dispersal requirements for the interior parking areas, a deviation from the requirement for a building entrance to be located on a corner cutoff, and a parking exception to allow 24 of the proposed parking spaces to be compact spaces.
9.	**Surrounding Land Uses and Setting:** *North*: IMU Zone (Industrial/Commercial Mixed Use), IMU-R Zone (Industrial/Commercial Residential Mixed Use), Commercial & Public Facilities *South*: IMU Zone (Industrial/Commercial Mixed Use), Commercial & Multi- & Single-Family Residential *East*: R-2250 Zone (Medium Density Residential), Multi-Family Residential *West*: T Zone (Transportation) and M2 Zone (City of Los Angeles), Transit and Industrial
10.	**Other public agencies whose approval is required (e.g., permits, financing approval or participation agreement).**

None.

11. Environmental Factors Potentially Affected:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact," as indicated by the checklist on the following pages.

☒ Aesthetics	☐ Agriculture and Forest Resources	☒ Air Quality
☐ Biological Resources	☒ Cultural Resources	☐ Energy
☐ Geology / Soils	☒ Greenhouse Gas Emissions	☒ Hazards / Hazardous Materials
☐ Hydrology / Water Quality	☒ Land Use / Planning	☐ Mineral Resources
☒ Noise	☐ Population / Housing	☐ Public Services
☐ Recreation	☒ Transportation	☐ Tribal Cultural Resources
☐ Utilities / Service Systems	☐ Wildfire	☐ Mandatory Findings of Significance

LEAD AGENCY DETERMINATION:

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☒ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Aileen Babakhani

A. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Have a substantial adverse effect on a scenic vista?	X			
2. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				X
3. Substantially degrade the existing visual character or quality of the site and its surroundings?	X			
4. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X	

Discussion

a. Have a substantial adverse effect on a scenic vista?

b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway?

c. Substantially degrade the existing visual character or quality of the site and its surroundings?

d. Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?

Potentially Significant Impact. The existing structures on site range from 17 feet to 33 feet in height. The maximum height allowed in the IMU zone is 50 feet with an additional maximum 5'-0" in height for the rooftop equipment/screen. Two of the four buildings proposed have heights greater than 50 feet. Building 1, proposed on San Fernando Road, would have a height up to 93'-3" and Building 4, located on San Fernando Road at the southern end of the site, would have a height up to 77'-3" , and Buildings 2 and 3, located in the central and eastern portion of the site would be 55 feet in height (including 5'-0" high rooftop equipment/screen, which is exempt from the height requirement). The Project includes a request for approval of a variance to allow Building 1 to have a height of up to 93'-3" including 11'-3" high rooftop equipment/screen, which occupies approximately 5% of the building's rooftop footprint and, and Building 4 to have a height up to 77'-3" including 11'-3" high rooftop equipment/screen, which occupies approximately 8% of the building's rooftop footprint. Further analysis will be provided in the EIR to determine if these proposed building heights would result in any significant impacts.

B. AGRICULTURE AND FOREST RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
2. Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
3. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined in Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?				X
4. Result in the loss of forest land or conversion of forest land to non-forest use?				X
5. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X

Discussion

a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources the City, to nonagricultural use?

b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?

c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

d. Result in the loss of forestland or conversion of forestland to non-forest use?

e. Involve other changes in the existing environment which, due to their location or nature could result in conversion of Farmland, to nonagricultural use or conversion of forestland to non-forest use?

No Impact. The Project site is zoned for Industrial/Mixed Use. There is no prime farmland, unique farmland, or farmland of statewide importance within or adjacent to the Project site and no agricultural activities take place on the Project site.[1] No agricultural use zones currently exist within the city, nor are any agricultural zones proposed. No impacts would occur. The Project site is located in an urbanized area. No portion of the Project site is proposed to include agricultural zoning designations or uses, nor do any such uses exist within the city under the current General Plan and zoning. There are no Williamson Act contracts in effect for the Project site or surrounding vicinity. No conflicts with existing zoning for agricultural use or Williamson Act contract would result.[2] There is no existing zoning of forestland or timberland in the City of Glendale. No

[1] California Department of Conservation, California Important Farmland Finder website, https://maps.conservation.ca.gov/DLRP/CIFF/. Accessed March 2022.

[2] California Department of Conservation, State of California Williamson Act Contract Land, https://planning.lacity.org/eir/HollywoodCenter/Deir/ELDP/(E)%20Initial%20Study/Initial%20Study/Attachment%2

forestland exists within the City of Glendale; therefore, no forestland would be converted to non-forest use under the Project. According to the California Department of Conservation, Division of Land Resource Protection, the Project site and the surrounding area are not candidates for listing as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance.[3] Therefore, the Project has no impact related to agriculture and forestry resources. No additional analysis of this topic in the EIR is needed.

C. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Conflict with or obstruct implementation of the applicable air quality plan?	X			
2. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	X			
3. Expose sensitive receptors to substantial pollutant concentrations?	X			
4. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	X			

Discussion

a. Conflict with or obstruct implementation of the applicable air quality plan?

b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or State ambient air quality standard?

c. Expose sensitive receptors to substantial pollutant concentrations?

d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Potentially Significant Impact. Construction and operation of the Project will result in the generation of air emissions. Analysis is needed to estimate the amount of emissions that would be generated to determine significance. The construction and operational air quality emissions generated by the construction and operation of the proposed Project will be further analyzed in the EIR.

D. BIOLOGICAL RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?				**X**
2. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?				**X**
3. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				**X**
4. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				**X**
5. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			**X**	
6. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				**X**

Discussion

a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?

c. Have a substantial adverse effect on State or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

e. Conflict with any local policies or ordinances protecting biological resources, such as tree preservation policy or ordinance?

f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan?

Less Than Significant Impact. The majority of the local area has been developed or landscaped and supports largely non-native plant communities and species. Therefore, only a limited number of plant species that flourish in urban environments, none of which are considered rare or endangered, can be found on the Project site. As identified in the City's General Plan Open Space and Conservation Element, the open space within the City includes five recognizable plant communities including chaparral, southern oak woodland, southern oak riparian woodland, coastal sage scrub, and alluvial scrub.[4] The Project site is not within the vicinity of any riparian habitat or other sensitive natural community. The nearest wetland resources include the Verdugo Wash located approximately a quarter mile north of the Project site and the Los Angeles River located approximately a quarter mile west of the Project site. These waterways do not intersect the Project site. As the Project site is located in an urban area of the City, the proposed Project would not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites.

The Glendale Municipal Code, Chapter 12.44 Indigenous Trees, contains guidelines for the protection and removal of indigenous trees.[5] These trees are defined as any Valley Oak, California Live Oak, Scrub Oak, Mesa Oak, California Bay and California Sycamore, which measure 6 inches or more in diameter breast height (DBH). Furthermore, the Glendale Municipal Code, Chapter 12.40 City Street Trees, contains guidelines for the preservation and protection of city street trees.[6] Should native trees be identified within the Project site which would potentially be removed upon implementation of the proposed Project, the proposed Project would comply with Glendale Municipal Code, Chapter 12.44 Indigenous Trees. The proposed Project would also comply with the Glendale Municipal Code, Chapter 12.40 for street trees. No adopted Habitat Conservation Plan, Natural Community Conservation Plan, or similar plan applies to the Project site.[7] Therefore, a less than significant impact would occur. No additional analysis of this topic in the EIR is needed.

E. CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?	X			
2. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?		X		
3. Disturb any human remains, including those interred outside of formal cemeteries?		X		

Discussion

a. Cause a substantial adverse change in the significance of a historical resource as defined in section 15064.5?

b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to section 15064.5?

c. Disturb any human remains, including those interred outside of formal cemeteries?

Potentially Significant Impact. One existing building located on the northwest corner of the project site, was previously evaluated in 2017 and assigned a California Historical Resource (CHR) Status Code of 5S3 as a part of the City of Glendale's South Glendale Historic Resources Survey, meaning the subject building "Appears to be individually eligible for local listing or designation through survey evaluation."[8] Further analysis in the EIR is needed to determine the potential impacts of the proposed Project on historical resources.

The site has been disturbed by historical development as well as activities to remediate soil and groundwater contamination. The depth of disturbance from grading will be relatively shallow. For these reasons, the potential for encountering archeological resources or human remains on the site is considered low. Potential impacts to any archaeological resources that may be present on the site and encountered during construction of the Project will be mitigated to less than significant by implementation of the following mitigation measure:

In the event that archaeological resources are unearthed during project subsurface activities, compliance to regulations outlined by California Public Resource Code PRC21083.2(i) will be adhered to, which all earth-disturbing work within a 100-meter radius must be temporarily suspended or redirected until an archaeologist has evaluated the nature and significance of the find. The Fernandeño Tataviam Band of Mission Indians (FTBMI) shall be contacted regarding any pre-contact and/or post- contact finds and be provided information after the archaeologist makes their initial assessment of the nature of the find, so as to provide Tribal input with regards to significance and treatment. After the find has been appropriately mitigated, work in the area may resume.

Potential impacts to any human remains that may be present on the site and encountered during construction of the Project will be mitigated to less than significant by implementation of the following mitigation measure:

In the event that human remains are encountered during excavation and grading activities. State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition, pursuant to Public Resources Code Section

[8] Christine Lazzarertto and Robby Aranguren, "DPR 523 Series Forms: 5426 San Fernando Road," Prepared for the City of Glendale,2017, 1-2.

5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission (NAHC). The NAHC will then contact the most likely descendant of the deceased Native American, who will then serve as a consultant on how to proceed with the remains (i.e., avoid removal or rebury).

F. ENERGY

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?			X	
2. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X	

Discussion

a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

b. Conflict with or obstruct a State or local plan for renewable energy or energy efficiency?

Less than Significant Impact. The proposed Project would meet all applicable energy conservation standards. As a production studio and supporting uses project, the proposed Project would not result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation or conflict with or obstruct a State or local plan for renewable energy or energy efficiency. Impacts would be less than significant. No additional analysis of this topic in the EIR is needed.

G. GEOLOGY AND SOILS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			X	
ii) Strong seismic ground shaking?			X	
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?			X	
2. Result in substantial soil erosion or the loss of topsoil?			X	
3. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on-or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			X	
4. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994, as updated), creating substantial direct or indirect risks to life or property?			X	
5. Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water?				X
6. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?		X		

Discussion

a. Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

ii. Strong seismic ground shaking?

iii. Seismic-related ground failure, including liquefaction?

iv. Landslides?

b. Would the project result in substantial soil erosion or the loss of topsoil?

c. Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

d. Would the project be located on expansive soil, as defined in Table 18 1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

e. Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less than Significant Impact with Mitigation. The Project site is not located within an established Alquist-Priolo Earthquake Fault Zone or designated Fault-Rupture Hazard Zone for surface fault rupture hazards. The York Boulevard Fault is the closest active fault; the nearest Fault-Rupture Hazard Zone for active faults with evidence of surface rupture, which is located approximately one mile south of the Project site. The Project site could be subject to strong ground shaking in the event of an earthquake originating along one of the faults listed as active or potentially active in the Southern California area. Loose sandy solids that are not excavated as part of the future development may be susceptible to seismically-induced settlement. However, the potential for seismic ground-shaking is common in Southern California and the effects of ground shaking can be lessened if the proposed structures are designed and constructed in conformance with current building codes and engineering practices. The proposed Project would not expose people or structures to strong seismic ground shaking greater than what currently exists.

According to the City's General Plan Safety Element, the Project site is not located within an area that is susceptible to liquefaction. Overall, the proposed Project would comply with the applicable Building Codes to avoid potential impacts related to seismic-related ground failure including liquefaction. There are no known landslides near the Project site nor is the site in the path of any known or potential landslides. As part of the proposed Project, the applicant would be required to adhere to conditions under the National Pollutant Discharge Elimination System (NPDES) Permit set forth by the Regional Water Quality Control Board (RWQCB) and be required to prepare and submit a Stormwater Pollution Prevention Plan (SWPPP) to be administered throughout proposed Project construction pursuant Glendale Municipal Code (GMC) Section 13.42.060. In addition, the applicant would be required to adhere to SCAQMD Rule 403—Fugitive Dust control.

The Project site is located within the Holocene Alluvium geologic unit which includes older floodplain deposits. The relatively flat topography of the Project site precludes both stability problems and the potential for lurching, which is earth movement at right angles to a cliff or steep slope during ground shaking. The potential for hazards such as landslides and liquefaction are considered low. No regional subsidence because of groundwater pumping has been reported in the Glendale area. Therefore, the potential for ground collapse and other adverse effects due to subsidence to occur on the project site is considered low. According to the Natural Resources Conservation Service Web Soil Survey, the soils on the Project site consists primarily of Urban land-Tujunga-Typic Xerorthents, sandy substratum complex soils, 0 to 2 percent slopes.[9] Soils within the Project site are generally sandy soils found within alluvial fans and flood plains. These soils are typically in the low to moderately low range for shrink-swell (e.g., expansion). The Project would connect to existing sewer lines that serve the Project site and would not use septic tanks or alternative waste disposal systems.

The Project site is completely underlain with older Quaternary soil and paleontologically-sensitive rock formations may be present at relatively shallow depths and could be encountered during excavation activities. The site will be graded to accommodate the building foundations, with the depth of grading to be

[9] USDA, Natural Resources Conservation, Web Soil Survey, https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx. Accessed August 2021.

shallow to preserve the existing GCL cap at a depth of approximately 6 feet below the ground surface, The amount of soil to be imported and/or exported during grading would be approximately 20,000 cubic yards (CY) depending on the final grading plan.

There is a possibility that during grading, a previously unknown paleontological resource could be identified and impacts would be potentially significant. Impacts would be less than significant with mitigation. Mitigation would include a qualified paleontologist observing grading activities in excavations that may impact older Quaternary deposits or the marine Pliocene Fernando Formation in order to salvage and catalogue fossils. The Paleontologist shall establish procedures for paleontological resources surveillance and would establish, in cooperation with the contractor, procedures for temporarily halting or redirecting work to permit sampling, identification, and evaluation of the fossils.

H. GREENHOUSE GAS EMISSIONS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	**X**			
2. Conflict with any applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	**X**			

Discussion

a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

b. Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Potentially Significant Impact. Construction and operation of the Project will result in the generation of greenhouse gas emissions. Analysis is needed to estimate the amount of these emissions to determine significance. The construction and operational greenhouse gas emissions of the proposed Project will be further analyzed in the EIR.

I. HAZARDS AND HAZARDOUS MATERIALS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X	
2. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	X			
3. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
4. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			X	
5. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?				X
6. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?				X
7. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X	
8. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?				X

Discussion

a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

h. Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Potentially Significant Impact. The transport, use, and storage of hazardous materials during the construction and operation of the Project would be conducted in accordance with applicable State and federal regulations, such as the Hazardous Materials Transportation Act, Resource Conservation and Recovery Act, the California Hazardous Material Management Act, and the California Code of Regulations, Title 22. The proposed Project would generally not produce significant amounts of hazardous waste, use or transport hazardous waste beyond those materials typically used in a commercial development. All potentially hazardous materials would be used and stored in accordance with the manufacturer's instructions and handled in accordance with all applicable federal, State, and local regulations, including but not limited to those set forth by the Federal and State Occupational Safety and Health Acts.

All contaminated waste encountered would be required to be collected and disposed of at an appropriately licensed disposal or treatment facility. Adherence to the Los Angeles County Hazardous Waste Management Plan (HWMP) and all other emergency response plan requirements set forth by the City, the City of Glendale Fire Department, and the City's Department of Public Works would be required through the duration of the Project. Compliance with federal, State, and local laws and regulations relating to transport, storage, disposal, and sale of hazardous materials would minimize any potential for accidental release or upset of hazardous materials. A Phase I ESA of the Project site was conducted in general accordance with ASTM Standard Practice E1527-13 and United States Environmental Protection Agency standards. The Phase I ESA concluded the Project site has been adequately investigated and did not identify new areas of environmental concern that have not been investigated. Residual concentrations of contaminants of concern (COCs) in soil, soil vapor, and groundwater were identified beneath the Project site.[10] The Phase I ESA stated the Los Angeles Regional Water Control Board (LARWQCB) and the Office of Environmental Health Hazard Assessment (OEHHA) concluded the Project site is in a condition suitable for a No Further Action (NFA), conditioned on the recording of a commercial/industrial land use covenant (LUC). As such, these residual concentrations are considered to be a controlled recognized environmental condition (CREC).[11] A CREC exists when a past release of a hazardous substance has been investigated and/or remediated to a point where hazardous substances are allowed to remain in place subject to the implementation of required institutional and/or engineering controls. In this case, the institutional control is the recording of the LUC and the Project site's restriction to commercial/industrial land use.[12] The Project as proposed includes maintenance of the existing geosynthetic clay liner (GCL) cap over hexavalent chromium (CrVI)-impacted deeper soils on the western side of the Project site. This existing GCL cap is located approximately 6 feet below the existing ground surface. As the proposed construction activities would involve excavation and

[10] SCS Engineers. *Phase I Environmental Site Assessment 5426 San Fernando Road, Glendale, California 91203 Assessor Parcel Numbers (APNs): 5638-018-032*. May 25, 2021.
[11] SCS Engineers. *Phase I Environmental Site Assessment 5426 San Fernando Road, Glendale, California 91203 Assessor Parcel Numbers (APNs): 5638-018-032*. May 25, 2021.
[12] SCS Engineers. *Phase I Environmental Site Assessment 5426 San Fernando Road, Glendale, California 91203 Assessor Parcel Numbers (APNs): 5638-018-032*. May 25, 2021.

disturbance of the existing soils the potential for impacts from the accidental release of hazardous materials into the environment will be further analyzed in the EIR.

As the proposed construction activities would involve excavation and disturbance of on-site soil, there is a potential for the accidental release of these materials into the environment or groundwater. Further analysis is required to determine the potential for accidental release of these materials.

The Project site is not included on the lists of hazardous materials sites compiled pursuant to Government Code Section 65962.5. No school sites are located within one-quarter mile of the project site. The Project site is not within the vicinity of an airport land use plan, within two miles of a public airport or public use airport, or a private airstrip. According to the City of Glendale General Plan Safety Element, San Fernando Road, which borders the Project site to the west is a County evacuation route. Implementation of the project would neither result in a reduction of the number of lanes along this roadway in the Project area nor result in the placement of an impediment to the flow of traffic such as medians. In the event of an emergency, all lanes would be opened to allow for traffic flow to move in one direction and traffic would be controlled by the appropriate agencies, such as the City of Glendale Police Department. During construction, the construction contractor shall notify the City of Glendale Police and Fire Departments of construction activities that would impede movement (such as movement of equipment and temporary lane closures) along San Fernando Road to allow for these first emergency response teams to reroute traffic to an alternative route, if needed. Further, during construction the applicant would be required to obtain any necessary permits from the City of Glendale Public Works Department for all work occurring within the public right-of-way. The Project area is not located in a designated wildland area that may contain substantial forest fire risks or hazards. In addition, the project area is not located within a City-designated Fire Hazard Zone as shown on Plate P-2 in the City of Glendale General Plan Safety Element (August 2003).[13] Therefore, risk of increased fire hazards in areas where flammable brush, grass or trees from future development within the project area is not identified as significant.

[13] City of Glendale General Plan, Safety Element, Plate P-2, https://www.glendaleca.gov/government/departments/community-development/planning/city-wide-plans/safety-element. Accessed August 2021.

J. HYDROLOGY AND WATER QUALITY

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface of groundwater quality?			X	
2. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?			X	
3. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of stream or river or through the addition of impervious surfaces, in a manner which would:				
i) result in substantial erosion or siltation on- or off-site;			X	
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;			X	
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or			X	
iv) impede or redirect flood flows?				X
4. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?				X
5. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X	

Discussion

a. Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?

b. Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede substantial groundwater management of the basin?

c. Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:

i. result in substantial erosion or siltation on or off site;

ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;

iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff;

iv. impede or redirect flood flows?

d. In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation?

e. Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less than Significant Impact. The applicant would be required to satisfy all applicable requirements of Chapter 13.42 of the City's Municipal Code relating to the Stormwater and Urban Runoff Pollution Prevention Control (SUSMP). These requirements include preparation of a Stormwater Pollution Prevention Plan (SWPPP) containing structural treatment and source control measures appropriate and applicable to the proposed Project. The SWPPP would incorporate best management practices (BMPS) by requiring controls of pollutant discharges that utilize best available technology (BAT) economically achievable and best conventional pollutant control technology (BCT) to reduce pollutants. Development of the proposed studios would result in a minimal change in the number of impervious surfaces and drainage characteristics of the site. The proposed Project would not increase the intensity of activities on the site and would likely result in a similar generation of urban pollutants generated by motor vehicle use on roadways and parking areas adjacent to the Project site, and the maintenance and operation of landscaped areas. All runoff with implementation of the Project would continue to be conveyed via streets and gutters to storm drain locations around the Project site. The Applicant would be required to adhere to conditions under the NPDES Permit set forth by the RWQCB and prepare and submit a SWPPP to be administered throughout Project construction. The SWPPP would incorporate BMPs to ensure that potential water quality impacts from water driven erosion during construction would be reduced to a less than significant level. The Project would not involve an alteration in the course of a stream or river or alter the drainage pattern of the site or area in a manner that would result in erosion, siltation, or flooding on- or off-site. The Project does not propose to alter any drainage patterns in a manner that would cause on- and off-site surface runoff impacts. In addition, the proposed Project applicant would be required to comply with City grading permit regulations and inspections to reduce sedimentation and erosion.

The Project site is located in a Federal Emergency Management Agency (FEMA) designated flood Zone X, meaning that it is in an area of minimal flood hazard and the Project site is not located within a 100-year flood zone.[14] The Project site is not located near the ocean or any large enclosed or semi-enclosed bodies of water, the Project would not be located within designated tsunami or seiche zones. The Project would comply with all provisions of the NPDES program and other applicable waste discharge requirements (WDRs), as enforced by the LARWQCB, including the LARWQCB's Waste Discharge Requirements for Discharges of Groundwater from Construction and Project Dewatering to Surface Waters in Coastal Watersheds of Los Angeles and Ventura Counties. The proposed Project would also comply with applicable NPDES and City requirements, which would include the use of BMPs during construction of the proposed Project as detailed in a SWPPP and in the City's LID ordinance. Impacts from construction and operation of the proposed Project would be less than significant. No additional analysis of this topic in the EIR is needed.

[14] Federal Emergency Management Administration (FEMA), Flood Map Service Center, https://www.fema.gov/flood-maps/national-flood-hazard-layer. Accessed September 2021.

K. LAND USE AND PLANNING

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Physically divide an established community?				X
2. Conflict with applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to, the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	X			

Discussion

a. Physically divide an established community?

b. Conflict with applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to, the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?

Potentially Significant Impact. The proposed Project would involve development of an entertainment production studio on a site previously developed for industrial use in the City's Industrial/Mixed Use (IMU) zone along San Fernando Road on the western edge of the City. The proposed use is allowed in the IMU zone and would not physically divide an established community as the City's IMU zone was adopted to allow a mix of uses along this portion of San Fernando Road. The proposed Project would not conflict with the General Plan land use designation or zoning of the Project site. The Applicant requests the approval of discretionary actions to develop the Project as proposed including variances for building heights, landscape and tree locations, and deviation from a corner entrance and a parking exception. The deviations from applicable development standards in the IMU zone will be further analyzed in the EIR.

L. MINERAL RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
2. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

Discussion

a. Result in the loss of availability of a known mineral resource that would be of future value to the region and the residents of the State?

b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

No Impact. The Project site and surrounding area are characterized by features typical of the urban landscape and include commercial and industrial uses. The Project site is not within an oil drilling district, State-designated oil field, or surface mining district.[15] The Project site is not located within a Mineral Resource Zone 2 (MRZ-2) Area. The Project site is not designated as a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan. Thus, there would be no impacts. No additional analysis of this topic in the EIR is needed.

[15] City of Glendale General Plan, Open Space and Conservation Element, https://www.glendaleca.gov/government/departments/community-development/planning/city-wide-plans. Accessed August 2021.

M. NOISE

Would the project result in:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	X			
2. Generation of excessive groundborne vibration or groundborne noise levels?	X			
3. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X

Discussion

a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

b. Generation of excessive groundborne vibration or groundborne noise levels?

c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Potentially Significant Impact. The Project site is not within the vicinity of a private airstrip or an airport land use plan. Construction and operation of the project will generate noise. Analysis of the noise that will be generated is needed to determine significance. The construction and operational noise impacts of the proposed Project will be further analyzed in the EIR.

N. POPULATION AND HOUSING

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			X	
2. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				X
3. Displace substantial numbers of existing people, necessitating the construction of replacement housing elsewhere?				X

Discussion

a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

Less Than Significant Impact. The proposed Project does not include any residential uses and would not result in new population growth in the City. It is anticipated that Project employees would likely be comprised of those already in the local labor force. Since the Project site is located within an urban area and is currently served by existing circulation and utility infrastructure, no major extension of infrastructure is required as part of the proposed Project.

Minor improvements to the City's existing electrical distribution system would be required to provide the amount of power needed by the proposed Project. Glendale Water and Power (GWP) would construct these improvements to existing distribution facilities in the immediate vicinity of the Project site. These improvements would not create add capacity to accommodate additional growth the vicinity of the Project site.

No residential dwelling units or residents currently exist on the Project site. Therefore, no existing housing or residents would be displaced by development of the proposed Project and the construction of replacement housing elsewhere would not be necessary. Less than significant impacts would occur. No additional analysis of this topic in the EIR is needed.

O. PUBLIC SERVICES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?			X	
b) Police protection?			X	
c) Schools?				X
d) Parks?				X
e) Other public facilities?				X

Discussion

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

a. Fire Protection?

Less than Significant Impact. The Glendale Fire Department (GFD) provides comprehensive emergency services for the City of Glendale, including fire, rescue and emergency medical services, as well as fire prevention and code enforcement functions. Fire Station No. 21, located at 421 Oak Street approximately 1.2 miles southeast of the Project site, would serve as the first-in station responder in the event of an emergency. Compliance with the applicable Fire Code and the Building Code provisions determines a project's impact on fire services. The project will be required to meet all code provisions. As a result, the project can be adequately served by existing public services and is not anticipated to result in substantial adverse impacts. The overall need for fire protection services is not expected to substantially increase and impacts would be less than significant.

b. Police Protection?

Less than Significant Impact. Police protection services would be provided by the Glendale Police Department. The closest station to the Project site is located at 131 North Isabel Street, approximately 1.7 miles to the east. The proposed Project does not result in any population and housing growth given the proposed and current commercial uses on the Site and no new facilities would be required. Thus, police protection to the Project site would remain similar to existing operations and impacts on police protection would be less than significant.

c. Schools?

No Impact. School services for the Project are provided by the Glendale Unified School District (GUSD). Pursuant to Section 65995, the Project applicant is required to pay school impact fees to the GUSD based on the current fee schedule for developments prior to the issuance of building permit. The proposed Project

would not impact current GUSD operating capacities as the proposed use would not generate an increased demand of these uses. As such, no impacts on schools would occur.

d. Parks?

No Impact. In accordance with the requirements of the City of Glendale Municipal Code (Ordinance No. 5575 and Resolution No. 07-164), the project applicant will be required to pay the Development Impact Fee to the City. The current fee schedule is $6.50 per square foot of commercial uses.[16] Implementation of the Project would not impact parks within the vicinity of the Project, as construction and operation would occur within the Project site. As such, no impacts would occur.

e. Other Public Facilities?

No Impact. The Project site does not include police, fire, school, parks, or other public facilities such as libraries. In accordance with the requirements of the City of Glendale Municipal Code (Ordinance No. 5575 and Resolution No. 07-164), the project applicant will be required to pay the Development Impact Fee to the City. Thus, the proposed Project would not result in adverse physical impacts associated with the provision of a new or physically altered government building or library. As such, there would be no impact to other public facilities resulting from implementation of the proposed Project. No additional analysis of this topic in the EIR is needed.

[16] City of Glendale, FY 2021-2022 Citywide Fee Schedule, July 1, 2021, https://www.glendaleca.gov/home/showpublisheddocument/61824/637604634370470000, accessed August 24, 2021.

P. RECREATION

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
2. Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

Discussion

a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

b. Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?

Less Than Significant Impact. The proposed Project, which would include the development on an entertainment production studio, would not generate a substantial increase in demand on existing park or recreational facilities. The project applicant will be required to pay the Development Impact Fee to the City. Payment of the impact fee would result in a less than significant impact to park and recreational facilities.

The proposed Project does not include recreational facilities. The Project is not anticipated to create a significant demand on park facilities that would require the construction or expansion at existing recreational facilities. Therefore, no growth-related impacts to recreational resources would occur. No additional analysis of this topic in the EIR is needed.

Q. TRANSPORTATION

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Conflict with program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	X			
2. Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?	X			
3. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	X			
4. Result in inadequate emergency access?	X			

Discussion

a. Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?

b. Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivisions (b)?

c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

d. Result in inadequate emergency access?

Potentially Significant Impact. Construction and operation of the proposed Project will generate additional trips. Analysis is needed to determine the amount of vehicle miles the proposed use will induce and if the Project will conflict with applicable transportation plans and policies, increase traffic hazards or affect emergency access. Transportation impacts of the proposed Project will be further analyzed in the EIR.

R. TRIBAL CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i) Listed or eligible for listing in the California Register of Historical Resources, or in the local register of historical resources as defined in Public Resources Code Section 5020.1(k), or		**X**		
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.		**X**		

Discussion

a. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or

ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Less Than Significant Impact. The site has been disturbed by historical development as well as activities to remediate soil and groundwater contamination. The depth of disturbance from grading will be relatively shallow. For these reasons, the potential for encountering tribal cultural resources on the site is considered low. The City consulted with the Fernandeño Tataviam Band of Mission Indians and the following mitigation measure has been identified to mitigate potential impacts to any tribal cultural resources that may be present on the site and encountered during construction of the Project to less than significant:

In the event that Native American cultural resources are discovered during project activities, all work in the immediate vicinity of the find (within a 60-foot buffer) shall cease and a qualified archaeologist meeting Secretary of Interior standards shall assess the find. The Fernandeño Tataviam Band of Mission Indians (FTBMI) shall be contacted regarding any pre-contact and/or post-contact finds and be provided information after the archaeologist makes their initial assessment of the nature of the find, so as to provide Tribal input with regards to significance and treatment. The archaeologist shall complete all relevant California State Department of Parks and Recreation (DPR) 523 Series forms to document the find and submit this documentation to the applicant, Lead Agency, and NAHC. If the Native American cultural resource is determined to be significant, as defined by consulting Tribes, a Native American archaeological monitor from a consulting tribe shall be present for all ground disturbing activities that occur within the proposed project area. The archaeologist and Tribal monitor will have the authority to request ground disturbing activities cease within the immediate area of a discovery to evaluate potential finds in real time.

S. UTILITIES AND SERVICE SYSTEMS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?			X	
2. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X	
3. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			X	
4. Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			X	
5. Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			X	

Discussion

a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water, drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

b. Have sufficient water supplies available to serve the project and reasonable foreseeable future development during normal, dry and multiple dry years?

c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

e. Comply with federal, State, and local management and reduction statutes and regulations related to solid waste?

Less than Significant Impact. Glendale Water and Power (GWP) will make minor improvements to the City's existing electrical distribution system to provide up to 10 megawatts of power to the Project site to meet the needs of the proposed Project. GWP will rebuild the power poles on Faircourt Lane and install overhead conductors from San Fernando Road to Concord Street, install 1,700 feet of conduit and four vaults on Concord and Milford Streets, and 200 feet of conduit on San Fernando Road to bring power from the power pole at northeast corner of the California Avenue and San Fernando Road to a new pull box in front of the Project site. These improvements to existing electrical distribution facilities would occur in existing improved public right-of-way and would not result in any potential significant impacts for this reason.

Per CALGreen, 65 percent of construction and demolition waste must be diverted from landfills. As such, at least 65 percent of all construction and demolition debris from the site would be diverted. Additionally, CALGreen requires 100 percent of trees, stumps, rocks, and associated vegetation and soils resulting primarily from land clearing to be reused or recycled. The Project would be consistent with the applicable solid waste regulations, including GMC 8.58.050. Since the Project would comply with federal, State, and local statutes and regulations related to solid waste, impacts would be less than significant. No additional analysis of this topic in the EIR is needed.

T. WILDFIRE

If located in or near state responsibility area or lands classified as very high fire hazard severity zones, w*ould the project:*	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Substantially impair an adopted emergency response plan or emergency evacuation plan?				X
2. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from wildfire or the uncontrolled spread of a wildfire?				X
3. Require the installation or maintenance of associated infrastructure (such as roads, fuel, breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				X
4. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				X

Discussion

a. Substantially impair an adopted emergency response plan or emergency evacuation plan?

b. Due to slope, prevailing winds, and other factors, exacerbate wildlife risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. The Project is not located in or near a State Responsibility Area of land classified as Very High Fire Hazard Severity Zone.[17] Furthermore, the Project would not impair an adopted emergency response plan or emergency evacuation plan as the Project site is not located near a non-compliant access road as depicted in the City's Safety Element. [18] The Project is located on relatively flat land and would not change or exacerbate current risks of wildfire or pollutant concentrations from a wildfire The Project would not require the installation of infrastructure that may exacerbate fire risk. Future driveway and building configurations would comply with applicable fire code requirements for emergency evacuation, including proper emergency exits for patrons, employees, and residents. Project site access and circulation plans would be subject to review and approval by the GFD. No impact would occur. No additional analysis of this topic in the EIR is needed.

[17] CalFire, Fire and Resource Assessment Program (FRAP), Fire Hazard Severity Zone Viewer, https://egis.fire.ca.gov/FHSZ/. Accessed August 2021.

[18] City of Glendale General Plan, Safety Element, Ch. 4 Fire Hazards, Plate 4-3.

U. MANDATORY FINDINGS OF SIGNIFICANCE

	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Does the project have the potential to substantial degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	X			
2. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	X			
3. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			X	

Discussion

a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

c. Does the project have environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly?

Potentially Significant Impact. Impacts related to substantially degrading the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal would not be significant. Analysis of the potential for the Project to affect historic resources will be evaluated in the EIR. The potential of the Project to contribute to significant cumulative impacts will also be evaluated in the EIR. The Project does not have the potential to result in environmental effects which would cause substantial direct or indirect adverse effects on human beings.

ORIGINAL FILED
SEP 12 2022
LOS ANGELES, COUNTY CLERK

NOTICE OF PREPARATION
SAN FERNANDO SOUNDSTAGE CAMPUS PROJECT EIR

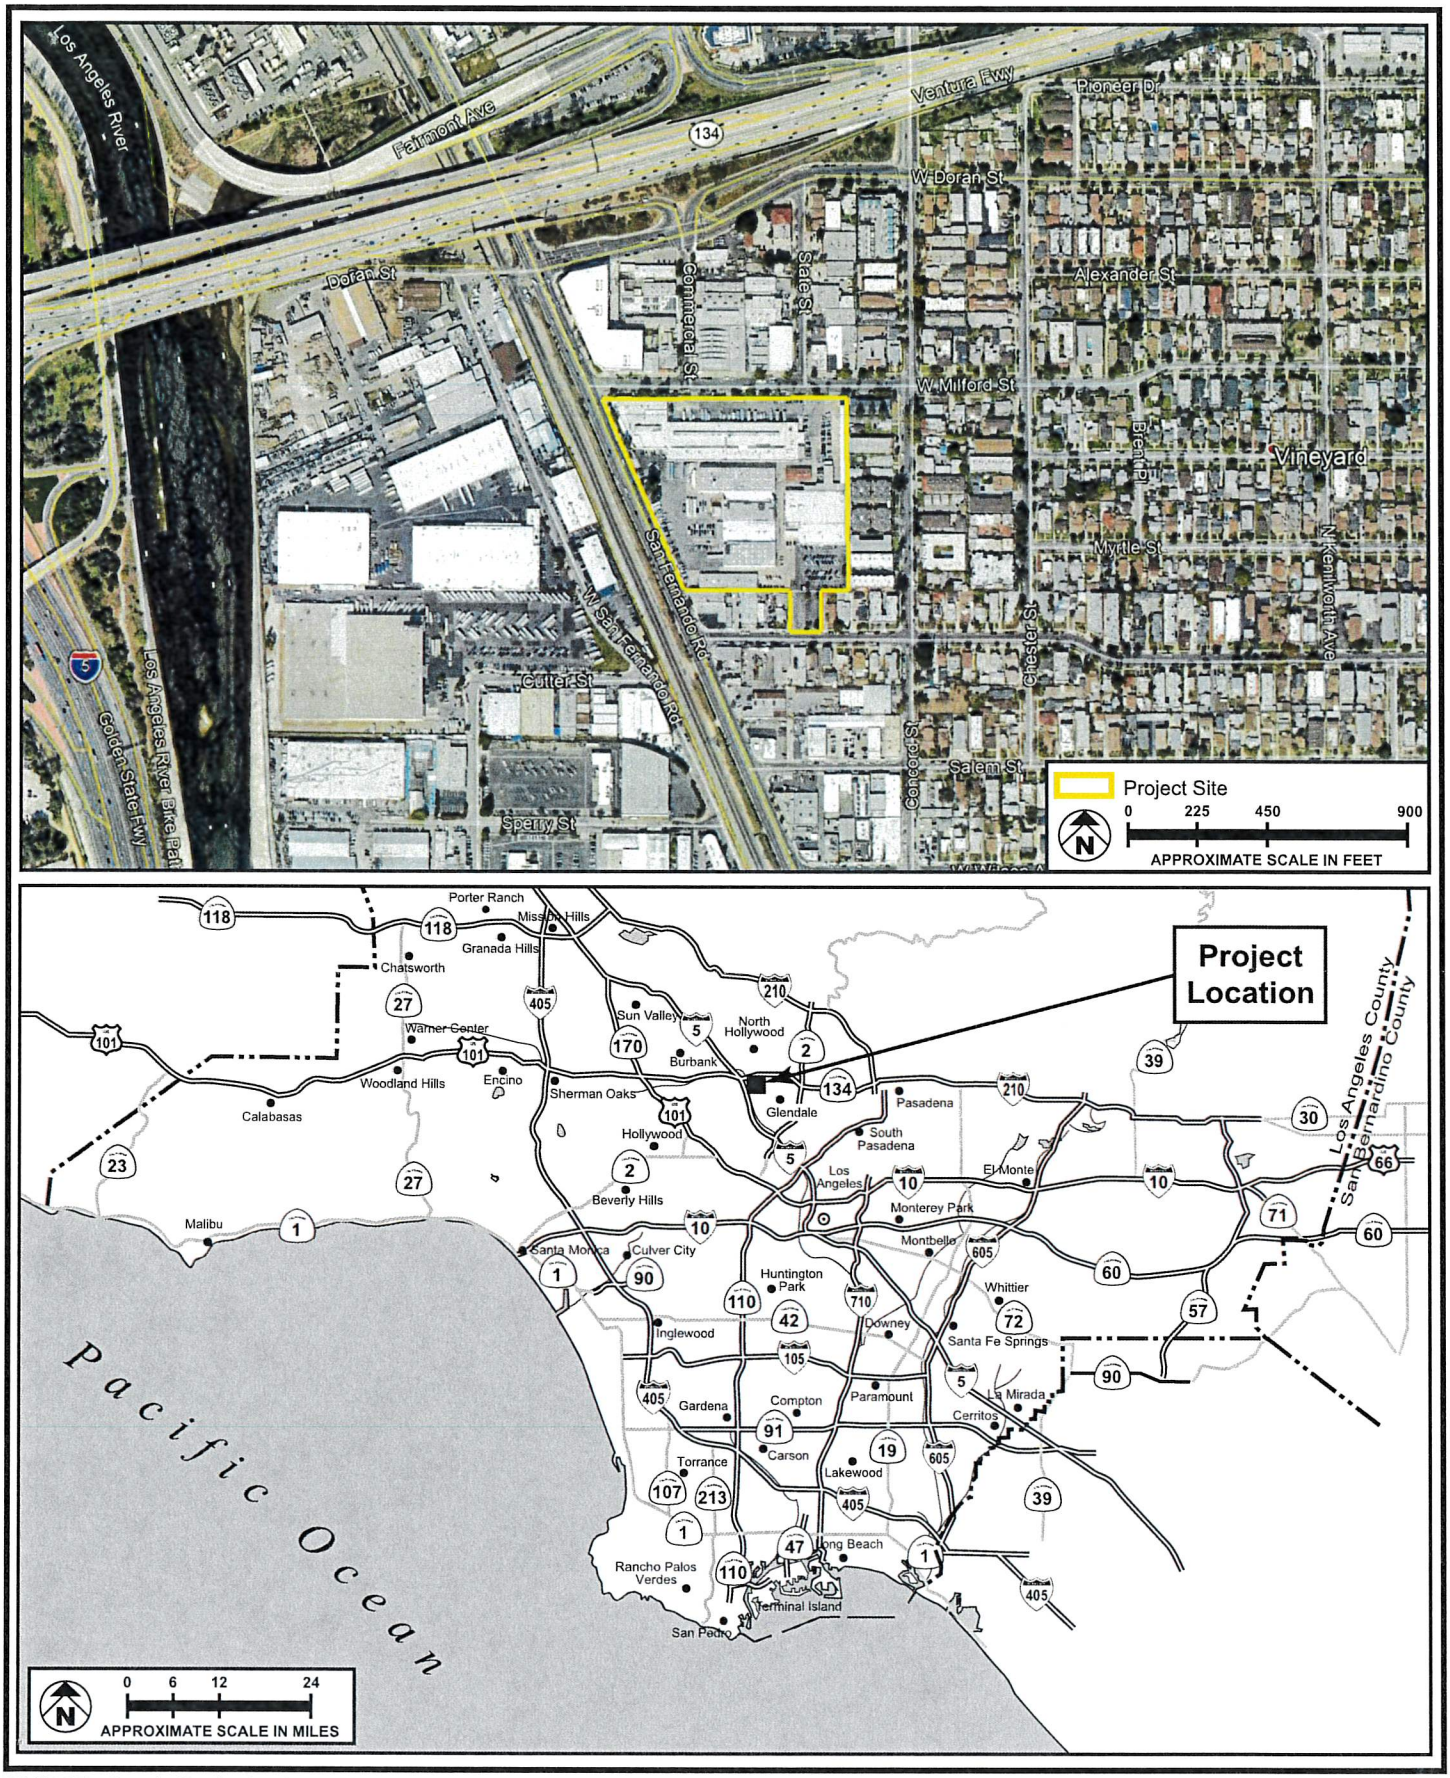
To: Agencies, Organizations, and Interested Parties

From: City of Glendale, Community Development Department

Subject: Notice of Preparation (NOP) of an Environmental Impact Report (EIR) in Compliance with Title 14, Sections 15082(a), 15103, and 15375 of the California Code of Regulations (CCR). The City of Glendale (City) is the Lead Agency under the California Environmental Quality Act (CEQA) and will prepare an EIR for the proposed project identified below.

Project Title: San Fernando Soundstage Campus Project

Project Location: The proposed project site is located at 5426 San Fernando Road and 753 West California Avenue and is approximately 500 feet south of SR-134 within the industrial corridor in the west portion of the City of Glendale (APNs: 5638-018-023 and 5638-018-032) (Figure 1, Regional and Local Vicinity Map). The project site is bounded to the north by Milford Street, to the west by San Fernando Road, to the east by medium density residential uses, and to the south by a mix of residential and commercial uses. The Metrolink station for Glendale is approximately 2.2 miles to the southeast and the nearest major roadways are San Fernando Road to the west and Pacific Avenue to the east. The Metro Local 94 and Glendale Beeline 12 bus lines travel along San Fernando Road west of the project site.



Project Description: The project site is designated Mixed Use by the General Plan and zoned IMU (Industrial/Commercial Mixed Use). The project site is developed with 10 existing warehouse structures, surface parking, and loading areas. The project would include demolition of the existing structures and surface parking and construct four (4) new buildings (Figure 2, Site Plan) containing 10 new production sound stage studios, three flex spaces, various support spaces, a 385-space four-level above-grade parking garage, and 124 surface parking spaces with 12 loading spaces. Building 1, proposed on the northwest corner of the site on San Fernando Road, would have a height up to 93'-3" (including 11'-3" high rooftop equipment/screen) and Building 4, located on San Fernando Road at the southern end of the site, would have a height up to 77'-3"(including 11'-3" high rooftop equipment/screen), and Buildings 2 and 3, located in the central and eastern portion of the site would be 55 feet in height (including 5'-0" high rooftop equipment/screen, which is exempt from the height requirement). Access to the Project would be provided by four (4) gated entrances; two (2) located on Milford Street, one (1) on San Fernando Road, and one (1) on California Avenue, where primary access to the site is currently provided. The proposed Project is consistent with the zoning and General Plan land use designation of IMU (Mixed Use). The Applicant requests the approval of discretionary actions to develop the Project as proposed including variances for the heights of Buildings 1 and 4 to exceed the 50-foot height limit in the IMU zone, the landscape location and tree planting dispersal requirements for the interior parking areas, a deviation from the requirement for a building entrance to be located from the corner cutoff at the intersection of San Fernando Road and Milford Street, and a parking exception to allow 24 of the proposed parking spaces to be compact spaces.

The potential environmental effects are identified in City's Initial Study, available for review at: https://www.glendaleca.gov/government/departments/community-development/planning/current-projects/environmental-review

Agency/Public Comments: The City requests your comments regarding the scope and content of the environmental review to be conducted for the proposed project. Due to the time limits mandated by State law, your response must be sent at the earliest possible date but not later than 30 days after receipt of this notice. The City will accept written comments on this NOP between **September 9, 2022 and October 10, 2022 at 5 p.m.** Please send your comments by email to ABabakhani@glendaleca.gov or by mail to: City of Glendale, Community Development Department, 633 East Broadway, Room 103, Glendale, CA 91206, Attention: Aileen Babakhani, Planner.

Date: September 9, 2022
