A SUBSIDIARY OF MATERIALS TESTING, INC.

Project No. VV5181
2 June 2021

Mr. Eric Zweig, Director of Planning
Edenbridge Homes
21771 Stevens Creek Boulevard, Suite 200A
Cupertino, CA 95014

Subject: APN 041-170-009
3090 Browns Valley Road
Napa, Napa County, California
PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Zweig:

In accordance with your authorization, **KC ENGINEERING COMPANY** has completed a Phase I Environmental Site Assessment (ESA) of the property identified as Assessor's Parcel Number (APN) 041-170-009, located at 3090 Browns Valley Road in Napa, Napa County, California. The approximate 3.41-acre property currently contains a residence, a guest house, and several barns, workshops, and sheds.

The accompanying report presents our conclusions and recommendations based on our investigation and review. Should you have any questions relating to the contents of this report, or should you require additional information, please contact our office at your convenience.

SUMMARY

This Phase I ESA addresses Napa County APN 041-170-009, located at 3090 Browns Valley Road in Napa, Napa County, California. Historical research conducted for this assessment indicates that the property consisted of vacant land from at least 1902 to 1942. The southern portion of the property contained an orchard from approximately 1947 to 1951, and consisted of vacant land from at least 1957 to 2021. A barn/workshop was located on the central portion of the property from at least 1947 to 2021, and two residences have been located on the central portion of the property from at least 1951 to 2021. A shed/workshop was added to the northwest portion of the property by 1968; a shed was added to the northwest portion of the property by 1982; and a pole barn was fairly recently added to the central eastern portion of the property. Napa Creek, and intermittent stream, has been located on and adjacent to the northern portion of the property from 1902 to 2021. No significant data gaps or data failures were encountered during the course of this assessment.

The southern portion of the property historically contained an orchard from approximately 1947 to 1951, implying the possible past use of agricultural chemicals (pesticides, insecticides, and/or herbicides) on the property. These compounds tend to biodegrade over time, and it is **KC ENGINEERING COMPANY'S** experience that residual concentrations of these chemicals found at similar sites are rarely discovered at levels requiring regulatory action. The past agricultural use of the property is not considered a recognized environmental condition (REC). However, some Cities and/or Counties require analytical testing on former agricultural properties prior to approving development.

The property was not identified as a hazardous material use, storage, disposal, or release site on any of the 134 federal, state, local, tribal, and proprietary records databases reviewed for this assessment. Institutional controls and engineering controls were not identified for the subject property. Oil and gas wells were not identified on the subject property. The search of regulatory lists for hazardous material sites in the vicinity of the property did not identify any open hazardous material release sites, or any obvious potential off-site sources of contamination within the ASTM-specified approximate minimum search distances (up to one mile) of the subject property. No obvious RECs for the property were noted from the 134 databases reviewed.

The property currently contains a residence, a guest house, and several barns, workshops, and sheds. Regulated quantities of hazardous materials including underground storage tanks (USTs), aboveground storage tanks (ASTs), and 55-gallon drums of chemicals were not observed to be used, stored, or disposed of on the property during the recent site reconnaissance. No obvious RECs were observed for the property during the recent site reconnaissance. No current uses likely to involve the use, treatment, storage, disposal, or generation of significant quantities of hazardous substances or petroleum products were identified during the site reconnaissance.

Based on the research conducted for this assessment, it is **KC ENGINEERING COMPANY's** opinion that no obvious RECs, historical RECs, or controlled RECs were identified during the course of this assessment. No obvious conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products on, at, in, or to the subject property were identified during the course of this assessment. No further environmental investigation of the subject property appears warranted at this time. This opinion is based on the information provided to **KC ENGINEERING COMPANY** during the course of this assessment. Any data that is missing or was withheld from **KC ENGINEERING COMPANY** could alter our opinion.

INTRODUCTION

This report presents the findings of **KC ENGINEERING COMPANY's** Phase I ESA conducted for APN 041-170-009, located at 3090 Browns Valley Road in Napa, Napa County, California. The property currently contains a residence, a guest house, and several barns, workshops, and sheds.

The purpose of this assessment is to permit the client to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. This assessment is intended to constitute "all appropriate inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C.§9601(35)(B)". AAI is only the first step to establishing the ability to qualify for CERCLA liability protection – "continuing obligations" apply after purchase.

This evaluation has been performed at your request to identify, to the extent feasible pursuant to the processes prescribed in ASTM E 1527-13, RECs in connection with the subject property. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Hazardous substances are defined pursuant to CERCLA 42 U.S.C.§9601(14), as interpreted by EPA regulations and the courts. A controlled REC is defined as "a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls". A historical REC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls".

KC ENGINEERING COMPANY performed this Phase I ESA for Edenbridge Homes, in accordance with ASTM Standard E 1527-13, *Standard Practice for Environmental Site Assessments*. This report is prepared for the sole use and benefit of Edenbridge Homes, and is based in part upon data provided by Edenbridge Homes and their representatives. Neither this report, nor any of the information contained herein, shall be used or relied upon for any other purpose by any person or entity other than Edenbridge Homes.

Scope of Services

KC ENGINEERING COMPANY's services were performed in accordance with our proposal dated 4 May 2021 and in general conformance to the guidelines presented in ASTM Standard E 1527-13, *Standard Practice for Environmental Site Assessments*. **KC ENGINEERING COMPANY** performed the following tasks in order to identify RECs on and in the immediate vicinity of the subject site:

- Conducted a visual survey of the property to evaluate on-site hazardous material use, storage, and disposal activities.

- Performed a visual reconnaissance of the immediately adjacent sites.

- Interviewed the client representative regarding specialized knowledge, purchase price, and commonly known information via a User Provided Information Questionnaire. The property is currently unoccupied, and therefore current occupants of the property were not interviewed during the site reconnaissance.

- Reviewed readily available literature and historical documentation for the property to attempt to determine historical site usage from the time of the property's first developed use. Historical documents prior to 1940 were reviewed when available. Documents reviewed include historical U.S.G.S. topographic maps, historical aerial photographs, Sanborn fire insurance maps, building department records, and historical city directories.

- Conducted a file review with the local Environmental Health Department and Regional Water Quality Control Board's GeoTracker website.

- Reviewed 134 reasonably ascertainable regulatory agency databases concerning chemical use, storage, and disposal for the subject property and surrounding sites.

- Searched for environmental cleanup liens and activity and use limitations (AULs).

- Prepared this report presenting our findings, conclusions and recommendations.

SITE DESCRIPTION

The approximate 3.41-acre property is located at 3090 Browns Valley Road in Napa, Napa County, California. The property is situated along the north side of Browns Valley Road, west of Robinson Lane. Access to the property is made from Browns Valley Road, a paved road. The property is identified as APN 041-170-009, and currently contains a residence, a guest house, and several barns, workshops, and sheds. The predominant land uses in the vicinity of the property are residential and a park (see Plates I, II, and III: Vicinity Map, Site Sketch, and Aerial Photograph, respectively).

The elevation of the property is approximately 86 feet above sea level. The topography in the immediate vicinity of the property is relatively flat, with an overall downward gradient towards the east (U.S.G.S. Topographic Map, Napa Quadrangle, 1980).

Hydrology

No wells were observed on the property during the recent site reconnaissance; however, **KC ENGINEERING COMPANY** was informed that one well is located beneath the guest house. Depth to groundwater information was not available for this on-site well.

Depth to groundwater was historically measured between 17.9 and 19.8 feet below the ground surface (bgs) on October 3, 1977 in wells located approximately 0.45-miles west of the property. No current depth to groundwater information was available for the property or vicinity (EDR Inquiry Number 6498900.2s and RWQCB GeoTracker Website). Fluctuations in the groundwater table can occur with variations in seasonal rainfall, development of the site and vicinity, and irrigation.

Napa Creek, an intermittent stream, flows in an easterly direction along the northern portion of the property. In the absence of reported groundwater flow direction information, it is assumed that groundwater follows the surface topography, and flows towards the east.

The northern portion of the property adjacent to Napa Creek is identified within the bounds of a 1% Special Flood Hazard Area (formerly called a 100-year flood zone), and is identified as a wetland area on the National Wetland Inventory and the State Wetlands database (EDR Inquiry Number 6498900.2s).

SITE RECONNAISSANCE

A field reconnaissance of the site was conducted by Mrs. Amy Lee on May 25, 2021. Mrs. Lee is a Registered Environmental Property Assessor with over twenty-six (26) years' experience conducting Phase I ESAs. The property was visually and/or physically observed by walking throughout the property. Photographs of the subject property are included in Appendix A. The following observations were made:

The approximate 3.41-acre property is located at 3090 Browns Valley Road. The property is situated along the north side of Browns Valley Road, west of Robinson Lane. Access to the property is made from Browns Valley Road, a paved road. The predominant land uses in the vicinity of the property are residential and a park.

The property contains several structures, including a main residence, a guest house, a car port, a barn/workshop, a shed/workshop, a shed, and a pole barn. An asphalt-paved driveway is located on the eastern end of the property, which leads from Browns Valley Road to the structures located on the central portion of the property. The main residence consists of a single-story wood-framed structure with a raised foundation. The approximate 1,815-square foot residence contains two bedrooms, two bathrooms, a kitchen, a dining room, a living room, and an office. A carport with a concrete slab foundation is located to the west of the main residence. Two wood-framed storage rooms with concrete slab foundations are located to the west of the carport, and an outdoor sink area with a concrete ground surface is located to the southwest of the carport.

The guest house consists of a single-story wood and corrugated metal structure with a raised foundation. The approximate 648-square foot guest house contains a bedroom, a bathroom, a living room, and a kitchen. A floor drain was observed in the bathroom of the guest house.

A two-story barn/workshop building is located to the north of the residences. The approximate 1,085-square foot barn/workshop consists of a wood-framed structure. The southern end of the barn/workshop has a dirt and gravel ground surface, and the remainder of the building has a raised foundation. The barn/workshop contains a restroom, a shower, and a sink area.

A shed/workshop is located just north of the barn/workshop. This building consists of a single-story wood and corrugated metal structure with a raised foundation. What appeared to be a chicken coop was located along the exterior of this building.

A small single-story wood-framed shed with a gravel ground surface is located near the northwest corner of the property. A pole barn is located on the central eastern portion of the property. The approximate 1,104-square foot pole barn has a gravel ground surface. A work bench with minor quantities of oil, paint thinner, and spray paints was observed along the

exterior east side of the pole barn, along with several empty gasoline cans and an empty 5-gallon water seal can.

A small fountain is located in a redwood tree grove to the north of the main residence. A gravel-surfaced circular drive is located to the north of the main residence, which leads to the barns, workshops, and sheds located on the property. The remainder of the property consists of grass lawn areas. Napa Creek, and intermittent stream, is located on and adjacent to the northern portion of the property.

Regulated quantities of hazardous materials including 55-gallon drums of chemicals, USTs, and ASTs were not observed to be used, stored, or disposed of on the property. Electric and gas service are provided to the property by Pacific Gas and Electric Company. An on-site well and the City of Napa Water Division provide water to the property. The property is connected to an on-site septic system. Refuse collection service is provided to the property by Napa Recycling and Waste Services. Utility-pole mounted transformers were observed along the eastern property boundary.

The presence of an obvious wastewater discharge was not observed on the property. No sumps, basements, elevators, storm drains, hoists, or hydraulic lifts were observed on the property. Waste management and solid waste disposal activities were not observed on the property. Neither stained soils, stained pavement, discolored water, nor stressed vegetation were noticeable on the subject property. Strong, pungent, or noxious odors were not noticeable during the site reconnaissance. Standing surface waters including pits, ponds, and lagoons were not observed on the property. Storm water flows into Napa Creek and onto adjacent parcels.

No current uses likely to involve the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products were identified during the site reconnaissance. No obvious RECs were observed for the property during the site reconnaissance.

SURROUNDING PROPERTIES

The following current uses of adjoining properties were visually and/or physically observed during the recent site reconnaissance:

- Adjacent to the north: Residences located at 3145 and 3141 Kingston Avenue.
- Adjacent to the south: Browns Valley Road, followed by Westwood Hills Park located at 3107 Browns Valley Road.
- Adjacent to the west: Residences located at 3096 and 3138 Browns Valley Road.
- Adjacent to the east: Residence located at 3084 Browns Valley Road.

INTERVIEWS AND USER PROVIDED INFORMATION

All interviews were conducted by Amy E. Lee, a Registered Environmental Property Assessor with over twenty-six (26) years' experience conducting Phase I ESAs. **KC ENGINEERING COMPANY** conducted an interview with the client representative, Mr. Eric Zweig of Edenbridge Homes, via a User Provided Information Questionnaire. A copy of the completed questionnaire is included in Appendix B.

Mr. Zweig is not aware of any RECs for the property, including environmental cleanup liens, activity and land use limitations, engineering controls, or institutional controls. The purchase price being paid for this property reasonably reflects the fair market value of the property. Mr. Zweig is not aware of any obvious indicators that point to the presence or likely presence of contamination at the property. This Phase I ESA is being performed to qualify for land owner liability protections to CERCLA liability.

A preliminary title report prepared by First American Title Company of Napa dated April 16, 2021 was provided to **KC ENGINEERING COMPANY** for review. The owners of the property were identified as Daniel L. Breit (50%) and Theodore J. Wigger (50%). No obvious RECs were identified for the property from the title report review.

The property is currently unoccupied, and therefore occupants of the property were not interviewed during the recent site reconnaissance.

KC ENGINEERING COMPANY communicated with Mr. Stefan Jezycki, the realtor/property manager, via email correspondence. Mr. Jezycki stated that a well is located beneath the guest house. The property is also connected to the City of Napa Water Division. A valve is located near the main house, which can switch the water supply between the City water supply and the on-site well. Currently, the well is supplying water to the property. The property is connected to an on-site septic system. A septic tank is located on the central portion of the property, north of the main residence.

LOCAL ENVIRONMENTAL HEALTH DEPARTMENT

A file review was conducted with the Napa County Department of Environmental Management, to determine if any files pertaining to regulated quantities of hazardous materials or permits for installation and/or removal of USTs exist for the subject property. No records were found for the subject property.

RECORDS REVIEW

In order to obtain information regarding current and past RECs at the site, reasonably ascertainable information from several sources was researched. The results of this research are outlined below.

Aerial Photographs

In an attempt to identify the likelihood of past property uses having led to RECs in connection with the property or surrounding area, select aerial photographs of the subject property and surrounding areas were reviewed. Photographs taken in 1947, 1957, 1959, 1968, 1973, 1982, 1993, 2006, 2009, 2012, and 2016 were available for review.

A barn was visible on the central portion of the property in 1947. Orchard trees were located on the southern portion of the property in 1947, and the northern portion of the property was vacant. The orchard trees were removed from the property by 1957. Two residences and a barn were located on the central portion of the property from 1957 to 2016. An additional shed/workshop was added to the northwest portion of the property by 1968, and a shed was added to the northwest portion of the property by 1982. The remainder of the property consisted of vacant land from 1957 to 2016.

Napa Creek adjoined the northern portion of the property from 1947 to 2016, followed by vacant land from 1947 to 1959, and by residences from 1968 to 2016. Browns Valley Road adjoined the property to the south from 1947 to 2016, followed by a barn and vacant land from 1947 to 1973, and by a paved parking lot and vacant land (a park) from 1982 to 2016.

An orchard adjoined the property to the west in 1947, and a residence adjoined the property to the west from 1957 to 2016. An additional residence adjoined the property to the west from 1982 to 2016. An orchard adjoined the property to the east in 1947, and an orchard and a residence adjoined the property to the east from 1957 to 1968. A residence adjoined the property to the east from 1973 to 2016.

The southern portion of the property consisted of an orchard in 1947. It is possible that agricultural chemicals (pesticides, insecticides, and/or herbicides) were used on the property during this time period. These compounds tend to biodegrade over time, and it is **KC ENGINEERING COMPANY'S** experience that residual concentrations of these chemicals found at similar sites are rarely discovered at levels requiring regulatory action. The past agricultural use of the property is not considered a REC. No obvious RECs for the property were identified from the historical aerial photographs reviewed. However, some Cities and/or

Counties require analytical testing on former agricultural properties prior to approving development.

Historical Topographic Maps

In an attempt to assess past property uses which may have had an environmental impact on the property or surrounding area, select historical topographic maps depicting the subject property and surrounding areas were reviewed. Maps dated 1902, 1942, 1951, 1968, 1973, and 1980 were available for review.

The property consisted of vacant land from 1902 to 1942. Two residences and a barn were located on the central portion of the property from 1951 to 1980. The remainder of the property was shown as an orchard from 1951 to 1973. The southern portion of the property consisted of vacant land in 1980, and orchard trees remained to the north of the residences and barn in 1980. Although topographic maps dated from 1951 to 1980 show orchards located on the property, aerial photographs from 1957, 1959, 1968, 1973, and 1982 clearly show that no orchards were located on the property from at least 1957 to 1982.

Napa Creek, an intermittent stream, adjoined the northern portion of the property from 1902 to 1980, followed by vacant land from 1902 to 1951, and by a residential area (shaded pink) from 1968 to 1980. Browns Valley Road adjoined the property to the south from 1902 to 1980, followed by vacant land from 1902 to 1942, and by a barn and vacant land from 1951 to 1980.

Vacant land adjoined the property to the west from 1902 to 1942. Orchards adjoined the property to the west in 1951, orchards and a residence adjoined the property to the west from 1968 to 1973, and a residence adjoined the property to the west in 1980. Vacant land adjoined the property to the east from 1902 to 1942, and orchards and a residence adjoined the property to the east from 1951 to 1980.

The property contained an orchard in 1951. It is possible that agricultural chemicals (pesticides, insecticides, and/or herbicides) were used on the property during this time period. These compounds tend to biodegrade over time, and it is **KC ENGINEERING COMPANY'S** experience that residual concentrations of these chemicals found at similar sites are rarely discovered at levels requiring regulatory action. The past agricultural use of the property is not considered a REC. No obvious RECs for the property were identified from the historical topographic maps reviewed. However, some Cities and/or Counties require analytical testing on former agricultural properties prior to approving development.

Sanborn Fire Insurance Maps

During the course of this assessment, **KC ENGINEERING COMPANY** utilized Environmental Data Resources, Inc. (EDR) as an information source for historical Sanborn fire insurance maps. Sanborn maps for Napa were reviewed. Coverage of the property was not available (EDR Inquiry 6498900.3).

City Directories

Business directories including city, cross reference, and telephone directories were reviewed, if available, at approximate five-year intervals for the years spanning from 1923 through 2017. During the course of this study, **KC ENGINEERING COMPANY** utilized EDR as an information source for historical city directories. The property address was not listed from 1923 to 1960. The following listings were found for the property address:

1965: Willard F. Moyer
Rear Vacant
1970 to 1981: Henry M. Wigger
Rear Willard F. Moyer
1990: Henry M. Wigger
1994: Mary Wigger
1996: Mary Wigger
M. J. Wolfe
1999 to 2017: Theodore Wigger

No obvious RECs for the property were identified from the historical city directories reviewed.

Building Department Records

A search of Napa County and Napa City building department records was conducted by EDR on May 18, 2021. Napa County permits dated from 1960 to 2021 were researched, and Napa City permits dated from 1980 to 2021 were researched. No permits were found for the property address (EDR Inquiry 6498900.8).

Environmental Liens and Activity and Use Limitations

During the course of this assessment, **KC ENGINEERING COMPANY** utilized EDR as an information source for environmental cleanup liens and AULs. A search was made for the existence of environmental cleanup liens and AULs against the subject property that are filed or

recorded under federal, tribal, state, or local law. No environmental liens or AULs were identified for the property (EDR Inquiry Number 6498900.7). The property owner was identified as Theodore J. Wigger, Trustee.

REGULATORY AGENCY DATABASE REVIEW

To ascertain reported areas of possible environmental impairment on or in the vicinity of the subject property, one hundred and thirty-four (134) federal, state, local, tribal, and proprietary records databases were reviewed. During the course of this study, **KC ENGINEERING COMPANY** utilized EDR as an information source for environmental records. Records were also reviewed on the California Regional Water Quality Control Board's GeoTracker website. A complete copy of the EDR Radius Map with GeoCheck Report is included in Appendix C.

The subject property and adjoining parcels were not identified as hazardous material use, storage, disposal, or release sites on any of the 134 databases reviewed for this assessment. Institutional controls and engineering controls were not identified for the subject property. Oil and gas wells were not identified on the subject property.

Eight (8) hazardous material use, storage, disposal, or release sites were identified within the ASTM-specified approximate minimum search distances (up to a one-mile radius) of the subject property. Four (4) of the eight identified sites have not had a reported spill or release of hazardous materials, and are therefore not considered a REC for the subject property. The four identified hazardous material release sites have all received regulatory agency closure, and they are therefore not considered a REC for the subject property.

No open hazardous material release sites or obvious potential off-site sources of contamination were identified within the ASTM-specified approximate minimum search distances (up to one-mile) of the subject property. No obvious RECS were identified for the property from the 134 databases reviewed.

FINDINGS AND OPINION

Historical research conducted for this assessment indicates that the property consisted of vacant land from at least 1902 to 1942. The southern portion of the property contained an orchard from approximately 1947 to 1951, and consisted of vacant land from at least 1957 to 2021. A barn/workshop was located on the central portion of the property from at least 1947 to 2021, and two residences have been located on the central portion of the property from at least 1951 to 2021. A shed/workshop was added to the northwest portion of the property by 1968; a shed was added to the northwest portion of the property by 1982; and a pole barn was fairly recently added

to the central eastern portion of the property. Napa Creek, and intermittent stream, has been located on and adjacent to the northern portion of the property from 1902 to 2021. No significant data gaps or data failures were encountered during the course of this assessment.

The southern portion of the property historically contained an orchard from approximately 1947 to 1951, implying the possible past use of agricultural chemicals (pesticides, insecticides, and/or herbicides) on the property. These compounds tend to biodegrade over time, and it is **KC ENGINEERING COMPANY'S** experience that residual concentrations of these chemicals found at similar sites are rarely discovered at levels requiring regulatory action. The past agricultural use of the property is not considered a REC. However, some Cities and/or Counties require analytical testing on former agricultural properties prior to approving development.

The property was not identified as a hazardous material use, storage, disposal, or release site on any of the 134 federal, state, local, tribal, and proprietary records databases reviewed for this assessment. Institutional controls and engineering controls were not identified for the subject property. Oil and gas wells were not identified on the subject property. The search of regulatory lists for hazardous material sites in the vicinity of the property did not identify any open hazardous material release sites, or any obvious potential off-site sources of contamination within the ASTM-specified approximate minimum search distances (up to one mile) of the subject property. No obvious RECs for the property were noted from the 134 databases reviewed.

The property currently contains a residence, a guest house, and several barns, workshops, and sheds. Regulated quantities of hazardous materials including USTs, ASTs, and 55-gallon drums of chemicals were not observed to be used, stored, or disposed of on the property during the recent site reconnaissance. No obvious RECs were observed for the property during the recent site reconnaissance. No current uses likely to involve the use, treatment, storage, disposal, or generation of significant quantities of hazardous substances or petroleum products were identified during the site reconnaissance.

Based on the research conducted for this assessment, it is **KC ENGINEERING COMPANY's** opinion that no obvious RECs, historical RECs, or controlled RECs were identified during the course of this assessment. No obvious conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products on, at, in, or to the subject property were identified during the course of this assessment. No further environmental investigation of the subject property appears warranted at this time. This opinion is based on the information provided to **KC ENGINEERING COMPANY** during the course of this assessment. Any data that is missing or was withheld from **KC ENGINEERING COMPANY** could alter our opinion.

CONCLUSIONS

KC ENGINEERING COMPANY has performed a Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-13 of the property identified as APN 041-170-009, located at 3090 Browns Valley Road in Napa, Napa County, California. The approximate 3.41-acre property currently contains a residence, a guest house, and several barns, workshops, and sheds. Any exceptions to, or deletions from, this practice are described under the Scope of Services on Page 5 of this report.

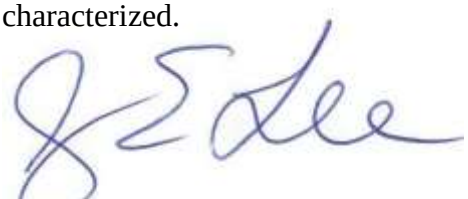
This assessment has revealed no obvious evidence of RECs, historical RECs, or controlled RECs in connection with the subject property. No further environmental investigation of the subject property appears warranted at this time.

CERTIFICATION

This Phase I ESA Report has been prepared by **KC ENGINEERING COMPANY** at the request of Edenbridge Homes, and has been reviewed and approved by the undersigned. The research, interviews, and field work conducted for this assessment were completed by Amy E. Lee, a Registered Environmental Property Assessor with over twenty-six (26) years' experience conducting Phase I ESAs.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR §312.10(b). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The scope of effort upon which this report is based is intended to provide a reasonable assessment of environmental risk for the client. This effort was not absolutely exhaustive and the quality of our assessment is necessarily dependent on the quality of the information supplied to **KC ENGINEERING COMPANY** by all sources cited. Inspection and data collection were carried out by **KC ENGINEERING COMPANY** staff according to accepted standards. However, inspection was mainly surficial and the identification of possible environmental risks or contamination was limited accordingly. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property. Therefore, this report does not carry with it any express or implied warranty that environmental risks associated with the subject site have been totally excluded or precisely characterized.



Amy E. Lee, R.E.P.A. #157732
Environmental Assessor

LIMITATIONS

At the present date, the findings of this report are valid for the property investigated. With the passage of time, significant changes in the conditions of a property can occur due to natural processes or works of man on this or adjacent properties. In addition, legislation or the broadening of knowledge may result in changes in applicable standards. Changes outside of our control may render this report invalid, wholly or partially. Therefore, this report should not be considered valid after a period of 180 days without our review, nor should it be used, or is it applicable, for any properties other than those investigated.

This report has been prepared for the exclusive use of Edenbridge Homes, as it pertains to the property described herein. The conclusions in this report are opinions, based on readily available information obtained to date, within the scope of work authorized by Edenbridge Homes. Use of, or reliance on the information and opinions contained in this report by other parties without first consulting this office is at those parties' own risk.

The results contained in this report are based upon the information acquired during this assessment. **KC ENGINEERING COMPANY** shall not be responsible for conditions or consequences arising from facts and information that were withheld or concealed, or not fully disclosed at the time that this evaluation was performed. **KC ENGINEERING COMPANY** is not responsible for errors or omissions in agency files or databases. It is possible that variations exist beyond or between points observed during the course of this assessment. Also, changes in observed conditions could occur due to contamination migration, variations in rainfall, temperature, and/or other factors not apparent at the time of the field evaluation. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property.

KC ENGINEERING COMPANY has strived to prepare this report in accordance with generally accepted geologic/environmental practices in this community, as well as good commercial and customary practice for ESAs. No warranty or guarantee is expressed or implied.

User Provided Information Questionnaire

USER-PROVIDED INFORMATION QUESTIONNAIRE

DATE: May 18, 2021
CLIENT: Mr. Eric Zweig, Edenbridge Homes
PROPERTY: APN 041-170-009
3090 Browns Valley Road
Napa City and County, California

The following information **MUST** be provided to **KC ENGINEERING COMPANY** in accordance with ASTM Standard E1527-13. Please complete this questionnaire and return it to **KC ENGINEERING COMPANY** at your earliest convenience.

1. **TITLE REPORT** – Please provide **KC ENGINEERING COMPANY** with a copy.

2. Are you aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

_____YES _✓_NO

3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

_____YES _✓_NO

4. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

_____YES _✓_NO

5. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

_____YES _✓_NO

6. Do you have any specialized knowledge or experience related to the property or nearby properties?

_____YES _✓_NO
(If yes, please list)

7. Are you aware of any commonly known or reasonably ascertainable information about the property or nearby properties that would help identify conditions indicative of releases or threatened releases?

_____YES _✓_NO
(If yes, please list)

8. Do you know the past uses of the property?

_____YES _✓_NO
(If yes, please list)

9. Do you know of specific chemicals that are present or once were present at the property?

_____YES _✓_NO
(If yes, please list)

10. Do you know of spills or other chemical releases that have taken place at the property?

_____YES _✓_NO
(If yes, please list)

11. Do you know of any environmental cleanups that have taken place at the property?

_____YES ✓ NO
(If yes, please list)

12. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

✓ YES _____NO

If no, is the lower purchase price due to contamination that is known or believed to be present at the property?

_____YES _____NO

13. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

_____YES ✓ NO

14. Property owner NAME Dan Breit
PHONE NUMBER_____

15. Property manager NAME Stefan Jezycki - Realtor - Engel & Volkers
PHONE NUMBER (707) 738-2945

16. Occupant NAME _____
PHONE NUMBER_____

17. Reason for performing Phase I Environmental Site Assessment?
    ✓ To qualify for land owner liability protections to CERCLA liability
    _____ OTHER: _____

18. Are you aware of any of the following documents that may exist for the property?

    a. Environmental Site Assessment Reports _____ YES ✓ NO
    b. Environmental Compliance Audit Reports _____ YES ✓ NO
    c. Environmental Permits (e.g. solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits) _____ YES ✓ NO
    d. Registrations for underground and aboveground storage tanks _____ YES ✓ NO
    e. Registrations for underground injection systems _____ YES ✓ NO
    f. Material safety data sheets _____ YES ✓ NO
    g. Community right-to-know plan _____ YES ✓ NO
    h. Safety plans, preparedness and prevention plans, spill prevention, countermeasure, and control plans _____ YES ✓ NO
    i. Reports regarding hydro geologic conditions on the property or surrounding area _____ YES ✓ NO
    j. Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property _____ YES ✓ NO
    k. Hazardous waste generator notices or reports _____ YES ✓ NO
    l. Geotechnical studies _____ YES ✓ NO
    m. Risk assessments _____ YES ✓ NO
    n. Recorded activity and use limitations _____ YES ✓ NO

If yes on (a-n) above, will copies be provided to **KC ENGINEERING COMPANY** for review?

_____ YES _____ NO

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 12/17/2020 has revealed that there are 2 Cortese sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Site History:	Former gas station site at some time in the past (unknown duration or period). The site is currently a vacant lot located at the southwest corner of Browns Valley Road and Laurel Street in the town of Napa. Surrounding land use is residential, with residences north and east of the site, and apartment complexes west and south of the site. The site topography is relatively flat at an elevation of approximately 80 feet above mean sea level. Former gas station facilities included three 10,000-gallon underground storage tanks (USTs), one 1,000-gallon used oil UST, two dispenser islands and associated product piping, two hydraulic hoists, and a station building. The site is currently owned by the City of Napa. The City of Napa plans to build a fire station on the site (station # 5).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 10/05/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

3090 BROWNS VALLEY ROAD
3090 BROWNS VALLEY ROAD
NAPA, CA 94558

TARGET PROPERTY COORDINATES

Latitude (North):	38.304127 - 38° 18' 14.86''
Longitude (West):	122.318921 - 122° 19' 8.12''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	559550.9
UTM Y (Meters):	4239572.5
Elevation:	86 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5602154 NAPA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

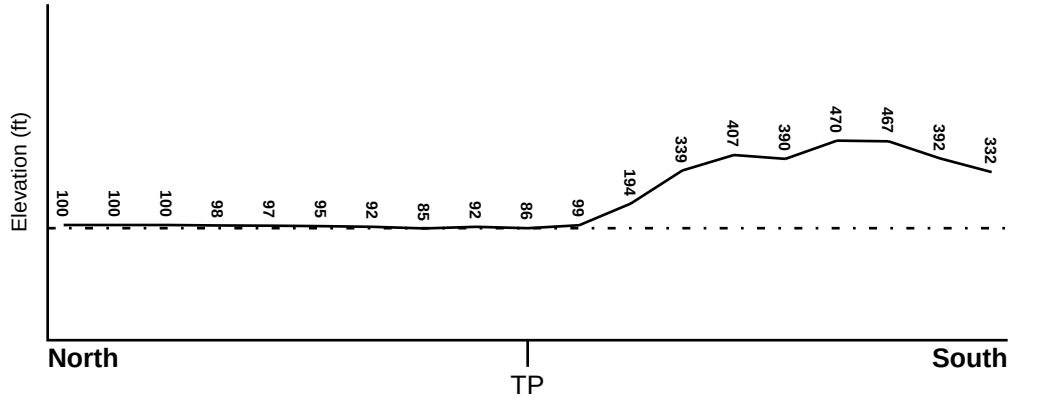
TOPOGRAPHIC INFORMATION

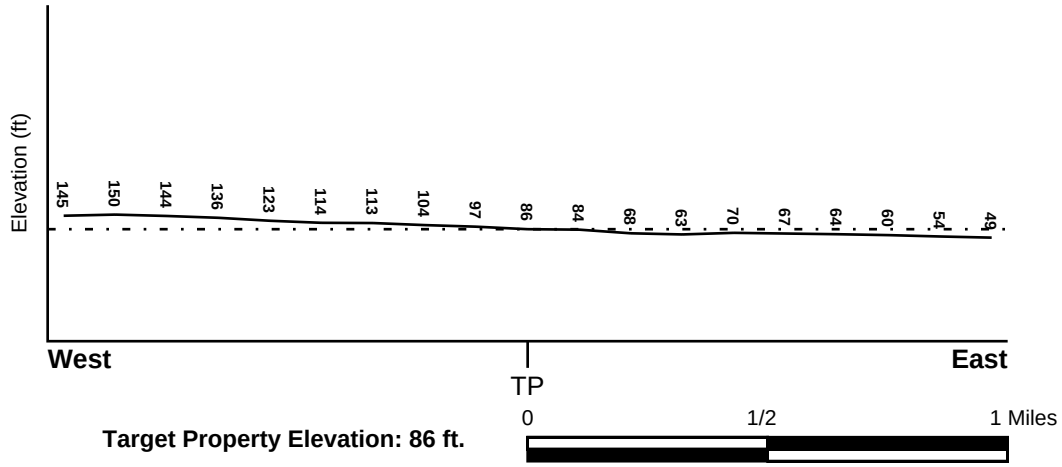
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 86 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06055C0512E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06055C0504F	FEMA FIRM Flood data
06055C0508F	FEMA FIRM Flood data
06055C0516F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NAPA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: COLE

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	7 inches	64 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: Millsholm

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 38 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 1.4	Max: Min:
2	11 inches	16 inches	unweathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 14 Min: 1.4	Max: Min:

Soil Map ID: 3

Soil Component Name: BALE

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	24 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.5 Min: 5.6
2	24 inches	59 inches	stratified gravelly sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.5 Min: 5.6

Soil Map ID: 4

Soil Component Name: FORWARD

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	3 inches	35 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	35 inches	38 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 5

Soil Component Name: BOOMER

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	3 inches	44 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	44 inches	48 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 6

Soil Component Name: BALE

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

2021 CURRICULUM VITAE / RESUME

DAVID V. CYMANSKI, P.E., G.E.

Education: 1990 - Bachelor of Science in Civil Engineering
California State University at Chico

Affiliations: American Society of Civil Engineers, Geo Institute (ASCE)
California Geotechnical Engineers Association (CalGeo)
California Council of Testing and Inspection Agencies (CCTIA)
ACI, PTI, ACEC & ASTM

Registrations: 1994 - California Registered Civil Engineer, C 51421
2003 - California Registered Geotechnical Engineer, GE 2585
2008 - Oregon Registered Professional Geotechnical Engineer, P.E. #80732

Certifications: 1990 - Certified Special Inspector, Reinforced Concrete, ICC #1064377-88
1990 - ACI Concrete Field Testing Technician – Grade I, #00947884

EXPERIENCE

1996 to Present **MATERIALS TESTING, INC. /KC ENGINEERING CO., Vacaville & Redding, CA**

- Owner, President & Principal Engineer
- Responsible charge of geotechnical engineering, materials testing, special inspection and environmental consulting.
- Manage and perform subsurface investigation and geotechnical design activities.
- Manage Environmental Site Assessments.
- Perform geotechnical Expert Witness services; construction materials evaluations, and forensic studies of distressed structures, concrete foundations, pavements, retaining walls, drainage & landslides.
- Engineering oversight and compaction testing for all grading, excavation and earthwork filling operations.
- Evaluate and test subsurface ground improvement construction & underground utility backfill placement.
- Analyze and recommend pavement designs including lime & cement modification and stabilization.
- Foundation design and review including piling, drilled piers, caissons, footings & post-tension slabs.
- Provide soil criteria and analysis of soil nail, tie-back, MSE, CMU & conventional retaining walls.
- Evaluate and analysis of global slope stability, landslides & earth movement.
- Bridge, dams and canal studies.
- Responsible Engineer for **MTI-KCE** laboratory and special inspection services in soils, reinforced concrete, hot mix asphalt, post-tensioning, structural masonry, reinforcing, high-strength bolting, structural steel welding, non-destructive examination and fireproofing.

1989 to 1996 **TERRASEARCH, INC., Fairfield & Dublin, CA**

- Project Engineer & Staff Engineer.
- Perform geotechnical engineering investigations for commercial, industrial, residential and public works.
- Perform compaction testing of earthwork operations.
- Perform special inspections of reinforced and pre-stressed concrete, structural masonry & structural steel.
- Supervise engineering technicians and laboratory during grading and foundation operations.
- Review civil and structural plans for geotechnical conformance.
- Evaluate distressed structures and perform forensic investigations of earthwork projects.

KC ENGINEERING COMPANY
A SUBSIDIARY OF MATERIALS TESTING, INC.

AMY E. LEE Years in Field: 26
Environmental Professional Years with **KC ENGINEERING COMPANY**: 19

EDUCATION:

B.S., Forestry and Natural Resources Management
California Polytechnic State University, San Luis Obispo, CA, GPA 3.5

REGISTRATIONS:

REPA – Registered Environmental Property Assessor #157732
REA - Registered Environmental Assessor I-07387 from 1999 through 2012 (program terminated on July 1, 2012)
OSHA/EPA 40-Hour Health and Safety Training for Hazardous Waste Operations and Yearly 8-Hour Refresher Course

PROFESSIONAL EXPERIENCE:

Mrs. Lee has more than twenty-six years' experience in performing all aspects of Environmental Site Assessments, site characterizations, and remediation plans in conformance with ASTM Standards. Mrs. Lee has performed Phase I and Phase II Assessments on commercial, industrial, and residential properties throughout California. Her work includes conducting site reconnaissances, evaluating historical research, reviewing regulatory agency records and government databases, interpreting aerial photographs, sampling soil and groundwater, interpreting laboratory data, and preparing final reports that include recommendations for remediation. Mrs. Lee has authored numerous Closure Reports, Work Plans, and Health and Safety Plans for regulatory agency submittal.

Representative Experience:

- *Phase I Environmental Site Assessments*. As an Environmental Professional, Mrs. Lee specializes in performing Phase I ESAs in conformance with ASTM Standard E 1527-13. Phase I ESAs are conducted to identify recognized environmental conditions in connection with a property. The term "recognized environmental conditions" means the

presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- *Environmental Audits*. Mrs. Lee has conducted Site Closure Environmental Audits for properties in southern California. Services performed include an initial site reconnaissance to identify areas of potential environmental concern; soil and groundwater sampling and analysis; and preparation of a Site Closure Environmental Audit report.

- *Phase II Environmental Site Assessments*. Mrs. Lee has conducted numerous Phase II ESAs on properties located throughout the state of California. Phase II studies have been performed to determine the presence or absence of soil and groundwater contamination at a property after a recognized environmental condition has been identified during the course of a Phase I ESA. Mrs. Lee has experience identifying and defining petroleum hydrocarbon, solvents, agricultural chemicals, and metals-based contamination plumes in both the soil and groundwater.

- *Soil Remediation*. Following the identification and delineation of contamination plumes, Mrs. Lee has coordinated and overseen soil remediation activities including remediation by excavation and in-situ bio-remediation.

- *Regulatory Agency Case Closure*. Mrs. Lee has authored several Closure Reports for regulatory agency submittal following successful remediation of contaminated properties. Mrs. Lee also authors Closure Reports for underground storage tank removal activities.
