Site History:	

The subject site comprises two parcels that are part of the Rohr manufacturing facility. Two buildings (Buildings 99 and 100) are located on APN 567•-022•-30•-00; one building (Building 29) is located on the eastern portion of 571•-330•-29•-00. Rohr purchased APN 567•-022•-30•-00 in 1986. The parcel has been used primarily for administrative purposes. Test laboratories are located in Building 100. Building 29 on the eastern portion of 571•-330•-29•-00 was constructed in the late 1950s and has primarily been used for tooling and machining, and office space for most of its history. The northernmost portion served as the Maintenance Department for the facility. The building currently houses a number of laboratories, kitting, an After Market Spares Warehouse, Service Center and FAI repairs, storage, tool calibration, product development and office space. Prior to Rohr•fs ownership, the subject site had a variety of other historical uses, including agriculture, truck engine repair, and a possible lumber yard.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violations

Violation Date: 12/18/2013 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** San Diego County Department of Env Health
Citation: 23 CCR 16 2636(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)
Violation Notes:

Returned to compliance on 12/19/2013.

Violation Description:

Failure to continuously monitor the interstitial space of the tank, piping and/or sumps sump such that the leak detection activates an audible/visual alarm when a leak is detected.

Violations

Violation Date: 12/18/2013 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** San Diego County Department of Env Health
Citation: 23 CCR 16 2638 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638
Violation Notes:

Returned to compliance on 12/18/2013.

Violation Description:

Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test

Violations

Violation Date: 12/14/2016 ***Violation Source:*** CERS

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

CUF Case: YES
Lead Agency: SAN DIEGO RWQCB (REGION 9)
Case Worker: LT
Local Agency:
RB Case No: 2090042
Local Case No:
File Location: Regional Board
Potential COC: Gasoline
Potential Media of Concern: Aquifer used for drinking water supply
Begin Date: 4/1/2003
How Discovered:
How Discovered Description:
Stop Method: Other Means
Stop Description: OTHER MEANS **Note: Many records provided by the department have a truncated [Stop Description] field.
Calwater Watershed Name: Sweetwater - Lower Sweetwater - La Nacion (909.12)
DWR GW Subbasin Name: Coastal Plain Of San Diego (9-033)
Disadvantaged Community: Disadvantaged Community
CalEnvScreen Score:
Coordinate Source: Manual Entry on Screens
Discharge Cause: Other
Discharge Source:
EPA Region: 9
Leak Reported Dt: 2003-10-10 00:00:00
Military DoD Site: No
No Further Action Dt:
Qty Rlsd Gallons: 200
Facility Project Sub Type:
Calenviroscreen 3 Score: 76-80%
Calenviroscreen 4 Score: 90-95%
Site History:

and the southern portion of former Colorado Avenue (Figure 2). The southeastern portion of the site (lots 7, 8, 17, and 18) was developed as a Humble-branded gasoline station from 1966 to 1972 and operated as an Exxon-branded gasoline service station from 1972 to 1978. The remaining portion of the site was vacant until developed as residential homes in approximately 1953. In 1980, the San Diego Metropolitan Transit Development Board acquired the site and developed it as an MTS train and bus station and associated parking lot. The former site configuration for the Humble/Exxon service station consisted of a service station building with two service bays, one hydraulic hoist, one clarifier, two dispenser islands south of the service station building, and three 8,000-gallon underground storage tanks (USTs), west of the service station building. The installation and removal dates of these improvements were not documented in the City of Chula Vista building records; however, station construction permits were obtained by Humble Oil in 1965. As part of an investigation for an adjacent gasoline station, PSH was encountered on the site. Due to the presence of petroleum hydrocarbons and the historic site use the DEH opened a case on this site.

Title Description Comments:

Meeting to discuss results of focused soil and groundwater investigation Meeting with ExxonMobil and MTS to discuss results from focused soil and groundwater investigation and proposed further work. ExxonMobil will submit report of the focused soil and groundwater investigation by the end of Dec 2009. ExxonMobil will begin quarterly groundwater monitoring and free product removal after the wells are transferred to ExxonMobil. ExxonMobil will also evaluate whether the free product plume from the adjacent ARCO facility has migrated onto the site. Issued letter summarizing meeting on 12/1/09.

Title Description Comments:

Project Status Meeting Meeting with ExxonMobil and consultants to discuss project status. ExxonMobil has completed three "vac truck" free product removal events. They have been able to recover a good amount of product from MW-5. The assessment has been delayed due to issues with site access. Both the City and MTS have required more items then expected (such as having each subcontractor be a signature to the Right of Entry Agreement) and is taking longer. They requested an extension of the due dates for the report and CAP. Also requested to eliminate sampling the only two wells without free product. Responses submitted in Sept. 15, 2010 Letter.

Title Description Comments:

Update on Remediation Progress - RP (Exxon Mobil representative Ms. Marla Madden) is working with the property owner and franchisee of Carl's Jr. to obtain access. If unsuccessful, RP to send San Diego Water Board (SDWB) a letter stating that installation of poles on Carl's Jr. property is the only feasible option. Upon receiving this letter, SDWB shall send a 'Request for Property Access' letter to the property owner and franchisee., San Diego Water Board contacted Mr. Mike Borchard (Carl's Jr. franchisee) to discuss property access issues., The San Diego Water Board (SDWB), RP (Exxon Mobil), and ETIC had a conference call. SDWB to contact franchisee of Carl's Jr. to request for access. SDWB also suggested the RP to conduct remediation and submit deliverables as soon as possible without amending the Order.

RAT Def: Response action that requires expeditious attention to reduce imminent and substantial dangers to human health, welfare, or the environment or an emergency response required within hours or days to address acute situations involving actual or potential threat to human health, the environment, or real or personal property due to the release of a hazardous substance. Characterization of a removal action as removal, not immediate removal or planned removal, started at the beginning of FY 1987. This code now takes the place of immediate removal (IR) and planned removal (PR).

Completed Activities

Title: Site Screening
Title Link:
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Site Screening
Date Completed: 1/26/1995
Comments: Site was identified from a non-emergency release report dated August 1994. The San Diego Unified Port District, a prospective buyer, conducted a Phase I and Phase II assess- ments and found that the site is contaminated with copper, zinc, and lead. A PEA notification letter was sent to the Port.

Site History:

In April 1995, Liquid Phase Hydrocarbons were identified on site. Site assessment activities have been ongoing to determine the extent of the contamination plume for this site. Joint monitoring is occuring between this site and the MTDB site (DEH case # H39642-001). Joint monitoring is utilized to compare both sites and ensure that the data will represent a larger area for data analysis. Please see the Environmental Data tab for additional site specific informaiton.

Program Element: Underground Storage Tank
Violation Classification:
Violation Code: 2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)

Violation Notes:

Returned to compliance on 01/30/2019. Inspection Sequence ID:6056664;Tank ID:24787,24788;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Returned to compliance on 03/04/2022. Inspection Sequence ID:6849678

Violation Description:

Failure of the universal waste handler of PV modules, electronic devices, CRTs, and CRT glass to prevent the release of the universal waste to the environment under reasonable conditions by the following methods:
1) Immediately clean spills and leaks of universal wastes; and
2) Place all universal waste spills and leaks in containers that are structurally sound and compatible with the universal waste.

Violations

Violation Date: 01/04/2018 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** San Diego County Department of Env Health
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Notes:

Returned to compliance on 01/04/2018.

Violation Description:

Failure to comply with one or more of the following:

Failure to install or maintain a liquid-tight spill bucket.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container.

Be resistant to galvanic corrosion.

Handler Summary

Importer Activity:	No
Mixed Waste Generator:	No
Transporter Activity:	No
Transfer Facility:	No
Onsite Burner Exemption:	No
Furnace Exemption:	No
Underground Injection Activity:	No
Commercial TSD:	No
Used Oil Transporter:	No
Used Oil Transfer Facility:	No
Used Oil Processor:	No
Used Oil Refiner:	No
Used Oil Burner:	No
Used Oil Market Burner:	No
Used Oil Spec Marketer:	No

Hazardous Waste Handler Details

Sequence No:	1
Receive Date:	20210727
Handler Name:	MARGARET & JOE LAMADRID
Source Type:	Implementer
Federal Waste Generator Code:	N
Generator Code Description:	Not a Generator, Verified

Owner/Operator Details

Owner/Operator Ind:	Current Owner	***Street No:***	
Type:	Other	***Street 1:***	44056 TERRAZA CT.
Name:	MARGARET & JOE LAMADRID	***Street 2:***	
Date Became Current:		***City:***	TEMECULA
Date Ended Current:		***State:***	CA
Phone:	619-316-6750	***Country:***	
Source Type:	Implementer	***Zip Code:***	92592

Qty Rlsd Gallons:	
Facility Project Sub Type:	
Calenviroscreen 3 Score:	86-90%
Calenviroscreen 4 Score:	85-90%
Site History:	

This case was opened following the discovery of contaminated soil during the removal of a 10,000 gallon diesel tank on December 2, 1999. Additionally, case H04568-005 opened in 1/2004 was administratively consolidated with this case in July 2008. Two USTs were removed in 2004 and diesel fuel contamination was discovered beneath a dispenser island. The diesel fuel contamination was over-excavated during the tank removal activities.

Title Description Comments:

8/15/17 Email to Paul Brown & Robert Kurkjian: As we discussed in yesterday's conference call, please modify the Exchange Parcel's concrete classification flow chart and include it in the H3 Management Plan. Also, revise the text so that it's clear that the concrete, asphalt, joint compound, and soil samples were evaluated using the revised flow chart. Please submit a redline version of the Management Plan to us by 5:00 pm on September 1, 2017.

Site History:

In August 1995 two hand-auger borings were advanced near the UST pit which detected petroleum hydrocarbon impacted soil. DEH case H03739-001 was opened and multiple wells and borings were advanced on and offsite to assess hydrocarbon impacted soil and groundwater. On April 23, 2003, an IRAP was implemented with the startup of a high vacuum dual-phase extraction system in an effort to mitigate several feet of liquid-phase hydrocarbons observed across the site. The system operated until 2007 when DEH directed the RP to shut down the system until disagreements with the adjacent

Thrifty Station (H20174) about responsibility for offsite impacts could be alleviated.

Program Element:	Underground Storage Tank		
Violation Classification:	Class II		
Violation Code:	2060020 (TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of		

liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2

Violations

Violation Date: 02/12/2020
Violation Program: UST
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

Violation Source: CERS
Violation Division: San Diego County Department of Env Health

Returned to compliance on 02/12/2020. Inspection Sequence ID:6389041;Tank ID:17791,17792;Violation Description:(TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Site History:	

Commingled Plume Account: Please search on H03739-001 for additional 2010 and later reports. Uploaded under World Oil #80. Following the removal of USTs and demolition of site improvements in 1987, hydrocarbon impacts were observed with a series of investigation trenches and borings. Liquid-phase hydrocarbons (LPH) were observed at the site during these and subsequent investigations prompting LPH removal activities via tanker truck extraction and LPH bailing operations. Soil vapor extraction and limited dual-phase extraction have been implemented at the site with some success. World Oil Station #46 (H03739), located across the intersection, reported a significant unauthorized release in 1997. Based on available data, LPH appears inseparably commingled from the Thrifty and World Oil sites and extends offsite. Cleanup activities for these sites must be coordinated.

School District:
APN: 567-032-09-00
Cleanup Status: NO FURTHER ACTION AS OF 6/30/2014

Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
Site Type: VOLUNTARY AGREEMENT
Office: CLEANUP CYPRESS
Past Use that Caused Contam: DRY CLEANING
Potential Media Affected: INDOOR AIR, OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER)
Potential Contamin of Concern:

TETRACHLOROETHYLENE (PCE)

Site History:

The site is approximately 4.87 acres and includes 12 two-story apartment buildings with a total of 160 units. The reason for the VCA termination request, by the project proponenet is that the Woodlawn Colonial Apartments site was purchased by Woodlawn Colonial, LP (Woodlawn), and Woodlawn will be conducting the investigation and remediation of the above-mentioned site under a separate agreement with DTSC from this point forward. All future activities for this project have been absorbed by the E Street Plaza Shopping Center Site in Envirostor. This project has been listed as No Further Action in order to preserve historical activities associated with the E Street Plaza Site.

Status: NO FURTHER ACTION
Program Type: VOLUNTARY CLEANUP
CalEnviroScreen Score: 85-90%

Stop Method:
Stop Description:
Case Worker: SAM
Military DoD Site: No
Leak Reported Dt:
No Further Action Dt: 2016-05-02 00:00:00
Potential Media of Concern: Aquifer used for drinking water supply, Soil, Soil Vapor
How Discovered Description:
Calwater Watershed Name: Sweetwater - Lower Sweetwater - La Nacion (909.12)
DWR GW Subbasin Name: Coastal Plain Of San Diego (9-033)
Disadvantaged Community: Disadvantaged Community
Coordinate Source:
Discharge Cause:
Discharge Source:
Facility Project Sub Type:
Calenviroscreen 3 Score: 86-90%
Calenviroscreen 4 Score: 85-90%
File Location: All Files are on GeoTracker or in the Local Agency Database
Site History:

The approximately 97-acre site is located adjacent to the Sweetwater Marsh/San Diego Bay National Wildlife Refuge and is targeted for development as part of the Chula Vista Bayfront Master Plan. Redevelopment will include an RV park, recreational parks, streets, and utilities. The site has been impacted by historical agricultural use (pesticides in surface and near-surface soil), illegal dumping, petroleum from historical USTs, lead in shallow soil (potential secondary deposits of burn ash from other sources and aerially deposited lead), migration of VOC-contaminated groundwater from off-site industrial sources, metals in shallow soil from former industrial operations (e.g., sandblasting), and possibly waste disposal. Several environmental investigations have been performed at the site since 1999. Additional site assessment was performed in 2015 that involved shallow soil sampling and performance of a human health risk assessment. No further work is required to be performed at this site and the site was issued a No Further Action letter on January 4, 2016. A Soil Management Plan will be prepared for the site for use during future site redevelopment.

Site History:	

UOP Fluid Systems site is located at 965 F Street, Chula Vista, CA 91910. Presently site is vacant, unused and covered with vegetation with some illegal dumping of debris of household materials and auto body parts. This site is located in an industrial zone and there are some industrial units but no residential units within a radius of about one mile. In April, 1992, TorStan, Inc. 160 Chesterfield, Suite 3, Cardiff, CA 92007 conducted a Phase II Site Assessment for the site for San Diego County and City of Chula Vista, California and discovered that: 1) Four of the six 5-gallon buckets observed on the site appeared to contain roofing tar. Of the two remaining buckets, one appeared to contain motor oil and other gear lubricant. 2) Two underground tanks were removed under permit; one tank had an unauthorized release while the second tank was removed in good condition with no evidence of a release. A 2000 & 6000 Gal. gas tanks were removed 12/27/91 with no holes observed. 100 gallons of petroleum product and water were pumped out

from the 2000 gal. tank pit. 3) History of the on-site well indicated that the well was used to pump sea water to an on-site basin for desalination and water treatment research and there were no Title 22 Metals above the instrument detection limit. 4) Analyses of materials in the various outdoor basins indicated the presence of arsenic above regulatory limits. 5) On-site presence of a septic system indicated that the site accessed water from the Sweetwater Authority and that the site was not on City sewer. Based upon analytical results from the subsurface assessment it did not appear that the septic system was used to dispose of petroleum products. On February 19, 1993, San Diego County Hazardous Materials Management Division (HMMD) transferred oversight of the site to San Diego RWQCB for further site investigation and mitigation activities. On October 6, 1995, as a result of the bioremediation at this site and on the basis of soil and groundwater results provided by Ninyo & Moore, San Diego RWQCB closed the site for further action because the site was not posing any threat to water quality and the environment.

Torstan Inc. mailed a "Phase II Site Assessment" report for the City of Chula Vista Redevelopment Agency seeking immun-ity from liability under AB3193 (Polanco Bill). Since this was not a RAP, DTSC transmitted PEA Manual and other guid-ance listed in MM#91-7. Torstan Inc. mailed a report entitled "Unauthorized Release Report". The release was from UST; DTSC referred the matter to the SDRWQCB and County of San Diego. Region 4 staff completed screening of the site and sent the two reports and correspondence to the file room.

Background:

Up until 1959, the site and surrounding area was a marsh/ lagoon. Building permit issues 9/59 for office/warehouse. A garage was built in 7/71 and a temporary storage building added in 1975. From 1976 to 1985, the site was used as a ship building/repair yard. The present owner is the City of Chula Vista, 276 4th Avenue, Chula Vista, CA 91910. Property Lessee is UOP Fluid Systems.

Calenviroscreen 3 Score: 76-80%
Calenviroscreen 4 Score: 90-95%
Site History:

Three underground storage tanks were removed on 12/4/98 and soil sampling results indicated a release in both the gas and diesel carbon ranges. Several investigations showed that both soil and groundwater were impacted by gasoline. Soil contamination has been assessed. The leading edge of the groundwater plume has not been defined. A workplan approval letter was issued on 6/23/09 to install three more groundwater monitoring wells down gradient. Since December 2009, we have been trying to locate a Responsible Party to continue with the assessment.

TETRACHLOROETHYLENE (PCE)

Site History:

Site Description – The 3.4-acre site is a multi-tenant retail property located at 640-692 E Street, Chula Vista. It is bordered by E Street to the north, commercial property at 632 E Street to the east, Woodlawn Colonial Apartments at 245 Woodlawn Avenue to the south, and Woodlawn Avenue to the west. The site is developed with four detached buildings and associated parking. Eldorado Cleaners and Drive-In Cleaners were located in two of the units at the site. Both Eldorado Cleaners and Drive-In Cleaners (dba Coast Cleaners) were known to use tetrachloroethylene (PCE). It is believed, PCE came into contact with soil and groundwater during the time Eldorado Cleaners and Drive-In Cleaners operated at the site.

Contamination – Chlorinated volatile organic compounds including PCE and its degradation products were detected in soil, soil vapor, groundwater, and air inside some of the retail facilities and at the Woodlawn Colonial Apartments.

Work Done to Date - Several investigations were conducted at the site under the San Diego County oversight. San Diego County CUPA referred the site

to DTSC for further investigation and remediation. On September 21, 2009, the Proponents entered into an agreement with the DTSC to further evaluate the extent of the contamination and implement mitigation measures to protect human health and the environment. DTSC circulated for public comment and subsequently approved an Interim Measures (IM) Workplan, soil vapor extraction (SVE), to address the soil vapor intrusion issues at the E Street Plaza property and on the adjoining Woodlawn Colonial property. SVE system is operating at the site since September 2011. The SVE system has been effectively removing VOCs from the subsurface. Based on the results of the December 2011 and April 2012 indoor air monitoring results, indoor air is no longer a health and safety risk. Based on the February 2016 monitoring report, with the exception of SHEW-1, VOCs in the vapor extraction wells have remained below 1.0 ppm during the previous six months. In parallel, an In Situ Chemical Oxidation (ISCO) pilot study was conducted at the Woodlawn Colonial Apartment property to address groundwater contamination and develop a path to completion of the remediation at the Woodlawn Colonial Apartment Site. Since the ISCO has been implemented, groundwater below the Woodlawn Colonial Apartment property remains below MCL for all VOCs. Groundwater monitoring results indicate that "the size of the dissolved PCE plume has been reduced significantly since 2004, and concentrations have decreased significantly (many 1-2 orders of magnitude) in the majority of wells" at E Street Plaza. The highest PCE concentration was detected in the groundwater sample collected from MW-10 (5,200 ug/L), located hydraulically downgradient of the former Coast Cleaners dry cleaner suite. Cyclical SVE system operation and rebound testing is continuing at the E Street.

Current Status – The Proponent proposed additional investigation, ISCO pilot test for groundwater, and SVE system optimizations to further reduce PCE levels in groundwater and soil gas levels to achieve the preliminary remediation goals for the site and ensure it is no longer a threat to site occupants and residents of neighboring properties. ISCO injections were implemented in October 2020 and continue to be monitored. The Proponent plans to submit an ISCO Pilot Study Report, SVE Interim Measure Report, a Vapor Intrusion Study using Radon gas, and a Conceptual Site Model and Limited Corrective Measures Study to propose a final remedy for soil vapor by mid-2021 while also evaluating ISCO effectiveness in groundwater.

Cleanup Oversight Agencies: SAN DIEGO RWQCB (REGION 9) (LEAD) - CASE #: 4090008
CASEWORKER: TOM ALO
Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T10000004581&tabname=regulatoryhistory
Site History:

The Chula Vista Bayfront Master Plan (CVBMP) is a joint master planning process of the Port of San Diego, the City of Chula Vista, and Pacifica Companies. The purpose of the project is to develop a master plan that transforms the Chula Vista waterfront into a world-class destination for local residents and visitors.

Site History:

This Voluntary Assistance Program (VAP) case was opened for redevelopment of the Site into 11 slab-on-grade residential buildings. The Site consists of approximately 1.53 acres of currently vacant land that was formerly occupied by Bahia Auto Sales (270 Broadway) and Chula Vista Tire Center (260 Broadway). The Site is identified with the Assessor's Parcel Numbers (APNs) 567-032-01, -18, -19, and -20. A June 2017 Phase II from SCS Engineers (SCS) discussed the advancement of eight soil borings (SBs), and eight soil vapor (SV) probes. The SBs revealed soil concentrations of arsenic and lead up to 1.72 mg/kg and 56.9 mg/kg, respectively. In addition, levels of total petroleum hydrocarbon (TPH) in the gasoline, diesel and oil ranges, and Volatile Organic Compounds (VOCs), were non-detect (ND) for all SB samples. Moreover, SV sample results were also all ND. On November 29, 2017, a used oil underground storage tank (UST) was removed from the Site under DEHQ permit. Based on soil sample results from the UST removal, an unauthorized release case was not opened. A November 2018 Soil Management Plan (SMP) and Community Health and Safety Plan (CHSP) described methods of soil management during construction and safeguards for the community. SCS stated that the soil vapor sampling results did not indicate the presence of VOCs in shallow soil vapor in the vicinity of the proposed building. Based on this, there were no plans to incorporate a soil vapor barrier into the building design unless it was later determined during grading that soil with elevated petroleum hydrocarbons and VOCs would be left in place. The SMP and CHSP were approved in November 2018. A July 2021 Property Closure Report (PCR) detailed the excavation activities and the results of confirmation soil samples. The PCR stated that excavation occurred from August 2019 to November 2020. Only one area was encountered with indications of petroleum hydrocarbons in soil, resulting in removal of approximately 22 tons of soil that was disposed at Soil Safe in Adelanto. On July 15, 2019, final confirmation samples were taken in this area, analyzed for TPH, and the results were ND. Aside from the TPH-impacted soil, a total of approximately 3,209 tons of non-hazardous soil was disposed at Otay Landfill. No soil was exported for off-site reuse. SCS concludes that because confirmation sample results did not indicate the presence of residual petroleum hydrocarbons, and that lead concentrations from earlier samples did not exceed human health risk mitigation criteria of 80 mg/kg for residential use, there are no complete exposure pathways from residual constituents of concern (CoCs) to receptors at the Site or groundwater. Moreover, SCS states that based on the results of the soil vapor survey and removal of VOC impacted soil, there is no potential risk from vapor intrusion of VOCs for the future occupants of the residences. DEHQ concurs.

POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)
UNDER INVESTIGATION

Site History:

This property is located approximately 1000 feet north of East Street in Chula Vista (San Diego County) and is identified by San Diego County Assessor's Parcel Numbers 5623-000-200 and 565-0100-800, and any off-site area to which hazardous substances have or may have migrated. The property is approximately 8.2 acres in size and is currently unoccupied, fenced and gated, and owned and operated as a utility corridor by San Diego Gas & Electric (SDG&E). In general, north of the SDG&E property is a bridge over the Sweet Water River. To the north and west of the river are commercial properties, including a marina. Immediately east of the property is an out of service rail line, previously used by passenger trains. South of the property consists of a parking lot for the Chula Vista Nature Preserve. Immediately west of the property is open land which is part of the U.S. Fish & Wildlife Service (USFWS) San Diego Bay National Wildlife Refuge.

The County of San Diego considers portions of the Sweetwater Marsh a Closed, Inactive and Abandoned (CIA) disposal site. SDG&E initiated a response for its property by removing undocumented fill, suspected to be burn ash, from two areas. Approximately 160 cubic yards (CY) of material was removed from these two areas. SDG&E prepared and submitted a workplan for delineation of undocumented non-burn ash fill materials in 2012. Due to the potential presence of hazardous wastes within the burn ash areas, the lead for regulatory management of the burn ash material at the SDG&E property was transferred from the County of San Diego to DTSC under a Voluntary Cleanup Agreement (VCA) in February 2014.

SDG&E then prepared and submitted a Supplemental Site Characterization Workplan (Workplan), dated September 10, 2014, with the explicit purpose of documenting that no additional burn ash remains on site, and that the presence of other undocumented fill materials does not pose an undue risk to sites' occasional commercial workers or visitors. After DTSC reviewed and approved the Workplan, SDG&E completed the additional investigation in 2014, and submitted the Supplemental Site Characterization Report (SI) for DTSC review January 2015. SDG&E prepared a workplan addendum in response to DTSC's comments dated July 27, 2015, in which DTSC reviewed the SI Report and determined that additional lateral delineation of potentially undocumented fill was necessary in one area of the site. SDG&E concurred that additional lateral delineation of the area would assist in determining that the slightly elevated polycyclic aromatic hydrocarbons (PAHs) posed no additional risk to future hypothetical site occupants. The additional investigation was performed on January 14, 2016. In a letter dated May 8, 2017, DTSC concurred that undocumented fill areas within the property boundary were fully delineated; however, the off-site extent of PAHs along the eastern property boundary was not fully delineated. DTSC acknowledged that, based on the risk assessment, potential exposures to maintenance workers and/or trespassers was acceptable.

DTSC determined no further action is warranted and terminated VCA.

The USFWS is currently investigating the Sweetwater Marsh area, located adjacent to this site and conducting an ECO risk assessment.

Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 221
Year: 1992
Tons: 1.45
Method Code: H01
State Waste Code Desc: Waste oil and mixed oil
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 232
Year: 1992
Tons: 7.50E-03
Method Code: H01
State Waste Code Desc: Pesticides and other waste associated with pesticide production
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Method Description:

Tanner Information

State Waste Code:	551	***Generator County:***	San Diego
Year:	1992	***Tsd Epa ID:***	CAT080010101

Method Code: D99
State Waste Code Desc: Unspecified organic liquid mixture
Method Description:

Tanner Information

State Waste Code: 551 ***Generator County:*** San Diego
Year: 1989 ***Tsd Epa ID:*** CAT080010101
Tons: 1.56 ***Tsd County:*** San Diego
Method Code: H01
State Waste Code Desc: Laboratory waste chemicals
Method Description:

Tanner Information

State Waste Code: 611 ***Generator County:*** San Diego
Year: 1989 ***Tsd Epa ID:*** CAT080010101
Tons: 3.72 ***Tsd County:*** San Diego
Method Code: H01
State Waste Code Desc: Contaminated soil from site clean-up
Method Description:

Tanner Information

State Waste Code: 211 ***Generator County:***
Year: 1990 ***Tsd Epa ID:*** CAD042245001
Tons: 1.14 ***Tsd County:*** Los Angeles
Method Code:
State Waste Code Desc: Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc)
Method Description:

Tanner Information

State Waste Code: 551 ***Generator County:*** San Diego
Year: 1990 ***Tsd Epa ID:*** AZD049318009
Tons: 7.50E-03 ***Tsd County:*** Unknown
Method Code: 1
State Waste Code Desc: Laboratory waste chemicals
Method Description:

Tanner Information

State Waste Code: 135 ***Generator County:*** San Diego
Year: 1990 ***Tsd Epa ID:*** CAD050806850
Tons: 0.01 ***Tsd County:*** Los Angeles
Method Code: T01
State Waste Code Desc: Unspecified aqueous solution
Method Description:

Tanner Information

State Waste Code: 181 ***Generator County:*** San Diego
Year: 1990 ***Tsd Epa ID:*** CAD095894556
Tons: 0.15 ***Tsd County:*** San Diego
Method Code: H01
State Waste Code Desc: Other inorganic solid waste
Method Description:

Tanner Information

State Waste Code: 221 ***Generator County:*** San Diego

Year: 1990
Tons: 7.4
Method Code: D99
State Waste Code Desc: Waste oil and mixed oil
Method Description:

Tsd Epa ID: CAD095894556
Tsd County: San Diego

Tanner Information

State Waste Code: 222
Year: 1990
Tons: 0.2
Method Code: D99
State Waste Code Desc: Oil/water separation sludge
Method Description:

Generator County: San Diego
Tsd Epa ID: CAD095894556
Tsd County: San Diego

Tanner Information

State Waste Code: 181
Year: 1990
Tons: 0.06
Method Code: R01
State Waste Code Desc: Other inorganic solid waste
Method Description:

Generator County: San Diego
Tsd Epa ID: CAD097854541
Tsd County: Los Angeles

Tanner Information

State Waste Code: 212
Year: 1990
Tons: 8.30E-03
Method Code:
State Waste Code Desc: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 211
Year: 1990
Tons: 0.31
Method Code: H01
State Waste Code Desc: Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc)
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 221
Year: 1990
Tons: 6.65
Method Code: H01
State Waste Code Desc: Waste oil and mixed oil
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 223
Year: 1990
Tons: 1.88
Method Code: H01
State Waste Code Desc: Unspecified oil-containing waste
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 271
Year: 1990
Tons: 0.02

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Method Code:
State Waste Code Desc: Organic monomer waste (includes unreacted resins)
Method Description:

Tanner Information

State Waste Code: 291
Year: 1990
Tons: 0.15
Method Code: H01
State Waste Code Desc: Latex waste
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 331
Year: 1990
Tons: 7.70E-03
Method Code: T01
State Waste Code Desc: Off-specification, aged or surplus organics
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 551
Year: 1990
Tons: 0.7
Method Code: T01
State Waste Code Desc: Laboratory waste chemicals
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 612
Year: 1990
Tons: 1.34
Method Code: H01
State Waste Code Desc: Household waste
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 213
Year: 1990
Tons: 1.04
Method Code: R01
State Waste Code Desc: Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.)
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080013352
Tsd County: Los Angeles

Tanner Information

State Waste Code: 221
Year: 1990
Tons: 0.7
Method Code: R01
State Waste Code Desc: Waste oil and mixed oil
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080013352
Tsd County: Los Angeles

Tanner Information

State Waste Code: 352
Year: 1991
Tons: 0.25
Method Code: D99
State Waste Code Desc: Other organic solids
Generator County: San Diego
Tsd Epa ID: AZD049318009
Tsd County: Unknown

Method Description:

Tanner Information

State Waste Code: 461
Year: 1991
Tons: 0.22
Method Code: T01
State Waste Code Desc: Paint sludge
Method Description:
Generator County: San Diego
Tsd Epa ID: CAD050806850
Tsd County: Los Angeles

Tanner Information

State Waste Code: 791
Year: 1991
Tons: 0.14
Method Code: R01
State Waste Code Desc: Liquids with pH <= 2
Method Description:
Generator County: San Diego
Tsd Epa ID: CAD050806850
Tsd County: Los Angeles

Tanner Information

State Waste Code: 122
Year: 1991
Tons: 0.1
Method Code: 15
State Waste Code Desc: Alkaline solution without metals pH >= 12.5
Method Description:
Generator County: San Diego
Tsd Epa ID: CAD097030993
Tsd County: Los Angeles

Tanner Information

State Waste Code: 122
Year: 1991
Tons: 1.01
Method Code:
State Waste Code Desc: Alkaline solution without metals pH >= 12.5
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 212
Year: 1991
Tons: 1.16
Method Code:
State Waste Code Desc: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 212
Year: 1991
Tons: 1.04
Method Code: H01
State Waste Code Desc: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 134
Year: 1991
Tons: 0.02
Method Code: H01
State Waste Code Desc: Aqueous solution with total organic residues less than 10 percent
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code:	211	***Generator County:***	San Diego

Tanner Information

State Waste Code: 461
Year: 1992
Tons: 0.2
Method Code: R01
State Waste Code Desc: Paint sludge
Method Description:
Generator County: San Diego
Tsd Epa ID: CAD050806850
Tsd County: Los Angeles

Tanner Information

State Waste Code: 223
Year: 1992
Tons: 0.83
Generator County: San Diego
Tsd Epa ID: CAD981458466
Tsd County: Los Angeles

Method Code: R01
State Waste Code Desc: Unspecified oil-containing waste
Method Description:

Tanner Information

State Waste Code: 134
Year: 1992
Tons: 0.02
Method Code:
State Waste Code Desc: Aqueous solution with total organic residues less than 10 percent
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 181
Year: 1992
Tons: 1.00E-03
Method Code:
State Waste Code Desc: Other inorganic solid waste
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 211
Year: 1992
Tons: 0.08
Method Code: 99
State Waste Code Desc: Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc)
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 352
Year: 1992
Tons: 1.36
Method Code:
State Waste Code Desc: Other organic solids
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 352
Year: 1992
Tons: 0.44
Method Code: D99
State Waste Code Desc: Other organic solids
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT000646117
Tsd County: Kings

Tanner Information

State Waste Code: 211
Year: 1992
Tons: 0.06
Method Code: H01
State Waste Code Desc: Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc)
Method Description:
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 214
Year: 1992
Tons: 1.06
Method Code: H01
State Waste Code Desc: Unspecified solvent mixture
Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Method Description:

Tanner Information

State Waste Code: 291
Year: 1992
Tons: 0.05
Method Code: H01
State Waste Code Desc: Latex waste
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 331
Year: 1992
Tons: 0.63
Method Code: H01
State Waste Code Desc: Off-specification, aged or surplus organics
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 461
Year: 1992
Tons: 0.11
Method Code: H01
State Waste Code Desc: Paint sludge
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 611
Year: 1992
Tons: 1.64
Method Code: H01
State Waste Code Desc: Contaminated soil from site clean-up
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 791
Year: 1992
Tons: 0.51
Method Code: T01
State Waste Code Desc: Liquids with pH <= 2
Method Description:

Generator County: San Diego
Tsd Epa ID: CAT080010101
Tsd County: San Diego

Tanner Information

State Waste Code: 141
Year: 1991
Tons: 0.07
Method Code: R01
State Waste Code Desc: Off-specification, aged or surplus inorganics
Method Description:

Generator County: San Diego
Tsd Epa ID: AZD049318009
Tsd County: Unknown

Tanner Information

State Waste Code: 211

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jul 26, 2022

National Priority List - Proposed: PROPOSED NPL

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jul 26, 2022

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jul 26, 2022

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Nov 23, 2022

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Nov 23, 2022

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Nov 7, 2022

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Nov 7, 2022

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Nov 7, 2022

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Nov 7, 2022

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Nov 7, 2022

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Nov 7, 2022

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Nov 7, 2022

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Dec 22, 2022

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Dec 22, 2022

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Jul 26, 2022

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 6, 2022

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Nov 23, 2022

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Sep 28, 2022

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Oct 17, 2022

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Oct 17, 2022

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Oct 17, 2022

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Nov 7, 2022

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Oct 17, 2022

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jan 12, 2023

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jan 12, 2023

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 11, 2022

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Nov 16, 2022

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Nov 16, 2022

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Nov 16, 2022

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Oct 14, 2022

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Jan 9, 2023

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Jan 9, 2023

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Oct 7, 2022

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Oct 7, 2022

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Oct 17, 2022

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Nov 16, 2022

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Oct 17, 2022

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Nov 16, 2022

Delisted Cleanup Program Sites: DELISTED CLEANUP

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Government Publication Date: Nov 16, 2022

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Nov 28, 2022

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

County

San Diego County - Solid Waste Facility List: SWF SANDIEGO

This list of open and closed Solid Waste Facilities is made available by the County of San Diego Department of Environmental Health and Quality's (DEHQ) agency files and map service. The County of San Diego DEHQ Solid Waste Local Enforcement Agency (LEA) is certified by the California Department of Resources Recycling and Recovery to enforce state solid waste laws and regulations in San Diego County, excluding the City of San Diego.

Government Publication Date: Dec 7, 2021

San Diego County - Local Oversight Program List: LOP SANDIEGO

A list of Underground Storage Tank (UST) release sites in the County of San Diego. This list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Jun 15, 2020

San Diego County - Hazardous Materials Management Division Database: HAZ SANDIEGO

A list of facilities with Unified Program Facility Permit in San Diego County. This list has been made available by County of San Diego Environmental Health.

Government Publication Date: May 1, 2022

San Diego County - UST List: UST SANDIEGO

A list of registered Underground Storage Tanks in the County of San Diego. The list is made available by the San Diego County Hazardous Materials Division.

Government Publication Date: Jan 17, 2023

San Diego County - Site Assessment and Mitigation Investigation Sites: SAM SANDIEGO

List of sites which have undergone a Site Assessment and Mitigation investigation. This list is made available by the County of San Diego Department of Environmental Health.

Government Publication Date: Dec 13, 2022

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites: PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Oct 4, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations https://pfasproject.com/pfas-contamination-site-tr acker/

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills: ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Aug 30, 2022

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Nov 23, 2022

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.
Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Jun 25, 2022

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).
Government Publication Date: Jun 25, 2022

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.
Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.
Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.
Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.
Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.
Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Aug 3, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG) fuel type locations.

Government Publication Date: Jan 3, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jan 11, 2023

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Jul 28, 2022

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 28, 2020

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2020

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of FAA Part 139 Airports, Selected Landfills, and Chrome Plating Facilities from California Water Boards PFAS Investigations, as well as sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Feb 15, 2022

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Nov 11, 2022

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: May 20, 2021

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.
Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF
This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.
Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF
A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.
Government Publication Date: Oct 24, 2022

School Property Evaluation Program Sites: SCH
A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.
Government Publication Date: Oct 17, 2022

California Hazardous Material Incident Report System (CHMIRS): CHMIRS
A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).
Government Publication Date: Aug 15, 2022

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS
A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).
Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data: HAZNET
A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).
Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data: HAZ GEN
List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).
Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data: HAZ TSD
List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).
Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data: HIST MANIFEST
A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.
Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT
The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.
Government Publication Date: Dec 9, 2022

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 11, 2022

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Oct 31, 2022

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Oct 7, 2022

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Nov 16, 2022

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jun 23, 2022

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Aug 3, 2022

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Nov 16, 2022

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

ERIS

0 0.375 0.75 Miles

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Geologic Unit water

Unit Name:	water
Unit Age:	Holocene
Primary Rock Type:	water
Secondary Rock Type:	
Unit Description:	water

Soil Information

SSURGO Soils

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit HrC (0.87%)

Map Unit Name:	Huerhuero loam, 2 to 9 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Huerhuero(85%)

horizon H1(0cm to 30cm)	Loam
horizon H2(30cm to 140cm)	Clay
horizon H2(30cm to 140cm)	Clay loam
horizon H3(140cm to 183cm)	Stratified sand to sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: HrC - Huerhuero loam, 2 to 9 percent slopes

Component: Huerhuero (85%)
The Huerhuero component makes up 85 percent of the map unit. Slopes are 2 to 9 percent. This component is on valleys, hummocks marine terraces. The parent material consists of calcareous alluvium derived from sedimentary rock. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R019XD061CA Claypan (1975) ecological site. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 3e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 20 within 30 inches of the soil surface.

Component: Stockpen (5%)
Generated brief soil descriptions are created for major soil components. The Stockpen soil is a minor component.

Component: Las Flores (5%)
Generated brief soil descriptions are created for major soil components. The Las Flores soil is a minor component.

Component: Olivenhain (3%)
Generated brief soil descriptions are created for major soil components. The Olivenhain soil is a minor component.

Component: Unnamed (2%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Map Unit HuC (19.69%)

Map Unit Name:	Huerhuero-Urban land complex, 2 to 9 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Huerhuero(50%)

horizon H1(0cm to 30cm)	Loam
horizon H2(30cm to 140cm)	Clay
horizon H2(30cm to 140cm)	Clay loam
horizon H3(140cm to 183cm)	Stratified sand to sandy loam
Urban land(30%)	
horizon H1(0cm to 15cm)	Variable

Component Description:

Minor map unit components are excluded from this report.

Map Unit: HuC - Huerhuero-Urban land complex, 2 to 9 percent slopes

Component: Huerhuero (50%)
The Huerhuero component makes up 50 percent of the map unit. Slopes are 2 to 9 percent. This component is on valleys, marine terraces. The parent material consists of calcareous alluvium derived from sedimentary rock. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 4e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 20 within 30 inches of the soil surface.

Component: Urban land (30%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Las Flores (10%)
Generated brief soil descriptions are created for major soil components. The Las Flores soil is a minor component.

Component: Oliventain (5%)
Generated brief soil descriptions are created for major soil components. The Oliventain soil is a minor component.

Map Unit Md (1.01%)

Map Unit Name:	Made land
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	
Major components are printed below	
Made land(100%)	
horizon H1(0cm to 15cm)	Variable

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Md - Made land

Component: Made land (100%)
Generated brief soil descriptions are created for major soil components. The Made land is a miscellaneous area.

Map Unit Tf (2.29%)

Map Unit Name:	Tidal flats
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	0cm
Drainage Class - Dominant:	Very poorly drained

Soil Information

Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Tidal flats(100%)

horizon H1(0cm to 152cm)	Variable

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Tf - Tidal flats

Component: Tidal flats (100%)
Generated brief soil descriptions are created for major soil components. The Tidal flats is a miscellaneous area.

Map Unit W (76.12%)

Map Unit Name:	Water

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: W - Water

Component: Water (100%)
Generated brief soil descriptions are created for major soil components. The Water is a miscellaneous area.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SAN DIEGO* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SAN DIEGO* County

No Measures/Homes:	39
Geometric Mean:	0.4
Arithmetic Mean:	0.6
Median:	0.6
Standard Deviation:	0.6
Maximum:	2.4
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

Wells from NWIS — **FED USGS**

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well,

Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

State Sources

Oil and Gas Wells **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

APPENDIX D: QUALIFICATIONS

PARTNER

PARTNER

Heather Hodgetts
Senior Scientist

Education
B.A. in Earth Sciences, University of Southern California

Training
40-Hour OSHA-approved Health & Safety Training
8-hour OSHA HAZWOPER Annual Refresher

Highlights
20 years in the environmental consulting industry
Phase I Environmental Site Assessments
Phase II and III Subsurface Investigations

Experience Summary
As a Senior Scientist for due diligence services within the Investment Advisory Group, Ms. Hodgetts focuses on providing solutions to clients' due diligence and engineering needs and sharing years of expertise with staff and clients. Previously, Ms. Hodgetts was a Senior Environmental Scientist for a Fortune 500 company and was responsible for managing due diligence projects throughout the United States.

Ms. Hodgetts has performed hundreds of Phase I Environmental Site Assessments, Third Party Reviews, Due Diligence Audits, and Record Search, Phase II Subsurface Investigations, Underground Storage Tank Investigations, Remedial Investigations, Limited asbestos surveys, Lead-based paint surveys, Radon Studies, and Lead-in-water sampling and analysis.

Ms. Hodgetts has worked with various clients including: individual investors, institutional investors, private and institutional equity companies, insurance companies, attorneys, brokers, developers, and multiple lenders.

Project Experience
Phase I Environmental Site assessments

Ms. Hodgetts has performed Phase I Environmental Site Assessments of commercial, residential, and industrial properties including schools, shopping centers, industrial parks, manufacturing facilities, drycleaners and gasoline stations.

Subsurface Investigations

Conducted soil and groundwater assessments at County of San Diego Department of Public Works Road Stations throughout San Diego County. Activities included field oversight of groundwater monitoring well installation using mud-rotary, air-rotary, and hollow-stem augers; soil and groundwater sampling; receptor surveys; and installed monitoring wells and soil borings.

Environmental Regulatory Compliance

Assisted in environmental regulatory compliance audit and ownership transfer activities. The audit included coordinating with local agencies to transfer environmental permits for air, wastewater, hazardous waste, and medical waste.

Storage Tank Programs

Completed UST Closure Reports, Limited Site Assessments, Soil Assessment Reports, Soil Closure Reports, and Corrective Action Plans for submittal to regulatory agencies for UST sites owned by various industrial and government entities.

School District Investigations

Worked in-house for San Diego Unified School District (SDUSD) for 15 months completing the environmental due diligence for Proposition MM, a bond measure passed by voters to fund modernization of 165 existing school and construction of 16 new/rebuilt schools. Activities included: conducting Phase I ESAs for proposed school sites, including information relevant to the California Department of Education (CDE) School Site Selection and Approval Guide; submitting Phase I ESAs for EPA Department of Toxic Substances Control review; preparing Public Participations Plans and assisting with public meeting presentations; and submitting site packages to CDE for site approval. In addition to SDUSD, Ms. Hodgetts has also worked on Los Angeles Unified School District, Coronado Unified School District, and Lake Elsinore Unified School District sites.

Subsurface Investigations

Conducted soil and groundwater assessments at County of San Diego Department of Public Works Road Stations throughout San Diego County. Activities included field oversight of groundwater monitoring well installation using mud-rotary, air-rotary, and hollow-stem augers; soil and groundwater sampling; receptor surveys; and installed monitoring wells and soil borings.

Environmental Regulatory Compliance

Assisted in environmental regulatory compliance audit and ownership transfer activities. The audit included coordinating with local agencies to transfer environmental permits for air, wastewater, hazardous waste, and medical waste.

Cellular Telephone Investigations

Performed environmental assessments for cellular telephone antenna installations for a major cellular operator. Tasks included: inspections of numerous buildings, installations, additions, collocations, and vacant land; and asbestos and lead sampling at these facilities throughout southern California.

PARTNER

Debbie Stott, P.G.
Nevada CEM - Technical Director

Education
BA Geology, The Ohio State University

Registrations
California Professional Geologist No. 6221
Nevada Certified Environmental Manager No. 2359

Training
OSHA, Hazardous Waste Operator (HAZWOPER) 40 hour Certification
AHERA Certified Asbestos Inspector
Certified Project Manager

Highlights
Over 28 years of experience in the environmental service industry with a focus on due diligence assessments
Knowledgeable with ASTM, EPA's All Appropriate Inquiry (AAI), and customized client formats.
100+ Phase I Environmental Site Assessments

Experience Summary
As Technical Director for due diligence services as part of the Investment Advisory Group, Ms. Stott focuses on report quality, client service, and sharing her years of expertise with staff and clients.

Ms. Stott has performed hundreds of Phase I Environmental Site Assessments, Third Party Reviews, Due Diligence Audits, Record Search and Risk Assessments, Phase II and III Subsurface Investigations, Underground storage tank investigations, Remedial Investigations, Radon Studies, Mold Assessments, Methane Surveys, Indoor Air Quality Assessments, and Lead-in-water sampling and analysis.

Clients have varied and have included: individual investors, City of Los Angeles Agencies, Los Angeles County, City of Anaheim, institutional investors, private and institutional equity companies, insurance companies, attorneys, brokers, developers, and multiple lenders.

Project Experience
Ms. Stott has conducted, managed and directed thousands of ESAs throughout her career and has been Senior Project Manager for hundreds of site investigations, characterization studies and remediation projects throughout California and the US. The following select projects summarize her experience and due diligence background:

Transaction Due Diligence
Project Manager, Western US and Southern California, LBA Realty - For over 17 years performed due diligence services related to real estate transfers as well as asset refinances for LBA Realty. The relationship requires close coordination and communication with property managers and representatives to provide a smooth process with client and lenders. Services have also included review of third party reports, asbestos surveys, subsurface investigations, and development of soil management plans. Many projects involved multiple locations in several states thus requiring coordination with other offices and client contacts.

Environmental Lead, West Coast, Barings, LLC (Barings) - Ms. Stott assists with management and review of environmental due diligence and environmental actions associated with acquisitions, property development, joint venture developments, property divestments and finance group loan transactions. Environmental due diligence includes Phase I ESAs, Phase II ESAs, indoor air quality assessments, mold assessment and mitigation planning, providing third party review, asbestos investigations, asbestos abatement, operation and maintenance plan development, remedial action development and implementation, regulatory correspondence and permitting.

Phase I ESAs – multiple clients throughout US - Ms. Stott manages and oversees preparation of Phase I Environmental Site Assessments for several confidential clients. All are completed to ASTM guidelines with various special criteria specific to each client.

Subsurface Investigations/Vapor Intrusion

Project Manager, Whittier, CA, Confidential Client - Conducted several investigations to evaluate the potential for vapor intrusion associated with contaminated groundwater into client buildings. At one location a horizontal well system was installed to passively vent vapors. Site investigations involved the installation of multiple, multi-depth vapor probes through the property to map the plume and to assist in decision making for potential further investigation. Data collected from both soil vapor and indoor air monitoring was subjected to risk assessment in order to determine if indoor air quality had been negatively impacted and engineering controls needed to protect workers. Client was able to purchase and redevelop portions of the desired parcels for use as parking.

Project Manager and Environmental Lead, Berkeley, CA, LBA Realty - Evaluation of potential risks associated with the presence of trichloroethylene (TCE) and breakdown products cis 1,2- dichloroethene (cis 1,2-DCE) and vinyl chloride (VC), and methyl tert butyl ether (MTBE) in groundwater and ambient air at an existing building in Berkeley, CA. Worked with outside counsel to evaluate, summarize, and present the risks and potential risks of continued investment in the property. Remedial systems were installed under DTSC oversight, risk assessment performed and the building remodeled and reused for office space.

Municipal/State Contracts

Project Manager, ESAs for City of Anaheim widening of Lincoln Avenue - As a subcontractor to the geotechnical consultant, Partner provided Environmental Site Assessments for multiple properties along the project alignment. The parcel uses ranged from car wash, to older office and motel properties, automotive repair, banks, public school, and a church. Partner finished the multi-site project on time and within budget.

PARTNER

Michael P. Arias
National Technical Director
Institutional PCA Group

Education

B.S. Urban and Regional Planning, California State Polytechnic University, Pomona, CA

Training

Safety Assessment Volunteer, State of California

Highlights

35 years in the architectural and construction fields
Extensive knowledge of real estate due diligence
25 years of experience with institutional and private clients
Acquisitions/dispositions and mortgage lending property condition assessments
Construction monitoring services

Experience Summary

Partner Engineering and Science, Inc. (Partner). The Institutional PCA group produces a more thorough Property Condition Assessment for the institutional and equity client beyond the "ASTM E2018-08 Standard Guide for Property Condition Assessments: Baseline Property Condition Assessment Process". In order to provide a detailed level of assessment, Partner engages both in-house engineers and trade specialists including, but not limited to, structural/seismic engineers, Mechanical/Electrical/Plumbing engineers, Fire/Life Safety and Code specialists and elevator, roof and accessibility specialists.

Mr. Arias has completed hundreds of Property Condition Assessments (PCAs) including planning, field work, report preparation/quality control, and client contact on a myriad of acquisition/disposition projects including: high-rise offices; suburban office; regional and local retail centers; industrial; and multi-family housing projects. He has provided owner's representation services on various projects for institutional investors. Mr. Arias managed the review of numerous document reviews for institutional-level development projects in all disciplines on a variety of projects including office, retail, industrial, multi-family, etc. These reviews consisted of projects noted in the Owner's Representation Services. He has also performed job captain and project manager responsibilities for a design/build general construction firm specializing in industrial concrete tilt-up construction, retail centers and auto dealerships. He has significant knowledge of the accessibility requirements of ADA and FHA, and is currently a candidate for California's CASp (Certified Access Specialist) program.

Additionally, over the past 15 years, Mr. Arias' responsibilities also included evaluation of staff; developing new skills and improving existing skills within the staff; scheduling of personnel; maintaining quality control practices consistent with company goals; and participated in development of protocols and practices to serve national clients of the firm.

Project Experience

Multi-Family Project, Oakland, CA - Organized and led a team of engineers and specialists to conduct an equity-level property condition assessment of a five-story, 300+ unit apartment project in downtown Oakland, CA. The project had been dormant prior to the client purchasing the property, therefore, the client

required a detailed assessment of the building systems but also an assessment of investigation and construction documentation. The team consisted of structural engineers performing a seismic risk assessment; elevator, roof and façade specialists; mechanical, electrical, plumbing and fire/life safety engineers and an acoustical engineer. Mr. Arias assessed all other systems including the ADA and FFHA accessibility elements of the project. Mr. Arias led team in meetings with client and their counsel.

Hospitality Project, San Jose, CA - Organized and led a team of engineers and specialists to conduct an equity-level property condition assessment of a 28-story, 500+ guestroom, 400,000-square foot hospitality project in downtown San Jose, CA. The institutional client required a detailed assessment of the building systems including an assessment of the façade from the building's swing stage due to observed water intrusion issues. The team consisted of structural engineers performing a seismic risk assessment; elevator, roof and façade specialists; mechanical, electrical, plumbing and fire/life safety engineers, as well as a specialist to sample the fire sprinkler water to identify microbial influence corrosion (MIC) in the fire sprinkler piping system. Mr. Arias assessed all other systems including the ADA accessibility elements of the project.

Retail Project, Emeryville, CA - Organized and led a team of engineers and specialists to conduct an equity-level property condition assessment of a popular and active 800,000-square foot mixed-use project in Emeryville, CA. The institutional client required a detailed assessment of the building systems including destructive testing of several locations of the façade to confirm construction of the exterior walls. The team consisted of structural engineers performing a seismic risk assessment, roof and façade specialists, mechanical, electrical, plumbing and fire/life safety engineers. Mr. Arias assessed all other systems including the ADA accessibility elements of the project.

Senior Housing Portfolio, Numerous Sites in US - Assisted with organizing teams to conduct disposition property condition assessments of 30 senior housing projects throughout the West and Midwest. The client required a summary of issues identified by the field assessors. Mr. Arias reviewed all property condition assessments for accuracy and quality control.

Owners' Representation Services - Mr. Arias has provided owner's representation services on various projects for institutional investors, including recent developments of numerous 50 to 250-unit multi-family projects in Santa Monica, Los Angeles, and Glendale, CA., several concrete tilt-up industrial developments in the Inland Empire area of Southern California and San Diego totaling over 1 million square feet; major hospitality projects consisting of the W-Hotel and Manchester Grand Hyatt Hotel in San Diego and several large "big box" retail centers in the San Fernando Valley in Southern California.

Project Management Services, Southern California - Mr. Arias managed staff and performed Project Management services on numerous projects including reconstruction of balcony decks of an existing multi-family project in Pasadena, California; forensic analysis and resealing of a plaza deck, also in Pasadena and an exterior wall repair, plaza deck waterproofing, and structural repair project for a homeowner association of a large condominium project in Marina del Rey.
