Application to Alter, Repair, Demolish or Move

Application is hereby made to the Superintendent of Buildings of the City of Glendale for the approval of this detailed statement of specifications herewith submitted for the alteration, repair, demolition or move the building herein described. All provisions of the building ordinances and state laws shall be complied with in the alteration of said building, whether herein specified or not. It is also understood that the granting of a permit on this application does not grant any right or privilege for the alteration, repair or demolition of the building herein described, on any public street or alley or on any land or portion thereof, the title or right of possession to which is in litigation by, or is disputed by the City, County or State; or as giving or granting any right or privilege to use the said structure or building for any purpose which is or may hereafter be prohibited by ordinance of the City of Glendale.

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

_____Yes _____No

Worker's Compensation Declaration

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation insurance or a certified copy thereof. (Sec. 3800, Labor Code)

Policy No. 3092 Company SELF INSUR Worker's Comp. expiration date _____

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

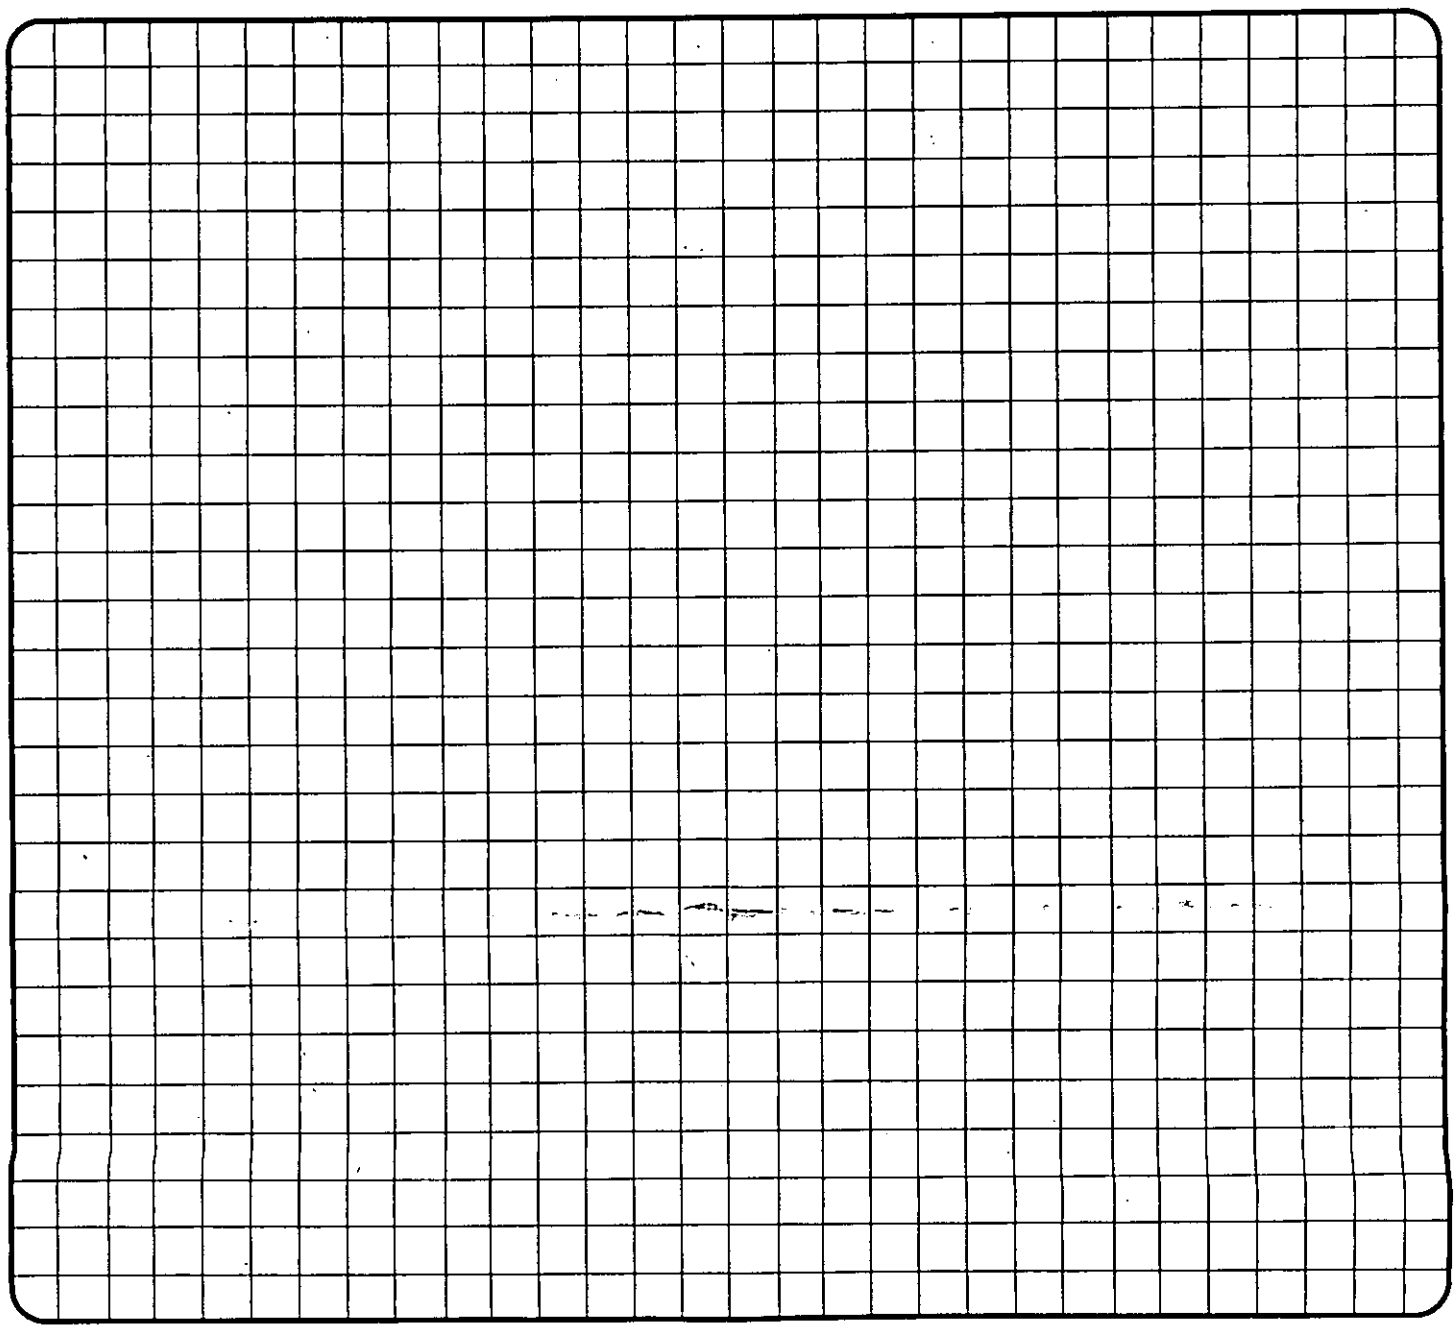
PLOT PLAN INSTRUCTIONS



City of Glendale
Permit Services Center

PLEASE SHOW ON PLOT PLANS FOR BUILDING PERMIT THE FOLLOWING INFORMATION:

1. Make the bottom of the page the street frontage.
2. Draw the shape of the lot only if it is irregular.
3. Put the dimensions of the lot in the brackets provided on the sheet for right, left, front and rear; or if it is irregular, on the outside of the lot lines.
4. Draw where existing structures sit on the property and show length/width size. Locate all structures on the lot and their distance from one another.
5. Draw where the new construction will be located: ie. onto an existing building or on the property and its size.
6. Show how far from the property lines existing buildings and new construction will be.

STREET NAMES

1. Give the names of the road or street your property is located on. Mark an X where the building is located.
2. Show the nearest intersecting streets or roadways.
3. Check the appropriate box if the property is a corner or hillside lot.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

_____Yes _____No

Worker's Compensation Declaration

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation insurance or a certified copy thereof. (Sec. 3800, Labor Code)

Policy No. _____ Company _____ Worker's Comp. expiration date _____

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. I understand that the building permit will expired within 180 days from the date of its issuance unless work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

Signature of Applicant

Driver's License No. G0429397

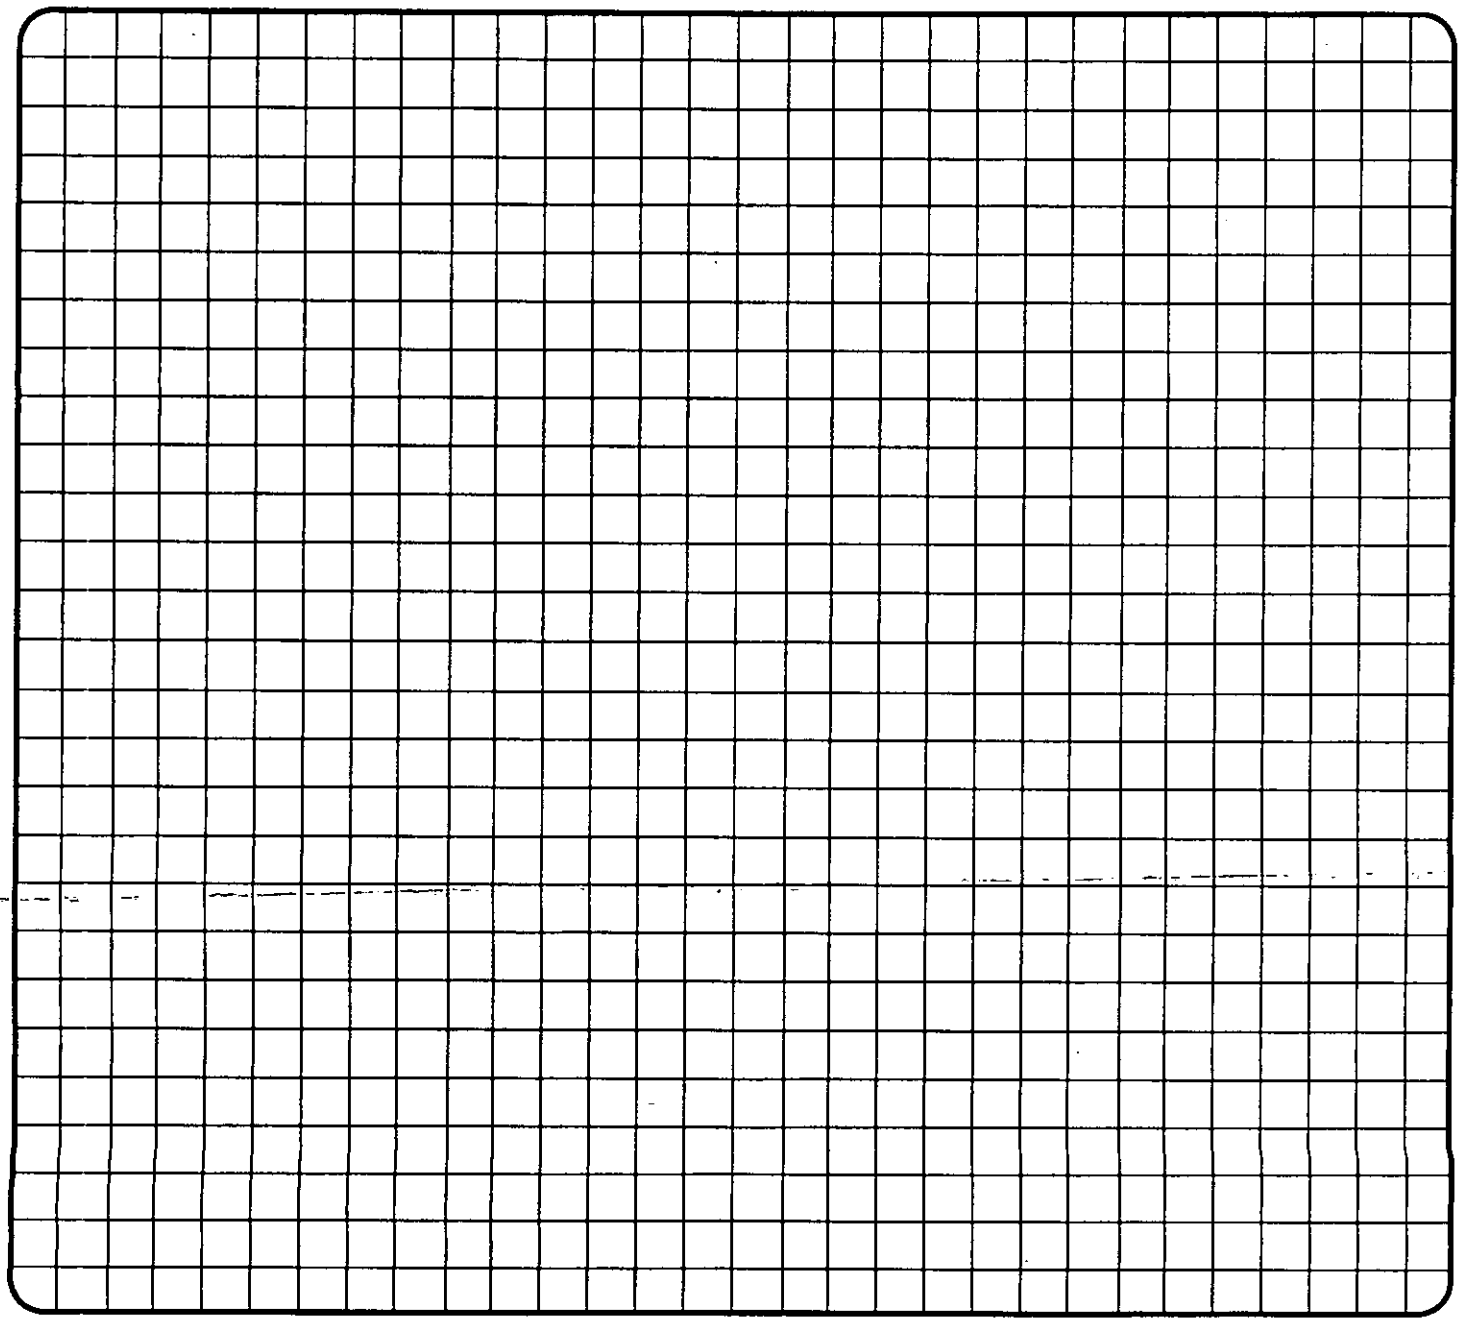
PLOT PLAN INSTRUCTIONS



City of Glendale
Permit Services Center

PLEASE SHOW ON PLOT PLANS FOR BUILDING PERMIT THE FOLLOWING INFORMATION:

1. Make the bottom of the page the street frontage.
2. Draw the shape of the lot only if it is irregular.
3. Put the dimensions of the lot in the brackets provided on the sheet for right, left, front and rear; or if it is irregular, on the outside of the lot lines.
4. Draw where existing structures sit on the property and show length/width size. Locate all structures on the lot and their distance from one another.
5. Draw where the new construction will be located: ie. onto an existing building or on the property and its size.
6. Show how far from the property lines existing buildings and new construction will be.

STREET NAMES

1. Give the names of the road or street your property is located on. Mark an X where the building is located.
2. Show the nearest intersecting streets or roadways.
3. Check the appropriate box if the property is a corner or hillside lot.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☒ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

_____Yes _____No

Worker's Compensation Declaration

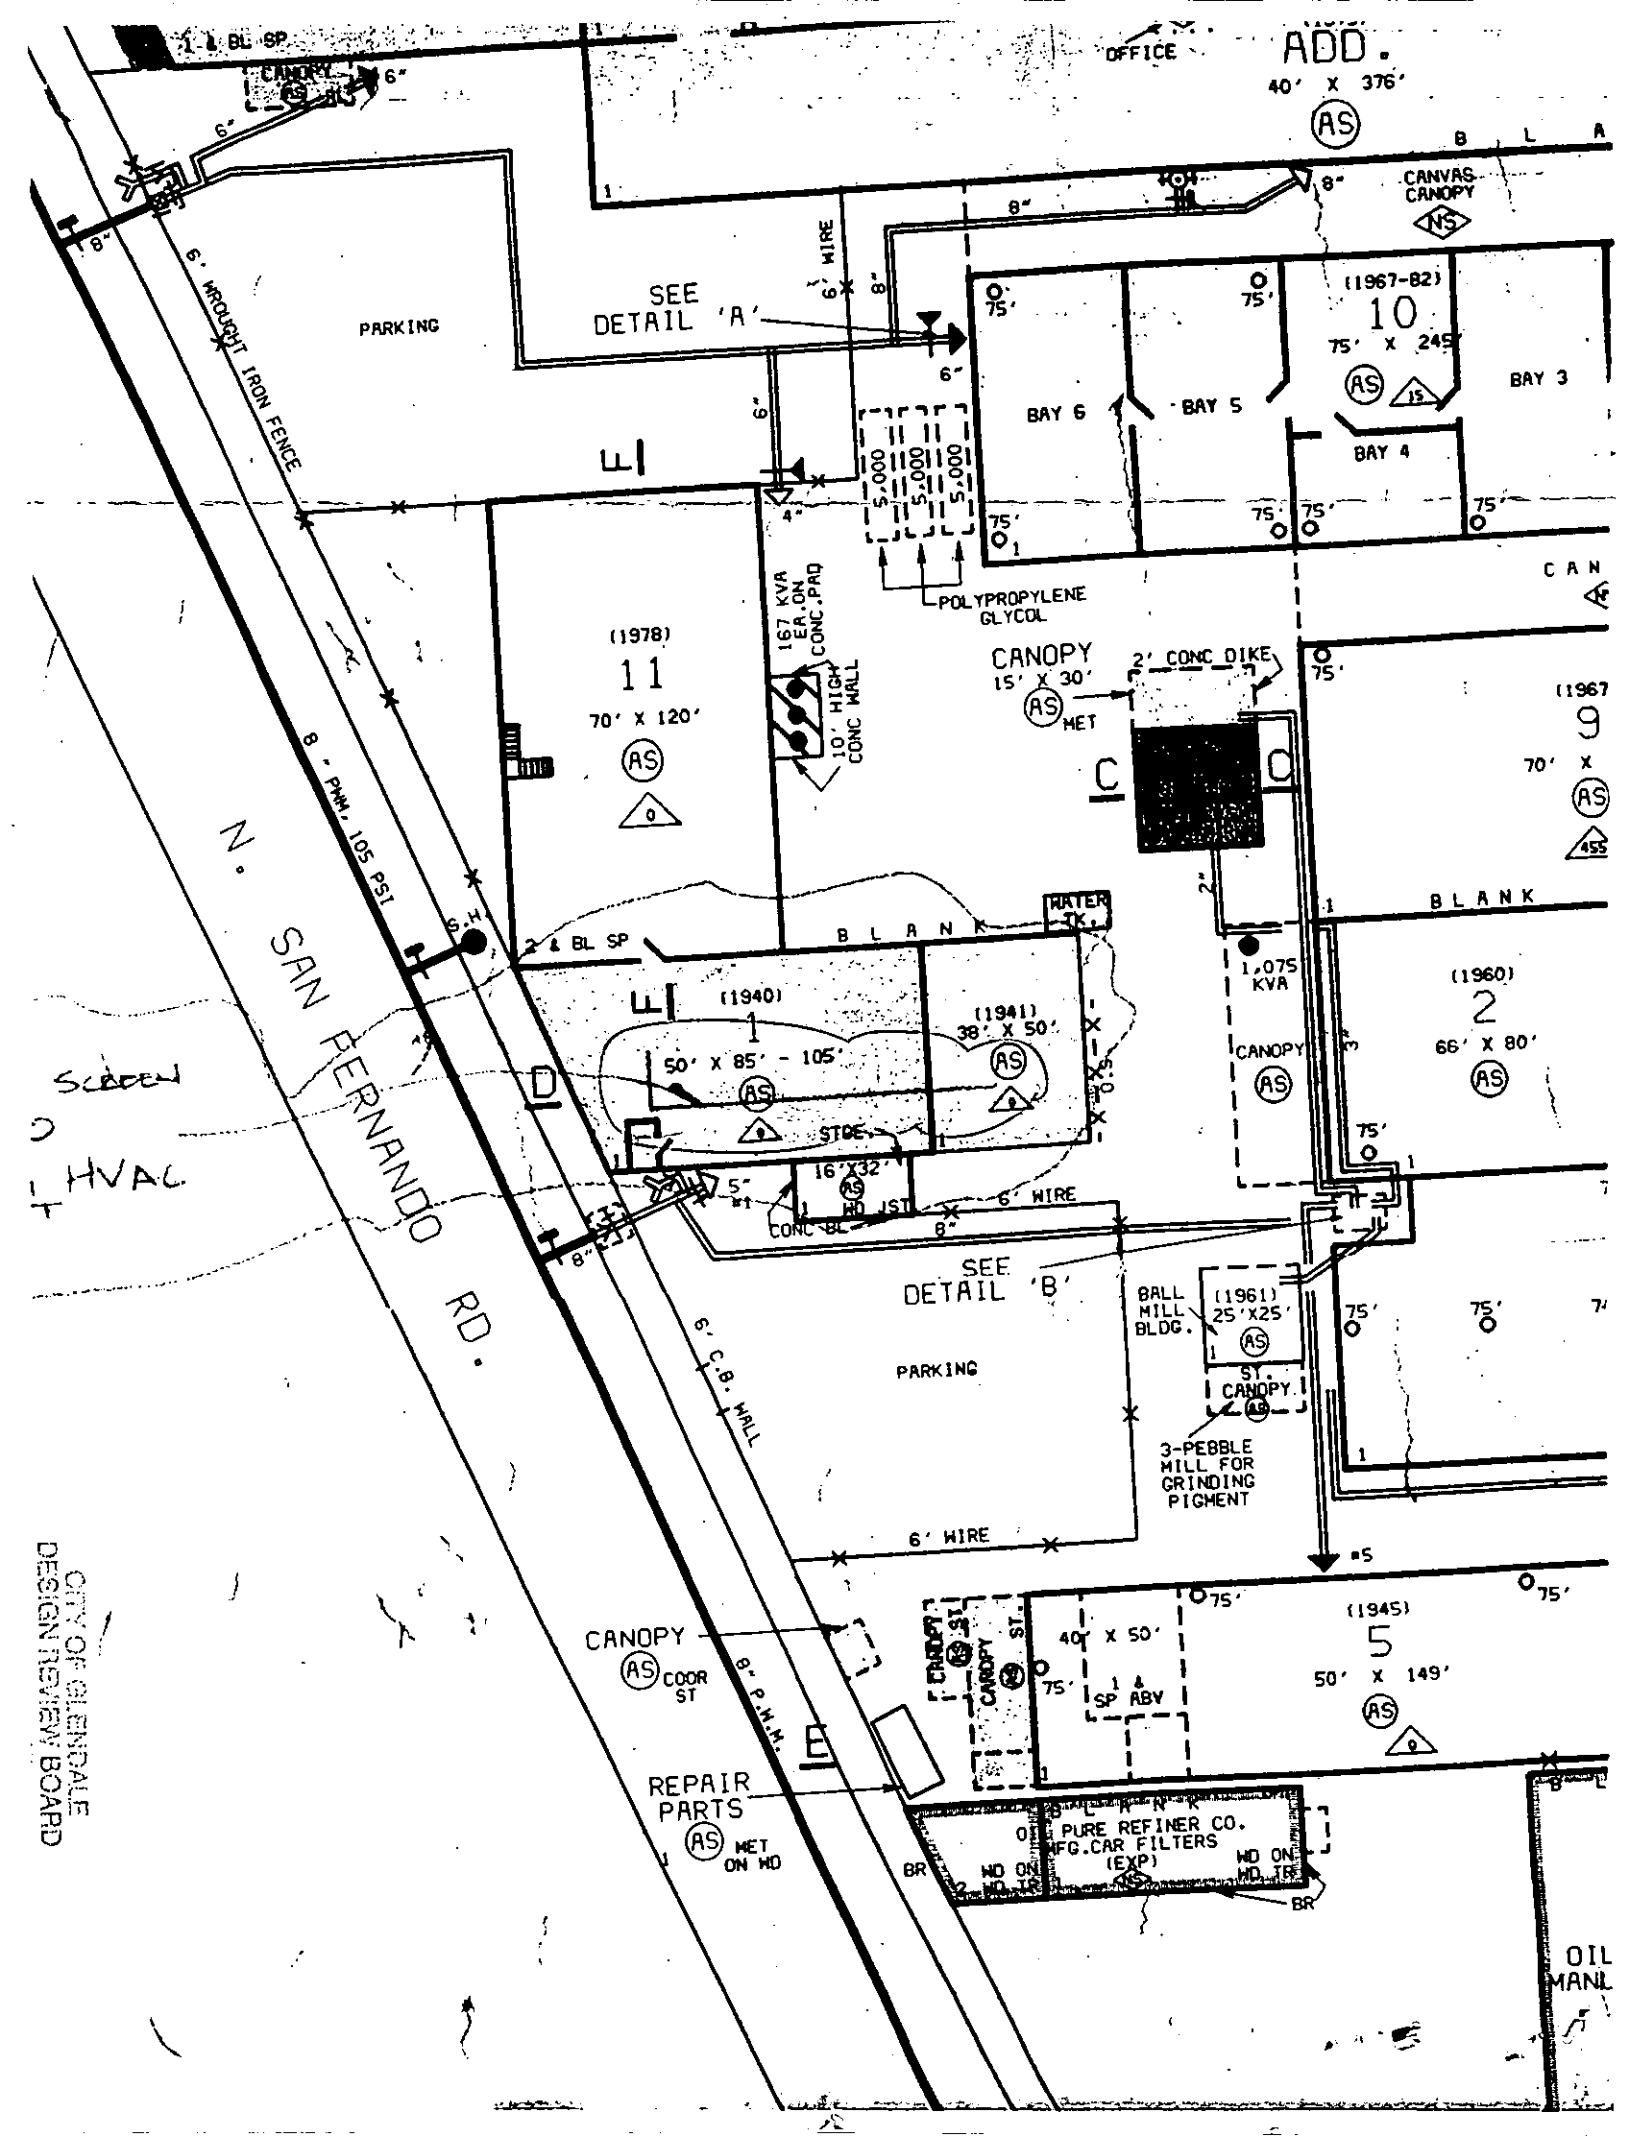
I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation insurance or a certified copy thereof. (Sec. 3800, Labor Code)

Policy No. WC2-161-031975-017 Company Liberty Mutual Worker's Comp. expiration date 4-1-98

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.



Applicant _____ Date 4/9/98

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize rapresentatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

September 25, 1980

Mr. Carl Linderman
5426 San Fernando Road
Glendale, CA. 91203

Re: 5426 San Fernando Road
Request for Variance

Dear Mr. Linderman:

The Building Commission at the September 24, 1980 meeting held a public hearing on your request for variance from the requirements of the 1976 Edition of the Uniform Building Code as adopted by the City of Glendale, to allow the use of 1979 Edition of the Code. This request for variance was by application #76230 and applied to the above-referenced address.

The Commission, after due consideration, found that the facts required by the 1976 Edition of the Uniform Building Code as adopted by the City of Glendale for the granting of a variance, were present. Your request for variance was granted based on the following facts:

1. That the strict application of the provisions of this Code would result in practical difficulties or unnecessary hardships inconsistent with the general purpose and intent of this Code, because if the project was delayed for ten months, the project could be built as planned by the designer.

2. That there are exceptional circumstances of conditions applicable to the building or structure involved or to the intended use or development thereof that do not generally apply to other buildings or structures, the construction of which is regulated by this Code.

3. That the granting of a variance will not be materially detrimental to the public welfare or injurious to the property or improvements in the neighborhood in which the building or structure is located; and in granting a variance, the Building Commission may impose such conditions as are necessary to protect the public health, safety or welfare in accordance with the purpose and intent of this Code. It will not be detrimental because if the project was delayed for ten months, the project could be built as designed by the designer.

4. That the granting of a variance will not be contrary to the objectives of this Code because the building will be designed in compliance with the 1979 Code.

Section 3-41 of the Glendale Municipal Code, 1964, provides that any person aggrieved by the decision of the Commission granting or denying a variance may appeal to the City Council within fifteen (15) days after the act or determination appealed from, by filing with the City Clerk a written notice of appeal.

Very truly yours,

Alexander C. Pyper
Superintendent of Building

I certify that I am exempt from the "License required" provisions of the Contractor License Law. (State basis of exemption)

no employees

If I should become subject to the workmen's compensation provisions of the Labor Code of California I will forthwith comply with the provisions of Section 3700 or my permit will be deemed revoked.

Date

Signature of Exempt Individual

Section 19831 of the Health & Safety Code requires the following:

"OWNER-BUILDER VERIFICATION

"Attention Property Owner:

"An 'owner-builder' building permit has been applied for in your name and bearing your signature.

"Please complete and return this information in the envelope provided at your earliest opportunity to avoid unnecessary delay in processing and issuing your building permit. No building permit will be issued until this verification is received.

1. I personally plan to provide the major labor and materials for construction of the proposed property improvement (yes or no) YES.

2. I (have/have not) HAVE signed an application for a building permit for the proposed work.

3. I have contracted with the following person (firm) to provide the proposed construction:

Name _____
Address _____ City _____
Phone _____ Contractors License No. _____

4. I plan to provide portions of the work, but I have hired the following person to coordinate, supervise, and provide the major work:

Name DAVID DEMSKY
Address _____ City 1604 E. VICTORY BLVD. GLENDALE CA
Phone 242-3181 Contractors License No. _____

5. I will provide some of the work but I have contracted (hired) the following persons to provide the work indicated:

Name	Address	Phone	Type of Work

Signed: Carl Lindemann
Property owner
Social Security number 266-30-1042
Date: 10-16-00

CITY OF GLENDALE
PUBLIC WORKS DIVISION
OWNER-BUILDER INFORMATION

Dear Property Owner:

State law Sec. 19830 & 19831 of part 3 of division 13 of the Health & Safety Code requires the following information be supplied to you:

"OWNER–BUILDER INFORMATION

"Dear Property Owner:

"An application for a building permit has been submitted in your name listing yourself as the builder of the property improvements specified.

"For your protection you should be aware that as 'owner-builder' you are the responsible party of record on such a permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name.

"Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the city or county. They are also required by law to put their license number on all permits for which they apply.

"If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware of the following information for your benefit and protection:

"If you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer.

"If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers' compensation insurance, disability insurance costs, and unemployment compensation contributions.

"There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance.

"For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U. S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents.

"If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions.

"A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Building permits are not required to be signed by property owners unless they are performing their own work personally.

"Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814.

"Please complete and return the enclosed owner-builder verification form so that we can confirm that you are aware of these matters. The building permit will not be issued until the verification is returned.

Very truly yours,

B-70

Certificate of Use and Occupancy

For Existing Legal Structure or Building

March 13, 1995 — UO-15709

Named Applicant: Theodore M. Clark, Vice President

Named Business: Courtaulds Aerospace, Inc.

Street Address: 5426 San Fernando Rd. Glendale, CA 91203

Use: Corporate Offices — Occupancy Classification: H2/H3/B2

Square Feet: 6,500 — Parking Spaces: 294 — Zoning: M2

This certifies that so far as ascertained by or made known to the below named parties, the building identified above is a legally existing building and has been determined that the change of use or occupancy or both to the named use occupancy and owner or tenant will not result in any increased hazard to life or limb, health, property or public welfare and such use and occupancy complies with the various ordinances of the city regulating building construction and use.

Michael J. Wiederkehr
Acting Permit Services Administrator

Edith Fuentes
Zoning Administrator

(Section 308 (e), Volume I of the Glendale Building and Safety Code requires that this certificate be posted in a conspicuous place on the premises and shall not be removed except by the Permit Services Administrator.)

Attention: Mr. C. A. Blodgett, Assistant Superintendent

Gentlemen:

Reference is made to the construction of the Metal Products Facility at 5426 San Fernando Road by Products Research Company. A review in your office was made of the Building Code requirement for one hour fire resistive construction for exterior walls, Fire Zone No. 2. Noted was an exception to the requirement if the exterior wall is on a street at least 30 feet wide.

In the development of a "Master Plan" for Products Research Company of the Glendale Site a driveway is provided at least 30 feet in width adjacent to the west face of the Metal Products Facility extending beyond the Facility both northward and southward.

We respectfully request that the proposed Driveway, as long as maintained by Products Research Company, be accepted as an exception as noted in the first paragraph above.

Very truly yours,

HOLMES & NARVER, INC.

H. K. Madison

H. K. Madison
Project Engineer

cc: Products Research Company - Attention: Mr. Gordon Bradford
Products Research Company - Attention: Mr. Nelson Sweetser

Exterior wall on west side is unprotected incombustible construction fronting on a (private) street 30' wide.
North wall will be 1-hr protected per Sec. 2203 (a)

CAB 7/12/63

Dear Sir,

Re: Proposed residential development - [illegible] Road, [illegible]

We have been instructed by the above client to submit a planning application for the erection of [illegible] dwellings on the above site.

Please find enclosed the following documents:

- Completed application forms
- Site location plan
- Block plan
- Floor plans and elevations
- Design and Access Statement

The application fee of £[illegible] has been paid.

We trust that the application is in order and look forward to receiving confirmation of validation in due course.

Yours faithfully,

[illegible]

Department of Building and Safety
Glendale, California

Attention: Mr. C. A. Blodgett

Gentlemen:

The final review by your office of the construction of the metal products manufacturing building at 5426 San Fernando Road, belonging to Products Research Company, raised a question about the material of construction on the exterior walls of the open side storage area.

Our engineers, Holmes & Narver, suggested a solution based on a statement in the Glendale Building Code that an "exterior wall fronting on a street having a width of at least thirty feet may be of unprotected incombustible construction." This would apply to the parapet and trim stub wall along the west side of the storage area which would then not have to be of one hour fire resistive construction, normally required in Fire Zone 2.

We understand, therefore, based on the above, that the present construction of the west face of the storage area portion of the building is acceptable as long as an adjacent driveway at least thirty feet wide is maintained for the purpose of controlled vehicular traffic.

Very truly yours,

PRODUCTS RESEARCH COMPANY

Gordon M. Bradford, Jr.

The principal members of the job covered by this certificate are stamped with one of the following type quality marks. Each qualified plant has an individual qualification designation. The designation "P-143" shown on the typical quality marks below is not assigned to any plant and is used only for the purpose of illustration.

A TYPICAL CUSTOM PRODUCT QUALITY MARK

P-143 — AITC designation of qualified licensed plant.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

CS 253-63 — Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

A TYPICAL NON-CUSTOM PRODUCT QUALITY MARK

AITC designation of qualified licensed plant.

P-143W — Designates type of adhesive, W for WET USE or D for DRY USE.

"SPECIES" — Name of wood species used.

0000f ARCH — Designates appearance grade. IND—Industrial. ARCH—Architectural. PREM—Premium.

Designates dry use stress. f—bending t—tension. c—compression parallel to grain.

CS 253-63 — Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

▷ For a custom product the specifications covering the desired product are included in the plans and specifications.
▷ For non-custom products essential detail specifications are included on stamp.

xxxxxxxxxxx G. B. WILSON

Edgar N. Gregg
208 E. Glenoaks Blvd.
Glendale, California

Dear Mr. Gregg,

In accordance with your request we would like to review the conditions imposed on your proposed building located at 5426 San Fernando Road. The easterly 90' of the building is restricted to use as an "F" occupancy as listed in the Glendale Building Code. The westerly 70' is classed as an "E3" occupancy and may be used for the storage of Class I, II, and III flammable liquids. This includes liquids with flash points below 190 degrees Fahrenheit as indicated in Section 1001 of the Glendale Building Code.

A one hour fire separation is to be provided between the "F" occupancy and the "E" occupancy and said separation is to be provided with Class "D" fire doors. The "D" fire doors are being accepted by this department in lieu of Class "C" fire doors normally required in the one hour occupancy separation.

The entire building is to be sprinklered throughout. At the time that sprinkler plans are submitted to this department we will require the approval of the Fire Department on these plans.

Please contact us if any further clarification is required or if we may be of any further assistance.

Very truly yours,

CITY OF GLENDALE

Attention: Mr. C. A. Blodgett
Assistant Superintendent

Subject: Construction of Metal Products
Facility for Products Research
Company, 5426 San Fernando Road

Gentlemen:

Reference is made to the Subject Construction now underway by permit issued from your office. A telephone discussion was held with you on April 2, 1963, by Mr. Norman Jones, Chief Structural Engineer for Holmes & Narver pertaining to the nailing of the plywood roof diaphragm of the referenced building.

Determination was made that 6 penny nails at 4 inches on center at all edges will develop overstress of about 10%. The figure is arrived at by comparing the calculated maximum diaphragm shear of 290 pounds per foot (page 17 of our original calculations) with the allowable of 281 for the above nail and spacing per Table 25-M of the Uniform Building Code.

Recommendation is made that the 6 penny nailing at 4 inches on center at all edges with supplemental additional nailing with 6 penny nails at 12 inches on center at all edges will provide for the maximum shear stress in the diaphragm. Request is made for your approval of our recommendation.

OK CAB 4-4-63

CITY OF GLENDALE

INTER-DEPARTMENT COMMUNICATION

DATE July 21, 1959

TO G. Wilson, Building Superintendent

FROM E. H. Aiman, Fire Chief
By: A. W. Hunt, Fire Marshal

SUBJECT PRODUCTS RESEARCH CO.
5426 SAN FERNANDO ROAD

With further reference to usage of Building "C" at the above location for the purpose of storing and packaging of certain flammable liquids, I have checked on the type of liquid to be used and stored in this building and found that 90% of the product is nonflammable, with the balance being M.E.K., and the mixture of the two result in the final product being practically nonflammable, also, except for a minor flash obtained under certain conditions.

Therefore, I am going to consider this material to be "Class III" and permit a total of 220 gallons to be stored and packaged inside of the aforesaid building, subject to your approval and the firm's compliance with the following:

1. It is understood that drums not exceeding 60 gallon capacity will be used in dispensing of liquids to smaller containers.

2. Drums used in dispensing of the liquids must be in an upright position, with dispensing being done by pump, and the tops of the drums must be covered in a satisfactory manner during dispensing operations.

3. Install an approved type mechanical ventilation system which will preclude the accumulation of any possible flammable vapors in hazardous concentrations. Design of the ventilating system shall take into account the relatively high specific gravity of the vapors. Mechanical systems for removing flammable vapors shall be designed, installed and operated in accordance with nationally recognized good practice.

4. Open flames and other sources of ignition shall not be used within the possible path of vapor travel in a vapor area.

5. Wherever flammable liquids are stored in containers, provision shall be made and maintained for the detection of leakage. Leaking containers shall be immediately removed and the contents transferred to a tight container.

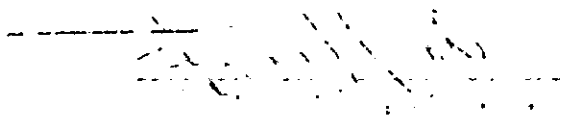
6. Access shall be provided by unobstructed aisles whereby first-aid fire control apparatus may be brought to bear on any part of such flammable liquids storage.

7. In buildings, rooms or other confined spaces in which flammable liquids are stored, combustible waste materials shall not be allowed to accumulate, except in closed metal containers.

8. Where flammable liquids are stored, or are used in open vessels, or are dispensed within buildings or other enclosures, first-aid fire-control equipment shall be provided in such quantities as public safety shall require. The number and type of appliances shall be in accordance with nationally recognized good practice and shall be acceptable to the Chief of the Bureau of Fire Prevention.

9. Smoking is to be prohibited within this building, and approved type "No Smoking" signs, with the letters "By Order of the Fire Chief," must be posted in conspicuous places.

10. Two means of egress must be provided from this building, one remote from the other, and must be installed in accordance with the Building Code requirements.



Yours very truly,

E. H. AIMAN, FIRE CHIEF

INDUSTRIAL SALES OPERATION

June 27, 1963

Mr. A. Kidder
4712 Rosemont Avenue
La Crescenta, California

Subject: Cummings & Sander Division
of Products Research Company

Dear Mr. Kidder:

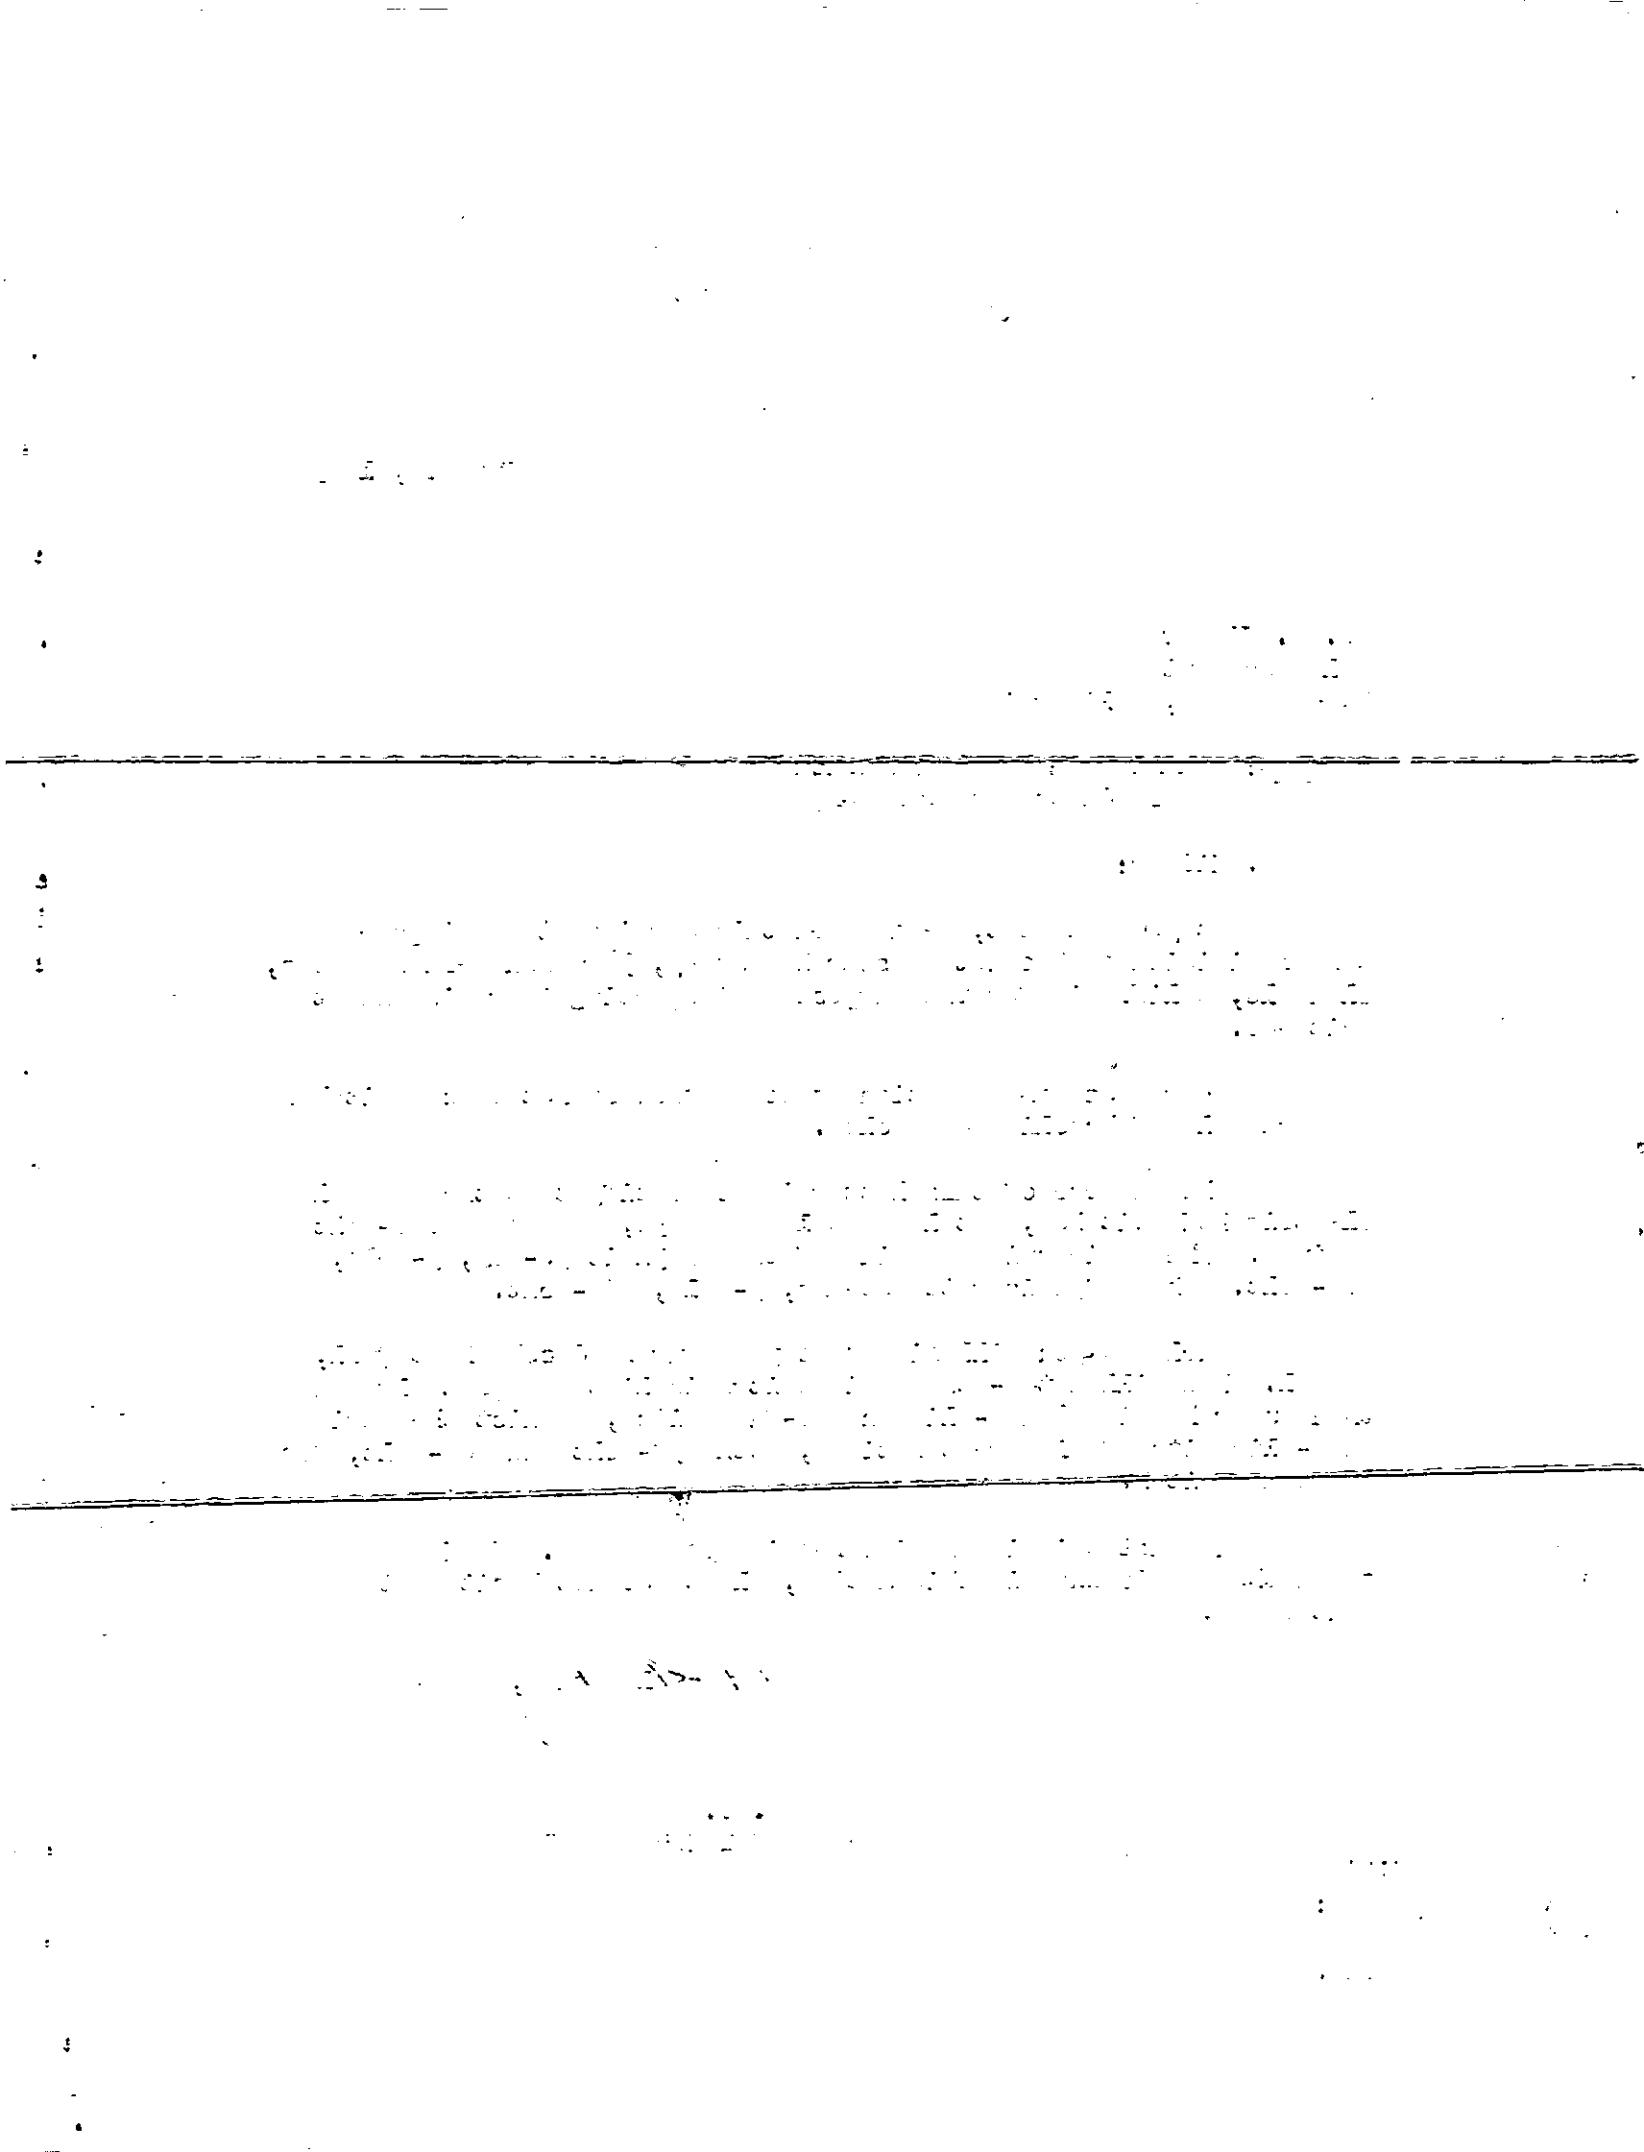
At your request, we met you this morning at Cummings & Sander Division of Products Research Company, 5426 San Fernando Road, Glendale, California for the purpose of inspecting four disconnect switches.

There was some question as to whether or not these switches were capable of handling 480 volts.

The purpose of this letter is to certify that the General Electric HCI switches, Catalog THC31 and THC32, are rated 600-volts maximum. The basic switch rating of the THC31 is 30-amp, 3-pole, 600-volt. The THC32 is rated 60-amp, 3-pole, 600-volt.

Enclosed you will find a copy of our Handbook Sheet 7621, Page 1. You will note - the basic switch is listed separately and then under heading "Fuse-clip and No-fuse Kits", we list the various fuse-clip kits of different ratings, both 250-volt and 600-volt, for the same switch.

I trust this is the information you wanted. If I can be of further assistance in this matter, please do not hesitate to contact me.



Very truly yours,

G. B. Moe

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued. (Sec. 3097, Civil Code.)

CONSTRUCTION LENDER & BRANCH NONE

MAILING ADDRESS

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: *(Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars ($500).)*

☑ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. *(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)*

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. *(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)*

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

Date 10-16-80 Owner Carl Lindeman

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof. *(Sec. 3800, Labor Code.)*

Policy No. _____ Company _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

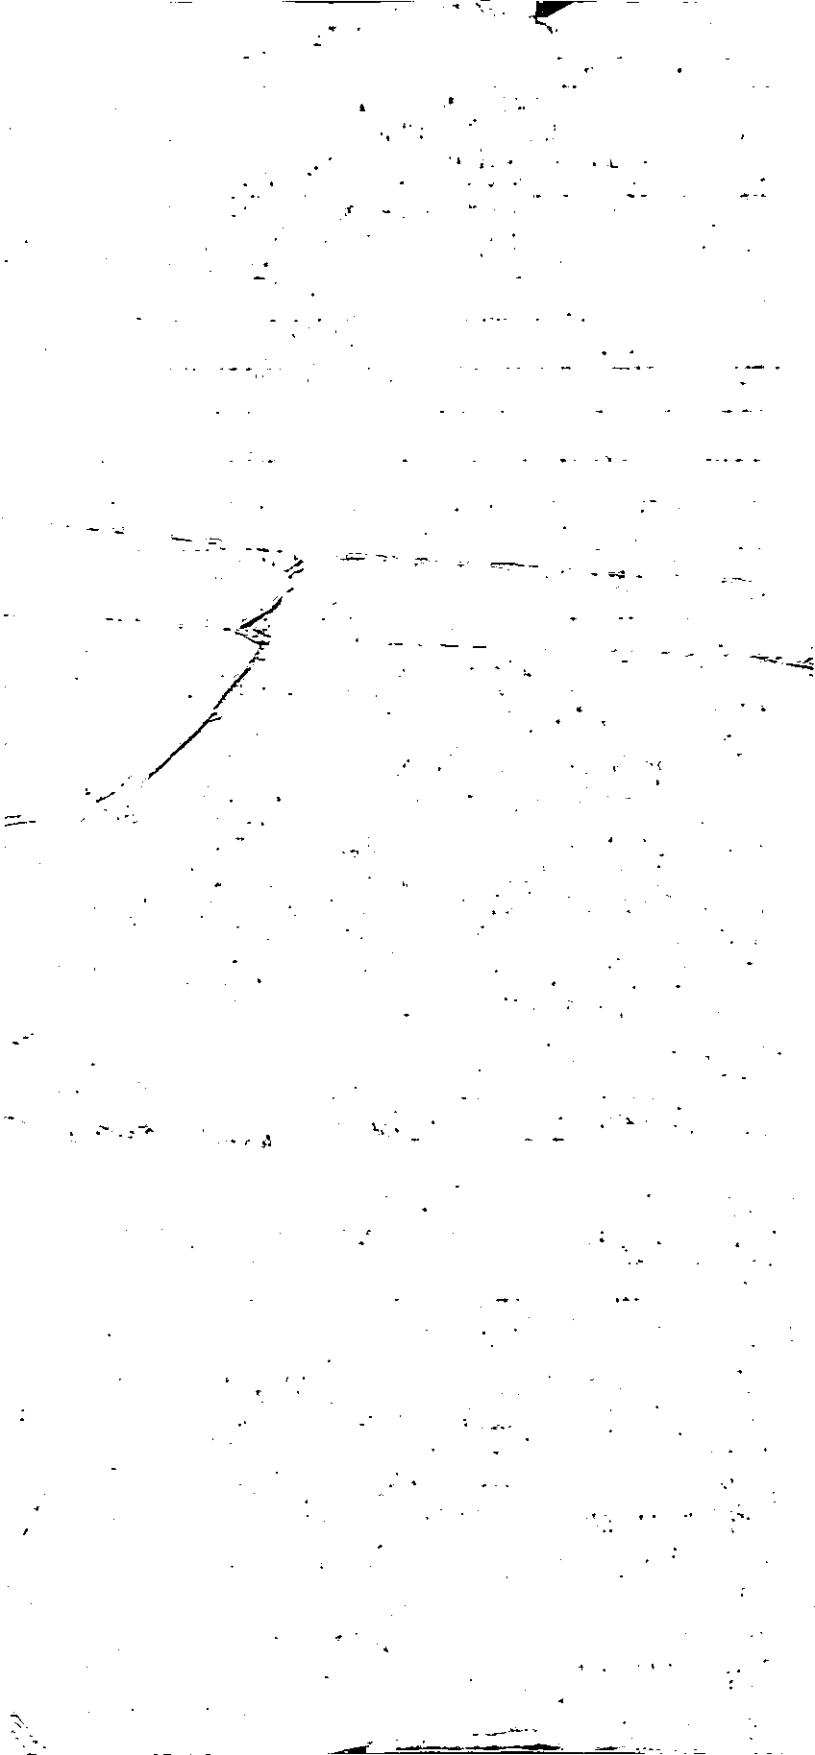
(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

Applicant _____ Date _____

I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been received.



I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued. (Sec. 3097, Civil Code.)

CONSTRUCTION LENDER & BRANCH

MAILING ADDRESS

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: *(Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars ($500).)*

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. *(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)*

☒ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. *(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)*

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

Date 11-29-79 Owner Carl Lindeman

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof. *(Sec. 3800, Labor Code.)*

Policy No. _____ Company _____

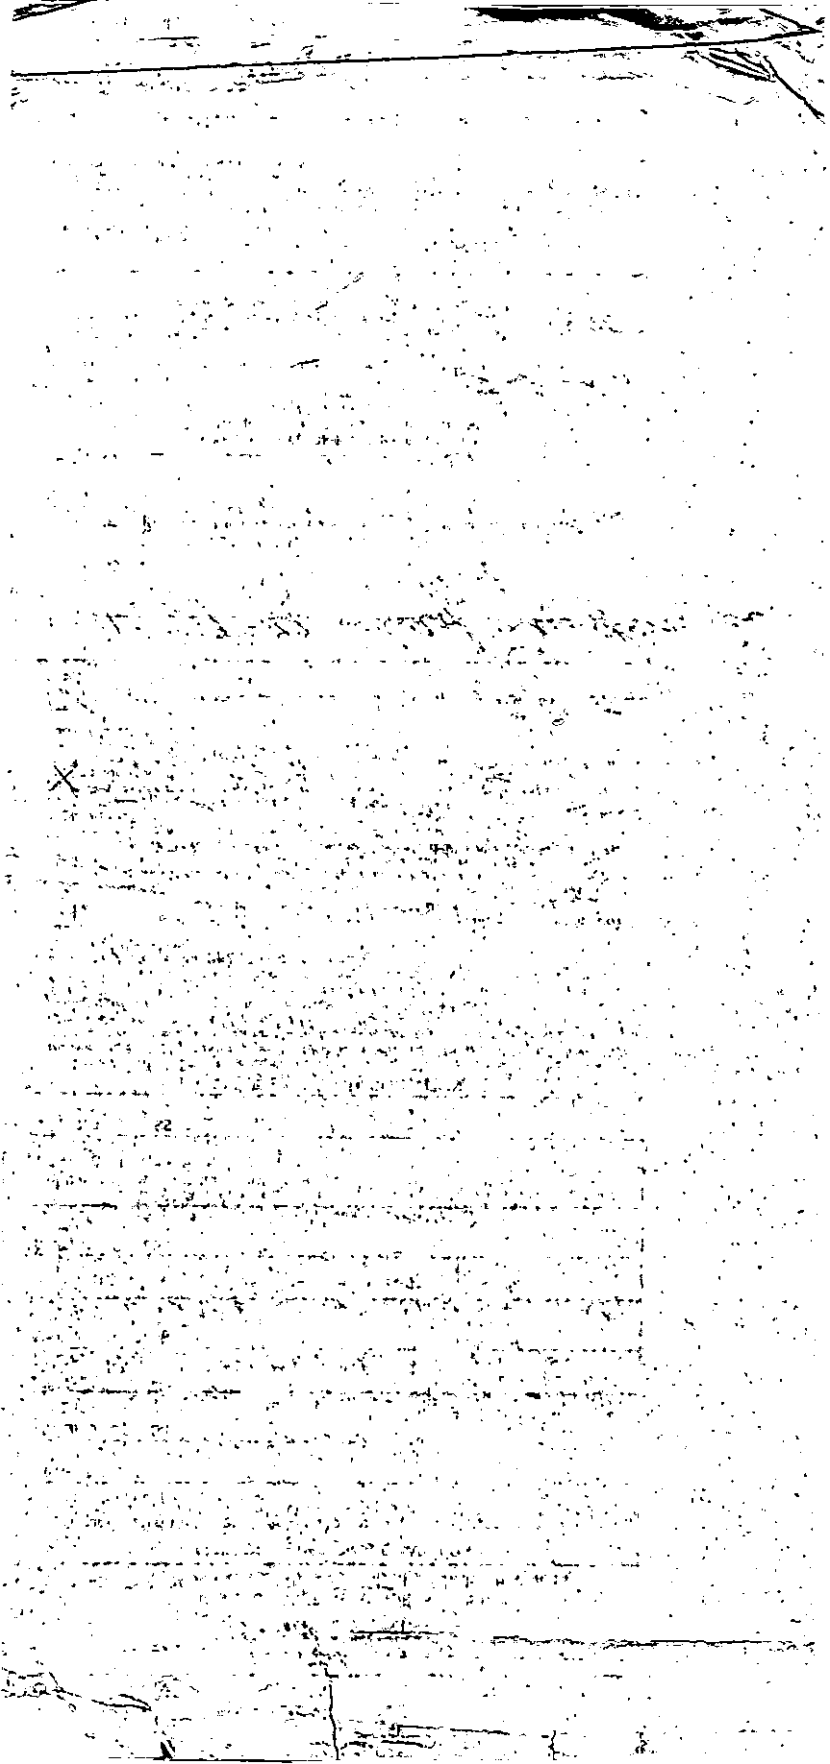
CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

Applicant _____ Date _____



I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been received.

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

A CERTIFICATE OF OCCUPANCY IS REQUIRED, EXCEPT FOR SINGLE FAMILY DWELLINGS, TO BE ISSUED BY PERMIT SERVICES BEFORE THIS BUILDING MAY BE OCCUPIED. NO CERTIFICATE OF USE AND OCCUPANCY WILL BE ISSUED UNTIL ALL BUILDING, PLUMBING, MECHANICAL & ELECTRICAL INSPECTIONS HAVE BEEN MADE AND APPROVED. IF THE USE OF THE BUILDING OR IF OWNERSHIP CHANGES, A NEW CERTIFICATE MUST BE OBTAINED.

NOTE: SEPARATE ELECTRICAL, MECHANICAL AND PLUMBING PERMITS ARE REQUIRED.

THIS PERMIT BECOMES NULL AND VOID IF WORK IS NOT COMMENCED WITHIN 180 DAYS FROM DATE OF ISSUANCE OR IF CONSTRUCTION OR WORK IS SUSPENDED OR ABANDONED FOR A PERIOD OF 90 DAYS AT ANY TIME AFTER WORK IS COMMENCED.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec. _____ B&PC for this reason _____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

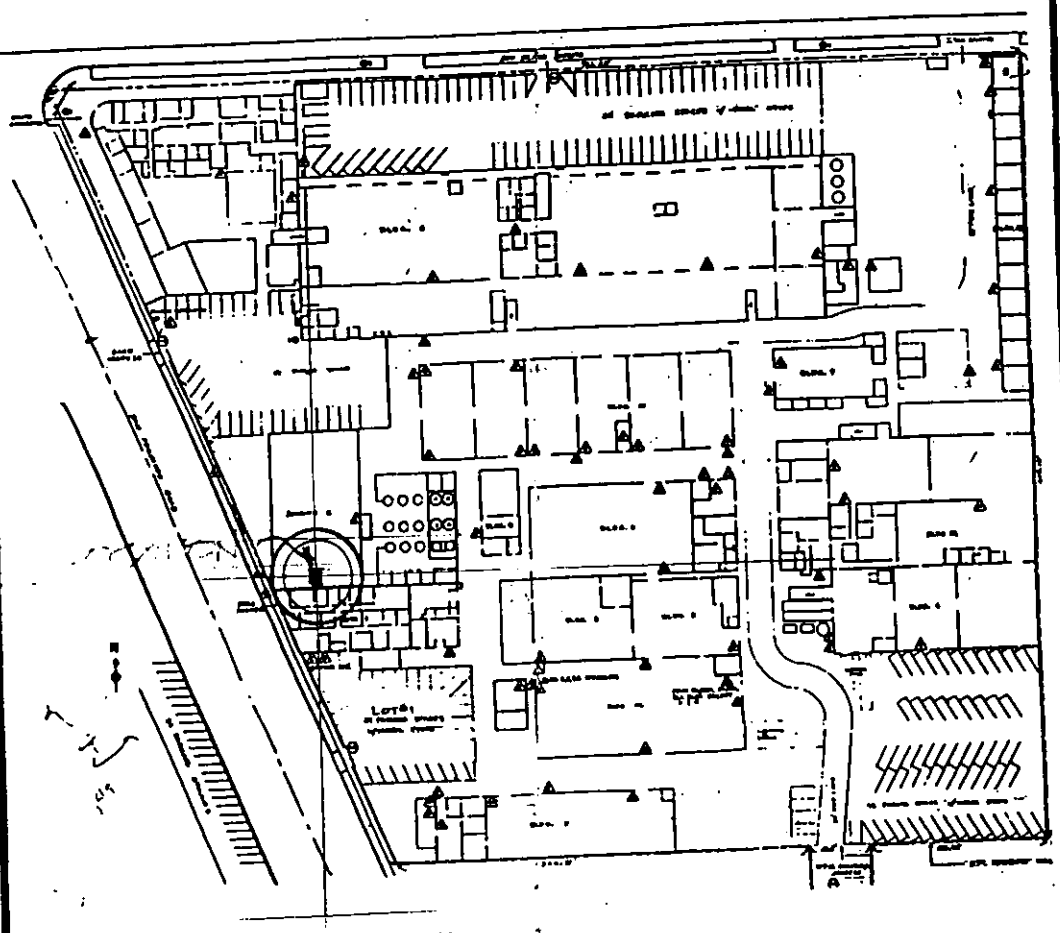
Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.



Applicant MILESTONE BLDR. SVCS. Date 11-10-97

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

COPYRIGHT KIVA 1997

5420 SAN FERNANDO RD,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class C-10 License No. 280420 Contractor's Signature Paul Mustoe Date 6-29-00

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____ Phone_____ Contractors Lic. No._____

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

At the time of final inspection, the inspector shall verify the installation of smoke detectors in all sleeping rooms and hallways leading thereto. Battery operated smoke detectors are acceptable in existing construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

COPYRIGHT KIVA 1997 - 2002

5430 SAN FERNANDO RD,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in *full force and effect.*

License Class _____ License No._____Contractor's Signature_____Date_____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or ber own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____Phone_____Contractors Lic. No._____

_____ INITIAL I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) /(company(ies)) to provide the work indicated.

THE CITY OF GLENDALE RESTRICTS ISSUANCE OF THE BUILDING PERMIT TO THE PROPERTY OWNER OR LICENCED GENERAL CONTRACTOR ONLY. SIGNATURES ON THIS INDIVIDUAL MUST BE VERIFIED BY PERSONAL IDENTIFICATION. ANY PERSON SIGNING THE PERMIT APPLICATION AS AGENT FOR THE OWNER OR CONTRACTOR SHALL HAVE AN ORIGINAL LETTER OF AUTHORIZATION AT THE TIME OF PERMIT ISSUANCE. APPLICATIONS SHALL EXPIRE 180 DAYS AFTER THE DATE OF SUBMITTAL AND THEREAFTER, ANY DOCUMENTS SUBMITTED TO THE DEPARTMENT SHALL BE RETURNED TO THE APPLICANT OR DESTROYED BY THE BUILDING OFFICIAL. UPON WRITTEN REQUEST FROM THE APPLICANT, THE BUILDING OFFICIAL MAY EXTEND THE PERIOD OF PERMIT APPLICATION.

Rev. 01/2000

5430 San Fernando Rd.

LICENSED CONTRACTORS DECLARATION

I HEREBY AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM LICENCED UNDER THE PROVISIONS OF CHAPTER 9 (STARTING WITH SECTION 7000) OF DIVISION 3 O FTHE BUS. & PRCEDCE. AND THAT MY LICENSE IS IN FULL FORCE AND EFFECT.

LICENSE CLASS B-1 LICENSE NO. 196066 CONTRACTOR'S SIGNATURE [signature] DATE 04-10-02

OWNER-BUILDER DECLARATION

AS THE PROPERTY OWNER AND BUILDER OF THE PROPOSED PROJECT (OWNER-BUILDER) YOU ARE THE RESPONSIBLE PARTY OF RECORD ON THIS PERMIT. BUILDING PERMITS ARE NOT REQUIRED TO BE SIGNED BY PROPERTY OWNERS UNLESS THEY ARE PERSONALLY PERFORMING THEIR OWN WORK. IF YOUR WORK IS BEING PERFORMED BY SOMEONE OTHER THAN YOURSELF, YOU MAY PROTECT YOURSELF FROM POSSIBLE LIABILITY IF THAT PERSON APPLIES FOR THE PROPER PERMIT IN HIS OR HER NAME. CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND BONDED BY THE STATE OF CALIFORNIA AND TO HAVE A BUSINESS LICENSE FROM THE CITY OF GLENDALE. THEY ARE ALSO REQUIRED BY LAW TO PUT THEIR LICENSE NUMBER ON ALL PERMITS FOR WHICH THEY APPLY. IF YOU PLAN TO DO YOUR OWN WORK, WITH THE EXCEPTION OF VARIOUS TRADES THAT YOU PLAN TO SUBCONTRACT, YOU SHOULD BE AWARE THAT IF YOU EMPLOY OR OTHERWISE ENGAGE ANY PERSONS OTHER THAN YOUR IMMEDIATE FAMILY, AND THE WORK (INCLUDING MATERIALS AND OTHER COSTS) IS $200 OR MORE FOR THE ENTIRE PROJECT, AND SUCH PERSONS ARE NOT LICENSED AS CONTRACTORS OR SUBCONTRACTORS, THEN YOU MAY BE AN EMPLOYER. IF YOU ARE AN EMPLOYER, YOU MUST REGISTER WITH THE STATE AND FEDERAL GOVEMMENT AS AN EMPLOYER AND YOU ARE SUBJECT TO SEVERAL OBLIGATIONS INCLUDING STATE AND FEDERAL INCOME TAX WITHHOLDING, FEDERAL SOCIAL SECURITY TAXES, WORKERS COMPENSATION INSURANCE, DISABILITY INSURANCE COSTS, AND UNEMPLOYMENT COMPENSATION CONTRIBUTIONS. THERE MAY BE FINANCIAL RISKS FOR YOU IF YOU DO NOT CARRY OUT THESE OBLIGATIONS, AND THESE RISKS ARE ESPECIALLY SERIOUS WITH RESPECT TO WORKERS' COMPENSATION INSURANCE. FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER FEDERAL LAW, CONTACT THE INTERNAL REVENUE SERVICE (AND, IF YOU WISH, THE U.S. SMALL BUSINESS ADMINISTRATION). FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER STATE LAW, CONTACT THE DEPARTMENT OF BENEFIT PAYMENTS AND THE DIVISION OF INDUSTRIAL ACCIDENTS. IF THE STRUCTURE IS INTENDED FOR SALE, PROPERTY OWNERS WHO ARE NOT LICENSED CONTRACTORS ARE ALLOWED TO PERFORM THEIR WORK PERSONALLY OR THROUGH THEIR OWN EMPLOYEES, WITHOUT A LICENSED CONTRACTOR OR SUBCONTRACTOR, ONLY UNDER LIMITED CONDITIONS. A FREQUENT PRACTICE OF UNLICENSED PERSONS PROFESSING TO BE CONTRACTORS IS TO SECURE AN 'OWNER-BUILDER' BUILDING PERMIT, ERRONEOUSLY IMPLYING THAT THE PROPERTY OWNER IS PROVIDING HIS OR HER OWN LABOR AND MATERIAL PERSONALLY. INFORMATION ABOUT LICENSED CONTRACTORS MAY BE OBTAINED BY CONTACTING THE CONTRACTORS' STATE LICENSE BOARD IN YOUR COMMUNITY OR AT 1020 N STREET, SACRAMENTO, CALIFORNIA 95814. NOTE: THE CURRENT MAILING ADDRESS OF THE CONTRACTORS STATE LICENSE BOARD IS P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

SECTION 7031.5 OF THE BUS. & PROF. CODE REQUIRES THE PERMIT APPLICANT TO SIGN A STATEMENT ABOVE OR CLAIM EXEMPTION FROM THE CONTRACTORS LICENSE LAW AND STATE THE BASIS FOR SUCH EXEMPTION. VIOLATIONS OF THIS SECTION SUBJECTS THE APPLICANT TO A CIVIL PENALTY OF NOT MORE THAN FIVE HUNDRED DOLLARS ($500). I HEREBY AFFIRM THAT I HAVE READ THE PARAGRAPH ABOVE AND WILL FULLY ACCEPT THE RESPONSIBILITY OF AN OWNER-BUILDER. I FURTHER AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM EXEMPT FROM THE CONTRACTOR'S LICENSE LAW FOR THE FOLLOWING REASON:

INITIAL ____ I, AS OWNER OF THE PROPERTY, OR MY EMPLOYEES WITH WAGES AS THEIR SOLE COMPENSATION, WILL DO THE WORK, AND THE STRUCTURE IS NOT INTENDED OR OFFERED FOR SALE (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO DOES SUCH WORK HIMSELF OR HERSELF OR THROUGH HIS OR HER OWN EMPLOYEES, PROVIDED THAT THE IMPROVEMENTS ARE NOT INTENDED OR OFFERED FOR SALE. IF, HOWEVER, THE BUILDING OR IMPROVEMENT IS SOLD WITHIN ONE YEAR OF COMPLETION, THE OWNER-BUILDER WILL HAVE THE BURDEN OF PROVING THAT HE OR SHE DID NOT BUILD OR IMPROVE FOR THE PURPOSE OF SALE.)

INITIAL ____ I, AS OWNER OF THE PROPERTY, AM EXCLUSIVELY CONTRACTING WITH LICENSED CONTRACTORS TO CONSTRUCT THE PROJECT (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO CONTRACTS FOR THE PROJECTS WITH A CONTRACTOR(S) LICENSED PURSUANT TO THE CONTRACTORS LICENSE LAW.). I HAVE OR PLAN TO CONTRACT WITH THE FOLLOWING PERSON (COMPANY) TO PROVIDE THE PROPOSED CONSTRUCTION:

Date: November 9, 1999

From: Dick Shinn

To: Mr. Pat Doherty, City of Glendale

Subject: PRC-DeSoto International Gas Pipe Section Replacement

Tim @ T&M,

Thanks for having Rafael stop by Monday morning to review the process for disconnecting the gas pipe at the union by the meter and to see the pipe termination assembly so we can safely purge the pipe of gas to an LEL rating.

I did talk with Mr. Pat Doherty-inspector for the City of Glendale. He gave me the address for Permit Services @ 633 East Broadway, Glen Ave and Broadway, Room 101, Glendale. We will need a permit for the project. Should we need to replace a section of pipe, (and I'm guessing we will), we will need to have a certified welder. When I asked Mr. Doherty who does the certification, he said we would need to fax the welders certificate to him, and he could assess the certification.

Mr. Doherty will want to see the welds before we cover the replaced sections.

We will need to call him between 7:00 and 8:00 a.m. on the morning of the day we need to have the inspection so he can plan to be here. I shared with him that we would start on Tuesday afternoon, November 23rd and continue on the 24th. Perhaps with some good fortune, we can be prepared to weld Wednesday morning and be inspected on Wednesday morning.

Tim, will you secure the permit and let me know when you have it in possession?

Thanks

Dick Shinn

A CERTIFICATE OF OCCUPANCY IS REQUIRED, EXCEPT FOR SINGLE FAMILY DWELLINGS, TO BE ISSUED BY PERMIT SERVICES BEFORE THIS BUILDING MAY BE OCCUPIED. NO CERTIFICATE OF USE AND OCCUPANCY WILL BE ISSUED UNTIL ALL BUILDING, PLUMBING, MECHANICAL & ELECTRICAL INSPECTIONS HAVE BEEN MADE AND APPROVED. IF THE USE OF THE BUILDING OR IF OWNERSHIP CHANGES, A NEW CERTIFICATE MUST BE OBTAINED.

NOTE: SEPARATE ELECTRICAL, MECHANICAL AND PLUMBING PERMITS ARE REQUIRED.

THIS PERMIT BECOMES NULL AND VOID IF WORK IS NOT COMMENCED WITHIN 180 DAYS FROM DATE OF ISSUANCE OR IF CONSTRUCTION OR WORK IS SUSPENDED OR ABANDONED FOR A PERIOD OF 90 DAYS AT ANY TIME AFTER WORK IS COMMENCED.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

RE: 5430 San Fernando Road
M10036333, M10036431

Dear Owner:

An inspection of the air-conditioning system at 5430 San Fernando Road by a representative of the Building Inspection Section is required. Certain conditions may exist which are in violation of Section 301(a) of Volume III of the Glendale Building Code as adopted by Ordinance 4992 as evidenced by:

H.V.A.C. system is being maintained without permits or approvals.

Correction requires that you obtain a new H.V.A.C. permit and have all work made to comply with the requirements of the 1991 Uniform Mechanical Code and request inspection by the Building Inspection Section.

Permits #M10036333 and M10036431 issued to Climate Changers on April 2 & 7, 1993 have expired due to abandonment of work.

In accordance with the provisions of Chapter 3 of Volume I of the Glendale Building Code, you are required to obtain the necessary permits and commence corrective action within ten (10) days of receipt of this notice. **If you have any questions, please contact Michael Brennan at 548-3974 between 7:00-8:00 a.m. Monday through Thursday, or 7:30-8:30 a.m. Friday.**

Sincerely,

Michael Brennan
Mechanical Inspector

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

*** No rooftop equipment will be allowed unless the applicant obtains a separate variance or administrative exception from the Planning Division. Issuance of this permit shall not be construed as an approval to install equipment on the roof without a variance or administrative exception.

*** Issuance of trade permits, without complete architectural plans, shall not constitute a waiver of any provisions of the building or zoning codes of the City of Glendale. It is soley the responsibilty of the applicant to verify that proposed installations are in compliance with the regulations of all applicable codes or else obtain written approval for any deviation from the regulations.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

5430 SAN FERNANDO RD,

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class C10 License No. 284288 Contractor's Signature Ness Sawchuk Date 7-30-04.

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____ Phone_____ Contractors Lic. No._____

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. I understand that the building permit will expired within 180 days from the date of its issuance unless work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

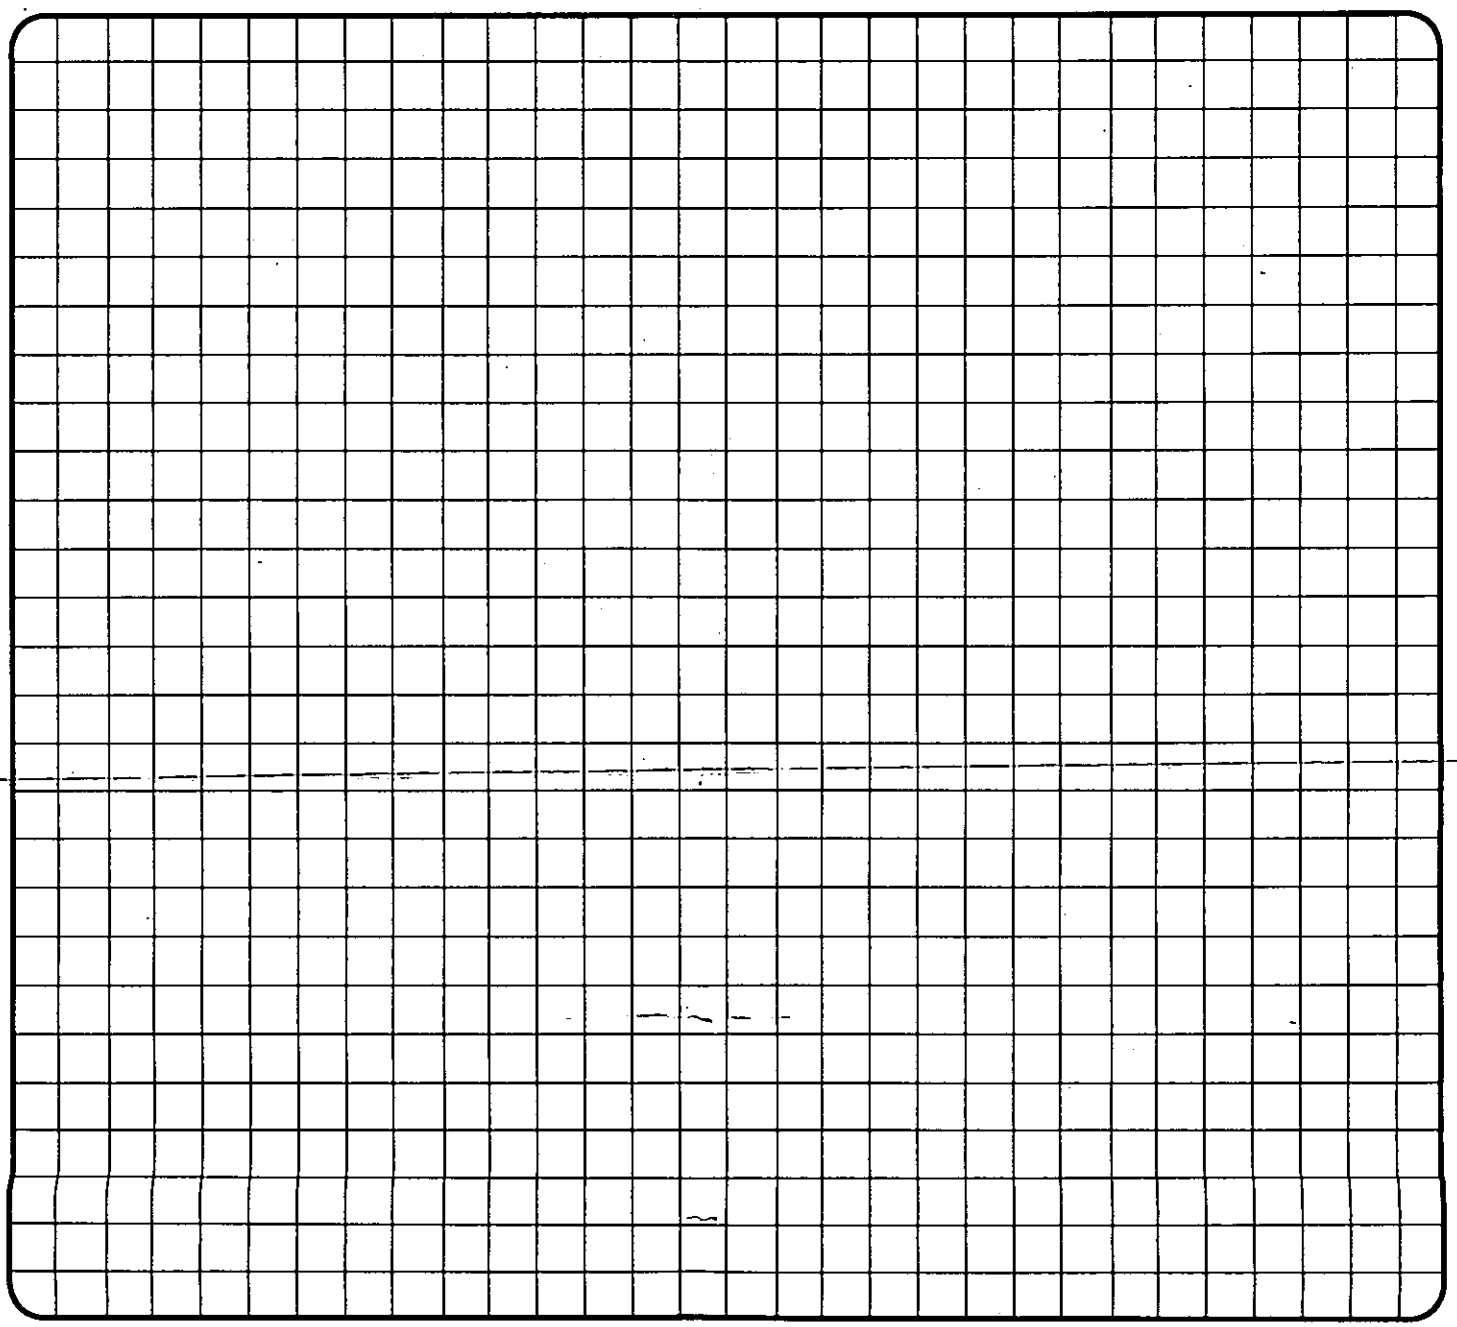
PLOT PLAN INSTRUCTIONS



City of Glendale
Permit Services Center

PLEASE SHOW ON PLOT PLANS FOR BUILDING PERMIT THE FOLLOWING INFORMATION:

1. Make the bottom of the page the street frontage.
2. Draw the shape of the lot only if it is irregular.
3. Put the dimensions of the lot in the brackets provided on the sheet for right, left, front and rear; or if it is irregular, on the outside of the lot lines.
4. Draw where existing structures sit on the property and show length/width size. Locate all structures on the lot and their distance from one another.
5. Draw where the new construction will be located: ie. onto an existing building or on the property and its size.
6. Show how far from the property lines existing buildings and new construction will be.

STREET NAMES

1. Give the names of the road or street your property is located on. Mark an X where the building is located.
2. Show the nearest intersecting streets or roadways.
3. Check the appropriate box if the property is a corner or hillside lot.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☒ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Condition Code	Status	By	Date

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class C16 License No. 311690 Contractor's Signature P Brown Date 11/06/02

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

CONTRACTOR'S EXEMPTION DECLARATION

I certify that I am exempt from the "License Required" provisions of the Contractor License Law. (State Basis of Exemption)

If I should become subject to the Workmen's Compensation provisions of the Labor Code of California, I will forthwith comply with provisions of Sec. 3700 or my permit will be deemed revoked.

Date Signature of Exempt Individual

DECLARATION OF OWNER

I am the bonafide owner of the building described in the foregoing application: Said building is a single family dwelling used exclusively for living purposes except for the usual accessory buildings in conjunction with such dwelling: Said living quarters are occupied or will be occupied by the under signed. I will personally purchase all materials and will perform all labor in connection with the foregoing permit. I declare under penalty of perjury that the foregoing is true and correct.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

COPYRIGHT KIVA 1997 - 2002

5430 SAN FERNANDO RD 1ST FL,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class B1 License No. 196066 Contractor's Signature John LaForest Date 5-8-02

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division

of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____ Phone_____ Contractors Lic. No._____

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

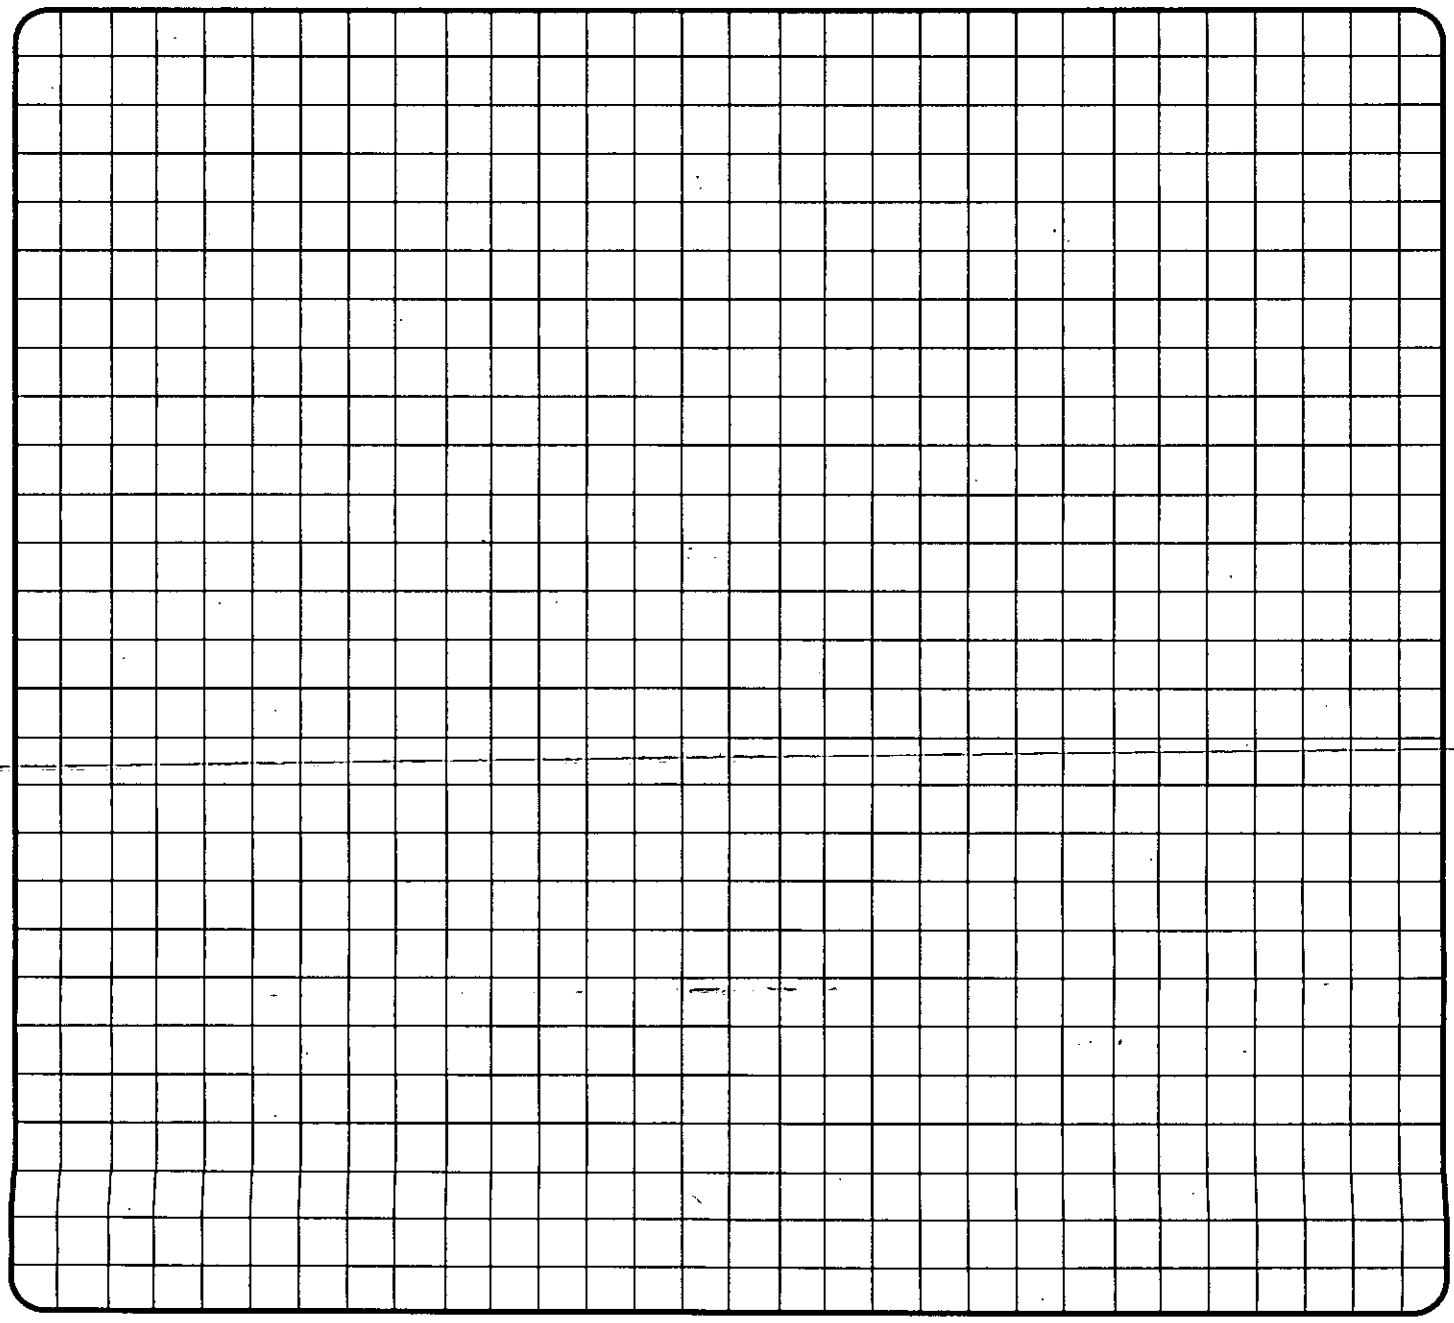
PLOT PLAN INSTRUCTIONS



City of Glendale
Permit Services Center

PLEASE SHOW ON PLOT PLANS FOR BUILDING PERMIT THE FOLLOWING INFORMATION:

1. Make the bottom of the page the street frontage.
2. Draw the shape of the lot only if it is irregular.
3. Put the dimensions of the lot in the brackets provided on the sheet for right, left, front and rear; or if it is irregular, on the outside of the lot lines.
4. Draw where existing structures sit on the property and show length/width size. Locate all structures on the lot and their distance from one another.
5. Draw where the new construction will be located: ie. onto an existing building or on the property and its size.
6. Show how far from the property lines existing buildings and new construction will be.

STREET NAMES

1. Give the names of the road or street your property is located on. Mark an X where the building is located.
2. Show the nearest intersecting streets or roadways.
3. Check the appropriate box if the property is a corner or hillside lot.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class B1 License No. 1960666 Contractor's Signature [signature] Date 5-08-02

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully aceept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____ Phone_____ Contractors Lic. No._____

_____ INITIAL I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) /(company(ies)) to provide the work indicated.

Name_____ Address_____ Phone_____ Type of work_____

Name_____ Address_____ Phone_____ Type of work_____

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

COPYRIGHT KIVA 1997

5430 SAN FERNANDO ST,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class _____ License No._____Contractor's Signature_____Date_____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____Phone_____Contractors Lic. No._____

_____ INITIAL I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) /(company(ies)) to provide the work indicated.

Name_____ Address_____Phone_____Type of work_____

Name_____ Address_____Phone_____Type of work_____

INSPECTION RECORD

PRESERVE THIS RECORD OF YOUR BUILDING INSPECTIONS

This card must be posted in a conspicuous place at or near the main entrance to the new building, addition or alteration during foundation and framing construction.

When the building is framed this card may be posted at the electric meter service box or the garage and must always be available to the building inspector.

The issuance of a building permit does not authorize the installation of mechanical work such as plumbing, electrical, heating or refrigeration which requires a separate plumbing, electrical, heating or refrigeration permit.

Building permits shall expire on the **one hundred eightieth (180)** day from date of issuance if the work permitted thereunder has not been commenced. Such permit shall also expire if the building or work authorized by such permit is suspended or abandoned for a period of **180** days at any time after work commences.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

_____Yes _____No

Worker's Compensation Declaration

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation insurance or a certified copy thereof. (Sec. 3800, Labor Code)

Policy No. _____ Company _____ Worker's Comp. expiration date _____

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

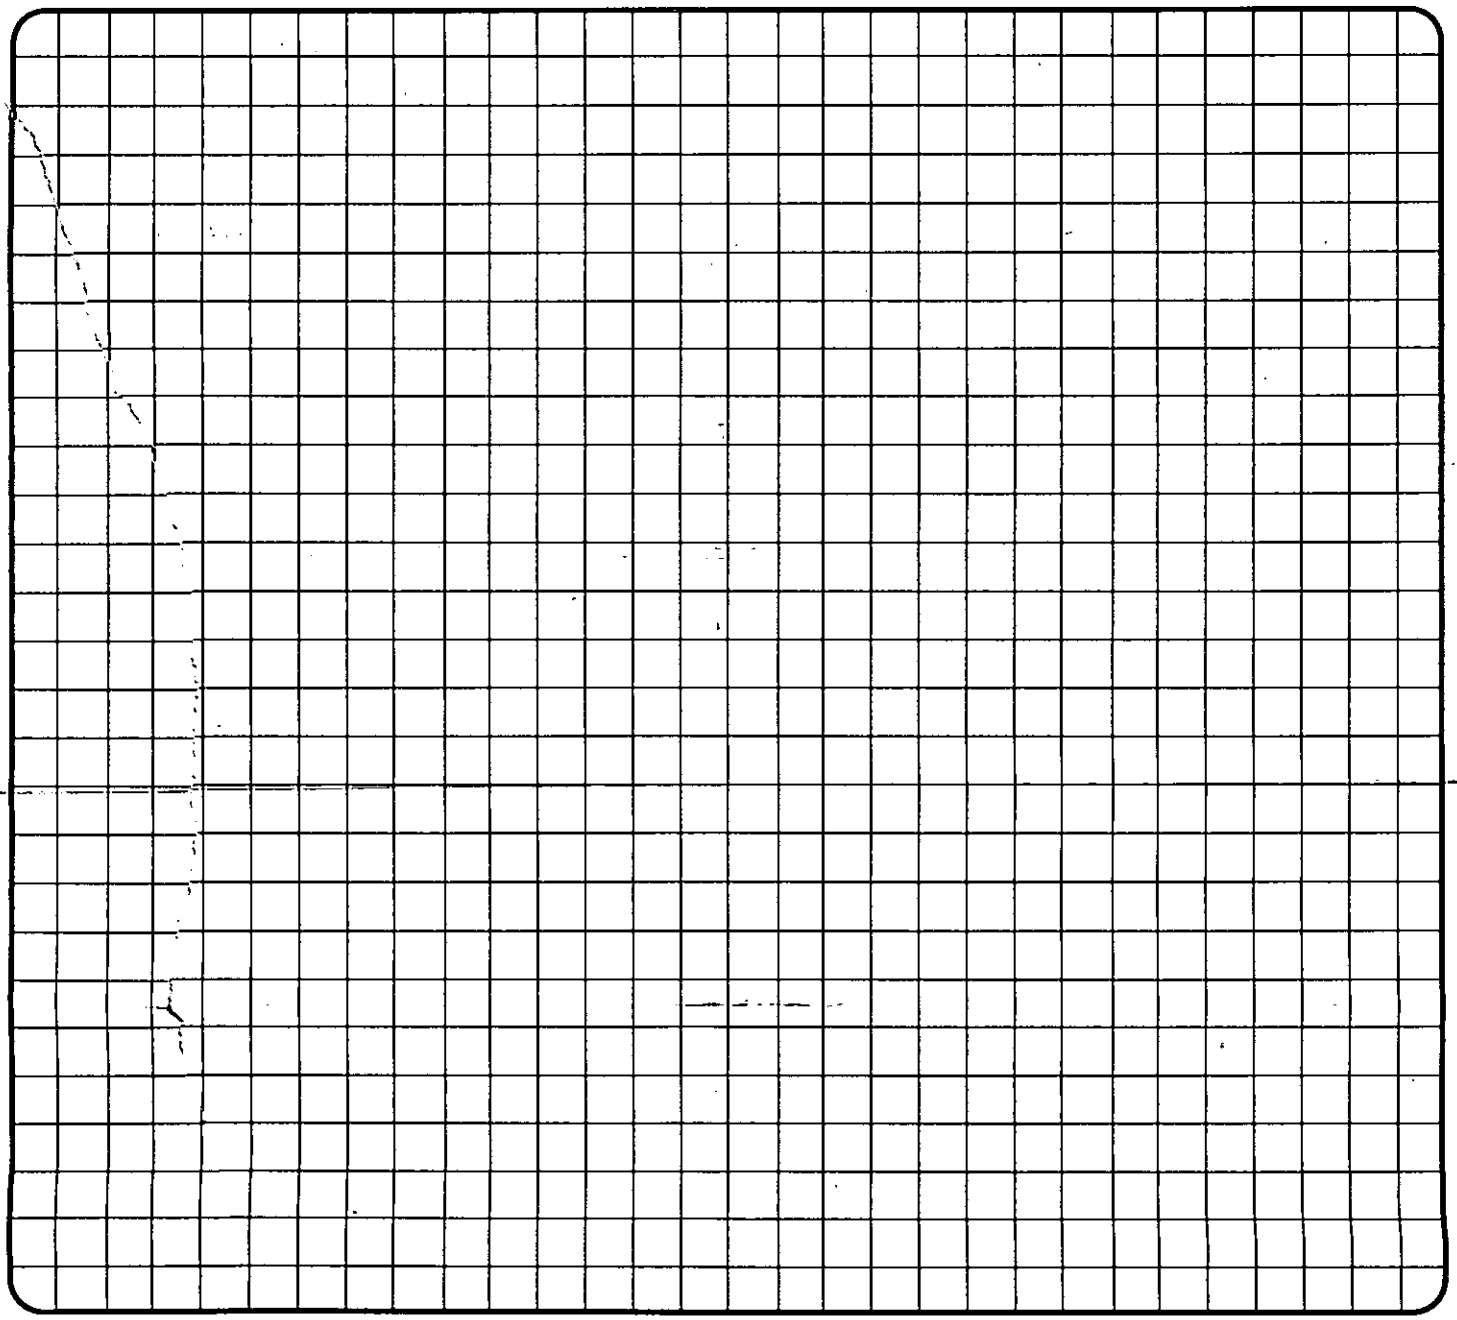
PLOT PLAN INSTRUCTIONS



City of Glendale
Permit Services Center

PLEASE SHOW ON PLOT PLANS FOR BUILDING PERMIT THE FOLLOWING INFORMATION:

1. Make the bottom of the page the street frontage.
2. Draw the shape of the lot only if it is irregular.
3. Put the dimensions of the lot in the brackets provided on the sheet for right, left, front and rear; or if it is irregular, on the outside of the lot lines.
4. Draw where existing structures sit on the property and show length/width size. Locate all structures on the lot and their distance from one another.
5. Draw where the new construction will be located: ie. onto an existing building or on the property and its size.
6. Show how far from the property lines existing buildings and new construction will be.

STREET NAMES

1. Give the names of the road or street your property is located on. Mark an X where the building is located.
2. Show the nearest intersecting streets or roadways.
3. Check the appropriate box if the property is a corner or hillside lot.

Owner - Builder Declaration

Section 7031.5 Business and Professional Code: Any City or County which requires a permit to construct, alter, improve, demolish, or repair any structure proir to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contrator's License Law, Chapter 9, Section 7000 of Division 3 of the Business and Professional Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars)$500).

I hereby affirm that I am exempt from the Contractor's License Law for the following reason:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project.

Sec. 7044, Business and Professional Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec._____ B&PC for this reason_____

Date _____ Owner _____

Will you or a future occupant of the building for which the permit is issued, need to comply with the requirements of the State Health and Safety Code SEC. 25505, 25533 and 25534 (I.E. Will this building be used to handle hazardous or generic hazardous waste)?

_____Yes _____No

Worker's Compensation Declaration

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation insurance or a certified copy thereof. (Sec. 3800, Labor Code)

Policy No:_____ Company Freemont Worker's Comp. expiration date 1-1-95

Certificate of Exemption from Worker's Compensation Insurance

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to the provisions of the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be revoked.

Applicant _____ Date _____

I certify that I have read this application and state that the information is correct. I agree to comply with all City and County ordinances and State laws relating to building construction, that no work on the above property will be performed not specifically described in this application, and, I hereby authorize representatives of this City to enter upon the above-mentioned property for purposes of inspecting the work permitted and posting notices. This permit becomes null and void if construction or work is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 90 days at any time after work is commenced. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been completed.

RE: Certification of Zoning
5430 San Fernando Road
APN 5638-018-032

Dear Mr. Brian,

The following information is provided in response to your inquiry of September 14, 1999.

1) **The legal description for the parcel**

Unnumbered Lot, portion of West Glendale Tract.

2) **The zoning designation for the property**

The property is zoned M2 Light Industrial Zone. The M2 zone is intended as a zone for light industrial development including manufacturing, wholesaling, research and development and limited services and retail activities in conformance with the comprehensive general plan of the city. In order to protect the public health, safety and general welfare, landscaping and performance standards have been established to foster compatibility between uses and the orderly and planned use of land resources.

3) **Permitted primary uses and structures**

No building permit was found for the construction of the structures located on this property. Other records indicate that six manufacturing/office structures exist at this address. Manufacturing, assembly, and packaging of aircraft products, as well as support offices for these operations are permitted uses in the M2 zone (for further information regarding the permitted uses in the M2 zone, please refer to the attached copy of Glendale Municipal Code Chapter 30.88). This zoning classification allows the existing use of the project, which is consequently a conforming legal use.

PRINTED ON RECYCLED PAPER

4) **Certificate of Use and Occupancy**

Copies of the most recent Certificates of Use and Occupancy are attached. These Certificates of Use and Occupancy were issued without any accompanying variance or conditional use proceedings, and we are unaware of any circumstances that would render them invalid or cause them to be revoked.

5) **Variance cases**

Use Variance Case No. 3787-U to permit polymeric raw material manufacturing at 5430-5460 San Fernando Road and 744-846 Milford Street was granted with conditions on January 7, 1966.

Use Variance Case No. 4446-U to permit polymeric raw material manufacturing at 5430-5460 San Fernando Road and 744-846 Milford Street was granted with conditions on December 20, 1967.

6) **Other city agencies to contact**

Contact the Building and Safety Section, 633 East Broadway, Room 101, 91206, (818) 548-3200, for information regarding building codes, use and occupancy permits, and fire codes.

Contact the Environmental Management Section, 780 Flower Street, 91201, (818) 548-4030, for information regarding hazardous materials.

I hope this is helpful. If you need further assistance, please call this office at (818) 548-2115.

Sincerely,

Edith M. Fuentes

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

At the time of final inspection, the inspector shall verify the installation of smoke detectors in all sleeping rooms and hallways leading thereto. Battery operated smoke detectors are acceptable in existing construction.

*** No rooftop equipment will be allowed unless the applicant obtains a separate variance or administrative exception from the Planning Division. Issuance of this permit shall not be construed as an approval to install equipment on the roof without a variance or administrative exception.

The City of Glendale restricts issuance of the building permit to the property owner or licensed contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

5454 SAN FERNANDO RD,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class B License No. 682874 Contractor's Signature [signature] Date 4/29/03

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

UPON WRITTEN REQUEST FROM THE APPLICANT, THE BUILDING OFFICIAL MAY EXTEND THE PERIOD OF PERMIT APPLICATION

BB Rev. 01/2001

LICENSED CONTRACTORS DECLARATION

I HEREBY AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM LICENCED UNDER THE PROVISIONS OF CHAPTER 9 (STARTING WITH SECTION 7000) OF DIVISION 3 O FTHE BUS. & PROFCODE , AND THAT MY LICENSE IS IN FULL FORCE AND EFFECT.

LICENSE CLASS _____ LICENSE NO._____CONTRACTOR'S SIGNATURE_____DATE_____

OWNER-BUILDER DECLARATION

AS THE PROPERTY OWNER AND BUILDER OF THE PROPOSED PROJECT ('OWNER-BUILDER') YOU ARE THE RESPONSIBLE PARTY OF RECORD ON THIS PERMIT. BUILDING PERMITS ARE NOT REQUIRED TO BE SIGNED BY PROPERTY OWNERS UNLESS THEY ARE PERSONALLY PERFORMING THEIR OWN WORK. IF YOUR WORK IS BEING PERFORMED BY SOMEONE OTHER THAN YOURSELF, YOU MAY PROTECT YOURSELF FROM POSSIBLE LIABILITY IF THAT PERSON APPLIES FOR THE PROPER PERMIT IN HIS OR HER NAME. CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND BONDED BY THE STATE OF CALIFORNIA AND TO HAVE A BUSINESS LICENSE FROM THE CITY OF GLENDALE. THEY ARE ALSO REQUIRED BY LAW TO PUT THEIR LICENSE NUMBER ON ALL PERMITS FOR WHICH THEY APPLY. IF YOU PLAN TO DO YOUR OWN WORK, WITH THE EXCEPTION OF VARIOUS TRADES THAT YOU PLAN TO SUBCONTRACT, YOU SHOULD BE AWARE THAT IF YOU EMPLOY OR OTHERWISE ENGAGE ANY PERSONS OTHER THAN YOUR IMMEDIATE FAMILY, AND THE WORK (INCLUDING MATERIALS AND OTHER COSTS) IS $200 OR MORE FOR THE ENTIRE PROJECT, AND SUCH PERSONS ARE NOT LICENSED AS CONTRACTORS OR SUBCONTRACTORS, THEN YOU MAY BE AN EMPLOYER. IF YOU ARE AN EMPLOYER, YOU MUST REGISTER WITH THE STATE AND FEDERAL GOVERNMENT AS AN EMPLOYER AND YOU ARE SUBJECT TO SEVERAL OBLIGATIONS INCLUDING STATE AND FEDERAL INCOME TAX WITHHOLDING, FEDERAL SOCIAL SECURITY TAXES, WORKERS COMPENSATION INSURANCE, DISABILITY INSURANCE COSTS, AND UNEMPLOYMENT COMPENSATION CONTRIBUTIONS. THERE MAY BE FINANCIAL RISKS FOR YOU IF YOU DO NOT CARRY OUT THESE OBLIGATIONS, AND THESE RISKS ARE ESPECIALLY SERIOUS WITH RESPECT TO WORKERS' COMPENSATION INSURANCE. FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER FEDERAL LAW, CONTACT THE INTERNAL REVENUE SERVICE (AND, IF YOU WISH, THE U.S. SMALL BUSINESS ADMINISTRATION). FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER STATE LAW, CONTACT THE DEPARTMENT OF BENEFIT PAYMENTS AND THE DIVISION OF INDUSTRIAL ACCIDENTS. IF THE STRUCTURE IS INTENDED FOR SALE, PROPERTY OWNERS WHO ARE NOT LICENSED CONTRACTORS ARE ALLOWED TO PERFORM THEIR WORK PERSONALLY OR THROUGH THEIR OWN EMPLOYEES, WITHOUT A LICENSED CONTRACTOR OR SUBCONTRACTOR, ONLY UNDER LIMITED CONDITIONS. A FREQUENT PRACTICE OF UNLICENSED PERSONS PROFESSING TO BE CONTRACTORS IS TO SECURE AN 'OWNER-BUILDER' BUILDING PERMIT, ERRONEOUSLY IMPLYING THAT THE PROPERTY OWNER IS PROVIDING HIS OR HER OWN LABOR AND MATERIAL PERSONALLY. INFORMATION ABOUT LICENSED CONTRACTORS MAY BE OBTAINED BY CONTACTING THE CONTRACTORS' STATE LICENSE BOARD IN YOUR COMMUNITY OR AT 1020 N STREET, SACRAMENTO, CALIFORNIA 95814. NOTE: THE CURRENT MAILING ADDRESS OF THE CONTRACTORS STATE LICENSE BOARD IS P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

SECTION 7031.5 OF THE BUS. & PROF. CODE REQUIRES THE PERMIT APPLICANT TO SIGN A STATEMENT ABOVE OR CLAIM EXEMPTION FROM THE CONTRACTOR'S LICENSE LAW AND STATE THE BASIS FOR SUCH EXEMPTION. VIOLATIONS OF THIS SECTION SUBJECTS THE APPLICANT TO A CIVIL PENALTY OF NOT MORE THAN FIVE HUNDRED DOLLARS ($500). I HEREBY AFFIRM THAT I HAVE READ THE PARAGRAPH ABOVE AND WILLFULLY ACCEPT THE RESPONSIBILITY OF AN OWNER-BUILDER. I FURTHER AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM EXEMPT FROM THE CONTRACTOR'S LICENSE LAW FOR THE FOLLOWING REASON:

_____ INITIAL I, AS OWNER OF THE PROPERTY, OR MY EMPLOYEES WITH WAGES AS THEIR SOLE COMPENSATION, WILL DO THE WORK, AND THE STRUCTURE IS NOT INTENDED OR OFFERED FOR SALE (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO DOES SUCH WORK HIMSELF OR HERSELF OR THROUGH HIS OR HER OWN EMPLOYEES, PROVIDED THAT THE IMPROVEMENTS ARE NOT INTENDED OR OFFERED FOR SALE. IF, HOWEVER, THE BUILDING OR IMPROVEMENT IS SOLD WITHIN ONE YEAR OF COMPLETION, THE OWNER-BUILDER WILL HAVE THE BURDEN OF PROVING THAT HE OR SHE DID NOT BUILD OR IMPROVE FOR THE PURPOSE OF SALE.).

_____ INITIAL I, AS OWNER OF THE PROPERTY, AM EXCLUSIVELY CONTRACTING WITH LICENSED CONTRACTORS TO CONSTRUCT THE PROJECT (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO CONTRACTS FOR THE PROJECTS WITH A CONTRACTOR(S) LICENSED PURSUANT TO THE CONTRACTORS LICENSE LAW.). I HAVE OR PLAN TO CONTRACT WITH THE FOLLOWING PERSON (COMPANY) TO PROVIDE THE PROPOSED CONSTRUCTION:

NAME_____ADDRESS_____PHONE_____CONTRACTORS LIC. NO._____

_____ INITIAL I, AS OWNER OF THE PROPERTY, PLAN TO PROVIDE PORTIONS OF THE WORK BUT I HAVE OR PLAN TO CONTRACT WITH THE FOLLOWING PERSON(S) /(COMPANY(IES)) TO PROVIDE THE WORK INDICATED

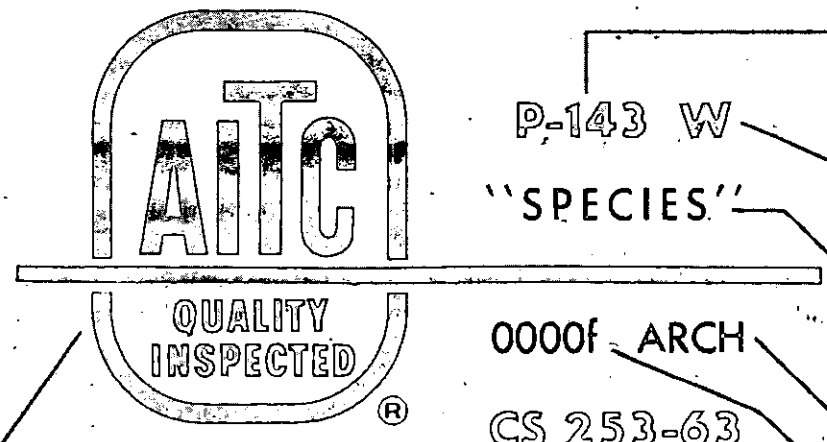
The principal members of the job covered by this certificate are stamped with one of the following type quality marks. Each qualified plant has an individual qualification designation. The designation "P-143" shown on the typical quality marks below is not assigned to any plant and is used only for the purpose of illustration.

A TYPICAL CUSTOM PRODUCT QUALITY MARK



P-143 — AITC designation of qualified licensed plant.

CS 253-63 — Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

A TYPICAL NON-CUSTOM PRODUCT QUALITY MARK

P-143 W — AITC designation of qualified licensed plant.

Designates type of adhesive, W for WET USE or D for DRY USE.

"SPECIES" — Name of wood species used.

0000f - ARCH — Designates appearance grade. IND — Industrial. ARCH — Architectural. PREM — Premium.

Designates dry use stress. f — bending. t — tension. c — compression parallel to grain.

CS 253-63 — Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

▷ For a custom product the specifications covering the desired product are included in the plans and specifications.
▷ For non-custom products essential detail specifications are included on stamp.

Re: Case No. 3787-U

Gentlemen:

The Zoning Administrator at a hearing held January 7, 1966, at 2:45 P. M., granted your application for a Variance to permit polymeric raw material manufacturing on Portion of West Glendale, being 5430-5460 San Fernando Road and 744-846 Milford Street, which is in the M2 Industrial Zone and No. 2 Fire Zone, subject to the following conditions:

1. That the location of the construction be substantially in accordance with the Zoning Administrator's Exhibit "A".

2. That the applicants obtain approval of the Bureau of Fire Prevention;

3. That final plans for the construction be approved by the Zoning Administrator;

4. That the application be granted for two years, until January 7, 1968.

Under the provisions of the Municipal Code the determination of the Zoning Administrator does not become effective until after an elapsed period of seven days from the date of determination. This seven-day period is provided for the purpose of allowing opportunity for any aggrieved person to file a written appeal from this decision with the Board of Zoning Adjustments.

The rights and privileges granted by this variance unless promptly commenced and used in full compliance with all

the conditions of approval will expire one year from the date of this grant except where the time limit is stated as a condition of approval.

Yours very truly,

W. H. Eaton, Zoning Administrator

Re: Case No. 4446-U

Gentlemen:

The Zoning Administrator at a hearing held December 20, 1967, at 9:00 A. M., granted your application for Variance to permit polymeric raw material manufacture on Portion of West Glendale Tract, being 5430-5460 San Fernando Road and 744-846 Milford St., which is in the M2 Industrial Zone and No. 2 Fire Zone, for a period of four years, until January 7, 1972, subject to the condition that the applicants obtain approval of the Bureau of Fire Prevention.

Under the provisions of the Municipal Code, the determination of the Zoning Administrator does not become effective until after an elapsed period of seven days from the date of determination. This seven-day period is provided for the purpose of allowing opportunity for any aggrieved person to file a written appeal from this decision with the Board of Zoning Adjustments.

The rights and privileges granted by this variance unless promptly commenced and used in full compliance with all the conditions of approval will expire one year from the date of this grant.

CUSTOMER'S ORDER NO. _____ DATE 3-7-67 MFGR'S ORDER NO. 2275-0005

SIGNATURE E. P. Blozvich COMPANY WEYERHAEUSER COMPANY LAMINATED LUMBER PRODUCTS

TITLE Quality Control Supervisor ADDRESS P.O.Box 585 Cottage Grove, Oregon DATE March 15, 1967

AITC HEREBY CERTIFIES that the said company at its said plant is licensed by the AMERICAN INSTITUTE OF TIMBER CONSTRUCTION to use the AITC Collective Mark in respect of products which comply with applicable provisions of said Standard, that the adequacy of the quality control system in effect at said plant is periodically inspected and verified by the Inspection Bureau of the AMERICAN INSTITUTE OF TIMBER CONSTRUCTION, and that, in the judgment of the undersigned, said company is capable of complying with applicable manufacturing and testing provisions of said Standard in respect of products manufactured at said plant. Conformance with the Standard in respect of any specific or particular product is the sole responsibility of the manufacturer; AITC's guarantee hereunder being that the said company is qualified to produce a product meeting the said Standard and that its plant is periodically inspected and verified by the AITC Inspection Bureau.

AITC FORM 1B-1-65

The principal members of the job covered by this certificate are stamped with one of the following type quality marks. Each qualified plant has an individual qualification designation. The designation "P-143" shown on the typical quality marks below is not assigned to any plant and is used only for the purpose of illustration.

A TYPICAL CUSTOM PRODUCT QUALITY MARK

P-143 — AITC designation of qualified licensed plant.

CS 253-63 — Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

A TYPICAL NON-CUSTOM PRODUCT QUALITY MARK

P-143 W — AITC designation of qualified licensed plant.

"SPECIES" — Designates type of adhesive, W for WET USE or D for DRY USE.

0000f ARCH — Name of wood species used.

CS 253-63 — Designates appearance grade. IND — Industrial. ARCH — Architectural. PREM — Premium.

Designates dry use stress. f — bending. t — tension. c — compression parallel to grain.

Indicates that the designated licensed plant has met all requirements for qualification and maintains an acceptable quality control system which is periodically inspected by AITC.

Indicates conformance to U.S. Commercial Standard for Structural Glued Laminated Timber.

▷ For a custom product the specifications covering the desired product are included in the plans and specifications.
▷ For non-custom products essential detail specifications are included on stamp.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

At the time of final inspection, the inspector shall verify the installation of smoke detectors in all sleeping rooms and hallways leading thereto. Battery operated smoke detectors are acceptable in existing construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

5454 SAN FERNANDO RD A,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class _____ License No._____Contractor's Signature_____Date_____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division

of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____Phone_____Contractors Lic. No._____

_____ INITIAL I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) /(company(ies)) to provide the work indicated.

Name_____ Address_____Phone_____Type of work_____

LICENSED CONTRACTORS DECLARATION

I HEREBY AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM LICENCED UNDER THE PROVISIONS OF CHAPTER 9 (STARTING WITH SECTION 7000) OF DIVISION 3 O FTHE BUS. & PROF. CODE , AND THAT MY LICENSE IS IN FULL FORCE AND EFFECT.

LICENSE CLASS _____ LICENSE NO._____CONTRACTOR'S SIGNATURE_____DATE_____

OWNER-BUILDER DECLARATION

AS THE PROPERTY OWNER AND BUILDER OF THE PROPOSED PROJECT ('OWNER-BUILDER') YOU ARE THE RESPONSIBLE PARTY OF RECORD ON THIS PERMIT. BUILDING PERMITS ARE NOT REQUIRED TO BE SIGNED BY PROPERTY OWNERS UNLESS THEY ARE PERSONALLY PERFORMING THEIR OWN WORK. IF YOUR WORK IS BEING PERFORMED BY SOMEONE OTHER THAN YOURSELF, YOU MAY PROTECT YOURSELF FROM POSSIBLE LIABILITY IF THAT PERSON APPLIES FOR THE PROPER PERMIT IN HIS OR HER NAME. CONTRACTORS ARE REQUIREO BY LAW TO BE LICENSED AND BONDED BY THE STATE OF CALFORNIA AND TO HAVE A BUSINESS LICENSE FROM THE CITY OF GLENDALE. THEY ARE ALSO REQUIRED BY LAW TO PUT THEIR LICENSE NUMBER ON ALL PERMITS FOR WHICH THEY APPLY. IF YOU PLAN TO DO YOUR OWN WORK, WITH THE EXCEPTION OF VARIOUS TRADES THAT YOU PLAN TO SUBCONTRACT, YOU SHOULD BE AWARE THAT IF YOU EMPLOY OR OTHERWISE ENGAGE ANY PERSONS OTHER THAN YOUR IMMEDIATE FAMILY, AND THE WORK (INCLUDING MATERIALS AND OTHER COSTS) IS $200 OR MORE FOR THE ENTIRE PROJECT, AND SUCH PERSONS ARE NOT LICENSED AS CONTRACTORS OR SUBCONTRACTORS, THEN YOU MAY BE AN EMPLOYER. IF YOU ARE AN EMPLOYER, YOU MUST REGISTER WITH THE STATE AND FEDERAL GOVEMMENT AS AN EMPLOYER AND YOU ARE SUBJECT TO SEVERAL OBLIGATIONS INCLUDING STATE AND FEDERAL INCOME TAX WITHHOLDING, FEDERAL SOCIAL SECURITY TAXES, WORKERS COMPENSATION INSURANCE, DISABILITY INSURANCE COSTS, AND UNEMPLOYMENT COMPENSATION CONTRIBUTIONS. THERE MAY BE FINANCIAL RISKS FOR YOU IF YOU DO NOT CARRY OUT THESE OBLIGATIONS, AND THESE RISKS ARE ESPECIALLY SERIOUS WITH RESPECT TO WORKERS' COMPENSATION INSURANCE. FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER FEDERAL LAW, CONTACT THE INTERNAL REVENUE SERVICE (ANO, IF YOU WISH, THE U.S. SMALL BUSINESS ADMINISTRATION). FOR MORE SPECIFIC INFORMATION ABOUT YOUR OBLIGATIONS UNDER STATE LAW, CONTACT THE DEPARTMENT OF BENEFIT PAYMENTS AND THE DIVISION OF INDUSTRIAL ACCIDENTS. IF THE STRUCTURE IS INTENDED FOR SALE, PROPERTY OWNERS WHO ARE NOT LICENSED CONTRACTORS ARE ALLOWED TO PERFORM THEIR WORK PERSONALLY OR THROUGH THEIR OWN EMPLOYEES, WITHOUT A LICENSED CONTRACTOR OR SUBCONTRACTOR, ONLY UNDER LIMITED CONDITIONS. A FREQUENT PRACTICE OF UNLICENSED PERSONS PROFESSING TO BE CONTRACTORS IS TO SECURE AN 'OWNER-BUILDER' BUILDING PERMIT, ERRONEOUSLY IMPLYING THAT THE PROPERTY OWNER IS PROVIDING HIS OR HER OWN LABOR AND MATERIAL PERSONALLY. INFORMATION ABOUT LICENSED CONTRACTORS MAY BE OBTAINED BY CONTACTING THE CONTRACTORS' STATE LICENSE BOARD IN YOUR COMMUNITY OR AT 1020 N STREET, SACRAMENTO, CALIFORNIA 95814. NOTE: THE CURRENT MAILING ADDRESS OF THE CONTRACTORS STATE LICENSE BOARD IS P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

SECTION 7031.5 OF THE BUS. & PROF. CODE REQUIRES THE PERMIT APPLICANT TO SIGN A STATEMENT ABOVE OR CLAIM EXEMPTION FROM THE CONTRACTOR'S LICENSE LAW AND STATE THE BASIS FOR SUCH EXEMPTION. VIOLATIONS OF THIS SECTION SUBJECTS THE APPLICANT TO A CIVIL PENALTY OF NOT MORE THAN FIVE HUNDRED DOLLARS ($500). I HEREBY AFFIRM THAT I HAVE READ THE PARAGRAPH ABOVE AND WILLFULLY ACCEPT THE RESPONSIBILITY OF AN OWNER-BUILDER. I FURTHER AFFIRM, UNDER PENALTY OF PERJURY, THAT I AM EXEMPT FROM THE CONTRACTOR'S LICENSE LAW FOR THE FOLLOWING REASON:

_____ INITIAL I, AS OWNER OF THE PROPERTY, OR MY EMPLOYEES WITH WAGES AS THEIR SOLE COMPENSATION, WILL DO THE WORK, AND THE STRUCTURE IS NOT INTENDED OR OFFERED FOR SALE (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO DOES SUCH WORK HIMSELF OR HERSELF OR THROUGH HIS OR HER OWN EMPLOYEES. PROVIDED THAT THE IMPROVEMENTS ARE NOT INTENDED OR OFFERED FOR SALE. IF, HOWEVER, THE BUILDING OR IMPROVEMENT IS SOLD WITHIN ONE YEAR OF COMPLETION, THE OWNER-BUILDER WILL HAVE THE BURDEN OF PROVING THAT HE OR SHE DID NOT BUILD OR IMPROVE FOR THE PURPOSE OF SALE.).

_____ INITIAL I, AS OWNER OF THE PROPERTY, AM EXCLUSIVELY CONTRACTING WITH LICENSED CONTRACTORS TO CONSTRUCT THE PROJECT (SEC. 7044, BUSINESS AND PROFESSIONS CODE: THE CONTRACTORS LICENSE LAW DOES NOT APPLY TO AN OWNER OF PROPERTY WHO BUILDS OR IMPROVES THEREON, AND WHO CONTRACTS FOR THE PROJECTS WITH A CONTRACTOR(S) LICENSED PURSUANT TO THE CONTRACTORS LICENSE LAW.). I HAVE OR PLAN TO CONTRACT WITH THE FOLLOWING PERSON (COMPANY) TO PROVIDE THE PROPOSED CONSTRUCTION:

CITY ZIP

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: *(Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars ($500).)*

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. *(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)*

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. *(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)*

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

Mr. Fred S. Solomon
Superintendent of Buildings
City of Glendale
633 East Broadway
Glendale, California 91205

Dear Mr. Solomon:

Your Letter of April 16 Concerning Discharge of Hexavalent Chromium to the Public Street at 5454 San Fernando Road, Glendale

Corrections have been made to prevent any reoccurrence as follows:

1. The bermed cleaning area has been made water tight.
2. The metylene chloride storage tank has been diked.
3. Spent cleaning solutions are returned to the supplier for reprocessing and reuse.
4. A portable tank and pump are available for emptying the bermed and diked areas in the event of a spill.
5. Employees have been informed of the absolute necessity of preventing any chemical discharge to the street gutters.

We hope this meets with your approval and if there are any questions, please contact the writer.

Very truly yours,

PRODUCTS RESEARCH & CHEMICAL CORPORATION

G. Carson

Re: Case No. 6143-U

Gentlemen:

Pursuant to the provisions of Article IX, Appendix, Glendale Municipal Code, the Zoning Administrator on September 1, 1976, conducted and closed a hearing, taking under submission the application for Zone Variance to manufacture polymeric raw materials in the M2 Industrial Zone at 5454 San Fernando Road, being Portion of West Glendale and Portion of Lot 31, Tract No. 3784, which is in the M2 Zone and No. 2 Fire Zone.

After considering the evidence presented with respect to this application, under the provisions of Section 900, Appendix, the Zoning Administrator has made the following findings:

I. The strict application of the provisions of the ordinance would result in practical difficulties or unnecessary hardship inconsistent with the general purposes and intent of the ordinance in that it would cause abandonment of a use which has been established for ten years pursuant to a variance renewed twice in the past. The area used in polymeric production is essential to the efficient operation of the plant, but uses only a very minor fraction of the total land area. The ordinance intends reasonable flexibility to allow an operation in a zone which chiefly falls into the Code allowed uses.

II. There are exceptional circumstances or conditions applicable to the property involved or to the intended use or development of the property that do not apply generally to other property in the same zone or neighborhood in

that the proposed site is one of the largest in the neighborhood, and the area occupied for the polymeric production is in the center of this area, totally buffered with uses permitted in the M2 Zone.

III. The granting of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in such zone or neighborhood in which the property is located because the use will not be expanded beyond its present size, the use has not proven detrimental in the past, the Environmental and Planning Board has recommended that the use would not be detrimental to the surrounding area, and because the use will continue to be surrounded by uses conforming to the Code.

IV. The granting of the variance will not be contrary to the objectives of the ordinance in that the surrounding neighborhood will be protected, which is the intent of the Code, and because of the unique situation further or more extensive variance or zone change requests will not be engendered by the favorable consideration of this variance.

It is, therefore, the determination of the Zoning Administrator on September 9, 1976, that this application for variance be granted subject to compliance with the following conditions:

1. That all noise and odors be suppressed from being transmitted into the adjacent residential areas. Noise shall be suppressed to the extent prescribed by Article II, Chapter 11, Glendale Municipal Code.

2. All requirements of the Bureau of Fire Prevention shall be maintained in satisfactory compliance.

3. That the polymeric raw material manufacturing facility shall remain essential where located on the site as shown on the site plan submitted in conjunction with the application. Variance granted herein shall terminate if the site or property is divided for sale, lease or rental to other firms such that the above spatial relationship no longer exists.

4. That variance granted herein shall be granted for a period of seven years, until September 1, 1983, at which time renewal may be considered.

Under the provisions of Article X, Appendix, the determination of the Zoning Administrator does not become effective for a

fifteen-day period. This period of time, until September 24, 1976, is allowed for any person aggrieved by this determination to file a written appeal in triplicate on forms which shall be provided upon request to the Board of Zoning Adjustments.

The rights and privileges granted by this variance will expire one year from the date of this grant unless promptly commenced and used in full compliance with the law and all conditions of approval.

Very truly yours,

Gerald J. Jamriska, A.I.P.

Re: Case No. 6886-U
5454 San Fernando Road

Gentlemen:

Pursuant to the provisions of Article IX, Appendix, Glendale Municipal Code, the Zoning Administrator on November 14, 1979, conducted and closed a public hearing on your application for Use Variance to continue the manufacture of polymeric raw materials in the M2 Industrial Zone at 5454 San Fernando Road, being a Portion of Lot 31, Tract No. 3784.

After considering the evidence presented with respect to this application, under the provisions of Section 900, Appendix, the Zoning Administrator has made the following findings:

I. The strict application of the provisions of the ordinance would result in practical difficulties or unnecessary hardship inconsistent with the general purposes and intent of the ordinance in that it would create an uncertainty that could lead to relocation of the business. The Code intends to promote stability among uses of property, promoting investment in plants and improvements.

II. There are exceptional circumstances or conditions applicable to the property involved or the intended use or development of the property that do not apply generally to other property in the same zone or neighborhood in that the area used for polymeric production (the M3 use) is but a minor fraction of the plant; and it is located far from the boundaries of the property. The bulk of all operations is well within M2 permitted uses. The polymeric production is however, a vital element of the company's business.

RECEIVED
BUILDING SECTION

1979 DEC 7 PM 12 47

III. The granting of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in such zone or neighborhood in which the property is located in that the use has proven to be compatible with the industrial zone it is in for more than thirteen years, and no expansion of the M3 polymeric production is contemplated or granted herein. The Environmental and Planning Board has recommended that the use would not be determinantal to the surrounding area, and the Fire Division has indicated conditional approval is appropriate.

IV. The granting of the variance will not be contrary to the objectives of the ordinance in that the surrounding neighborhood is not subjected to a use of property that is any more intense than permitted M2 uses. Only reasonable flexibility is granted herein to permit a business to continue operations which for all practical considerations is already permitted in the Zone.

It is, therefore, the determination of the Zoning Administrator, that this application for variance be granted subject to compliance with the following conditions:

1. That all noise and odors be suppressed from being transmitted into the adjacent residential areas. Noise shall be suppressed to the extent prescribed by Article II, Chapter 11, Glendale Municipal Code.

2. All requirements of the Bureau of Fire Prevention shall be maintained in satisfactory compliance.

3. That the polymeric raw material manufacturing facility shall remain essential where located on the site as shown on the site plan submitted in conjunction with the application. Variance granted herein shall terminate if the site or property is divided for sale, lease or rental to other firms such that the above spatial relationship no longer exists.

4. All flammable liquids and material that may not be compatible shall be clearly identified and stored properly as to minimize any potential fire hazard to the satisfaction of the Bureau of Fire Prevention.

5. The plant shall at all times operate within the established regulations of all regulatory agencies having jurisdiction concerning hazards or pollutants.

6. The discharge of waste water to San Fernando Road or other City street shall immediately be discontinued.

RECEIVED
BUILDING SECTION

1979 DEC 7 PM 12 47

Under the provisions of Section 1001, Appendix, any person affected by the above decision may appeal said determination to the Board of Zoning Adjustments within fifteen days following the actual date of such action. Appeal forms will be provided by the Zoning office upon request and must be filed with the prescribed fee prior to expiration of the 15-day period, or until December 19, 1979, at the office of the Zoning Administrator.

The rights and privileges granted by this variance will expire one year from the date of this grant unless promptly commenced and used in full compliance with the law and all conditions of approval.

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

5454 SAN FERNANDO RD A,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class _____ License No._____Contractor's Signature_____Date_____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____Phone_____Contractors Lic. No._____

Re: Explosion Damage
5454 San Fernando Road
M.R. 42-39, Portion West Glendale

Gentlemen:

As a result of an explosion, an inspection of the commercial buildings at 5454 San Fernando Road was made by a representative of the Building Section on July 6, 1976. The inspection revealed the following conditions:

The corrugated metal wall covering was blown off of the building.

Correction requires that you repair the building under permit and inspection.

In accordance with the provisions of Section 203 of Ordinance 4193, you are hereby required to obtain the necessary permits and commence corrective action within thirty (30) days of the date of this notice.

Please do not hesitate to contact this office for any clarification you may require.

Very truly yours,

Alexander C. Pyper, S.E.
Superintendent of Buildings

Re: Discharge of Hexavalent Chromium
to the public street at
5454 San Fernando Road, Glendale

Attention: Mr. Charles Foley
Executive Vice President

Gentlemen:

A sample was collected by Mr. Wayne O'Shana, Industrial Waste Inspector, for laboratory analysis for hexavalent chromium from the street gutter at the subject address at 10:40 A.M. on April 11, 1973, which contained 740 ppm Cr^{+6} and a pH of 6.4. A sample collected on March 9, 1973, contained 360 ppm Cr^{+6} and a similar flow was noted on March 22, 1973. These flows enter the storm drain system and discharge into the Los Angeles river via Verdugo Wash in violation of Section 25-38 of the Glendale Municipal Code.

Mr. Gerald Carson, Plant Manager, was contact on April 11, 1973, regarding the above discharges and the recommendations contained herein were made to effect the correction of these violations.

A similar situation at your facility at 5426 San Fernando Road occurred on December 11, 1963, when a sample from the street gutter was found to contain 7,700 ppm of Cr^{+6} and a ph of 5.8 which flowed to the storm drain. Mr. Carson was notified of the situation and corrections to the facility were made. No further violations have been noted at that facility. To correct the situation at 5454 San Fernando Road the following corrections are to be made:

1. The bermed wash area must be made water-tight and be provided with a storage tank, or sump, to collect and contain all waste liquids in that area.
2. All chemical storage areas are to be bermed, or diked, to prevent any spills from reaching the storm drain system.

There was evidence of waste discharge from the doorway of a chemical compounding room onto the paved area. Cease and desist from such discharge and provide proper disposal for this waste.

It is requested that thorough inspection of the facility at 5454 San Fernando Road should be made to insure that no dischaege of toxic or hazardous materials can escape the premises to reach the storm drain system.

Pleaso do not hesitate to call if this office can provide additional information.

Very truly yours,

Fred S. Solomon

BUILDING SECTION

NOTICE OF VIOLATION

No. 107

TO:

Date 5-14-58

NAME: Ames, Harris, Neville Co.

ADDRESS: 5454 San Fernando Rd.

An inspection of the property located at 5454 San Fernando Rd. has revealed the fact that certain violations of the Glendale Bldg Code exist as follows:

(1) Section 301-A - Glendale Bldg. Code
(Erection of Canvas covered structure along South Property line without permit)

(2) Section 1603 Glendale Bldg. Code.
(This Canvas Covered Structure does not conform to Fire Zone #2 Requirements.

Correction of these conditions requires that the following be done:

Remove Canvas Covered Structure.

(Gen. Manager J.P. Guthrie
Carl W. Fadave)

7 Days For office Hearing
June 25, 1958 To Comply by Removal.

You are hereby notified to comply with these requirements within ..... days from this date or legal proceedings will be started against you.

I have carefully read and examined the above application and find the same to be true and correct. All provisions of the Laws and Ordinances governing building construction will be complied with whether specified herein or not. I agree not to occupy or allow occupancy of any building authorized by this permit until final building inspection has been received. "I certify that in the performance of the work for which this permit is issued I shall not employ any person in any manner so as to become subject to the workmen's compensation laws of California."

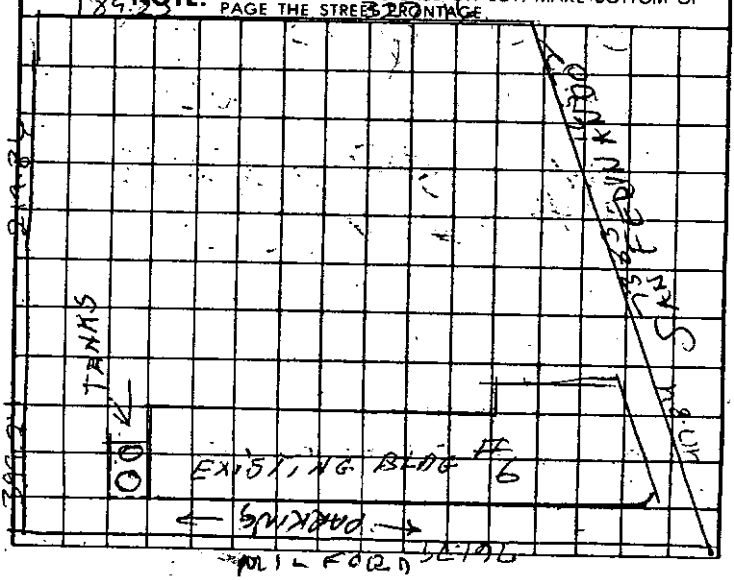
DECLARATION OF OWNER



I am the bonafide owner of the building described in the foregoing application: Said building is a single family dwelling, used exclusively for living purposes except for the usual accessory buildings in connection with such dwelling. Said living premises are occupied or will be occupied by the owner. I will personally purchase all material and I will personally perform all labor in connection with the foregoing permit.

I declare under penalty of perjury that the foregoing is true and correct.

Building Permit No. 27367

March 17, 1955

Roulac Construction Co.
622 South Lake Avenue
Pasadena, Calif.

Gentlemen:

Final Inspection of the building located at 5458 San Fernando Road was made on March 15, 1955 as requested. The following items were noted for correction before final approval is given and a Certificate of Occupancy issued:

1. Exit door at northwest corner of factory area No. 4 to swing outward
2. Exit signs of letters 5" minimum in height to be placed over all exit doors (8 signs)
3. Handrails required at each side of wood stairways
4. Install a handrail at each side of monumental stairway at front entrance
5. Final Electric inspection needed.

Please call for re-inspection when the indicated corrections have been made.

Very truly yours

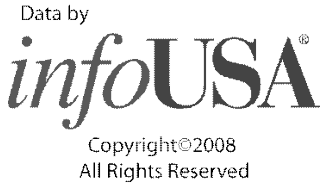
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Contact: Kim Braun

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
21865 East Copley Drive, Diamond Bar, CA 91765

Permit No.
D83011
A/N 288082

PERMIT TO CONSTRUCT/OPERATE

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner or Operator: SCIENCE & ENGRNG ANALYSIS CORP (SEACOR)
25864-F BUSINESS CENTER DR
REDLANDS, CA 92374

ID 099904

Equipment Location: 5454 SAN FERNANDO DR, GLENDALE, CA 91203

Equipment Description:

ABOVE GROUND/UNDERGROUND VAPOR EXTRACTION AND TREATMENT SYSTEM CONSISTING OF:

1. EXTRACTION WELL(S) AND DUCT(S).
2. AIR INJECTION WELLS (STANDBY).
3. WATER KNOCKOUT TRAP.
4. VAPOR EXTRACTION BLOWER, LAMPSON TURBOTRON, 25 H.P., MAXIMUM FLOW RATE OF 500 SCFM.
5. RESIN ADSORPTION/DESORPTION UNIT, PURUS, MODEL NO. PADRE 500, 7'-0" W. x 11'-0" L. x 7'-0" H. WITH TWO 300 LB. PURSORB-200 ADSORBENT BEDS, ONE CHILLER, ONE CONDENSER AND ONE WASTE PRODUCT STORAGE TANK.
6. L.E.L. MONITORING SYSTEM WITH SAFETY CONTROLS AND INTERLOCKS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. UPON COMPLETION, ANY VAPOR EXTRACTION OR REINJECTION WELL(S) AND DUCTS(S) SHALL BE CAPPED TO PREVENT VAPORS FROM VENTING TO THE ATMOSPHERE. VAPORS

South Coast Air Quality Management District
Certified Copy

FILE COPY

PERMIT TO CONSTRUCT/OPERATE

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

SHALL NOT BE EXTRACTED FROM THE SOIL, UNLESS VENTED TO THE VAPOR CONTROL SYSTEM.

4. IDENTIFICATION TAG(S) OR NAME PLATE(S) SHALL BE DISPLAYED ON THE EQUIPMENT TO SHOW MANUFACTURER MODEL NUMBER AND SERIAL NUMBER. THE TAG(S) OR PLATE(S) SHALL BE ISSUED BY THE MANUFACTURER AND SHALL BE AFFIXED TO THE EQUIPMENT IN A PERMANENT AND CONSPICUOUS POSITION.

5. A FLOW INDICATOR SHALL BE MAINTAINED AT ALL INLET STREAMS TO THE VAPOR CONTROL SYSTEM TO INDICATE THE TOTAL AIR FLOW RATE IN CUBIC FEET PER MINUTE (CFM). THE TOTAL FLOW RATE SHALL NOT EXCEED 500 CFM. IN CASE A PRESSURE SENSOR DEVICE IS USED IN PLACE OF THE FLOW INDICATOR, A CONVERSION CHART SHALL BE AVAILABLE TO INDICATE THE CORRESPONDENT FLOW RATE (IN CFM) TO THE PRESSURE READING.

6. CURRENT CONTACT PERSON NAME, COMPANY AND PHONE NUMBER SHALL BE DISPLAYED IN A PERMANENT AND CONSPICUOUS POSITION.

7. VOLATILE ORGANIC COMPOUND (VOC) CONCENTRATION SHALL BE MEASURED AT THE OUTLET OF THE VAPOR CONTROL SYSTEM CONTINUOUSLY BY USING A FLAME IONIZATION DETECTOR OR A DISTRICT APPROVED ORGANIC VAPOR ANALYZER CALIBRATED IN PARTS PER MILLION BY VOLUME (PPMV) OF HEXANE (IF ANOTHER CALIBRATING AGENT IS USED, IT SHALL BE CORRELATED TO AND EXPRESSED AS HEXANE).

8. THIS EQUIPMENT SHALL NOT BE USED TO EXTRACT AND TREAT SOIL VAPORS CONTAINING CARCINOGENIC AIR CONTAMINANTS LISTED IN RULE 1401 EXCEPT BENZENE, METHYLENE CHLORIDE AND TRICHLOROETHYLENE.

9. VOC CONCENTRATION MEASURED AT THE OUTLET OF THE VAPOR CONTROL SYSTEM SHALL NOT EXCEED 59 PPMV.

10. RECOVERED HYDROCARBONS FROM THE REGENERATION OF THE RESIN ADSORBER SHALL BE DISPOSED OF IN CLOSED CONTAINERS.

11. RECORDS SHALL BE MAINTAINED TO PROVE COMPLIANCE WITH CONDITIONS NUMBER 7 AND 9 .THE RECORDS SHALL BE KEPT FOR AT LEAST TWO YEARS AND MADE AVAILABLE TO THE DISTRICT UPON REQUEST.

Equipment Description :

SPRAY BOOTH, JBI, MODEL BDB-6, BENCH TYPE, 4'-0" W. X 5'-2" L. X 7'-0" H., WITH SIX 20" X 20" EXHAUST FILTERS AND ONE 1/2 HP EXHAUST FAN.

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA AT LEAST 2 INCHES THICK.

4. A GAUGE SHALL BE MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER.

5. THIS EQUIPMENT SHALL BE OPERATED IN COMPLIANCE WITH RULES 1107 AND 1171.

6. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSION FROM THE USE OF COATINGS, THINNERS, REDUCERS AND CLEANUP SOLVENT IN THIS EQUIPMENT SHALL NOT EXCEED 330 POUNDS IN ANY CALENDAR MONTH.

7. IN ADDITION TO THE RECORD KEEPING REQUIREMENTS IN RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY THE MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

8. COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL NOT CONTAIN ANY COMPOUNDS IDENTIFIED AS CARCINOGENIC AIR CONTAMINANTS IN RULE 1401 AS AMENDED DECEMBER 7, 1990.

FILE COPY

CONTINUATION OF PERMIT TO OPERATE

9. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.

10. THE OPERATOR SHALL KEEP RECORDS IN ACCORDANCE WITH THE REQUIREMENTS OF RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS). SUCH RECORDS SHALL BE RETAINED FOR A PERIOD OF THREE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

11. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL PERMITTED EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING MANAGEMENT OFFICIAL WITH RESPONSIBILITY FOR OPERATION OF EQUIPMENT SUBJECT TO THE PERMIT.

12. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

13. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY, FOR 36 MONTHS.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. 8. COATINGS, AND SOLVENTS USED AT THIS FACILITY SHALL NOT CONTAIN ANY COMPOUNDS IDENTIFIED AS CARCINOGENIC AIR CONTAMINANTS IN RULE 1401 AS AMENDED DECEMBER 7, 1990.

9. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.

10. THE OPERATOR SHALL KEEP RECORDS IN ACCORDANCE WITH THE REQUIREMENTS OF RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS). SUCH RECORDS SHALL BE RETAINED FOR A PERIOD OF THREE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

11. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL PERMITTED EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING MANAGEMENT OFFICIAL WITH RESPONSIBILITY FOR OPERATION OF EQUIPMENT SUBJECT TO THE PERMIT.

12. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

13. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY, FOR 36 MONTHS.

Equipment Description:

SPRAY BOOTH, JBI, MODEL BDB-6, BENCH TYPE, 4'-0"W. X 5'-2"L. X 7'-0"H., WITH SIX 20" X 20" EXHAUST FILTERS AND ONE 1/2 HP EXHAUST FAN.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA AT LEAST 2 INCHES THICK.

4. A GAUGE SHALL BE MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER.

5. THIS EQUIPMENT SHALL BE OPERATED IN COMPLIANCE WITH RULES 1107 AND 1171.

6. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSION FROM THE USE OF COATINGS, THINNERS, REDUCERS AND CLEANUP SOLVENT IN THIS EQUIPMENT SHALL NOT EXCEED 330 POUNDS IN ANY CALENDAR MONTH.

7. IN ADDITION TO THE RECORD KEEPING REQUIREMENTS IN RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY THE MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). ALL RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, SHALL BE RETAINED ON THE PREMISES

PERMIT TO CONSTRUCT/OPERATE

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

FOR AT LEAST TWO YEARS AND SHALL BE MADE AVAILABLE UPON REQUEST OF THE EXECUTIVE OFFICER OR HIS REPRESENTATIVE.

8. COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL NOT CONTAIN ANY COMPOUNDS IDENTIFIED AS CARCINOGENIC AIR CONTAMINANTS IN RULE 1401 AS AMENDED DECEMBER 7, 1990.

9. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

Mr. James Heaukulani
Courtaulds Aerospace
P.O. Box 1800
Glendale, CA 91209

Dear Sirs:

Improper Disposal of Hazardous Waste

Hazardous wastes generated at your location were improperly disposed of at a Sanitation Districts' facility as described in the enclosed report. The recovered wastes indicated on the report were stored on-site for proper disposal.

The wastes were not accompanied by a manifest nor were they represented to site personnel as anything other than normal refuse. Sanitation Districts' landfills are permitted to accept only those wastes that can be determined to be nonhazardous according to CCR Title 22, Division 4, Chapter 30. Hazardous wastes include empty containers regulated under section 66261.7 of Title 22. Nonhazardous wastes must conform to Regional Water Quality Control Board waste discharge requirements for the selected landfill (e.g. not soluble, liquid, or otherwise capable of affecting ground or surface water) and the Sanitation Districts' waste disposal criteria (e.g. not dusty, or highly odorous). Certain requirements must be complied with before anyone can dispose of hazardous wastes in any landfill. California law requires any person producing hazardous wastes to provide the hauler with a manifest, signed under penalty of perjury, that lists the types and amounts of wastes to be disposed, gives the origin of the wastes, and specifies a proper disposal facility as the destination for the wastes.

The Sanitation Districts have contacted you by phone concerning this improper disposal. You made arrangements to have the drums picked up for proper disposal. You will be billed for the Districts' costs associated with this incident.

The Districts will take whatever steps are necessary to prevent such improper disposal. Any recurrence of improper disposal will be grounds for loss of disposal privileges at Districts' facilities.

S-13

If you have any questions, please contact Lisa Scales of this office, ext. 3541.

Very truly yours,

Charles W. Carry

Dear Mr. Young:

NOTICE OF APPROVAL FOR 30 DAY GENERATOR EXTENSION: PRODUCTS RESEARCH & CHEMICAL CORPORATION, 5426 SAN FERNANDO ROAD, GLENDALE, CALIFORNIA 91209 (EPA ID NO. CAD08237596)

On March 26, 1991 you applied for a thirty-day storage extension beyond the ninety-day generator accumulation limit for 10 drums of chromium contaminated fire cleanup residue identified as hazardous waste.

The Department hereby grants your request for one-time extension in accordance with section 66508(b) of Title 22, California Code of Regulations. This extension shall expire on April 26, 1990.

Upon shipment of the aforementioned waste, please submit to this office copies of the corresponding manifests, thereby verifying proper disposal.

This approval shall not waive any other applicable provisions of hazardous waste control laws or regulations. All requirements for hazardous waste generators still apply.

If you any questions regarding this approval, please contact Rachel Segal of my staff at (818) 567-3022.

Sincerely,

Scott Simpson, Branch Chief
Facility Management Branch

March 26, 1991

Ms. Rachel Segal,
California Department of Health Services
1405 N. San Fernando Road
Burbank CA 91504

Dear Ms. Segal:

This is a formal request for an extension of the 90-day storage limit for a specific hazardous waste.

This waste consists of a fire cleanup residue that was generated on December 28, 1990. In conjunction with the Glendale Fire Department and Los Angeles County Health Department, IT corporation services were procured to cleanup the residue which has some chromium contamination.

A waste profile is in process with Chemical Waste Management, but, it now appears that the profile will not be completed before the 90-day limit has elapsed, i.e., March 28, 1991.

Our EPA ID# is CAD-008237596

EPA I.D. # CAD008237596 -- Waste Disposal

Dear Ms. Segal,

In my letter dated May 1, 1992, I requested an extension to the ninety day time limit for disposal of polymeric resin waste stream #WS 17-000-0400 while it underwent analysis . This letter is to inform you that the waste was re-profiled and then sent to U.S. Ecology, Beatty, Nevada for disposal. Enclosed you will find a copy of the disposal manifest.

Sincerely,

Dear Mr. Young:

This is in response to your request for a variance from the manifesting and vehicle inspection requirements of Title 22, California Administrative Code (CAC). The Department does not consider the types or the quantities of hazardous wastes listed in your application for a variance to be insignificant as a potential hazard to human health, due to either a small quantity, low concentration, or physical or chemical characteristics, when transported on public roads in California. Therefore, your request for a variance is denied.

You may wish to review the small quantity exemptions which are provided to generators of hazardous waste in Section 25163(c) of the Health and Safety Code. A copy is provided for your information. If I can be of any further help in this matter, please contact Mr. Kit Davis at (916) 324-2428.

Sincerely,

for Kit Davis

Re: Discharge of Waste to the Street
(BIIL-81)

Gentlemen:

This is to confirm the discussion of July 29, 1981, among Messrs. Hay and Carson of your company and Mr. Fu of this office relative to a complaint received of discharge of wastes from your facility at the above address to the San Fernando Road street gutter.

Our investigation on July 29, 1981, disclosed that on July 1, 1981, approximately 100 gallons of organic solvent was spilled from a faulty nozzle into a yard drainage trench on your property and thence to the street gutter in San Fernando Road, Glendale. The spilled solvent was contained and cleaned up, and no solvent reached to the adjacent storm drain catch basin.

Although your prompt action prevented a serious problem, our inspection also disclosed that a sluice gate valve in the yard drainage trench was frozen in an open position and not operative. Your facility has uncontained solvent storage and processing areas from which spills and/or chemicals deposited on the ground could then be discharged or flushed to the yard drainage trench then to a storm drain in the event of major spill during the rainy season. Your existing berms, drainage trench and the sluice gate valve are inadequate to prevent such discharge as stated herein above.

You are requested to provide a written report to this Board by August 28, 1981 of the necessary measures your company will take (or has been taken) to preclude discharge of chemicals to the storm drain in the future, especially during rainy periods. Please include in your report the estimated time schedule of implementation of these measures.

If you have any questions concerning this matter, please call Mr. Josh M. Workman at the above telephone number.

Very truly yours,

Lawrence A. Myerson

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

* The U.S. EPA has released this contaminant plume map to update the public on the current status of the San Fernando Valley Superfund groundwater site. The areas of contamination shown on this map represent two-dimensional approximations based on water quality data from groundwater monitoring wells in the eastern part of the San Fernando Valley. Areas of contamination are based on the most recent sample taken from each well shown between January 2014 and June 2019. In any given year, the maximum contaminant concentration at any well or group of adjacent wells, regardless of depth, was used for developing the plume extent. This map is not intended to identify any specific source(s) of contamination and does not reflect where contamination originated or its path of migration in the groundwater.

Mr. Scott Krall CPG, CHMM
Corporate EHS
PRC-DeSoto International, Inc.
440 College Park Drive
Monroeville, PA 15146

SUBJECT: WATER CODE SECTION 13267 ORDER WQ 2019-0045-DWQ FOR THE DETERMINATION OF THE PRESENCE OF PER- AND POLYFLUOROALKYL SUBSTANCES AT COURTAULDS AEROSPACE

SITE: COURTAULDS AEROSPACE, 5430 SAN FERNANDO ROAD, GLENDALE, CALIFORNIA, GEOTRACKER GLOBAL ID SL603799127

Dear Mr. Krall:

Your Courtaulds Aerospace property (Facility) ("Former PRC-DeSoto") previously received Order WQ 2019-0045-DWQ (Order) regarding the determination of the presence of Per- and Polyfluoroalkyl substances (PFAS) at chrome plating facilities. The Order contains the following language:

"If your facility does not perform chrome plating, or if fume suppressants were not used, disposed, discharged, spilled, or released in any way to the land, drains, sewers, surface water, air, and/or groundwater at your facility, you may instead fill out and submit the questionnaire included in Section C."

You are receiving this letter to acknowledge that the above-referenced questionnaire was submitted on behalf of the Facility. Accordingly, at this time the Facility does not need to take further action to comply with the Order. We will let you know should it become necessary for you to submit additional information or take additional action.

Thank you for your submittal of the required questionnaire and your attention to this matter.

Should you have any questions related to this matter, please contact me at (213) 576-6677 or Nicole.Alkov@waterboards.ca.gov or Mr. Jeffrey Hu, Unit Chief, at (213) 576-6803 or Jeffrey.Hu@waterboards.ca.gov.

Additional questions can be sent via email to pfas@waterboards.ca.gov. PFAS related State Water Resources Control Board activities, information, and contact information can be found at http://waterboards.ca.gov/pfas.

Sincerely,

Nicole Alkov

Executive Summary

This *Draft Site Closure Report* has been prepared by Stantec Consulting Services Inc. (Stantec) on behalf of PRC-DeSoto International Inc. (PRC) to describe the completion of investigation and remediation requirements set forth in Cleanup and Abatement Order No. R4-2002-0085 (CAO) and other requirements by the California Regional Water Quality Control Board-Los Angeles Region (RWQCB) for the former PRC facility located at 5430 San Fernando Road, in Glendale, California (the Site, Figure 1). The CAO required, among other things, investigation, and remediation, as necessary, of emerging chemicals (e.g., heavy metals, hexavalent chromium (Cr(VI)), 1,4-Dioxane, etc.) and groundwater monitoring for volatile organic compounds (VOCs) and emerging chemicals.

Following completion of the CAO requirements, PRC representatives met with Dr. Arthur Heath, Mr. Alex Lapostal, and Mr. Larry Moore on 29 May 2013 to discuss the completion of chromium remediation at the Site as documented in the *Chromium Remediation Confirmation Sampling and RAP Addendum No. 5 Investigation Report* (Stantec, 20 February 2013) and the requirements for final Site closure. At the meeting, the RWQCB acknowledged the completion of remedial actions at the Site, and, as concerns for Site closure further requested,

1. Evaluation of human health risks as relates to the potential for vapor intrusion (VI) at the Site and at adjacent properties using existing soil vapor data, and the continued evaluation and mitigation of the VI pathway as necessary,

2. Preparation of a draft closure report summarizing investigation activities, groundwater monitoring results, remedial actions, and vapor intrusion studies,

3. Public notification and participation in the Site closure process,

4. Finalization of the closure report,

5. Filing of a deed covenant restricting Site use to commercial/industrial use, and

6. Monitoring well abandonment.

Subsequent VI evaluations identified the need for additional soil vapor investigations along the east and south property lines and indoor air quality studies at the Site. Following completion of the on-Site investigations, representatives of PRC met with RWQCB representatives Dr. Arthur Heath, Larry Moore, Susan Lagudis, and Paul Rasmussen on 1 July 2015 to discuss the scope of off-Site VI investigations and public participation requirements for Site closure. At this meeting, it was determined that,

1. No further action (NFA) was necessary to address on-Site VI to commercial/industrial use, and

2. Additional evaluation of the off-Site VI pathway were needed at selected worst-case residential properties on the east and south sides of the Site.

The RWQCB provided further direction regarding public participation requirements and stated that PRC would need to assist RWQCB in the development and distribution of a Pre-Closure Notification letter to property owners/occupants within a 500-foot radius of the Site and to selected pubic agencies notifying them of the pending closure and the draft closure report.

Once all public comments are addressed to the satisfaction of the RWQCB, the draft closure report will be revised as necessary, and finalized (Meeting Minutes, Stantec, 20 July 2015).

This *Draft Site Closure Report* documents all remedial investigations and actions performed over the past 30 years, provides an updated Site Conceptual Model, and documents the results of a human health risk assessment (HHRA) for on and off-Site property users.

Site Investigations coupled with post-remediation confirmation soil sampling, on- and off-Site vapor intrusion studies, groundwater monitoring, and HHRA have demonstrated that remedial goals have been largely achieved and that no adverse excess human health risks exist for current on-Site and off-Site receptors, based on current property usage and documented residual concentrations of chemicals of potential concern (COPC) in environmental media. To assure that potential future receptors are not adversely exposed to COPCs 1) a deed notification will be recorded for the property that will restrict property usage to commercial/industrial use until such time that investigation/mitigation demonstrate that potential health risks have been reduced to acceptable levels , 2) require the preservation of the GCL cap over residual Cr(VI) impacted soil buried six feet bgs on the east side of the former Building 1 footprint, and 3) restrict groundwater extraction at the Site for potable water purposes. With these conditions, potential excess health risks to future receptors will be mitigated to insignificant levels.

In consideration of the findings of Site investigations, post remediation sampling and monitoring, human health risk evaluations, and the planned filing of a deed notification, remedial actions are complete and the Site qualifies for a No Further Action Status.

This report has been developed for public review and comment in accordance with the final closure requirements outlined in the 29 May 2013 and 1 July 2015 meetings (described above).

1.0 INTRODUCTION

This *Draft Site Closure Report* has been prepared by Stantec Consulting Services Inc. (Stantec) on behalf of PRC-DeSoto International Inc. (PRC) to describe the completion of remedial actions at the former PRC facility located at 5430 San Fernando Road, in Glendale, California (the Site, Figure 1). This comprehensive *Draft Site Closure Report* was prepared in accordance with previous agreements with the California Regional Water Quality Control Board-Los Angeles Region (RWQCB) to demonstrate the completion of requirements of Cleanup and Abatement Order No. R4-2002-0085 (CAO). The CAO required, among other things, investigation, and remediation, as necessary, of emerging chemicals (e.g., heavy metals, hexavalent chromium (Cr(VI)), 1,4-Dioxane, etc.) and groundwater monitoring for volatile organic compounds (VOCs) and emerging chemicals.

1.1 PURPOSE AND OBJECTIVE

Following completion of the CAO requirements, PRC representatives met with Dr. Arthur Heath, Mr. Alex Lapostal, and Mr. Larry Moore on 29 May 2013 to discuss the completion of chromium remediation at the Site as documented in the *Chromium Remediation Confirmation Sampling and RAP Addendum No. 5 Investigation Report* (Stantec, 20 February 2013) and the requirements for final Site closure. At the meeting, the RWQCB acknowledged the completion of remedial actions at the Site, and, as concerns for Site closure, further requested,

1. Evaluation of human health risks as relates to the potential for vapor intrusion (VI) at the Site and at adjacent properties using existing soil vapor data, and the continued evaluation and mitigation of the VI pathway as necessary,

2. Preparation of a draft closure report summarizing investigation activities, groundwater monitoring results, remedial actions, and vapor intrusion studies,

3. Public notification and participation in the Site closure process,

4. Finalization of the closure report,

5. Filing of a deed covenant restricting Site use to commercial/industrial use, and

6. Monitoring well abandonment.

Subsequent VI evaluations identified the need for additional soil vapor investigations along the east and south property lines and indoor air quality studies at the Site. Following completion of the on-Site investigations, representatives of PRC met with RWQCB representatives Dr. Arthur Heath, Larry Moore, Susan Lagudis, and Paul Rasmussen on 1 July 2015 to discuss the scope of off-

Site VI investigations and public participation requirements for Site closure. At this meeting, it was determined that,

1. No further action (NFA) was necessary to address on-Site VI to commercial/industrial use, and

2. Additional evaluation of the off-Site VI pathway were needed at selected worst-case residential properties on the east and south sides of the Site.

The RWQCB provided further direction regarding public participation requirements and stated that PRC would need to assist RWQCB in the development and distribution of a Pre-Closure Notification letter to property owners/occupants within a 500-foot radius of the Site and to selected pubic agencies notifying them of the pending closure and the draft closure report.

Once all public comments were addressed to the satisfaction of the RWQCB, the draft closure report would then be revised as necessary, and finalized (Meeting Minutes, Stantec, 20 July 2015).

The objective of this this *Draft Site Closure Report* is to document remedial investigations and actions with the purpose of achieving Site closure. This report has been developed for public review and comment in accordance with the final closure requirements outlined in the 29 May 2013 and 1 July 2015 meetings.

1.2 REPORT ORGANIZATION

This report is organized as follows:

- Section 1 - Introduction sets forth the regulatory framework under which remedial investigations and actions have been undertaken and summarizes the purpose and objectives of this report.

- Section 2 - Site Description and History describes the physical characteristics of the Site and summarizes historical site usage with an emphasis on potential source areas and structures.

- Section 3 - Site Investigations and Remediation summarizes all investigation and remedial actions conducted at the Site since 1988.

- Section 4 - Groundwater Monitoring describes the results, findings, and trends of post-remediation groundwater monitoring activities.

- Section 5 - Human Health Risk Assessment summarizes excess human health risks associated with residual concentrations of chemicals of concern (COCs) in soil, soil vapor and groundwater.

- Section 6 - Conceptual Site Model (CSM) evaluates site characteristics, residual COC concentrations, and pathways of exposure for current and future site occupants.

- Section 7 - Closure succinctly summarizes the environmental status of the Site and concludes that the Site qualifies for a NFA status.

2.0 SITE DESCRIPTION AND HISTORY

This section provides a description of the Site and its operational history.

2.1 SITE DESCRIPTION

The former PRC facility is located southeast of the intersection of the Golden State Freeway (I-5) and the Ventura Freeway (SR-134), at 5430 San Fernando Road, Glendale, California (the "Site", Figure 1). The Site is located within Upper Los Angeles River Area (ULARA) at the southeast corner of the San Fernando Valley at the head of the Glendale Narrows. The Site is located approximately one quarter mile east of the Los Angeles River and one quarter mile south of the Verdugo Wash. The Site is relatively flat. The elevation of the site is approximately 470 feet above mean sea level (amsl).

The facility is located in an area of mixed commercial, industrial and residential use, and is bounded on the north by Milford Street, on the west by San Fernando Road, on the south by single-family residential dwellings, an automotive repair shop and California Avenue, and on the east by single and multi-family residential units along Concord Street.

With the exception of a few limited landscape areas located along the northwestern corner of the facility, fronting San Fernando Road, the remainder of the Site is covered by buildings, asphalt, and concrete pavement. Figure 2 shows the approximate locations of existing and former structures on the former PRC facility.

The Site is currently used for the storage of video and sound equipment used in the entertainment business.

2.2 SITE HISTORY

Prior to operations by PRC and its predecessors (beginning in the mid-1940s), the north portion of the Site was occupied by a winery and subsequently an aluminum window and door fabricator. The south portion of the Site was occupied by a lumber yard and soft drink bottling warehouse. Development of the facility by PRC began in approximately 1946 to 1947 in Building 1 where metal products, gaskets, and sealants were manufactured for use in the aerospace industry utilizing lead dioxide curing technology (non-aqueous). Dichromate technology (involving polysulfide resins and aqueous dichromate curing agent) was introduced in the 1950s. Manufacturing activities included lead curing compounds (lead dioxide) and storage of chromic acid (Cr[VI]). The facility expanded to 15 buildings to support storage of automotive coatings, repackaging of aerospace adhesives, coatings, and sealants.

The manufacture of aerospace sealants was terminated in the late 1990s and plastic injection molding of aerospace and electronic packaging was terminated in 2006. PRC's activities on the Site were terminated in late 2008.

The following subsections describe site development, including buildings, waste storage areas, subsurface structures (i.e., storm water holding tanks, sumps, and clarifiers), boilers, cooling towers, aboveground storage tanks (ASTs), and underground storage tanks (USTs).

2.2.1 Buildings

Facility development and building usage are described below. The location of each building is shown on Figure 2.

Building 1

Building 1, constructed in 1942, was one-story with an area of 6,500 square feet located along the central-western perimeter of the Site. The building's original use (west side) was for manufacturing of metal products, gaskets, and aerospace sealants utilizing lead dioxide curing technology starting in 1946 and 1947. Dichromate technology was introduced (involving polysulfide resins and aqueous dichromate curing agent) in the early 1950s. Manufacturing activities included lead curing (lead dioxide) and storage of chromic acid. A fire damaged the building in 1954. The east side of Building 1 was constructed in the 1960s for manufacturing of the urethane product line. Manufacturing activities utilizing dichromate technology were moved outside and west of Building 8 in the mid-1970s when Building 1 was converted to office space. The west portion of the building was used for office space and the east side was used to process 4,4'-methylenebis (2-chloroaniline) (MBOCA). The building was demolished at the close of 2008. The area is currently paved and used for parking.

Building 2

Building 2, constructed in 1942, is one-story with an area of 5,300 square feet located on the south-central portion of the Site. The building was used for packaging, labeling, and storage and supported operations in Building 3 until the late-1990s. The building was never used for manufacturing and is currently used for video equipment storage.

Building 3

Building 3, constructed in 1945, is one-story with an area of 5,200 square feet located on the south-central portion of the Site. The building was used for warehousing and office space. Historically, large walk-in freezers were located in Building 3. At the time of this report, the building was being used for video equipment set up and preparation.

Building 4

Building 4, constructed in 1955, is one-story with an area of 9,600 square foot located near the southeast corner of the Site. The building was used for shipping, receiving, and warehousing. However, historical Sanborn maps indicate that Building 4 may have been used to process sealants in the 1970s. Walk-in freezers were located west of Building 4 and associated condensers

and liquid nitrogen storage were located south of the freezers. Building 4 is currently used for office space.

Building 4A

Building 4A, constructed in 1963, is a multi-level (one- to two-stories) with an area of 20,000 square feet located along the central-eastern perimeter of the Site. The building was originally used to manufacture seat belts using punch presses until the late-1960s. The building was used for repackaging and filling operations. A drum/pot cleaning area was located outside on the northwest corner of the building within a bermed area. The pot cleaning area consisted of an 18-inch by 25-foot steel dip AST (T-33) containing 1,1,1-trichloroethane (TCA) in the early to mid-1990s. Building 4A is currently used for office space.

Building 5

Building 5, constructed in 1950, is one-story with an area of 11,500 square feet located on the southwest corner of the Site. Prior to PRC's acquisition, the building was used as a soft drink distribution and storage facility through 1960. Following PRC's acquisition, the building was used for raw materials storage in the 1970s and subsequently used for maintenance activities and storage of old office furniture up to the time of facility decommissioning. The building is currently used for video equipment calibration.

Buildings 6 and 6A

Buildings 6 and 6A, constructed in 1951, are one-story with areas of 46,600 and 27,500 square feet, respectively, located on the northern portion of the Site. The buildings were historically used by American Radiator and Standard Sanitary Corporation for warehousing and by a company by the name of Fullview for assembly of aluminum windows and glass doors. Plastics assembly and injection molding using polyethylene and polypropylene were performed from the 1960s to 2006 in Building 6. Plasticizers were not used in this manufacturing process. Other activities performed in Buildings 6 and 6A include repackaging, machining, and warehousing. The building is currently used for video and sound system receiving, shipping and repair.

Building 7

Building 7, constructed in 1951, is a one-story metal shed with an area of 3,200 square feet located on the northeast portion of the Site (south of the southeast corner of Building 6). The building was originally oriented north/south and is now oriented east/west. The south side of the building was equipped with ovens historically used for heating operations for filler drying, heat aging, and reducing material viscosity. The ovens have been removed and the new owner removed the sides and the building is now a covered, open-air storage area.

Building 8

Building 8, constructed in 1962, is one-story with an area of 1,000 square feet located on the west-central portion of the Site. The building was historically part of the polymer plant for manufacture of polysulfides and polyurethanes. Chromic acid was used in the manufacturing process for dichromate curing compounds. At the time of Site decommissioning the building was used for materials quality assurance/quality control (QA/QC). A cooling tower is also located near Building 8.

Building 9

Building 9, constructed in 1966, is one-story with an area of 11,600 square feet located on the central portion of the Site. The building was used for warehousing finished and raw products. A compressor room was located in the northeast corner of the building. The building is currently used for video equipment staging and storage.

Building 10

Building 10, constructed in 1966, is one-story with an area of 16,700 square feet located on the north-central portion of the Site. The building was historically used for the manufacture of polysulfide sealants and polyurethane molding compounds from 1966 to 2001. The building was divided into six bays labeled Bay 1 through Bay 6 from east to west. The east four bays (Bays 1 through 4) were constructed in 1966 and the west two bays (Bays 5 and 6) were constructed in the early to mid-1980s. The building is currently used for video equipment staging and storage.

Building 11

Building 11, constructed in 1977, was two-stories with an area of 16,800 square feet located on the west-central perimeter of the Site. The building was used for office space. The building was demolished in 2008. The area is currently paved and used for parking.

Building 12

Building 12, constructed in 1979, is one-story with an area of 12,400 square feet located on the south portion of the Site. The building was used for shipping, receiving and warehousing of automotive coatings. The building is currently used for staging and storage of equipment.

Building 13

Building 13, constructed in 1985, is one-story with an area of 4,800 square feet located on the northeast corner of the Site. The open-sided building is divided into 12 compartments that were used for storage of raw materials, including liquids. The building was equipped with secondary containment connected to two spill containment tanks located west of the storage bays. The containment tanks were removed and the structure is currently used for storage.

Ball Mill Building

The Ball Mill Building, constructed in 1961, was one-story with an area of 625 square feet located west of Building 12. The building was utilized for grinding pigment. Chromium-containing materials were also handled in this area. The building was demolished after PRC's operations at the Site were terminated and this area is currently paved and used for parking.

Other Buildings

Other support buildings included a forklift repair and a repair parts canopy located on the southwest corner of the Site and a guard shack north and adjacent to the southernmost parking lot. The forklift area was removed and is currently paved. The guard shack continues to be operated by Site security.

2.2.2 Hazardous Materials and Hazardous Waste Storage Areas

Hazardous waste accumulated and collected from throughout the facility was transferred to drum storage in a bermed and canopied area north and adjacent to Building 4A. The area was constructed in 1991, has a covered area of approximately 30 feet by 25 feet, and is slightly sloped towards the center. A cleanout sump was located beneath the hazardous waste storage area.

Raw materials were stored in bulk in Buildings 7, 9, 10, 12, and 13 and smaller quantities were stored throughout the facility.

2.2.3 Subsurface Structures

Site subsurface structures include storm water control structures, sumps, and clarifiers as discussed below. All of the structures have either been removed or abandoned in place.

Storm Water Control Structures

Storm water runoff was diverted to three concrete catch basins and ultimately to three spill containment tanks that were exempted from the UST regulations. The concrete catch basins and spill containment tanks were located outside the northeast corner of Building 6A, in the corporate parking lot northwest of Building 11, and in the parking lot southwest of Building 1 (Figure 2). Storm water was automatically discharged into the municipal sewer after containing the initial 0.1 inch of rainfall. The purpose of these tanks was to contain any surface spills and to contain contaminated storm water runoff before discharging to the storm drain. The contained water was not discharged to the storm water sewer, but was transported off-site for disposal. The concrete catch basins, spill containment tanks, and the remaining subsurface structures listed above were removed between 21 November 2018 and 29 January 2009 under the oversight of the Glendale City Fire Department (GCFD).

Sumps

Sumps existed at the following locations:

- Outside the northeast corner of Building 9
- Outside the southeast corner and east of Building 12
- Within the hazardous waste storage area in the northeastern portion of the Site,
- Inside the east end of Building 10

The sumps were removed or are no longer operational.

Clarifiers

Four clarifiers were documented at the Site. Two three-stage clarifiers (built in 1970) were located on the Site west of Building 5 and east of Building 6. These clarifiers received wash water, detergent solution, and boiler blow-down. The effluent from these clarifiers was discharged to the sanitary sewer.

One three-stage clarifier (built in 1978) was installed inside Bay 5 of Building 10 to process a saline wastewater stream. Use of the Building 10 clarifier was discontinued in 1985 and it was subsequently filled with concrete.

One three-stage clarifier (built prior to 1949) was installed inside the east end of Building 1 to collect wash water from general housekeeping and cleaning operations. Use of the Building 1 clarifier was discontinued in 1977 and was filled with concrete. The clarifier was removed during demolition of Building 1.

2.2.4 Boilers

A boiler existed beneath the canopy east of Building 6. The boiler was fueled by natural gas and was not fueled by liquid fuels such as diesel in the past. Boiler chemicals (scale retardants) were stored within high density polyethylene (HDPE) tanks on the east side of Building 6. The boilers were removed at the time of Site decommissioning.

2.2.5 Cooling Tower

A cooling tower was located in the vicinity of Building 8 (SECOR [formerly SEACOR], 2004 – Appendix A). Cooling tower chemicals were stored within an HDPE tank in a bermed area north of Building 8. The cooling tower was removed during facility decommissioning.

2.2.6 Above-Ground Storage Tanks (ASTs)

Documented ASTs are identified below:

- Two 15,000-gallon silos containing polyethylene beads were located outside the northeast corner of Building 6.
- Two 10,000-gallon silos that contained polyethylene beads were located at the northeast corner of Building 6.
- One 3,000-gallon AST containing liquid nitrogen was located on the southwest corner of Building 4.
- Two 6,000-gallon and two 5,000-gallon ASTs (T-1 through T-4) that contained Polyol (a non-hazardous reactant) were located west of Building 8.
- Four 8,400-gallon ASTs that contained polysulfide polymer (T-9 through T-12) were located south of Building 7.
- Three 10,900-gallon ASTs that contained polysulfide intermediate (T-25 through T-27) were located between Buildings 1, 8 and 11.
- Two 3,400-gallon ASTs (T-38 and T-39) were located outside the northeast corner of Building 7 that contained spent and recycled 1, 1, 1-TCA and later dibasic ester (DBE).
- One 1,000-gallon AST that contained 1,1,1-TCA was located between Buildings 6 and 10.

All ASTs have been removed from the Site.

2.2.7 Underground Storage Tanks (USTs)

A total of 27 USTs (not including the storm water containment tanks) were documented on the Site and were either removed or abandoned. The locations are indicated on Figure 2. These are identified as follows:

- Three 8,100-gallon and three 12,000-gallon USTs that formerly contained non-hazardous Polyol are located west of Building 10 (T-22 through T-24 and T-28 through T-30).
- Two unused 16,000-gallon USTs were located east of Building 1 (T-31 and T-32).
- Three 8,050-gallon USTs and one 10,090-gallon UST containing Polyol (T-5 through T-8) existed between Buildings 1, 8 and 11.
- Nine USTs ranging from 5,000- to 10,000-gallons (T-13 to T-21) located in the corridor between Buildings 6, 7 and 10. Capacities and contents included one 5,000-gallon UST (T-

13) containing the solvent PM acetate (PMA), one 5,000-gallon UST (T-14) containing methyl ethyl ketone (MEK) and xylenes, one 5,000-gallon UST (T-15) containing toluene, one 8,100-gallon UST (T-16) containing MEK, one 8,100-gallon UST (T-17) containing 1,1,1-TCA, one 8,100-gallon UST (T-18) containing 1,1,1-TCA and plasticizer, one 10,000-gallon UST (T-19) containing MEK and 1,1,1-TCA, one 8,100-gallon UST (T-20) containing MEK and 1,1,1-TCA, and one 8,100-gallon UST (T-21) containing plasticizer.

- Four 1,000-gallon USTs containing MEK/toluene (no tank numbers) on the east side of Building 1.
- One 7,500-gallon UST containing leaded gasoline (T-36) on the northeast corner of the Site.
- Two 1,500-gallon USTs were located approximately 20 feet south of Milford Street and 60 feet west of the eastern property line. UST contents were not known.
- An 18-inch by 24-foot steel dip tank (T-33 - 1,000 gallon) containing 1,1,1-TCA existed in the northwest corner of Building 4A.

3.0 SITE INVESTIGATIONS AND REMEDIAL ACTIONS

The following subsections summarize Site environmental investigations conducted to assess and characterize the distribution of COCs in the vadose and saturated zones. In addition, remedial actions to mitigate COCs in the vadose and saturated zones are also summarized. Historical remedial activities described below include removal of potential sources, remediation of VOCs in the vicinity of the former UST farm located in the corridor between Buildings 6, 7 and 10 by soil vapor extraction (closed by the RWQCB on 6 January 1997) and the remediation of Cr(VI) in and around the Building 1, 8, and 11.

Analytical data, tables, and figures from reports cited in this section are provided in Appendix A.

3.1 INITIAL INVESTIGATIONS AND REMEDIATION (1988 TO 1995)

3.1.1 Clayton Environmental Consultants (1988)

In conjunction with UST compliance monitoring, Clayton Environmental Consultants, Inc. (Clayton) performed subsurface investigations in the vicinity of USTs located in the corridor between Buildings 6, 7, and 10 (T-13 through T-17, T-19, and T-20) and west of Building 13 (T-36) from March through May 1988. The results of the investigation are summarized in their report dated 20 July 1988 (Clayton, 1988). The subsurface soil investigation included sampling soil borings in conjunction with the construction of 12 UST leak detection monitoring wells (MW-1 through MW-12). All borings were advanced using hollow stem auger to a depth of 40 feet below ground surface (bgs), with the exception of MW-10 which was advanced to 15 feet bgs. Soil samples were collected at the 5-, 10-, 15-, 20-, 30-, and 40-foot depth intervals. Laboratory analysis of select discrete and composite soil samples was performed for gasoline-range hydrocarbons by United States Environmental Protection Agency (EPA) Method 8015 and composite samples from each boring were analyzed for VOCs by EPA Methods 8015 and 8240, respectively. All analytical results were reported below laboratory reporting limits. The borings were converted to vadose zone monitoring wells for the purpose of UST leak detection. Analytical data and figures are attached in Appendix A.

3.1.2 Ralph Stone and Company (1989)

Ralph Stone and Company (Stone) performed a Phase II environmental site assessment (ESA) (Stone, 1989a) installed and sampled 12 vapor points (VP-1 through VP-12) at depths ranging from 2.5 to eight feet bgs. The vapor points were installed in the following locations:

- Southwest corner of the Site in the fork lift repair area (VP-1)
- Northeast corner of Building 1 and south of ASTs T-1 through T-4 (VP-2)
- Inside the visitor parking lot near storm drain (VP-3)

- Outside the northwest corner of Building 10 and south of Building 6 (VP-4)
- Inside the Building 1 parking lot (VP-5)
- Building 6, 7, and 10 UST corridor and former ASTs T-38 and T-39 (VP-6 through VP-10 in the vicinity of Tanks T-13 through T-21)
- Cracked pavement west of Building 13 (VP-11 and VP-12)

Vapors were analyzed for benzene, toluene, ethylbenzene, and xylenes (collectively referred to as BTEX), 1,1,1-TCA, and MEK by EPA Methods 8020, 8015, and 8010, respectively. The highest concentrations were reported in the UST farm area between Buildings 6, 7 and 10. Tables and figures from the Stone report are attached in Appendix A.

Stone subsequently performed a Supplemental Phase II ESA report consisting of nine soil borings (PR-1 through PR-9) to depths ranging from 20 to 66 feet bgs by hollow-stem auger (Stone, 1989b). Soil samples were collected at five-foot intervals and select samples were analyzed for the following analytes:

- VOCs (EPA Method 8240)
- Polychlorinated biphenyls (PCBs - EPA Method 8080)
- Heavy Metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, zinc)
- Waste oil (EPA Method 418.1).

Chemical analytes were reported at non-detect (ND) to very low concentrations in all soil samples. Soil borings PR-1 through PR-9 (as presented on Figures 3 and 4, Appendix A) were located between Buildings 6 and 11 (PR-1), north of Building 6 (PR-2 through PR-4), between Buildings 9 and 11 (PR-5), the southeast corner of the Site (PR-6), east of Building 5 (PR-7), and south of Building 4 (PR-8 and PR-9). Tables and figures from the Stone, 18 October 1989 report are attached in Appendix A.

3.1.3 Combustion Engineering Environmental Inc. (1989)

In 1989, Combustion Engineering Environmental Inc. (CEE) was retained to follow-up on comments by Los Angeles County Department of Public Works (LADPW) concerning Clayton Environmental's (CE) leak detection sampling program (CE, 11 October 1989). CEE advanced six borings (B1 to B6) to depths of approximately 40 feet bgs by hollow-stem auger in the following areas:

- Inside the Building 1 parking lot (B-1 – former Stone VP-5 location)
- Outside the northwest corner of Building 10 (B-2 – former Stone VP-4 location)

- Near the southeast corner of the gasoline UST (T-36) near the northeast corner of the Site (B-3)

- Within the Building 6, 7, and 10 UST corridor (B-4 through B-6)

Soil samples were collected at five, 10, 15, 20, 30 and 40 feet bgs and analyzed for VOCs by EPA Method 8240. VOCs were sporadically detected at trace to low concentrations [generally less than 0.05 milligrams per kilogram (mg/kg)]. Tables and Figures from the CEE 1989 report are attached in Appendix A.

3.1.4 Hekimian & Associates (1990)

In September of 1990, Hekimian & Associates, Inc. (Hekimian) supervised the excavation and removal of six USTs (T-16 through T-21) in the eastern portion of the corridor between Buildings 6, 7 and 10. Chemicals reportedly stored in the USTs at the time of removal included new and recycled MEK, waste and recycled 1,1,1-TCA, waste flammable liquids, and Jayflex DTDP, and HB-40 plasticizers.

Analytical results from soil samples collected below UST T-16 showed elevated levels of TPH (18,000 mg/kg) and 1,1,1-TCA (3.1 mg/kg). 1,1,1-TCA was reported below UST T-20 at 5.1 mg/kg. Lower concentrations of PCE (up to 0.4 mg/kg), 1,1,1-TCA (up to 0.32 mg/kg), methylene chloride (up to 0.077 mg/kg), and TPH (up to 970 mg/kg) were reported in soil samples collected beneath the USTs. The contaminants in subsurface soils below T-16 were attributed to an accidental release that occurred during the excavation and removal of T-16 by the contractor. Tables and figures from the Hekimian report are attached in Appendix A.

3.1.5 ABB Environmental Services (1990)

Following removal of the USTs, ABB Environmental Services, Inc. (ABB) advanced five exploratory soil borings to a maximum depth of roughly 40 feet bgs in and around the area of former UST T-16 to assess the vertical and lateral limits of VOC impact in the vadose zone. Soil sample analytical results showed MEK concentrations as high as 37,000 mg/kg. Low concentrations of toluene, carbon disulfide, 1,1,1-TCA, and acetone were sporadically reported in the soil samples collected and analyzed from the five borings at concentrations less than 0.050 mg/kg. Tables and figures from the ABB report are attached in Appendix A.

3.1.6 Radian (1992)

In a letter dated 21 October 1991, the RWQCB directed additional subsurface investigations to assess potential VOC impacts in subsurface soils. In September 1992, Radian advanced and sampled 31 borings (WB-1 through WB-31) at locations designated and approved by the RWQCB. It is noted that WB-1 through WB-4 were advanced at an off-Site property. WB-5 through WB-31 were advanced on the Site (Radian, 8 January 1993). The following is a summary of the areas investigated.

- North fence of the maintenance area and former storage area (south end of Building 1 parking lot) (WB-5 through WB-7)
    - Samples were collected at one, five, 10 and 15 feet bgs.
    - Total petroleum hydrocarbons (TPH) did not exceed 100 mg/kg except for the sample collected from WB-6 at 5 feet where TPH oil was reported at 1,860 mg/kg.
    - VOC analytes did not exceed 79 micrograms per kilogram (µg/kg).
- Forklift clarifier (WB-8 and WB-9)
    - Samples were collected at two, four, 10 and 15 feet bgs.
    - TPH not detected except for WB-9 at two feet where TPH was reported 160 mg/kg.
    - VOC analytes did not exceed 40 µg/kg, with the exception of methanol at 170 µg/kg.
    - Heavy metals were consistent with background concentrations.
- Maintenance sink northwest of Building 5 (WB-10)
    - Samples were collected at one, five, 10 and 15 feet bgs.
    - TPH was not reported above laboratory reporting limits.
    - VOC analytes were not reported above laboratory reporting limits.
- Former Mixing Pot (northwest corner of Building 4A) where 1,1,1-TCA was used as a cleaning solvent (WB-11 and WB-12)
    - Samples were collected at two, seven, and 12 feet bgs.
    - TPH oil was not reported above 70 mg/kg.
    - Heavy metals were reported at concentrations consistent with background.
    - VOC analytes were not reported above 20 µg/kg, except for methanol at a maximum concentration of 150 µg/kg.
- Former ASTs T-1 to T-4 and T-25 to T-26 between Buildings 8 and 11 (WB-13 through WB-15)
    - Samples were collected at one, five, 10 and 15 feet bgs.
    - TPH oil did not exceed 100 mg/kg except for the samples collected from WB-15 at 1 and 5 feet bgs at 890 and 420 mg/kg, respectively.

  - VOC analytes did not exceed 24 µg/kg.

- Former AST FS-50 south of Building 6 (WB-16 and WB-17)
  - Samples were collected at one, five, 10 and 15 feet bgs.
  - TPH oil did not exceed 37 mg/kg except for samples collected from WB-17 at 2 feet bgs at 140 mg/kg.
  - VOC analytes did not exceed 75 µg/kg.
- Building 10 Bay 5 clarifier (WB-18 and WB-19)
  - Samples were collected at two, five, and 15 feet bgs.
  - TPH oil was reported at a maximum concentration of 810 mg/kg in WB-18 at two feet bgs.
  - Heavy metals were reported at concentrations consistent with background.
  - VOC analytes did not exceed 25 µg/kg, except for methanol at a maximum concentration of 130 µg/kg.
- Building 1 Clarifier (WB-20 and WB-21)
  - Samples were collected at one, five, 10 and 15 feet bgs.
  - TPH oil was not reported above the laboratory reporting limit.
  - Heavy metals were reported at concentrations consistent with background.
  - VOC analytes did not exceed 30 µg/kg, except for methanol at a maximum concentration of 280 µg/kg.
  - Semi-VOCs were not reported above the laboratory reporting limits.
- Building 1 TCA sink (WB-22)
  - Samples were collected at five, 10 and 15 feet bgs.
  - TPH oil did not exceed the laboratory reporting limits.
  - VOC analytes did not exceed 9 µg/kg.
- Code 7 TCA sink southwest corner of Building 6 (WB-23)
  - Samples were collected at one, five, 10 and 15 feet bgs.

  - TPH oil did not exceed 130 µg/kg.
  - VOC analytes did not exceed 21 µg/kg.

- Boiler Clarifier east of Building 6 (WB-24 and WB-25)
  - Samples were collected at two, four, 10 and 15 feet bgs.
  - TPH oil was not reported above 50 mg/kg.
  - Heavy metals were reported at concentrations consistent with background.
  - VOC analytes did not exceed 50 µg/kg, except for methanol at a maximum concentration of 450 µg/kg.
  - Semi-VOCs were not reported above the laboratory reporting limits.
- Former ASTs T-38 and T-39 northeast of Building 7 (WB-26 and WB-27)
  - Samples were collected at one, five, 10 and 15 feet bgs.
  - TPH oil was reported at a maximum concentration of 960 mg/kg at a depth of one foot bgs.
  - VOC analytes generally did not exceed 100 ug/kg with the exception of 1,1,1-TCA and tetrachloroethene (PCE) which were reported at maximum concentrations of 400 and 180 µg/kg, respectively, in WB-26 at 5 feet bgs (these analytes were not reported above the laboratory reporting limit in the 10 and 15-foot bgs samples).
- Hazardous waste storage area (WB-28 through WB-30)
  - Samples were collected at one, five, 10 and 15 feet bgs.
  - TPH oil was not reported above the laboratory reporting limit.
  - VOC analytes did not exceed 8 µg/kg.
- Building 4a TCA Sink (WB-31)
  - Samples were collected at one, five and 10 feet bgs.
  - TPH oil was not reported above the laboratory reporting limit.
  - VOC analytes were not reported above the laboratory reporting limits.

In addition, samples of sludge in the bottom of three clarifiers and three surface-water collection basins were collected for chemical analysis.

Soil sample analytical results from the 27 borings advanced on the Site showed low concentrations of VOCs, with the highest levels of chlorinated VOCs in the area of the UST Farm and T-38/T-39 area between Buildings 6, 7 and 10 (Figure 2). The highest VOC concentrations were reported in the upper 10 feet. TPH oil was generally reported at low levels (<1,000 mg/kg) with the exception of one sample collected at five feet bgs in WB-6 (1,860 mg/kg). Heavy metals were reported at concentrations consistent with background levels for the Los Angeles Basin and SVOCs were not reported above laboratory reporting limits. Radian subsequently recommended no further investigation in the areas explored. Tables and figures from the Radian report are attached in Appendix A.

3.1.7 SECOR (Formerly SEACOR -1992 to 1995)

In September 1992, SECOR supervised the installation and sampling of 28 multi-depth soil-gas probes (SG-1 through SG-28) in the corridor between Buildings 6, 7 and 10, and the drilling and installation of four groundwater monitoring wells (MW-1 through MW-4) to the north and south of the corridor between Buildings 6, 7 and 10.

The results of the multi-depth soil-gas survey are summarized below:

- Volatile TPH from 86 parts per million by volume (ppmv) to 7,114 ppmv
- 1,1-dichloroethene (DCE) from 75 micrograms per liter (µg/L) to 898 µg/L
- 1,1-dichloroethane (DCA) from 6 µg/L vapor to 277 µg/L
- 1,1,1-TCA from 120 µg/L to 514 µg/L
- Trichloroethene (TCE) from 1.9 µg/L vapor to 91 µg/L
- PCE from 1 µg/L vapor to 38 µg/L

It is noted that soil-gas probes extended to a maximum depth of 21 feet bgs where refusal was encountered in dense, coarse-grained native sediments.

Analytical results from soil samples collected during drilling of monitoring wells MW-1, MW-3, and MW-4 showed ND to low concentrations of acetone, benzene, and toluene. Chlorinated VOCs were not reported above the laboratory reporting limits in the soil samples. Analytical results from soil samples collected during drilling of MW-2 showed ND concentrations of all VOC analytes by EPA Method 8260. Analytical results of groundwater samples collected from MW-1 through MW-4 showed detectable concentrations of 1,1-DCE, 1,1-DCA, chloroform, PCE, TCE, 1,1,1-TCA, and xylenes (SEACOR, 1993a).

In June of 1993, characterization of VOCs in groundwater continued with the installation of two upgradient groundwater monitoring wells (MW-5 and MW-6). Analytical results from groundwater samples collected from the two monitoring wells showed low to ND VOC concentrations (SEACOR,

1993b). The upgradient wells appeared to be in a groundwater mound area which may influences the water quality in the wells.

During the latter part of September and the first part of October 1993, SECOR supervised the excavation and removal of the three remaining USTs and associated piping (USTs T-13, T-14, and T-15) in the corridor between Buildings 6, 7 and 10. Chemicals stored in the USTs at the time of removal were PM acetate (a common solvent, propylene glycol monomethyl acetate ester), MEK, and toluene. All VOC analytes, including 1,2,3-trichloropropane (TCP), were not reported above laboratory reporting limits except for very low detections of toluene in confirmation soil samples collected below the USTs. Toluene was detected in two samples at 0.001 mg/kg. Soil samples were also collected from below a former drain pipe leading from a manufacturing room located in the northeast corner of Building 10 (samples OSP-9 and OSP-10) and analyzed for VOCs. The results of these analyses showed low concentrations of TCE and 1,1,1-TCA at 0.062 mg/kg and 0.048 mg/kg, respectively. Affected soils below the drain pipe were subsequently excavated and removed from the PRC facility (SEACOR, 1993c).

During late 1994 and early 1995, SECOR staff supervised the drilling and installation of two additional groundwater monitoring wells (upgradient well MW-7 and down/cross gradient well MW-8) located offsite to the northwest and southwest of the PRC property as part of the ongoing regional RWQCB Well Investigation Program (WIP) (SECOR, 1995).

Boring logs for the project groundwater monitoring wells are provided in Appendix B.

3.2 SOIL VAPOR EXTRACTION AND CONFIRMATION SAMPLING

On 27 April 1993, a meeting was held with RWQCB staff in which it was determined that soil vapor extraction (SVE) should be undertaken to mitigate VOCs in the corridor between Buildings 6, 7 and 10. In compliance with this request, SECOR prepared and submitted a pilot-test work plan to the RWQCB for vapor extraction of VOCs (SECOR, 1993d). The RWQCB approved the work plan on 9 July 1993.

With RWQCB's approval, SECOR installed four single casing SVE wells (VE-1 through VE-4) and five multi-depth SVE monitoring wells (VM-1 through VM-5) to support a 90-day SVE pilot test in the corridor between Buildings 6, 7 and 10. The SVE pilot test was performed from 16 September through 16 December 1993. Results of the pilot test are described in SECOR's 18 February 1994 report (SECOR, 1994a).

Following the 90-day pilot test and with approval of the RWQCB, remedial SVE in the corridor between Buildings 6, 7 and 10 was restarted on 15 January 1994.

Two SVE verification borings were advanced in the former UST area (USTs T-16 through T-21) in the corridor between Buildings 6, 7 and 10 in February 1994. Soil samples were collected at five-foot intervals to approximately 48 feet bgs. Collected samples were analyzed for VOCs by EPA Method 8260. With the exception of dichloromethane reported at 0.002 mg/kg in two samples

and total xylenes at 0.024 mg/kg in one sample, VOCs including 1,2,3-TCP, PCE, TCE and benzene, were not reported above laboratory reporting limits.

Based on the results of the soil confirmation samples and the low inlet vapor concentrations to the SVE system, the system was shut down on 10 March 1994.

In response to a closure request, the RWQCB requested confirmation soil vapor sampling. In September 1996, SECOR installed and sampled five temporary, multi-depth soil-vapor probes (SG-1 to SG-5) at depths ranging from five to 30 feet bgs in the area of the former USTs in the corridor between Buildings 6, 7 and 10 (USTs T-13, T-14, and T-15). The following is a summary of the findings:

- PCE vapor concentrations ranged from 4 to 12 µg/L.
- TCE vapor concentrations ranged from 7 to 24 µg/L.
- 1,1-DCE vapor concentrations ranged from 7 to 17 µg/L.
- 1,1-DCA vapor concentrations <1 to 3 µg/L.
- 1,1,1-TCA vapor concentrations ranged from 92 to 250 µg/L.

Based on the results of verification borings and the additional soil gas surveys, the RWQCB granted closure of VOC vadose zone remedial actions conducted in the corridor area between Buildings 6, 7 and 10 on 6 January 1997. Upon receipt of the closure letter and with verbal concurrence of the RWQCB, groundwater monitoring for VOCs was terminated at that time.

3.3 CHROMIUM INVESTIGATIONS AND REMEDIATION (1992 TO 2003)

This subsection describes investigations and remediation of chromium (Cr) and Cr(VI) at the Site. The data collected to date indicate that Cr and Cr(VI) impacts to groundwater are largely contained on site and do not appear to have migrated any significant distance off Site at concentrations above the California Cr and Cr(VI) maximum contaminant levels (MCLs) of 50 and 10 µg/L, respectively.

During September 1992, evidence of Cr(VI) was observed in the water sample collected from MW-4 located south of Building 1. Subsequent analysis identified Cr(VI) in the sample at a concentration of 21,000 µg/L (SECOR, 1993a). Subsurface assessments subsequently focused on the area of a former chromium-reactor (C-reactor) and the ball mill shed where chromium-containing materials were historically handled. As shown on Figure 2, the C-reactor was located on the north end of Building 8 and the former Ball Mill shed, currently used for materials packaging and storage, is located near the western edge of Building 12.

In February 1993, seven hand auger borings (HB-1 to HB-7) were drilled and sampled to depths up to 15 feet bgs to investigate Cr(VI). Cr(VI) was not reported above the laboratory reporting limit (1.5 mg/kg) in samples collected at 1, 5, 10 and 15 feet in borings drilled in the area of the Ball Mill Shed and the east side of Building 1. However, Cr(VI) was reported in samples collected from the

area of the C-reactor to depths of approximately 15 feet bgs at concentrations up to 47 mg/kg (HB-7 at one foot bgs). Total Cr concentrations were reported at concentrations ranging from 2.0 to 114 mg/kg.

To evaluate the efficacy of in-situ reduction of Cr(VI) to Cr[III] in soils and groundwater a feasibility pilot study was conducted between April and June of 1996 under the direction of the RWQCB. As part of this study, four soil borings (AB-1 to AB-3, IW-1) were drilled to assess the lateral limits of Cr(VI) impact in the area of the C-reactor to depths of 50 to 55 feet bgs. The results of these investigations showed that elevated Cr(VI) appeared to be confined to the upper 15 feet below the C-reactor (see Figures– Appendix A). In addition, a nested injection well (IW-1) was installed in the C-reactor area and screened from five to 20 feet bgs and 25 to 45 feet bgs. Six shallow zone groundwater wells, MW-4a, MW-12a, MW-13, MW-14 and MW-15 were installed with screen intervals at 37 to 67 feet bgs and one deeper well (MW-12b) was installed with a screen interval from 73 to 88 feet bgs. In June 1996, a temporary shallow injection well (IW-2), screened from one to 2.5 feet bgs, was installed to assist in the ferrous sulfate ($FeSO_4$) injection feasibility study. IW-2 was removed at the completion of the feasibility study.

During the test, 1,020 gallons of $FeSO_4$ (600 milligram per Liter [mg/L]) were injected into the shallow screen in IW-1 (IW-1U) and 80 gallons were injected into IW-2. Following injections, one confirmation boring (CB-1 as shown on Figure 4, Appendix A) was drilled in the area of the C-reactor, sampled, and analyzed for Cr(VI). A tenfold reduction in Cr(VI) concentrations was achieved in vadose zone soils within five feet of IW-1U and IW-2. Based on laboratory testing the highest reported detection was 2.6 mg/kg at 16 feet bgs. Tables and figures from the July 1996 are attached in Appendix A.

As part of the groundwater pilot study, 600 gallons of $FeSO_4$ solution (1,200 mg/L) were injected into groundwater monitoring well MW-4 located downgradient from Building 1. Subsequent sampling and testing showed Cr(VI) concentrations in groundwater were reduced to ND levels following injection of the treatment solution (SECOR, 1996d).

The results of the pilot tests showed that in-situ treatment of Cr(VI) in subsurface soils (boring CB-1) and groundwater using $FeSO_4$ was feasible and that Cr(VI) could be effectively reduced in soil and groundwater to the less soluble Cr(III) to levels protective of groundwater and human health. In addition, total soluble Cr was also reduced in groundwater as a result of precipitating the soluble Cr(VI) as Cr(III) in the formation material to levels below the 0.05 mg/L MCL for total Cr.

A remedial action plan (RAP) to implement full-scale in-situ treatment of the soil and groundwater was submitted to the RWQCB on 14 August 1996 (SECOR, 1996). The RAP was subsequently approved by the RWQCB on 27 September 1996.

In October and November 1996 and January through April 1997, nine exploratory soil borings (CB-2 through CB-10 as shown on Figure 4, Appendix A) and 19 injection/monitoring wells (MW-16 through MW-34) were installed in the area around Building 1 and the C-reactor (Figure 3). The soil borings and monitoring wells were installed to verify the limits of Cr(VI) impact to soil adjacent to the former C-reactor area and Cr(VI) impact to groundwater upgradient and downgradient of

monitoring well MW-4. During the groundwater plume assessment, SECOR observed inconsistencies in the data that suggested the presence of a second source of soil and groundwater Cr(VI) impact other than the former C-reactor area. Based on the data, it was theorized that although the former C-reactor was a source of Cr(VI) impact to soil, the primary area of soil and groundwater impact was the area directly north of Building 1. The source of Cr(VI) may have been the result of surface spills and runoff from the C-reactor area onto this area, or from other undiscovered source below Building 1 and 11. Based on records provided by PRC-DeSoto, the area directly north of Building 1 was previously unpaved and a topographic low where surface water was known to pond.

Beginning in January 1997, SECOR initiated remediation operations at the facility following the guidelines outlined in the approved RAP and with authorization from RWQCB.

Injection/monitoring wells MW-35 through 38 were drilled and installed in July and August 1997 to verify the extent of the Cr(VI) plume and for potential use as injection wells. The wells were constructed of four-inch diameter polyvinyl chloride (PVC) and screened from approximately 37 to 67 feet bgs.

In addition to vadose zone injection wells, IW-1U and IW-2, 84 additional two-inch diameter vadose zone $FeSO_4$ injection wells were installed to mitigate Cr(VI) in the area north of Building 1 between Buildings 8 and 11.

Soil samples were collected from the injection wells and analyzed for Cr(VI) and total Cr to evaluate the lateral and vertical limits of impact in the vadose zone. The results of these investigations are reported in SECOR's report dated 30 May 1997 (SECOR, 1997) and are summarized on Figure 5 of the RAP (SECOR 2008) in Appendix A.

Based on the data collected from the remedial investigations, the areal extent of Cr(VI) impact north of Building 1 and between Buildings 8 and 11 was estimated to be 30 to 40 feet wide (north to south) and 80 to 90 feet long (east to west). The maximum vertical depth of impact in this area was found to extend to first encountered groundwater (approximately 45 feet bgs).

Vadose Zone Soils Remediation

SECOR initiated treatment of impacted soils north of Building 1 using 74 vadose zone injection wells. Approximately 7,500 gallons of the $FeSO_4$ treatment solution (600 mg/L $FeSO_4$) were injected into each well. In addition to in-situ treatment in the area north of Building 1, 7,500 gallons of $FeSO_4$were injected into the 13 vadose zone injection wells (IW-1 and IW-64 to IW-75) installed in the C-reactor area in April 1997.

In May 1997, SECOR submitted a work plan to the RWQCB to address closure criteria for subsurface soils and groundwater impacted by Cr(VI) at the PRC-DeSoto facility. The work plan was subsequently approved by the RWQCB on 19 June 1997. At that time, RWQCB closure criteria required reduction of Cr(VI) concentrations in the vadose zone in the vicinity of Buildings 1, 8, and 11 to less than 30 mg/kg based on leachability and reduction of Cr(VI) concentrations in

groundwater to 50 µg/L. However, the RWQCB modified the vadose zone cleanup goal for Cr(VI) to 2.0 mg/kg (EPA Region 9 Soil Screening Level [SSL] for a dilution attenuation factor [DAF] of 1) in a letter dated 6 November 2003. This goal is very conservative and assumes no dilution or attenuation.

Twelve 15-foot deep angle (hand auger) borings were advanced beneath the foundations of Buildings 1 and 11 (IW-76 through IW-87). These borings/wells were installed to assess the lateral extent of Cr(VI) impact beneath Building 1 and Building 11 and for use as vadose zone injection wells. Approximately 7,500 gallons of $FeSO_4$ solution were subsequently injected into each well (600 mg/L $FeSO_4$).

Treatment of soils in the area of the former C-reactor and north of Building 1 were completed in May and June 1997. Five remediation confirmation borings (CB-11 through CB-15 as shown on Figure 4 of the RAP [Appendix A]) were sampled to assess the efficacy of the treatment program.

The soil chemical data indicated a reduction in Cr(VI) soil concentrations ranging from approximately 60 to greater than 90 percent. Peak Cr(VI) soil concentrations prior to treatment north of Building 8 were 47 mg/kg in HB-7 at approximately 2.5 feet bgs. Following treatment, soils at approximately the same depth horizon exhibited a Cr(VI) concentration of 0.61 mg/kg. North of Building 1, treated soils exhibited Cr(VI) concentrations ranging from ND to 4.6 mg/kg (Figure 6 of the RAP [Appendix A]). The maximum reported Cr(VI) soil concentration prior to treatment north of Building 1 was reported at 13 mg/kg. Total Cr concentrations in the soil samples collected from the remediation verification borings (CB-11 through CB-15) ranged from 7.7 mg/kg to a peak of 240 mg/kg in CB-14 at a depth of approximately five feet bgs.

To evaluate residual Cr(VI) concentrations in soil below the northern and western portion of Building 1 and the southeastern portion of Building 11, SECOR advanced two hand auger borings (AB-1 and AB-2 to 15 feet bgs) and eight direct-push borings (AB-3 to AB-10 ranging from 15 to 40 feet bgs) inside the buildings in June 1999 (these borings should not be confused with the slant borings [AB-1 to AB-3] advanced under the C-reactor in 1996 as described above). The borings were sampled at two and five feet bgs and at five-foot intervals thereafter to the bottom of the borings. Cr(VI) concentrations ranged from ND to 1.9 mg/kg (AB-3 at 30 feet bgs). Total Cr typically ranged from 6.2 mg/kg to 56 mg/kg, with the exception of detections of 100, 2100, and 90 mg/kg in AB-6 at depths of five, 10, and 15 feet bgs, respectively. The results of the 1999 AB borings are summarized on Figure 6 of the RAP in Appendix A.

Saturated Zone Remediation

Comprehensive in-situ treatment of Cr(VI)-impacted groundwater was performed from January 1997 to March 1998 by injecting $FeSO_4$ into the groundwater via project groundwater wells.

To reduce the potential for plume spreading, a downgradient Cr(VI) migration barrier was first developed by injecting $FeSO_4$ into barrier wells followed by injection into the more heavily impacted areas of the plume upgradient of the barrier wells. Following the initial treatment period,

groundwater was monitored on a quarterly basis for Cr(VI) using colorimetric methods and spot treated with $FeSO_4$ injections on an as-needed basis through November 2003.

Beginning in January 1997, SECOR initiated treatment of groundwater affected by Cr(VI) underlying the facility. Initially, a reducing barrier was established to impede the downgradient (southerly) migration of Cr(VI) in groundwater off of the PRC DeSoto property. The barrier was established by injecting $FeSO_4$ treatment solution (1,200 mg/L) into a line of wells (MW-13, MW-14, MW-15, and MW-18) located directly north of Building 5. Wells MW-34 and MW-16 were integrated into the barrier on 17 and 25 February 1997, respectively. Wells MW-35 through MW-37 were incorporated into the barrier on 1 August 1997. Later, wells MW-27 and MW-38 were brought online on 8 August 1997 and 15 September 1997, respectively. On an interim basis, from approximately 26 February through 31 March 1997, wells MW-4, MW-4a, MW-25, and MW-26 were integrated into the barrier.

On a daily basis $FeSO_4$ treatment solution was injected into the subsurface using various combinations of the above-referenced wells. The downgradient barrier was maintained throughout the duration of the injection program.

Periodic groundwater monitoring was conducted to evaluate the efficacy of the treatment program. Groundwater monitoring showed a consistent pattern of rebounding Cr(VI) concentrations immediately downgradient of Building 1. As a result, spot injections were continued to control rebounding mass that appeared to be emanating from below Building 1. The periodic injection program continued through 2003 and was terminated at the request of the RWQCB.

A total of approximately 3.6 million gallons of $FeSO_4$ solution were injected into the vadose zone and groundwater from April 1996 to November 2003.

3.4 EMERGING CHEMICAL INVESTIGATION, BASELINE GROUNDWATER MONITORING EVENT (2004)

Pursuant to CAO R4-2002-0085 issued on 22 August 2002, an emerging chemical soil investigation and a comprehensive baseline groundwater-monitoring event were conducted in January 2004. The scope of work included installation of three off-Site groundwater monitoring wells and onsite assessment of emerging chemicals in the vadose and saturated zones.

Ten soil borings (SB-1 through SB-10 as shown on Figure 3, Appendix A) were advanced at locations selected by the RWQCB to depths ranging from 46 to 51 feet bgs using a direct push rig. These locations are described below.

- Boiler clarifier located east of the southeast corner of Building 6 (SB-1 and SB-2)
- Former 1,1,1-TCA UST storage area between Buildings 6, 7, and 10 (SB-3)

- Former TCE and 1,1,1-TCA AST storage area located near the containment area on the northeast corner of Building 7 (SB-4)
- Former pot/drum cleaning area (T-33) located near the northwest corner of Building 4A (SB-5)
- Building 10 Bay 5 three-stage clarifier (SB-6 and SB-7)
- West storm water catch basin located in the parking lot south of Building 1 (SB-8)
- Former three-stage Forklift Cleaning Clarifier located west of Building 5 (SB-9 and 10)

Soil samples collected at 5-foot intervals were analyzed for the following parameters:

- TPH (C6-C12) EPA Method 8260B
- TPH (C13-C40) EPA Method 8015M (GC/FID)
- VOCs EPA Method 8260B
- 1,2,3-TCP EPA Method 8260B
- Title 22 Metals EPA Method 6010B
- Total Cr EPA Method 6020
- Cr(VI) EPA 71Method 99
- 1,4-Dioxane GC/MS Isotope Dilution

In addition, select soil samples were also analyzed for the following:

- Bromodiphenyl Ether (BDPE) GC/MS Isotope Dilution
- n-Nitrosodimethylamine (NDMA) EPA Method 8270C Selective Ion Mode (SIM)
- Perchlorate EPA Method 314.0M

The results are summarized in the *Soil Investigation, Baseline Groundwater Monitoring Event and Supplemental Remedial Action Plan* dated 8 March 2004 (SECOR, 2004). Analytical results for soil samples are summarized as follows:

- TPH was not detected above the laboratory reporting limits with exception of 13 mg/kg C22-C40 in SB-3 at 10 feet bgs in the former 1,1,1-TCA UST storage area between Buildings 6, 7, and 10.

- Title 22 Metals (excluding Cr) were reported at levels consistent with background in the Los Angeles Basin.
- 1,4-Dioxane was not reported above the laboratory reporting limit in any of the analyzed samples.
- As in past soil sample analyses, 1,2,3-TCP was not detected above the laboratory reporting limits in any of the analyzed soil samples.
- Low concentrations (i.e. not exceeding 0.003 mg/kg) of VOCs including toluene, PCE, 1,1,1-TCA, and TCE, were detected in many of the investigated areas.
- MEK was detected at a maximum concentration of 0.052 mg/kg in the sample collected at 10 feet bgs in the former 1,1,1-TCA UST storage area between Buildings 6, 7, and 10.
- Perchlorate was not reported above the laboratory reporting limit with the exception of one sample collected from SB-3 at 10 feet bgs in the former 1,1,1-TCA UST storage area between Buildings 6, 7, and 10 (0.123 mg/kg).
- NDMA and BDPE were not reported above the laboratory reporting limits in any of the analyzed samples.
- Cr(VI) concentrations did not exceed 2.0 mg/kg.
- Total Cr concentrations ranged from 2.3 mg/kg to a maximum concentration of 59.4 mg/kg (Building 10 clarifier).
- Nickel was not reported above 11 mg/kg in any of the analyzed soil samples.

Thirty-four project groundwater monitoring wells (MW-1 through MW-8, MW-12A, MW-12B, MW-13 through MW-23, MW-25 through MW-28, and MW-30 through MW-38) were sampled and analyzed for the following analytes as part of the Baseline Groundwater Monitoring event:

- TPH (C6-C12) EPA Method 8260B
- TPH (C13-C40) EPA Method 8015 modified
- VOCs and 1,2,3-TCP EPA Method 8260B
- Title 22 Metals EPA Method 6010B/7000 series
- Total Cr EPA Method 200.8
- Cr(VI) EPA Method 218.6
- 1,4-Dioxane GC/MS isotope dilution

- Perchlorate EPA Method 314.0
- NDMA 1625CM
- BDPE GC/MS isotope dilution
- General Minerals (specific conductance, total hardness, pH, anions, alkalinity, surfactants, and total dissolved solids [TDS]) by EPA Methods 120.1, 130.2, 150.1, 300.0, SM2320B, 425.1, and 160.1.

Tables and figures from the emerging chemicals investigation are attached in Appendix A.

The baseline groundwater monitoring results are summarized below:

- TPH was not reported above laboratory reporting limits in any of the analyzed groundwater samples.
- VOCs were reported at concentrations consistent with characteristics of the regional plume. The VOC analyte most commonly reported at concentrations above primary drinking water MCLs was TCE. The highest concentrations of TCE were reported in upgradient well MW-7 (95 µg/L) and in wells along the western property boundary.
- Dissolved Title 22 metals were generally reported below primary drinking water standards with the exception of the following:
    - Chromium was reported at concentrations above the 50 µg/L MCL in upgradient well MW-7 (240 µg/L) and in onsite wells MW-2 (51.5 µg/L), MW-3 (56.4 µg/L), MW-4 (59 µg/L), MW-12a and 12b (97 µg/L), MW-26 (430 µg/L) and MW-35 (110 µg/L).
    - Nickel was reported at concentrations above the 100 µg/L MCL in project upgradient wells MW-1 (370 µg/L), MW-7 (880 µg/L), onsite wells MW-2 (190 µg/L), MW-20 (110 µg/L), and MW-35 (140 µg/L), and downgradient well MW-3 (1,000 µg/L). The highest concentrations were reported in upgradient well MW-7 and downgradient well MW-3 at statistically equivalent concentrations.
- Total Cr (EPA Method 200.8) was reported above the California primary drinking water MCL of 50 µg/L in samples collected from upgradient wells MW-5 (52 µg/L) and MW-7 (631 µg/L), onsite wells MW-2 (51.5 µg/L), MW-19 (110 µg/L), MW-25 (77.4 µg/L), MW-26 (279 µg/L), and downgradient wells MW-3 (56.4 µg/L), MW-8 (64.8 µg/L), and MW-31 (57.2 µg/L).
- Cr(VI) was reported above 50 µg/L in wells MW-19 (110 µg/L) and MW-26 (380 µg/L).
- 1,4-Dioxane was reported at concentrations ranging from less than the laboratory reporting limit to 8.7 µg/L (MW-20).

- 1,2,3-TCP and BDPE were not reported above the laboratory reporting limits (0.5 and 0.1 µg/L, respectively) in any of the analyzed groundwater samples. It is noted that an additional round of sampling for 1,2,3-TCP was performed in June 2004 at a reduced detection limit of 0.0050 µg/L. 1,2,3-TCP was not reported in any of the wells above the laboratory reporting limit, with the exception of a very low detection in offsite, cross/downgradient well MW-8 (0.0052 µg/L).

- NDMA was not reported above the laboratory reporting limit of 0.002 µg/L; with the exception of MW-33 (0.038 µg/L - Note: This value is misreported as 38 µg/L in historical tables), which is slightly above the California notification level (NL) of 0.01 µg/L. PRC subsequently sampled MW-33 for three additional sampling events in June 2004 (<0.002 µg/L), September 2005 (0.067 µg/L [Note: This value was misreported as 67 µg/L in historical tables]), and December 2005 (<0.002 µg/L).

- Perchlorate was not generally reported above laboratory reporting limits, with the exception of upgradient well MW-6 (3.0 µg/L) and onsite well MW-15 (2.3 µg/L). These concentrations are below the California Department of Health Services (DHS) action level of 4 µg/L.

General water chemistry parameters were also monitored. Tables and figures from the emerging chemicals and baseline sampling event are attached in Appendix A.

3.5 SITE-WIDE COMPREHENSIVE SOIL GAS SURVEY

A Site-wide comprehensive multi-depth soil-gas survey was completed under the oversight of the RWQCB in November 2007. Soil vapor samples were collected at potential source areas identified in previous studies and at random locations across the Site. A total of 191 soil vapor samples were collected from 108 sample locations at depths ranging from five to 20 feet bgs. The samples were analyzed by EPA Method TO-15 using mobile and stationary laboratories. Purge testing and leak testing were performed in accordance with RWQCB protocols. Throughout the sampling and analysis process, RWQCB and PRC team members reviewed real-time data to assess the potential need for additional lateral and vertical characterization.

The results of the soil-vapor study were compiled in the *Soil Vapor Survey Report* dated 2 January 2008. Low levels of VOCs were reported throughout the Site at concentrations consistent with those reported at the time VOC concerns were closed in 1997. Of the VOC analytes reported in soil vapors, only benzene, TCE and PCE were reported above the residential and/or commercial California Human Health Screening Levels (CHHSLs) for shallow soil vapors at maximum concentrations of 80, 29 and 0.3 µg/L, respectively. The highest concentrations of PCE and TCE were reported at the following locations:

- West side of former UST Farm between Building 6, 7 and 10: PCE and TCE were reported at maximum concentrations of 11 and 36 µg/L, respectively.

- West half of Building 6: PCE and TCE were reported at maximum concentrations 80 and 29 µg/L, respectively.

Benzene was reported above the residential CHHSL in only a few scattered sample points.

Tables and Figures from the Soil Vapor Survey Report (Stantec, 2008a) are attached in Appendix A.

These findings are consistent with the findings of previous confirmation soil vapor sampling performed at the time that VOC remedial actions were closed by the RWQCB in 1997.

3.6 REMEDIAL ACTION PLAN (2008)

Pursuant to the CAO, a RAP (SECOR 2008) was developed to address remaining environmental issues in conjunction with Site decommissioning. The RAP summarized all previous investigations and remedial actions, presented a CSM, and outlined a path to Site closure.

The RAP identified areas for additional investigation, outlined an investigation plan to address the identified areas, set forth preliminary remediation goals (PRGs), and outlined a remediation plan to achieve Site closure as part of Site decommissioning. The goal was to mitigate environmental concerns through engineering and administrative controls while optimizing the commercial/industrial development potential for the Site.

The RAP identified the following COCs:

- **Cr(VI):** The RAP initially recommended the EPA screening level of 2.0 mg/kg for migration to groundwater using a DAF of 1. This is a very conservative preliminary goal as it assumes little to no attenuation of concentrations.

- **Cr:** The PRG for abatement of residual total Cr in soil was based on the EPA screening level of 450 mg/kg for industrial soil assuming a ratio of Cr(VI) to Cr(III) of 6:1. Where Cr(VI) is ND the EPA Industrial PRG of 100,000 mg/kg of Cr(III) was used as the Cr cleanup goal. The PRG for abatement of total Cr in groundwater was based on the drinking water MCL of 50 µg/L.

1,4-Dioxane: 1,4-Dioxane was not detected in analyzed soil samples. However, the RAP set forth the EPA industrial exposure screening level of 160 mg/kg for soil. The preliminary remediation goal for 1,4-Dioxane in groundwater was originally established at the California Department of Health Services Notification Level (DHS NL) of 3 µg/L.

- **VOCs**: PRGs for VOCs in soil and groundwater followed the RWQCB screening levels (SLs) and MCLs. PCE and TCE are the primary VOCs of concern at the Site. The RWQCB screening levels for PCE and TCE ranges from 5 to 100 µg/kg depending on depth to groundwater and soil type. The MCL for PCE and TCE is 5 µg/L.

The following summarizes the remedial approach set forth in the RAP.

- *Monitored Natural Attenuation (MNA)* for VOCs and 1,4-Dioxane in groundwater.
- *In-Situ Reduction* of Cr(VI) by injecting biological or chemical reductants in the deep vadose and saturated zone followed by MNA.
- *Removal and Disposal* where feasible and practical, of shallow soils exhibiting concentrations of chemicals of concern above PRGs to address human health risks.
- *Engineered Development Controls* (e.g., vapor barriers) to reduce the potential for exposure vapors that could migrate into the indoor air space.

The following summarizes the proposed remedial approach for each area of concern and COC:

Area of Concern	Potential COC	Remedial Approach
Building 1, Building 11 and former C-Reactor Area—Soil and Groundwater	Cr, Cr(VI), 1,4-Dioxane	Investigation, removal and/or in-situ reduction of Cr(VI) in soil and groundwater. Groundwater monitoring and natural attenuation of the low concentration 1,4-Dioxane groundwater plume.
Site-Wide VOC Vapors	PCE, TCE, Benzene	Deed notification and engineering controls during redevelopment (e.g., vapor barriers, venting)
VOCs in Groundwater	PCE, TCE	Groundwater monitoring and natural attenuation

A Waste Discharge Permit (WDP) application was subsequently filed and procured through the RWQCB (5 February 2009) for the planned Cr(VI) in-Situ reduction program.

3.7 CHROMIUM INVESTIGATIONS AND REMEDIATION (2008 TO 2010)

3.7.1 Building 1 and 11 Pre- and Post-Demolition Investigations

The results of pre- and post-demolition investigations, observations and findings were reported in RAP and Waste Discharge Requirement (WDR) Addendum No. 1 dated 16 October 2008. In March 2008, 27 soil borings were advanced on a grid pattern to 25 feet bgs in Building 1 and 11 and sampled for Cr, Cr(VI), VOC and 1,4-Dioxane analysis. All concentrations were reported below the PRGs. 1,4-Dioxane was not detected above laboratory reporting limits.

During demolition in August and September 2008, two clarifiers, two sumps, a gravel-filled drum and a support cylinder for a hydraulic lift were discovered under Building 1 and subsequently removed. Yellow-green staining was observed in one of the clarifiers. Surface soil sampling was conducted below both Buildings 1 and 11, soil samples were collected below subsurface structures and soil borings were advanced adjacent to the encountered structures to depths of 50 feet bgs. A total of 136 soil samples were collected below Building 1 and 30 soil samples were collected below Building 11. All samples were analyzed for Cr and Cr(VI).

Maximum concentrations of Cr(VI) were reported at 11 mg/kg under Building 1 and 2.7 mg/kg below Building 11. Total Cr was reported at up to 650 mg/kg under Building 1 and 59 mg/kg below Building 11.

Grab groundwater samples were also collected from borings advanced adjacent to the clarifiers. Cr(VI) was reported at 1,400 µg/L under Clarifier 1 and at 1.8 µg/L below Clarifier 2.

The findings indicated that the source of Cr(VI) previously suggested by rebounding concentrations immediately downgradient of Building 1 was likely Clarifier 1 identified below Building 1.

PRC proposed excavation of shallow impacts from 10 to 15 feet followed by in-Situ reduction of deeper vadose zone and groundwater impacts. In addition, RAP Addendum No. 1 amended the WDP by increasing the number of injection points. A total of 33 dual-nested groundwater injection points and three dual-nested and three single completion wells were proposed in conjunction with the WDR.

Tables and Figures from RAP Addendum No. 1 are provided in Appendix A.

3.7.2 Building 1 Chromium Excavation

As indicated in *Remedial Action Plan Addendum No. 2, Expanded Excavation ad GCL Cap* (Stantec, 24 November 2008), remedial excavations were conducted in Building 1 and extended to incorporate the area of CB-12 and CB-14 where Cr(VI) was reported at up to 4.6 mg/kg. Excavations were conducted to a maximum depth of 15 feet bgs and approximately 1,320 tons of soil were removed and disposed off-Site. The excavations were backfilled to depth of six feet below final grade and then covered with a geosynthetic clay liner (GCL) to prevent infiltration.

3.7.3 In-Situ Cr(VI) Reduction

In-situ remediation of the vadose zone and groundwater was conducted in three injection events as described in the following documents:

- *Remedial Action Plan Addendum No.* 2 (Stantec, 10 December 2009),
- *Remedial Action Plan Addendum No.* 3 (Stantec, 5 February 2010), and
- *Remedial Action Plan Addendum No.* 4—*Hot Spot Locations* (Stantec, 19 November 2010).

The scope of each of these events is summarized in the following paragraphs.

Injection Event 1: The first injection event was conducted between 30 March and 14 April 2009, and involved the injection of 46,800 gallons of calcium polysulfide (CPS) solution at concentrations ranging from 1,000 to 2,000 mg/L into 33 dual-nested groundwater injection points (IP-1 to IP-33) and six vadose zone injection points (three single completion injection points, VIP-1, VIP-5 and VIP-6, and three dual-nested injection points, VIP-2 through VIP-4).

- **Vadose Zone Injection (VIP-1 to VIP-6)**: Vadose zone points were injected with 800 gallons of 2,000 mg/L CPS solution and flushed with 2,000 gallons of clean water.

- **Groundwater Injection (IP-1 to IP-33)**: Shallow nested injection points (IP-1 to IP-33) received 800 gallons and deep-nested injection points (IP-1 to IP-33) received 400 gallons of CPS solution. Perimeter points were injected with 1,000 mg/L CPS solution and interior points were injected with 2,000 mg/L CPS solution. Each point was flushed with 2,000 gallons of clean water following injection of CPS.

Following this initial injection event, four borings (CSP-1 to CSP-4) were advanced in the vadose zone treatment area to 50 feet bgs in May 2009, to evaluate the influence of injections on vadose zone Cr(VI) concentrations. Reported Cr(VI) concentrations exceeded PRGs (Stantec, 10 December 2009).

Injection Event 2: The second injection event was conducted between 11 January and 18 February 2010 and involved the injection of CPS, emulsified oil and fructose, as described in RAP Addendum No. 2 (Stantec, 2009). The injection of carbon substrate was focused on the Building 1 source area with CPS injections in the downgradient portions of the Cr(VI) plume. A total of 17,000 gallons of 30 percent emulsified oil solution, 136,000 gallons of 10,000 mg/L fructose solution and 98,900 gallons of 3,500 mg/L CPS solution were injected during the second event. Five additional temporary vadose zone injection points (VIP-7 to VIP-11), and 12 additional groundwater injection points (IP-34 to IP-45) and two temporary groundwater injection points (GIP-1 and GIP-2) were added to the injection program to improve plume coverage and treatment. GIP-1 and GIP-2 were placed north of MW-20 and MW-33 (north of Building 1) as described in RAP Addendum No. 3 (Stantec, 2009).

- **Vadose Zone Injection** (Permanent points VIP-1 to VIP-6 and temporary points VIP-7 to VIP-11): Vadose zone injection points received 500 gallons of 30 percent emulsified oil solution and 4,000 gallons of 10,000 mg/L fructose solution, followed by 100 gallons of clean water. The volume for each point was split between multi-depth nested points. Injections were conducted in temporary points at 20 to 25 feet bgs and 35 to 40 feet bgs.

- **Groundwater Injection**

    - *Source Area (IP-1 to IP-3, IP-16 to IP-19, IP-21 to IP-33, IP-41 to IP-43 and IP-45; and temporary points GIP-1 and GIP-2)*: Shallow injection points received approximately

500 gallons of 30 percent emulsified oil solution and 4,000 gallons of 10,000 mg/L fructose solution, followed by 100 gallons of clean water.

- *Downgradient Plume (IP-4 to IP-15, IP-20, IP-34 to IP-40, IP-44 and MW-17)*: Shallow injection points received approximately 4,300 gallons of 3,500 mg/L CPS solution followed by 500 gallons of clean water to flush the casing and surrounding sand pack.

Injection Event 3: The third injection event was conducted between 30 November and 22 December 2010, and involved the injection of emulsified oil and fructose substrate in three areas where elevated Cr(VI) persisted in groundwater (RAP Addendum No. 4, Stantec, 19 November 2010):

1. Near MW-20, north of Building 1,
2. Near MW-15, northwest corner of Building 5, and
3. Near MW-38, northeast corner of Building 5.

A total of 17,000 gallons of 30 percent emulsified oil and 136,000 gallons of 10,000 mg/L fructose solution were injected into the subsurface.

- **Vadose Zone Injection, MW-20 area** (VIP-3 to VIP-5, VIP-8, and TVP-1)**:** Vadose zone injection points received approximately 500 gallons of 30 percent emulsified oil solution and 4,000 gallons of 10,000 mg/L fructose solution, followed by 100 gallons of clean water. The volume for each point was split between multi-depth nested points, and at the depth intervals of 20 to 25 feet bgs and 35 to 40 feet bgs in temporary injection points, VIP-8 and TVP-1.

- **Groundwater Injection:** Shallow permanent and temporary injection points received approximately 500 gallons of 30 percent emulsified oil solution and 4,000 gallons of 10,000 mg/L fructose solution, followed by 100 gallons of clean water at three locations where elevated Cr(VI) concentrations persisted in monitoring wells, MW-15, MW-20 and MW-38. Injection at each of these locations is described below.

  - *Northwest Corner of Building 5 (MW-15):* Substrate injections were conducted in the shallow points at IP-4, IP-34, IP-35, IP-37 through IP-39, and in temporary direct push borings, TPG-7 and TPG-8.

  - *North of Building 1 (MW-20)***:** Substrate injections were conducted in the shallow points at IP-29 to IP-31 and IP-33, and in six temporary direct push borings, TGP-1 to TGP-6.

  - *Northeast Corner of Building 5 (MW-38):* Substrate injections were conducted in the shallow points at IP-7 to IP-10, IP-13, and in temporary direct push borings, TPG-9 to TGP-14.

A total of 145,700 gallons of CPS solution, 34,000 gallons of emulsified oil solution and 272,000 gallons of fructose solution were injected into the subsurface during the three injection events to reduce Cr(VI) to the less soluble trivalent Cr species.

Groundwater monitoring conducted since the last injection event has demonstrated that Cr(VI) and Cr have been reduced to concentrations below their California MCL of 10 µg/L and 50 µg/L, respectively, in on-Site wells.

Tables and Figures from RAP Addenda 2, 3, and 4 showing the configuration of each injection event are provided in Appendix A.

3.8 SITE DECOMMISSIONING INVESTIGATIONS

Consistent with the requirements of the RAP, Stantec conducted subsurface investigations in and around subsurface drains and collected confirmation samples during the removal and abandonment of two 16,000-gallon USTs, three 12,000-gallon USTs, three 8,100-gallon USTs, three 16,000-gallon underground storm water retention vaults (USRVs), two 8,000-gallon USRVs, and three 1,500-gallon subsurface clarifiers.

In December 2008, a total of 50 shallow soil borings (SD-01 to SD-11, SD-13 to SD-16 and SD-18 to SD-52) were advanced along subsurface drain lines that run through the Site. Five additional step-out borings (SD-14-DB1 through SD-14-DB5) and two additional drain line borings (SD-12 and SD-12.5) were advanced in January and February 2009, respectively, to evaluate the vertical and lateral extent of impact around the SD-14 boring near one of the USRVs.

Under the direction of the GCFD inspector, soil samples were collected from beneath the USTs, USRVs, and clarifiers at the time of removal. Soil samples were submitted to an Environmental Laboratory Accreditation Program (ELAP) laboratory and analyzed for VOC by EPA Method 8260B, by EPA Method 8015M, Metals by EPA Method 6010B/7000, Cr(VI) by 7196A, and 1,4-Dioxane by GC/MS Isotope dilution. Analytical results were compared to the PRGs approved by the RQWCB. In general, any soil reporting concentrations above the PRGs was excavated and confirmation soil samples were collected prior to backfilling of the area.

In general, very low concentrations of chemical analytes were reported in soil samples. Stained and impacted soils were excavated and disposed to an off-Site landfill. The following summarizes remedial excavation locations and quantities:

- Drain line SD-14 near Bay K, Building 13 (5 cubic yards excavated)
- Tank T-22 located west of Building 10 (10 cubic yards excavated)
- Forklift Clarifier (5 cubic yards excavated)
- UST excavations (720 cubic yards excavated)

UST T-22 could not be removed due to the presence of the Building 10 footing. However, the reported Cr(VI) concentration below T-22 of 2.9 mg/kg only slightly exceeded the site specific PRG of 2 mg/Kg. All other analytes were reported below PRGs in confirmation soil samples.

Tables and Figure from the *UST, Stormwater Retention Vault, and Clarifier Removal Report* (Stantec, 20 March 2009) are attached in Appendix A.

3.9 SITE CLOSURE CONFIRMATION SOIL INVESTIGATIONS

Chromium confirmation soil sampling was conducted in the Building 1 area following excavation, capping, and in-situ treatment pursuant to the *Work Plan for Confirmation Soil Borings, Building 1 Vadose Zone Chromium Treatment Area* (Stantec, 6 November 2011).

A total of eight borings (CB-1 to CB-8) were advanced and sampled to confirm the efficacy of remedial actions. Seven of the confirmation boring locations were unbiased and selected using a random number generator. An eighth biased boring location, CB-4, was selected to specifically evaluate the area north of Building 1 where elevated Cr(VI) was identified in past soil and groundwater sampling events. A total of 51 samples were collected from depths up to 41 feet bgs, and analyzed for total Cr and Cr(VI). The depth of sampling was limited by refusal to direct push technology (DPT) penetration in dense, coarse-grained soils.

Samples were collected beginning at 10 feet bgs in borings outside the Cr remedial excavation area and at 15 feet bgs in borings collected below the Cr remedial excavation. The following summarizes the results of chemical analysis for total Cr and Cr(VI).

- **Total Cr** was reported in all samples at concentrations ranging from 5.0 mg/Kg to 470 mg/Kg, with the highest concentration reported in sample CB-3-15' located at the base of the remedial excavation and beneath the GCL cap at a depth of 15 feet bgs (Appendix C). The average chromium concentration (mean) was 25.34 mg/Kg and the 95 percent upper confidence level of the mean (UCL) was 29.32 mg/Kg, which is less than the conservative PRG of 450 mg/Kg (Appendix D).

- **Cr(VI)** was reported in analyzed samples at concentrations ranging from ND to 24 mg/Kg, with the highest concentration reported in sample CB-3-15' located at the base of the remedial excavation and beneath the GCL cap (Appendix C). Statistical analysis of the data set using the Rosner's Outlier Test included in EPA ProUCL 4.1 software, indicates that sample CB-3-15 is a statistical outlier at both the 1% and 5% significance level. Consequently, this data point was omitted from further statistical analysis. Based on statistical analysis of the revised data set, the mean Cr(VI) concentration is calculated to be 1.67 mg/Kg (which is less than the 2 mg/Kg cleanup goal), and the 95 percent UCL is calculated to be 2.54 mg/Kg (only slightly above the cleanup goal of 2 mg/Kg) and well below the June 2017 USEPA Regional Screening Level (RSL) of 6.3 mg/Kg for commercial/ industrial exposure (Appendix D).

The Cr(VI) outlier (24 mg/Kg in CB-3-15) is located immediately below the bottom of the 2008 Cr(VI) remedial excavation and below the cap. Cr(VI) concentrations in CB-3 samples collected below 15 feet bgs are all below the cleanup goal of 2 mg/Kg. It is noted that the GCL liner was specifically placed over this area to reduce the potential of infiltration and migration or residual Cr(VI) to groundwater. It is further noted that the deeper vadose zone and groundwater have been treated to reduce Cr(VI). Should residual Cr(VI) migrate into these zones, it will continue to be reduced as demonstrated and confirmed by the persistently low levels of Cr(VI) reported in project groundwater monitoring wells since the last in-situ Cr(VI) treatment injections were conducted in December 2010.

To complete confirmatory investigations under the RAP (Stantec 2008), additional investigations were undertaken across the Site as described in the *Remedial Action Plan—Addendum No. 5*, (Stantec, 11 January 2012). The RAP originally envisioned that the all structures would be razed in support of redevelopment. To this end, shallow surface soil sampling was proposed in areas of former materials storage based on surface soil observations at the time pavements and structures were removed. However, the Site owner decided not to raze the Site. To fulfill the intent of the RAP, additional confirmation soil samples were collected across the Site in areas not previously investigated.

A total of 32 borings were advanced at locations throughout the Site and a total of 96 soil samples were collected at depths of one, five and 10 feet bgs and analyzed for TPH, Title 22 metals, Cr(VI), VOCs and 1,4-Dioxane. The results of the investigations are summarized below:

- **VOCs** were sporadically reported at low concentrations. The analyte reported at the highest concentration was TCE at 12 ug/Kg (RA5-13 at one foot bgs). None of the VOC analytes was reported above RWQCB SSLs (RWQCB, 1996) for groundwater deeper than 40 feet below the sample depth (the TCE SSL is approximately 100 ug/Kg for detections in the upper 5 feet at the Site).

- **TPH** were sporadically reported in the diesel and oil ranges up to 240 mg/Kg and 680 mg/Kg, respectively. Gasoline range organic (GRO) was not reported above laboratory reporting limits. The reported concentrations are well below the 1996 RWQCB SSLs (CRWQCB, 1996) for soil with groundwater deeper than 20 feet (<1,000 mg/Kg diesel range organics[DRO] and <10,000 mg/Kg for oil range organics [ORO]).

- **1,4-Dioxane** was not reported above laboratory reporting limits in any analyzed sample.

- **Title 22 metals,** including arsenic**,** were reported at concentrations consistent with typical background levels in southern California soils (Bradford et al., 1996; Hunter and Davis, 2001; and, Bosnan et al., 2008).

- **Total Cr** concentrations were reported above the very conservative PRG of 450 mg/Kg in one sample at 580 mg/Kg. However, the mean and the 95 percent UCL were calculated at 22.9 and 49.7 mg/Kg, respectively—well below 450 mg/Kg.

- **Cr(VI)** concentrations were reported above 2.0 mg/Kg in five of 96 samples at concentrations up to 9.3 mg/Kg. However, the mean and 95 percent UCL were calculated at 0.77 and 1.37 mg/Kg, respectively—well below cleanup goal of 2 mg/Kg and the June 2017 USEPA Regional Screening Level of 6.3 mg/Kg for commercial/ industrial exposure.

The tables and figures from the *Chromium Remediation Confirmation Sampling and RAP Addendum No. 5 Investigation Rep*ort (Stantec, 20 February 2013) are attached in Appendix C and A, respectively.

Based on the above findings, the RWQCB confirmed in a meeting on 29 May 2013 that NFA was required on the Site as pertains to the requirements under the RAP (Stantec 2008).

3.10 VAPOR INTRUSION INVESTIGATIONS

At a meeting on 29 May 2013 to discuss final Site closure requirements, RWQCB requested that PRC evaluate potential health risks related to the vapor intrusion pathway for both the on-Site worker and off-Site resident. The data from the November 2007 Site-wide comprehensive soil vapor survey showed concentrations of PCE, TCE and benzene at levels above generic screening levels. Using building-specific construction details (slab thickness, ceiling height, etc.) for on-Site buildings and generic values for residential structures, Stantec modeled potential indoor air concentrations using the Johnson-Ettinger model. Excess human health risks were calculated for off-Site residences using data collected near the property line closest to the residence.

The excess cancer human health risk and non-cancer health index (HI) for the theoretical off-Site resident and for all on-Site structures were calculated to be below the $1x10^{-6}$ and 1.0, respectively, except for the following:

- Off-Site Resident: Cancer = $1x10^{-5}$ (HI = 0.2)
- Building 10 worker: $6x10^{-6}$ (HI = 0.022)

Although these findings reported excess health risks within the risk management range to $1x10^{-5}$, additional vapor intrusion investigations were conducted to confirm the assumption of no unacceptable risk due to vapor intrusion.

3.10.1 On-Site Indoor Air Investigation

A total of 16 indoor air samples and three ambient air samples were collected in six-liter summa canisters over an eight-hour period on 10 December 2014, to represent seasonal worst case (winter) conditions (Stantec, 20 February 2015). The indoor air samples were collected at the locations indicated below.

- Building 4/4A: four samples
- Building 6: 8 samples
- Building 10: four samples

The laboratory analytical results are summarized below.

- Benzene was reported above the laboratory reporting limit at concentrations ranging from 1.1 to 2.2 micrograms per cubic meter (µg/m³) in structures, while ambient air concentrations were reported in a similar range from 1.4 to 1.6 µg/m³. Indoor benzene concentrations were attributed to background ambient air.
- TCE was reported below the laboratory reporting limit at estimated values of 0.1 to 0.66 µg/m³ in structures, while ambient air concentrations ranged from 0.08 to 0.1 µg/m³.
- PCE ranged from less than the reporting limit (<0.69) to 2.3 µg/m³, while ambient air concentrations were reported at <0.69 µg/m³.

At the time of the investigation, none of the reported PCE and TCE concentrations exceeded screening levels. However, since the time the investigation was published in February 2015, screening levels have decreased. The following table compares 95 percent UCL for PCE and TCE indoor air concentrations with current screening levels (DTSC 2017, USEPA 2017).

Building No.	No. of Samples	PCE 95% UCL (µg/m³)	TCE 95% UCL (µg/m³)
4	4	0.66	0.21
6	8	1.5	0.43
10	4	1.3	0.65
Industrial/Commercial Screening Level		2.1	3.0

Note: Screening level is the lower of the DTSC HERO Note 3 or USEPA RSLs for cancer or non-cancer endpoints.

The 95 percent UCL for PCE and TCE concentrations are below the commercial/industrial screening levels in each building. Tables and figures from the *Supplemental Soil Vapor Survey and Indoor Air Sampling Report* (Stantec, 20 February 2015) are attached in Appendix C.

3.10.2 Off-Site Residential Vapor Intrusion Investigations

To evaluate potential off-Site vapor intrusion health risks, nine soil vapor points were installed and sampled at depths of five and 10 feet bgs between December 2014 and January 2015. SV-1 through SV-8 were installed along the eastern and southern property boundaries where reported concentrations exceeded SLs during the 2007 soil vapor survey and SV-9 was installed approximately 100 feet northeast of the Site to evaluate potential impacts from groundwater or other sources. PCE was the predominant analyte reported above SLs (up to 2,500 µg/m³), with lower concentrations of TCE (up to 200 µg/m³) and benzene (up to 11 µg/m³). The highest concentrations were reported along the northern end of the east property line and on the southern property line in the parking lot along California Avenue (Stantec, 20 February 2015).

On 1 July 2015, PRC-DeSoto representatives met with the RWQCB to discuss the next steps in the evaluation of potential off-Site vapor intrusion human health risks. During the meeting, the five residential properties (off-Site properties) were identified for further soil vapor investigations.

- 405 and 405-1/2 Concord St.,
- 345 Concord St.,
- 343 and 343-1/2 Concord St.,
- 749 and 749-1/2 West California Ave. and,
- 761and 761-A West California Ave.

These properties were selected based on their proximity to on-Site soil vapor points where PCE and TCE were reported above residential SLs and on the nature of their construction. The target properties are comprised of single family dwellings and are constructed over crawl spaces, whereas other nearby multi-family units are constructed on open below grade or first floor parking. The selected properties were identified as surrogates for evaluating off-Site vapor intrusion human health risks.

Of the five properties, access was procured to four of the properties. Both PRC and the RWQCB made repeated attempts to secure access to the 761/761-A West California Avenue through phone calls, knocking doors and registered mail, without success. However, sampling at the other four properties is sufficient to represent potential health risks at other nearby residential properties.

Thirteen shallow soil vapor samples were collected around the outside perimeter of the structures on the four target properties in April 2016. The samples were analyzed for PCE, TCE, vinyl chloride (VC) and 1,1-DCE. Of these analytes, only PCE was reported above laboratory reporting limits at concentrations ranging from <6.9 to 440 µg/m^3 (Stantec, 26 May 2016).

Reported PCE soil vapor exceeded the generic residential SL of 240 µg /m^3 in samples collected outside the foundation footings on two residential properties:

- 343-1/2 Concord Street (the western-most dwelling): the mean PCE concentration on the property was less than the generic SL of 240 µg /m^3 (110 µg /m^3), however, one sample near 343-1/2 Concord Street reported PCE at 280 µg /m^3.

- 749/749-1/2 California Avenue: the mean PCE concentration only slightly exceeded the generic SL of 240 µg /m^3 at 749/749-1/2 California Avenue (323 µg /m^3).

To further evaluate the assumption of no unacceptable risk, two seasonal crawl space sampling events were conducted in July 2016 and January 2017 to evaluate the vapor intrusion pathway. PCE was the only analyte reported in crawl space samples at concentrations ranging from 0.07

to 0.41 µg/m^3. It is noted that ambient air PCE concentrations were reported in the same range, suggesting little to no impact from vapor intrusion. Regardless of the source, the PCE concentrations were reported below the DTSC HHRA HERO Note 3 screening level of 0.48 µg/m^3. The results confirmed the assumption of no unacceptable risk via the vapor intrusion pathway.

Tables and figures from the *Off-Site Soil Vapor Survey Report* (Stantec, 26 May 2016) and the *Final Off-Site Crawl Space Air Sampling Report, 343½ Concord Street and the 749/749½ West California Avenue, Glendale California* (Stantec, 16 February 2017) are attached in Appendix C.

4.0 GROUNDWATER MONITORING

The Site is located on the east side of a regional groundwater plume impacted with VOCs (primarily TCE and PCE), Cr, Cr(VI), 1,4-Dioxane, perchlorate, NDMA, and 1,2,3-TCP. This fact is important when interpreting Site groundwater quality and trends.

Groundwater monitoring was initially implemented in 1992 to assess the distribution of VOCs at the Site. Monitoring for Cr and Cr(VI) was initiated shortly thereafter with the discovery Cr(VI) in MW-4 and continued following completion of VOC remediation in 1997. In 2003, following the issuance of the CAO, a comprehensive baseline monitoring event was conducted for VOCs and emerging chemicals to identify COCs. The groundwater monitoring frequency was initially conducted on a quarterly basis, was changed to a semi-annual frequency in June 2014 and most recently to annual frequency in 2016. Since the groundwater monitoring program was implemented, it has undergone several modifications, the most significant being testing for compliance with the WDR permit which was instituted in the first quarter of 2009 and was terminated in the first quarter of 2014.

Under the current annual groundwater monitoring program, monitoring wells MW-01 through -08, -12a, -16, -18 through -20, -22, -24 through -26, -28, -30 through -32, -35, -37, -39, -40 and -41 are sounded, purged using low-flow purge method, and sampled for the analytes indicated below:

- Total Chromium (Cr) by EPA Method 200.8
- Hexavalent Cr [Cr(VI)] by EPA Method 218.6
- Title 22 metals by EPA Method 200.8 (mercury by EPA Method 245.1)
- 1,4-Dioxane by EPA Method 8270C
- VOCs by EPA Method 8260B (MW-01 through MW-08 only)
- pH, Temperature, Electrical Conductivity, Dissolved Oxygen (DO), Oxidation/Reduction Potential (ORP), and Turbidity by in-situ field measurement.

Well locations are shown on Figure 3.

4.1 DEPTH TO GROUNDWATER

Depth to groundwater has fluctuated approximately six feet since the baseline sampling event in 2003. The lowest groundwater elevations were recorded in late 2004 to early 2005. The highest groundwater levels were recorded in early to mid-2013. Groundwater levels have steadily declined since that time. During the Annual 2017 groundwater sampling event, groundwater levels ranged from 42.11 to 60.45 feet bgs in project wells.

A groundwater mound has persisted north of the Site since groundwater monitoring was initiated in the 1990s. Studies have shown that the water quality is different than regional groundwater. The mound has the effect of diverting the regional groundwater plume. As a result, the upgradient wells do not reflect regional groundwater quality. From time to time elevated chromium and nickel of been detected in the upgradient wells. These findings are believed to reflect conditions emanating from a former plating shop on Milford where elevated chromium and nickel have been reported in soil.

4.2 GROUNDWATER FLOW DIRECTION

Based on well measurements and interpolation between well points, groundwater generally migrates in a south southeasterly direction at an average horizontal gradient of 0.007 feet per foot. However, a groundwater mound north of the Site (near Milford Street and Commercial Street) locally influences groundwater flow directions and gradient (Figure 3).

4.3 GROUNDWATER QUALITY

Extensive investigations have been conducted to identify groundwater COCs. As indicated in the RAP (Stantec 2008), the primary groundwater COCs in groundwater at the Site are Cr, Cr(VI), TCE, PCE, and 1,4-Dioxane. As previously noted, the Site is located on the eastern edge of a regional groundwater plume containing these and other constituents. In addition, a former plating shop was located on Milford Avenue, east of Commercial Street, where elevated chromium and nickel were reported in soil. Based on observed concentrations in upgradient wells, these sources have influenced the distribution of COCs on the Site. The following is a summary of the distribution of concentrations in project monitoring wells reported during the April 2017 annual sampling event.

- *Cr* (Figure 4) was reported in:
  - Upgradient wells at concentrations up to 63 µg/L (MW-07);
  - On-site wells at concentrations up to 15 µg/L (MW-03);
  - Cross-gradient at concentrations up to 36 µg/L (MW-39); and
  - Downgradient wells at concentrations up to 14 µg/L (MW-40).

- Cr(VI) (Figure 5) was reported in:
  - Upgradient wells at concentrations up to 65 µg/L (MW-07);
  - On-site wells at concentrations up to 16 µg/L (MW-03);
  - Cross-gradient wells at concentrations up to 34 µg/L (MW-39); and
  - Downgradient wells at concentrations up to 15 µg/L (MW-40).

- TCE and PCE (Figure 6) are the VOC analytes most commonly reported at concentrations above MCLs. PCE and TCE results are summarized below:

  - Upgradient wells: PCE and TCE were generally reported at <2 µg/L.

  - On-site wells: PCE was reported in on-site wells at concentrations up to 4.5 µg/L in well MW-03. TCE was reported in on-site wells at concentrations up to 15 µg/L in well MW-02.
  - Cross gradient wells: PCE was reported at <2.0 µg/L and TCE was reported was reported at 5.4 µg/L in MW-08.

- *1,4-Dioxane* (Figure 7) was reported above the California Department of Public Health (CDPH) NL of 1 µg/L in:
  - Upgradient wells at concentrations <1.0 µg/L (influenced by groundwater mound);
  - On-site wells at concentrations up to 7.5 µg/L (MW-28);
  - Cross-gradient wells at concentrations up to 6.3 µg/L (MW-39); and
  - Downgradient wells at concentrations up to 8.1 µg/L (MW-30).

Mann-Kendall trend analysis was performed for Cr, Cr(VI), TCE, PCE, and 1,4- Dioxane to evaluate temporal concentration trends in monitoring wells MW-01 to MW-08 (Appendix C -Table 8). Concentrations reported below the laboratory detection limits were plotted at half the detection limit. The following is a summary of trends and historical highs in comparison to current concentrations:

- Total Cr concentrations were reported as "no trend" on all the wells. Cr was reported at a high of 25,000 µg/L in 1997, but is generally not reported above the California MCL of 50 µg/L in on-Site wells. However, elevated Cr was reported in upgradient wells MW-1, MW-5, and MW-7 at concentrations up to 530 µg/L in the last three years which has affected some on-Site wells such as MW-3. The chromium impacts are believed to be the result of variable pumping and containment of the regional plume at and Glendale North extraction well field.

- The Cr(VI) concentrations in wells MW-01 through MW-08 reported a "decreasing" or "no trend" trends in all the wells, except upgradient wells MW-05 which were reported as "increasing." MW-05 is an upgradient well and the reported concentrations are well below the MCL. Cr(VI) was reported at a high of 24,000 µg/L in MW-04 in 1997, but has not exceeded the California MCL of 10 µg/L since 2011 in on-Site monitoring wells, despite the contribution of Cr(VI) from the regional plume.

- Most of the TCE concentration trends are "no trend" or "stable" except for MW-02, which is considered to be "decreasing," and MW-03 which is considered to be "increasing." TCE concentrations in MW-03 vary between 2 and 4 µg/L, below the MCL. The highest TCE concentration was reported in upgradient well MW-07 during the 2004 baseline sampling event at 95 µg/L. Since that time, TCE concentrations have remained stable or decreased across the Site. The highest TCE concentration reported during the April 2017 event was 15 µg/L.

- PCE concentrations in monitoring wells MW-01 through MW-08 were generally "stable," "no trend" or "decreasing". PCE is generally not reported above the MCL in on-Site monitoring wells. The highest concentrations were historically reported in MW-03 at 18 µg/L. Most recently, PCE was reported at 4.5 µg/L.

- 1,4–Dioxane concentrations are identified as "decreasing" or "no trend" where concentrations are reported above the laboratory reporting limit. The highest on-site 1,4-Dioxane concentrations were historically reported in MW-16 at 40 µg/L. Most recently, 1,4-Dioxane was reported at 1.6 µg/L in MW-16.

The recent trends were discussed with RWQCB in a meeting on 1 July 2015. Based on these results, RWQCB acknowledged that groundwater remediation goals had been achieved and that the Site appeared to be ready for consideration of an NFA status once the off-Site vapor intrusion issues were addressed.

5.0 HUMAN HEALTH RISK EVALUATION

5.1 INTRODUCTION

The methodology used in this HHRA is consistent with current USEPA, and California Environmental Protection Agency (Cal-EPA) Department of Toxic Hazardous Substances Control (DTSC) guidance (USEPA, 1989; 1991; 2002; 2009; Cal-EPA, 1997; 2014ab; 2013; 2016.

The approach used to conduct this human health risk assessment (HHRA) is conservative to minimize the possibility of underestimating potential human health risks. To ensure a health protective (i.e., conservative) approach, a reasonable maximum exposure (RME) scenario was evaluated for the identified receptors. Risks and hazards were estimated using a deterministic approach under a conceptual site model (CSM) developed from on-Site information that identified potential receptors and potentially complete exposure pathways for risk characterization. This information was used in the remedial decision-making process to determine if further action is warranted.

Although land surface at the Site is currently almost entirely covered with impervious materials (e.g. pavement, building foundations), in the event of Site redevelopment, impervious materials may be removed allowing for direct contact with soil. Therefore, direct contact with soil was assumed to be a complete exposure pathway under future conditions. The HHRA assessed potential risk for hypothetical current and future on-Site commercial workers and hypothetical future on-Site residents.

The Site and adjacent properties are not considered ecological habitat and no environmentally sensitive areas were identified in proximity to the Site, therefore, ecological receptors were not considered as part of the HHRA. The HHRA includes an analysis of potential vapor intrusion risk using the DTSC-modified Johnson and Ettinger (J&E) soil-gas screening model (USEPA 2004, CalEPA 2014) as well as potential human health risks from direct contact with chemicals of potential concern (COPCs) in soil (Appendix E).

5.2 DATA EVALUATION AND SELECTION OF COPCS

COPCs are potentially Site-related chemicals for which data are of sufficient quality for use in a quantitative risk assessment (USEPA, 1989). The final selection of COPCs for the HHRA is based on guidance provided by USEPA (1989) and Cal-EPA (1999). Consistent with Cal-EPA Department of Toxic Substances and Control (DTSC), Human and Ecological Risk Office (HERO; Cal-EPA, 2012). The factors evaluated in selecting COPCs for the HHRA are summarized below. It should be noted that all analytical results provided for the HHRA were assumed to meet data quality objectives for the risk assessment.

5.2.1 Evaluation of Reporting Limits

The analytical methods specified in investigation work plans can detect COPCs below their respective screening levels. However, sample preparation or analytical adjustments, such as dilution of a sample to allow for quantitation of an extremely high level of one compound, could result in elevated reporting limits for other compounds. Therefore, before chemicals were eliminated because they were not detected, the HHRA compared the laboratory reporting limit (LRL) for a chemical to its corresponding risk-based screening level (e.g., if the reporting limit was higher than the corresponding SL, elimination of the chemical based on absence of detection could result in under estimates of potential risk).

5.2.2 Background Concentration of Arsenic

Cal-EPA guidance allows metals to be excluded from quantitative risk assessment if they are detected at levels within the ranges of local background or ambient concentrations (Cal-EPA 2013). Unless specifically related to historical Site operations, the presence of most naturally-occurring metals in soil do not contribute significantly to estimates of exposure. Arsenic is an exception. Naturally-occurring concentrations of arsenic above conservative risk-based screening levels are common in California soils. In a study of naturally occurring arsenic levels in southern California, (DTSC, not dated) DTSC determined that 12 mg/kg is a reasonable upper-bound approximation of background arsenic levels. Although arsenic was detected above screening levels it was not retained as a COPC because both the maximum concentration (9.2 mg/kg as present in Table 1) and the site-wide Exposure Point Concentration (EPC) for arsenic (3.327 mg/kg) are below the published level of arsenic in background soil (DTSC 2013).

5.2.3 COPC Screening

USEPA risk assessment guidance presents a methodology for identifying which detected chemicals should be included in a quantitative HHRA. These are defined by USEPA (1989) as chemicals potentially related to the site whose data are of sufficient quality for use in a quantitative HHRA. USEPA guidance states that the list of COPCs should include all chemicals that were:

1) Positively detected in at least one sample;

2) Detected above levels of the same chemicals found in associated blank samples;

3) Tentatively identified but may be associated with the Site based on historical information;

4) Transformation products of detected chemicals; and

5) Metals detected above naturally occurring levels (background).

Soil Gas COPCs

For soil gas, all chemicals detected at least once were selected as COPCs. Chemicals reported as not detected with LRLs above screening levels were also retained as COPCs. Soil gas data used by the HHRA were collected pursuant to requirements of the RWQCB including soil gas data collected in 2007 from multi-depth probes installed up to 20 feet bgs to establish a vertical soil gas profile. The entire 2007 soil gas dataset is presented in Table 2 and the 5-feet bgs soil gas dataset is presented in Table 3. The HHRA used vapor data collected at 5 feet bgs to represent reasonable maximum exposure (RME) conditions since vertical profiling at intervals down to 20 feet bgs indicated that chemical concentrations at five feet are generally higher than concentrations at 10 feet and below.

Soil COPCs

Table 1 presents a summary of all chemicals detected in at least one soil sample. Relevant screening levels for commercial and residential land use are provided for comparison, along with: the frequency of detection; minimum detected concentration; maximum detected concentration; and the 95 percent upper confidence limit of the mean (95% UCL) EPC. A full statistical summary for the underlying distribution of the data (e.g. normal, non-parametric); and the method used to select the EPC is provided with the ProUCL printouts are included in Appendix D.

The following chemicals were excluded because they were detected in less than 5% of all soil samples and_the maximum concentrations were less than the lowest screening level: selenium; 1,2-dichloroethane; naphthalene; benzene; ethylbenzene; xylenes; and chlorobenzene

As stated previously, arsenic was not retained as a COPC because the maximum concentration (9 mg/kg) was below the published level of arsenic in background soil (DTSC 2013).

Groundwater COPCs

The HHRA excluded direct contact with groundwater below the Site as groundwater is regionally impacted, COPCs have been shown to be consistent in concentration with the regional plume and because there is no completed pathway for exposure to groundwater.

5.3 EXPOSURE ASSESSMENT

5.3.1 Conceptual Site Model

The CSM is an important preliminary step in the exposure assessment portion of a risk assessment (USEPA, 1989). The CSM, graphically presented as Figure 8, describes the relationship between chemical sources in various environmental media and potential receptors at the site, and identifies potentially complete and significant pathways through which receptors may be exposed to the COPCs.

5.3.1.1 Identification of Potential Receptors and Exposure Pathways

A receptor may encounter COPCs only if there is a complete exposure pathway (USEPA, 1989). For an exposure pathway to be considered complete, it must be possible for a chemical to be transported via an environmental medium to a potential receptor location, and for receptors to be in contact with the chemical and assimilate it into their bodies via different routes of exposure (e.g., ingestion, inhalation, or dermal contact).

A complete exposure pathway consists of the following four elements (USEPA, 1989):

- A source of chemical;
- A mechanism by which the chemical is released;
- A retention or transport medium through which chemicals travel from the point of release to the receptor location (leaching, volatilization, or uptake via food); and,
- A route of exposure (ingestion, inhalation, or dermal contact) by which the chemical enters the receptors' body.

If any of these elements do not exist, the exposure pathway is considered incomplete and further evaluation of the pathway is not required.

The site is currently used for commercial/industrial purposes. While commercial use of the Site is expected to continue, to ensure the protection of future receptors, the HHRA also evaluated hypothetical future on-Site residents. Additional descriptions of these receptors are provided below.

- **Current and Future Onsite Commercial/Industrial Worke**r – The commercial/industrial worker is assumed to be a long-term receptor employed by the company operating on the Site. Under current conditions on the Site, exposure to COPCs may occur from inhalation of volatiles migrating from subsurface sources to indoor air (indoor commercial workers). Future redevelopment of the Site may remove existing buildings and pavement making the underlying soils accessible for direct contact (incidental ingestion, dermal contact, and inhalation of vapors and particles released to ambient air from soil) by people working on the property.
- **Future On-Site Resident** – The future on-Site residential receptor is assumed to be a long-term receptor occupying residences on the Site following removal of impervious ground cover and commercial/industrial infrastructure. This receptor is assumed to live in the dwelling 24 hours per day, 350 days per year for 26 years. Potential exposure pathways for a future on-Site resident include incidental ingestion of soil, dermal contact with soil, inhalation of fugitive dust and vapors originating from soil, and indoor inhalation of VOC originating from subsurface outdoor sources (e.g. vadose zone soil or groundwater).

5.3.2 Exposure Point Concentrations

The EPC is the concentration of a COPC that could be contacted by a receptor over the exposure period. The EPC is intended to represent the potential for contact with media at any given location by a receptor moving randomly across the physical boundaries of an exposure area.

5.3.2.1 Soil Gas EPCs

EPCs for COPCs in soil gas were estimated on a Site-wide basis using both the 95% UCL for each COPC detected in samples collected from 5-feet below the ground surface (bgs), and by selecting the maximum concentration of each COPC. Results for samples collected from 5-feet were selected to represent reasonable maximum exposure (RME) conditions since vertical profiling at intervals down to 20 feet bgs indicated that chemical concentrations at this depth are generally higher than concentrations at 10 feet and below.

5.3.2.2 Soil EPCs

For soil, the EPC for a given COPC was calculated as the 95 percent UCL of the mean (95% UCL) for each COPC detected in soil samples collected in the upper 10 feet; the reasonable depth of potential exposure. The 95% UCL was calculated using USEPA's ProUCL software, Version 5.1. A statistical summary of chemicals analyzed for in soil is presented in Table 3 and ProUCL printouts are included in Appendix D. Consistent with Cal-EPA Department and USEPA guidance, the HHRA includes all compounds detected in more than 5% of all samples as chemicals of potential concern (COPCs) (Cal-EPA 2013, USEPA 1989).

5.3.2.3 Vapor Intrusion Fate and Transport Modeling

The USEPA (USEPA 2004) developed the 1991 J&E model to provide a set of screening-level, one-dimensional analytical models that account for the diffusion of chemicals through the subsurface, the advection of chemicals through soil and concrete slabs due to pressure differentials between the soil and buildings, and the mixing in indoor air caused by heating and ventilation systems. In, December 2014, the DTSC updated both the soil gas and groundwater screening models (Cal-EPA 2014a). The residential exposure duration (ED) and the averaging time for non-carcinogens (ATnc) have been changed to 26 years as recommended by the DTSC Human and Ecological Risk Office (Cal-EPA 2014b) which is also consistent with the USEPA Exposure Factors Update (USEPA 2014). Other updates included chemical physical parameters and toxicity values in the VLOOKUP Table (Table 4). The J&E models are provided as Microsoft Excel spreadsheets and each model is constructed of five worksheets:

1. DATAENTER (Data Entry Sheet for single chemical of interest);
2. CHEMPROPS (Chemical Properties Sheet for single chemical of interest);
3. INTERCALCS (Intermediate Calculations Sheet);

4. RESULTS (Results Sheet); and

5. VLOOKUP (Lookup Tables – Physical and chemical data and toxicity values for a list of chemicals).

For this HHRA, the J&E soil gas screening model (SG-SCREEN), modified by the Cal-EPA DTSC (Cal-EPA 2014a), was used to estimate indoor air concentrations using the soil gas data. Soil gas data are typically the preferred medium from which to evaluate the vapor intrusion pathway (Cal-EPA, 2011a). In the original DTSC model, only a single chemical can be modeled at a time; modification of the model was done to allow modeling of multiple chemicals at once.

Soil boring logs indicate variability of soil from the surface to the depth of the soil gas samples but generally consist primarily of sand (silty sands to gravelly sands) (SECOR, 2008a). Therefore, sand was selected as the predominant soil type for input into the models.

5.3.2.4 Soil Exposure Estimates

Exposure factors used in this HHRA are consistent with the HERO HHRA Note 1 (Cal-EPA 2014c), which incorporated many of the default exposure assumptions put forth in USEPA's memorandum "Human Health Evaluation Manual, Supplemental Guidance: Update of Standard Default Exposure Factors" (USEPA 2014). A complete list the exposure factors used for quantitative risk calculations are provided in Table 5. The algorithms used to estimate ADD and LADD for current and future commercial/industrial workers, future resident adults and children exposed to soil through ingestion, dermal contact and inhalation of dust and vapors are presented in Appendix E. Chemical intake for direct contact (incidental ingestion), dermal contact and exposure concentrations for inhalation of particulates and VOCs were calculated in accordance with the following:

5.3.2.4.1 Incidental Ingestion of COPCs in Soil

The intake due to incidental soil ingestion was calculated using the following equation:

$$\text{Intake} = \frac{(C_{soil} \times FI \times IR \times UCF \times EF \times ED)}{(BW \times AT)}$$

Where:

$Intake_{ca}$	=	Lifetime average daily dose for carcinogenic effects, averaged over a lifetime of 70 years, in mg/kg-day;
$Intake_{nc}$	=	Average daily dose for non-carcinogenic effects, averaged over the exposure duration, in mg/kg-day;
C_{soil}	=	Soil concentration, in mg/kg;
FI	=	Fraction ingested from the contaminated source (unitless)
IR	=	Soil intake rate (mg/day);
UCF	=	Conversion factor, 1E-06 kilograms per milligram (kg/mg);
EF	=	Exposure frequency, in days/year (130 days/year)

ED = Exposure duration, in years;
BW = Average body weight, in kilograms (kg); and,
AT = Averaging time, in days; equals 70 years x 365 days/year for carcinogenic effects and ED x 365 days/year for non-carcinogenic effects.

5.3.2.4.2 Dermal Absorption of COPCs from Soil

The intake from dermal contact with soil was calculated using the following equation:

$$\text{Intake} = \frac{(C_{soil} \times UCF \times SA \times AF \times ABS_d \times EF \times ED)}{(BW \times AT)}$$

Where:

LADD = defined above;
ADD = defined above;
C_{soil} = Soil concentration, in mg/kg;
CF = Conversion factor, 1E-06 kg/mg;
SA = Skin surface area for soil contact, in square centimeters per day (cm^2/day);
AF = Soil adherence factor, in milligrams per square centimeter (mg/cm^2);
ABS_d = Chemical-specific dermal absorption factor (unitless);
EF = Exposure frequency, in days/year;
ED = Exposure duration, in years;
BW = Average body weight, in kilograms (kg); and,
AT = Averaging time, in days, equals 70 years x 365 days/year for carcinogenic effects and ED x 365 days/year for non-carcinogenic effects.

5.3.2.4.3 Inhalation of COPCs in Particulates/Vapors

USEPA revised guidance for evaluation of the inhalation exposure pathway to include inhalation dosimetry methodology which recommends that when estimating risk via inhalation, risk assessors should use the concentration of chemical in air as the exposure metric rather than intake based on body weight and inhalation rate (EPA 2009). Thus, the term exposure concentration (EC) is now used to estimate chemical intake via inhalation.

The following equation was used to calculate EC for inhalation of vapors and particulates released from soil by the wind and mechanical disturbance:

$$EC = \frac{C_{air} \times ET \times EF \times ED}{AT}$$

Where:

EC = Exposure Concentration;
ET = Exposure time (hour/8 hours day);
EF = Exposure frequency (days/year);
ED = Exposure duration (years); and
AT = Averaging time, in days. Represents the period over which exposure is averaged.

C_{air} = Chemical concentration in air (mg/m^3) calculated using the following;

$C_{air} = Cs \times ET \times ED \times EF \times ((1/PEF) + (1/VF)) \times UCF1 \times UCF3/AT$

Where:

C_s = Chemical concentration in soil (mg/kg), as represented by the EPC;
PEF = Particulate emission factor (m^3/kg); default DTSC value of 1E+06;
VF = Volatilization factor (m^3/kg)-chemical specific;
UCF1 = Conversion factor-day/hour;
UCF3 = Conversion factor- micrograms to milligrams;
All other terms defined above.

5.4 TOXICITY EVALUATION

Potential toxic effects of chemicals are generally classified as carcinogenic (i.e., cancer causing), or non-carcinogenic (i.e., non-cancer health effects). These endpoints are separately quantified in HHRAs as cancer risks and non-cancer hazards, respectively. Toxicity values numerically express the magnitude of potential toxic effects of chemicals. Reference doses (RfDs) and reference concentrations (RfCs) are used to quantify non-cancer health effects, and cancer slope factors (SFs) and inhalation unit risks (IURs) are used to quantify cancer risks. Both cancer and non-cancer endpoints may be evaluated for carcinogenic chemicals depending on the chemicals' toxic effects and availability of RfDs/RfCs.

Toxicity values are pathway-specific and are provided for both ingestion (RfDs and SFs) and inhalation (RfCs and IURs) pathways, as available and applicable. In addition, the Office of Environmental Health Hazard Assessment (OEHHA) has developed reference exposure levels (RELs) for a small number of chemicals. RELs correspond to USEPA reference concentrations for the inhalation pathway.

Non-cancer toxicity values are provided by USEPA for chronic and subchronic exposure, which correspond to 7 years or more exposure, and less than 7 years, respectively. Chronic RfDs and RfCs were used to evaluate receptors in the HHRA. Cancer-based toxicity values correspond to lifetime exposure and are provided for both the ingestion (SFs) and inhalation (IURs) pathways, as available and applicable, by USEPA. Cal-EPA also provides cancer SFs and IURs. Cal-EPA values are based on an independent review by OEHHA of the toxicological literature, and are generally more conservative than USEPA values.

The DTSC uses the following hierarchy for toxicity values in the development of screening levels:

- OEHHA Toxicity Criteria Database
- USEPA Integrated Risk Information System (IRIS);
- USEPA Provisional Peer Reviewed Toxicity Values (PPRTVs);

- Agency for Toxic Substances and Disease Registry (ATSDR) minimal risk levels (MRLs);
- USEPA PPRTV screening toxicity values; and
- USEPA Health Effects Summary Table.

For COPCs other than TPH mixtures (i.e., VOCs), if the most protective toxicity value was available in the OEHHA Toxicity Criteria Database (TCDB; Cal-EPA, 2016), then the OEHHA value was used.

For TCE, the updated USEPA inhalation IUR of 4.1E-06 µg/m^3 and oral cancer slope factor of 4.6E-02 mg/kg-day^{-1} were used in this HHRA, which are the most recent USEPA published toxicity values for TCE (USEPA 2017). Moreover, because TCE is considered a mutagen, age-dependent adjustment factors were used as outlined in the USEPA RSL guidance (USEPA 2017).

The non-cancer and cancer toxicity values for the COPCs evaluated in the HHRA are provided in Table 6.

5.5 RISK CHARACTERIZATION

Risk characterization is the culmination of the risk assessment process (USEPA, 1992b). It integrates the results of the identification of COPCs, exposure assessment, and toxicity assessment to describe the risks to individuals and populations in terms of extent and severity of probable adverse health risks under both current and anticipated future land use conditions. Because the development of carcinogenic and non-carcinogenic effects is assumed to be caused by different mechanisms of action, different methods will be used to evaluate these effects (Cal-EPA, 1996; USEPA, 1989 and 2009b).

Cancer risk (CR) values are expressed in scientific notation in terms such as 1 x 10^{-6} (or 1E-06). A CR of 1E-06 means that an exposed individual may have an added one-in-one million chance of developing cancer over a lifetime, or one person among one million exposed people might be expected to develop cancer resulting from exposure to Site-related COPCs.
