Project Title: California Endangered Species Act (CESA) Amended Incidental Take Permit (ITP) No. 2081-2022-064-04 (Minor Amendment No. 6) for the Southern California Gas Company (SoCalGas) eTS 58713.01 Line 85 Milepost 75.85 Remediation Digs Project (Project).

Project Location: The Project is located in the southern San Joaquin Valley approximately 6 miles east of the City of Taft in Kern County, California. The Project is specifically located at six distinct Work Areas adjacent to and on both sides of the California Aqueduct near Lake Station Road within the United States Geological Survey 7.5-Minute Quadrangle Map Buena Vista Lake Bed. Work Areas 1 - 4 are within California Department of Water Resources-owned land in Section 12 of Township 32 South, Range 24 East, Mount Diablo Base and Meridian (MDB&M). Work Area 5 is within privately-owned land in Section 7 of Township 32 South, Range 25 East, MDB&M. Work Area 6 is within California Department of Water Resources owned land in Section 12 of Township 32 South, Range 24 East, MDB&M. Work Areas are located at approximately 35.158518°, -119.349025°; 35.157883°, -119.346292°; 35.158184°, -119.345164°; 35.164648°, -119.349428°; 35.155344°, -119.335747°; and 35.158649°, -119.349604°.

Project Description: The California Department of Fish and Wildlife (CDFW) has issued a CESA (Fish & G. Code, § 2050 et seq.) ITP, Major Amendment No. 1, Major Amendment No. 2, Amended ITP (Major Amendment No. 3), Amended ITP (Minor Amendment No. 4), Amended ITP (Major Amendment No. 5), and this Amended ITP (Minor Amendment No. 6) to authorize SoCalGas (Permittee) to incidentally take Tipton kangaroo rat (*Dipodomys nitratoideus nitratoideus*) which is an endangered species under CESA, San Joaquin antelope squirrel (*Ammospermophilus nelsoni*) which is designated as a threatened species under CESA, and San Joaquin kit fox (*Vulpes macrotis mutica*) which is listed which is designated as a threatened species under CESA (Fish & G. Code § 2050 et seq.; see Cal. Code Regs., tit. 14, § 670.5, subd. (a)(6)(D), (b)(6)(B), and (b)(6)(E), respectively).

The Project includes activities necessary to inspect and repair five segments of the 26-inch natural gas pipeline (Line) 85 near MP 75.85 where anomalies were identified and to install cathodic protection for integrity and safety of the pipeline at a sixth location. This Amended ITP (Minor Amendment No. 6) extends the expiration date for an additional 6 months and extends the deadline to complete the Habitat Management Lands requirement by an additional 18 months. The resulting impacts of the Project to the Covered Species remain the same. Construction for the Project has experienced continued delays associated with gas control scheduling conflicts, but is anticipated to begin in early 2026.

Public Agency Approving Project: **CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE**

Person or Public Agency Carrying Out Project: Southern California Gas Company, Chloe Phan, Project Manager, 1919 S State College Blvd, ANAG2Z, Anaheim, California 92806

Exempt Status:

- ☒ Statutory Exemption. California Code of Regulations, Title 14, section 15269, subdivision (b); Public Resources Code, section 21080, subdivision (b)(4)

Reasons why project is exempt: See Attachment

(Minor Amendment No. 6)**

**Southern California Gas Company
eTS 58713.01 Line 85 Milepost 75.85 Remediation Digs Project**

Approval of this Project is statutorily exempt from the California Environmental Quality Act (CEQA, Pub. Resources Code, § 21000 et seq.) because the Project is subject to California Code of Regulations, Title 14, section 15269, subdivision (b), "Emergency repairs to publicly or privately owned service facilities necessary to maintain service essential to the public health, safety, or welfare which includes those actions that require a reasonable amount of planning to address an anticipated emergency" and Public Resources Code, section 21080, subdivision (b)(4), "Specific actions necessary to prevent or mitigate an emergency". "Emergency" is defined as "a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to, life, health, property, or essential public services" (Pub. Resources Code, § 21060.3).

The purpose of the Project is to prevent pipeline failure by inspecting and repairing five segments of the 26-inch natural gas pipeline (Line) 85 near Milepost 75.85 where potential anomalies have been identified via remote pigging equipment and replacing the cathodic protection Thermal Electric Generator at a sixth location. Repairs are needed to ensure the integrity and safety of the pipeline and to reduce potential impacts to other pipelines in the vicinity of the California Aqueduct, and possibly to the California Aqueduct itself. The Project has been subject to numerous delays and scheduling conflicts from the California Department of Water Resources and Gas Control to accommodate gas needs for winter, as well as additional locations where repairs have been identified as the Project progressed.

On December 23, 2025, the Permittee requested a minor amendment to extend the expiration date for an additional 6 months and extend the deadline for completing the Habitat Management Lands requirement due to the delays described above. This Amended ITP (Minor Amendment No. 6) amends the ITP to extend the expiration date to June 30, 2026, and extends the deadline for completing the Habitat Management Lands requirement by an additional 18 months. The resulting impacts of the Project to the Covered Species remain the same.

CDFW has determined that Minor Amendment No. 6 will not increase the amount take of the Covered Species, nor will it increase Covered Species habitat impacts. Impacts will be minimized and fully mitigated through the implementation of measures required by Incidental Take Permit No. 2081-2022-064-04, as amended. Measures include: 1) Monthly Compliance Reports; 2) establishment of avoidance zones; 3) worker education; 4) species relocation; and 5) permanent habitat protection.
