Local Agency: Not reported
RB Case Number: 1192
File Location: Regional Board
Potential Media Affected: Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: The Westin Bonaventure Hotel (Site) is located in the central downtown Los Angeles area and is bordered by Figueroa Street on the northwest, 4th Street on the northeast, Flower Street on the southeast, and 5th Street on the southwest. The Site consists of approximately 3.5 acres and is occupied by a 500,000 square-foot building with 36 stories consisting of guest rooms, retail space, meeting rooms, offices, and subterranean parking. Laundry services, including a dry cleaning system, are located in a basement area measuring approximately 25 feet by 25 feet. Previous investigations completed at the Site detected concentrations of tetrachloroethene up to 1,610 micrograms per kilogram (a%g/kg) in soil and up to 87.5 micrograms per liter (a%g/L) in groundwater. The Site was issued a "No Further Action" letter on Novemeber 15, 2011.

Registry ID: 110002950977

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

PACIFIC BELL TELEPHONE (Continued) **1000250339**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History: There is a State Water Board closure Order for this case issued 1/28/2015. The State Water Board needs confirmation that the corrective action wells and wastes have been removed from the site in order to close the case. Once confirmation has been received State Water Board can issue a Uniform Closure Letter and close the case. Attempts to reach the RP have failed. gwl 4/14/2016.

Latitude: 34.0392409
Longitude: -118.245909
Case Type: Cleanup Program Site
Case Worker: RV
Local Agency: Not reported
RB Case Number: 1290
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Contaminated Surface / Structure, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Chromium VI
Site History: Plating operations started in the mid-1910s in the southwestern portion of the Site until 2005. Ace Plating owned and conducted plating related operations on the 11 contiguous parcels, specifically electrochemical coating of metal parts. Numerous assessments conducted at the site indicate that the soil is impacted with VOCs and metals. The soil vapor has been sampled throughout the Site with tetrachloroethene (PCE) concentrations at 5 feet below ground surface (bgs) ranging from 7.9 micrograms per liter (a%g/L) to 87 a%g/L. The soil vapor data is limited at depths greater than 30 feet bgs. At 60 feet bgs and below, PCE concentrations range from 39 a%g/L below the

ACE PLATING CO., INC. (Continued) **S105632824**

Assembly Room to 127 a%g/L offsite on Crocker Street. The lateral extent of shallow PCE greater than 12 a%g/L is only defined on the east side. The source of the PCE is unknown but slightly higher concentrations exist in the central portions of the Plating Rooms. Chromium concentrations ranged from 1.5 mg/kg to 4,300 mg/kg for total chromium and from 0.92 to 840 mg/kg for hexavalent chromium. The maximum concentrations were both collected from SSVW-2 at 1 foot bgs located in the alley between the Crocker Street and Towne Avenue buildings and is adjacent to the location of the former chromium tanks. Outside of the area impacted by the former chromium tanks, the maximum chromium concentration is 4200 mg/kg for total chromium and 94 mg/kg for hexavalent chromium at MW-1. Degreasers that contained PCE were utilized in Plating Rooms 1 and 2 from 1993 to 2001. The maximum PCE concentration is 0.150 mg/kg and was sampled 4 feet deep in the vicinity of the former nickel dip tank in Plating Room 2. Two groundwater monitoring wells have been installed. Hexavalent chromium was not detected above the laboratory detection limits in any of the groundwater samples collected. Tetrachloroethylene (PCE) and 1,1-dichloroethene are the only VOC detected in groundwater, with the maximum concentration detected in MW-3 at a concentration of 33 ug/L and 2.7 ug/L, respectively.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Requirement to Prepare and Implement (40 CFR 112.3)

1 Professional engineer has reviewed and properly certified the SPCC Plan
☐ NVO ☐ OUT ■ NA ☐ UD ☐ COS ☐ RPT

2 SPCC maintained onsite (If facility staffed 4 hrs/day)
☐ NVO ☐ OUT ■ NA ☐ UD ☐ COS ☐ RPT

3 Facility meets the Tier I/II requirements
☐ NVO ☐ OUT ■ NA ☐ UD ☐ COS ☐ RPT

4 SPCC has been prepared and implemented
☐ NVO ■ OUT ☐ NA ☐ UD ☐ COS ☐ RPT
CLASS I
COMPLY BY: 1/14/2016

Violation Description:
Failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan . 40 CFR 112.3; HSC 6.67 25270.4.5(a)

Violation Comments:
OBSERVATION:
Failure to prepare and implement SPCC.

CORRECTIVE ACTION:
Prepare and implement SPCC.

SPCC Amendments (40 CFR 112.5)

5 Facility has amended SPCC as necessary
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

6 5 year review performed on SPCC
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

General SPCC Requirements (40 CFR 112.5 & 112.7)

26 Alternative environmental equivalence discussed in SPCC
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

General SPCC Requirements (40 CFR 112.7)

27 SPCC contians facility management approval to fully implement the SPCC Plan
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

28 SPCC follows seq/cross ref, good engineering practice, has mgt. approval, in writing, procedures
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

29 Adequate physical facility layout of facility included in SPCC
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

30 SPCC adequately addresses facility layout, operations, discharge prevention methods and containers
☐ NVO ☐ OUT ☐ NA ■ UD ☐ COS ☐ RPT

Overall Inspection Comments

On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (EDDIE MILLACCI - BUILDING ENGINEER). EMAIL: EMILLACCI@RATKOVICH.COM

Observed the facility and inspected hazardous materials storage.

Annual employee safety training records were maintained.

The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change

This report shall serve as a “NOTICE TO COMPLY” for Minor Violations, and a “NOTICE OF VIOLATION” for Major violations. Overall Inspection Comments

Consent to enter, inspect, and take photographs was given by: Danny Adams & Cruz Oropeza

Documents uploaded to CERS were reviewed and field verified. The Spill Prevention Control and Countermeasure plan and related inspection and testing logs were reviewed on site. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation.

NOTE:

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. The California Health and Safety Code (CHAPTER 6.67 SECTION 25270) requires that facilities meeting either of the following requirements be added to the APSA (Aboveground Petroleum Storage Act) program and comply with the regulations set forth in the CHSC. Storage of any liquid petroleum based product stored in above ground tanks 55 gallons or greater that either; have a total storage capacity of 1320 gallons or greater or; are stored below grade.

**********Upon the resolution of all the above mentioned violations, please respond via email to the issuing inspector to have the corrections reviewed and the violations cleared. **********

Reports emailed to:

This report shall serve as a “NOTICE TO COMPLY” for Minor Violations, and a “NOTICE OF VIOLATION” for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

Overall Inspection Comments

Consent to enter, inspect and take photographs was given by: Danny Adams

The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. New user instructions are provided below.

NOTE:
The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA
**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change.
For new CERS users, please follow the procedures below:
1. Visit http://cers.calepa.ca.gov to create a user name and password. The approval will take 2-3 days and Confirmation will be sent to the email provided.
2. Fill out owner/operator and business activity information on CERS. Verify that owner and business information in CERS is correct. Please remember to add your EPA ID number if you generate or store hazardous waste.
3. Complete your chemical inventory in CERS. All inventory items equal to or greater than 200 cubic feet of compressed gas, 55 gallons of liquid, or 500 pounds of solid, needs to be reported. This would include all containers of the same product added together. If you had a total of 11 containers of 5 gallons each of the same material the total would be 55 gallons and would need to be reported. In addition to your chemical inventory please upload a copy of your site map.
4. Upload a copy of your Emergency Response Plan/Contingency Plan, in the plan section of CERS. A CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN form can be found on the CERS website. When properly completed, this form will satisfy the Health and Safety code reporting requirements for both the Emergency Response and Employee Training sections in CERS.

As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help section for any questions that you may have.

General SPCC Requirements

19 PE required attestations in the SPCC Plan for alternative measure claim at a Tier II facility
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

20 Physical layout of the facility is adequately and accurately described in SPCC
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

21 SPCC Plan addresses the type of oil and storage capacity for all fixed and portable containers
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

22 SPCC contains an adequate facility diagram
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

23 SPCC adequately addresses discharge prevention measures for routine handling, loading/unloading
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

24 SPCC Plan addressed countermeasures for discharge discovery, response and cleanup
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

25 SPCC Plan addresses disposal methods for recovered materials
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

26 SPCC contains procedures for reporting a discharge
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

27 SPCC organized so discharge procedures are readily usable if the facility has no response plan
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

28 SPCC predicts direction, rate of flow, total quantity of oil that could be released from a discharge
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

30 SPCC addresses the appropriate general containment/diversionary structures/equipment
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

31 Appropriate (general) containment/diversionary structures/equipment have been provided
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

32 Impracticability of containment/diversionary items, if claimed, is PE demonstrated and certified
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

33 Periodic integrity/leak testing performed with impracticability claim
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

34 If claiming impracticability of containment/diversionary items a contingency plan has been included
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

35 If claiming impracticability written commitment of manpower, equipment, and materials provided
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

36 Employee training and spill prevention briefings discussed in SPCC plan
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

37 Training provided for op/maint of equip, discharge procedures, laws/regs, general fac ops, and SPCC
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

General SPCC Requirements

38 Person has been designated as accountable for discharge prevention and reports to management
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

39 Spill prevention briefings are conducted annually
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

40 SPCC addresses security measures-lighting, access to handling/storage, valves/pumps/transfer equip
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

41 Handling areas, valves, pumps/starter controls, load/unload connections secured, lighting adequate
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

42 SPCC adequately discusses facility tank car and tank truck loading/unloading rack
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

43 Loading rack containment has capacity to contain single largest compartment of tank car/truck
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

44 Vehicular departure warning system in place at facility with a loading/unloading rack
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

46 Brittle fracture evaluation of field-constructed aboveground tanks performed
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

47 Oil filled operational equipment containment standards are met
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

SPCC Requirements for Onshore Facilities

48 Facility drainage or drainage controls adequately discussed
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

49 Facility drainage adequately restrained unless conditions met
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

50 Valves used for drainage are manual (not flapper-type) to prevent a discharge
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

51 Drainage from undiked areas or diversion systems designed to retain final discharge in facility
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

52 Lift pumps provided for treated drainage waters when more than one treatment unit
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

53 Adequate discussion of all bulk storage containers located at the facility
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

54 Material and construction of all containers are compatible with the material stored
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

55 Adequately sized secondary containment provided and maintained for bulk storage containers
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Overall Inspection Comments

Second Notice of Violation Inspection Report

Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on1/25/2019, that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. New user instructions are provided below.

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement:
**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change.

For new CERS users, please follow the procedures below:
1. Visit http://cers.calepa.ca.gov to create a user name and password. The approval will take 2-3 days and Confirmation will be sent to the email provided.
2. Fill out owner/operator and business activity information on CERS. Verify that owner and business information in CERS is correct. Please remember to add your EPA ID number if you generate or store hazardous waste.
3. Complete your chemical inventory in CERS. All inventory items equal to or greater than 200 cubic feet of compressed gas, 55 gallons of liquid, or 500 pounds of solid, needs to be reported. This would include all containers of the same product added together. If you had a total of 11 containers of 5 gallons each of the same material the total would be 55 gallons and would need to be reported. In addition to your chemical inventory please upload a copy of your site map.
4. Upload a copy of your Emergency Response Plan/Contingency Plan, in the plan section of CERS. A CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN form can be found on the CERS website. When properly completed, this form will satisfy the Health and Safety code reporting requirements for both the Emergency Response and Employee Training sections in CERS. As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help

RE: PRA of October 20, 2019, Reference # H015838-102019.

Dear Ms. Carol Noland,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 700 S. Flower Street
Los Angeles CA 90017

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

Re: Phase I Environmental Site Assessment
700 South Flower and 711 South Hope
Los Angeles, California 90017
IVI Project No.: PC21102317

Dear Mr. Kindberg:

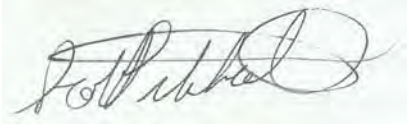
IVI Assessment Services, Inc. ("IVI") is pleased to submit this copy of our Phase I Environmental Site Assessment on the above-referenced property. This report outlines the findings of IVI's site reconnaissance, historical land use research, review of governmental records, interviews, and our Pre-Survey Questionnaire.

I declare that, to the best of my professional knowledge and belief, I meet the definition of *environmental professional* as defined in § 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the *subject property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Please contact the undersigned at **(619) 254-3124** or by email at scott.pritchard@ivi-intl.com should you have any questions.

Sincerely,

IVI Assessment Services, Inc.



Scott Pritchard, REA I
Environmental Professional

This report documents IVI's findings from our Phase I Environmental Site Assessment on the 700 South Flower and 711 South Hope, located at 700 South Flower and 711 South Hope, Los Angeles, California (the "Subject"). The property, which is situated in an urban area characterized by commercial, retail and office development, consists of a 4.3-acre parcel improved with a 39-year-old (built in 1973), office, hotel, and retail complex. The building was built in three phases. Phase I consists of two office towers, Phase II consists of a retail mall and a parking structure, and Phase III consists of a Sheraton Hotel. In plan, the complex consists of a single building, which is rectangular in shape containing two towers set on a connecting retail plaza occupying the first three floor levels with numerous retail tenants including a Macy's anchor tenant. In addition, there is an at-grade parking garage on the southern portion of the site. Prior to the construction of the existing improvements, the site was improved with single family residences, apartments, a YMCA, hotels, stores, restaurants and parking lots.

The purpose of this Phase I Environmental Site Assessment was to assess existing site conditions and render an opinion as to the identified or potential presence of recognized environmental conditions in connection with the property within the scope and limitations of ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-05 and the limitations identified herein. Exceptions to or deletions from the scope of work are described in Section 2.0.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject; however, the following items of environmental concern were identified which warrant mention:

Asbestos-Containing Material (ACM)

In December 2012, Environmental Testing Associates conducted an asbestos survey at the Subject, the results of which were reported in three separate reports, prepared for the Ratkovich Company. Positive asbestos results were detected in samples of drywall and tape, joint compound, fireproofing material, wall and ceiling texture, transite panels, thermal systems insulation, floor tile and mastic, carpet mastic and glue, cove base mastic, exterior stucco, leveling compound, and pipe wrap. The positive samples were found in various locations throughout the Subject. All of the positive samples were found to be in good condition, except for a fire door located in Carl's Jr., which was noted as damaged, and fireproofing debris noted in the ceiling area of Room 2424 in the Sheraton Hotel, which was noted as significantly damaged. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified asbestos-containing materials is being prepared.

Methane Hazard Zone

Based on information provided by the City of Los Angeles, the Subject is located in an area that has been identified as a potential methane hazard site due to its proximity to methane gas sources such as landfills, oil wells, oil fields and underground gas storage facilities. The locations of these methane gas sources are based on data from the California Division of Oil, Gas and Geothermal Resources and the City of Los Angeles Department of Environmental Affairs. From review of oil and gas field maps of the area, it does not appear that any active or inactive oil wells, landfills or oil fields have been located on the Subject property. Of note, methane is a non-toxic, non-carcinogenic gas that is extremely flammable at certain concentrations. No rotten egg-like odors, indicative of methane gas, have been reported in the building. Based on this information, the Subject's location within a Los Angeles City's designated Methane Zone is not suspected to be of a significant environmental concern. However, should future additions, alterations, repairs, changes of use or changes of occupancy to the existing building take place, the Subject may continue to be required to comply with the methane mitigation requirements set forth by the City of Los Angeles.

2.1 General

IVI was retained by National Real Estate Advisors ("Client" or "User") to prepare a Phase I Environmental Site Assessment, in conformance with ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-05 on the Subject in accordance with our Agreement dated November 29, 2012.

This Report was specifically prepared for the use and reliance of National Real Estate Advisors, National Real Estate Advisors, LLC, IBEW-NECA Diversified Underwritten Real Estate Fund ("INDURE"), The Ratkovich Company, NREA 700 Investors LLC, NREA 711 Investors, Inc., NREA-TRC 700 LLC, NREA-TRC 711 LLC, BVSEF III 700 REIT LLC, BVSEF III 711 NON REIT LLC, potential mortgagees and U.S. Bank National Association, a national banking association organized and existing under the laws of the United States of America, not in its individual capacity but solely in its capacity as Trustee for the registered holders of LB-UBS Commercial Mortgage Trust 2007-C1, Commercial Mortgage Pass-Through Certificates, Series 2007-C1 as an aid in underwriting and evaluating the collateral that would secure the Subject's mortgage. This Report is exclusively for the use of National Real Estate Advisors, National Real Estate Advisors, LLC, IBEW-NECA Diversified Underwritten Real Estate Fund ("INDURE"), The Ratkovich Company, NREA 700 Investors LLC, NREA 711 Investors, Inc., NREA-TRC 700 LLC, NREA-TRC 711 LLC, BVSEF III 700 REIT LLC, BVSEF III 711 NON REIT LLC and U.S. Bank National Association, a national banking association organized and existing under the laws of the United States of America, not in its individual capacity but solely in its capacity as Trustee for the registered holders of LB-UBS Commercial Mortgage Trust 2007-C1, Commercial Mortgage Pass-Through Certificates, Series 2007-C1 and is not for the use and benefit of, nor may it be relied upon by, any other person or entity, for any purpose, without the advance written consent of IVI or as described in this Report.

2.2 Purpose and Scope

2.2.1 Purpose

The purpose of this report is to identify Recognized Environmental Conditions in connection with the property, using the methodology recommended by ASTM International in order for a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser defenses to CERCLA liability and/or to help understand potential environmental conditions that could materially impact the operation of the business associated with the Subject. Specifically, this methodology is referred to as *Standard Practice for Environmental Site Assessments: Phase l Environmental Site Assessment Process* Designation: E 1527-05.

The term Recognized Environmental Condition is defined by ASTM Standard E 1527-05 as "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

2.2.2 Scope

In general, the scope of this assessment consisted of reviewing readily available information and environmental data relating to the property; interviewing readily available persons knowledgeable about the site; reviewing readily available maps, aerial photographs and records maintained by federal, state, and local regulatory agencies; and conducting a site visit.

Of importance, the client is advised that federal, state, and local laws may impose environmental assessment obligations beyond the scope of this practice. Client is also notified that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the Subject that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

The specific scope of this assignment included the following:

2.2.2.1 Performing a site reconnaissance to characterize on-site conditions and assess the site's location with respect to surrounding property uses and natural surface features. In addition, IVI conducted a reconnaissance of the surrounding roads and readily accessible adjacent properties to identify obvious potential environmental conditions on neighboring properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.

The site visit was conducted on December 12, 2012, by Carol Noland representing IVI. The site was represented by Mr. Phillip Lee, the Property Manager. It was partly cloudy and the temperature was approximately 55° F at the time of our site survey. IVI conducted the site reconnaissance in a systematic manner focusing initially on the exterior, which was surveyed in a grid pattern. IVI also surveyed a representative sampling of the interior spaces in a systematic manner.

2.2.2.2 Interviewing persons familiar with the property to obtain information on present and previous on-site activities potentially resulting in the environmental degradation of the site or adjoining properties. A Pre-Survey Questionnaire to be filled out and returned to IVI by someone knowledgeable about the site was provided to Mr. Phillip Lee. A copy of the returned Pre-Survey Questionnaire is provided in Appendix B.

The following table presents a summary of the individuals contacted or to whom requests for documentation were made as part of this assessment:

Name	Affiliation	Telephone No.
Custodian of Records	County of Los Angeles Public Health Investigation	(626) 430-5569
Customer Service Representative	Los Angeles Department of Water & Power (LADWP)	(800) 342-5397
Representative	Los Angeles County Department of Public Works –Environmental Programs	(626) 458-3517
Katie Fernandez	Los Angeles Fire Department	(213) 482-7115
Representative	California Department of Conservation – Division of Oil Gas & Geothermal Resources	(714) 816-6847
Phillip Lee	Subject Property – Property Manager	(213) 624-2891
Jeff Jorgensen	Subject Property – Chief Engineer	(213) 265-1968
Sam	Owner – Kodak Express Digital Solutions	(213) 629-4000
Ian Gee	General Manager – Sheraton Hotel	(213) 488-3500

2.2.2.3 If provided, reviewing of information such as previously prepared appraisals, building plans and specifications, and environmental reports.

2.2.2.4 Reviewing readily available historical documents, such as topographic maps, aerial photographs, city directories, Sanborn Fire Insurance Maps and atlases, to identify previous activities on and in the vicinity of the Subject. Copies of these documents are included in Appendix C.

2.2.2.5 Reviewing readily available environmental databases maintained by federal, state, and local agencies within the approximate minimum search distances as described within the Regulatory

Review Section 6.0 of this report. A copy of the Computerized Environmental Report, provided by Environmental Data Resources, Inc. can be referenced in Appendix D.

2.2.2.6 Conducting a visual survey of readily accessible common areas to identify the presence of the most obvious and common types of suspect asbestos containing materials (ACM). The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental protection Agency (USEPA) publication Managing Asbestos in Place (also known as the Green Book). All building materials listed within Appendix G of the Green Book are considered to be suspect ACMs at the Subject. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

THIS LIMITED SURVEY IS NOT TO BE CONSTRUED AS A COMPREHENSIVE ASBESTOS SURVEY, WHICH OFTEN ENTAILS DESTRUCTIVE TESTING OR THE SURVEY OF AREAS BEHIND WALLS, ABOVE CEILINGS, IN TENANT SPACES AND IN OTHER TYPICALLY INACCESSIBLE AREAS. MOREOVER, IVI DOES NOT WARRANT THAT ALL ACMs AT THE SUBJECT HAVE BEEN IDENTIFIED.

2.2.2.7 Reviewing published radon occurrence maps to determine whether the site is located in an area with a propensity for elevated radon concentrations.

2.2.2.8 An analysis of mold and/or mold issues was beyond the scope of this report.

2.2.2.9 Assessing the age of the Subject to determine whether it is predisposed to contain lead-based paint. During our walkthrough survey, IVI noted the condition of the paint observed. Note, a compliance audit for lead paint was not conducted.

2.2.2.10 Testing, if any, was designed solely to meet the requirements of the client's scope of work, not to meet any local, State or Federal regulations and shall not be utilized as such.

2.3 Data Gaps

According to § 3.3.20 of ASTM Standard E 1527-05 a data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts to gather same. Data gaps may result from incompleteness in any of the activities required by the ASTM Standard. The following data gaps occurred in connection with this report:

Data Gap	Explanation	Significance of Gap
Site History	History not conducted back to a time when the site was undeveloped land (See § 5)	Low - not likely to alter Report's conclusions due to IVI's search of standard historical sources of information such as aerial photographs, historic topographic maps, city directory abstracts, Sanborn Fire Insurance Maps, reviews of previous investigations and interviews with knowledgeable individuals who were familiar with the property.
Site History	Site history not conducted in 5-year intervals (See § 5)	Low - not likely to alter Report's conclusions due to IVI's search of standard historical sources of information such as aerial photographs, historic topographic maps, city directory abstracts, Sanborn Fire Insurance Maps, reviews of previous investigations and interviews with knowledgeable individuals who were familiar with the property.
User Interview	AAI User Questionnaire not returned to IVI	Low - not likely to alter Report's conclusions
Former Owner or Operator Interview	Unable to interview former site owner or operator due to inability to locate	Low - not likely to alter Report's conclusions
Governmental Records	FOIAs not returned (See § 8.6)	Unknown - However, if receipt of FOIAs alters the Report's conclusion, the client will be notified
Inaccessible Areas	IVI was not able to access two on-site transformer vaults owned by the Los Angeles Department of Water and Power. On-site personnel have no access to these areas. Accordingly, we make no representations with respect to same.	Low - not likely to alter Report's conclusions

Salient Assignment Information	
IVI Project No.:	PC21102317
Project Name:	700 South Flower and 711 South Hope
Street Address:	700 South Flower and 711 South Hope
City, State and Zip:	Los Angeles, California 90017
Primary Use:	Office, hotel, and retail
Year Built and Age of Improvements:	1973; 39 years-old
Site Area:	4.3 Acres
Building Size:	Verizon Center Tower – 673,553 SF Sheraton Hotel – 450,000 SF Macy's Store – 243,762 SF Plaza Mall – 104,452 SF Parking Garage – 833,000 SF
Number of Buildings:	4 + parking garage above Macy's

4.1 Property Location

The site is located at 700 South Flower and 711 South Hope in Los Angeles, Los Angeles County, California and is identified on local tax maps as Parcel Nos. 5144-010-401 through 5144-010-410. The address of 750 West 7th Street is also associated with the Subject. Please refer to the Site Plan and maps provided within Appendix C.

4.2 Surrounding Land Use

The property is located in an urban setting characterized by commercial retail and office development. The following is a tabulation of surrounding property usage:

Direction	Adjacent Properties	Surrounding Properties
North	Across 7th Street is The Roosevelt office building with several retail stores and restaurants on the ground floor.	Surrounding properties to the north are improved with mixed urban use office, residential loft and retail development.
South	Across 8th Street are a construction site, and the Gas Company Lofts building (with International House of Pancakes as a ground floor tenant).	Surrounding properties to the south are improved with mixed urban use office, residential loft and retail development.
East	Across Hope Street is an office building occupied by Rite Aid Pharmacy, a small building occupied by a Christian Science Reading Room, a parking Lot, and two public parking garages.	Surrounding properties to the east are improved with mixed urban use office, residential loft and retail development.
West	Across Flower Street are two parking garage structures, a surface parking lot, and an office building with retail stores and restaurants on the ground floor.	Surrounding properties to the west are improved with mixed urban use office, residential loft and retail development.

4.3 Physical Site Setting

4.3.1 Size and Shape of Parcel

The property is rectangular in shape and 4.3-acres in size.

4.3.2 Topography

The site slopes gently from the northeast to southwest. The topography of the area is best described as gently sloping. Properties to the northeast are at a higher topographic elevation. According to the United States Geological Survey (USGS) *Hollywood, CA* 7.5 Minute Series topographic

map, the Subject's topographic elevation ranges from 269' above mean sea level (msl) on the northeast end to approximately 260' above msl on the southwest end.

4.3.3 Surface Waters and Wetlands

Surface Waters

There are no surface water bodies or streams on or adjacent to the Subject. The closest open surface water to the Subject is the Los Angeles River, which is located approximately 1.5 miles to the east.

Wetlands

IVI reviewed a wetlands map of the subject area prepared using the US Department of the Interior, Fish and Wildlife Service's Internet Wetland Interactive Mapper. The source material used to produce the National Wetlands Inventory digital data for these maps was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Based on this review, IVI did not identify any federally regulated wetlands on the subject property. Additionally, IVI did not observe vegetation characteristic of wetlands on the subject site.

4.3.4 Soils, Geology and Groundwater

Soils

According to the *Soil Survey of Los Angeles County, California,* dated 1969, issued by the United States Department of Agriculture, Soil Conservation Service, the soils at the site are mapped as Hanford association, 2 to 5 percent slopes. The soils of this association occur on gently sloping alluvial fans. Hanford soils are over 60 inches deep, are well drained, and have moderately rapid subsoil permeability. They have a pale-brown coarse sandy loam surface layers approximately 8 inches thick underlain by light yellowish-brown coarse sandy loam and gravelly loamy coarse sand substratum.

Geology

The site is located within the western portion of the Coastal Plain of Los Angeles County, a deep northwest trending depositional basin bounded to the northeast by the Puente Hills and Whittier Fault, to the southwest by the folds and faults of the Newport-Inglewood structural zone, and to the southeast by the Santa Ana Mountains.

Deposits of recent alluvium of up to 175 feet in thickness underlie the site vicinity. The upper part of these deposits consist of stream channel deposits and unconsolidated and semi-consolidated alluvial fan and flood plain sediments consisting of gravel, sand, silt, and clay.

Groundwater

Under natural, undisturbed conditions, shallow groundwater flow generally follows the topography of the land surface and, on this basis, the topography suggests that groundwater flow across the site is in a south-southwesterly direction. However, localized conditions can alter flow direction and thus the presumed flow may not coincide with the actual in the subject area. Shallow groundwater in the vicinity of the site is anticipated to be encountered at a depth of approximately 50' below ground surface.

4.4 Site Improvements

4.4.1 Utilities

The Subject is served with the following utilities:

Water:	Los Angeles Department of Water & Power
Sanitary Sewer:	City of Los Angeles Bureau of Sanitation
Storm Sewer:	City of Los Angeles Public Works Department
Electric:	Los Angeles Department of Water & Power
Natural Gas:	The Gas Company

According to the most recent water quality report published by the Los Angeles Department of Water and Power, the water supplied to the Subject meets federal and state water quality standards.

Stormwater runoff collected by catch basins and roof drains is discharged into the municipal stormwater management system.

4.4.2 Building Description

The Subject is improved with a 39-year-old, office/retail complex which consists of a 33-story office tower, a 26-story hotel tower, a 3-story department store with 6 levels of parking above (9 total stories), and a 2-story shopping mall. The building features a two level basement, which underlies the entire complex, with cast-in-place concrete and concrete masonry unit (CMU) walls. The basement floors are used primarily for the central mechanical plant, loading docks, and some parking. The superstructure is of fireproofed structural steel. Exterior walls feature a glass and concrete panel curtainwall system and brick. The flat roofs are covered with a single-ply EPDM system.

Interior finishes include floor coverings of carpet, resilient floor tile, ceramic tile, and marble tile; walls of painted and papered gypsumboard, and brick; and ceilings of painted drywall, a suspended systems with inlaid acoustical ceiling tiles, and an open system that exposes the underside of the roof.

Heating is provided by natural gas-fired boilers located in the central plant, and air conditioning is provided by a chilled water system with a cooling tower located on the top level of the parking garage.

Vertical transportation for the office tower is provided by two banks of traction elevators (hi-rise and low-rise), with a total of 15 passenger and two freight elevators. The parking structure and the Macy's store are served by a common bank of five passenger and two freight elevators, one of which is hydraulic. The hotel is served by four traction passenger elevators, one electric freight elevator, and two hydraulic elevators.

The mall area and Macy's are also served by four electric escalators, and the hotel is served by six electrical escalators.

4.5 Current Property Use

The Subject is developed with an office, hotel, and retail. The following table summarizes the site's tenants and their activities:

Tenant	Description of Operation
Office building	Multiple professional office uses
Sheraton Hotel	Hotel
Macy's	Department store
Broadway Plaza Cleaners	Drop-off only dry cleaner
Kodak Express Digital Solutions	Photo developing
Mirror Image Car Wash	Car wash
Bally Total Fitness	Fitness center
Express	Women's clothes
Lady Foot Locker	Women's shoes
Plaza Suit & Tuxedo	Men's clothing
Victoria's Secret	Women's clothing
Bath & Body Works	Accessories
Bombay Eyebrow Threading Bar	Beauty salon
GNC	Health food store
Ultima Beauty Supply	Cosmetics
Dr. Regier, Optometrist	Optometry
U.S.P.O.	Post office
AT&T	Cell phone store

Tenant	Description of Operation
Hallmark Gold Crown	Cards and gift store
Jewelry Pavilion	Jewelry store
Mr. G's Toys	Toy store
Radioshack	Electronics store
Smoke & Stuff	Smoking accessories
Sports Iconic	Sports memorabilia store
T-Mobile	Cell phone store
The Brasserie	Restaurant
Carl's Jr.	Restaurant
Checker Cab Pizza	Restaurant
China Best Express	Restaurant
Coffee Walk & Yogurt Talk	Restaurant
Fresh & Tasty	Restaurant
Gourmet Fruit Bowl	Restaurant
The Lovin Oven	Restaurant
The Mad Burrito	Restaurant
Pam's Deli	Restaurant
Robek's Juice	Restaurant
Super Lunch	Restaurant
Wakana Sushi	Restaurant

Kodak Image Center Solutions utilizes photo developing equipment which generates a silver-containing development waste stream. The spent photo developer solution is passed through a silver-recovery unit prior to discharge to the municipal sewer system. The silver recovery unit filters are picked up by a contracted waste hauler (ERSI) on a regular basis.

Dry cleaning is not conducted on-site. Broadway Plaza Cleaners is a "drop-off" point only. This was confirmed during our site walkthrough. According to Property Management and the cleaner's manager, they have always been a drop off only cleaners.

4.6 Environmental Permits

Air Emissions

Based on our research, the Subject has registered with the South Coast Air Quality Management District (SCAQMD) and obtained permits to operate equipment that releases pollutants into the air. The Subject has obtained permit Nos. G12592, G12593, G13947, G14664, F77029, F77033, F77028, and F77030. The Subject maintains these permits for the emissions from emergency generators, fire pumps and boilers. No current violations were noted with the SCAQMD. As such, these permits do not represent a significant environmental concern to the Subject.

4.7 Plans and Specifications

Neither building drawings nor specifications were provided for our review.

5.1 Historical Summary

Prior to the construction of the existing improvements, the site contained single family residences, apartments, a YMCA, hotels, stores, restaurants and parking lots.

5.2 Topographic Maps

IVI reviewed historic USGS *Hollywood, CA* 7.5 Minute Series topographic maps of the Subject area provided by EDR. The following maps were provided for our review:

Year Revised	Subject Property	Surrounding Properties
1964	The Subject is shaded pink, denoting dense development. A building labeled as the YMCA is located in the northeastern-most corner in the location of the current hotel.	All surrounding areas are shaded pink, denoting dense development. Two churches are depicted to the southeast and southwest, and Pershing Square is shown to the northeast. A fire station is located to the northwest.
1975	Similar to the previous topographic map reviewed	Similar to the previous topographic map reviewed
1982	Similar to the previous topographic map reviewed	Similar to the previous topographic map reviewed
1994	Similar to the previous topographic map reviewed	Similar to the previous topographic map reviewed

The topographic maps do not identify individual buildings or development on the Subject due to the concentration of structures in the highly urbanized Los Angeles area, but rather shows the area to be shaded denoting urbanized land use, and identifies only landmarks as distinct structures. Nevertheless, the topographic maps do not identify any industrial complexes, landfills or wetlands on or adjacent to the subject site.

5.3 Historical Maps

Sanborn Fire Insurance Maps (Sanborn Maps)

IVI had a search conducted for Sanborn Maps, which reference the property. The findings of this review are summarized below:

Year	Subject Property	Adjacent and Surrounding Properties
1888	The north and central portions of the subject property are depicted as vacant land except for one residences located in the northeast corner. Six single-family dwellings, one with a conservatory, are located near the southwest portion of the	Vacant land, a shed, and a single family dwelling are depicted on the adjoining properties to the north, with single family dwellings located beyond to the east. Vacant land and the Los Angeles College are located to the south, across 8th Street.

Year	Subject Property	Adjacent and Surrounding Properties
	subject property, two dwellings and sheds are located near the center of the east side of the property, and a multifamily dwelling is located near the southeast portion of the subject property.	Several dwellings, a buggy shed, two liveries, and a small school are located to the west, across Flower Street. Two dwellings and vacant land a located to the north, across 7th Street. Sixth Street Baseball Park is located further north.
1894	A greenhouse, two hen houses, a small dwelling and several outbuildings are present on the northern end of the Subject. Three additional homes are present on the southeastern end of the property. No other significant changes were noted.	Several houses and the Simpson M. E. Tabernacle are present to the east across South Hope Street. The First English Lutheran Church and the Abbotsford Inn are located to the south across West 8th Street. Dwellings and a Lutheran church are located to the west across South Flower Street. No other significant changes were noted.
1906	The subject property is improved with flats, a dwellings and three small stores near the northern portion; dwellings and the Chateau Frontenac along the western portion; dwellings, a Swedish Baptist Church, two hotels, and a boarding house along the southern end; and dwellings along the eastern side.	Surrounding properties to the north, across 7th Street, include lodging, Hotel Orena, dwellings, and vacant land. Across 8th Street to the south are a church, dwellings, and the Abottsford Inn. Surrounding properties to the east, across South Hope Street, include flats, dwellings, and an auditorium.
1920	Similar to the previous map reviewed.	Similar to the previous map reviewed.
1950	The former flats located on the northern portion of the Subject have now been converted to retail stores. A YMCA building with a restaurant and a swimming pool is located on the northeastern end of the property. Stores, a clinic, and parking lots are located along the western portion of the subject property. Stores, restaurants, parking, and a sign painting area are located near the southern portion of the subject property.	Surrounding properties to the north, across West 7th Street, consist of restaurants, Hotel Victoria, stores, and a parking lot. Surrounding properties to the east, across South Hope Street, include a large department store, a church, a parking lot, several stores, and parking garages. The western adjacent area is improved with several office buildings, a parking garage, a piano store, and a large furniture store.
1955-1958	Similar to previous map reviewed.	Similar to previous map reviewed.
1960	The stores on the northern portion of the subject property have not changed significantly. The entire western portion of the subject property has been cleared and is utilized as a parking lot. The southwestern corner of the site is improved with a hotel and several stores. The southeastern portion of the subject property is improved with stores, restaurants, a parking garage, and a parking lot.	The northern surrounding area is improved with commercial retail and office buildings. The Southern California Gas Company Building was constructed on an adjacent property to the south. The remaining adjacent and surrounding properties appear unchanged.
1962-1963	Similar to previous map reviewed.	Similar to previous map reviewed.

Year	Subject Property	Adjacent and Surrounding Properties
1967	The stores on the northern portion of the site have been razed, and the area is developed with a parking lot. The YMCA is still present on the eastern end, along with several stores, a motel, and a parking lot. The western area parking lot and hotel and stores near the southwestern portion remain unchanged.	Surrounding properties to the north, across West 7th Street, consist of the Republic Federal Savings Building, stores, restaurants, bars, and offices. The remaining adjacent and surrounding properties appear unchanged.
1970	The stores on the northern portion of the site have been razed, and the area is developed with a parking lot. One small motel is present on the eastern end. The southeastern portion of the Subject has also been cleared and is used as a parking lot. The western area parking lot and hotel and stores near the southwestern portion remain unchanged.	Similar to previous map reviewed.

5.4 Aerial Photographs

Aerial photographs frequently provide visual documentation of site conditions at the time of the photographs. Activities such as dumping or industrial use of a site can often be discerned through the examination of aerial photographs. IVI reviewed historic aerial photographs provided by EDR and GoogleEarth (online). The following is a synopsis of the aerial photographs reviewed:

Year	Subject	Surrounding Properties
1928	The Subject appears developed with several larger commercial and structures.	The surrounding area appears densely developed, primarily with smaller residential-type structures to the south and east, with some larger commercial structures to the north and west.
1938	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
1947	Similar to the previous aerial photograph reviewed.	Several larger commercial buildings are present to the east and south. No other significant changes were noted.
1952	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
1960	Similar to the previous aerial photograph reviewed.	Several commercial structures and parking lots are visible in the surrounding area. The 110 freeway is located approximately 0.25 mile to the west.
1971	The Subject appears to contain no structures, and to be used as parking lot.	The surrounding area appears relatively unchanged, although several larger office buildings are present.
1982	The Subject is improved with the existing structure.	Similar to the previous aerial photograph reviewed.

Year	Subject	Surrounding Properties
1994	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
2004	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
2011	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.

5.5 Chain-of-Ownership

A copy of the Subject's Chain-of-Title has not been provided to IVI for review.

5.6 Previous Reports

IVI reviewed several previous environmental assessments prepared on the Subject. The information obtained was not verified for accuracy by IVI and a critique of the report was beyond the scope of this assessment. The following documents were provided for review:

- *Phase I Environmental Site Assessment of Hyatt Regency Los Angeles, 711 South Hope Street, Los Angeles, California*, dated February 17, 2000, prepared by IVI Environmental Inc. (IVI), on behalf of Commercial Capital Initiatives, Inc. According to this report, the hotel was attached to the MCI Center, which was not a part of this assessment. The report noted that the hotel's mechanical systems and central plant were located off-site (within the MCI Center central plant). The Subject was improved with various commercial and residential buildings prior to construction of the existing improvements.

  This report did not identify any recognized environmental conditions in connection with the Subject. However, the report identified friable fireproofing and acoustic ceiling texture, as well as non-friable flooring and wallboard assemblies, and roofing materials as asbestos-containing. All of the suspected and identified ACM throughout the property is considered to be in good condition with a low potential for disturbance. All of the asbestos on-site was noted as being properly managed under an Operations and Maintenance (O&M) Program which appeared adequate, and in use.

- *Phase I Environmental Site Assessment of MCI Center and Macy's Plaza, 700 South Flower Street, Los Angeles, California, 90017*, dated February 18, 2000, prepared by IVI Environmental, Inc. (IVI), on behalf of Commercial Capital Initiatives, Inc. This report did not include the adjoining hotel. According to this report, improved with various residential and commercial structures prior to construction of the existing improvements.

This report did not identify any recognized environmental conditions in connection with the Subject. However, the report identified fireproofing material, floor tile assemblies, wallboard assemblies, fire door insulation, and pipe insulation tape as asbestos-containing materials (ACMs), and cooling tower fill material and the built-up roofing materials as suspect ACMs. The report recommended the continued management of ACMs under the existing Operations and Maintenance Plan (O&M). The report also recommended that the aboveground storage tanks serving the emergency generators and fire pumps be properly registered.

- *Asbestos Operations and Maintenance Program Manual, The Complex Containing The MCI Center Office Tower, The Hyatt Hotel, The Macy's Plaza Department Store and Shopping Center, and a Parking Garage in the Block Bounded by 7th, 8th, Flower and Hope in Los Angeles, CA,* dated June 24, 2003, prepared by Masek Consulting Services, Inc. (Masek), on behalf of Cushman & Wakefield of California, Inc.

  The O&M plan was prepared to assist those involved with the Subject to prevent exposure to the actual and assumed asbestos-containing materials (ACMs) present in the building, and to assist the owner and management in complying all al asbestos-related regulations, and to minimize exposure of people in the building. The O&M plan identified the following ACMs at the site:

  1) Fireproofing applied to structural steel, including overspray
  2) Drywall joint compound
  3) Insulation on an abandoned water line
  4) Elbow/joint insulation on four fire-suppression water pipes
  5) White, soft, rubbery insulation tape
  6) Asbestos-insulated fire doors
  7) Composition roofing
  8) Vinyl floor tile or cove base and/or associated mastic
  9) Heavy acoustic texture on the concrete deck above the former department store restaurant kitchen
  10) Acoustic ceiling texture in hotel gift shop
  11) 2 x4 suspended ceiling panels in storage areas
  12) Miscellaneous sheet vinyl flooring

- *Phase I Environmental Site Assessment Report, MCI Center, 700 South Flower Street, Los Angeles, California, 90017*, dated April 11, 2005, prepared by EBI Consulting (EBI), on behalf of Wells Fargo Bank. According to this report, the Subject was single family residences, hotels, boarding schools, stores, restaurants and parking lots prior to construction of the existing improvements.

This report did not identify any recognized environmental conditions in connection with the Subject, except for the following:

1) EBI noted several ASTS at the Subject, specifically two 8,800-gallon diesel ASTs located in the sub-basement of the building. Diesel fuel is supplied to these tanks and then automatically distributed through internal lines to remote day tanks connected to various emergency generators and the fire pumps. EBI noted that a Veeder Root leak detection system is in-place, and that all ASTs appeared to be properly labeled and in good condition. No staining or evidence of leakage was observed. No further action was recommended.
2) EBI also noted ACM in the form of fireproofing, drywall joint compound, vinyl floor tile and other products. The identified ACM was in good condition, and was managed under an O&M plan. EBI recommended additional sampling and removal should building construction or renovation activities occur.
3) EBI also noted PCB-containing fluorescent lighting ballasts at the Subject, which appear to have been appropriately removed by a licensed contractor. No further action was recommended, other than the continued appropriate disposal of the lighting ballasts.
4) EBI noted several historical tenants of potential environmental concern, including Sun-Sun Laundry, B'Nai B'Rith Messenger Newspaper, Allied Artists & Photographers and Ralph Sanford garage. EBI was not able to determine whether Sun-Sun Laundry conducted dry cleaning on-site or whether any hazardous materials usage actually occurred at the Subject. EBI noted, however, that the entire footprint of the Subject was excavated for two subterranean levels during construction, and that these historical uses were no longer of specific concern. No further action was recommended.
5) EBI also noted that a car wash operates in the underground parking garage below Macy's which uses a clarifier. The clarifier is reportedly pumped out on a regular basis, and no further action was recommended.

- *Phase I Environmental Site Assessment, 700 S. Flower Street, 700 South Flower Street, Los Angeles, California, 90017,* dated December 2, 2005, prepared by IVI Due Diligence Services, Inc. (IVI), on behalf of GE Capital Corporation. This Phase I did not include the adjoining hotel. According to this report, the Subject was single family residences, hotels, boarding schools, stores, restaurants and parking lots prior to construction of the existing improvements.

  This report did not identify any recognized environmental conditions in connection with the Subject, but did note the presence of ACM, as reported above. This report recommended the continued use of the existing O&M plan.

- *Phase I Environmental Site Assessment of Sheraton Downtown Los Angeles, 711 South Hope Street, Los Angeles, Los Angeles County California 90017,* dated November 2, 2006, prepared by Property Solutions Inc. (PSI), on behalf of UBS Real Estate Investments, Inc. This report did not cover the adjoining office building or shopping mall. According to this report, the Subject was occupied by a YMCA, a parking lot, and various retail spaces prior to construction of the existing improvements. The report noted that renovations including some asbestos abatement occurred in 1989.

  This report did not identify any recognized environmental conditions in connection with the Subject.

5.7 City Directories

A Historical City Directory Abstract obtained from EDR was reviewed. This Abstract provides site occupant listings by address. Historical site addresses include 700-754 South Flower Street, 701-757 South Hope Street, 700-762 West 7th Street, and 701-733 West 8th Street. However, EDR did not provide a summary of addresses on South Hope Street or West 8th Street. Previous site occupants were primarily residential and commercial in nature, and included the following significant listings:

1924 – C&S Lubricating Service, 742 South Flower Street
1929 – Harold Schimke, gas station, 708 South Flower Street
1951 – Allied Typographers & Photographers, 718 South Flower Street

Of note, no evidence of the presence of a gasoline station at 708 South Flower Street was found. The 1920 Sanborn maps depicted that address as containing a residential flat, and the 1950 Sanborn map, the next available, depicts a small store at that location. It is possible that the listing was indicative of Mr. Schimke's occupation, rather than what was actually present on the site. Notwithstanding, it should be noted that the entire footprint of the Subject was excavated for the construction of two subterranean levels. It is likely that any potential residual impacts to the soil from any previous uses would have been removed at that time. As such, these listings are not considered to be a significant environmental concern to the Subject.

No significant listings, other than Plaza Cleaner and Kodak Imaging, two current tenants discussed elsewhere in this report, were identified after the current complex was constructed in 1973.

5.8 Interviews

According to Jeff Jorgensen, the Chief Building Engineer, who has been involved with the property for the past 12 years, the Subject was constructed in 1973. He had no other knowledge of the history of the property.

5.9 Municipal Records

Tax Assessor Records

According to the tax assessor records reviewed, the Subject buildings were constructed in 1973.

5.10 Internet Search

IVI conducted a cursory internet search for the Subject's name and address using the Google search engine on December 14, 2012. No environmentally related information was identified on the first page of the Google search engine.

A copy of regulatory database information contained within a Computerized Environmental Report (CER) provided by Environmental Data Resources, Inc. (EDR) appears in Appendix D. The CER is a listing of sites identified on select federal and state standard source environmental databases within the approximate minimum search distance specified by ASTM Standard Practice for Environmental Site Assessments E 1527-05. IVI reviewed each environmental database to determine if certain sites identified in the CER are suspected to represent a material negative environmental impact to the Subject. The following table lists the number of sites by regulatory database within the prescribed minimum search distance appearing in the CER.

Databases Reviewed	Approximate Minimum Search Distance (AMSD)	Number of Sites Within AMSD
Federal National Priorities List (NPL) Site List	One-Mile	0
Federal Delisted NPL Site List	One-Half Mile	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	One-Half Mile	2
Federal CERCLIS No Further Remedial Action Planned (NFRAP) Sites	One-Half Mile	0
Federal Resource Conservation and Recovery Information System (RCRIS) Treatment, Storage, and Disposal (TSD) List	One-Half Mile	0
Federal RCRIS Generators List	On-Site and Adjoining Properties	3
Federal Corrective Action Tracking System (CORRACTS)	One-Mile	0
Federal Emergency Response Notification System (ERNS) List	On-Site	0
Federal Institutional/Engineering Control Registries	On-Site	0
Facility Index Systems (FINDS)	On-Site	2
California and Tribal Lists of NPL Equivalent Hazardous Waste Sites Identified for Investigation and/or Remediation	One-Mile	0
California and Tribal Lists of CERCLIS Equivalent Hazardous Waste Sites Identified for Investigation and/or Remediation	One-Half Mile	8
California and Tribal Landfills or Solid Waste Facilities List	One-Half Mile	0
California and Tribal Registered Underground Storage Tank (RUST) Facility List	On-Site and Adjoining Properties	2
California and Tribal Leaking UST/Spill List	One-Half Mile	27
California and Tribal Institutional/Engineering Control	On-Site	0

Databases Reviewed	Approximate Minimum Search Distance (AMSD)	Number of Sites Within AMSD
Registries		
California and Tribal Voluntary Cleanup Sites	One-Half Mile	0
California and Tribal Brownfields Sites	One-Half Mile	0
California Haznet	On-Site	6
California Emissions Inventory (EMI)	On-Site	2

The CER identified 20 "Orphan Sites". "Orphan Sites" are those sites that could not be mapped or "geocoded" due to inadequate address information. Refer to the CER for a list of these "Orphan Sites". IVI attempted to locate these sites via a review of street maps, vehicular reconnaissance and/or interviews with people familiar with the area. "Orphan Sites" that were identified in this manner were analyzed in their respective regulatory database below.

A description of the databases reviewed by IVI and an analysis of sites identified within the prescribed search area are presented below.

6.1 Federal Databases

NPL

The NPL database is a listing of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or “Superfund”). A site must be on the NPL to receive money from the Trust Fund for Remedial Action.

Analysis/Comment: The CER did not identify NPL sites within the AMSD.

Delisted NPL Site List

The EPA may delete a final NPL site if it determines that no further response is required to protect human health or the environment. Under Section 300.425(e) of the National Contingency Plan (55 FR 8845, March 8, 1990). Sites that have been deleted from the NPL remain eligible for further Superfund-financed remedial action in the unlikely event that conditions in the future warrant such action. Partial deletions can also be conducted at NPL sites.

Analysis/Comment: The CER did not identify Delisted NPL sites within the AMSD.

CERCLIS

CERCLIS is the USEPA's system for tracking potential hazardous-waste sites within the Superfund program. A site's presence on CERCLIS does not imply a level of federal activity or progress at a site, nor does it indicate that hazardous conditions necessarily exist at the location. Within one year of being entered into CERCLIS, the USEPA performs a preliminary assessment of a site. Based upon the results of the preliminary assessment, the USEPA may conduct additional investigation, which could lead to a site being listed on the NPL.

Analysis/Comment: The CER identified the following CERCLA sites within the AMSD:

Property Name/ Address	Distance (Miles)	Direction	Presumed Hydrogeologic Relationship	Regulatory Status
Kirk-Rich Dials 404 West 7th Street, Suite 1215	0.23	Southeast	Crossgradient	Stabilized. removal; no site assessment work required
Democratic National Convention 1111 S. Figueroa Street	0.44 (corrected)	Southwest	Downgradient	Removal only; no site assessment work required

These sites are located a sufficient distance from the Subject so as not to be reasonably suspect of having impacted same. In addition, these sites are located hydrogeologically crossgradient/downgradient from the Subject and groundwater flow across these sites is not suspected to be in the direction of the Subject. As such, IVI does not suspect these sites of having had a significant negative environmental impact on the Subject.

CERCLIS No Further Remedial Action Planned (NFRAP) Sites

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from the CERCLIS list. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to warrant Federal Superfund Action or NPL consideration.

Analysis/Comment: The CER did not identify CERCLA NFRAP sites within the AMSD.

RCRIS TSD

The RCRIS TSD contains information pertaining to those facilities that treat, store, or dispose of hazardous waste. While these facilities represent some form of hazardous waste activity, they are most significant if determined to be out of compliance or to have violations.

Analysis/Comment: The CER did not identify RCRIS TSD facilities within the AMSD.

RCRIS Generators

IVI reviewed the list of sites, which have filed notification with the USEPA in accordance with RCRA requirements. These sites include generators of hazardous waste regulated under RCRA. Under RCRA, hazardous waste generators are classified by the quantity of hazardous waste generated in a calendar month into the following categories: Large Quantity Generator (LQG), greater than 1,000 kilograms (kg); Small Quantity Generator (SQG), 100 to 1,000 kg; and Conditionally-Exempt Small Quantity Generator (CESQG), less than 100 kg. RCRA Generators, while they represent some form of hazardous waste activity, are most significant if they are determined to have Class I Violations or to be non-compliant.

Analysis/Comment: The CER identified the following RCRA Generators located within the AMSD:

Property Name/ Address	Distance	Direction	Presumed Hydrogeologic Relationship	Regulatory Status
Broadway Plaza/700 S. Flower Street	On-Site	NA	NA	Compliant/No Violations
Broadway Plaza Photo/750 W. 7th Street	On-Site	NA	NA	Compliant/No Violations

The Subject was identified on the RCRIS database twice due to the on-site photo developing and the generation of lighting ballasts and waste oils from the building mechanicals. No violations or compliance infractions were identified with respect to these two listings. The generation and removal of hazardous waste from the Subject is further discussed in Section 7.3.

Property Name/ Address	Distance	Direction	Presumed Hydrogeologic Relationship	Regulatory Status
Bullock's/800 S. Hope Street	Adjacent	S	Downgradient	Compliant/No Violations

No violations or compliance infractions were identified in connection with the above-referenced RCRA site. In addition, this site is located hydrogeologically

downgradient from the Subject and groundwater flow across this site is suspected to be away from the Subject. As such, IVI does not suspect this site of having had a significant negative environmental impact on the Subject.

Corrective Action Tracking System (CORRACTS)

CORRACTS is a list of facilities that are found to have had hazardous waste releases and require RCRA corrective action activity, which can range from site investigations to remediation.

Analysis/Comment: The CER did not identify CORRACTS sites within the AMSD.

ERNS

The ERNS is a database of notifications of oil discharges and hazardous substance releases made to the Federal government. These notifications are used by "On-Scene Coordinators" to determine an emergency response and release prevention. When a call is made to the National Response Center or one of the 10 USEPA Regions, a report is created containing all of the release information that the caller provided. This report is transferred to an appropriate agency to evaluate the need for a response and the records are electronically transferred to the ERNS database. As such, if a reported release of oil or a hazardous substance is deemed to require a response, it should also be listed in the appropriate federal or state environmental database such as CERCLIS, state equivalent CERCLIS, or state leaking underground storage tank or spills lists.

Analysis/Comment: The CER did not identify the Subject on the ERNS database.

Federal Institutional Control/Engineering Control Registries

These Federal registries contain listings of those sites which have either engineering and/or institutional controls in place. Engineering controls include various physical control devices such as fences, caps, building slabs, paved areas, liners and treatment methods to eliminate pathways for regulated substances to enter the environment or affect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions (Activity and Use Limitations) are generally required as part of institutional controls.

Analysis/Comment: The CER did not identify the Subject on the Federal Institutional or Engineering Control registries.

FINDS

FINDS contains both facility information and "pointers" to other environment database sources that contain additional detail. These other databases include: RCRIS, PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]), CERCLIS, DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), FRDS (Federal Reporting Data System), SIA (Surface Impoundments), CICIS (TSCA Chemicals in Commerce Information System), PADS, RCRA-J (medical waste transporters/disposers), TRIS and TSCA.

***Analysis/Comment*:** The CER identified the Subject on the FINDS database under the name of Broadway Plaza and Broadway Plaza Photo. The listings are related to the Subject's designation as a RCRA hazardous waste generator.

Nevertheless, these listings were not cross-referenced on any regulatory databases that report releases or contamination conditions, such as the SHWS, LUST or SLIC databases. Based on the above information, these listings are not suspected to be of a significant environmental concern to the Subject.

6.2 California Environmental Protection Agency (Cal/EPA) Databases

Response and Tribal NPL Equivalent Hazardous Waste Sites (HWS)

The Response database is a list of confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Analysis/Comment: The CER did not identify sites within the AMSD.

Envirostor, HIST Cal-Sites, and Tribal CERCLIS Equivalent Hazardous Waste Sites (HWS)

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used

to assess potential impacts to public health and the environment at contaminated sites.

The HIST Cal-Sites database is a list of facilities subject to investigation concerning likely or threatened releases of hazardous substances. These sites are either being actively remediated, or are currently under evaluation for further action, if necessary. This database has been replaced by Envirostor and is no longer being updated.

Tribal CERCLIS Equivalent HWS list is an inventory of toxic sites listed by Tribal Environmental and Health Authorities. These sites are either under remediation, or are currently under evaluation for further action, if necessary.

Analysis/Comment: The CER identified eight California and/or Tribal CERCLIS Equivalent Hazardous Waste sites within the AMSD (<0.5 mile). All of the identified sites are located a sufficient distance (>0.20 mile), and are in a crossgradient/downgradient location from the Subject so as not to be reasonably suspected of having impacted same.

California and/or Tribal Solid Waste Facilities (SWF) List

The SWF list is an inventory of active, closed and inactive landfills and other sites that manage solid wastes.

Analysis/Comment: The CER did not identify SWF sites within the AMSD.

California and/or Tribal Registered Underground Storage Tanks (UST), HIST USTs and SWEEPS UST Facility Lists

The UST facility list is an inventory of registered liquid bulk storage tanks. The HIST UST database, aka the Hazardous Substance Storage Container Database, is a historical listing of UST sites. The SWEEPS UST database, aka the Statewide Environmental Evaluation and Planning System, is a list of USTs that was updated and maintained by a company contacted by the State Regional Water Quality Control Board in the early 1980's. This listing is no longer updated or maintained but has historical significance.

Inclusion of a site on these lists does not necessarily constitute environmental contamination, but instead merely indicates the presence of registered bulk storage tanks.

Analysis/Comment: The CER identified the following Registered Storage Tank sites within the AMSD:

Property Name/	Distance	Direction	Presumed Hydrogeologic	Regulatory

Address			Relationship	Status
Hammerson Properties/655 S. Hope Street	Adjacent	NE	Upgradient	Active
Bullock's/800 S. Hope Street	Adjacent	S	Downgradient	Active

The registered storage tank sites listed above have an Active regulatory status. However, these sites are not listed on other environmental databases indicative of contamination such as the leaking underground storage tank list or the inventory of State Hazardous Waste Sites. Since the registered storage tank list is only an inventory of storage tanks, and does not necessarily indicate subsurface contamination, in the absence of additional information, it is not suspected that these registered storage tank sites have had a negative environmental impact on the Subject.

California and Tribal Leaking Underground Storage Tanks (LUST) List and Spills, Leaks, Investigations and Cleanups (SLIC) Records

The LUST list is an inventory of reported spills and leaks, both active and inactive maintained by the various California Regional Water Quality Control Boards. It includes stationary and non-stationary source spills reported to state and federal agencies, including remediated and contaminated leaking UST sites. SLIC records, which are maintained by the various Regional Water Quality Control Boards, document unauthorized discharges from spills and leaks from sources other than UST and other regulated sites.

Analysis/Comment: The CER identified 27 LUST/SLIC sites within the AMSD, 19 of which have been granted a Case Closed status. A Case Closed status is granted to those sites that do not exhibit levels of contamination requiring clean-up, have been remediated to the satisfaction of the lead regulatory agency, or are not suspected to represent a significant threat to human health or the environment. As such, absent additional information to the contrary, it is unlikely that contamination originating at sites with a Case Closed status have had a significant negative environmental impact on the Subject.

All of the remaining open sites are located a sufficient distance (>0.25 mile), and are in a crossgradient/downgradient location from the Subject so as not to be reasonably suspected of having impacted same.

California Deed Restriction Listing and Tribal Institutional Control/Engineering Control Registries

The DTSC SMBRP list includes sites remediated under the program's oversight that have active deed restrictions. The DTSC Hazardous Waste Management Program Facility Sites (HWMP) list includes current and former hazardous waste facilities with deed/Land Use Restrictions that have been recorded with the County. The type of land use restrictions includes deed notices, deed restrictions, or a land use restriction that binds current and future owners.

The Tribal Institutional Control/Engineering Control Registries contain listings of those sites which have either engineering and/or institutional controls in place. Engineering controls include various physical control devices such as fences, caps, building slabs, paved areas, liners and treatment methods to eliminate pathways for regulated substances to enter the environment or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions (Activity and Use Limitations) are generally required as part of institutional controls.

Analysis/Comment: The CER did not identify the Subject on the SMBRP, HWMP or Tribal Institutional or Engineering Control registries.

California and Tribal Voluntary Cleanup Program (VCP) Sites

The California VCP properties list includes "low" threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that the DTSC oversee the investigation and cleanup.

Analysis/Comment: The CER did not identify VCP sites within the AMSD

California and Tribal Brownfield Sites

A Brownfield site was defined in the 2002 Small Business Liability Relief and Brownfields Revitalization Act (Brownfields Law) as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant". In connection with the passage of the Brownfields Law, the Environmental Protection Agency grants awards to states and tribes for activities under Section 128 (a).

Analysis/Comment: The CER did not identify Brownfield sites within the AMSD.

California HAZNET

The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Analysis/Comment: The Subject has two active EPA ID numbers for the removal of hazardous waste, CAL000334972 under the name of 700 South Flower LLC, and CAL000195592, under the name of Macy's West. In addition, several other EPA ID numbers have been associated with the Subject addresses, which are currently inactive. Wastes removal under these EPA ID numbers include asbestos-containing waste, waste oil, paint sludge, organic solids, and hydrocarbon solvents.

This database provides information on quantities and types of wastes generated and not on spills or cleanups. The Subject was not identified on any regulatory databases that report releases or contamination conditions, such as the SHWS, LUST or SLIC databases. Based on the above information, these listings are not suspected to be of a significant environmental concern to the Subject.

Emissions Inventory Data (EMI)

Database of toxics and criteria pollutant emissions data collected by the California Air Resources Board. This database provides information on facilities with air emissions permits and not on spills or cleanups. Therefore, inclusion on this database does not represent an adverse impact on the subject property.

Analysis/Comment: The Subject was identified on the EMI database, under the names of Broadway Plaza and Hope & Flower BP Partnership. It is likely that these listings are related to the use of diesel-powered generators, diesel-powered fire pumps, natural gas-powered boilers, and natural gas-powered charbroilers at the Subject. No violations were listed, and none were found on the South Coast Air Quality Management District website. Based on this information, these listings are not suspected to be of a significant environmental concern to the Subject.

6.3 EDR Proprietary Databases

EDR Historic Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories

of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

Analysis/Comment: The CER identified the Subject on the historical auto stations database. Specifically, C S Lubricating Service listed at 742 S. Flower Street in 1924. No other evidence of the presence of on-site auto stations was found. A 1920 Sanborn map was reviewed but did not indicate individual occupants, but that area appeared to be occupied by houses. A 1950 Sanborn map was also reviewed which showed that area to be a parking lot at that time.

In addition, one adjacent site was listed, the Auto Center Garage at 746 S. Hope Street, located adjacent to the east. No reported releases were found for this site.

Although the exact nature of these listed sites cannot be confirmed, it should be noted that the entire footprint of the Subject was excavated for the construction of two subterranean levels. It is likely that any potential residual impacts to the soil would have been removed at that time. As such, these listings are not considered to be a significant environmental concern to the Subject.

EDR Historic Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

Analysis/Comment: The CER identified the Subject on the historical cleaners database. Specifically, J Tanaka listed at 709 W. 8th Street in 1924, Steve Pappas listed at 721 W. 8th Street in 1928-1937, and James Robertson listed at 715 S. Hope Street in 1937. No other evidence of the presence of on-site dry cleaners was found. A 1920 Sanborn map was reviewed but did not indicate individual occupants. A 1950 Sanborn map was also reviewed which showed that 709 and 721 W. 8th Street were identified as stores and 715 S. Hope Street was part of the YMCA at that time.

In addition, one adjacent site was listed, Rudder O'Brien at 744 S. Hope Street, located adjacent to the east. The 1950 Sanborn map shows this located to be a parking garage at that time.

Although the exact nature of these listed sites cannot be confirmed, it should be noted that the entire footprint of the Subject was excavated for the construction of two subterranean levels. It is likely that any potential residual impacts to the soil would have been removed at that time. As such, these listings are not considered to be a significant environmental concern to the Subject.

In addition, Broadway Plaza Cleaners, a current tenant, appears in this database for a listing from 1994. As noted elsewhere within this report, Broadway Plaza Cleaners is a drop-off facility only. No actual dry cleaning occurs on the Subject. According to Jeff Jorgensen, as well as the previous Phase I ESAs reviewed, no dry cleaning has ever occupied at this location. As such, this listing is not considered to be a significant environmental concern to the Subject.

EDR Manufactured Gas Plants

This database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to the 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of wastes. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Analysis/Comment: The CER did not identify the Subject or any adjacent properties on the manufactured gas plant database.

7.1 Chemical Storage and Usage

IVI noted two, 75-gallon plastic containers and one, 100-gallon plastic container of cooling tower chemicals. The containers are stored within a secondary containment berm and are located in a labeled chemical storage room in the basement. In addition, chemicals customarily used for routine building maintenance, including six, 5-gallon containers of oil for the compressors, as well as paints, were noted on-site. For the most part, the maintenance chemicals are stored in various locations in the basement within flammable cabinets. Of note, floor drains were not observed in the vicinity of the chemical storage areas. In addition, housekeeping was generally considered satisfactory. The chemicals, which are stored in their original containers, do not appear to represent an impact to the environmental quality of the site provided that they are used as intended, properly handled, and the regulations pertaining to their usage are followed.

7.2 Bulk Storage Tanks

Underground Storage Tanks (USTs)

No USTs were identified on the subject property and no common indicators of USTs such as vent pipes, fill ports, manways, pavement cuts, fuel gauges or dispensers were observed. In addition, according to Jeff Jorgensen, there are no USTs on-site. Furthermore, the Subject was not identified on the California list of registered UST facilities.

No underground storage tanks were reportedly removed, closed-in-place or abandoned at the site and no common indicators of closed tanks were observed.

Aboveground Storage Tanks (ASTs)

ASTs per the following schedule were observed:

Tank No.	Location	Capacity (Gallons)	Product	Visible Condition	Secondary Containment
1	Basement	8,800	Diesel	Satisfactory	Yes
2	Basement	8,800	Diesel	Satisfactory	Yes
3	Loading Dock	1,500	Diesel	Satisfactory	Yes
4	Generator room/basement	60	Diesel	Satisfactory	Yes
5	Generator room/basement	60	Diesel	Satisfactory	Yes
6	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes
7	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes
8	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes
9	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes

There are two large diesel tanks, a transfer tank, and several day tanks that supply diesel fuel to the two emergency generators and fire pumps. The tanks are provided with secondary containment, appeared to be in good condition, void of leaks. The secondary containment structures appear to be in good condition and void of breaches. All the tanks are correctly permitted under the Los Angeles Fire Department.

Of note, one of the tenants, AT&T, has an emergency generator on the 3rd floor, for which it is responsible. That generator is equipped with a 60-gallon diesel day tank which is fed from one of the 8,800-gallon diesel supply tanks.

7.3 Site Waste and Wastewater

Solid Waste

Non-hazardous solid waste is disposed of in dumpsters and is removed from the Subject on a regular basis by Key Disposal. Potential sources of contamination, such as waste oil or automobile batteries, were not observed in the vicinity of the dumpsters.

Sanitary Sewage

Sanitary sewage disposal is provided by the City of Los Angeles Bureau of Sanitation. IVI did not observe any sources of wastewater or liquid discharge into the sewer other than sanitary sewage.

Hazardous Waste

Hazardous waste streams per the following schedule are generated on the subject site:

Generator	Location	Generated Waste	Quantity (Gallons)	Storage Conditions	Disposal Entity
Kodak Image Center Solutions	Tenant space	Silver-containing filter canisters	1 canister	Satisfactory	ERSI
Jamison Services	Pump Room/Basement	Waste Pump Oil	55	Satisfactory	Not reported

The Subject has two active EPA ID numbers for the removal of hazardous waste, CAL000334972 under the name of 700 South Flower LLC, and CAL000195592, under the name of Macy's West. Waste pump oils are stored in a 55-gallon drum in the basement sump room. Silver-containing filters are generated and stored in the Kodak Image Center Solutions tenant space. Of note, floor drains were not observed in the vicinity of the chemical storage areas. Hazardous waste manifests maintained

on-site appeared to be in order. Housekeeping was observed to be satisfactory. For the most part, the hazardous waste containers were undamaged and capped and the immediate storage areas did not exhibit obvious evidence of significant spills or leakage. Moreover, the hazardous waste containers are stored on spill containment structures. In any event, the hazardous wastes do not appear to represent an impact to the environmental quality of the site, provided that the existing storage conditions are representative of past and future hazardous waste storage conditions.

Of note, several other EPA ID numbers have been associated with the Subject addresses, which are currently inactive. Wastes removed under these EPA ID numbers included asbestos-containing waste, waste oil, paint sludge, organic solids, and hydrocarbon solvents.

7.4 Stained Soil, Stained Pavement, or Stressed Vegetation

There was no evidence of significant soil staining, stained pavement, or stressed vegetation observed on-site.

7.5 Liquid Discharges

No visible evidence of liquid discharges, suspected to represent an environmental concern were observed during our survey.

7.6 Pools of Liquid

IVI did not observe significant standing surface water or pools containing liquids likely to be hazardous substances or petroleum products.

7.7 Pits, Ponds, or Lagoons

false

No pits, ponds or lagoons suspected of containing hazardous substances or petroleum products were identified on-site.

7.8 Wells

IVI did not identify on-site dry wells, irrigation wells, injection wells, observation wells, monitoring wells, potable water wells, recovery wells or abandoned wells.

7.9 On-Site Fill

Based on our observations, other than typical engineered fill used in foundation construction, it does not appear that a significant amount of fill has been imported onto the Subject.

7.10 Drums and Containers for Storing Waste

IVI observed a 55-gallon drum containing waste pump oil located on a spill containment pad in the basement. That drum is only partially filled, according to Jeff Jorgensen, the Chief Engineer. In addition, three, 55-gallon drums labeled for waste sorbents generated on-site are also kept on the spill containment pad. Those drums were reported empty, according to Mr. Jorgensen. The drums, which are labeled, are stored on a spill containment structure, and were observed to be in generally in good condition.

7.11 Floor Drains and Sumps

IVI did not identify any floor drains or sumps that were stained, emitting foul odors, or connected to an on-site sewage disposal system, or located adjacent to chemical storage areas. Two sets of sump pumps for storm water and sanitary sewage are present in the basement of the complex. The on-site car wash utilizes a 750-gallon clarifier which is pumped out every six months. In addition, several above-ground grease traps are present throughout the Subject and are used by the on-site restaurants. These grease traps are also pumped out every six months. The presence of this equipment is not suspected to be of a significant environmental concern to the Subject.

7.12 Odors

IVI did not identify strong, pungent, or noxious odors suspected to represent an environmental concern.

7.13 Air Emissions

The on-site boilers, emergency generators and fire pumps, generate air emissions which are permitted through the South Coast Air Quality Management District. There are no environmental concerns regarding these emissions.

7.14 Polychlorinated Biphenyls (PCBs)

Transformers

Utility-owned electrical transformers are maintained within an inaccessible vault, which was not observed by IVI. Based on the age of the improvements, the transformers may contain PCBs. In accordance with *Title 40—Protection of*

Environment, Chapter 1—Environmental Protection Agency, Subchapter R—Toxic Substance Control Act (TSCA), Part 761—Polychlorinated Biphenyls (PCBs), Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions, the owner of the transformers, the Los Angeles Department of Water and Power, is responsible for the transformers' maintenance and remediation in the event of a leak.

Elevators

IVI identified three hydraulic elevators at the Subject. Since the elevators were installed prior to the 1979 ban on the manufacturing of PCB-containing hydraulic fluid, IVI was of the opinion that, although unlikely, the elevator hydraulic fluid may potentially contain PCBs. No significant staining or pools of hydraulic fluid were observed in the elevator machine room.

Lighting Ballasts

Waste fluorescent lighting ballasts which may potentially contain PCBs, were previously noted at the Subject. According to Jeff Jorgensen, the Chief Engineer, all previously suspected PCB-containing light ballasts have been changed out.

Trash Compactor

IVI observed four hydraulic solid waste compactors near the loading docks. According to Mr. Jorgensen, the compactors were brought to the Subject at various times from 2001 to 2005 by Key Disposal. Based on the age of the compactors, the hydraulic components are not suspected to contain PCBs. In any event, the compactor was observed to be in good condition, with no evidence of releases.

7.15 Asbestos-Containing Material (ACM)

IVI reviewed an asbestos document entitled *Asbestos Operations and Maintenance Program Manual, The Complex Containing The MCI Center Office Tower, The Hyatt Hotel, The Macy's Plaza Department Store and Shopping Center, and a Parking Garage in the Block Bounded by 7th, 8th, Flower and Hope in Los Angeles, California*, dated April 23, 2003, prepared by Masek Consulting Services, Inc., on behalf of Cushman & Wakefield. This document contains bulk sampling data, air sampling data, and abatement documentation for the Subject. According to this report, work on the document began in 1999 with the collection of 328 bulk samples of the building materials. Based on the sampling and abatements conducted as of the writing of this document, the following ACMs were identified as remaining on-site:

1. Fireproofing applied to structural steel, including overspray. Substantial portions of the original asbestos containing fireproofing have been removed and replaced with non- asbestos materials. The major remaining areas of fireproofing include:

- Most of the columns in the hotel, except the free-standing corner columns in the corner rooms;
- Beams in the hotel where the detailed cleaning of the old fireproofing by the abatement crew was inadequate. Such residue would only be an issue if there is a need to cut a hole in, or weld onto, the beams;
- The portions of the beams in the hotel above the walls, in phone closets, and in chases, plus overspray;
- Small strips of fireproofing formerly above walls (Photo 102), strips of fireproofing on beams in the corridor with ducts close to or touching the beam, and some scattered areas above bathrooms and at intersections between bathrooms and bedrooms in the hotel;
- The 24th floor of the hotel, mostly encapsulated;
- The hotel office area on the 2' floor;
- Most core areas in the office tower and hotel (elevators shafts, chases, stairs, and mechanical rooms), including strips above core walls;
- The perimeter beams (inaccessible without removal of the glass);
- Suite 1406 in the office tower;
- Most of the mezzanine floor in the office tower (Photos 1 and 2);
- The half of the 2 floor in the office tower towards 7th Street;
- Columns in the office tower on the 4th floor, many on the 5th floor, on the floor 11th, most on the 12th floor, many on the 14th floor, three columns on the l5th floor, on the 21 floor of the office tower, half of the columns on the 23 floor, half of the columns on the 29th floor, and columns in Suites 3210 and 3212; and
- Scattered small strips and patches of fireproofing in the office tower at former wall and suite entrance locations.

2. Drywall joint compound. The major areas present are:

- The walls throughout the hotel (the ceilings were removed and replaced);
- The base building walls and ceilings in the office tower (the core, mechanical, storage, basement, and most of the upper and lower perimeter walls);
- The base building walls and ceilings of the retail area; and
- Some tenant improvement walls.

3. Various other asbestos containing materials present include:

- Insulation on an abandoned water line formerly used by the fire department to refill the tank from the street, running up through A level, and through Garden Level to the street connection between column lines H, M,1, and 3;
- Elbow/joint insulation on four fire-suppression water pipes which run from the street to Garden Level, down through A Level, and to the basement between column lines J, K, 1 and 3;

- White soft rubbery insulation tape used throughout the complex on some pipe joints, valves, and on some fittings under sinks, as in the 6th floor men's room of the office tower, and painted in some areas;
- Asbestos insulated fire doors: Some were identified, and more may be present. All insulated doors throughout should be assumed to contain asbestos;
- The composition roofing under the red rocks and tar above portions of the second 2 floor;
- Some vinyl floor tile or cove base and/or the mastic adhering it in scattered locations, such as the hotel basement corridor areas, some basement storage areas, and a variety of various other rooms. Almost all of the total floor area of the complex is covered with non-asbestos materials;
- Heavy acoustic texture on the concrete deck above the former department store restaurant kitchen, and debris on the top of the suspended finish ceiling structure below;
- Acoustic ceiling texture in the hotel gift shop;
- The 2x4 suspended ceiling panels in storage areas R26 and R9 (except for rooms R9E, and R9CIB); and
- Miscellaneous materials, such as sheet vinyl flooring on shelves in the former department store restaurant.

According to a letter from Masek Consulting Services, Inc., to Cushman & Wakefield, dated June 4, 2003, they estimate that approximately 50% of the asbestos originally installed in the Macy's and Macy's Plaza is still present (primarily walls and ceilings with asbestos joint compound, acoustic material above the Macy's kitchen, and fireproofing in various areas); and, approximately 20% of the asbestos originally installed in the MCI Center office tower is still present (primarily drywall on core & perimeter walls with asbestos joint compound, fireproofing on the outside of the perimeter beams, and fireproofing in core areas).

The materials listed above that were observed during our inspection were in good condition. The O&M program appears adequate and in use.

In December 2012, Environmental Testing Associates conducted an asbestos survey at the Subject, the results of which were reported in three separate reports, prepared for the Ratkovich Company. Positive asbestos results were detected in samples of drywall and tape, joint compound, fireproofing material, wall and ceiling texture, transite panels, thermal systems insulation, floor tile and mastic, carpet mastic and glue, cove base mastic, exterior stucco, leveling compound, and pipe wrap. The positive samples were found in various locations throughout the Subject. All of the positive samples were found to be in good condition, except for a fire door located in Carl's Jr., which was noted as damaged, and fireproofing debris noted in the ceiling area of Room 2424 in the Sheraton Hotel, which was noted as significantly damaged. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified asbestos-containing materials is being prepared.

7.16 Lead-in-Drinking Water

Based on our conversations with utility personnel, the water at the Subject is not expected to contain elevated levels of lead.

7.17 Radon

Based on statistical information maintained within the U.S. Department of the Interior and U.S. Geological Survey's *Geologic Radon Potential*, dated 1993, radon concentrations in Los Angeles County average 0.7 picocuries per liter (pCi/L), which is below the 4.0 pCi/L action level established by the USEPA. Based solely on this data, it is unlikely that radon represents an environmental concern at this time.

7.18 Lead-Based Paint (LBP)

Since the Subject was constructed prior to the Consumer Product Safety Commission's 1978 ban on the sale of LBP to consumers and the use of LBP in residences, there is a potential that LBP may have been applied at the Subject.

Limited LBP sampling took place in 2005. It was noted that the majority of the painted surfaces observed during this limited survey were constructed after the 1978 LBP ban during tenant renovations and changeovers. As such, the focus was on areas where renovations were not reported to have been conducted. The results of this limited testing is summarized below:

Location	Surface Checked	Paint Condition	Test Result % by weight
Freight elevator molding, basement	Gray paint on metal	Fair-Some Peeling	BDL
Basement hallway wall	Off white paint on concrete surface	Fair-Some Peeling	0.005
Loading dock support column	Yellow paint on concrete	Fair-Some Peeling	BDL
Upper level parking garage stairway railing	Gray paint on metal	Fair-Some Peeling	0.0108
Pump room light switch	White paint on metal	Fair-Some Peeling	BDL
Basement hallway wall	Off white paint on concrete surface	Fair-Some Peeling	BDL
Basement hallway wall	Off white paint on concrete surface	Fair	BDL
Basement hallway wall	Off white paint on concrete surface	Fair	0.0108
Basement hallway wall	Off white paint on concrete surface	Fair	BDL

BDL = Below Detectable Limits

The U.S. Department of Housing and Urban Development (HUD) defines LBP as paint containing 0.5 % by weight or more of lead. Based on the above results, LBP was not detected on surfaces sampled. Notwithstanding, painted surfaces were generally in good condition indicating only minor peeling and no evidence of pervasive peeling or flaking.

Of note, the Bally's Total Fitness tenant space has a small child care area. According to Mr. Jorgensen this area was built-out in 2003. As such, the surfaces in this area is not suspected to be covered with LBP.

In December 2012, an extensive lead-based paint survey was conducted at the Subject. Over 3,500 samples were analyzed using XRF throughout the Subject, however only 160 samples were found to contain measureable quantities of lead. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified lead-based paint is being prepared.

7.19 Mold

Although mold is ubiquitous and may occur in a very short time span, an effort was made to identify conspicuous mold growth in the common areas surveyed. Moreover, our Pre-survey Questionnaire requested information pertaining to known mold growth or tenant complaints regarding same.

Based on the above efforts, conspicuous mold growth was not identified at the time of our survey.

8.1 Questionnaires

IVI sent a Pre-Survey Questionnaire and an AAI User Questionnaire to the site contact and the User, respectively. The purpose of these questionnaires was to disclose any previous or existing hazardous waste or toxic material conditions, which may not have been apparent at the time of our site reconnaissance and to satisfy the User interview all appropriate inquiry requirements.

The completed Pre-Survey Questionnaire is attached hereto as Appendix B. The questionnaire did not identify any recognized environmental conditions in connection with the Subject. However, the PSQ noted the storage of paint, solvents, and petroleum (diesel) at the Subject, but only for building maintenance purposes. The PSQ also noted that a spill of cooling tower chemicals had occurred in the chemical storage room on an unreported date. The spill was completely contained within the storage containment wall, and was subsequently cleaned up by Safety Kleen.

8.2 User

8.2.1 Title Records

A copy of the Subject's Chain-of-Title has not been provided to IVI for review.

8.2.2 Environmental Clean Up Liens and Activity and Use Limitations (AULs)

The User has not returned the AAI User Questionnaire.

8.2.3 Specialized Knowledge

The User has not returned the AAI User Questionnaire.

8.2.4 Relationship of Purchase Price to Fair Market Value Due to Contamination in Connection with the Subject

The User has not returned the AAI User Questionnaire.

8.2.5 Common Knowledge or Reasonably Ascertainable Information

The User has not returned the AAI User Questionnaire.

8.2.6 Purpose for Conducting the Phase I Environmental Site Assessment

The User has not returned the AAI User Questionnaire.

8.2.7 Proceedings Involving the Property

The User has not returned the AAI User Questionnaire.

8.3 Key Site Manager

8.3.1 Historic Site Use

According to Phillip Lee, the General Manager and site contact, who has been involved with the property for the past 3 months, the Subject was constructed in 1973. He had no other knowledge of the history of the Subject.

According to Jeff Jorgensen, the Chief Engineer, who has been involved with the property for the past 12 years, the Subject was constructed in 1973. He had no other knowledge of the history of the Subject.

8.3.2 Proceedings Involving the Property

Neither Mr. Lee nor Mr. Jorgensen had any knowledge of pending, threatened, or past litigation, administrative proceedings, or notices from governmental agencies regarding violations of environmental laws regarding hazardous substances or petroleum products.

8.4 Occupants

Mr. Ian Gee, who has been the Manager of the Sheraton Hotel for the last 4 years, has no knowledge of the history of the Subject. In addition, Mr. Gee was unaware of any environmental problems in connection with the Subject.

Sam (last name withheld), owner of Kodak Express Digital Solutions, had no knowledge of the history of the Subject. In addition, he was unaware of any environmental problems in connection with the Subject. He indicated that he generates only small quantities of waste photoprocessing solution and recovered silver, and that all waste is removed every six months by ERSI.

8.5 Past Owners

IVI was unable to locate the site's former owner.

8.6 Local Regulatory Agency Interviews and/or File Reviews

Fire Department

IVI has sent a request to the Los Angeles Fire Department for environmental information pertaining to the subject property. According to Ms. Katie Fernandez, the Fire Department has no records of underground storage tanks at the Subject addresses of 700 S. Flower Street, 711 S. Hope Street or 750 W. 7th Street.

Health Department

IVI has sent a request to the Los Angeles County Public Health Investigation for environmental information pertaining to the subject property. The agency responded that it had no files for the addresses of 700 S. Flower Street and 711 S. Hope Street. The agency provided copies of files it maintains for the address of 750 W. 7th Street. This information included a Hazardous Waste Generator form dated December 2009 from Macy's for the removal of 400 lbs. of waste liquid (old cosmetics and perfume), 30-gallons of waste oil from the HVAC system, 5-gallons of waste oil from a generator, and 15-gallons used water-based paint. In addition, the Los Angeles County Fire conducted an inspection of Macy's in March 2010 which no noted violations. The Fire Department also conducted an inspection of Broadway Plaza Cleaners in July 2000, and found that no dry cleaning is conducted at the site and no hazardous waste is generated.

County Department of Public Works Records

According to a representative of the Los Angeles County Department of Public Works (DPW), the DPW has no records pertaining to the Subject's address.

Tax Assessor

A cursory review of property tax files at the Los Angeles County Tax Assessor did not identify any environmental liens with respect to the subject property.

Department of Planning and Zoning

Review of available zoning records maintained by the Los Angeles City Planning Department indicates that the Subject is currently zoned C2-4D for Commercial uses. According to the planning and zoning records, no additional zoning changes were listed for the Subject.

Building Department Records

IVI contacted the City of Los Angeles Department of Building and Safety (DBS) in an attempt to obtain historical building permits and records for the Subject.

However, according to DBS personnel, a file review request must be submitted, which could take up to a month to process. Based on the current and past use of the Subject, this department is not anticipated to have any environmentally significant information. Therefore, a FOIA request was not submitted.

However, IVI reviewed a Parcel Profile Report for the Subject available from the City of Los Angeles website. This report notes that the Subject is located in a Methane Buffer Zone, an area that has been identified as a potential methane hazard site due to its proximity to methane gas sources such as landfills, oil wells, oil fields and underground gas storage facilities. The locations of these methane gas sources are based on data from the California Division of Oil, Gas and Geothermal Resources and the City of Los Angeles Department of Environmental Affairs. However, IVI reviewed a map of oil and gas fields in the Subject area, and no active or inactive oil wells were identified within ¼ mile of the Subject.

California Division of Oil, Gas and Geothermal Resources Records

IVI reviewed California Division of Oil, Gas and Geothermal Resources (DOGGR) maps in an attempt to determine if any oil production wells are or have historically been located on the Subject. From review of DOGGR maps, it does not appear that any oil wells have been located on the Subject site. However, one well, which was determined to be a dry hole and was subsequently plugged and abandoned, was noted to be within 200 feet east of the Subject. Another well, which was also plugged and abandoned, was noted to be within 0.13 mile south of the Subject, on the current site of the Los Angeles Convention Center. Due to the extensive redevelopment of this area, it is unlikely that these previous wells are likely to have any negative impact on the Subject.

9.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

IVI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-05 of the 700 South Flower and 711 South Hope, located at 700 South Flower and 711 South Hope, Los Angeles, California. Any exceptions to, or deletions from, the standard practice are described within Section 2.0 of this report.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject; however, the following items of environmental concern were identified which warrant mention:

Asbestos-Containing Material (ACM)

In December 2012, Environmental Testing Associates conducted an asbestos survey at the Subject, the results of which were reported in three separate reports, prepared for the Ratkovich Company. Positive asbestos results were detected in samples of drywall and tape, joint compound, fireproofing material, wall and ceiling texture, transite panels, thermal systems insulation, floor tile and mastic, carpet mastic and glue, cove base mastic, exterior stucco, leveling compound, and pipe wrap. The positive samples were found in various locations throughout the Subject. All of the positive samples were found to be in good condition, except for a fire door located in Carl's Jr., which was noted as damaged, and fireproofing debris noted in the ceiling area of Room 2424 in the Sheraton Hotel, which was noted as significantly damaged. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified asbestos-containing materials is being prepared.

Methane Hazard Zone

Based on information provided by the City of Los Angeles, the Subject is located in an area that has been identified as a potential methane hazard site due to its proximity to methane gas sources such as landfills, oil wells, oil fields and underground gas storage facilities. The locations of these methane gas sources are based on data from the California Division of Oil, Gas and Geothermal Resources and the City of Los Angeles Department of Environmental Affairs. From review of oil and gas field maps of the area, it does not appear that any active or inactive oil wells, landfills or oil fields have been located on the Subject property. Of note, methane is a non-toxic, non-carcinogenic gas that is extremely flammable at certain concentrations. No rotten egg-like odors, indicative of methane gas, have been reported in the building. Based on this information, the Subject's location within a Los Angeles City's designated Methane Zone is not suspected to be of a significant environmental concern. However, should future additions, alterations, repairs, changes of use or changes of occupancy to the existing building take place, the Subject may continue to be required to comply with the methane mitigation requirements set forth by the City of Los Angeles.

10.1 This report has been prepared in compliance with the ASTM standard entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" E1527-05.

10.2 The observations described in this report were made under the conditions stated herein. The conclusions presented in the report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of described services within the constraints imposed by the client. The work described in this report was carried out in accordance with the Terms and Conditions of the contract.

10.3 In preparing this report, IVI has relied on certain information provided by federal, state, and local officials and other parties referenced therein, and on information contained in the files of governmental agencies, that were readily available to IVI at the time of this assessment. Although there may have been some degree of overlap in the information provided by these various sources, IVI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this site assessment. Observations were made of the site and of the structures on the site as indicated in this report. Where access to portions of the site or to structures on the site was unavailable or limited, IVI renders no opinion as to the presence of direct or indirect evidence relating to petroleum substances, hazardous substances, or both, in that portion of the site and structure. In addition, IVI renders no opinion as to the presence of indirect evidence relating to hazardous material or oil, where direct observation of the ground surface, interior walls, floors, ceiling or a structure is obstructed by objects or materials, including snow, covering on or over these surfaces.

10.4 As part of this assessment, IVI submitted requests for information via the Freedom of Information Act (FOIA) to various governmental agencies. As of the preparation of this report these requests may not have been fulfilled. The conclusions of this report are subject to change upon receipt of a response from these FOIA requests.

10.5 IVI does not represent that the site referred to herein contains no petroleum or hazardous or toxic substances or other conditions beyond those observed by IVI during the site walkthrough.

10.6 IVI has produced this document under an agreement between IVI and National Real Estate Advisors. All terms and conditions of that agreement are included within this document by reference. Any reliance upon this document, or upon IVI's performance of services in preparing this document, is conditioned upon the relying party's acceptance and acknowledgement of the limitations, qualifications, terms, conditions and indemnities set forth in that agreement, and property ownership/management disclosure limitations, if any. It is not to be relied upon by any party other than National Real Estate Advisors, National Real Estate Advisors, LLC, IBEW-NECA Diversified Underwritten Real Estate Fund ("INDURE"), The Ratkovich Company, NREA 700 Investors LLC, NREA 711 Investors, Inc., NREA-TRC 700 LLC, NREA-TRC 711 LLC, BVSEF III 700 REIT LLC, BVSEF III 711 NON REIT LLC and U.S. Bank National Association, a national banking association organized and existing under the laws of the United States of America, not in its individual capacity but solely in its capacity as Trustee for the registered holders of LB-UBS Commercial Mortgage Trust 2007-C1, Commercial Mortgage Pass-Through Certificates, Series 2007-C1, nor used for any purpose other than that specifically stated in our Agreement or within this Report's Introduction section without IVI's advance and express written consent. The Phase I report is only valid if completed within 180 days of an acquisition or the transaction necessitating the report.

10.7 TIME LIMITATION TO ENACT CLAIM AGAINST IVI If in the opinion of the client, or any third party claiming reliance on IVI's report or services, that IVI was negligent or in breach of contract, such aforementioned parties shall have one year from the date of IVI's site visit to make a claim.

10.8 Unless specifically identified within Section 2, Chinese drywall, indoor air quality and any other non-ASTM scope issues as identified in ASTM E1527-05, Section 13.1.5, are excluded from the scope of this assessment.

Phase I Environmental Site Assessment
Pre-Survey Questionnaire

Someone familiar with the site should complete this questionnaire prior to our site visit. For those questions that are not applicable, please respond "N/A", and "U/K" for those questions in which the answer is not known. If you have any questions about how to answer any of the questions, please call IVI. If additional pages for responses are necessary, please attach hereto and reference it to the appropriate question number. Upon completing this form, please fax it to the above fax number. This document and your written response will be included as an exhibit in the final report.

Subject Name: 700 South Flower and 711 South Hope

Project Manager: Carol Noland

Street: 700 South Flower and 711 South Hope

IVI Project No.: PC21102317

City/State: Los Angeles, California

Date: December 10, 2012

Key Site Contact: Phillip Lee
Telephone: 213-624-2891
Fax: (213) 688-0176

© IVI International, Inc

A. GENERAL

PREPARER

1. Name, title and telephone number of person completing this questionnaire:

Phillip Lee
Name
General Manager
Title
Signature
(213) 624-2891

Occupant's Name

Occupant's Address

VALUATION REDUCTION

Was/is the purchase price of the Subject property significantly less than the purchase price of comparable properties due to environmental conditions? Yes ☐ No ☑ U/K ☐

If yes, please explain below.

B. Property Description

1. **Land**

a. Size of Parcel? 4.28 Acres

b. Shape of Parcel? ☑ Rectangular ☐ Irregular ☐ Other

c. Are there any surface waters or wetlands on the site? Yes ☐ No ☑ U/K ☐

d. Is there a well on the site? Yes ☐ No ☑ U/K ☐

If so, what type of well is it?:

Drinking Water	☐
Irrigation	☐
Monitoring	☐
Dry Well	☐

Have contaminants in excess of governmental guidelines been identified in the water? Yes ☐ No ☐

© IVI International, Inc

e. Was or is there a septic system on the property? Yes ☐ No ☑ U/K ☐

If so, is the septic system currently in use? Yes ☐ No ☐

f. Has fill been imported onto the Subject? Yes ☐ No ☑ U/K ☐

g. Are there currently or has there previously been waste treatment or disposal pits, ponds, or lagoons on the site? Yes ☐ No ☑ U/K ☐

h. Where is the site's stormwater discharged to? _____

B. PROPERTY DESCRIPTION – continued

2. **Site Improvements** This includes all buildings ☐ N/A

a. Describe the size (square foot) of the existing building(s).

b. How old is the building(s)?

c. Describe the heating and cooling system.

d. Who provides the following utilities?

Water: _____

Sanitary Sewer: _____

Storm Drainage: _____

Natural Gas: _____

Electric: _____

e. Are there any floor drains on the site? Yes ☐ No ☐ U/K ☐

If so, where do they discharge to?

3. **Site History**

a. Were there any buildings or other improvements on the property prior to the existing improvements? Yes ☐ No ☐ U/K ☑

If so, what were they?

b. Is or has the property been used for industrial or agricultural purposes, or as a gasoline station, auto repair, dry cleaner, junkyard, or landfill? Yes ☐ No ☐ U/K ☑

If so, please describe.

© IVI International, Inc

B. PROPERTY DESCRIPTION – continued

4. Site Operations

To the best of your knowledge, do any of the following operations take place on the Subject or have ever taken place on the Subject:

• Dry Cleaning:	Yes ☐	No ☑
• Battery Storage/Sales:	Yes ☐	No ☑
• Paint Storage/Sales:	Yes ☑	No ☐
• Petroleum Storage/Sales:	Yes ☑	No ☐
• Photo or X-Ray Finishing:	Yes ☑	No ☐
• Electronic Equipment Assembly or Manufacturing:	Yes ☐	No ☑
• Solvent Storage or Sales:	Yes ☑	No ☐
• Chemical Manufacturing/Sales:	Yes ☐	No ☑
• Automobile Storage, Repair, or Disposal:	Yes ☐	No ☑
• Agriculture:	Yes ☐	No ☑
• Medical or Dental Offices: Eye Doctor	Yes ☑	No ☐

5. Previous Studies/Documentation

a. Do you have any knowledge of previously prepared Environmental Site Assessment Reports, asbestos surveys, lead-based paint studies or testing (soil, groundwater, tank tightness testing, lead-based paint testing, asbestos testing, indoor air quality, mold (bacteria and fungi testing), etc.) conducted on the site? If so, please either provide copies of the reports or list the title, date, preparer and recipient of such report(s) below:

☐ I have no knowledge of any environmental related studies or reports prepared on the Subject.

b. Are you in possession of a title report, site drawings, building drawings and specifications and/or a survey for the site? Yes ☐ No ☐

If so, please provide copies of same.

Please provide all available environmental information from yours or your Client's records including, but not limited to, documentation in connection with any pending or threatened public or private proceedings or litigation with respect to environmental liability, environmental permits and permit applications, underground and above ground tank registration and information (including removal and testing of such tanks), environmental reports, asbestos, lead-based paint or indoor air quality studies, spill information and compliance information and programs.

© IVI International, Inc

C. SURROUNDING PROPERTIES

1. Has any adjoining properties been used for industrial purposes, or as a gasoline station, auto repair shop, junkyard, dry cleaner or landfill? Yes ☐ No ☐ U/K ☐

   If so, please explain.

2. Are you aware of any contamination conditions on adjoining or nearby properties? Yes ☐ No ☐ U/K ☐

3. Are there any open surface waters or wetlands adjacent to the site? Yes ☐ No ☐ U/K ☐

4. Are you aware of any active or former waste treatment or disposal pits, ponds, or lagoons on adjacent or nearby sites? Yes ☐ No ☐ U/K ☐

5. Is any neighboring property engaged in the storing, transporting or disposal of hazardous waste, or chemicals? Yes ☐ No ☐ U/K ☐

D. REGULATORY

1. Are you aware of any pending, threatened, or past litigation relevant to *harardouse substances* or *petroleum products* in, on, or from the *property*? Yes ☐ No ☑ U/K ☐

   If so, please explain.

2. Are you aware of any pending, threatened, or past administrative proceedings relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*? Yes ☐ No ☑ U/K ☐

   If so, please state the circumstances.

3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to *hazardous substances* or *petroleum products*? Yes ☐ No ☑ U/K ☐

   If so, please explain.

E. ASBESTOS

1. Do you have knowledge of any materials or substances on the site that are known or suspected to contain asbestos? Yes ☑ No ☐ U/K ☐

   If so, what materials and where are they located? SEE Mazek Report

© IVI International, Inc

E. ASBESTOS – continued

2. Has an inspection for asbestos ever been conducted on the Subject? Yes ☑ No ☐ U/K ☐

3. Has asbestos been removed from the Subject? Yes ☑ No ☐ U/K ☐

4. Does the building have:

- Spray-on or troweled-on fireproofing, insulation or finishes? Yes ☑ No ☐ U/K ☐
- Insulation on piping, boilers, tanks, chillers, or other mechanical equipment? Yes ☑ No ☐ U/K ☐
- Transite used in cooling towers, exterior walls, ceilings fascia panels, etc.? Yes ☐ No ☑ U/K ☐
- Resilient floor tile? Yes ☑ No ☐ U/K ☐
- Suspended acoustical ceiling tiles? Yes ☐ No ☑ U/K ☐
- A built-up or rolled roofing system? Yes ☐ No ☑ U/K ☐

F. PCBs

1. Are there any on-site electrical transformers? Yes ☐ No ☑ U/K ☐

If so, do any of the transformers contain PCBs? Yes ☐ No ☑ U/K ☐

Who owns the transformers and where are they located?

2. Did any on-site transformers formerly contain PCBs, but later had the dielectric fluid replaced? Yes ☑ No ☐ U/K ☐

3. Is there any hydraulic equipment such as elevators or automotive lifts on-site? Yes ☑ No ☐ U/K ☐

If so, who services the equipment? Schindler

Are you aware of any hydraulic fluid leaks or evidence of leakage such as unexplained fluid loss in connection with the hydraulic equipment? Yes ☐ No ☑ U/K ☐

© IVI International, Inc

F. Storage Tanks

1. Are there any (active or inactive) Underground Storage Tanks (UST) or Aboveground Storage Tanks (AST) on the site? Yes ☑ No ☐ U/K ☐

If so, please fill out the following schedule:

Active or Inactive Tanks

Location of Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Age of Tank (Years)	Does the Tank Have Corrosion Protection? (Yes/No)	Does the Tank Have Leak Detection? (Yes/No)	Is the Tank In-Use? (Yes/No)
B-level	8,800	AST	Diesel	39	yes	yes	yes
B-level	8,800	AST	Diesel	39	yes	yes	yes
B-level	1,000	AST	Diesel	39	yes	yes	yes

Have any of the tanks been tightness tested? Yes ☐ No ☑ U/K ☐

1. Do you have any knowledge of tanks that were either removed or closed in-place at the site? Yes ☐ No ☑ U/K ☐

If so, please fill out the following schedule:

Tanks Removed or Closed In-Place

Location of Former Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Tank Removal Company	Year Tank Was Removed

© IVI International, Inc

H. LEAD

1.	Are you aware of any lead-based paint (LBP) applications on the site?	Yes ☐	No ☑ U/K ☐
2.	Has LBP testing been conducted?	Yes ☐	No ☑ U/K ☐
3.	Have there been any reported incidences of children with elevated blood lead levels residing at the site?	Yes ☐	No ☑ U/K ☐
4.	Are there any children younger than 7 years old residing at the site or frequenting the site on a daily basis?	Yes ☐	No ☑ U/K ☐
5.	Have any LBP abatements been conducted?	Yes ☐	No ☑ U/K ☐
6.	Has the water been tested for lead?	Yes ☑	No ☐ U/K ☐

If so, please provide a copy of the results

I. HAZARDOUS MATERIALS

1. Are hazardous materials or chemicals stored or used on-site? Yes ☑ No ☐ U/K ☐

If so, please fill out the following schedule (attach separate page if more room is required):

Schedule of Hazardous or Toxic Substances Stored On-Site

Material Type	Quantity (Gallons)	Location
Cooling Tower Chemicals	2 (100 gal) Tank	B-level

2. Are there any hazardous or medical waste or fluids generated or used that employ an outside service for their periodic supply and removal? Yes ☑ No ☐ U/K ☐

If so, please provide the name, address, & telephone number of the disposal company and the facility generating the waste. Hotel generates blood borne stuff

J. INDOOR AIR QUALITY

1.	Have strong mold odors and/or mold staining been observed onsite?	Yes ☐	No ☑ U/K ☐
2.	Has there been any employee or tenant reports of symptoms consistent with mold contamination or other indoor air quality concerns?	Yes ☐	No ☑ U/K ☐
3.	Are you aware of elevated radon gas concentrations on-site?	Yes ☐	No ☑ U/K ☐

© IVI International, Inc

K. AAI USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Yes ☐ No ☑ U/K ☐

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, slate or local law? Yes ☐ No ☐ U/K ☑

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes ☐ No ☑ U/K ☐

4. Does/Did the purchase price paid for this property reasonably reflect the fair market value of the property? Yes ☑ No ☐ U/K ☐

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes ☐ No ☐ U/K ☐

5. Are you aware of commonly known or reasonably ascertainable information about the properly that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

(a.) Do you know the past uses of the property? Yes ☐ No ☑ U/K ☐

(b.) Do you know of specific chemicals that are present or once were present at the property? Yes ☐ No ☑ U/K ☐

(c.) Do you know of spills or other chemical releases that have taken place at the property? Yes ☑ No ☐ U/K ☐

(d.) Do you know of any environmental cleanups that have taken place at the property? Yes ☐ No ☑ U/K ☐

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? Yes ☐ No ☑ U/K ☐

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 12/27/2011 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 39 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2012 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/05/2012 has revealed that there are 18 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 10/17/2012 has revealed that there are 23 LUST sites within approximately 0.5 miles of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 49 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 09/11/2012 has revealed that there are 5 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 42 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No

BROADWAY PLAZA (Continued) **1000145755**

Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 02/12/1988
Facility name: BROADWAY PLAZA
Classification: Large Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110002794600

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SIC Code 2: Not reported
Primary Waste: Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type)
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G.,

550 S. HOPE (Continued) **U003780196**

inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

JEWELRY DESIGN CENTER (Continued) **1000597500**

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110002950977

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

PACIFIC BELL (Continued) **1000250339**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MID WEST MARKETING (Continued) **S104566310**

northwest, 4th Street on the northeast, Flower Street on the southeast, and 5th Street on the southwest. The Site consists of approximately 3.5 acres and is occupied by a 500,000 square-foot building with 36 stories consisting of guest rooms, retail space, meeting rooms, offices, and subterranean parking. Laundry services, including a dry cleaning system, are located in a basement area measuring approximately 25 feet by 25 feet. Previous investigations completed at the Site detected concentrations of tetrachloroethene up to 1,610 micrograms per kilogram (a%g/kg) in soil and up to 87.5 micrograms per liter (a%g/L) in groundwater. The Site is currently monitoring groundwater on a quarterly basis.

Environmental Interest/Information System
CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/07/2012
Date Data Arrived at EDR: 07/05/2012
Date Made Active in Reports: 09/18/2012
Number of Days to Update: 75

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/07/2012

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2012

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2012
Date Data Arrived at EDR: 10/04/2012

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/11/2012

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 08/17/2012

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

East Map:	34118-A2 LOS ANGELES, CA
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

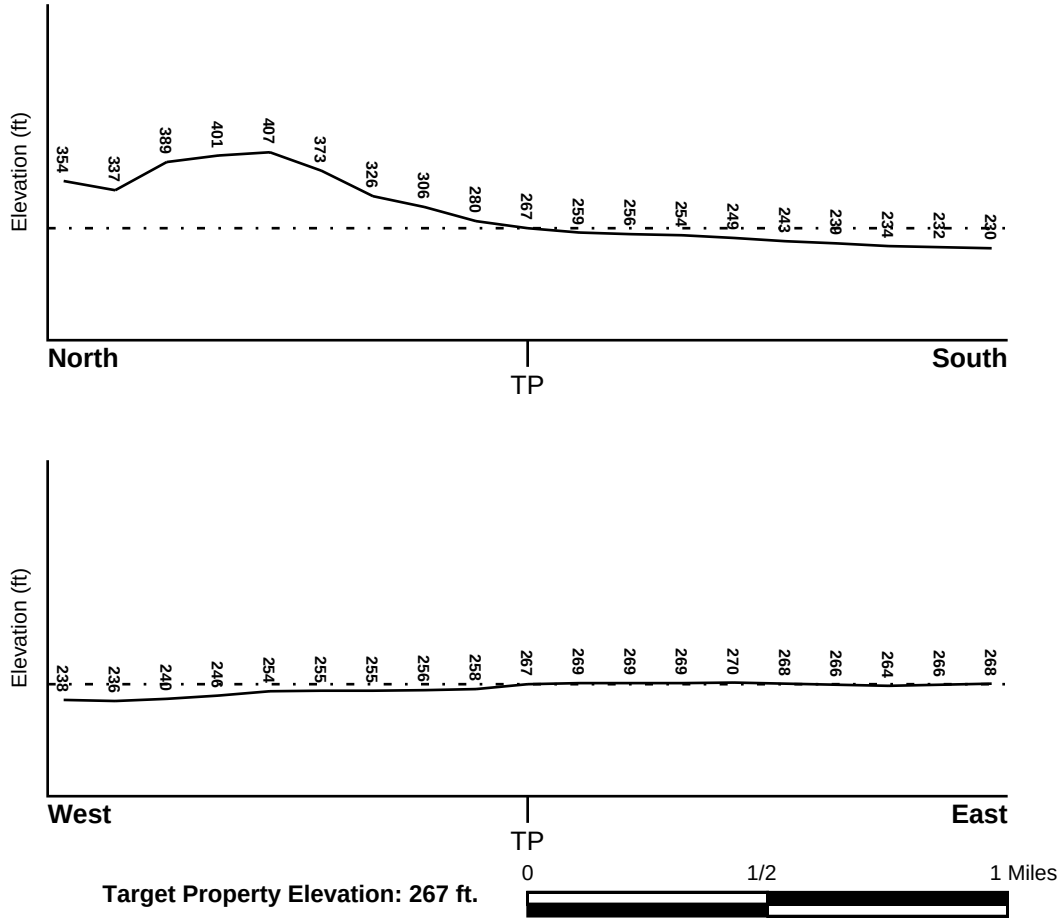
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile East
Site Name:	SO CALIF RAPID TRANSIT DISTRICT
Site EPA ID Number:	CAD981989841
Groundwater Flow Direction:	GENERALLY SE.
Measured Depth to Water:	approximately 37 feet.
Hydraulic Connection:	The uppermost aquifer at the site is the Gaspur aquifer. The Gaspur aquifer is hydraulically connected to underlying aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Business Owr Operator Identification (LACoCUP. orm 2730)

Please submit the Business Activities page, the Business Owner/Operator Identification page (Form 2730), and Hazardous Materials - Chemical Description pages (Form 2731) for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report. (YYYY/MM/DD, ex. 1999/07/01)
101. ENDING DATE Enter the ending year and date of the report. (YYYY/MM/DD, ex. 2000/06/30)
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digit s in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
133b. E-MAIL ADRESS Enter the e-mail address of the corresponding primary or secondary emergency contact if an e-mail address exists.
133c. LOCALLY COLLECTED INFORMATION Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS). Also, include the business owner's/president's name, position in the business, date of birth and driver's license number with the State issued in abbreviation.
133d. Number of Employees for facility: For Retail and service type businesses; the number of employees is determined by the actual number of employees directly related to the hazardous waste generating activity (s). For manufacturing type businesses; the total number of employees in the business shall be used for determining the hazardous waste licensing fee.
133e. Businesses will be identified by the following twelve codes: 01)-Corporation, 02)-Individual Owner, 03)-Partnership, 04)-Local Government Agency, 05)-County Government Agency, 06)-State Government Agency, 07)-Federal Government Agency, 08)-LA County Fire Department Facilities, 09)-Unknown Classification (Other), 10)-City Fire Facilities, 11)-LA County Sheriff Facilities, 12)-Other Police Facilities.
133f. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
133g. MAILING/BILLING CITY Enter the city for the mailing/billing address.
133h. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
133i. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digits in the zip code may also be added.
134. DATE Enter the date that the document was signed. (YYYYMMDD, ex. 1999/07/01)
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate and complete.
137. TITLE OF SIGNER Enter the title of the person signing the page.

UNIFIED PROGRAM (UP) FORM

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID #	1	EPA ID # (Hazardous Waste Only) CAL000195592	2

BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) 3

Macy's Los Angeles Downtown Plaza

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility...	If Yes, please complete these pages of the UPCF....	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☐ YES X NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION CONSOLIDATED CONTINGENCY PLAN (Section I and Site Map(s)) TRAINING PLAN
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks?	☐ YES X NO 5	UST FACILITY UST TANK (one page per tank)
2. Intend to upgrade existing or install new USTs?	☐ YES X NO 6	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank)
3. Need to report closing a UST?	☐ YES X NO 7	UST TANK (closure portion –one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Petroleum oil is stored in any container or tank that has a storage capacity of 55 gallons or more. The aggregate capacity of petroleum oil in all tanks and containers is greater than 1,320 gallons.	☐ YES X NO 8	CONSOLIDATED CONTINGENCY PLAN (Section I and Site Map(s))
D. HAZARDOUS WASTE 1. Generate hazardous waste?	X YES ☐ NO 9	EPA ID NUMBER – provide at the top of this page. As a generator, answer YES to Item E2b and complete Waste Generator Form.
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES X NO 10	RECYCLABLE MATERIALS REPORT
3. Treat hazardous waste on site?	☐ YES X NO 11	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES X NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
5. Consolidate hazardous waste generated at a remote site?	☐ YES X NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐YES X NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION

15

E. LOCAL REQUIREMENTS

1. REGULATED SUBSTANCES

Have Regulated Substances (RS) including Extremely Hazardous Substances (EHS) stored on site at greater than the threshold planning quantities established by the California Accidental Release Program (Cal ARP) ?	☐YES X NO 15a	In addition to Hazardous Materials requirements, complete: Regulated Substance Registration Risk Management Plan (when required)
2. OTHER REQUIREMENTS		
a. Have hazardous materials stored on site at or above a threshold amount established by a CUPA's or PA's local ordinance?	☐YES X NO 15b	Consult local CUPA or PA for added reporting requirements.
b. Required by a CUPA or PA to provide other information?	X YES ☐ NO 15c	Waste Generator Form (LA County)

OFFICIAL USE ONLY	UP Form	HW	HM	ARP	AST	UST	TP	CUPA	PA

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page (Form 2730), and Hazardous Materials Inventory - Chemical Description pages (Form 2731) for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. EPA ID NUMBER If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you need a CA EPA number, complete and submit DTSC Form 1358 located at http://www.dtsc.ca.gov/IDManifest/ID_Numbers.cfm to the Department of Toxic Substances Control (DTSC), or for a federal EPA number call (415) 495-8895 http://www.epa.gov/region09/waste/epanums.html#rcranum
3. BUSINESS NAME Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. HAZARDOUS MATERIALS ONSITE Check the box to indicate whether you have hazardous materials onsite. You have a hazardous material if:
   - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
   - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
   - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have hazardous materials onsite, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. UPGRADE/INSTALL UST Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan and monitoring program plan.
7. UST CLOSURE Check the appropriate box if you are closing an UST and complete the closure portion of the UST Tank pages for each tank.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST) To calculate the storage capacity of petroleum oil, add the volume capacities of all containers and tanks that store 55 gallons or more of petroleum oil in your calculation. Do not include underground storage tanks. In the H&SC, Section 25270.2 (g) defines petroleum oil and Section 25270.2 (a)(4) lists the types of petroleum oil that are exempt. Until the CUPA provides a tank facility statement, document your consolidated contingency plan with the following tank information: (1) facility name, address, and owner or operator; (2) total storage capacity, and (3) the location, size, age, and contents of each storage tank that exceeds 10,000 gallons of petroleum oil. If you have 1,320 gallons or more of petroleum oil, prepare a spill prevention control and countermeasure plan.
9. HAZARDOUS WASTE GENERATOR Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. ONSITE HAZARDOUS WASTE TREATMENT Check the appropriate box to indicate whether your facility treats hazardous waste onsite. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste onsite, complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages for each unit.
12. FINANCIAL ASSURANCE Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank.
If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.
15a. LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS) Check the box to indicate whether Regulated Substances (RS) are stored onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.
15b. LOCAL HAZARDOUS MATERIALS THRESHOLD Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.
15c. LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "yes" box, complete the Hazardous Waste Generator Form (LA County).

INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM

HAZARDOUS WASTE GENERATOR PAGE (LA COUNTY)

The waste generator page is used to identify your generator status and all waste streams generated at your facility.

1. FACILITY ID NUMBER Leave this blank. The Certified Unified Program Agency assigns this number (CUPA) and identifies your facility.

2. EPA ID # If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.

3. BUSINESS NAME Enter the full legal name of the business.

133b. NUMBER OF EMPLOYEES Enter the total number of employees currently working at your facility.

A. TYPE OF GENERATOR Check the box that most closely apply to your facility.

RCRA GENERATOR Check the box that best describes the amount of Federal listed and regulated hazardous waste generated by your facility. Leave blank if your facility doesn't generate hazardous waste regulated under Subtitle C of RCRA (the Resource Conservation and Recovery Act of 1976).

NON - RCRA GENERATOR Check the box that that best describes the amount of California-only listed and regulated hazardous waste generated by your facility. Leave blank if your facility doesn't generate non-RCRA hazardous waste.

Boxes include:

- Large Quantity Generator (greater than 1000 kg per Hazardous Waste per month)
- Small Quantity Generator (less than 1000 kg per month but greater than 100 kg Hazardous Waste per month)
- Conditionally Exempt Small Quantity Generator (less than 100 kg Hazardous Waste per month)

Note:
1. 1 kg = 2.2 lbs.
2. For Acutely Hazardous Waste or Extremely Hazardous Waste, facilities that generate greater than 1 kg per month are considered Large Quantity Generators and facilities that generate less are considered Conditionally Exempt Small Quantity Generators.

B. PROCESS Briefly describe all processes that generate hazardous waste(s) at your facility. Example: plating, machining, painting, etc.

C. WASTE DESCRIPTION Describe the type of waste that is generated from each process listed. Example: heavy metal sludge, waste oil, etc.

D. WASTE ID List the Waste ID #'s for all RCRA and non-RCRA hazardous waste. Refer to 22 CCR § 66261.126.

E. AMOUNT PER YEAR List the amount of hazardous waste generated from each separate process in kilograms, pounds, gallons, or tons per year.

F. STORAGE METHOD Enter the letter that corresponds to the type of storage used at your facility for each of the hazardous waste streams listed.
A = Drums
B = Underground Tank
C = Aboveground Tank
D = Waste Pile
E = In Process Equipment

G. DISPOSAL METHOD Enter the letter in the space provided to describe the disposal method used at your facility for each of the hazardous waste streams listed.
A = Treatment Onsite
B = Treatment Offsite
C = Recycle Onsite
D = Recycle Offsite

H. OWNER/OPERATOR NAME Indicate the name of the person who signed the form.

I. OWNER/OPERATOR TITLE Indicate the title of the person who signed the form.

J. DATE Indicate the date the form was signed.

Please print or type. (Form designed for use on elite (12-pitch) typewriter.) CAD982486001 SEP 1 20 2010 Form Approved. OMB No. 2050-0039

RE: 700 S. FLOWER ST, LOS ANGELES CA 90017

I, the undersigned, being the Custodian or the Keeper of Records, certify that a thorough search for the records you requested was carried out under my direction and control.

This search revealed no records.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, name, or classification; or were not located. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

If you have any questions regarding your request, please contact our office at (323) 890-7801.

Very truly yours,

IAN GALVAN, Deputy Health Officer
Public Health Investigation

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Phillip Lee	
Of: Subject – General Manager (Jamison Services, Inc.)	
Location: Los Angeles, CA	Phone: (213) 624-2891
Recorded By: Carol Noland	Of: IVI
At: (time): 10:00 am	On (date): December 12, 2012
Re: General knowledge of the site	
Summary of Communication: Mr. Lee is the General Manager of the Subject, but has only been at the site for 3 months. He indicated that the Subject was constructed in 1973, but had no other information regarding the site history. Mr. Lee knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no	
ROC 1	

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Jeff Jorgensen	
Of: Subject – Chief Engineer (Jamison Services, Inc.)	
Location: Los Angeles, CA	Phone: (213) 265-1968
Recorded By: Carol Noland	Of: IVI
At: (time): 10:00 am	On (date): December 12, 2012
Re: General knowledge of the site	
Summary of Communication: Mr. Jorgensen has been the Chief Engineer at the Subject since 2000. He indicated that the Subject was constructed in 1973, but had no other information regarding the site history. Mr. Jorgensen accompanied IVI on the site inspection, and provided information regarding the on-site building systems, including the emergency generators and elevators. He had no knowledge of any USTs at the Subject, but pointed out the locations of the on-site ASTs, grease interceptors, and sump pumps. He also provided information regarding the small quantity of waste oil which is generated at the Subject. Mr. Jorgensen knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no	
ROC 2	

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Sam	
Of: Subject – Owner, Kodak Express Digital Solutions	
Location: Los Angeles, CA	Phone: (213) 629-4000
Recorded By: Carol Noland	Of: IVI
At: (time): 10:00 am	On (date): December 12, 2012
Re: Hazardous waste generation	
Summary of Communication: Sam is the current owner of Kodak Express. He indicated that he does very little processing of film, but pointed out the developing chemicals and the solver recovery equipment. He stated that the spent chemicals and silver are picked up every 6 months by ERSI. He knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no	
ROC 3	

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Ian Gee	
Of: Subject – General Manager, Sheraton Hotel	
Location: Los Angeles, CA	Phone: (213) 488-3500
Recorded By: Carol Noland	Of: IVI
At: (time): 11:00 am	On (date): December 12, 2012
Re: General knowledge of the site	
Summary of Communication: Mr. Gee is the General Manager of the Sheraton Hotel and has been at the site for over 4 years. He had no information regarding the site history. He also knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no	
ROC 4	

Asbestos Operations and Maintenance Plan

Prepared for:

THE BLOC

Office/Retail/Parking Components
700 South Flower/750 West 7th Street
Los Angeles, California 90017

Prepared by:

Environmental Testing Associates
850 Hampshire Road, Suite G
Westlake Village, California 91361

Asbestos Operations and Maintenance Plan

The Bloc

700 South Flower/750 West 7th Street

September 2014

Prepared for:
The Bloc

CERTIFICATION AND LIMITATION STATEMENT

This document was prepared by Mr. John Mitchell, California Certified Asbestos Consultant, CAC 97-2289, and Mr. Kevin Riley, NV-1JPM-1674. This document was prepared for NREA-TRC 700 LLC in compliance with federal, state and local asbestos regulations. This Operations and Maintenance (O&M) plan is dynamic and should be continuously modified and updated to reflect changing conditions and materials in the field.

Environmental Testing Associates, (ETA) prepared the O&M plan based on a combination of previous asbestos inspection data prepared and provided by others along with limited asbestos investigation performed at the property during the due diligence stage prior to the purchase of the property. Except as set forth in a separate agreement, ETA makes no representations regarding the accuracy of the referenced data and will not be held responsible for any incidental or consequential loss or punitive damages including but not limited to, loss of profits or revenues, loss of use of a facility or land, delay in construction or action of regulatory agencies

REVIEW AND APPROVAL

We, the undersigned, approve the Asbestos Operations and Maintenance Plan for
The Bloc located at 700 South Flower Street/750 West 7th Street, Los Angeles, California.

Certified Asbestos Consultant:	John Mitchell, Project Manager	CAC 97-2289 Cert. No.	9/10/14 Date
Asbestos Program Manager:	Kevin Riley, President	NV-1JPM-1674 Cert. No.	9/10/14 Date

GLOSSARY OF TERMS

AHERA: *Asbestos Hazard Emergency Response Act, Implemented 1986*

Air erosion*: the passage of air over friable ACBM which may result in the release of asbestos fibers.*

Asbestos*: the asbestiform varieties of Chrysotile (serpentine); crocidolite (riebeckite); amosite (cummingtonitegrunerite); anthophyllite; tremolite; and actinolite.*

Asbestos-containing material (ACM)*: any material or product which contains more than 1 percent asbestos.*

Asbestos-containing building material (ACBM)*: surfacing ACM, thermal system insulation ACM, or miscellaneous ACM that is found in or on interior structural members or other parts of a school building.*

Asbestos debris*: pieces of ACBM that can be identified by color, texture, or composition, or means dust, if the dust is determined by an accredited inspector to be ACM.*

Damaged friable miscellaneous ACM*: friable miscellaneous ACM which has deteriorated or sustained physical injury such that the internal structure (cohesion) of the material is inadequate or, if applicable, which has delaminated such that its bond to the substrate (adhesion) is inadequate or which for any other reason lacks fiber cohesion or adhesion qualities. Such damage or deterioration may be illustrated by the separation of ACM into layers; separation of ACM from the substrate; flaking, blistering, or crumbling of the ACM surface; water damage; significant or repeated water stains, scrapes, gouges, mars or other signs of physical injury on the ACM. Asbestos debris originating from the ACBM in question may also indicate damage.*

Damaged friable surfacing ACM*: friable surfacing ACM which has deteriorated or sustained physical injury such that the internal structure (cohesion) of the material is inadequate or which has delaminated such that its bond to the substrate (adhesion) is inadequate, or which, for any other reason, lacks fiber cohesion or adhesion qualities. Such damage or deterioration may be illustrated by the separation of ACM into layers; separation of ACM from the substrate; flaking, blistering, or crumbling of the ACM surface; water damage; significant or repeated water stains, scrapes, gouges, mars or other signs of physical injury on the ACM. Asbestos debris originating from the ACBM in question may also indicate damage.*

Damaged or significantly damaged thermal system insulation ACM*: thermal system insulation ACM on pipes, boilers, tanks, ducts, and other thermal system insulation equipment where the insulation has lost its structural integrity, or its covering, in whole or in part, is crushed, water-stained, gouged, punctured, missing, or not intact such that it is not able to contain fibers. Damage may be further illustrated by occasional punctures, gouges or other signs of physical injury to ACM; occasional water damage on the protective coverings/jackets; or exposed ACM ends or joints. Asbestos debris originating from the ACBM in question may also indicate damage.*

Encapsulation*: the treatment of ACBM with a material that surrounds or embeds asbestos fibers in an adhesive matrix to prevent the release of fibers, as the encapsulant creates a membrane over the surface (bridging encapsulant) or penetrates the material and binds its components together (penetrating encapsulant).*

Enclosure*: an airtight, impermeable, permanent barrier around ACBM to prevent the release of asbestos fibers into the air.*

EPA Worker Protection Rule*: extends the protection afforded by OSHA to all employees in asbestos abatement who may have been excluded from protection by OSHA.*

***Fiber release episode**: any uncontrolled or unintentional disturbance of ACBM resulting in visible emission.*

***Friable**: when referring to material in a school building means that the material, when dry, may be crumbled, pulverized, or reduced to powder by hand pressure, and includes previously nonfriable material after such previously nonfriable material becomes damaged to the extent that when dry it may be crumbled, pulverized, or reduced to powder by hand pressure.*

***Friable asbestos-containing material (ACM)**: any material containing more than one percent asbestos which has been applied on ceilings, walls, structural members, piping, duct work, or any other part of a building, which when dry, may be crumbled, pulverized, or reduced to powder by hand pressure. Includes non-friable asbestos-containing material after such previously non-friable material becomes damaged to the extent that when dry it may be crumbled, pulverized, or reduced to powder by hand pressure.*

***Friable asbestos-containing building material (ACBM)**: any friable ACM that is in or on interior structural members or other parts of a school or public and commercial building.*

***Functional space**: a room, group of rooms, or homogeneous area (including crawl spaces or the space between a dropped ceiling and the floor or roof deck above), such as classroom(s), a cafeteria, gymnasium, hallway(s), designated by a person accredited to prepare management plans, design abatement projects, or conduct response actions.*

***High-efficiency particulate air (HEPA)**: refers to a filtering system capable of trapping and retaining at least 99.97 percent of all monodispersed particles 0.3 □m in diameter or larger.*

***Homogeneous area**: an area of surfacing material, thermal system insulation material, or miscellaneous material that is uniform in color and texture.*

***Inspection**: an activity undertaken in a school building, or a public and commercial building, to determine the presence or location, or to assess the condition of, friable or non-friable asbestos-containing building material (ACBM) or suspected ACBM, whether by visual or physical examination, or by collecting samples of such material. This term includes re-inspections of friable and non-friable known or assumed ACBM which has been previously identified. The term does not include the following:*

1) *Periodic surveillance of the type described in 40 CFR 763.92(b) solely for the purpose of recording or reporting a change in the condition of known or assumed ACBM;*
2) *Inspections performed by employees or agents of Federal, State, or local government solely for the purpose of determining compliance with applicable statutes or regulations; or*
3) *Visual inspections of the type described in 40 CFR 763.90(i) solely for the purpose of determining completion of response actions.*

***Major fiber release episode**: any uncontrolled or unintentional disturbance of ACBM, resulting in a visible emission, which involves the falling or dislodging of more than 3 square or linear feet of friable ACBM.*

***Management Plan:** a site-specific guidance document that the responsible person must follow in managing the ACBM present in a subject property.*

***Minor fiber release episode**: any uncontrolled or unintentional disturbance of ACBM, resulting in a visible emission, which involves the falling or dislodging of 3 square or linear feet or less of friable ACBM.*

***Miscellaneous ACM**: other, mostly nonfriable ACM, products and materials (found on structural components, structural members or fixtures) such as floor tile, ceiling tile, construction mastic for floor and ceiling materials, sheet flooring, fire doors, asbestos cement pipe and board, wallboard, acoustical wall tile, and vibration damping cloth.*

***Miscellaneous material**: interior building material on structural components, structural members or fixtures, such as floor and ceiling tiles, and does not include surfacing material or thermal system insulation.*

***Nonfriable**: material in a building which when dry may not be crumbled, pulverized, or reduced to powder by hand pressure.*

***Operations and maintenance program**: a program of work practices to maintain friable ACBM in good condition, ensure clean-up of asbestos fibers previously released, and prevents further release by minimizing and controlling friable ACBM disturbance or damage.*

***PACM:** Presumed Asbestos Containing Materials.*

***Potential damage**: circumstances in which:*

1) *Friable ACBM is in an area regularly used by building occupants, including maintenance personnel, in the course of their normal activities.*
2) *There are indications that there is a reasonable likelihood that the material or its covering will become damaged, deteriorated, or delaminated due to factors such as changes in building use, changes in operations and maintenance practices, changes in occupancy, or recurrent damage.*

***Potential significant damage**: circumstances in which:*

1) *Friable ACBM is in an area regularly used by building occupants, including maintenance personnel, in the course of their normal activities.*
2) *There are indications that there is a reasonable likelihood that the material or its covering will become significantly damaged, deteriorated, or delaminated due to factors such as changes in building use, changes in operations and maintenance practices, changes in occupancy, or recurrent damage.*
3) *The material is subject to major or continuing disturbance, due to factors including, but not limited to, accessibility or, under certain circumstances, vibration or air erosion.*

***Preventive measures**: actions taken to reduce disturbance of ACBM or otherwise eliminate the reasonable likelihood of the material's becoming damaged or significantly damaged.*

***Public and commercial building**: the interior space of any building which is not a school building, except that the term does not include any residential apartment building of fewer than 10 units or detached single-family homes. The term includes, but is not limited to: industrial and office buildings, residential apartment buildings and condominiums of 10 or more dwelling units, government-owned buildings, colleges, museums, airports, hospitals, churches, preschools, stores, warehouses and factories. Interior space includes exterior hallways connecting buildings, porticos, and mechanical systems used to condition interior space.*

***Removal**: the taking out or the stripping of substantially all ACBM from a damaged area, a functional space, or a homogeneous area in a school building.*

***Repair**: returning damaged ACBM to an undamaged condition or to an intact state so as to prevent fiber release.*

***Response action:** a method, including removal, encapsulation, enclosure, repair, operations and maintenance that protect human health, and the environment from friable ACBM.*

***Routine maintenance area**: an area, such as a boiler room or mechanical room that is not normally frequented by students and in which maintenance employees or contract workers regularly conduct maintenance activities.*

***School**: any elementary or secondary school as defined in section 198 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2854).*

School building:

1) *Any structure suitable for use as a classroom, including a school facility such as a laboratory, library, school eating facility, or facility used for the preparation of food.*
2) *Any gymnasium or other facility which is specially designed for athletic or recreational activities for an academic course in physical education.*
3) *Any other facility used for the instruction or housing of students or for the administration of educational or research programs.*
4) *Any maintenance, storage, or utility facility, including any hallway, essential to the operation of any facility described in this definition of "school building" under paragraphs (1), (2), or (3).*
5) *Any portico or covered exterior hallway or walkway.*
6) *Any exterior portion of a mechanical system used to condition interior space.*

Significantly damaged friable miscellaneous ACM: *damaged friable miscellaneous ACM where the damage is extensive and severe.*

Significantly damaged friable surfacing ACM: *damaged friable surfacing ACM in a functional space where the damage is extensive and severe.*

Small-scale, short-duration activities (SSSD): *tasks such as, but not limited to:*

1) *Removal of asbestos-containing insulation on pipes.*
2) *Removal of small quantities of asbestos-containing insulation on beams or above ceilings.*
3) *Replacement of an asbestos-containing gasket on a valve.*
4) *Installation or removal of a small section of drywall.*
5) *Installation of electrical conduits through or proximate to asbestos-containing materials.*

SSSD can be further defined by the following considerations:

1) *Removal of small quantities of ACM only if required in the performance of another maintenance activity not intended as asbestos abatement.*
2) *Removal of asbestos-containing thermal system insulation not to exceed amounts greater than those which can be contained in a single glove bag.*
3) *Minor repairs to damaged thermal system insulation which do not require removal.*
4) *Repairs to a piece of asbestos-containing wallboard.*
5) *Repairs, involving encapsulation, enclosure, or removal, to small amounts of friable ACM only if required in the performance of emergency or routine maintenance activity and not intended solely as asbestos abatement. Such work may not exceed amounts greater than those which can be contained in a single prefabricated mini-enclosure. Such an enclosure shall conform spatially and geometrically to the localized work area, in order to perform its intended containment function.*

Surfacing ACM: *interior ACM that has been sprayed on, troweled on, or otherwise applied to surfaces (structural members, walls, ceilings, etc.) for acoustical, decorative, fireproofing, or other purposes. Surfacing material that is ACM.*

Surfacing material: *material in a school building that is sprayed-on, troweled-on, or otherwise applied to surfaces, such as acoustical plaster on ceilings and fireproofing materials on structural members, or other materials on surfaces for acoustical, fireproofing, or other purposes.*

Thermal system insulation TSI: *material in a school building applied to pipes, fittings, boilers, breeching, tanks, ducts, or other interior structural components to prevent heat loss or gain, or water condensation, or for other purposes.*

Thermal system insulation ACM: *insulation used to control heat transfer or prevent condensation on pipes and pipe fittings, boilers, breeching, tanks, ducts, and other parts of hot and cold water systems; heating, ventilation, and air-conditioning (HVAC) systems; or other mechanical systems that is ACM.*

***Vibration**: the periodic motion of friable ACBM which may result in the release of asbestos fibers.*

EXECUTIVE SUMMARY

This Asbestos Operations and Maintenance (O&M) Plan was prepared for The Bloc by Environmental Testing Associates, Incorporated. The Asbestos O&M Plan prescribes a program for controlling exposure to asbestos in the recently purchased mixed-use structure. The principal elements of this program involve requirements and responsibilities for material identification (surveys), employee notifications, proper work procedures for activities that the potential to disturb ACM and proper disposal of asbestos waste. The following Table – 1 describes the buildings/areas including in this plan.

TABLE - 1
BUILDINGS/AREAS INCLUDED IN THE 2014 ASBESTOS O&M PLAN

Building/Area	Description	Year of Construction	Date(s) Surveyed
700 South Flower/750 West 7th Street	Office Spaces		December 2012
750 West 7th Street	Retail Spaces		December 2012
700 South Flower/750 West 7th Street	Parking Components		December 2012

The Asbestos O&M Plan was prepared for the NREA-TRC 700 LLC Asbestos Management Program. The objective of the NREA-TRC 700 LLC Asbestos Management Program is to limit personnel exposure to airborne asbestos fibers in occupied NREA-TRC 700 LLC buildings and work spaces through cost-effective management of ACM. The program contains the following three key elements:

- Survey and material evaluation
- O&M program
- Design and abatement

This Asbestos O&M Plan was written and developed in accordance with the United States Environmental Protection Agency (EPA) Managing Asbestos in Place (Green Book), EPA Guidance for Controlling Asbestos-Containing Materials in Buildings (Purple Book), 40 CFR 61 Subpart M National Emissions Standards for Hazardous Air Pollutants (NESHAP) Asbestos Regulations, 40 CFR 763 Subpart G Asbestos Worker Protection, 29 CFR 1910.134 Respiratory Protection, 29 CFR 1910.1001 Asbestos in General Industry Standard, 29 CFR 1926.1101 Asbestos, and SCAQMD Rule 1403. Work practices and procedures dealing with asbestos will be performed in accordance with the referenced guidance documents and regulations.

This O&M plan will remain effective until all ACM or presumed asbestos-containing material (PACM) is removed from the locations listed in Table - 1 or until the buildings containing asbestos are demolished. ETA has been designated Asbestos Program Manager (APM) and is an accredited Asbestos Hazard

Emergency Response Act (AHERA) Building Inspector, Management Planner, and Project Designer. The APM will implement this O&M Plan and update it as necessary. The APM shall perform the following tasks:

- Notify building occupants of buildings with ACM via memo or asbestos awareness training.
- Ensure that workers directly involved in ACM abatement activities are EPA-accredited.
- Provide contractors/contract workers who may come in contact with asbestos with information regarding the exact location of ACM in their work vicinity.
- Post warning labels directly on ACM. If direct labeling is not possible, post a warning sign on the entry doors. Post warning signs on the doors of all mechanical rooms where ACM may be encountered.
- Conduct periodic surveillance of ACM to identify changes in condition until ACM is removed for abatement, maintenance, renovation, or demolition.
- Ensure that South Coast Air Quality Management District (SCAQMD) notification application for asbestos removal is properly completed and that authorization is given prior to the start of any asbestos work.
- Review and approve work plans written for asbestos abatement or O&M work prior to the beginning of work activities.
- Ensure that asbestos work activities are performed in accordance with federal, state and local rules, regulations, and requirements.

SECTION 1 INTRODUCTION

1.1 OBJECTIVE

The O&M plan is one of the key elements of the NREA-TRC 700 LLC Asbestos Management Program. The O&M Plan provides a responsible alternative to asbestos removal by developing a proactive, in-place management program for asbestos present in and around NREA-TRC 700 LLC buildings. The objective of the O&M Plan is to ensure that personnel are properly trained and protected from asbestos exposure caused by inadvertent disturbance of asbestos-containing material (ACM). The O&M Plan provides NREA-TRC 700 LLC with a living document for the purposes of managing and recording asbestos-related actions.

The O&M plan minimizes the exposure of building occupants, maintenance workers, and contractors to asbestos fibers by establishing work practices and procedures with the following purposes:

- Maintain existing ACM in good condition.
- Ensure proper clean-up of asbestos fibers previously released.
- Prevent further release of asbestos fibers.
- Monitor the condition of ACM.

The O&M Plan specifies the requirements for the management of ACM, including surfacing material, thermal system insulation, floor and ceiling tiles, fabrics, etc. Both friable and non-friable materials are to be monitored and managed appropriately.

Federal and state regulations require friable and non-friable ACM that may become friable during disturbance to be removed from buildings before demolition or renovation that will disturb ACM or presumed asbestos-containing material (PACM). The O&M plan does not present a permanent solution, but covers only management in place and the intentional disruption of ACM for repair or removal of small areas of significantly damaged material, or small areas where removal is necessary to facilitate maintenance/renovation activities.

1.2 O&M PLAN ELEMENTS

As specified by the *Managing Asbestos in Place* (Green Book), United States Environmental Protection Agency (EPA), an O&M plan includes the following seven elements:

- **Notification:** A program to notify building occupants, maintenance and custodial personnel, visitors, and contractors of the location of ACM and to identify procedures to avoid disturbing ACM.

- **Periodic Surveillance/Re-inspection:** Regular surveillance of ACM to note, assess, and document changes in condition. Perform periodic surveillance on an annual basis, in conjunction with the annual building safety or facility inspection. Document and report changes in the condition of ACM to the Asbestos Program Manager (APM). In addition, EPA-certified inspectors shall perform a complete re-inspection every three years.

- **Work Controls/Permits:** A system to review all work requests or trouble tickets for the likelihood of disturbing ACM.

- **Work Practices:** Establish work practices to avoid or minimize asbestos fiber release during activities that affect ACM. Work practices are detailed in Guidance *Manual: Asbestos Operations & Maintenance Work* (National Institute of Building Sciences [NIBS] *and the Green Book*).

- **Recordkeeping:** Document all O&M activities including the inspection and collection of survey data that documents the physical condition of the ACM, any response and abatement actions, employee training, and medical and respiratory program information.

- **Training:** Train personnel involved with ACM management, as follows: 1) the APM and asbestos removal workers shall receive training in accordance with EPA regulations and accredited courses; and 2) maintenance and custodial personnel whose work activities may result in the disturbance of ACM shall receive training in proper O&M procedures in accordance with EPA regulations. Proper training reduces disturbance of ACM and asbestos fibers.

- **Worker Protection:** Requirements are set forth in Federal and California Occupational Safety and Health Administration medical and respiratory standards.

1.2.1 ACM CATEGORIES

This O&M Plan addresses ACM present in buildings. A material is considered to contain asbestos if the material contains more than one percent asbestos as specified by 40 CFR Part 763. ACM is classified in one of the three following categories:

- **Surfacing Material:** Examples include ACM sprayed or troweled onto surfaces, such as decorative plaster on ceilings, acoustical ACM on the underside of concrete slabs or decking, and fireproofing materials on structural members.

- **Thermal System Insulation (TSI):** Examples include ACM applied to pipes, boilers, tanks, and ducts to prevent heat loss or gain, or condensation.

- **Miscellaneous ACM:** Examples include asbestos-containing ceiling or floor tiles, textiles, and other components such as asbestos-cement panels, asbestos siding, transite panels, and roofing materials.

This O&M Plan includes those materials not tested but presumed to contain asbestos, or PACM, and considers ACM and PACM to be equivalent. Only laboratory analysis of bulk samples, conducted by an accredited laboratory, can demonstrate that PACM is non-asbestos-containing; otherwise, all asbestos regulatory requirements apply to PACM.

1.3 SCOPE

This O&M Plan provides the framework for NREA-TRC 700 LLC to manage and document asbestos-related actions. An active and aggressive program as outlined in the O&M Plan and implemented by the APM protects personnel by ensuring that ACM or PACM is tested before a maintenance or repair operation disturbs it, and that proper work practices are employed whenever ACM is disturbed. This O&M defines three types of projects:

- **Those unlikely to involve any direct contact with ACM**, such as routine cleaning of shelves and counter tops or other surfaces in a building (provided ACM debris is not present). Generally, such activities would not disturb ACM.
- **Those that may cause accidental disturbance of ACM**, such as maintenance work above a suspended ceiling in an area that may have surfacing ACM overhead.
- **Those that involve minor disturbances of ACM** (maintenance, repair, or installation projects involving less than 25 linear feet of TSI or less than 10 square feet of surfacing ACM), such as the installation of new light fixtures on, or in, an ACM ceiling. Another example is a single glove bag operation to remove a small amount of TSI to repair a pipe in a boiler room.

OSHA defines the following four classes of asbestos work:

- **Class I:** Activities involving the removal of TSI and surfacing ACM and PACM.
- **Class II:** Activities involving the removal of ACM or PACM that is not TSI or surfacing material. This includes removal of floor tile, roofing products, construction mastics, etc.
- **Class III:** Repair and maintenance operations likely to disturb ACM or PACM.
- **Class IV:** Custodial and housekeeping operations where minimal contact with ACM or PACM may occur.

Larger scale projects (Classes I and II) involving more complex procedures for the intentional removal of ACM are considered asbestos abatement projects and include ACM removal prior to demolition and enclosure during renovation. These projects require asbestos control and abatement procedures that are outside the scope of this O&M Plan but require an update to inventory records to document changes in condition, amount, and accessibility. Contracted projects require the abatement contractor to forward copies of updated building drawings to the APM that document the locations of removed and remaining ACM, NESHAP notifications, disposal records, and final air clearance sampling results.

1.4 APPLICABLE STANDARDS AND GUIDANCE DOCUMENTS

Federal, state, and local regulations provide the basis for developing an activity's O&M plan. Table 1-1 identifies asbestos regulations applicable to NREA-TRC 700 LLC. Summaries of those regulations are presented in Appendix A. Utilize these standards as references for the O&M plan. Because rules and regulations affecting asbestos management are constantly revised, some conflicting information may be found within the listed documents. In such cases, follow the more restrictive requirement or guideline.

Table 1-2 shows the applicability of state and local requirements to Navy activities conducting asbestos removal and disposal. Appendix A provides additional Federal regulation guidance.

TABLE 1-1
APPLICABLE STANDARDS AND GUIDANCE

REGULATION/ GUIDANCE	TYPE	CITATION	REMARKS
NESHAP Subpart M	Federal Regulation	40 CFR 61	• Regulates asbestos demolition, construction, and removal activities. • Defines friable and non-friable asbestos at 1% by area.
Cal/OSHA	State Regulation	Title 8 CCR 1529	• Defines ACCM as any manufactured construction material which contains more than one tenth of 1 percent asbestos by weight.
South Coast Air Quality Management District	State/Local Regulation	40 CFR Part 61	• Enforces NESHAP requirements.
AHERA	Federal Regulation	40 CFR 763	• Defines procedures for handling and managing asbestos in schools. • Sets forth training requirements of asbestos workers under the Model Accreditation Plan.
OSHA	Federal Regulation	29 CFR 1926.1101 29 CFR 1915.1001 29 CFR 1910.1001	• Defines exposure and excursion limits, general health and safety.
Purple Book	Federal Guidance	EPA 560/5-85-024	• Guidance on identification of management planning of in-place asbestos.
Respiratory Protection	Federal Regulation	29 CFR 1910.134 29 CFR 1926.1101 29 CFR 1915.1001	• Regulations for respirator use, fit test, training.
Respiratory Protection	Federal Guidance	EPA 560-OPTS-86-001	• Procedure for respirator use, fit test, training.
Sampling	Guidance	EPA 560/5-85-030A	• Definition of homogeneous area.

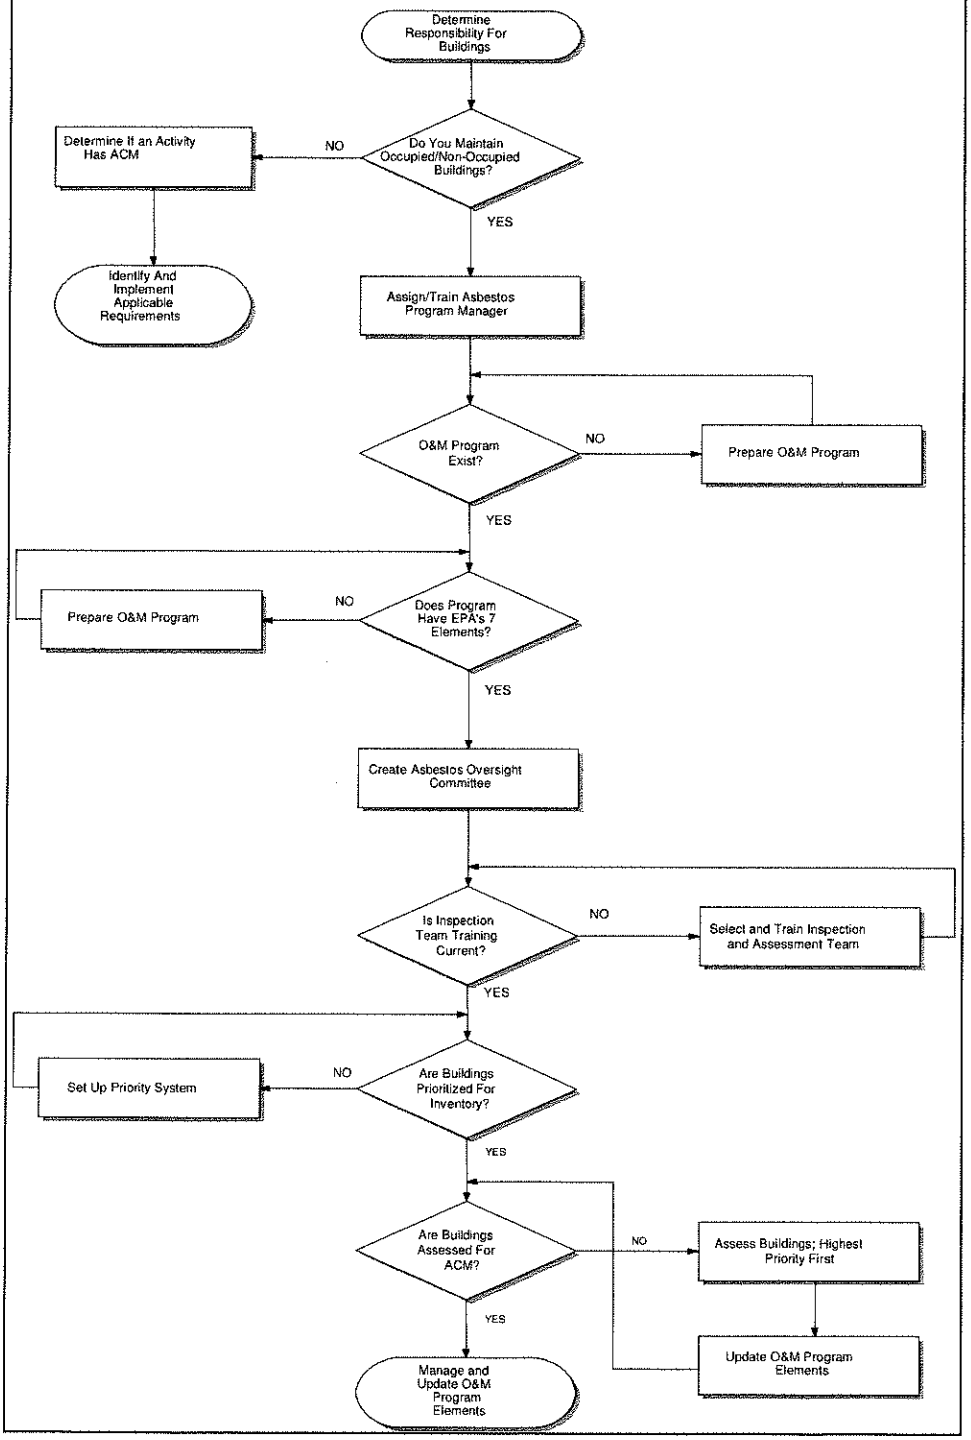
1.5 BACKGROUND AND ASBESTOS SURVEYS

This Asbestos O&M Plan was prepared by ETA for NREA-TRC 700 LLC under the supervision of the Certified Asbestos Consultant, John Mitchell. The O&M Plan is geared toward the management and maintenance of materials, assumed or confirmed to contain asbestos, identified in the asbestos surveys and will be updated as required by subsequent building inspections and re-inspections.

Use the previous Asbestos Survey Reports to determine the specific locations and conditions of ACM.

FIGURE 1-1
HOW TO MANAGE ACM



SECTION 2 ASBESTOS PROGRAM MANAGER

NREA-TRC 700 LLC has appointed ETA as the APM. To implement all aspects of the asbestos program, the APM shall be properly qualified through training and experience. ETA is an Asbestos Hazard Emergency Response Act (AHERA) Certified Building Inspector, Management Planner, and Project Designer. Contact information for ETA is presented in Table 2-1.

The APM is actively involved in asbestos-control activities and has the authority to oversee inspections, O&M activities, and abatement actions. The APM shall provide training for building workers performing O&M procedures. In addition, the APM shall verify that custodial and maintenance staffs, contractors, and outside service vendors are in compliance with current asbestos regulations when performing asbestos-related activities. Maintenance and repair activities dealing with ACM, whether friable or non-friable, are to be approved by the APM prior to implementation.

The APM shall implement the following procedures:

- Initiate the provisions of this O&M plan.
- Ensure the proper cleanup of damaged ACM.
- Initiate monitoring and surveillance of identified ACM and ACCM.
- Initiate and define regulated areas to control unauthorized access to ACM.
- Assess the need for other control measures.
- Oversee abatement projects if additional corrective action is necessary.

The duties and responsibilities of the APM will continue until all ACM is removed from all NREA-TRC 700 LLC buildings.

2.1 ASBESTOS CONTROL PROGRAM OVERSIGHT COMMITTEE

This O&M Plan establishes an Asbestos Control Program Oversight Committee. The committee meets when appropriate to discuss current and upcoming projects that impact asbestos. The APM is responsible for establishing a meeting time and place.

The committee shall comprise the APM, Respiratory Protection Program Manager (RPPM), Industrial Hygienist, and representatives of the Facilities Management Department, the Safety Department, and all other offices involved in asbestos management. Members of the committee are listed in Table 2-1.

TABLE 2-1

BUDGET								X						
ADMIN. SERVICES			X											

The following numbered paragraphs correspond to the numbered responsibilities presented in Table 2-2.

1. **Program Oversight:** The APM will administer, as well as ensure, regulatory compliance for asbestos-related projects accomplished at NREA-TRC 700 LLC buildings. In addition, the APM will provide technical support to customers in conjunction with inspection, sampling, awareness training, etc.

2. **Inventory:** NREA-TRC 700 LLC will maintain records from completed asbestos building inventories. Additional inventories and sample collections shall be completed by AHERA-Certified Inspectors. Information from these surveys shall be incorporated by the APM into the inventory record. Periodic re-inspections will be performed according to applicable regulations.

3. **Training:** The APM will work with the Facilities Department to ensure applicable personnel certifications are current and to conduct awareness training when and where applicable. The Safety Office will be responsible for issues related to the respirator program. Administrative services will procure outside training vendors as necessary and assist in recordkeeping for asbestos-related training, certification, and respirator program documentation.

4. **Project Initiation**: Asbestos abatement projects are either customer-generated or submitted by the APM and Facilities.

5. **Project Design:** The APM will participate in support of project design by Facilities (Building) Maintenance.

6. **Abatement Plan:** The APM will consult with the Industrial Hygiene, Safety, and Facilities (Building) Maintenance offices during the preparation of abatement plans. (An AHERA-Certified Project Designer must approve abatement plans submitted for projects to be accomplished by Facilities Maintenance personnel.) Abatement projects being performed by contractor personnel require submittal of an abatement plan, proof of certification for personnel and equipment, and a copy of the permit package.

7. **Environmental Compliance:** The APM shall assume responsibility for all compliance issues regarding county, state, federal, and local regulations relative to asbestos and asbestos abatement policies and procedures at NREA-TRC 700 LLC. Facilities is responsible for complying with county, state, federal and local asbestos regulations while performing or overseeing asbestos and asbestos abatement projects at NREA-TRC 700 LLC. Contracts shall require adherence to county, state, federal and local asbestos regulations and requirements on all asbestos and asbestos abatement projects.

8. **Permitting:** The APM shall ensure that required permitting is accomplished.

9. **Notification:** The APM will notify building occupants, custodial workers, contractors, and maintenance staff of the presence and condition of ACM, and of the need to avoid disturbance of ACM. The Facilities Maintenance Division or contractors performing asbestos abatement or O&M activities will be required to notify building occupants prior to beginning the project.

10. **Abatement:** During asbestos abatement projects, the Facilities-provided Competent Person (CP) or contractor CP will have authority over abatement actions. The CP is responsible for ensuring that the entire abatement conforms to the approved abatement plan and all county, state, federal and local asbestos regulations and the policies of NREA-TRC 700 LLC. Facilities and the APM will perform oversight of the contractor CP and abatement projects.

11. **Worker Protection:** The CP will assume responsibility for the safety of his crew during all phases of the abatement. The APM will coordinate with the CP and the Safety Office on related issues in conjunction with abatement operations.

12. **Air Sampling:** The Industrial Hygienist is responsible for any air monitoring deemed necessary by the APM in conjunction with work performed. Contractors are responsible for conducting any air monitoring required in association with an abatement project. Contractors shall provide copies of air monitoring sample analyses to the APM.

13. **Materials**: The APM will support the Facilities Maintenance Division with technical data concerning required equipment, type, and location of materials affected by abatement or O&M projects. Facilities Maintenance or the contractor will be responsible for maintaining an adequate inventory of supplies and equipment.

14. **Disposal:** All applicable regulations shall apply to the disposal of ACM. Disposal of non-friable ACM will be coordinated with the Environmental Protection Specialist for disposal.

SECTION 3 NOTIFICATION

The APM notifies building tenants, occupants, maintenance workers, and contractors about the location and physical condition of ACM that they might disturb, and about the need to avoid disturbing the ACM. Notification informs people of the potential hazards in the vicinity. Informed persons are less likely to unknowingly disturb ACM and cause the release of fibers into the air. Methods of notification and specific information given depend on the type, location, and condition of ACM.

NREA-TRC 700 LLC or the APM shall inform employees how to avoid disturbing ACM and who to contact if they detect damaged ACM. New employees are provided asbestos awareness notification during the new hire orientation program before they begin work.

Additional notification may also be made in writing or by posting signs or labels. Clear lines of communication with building occupants, custodial workers, contractors, and maintenance staff is an integral part of this O&M Plan. This approach, along with information regarding the presence, location, and condition of ACM, encourages understanding that the presence of asbestos is not necessarily hazardous and that ACM can be effectively managed in place.

3.1 NOTIFICATION REQUIREMENTS

In regulated service and maintenance areas, such as boiler rooms, or areas known to contain friable damaged ACM, place signs that state: "**Caution - Contains Asbestos Fibers**" adjacent to the ACM to alert and remind contractors and maintenance staff of the presence of ACM. In areas with boilers or pipes, or other service areas where the potential for damage to ACM may occur, place prominent warning signs next to or on the ACM.

The APM conducts information briefings to reinforce and clarify written notices and signs, and to provide an opportunity to answer questions. Persons likely to disturb ACM are included in the notification program. The NREA-TRC 700 LLC informs new employees about the presence of ACM before they begin work. The specific information the APM provides for each building depends on the tasks of the building occupants and service workers. NREA-TRC 700 LLC is required to notify all potentially exposed personnel about asbestos hazards via warning signs and labels.

The APM determines the notification method used to notify building occupants, custodial workers, contractor, and maintenance staff. The information method, at a minimum, shall contain the following information:

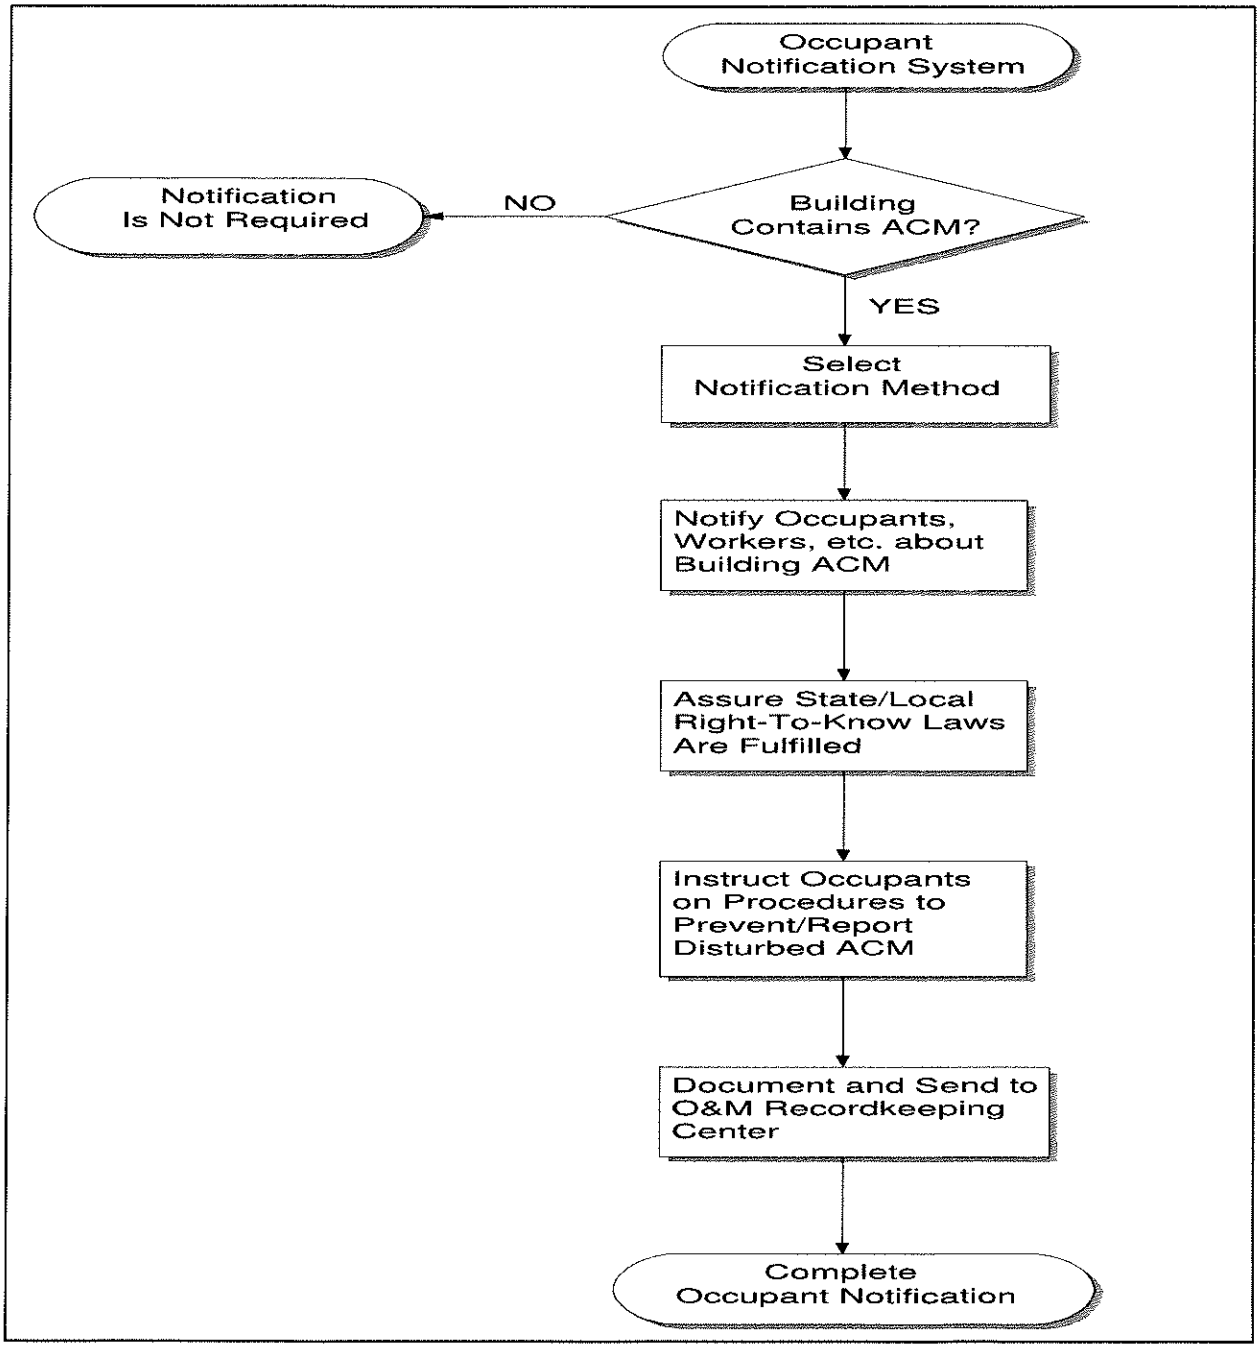
- Location of ACM around or within the building and where it might be disturbed
- Condition of the ACM and the appropriate response if that condition changes
- Information regarding the inhalation health hazards of friable, airborne asbestos
- Notification that intact and non-friable ACM does not represent a health hazard
- Warning not to disturb ACM while performing routine work tasks

- Directives for persons to report evidence of disturbance or damage of the ACM and the name, location, and phone number of the APM
- Notification to report any dust or debris that might come from the ACM, any change in the condition of the ACM, or any improper action by building personnel to the APM
- Instructions to custodial, contractors, and maintenance workers who are taking special precautions during work activities to properly clean up any asbestos debris and guard against disturbing ACM
- Results of any asbestos area air sampling conducted in the building
- Record of ACM inspection and appropriate action taken, if any, to protect the health of people potentially exposed to ACM
- Notice that periodic re-inspection will occur

Additional notification to building occupants is required whenever an asbestos abatement project is initiated. The APM shall send a memo, or ensure that the abatement contractor sends a memo, to building occupants prior to beginning an asbestos project. Post the memo outside the regulated area. Include a copy of the memo in the building O&M file. The memo must include the following information:

- Project location(s)
- Project dates
- Point of contact with phone number
- Information regarding what is being done to minimize/prevent any fiber release
- Information on periodic surveillance to ensure that remaining ACM remains in good condition

FIGURE 3-1
OCCUPANT NOTIFCATION SYSTEM



SECTION 4 TRAINING

Training is one of the keys to a successful O&M program. In general, training provides background information regarding asbestos uses and health hazards, asbestos regulations, respiratory and other personal protection equipment, key concepts of asbestos hazard control, and the O&M training presented in this document. Trained personnel reduce the risk faced both by building workers and occupants from the release of asbestos fibers due to improper work practices.

All custodial and maintenance workers, abatement workers and contractors, or other persons involved in asbestos-related activities shall receive training if they have the potential to disturb ACM, enter an asbestos regulated area, or perform ACM related activities. Table 4-2 lists the training requirements for each type of asbestos operation.

Training complies with OSHA General Industry Standard for Asbestos (29 CFR 1910.1001); OSHA Construction Industry Standard for Asbestos (29 CFR 1926.1101); OSHA Respiratory Protection Standard (29 CFR 1910.134); EPA National Emission Standard for Hazardous Air Pollutants (40 CFR 61, Subpart M); EPA Asbestos Worker Protection (40 CFR 763, Subpart G) and EPA AHERA Regulations (40 CFR 763, Subpart E

TRAINED PERSONNEL

The APM maintains a record of trained personnel. Table 4-1 lists certified NREA-TRC 700 LLC personnel. The APM maintains the attendance roster of custodial and maintenance workers who receive two-hour asbestos awareness training (OSHA Class IV Training).

TABLE 3-1

4.1 OSHA CLASS IV 2-HOUR ASBESTOS AWARENESS TRAINING FOR CUSTODIAL AND MAINTENANCE WORKERS

This 2-hour Asbestos Awareness Training Course is required for OSHA Class IV Asbestos Work and requires a minimum of two hours of training per 40 CFR 763.92(a) (1). This training is for custodial and maintenance workers, contractors, and employees involved in cleanup tasks, such as sweeping, mopping, dusting, cleaning, and vacuuming of ACM. The following topics are included:

- Background information on asbestos
- Health effects of asbestos
- Worker protection programs
- Location of ACM in Facility buildings
- Recognition of ACM damage and deterioration
- Review of this O&M Plan
- Proper response to fiber release episodes

4.2 OSHA CLASS III 16-HOUR OPERATIONS & MAINTENANCE TRAINING

The 16-Hour Operations & Maintenance Course covers O&M procedures for OSHA Class III Asbestos Work and is required for workers involved in repair and maintenance operations where ACM, including TSI and surfacing materials, is likely to be disturbed. Examples include repair or removal of a small section of damaged pipe insulation or the installation of electrical conduit in an air plenum containing ACM or ACM debris. This course includes more detailed discussions of topics covered in the 2-hour Asbestos Awareness Training Course (Section 4.1), and the following additional topics per 40 CFR 763.92(a)(2):

- Federal, state and local asbestos regulations
- Proper asbestos-related work practices
- Proper methods of handling ACM, including waste handling and disposal
- Respirator use, care, and fit testing
- PPE donning, use, and handling
- Hands-on exercises for techniques such as glove bag work and high-efficiency particulate air filter (HEPA)-vacuum use and maintenance
- Appropriate and proper worker decontamination procedures

4.3 OSHA CLASS I & II AHERA WORKER TRAINING

This 4-day AHERA Worker course is required for workers who conduct asbestos abatement (OSHA Class I and II) or have direct intentional contact with ACM. The worker is trained how to perform an ACM removal job, construct an enclosure, and encapsulate a surface containing ACM. In addition to the elements of the 2-hour Asbestos Awareness Training Course (Section 4.1) and the 16-Hour Operations & Maintenance course (Section 4.2), the AHERA Worker. The course includes the following specialized topics:

- Pre-asbestos abatement work activities
- Work area preparation
- Establishment of decontamination units
- PPE, including respirator selection, use, fit testing, and protective clothing
- Worker decontamination procedures
- Safety considerations in the abatement work area
- Practical hands-on exercises
- Proper handling and disposal of ACM wastes

4.4 AHERA CONTRACTOR SUPERVISOR TRAINING

Supervisors of OSHA Class I and II work are required to complete the 5-day AHERA Contractor Supervisor Course, which also designates the individual as a "competent person". In addition to the 5-day AHERA Contractor Supervisor Course, the APM and the Deputy APM shall also have completed the 2-day AHERA Management Planner Course and the 3-day AHERA Project Designer Course. The AHERA Contractor Supervisor Course includes the following topics:

- Physical characteristics of asbestos and ACM
- Potential health effects related to asbestos exposure
- Employee PPE
- State-of-the-art work practices
- Personal hygiene
- Additional safety hazards
- Medical monitoring
- Air monitoring

- Relevant Federal, State, and local regulatory requirements, procedures, and standards
- Respiratory Protection Programs and Medical Monitoring Programs
- Insurance and liability issues
- Recordkeeping for asbestos abatement projects
- Supervisory techniques for asbestos abatement activities
- Contract specifications
- Course review

4.5 AHERA BUILDING INSPECTOR COURSE

Certification as an AHERA Building Inspector is required for all personnel who survey and inspect buildings for ACM. An inspection includes those activities undertaken to specifically determine the presence or location of, and assess the condition of, friable or non-friable ACM or PACM. An accredited 3-day AHERA Building Inspector Course is required for certification. The course includes the following topics:

- Background information on asbestos
- Potential health effects related to asbestos exposure
- Functions/qualifications and the role of inspectors
- Legal liability and defenses
- Understanding of building systems
- Public/employee/building occupant relations
- Pre-inspection planning and review of previous inspection records
- Inspecting for friable and non-friable ACM and assessing the condition of friable ACM
- Bulk sampling/documentation of asbestos
- Respiratory protection and personal protective equipment
- Recordkeeping and writing the inspection report
- Regulatory review
- Field trip
- Course Review

4.6 AHERA MANAGEMENT PLANNER COURSE

AHERA Management Planner certification is required only for people who prepare management plans for schools (Kindergarten to Grade 12), but is also recommended for personnel responsible for implementing and managing the O&M Plan, such as the APM and the Assistant APM. The 3-day AHERA Building Inspector Course is a prerequisite of the 2-day AHERA Management Planner Course. The AHERA Management Planner Course is beneficial to the APM for administering the O&M Plan and includes the following topics:

- Course overview
- Evaluation/interpretation of survey results
- Hazard assessment
- Legal implications
- Evaluation and selection of control options
- Role of other professionals
- Development of an O&M plan
- Regulatory review
- Record keeping for management planner
- Assembling and submitting the management plan
- Financing abatement actions
- Course Review

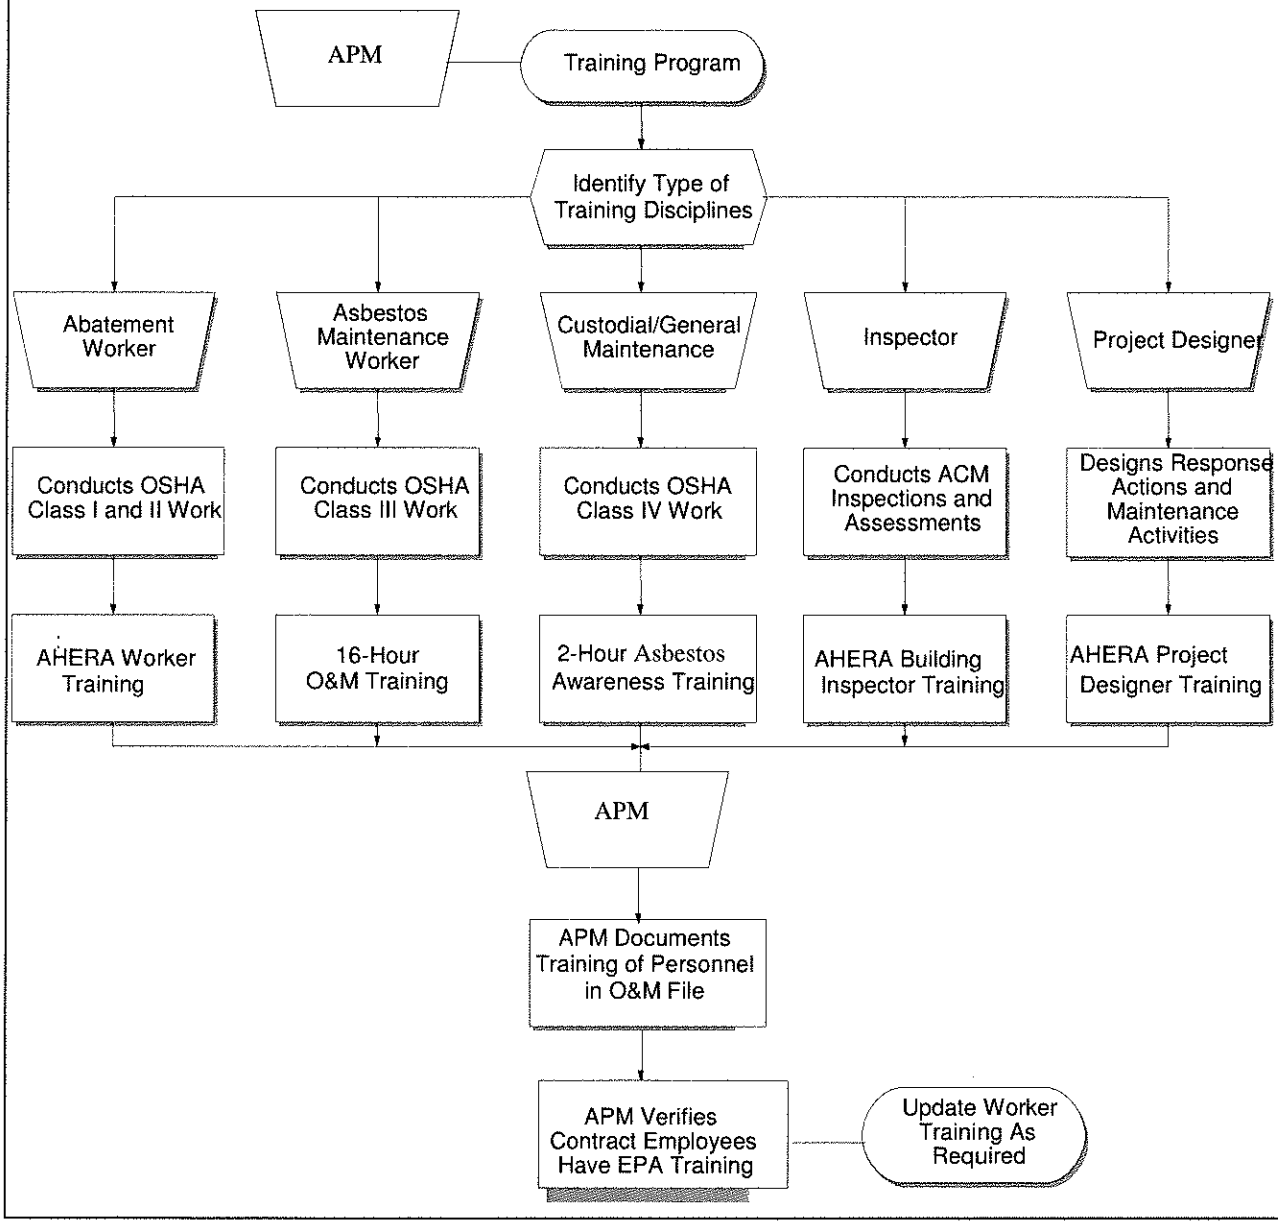
4.7 AHERA PROJECT DESIGNER COURSE

AHERA Project Designer certification is required for a person who designs: (1) a response action, other than an OSHA Class III work activity; (2) a maintenance activity other than an OSHA Class III work activity that disturbs friable ACM; and, (3) a response action for a major fiber-release episode. Project designers shall complete a 3-day AHERA Project Designer Course. The course includes the following topics:

- Background information on asbestos
- Potential health effects related to asbestos exposure
- Overview of abatement construction projects
- Safety system design specifications

- Field trip
- Employee PPE
- Additional safety hazards
- Fiber aerodynamics and control
- Designing abatement solutions
- Final clearance process
- Budgeting and cost estimating
- Writing abatement specifications
- Preparing abatement drawings
- Contract preparation and administration
- Legal/liabilities/defenses
- Replacement
- Role of other consultants
- Relevant Federal, State, and local regulatory requirements, procedures, and standards
- Course review

FIGURE 4-1
ASBESTOS TRAINING PROGRAM



SECTION 5 WORKER PROTECTION

A worker protection program includes medical surveillance, PPE, personal exposure monitoring, and engineering controls. Engineering controls are the preferred method for worker protection. Contractors conducting maintenance and repair operations will notify the APM, in writing, that they have an asbestos worker protection program in place. In addition, OSHA regulations require a written respiratory protection program whenever an O&M plan specifies that service workers wear respirators or where respirators are made available to workers. The APM must verify and approve these programs prior to allowing any asbestos work to begin.

5.1 WORKER PROTECTION DURING ROUTINE O&M

5.1.1 MEDICAL SURVEILLANCE

OSHA 29 CFR 1926.1101 requires workers who wear respirators or who are exposed to asbestos at concentrations equal to or in excess of the permissible exposure limit (PEL) of 0.1 fibers per cubic centimeter (f/cc) for 30 days or more per year to be enrolled in a medical surveillance program.

A baseline medical exam documents the state of a worker's health before the employee begins an assignment with a potential for asbestos exposure. Annual medical exams are used to detect and document any changes in employee health from year to year and relative to the baseline medical exam. The baseline and annual medical exams are crucial in identifying any asbestos-related medical conditions. The earlier that asbestos complications and disease are found, the greater the chances for successful treatment. By law, NREA-TRC 700 LLC must provide all exams.

Asbestos medical exams must include at least the following four parts:

- A work history, to determine whether the worker has ever worked with materials that might have damaged the lungs. This is an official questionnaire, required by OSHA, asking the worker about past work, smoking habits, lung disease, etc.
- A general physical examination that concentrates on the worker's lungs, heart, and stomach to see whether these organs are normal and without any medical problems that exposure to asbestos could make worse. After the general physical exam, the doctor will determine whether the worker can wear a respirator, and whether they can work with asbestos.
- A breathing test, called a pulmonary function test (PFT), to make sure that the lungs are not damaged before beginning work. It is used as a baseline for later tests.
- A chest X-ray to make sure that the worker's lungs are not damaged before beginning work. It is compared to future X-rays to detect any changes that take place in the lungs over the year.

NREA-TRC 700 LLC requires employees working with asbestos to enroll in the Asbestos Medical Surveillance Program. The APM is responsible to ensure required employees attend a company acceptable Medical facility.

Contractors shall verify the medical file for all workers or other persons who may perform work in a regulated area, or who wear respirators, or who are exposed to asbestos at levels equal to or in excess of the permissible exposure limit (PEL) of 0.1 fibers per cubic centimeter (f/cc) for 30 days or more per year to ensure that their workers have passed the physical examination and have received a respiratory compliance letter from a doctor.

5.1.2 PERSONAL PROTECTIVE EQUIPMENT

PPE is designed to protect workers from inhalation or dermal exposure to free or releasable asbestos fibers. PPE consists of disposable Tyvek® coveralls, head covering, protective glasses or goggles, disposable gloves, disposable shoe covers, and a proper respirator. In general, upon completion of asbestos O&M work in a regulated area (under direction of the APM) workers will HEPA-vacuum PPE in the decontamination zone. Leaving the respirator in place, the worker will then removes PPE and fold it inside out as it is removed. All disposable PPE and respirator filters are disposed of as asbestos-containing wastes.

PPE is available through NREA-TRC 700 LLC. The APM shall train asbestos O&M workers in the proper use, removal, and disposal of PPE. Some asbestos O&M activities may not require the use of PPE. The APM will assess PPE need(s) on a case-by-case basis.

5.1.3 RESPIRATORY PROTECTION

When effective engineering controls are infeasible or while engineering controls are being implemented, the APM will ensure that appropriate respirator protection is used. The Safety Manager, ETA, is designated as the RPPM for NREA-TRC 700 LLC. RPPM responsibilities include providing training in proper respirator use and limitations and ensuring that each worker is physically fit to wear a respirator.

The RPPM provides NREA-TRC 700 LLC employees respirators with HEPA filters and conducts fit testing. Employees are responsible for using the respiratory protection provided in accordance with the instructions and training given by the RPPM. Facilities maintenance employees and contractors doing maintenance repair, or asbestos abatement projects shall provide appropriate respirators and fit test to contractor employees.

Respirator selection is based on an asbestos fiber concentration of 0.01 f/cc inside the respirator. Respirators are selected by first performing air sampling to determine the asbestos concentration exposure level and then applying the respirator protection factor. An asbestos concentration exposure level equal to the PEL of 0.1 f/cc would require a protection factor greater than 10. Workers disturbing asbestos without air sampling data must wear full-face, powered air-purifying respirators (PAPR) approved by National Institute of Occupational Safety and Health (NIOSH).

5.1.4 EXPOSURE MONITORING

Employees who expect to exceed the PEL of 0.1 f/cc shall receive proper training and participate in the medical surveillance program. NREA-TRC 700 LLC contractors performing abatement, construction, and maintenance activities with the potential to disturb ACM shall provide the following information to the APM.

- Documentation of the contractor respiratory protection program
- Daily personal exposure monitoring results and records
- Employee notification plan to communicate air monitoring
- Documentation of the establishment of an asbestos-regulated negative-pressure enclosure area in cases where the concentration of airborne asbestos exceeds the PEL
- Names of designated competent person(s)
- Proof of certification of asbestos abatement personnel

5.1.5 AIR MONITORING

Laboratories must be accredited by the National Institute of Standards and Technology (NIST) and/or the American Industrial Hygiene Association (AIHA) for asbestos analysis. Phase contrast microscopy (PCM) is used to determine airborne fiber concentration following NIOSH Method 7400 counting rules. PCM analysis is not asbestos fiber-specific; consequently, its use for baseline or limited clearance samples. However, PCM is quite useful during asbestos abatement when airborne fibers are likely to be asbestos. PCM results can be available with little lead time, and PCM is more economical than the costly, but more accurate, transmission electron microscopy (TEM) analysis. TEM analysis is specific to asbestos fibers and has a more precise detection level. Cal/OSHA T8 CCR 1529 and OSHA 29 CFR 1926.1101 require employers to use PCM to determine whether employees are exposed in excess of the PEL and PCM is sufficient for O&M baseline air monitoring.

If air sampling indicates that airborne fiber levels inside the containment area exceed 1.0 f/cc, cease work and immediately implement additional engineering controls to reduce airborne fiber levels. If fiber levels outside a regulated area reach 0.01 f/cc, notify the APM, extend the regulated area, evacuate people from the affected area, limit access, and control the release of airborne fibers. If fiber levels exceed 0.1 f/cc, medical monitoring will ensue and respirators shall be worn.

5.1.6 EQUIPMENT AND SUPPLIES

Maintenance workers or asbestos abatement contractors assisting with O&M activities in areas where ACM may be disturbed shall have the necessary equipment and supplies to contain ACM and to perform abatement and decontamination in regulated ACM areas. Refer to the NIBS asbestos guidance manual for a listing of required equipment.

5.2 WORKER PROTECTION DURING ASBESTOS ABATEMENT

5.2.1 PERSONAL PROTECTIVE EQUIPMENT

PPE is worn to prevent asbestos fibers contamination to employee clothing and prevent carrying the contamination from the workplace to the home. NREA-TRC 700 LLC personnel and contractors performing asbestos abatement or other O&M functions shall comply with Sections 5.1.2 and 5.1.3 whenever PPE is required.

Decontamination procedures are essential for protecting both worker and property from the spread of asbestos fiber contamination. Everyone leaving the work area for any reason, including lunch breaks, rest breaks, phone calls, and equipment retrieval must strictly adhere to these decontamination procedures.

5.2.2 WORKER TRAINING

Workers undergo rigorous training on the health risks of asbestos exposure. Such training includes the use of, care of, and fit-testing of respirators. Give attention to abatement procedures and policies and other hazardous materials handling. Refer to Section 4.3 for appropriate asbestos training requirements.

5.2.3 SMOKING AND EATING

Asbestos fibers are hazardous when inhaled and may be hazardous when ingested. To protect against such hazards, smoking, drinking, eating, chewing gum or chewing tobacco is prohibited in any area requiring the use of PPE.

SECTION 6 WORK PRACTICES

This O&M plan focuses on a special set of asbestos work practices for custodial, maintenance, and construction staff. Work practices and standard operating procedures used in this plan are based on information in *Guidance Manual: Asbestos Operations & Maintenance Work Practices* (NIBS, 1996).

In addition, Cal/OSHA T8 CCR 1529 and OSHA Standard 29 CFR 1926.1101, Construction Industry, requires the following work practices and engineering controls regardless of the levels of exposure or classes of asbestos work:

- HEPA-equipped vacuums
- Wet methods
- Prompt cleanup and disposal of waste/debris

Additional engineering controls may be necessary to achieve PEL/excursion limit compliance including:

- Negative-pressure systems with local exhaust ventilation and HEPA filters
- Process enclosure and/or isolation
- Ventilation of regulated areas

The following work practices are prohibited regardless of measured exposure or the results of initial exposure assessments:

- Use of high-speed abrasive saws without attached HEPA-filtered point-of-cut ventilator or HEPA-filtered enclosure
- Use of compressed air
- Dry sweeping, shoveling, or other dry clean-up method
- Employee rotation to reduce exposure

The APM develops works practices for asbestos activities. Work practices are reviewed annually for recurring asbestos activities. NREA-TRC 700 LLC Facilities Management Department is responsible for ensuring that proper work practices are in place when conducting asbestos-related maintenance and cleanup work. Facilities Management shall notify the APM, in writing, of the nature and location of the asbestos-related work, the estimated duration, and the completion date. The APM shall provide work practices applicable to each job to employees.

Proper implementation of the O&M worker protection plan is essential to ensure worker safety. Asbestos-trained and certified maintenance staff or contractors will perform all O&M work that involves direct contact with friable ACM or disturbance of friable or non-friable ACM using the methods detailed in the *Guidance Manual: Asbestos Operations & Maintenance Work Practices* (NIBS, 1996) or equivalent.

Large-scale abatement projects require complex controls and procedures that are site-specific and outside the scope of this O&M plan. Large-scale abatement projects shall be performed in accordance with the asbestos specifications or written work plan prepared by the APM or NREA-TRC 700 LLC contractor. Contractors shall be bound by contract to comply with the provisions of the asbestos abatement specifications or work plan. The APM shall be informed of the extent of the asbestos abatement project by reviewing the drawings, contract, and attending the pre-construction meeting.

6.1 CLASS I AND II ASBESTOS WORK PRACTICES

Cal/OSHA T8 CCR 1529 and OSHA Standard 29 CFR 1926.1101, Construction Industry, defines Class I Asbestos Work as any activity involving the removal of TSI and surfacing ACM. The definition also includes Class III repair and maintenance work where more than one standard waste bag or standard glove bag is needed (a standard glove bag/waste bag shall not exceed 60 inches in length and width). Class II Asbestos Work is defined as any activity involving the removal of ACM that is not TSI or surfacing material (i.e., wallboard, flooring, roofing, siding, mastics, and gaskets).

The following are requirements for Class I Asbestos Work:

- Designate a regulated area.
- Use wet methods, HEPA-filtered vacuums, and prompt cleanup.
- Use critical barriers or other effective means of isolation.
- Not required when disturbed ACM is less than 25 linear feet or 10 square feet.
- Seal HVAC systems with a double layer of 6-millimeter plastic or equivalent.
- Use impermeable drop cloths below removal area and place drop cloths over objects remaining in the regulated area.
- Ventilate area away from workers breathing zone towards a HEPA-filtered collection device.
- Use of one or more of the following specific control methods (each method includes specifications and work practices):
  - Negative Pressure Enclosure System (NPE)
  - Glove bag System
  - Negative Pressure Glove bag System
  - Negative Pressure Glove Box System
  - Water Spray Process System
  - Walk-In Mini-Enclosure
- Use alternative methods if certified by a CIH or PE who is also an AHERA Project Designer:
  - Provide OSHA a copy of the evaluation and certification when removed ACM is greater than 25 linear feet or 10 square feet.
  - A competent person can make this certification if removed ACM is less than 25 linear or 10 square feet.

- Use full decontamination procedures with a shower (use remote shower where contiguous shower is infeasible):
  - Drop cloth decontamination is permitted where removed ACM is less than 25 linear feet or 10 square feet.

The following are requirements for Class II Asbestos Work:

- Designate a regulated area
- Use wet methods, HEPA-filtered vacuums, and prompt cleanup.
- Use critical barriers or other effective means of isolation.
- Use impermeable drop cloths below removal area.
- Alternative methods may be used if demonstrated that the PEL cannot be exceeded. A competent person must certify the method in writing.
- Use a drop cloth where clothes can be HEPA-vacuumed for decontamination process.

6.2 CLASS III AND IV ASBESTOS WORK PRACTICES

Cal/OSHA T8 CCR 1529 and OSHA Standard 29 CFR 1926.1101, Construction Industry defines all O&M work that involves direct contact with friable ACM, or disturbance of friable or non-friable ACM as Class III or Class IV Asbestos Work.

Class III Asbestos Work is defined as repair and maintenance operations, where ACM, including TSI and surfacing material, is likely to be disturbed. The maximum amount of disturbed material must not exceed that which will fit into one standard glove bag or standard waste bag. The standard glove bag/waste bag shall not exceed 60 inches in length and width. The following are the minimum requirements for Class III Asbestos Work:

- Designate a regulated area.
- Use wet methods, HEPA-filtered vacuums, and prompt cleanup.
- Use a negative pressure system with local exhaust ventilation and HEPA filters when feasible.
- Use impermeable drop cloths below removal area.
- Use glove bags or mini-enclosures whenever disturbance involves drilling, cutting, abrading, sanding, chipping, breaking, or sawing TSI or surfacing materials.
- Isolate area if PEL is exceeded.
- Decontamination process includes HEPA-vacuuming clothes over a drop cloth.

Class IV Asbestos Work is defined as maintenance and custodial activities during which employees contact ACM, and activities that involve the cleanup of waste and debris containing ACM. The following are the requirements for Class IV Asbestos Work:

- HEPA-filtered vacuum or steam-clean all carpets.
- HEPA-filtered vacuum or wet clean all other floors and other horizontal surfaces.
- Prompt cleanup.
- HEPA-filtered vacuum clothes over drop cloths for decontamination purposes.
- Disposal of all debris, filters, mop heads, and cloths in sealed leak-tight containers.

Additional cleaning shall be determined and recommended in writing by the APM. Methods and frequency shall be considered.

Cal/OSHA T8CCR 1529, OSHA 29 CFR 1926.1101 and 29 CFR 1910.1001 specify the following work practices for vinyl and asphalt asbestos flooring material:

- Prohibit sanding of flooring material.
- Vacuums shall be equipped with HEPA filter, disposable dust bag, and a metal floor tool (no brush) shall be used to clean floors (applies to floor removal/renovation or areas containing accessible TSI or surfacing ACM/PACM, or visibly deteriorated ACM)
- Strip finishes using low-abrasion pads (speed lower than 300 rotations per minute) and wet methods.
- Burnish or dry buff only on floorings that have sufficient finish so that the pad cannot contact the material.

6.3 FIBER RELEASE EPISODES

NREA-TRC 700 LLC employees and staff shall notify the APM of an ACM disturbance or episode that causes the release of asbestos fibers. Access shall be prohibited to the area until the APM can make an estimate of the extent of contamination. The area will be isolated until the APM determines the area is safe for re-entry.

If moderate-to-relatively large amounts of ACM are disturbed, the APM must use the following general procedures to address the hazard:

- Keep ACM wetted, if possible.
- Ascertain scope of the asbestos episode.
- Evacuate workers, identify and isolate the regulated area.

- Limit entry to the regulated area by persons other than those necessary to perform the maintenance project; isolate the building HVAC system, if applicable.
- Post signs to prevent entry by unauthorized persons.
- Institute O&M work practices and worker protection.
- Institute personal exposure monitoring activities.
- Determine need for medical surveillance of workers.
- Establish perimeter air monitoring stations, if possible.
- Repair/replace damaged ACM with asbestos-free material.
- Clean all fixtures or other components in the immediate work area, using either wet methods or a HEPA-filtered vacuum.
- Place asbestos debris and other cleaning material in labeled, double-sealed bags or impermeable leak-tight containers.

Special procedures are generally needed to minimize the spread of fibers throughout the building after an asbestos fiber release occurs, such as the partial collapse of an ACM ceiling or wall, or the accidental disturbance of ACM. These procedures are needed whether the ACM disturbance is intentional or unintentional. Under AHERA regulations, a "major fiber release" (large asbestos episode) is defined as one involving more than three square feet or three linear feet of ACM. The procedures followed will vary according to the amount of ACM affected, the extent of fiber released from the ACM, the relationship of the release area to the air handling systems, and whether the release site is accessible to building occupants. Depending on the severity of the episode, asbestos consultants and contractors may be needed to develop a strategy for conducting the cleanup operations.

In general, for major fiber releases, wet the ACM and isolate the area by closing doors and erecting temporary barriers to restrict airflow. Restrict access to the site to prevent persons not involved in the cleanup operation from inadvertently entering the area. If asbestos fibers could enter the HVAC system, shut down the supply and return air system of the affected area, and seal off the system to prevent fiber entry. The final steps will include a thorough cleanup, a careful inspection, and final clearance air monitoring to verify satisfactory cleanup.

More specific procedures for controlling asbestos fiber releases are discussed in the *Guidance Manual: Asbestos Operations & Maintenance Work Practices* (NIBS, 1996). In general, "critical barriers" or "mini-containment structures" are required for access to regulated areas or activities that may disturb ACM. Critical barriers are necessary to contain ACM and may include barriers at doorways, hatches, open ceilings, shafts, and holes in plenum walls. Mini-containment structures are one- or two-chamber polyethylene structures designed to provide a barrier and decontamination area for entry and exit of workers and equipment. Contained areas will be posted per OSHA regulations.

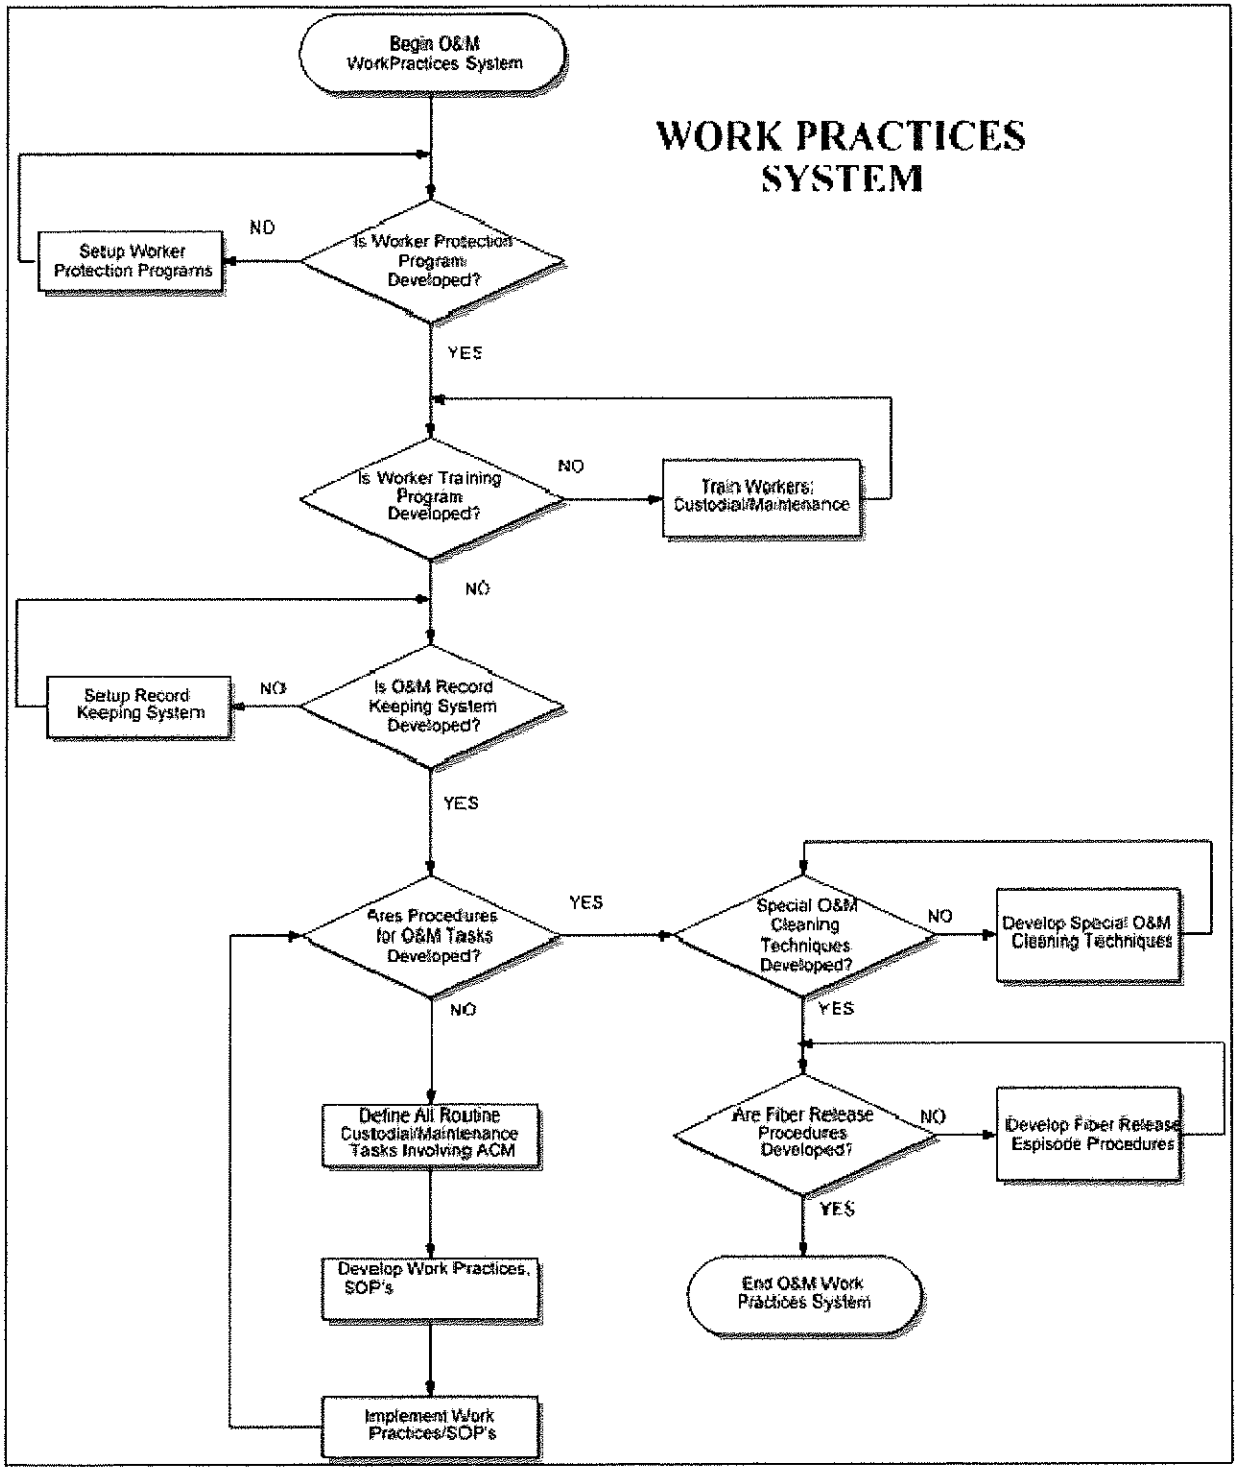
6.4 REGULATED AREAS

The primary method used to control access to and operations with ACM is the establishment of specific regulated areas. Regulated areas are defined by OSHA as those areas where Class I, II, and III asbestos work is conducted; any area where debris and waste from such work accumulates; and, work areas where the fiber concentration may exceed the PEL of 0.1 f/cc. Implement restrictive work procedures, with engineering controls, to reduce fiber release. In addition, use health and safety protocols to protect workers in these areas.

Limit access to regulated areas or activities that may disturb ACM by installing critical barriers or mini-containment structures. Critical barriers are necessary to contain ACM and may include barriers at doorways, hatches, open ceilings, shafts, and holes in plenum walls. Mini-containment structures are one- or two-chamber polyethylene structures designed to provide a barrier and decontamination area for entry and exit of workers and equipment. Post signs indicating regulated areas per OSHA regulations

Locations of friable or damaged (friable and non-friable) ACM are considered "regulated areas." The APM can also define other areas as regulated areas. An ACM work control/permit is required for all activities in regulated areas due to the high potential for disturbing the friable or damaged ACM. Documentation of contact, both accidental and intentional, is placed on record at the APM's office.

FIGURE 6-1
WORK PRACTICES SYSTEM



SECTION 7 ACM WORK CONTROLS AND PERMITS

7.1 WORK CONTROLS/PERMITS

The purpose of a work control/permit system is to ensure that the contractor employees who conduct maintenance and repair are aware of the location of ACM and the restrictions and requirements of the O&M plan.

The work control/permit system allows review of work plans by the APM so that particular engineering and health procedures are implemented during the work activity. A work control/permit system, such as using *work permits,* is required for all activities in regulated areas and for any activities that may disturb or damage ACM.

The following O&M activities shall require an asbestos work permit:

- Access to regulated areas or asbestos abatement containments
- Decontamination of small amounts of asbestos debris resulting from unintentional disturbance of ACM
- Building maintenance, repair, or installation activities that are conducted in areas with damaged or friable ACM
- Building maintenance or repair activities that require the disturbance of ACM in any area

7.2 WORK CONTROL/PERMIT SYSTEM

Trouble Tickets and Work Requests shall be reviewed by the APM. Any trouble ticket that may involve building materials (doors, floor tile, pipes) is submitted to the APM for review. The APM consults the asbestos inventory or, if necessary, conducts additional sampling. If the work involves asbestos, the APM provides work practices and guidance to employees. If the work falls under project status and not O&M, the work is assigned to contract. After reviewing, the APM will forward the trouble ticket/work request to the Facilities Management Department head for final authorization.

7.3 CONTRACT PROJECTS

The APM will ensure that work performed by an independent contractor that may involve the release of asbestos fibers shall incorporate the appropriate references and/or specific contract clause or clauses necessary to assure that the following actions occur:

- The contractor is aware of the potential hazard to his/her employees.
- The contractor takes special precautions to comply with references 29 CFR 1910.1001; 29 CFR 1926.1101; 40 CFR Part 61, National Emission Standards for Hazardous Air Pollutants; Asbestos NESHAP Revision, November 20, 1990 rule to protect his/her employees from exposure to asbestos fibers in excess of the PEL.

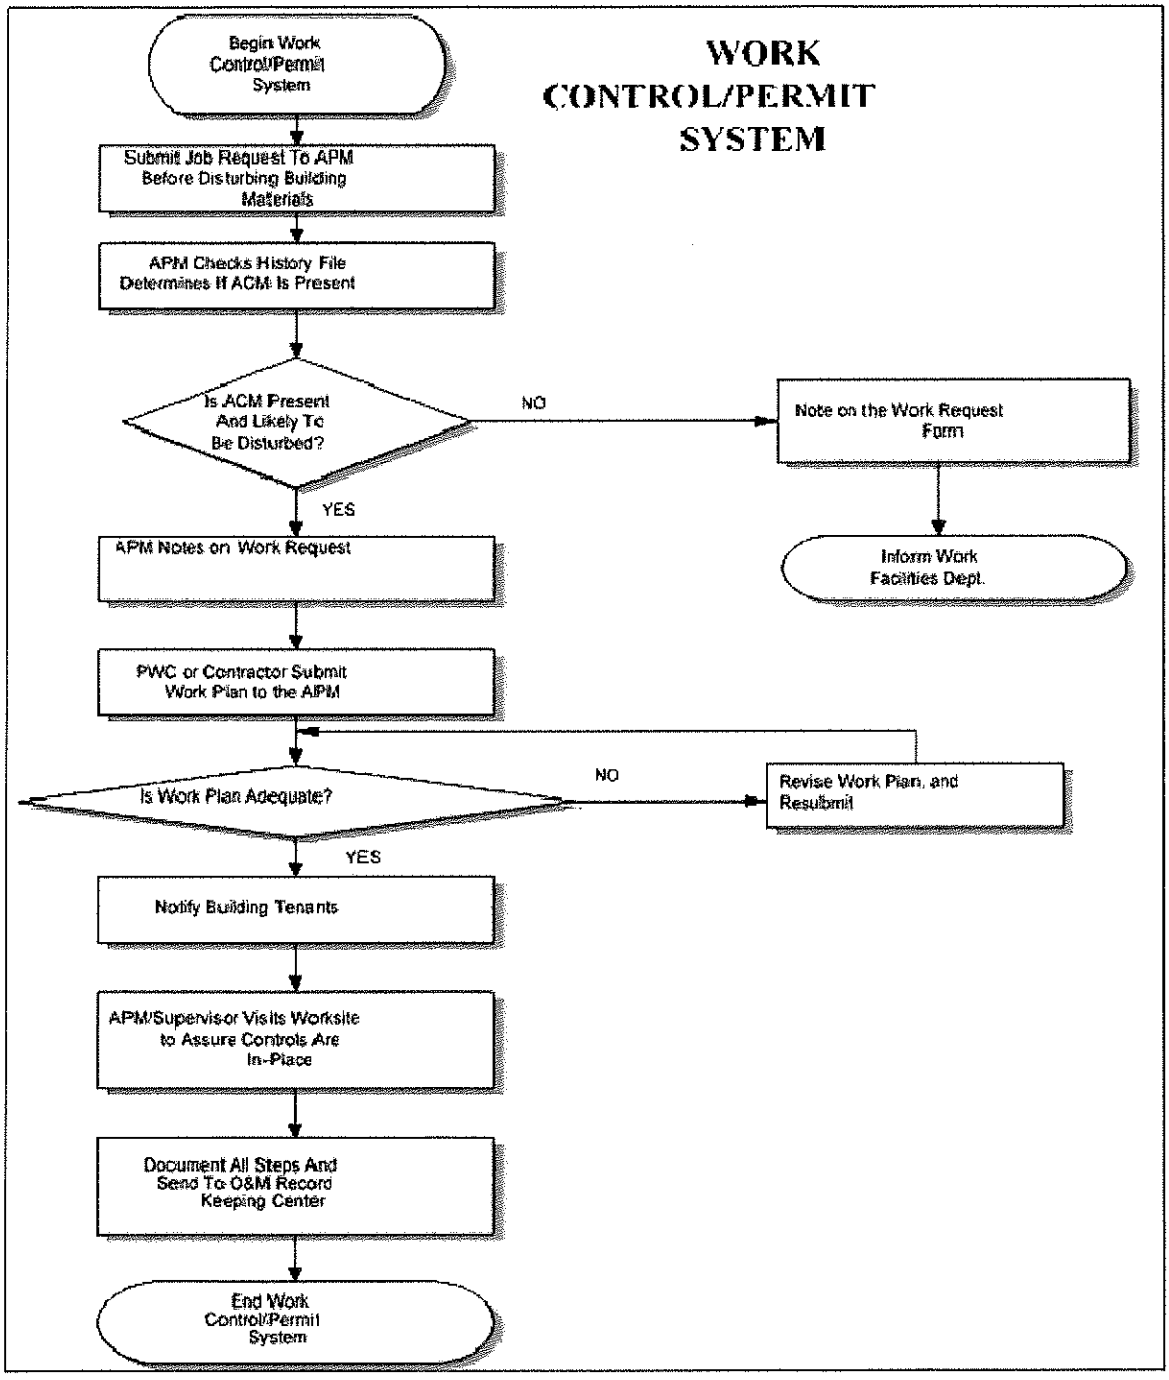
- The contractor measures and controls asbestos fibers outside the asbestos boundary to less than 0.01 f/cc as required by Cal/OSHA T8CCR 1529 and 29 CFR 1926.1101. In addition, controlled/regulated areas shall meet this criterion prior to release for unrestricted access. Appropriate monitoring and enforcement of the contract provisions is the responsibility of the official responsible for contract compliance. In addition, coordinate with the industrial hygienist and the APM. Forward documentation of final air clearance levels to the APM for inclusion in the building files.

- The contractor notifies the APM, in writing, that they have an asbestos worker protection program in place.

- Contractor personnel are trained in accordance with the provisions of 29 CFR 1910.1001, Cal/OSHA T8CCR 1529 and 29 CFR 1926.1101. Forward documentation of training to the APM for inclusion in the building files.

Upon completion of the project, the contractor shall forward documentation on the type, amount, and location of the ACM removed to the APM for inclusion in the building files.

FIGURE 7-1
WORK CONTROL/PERMIT SYSTEM



SECTION 8 INSPECTIONS, PERIODIC SURVEILANCE, AND RE-INSPECTIONS

8.1 INSPECTION

An asbestos inspection includes a survey of the building to locate and identify ACM and PACM, and an assessment of the material's condition. The inspection, conducted by an EPA-accredited inspector, includes identifying all suspect material, recording the location, quantity, characteristics, and condition of the material.

The inspection process focuses on identifying the following materials that are deemed likely to contain asbestos: (1) surface materials, (2) TSI, and (3) miscellaneous materials. Locate these materials and define homogeneous sampling areas (HAs). Sample and analyze suspect material for asbestos. At a minimum, take identification bulk samples of damaged and significantly damaged HAs. Collect bulk samples following the guidelines of AHERA, as detailed in 40 CFR 763 (see Appendices A and B). Analyze samples using polarized light microscopy (PLM) to determine the asbestos content of the suspect material prior to allowing any O&M work that could disturb the material. TEM may be required to distinguish between false negatives and true negatives from PLM. Analyze samples at a certified asbestos laboratory. If bulk samples of suspect ACM are not taken, presume that the material contains asbestos until laboratory analysis proves otherwise. Follow the appropriate O&M practices and response actions for all areas assumed to contained asbestos.

Directions for conducting and recording an asbestos inventory are outlined in Appendix B.

Appendix B provides a quick reference for ACM identified in each building. The O&M plan is based upon material assumed and confirmed to contain asbestos identified in the initial inspection and subsequent re-inspections. A copy of all inspection results is located in the APM's office.

8.2 PERIODIC SURVEILLANCE

Periodic surveillance is one of the key objectives of an O&M plan. Combined with re-inspections, work control/permits, and ongoing reports from maintenance workers of changes in condition; periodic surveillance ensures that damaged or deteriorated material are identified. Periodic surveillance can be conducted by in-house personnel annually or more frequently as necessary.

Conduct periodic surveillance in conjunction with the annual facility or building inspection. The Safety Office conducts annual surveillance during the building safety inspection. If necessary, the APM will schedule more frequent surveillance for specific buildings. Document findings from the surveillance and add the information to the building's asbestos O&M file.

Each surveillance includes comments about the following assessment factors:

- Deterioration or delamination from underlying surfaces
- Water damage
- Physical damage, including the presence of debris
- Disturbance of ACM by employees

- Accessibility
- Number of people potentially exposed

Whenever damaged material is found, notify the APM immediately. The APM determines the change in condition, implements cleanup procedures, determines and initiates required corrective action, and documents the action for inclusion in the building's asbestos O&M file.

8.3 RE-INSPECTION

In addition to annual surveillance, a re-inspection of ACM is conducted every three years by an EPA-accredited building inspector. For that year the re-inspection is conducted in lieu of periodic surveillance.

The building inspector performs the following tasks:

- Visually inspecting all the functional spaces defined in the original survey report to identify and verify all suspect friable and non-friable ACM by HA
- Reviewing the periodic surveillance documents
- Reviewing abatement records, work evaluation forms, and fiber release reports
- Determining friability through touch
- Updating the survey report and the management plan accordingly

Update the information for HAs identified during the initial inspection and includes the date of the re-inspection and any comments. If changes in condition, quantity, friability, or accessibility occur, recalculate the HA rating score. Complete additional forms for any additional HAs areas discovered during subsequent re-inspections. Place the completed forms with the asbestos inspection records.

Collect bulk samples of previously not sampled suspect material and newly-identified HAs, as necessary, following the guidelines of AHERA, as detailed in 40 CFR 763. Analyze samples using PLM to determine the asbestos content. TEM may be required to distinguish between false negatives and true negatives from PLM.

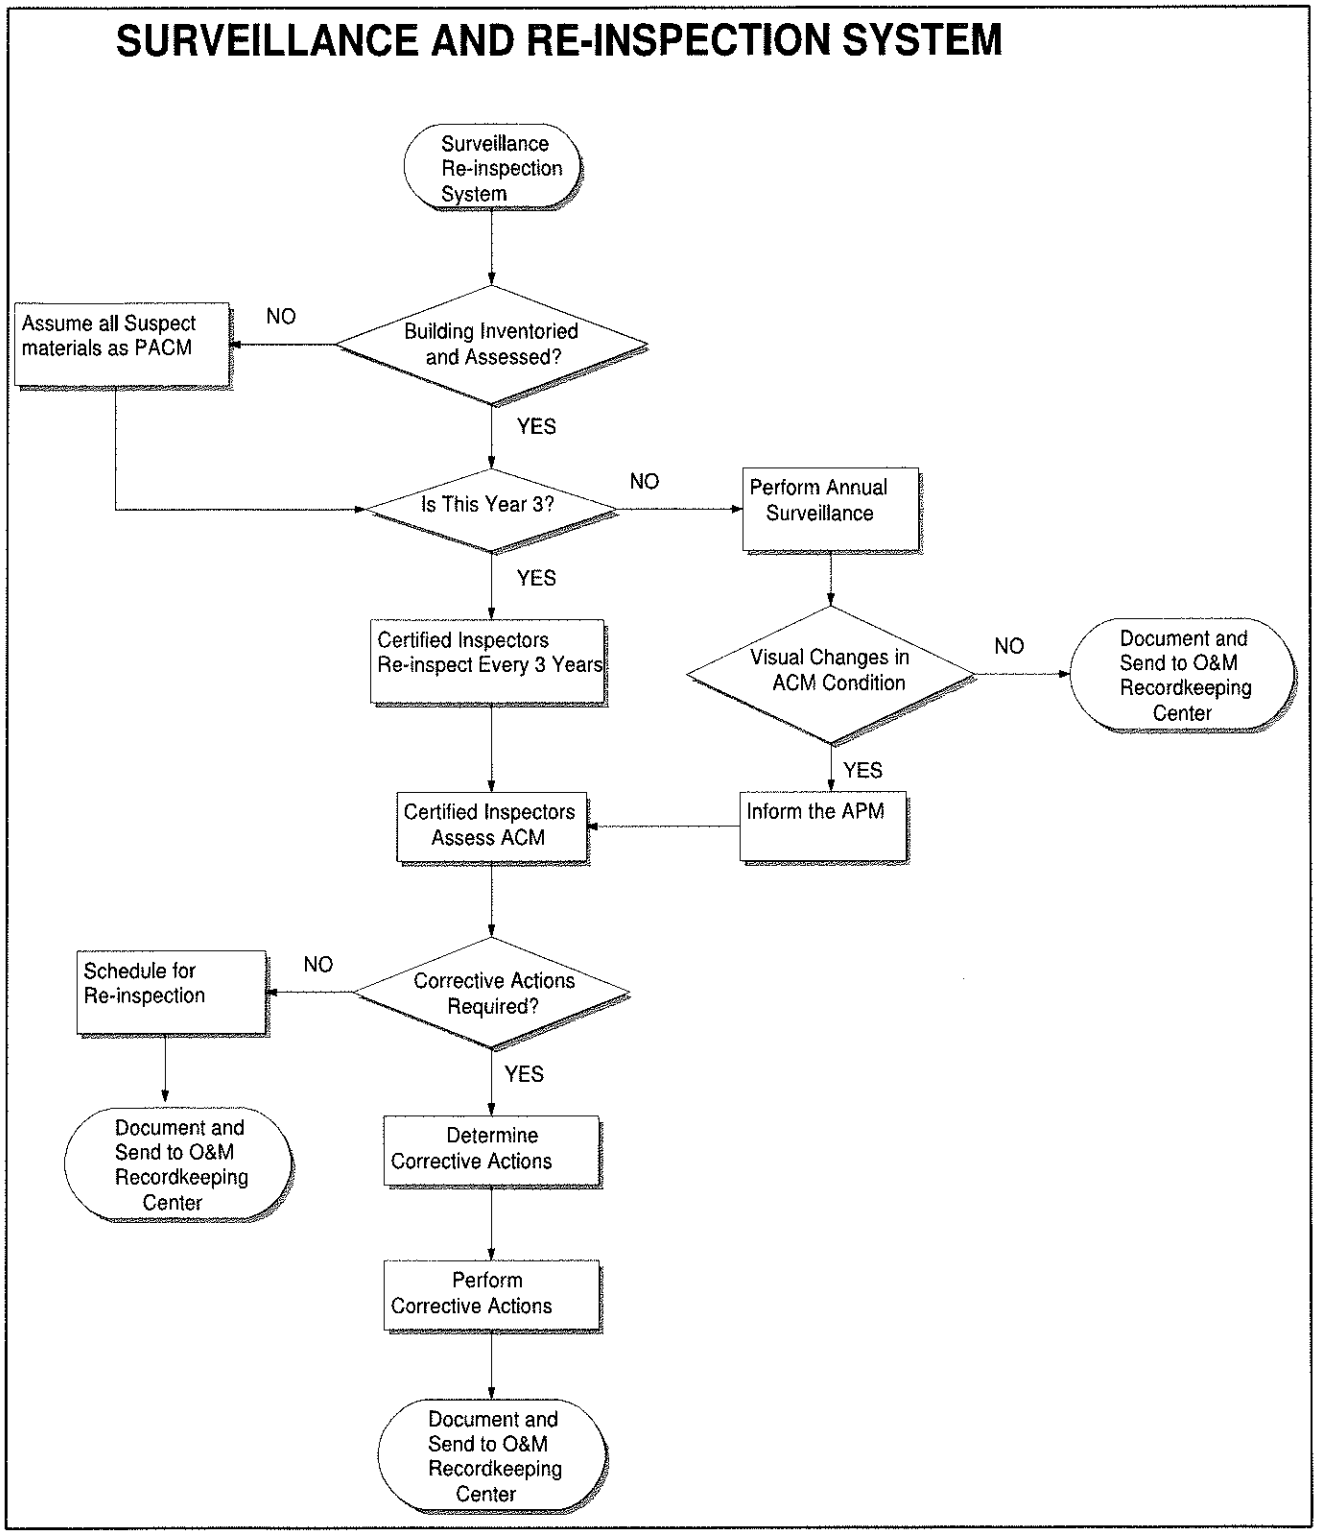
An accredited laboratory shall analyze bulk samples to confirm the presence or absence of asbestos. Only the following laboratories should be used:

- Laboratories accredited by AIHA
- Laboratories accredited by NIST

8.4 HAZARD ABATEMENT

Prepare a Hazard Abatement Application form for each building containing friable, accessible, and damaged asbestos that meets the requirements specified in Appendix C. Include general recommendations and a rough cost estimate for removal, encapsulation, enclosure, or replacement with non-ACM in the Hazard Abatement Application.

FIGURE 8-1 SURVEILLANCE AND RE-INSPECTION SYSTEM



SECTION 9 RECORDKEEPING

The purpose of an O&M recordkeeping system is to establish and maintain a standardized system that clearly documents the implementation of an asbestos control program. The steps taken to identify ACM and associated hazards, and to minimize the potential exposure to employees and building occupants are recorded for future reference. EPA, and OSHA have specific requirements concerning the various records and documentary information that must be maintained.

The recordkeeping system tracks the following types of data:

- Building information including, inspection or survey data, physical condition of the ACM, and response actions taken to manage or remove the ACM
- Employee training and medical program information
- Data on work practices and procedures
- Additional federal/state/local recordkeeping requirements

9.1 BUILDING INFORMATION

The APM retains building asbestos management documents in a permanent O&M file organized by building. The O&M building file includes the following records and information:

- **Inspection and Assessment Information.** Record the details regarding the location, quantity, characteristics, and assessment of the condition of suspect material. Record bulk sampling locations and results from laboratory analyses. Update the records with data collected during re-inspections, periodic surveillance, and maintenance work. Include information regarding ACM not identified during the initial inspection/assessment as it is located and sampled.
- **Work Control/Permit System.** As maintenance and renovation activities occur, a work control/permit system is necessary to insure that untrained workers do not inadvertently disturb ACM and that trained workers use the proper procedures when they are authorized to disturb ACM. Fully document the review and authorization of work requests. See Section 7.3 for details of the work control/permit system.
- The work control/permit system is also tied into the personnel asbestos training and medical records to insure that only trained individuals with proper medical clearance are allowed to perform activities that might potentially disturb asbestos.
- **Work Practices and Procedures.** The APM determines the proper O&M work practices to use whenever asbestos is disturbed during maintenance activities. The APM reviews and approves the work practices used for maintenance activities performed by contract personnel. The APM documents and maintains records of these work practices in the O&M building files. The APM also documents and maintains standard operating procedures for asbestos removal operations in the O&M building files.

- **Work Evaluation/Response Action Data.** Upon completion of maintenance or renovation work, a Facilities Maintenance worker documents all changes in the location or condition of ACM. The information is forwarded to the APM for inclusion in the O&M building files and database. For removal jobs the information will include certification that the work area is asbestos-free, final air sampling results, and the waste shipment record. For enclosure or encapsulation work, the information will include final air sampling results. In addition, the APM retains copies of asbestos abatement contract drawings and specifications, the work plan, final air clearance results, documentation of worker training, and documentation on the type, amount, and location of the material removed. Maintain a copy of the waste shipment record to the Environmental Department. Include, as part of the contract, the submittal of the above information to the APM.

- **Re-inspection and Surveillance.** The re-inspection and periodic surveillance process involves updating HA information, identifying new HAs, and determining abatement actions. Conduct periodic surveillance and re-inspections as part of the annual Building Safety Inspection. Conduct periodic surveillance annually and report any changes in ACM condition to the APM for re-inspection by an EPA-certified inspector. Every three years a certified inspector will conduct a re-inspection to reassess the condition of the ACM. Document changes in ACM condition, enter the information into the asbestos database, file it in the O&M building file, and determine the required cleanup and corrective actions.

- **Building Occupant Notification.** Prior to any renovation or removal project, affected building occupants are notified of the exact location of the project, the methods used to prevent fiber release, and the methods used to ensure the remaining ACM stays in good condition. The building occupants are notified by the APM, via memo. Post a copy of the memo at the project site.

9.2 EMPLOYEE RECORDS

Employee records are typically organized into the following categories:

- Medical Surveillance Program
- Respiratory Protection Program
- Training

NREA-TRC 700 LLC retains documentation of the Medical Surveillance Program. The RPPM retains the Respiratory Protection Program records, including those for training, medical surveillance, and respirator fit-testing.

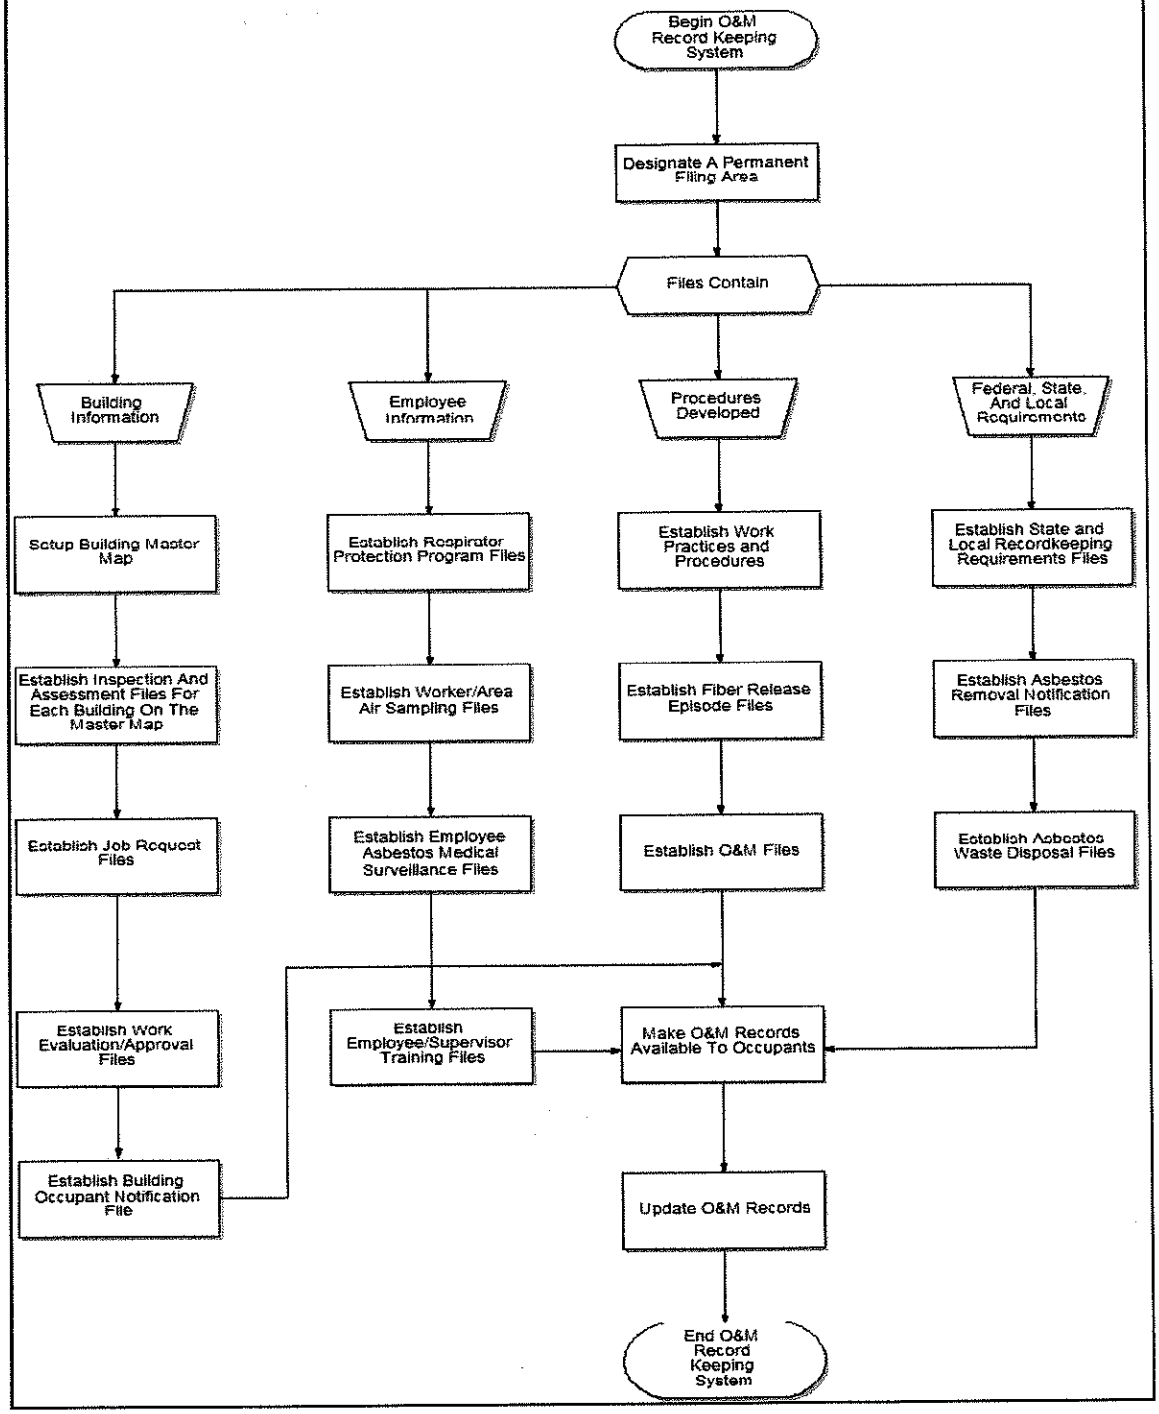
The APM retains a copy of the EPA certifications for asbestos abatement workers, building inspectors, project designers, and competent persons. The APM also maintains class attendance records for activity maintenance workers who have attended the 16-hour Asbestos O&M Awareness Course and custodial and maintenance workers who have attended the 2-hour Asbestos Awareness Course.

9.3 O&M DOCUMENTS

Many different records are required for asbestos-related work and depend on the type and extent of the asbestos-related activity being performed. Information included in the building asbestos files includes:

- Regulatory requirements
- Agency notifications
- Inspection reports, updates, and surveillance records
- Employee training records
- Employee medical and personal air monitoring records
- Notification requirements for building occupants and workers
- Sign and labeling information and regulatory agencies
- Asbestos abatement records
- Waste disposal requirements
- Work permits for activities that might disturb ACM

FIGURE 9-1
RECORDKEEPING SYSTEM



SECTION 10 ASBESTOS WASTE DISPOSAL

10.1 TYPES OF ASBESTOS WASTE

Material disposed of as ACM waste includes any designated as contaminated ACM waste such as ceiling tiles, lighting fixtures, fiberglass insulation, electrical fittings, and other construction materials that cannot be decontaminated. In some cases, items such as carpets, furniture, and drapes may also be designated as contaminated ACM waste. Other materials for disposal as ACM waste include PPE, all filters (including those used in respirators), HEPA-filtered exhaust units, HEPA vacuum cleaners, and water filtration units.

In some situations, certain construction materials may be cleaned and disposed of as non-asbestos contaminated waste, or the materials may be reused. In all cases, efforts are to be made to minimize the amount of asbestos waste generated.

10.2 REQUIREMENTS FOR BAGS, BARRELS, OR DRUMS

All ACM wastes must be wetted and sealed in 6-mil polyethylene plastic bags (double-bagged), or in barrels or drums that are double-lined with 6-mil polyethylene. Barrels or drums are used to contain pipe hangers or other sharp objects that could puncture or tear waste disposal bags. All bags, barrels, and drums must be permanently sealed before they are removed from the worksite and must be labeled in accordance with OSHA, EPA and Department of Transportation (DOT) requirements.

ACM containment area construction materials also must be bagged for disposal as the area is disassembled following final air clearance testing.

There are three required labels for each bag, drum or container of ACM waste.

Label #1: Required by Cal/OSHA T8 CCR 1529, OSHA 29 CFR 1926.1101, 1915.1001, and 29 CFR 1910.1001.

DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
CANCER AND LUNG DISEASE HAZARD

Label #2: Required by DOT, pursuant to changes that were published in the Federal Register (No. 225, November 25, 1986, page 42175) and that became effective on July 1, 1987.

Hazardous Waste, Solid, N.O.S.,
ORM-E, NA 9188 (Asbestos) RQ

The DOT does not require placards on vehicles transporting ACM waste.

Label # 3: As required by EPA 40 CFR 61.150 (a) (i) (v), label containers or wrapped materials that contain asbestos waste material, and that will be transported off the facility, with the name of the waste generator, and the location at which the waste was generated. For example:

ASBESTOS WASTE

State and Federal Laws prohibit improper disposal. If found, contact [Names and phone numbers of applicable agencies]

Waste Generator's Name:

_____

Waste Generator's ID# (if applicable)[1]

_____

Waste Generation Location:
(Address, City, State, Zip Code)

_____

10.3 TRANSPORTATION REQUIREMENTS

EPA and DOT regulate the transport and disposal of asbestos-containing waste. Hand trucks, pushcarts, or other devices that are used to transport waste to a trash receptacle must be plastic-lined and kept free of ACM debris. The transport cart must be thoroughly cleaned before being used for another purpose.

The APM is responsible for ensuring the proper disposal of asbestos contaminated waste. A registered waste hauler must be used to transport ACM waste from the site. A manifest shall be prepared and certified by the hauler and disposal site operator. A copy of the manifest is forwarded to the APM for inclusion in the O&M files. The waste shall be hauled directly from the site to the pre-approved landfill. No intermediate storage or transfer is permitted.

In no case may loose asbestos waste be transported. Asbestos waste must be handled in such a way as to comply with NESHAP regulations. Absolutely no emission to the atmosphere is allowed.

10.4 LANDFILL AND DISPOSAL REQUIREMENTS

Asbestos-containing waste must be deposited at a waste disposal site that is operated in accordance with NESHAP, 40 CFR 61.154. Cal/EPA can provide current information regarding landfills that are allowed to accept ACM. A Waste Shipment Record (WSR) must accompany all asbestos-containing waste to the landfill. If a copy of this WSR, signed by the operator of the designated disposal site, is not received within 35 days of leaving the facility, contact the waste transporter or designated disposal site to determine the status of the waste shipment. If a copy of the WSR is not returned within 45 days, report in writing to Cal/EPA of the NESHAP regulation. Consult the regulation to determine what information must be reported.

APPENDIX A

REGULATIONS SUMMARY

FEDERAL REGULATIONS

40 CFR Part 61 Subpart M - National Emissions Standard for Hazardous Air Pollutants (NESHAP)

NESHAP governs asbestos demolition, construction, and removal activities in all facilities. The rule prohibits visible emissions of asbestos during demolition, renovation, and removal activities and requires appropriate work practices and procedures for the control of emissions if friable ACM is disturbed. This also includes any ACM that may become friable.

The regulation identifies friable ACM as material that can be pulverized or crumbled by hand pressure and that contains more than one percent asbestos as determined by polarized light microscopy (PLM). Category I non-friable ACM includes such materials as gaskets, resilient floor coverings, and asphalt roofing products. Category 2 non-friable ACM includes materials that cannot be crumbled by hand pressure such as transite, cement, plaster, stucco, paint, and mastic.

40 CFR Part 763 - Asbestos Hazard Emergency Response Act (AHERA)

The final rule and notice for asbestos-containing materials in schools was published in the Federal Register on 30 October 1987. Although many provisions of AHERA apply only to schools, the training requirements have been applied to all federal and commercial facilities.

In general, AHERA provides the technical definitions now used for all asbestos-related activities, including inventory, assessment, operations and maintenance (O&M), and abatement actions. AHERA requirements for personnel training, monitoring, inspection, routine cleaning, and maintenance and repair actions are also outlined in the body of this plan.

AHERA has the following requirements:

- Identify friable and non-friable asbestos.
- Monitor and periodically reinspect ACM.
- Develop and update management plans.
- Determine and implement response actions, and an O&M plan.
- Notify building occupants and outside contractors of ACM identified in the building.
- Perform all required actions by accredited persons.

Under AHERA, suspect materials may be assumed to contain ACM. To determine whether suspect materials contain ACM, bulk sampling must be conducted according to AHERA sampling protocol. Samples are required to be analyzed by an accredited laboratory. All friable and non-friable ACM must be located and categorized as to condition.

Options for management and control of ACM under AHERA include encapsulation, enclosure, operations and maintenance, and removal. An O&M plan must be implemented where friable ACM is present or assumed to be present. Cal/OSHA T8 CCR 1529, OSHA Construction Standard (29 CFR 1926.1101), and Environmental Protection Agency (EPA) Worker Protection Rule (40 CFR 763.121) cover workers performing O&M and repair activities. The O&M plan must include surveillance of ACM at least once a year and directions for responding to fiber release episodes. Record-keeping requirements under AHERA include a detailed written description of the location and amount of asbestos; O&M management plan of any preventative or response action taken involving ACM; and records for air monitoring, training, surveillance, cleaning, fiber release episodes, and re-inspections.

Other requirements under AHERA include training and posting of warning labels.

Cal/OSHA T8 CCR 1529 and 29 CFR 1926.1101 - OSHA Construction Standard

Specifically covers employees who are likely to engage in demolition or construction activities that expose them to asbestos. Activities may include removal, encapsulation, alteration, repair, maintenance, insulation, spill emergency clean-up, transportation, and disposal and storage of ACM. According to this regulation, building occupants are also considered employees.

Asbestos exposure limits include the following:

- The permissible exposure limit (PEL) is 0.1 f/cc, 8-hour time weighted average, (8-hr/TWA). TWA refers to exposure over an 8-hour day.
- The excursion limit is 1.0 f/cc measured over a 30-minute period.

If employees are exposed to asbestos at or above the PEL level, the following steps must be initiated by the employer:

- Provide medical surveillance if the PEL level exceeds 30 or more days a year or if a negative pressure respirator is used.
- Record employees' exposure to asbestos through daily personal air monitoring.
- Notify employees of air monitoring results as soon as possible.
- Inform employees and reduce fiber levels if the PEL or excursion limits are exceeded.

If employees are exposed to asbestos that cannot be reduced to below the PEL, then the following steps must be taken by the employer:

- A regulated area must be established when the PEL or excursion limit is exceeded.
- Access to the regulated area must be limited.
- A negative pressure enclosure must be established around the regulated area.

- All persons must be provided with proper respirators.
- A "competent person" must be present on-site.

A "competent person" is equivalent to an EPA/AHERA-accredited abatement supervisor/contractor. "Competent person" responsibilities include identifying asbestos hazards, taking corrective actions as appropriate, ensuring the integrity of the negative pressure enclosure, controlling entry to and exit from the asbestos regulated area, ensuring that all employees have proper personal protective equipment (PPE), and that engineering controls are performed correctly.

Several engineering and housekeeping controls that can be utilized to reduce exposure include the use of high-efficiency particulate air filter (HEPA) ventilation and vacuums, wet cleaning methods, proper work practices, and PPE.

Hazard communication measures require the use of warning signs posted outside regulated areas. The signs read as follows:

DANGER, ASBESTOS
CANCER AND LUNG DISEASE HAZARD
AUTHORIZED PERSONNEL ONLY
RESPIRATORS AND PROTECTIVE CLOTHING
ARE REQUIRED IN THIS AREA

Hazard labels are to be attached to products or waste containers containing asbestos and must read as follows:

DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
CANCER AND LUNG DISEASE HAZARD

Other requirements under OSHA include training, medical surveillance monitoring, record keeping, and respiratory protection.

29 CFR 1910.1001 - Asbestos, Tremolite, Anthophylite, and Actinolite

This standard defines controlled areas and the PEL level requirements for airborne asbestos; outlines monitoring, air sampling and analysis; and discusses items such as the respiratory protection program warning signs and medical surveillance. This standard generally applies to industry and includes many of the same requirements as OSHA 29 CFR 1926.1101.

FEDERAL GUIDANCE

EPA 560/5-85-024 - Guidance for Controlling Asbestos-Containing Materials in Buildings

This document, also commonly referred to as the "Purple Book," offers guidance on the technical asbestos issues, the identification of asbestos in buildings, planning a control program, and choosing the proper corrective action, if necessary. Chapter 3 provides guidance on establishing an O&M Program and outlines the purpose, participants, and elements of the plan. Much of the information in this section of the "Purple Book" also appears in this O&M Program.

EPA 560-OPTS-86-001 - A Guide to Respiratory Protection for the Asbestos Abatement Industry

The elements for an asbestos operations respiratory protection program are outlined in this document. Guidance is provided for developing a standard operating procedure for respirator use, such as respirator selection, required training, fit testing, and maintenance. Much of the detailed information concerning respiratory protective equipment program requirements is incorporated into the O&M Plan.

APPENDIX B

ASBESTOS REASSESSMENT RESULTS
TABLE B-1
TABLE B-2

I. GENERAL CONCEPT

Whenever possible, take bulk samples of all suspect ACM for laboratory analysis. Suspect materials are presumed to contain asbestos if not sampled. As a minimum take bulk samples of damaged, and significantly damaged materials for immediate abatement action. Place all presumed asbestos containing materials (PACM) on the activities O&M plan.

II. ASBESTOS FACILITY INVENTORY INSTRUCTIONS

A. Facility Inspections

Have an EPA accredited inspector inspect each occupied or accessible facility space in an activity. A qualified inspector is one who has completed an EPA approved 3-day training course and obtained a minimum score of 70 percent on examination. The inspector must attend an annual half day refresher course to remain accredited.

The inspection process focuses on identifying (1) surfacing material, (2) thermal system insulation, and (3) miscellaneous materials. All of which are likely to contain asbestos. Locate these materials and define homogeneous sampling areas. Sample and analyze suspect materials for asbestos. If not sampled the suspect materials must be presumed to contain asbestos. Follow appropriate O&M practices and response actions for all areas presumed to contain asbestos. Sample all damaged or significantly damaged suspect materials.

EPA's "Asbestos in Buildings: Simplified Sampling Scheme for Friable Surfacing Materials," EPA Publication 560/5-85-030a, October 1985, also known as the "pink book", outlines specific inspection and assessment guidance. Each inventory/assessment shall include, but is not limited to:

1. Identifying all locations of suspected ACM through visual inspection;
2. Determining friability of all ACM through touch (using EPA guidance);
3. Identifying all suspected friable and non-friable homogeneous areas;
4. Identifying homogeneous areas assumed to contain asbestos (sampling is not required if the area is assumed to contain asbestos, but the area must be placed on the activity's O&M plan and treated as ACM);
5. Collecting and submitting samples for all areas of suspected material that are not assumed to be ACM;
6. Assessing the condition of material;
7. Recording the exact location of each sample number and the homogeneous area types on marked-up drawings, or other suitable permanent records as outlined by EPA guidance. Mark the area sampled with the sample number. Retain a complete set of records, including:
    a. An inspection report that includes the inspection dates and signature of each accredited inspector;
    b. Contractor's name, address, and phone number, and contractor's or inspector's State Accreditation number;
    c. Inventory record of locations of all homogeneous areas (friable & non-friable) where samples have been collected including: exact sample location (building, room number, etc.) and dates of sample collection
    d. A list of homogeneous areas where suspected friable material is assumed to contain asbestos (areas not sampled);
    e. A list of homogeneous areas where suspected non-friable material is assumed to contain asbestos (areas not sampled);
    f. A description of the manner/protocol used to determined sample locations;
    g. A list of homogeneous areas by ACM types, i.e. surfacing materials, thermal system insulation, or miscellaneous materials;
    h. Assessments made of friable and non-friable material conditions according to EPA definitions.

B. Sampling Strategy

It is important to group suspect materials into "homogeneous" sampling areas. A homogeneous area contains suspect materials that are uniform in texture and color and appears identical in every other respect. Materials installed at different times belong to different homogeneous areas. If there is any reason to suspect that materials might be different even though they appear uniform, assign them to separate homogeneous sampling areas. For example, material in different wings of a building, or on different floors should be assigned to separate homogeneous areas.

Collect the minimum number of samples listed below in a statistically random manner.

ACM TYPE	SIZE OF HOMOGENEOUS AREA	MINIMUM NO. OF SAMPLES
Surfacing Materials	less than or equal to 1000 square feet (sf)	3
	greater than 1000 sf and less than 5000 sf	5
	greater than 5000 sf	7
Thermal System Insulation	areas not assumed to be ACM	3
	patched areas (<6 linear feet (lf) or 6 sf)	1
Miscellaneous Material	sufficient samples from areas that are not assumed to contain ACM	1
Non-Friable Materials	sufficient samples from areas that are not assumed to contain ACM	1

NOTE: Areas that obviously contain fiberglass, foam glass, rubber, etc. do not require bulk samples. If an area is presumed to contain asbestos, then sampling is not necessary. However, follow all appropriate asbestos O&M practices and response actions whenever disturbance occurs.

C. Laboratory Analysis

The only way to determine if a homogeneous area contains asbestos is through laboratory analysis of bulk samples. Before disturbing any materials, analyze samples of the suspect materials by a laboratory to confirm the presence or absence of asbestos. Use a laboratory accredited by either the National Institute of Standards and Technology (NIST) or the American Industrial Hygiene Association (AIHA).

The EPA defines a homogeneous area as non-ACM if all samples tested contain less than 1% asbestos. Also, the National Emission Standards for Hazardous Air Pollutants (NESHAP) acknowledges 1% to be consistent with the preferred analytical methodology.

The laboratory analysis report should include the following:

1. Identification number of the sample.
2. Analytical technique used.
3. Laboratory quality control procedures.
4. Physical description of the sample as received.
5. Type(s) and estimated percentage of asbestos fiber.
6. Type(s) and percentage of other components.
7. Date of analysis.
8. Analyst name and signature.

NOTE: Notify safety and medical personnel of sample results for possible future workplace monitoring. Also, provide results to the activity Asbestos Program Manager to update files and building records.

ASBESTOS INVENTORY SUMMARY FORM AND ASBESTOS HOMOGENEOUS AREA SUMMARY FORM

The Asbestos Inventory Summary Form summarizes asbestos content and location of all homogeneous areas within a building. The form also provides building information, Asbestos Program Manager point of contact, and name of person who performed the inventory. Complete an Asbestos Inventory Summary Form for each inventoried building.

The Asbestos Homogeneous Area Summary Form describes and records data for each homogeneous area in a building. Complete an Asbestos Homogeneous Area Summary Form for each homogeneous area confirmed or suspected of containing asbestos material.

Nevertheless, if used properly as a qualitative hazard assessment guide, the Asbestos Facility Rating/Ranking System is a useful tool in scoring and ranking a buildings homogeneous areas for prioritizing abatement actions.

The Asbestos Facility Rating/Ranking Algorithm uses seven major parameters to standardize homogeneous area ratings:

1. Material Condition,
2. Percent (%) Asbestos,
3. Quantity,
4. Degree of Friability,
5. Exposure Potential,
6. Number of Personnel Potentially Exposed, and
7. Building Significance.

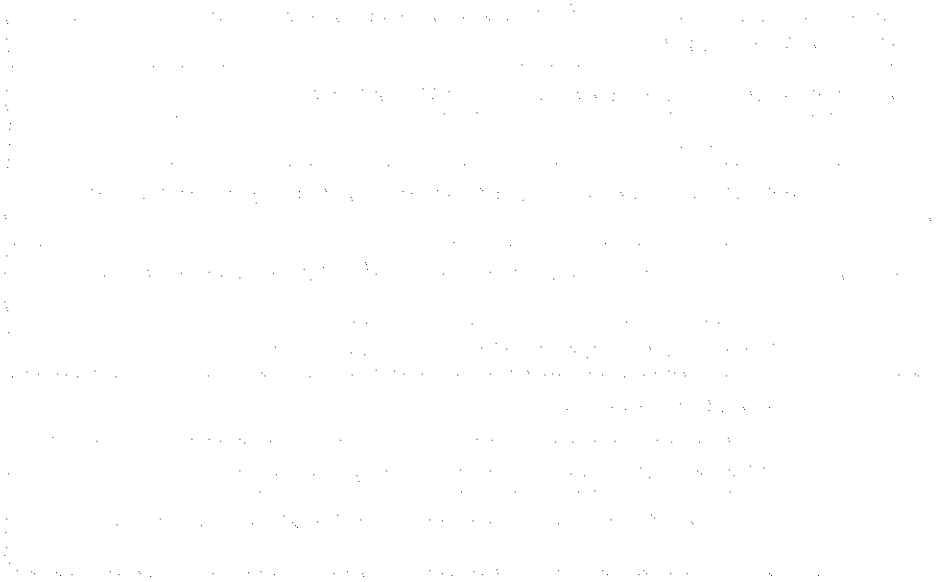
The Facility Asbestos Score is a combination of the material's condition (Significant Damage, Damage, or Potential Damage) and a numerical score. The material's condition is determined though a preliminary assessment following EPA guidance. The numerical score is the product of the multipliers chosen for each of the seven major parameters. The multipliers are obtained from the shaded boxes on the right side of the form.

The forms provide the activity permanent documentation of the inventory, and information on each homogeneous area. To request funding to abate damaged or significantly damaged material, transfer appropriate information to the Hazard Abatement Application Form.

Copies of the forms, and step by step instructions on how to complete the Asbestos Inventory Summary Form and the Asbestos Homogeneous Area Summary Form are as follows.

ASBESTOS INVENTORY SUMMARY FORM INSTRUCTIONS	
ITEM	**DESCRIPTION**
Building Number	Enter the building number found on the Property Record Card. If there is no assigned building number, note the number of an adjacent building and describe building location in the comment section.
NOTE: The following section is a summary of the information obtained from each of the Asbestos Homogeneous Area Summary Forms completed for the building.	
Number	Enter assigned homogeneous area number.
Asbestos (Y/N/A)	Enter the letter Y (Yes), N (No), or A (Assumed) to indicate if the homogeneous area contains asbestos. Choose "A" if an area has not been tested and is assumed to contain asbestos.
Location (Room No.)	Enter the appropriate room number for each homogeneous area.
Year Built	Enter the year the building was constructed from available building records
Building Type	Enter the type of building. Use the comments section on the reverse side of the form to explain unusual circumstance.
Building Significance	Using the following guidelines, enter the appropriate building significance: **CRITICAL:** The mission of the command would be jeopardized without the use of this particular building. An example would be the activity's security building where the central alarm panels for the entire base are located and where operations cannot be shut down even momentarily. Any building with 24 hour industrial operations with specialized equipment that cannot be easily relocated or a communication station that cannot be shutdown are other examples. **ESSENTIAL:** Regardless of the importance of the function of the building, the function can be moved to another location at the activity. **NON-ESSENTIAL:** Facilities without operational requirements that are in a maintenance or care-taker status would fall into this category.

ASBESTOS INVENTORY SUMMARY FORM INSTRUCTIONS	
ITEM	**DESCRIPTION**
Asbestos Program Manager	Provide the name and code of the Asbestos Program Manager overseeing the activity inventory. In most cases, the Asbestos Program Manager is located in either the Safety Office or the Environmental Department.
Phone	Enter the commercial number for the activity Asbestos Program Manager. If the commercial number is used, include the area code.
Inspector Name	Enter the name of the inspector who conducted the asbestos inventory.
Phone	Enter the inspector's phone number.
Signature	The signature of the inspector who conducted the asbestos inventory is required in the space provided.
EPA Accreditation Number	Enter the EPA Accreditation Number of inspector/contractor who conducted the asbestos inventory.
Survey Date	Enter the date(s) of the building survey. Use the Month/Day/Year format.
COMMENT SECTION	
Contractor	Enter name, address, and phone number of contractor conducting the inventory.
Comments	Use this area for additional comments or observations which will clarify existing conditions or actions



ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS	
ITEM	**DESCRIPTION**
Homogeneous Area Number	Assign a number to the homogeneous area and enter in the space provided.
SECTION I. HOMOGENEOUS AREA SUMMARY	
NOTE: Complete Section I after completing Sections II and III.	
Asbestos (Y/N/A)	Enter the letter Y (Yes), N (No), or A (Assumed) to indicate if the homogeneous area contains asbestos. Choose "A" if an area has not been tested and is assumed to contain asbestos.
Friable (Y/N)	Enter the letter Y (Yes) or N (No) to indicate if the asbestos in this homogeneous area is friable.
Building Number	Enter the building number found and/or location. If there is no assigned building number, note the number of an adjacent building and describe building location in the comment section.
Rating Score	Enter the rating score for each homogeneous area as determined by the algorithm.
Quantity (SF/LF)	Enter the square footage area (or linear footage with an outside diameter) of the homogeneous area.
Public Access (Y/N)	Enter the letter Y (Yes) or N (No) if the building is accessed by the general public (i.e. security office, theaters, museum, etc.).
Room Number	Enter the appropriate room number for each homogeneous area.
O&M Action(s)	Determine best possible action to reduce hazard based upon guidance given in Section II, number 6. Enter the action taken in the space provided.
SECTION II. HOMOGENEOUS AREA DATA	
1. Condition	Circle the material condition and enter corresponding base score into shaded box to the right. Determine the materials condition using the categories listed below: **SIGNIFICANT DAMAGE (SD):** ACM significantly damaged, deteriorated or delaminated, or where the damage is extensive and severe (see definitions for each functional type of ACM such as thermal system insulation (TSI), surfacing materials, or miscellaneous ACM for significant damage examples). **NOTE:** As general guidance, SD versus D may be determined by the extent and the severity of damage. Areas with greater than 10% evenly distributed damage or greater than 25% localized damage are to be considered SD. The condition abbreviations SD, D, and PD must precede the Rating Score i.e. SD87, D36, etc. **DAMAGE (D):** ACM or covering is damaged, deteriorated, or delaminated (see definitions for each functional type of ACM such as thermal system insulation (TSI), surfacing materials, or miscellaneous ACM for damage examples). **POTENTIAL DAMAGE (PD):** ACM in an area regularly used by occupants (includes maintenance areas) in the course of normal activities and where the material may become damaged from changes in building use, operations and maintenance practices, change in occupancy or recurrent damage

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS	
ITEM	**DESCRIPTION**
1. Condition (cont.)	**NOTE:** A specific description of the ACM's condition should be included in the comments section (on the reverse side of the form) when appropriate. Descriptions should include: (1) Type of damage: flaking, blistering, water damage, etc. (2) Severity of damage: major flaking, severely torn jacket, minor tears, etc. (3) Extend or spread of damage or the percentages of homogeneous area.
2. Quantity (SF/LF/D)	Measure the quantity of ACM in square feet (SF) for surfaces or linear feet (LF) for piping (include pipe diameter). Record the amount, the unit (SF or LF) and the pipe diameter in the space provided.
Quantity Range	Circle the appropriate quantity range, i.e. <1000 square feet or >5000 linear feet, and enter the corresponding multiplier into the shaded box to the right.
3. Friability	Circle the appropriate friability category and enter the corresponding multiplier into the shaded box to the right. A simple subjective test (while wearing proper personal protection equipment) will determine the degree of friability as outlined below: High - crumbles with the slightest touch Moderate - crumbles with very little hand pressure Low - crumbles with considerable hand pressure Non-friable - cannot be crumbled with hand pressure
4. Exposure Potential	Circle the exposure potential and enter the corresponding multiplier into the shaded box to the right. The exposure potential is determined based on the following definitions: **ACCESSIBLE AND OCCUPIED:** An area containing ACM that is occupied on a work shift or residential basis. This includes all areas where ACM is part of the immediate surroundings. For example, an overhead ACM insulated steamline even though the ACM was encapsulated in a lagging material. Another example is friable asbestos ceiling tile in an administration building that is normally occupied. **INACCESSIBLE AND LIKELY TO EXPOSE:** An area containing ACM that is entered infrequently with considerable effort to gain entry, but is likely to expose personnel. An example includes ACM insulated heating, ventilation and air conditioning (HVAC) duct that is located in a crawl space above the ceiling, but is known to leak and may cause asbestos fibers to be pulled into the duct and distributed throughout an accessible or occupied area. Another example includes a crawl space, used as a supply air plenum, which contains highly friable spray-applied ACM fireproofing. **ACCESSIBLE AND NON-OCCUPIED:** An area containing ACM that is entered for regular or preventative maintenance service, or entered on a regular basis. An example maybe a warehouse used for storage that is accessed daily, but not manned for an entire shift. Another example includes: a boiler room with friable asbestos boiler insulation where personnel normally do not occupy the facility, however, occasionally have access to the area to perform preventative maintenance activities. Another includes a parts storage warehouse with ACM ceiling tile that is accessed by personnel on a daily basis.

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS	
ITEM	**DESCRIPTION**
4. Exposure Potential (cont.)	**INACCESSIBLE AND NOT LIKELY TO EXPOSE:** An area containing ACM that is entered infrequently with considerable effort and is also unlikely to expose personnel. An example is ACM thermal system insulation encased inside a concrete slab.
5. Number of Persons Exposed	Enter the estimated number of persons likely to be exposed to this homogeneous area over an 8 hour period. Note 24 hour or other unusual schedules in the comments section on the reverse of the form.
Range of Personnel Exposed	Circle the range of the personnel likely to be exposed, based on the actual number of persons exposed, and enter the corresponding multiplier into the shaded box to the right.
6. Recommended Action(s)	Recommend a response action according to the criteria established in the EPA regulations and enter it in the space provided. The action should be sufficient to protect human health and the environment. Guidance in selecting the appropriate response action is as follows: I. Thermal System Insulation ACM -- Damaged or Significantly Damaged: * Repair the damaged area (as a minimum) * Remove material if repair is infeasible * Maintain all TSI and covering in intact and undamaged condition (O&M Program) II. Friable, Surfacing & Miscellaneous ACM -- Damaged: * Repair the damaged area * Remove * Encapsulate * Enclosure * O&M Program III. Friable, Surfacing & Miscellaneous ACM – Significant Damage: Immediately isolate functional space Restrict Access, if necessary Remove Encapsulate * Enclosure IV. Friable, Thermal System Insulation, Surfacing Material, or Miscellaneous Material -- Potential for Damage: O&M Program * Preventative Measures V. Friable, Thermal System Insulation, Surfacing Material, and Miscellaneous Material -- Potential Significant Damage * Isolate area, if necessary * Restrict Access, if necessary * Initiate O&M Program * Initiate Preventative Measures * Remove the material as soon as possible **NOTE:** Non-friable materials are subject to periodic surveillance and preventative measures as necessary.

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS	
ITEM	**DESCRIPTION**
7. Homogeneous Area Location	Describe the location of the homogeneous area and enter it into the space provided. Use the comments section on reverse of form to explain unusual circumstances.
8. Asbestos Form	Enter the particular type or form of asbestos material identified in the space provided. The materials form and friability help to define exposure potentials and assist in the determination of abatement cost estimates. Explain other forms of ACM in the comments section on reverse side of the form.
9. Building Significance	Circle the appropriate building significance and enter the corresponding multiplier into the shaded box to the right. .
SECTION III. LABORATORY RESULTS	
10. Sample Number	Enter the unique bulk sample number.
Total % Asbestos	Enter the total percentage of all asbestos identified from bulk sampling in the space provided.
Type(s)	Enter the type(s) of asbestos. There are six broad classifications including: chrysotile, amosite, tremolite, anthophyllite, crocidolite, and actinolite.
11. Percentage Asbestos	From the samples analyzed enter the largest total percent asbestos in the space provided.
Range	Circle the appropriate range based on the Percentage of Asbestos and enter the corresponding multiplier into the shaded box to the right.
12. Laboratory	Enter name and address of analytical laboratory.
SECTION IV. COMMENTS	
13. Comments	Use this area for additional comments or observations which will clarify existing conditions or actions.
SECTION V. AREA RE-INSPECTION	
14. Area Re-inspection	If the homogeneous area remains in the building and contains or is assumed to contain asbestos, it must be placed on the activities O&M plan. This plan includes periodic re-inspection of all areas identified as ACM. The re-inspection is done to ensure there is no deterioration of the material and that it does not become a hazard to the building occupants.

USER AND PRE-SURVEY QUESTIONNAIRES

AAI USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the *"Brownfield's Amendments"*), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that *"all appropriate inquiries"* is not complete.

AAI USER QUESTIONS

1. Did a search of recorded land title records (or judicial records where Appropriate, See Note 1 below) identify any environmental liens filed *or recorded against the property under federal, tribal, state or local law?* Yes ☐ No ☒ NA ☐

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases, judicial records must be searched for environmental liens and AULs.

2. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Yes ☐ No ☒ NA ☐

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge *of the chemicals and processes used by this type of business?* Yes ☐ No ☐ NA ☒

4. Does the purchase price paid for this property reasonably reflect the fair market value of the property? Yes ☒ No ☐ NA ☐

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes ☐ No ☐ NA ☒

5. Are you aware of commonly known or reasonably ascertainable information about the properly that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

(a.) Do you know the past uses of the property? Yes ☐ No ☒ NA ☐
(b.) Do you know of specific chemicals that are present or once were present at the property? Yes ☐ No ☒ NA ☐

(c.) Do you know of spills or other chemical releases that have taken place at the property? Yes ☐ No ☒ NA ☐

(d.) Do you know of any environmental cleanups that have taken place at the property? Yes ☐ No ☒ NA ☐

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property? Yes ☐ No ☒ NA ☐

7. Do any of the following documents exist and, if so, can and will a copy be provided to CBRE provided that it falls within reasonable time and cost constraints: (If yes to any, please indicate which below) Yes ☒ No ☐ NA ☐

- Environment site assessment reports ☒
- Environment compliance audit reports ☐
- Environment permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits) ☐
- Registrations for underground and above-ground storage tanks ☐
- *Registrations for underground injection systems* ☐
- Material safety data sheets ☐
- Community right-to-know plan ☐
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure and control plans; etc. ☐
- Reports regarding hydrogeologic conditions on the property or surrounding area ☐
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property ☐
- Hazardous waste generator notices or reports ☐
- Geotechnical studies ☐
- Risk assessments ☐
- Recorded Activity and Use Limitations (AUL) ☐

Phase I Environmental Site Assessment
Pre-Survey Questionnaire

Someone familiar with the site should complete this questionnaire prior to our site visit. For those questions that are not applicable or unknown, please respond "N/A" or "U/K", respectively. If you have any questions about how to answer any of the questions, please call CBRE. If additional pages for responses are necessary, please attach hereto and reference it to the appropriate question number. Upon completing this form, please email back to the sender. This document and your written response will be included as an exhibit in the final report.

Subject Name:

Project Manager:

Street:

Project No.:

City/State:

Date:

Key Site Contact:
Telephone:
Fax:

A. GENERAL

PREPARER

1. Name, title and telephone number of person completing this questionnaire:

_____
Name

_____
Title

_____
Signature

_____
Telephone Number

2. How long has the preparer been familiar with the site or facility?
If less than five years, who held the position prior?

3. Property Owner/Occupant Information

_____
Owner's Name

_____
Owner's Address

_____
Occupant's Name

_____
Occupant's Address

VALUATION REDUCTION

Was/is the purchase price of the Subject property significantly less than the purchase price of comparable properties due to environmental conditions? Yes ☐ No ☐ U/K ☐

If yes, please explain below.

B. Property Description

1. Land

a. Size of Parcel? _____ Acres

b. Shape of Parcel? ☐ Rectangular ☐ Irregular ☐ Other

c. Are there any surface waters or wetlands on the site? Yes ☐ No ☐ U/K ☐

d. Is there a well on the site? Yes ☐ No ☐ U/K ☐

If yes, what type of well is it?:

Drinking Water	☐
Irrigation	☐
Monitoring	☐
Dry Well	☐

Have contaminants in excess of governmental guidelines been identified in the water? Yes ☐ No ☐

e. Was or is there a septic system on the property? Yes ☐ No ☐ U/K ☐

If yes, is the septic system currently in use? Yes ☐ No ☐

f. Has fill been imported onto the Subject? Yes ☐ No ☐ U/K ☐

g. Are there currently or has there previously been waste treatment or disposal pits, ponds, or lagoons on the site? Yes ☐ No ☐ U/K ☐

h. Where is the site's stormwater discharged to? _____

B. PROPERTY DESCRIPTION – continued

2. **Site Improvements** This includes all buildings ☐ N/A

a. Describe the size (square foot) of the existing building(s).

b. How old is the building(s)?

c. Describe the heating and cooling system.

d. Who provides the following utilities?

Water: _____

Sanitary Sewer: _____

Storm Drainage: _____

Natural Gas: _____

Electric: _____

e. Are there any floor drains on the site? Yes ☐ No ☐ U/K ☐

If yes, where do they discharge to?

3. **Site History**

a. Were there any buildings or other improvements on the property prior to the existing improvements? Yes ☐ No ☐ U/K ☐

If yes, what were they?

b. Is or has the property been used for industrial or agricultural purposes, or as a gasoline station, auto repair, dry cleaner, junkyard, or landfill? Yes ☐ No ☐ U/K ☐

If yes, please describe.

B. PROPERTY DESCRIPTION – continued

4. Site Operations

To the best of your knowledge, do any of the following operations take place on the Subject or have ever taken place on the Subject:

☐	Dry Cleaning:	Yes ☐	No ☐
☐	Battery Storage/Sales:	Yes ☐	No ☐
☐	Paint Storage/Sales:	Yes ☐	No ☐
☐	Petroleum Storage/Sales:	Yes ☐	No ☐
☐	Photo or X-Ray Finishing:	Yes ☐	No ☐
☐	Electronic Equipment Assembly or Manufacturing:	Yes ☐	No ☐
☐	Solvent Storage or Sales:	Yes ☐	No ☐
☐	Chemical Manufacturing/Sales:	Yes ☐	No ☐
☐	Automobile Storage, Repair, or Disposal:	Yes ☐	No ☐
☐	Agriculture:	Yes ☐	No ☐
☐	Medical or Dental Offices:	Yes ☐	No ☐

5. Previous Studies/Documentation

a. Do you have any knowledge of previously prepared Environmental Site Assessment Reports, asbestos surveys, lead-based paint studies or testing (soil, groundwater, tank tightness testing, lead-based paint testing, asbestos testing, indoor air quality, mold (bacteria and fungi testing), etc.) conducted on the site? If yes, please either provide copies of the reports or list the title, date, preparer and recipient of such report(s) below:

☐ I have no knowledge of any environmental related studies or reports prepared on the Subject.

b. Are you in possession of a title report, site drawings, building drawings and specifications and/or a survey for the site? Yes ☐ No ☐

If yes, please provide copies of same.

Please provide all available environmental information from yours or your Client's records including, but not limited to, documentation in connection with any pending or threatened public or private proceedings or litigation with respect to environmental liability, environmental permits and permit applications, underground and above ground tank registration and information (including removal and testing of such tanks), environmental reports, asbestos, lead-based paint or indoor air quality studies, spill information and compliance information and programs.

C. SURROUNDING PROPERTIES

1. Has any adjoining properties been used for industrial purposes, or as a gasoline station, auto repair shop, junkyard, dry cleaner or landfill? Yes ☐ No ☐ U/K ☐

   If yes, please explain.

2. Are you aware of any contamination conditions on adjoining or nearby properties? Yes ☐ No ☐ U/K ☐

3. Are there any open surface waters or wetlands adjoining to the site? Yes ☐ No ☐ U/K ☐

4. Are you aware of any active or former waste treatment or disposal pits, ponds, or lagoons on adjoining or nearby sites? Yes ☐ No ☐ U/K ☐

5. Is any neighboring property engaged in the storing, transporting or disposal of hazardous waste, or chemicals? Yes ☐ No ☐ U/K ☐

D. REGULATORY

1. Are you aware of any pending, threatened, or past litigation relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*? Yes ☐ No ☐ U/K ☐

   If yes, please explain.

2. Are you aware of any pending, threatened, or past administrative proceedings relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*? Yes ☐ No ☐ U/K ☐

   If yes, please state the circumstances.

3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to *hazardous substances* or *petroleum products*? Yes ☐ No ☐ U/K ☐

   If yes, please explain.

E. ASBESTOS

1. Do you have knowledge of any materials or substances on the site that are known or suspected to contain asbestos? Yes ☐ No ☐ U/K ☐

   If yes, what materials and where are they located?

E. ASBESTOS – continued

2.	Has an inspection for asbestos ever been conducted on the Subject?	Yes ☐	No ☐	U/K ☐
3.	Has asbestos been removed from the Subject?	Yes ☐	No ☐	U/K ☐
4.	Does the building have:			
	• Spray-on or troweled-on fireproofing, insulation or finishes?	Yes ☐	No ☐	U/K ☐
	• Insulation on piping, boilers, tanks, chillers, or other mechanical equipment?	Yes ☐	No ☐	U/K ☐
	• Transite used in cooling towers, exterior walls, ceilings fascia panels, etc.?	Yes ☐	No ☐	U/K ☐
	• Resilient floor tile?	Yes ☐	No ☐	U/K ☐
	• Suspended acoustical ceiling tiles?	Yes ☐	No ☐	U/K ☐
	• A built-up or rolled roofing system?	Yes ☐	No ☐	U/K ☐

F. PCBs

1.	Are there any on-site electrical transformers?	Yes ☐	No ☐	U/K ☐
	If yes, do any of the transformers contain PCBs?	Yes ☐	No ☐	U/K ☐
	Who owns the transformers and where are they located?			
2.	Did any on-site transformers formerly contain PCBs, but later had the dielectric fluid replaced?	Yes ☐	No ☐	U/K ☐
3.	Is there any hydraulic equipment such as elevators or automotive lifts on-site?	Yes ☐	No ☐	U/K ☐
	If yes, who services the equipment?			
	Are you aware of any hydraulic fluid leaks or evidence of leakage such as unexplained fluid loss in connection with the hydraulic equipment?	Yes ☐	No ☐	U/K ☐

F. Storage Tanks

1. Are there any (active or inactive) Underground Storage Tanks (UST) or Aboveground Storage Tanks (AST) on the site? Yes ☐ No ☐ U/K ☐

If yes, please fill out the following schedule:

Active or Inactive Tanks

Location of Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Age of Tank (Years)	Does the Tank Have Corrosion Protection? (Yes/No)	Does the Tank Have Leak Detection? (Yes/No)	Is the Tank In-Use? (Yes/No)

Have any of the tanks been tightness tested? Yes ☐ No ☐ U/K ☐

1. Do you have any knowledge of tanks that were either removed or closed in-place at the site? Yes ☐ No ☐ U/K ☐

If yes, please fill out the following schedule:

Tanks Removed or Closed In-Place

Location of Former Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Tank Removal Company	Year Tank Was Removed

H. LEAD

1. Are you aware of any lead-based paint (LBP) applications on the site? Yes ☐ No ☐ U/K ☐
2. Has LBP testing been conducted? Yes ☐ No ☐ U/K ☐
3. Have there been any reported incidences of children with elevated blood lead levels residing at the site? Yes ☐ No ☐ U/K ☐
4. Are there any children younger than 7 years old residing at the site or frequenting the site on a daily basis? Yes ☐ No ☐ U/K ☐
5. Have any LBP abatements been conducted? Yes ☐ No ☐ U/K ☐

6. Has the water been tested for lead? Yes ☐ No ☐ U/K ☐

If yes, please provide a copy of the results

I. HAZARDOUS MATERIALS

1. Are hazardous materials or chemicals stored or used on-site? Yes ☐ No ☐ U/K ☐

If yes, please fill out the following schedule (attach separate page if more room is required):

Schedule of Hazardous or Toxic Substances Stored On-Site

Material Type	Quantity (Gallons)	Location

2. Are there any hazardous or medical waste or fluids generated or used that employ an outside service for their periodic supply and removal? Yes ☐ No ☐ U/K ☐

If yes, please provide the name, address, & telephone number of the disposal company and the facility generating the waste.

J. INDOOR AIR QUALITY

1. Have strong mold odors and/or mold staining been observed onsite? Yes ☐ No ☐ U/K ☐

2. Has there been any employee or tenant reports of symptoms consistent with mold contamination or other indoor air quality concerns? Yes ☐ No ☐ U/K ☐

3. Are you aware of elevated radon gas concentrations on-site? Yes ☐ No ☐ U/K ☐

AAI USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the *"Brownfield's Amendments"*), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that *"all appropriate inquiries"* is not complete.

Newbury Park CA 91320

Experience

Carol Noland is a Project Manager in the Environmental Advisory Service of Valuation & Advisory Services. She has over 27 years of experience as an Environmental Professional performing Phase I Environmental Site Assessments throughout the United States, with primary experience in California and other western States. She has conducted over 3,000 Phase I ESAs on various types of properties, including large-scale industrial and manufacturing sites, as well as commercial, residential, and agricultural properties. She is also experienced in conducting radon sampling, asbestos surveys, lead-based paint testing, and lead-in-water testing.

Ms. Noland's skill and experience in the research, evaluation, and summarizing of various historical land use sources and regulatory records provide her with the ability to identify and provide practical responses to open environmental issues on due diligence studies.

Professional Affiliations / Accreditations

Experience

Mr. Pritchard is an Environmental Professional (EP) with more than 20 years of experience as an environmental consultant. Mr. Pritchard is a Director (Environmental Site Assessment Division) in CBRE's - Assessment & Consulting Services - West Coast Region; more specifically, southern California. He has in depth knowledge of regulatory guidelines and compliance requirements with the USEPA, ASTM and numerous local government agencies throughout the country. He has reviewed/managed over 3,000 Phase I Environmental Site Assessments (ESAs), and performed over 1,000 Phase I ESAs on various types of real estate to include commercial office and retail, multi-family residential, and industrial and light industrial developments. He has also performed Phase I ESAs throughout the continental U.S., Hawaii and Baja Mexico. In addition, he conducts third party reviews, government agency file reviews and asbestos and lead-based paint surveys as well as designs Operations and Maintenance (O&M) programs for same.

Mr. Pritchard's approach focuses on maximizing research and technical resources for early resolution of potential environmental issues before moving into the next phase. He has been responsible for the rapid development of practical alternatives to address open environmental issues on due diligence studies. His environmental skills and training enable him to provide timely recommendations tailored to the specific needs of real estate transactions. He is experienced in dealings with regulatory agencies and multi-party transactions. He has also managed day-to-day office operations and provided quality control along with staff training and mentoring.

In 2016 (winter), Scott was awarded CBRE's Ambassador Award. The award is presented to only a handful of the hundreds of nominees that embody CBRE's RISE values and who demonstrate leadership, show initiative, possess determination and provide superior service.

1. INTRODUCTION

1.1. PROJECT DESCRIPTION

The proposed BLOC Residential Tower and signage (Project) would be located on the southern portion of a larger mixed-use development known as The BLOC located in the Financial District of Downtown Los Angeles (Development Area). The Applicant proposes to construct 466 residential units within a high-rise tower and signs included in The BLOC Supplemental Use District (case number CPC-2018-6388-SN) (Project). The development area is located within a 186,674-square-foot site (4.285-acre) known as The BLOC located at 700 South Flower Street, 700 West 7th Street, and 711 and 775 South Hope Street (Project Site) in the City of Los Angeles (City). The residential tower address will be 775 South Hope Street. The Project Site comprises an entire City block that is currently developed with hotel, office and commercial/retail uses and associated parking and contains a portal to the 7th Street/Metro Center rail station.

The BLOC Residential Tower would be located in the southern half of the Project Site (Development Area) and would consist of a high-rise tower with up to 466 residential units. The residential tower address will be 775 South Hope Street. The proposed signage would be provided throughout the Project Site pursuant to a new Supplemental Use District (case number CPC-2018-6388-SN).

The existing hotel, office, and commercial/retail uses would be retained, with the exception of approximately 24,342 square feet of existing commercial (theater and retail) uses that would be removed and replaced with residential uses (including the new residential lobby).

The BLOC Residential Tower would be constructed within and above an existing commercial/parking podium building. The rooftop parking level of the existing nine-story podium building would be enclosed, and two additional levels of parking would be added, increasing the podium to 12 stories. A new 41-story residential tower would extend above the 12-story podium. The two existing basement levels below the podium would be retained.

The 41-story residential tower will consist of the following: 2 stories of mechanical space, 1 story of rooftop amenities, 37 stories of residential dwelling units, and 1 story with amenities at podium roof level. The 12-story podium with parking consists of the following: 2 stories of new parking, 1 story of existing roof level parking now enclosed, 5 stories of enclosed existing parking and 4 stories of existing commercial area. The 2 below grade levels consist of 1 existing parking level and 1 loading level.

1.2. SCOPE OF WORK

This report provides a description of the existing surface water hydrology, surface water quality, groundwater level, and groundwater quality at the Project Site. In addition, the report includes an analysis of the Project's potential impacts related to surface water hydrology, surface water quality, groundwater level, and groundwater quality.

2. REGULATORY FRAMEWORK

2.1. SURFACE WATER HYDROLOGY

County of Los Angeles Hydrology Manual

Per the City's Special Order No. 007-1299, December 3, 1999, the City has adopted the Los Angeles County Department of Public Works Hydrology Manual as its basis of design for storm drainage facilities. The Los Angeles County Department of Public Works' Hydrology Manual requires that a storm drain conveyance system be designed for a 25-year storm event and that the combined capacity of a storm drain and street flow system

accommodate flow from a 50-year storm event. Areas with sump conditions are required to have a storm drain conveyance system capable of conveying flow from a 50-year storm event.[1] The County also limits the allowable discharge into existing storm drain facilities based on the municipal separate storm sewer system (MS4) Permit and is enforced on all new developments that discharge directly into the County's storm drain system. Any proposed drainage improvements of County owned storm drain facilities such as catch basins and storm drain lines requires the approval/review from the County Flood Control District department.

Los Angeles Municipal Code (LAMC)

Any proposed drainage improvements within the street right of way or any other property owned by, to be owned by, or under the control of the City requires the approval of a B-permit (Section 62.105, LAMC). Under the B-permit process, storm drain installation plans are subject to review and approval by the City of Los Angeles Department of Public Works Bureau of Engineering. Additionally, any connections to the City's storm drain system from a property line to a catch basin or a storm drain pipe requires a storm drain permit from the City of Los Angeles Department of Public Works, Bureau of Engineering.

2.2. SURFACE WATER QUALITY

Clean Water Act

The Clean Water Act was first introduced in 1948 as the Water Pollution Control Act. The Clean Water Act authorizes federal, state, and local entities to cooperatively create comprehensive programs for eliminating or reducing the pollution of state waters and tributaries. The primary goals of the Clean Water Act are to restore and maintain the chemical, physical, and biological integrity of the nation's waters and to make all surface waters fishable and swimmable. As such, the Clean Water Act forms the basic national framework for the management of water quality and the control of pollutant discharges.

[1] Los Angeles County Department of Public Works Hydrology Manual, January 2006, http://ladpw.org/wrd/publication/index.cfm, accessed on October 22, 2021.

The Clean Water Act also sets forth a number of objectives in order to achieve the above-mentioned goals. These objectives include regulating pollutant and toxic pollutant discharges; providing for water quality that protects and fosters the propagation of fish, shellfish and wildlife; developing waste treatment management plans; and developing and implementing programs for the control of non-point sources of pollution.[2]

Since its introduction, major amendments to the Clean Water Act have been enacted (e.g., 1961, 1966, 1970, 1972, 1977, and 1987). Amendments enacted in 1970 created the U.S. Environmental Protection Agency (USEPA), while amendments enacted in 1972 deemed the discharge of pollutants into waters of the United States from any point source unlawful unless authorized by a USEPA National Pollutant Discharge Elimination System (NPDES) permit. Amendments enacted in 1977 mandated development of a "Best Management Practices" Program at the state level and provided the Water Pollution Control Act with the common name of "Clean Water Act," which is universally used today. Amendments enacted in 1987 required the USEPA to create specific requirements for discharges.

In response to the 1987 amendments to the Clean Water Act and as part of Phase I of its NPDES permit program, the USEPA began requiring NPDES permits for: (1) MS4s generally serving, or located in, incorporated cities with 100,000 or more people (referred to as municipal permits); (2) 11 specific categories of industrial activity (including landfills); and (3) construction activity that disturbs five acres or more of land. Phase II of the USEPA's NPDES permit program, which went into effect in early 2003, extended the requirements for NPDES permits to: (1) numerous small municipal separate storm sewer systems,[3] (2) construction sites of one to five acres, and (3) industrial facilities owned or operated by small municipal separate storm sewer systems. The NPDES permit program is typically administered by individual authorized states.

In 2008, the USEPA published the draft Effluent Limitation Guidelines (ELGs) for the construction and development industry. On December 1, 2009 the EPA finalized its 2008 Effluent Guidelines Program Plan.

In California, the NPDES stormwater permitting program is administered by the State Water Resources Control Board (SWRCB). The SWRCB was created by the Legislature in 1967. The joint authority of water distribution and water quality protection allows the SWRCB to provide protection for the State's waters, through its nine Regional Water Quality Control Boards (RWQCBs). The RWQCBs develop and enforce water quality objectives and implement plans that will best protect California's waters, acknowledging areas of different climate, topography, geology, and hydrology. The RWQCBs develop

---

[2] Non-point sources of pollution are carried through the environment via elements such as wind, rain, or stormwater and are generated by diffuse land use activities (such as runoff from streets and sidewalks or agricultural activities) rather than from an identifiable or discrete facility.

[3] A small municipal separate storm sewer system (MS4) is any MS4 not already covered by the Phase I program as a medium or large MS4. The Phase II Rule automatically covers on a nationwide basis all small MS4s located in "urbanized areas" as defined by the Bureau of the Census (unless waived by the NPDES permitting authority), and on a case-by-case basis those small MS4s located outside of urbanized areas that the NPDES permitting authority designates.

"basin plans" for their hydrologic areas, issue waste discharge requirements, enforce action against stormwater discharge violators, and monitor water quality.[4]

Federal Anti-Degradation Policy

The Federal Anti-degradation Policy (40 Code of Federal Regulations (CFR) 131.12) requires states to develop statewide anti-degradation policies and identify methods for implementing them. Pursuant to the CFR, state anti-degradation policies and implementation methods shall, at a minimum, protect and maintain (1) existing in-stream water uses; (2) existing water quality, where the quality of the waters exceeds levels necessary to support existing beneficial uses, unless the state finds that allowing lower water quality is necessary to accommodate economic and social development in the area; and (3) water quality in waters considered an outstanding national resource.

California Porter-Cologne Act

The Porter-Cologne Water Quality Control Act established the legal and regulatory framework for California's water quality control. The California Water Code (CWC) authorizes the SWRCB to implement the provisions of the Clean Water Act, including the authority to regulate waste disposal and require cleanup of discharges of hazardous materials and other pollutants.

As discussed above, under the CWC, the State of California is divided into nine RWQCBs, governing the implementation and enforcement of the CWC and CWA. The Project Site is located within Region 4, also known as the Los Angeles Region. Each RWQCB is required to formulate and adopt a Basin Plan for its region. This Plan must adhere to the policies set forth in the CWC and established by the SWRCB. The RWQCB is also given authority to include within its regional plan water discharge prohibitions applicable to particular conditions, areas, or types of waste.

California Anti-Degradation Policy

The California Antidegradation Policy, otherwise known as the Statement of Policy with Respect to Maintaining High Quality Water in California was adopted by the SWRCB (State Board Resolution No. 68-16) in 1968. Unlike the Federal Antidegradation Policy, the California Antidegradation Policy applies to all waters of the State, not just surface waters. The policy states that whenever the existing quality of a water body is better than the quality established in individual Basin Plans, such high quality shall be maintained and discharges to that water body shall not unreasonably affect present or anticipated beneficial use of such water resource.

[4] USEPA. U.S. Environmental Protection Agency - Clean Water Act. https://www.epa.gov/compliance/about-clean-water-act-cwa-action-plan, accessed October 22, 2021.

California Toxics Rule

In 2000, the EPA promulgated the California Toxics Rule, which establishes water quality criteria for certain toxic substances to be applied to waters in the State. The EPA promulgated this rule based on the EPA's determination that the numeric criteria are necessary in the State to protect human health and the environment. The California Toxics Rule establishes acute (i.e., short-term) and chronic (i.e., long-term) standards for bodies of water such as inland surface waters and enclosed bays and estuaries that are designated by the Los Angeles Regional Water Quality Control Board (LARWQCB) as having beneficial uses protective of aquatic life or human health.

Board Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties

As required by the California Water Code, the LARWQCB has adopted a plan entitled "Water Quality Control Plan, Los Angeles Region: Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties" (Basin Plan). Specifically, the Basin Plan designates beneficial uses for surface and groundwaters, sets narrative and numerical objectives that must be attained or maintained to protect the designated beneficial uses and conform to the State's antidegradation policy, and describes implementation programs to protect all waters in the Los Angeles Region. In addition, the Basin Plan incorporates (by reference) all applicable State and Regional Board plans and policies and other pertinent water quality policies and regulations. Those of other agencies are referenced in appropriate sections throughout the LARWQCB Basin Plan.[5]

The Basin Plan is a resource for the RWQCB and others who use water and/or discharge wastewater in the Los Angeles Region. Other agencies and organizations involved in environmental permitting and resource management activities also use the Basin Plan. Finally, the Basin Plan provides valuable information to the public about local water quality issues.

NPDES Permit Program

The NPDES permit program was first established under authority of the Clean Water Act to control the discharge of pollutants from any point source into the waters of the United States. As indicated above, in California, the NPDES stormwater permitting program is administered by the SWRCB through its nine RWQCBs.

General Permit

SWRCB Order No. 2009-0009-DWQ known as the "General Permit" was adopted on September 2, 2009 and later amended by 2010-0014-DWQ and 2012-006-DWQ. This NPDES permit establishes a risk-based approach to stormwater control requirements for

[5] Los Angeles Regional Water Quality Control Board. LARWQCB Basin Plan http://www.waterboards.ca.gov/losangeles/water_issues/programs/basin_plan accessed on October 22, 2021.

construction projects by identifying three project risk levels. The main objectives of the General Permit are to:

1. Reduce erosion
2. Minimize or eliminate sediment in stormwater discharges
3. Prevent materials used at a construction site from contacting stormwater
4. Implement a sampling and analysis program
5. Eliminate unauthorized non-stormwater discharges from construction sites
6. Implement appropriate measures to reduce potential impacts on waterways both during and after construction of projects
7. Establish maintenance commitments on post-construction pollution control measures

California mandates requirements for all construction activities disturbing more than one acre of land to develop and implement Stormwater Pollution Prevention Plans (SWPPP). The SWPPP documents the selection and implementation of Best Management Practices (BMPs) for a specific construction project, charging Owners with stormwater quality management responsibilities. A construction site subject to the General Permit must prepare and implement a SWPPP that meets the requirements of the General Permit.[6] [7]

Los Angeles County Municipal Separate Storm Water System (MS4) Permit

As described above, USEPA regulations require that MS4 permittees implement a program to monitor and control pollutants being discharged to the municipal system from both industrial and commercial projects that contribute a substantial pollutant load to the MS4.

On November 8, 2012, the LARWQCB adopted Order No. R4-2012-0175 under the CWA and the Porter-Cologne Act. This Order is the NPDES Permit or MS4 permit for municipal stormwater and urban runoff discharges within Los Angeles County. The requirements of this Order (the "Permit") cover 84 cities and most of the unincorporated areas of Los Angeles County. Under the Permit, the Los Angeles County Flood Control District (LACFCD) is designated as the Principal Permittee. The Permittees are the 84 Los Angeles County cities (including the City of Los Angeles) and Los Angeles County. Collectively, these are the "Co-Permittees". The Principal Permittee helps to facilitate activities necessary to comply with the requirements outlined in the Permit but is not responsible for ensuring compliance of any of the Permittees.

---

[7] USEPA. U.S. Environmental Protection Agency - NPDES. https://www.epa.gov/npdes/ accessed on October 22, 2021.

Stormwater Quality Management Program (SQMP)

In compliance with the Los Angeles County MS4 Permit, the Co-Permittees are required to implement a stormwater quality management program (SQMP) with the goal of accomplishing the requirements of the Permit and reducing the amount of pollutants in stormwater runoff. The SWMP requires the County of Los Angeles and the 84 incorporated cities to:

- Implement a public information and participation program to conduct outreach on storm water pollution;
- Control discharges at commercial/industrial facilities through tracking, inspecting, and ensuring compliance at facilities that are critical sources of pollutants;
- Implement a development planning program for specified development projects;
- Implement a program to control construction runoff from construction activity at all construction sites within the relevant jurisdictions;
- Implement a public agency activities program to minimize storm water pollution impacts from public agency activities; and
- Implement a program to document, track, and report illicit connections and discharges to the storm drain system.

The MS4 Permit contains the following provisions for implementation of the SQMP by the Co-Permittees:

1. General Requirements:
    - Each permit is required to implement the SQMP in order to comply with applicable stormwater program requirements.
    - The SQMP shall be implemented and east permittee shall implement additional controls so that discharge of pollutants is reduced.
2. Best Management Practice Implementation:
    - Permittees are required to implement the most effective combination of BMPs for stormwater/urban runoff pollution control. This should result in the reduction of stormwater runoff.
3. Revision of the SQMP:
    - Permittees are required to revise the SQMP in order to comply with requirements of the RWQCB while complying with regional watershed

requirements and/or waste load allocations for implementation of TMDLs for impaired waterbodies.

4. Designation and Responsibilities of the Principal Permittee:

   The Los Angeles County Flood Control District is designated as the Principal Permittee who is responsible for:

   - Coordinating activities that comply with requirements outlined in the NPDES permit;
   - Coordinating activities among Permittees;
   - Providing personnel and fiscal resources for necessary updates to the SQMP;
   - Providing technical support for committees required to implement the SQMP; and
   - Implementing the Countywide Monitoring Program required under this Order and assessing the results of the monitoring program.

5. Responsibilities of Co-Permittee:

   Each co-permittee is required to comply with the requirements of the SQMP as applicable to the discharges within its geographical boundaries. These requirements include:

   - Coordinating among internal departments to facilitate the implementation of the SQMP requirements in an efficient way;
   - Participating in coordination with other internal agencies as necessary to successfully implement the requirements of the SQMP; and
   - Preparing an annual Budge Summary of expenditures for the stormwater management program by providing an estimated breakdown of expenditures for different areas of concern, including budget projections for the following year.

6. Watershed Management Committees (WMCs):

   - Each WMC shall be comprised of a voting representative from each Permittee in the Watershed Management Area (WMA).
   - Each WMC is required to facilitate exchange of information between co-permittees, establish goals and deadlines for WMAs, prioritize pollution control measures, develop and update adequate information, and recommend appropriate revisions to the SQMP.

7. Legal Authority:

    - Co-permittees are granted the legal authority to prohibit non-stormwater discharges to the storm drain system including discharge to the MS4 from various development types.

City of Los Angeles Water Quality Compliance Master Plan for Urban Runoff

On March 2, 2007, City Council Motion 07-0663 was introduced by the City of Los Angeles City Council to develop a water quality master plan with strategic directions for planning, budgeting and funding to reduce pollution from urban runoff in the City of Los Angeles. The Water Quality Compliance Master Plan for Urban Runoff was developed by the Bureau of Sanitation, Watershed Protection Division in collaboration with stakeholders to address the requirements of this Council Motion. The primary goal of the Water Quality Compliance Master Plan for Urban Runoff is to help meet water quality regulations. Implementation of the Water Quality Compliance Master Plan for Urban Runoff is intended over the next 20 to 30 years to result in cleaner neighborhoods, rivers, lakes and bays, augmented local water supply, reduced flood risk, more open space, and beaches that are safe for swimming. The Water Quality Compliance Master Plan for Urban Runoff also supports the Mayor and Council's efforts to make Los Angeles the greenest major city in the nation.

- The Water Quality Compliance Master Plan for Urban Runoff identifies and describes the various watersheds in the City, summarizes the water quality conditions of the City's waters, identifies known sources of pollutants, describes the governing regulations for water quality, describes the BMPs that are being implemented by the City, discusses existing TMDL Implementation Plans and Watershed Management Plans. Additionally, the Water Quality Compliance Master Plan for Urban Runoff provides an implementation strategy that includes the following three initiatives to achieve water quality goals:

- Water Quality Management Initiative, which describes how Water Quality Management Plans for each of the City's watershed and TMDL-specific Implementation Plans will be developed to ensure compliance with water quality regulations.

- The Citywide Collaboration Initiative, which recognizes that urban runoff management and urban (re)development are closely linked, requiring collaborations of many City agencies. This initiative requires the development of City policies, guidelines, and ordinances for green and sustainable approaches for urban runoff management.

- The Outreach Initiative, which promotes public education and community engagement with a focus on preventing urban runoff pollution.

- The Water Quality Compliance Master Plan for Urban Runoff includes a financial plan that provides a review of current sources of revenue, estimates costs for water quality compliance, and identifies new potential sources of revenue.

Low Impact Development – City of Los Angeles

In October 2011, the City of Los Angeles passed an ordinance (Ordinance No. 181899) amending City of Los Angeles Municipal Code Chapter VI, Article 4.4, Sections 64.70.01 and 64.72 to expand the applicability of the existing SUSMP requirements by imposing rainwater LID strategies on projects that require building permits. The LID ordinance became effective on May 12, 2012.

LID is a stormwater management strategy with goals to mitigate the impacts of increased runoff and stormwater pollution as close to its source as possible. LID promotes the use of natural infiltration systems, evapotranspiration, and the reuse of stormwater. The goal of these LID practices is to remove nutrients, bacteria, and metals from stormwater while also reducing the quantity and intensity of stormwater flows. Through the use of various infiltration strategies, LID is aimed at minimizing impervious surface area. Where infiltration is not feasible, the use of biofiltration, rain gardens, green roofs, and rain barrels that will store, evaporate, detain, and/or treat runoff may be used. [8]

The intent of the City of Los Angeles LID standards is to:

- Require the use of LID practices in future developments and redevelopments to encourage the beneficial use of rainwater and urban runoff;
- Reduce stormwater/urban runoff while improving water quality;
- Promote rainwater harvesting;
- Reduce offsite runoff and provide increased groundwater recharge;
- Reduce erosion and hydrologic impacts downstream; and
- Enhance the recreational and aesthetic values in our communities.

The City of Los Angeles Bureau of Sanitation, Watershed Protection Division will adopt the LID standards as issued by the LARWQCB and the City of Los Angeles Department of Public Works. The LID Ordinance will conform to the regulations outlined in the NPDES Permit and SUSMP.

2.3. GROUNDWATER

[8] City of Los Angeles. "Development Best Management Practices Handbook." May 2016.

Board Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties

As required by the California Water Code, the LARWQCB has adopted a plan entitled "Water Quality Control Plan, Los Angeles Region: Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties" (Basin Plan). Specifically, the Basin Plan designates beneficial uses for surface and groundwaters, sets narrative and numerical objectives that must be attained or maintained to protect the designated beneficial uses and conform to the State's antidegradation policy, and describes implementation programs to protect all waters in the Los Angeles Region. In addition, the Basin Plan incorporates (by reference) all applicable State and Regional Board plans and policies and other pertinent water quality policies and regulations. Those of other agencies are referenced in appropriate sections throughout the Basin Plan.

The Basin Plan is a resource for the Regional Board and others who use water and/or discharge wastewater in the Los Angeles Region. Other agencies and organizations involved in environmental permitting and resource management activities also use the Basin Plan. Finally, the Basin Plan provides valuable information to the public about local water quality issues.

Safe Drinking Water Act (SDWA)

The Federal Safe Drinking Act, established in 1974, sets drinking water standards throughout the country and is administered by the USEPA. The drinking water standards established in the SDWA, as set forth in the CFR, are referred to as the National Primary Drinking Water Regulations (Primary Standards, Title 40, CFR Part 141) and the National Secondary Drinking Water Regulations (Second Standards, 40 CFR Part 143). California passed its own Safe Drinking Water Act in 1986 that authorizes the State's Department of Health Services (DHS) to protect the public from contaminants in drinking water by establishing maximum contaminants levels (MCLs), as set forth in the CCR, Title 22, Division 4, Chapter 15, that are at least as stringent as those developed by the USEPA, as required by the federal Safe Drinking Water Act.

California Water Plan

The California Water Plan provides a framework for water managers, legislators, and the public to consider options and make decisions regarding California's water future. The California Water Plan, which is updated every five years, presents basic data and information on California's water resources including water supply evaluations and assessments of agricultural, urban, and environmental water uses to quantify the gap between water supplies and uses. The California Water Plan also identifies and evaluates existing and proposed statewide demand management and water supply augmentation programs and projects to address the State's water needs.

The goal for the California Water Plan Update is to meet Water Code requirements, receive broad support among those participating in California's water planning, and be a useful

document for the public, water planners throughout the state, legislators and other decision-makers.

3. ENVIRONMENTAL SETTING

3.1. SURFACE WATER HYDROLOGY

3.1.1. REGIONAL

As indicated in Figure 8, the Project Site is located within the greater Los Angeles area within the Ballona Creek Watershed. Ballona Creek is a 9-mile-long flood protection channel that drains the Los Angeles basin, from the Santa Monica Mountains on the north, the Harbor Freeway (110) on the east, and the Baldwin Hills on the south. The Ballona Creek Watershed totals approximately 130 square miles. It borders the crest of the Santa Monica Mountains on the north, the Ventura-Los Angeles County line, and extends to downtown Los Angeles. To the south, the Watershed extends to the south across the Los Angeles plain to include the area north of Baldwin Hills. The major tributaries to the Ballona Creek include Centinela Creek, Sepulveda Canyon Channel, Benedict Canyon Channel, and numerous storm drains.

3.1.2. LOCAL

Existing storm drainage facilities on and within the vicinity of the Project Site are shown in Figure 1. Underground storm drainage facilities along 8th Street are owned and maintained by the Los Angeles County. Based on City of Los Angeles record data from the NavigateLA online dashboard and the Los Angeles County Department of Public Works record data, there are two existing side inlet catch basins along the 8th Street frontage, one existing side inlet catch basin along the Hope Street frontage, and one existing side inlet catch basin along the Flower Street frontage of the Project Site that connect to the 36-inch reinforced concrete pipe (RCP) that runs along 8th Street. Two side inlet catch basins are located at the northern corner intersection of 8th Street and Hope Street and one is at the eastern corner of the 8th Street and Flower Street intersection. The existing 36-inch diameter storm drain line flows southeasterly along 8th Street to a junction where the flow is directed south along E. Alameda Avenue. The existing site, with approximately 100-percent impervious area, has a 50-year peak flow rate of 7.19 cubic feet per second (cfs). See Figure 3a for calculation results. Roof runoff enters on site area drains and is conveyed to the curb face via multiple parkway drains.

The underground storm drainage pipes, within the right-of-way, convey stormwater through underground pipe networks into Ballona Creek. Ballona Creek flows generally southwest, ultimately discharging into the Pacific Ocean at the Santa Monica Bay. Ballona Creek is designed to discharge to Santa Monica Bay approximately 71,400 cfs from a 50-year frequency storm event.[9]

[9] LACDPW: Ballona Creek Watershed, http://www.ladpw.org/wmd/watershed/bc/

3.1.3. ON SITE

The topography of the parking structure varies across the property and does not exceed a 50:1 slope. The existing Project Site is approximately 100-percent impervious. The Project Site is not crossed by any water courses or rivers. The existing site currently serves as a parking structure adjacent to an existing office tower, hotel, and plaza. As shown in Figure 1, the stormwater from the Project Site is conveyed via roof runoff to catch basins and discharged to the street that then drains to catch basins. The result of existing Q_{50} is presented in Table 1 below. The calculations are performed on HydroCalc and shown on Figure 3a and 3b.

Table 1- Existing Stormwater Runoff Calculations		
Drainage Area	Area (Acres)	Q50[a] (cfs)
Total	2.30	7.19
[a] 50-year peak volumetric flow rate.		

3.2. SURFACE WATER QUALITY

3.2.1. REGIONAL

As stated above, the Project Site lies within the Ballona Creek Watershed. Constituents of concern listed for Ballona Creek under California's Clean Water Act Section 303(d) List include Cadmium (sediment), Chlordane (Tissue & Sediment), Coliform Bacteria, Copper (Dissolved), Cyanide, DDT, Lead, PAHs, PCBs, Selenium, Sediment Toxicity, Shellfish Harvesting Advisory, Silver, Toxicity, Trash, Viruses (Enteric), and Zinc. [10]

3.2.2. LOCAL

In general, urban stormwater runoff occurs following precipitation events with the volume of runoff flowing into the drainage system depends on the intensity and duration of the rain event. Contaminants that may be found in stormwater from developed areas include sediments, trash, bacteria, metals, nutrients, organics and pesticides. The source of contaminants includes surface areas where precipitation falls, as well as the air it falls through. Contaminants on surfaces such as roads, maintenance areas, parking lots, and buildings, which are usually contained in dry weather conditions, may be carried by rainfall runoff into drainage systems. The City has installed catch basins with screens to capture debris before entering the storm drain system. In addition, the City conducts routine street cleaning operations as well as periodic cleaning and maintenance of catch basins to reduce stormwater pollution within the City.

[10] CA Water board: 2010 CALIFORNIA 303(d) LIST OF WATER QUALITY LIMITED SEGMENTS. available at https://www.waterboards.ca.gov/water_issues/programs/tmdl/2010state_ir_reports/category5_report.shtml ; accessed October 22, 2021.

3.2.3. ON SITE

The existing buildings on the Project Site were roughly built in the early 1970s. Based on the year these buildings were built, the Project Site currently does not seem to have structural BMPs for the treatment of stormwater runoff from existing impervious surfaces from the parking structure roof areas. As it has been explained earlier in this report, it has been assumed that the Site is discharging to the streets that surround the Project Site. It appears that the runoff water does not get treated on site before it gets discharged to the main storm drain facility. Please see Figure 1 for the existing drainage exhibit.

3.3. GROUNDWATER LEVEL

3.3.1. REGIONAL

Groundwater use for domestic water supply is a beneficial use of groundwater basins in Los Angeles County. The City of Los Angeles overlies the Los Angeles Coastal Plain Groundwater Basin. The Los Angeles Coastal Plain Basin is comprised of the Hollywood, Santa Monica, Central, and West Coast Subbasins. Groundwater flow in the Los Angeles Coastal Plain Groundwater Basin is generally south-southwesterly and may be restricted by natural geological features. Replenishment of groundwater basins occurs mainly by percolation of precipitation throughout the region via permeable surfaces, spreading grounds, and groundwater migration from adjacent basins, as well as injection wells designed to pump freshwater along specific seawater barriers to prevent the intrusion of salt water.

3.3.2. LOCAL

Within the Los Angeles Coastal Plain Groundwater Basin, the Project Site specifically overlies the Central Subbasin. The Project Site is located toward the northern portion of the Basin. The Central Subbasin is bounded on the north by a surface divide called the La Brea High, and on the northeast and east by emergent less permeable Tertiary rocks of the Elysian, Repetto, Merced and Puente Hills. The southeast boundary between the Central Basin and Orange County Groundwater Basin roughly follows Coyote Creek, which is a regional drainage province boundary. The southwest boundary is formed by the Newport Inglewood fault system and the associated folded rocks of the Newport Inglewood uplift. [10]

Groundwater in the Central Subbasin is naturally replenished from surface inflow through Whittier Narrows. Percolation in the Los Angeles Forebay Area is restricted due to urbanization of the area. Imported and recycled water is also used for artificial recharge at the Rio Hondo and San Gabriel River spreading grounds. There are problems with

[10] https://water.ca.gov/-/media/DWR-Website/Web-Pages/Programs/Groundwater-Management/Bulletin-118/Files/2003-Basin-Descriptions/4_011_04_CentralSubbasin.pdf

saltwater intrusions in locations where river systems have eroded through the Newport Inglewood uplift. The Central Subbasin "Allowed Pumping Allocation" ("APA") was set at 217,367 acre-feet-per-year (AFY).[11]

Two LADWP facilities provide groundwater supplies in the Central Subbasin: the Manhattan Wells and the 99th Street Wells. The active Manhattan Wells were installed between 1928 and 1974, and have a production capacity of 16.9 cubic feet per second (cfs). Wells at the 99th Street location were installed between 1974 and 2002, and have a production capacity of 7.4 cfs.[12]

3.3.3. ON SITE

According to a preliminary survey performed by KPFF Consultant Engineers dated March 1, 2021, the Project Site perimeter has a high elevation of 264.03 feet above mean sea level (MSL), located at the northern corner of the Site along Flower Street, and a low site perimeter elevation of approximately 256.28 feet above MSL at the southern corner of the Site at Hope Street. This corresponds to an approximate elevation difference of 7.75 feet between Flower Street and Hope Street and generally slopes from the north to the south.

The Project Site is within the Central Subbasin of the Coastal Plain of Los Angeles Groundwater Basin. Based on information from the California Geological Survey, the historic-high groundwater level at the Site is approximately 70 feet below ground surface. Groundwater seepage was encountered in a 1969 geotechnical exploration at depths relative consistent with the bedrock contact at 76, 65 and 54.5 feet below ground surface. Localized seepage within the wedge of alluvium overlying the bedrock is representative of a perched groundwater condition that probably fluctuates with seasonal precipitation. Although the bedrock of the Fernando Formation is considered non-water bearing, perched groundwater may be present locally in fractures and along bedding planes in the bedrock.

Fluctuations in the level of groundwater may occur due to variations in rainfall, temperature, and other factors not evident at the time of the measurements reported herein. Fluctuations also may occur across the Site. High groundwater levels can result in changed conditions.

[12] https://www.ladwp.com/ladwp/faces/ladwp/aboutus/a-water/a-w-sourcesofsupply/a-w-sos-localgroundwater?_adf.ctrl-state=jzum6iski_4&_afrLoop=1185517062045184 ; accessed October 22, 2021.

3.4. GROUNDWATER QUALITY

3.4.1. REGIONAL

As stated above, the City of Los Angeles overlies the Los Angeles Coastal Plain Groundwater Basin. This basin falls under the jurisdiction of the LARWQCB. According to LARWQCB's Basin Plan, objectives applying to all ground waters of the Region include Bacteria, Chemical Constituents and Radioactivity, Mineral Quality, Nitrogen (Nitrate, Nitrite), and Taste and Odor.[13]

3.4.2. LOCAL

As stated above, the Project Site specifically overlies the Central Basin. Based upon LARWQCB's Basin Plan, constituents of concern listed for the Central Basin include Boron, Chloride, Sulfate, TDS, and Nitrate.

3.4.3. ON SITE

The 4.285-acre Project Site that is currently occupied by The BLOC, a mixed-use destination that includes office tower, a high-rise hotel, commercial/retail uses and an expansive plaza that includes the portal to the 7th Street/Metro Center rail station. all located within the northern portion of the Project Site, outside of the Development Area (The BLOC Residential Tower). The southern portion of the Project Site that is comprised of the Development Area is currently developed with a an existing 9-story podium building, which includes five (6) stories of enclosed parking, four (2) stories of existing commercial/retail floor area, and one (1) rooftop parking. The Project Site is approximately 100-percent impervious surface coverage and surface runoff drains to existing side inlet catch basins located around the property as shown in Figure 1. Therefore, the existing Development Area does not contribute to groundwater pollution or otherwise adversely impact groundwater quality. The current property does not have any existing best management practices for stormwater management that comply with the current City of Los Angeles LID Ordinance since it was built out in the 1970s prior to the ordinance. Additionally, the combination of good housekeeping practices, compliance with all existing hazardous waste regulations, and future compliance with the City of Los Angeles LID Ordinance will further reduce the potential for adverse impacts to groundwater quality. The Project will not be impacting the groundwater quality as the Project will comply to the city and state standards for groundwater quality.

Other types of risk such as underground storage tanks have a greater potential to impact groundwater.

4. SIGNIFICANCE THRESHOLDS

In accordance with the significance thresholds described by the State CEQA Guidelines Appendix G and the 2006 L.A. CEQA Thresholds Guide, the Project has been analyzed for potential impacts on hydrology, water quality, and groundwater. This report includes an analysis of the Project with respect to the CEQA thresholds as described below.

- Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality;
- Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin;
- Substantially alter the existing drainage pattern of the Site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:
    - Result in substantial erosion or siltation on- or offsite;
    - Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;
    - Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or
    - Impede or redirect flood flows
- In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation; or;
- Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.

4.1. SURFACE WATER HYDROLOGY

4.1.1 STATE CEQA GUIDELINES APPENDIX G

In accordance with Appendix G of the California Environmental Quality Act (CEQA) Guidelines (*CEQA Guidelines*), the Project would have a significant impact related to stormwater if it would:

a) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects.

4.1.2 2006 L.A. CEQA THRESHOLDS GUIDE

The L.A. CEQA Thresholds Guide *(Thresholds Guide)*, identifies the following criteria to evaluate stormwater impacts:

- Cause flooding during the projected 50-year developed storm event which would have the potential to harm people or damage property or sensitive biological resources;

- Substantially reduce or increase the amount of surface water in a water body; or
- Result in a permanent, adverse change to the movement of surface water sufficient to produce a substantial change in the current or direction of water flow.

In assessing impacts related to stormwater in this section, the City will use Appendix G as the thresholds of significance. The criteria identified above from the *Thresholds Guide* will be used where applicable and relevant to assist in analyzing the Appendix G thresholds.

4.2. SURFACE WATER QUALITY

The City of Los Angeles *CEQA Thresholds Guide* states that a project would normally have a significant impact on surface water quality if discharges associated with the project would create pollution, contamination or nuisance, as defined in Section 13050 of the California Water Code (CWC) or that cause regulatory standards to be violated, as defined in the applicable NPDES stormwater permit or Water Quality Control Plan for the receiving water body. The CEQA Thresholds Guide and CWC include the following definitions:

"Pollution" means an alteration of the quality of the waters of the state to a degree which unreasonably affects either of the following: 1) the waters for beneficial uses or 2) facilities which serve these beneficial uses. "Pollution" may include "Contamination".

"Contamination" means an impairment of the quality of the waters of the state by waste to a degree, which creates a hazard to the public health through poisoning or though the spread of disease. "Contamination" includes any equivalent effect resulting from the disposal of waste, whether or not waters of the state are affected.

"Nuisance" means anything which meets all of the following requirements:1) is injurious to health, or is indecent or offensive to the senses, or an obstruction to the free use of property, so as to interfere with the comfortable enjoyment of life or property; 2) affects at the same time an entire community or neighborhood, or any considerable number of persons, although the extent of the annoyance or damage inflicted upon individuals may be unequal; and 3) occurs during, or as a result of, the treatment or disposal of wastes.[14]

4.3. GROUNDWATER LEVEL

According to the City of Los Angeles CEQA Thresholds Guide a project would normally have a significant impact on groundwater level if it would:

- Change potable water levels sufficiently to:

[14] City of Los Angles.LA. CEQA Thresholds Guides.2006 https://planning.lacity.org/eir/CrossroadsHwd/deir/files/references/A07.pdf , accessed October 22, 2021.

- Reduce the ability of a water utility to use the groundwater basin for public water supplies, conjunctive use purposes, storage of imported water, summer/winter peaking, or to respond to emergencies and drought;
- Reduce yields of adjacent wells or well fields (public or private); or
- Adversely change the rate or direction of flow of groundwater; or

- Result in demonstrable and sustained reduction of groundwater recharge capacity.

4.4. GROUNDWATER QUALITY

According to the City of Los Angeles CEQA Thresholds Guide a project would normally have a significant impact on groundwater quality if it would:

- Affect the rate or change the direction of movement of existing contaminants;
- Expand the area affected by contaminants;
- Result in an increased level of groundwater contamination (including that from direct percolation, injection or salt water intrusion); or
- Cause regulatory water quality standards at an existing production well to be violated, as defined in the CCR, Title 22, Division 4, and Chapter 15 and in the Safe Drinking Water Act.

5. METHODOLOGY

5.1. SURFACE WATER HYDROLOGY

The Project Site is located in the Downtown area under the jurisdiction of the City of Los Angeles Department of Public Works Bureau of Engineering. Drainage collection, treatment and conveyance are regulated by the City. Per the City's Special Order No. 007-1299, December 3, 1999, the City has also adopted the Los Angeles County Department of Public Works (LACDPW) Hydrology Manual as its basis of design for storm drainage facilities. The LACDPW Hydrology Manual requires projects to have drainage facilities that meet the Urban Flood level of protection. The Urban Flood is runoff from a 25-year frequency design storm falling on a saturated watershed. A 25-year frequency design storm has a probability of 1/25 of being equaled or exceeded in any year. The City's CEQA Threshold Guide, however, establishes the 50-year frequency design storm event as the threshold to analyze potential impacts on surface water hydrology as a result of development. This is in part because the City of Los Angeles uses the 50-year storm event to plan the existing and planned storm water drainage systems. Consequently, the use of the 50-year frequency design storm event in this analysis is in line with the CEQA threshold to determine if the project would "require or result in the construction of new storm water

drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects."

The Modified Rational Method was used to calculate storm water runoff. The "peak" (maximum value) runoff for a drainage area is calculated using the formula, **Q = CIA**

Where,

Q = Volumetric flow rate (cfs)

C = Runoff coefficient (dimensionless)

I = Rainfall Intensity at a given point in time (in/hr)

A = Basin area (acres)

The Modified Rational Method assumes that a steady, uniform rainfall rate will produce maximum runoff when all parts of the basin area are contributing to outflow. This occurs when the storm event lasts longer than the time of concentration. The time of concentration (Tc) is the time it takes for rain in the most hydrologically remote part of the basin area to reach the outlet.

The method assumes that the runoff coefficient (C) remains constant during a storm. The runoff coefficient is a function of both the soil characteristics and the percentage of impervious surfaces in the drainage area.

The LACDPW developed a time of concentration calculator, Hydrocalc, to automate time of concentration calculations as well as the peak runoff rates and volumes using the Modified Rational Method design criteria as outlined in the Hydrology Manual. The data input requirements include: sub-area size, soil type, land use, flow path length, flow path slope and rainfall isohyet. The Hydrocalc Calculator was used to calculate the storm water peak runoff flow rate for the Project conditions by evaluating an individual sub-area independent of all adjacent subareas. See Figure 3 for the Hydrocalc Calculator results and Figure 5 for LA County Hydrology / Isohyet Map.

5.2. SURFACE WATER QUALITY

5.2.1. CONSTRUCTION

Construction contractors disturbing less than one acre of soil would not be required to obtain coverage under the NPDES General Construction Permit (order No. 2012-0006-DWQ). However, the Site will still implement BMPs that adhere to the California Stormwater Quality Association (CASQA) BMP Handbook. The Erosion Control plan would specify BMPs to be used during construction. BMPs would include but not be limited to: erosion control, sediment control, non-stormwater management, and materials management BMPs.

5.2.2. OPERATION

The Project will meet all applicable stormwater management requirements through compliance with City of Los Angeles' LID standards. LID standards are used to analyze the stormwater peak mitigated flow rate and volume. LID standards also require that projects select source control and treatment control BMPs from a priority list approved by the RWQCB. The selected BMPs must control peak flow discharge to provide stream channel and over bank flood protection, based on LID flow design criteria. Furthermore, the source and treatment control BMPs will be sufficiently designed and constructed to collectively treat, infiltrate, capture and use, or filter stormwater runoff to meet or exceed the requirements of the City Watershed Protection Division and the LACDPW Watershed Division. According to City of Los Angeles LID Ordinance LID Requirements, the order of priority for selected BMPs is infiltration systems, stormwater capture and use, high efficiency biofiltration/bioretention systems, and any combination of any of the above. Based on the geotechnical recommendations the site soils are not suitable for infiltration due to the relatively impermeable nature of the underlying Older Alluvium and bedrock. Based on the planting areas shown on the entitlement drawings dated November 29, 2021 capture and use will be feasible and implemented. According to the City's LID standards, the capture and use systems shall be sized to capture the runoff generated from the greater of the 85th percentile storm and the 0.75-inch storm event at a minimum:

$$V_{design} \text{ (gallons)} = (85^{th} \text{ percentile} * 7.48 \text{ gallons/cubic foot}) * \text{Catchment Area (sq. ft.)}$$

Where:

$$\text{Catchment Area} = (\text{Impervious Area} \times 0.9) + [(\text{Pervious Area} + \text{Undeveloped Area}) \times 0.1]$$

For catchment areas given in acres, multiply the above equation by 43,560 sq. ft./acre. [15]

The total proposed area of planting for the Project is 13,600 square feet, meeting the minimum required planting area of 8,000 square feet. The required storage volume of 53,495 gallons was determined based on the calculations described above. With the total proposed planting area, capture and use is feasible and will be implemented for the Project. Stormwater runoff from the roof and surface drains will be collected and conveyed to a storage tank within the garage and subsequently pumped to the planter areas throughout the building, for use as drip irrigation.

Prior to reaching the storage tank, stormwater runoff will be conveyed through a pre-treatment device to trap trash, sediment and oil. This structure will be equipped with an overflow pipe designed to accommodate the 50 year flow and all other runoff greater than

[15] Planning and Land Development Handbook for Low Impact Development (LID), 5th Edition dated May 9, 2016, https://www.lacitysan.org/cs/groups/sg_sw/documents/document/y250/mde3/~edisp/cnt017152.pdf accessed on October 22, 2021.

the 85th percentile storm event. This overflow pipe will be routed through the podium building and discharge via a sidewalk drain, through the curb face on Hope Street.

5.3. GROUNDWATER LEVEL

The State's CEQA Guidelines, Appendix G mentioned in Section 4, require a review of the Project, environmental setting, significance thresholds, and comparison with the Threshold Guide criteria as stated above.

5.4. GROUNDWATER QUALITY

The State's CEQA Guidelines, Appendix G mentioned in Section 4, require a review of the Project, environmental setting, significance thresholds, and comparison with the Threshold Guide criteria as stated above.

6. PROJECT IMPACT ANALYSIS

6.1. CONSTRUCTION

6.1.1. SURFACE WATER HYDROLOGY

While the footprint of the high rise tower would only occupy a small section on the southeast side of the Project Site, the proposed residential development includes an amenity level that will occupy the entire roof of the podium building. The new construction occurs within and atop an existing 9 story parking garage with 2 below grade levels. The Project will enclose 1 rooftop parking level and add 2 enclosed parking levels to the podium and 41 residential tower levels above. The Project is proposed to disturb approximately 16,500 square feet (0.38 ac.) of site area.

Construction activities for the Project will include drilled cast in place concrete pile foundations. It is anticipated that approximately 18,239 cubic yards of soil would need to be exported from the Project Site during construction of the Project. In addition, construction activities such as earth moving, maintenance/operation of construction equipment, and handling/storage/disposal of materials could contribute to pollutant loading in stormwater runoff.

The construction site is anticipated to be less than one acre, therefore the Project would not be required to obtain coverage under the NPDES General Construction stormwater permit. BMPs would be designed to reduce runoff and pollutant levels in runoff during construction. The BMPs are designed to (and would in fact) contain and treat, as necessary, stormwater or construction watering on the Project Site so runoff does not impact offsite

drainage facilities or receiving waters. Construction activities are temporary and flow directions and runoff volumes during construction will be controlled.

In addition, the Project will comply with all applicable City grading permit regulations, plans, and inspections to reduce sedimentation and erosion. Thus, through compliance with NPDES General Construction Permit requirements, implementation of BMPs, and compliance with applicable City grading regulations, the Project would not substantially alter the Project Site drainage patterns in a manner that would result in substantial erosion or siltation. The Project would not result in a permanent adverse change to the movement of surface water. Therefore, construction-related impacts to surface water hydrology would be less than significant.

Per Section 3.3.3, the Project construction is unlikely to require temporary dewatering as the seepage water anticipated in the perched layers can be handled with temporary subdrains and subsequently the permanent retaining wall subdrainage system. If temporary dewatering is required, all operations will be performed in accordance with applicable regulations. Dewatering operations must be in accordance with the California Stormwater Quality Association (CASQA) approved methods and will overflow to the local sewer system. Therefore, no impact on local storm drain capacity would occur, associated with any construction dewatering.

6.1.2. SURFACE WATER QUALITY

Construction activities such as earth moving, maintenance of construction equipment, handling of construction materials, and dewatering, can contribute to pollutant loading in stormwater runoff.

Erosion Control plan would specify BMPs to be used during construction. BMPs would include but not be limited to: erosion control, sediment control, non-stormwater management, and materials management BMPs. Refer to Exhibit 2 for typical Erosion Control BMPs to be implemented during construction of the Project.

The Project is not expected to require dewatering during construction. Dewatering operations are practices that discharge non-stormwater, such as groundwater, that must be removed from a work location to proceed with construction into the drainage system.

With implementation of the Erosion Control Plan, site-specific BMPs would reduce or eliminate the discharge of potential pollutants from stormwater runoff. In addition, the Project Applicant would be required to comply with City grading permit regulations and inspections to reduce sedimentation and erosion. Construction of the Project would not result in discharge that would cause: (1) pollution which would alter the quality of the water of the State (i.e., Ballona Creek) to a degree which unreasonably affects beneficial uses of the waters; (2) contamination of the quality of the water of the State by waste to a degree which creates a hazard to the public health through poisoning or through the spread of diseases; or (3) nuisance that would be injurious to health; affect an entire community or neighborhood, or any considerable number of persons; and occurs during or as a result of

the treatment or disposal of wastes. Furthermore, construction of the Project would not result in discharges that would cause regulatory standards to be violated in the Los Angeles River Watershed. Therefore, temporary construction-related impacts on surface water quality would be less than significant.

For the same reasons discussed under Surface Water Hydrology above, no impact on surface water quality would occur, associated with any construction dewatering.

6.1.3. GROUNDWATER LEVEL

Construction activities for the Project would include drilled cast in place concrete pile foundations. Per the preliminary geotechnical report, groundwater seepage was encountered in 1969 geotechnical explorations at depths relatively consistent with the bedrock contact at 76, 65, and 54 ½ feet below ground surface. Localized seepage within the wedge of alluvium overlying the bedrock is representative of a perched groundwater condition that probably fluctuates with seasonal precipitation. The Project would result in less than significant impacts related to groundwater level and would not substantially deplete groundwater supplies in a manner that would result in a net deficit in aquifer volume or lowering of the local groundwater table.

6.1.4. GROUNDWATER QUALITY

As discussed above, the Project will require drilled cast in place concrete pile foundations. The Project will require a net export of existing soil material of 18,239 cubic yards. During onsite grading and building construction, hazardous materials, such as fuels, paints, solvents, and concrete additives, could be used and would therefore require proper management and, in some cases, disposal. The management of any resultant hazardous wastes could increase the opportunity for hazardous materials releases into groundwater. Compliance with all applicable federal, state, and local requirements concerning the handling, storage and disposal of hazardous waste, would reduce the potential for the construction of the Project to release contaminants into groundwater that could affect existing contaminants, expand the area or increase the level of groundwater contamination, or cause a violation of regulatory water quality standards at an existing production well. In addition, as there are no groundwater production wells or public water supply wells within a one-mile radius from the Project Site, construction activities would not be anticipated to affect existing wells. Therefore, the Project would not result in any substantial increase in groundwater contamination through hazardous materials releases and impacts on groundwater quality would be less than significant.

Since construction activities for the Project will require drilled cast in place concrete pile foundations (110 feet), the Project should encounter groundwater during excavation. Provided the adherence to the appropriate compliance and containment measures, the Project would result in less than significant impacts related to groundwater quality.

6.2. OPERATION

6.2.1. SURFACE WATER HYDROLOGY

As previously discussed, the existing Project Site, inclusive of the Development Area, is approximately 100-percent impervious. The Project would include development of new buildings, paved areas, and landscaped areas. With implementation of the Project (which includes 13,600 SF of landscape area on the amenity deck) the amount of the Development Area's impervious area is expected to lower to 85-percent. The proposed Q_{50} shown in Table 2 below of 7.17 cfs is approximately 0.28-percent lower than the existing Q_{50} (7.19 cfs) presented in Table 1 in Section 3.1.3. Please see Figure 3 for calculations.

Table 2- Existing and Proposed Stormwater Runoff Calculations

Drainage Area	Drainage Area 1 (Acres)[a]	Pre-development Q50[b] (cfs)	Post-development Q50[b] (cfs)	Incremental Decrease from Existing to Proposed Condition
Total	2.3	7.19	7.17	0.28%

[a] It is assumed that, of this area, 95% would be in impervious surfaces.

[b] 50-year peak volumetric flow rate.

The LID requirements for the Development Area outline the stormwater treatment post-construction BMPs required to control pollutants associated with storm events up to the 85th percentile storm event. The Project BMPs will mitigate the stormwater runoff quality and quantity.

As stated previously, the onsite runoff from the Development Area is tributary to the existing 36-inch City owned storm drain line that runs along the west side of W. 8th Street. No water bodies are located on or within the immediate vicinity of the Project Site, and as such, the Project would not substantially reduce or increase the amount of surface water in a local water body. Therefore, with the 50-year peak flow rate decrease for the Project, the discharge would be negligible when compared to the approximately 71,400 cfs capacity of Ballona Creek, and would not substantially affect the surface water levels of the Creek.

Based on the above, the Project would not result in an incremental impact on either onsite or offsite flooding during a 50-year storm event, would not substantially reduce or increase the amount of surface water in a water body, or result in a permanent adverse change to the movement of surface water that would result in an incremental effect on the capacity of the existing storm drain system. Furthermore, adequate capacity exists in the local storm drain

system to serve the Project. As such, operation of the Development Area would result in a less than significant impact on surface water hydrology.

Based on the Preliminary Geotechnical Report, permanent dewatering recommendations are anticipated. Permeant dewatering will need to be verified when the final Geotechnical Report has been received.

6.2.2. SURFACE WATER QUALITY

The Project Site will not increase concentrations of the items listed as constituents of concern for the Ballona Creek Watershed.

The Project will implement BMPs for managing stormwater runoff in accordance with the current City of Los Angeles LID Ordinance LID requirements. There is no prior knowledge of any existing onsite BMPs, stormwater run-off from the Project will result in improved surface water quality.

The LID requirements for the Project Site would outline the stormwater treatment post-construction BMPs required to control pollutants associated with storm events up to the 85^{th} percentile storm event, per the City of Los Angeles LID Ordinance.

According to City of Los Angeles LID Ordinance requirements, the order of priority for selected BMPs is infiltration systems, stormwater capture and use, high efficiency biofiltration/bioretention systems, and any combination of any of the above. Based on the planting areas shown on the entitlement drawings dated November 29, 2021 capture and use will be feasible and is recommended. See Figure 2 for proposed drainage area. Calculations associated with the Capture and Use option are conducted in Figure 4 and summarized below in Table 3. Exhibit 1 shows conceptually designed Post-Construction BMPs.

	Table 3 - Capture and Use Summary (See Figure 4 for details)			
Drainage Area	Drainage Area 1 (ft^2)	V_{design} (Gal.)*	Minimum Required Planter Area (ft^2)	Proposed Planting Area (ft^2)
1	100,375	53,495	8,000	13,600

* V_{design} under Capture and Use approach is the stormwater storage volume which is required to be stored onsite.

As described previously, a new storage tank with a submersible pump will be designed to store stormwater runoff for use as drip irrigation for the planter areas on upper and lower levels of the building. As a result of the implementation of stormwater treatment post-construction BMPs (capture and use system), operational impacts on surface water quality would be less than significant.

Based on the Preliminary Geotechnical Report, permanent dewatering recommendations are anticipated. Permeant dewatering will need to be verified when the final Geotechnical Report has been received.

6.2.3. GROUNDWATER LEVEL

The Project will develop hardscape and structures that cover the majority of the Project footprint with impervious surfaces. However, the Project would include the installation of LID BMP's, which would mitigate at minimum the first flush or the equivalent of the greater between the 85th percentile storm and first 0.75-inch of rainfall for any storm event. The installed BMP systems will be designed with an internal bypass or overflow system to prevent upstream flooding due to large storm events. The stormwater which bypasses the BMP systems would discharge to an approved discharge point in the public right-of-way and not result in infiltration of any rainfall, which would affect groundwater hydrology, including the direction of groundwater flow.

The construction activities for the Project would include drilled cast in place concrete pile foundations to a depth of 110 feet. The drilled cast in place concrete pile foundations will impact the groundwater hydrology, including groundwater levels. Per the geotechnical report, groundwater seepage was encountered in 1969 geotechnical explorations at depths relatively consistent with the bedrock contact at 76, 65, and 54 ½ feet below ground surface.

6.2.4. GROUNDWATER QUALITY

Operational activities which could affect groundwater quality include spills of hazardous materials and leaking underground storage tanks. Surface spills from the handling of hazardous materials most often involve small quantities and are cleaned up in a timely manner, thereby resulting in little threat to groundwater.

In addition, while the development of the Project would increase the use of existing onsite hazardous materials, compliance with all applicable existing regulations at the Project Site would prevent the Project from affecting or expanding any potential areas of contamination, increasing the level of contamination, or causing regulatory water quality standards at an existing production well to be violated, as defined in CCR, Title 22, Division 4, Chapter 15 and the Safe Drinking Water Act. Furthermore, as described above, operation of the Project would not require extraction from the groundwater supply based on the depth of excavation for the proposed uses and the depth of groundwater below the Project Site. Additionally, the Project would include the installation of LID BMPs, which would mitigate at minimum the first flush or the equivalent of the greater between the 85th percentile storm and first 0.75-inch of rainfall for any storm event.

Based on the above, operation of the Project would result in a less than significant impact on groundwater quality.

6.3. CUMULATIVE IMPACT ANALYSIS

6.3.1. SURFACE WATER HYDROLOGY

The geographic context for the cumulative impact analysis on surface water hydrology is the Ballona Creek Watershed. The Project in conjunction with forecasted growth in the Ballona Creek Watershed could cumulatively increase stormwater runoff flows. However, as noted above, the Project does not have an adverse impact on stormwater flows. Also, in accordance with City of Los Angeles, related projects and other future development projects would be required to implement BMPs to manage stormwater in accordance with LID guidelines. Furthermore, the City of Los Angeles Department of Public Works would review each future development project on a case-by-case basis to ensure sufficient local and regional infrastructure is available to accommodate stormwater runoff. Therefore, potential cumulative impacts associated with Project on surface water hydrology would be less than significant.

6.3.2. SURFACE WATER QUALITY

Future growth in the Ballona Creek Watershed would be subject to NPDES requirements relating to water quality for both construction and operation. In addition, since the Project Site is located in a highly urbanized area, future land use changes or development are not likely to cause substantial changes in regional surface water quality. As noted above, the Project does not have an adverse impact on water quality, and would in fact improve the quality of onsite flows due to the introduction of new BMPs that would collect, treat, and discharge runoff from the Project Site. Also, it is anticipated that the Project and other future development projects would also be subject to LID requirements and implementation of measures to comply with total maximum daily loads. Increases in regional controls associated with other elements of the MS4 Permit would improve regional water quality over time. Therefore, based on the fact that the Project does not have an adverse impact and through compliance with all applicable laws, rules and regulations, cumulative impacts to surface water quality would be less than significant.

6.3.3. GROUNDWATER LEVEL

Cumulative groundwater hydrology impacts could result from the overall utilization of groundwater basins located in proximity to the Project Site and the related projects. In addition, interruptions to existing injection or supply wells or designated spreading grounds would have the potential to affect groundwater levels. Any calculation of the extent to which the related projects would extract or otherwise directly utilize groundwater would be speculative. Nonetheless, in certain circumstances, to the extent existing injection or supply wells or designated spreading grounds are located within or near the related project

sites, could adversely affect local and regional groundwater hydrology, including groundwater levels. In addition, the cumulative utilization of groundwater in the region, either as a result of water extraction under the related project sites or extraction from local basins by the local water supply agency to accommodate the related projects could also adversely affect local and regional groundwater hydrology. However, as described above, no spreading grounds, water supply wells, or injection wells are located within a 0.5-mile radius of the Project Site. In addition, Project development would not involve the temporary or permanent extraction of groundwater from the Project Site or otherwise utilize the groundwater.

Furthermore, as previously discussed, implementation of the Project would result in a decrease in impervious surface area. Any calculation of the extent to which the related projects would increase or decrease impervious or pervious surfaces that might affect groundwater hydrology would be speculative. In addition, as the related projects are located in a highly urbanized area, any reduction in groundwater recharge due to the overall net change in impervious area within the related project sites would be minimal in the context of the regional groundwater basin. Additionally, the Project would include the installation of SUSMP and LID BMPs, which would mitigate at minimum the first flush or the equivalent of the greater between the 85th percentile storm and first 0.75-inch of rainfall for any storm event, the proposed SUSMP and LID BMPs as a means of stormwater treatment and management within the Project Site and related project sites would not result in a cumulative effect to groundwater hydrology.

Based on the above, the Project would not make a cumulatively considerable contribution to cumulative impacts, and cumulative impacts to groundwater hydrology would be less than significant.

6.3.4. GROUNDWATER QUALITY

Future growth in the Los Angeles Coastal Plain Central Subbasin would be subject to LARWQCB requirements relating to groundwater quality. In addition, since the Project Site is located in a highly urbanized area, future land use changes or development are not likely to cause substantial changes in regional groundwater quality. As noted above, the Project does not have an adverse impact on groundwater quality. Also, it is anticipated that the Project and other future development projects would also be subject to LARWQCB requirements and implementation of measures to comply with total maximum daily loads. Therefore, based on the fact that the Project does not have an adverse impact and through compliance with all applicable laws, rules and regulations, cumulative impacts to groundwater quality would be less than significant.

7. LEVEL OF SIGNIFICANCE

Based on the analysis contained in this report, no significant impacts have been identified for surface water hydrology, surface water quality, groundwater level, or groundwater quality for this Project, with implementation of the proposed/required BMPs and the proposed Project Design Features.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X Areas determined to be outside the 0.2% annual chance floodplain.

GENERAL NOTES

1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STRUCTURE, CAPACITY AND BACKFILL DETAILS, PLEASE CONTACT YOUR CONTECH CONSTRUCTION PRODUCTS INC REPRESENTATIVE. www.contech-cpi.com
3. ALL ELEVATIONS, DIMENSIONS AND LOCATIONS OF RISERS AND INLETS SHALL BE VERIFIED BY THE ENGINEER OF RECORD.
4. PRIOR TO INSTALLATION OF THE SYSTEM A PRE-CONSTRUCTION MEETING SHALL BE CONDUCTED. THOSE REQUIRED TO ATTEND ARE THE SUPPLIER OF THE SYSTEM, THE GENERAL CONTRACTOR, SUB-CONTRACTORS AND THE ENGINEER.
5. THE CISTERN IS MANUFACTURED FROM STEEL REINFORCED POLYETHYLENE PLASTIC.
6. SYSTEM TO MEET AASHTO HS20/HS25 LIVE LOADING, PER AASHTO LRFD SECTION 12.
7. ACCESS COVERS TO MEET AASHTO M306 LOAD RATING.
8. MINIMUM COVER IS EQUAL TO PIPE DIAMETER/S AND NO LESS THAN 12-INCHES (305 mm) FROM TOP OF PIPE TO BOTTOM OF PAVEMENT. Ø72" (1800 mm) AND Ø84" (2100 mm) PIPE MINIMUM COVER IS 18-INCHES (457 mm), Ø96" (2400 mm) PIPE MINIMUM COVER IS 24-INCHES (610 mm), Ø120" (3000 mm) PIPE MINIMUM COVER IS 36-INCHES (900 mm).
9. FOR INFORMATION ON PRE-TREATMENT SYSTEMS, REFERENCE CONTECH PRE-TREATMENT SYSTEM STANDARD DETAILS OR CONTACT YOUR LOCAL CONTECH REPRESENTATIVE.

INSTALLATION NOTES

A. INSTALLATION GUIDE TO BE REVIEWED BY CONTRACTOR PRIOR TO INSTALLATION.
B. CONTRACTOR TO PROVIDE, INSTALL AND GROUT ALL INLET AND OUTLET PIPES.
C. CONTRACTOR TO PROVIDE AND INSTALL ALL BEDDING AND BACKFILL MATERIAL.
D. PRIOR TO PLACING BEDDING, THE FOUNDATION MUST BE CONSTRUCTED TO A UNIFORM AND STABLE GRADE. IN THE EVENT THAT UNSUITABLE FOUNDATION MATERIALS ARE ENCOUNTERED DURING EXCAVATION, A GEOGRID SHALL BE UTILIZED OR UNSUITABLE MATERIAL SHALL BE REMOVED AND BROUGHT BACK TO GRADE WITH FILL MATERIAL AS APPROVED BY THE ENGINEER OF RECORD. ONCE THE FOUNDATION PREPARATION IS COMPLETE, THE BEDDING MATERIAL CAN BE PLACED.
E. STONE EMBEDMENT MATERIAL SHALL BE INSTALLED TO 95% STANDARD PROCTOR DENSITY AND PLACED IN 6-INCH (152 mm) TO 8-INCH (203 mm) LIFTS SUCH THAT THERE IS NO MORE THAN A TWO LIFT DIFFERENTIAL BETWEEN ANY OF THE BARRELS AT ANY TIME. GRANULAR BACKFILL MATERIAL SHALL BE COMPACTED TO 90% SPD. BACKFILLING SHALL BE ADVANCED ALONG THE LENGTH OF THE BARRELS AT THE SAME RATE TO AVOID DIFFERENTIAL LOADING AND DISPLACEMENT OF THE BARRELS. THE MINIMUM PIPE SPACING MUST BE MAINTAINED.
F. REFER TO INSTALLATION GUIDE FOR TEMPORARY CONSTRUCTION LOADING GUIDELINES.
G. IT IS ALWAYS THE RESPONSIBILITY OF THE CONTRACTOR TO FOLLOW OSHA GUIDELINES FOR SAFE PRACTICES.
H. GENERAL INSTALLATION METHODS AND MATERIALS TO BE IN ACCORDANCE WITH ASTM D2321.

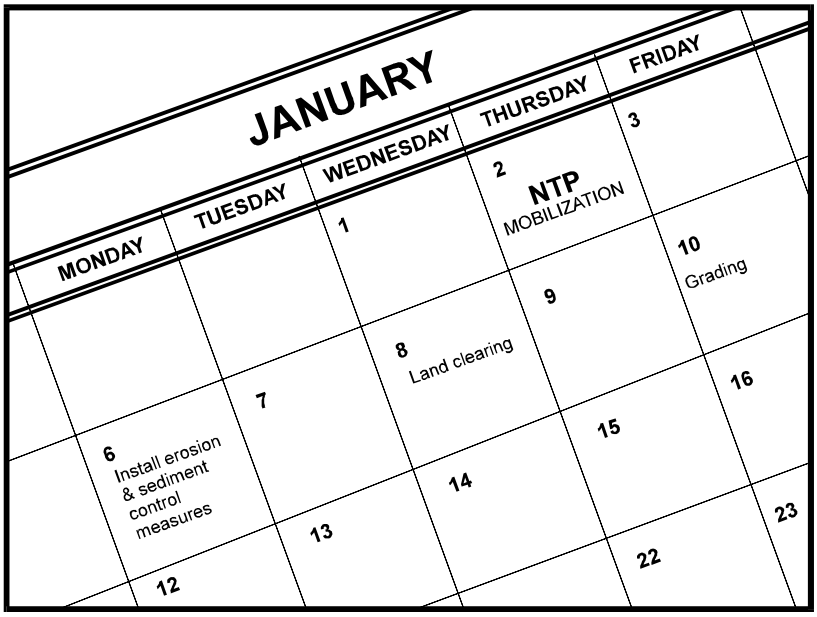
EXHIBIT 2
TYPICAL EROSION CONTROL BMPS

Scheduling EC-1



Description and Purpose

Scheduling is the development of a written plan that includes sequencing of construction activities and the implementation of BMPs such as erosion control and sediment control while taking local climate (rainfall, wind, etc.) into consideration. The purpose is to reduce the amount and duration of soil exposed to erosion by wind, rain, runoff, and vehicle tracking, and to perform the construction activities and control practices in accordance with the planned schedule.

Suitable Applications

Proper sequencing of construction activities to reduce erosion potential should be incorporated into the schedule of every construction project especially during rainy season. Use of other, more costly yet less effective, erosion and sediment control BMPs may often be reduced through proper construction sequencing.

Limitations

- Environmental constraints such as nesting season prohibitions reduce the full capabilities of this BMP.

Implementation

- Avoid rainy periods. Schedule major grading operations during dry months when practical. Allow enough time before rainfall begins to stabilize the soil with vegetation or physical means or to install sediment trapping devices.
- Plan the project and develop a schedule showing each phase of construction. Clearly show how the rainy season relates

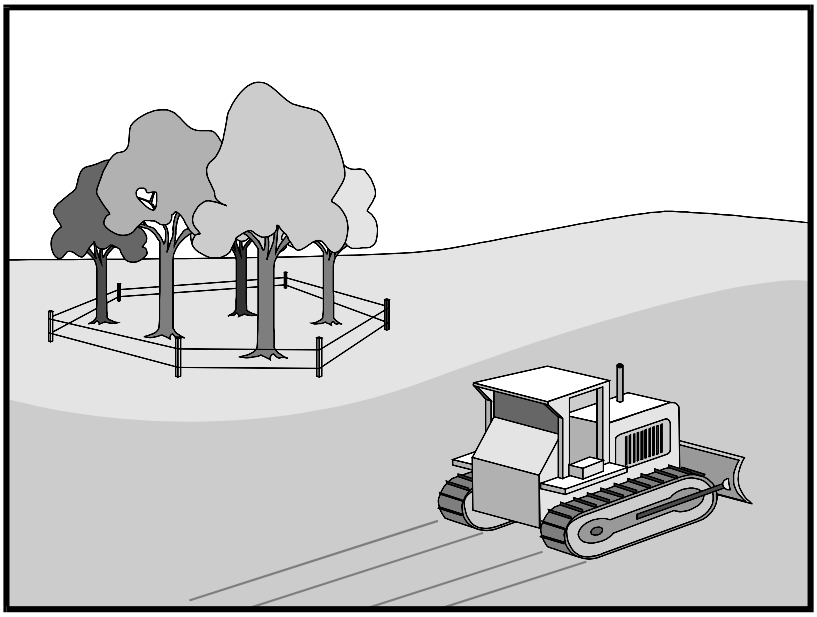
Preservation Of Existing Vegetation EC-2



Description and Purpose

Carefully planned preservation of existing vegetation minimizes the potential of removing or injuring existing trees, vines, shrubs, and grasses that protect soil from erosion.

Suitable Applications

Preservation of existing vegetation is suitable for use on most projects. Large project sites often provide the greatest opportunity for use of this BMP. Suitable applications include the following:

- Areas within the site where no construction activity occurs, or occurs at a later date. This BMP is especially suitable to multi year projects where grading can be phased.
- Areas where natural vegetation exists and is designated for preservation. Such areas often include steep slopes, watercourse, and building sites in wooded areas.
- Areas where local, state, and federal government require preservation, such as vernal pools, wetlands, marshes, certain oak trees, etc. These areas are usually designated on the plans, or in the specifications, permits, or environmental documents.
- Where vegetation designated for ultimate removal can be temporarily preserved and be utilized for erosion control and sediment control.

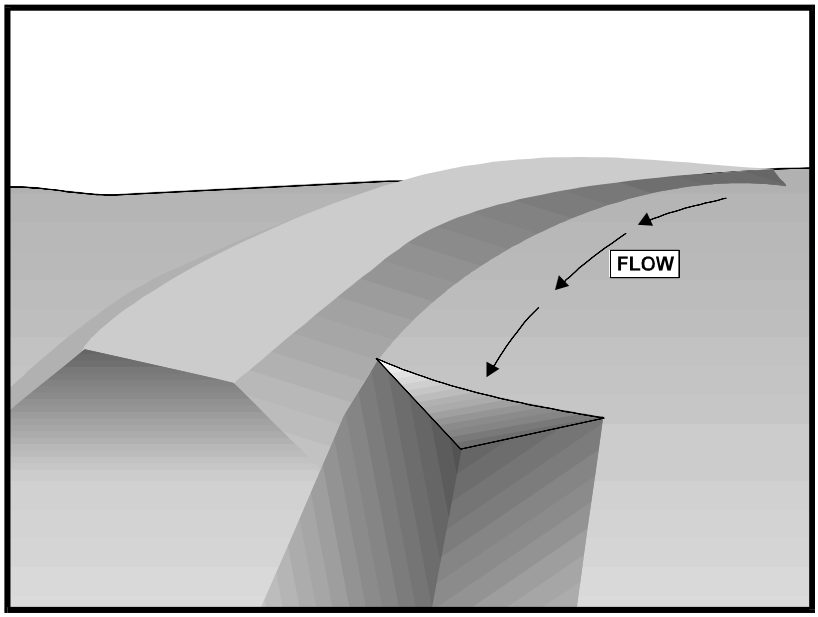
Earth Dikes and Drainage Swales EC-9



Description and Purpose

An earth dike is a temporary berm or ridge of compacted soil used to divert runoff or channel water to a desired location. A drainage swale is a shaped and sloped depression in the soil surface used to convey runoff to a desired location. Earth dikes and drainage swales are used to divert off site runoff around the construction site, divert runoff from stabilized areas and disturbed areas, and direct runoff into sediment basins or traps.

Suitable Applications

Earth dikes and drainage swales are suitable for use, individually or together, where runoff needs to be diverted from one area and conveyed to another.

- Earth dikes and drainage swales may be used:
  - To convey surface runoff down sloping land
  - To intercept and divert runoff to avoid sheet flow over sloped surfaces
  - To divert and direct runoff towards a stabilized watercourse, drainage pipe or channel
  - To intercept runoff from paved surfaces
  - Below steep grades where runoff begins to concentrate
  - Along roadways and facility improvements subject to flood drainage

Organics	

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Water conservation practices are activities that use water during the construction of a project in a manner that avoids causing erosion and the transport of pollutants offsite. These practices can reduce or eliminate non-stormwater discharges.

Suitable Applications

Water conservation practices are suitable for all construction sites where water is used, including piped water, metered water, trucked water, and water from a reservoir.

Limitations

- None identified.

Implementation

- Keep water equipment in good working condition.
- Stabilize water truck filling area.
- Repair water leaks promptly.
- Washing of vehicles and equipment on the construction site is discouraged.
- Avoid using water to clean construction areas. If water must be used for cleaning or surface preparation, surface should be swept and vacuumed first to remove dirt. This will minimize amount of water required.

SE-5: Fiber Roll

SE-6: Gravel Bag Berm

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Dewatering operations are practices that manage the discharge of pollutants when non-stormwater and accumulated precipitation (stormwater) must be removed from a work location to proceed with construction work or to provide vector control.

The General Permit incorporates Numeric Action Levels (NAL) for turbidity (see Section 2 of this handbook to determine your project's risk level and if you are subject to these requirements).

Discharges from dewatering operations can contain high levels of fine sediment that, if not properly treated, could lead to exceedances of the General Permit requirements or Basin Plan standards.

The dewatering operations described in this fact sheet are not Active Treatment Systems (ATS) and do not include the use of chemical coagulations, chemical flocculation or electrocoagulation.

Suitable Applications

These practices are implemented for discharges of non-stormwater from construction sites. Non-stormwaters include, but are not limited to, groundwater, water from cofferdams, water diversions, and waters used during construction activities that must be removed from a work area to facilitate construction.

Practices identified in this section are also appropriate for implementation when managing the removal of accumulated

Paving and Grinding Operations NS-3

Bacteria	
Oil and Grease	☑
Organics	

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Prevent or reduce the discharge of pollutants from paving operations, using measures to prevent runon and runoff pollution, properly disposing of wastes, and training employees and subcontractors.

The General Permit incorporates Numeric Action Levels (NAL) for pH and turbidity (see Section 2 of this handbook to determine your project's risk level and if you are subject to these requirements).

Many types of construction materials associated with paving and grinding operations, including mortar, concrete, and cement and their associated wastes have basic chemical properties that can raise pH levels outside of the permitted range. Additional care should be taken when managing these materials to prevent them from coming into contact with stormwater flows, which could lead to exceedances of the General Permit requirements.

Suitable Applications

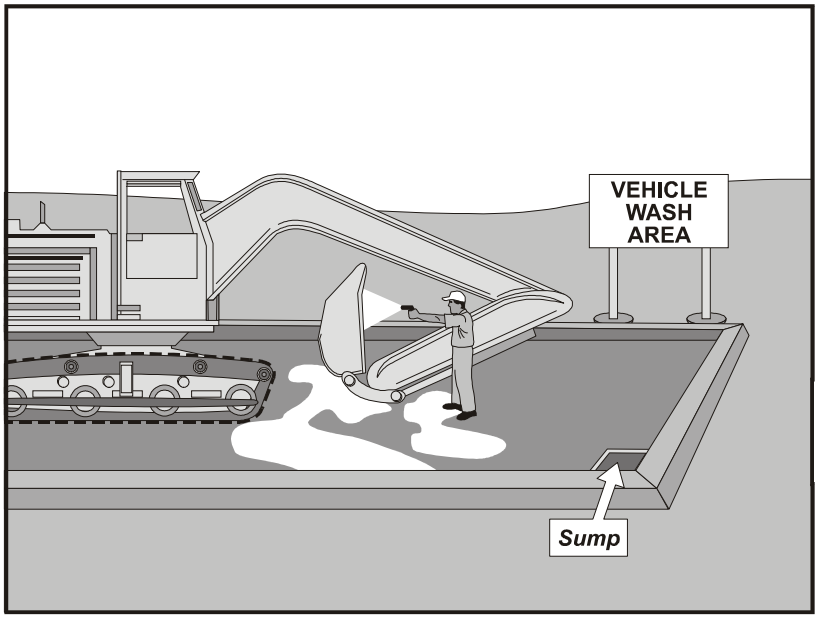
These procedures are implemented where paving, surfacing, resurfacing, or sawcutting, may pollute stormwater runoff or discharge to the storm drain system or watercourses.

Limitations

- Paving opportunities may be limited during wet weather.

  Discharges of freshly paved surfaces may raise pH to environmentally harmful levels and trigger permit violations.

Vehicle and Equipment Cleaning NS-8



Categories

EC	Erosion Control

Metals	
Bacteria	
Oil and Grease	☑
Organics	☑

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Vehicle and equipment cleaning procedures and practices eliminate or reduce the discharge of pollutants to stormwater from vehicle and equipment cleaning operations. Procedures and practices include but are not limited to: using offsite facilities; washing in designated, contained areas only; eliminating discharges to the storm drain by infiltrating the wash water; and training employees and subcontractors in proper cleaning procedures.

Suitable Applications

These procedures are suitable on all construction sites where vehicle and equipment cleaning is performed.

Limitations

Even phosphate-free, biodegradable soaps have been shown to be toxic to fish before the soap degrades. Sending vehicles/equipment offsite should be done in conjunction with TC-1, Stabilized Construction Entrance/Exit.

Implementation

Other options to washing equipment onsite include contracting with either an offsite or mobile commercial washing business. These businesses may be better equipped to handle and dispose of the wash waters properly. Performing this work offsite can also be economical by eliminating the need for a separate washing operation onsite.

If washing operations are to take place onsite, then:

Metals	
Bacteria	
Oil and Grease	☑
Organics	

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

The construction and retrofit of bridges and retaining walls often include driving piles for foundation support and shoring operations. Driven piles are typically constructed of precast concrete, steel, or timber. Driven sheet piles are also used for shoring and cofferdam construction. Proper control and use of equipment, materials, and waste products from pile driving operations will reduce or eliminate the discharge of potential pollutants to the storm drain system, watercourses, and waters of the United States.

Suitable Applications

These procedures apply to all construction sites near or adjacent to a watercourse or groundwater where permanent and temporary pile driving (impact and vibratory) takes place, including operations using pile shells as well as construction of cast-in-steel-shell and cast-in-drilled-hole piles.

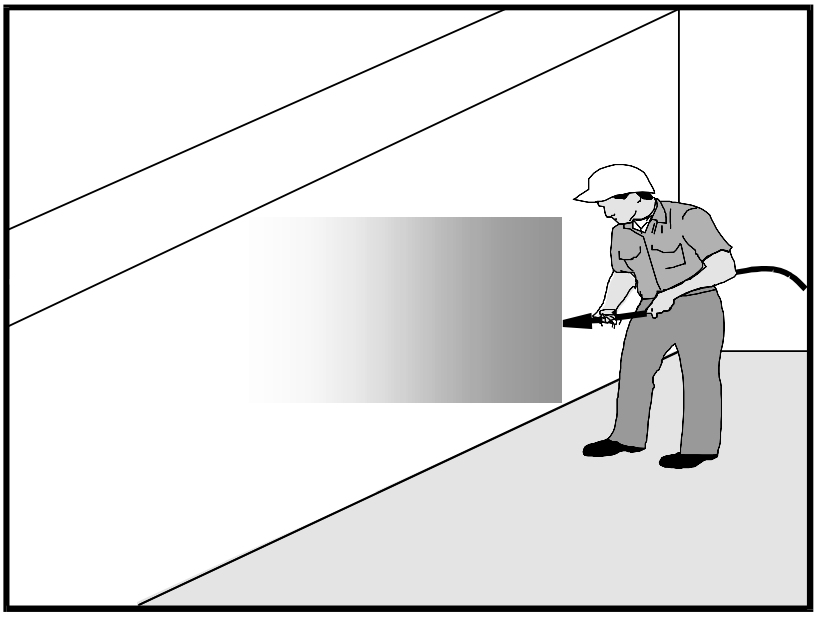
Limitations

None identified.

Implementation

- Use drip pans or absorbent pads during vehicle and equipment operation, maintenance, cleaning, fueling, and storage. Refer to NS-8, Vehicle and Equipment Cleaning, NS-9, Vehicle and Equipment Fueling, and NS-10, Vehicle and Equipment Maintenance.

Concrete Curing NS-12



Categories		
EC	Erosion Control	
SE	Sediment Control	
TC	Tracking Control

Bacteria	
Oil and Grease	☑
Organics	

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Concrete curing is used in the construction of structures such as bridges, retaining walls, pump houses, large slabs, and structured foundations. Concrete curing includes the use of both chemical and water methods.

Concrete and its associated curing materials have basic chemical properties that can raise the pH of water to levels outside of the permitted range. Discharges of stormwater and non-stormwater exposed to concrete during curing may have a high pH and may contain chemicals, metals, and fines. The General Permit incorporates Numeric Action Levels (NAL) for pH (see Section 2 of this handbook to determine your project's risk level and if you are subject to these requirements).

Proper procedures and care should be taken when managing concrete curing materials to prevent them from coming into contact with stormwater flows, which could result in a high pH discharge.

Suitable Applications

Suitable applications include all projects where Portland Cement Concrete (PCC) and concrete curing chemicals are placed where they can be exposed to rainfall, runoff from other areas, or where runoff from the PCC will leave the site.

Limitations

- Runoff contact with concrete waste can raise pH levels in the water to environmentally harmful levels and trigger permit violations.

Concrete Finishing NS-13

Organics	☑

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Concrete finishing methods are used for bridge deck rehabilitation, paint removal, curing compound removal, and final surface finish appearances. Methods include sand blasting, shot blasting, grinding, or high pressure water blasting. Stormwater and non-stormwater exposed to concrete finishing by-products may have a high pH and may contain chemicals, metals, and fines. Proper procedures and implementation of appropriate BMPs can minimize the impact that concrete-finishing methods may have on stormwater and non-stormwater discharges.

The General Permit incorporates Numeric Action Levels (NAL) for pH (see Section 2 of this handbook to determine your project's risk level and if you are subject to these requirements).

Concrete and its associated curing materials have basic chemical properties that can raise pH levels outside of the permitted range. Additional care should be taken when managing these materials to prevent them from coming into contact with stormwater flows, which could lead to exceedances of the General Permit requirements.

Suitable Applications

These procedures apply to all construction locations where concrete finishing operations are performed.

Sediment Trap SE-3

SE-2 Sediment Basin (for larger areas)

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

A sediment trap is a containment area where sediment-laden runoff is temporarily detained under quiescent conditions, allowing sediment to settle out or before the runoff is discharged by gravity flow. Sediment traps are formed by excavating or constructing an earthen embankment across a waterway or low drainage area.

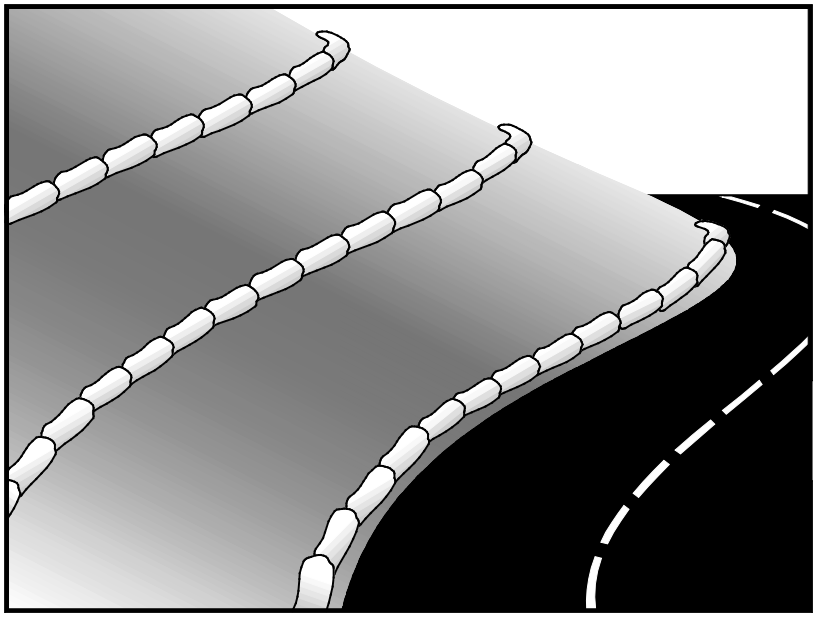
Trap design guidance provided in this fact sheet is not intended to guarantee compliance with numeric discharge limits (numeric action levels or numeric effluent limits for turbidity). Compliance with discharge limits requires a thoughtful approach to comprehensive BMP planning, implementation, and maintenance. Therefore, optimally designed and maintained sediment traps should be used in conjunction with a comprehensive system of BMPs.

Suitable Applications

Sediment traps should be considered for use:

- At the perimeter of the site at locations where sediment-laden runoff is discharged offsite.
- At multiple locations within the project site where sediment control is needed.
- Around or upslope from storm drain inlet protection measures.
- Sediment traps may be used on construction projects where the drainage area is less than 5 acres. Traps would be

Gravel Bag Berm SE-6



Description and Purpose

A gravel bag berm is a series of gravel-filled bags placed on a level contour to intercept sheet flows. Gravel bags pond sheet flow runoff, allowing sediment to settle out, and release runoff slowly as sheet flow, preventing erosion.

Suitable Applications

Gravel bag berms may be suitable:

- As a linear sediment control measure:
  - Below the toe of slopes and erodible slopes
  - As sediment traps at culvert/pipe outlets
  - Below other small cleared areas
  - Along the perimeter of a site
  - Down slope of exposed soil areas
  - Around temporary stockpiles and spoil areas
  - Parallel to a roadway to keep sediment off paved areas
  - Along streams and channels
- As a linear erosion control measure:
  - Along the face and at grade breaks of exposed and erodible slopes to shorten slope length and spread runoff as sheet flow.

Description and Purpose

Street sweeping and vacuuming includes use of self-propelled and walk-behind equipment to remove sediment from streets and roadways, and to clean paved surfaces in preparation for final paving. Sweeping and vacuuming prevents sediment from the project site from entering storm drains or receiving waters.

Suitable Applications

Sweeping and vacuuming are suitable anywhere sediment is tracked from the project site onto public or private paved streets and roads, typically at points of egress. Sweeping and vacuuming are also applicable during preparation of paved surfaces for final paving.

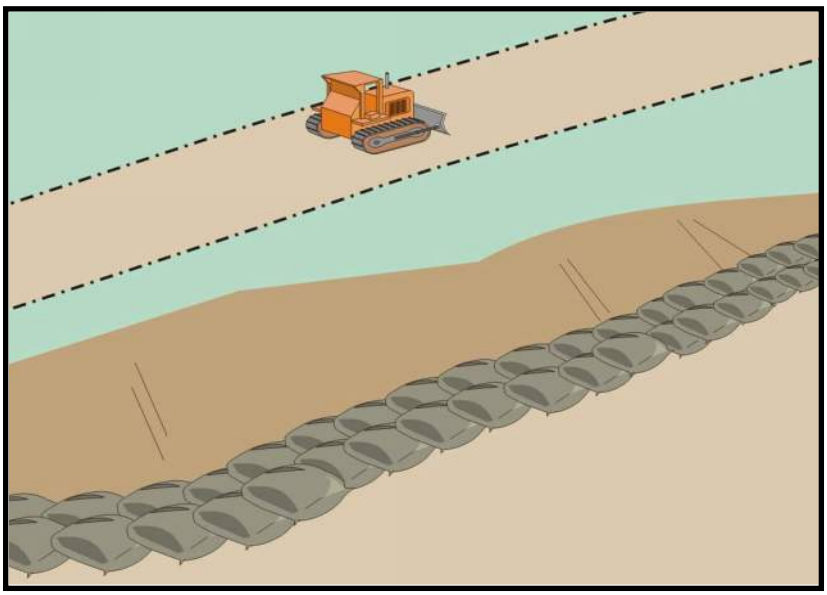
Limitations

Sweeping and vacuuming may not be effective when sediment is wet or when tracked soil is caked (caked soil may need to be scraped loose).

Implementation

- Controlling the number of points where vehicles can leave the site will allow sweeping and vacuuming efforts to be focused, and perhaps save money.
- Inspect potential sediment tracking locations daily.
- Visible sediment tracking should be swept or vacuumed on a daily basis.

Sandbag Barrier SE-8



Categories		
EC	Erosion Control	☒
SE	Sediment Control	☑
TC	Tracking Control	
WE	Wind Erosion Control	
NS	Non-Stormwater Management Control	
WM	Waste Management and Materials Pollution Control	

Legend:
☑ **Primary Category**
☒ **Secondary Category**

Description and Purpose

A sandbag barrier is a series of sand-filled bags placed on a level contour to intercept or to divert sheet flows. Sandbag barriers placed on a level contour pond sheet flow runoff, allowing sediment to settle out.

Suitable Applications

Sandbag barriers may be a suitable control measure for the applications described below. It is important to consider that sand bags are less porous than gravel bags and ponding or flooding can occur behind the barrier. Also, sand is easily transported by runoff if bags are damaged or ruptured. The SWPPP Preparer should select the location of a sandbag barrier with respect to the potential for flooding, damage, and the ability to maintain the BMP.

- As a linear sediment control measure:
  - Below the toe of slopes and erodible slopes.
  - As sediment traps at culvert/pipe outlets.
  - Below other small cleared areas.
  - Along the perimeter of a site.
  - Down slope of exposed soil areas.
  - Around temporary stockpiles and spoil areas.
  - Parallel to a roadway to keep sediment off paved areas.
  - Along streams and channels.

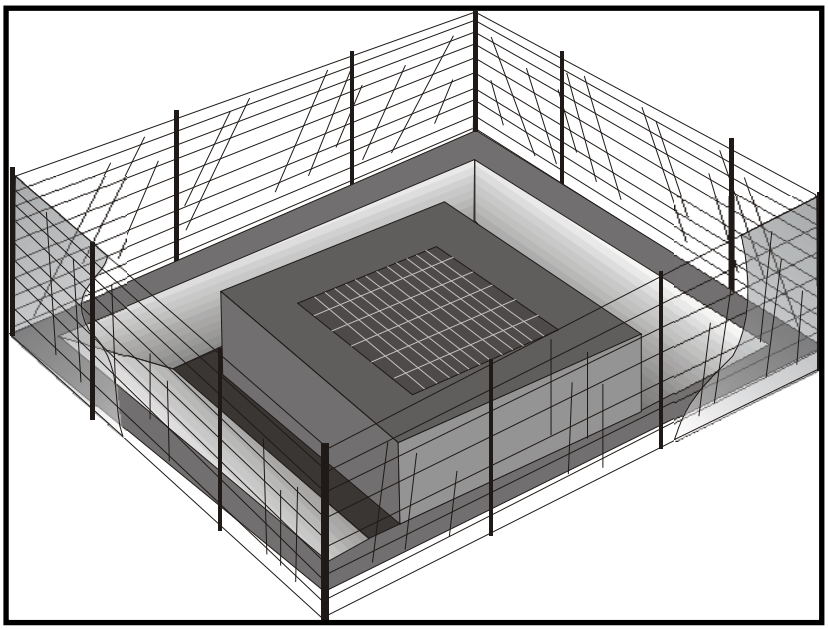
If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Storm Drain Inlet Protection SE-10



Description and Purpose

Storm drain inlet protection consists of a sediment filter or an impounding area in, around or upstream of a storm drain, drop inlet, or curb inlet. Storm drain inlet protection measures temporarily pond runoff before it enters the storm drain, allowing sediment to settle. Some filter configurations also remove sediment by filtering, but usually the ponding action results in the greatest sediment reduction. Temporary geotextile storm drain inserts attach underneath storm drain grates to capture and filter storm water.

Suitable Applications

- Every storm drain inlet receiving runoff from unstabilized or otherwise active work areas should be protected. Inlet protection should be used in conjunction with other erosion and sediment controls to prevent sediment-laden stormwater and non-stormwater discharges from entering the storm drain system.

Limitations

- Drainage area should not exceed 1 acre.
- In general straw bales should not be used as inlet protection.
- Requires an adequate area for water to pond without encroaching into portions of the roadway subject to traffic.
- Sediment removal may be inadequate to prevent sediment discharges in high flow conditions or if runoff is heavily sediment laden. If high flow conditions are expected, use

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Active Treatment Systems (ATS) reduce turbidity of construction site runoff by introducing chemicals to stormwater through direct dosing or an electrical current to enhance flocculation, coagulation, and settling of the suspended sediment. Coagulants and flocculants are used to enhance settling and removal of suspended sediments and generally include inorganic salts and polymers (USACE, 2001). The increased flocculation aids in sedimentation and ability to remove fine suspended sediments, thus reducing stormwater runoff turbidity and improving water quality.

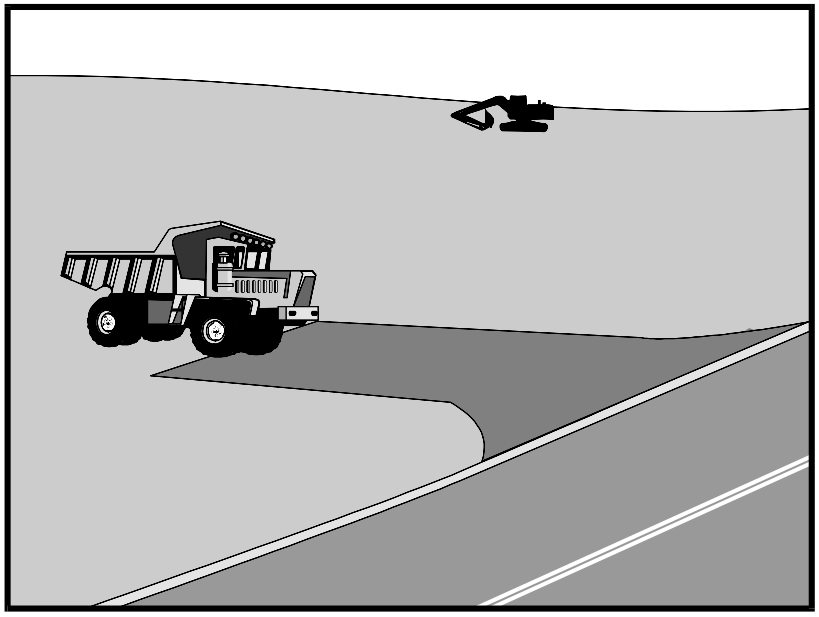
Suitable Applications

ATS can reliably provide exceptional reductions of turbidity and associated pollutants and should be considered where turbid discharges to sediment and turbidity sensitive waters cannot be avoided using traditional BMPs. Additionally, it may be appropriate to use an ATS when site constraints inhibit the ability to construct a correctly sized sediment basin, when clay and/or highly erosive soils are present, or when the site has very steep or long slope lengths.

Limitations

Dischargers choosing to utilize chemical treatment in an ATS must follow all guidelines of the Construction General Permit Attachment F – Active Treatment System Requirements. General limitations are as follows:

Stabilized Construction Entrance/Exit TC-1



Categories		
EC	Erosion Control	☒
SE	Sediment Control	☒
TC	Tracking Control	☑
WE	Wind Erosion Control	
NS	Non-Stormwater Management Control	
WM	Waste Management and Materials Pollution Control	

Legend:
☑ **Primary Objective**
☒ **Secondary Objective**

Description and Purpose

A stabilized construction access is defined by a point of entrance/exit to a construction site that is stabilized to reduce the tracking of mud and dirt onto public roads by construction vehicles.

Suitable Applications

Use at construction sites:

- Where dirt or mud can be tracked onto public roads.
- Adjacent to water bodies.
- Where poor soils are encountered.
- Where dust is a problem during dry weather conditions.

Limitations

- Entrances and exits require periodic top dressing with additional stones.
- This BMP should be used in conjunction with street sweeping on adjacent public right of way.
- Entrances and exits should be constructed on level ground only.
- Stabilized construction entrances are rather expensive to construct and when a wash rack is included, a sediment trap of some kind must also be provided to collect wash water runoff.

Targeted Constituents

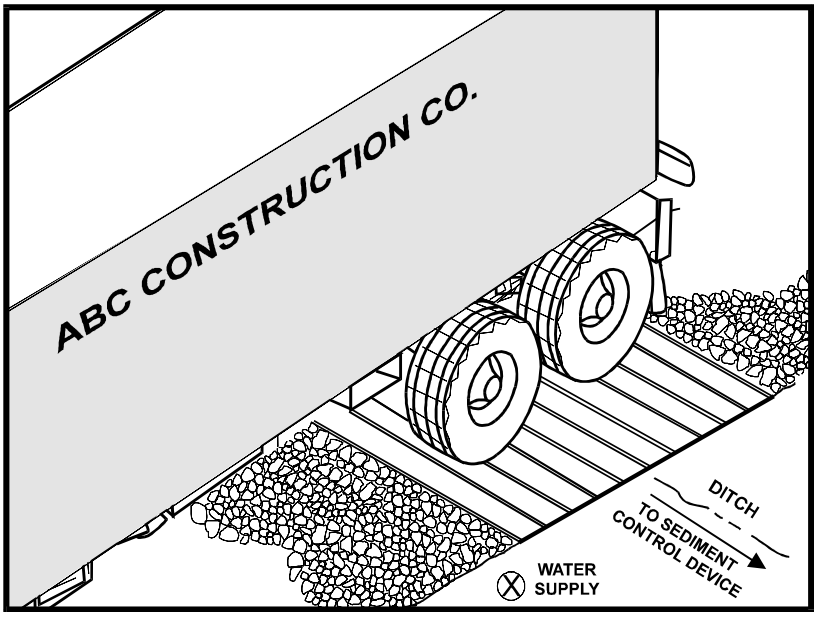
Entrance/Outlet Tire Wash TC-3



Description and Purpose

A tire wash is an area located at stabilized construction access points to remove sediment from tires and under carriages and to prevent sediment from being transported onto public roadways.

Suitable Applications

Tire washes may be used on construction sites where dirt and mud tracking onto public roads by construction vehicles may occur.

Limitations

- The tire wash requires a supply of wash water.
- A turnout or doublewide exit is required to avoid having entering vehicles drive through the wash area.
- Do not use where wet tire trucks leaving the site leave the road dangerously slick.

Implementation

- Incorporate with a stabilized construction entrance/exit. See TC-1, Stabilized Construction Entrance/Exit.
- Construct on level ground when possible, on a pad of coarse aggregate greater than 3 in. but smaller than 6 in. A geotextile fabric should be placed below the aggregate.
- Wash rack should be designed and constructed/manufactured for anticipated traffic loads.

EC-5 Soil Binders

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

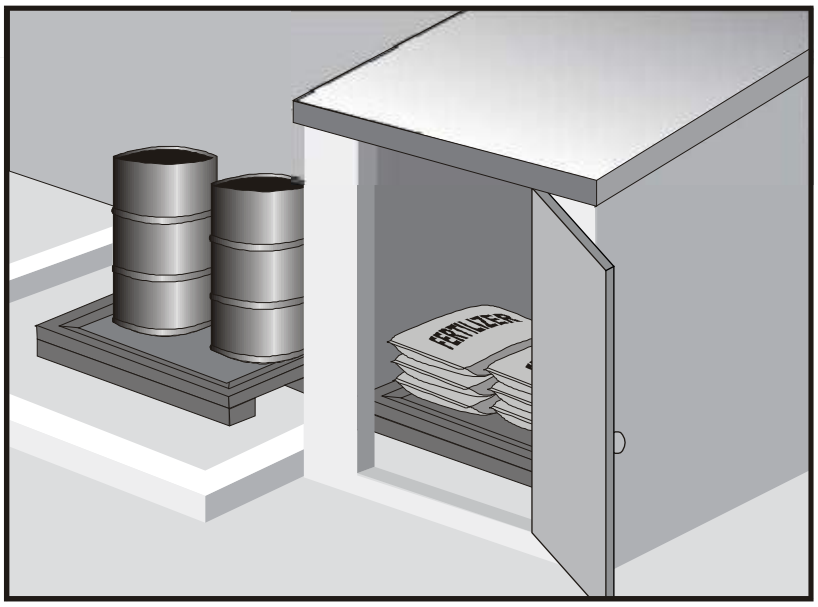
Wind erosion or dust control consists of applying water or other chemical dust suppressants as necessary to prevent or alleviate dust nuisance generated by construction activities. Covering small stockpiles or areas is an alternative to applying water or other dust palliatives.

California's Mediterranean climate, with a short "wet" season and a typically long, hot "dry" season, allows the soils to thoroughly dry out. During the dry season, construction activities are at their peak, and disturbed and exposed areas are increasingly subject to wind erosion, sediment tracking and dust generated by construction equipment. Site conditions and climate can make dust control more of an erosion problem than water based erosion. Additionally, many local agencies, including Air Quality Management Districts, require dust control and/or dust control permits in order to comply with local nuisance laws, opacity laws (visibility impairment) and the requirements of the Clean Air Act. Wind erosion control is required to be implemented at all construction sites greater than 1 acre by the General Permit.

Suitable Applications

Most BMPs that provide protection against water-based erosion will also protect against wind-based erosion and dust control requirements required by other agencies will generally meet wind erosion control requirements for water quality protection. Wind erosion control BMPs are suitable during the following construction activities:

Material Delivery and Storage WM-1



Categories		
EC	Erosion Control	
SE	Sediment Control	
TC	Tracking Control	
WE	Wind Erosion Control	
NS	Non-Stormwater Management Control	
WM	Waste Management and Materials Pollution Control	☑

Legend:
☑ **Primary Category**
☒ **Secondary Category**

Description and Purpose

Prevent, reduce, or eliminate the discharge of pollutants from material delivery and storage to the stormwater system or watercourses by minimizing the storage of hazardous materials onsite, storing materials in watertight containers and/or a completely enclosed designated area, installing secondary containment, conducting regular inspections, and training employees and subcontractors.

This best management practice covers only material delivery and storage. For other information on materials, see WM-2, Material Use, or WM-4, Spill Prevention and Control. For information on wastes, see the waste management BMPs in this section.

Suitable Applications

These procedures are suitable for use at all construction sites with delivery and storage of the following materials:

- Soil stabilizers and binders
- Pesticides and herbicides
- Fertilizers
- Detergents
- Plaster
- Petroleum products such as fuel, oil, and grease

Targeted Constituents

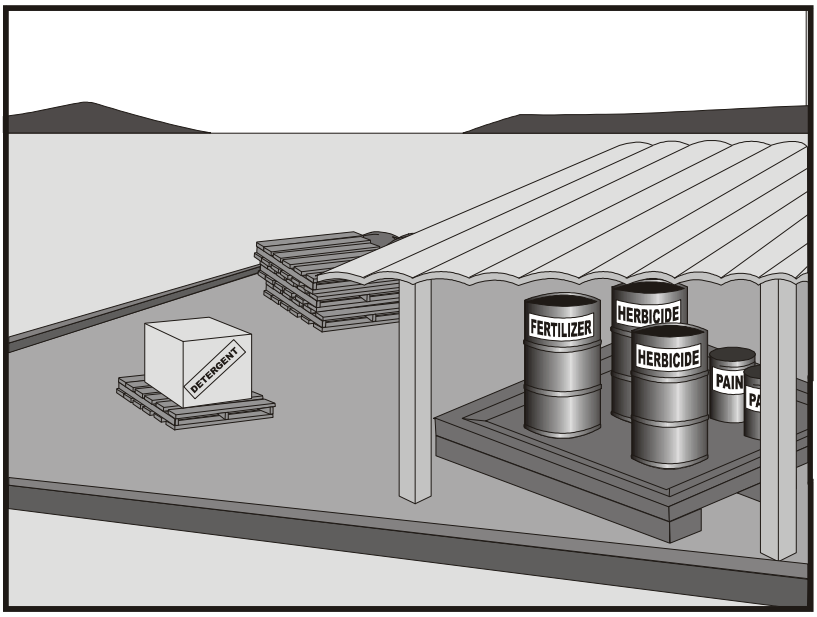
If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Material Use WM-2



Description and Purpose

Prevent or reduce the discharge of pollutants to the storm drain system or watercourses from material use by using alternative products, minimizing hazardous material use onsite, and training employees and subcontractors.

Suitable Applications

This BMP is suitable for use at all construction projects. These procedures apply when the following materials are used or prepared onsite:

- Pesticides and herbicides
- Fertilizers
- Detergents
- Petroleum products such as fuel, oil, and grease
- Asphalt and other concrete components
- Other hazardous chemicals such as acids, lime, glues, adhesives, paints, solvents, and curing compounds
- Other materials that may be detrimental if released to the environment

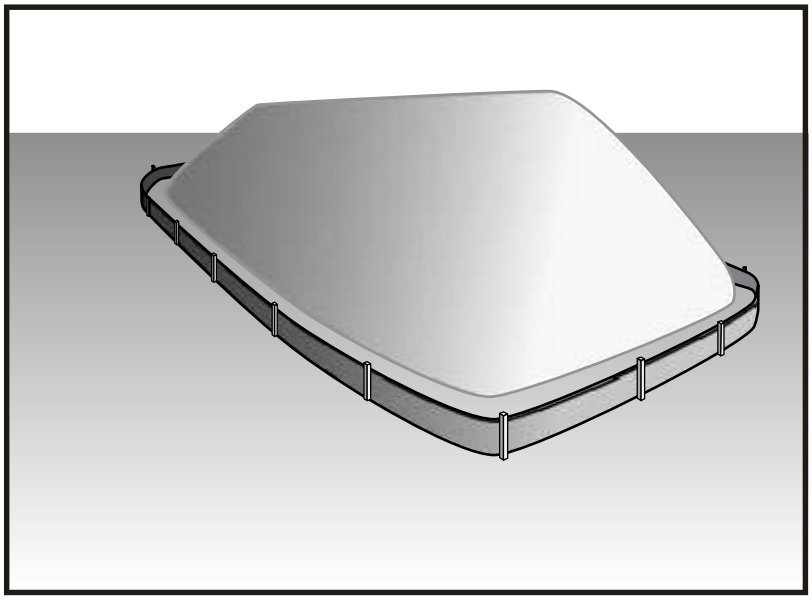
Stockpile Management WM-3



Categories		
EC	Erosion Control	
SE	Sediment Control	☒
TC	Tracking Control	
WE	Wind Erosion Control	
NS	Non-Stormwater Management Control	☒
WM	Waste Management and Materials Pollution Control	☑

Legend:
☑ **Primary Category**
☒ **Secondary Category**

Description and Purpose

Stockpile management procedures and practices are designed to reduce or eliminate air and stormwater pollution from stockpiles of soil, soil amendments, sand, paving materials such as portland cement concrete (PCC) rubble, asphalt concrete (AC), asphalt concrete rubble, aggregate base, aggregate sub base or pre-mixed aggregate, asphalt minder (so called "cold mix" asphalt), and pressure treated wood.

Suitable Applications

Implement in all projects that stockpile soil and other loose materials.

Limitations

- Plastic sheeting as a stockpile protection is temporary and hard to manage in windy conditions. Where plastic is used, consider use of plastic tarps with nylon reinforcement which may be more durable than standard sheeting.
- Plastic sheeting can increase runoff volume due to lack of infiltration and potentially cause perimeter control failure.
- Plastic sheeting breaks down faster in sunlight.
- The use of Plastic materials and photodegradable plastics should be avoided.

Implementation

Protection of stockpiles is a year-round requirement. To properly manage stockpiles:

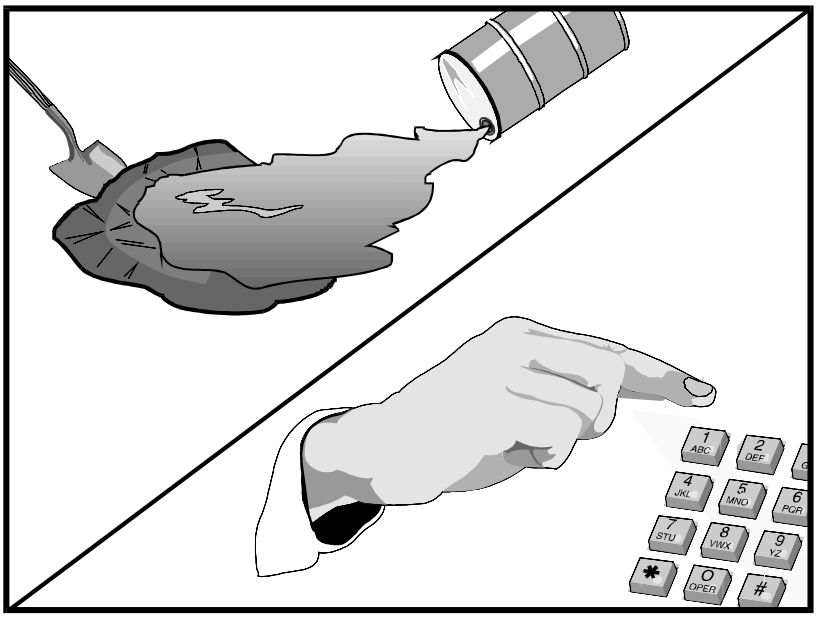
Spill Prevention and Control WM-4



Description and Purpose

Prevent or reduce the discharge of pollutants to drainage systems or watercourses from leaks and spills by reducing the chance for spills, stopping the source of spills, containing and cleaning up spills, properly disposing of spill materials, and training employees.

This best management practice covers only spill prevention and control. However, WM-1, Materials Delivery and Storage, and WM-2, Material Use, also contain useful information, particularly on spill prevention. For information on wastes, see the waste management BMPs in this section.

Suitable Applications

This BMP is suitable for all construction projects. Spill control procedures are implemented anytime chemicals or hazardous substances are stored on the construction site, including the following materials:

- Soil stabilizers/binders
- Dust palliatives
- Herbicides
- Growth inhibitors
- Fertilizers
- Deicing/anti-icing chemicals

Description and Purpose

Solid waste management procedures and practices are designed to prevent or reduce the discharge of pollutants to stormwater from solid or construction waste by providing designated waste collection areas and containers, arranging for regular disposal, and training employees and subcontractors.

Suitable Applications

This BMP is suitable for construction sites where the following wastes are generated or stored:

- Solid waste generated from trees and shrubs removed during land clearing, demolition of existing structures (rubble), and building construction
- Packaging materials including wood, paper, and plastic
- Scrap or surplus building materials including scrap metals, rubber, plastic, glass pieces, and masonry products
- Domestic wastes including food containers such as beverage cans, coffee cups, paper bags, plastic wrappers, and cigarettes
- Construction wastes including brick, mortar, timber, steel and metal scraps, pipe and electrical cuttings, non-hazardous equipment parts, styrofoam and other materials used to transport and package construction materials

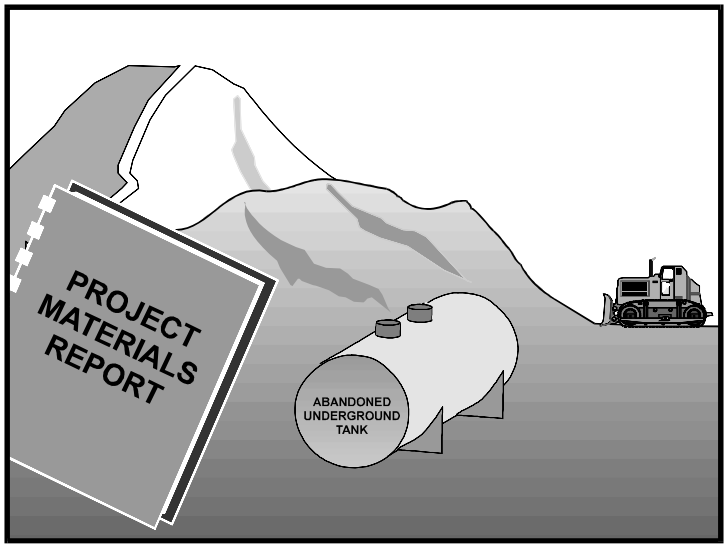
Contaminated Soil Management WM-7



Categories		
EC	Erosion Control	
SE	Sediment Control	
TC	Tracking Control	
WE	Wind Erosion Control	
NS	Non-Stormwater Management Control	
WM	Waste Management and Materials Pollution Control	☑

Legend:
☑ **Primary Objective**
☒ **Secondary Objective**

Description and Purpose

Prevent or reduce the discharge of pollutants to stormwater from contaminated soil and highly acidic or alkaline soils by conducting pre-construction surveys, inspecting excavations regularly, and remediating contaminated soil promptly.

Suitable Applications

Contaminated soil management is implemented on construction projects in highly urbanized or industrial areas where soil contamination may have occurred due to spills, illicit discharges, aerial deposition, past use and leaks from underground storage tanks.

Limitations

Contaminated soils that cannot be treated onsite must be disposed of offsite by a licensed hazardous waste hauler. The presence of contaminated soil may indicate contaminated water as well. See NS-2, Dewatering Operations, for more information.

The procedures and practices presented in this BMP are general. The contractor should identify appropriate practices and procedures for the specific contaminants known to exist or discovered onsite.

Implementation

Most owners and developers conduct pre-construction environmental assessments as a matter of routine. Contaminated soils are often identified during project planning and development with known locations identified in the plans, specifications and in the SWPPP. The contractor should review applicable reports and investigate appropriate call-outs in the

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Prevent the discharge of pollutants to stormwater from concrete waste by conducting washout onsite or offsite in a designated area, and by employee and subcontractor training.

The General Permit incorporates Numeric Action Levels (NAL) for pH (see Section 2 of this handbook to determine your project's risk level and if you are subject to these requirements).

Many types of construction materials, including mortar, concrete, stucco, cement and block and their associated wastes have basic chemical properties that can raise pH levels outside of the permitted range. Additional care should be taken when managing these materials to prevent them from coming into contact with stormwater flows and raising pH to levels outside the accepted range.

Suitable Applications

Concrete waste management procedures and practices are implemented on construction projects where:

- Concrete is used as a construction material or where concrete dust and debris result from demolition activities.
- Slurries containing portland cement concrete (PCC) are generated, such as from saw cutting, coring, grinding, grooving, and hydro-concrete demolition.
- Concrete trucks and other concrete-coated equipment are washed onsite.

Sanitary/Septic Waste Management WM-9

Organics	☑

Potential Alternatives

None

If User/Subscriber modifies this fact sheet in any way, the CASQA name/logo and footer below must be removed from each page and not appear on the modified version.

Description and Purpose

Proper sanitary and septic waste management prevent the discharge of pollutants to stormwater from sanitary and septic waste by providing convenient, well-maintained facilities, and arranging for regular service and disposal.

Suitable Applications

Sanitary septic waste management practices are suitable for use at all construction sites that use temporary or portable sanitary and septic waste systems.

Limitations

None identified.

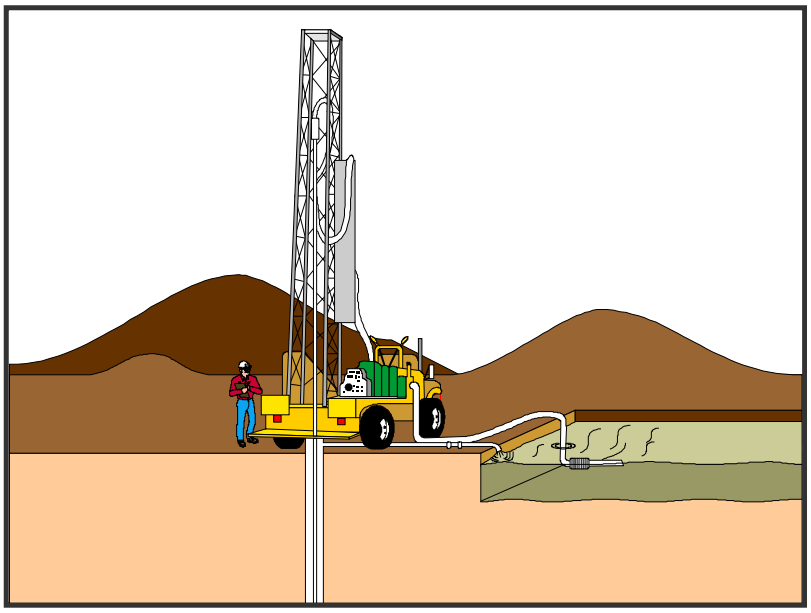
Implementation

Sanitary or septic wastes should be treated or disposed of in accordance with state and local requirements. In many cases, one contract with a local facility supplier will be all that it takes to make sure sanitary wastes are properly disposed.

Storage and Disposal Procedures

- Temporary sanitary facilities should be located away from drainage facilities, watercourses, and from traffic circulation. If site conditions allow, place portable facilities a minimum of 50 feet from drainage conveyances and traffic areas. When subjected to high winds or risk of high winds, temporary sanitary facilities should be secured to prevent overturning.

Liquid Waste Management WM-10



Description and Purpose

Liquid waste management includes procedures and practices to prevent discharge of pollutants to the storm drain system or to watercourses as a result of the creation, collection, and disposal of non-hazardous liquid wastes.

Suitable Applications

Liquid waste management is applicable to construction projects that generate any of the following non-hazardous by-products, residuals, or wastes:

- Drilling slurries and drilling fluids
- Grease-free and oil-free wastewater and rinse water
- Dredgings
- Other non-stormwater liquid discharges not permitted by separate permits

Limitations

- Disposal of some liquid wastes may be subject to specific laws and regulations or to requirements of other permits secured for the construction project (e.g., NPDES permits, Army Corps permits, Coastal Commission permits, etc.).
- Liquid waste management does not apply to dewatering operations (NS-2 Dewatering Operations), solid waste management (WM-5, Solid Waste Management), hazardous wastes (WM-6, Hazardous Waste Management), or

REQUEST FOR INFORMATION REGARDING RECREATIONAL AND PARK SERVICES FOR THE BLOC PROJECT IN THE CITY OF LOS ANGELES

Dear Ms. King:

The following has been prepared in response to your request for Recreation and Parks information relative to the proposed Bloc Project. This project proposes the development of a residential project with 466 residential dwelling units on a site generally located at 700 South Flower Street, 700 West 7th Street, and 711 and 775 South Hope Street in the Central City Community Plan.

1. *A list of the parks and recreational facilities located within a 2-mile radius of the Project Site, including the name of the park, the distance of the park from the Project Site, the park type, and amenities provided.*

The following Department of Recreation and Parks facilities are classified as neighborhood parks and are located within a two-mile radius of the project site:

- 6th and Glady's Street Park, located at 624 E 6th Street.
- Alvarado Terrace Park, located at 1342 S Alvarado Terrace.
- Art's District Park, located at 501 S Hewitt Street.
- City Hall Park, located at 200 N Spring Street.
- El Pueblo De Los Angeles Historic Monument, located at 845 N Alameda Street.
- Everett Park, located at 1010 N Everett Street.
- Francis Avenue Community Garden, located at 2909 W Francis Avenue.
- Grand Hope Park, located at 900 S Hope Street.
- Hoover Pedestrian Mall, located at University Ave between 30th Street & Hoover Street.
- Hope and Peace Park, located at 843 S Bonnie Brae Street.
- Leo Politi Elementary Community School Park, located at 2481 W 11th Street.
- Los Angeles Plaza Park, located at 125 E Paseo De La Plaza.
- Ord and Yale Street Park, located at 516 W Ord Street.

- Patton Street Pocket Park, located at 303-305, 317-327 N Patton Street.
- Parque Nativo Lopez, located at 1827 S Hoover Street.
- Rockwood Community Park, located at 1571 W Rockwood Street.
- Saint James Park, located at 20 S St James Park.
- San Julian Park, located at 312 E 5th Street.
- Spring Street Park, located at 428 S Spring Street.
- Unidad Park, located at 1644-1648 W Beverly Boulevard.
- Valencia Triangle, located at 1425 W 8th Street.

The following Department of Recreation and Parks facilities are classified as community parks and are located within a two-mile radius of the project site:

- 1st and Broadway Civic Center Park, located at 217 W 1st Street.
- Alpine Recreation Center, located at 817 N Yale Street.
- Central Recreation Center, located at 1357 E 22nd Street.
- Echo Park, located at 751 N Echo Park Boulevard.
- Hoover Recreation Center, located at 1010 W 25th Street.
- Lafayette Park, located at 625 S Lafayette Park Place.
- Lake Street Community Center, located at 227 N Lake Street.
- Macarthur (Gen Douglas) Park, located at 2230 W 6th Street.
- Pershing Square, located at 525 S Olive Street.
- Toberman Recreation Center, located at 1725 S Toberman Street.
- Trinity Recreation Center, located at 2415 S Trinity Street.
- Vista Hermosa Soccer Field, located at 1301 W 1st Street.

The following Department of Recreation and Parks facilities are classified as regional parks and are located within a two-mile radius of the project site:

- Elysian Park, located at 929 Academy Road.

For additional information regarding facilities and features available in these parks visit our website: www.laparks.org.

2. *What is the Central City Community Plan area's existing parkland acres-to-population ratio and what is the citywide acres-to-population ratio?*

According to the Los Angeles Countywide Comprehensive Park and Recreation Needs Assessment from 2016, the Central City Community Plan Area, within which the project is located, has a parkland acres-to-population ratio of neighborhood and community parks of 0.04 acres per 1,000 residents. The City of Los Angeles overall has a ratio of 0.84 acres of neighborhood or community parkland per 1,000 residents.

3. *What is the current capacity and level of use of parks and recreational facilities within 2 miles of the Project Site?*

While data regarding the level of use for the recreational facilities that serve the project site is not available, parks within the surrounding community are heavily utilized and often overburdened.

4. *Does the City have any plans to develop new parks or recreational facilities or expand existing parks or recreational facilities within a two-mile radius of the project site?*

First and Broadway Civic Center Park is a planned future park.

Thank you for the opportunity to provide information relative to the proposed project's impact on recreation and park services. Most subdivision projects that contain more than fifty residential dwelling units are required to meet with the Department of Recreation and Parks prior to filing in order to discuss any potential dedication requirements. If you have any questions or comments regarding this information, please contact the RAP Park Staff at (213) 202-2682 or rap.parkfees@lacity.org

Sincerely,

CATHIE M. SANTO DOMINGO

Exhibit 2 – Existing Infrastructure
Exhibit 3 – Proposed Infrastructure

1. INTRODUCTION

1.1. PROJECT DESCRIPTION

The proposed BLOC Residential Tower and signage (Project) would be located on the southern portion of a larger mixed-use development known as The BLOC located in the Financial District of Downtown Los Angeles (Development Area). The Applicant proposes to construct 466 residential units within a high-rise tower and signs included in The BLOC Supplemental Use District (case number CPC-2018-6388-SN) (Project). The development area is located within a 186,674-square-foot site (4.285-acre) known as The BLOC located at 700 South Flower Street, 700 West 7th Street, and 711 and 775 South Hope Street (Project Site) in the City of Los Angeles (City). The residential tower address will be 775 South Hope Street. The Project Site comprises of an entire City block that is currently developed with hotel, office and commercial/retail uses and associated parking and contains a portal to the 7th Street/Metro Center rail station.

The BLOC Residential Tower would be located in the southern half of the Project Site (Development Area) and would consist of a high-rise tower with up to 466 residential units. The residential tower address will be 775 South Hope Street. The proposed signage would be provided pursuant to a new Supplemental Use District (case number CPC-2018-6388-SN).

The existing hotel, office, and commercial/retail uses would be retained, with the exception of approximately 24,342 square feet of existing commercial (theater and retail) uses that would be removed and replaced with residential uses (including the new residential lobby).

The BLOC Residential Tower would be constructed within and above an existing commercial/parking podium building. The rooftop parking level of the existing nine-story podium building would be enclosed, and two additional levels of parking would be added, increasing the podium to 12 stories. A new 41-story residential tower would extend above the 12-story podium. The two existing basement levels below the podium would be retained.

The 41-story residential tower will consist of the following: 2 stories of mechanical space, 1 story of rooftop amenities, 37 stories of residential dwelling units, and 1 story with amenities at podium roof level. The 12-story podium with parking consists of the following: 2 stories of new parking, 1 story of existing roof level parking now enclosed, 5 stories of enclosed existing parking and 4 stories of existing commercial area. The 2 below grade levels consist of 1 existing parking level and 1 loading level.

1.2. SCOPE OF WORK

As a part of the environmental assessment for the Project pursuant to the California Environmental Quality Act (CEQA), the purpose of this report is to analyze the potential impact of the Project to the existing water, wastewater, and energy infrastructure.

2. REGULATORY FRAMEWORK

The City of Los Angeles has one of the largest sewer systems in the world including more than 6,700 miles of sewers serving a population of more than four million. The Los Angeles sewer system is comprised of three smaller systems: Hyperion Sanitary Sewer System, Terminal Island Water Reclamation Plant Sanitary Sewer System, and Regional Sanitary Sewer System.

The Project Site lies within the Hyperion Service Area served by the Hyperion Sanitary Sewer System. In January 2019, a Sewer System Management Plan (SSMP) was prepared for the Hyperion Sanitary Sewer System pursuant to the State Water Control Board's (SWRCB) May 2, 2006, Statewide General Waste Discharge Requirements (WDRs)[1]. The goal of the SSMP is to provide a plan and schedule to properly manage, operate, and maintain all parts of the sanitary sewer system to meet the WDRs for the system. In addition, the SSMP identifies protocols to help reduce and prevent sanitary sewer overflows, and to mitigate any sanitary sewer overflows that do occur. The City's 2019 SSMP confirms that the City is in full compliance with the applicable WDRs.

Sewer permit allocation for projects that discharge into the Hyperion Water Reclamation Plant is regulated by Ordinance No. 166,060 adopted by the City in 1990. This Ordinance established an additional annual allotment of 5.0 million gallons per day, of which 34.5 percent (1.725 million gallons per day) is allocated for priority projects, 8 percent (0.4 million gallons per day) for public benefit projects, and 57.5 percent (2.875 million gallons per day) for non-priority projects (of which 65 percent is for residential projects and 35 percent for non-residential projects).

The City of Los Angeles Municipal Code (LAMC) includes regulations that allow the City to assure available sewer capacity for new projects and require fees for improvements to the infrastructure system. LAMC Section 64.15 requires that the City perform a Sewer Capacity Availability Request (SCAR) analysis when any person seeks a sewer permit to connect a property to the City's sewer collection system, proposes additional discharge through their existing public sewer connection, or proposes a future sewer connection or future development that is anticipated to generate 10,000 gallons or more of sewage per day. A SCAR is an analysis of the existing sewer collection system

[1] City of Los Angeles Department of Public Works, Bureau of Sanitation, Sewer System Management Plan Hyperion Sanitary Sewer System, January 25, 2019. https://www.lacitysan.org/cs/groups/public/documents/document/y250/mdm1/~edisp/cnt035427.pdf

to determine if there is adequate capacity existing in the sewer collection system to safely convey the newly generated sewage to the appropriate sewage treatment plant.

The City has begun requiring projects in the entitlement phase to apply for a Wastewater Service Inquiry (WWSI) to allow Bureau of Sanitation (BOS) to review the project as described above without confusing construction projects from projects in the planning stages. WWSIs serve a similar function as SCARs for the purposes of CEQA analysis.

LAMC Section 64.11.2 requires the payment of fees for new connections to the sewer system to assure the sufficiency of sewer infrastructure. New connections to the sewer system are assessed as a Sewerage Facilities Charge. The rate structure for the Sewerage Facilities Charge is based upon wastewater flow strength as well as volume. The determination of wastewater strength for each applicable project is based on City guidelines for the average wastewater concentrations of two parameters (biological oxygen demand and suspended solids) for each type of land use. Fees paid to the Sewerage Facilities Charge fees are deposited in the City's Sewer Construction and Maintenance Fund for sewer and sewage-related purposes, including but not limited to industrial waste control and water reclamation purposes.

In addition, the City establishes design criteria for sewer systems to assure that new infrastructure provides sewer capacity and operating characteristics to meet City Standards (Bureau of Engineering Special Order No. SO06-0691). Per Special Order, lateral sewers, which are sewers 18 inches or less in diameter, must be designed for a planning period of 100 years. The Special Order also requires that sewers be designed so that the peak dry weather flow depth during their planning period shall not exceed one-half the pipe diameter.[2]

In 2006 the City approved the Integrated Resources Plan, which incorporates a Wastewater Facilities Plan.[3] The Integrated Resources Program was developed to meet future wastewater needs of more than 4.3 million residents expected to live within the City by 2020. In order to meet future demands posed by increased wastewater generation, the City has chosen to expand its current overall treatment capacity, while maximizing the potential to reuse recycled water through irrigation, and other approved uses. To that end, the City has developed the final draft of the One Water LA 2040 Plan, which builds on the premise of the Integrated Resources Plan to maximize water resources and to develop a framework for managing the City's watersheds, water resources, and water

[2] City of Los Angeles, L.A. CEQA Thresholds Guide, Your Resource for Planning CEQA Analysis in Los Angeles, M-Public Utilities, 2006. https://planning.lacity.org/eir/CrossroadsHwd/deir/files/references/A07.pdf

[3] City of Los Angeles, Department of Public Works, LA Sewers Website, Integrated Resources Plan Facilities Plan, Summary Report, December 2006. https://www.lacitysan.org/cs/groups/public/documents/document/y250/mdew/~edisp/cnt010373.pdf

facilities.[4] As with the IRP, such efforts would be organized in phases. Phase I of the One Water LA 2040 Plan includes developing initial planning baselines and guiding principles for water management and citywide facilities planning in coordination with City departments, other agencies, and stakeholders.[5] Phase II includes development of technical studies and an updated facilities plan for stormwater and wastewater. The final draft of One Water LA has been completed, and work on its Programmatic Environmental Impact Report (PEIR) will begin soon.[6]

3. EXISTING CONDITIONS

The 4.285-acres Project Site is currently occupied by The BLOC, a mixed-use destination that includes an office tower, a high-rise hotel, commercial/retail uses and an expansive plaza that includes the portal to the 7th Street/Metro Center rail station, all located within the northern portion of the Project Site, outside of the Development Area (The BLOC Residential Tower). The southern portion of the Project Site that is comprised of the Development Area is currently developed with a an existing 9-story podium building, which includes five (6) stories of enclosed parking, four (2) stories of existing commercial/retail floor area, and one (1) rooftop parking. Vehicular access to the Project Site is provided via ingress/egress access points along Flower Street, 8th Street, and Hope Street. The Project Site generally slopes from north to south between Flower Street and Hope Street with a grade difference of approximately 7.75 feet. The topography of the parking structure varies across the property and does not exceed a 50:1 slope. The existing Project Site, inclusive of the Development Area is approximately 100-percent impervious.

3.1. WASTEWATER

Sanitary sewer service to the site is provided by the City's BOS. According to the City's sewer wye maps, there are existing sewer facilities along the adjacent streets surrounding the site. There is an existing 8-inch vitrified clay pipe (VCP) within Hope Street, which flows southwesterly at a slope of 1.25%, an existing 8-inch vitrified clay pipe (VCP) within Flower Street, which flows northeasterly at a slope of 2.51% and joins an existing 8-inch vitrified clay pipe (VCP) also within Flower Street, which flows southwesterly at a slope of 2.50%. The City's sewer wye maps indicate that there are twenty-two (22) sewer wyes[7] on Hope Street from 7th to 8th street and five (4) sewer wyes on Flower Street from

[4] City of Los Angeles, One Water LA Plan, https://www.lacitysan.org/san/faces/wcnav_externalId/s-lsh-es-owla-r?_adf.ctrl-state=14epm9vu42_298&_afrLoop=2995637137833887#! accessed October 27, 2021.

[7] A wye is a short "y" shaped pipe intended to connect a sewer lateral branch to a sewer main line at an acute angle.

7th to 8th street. Sewage waste is conveyed for treatment at the City's Hyperion Treatment Plant.

Existing wastewater generation estimates from existing uses to be removed have been prepared based on the BOS sewerage generation factors for commercial categories and are summarized in Table 1 below.

Table 1 - Estimated Existing Wastewater Generation from Existing Uses to be Removed

Land Use	Quantity	Average Daily Flow[(a)]	Total Avg. Gallons Per Day (GPD)
Retail Area (less than 100,000 SF)	23,888	25 KGSF/GPD	597
Total Existing Wastewater Generation (gpd)			**597**

(a) The average daily flow based on 100% of City of Los Angeles sewerage generation factors.

(b) Wastewater generated by the theater space is not included since the removal of this space will not affect the existing wastewater generation.

4. SIGNIFICANCE THRESHOLDS

The City of Los Angeles considers the questions listed in Appendix G of the CEQA Guidelines as significance thresholds regarding impacts on wastewater infrastructure and treatment capacity. These questions are as follows:

Would the Project:

- Require or result in the relocation or construction of new or expanded water, or wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities or expansion of existing facilities, the construction or relocation of which would cause significant environmental effects?

- Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

In the context of the above questions from the Appendix G of the CEQA Guidelines, the City of Los Angeles considers the following criteria from the CEQA Thresholds Guide (2006 *L.A. CEQA Thresholds Guide*) with regard to wastewater impacts:

- The project would cause a measurable increase in wastewater flows at a

point where, and a time when, a sewer's capacity is already constrained or that would cause a sewer's capacity to become constrained; or

- The project's additional wastewater flows would substantially or incrementally exceed the future scheduled capacity of any one treatment plant by generating flows greater than those anticipated in the Wastewater Facilities Plan or General Plan and its elements.[8]

Based on these factors, the Project Site could have a significant impact if the City's wastewater infrastructure cannot adequately serve the Project Site. This could result in an increase in wastewater such that it exceeds available infrastructure capacity requiring construction of new facilities.

5. METHODOLOGY

The methodology for determining the significance of a project's impact on wastewater collection and treatment infrastructure is based on the *L.A. CEQA Thresholds Guide*. This methodology involves a review of the project's environmental setting, project impacts, cumulative impacts, and mitigation measures as required. The following has been considered as part of the determination for this Project:

Environmental Setting

- Location of the Project and appropriate points of connection to the wastewater collection system on the pertinent Wye Map
- Description of the existing wastewater system which would serve the Project, including its capacity and current flows
- Summary of adopted wastewater-related plans and policies that are relevant to the Project area

Project Impacts

- Evaluate the Project wastewater needs (anticipated daily average wastewater flow), taking into account design or operational features that would reduce or offset service impacts

[8] LADWP, 2017 Power Integrated Resource Plan, December 2017. https://www.ladwp.com/cs/idcplg?IdcService=GET_FILE&dDocName=OPLADWPCCB655007&RevisionSelectionMethod=LatestReleased

- Compare the Project's wastewater needs to the appropriate sewer's capacity and/or the wastewater flows anticipated in the Wastewater Facilities Plan or General Plan

This report analyzes the potential impacts of the Project on the existing public sewer infrastructure by comparing the estimated Project wastewater generation with the calculated available capacity of the existing facilities.

BOS' Wastewater Engineering Division made a preliminary analysis of the local and regional sewer conditions to determine if available wastewater conveyance and treatment capacity exists for future development. BOS' approach consisted of the study of a worst-case scenario envisioning peak demands from the relevant facilities occurring simultaneously on the wastewater system. A combination of flow gauging data and computed results from the City's hydrodynamic model were used to project current and future impacts due to additional sewer discharge. The data used in this report are based on the findings of the BOS preliminary analysis. Refer to Exhibit 3 for results of this BOS preliminary analysis, which is also known as the Wastewater Service Information Letter (WWSI).

6. PROJECT IMPACTS

6.1. CONSTRUCTION

During construction, existing sewer laterals would allow sewage generated at the BLOC's existing facilities to continue to enter the public sewer system. However, temporary facilities (such as portable toilet and hand wash areas) would be provided by the contractor at the Project Site. Sewage from these facilities would be collected and hauled offsite and not discharged into the public sewer system. Wastewater generated from other construction activities such as drilling and piling, concrete batching, or dust suppression would be required to be treated before being discharged from the site and may be transported off-site. Therefore, since the anticipated additional wastewater generated during construction is not anticipated to connect directly to existing sewer facilities, the increase in wastewater flow during construction is expected to be zero. If wastewater from construction activities is discharged from the project site, the amount is expected to be a modest amount and well within the capacity of the existing public sewer system. Thus, impacts to the sewer infrastructure due to construction activity are considered less than significant.

As part of the Project, new sewer lines would be required within the Project Site. This expansion of the existing on site sewer system would collect sewage from the Project and flow would be routed towards the public sewer laterals at the property line or at the existing sewer wye connections in the public right of way. At the time when the new onsite sewer lines would be constructed, the primary associated construction impacts would be the placement of pipe, and connection into city sewer main along the existing hardscape. Any offsite work that may affect services to the existing sewer line would be coordinated with the City of Los Angeles Bureau of Engineering (BOE). BOE would be

able to provide for connection requirements, pipe depths, and connection location(s). In addition, as part of the Project, a Construction Management Plan would be implemented to reduce any temporary pedestrian and traffic impacts during construction, including maintaining lanes of travel and ensuring safe pedestrian access and adequate emergency vehicle access. Therefore, Project impacts on wastewater infrastructure associated with construction activities would be less than significant.

6.2. OPERATION

6.2.1.1. SEWER GENERATION

In accordance with the L.A. CEQA Thresholds Guide, the base estimated sewer flows were based on the BOS sewerage generation factors for commercial, office and residential categories. A Request for Wastewater Service Information (WWSI) that conservatively overestimated the Project's anticipated sewage generation was submitted to see whether the existing public infrastructure can accommodate the Project. In preparing the WWSI, LASAN analyzed the Project's wastewater demands in conjunction with existing conditions and forecasted growth and has approved the Project to discharge up to 55,530 gpd of additional wastewater to the existing adjacent sewer lines on Hope Street (e.g., the net increase in wastewater generation associated with the Project). The estimated sewer flows have been summarized in Table 2 below.

Table 2 - Estimated Proposed Wastewater Generation[(a)]

Connection To:	Land Use	Quantity	Average Daily Flow[(a)]	Average Wasterwater Generation (GPD)
Hope Street	Lounge	56,236 SF	50 KGSF/GPD	2,812
	Residential: APT-Bachelor	83 DU	75 DU/GPD	6,225
	Residential: APT-1 Bedroom	203 DU	110 DU/GPD	22,330
	Residential: APT-1 Bedroom +	68 DU	110 DU/GPD	7,480
	Residential: APT-2 Bedroom	100 DU	150 DU/GPD	15,000
	Residential: APT-3 Bedroom	12 DU	190 DU/GPD	2,280
Total Proposed Wastewater Generation for Project				**56,127**
Existing Wastewater Generation for Project				**597**
Net Increase in Wastewater Generation for Project				**55,530**

(a) Based on 2012 City of Los Angeles Department of Public Works, Bureau of Sanitation Sewer Generation Rates table.

The existing design capacity of the Hyperion Water Reclamation Service Area, which would treat the Project's wastewater, is approximately 450 mgd (million gallons per day).[9] Currently, up to approximately 300 mgd is treated at the Hyperion Water Reclamation Plant,[10] resulting in a residual treatment capacity of approximately 150 mgd. The Project's proposed wastewater generation would be approximately 0.055530 mgd, which is roughly equal to 0.03702 percent of the Hyperion Water Reclamation Plant's available capacity. Consequently, impacts on wastewater treatment capacity are less than significant. Therefore, adequate wastewater treatment capacity is available to serve the Project, and Project impacts on wastewater treatment capacity would be less than significant.

7. CUMULATIVE IMPACTS

The Project will result in the additional generation of sewer flow. However, as discussed previously, the BOS has conducted an analysis of existing and planned capacity and determined that adequate capacity exists to serve the Project. Related projects connecting to the same sewer system are required to obtain a sewer connection permit and submit a WWSI to the BOS as part of each related project's development review. Impact determination will be provided following the completion of the WWSI analysis for each related project. If system upgrades are required as a result of a given project's additional flow, arrangements would be made between the related project's applicant and BOS to construct the necessary improvements.

Wastewater generated by the Project would be conveyed via the existing wastewater conveyance systems for treatment at the Hyperion Treatment Plant. As previously stated, based on information from the BOS, the existing design capacity of the Hyperion Treatment Service Area is approximately 450 million gpd, and the existing average daily flow for the Hyperion Water Reclamation Plant is approximately 300 million gpd. The Project's estimated wastewater generation increase of 55,530 gpd summarized in Table 2 comprises roughly 0.03702 percent of the available capacity for the Hyperion Water Reclamation Plant.

---

9 City of Los Angeles Department of Public Works, Bureau of Sanitation, Water Reclamation Plants, https://www.lacitysan.org/san/faces/home/portal/s-lsh-wwd/s-lsh-wwd-cw/s-lsh-wwd-cw-p?_adf.ctrl-state=oep8lwkld_4&_afrLoop=28344654751341747#! , accessed October 27, 2021.

10 City of Los Angeles Department of Public Works, Bureau of Sanitation, Sewer System Management Plan Hyperion Sanitary Sewer System, January 2019. https://www.lacitysan.org/cs/groups/public/documents/document/y250/mdm1/~edisp/cnt035427.pdf

Based on these forecasts, the Project's increase in wastewater generation would be adequately accommodated by the Hyperion Water Reclamation Plant. In addition, the BOS analysis confirms that the Hyperion Water Reclamation Plant has sufficient capacity and regulatory allotment for the Project. Thus, operation of the Project would have a less than significant impact on wastewater treatment facilities.

8. LEVEL OF SIGNIFICANCE

Based on the analysis contained in this report no significant impacts have been identified to water, wastewater, and energy supply and infrastructure for this Project.

March 7, 2022

Mr. Sergio Mendoza, Project Manager
KPFF Consulting Engineers
700 S Flower Street, #2100
Los Angeles, CA 90017

Dear Mr.Mendoza,

THE BLOC (UPDATE) - REQUEST FOR WASTEWATER SERVICE INFORMATION

This is in response to your February 8, 2022 letter requesting a review of your proposed mixed-use project located at 775 S. Hope Street, Los Angeles, CA 90017. The project will consist of residential units and lounge. LA Sanitation has conducted a preliminary evaluation of the potential impacts to the wastewater and stormwater systems for the proposed project.

WASTEWATER REQUIREMENT

LA Sanitation, Wastewater Engineering Services Division (WESD) is charged with the task of evaluating the local sewer conditions and to determine if available wastewater capacity exists for future developments. The evaluation will determine cumulative sewer impacts and guide the planning process for any future sewer improvement projects needed to provide future capacity as the City grows and develops.

Projected Wastewater Discharges for the Proposed Project:

Type Description	Average Daily Flow per Type Description (GPD/UNIT)	Proposed No. of Units	Average Daily Flow (GPD)
Proposed			
Residential Apt: Bachelor	75 GPD/1 DU	83 DU	6,225
Residential Apt:1-BDRM	110 GPD/1 DU	271 DU	29,810

Residential Apt:2-BDRM	150 GPD/1 DU	100 DU	15,000
Residential Apt:3-BDRM	190 GPD/1 DU	12 DU	2,280
Lounge Space	50 GPD/1000 SQ.FT	56,236 SQ.FT	2,812
Total			**56,127**

SEWER AVAILABILITY

The sewer infrastructure in the vicinity of the proposed project includes an existing 8-inch line on Hope St. The sewage from the existing 8-inch line feeds into a 10-inch line on Hope St then into a 39–inch line on 12TH St before discharging into a 57-inch sewer line on Santee St. Figure 1 shows the details of the sewer system within the vicinity of the project. The current flow level (d/D) in the 8-inch line and the 10-inch line cannot be determined at this time without additional gauging.

The current approximate flow level (d/D) and the design capacities at d/D of 50% in the sewer system are as follows:

Pipe Diameter (in)	Pipe Location	Current Gauging d/D (%)	50% Design Capacity
8	Hope St.	*	405,389 GPD
10	Hope St.	*	483,104 GPD
39	12th St.	9	7.83 MGD
57	Santee St.	19	28.10 MGD

* No gauging available

Based on estimated flows, it appears the sewer system might be able to accommodate the total flow for your proposed project. Further detailed gauging and evaluation will be needed as part of the permit process to identify a specific sewer connection point. If the public sewer lacks sufficient capacity, then the developer will be required to build sewer lines to a point in the sewer system with sufficient capacity. A final approval for sewer capacity and connection permit will be made at the time. Ultimately, this sewage flow will be conveyed to the Hyperion Water Reclamation Plant, which has sufficient capacity for the project.

All sanitary wastewater ejectors and fire tank overflow ejectors shall be designed, operated, and maintained as separate systems. All sanitary wastewater ejectors with ejection rates greater than 30 GPM shall be reviewed and must be approved by LASAN WESD staff prior to other City plan check approvals. Lateral connection of development shall adhere to Bureau of Engineering Sewer Design Manual Section F 480.

If you have any questions, please call Christopher DeMonbrun at (323) 342-1567 or email at chris.demonbrun@lacity.org.

STORMWATER REQUIREMENTS

LA Sanitation, Stormwater Program is charged with the task of ensuring the implementation of the Municipal Stormwater Permit requirements within the City of Los Angeles. We anticipate the following requirements would apply for this project.

POST-CONSTRUCTION MITIGATION REQUIREMENTS

In accordance with the Municipal Separate Storm Sewer (MS4) National Pollutant Discharge Elimination System (NPDES) Permit (Order No. R4-2012-0175, NPDES No. CAS004001) and the City of Los Angeles Stormwater and Urban Runoff Pollution Control requirements (Chapter VI, Article 4.4, of the Los Angeles Municipal Code), the Project shall comply with all mandatory provisions to the Stormwater Pollution Control Measures for Development Planning (also known as Low Impact Development [LID] Ordinance). Prior to issuance of grading or building permits, the applicant shall submit a LID Plan to the City of Los Angeles, Public Works, LA Sanitation, Stormwater Program for review and approval. The LID Plan shall be prepared consistent with the requirements of the Planning and Land Development Handbook for Low Impact Development.

Current regulations prioritize infiltration, capture/use, and then biofiltration as the preferred stormwater control measures. The relevant documents can be found at: www.lacitysan.org. It is advised that input regarding LID requirements be received in the preliminary design phases of the project from plan-checking staff. Additional information regarding LID requirements can be found at: www.lacitysan.org or by visiting the stormwater public counter at 201 N. Figueroa, 2nd Fl, Suite 280.

GREEN STREETS

The City is developing a Green Street Initiative that will require projects to implement Green Street elements in the parkway areas between the roadway and sidewalk of the public right-of-way to capture and retain stormwater and urban runoff to mitigate the impact of stormwater runoff and other environmental concerns. The goals of the Green Street elements are to improve the water quality of stormwater runoff, recharge local groundwater basins, improve air quality, reduce the heat island effect of street pavement, enhance pedestrian use of sidewalks, and encourage alternate means of transportation. The Green Street elements may include infiltration systems, biofiltration swales, and permeable pavements where stormwater can be easily directed from the streets into the parkways and can be implemented in conjunction with the LID requirements. Green Street standard plans can be found at: www.eng2.lacity.org/techdocs/stdplans/

CONSTRUCTION REQUIREMENTS

All construction sites are required to implement a minimum set of BMPs for erosion control, sediment control, non-stormwater management, and waste management. In addition, construction sites with active grading permits are required to prepare and implement a Wet Weather Erosion Control Plan during the rainy season between October 1 and April 15. Construction sites that disturb more than one-acre of land are subject to the NPDES Construction General Permit issued by the State of California, and are required to prepare, submit, and implement the Storm Water Pollution Prevention Plan (SWPPP).

If there are questions regarding the stormwater requirements, please call WPP's plan-checking counter at (213) 482-7066. WPD's plan-checking counter can also be visited at 201 N. Figueroa, 2nd Fl, Suite 280.

GROUNDWATER DEWATERING REUSE OPTIONS

The Los Angeles Department of Water and Power (LADWP) is charged with the task of supplying water and power to the residents and businesses in the City of Los Angeles. One of the sources of water includes groundwater. The majority of groundwater in the City of Los Angeles is adjudicated, and the rights of which are owned and managed by various parties. Extraction of groundwater within

the City from any depth by law requires metering and regular reporting to the appropriate Court-appointed Watermaster. LADWP facilitates this reporting process, and may assess and collect associated fees for the usage of the City's water rights. The party performing the dewatering should inform the property owners about the reporting requirement and associated usage fees.

On April 22, 2016 the City of Los Angeles Council passed Ordinance 184248 amending the City of Los Angeles Building Code, requiring developers to consider beneficial reuse of groundwater as a conservation measure and alternative to the common practice of discharging groundwater to the storm drain (SEC. 99.04.305.4). It reads as follows: "Where groundwater is being extracted and discharged, a system for onsite reuse of the groundwater, shall be developed and constructed. Alternatively, the groundwater may be discharged to the sewer."

Groundwater may be beneficially used as landscape irrigation, cooling tower make-up, and construction (dust control, concrete mixing, soil compaction, etc.). Different applications may require various levels of treatment ranging from chemical additives to filtration systems. When onsite reuse is not available the groundwater may be discharged to the sewer system. This allows the water to be potentially reused as recycled water once it has been treated at a water reclamation plant. If groundwater is discharged into the storm drain it offers no potential for reuse. The onsite beneficial reuse of groundwater can reduce or eliminate costs associated with sewer and storm drain permitting and monitoring. Opting for onsite reuse or discharge to the sewer system are the preferred methods for disposing of groundwater.

To help offset costs of water conservation and reuse systems, LADWP offers a Technical Assistance Program (TAP), which provides engineering and technical assistance for qualified projects. Financial incentives are also available. Currently, LADWP provides an incentive of $1.75 for every 1,000 gallons of water saved during the first two years of a five-year conservation project. Conservation projects that last 10 years are eligible to receive the incentive during the first four years. Other water conservation assistance programs may be available from the Metropolitan Water District of Southern California. To learn more about available water conservation assistance programs, please contact LADWP Rebate Programs 1-888-376-3314 and LADWP TAP 1-800-544-4498, selection "3".

For more information related to beneficial reuse of groundwater, please contact Greg Reed, Manager of Water Rights and Groundwater Management, at (213)367-2117 or greg.reed@ladwp.com.

SOLID RESOURCE REQUIREMENTS

The City has a standard requirement that applies to all proposed residential developments of four or more units or where the addition of floor areas is 25 percent or more, and all other development projects where the addition of floor area is 30 percent or more. Such developments must set aside a recycling area or room for onsite recycling activities. For more details of this requirement, please contact LA Sanitation Solid Resources Recycling hotline 213-922-8300.

Sincerely,

Ali Poosti, Interim Division Manager
Wastewater Engineering Services Division
LA Sanitation and Environment

NOTICE OF PREPARATION
OF ENVIRONMENTAL IMPACT REPORT

December 16, 2022

Puede obtener información en Español acerca de esta junta llamando al (213)-847-3686.

ENVIRONMENTAL CASE NO.:	ENV-2021-9959-EIR
PROJECT NAME:	The Bloc
PROJECT APPLICANT:	NREA-TRC 700, LLC
PROJECT ADDRESS:	700 South Flower Street, 700 West 7th Street, 711 and 775 South Hope Street Los Angeles, California 90017
COMMUNITY PLAN AREA:	Central City
COUNCIL DISTRICT:	14—de León
PUBLIC COMMENT PERIOD:	December 16, 2022–January 17, 2023

The City of Los Angeles (City) intends to prepare an Environmental Impact Report (EIR) for The Bloc (Project). In accordance with Section 15082 of the California Environmental Quality Act (CEQA) Guidelines, the City has prepared this Notice of Preparation to provide the public, nearby residents and property owners, responsible agencies, and other interested parties with information regarding the Project and its potential environmental effects. The EIR will be prepared by outside consultants under the supervision of the City of Los Angeles, Department of City Planning.

The City requests your written comments as to the scope and contents of the EIR, including mitigation measures or project alternatives to reduce potential environmental impacts from the Project. Comments must be submitted in writing according to the directions below. If you represent a public agency, the City seeks written comments as to the scope and content of the environmental information in the EIR that are germane to your agency's statutory responsibilities in connection with the Project. Your agency may need to use the EIR prepared by the City when considering your permit or other approval for the Project.

Additional project details and instructions for public comment submittal are listed below.

PROJECT LOCATION AND EXISTING ON-SITE USES: The 186,674-square-foot (4.285-acre) Project Site is located at 700 South Flower Street, 700 West 7th Street, and 711 and 775 South Hope Street within the Central City Community Plan area of the City. The Project Site is located within Downtown Los Angeles and bounded by 7th Street to the north, 8th Street to the south, Hope Street to the east, and Flower Street to the west. **(See attached Project Location Map.)** The Project Site is currently occupied by The Bloc, a mixed-use development that encompasses the entire block. The northern portion of the Project Site is developed with a 33-story office tower and a 26-story hotel tower, both programmed with ground floor commercial uses that surround the outdoor plaza, and a direct portal to the 7th Street/Metro Central rail station. The southern portion of the Project Site is currently developed with an existing nine-story parking/retail podium building, which includes five stories of enclosed parking, four stories of existing retail floor area (one of which includes theater uses), and rooftop

parking. The existing uses total approximately 1,424,314 square feet of floor area and are comprised of 656,423 square feet of office space, 28,599 square feet of medical office space, 269,622 square feet of retail uses, 23,180 square feet of restaurant/bar areas, 30,363 square feet of fitness uses, a 28,770-square-foot theater that includes 569 fixed seats, and a 387,357-square-foot hotel that includes 496 rooms and 25,282 square feet of meeting/banquet spaces. Vehicular access to the Project Site is provided via existing ingress/egress driveways along Hope Street, 8th Street, and Flower Street.

PROJECT DESCRIPTION The Project would develop 466 residential units within a new 53-story high-rise tower located on the southern half of the Project Site within and above the existing nine-story parking/retail podium building. The existing hotel and commercial uses on the Project Site, would be retained, with the exception of approximately 24,342 square feet of existing commercial (theater and retail) uses in the podium building that would be changed to residential uses (including a new residential lobby). No changes are proposed to the existing 7th Street/Metro Central rail station portal. The residential uses would be located primarily within the new tower with a small portion of residential square footage, such as bicycle parking areas and other residential services (e.g., residential mail, package and utility rooms), located in the parking/retail podium building. As part of the Project, the rooftop parking level of the existing nine-story parking/retail podium building would be enclosed, and two additional levels of parking would be added, increasing the podium to 12 stories. The residential uses would comprise a total of approximately 495,016 square feet of floor area, consisting of the conversion of the approximately 24,342 square feet of existing commercial (theater and retail) uses within the existing parking/retail podium building and the net increase of 470,674 square feet in the new 53-story tower, which will extend 41-stories above the 12-story podium. The two existing basement levels, which include one level of vehicle parking and one level of loading areas below the podium building would be retained. Upon completion of the Project, the Project Site would include a total of 1,894,988 square feet of floor area with a floor area ratio of 10.15:1. Upon completion of the Project, the Project Site would include a total of 1,948 vehicular parking spaces located within eight above ground parking levels and one basement parking level. The Project would also add 214 bicycle parking spaces (192 long-term and 22 short-term) within the Project Site. The Project also includes a request for a Sign District for the Project Site.

The following table identifies the existing and proposed uses for the Project for environmental impact analysis purposes:

Summary of Existing and Proposed Floor Area

Land Use	Existing Floor Area	Floor Area to be Removed	Proposed New Floor Area	Net Increase/ (Decrease)	Total Floor Area Upon Completion of Project
Hotel	387,357 sf (496 rooms and 25,282 sf of banquet space)	0 sf	0 sf	0 sf	387,357 sf (496 rooms and 25,282 sf of banquet space)
Office	656,423 sf	0 sf	0 sf	0 sf	656,423 sf
Retail	269,622 sf	23,888 sf	0 sf	(23,888 sf)	245,734 sf
Medical Office	28,599 sf	0 sf	0 sf	0 sf	28,599 sf
Gym/Fitness	30,363 sf	0 sf	0 sf	0 sf	30,363 sf
Restaurant/Bar	23,180 sf	0 sf	0 sf	0 sf	23,180 sf
Theater	28,770 sf (569 seats)	454 sf	0 sf	(454 sf)	28,316 sf (569 seats)
Residential	0 du	0 sf	495,016 sf (466 du)	495,016 sf	495,016 sf (466 du)
Total Floor Area	**1,424,314 sf**	**24,342 sf**	**495,016 sf**	**470,674 sf**	**1,894,988 sf**

sf = square feet

du = dwelling units

( ) = negative value

**24,342 sf of commercial (theater and retail) floor area located within the podium to be converted to residential uses.*

Note: Square footage for the Project Site is calculated pursuant to the Los Angeles Municipal Code (LAMC) definition of floor area for the purpose of calculating FAR. In accordance with LAMC Section 12.03, floor area is defined as "[t]he area in square feet confined within the exterior walls of a building, but not including the area of the following: exterior walls, stairways, shafts, rooms housing building-operating equipment or machinery, parking areas with associated driveways and ramps, space for the landing and storage of helicopters, and basement storage areas."

Source: Handel Architects, LLP, 2021.

REQUESTED ACTIONS

1. Pursuant to Los Angeles Municipal Code (LAMC) Section 14.5.6 A, a Transfer of Floor Area Rights (TFAR) greater than 50,000 square feet of floor area for the transfer of up to 470,674 square feet of floor area from the Los Angeles Convention Center (Donor Site), located at 1201 South Figueroa Street, to be added to the Project Site (Receiver Site) with an existing 1,424,314 square feet, thereby permitting a total maximum of 1,894,988 square feet, or 10.15:1 FAR in lieu of the otherwise permitted existing nonconforming 7.63:1 FAR and the maximum 6:1 FAR permitted by the C2-4D Zone.
2. Pursuant to LAMC Section 16.05 approval of Site Plan Review for a project that adds more than 50 dwelling units.
3. Pursuant to Charter Section 562 and LAMC Section 12.27 B, the following Parking Variances:
   - Relief from LAMC Section 12.21 A.4(p)(1) to permit 0.946 parking spaces per residential unit in lieu of the 1.096 parking spaces per unit required by the LAMC. If all 466 residential units are constructed, a total of 441 parking spaces would be provided in lieu of the required 511 parking spaces. The Applicant requests a parking ratio (rather than a fixed number of spaces) for the required parking in order to correspond to the number of residential units actually built.

- Relief from LAMC Section LAMC 12.21 A.4 (p)(2), 12.21 A.4 (i)(1) and (i)(3) to permit 1,507 hotel and commercial parking spaces, in lieu of the 1,636 hotel and commercial parking spaces required.

- Relief from LAMC 12.21 A.5 to allow 0.716 space per dwelling unit to be designed as standard spaces, in lieu of the requirement that one parking space per dwelling unit be designed as a standard space. If 466 units are constructed, this would provide for 334 standard spaces in lieu of 466 standard spaces. The remainder of the spaces provided could be compact spaces. The Applicant requests a parking ratio (rather than a fixed number of spaces) for the required standard sized parking spaces in order to correspond to the number of residential units actually built.

- Relief from LAMC 12.21 A.4(g) to temporarily allow up to 1,050 required parking spaces to be provided off-site, located more than 750 feet from the Project Site, during project construction.

- Relief from LAMC 12.26 E.5 to temporarily allow up to 1,050 required parking spaces to be provided off-site through lease, in lieu of covenant, during project construction.

4. Pursuant to LAMC Sections 17.03 and 17.15, approval of Vesting Tentative Tract Map (Tract No. VTT-83482) including the following:
   - Resubdivision and condominium purposes.

   - Creation of two (2) new airspace lots containing up to 466 residential condominium units.

   - In consideration of the project's proximity to jobs and Metro's 7th Street Rail station portal, a minimum of 0.946 parking spaces per dwelling unit, with zero (0) guest parking spaces, in lieu of compliance with the Deputy Advisory Agency's Parking Policy AA-2000-1 (which requires 2 residential parking spaces and 0.25 guest parking space per dwelling unit).

   - Waiver of an approximate 2-foot dedication to provide a 12-foot-wide sidewalk and a waiver of a 5-foot sidewalk easement on 8th Street required per the Downtown Street Standards plan.

   - Waiver of an approximate 5-foot sidewalk widening on Hope Street to provide a 15-foot sidewalk required per the Mobility Plan 2035 and a waiver of a 3-foot sidewalk easement required per the Downtown Street Standards plan.

   - Waiver of an approximate 2-foot sidewalk widening on 7th Street to provide a 12-foot-wide sidewalk required per the Mobility Plan 2035.

   - Waiver of a dedication to provide 15-foot by 15-foot corner cut at the Southeast intersection of 7th Street and Flower Street.

   - Waiver of a dedication to provide 15-foot by 15-foot corner cut at the Southwest intersection of 7th Street and Hope Street.

   - Haul Route with the export of 18,239 cubic yards.

5. Certification of the Final Environmental Impact Report ("EIR") for the Project.
6. Pursuant to LAMC Sections 12.32 S and 13.1, establishment of a Sign Supplemental Use District, pursuant to existing Case No. CPC-2018-6388-SN, filed on October 31, 2018. The Applicant requests the establishment of The Bloc Supplemental Use District, a "SN" Sign District for the block bounded by Flower Street on the west, 8th Street on the south, Hope Street on the east, and 7th Street on the north.
7. Approval by the City Board of Public Works for the Removal of Trees in the Public Right of Way.

8. Other discretionary and ministerial permits and approvals that may be deemed necessary, including, but not limited to, temporary street closure permits, demolition, excavation, shoring, foundation, grading and building permits, tree removal permits, haul route approval, revocable permits, B-permit, and sign permits.

POTENTIAL ENVIRONMENTAL EFFECTS OF THE PROJECT Based on the Initial Study, the Project could have potentially significant environmental impacts in the following topic areas, which will be addressed in the EIR: air quality; cultural resources (historic resources); energy; greenhouse gas emissions; hazards and hazardous materials (emergency access); land use and planning; noise; public services (fire protection and police protection); transportation; tribal cultural resources; and utilities and service systems (water supply and energy infrastructure).

FILE REVIEW AND COMMENTS The Department of City Planning recognizes the unprecedented nature of COVID-19 and, having been identified as an essential City service, continues to work and respond to all inquiries pertaining to our ongoing efforts to process entitlement applications. As a result of the Mayor's "Safer at Home" Order issued on March 19, 2020, means to access Project-related materials in-person may be limited. To that end, the Department of City Planning will ensure that interested parties seeking information about the Project will have access. A copy of this notice and the Initial Study prepared for the Project may be viewed with the environmental file or online at https://planning.lacity.org/development-services/eir.

The environmental file also may be available for public review, by appointment only, at the City of Los Angeles, Department of City Planning, 221 North Figueroa Street, Suite 1350, Los Angeles, CA 90012, during office hours Monday–Friday, 9:00 A.M.–4:00 P.M. Please contact the Staff Planner listed below to schedule an appointment.

Digital copies of the Initial Study are also available for review at the following library locations:

- Los Angeles Central Library, Library Reference Desk, 630 West Fifth Street, Los Angeles, CA 90071
- Little Tokyo Branch Library, 203 South Los Angeles Street, Los Angeles CA 90012
- Chinatown Branch Library, 639 North Hill Street, Los Angeles, CA 90012

The City will consider all written comments regarding the potential environmental effects of the Project and issues to be addressed in the EIR. If you wish to submit comments, please reference the Environmental Case Number provided above, and submit them in writing by **January 17, 2023, no later than 4:00 P.M.**

Please direct your comments to:

RE: The Bloc – Case No. ENV-2021-9959-EIR
Notice of Preparation of Environmental Impact Report (EIR)

Dear Ms. King:

Thank you for coordinating with the Los Angeles County Metropolitan Transportation Authority (Metro) regarding the proposed The Bloc (Project) located at 700 South Flower Street, 700 West 7th Street, 711 and 775 South Hope Street in the City of Los Angeles (City). Metro is committed to working with local municipalities, developers, and other stakeholders across Los Angeles County on transit-supportive developments to grow ridership, reduce driving, and promote walkable neighborhoods. Transit Oriented Communities (TOCs) are places (such as corridors or neighborhoods) that, by their design, allow people to drive less and access transit more. TOCs maximize equitable access to a multi-modal transit network as a key organizing principle of land use planning and holistic community development.

Per Metro's area of statutory responsibility pursuant to sections 15082(b) and 15086(a) of the Guidelines for Implementation of the California Environmental Quality Act (CEQA: Cal. Code of Regulations, Title 14, Ch. 3), the purpose of this letter is to provide the City with specific detail on the scope and content of environmental information that should be included in the Environmental Impact Report (EIR) for the Project. In particular, this letter outlines topics regarding the Project's potential impacts on the Metro 7th Street/Metro Center Station, Metro B Line (Red), Metro D Line (Purple), Metro A Line (Blue), Metro E Line (Expo), and Metro J Line (Silver), which should be analyzed in the EIR, and provides recommendations for mitigation measures as appropriate. Effects of a project on transit systems and infrastructure are within the scope of transportation impacts to be evaluated under CEQA.[1]

In addition to the specific comments outlined below, Metro is providing the City and NREA-TRC 700, LLC (Applicant) with the Metro Adjacent Development Handbook (attached), which provides an overview of common concerns for development adjacent to Metro right-of-way (ROW) and transit facilities, available at https://www.metro.net/devreview.

Project Description
The Project includes a new 53-story high rise tower located on the southern half of the Project Site within and above the existing nine-story parking/retail podium building. No changes are being proposed to the existing 7th/Metro rail station. The rooftop parking level of the existing nine-story parking/retail podium building would be

[1] See CEQA Guidelines section 15064.3(a); Governor's Office of Planning and Research Technical Advisory on Evaluating Transportation Impacts In CEQA, December 2018, p. 19.

enclosed, and two additional levels of parking would be added, increasing the podium to 12 stories. The two existing basement levels, which include one level of vehicle parking and one level of loading areas below the podium building would be retained. Upon completion of the Project, the Project Site would include a total of 1,948 vehicular parking spaces located within eight above ground parking levels and one basement parking level.

Recommendations for EIR Scope and Content

Bus Service Adjacency

1. Service: Metro J Line (Silver) and several bus lines, operate on Hope Street, Flower Street, and 7th Street adjacent to the Project. One Metro Bus stop heading southbound is directly adjacent to the Project at 7th and Flower Street. Other transit operators such as LADOT may provide service in the vicinity of the Project and should be consulted.

2. Impact Analysis: The EIR should analyze potential effects on Metro Bus service and identify mitigation measures as appropriate. Potential impacts may include impacts to transportation services, stops, and temporary or permanent bus service rerouting. Specific types of impacts and recommended mitigation measures to address them include, without limitation, the following:

    a. Bus Stop Condition: The EIR should identify all bus stops on all streets adjacent to the Project site. During construction, the Applicant may either maintain the stop in its current condition and location, or temporarily relocate the stop consistent with the needs of Metro Bus operations. Temporary or permanent modifications to any bus stop as part of the Project, including any surrounding sidewalk area, must be Americans with Disabilities Act (ADA)-compliant and allow passengers with disabilities a clear path of travel between the bus stop and the Project. Once the Project is completed, the Applicant must ensure any existing Metro bus stop affected by the Project is returned to its pre-Project location and condition, unless otherwise directed by Metro.

    b. Driveways: Driveways accessing parking and loading at the Project site should be located away from transit stops, and be designed and configured to avoid potential conflicts with on-street transit services and pedestrian traffic to the greatest degree possible. Vehicular driveways should not be located in or directly adjacent to areas that are likely to be used as waiting areas for transit.

    c. Bus Stop Enhancements: Metro encourages the installation of enhancements and other amenities that improve safety and comfort for transit riders. These include benches, bus shelters, wayfinding signage, enhanced crosswalks and ADA-compliant ramps, pedestrian lighting, and shade trees in paths of travel to bus stops. The City should consider requesting the installation of such amenities as part of the Project.

    d. Bus Operations Coordination: The Applicant shall coordinate with Metro Bus Operations Control Special Events Coordinator at 213-922-4632 and Metro's Stops and Zones Department at 213-922-5190 not later than 30 days before the start of Project construction. Other municipal bus services may also be impacted and shall be included in construction outreach efforts.

Subway Adjacency

1. Operations: The Metro B Line (Red), Metro D Line (Purple), Metro A Line (Blue), Metro E Line (Expo)currently operates peak service as often as every ten minutes in both directions. Trains may operate 24 hours a day, seven days a week in the tunnels below the Project.

2. Impact Analysis: Due to the Project's proximity to the 7th Street/Metro Center Station, the EIR must analyze potential effects on subway operations and identify mitigation measures as appropriate. Critical

impacts that should be studied include (without limitation): impacts of Project construction and operation on the structural and systems integrity of subway tunnels; damage to subway infrastructure, including tracks; disruption to subway service; temporary and/or permanent changes to customer access and circulation to the station; and noise and vibration.

3. Metro Station Ventilation Shafts and Emergency Exits: Subway ventilation shafts allow for continuous air circulation throughout the subway tunnels. Vents and emergency exits are located on the sidewalk on Flower Street and will need to be protected during and after construction.

   The following provisions should be used to develop a mitigation measure that addresses these potential impacts:

   a. Technical Review: The Applicant shall submit architectural plans, engineering drawings and calculations, and construction work plans and methods, including any crane placement and radius, to evaluate any impacts to the Metro 7th Street/Metro Center Station infrastructure in relationship to the Project. Before issuance of any building permit for the Project, the Applicant shall obtain Metro's approval of final construction plans.

   b. Metro Station Ventilation Shafts and Emergency Exits: The Applicant shall take all necessary measures to protect the subway vents and emergency exits from damage due to Project activities during and after construction. The Applicant shall label all Metro Station ventilation shafts and emergency exits on the demolition and construction plans.

   c. Construction Safety: The construction and operation of the Project shall not disrupt the operation and maintenance activities of the Metro 7th Street/Metro Center Station or the structural and systems integrity of Metro's tunnels. Not later than two months before Project construction, the Applicant shall contact Metro to schedule a pre-construction meeting with all Project construction personnel and Metro Real Estate, Construction Management, and Construction Safety staff. During Project construction, the Applicant shall:

      i. Work in close coordination with Metro to ensure that station access, visibility, and structural integrity are not compromised by construction activities or permanent build conditions;

      ii. Notify Metro of any changes to construction activity that may impact the use of the ROW;

      iii. Permit Metro staff to monitor construction activity to ascertain any impact to the 7th Street/Metro Station.

4. Advisories to Applicant: The Applicant is encouraged to contact the Metro Development Review Team early in the design process to address potential impacts. The Applicant should also be advised of the following:

   a. Occupational Safety and Health Administration (OSHA) Requirements: Construction and/or excavation work in proximity to Metro right-of-way (ROW) with potential to damage subway tracks and related infrastructure may be subject to additional OSHA safety requirements.

   b. Technical Review: Metro charges for staff time spent on engineering review and construction monitoring.

   c. Right of Way (ROW) Entry Permit: For temporary or ongoing access to Metro ROW for construction, and/or maintenance activities, the Applicant shall complete Metro's Track

Allocation process with Metro Rail Operations and obtain a Right of Entry Permit from Metro Real Estate. Approval for single tracking or a power shutdown, while possible, is highly discouraged; if sought, the Applicant shall apply for and obtain such approval not later than two months before the start of Project construction. The Applicant shall apply for and obtain approval for any special operations, including the use of a pile driver or any other equipment that could come in close proximity or encroach on the tunnels or related structures, not later than two months before the start of Project construction.

d. Cost of Impacts: The Applicant will be responsible for costs incurred by Metro resulting from Project construction/operation issues that cause delay or harm to Metro service delivery or infrastructure, including single-tracking or bus bridging around closures. The Applicant will also bear all costs for any noise mitigation required for the Project.

Transit Supportive Planning: Recommendations and Resources

Considering the Project's proximity to the 7th Street/Metro Center Station, Metro would like to identify the potential synergies associated with transit-oriented development:

1. Transit Supportive Planning Toolkit: Metro strongly recommends that the Applicant review the Transit Supportive Planning Toolkit which identifies 10 elements of transit-supportive places and, applied collectively, has been shown to reduce vehicle miles traveled by establishing community-scaled density, diverse land use mix, combination of affordable housing, and infrastructure projects for pedestrians, bicyclists, and people of all ages and abilities. This resource is available at https://www.metro.net/about/funding-resources/.

2. Land Use: Metro supports development of commercial and residential properties near transit stations and understands that increasing development near stations represents a mutually beneficial opportunity to increase ridership and enhance transportation options for the users of developments. Metro encourages the City and Applicant to be mindful of the Project's proximity to the 7th Street/Metro Center Station including orienting pedestrian pathways towards the station.

3. Transit Connections and Access: Metro strongly encourages the Applicant to install Project features that help facilitate safe and convenient connections for pedestrians, people riding bicycles, and transit users to/from the Project site and nearby destinations. The City should consider requiring the installation of such features as part of the conditions of approval for the Project, including:

    a. Walkability: The provision of wide sidewalks, pedestrian lighting, a continuous canopy of shade trees, enhanced crosswalks with ADA-compliant curb ramps, and other amenities along all public street frontages of the development site to improve pedestrian safety and comfort to access the nearby bus stops and 7th Street/Metro Center Station.

    b. Transfer Activity: Given the Project's proximity to the Metro bus stop 51 and 66, and 7th Street/Metro Center Station, the Project design should consider and accommodate transfer activity between bus and bus and bus and rail lines that will occur along the sidewalks and public spaces. Metro has completed the Metro Transfers Design Guide, a best practices document on transit improvements. This can be accessed online at https://www.metro.net/about/station-design-projects/.

    c. Bicycle Use and Micromobility Devices: The provision of adequate short-term bicycle parking, such as ground-level bicycle racks, and secure, access-controlled, enclosed long-term bicycle parking for residents, employees, and guests. Bicycle parking facilities should be designed with best practices in mind, including highly visible siting, effective surveillance, ease to locate, and

equipment installation with preferred spacing dimensions, so bicycle parking can be safely and conveniently accessed. Similar provisions for micro-mobility devices are also encouraged.

d. First & Last Mile Access: The Project should address first-last mile connections to transit and is encouraged to support these connections with wayfinding signage inclusive of all modes of transportation. For reference, please review the First Last Mile Strategic Plan, authored by Metro and the Southern California Association of Governments (SCAG), available on-line at: http://media.metro.net/docs/sustainability_path_design_guidelines.pdf

4. Parking: Metro encourages the incorporation of transit-oriented, pedestrian-oriented parking provision strategies such as the reduction or removal of minimum parking requirements and the exploration of shared parking opportunities. These strategies could be pursued to reduce automobile-orientation in design and travel demand.

5. Wayfinding: Any temporary or permanent wayfinding signage with content referencing Metro services or featuring the Metro brand and/or associated graphics (such as Metro Bus or Rail pictograms) requires review and approval by Metro Signage and Environmental Graphic Design.

6. Transit Pass Programs: Metro would like to inform the Applicant of Metro's employer transit pass programs, including the Annual Transit Access Pass (A-TAP), the Employer Pass Program (E-Pass), and Small Employer Pass (SEP) Program. These programs offer efficiencies and group rates that businesses can offer employees as an incentive to utilize public transit. The A-TAP can also be used for residential projects. For more information on these programs, please visit the programs' website at https://www.metro.net/riding/eapp/.

Quick Overview

Purpose of Handbook

The Metro Adjacent Development Handbook (Handbook) is intended to provide information and guide coordination for projects adjacent to, below, or above Metro transit facilities (e.g. right-of-way, stations, bus stops) and services.

Overarching Goal
By providing information and encouraging early coordination, Metro seeks to reduce potential conflicts with transit services and facilities, and identify potential synergies to expand mobility and improve access to transit.

Intended Audience
The Handbook is a resource for multiple stakeholder groups engaged in the development process, including:

- Local jurisdictions who review, entitle, and permit development projects,
- Developers,
- Property owners,
- Architects, engineers, and other technical consultants,
- Builders/contractors,
- Utility companies, and
- other Third Parties.

Handbook Content
The Handbook includes:

- **Introduction** of Metro's Development Review coordination process, common concerns, and typical stages of review.
- **Information** on best practices during three key coordination phases to avoid potential conflicts or create compatibility with the Metro transit system:
  - Planning & Conceptual Design,
  - Engineering & Technical Review, and
  - Construction Safety & Monitoring.
- **Glossary** with definitions for key terms used throughout the Handbook.

RULE OF THUMB: 100 FEET

Metro's Development Review process applies to projects that are within 100 feet of Metro transit facilities.

While the Handbook summarizes key concerns and best practices for adjacency conditions, it does not replace Metro's technical requirements and standards.

Prior to receiving approval for any construction activities adjacent to, above, or below Metro facilities, Third Parties must comply with the Metro Adjacent Construction Design Manual, available on Metro's website.

Contact Us
For questions, contact the Development Review Team:

- Email: devreview@metro.net
- Phone: 213.418.3484
- Online In-take Form: https://jpropublic.metro.net/in-take-form

Additional Information & Resources

- Metro Development & Construction Coordination website: https://www.metro.net/devreview
- Metro GIS/KML ROW Files: https://developer.metro.net/portfolio-item/metro-right-of-way-gis-data
- Metrolink Standards and Procedures: https://www.metrolinktrains.com/about/agency/engineering--construction

Metro will continue to revise the Handbook, as needed, to reflect updates to best practices in safety, operations, and transit-supportive development.

Background

Who is Metro?

The Los Angeles County Metropolitan Transportation Authority (Metro) plans, funds, builds, and operates rail, bus, and other mobility services (e.g. bikeshare, microtransit) throughout Los Angeles County (LA County). On average, Metro moves 1.3 million people each day on buses and trains. With funding from the passage of Measure R (2008) and Measure M (2016), the Metro system is expanding. Over the next 40 years, Metro will build over 60 new stations and over 100 miles of transit right-of-way (ROW). New and expanded transit lines will improve mobility across LA County, connecting riders to more destinations and expanding opportunities for development that supports transit ridership. Metro facilities include:

Metro Rail: Metro operates heavy rail (HRT) and light rail (LRT) transit lines in underground tunnels, along streets, off-street in dedicated ROW, and above street level on elevated structures. Heavy rail trains are powered by a "third rail" along the tracks. Light rail vehicles are powered by overhead catenary systems (OCS). To support rail operations, Metro owns and maintains traction power substations (TPSS), maintenance yards, and other infrastructure.

Metrolink/Regional Rail: Metro owns a majority of the ROW within LA County on which the Southern California Regional Rail Authority (SCRRA) operates Metrolink service. Metrolink is a commuter rail system with seven lines that span 388 miles across five counties, including: Los Angeles, Orange, Riverside, San Bernardino, Ventura, and North San Diego. As a SCRRA member agency and property owner, Metro reviews development activity adjacent to Metro-owned ROW on which Metrolink operates, and coordinates with Metrolink on any comments or concerns. Metrolink has its own set of standards and processes, see link on page 1.

Metro Bus Rapid Transit (BRT): Metro operates accelerated bus transit, which acts as a hybrid between rail and traditional bus service. Metro BRT may operate in a dedicated travel lane within a street or freeway, or off-street along dedicated ROW. Metro BRT stations may be located on sidewalks within the public right-of-way, along a median in the center of streets, or off-street on Metro-owned property.

Metro Bus: Metro operates 170 bus lines across more than 1,400 square miles in LA County. The fleet serves over 15,000 bus stops with approximately 2,000 buses. Metro operates "Local" and "Rapid" bus service within the street, typically alongside vehicular traffic, though occasionally in "bus-only" lanes. Metro bus stops are typically located on sidewalks within the public right-of-way, which is owned and maintained by local jurisdictions. Metro's NextGen Bus Plan re-envisions bus service across LA County to make service improvements that better serve riders.

Why is Metro interested in adjacent development?

Metro Supports Transit Oriented Communities: Metro is redefining the role of the transit agency by expanding mobility options, promoting sustainable urban design, and helping transform communities throughout LA County. Metro seeks to partner with local, state, and federal jurisdictions, developers, property owners and other stakeholders across LA County on transit-supportive planning and developments to grow ridership, reduce driving, and promote walkable neighborhoods. Transit Oriented Communities (TOCs) are places (such as corridors or neighborhoods) that, by their design, allow people to drive less and access transit more. TOCs maximize equitable access to a multi-modal transit network as a key organizing principle of land use planning and holistic community development.

Adjacent Development Leads to Transit Oriented Communities: Metro supports private development adjacent to transit as this presents a mutually beneficial opportunity to enrich the built environment and expand mobility options. By connecting communities, destinations, and amenities through improved access to public transit, adjacent developments have the potential to:

- reduce auto dependency,
- reduce greenhouse gas emissions,
- promote walkable and bikeable communities that accommodate more healthy and active lifestyles,
- improve access to jobs and economic opportunities, and
- create more opportunities for mobility – highly desirable features in an increasingly urbanized environment.

Opportunity: Acknowledging an unprecedented opportunity to influence how the built environment develops along and around transit and its facilities, Metro has created this document. The Handbook helps ensure compatibility between private development and Metro's transit infrastructure to minimize operational, safety, and maintenance issues. It serves as a crucial first step to encourage early and active collaboration with local stakeholders and identify potential partnerships that leverage Metro initiatives and support TOCs across LA County.

Metro Purview & Concerns

Metro Purview for Review & Coordination

Metro is interested in reviewing development, construction, and utility projects within 100 feet of Metro transit facilities, real estate assets, and ROW – as measured from the edge of the ROW outward – both to ensure the structural safety of existing or planned transit infrastructure and to maximize integration opportunities with adjacent development. The Handbook seeks to:

- Improve communication and coordination between developers, jurisdictions, and Metro.
- Identify common concerns associated with developments adjacent to Metro ROW.
- Highlight Metro operational needs and requirements to ensure safe, continuous service.
- Prevent potential impacts to Metro transit service or infrastructure.
- Maintain access to Metro facilities for riders and operational staff.
- Avoid preventable conflicts resulting in increased development costs, construction delays, and safety impacts.
- Streamline the review process to be transparent, clear, and efficient.
- Assist in the creation of overall marketable and desirable developments.

Key Audiences for Handbook

The Handbook is intended to be used by:

- Local jurisdictions who review, entitle, and permit development projects and/or develop policies related to land use, development standards, and mobility,
- Developers, property owners,
- Architects, engineers, design consultants,
- Builders/contractors,
- Entitlement consultants,
- Environmental consultants,
- Utility companies, and
- other Third Parties.

Metro Assets & Common Concerns for Adjacent Development

The table on the facing page outlines common concerns for development projects and/or construction activities adjacent to Metro transit facilities and assets. These concerns are discussed in greater detail in the following chapters of the Handbook.

METRO ASSETS	COMMON ADJACENCY CONCERNS
UNDERGROUND ROW Transit operates below ground in tunnels.	• Excavation near tunnels and infrastructure • Clearance from support structures (e.g. tiebacks, shoring, etc) • Coordination with utilities • Clearance from ventilation shafts, surface penetrations (e.g. emergency exits) • Surcharge loading of adjacent construction • Explosions • Noise and vibration/ground movement • Storm water drainage
AERIAL ROW Transit operates on elevated guideway, typically supported by columns.	• Excavation near columns and support structures • Column foundations • Clearance from OCS • Overhead protection and crane swings • Setbacks from property line for maintenance activities to occur without entering ROW • Coordination with utilities • Noise reduction (e.g. double-paned windows)
AT-GRADE ROW Transit operates in dedicated ROW at street level; in some cases tracks are separated from adjacent property by fence or wall.	• Pedestrian and bicycle movements and safety • Operator site distance/cone of visibility • Clearance from OCS • Crane swings and overhead protection • Trackbed stability • Storm water drainage • Noise/vibration • Driveways near rail crossings • Setbacks from property line for maintenance activities to occur without entering ROW • Utility coordination
BUS STOPS Metro operates bus service on city streets. Bus stops are located on public sidewalks.	• Lane closures and re-routing service during construction • Temporary relocation of bus stops • Impacts to access to bus stops
NON-REVENUE/OPERATIONAL Metro owns and maintains property to support operations (e.g. bus and rail maintenance facilities, transit plazas, traction power substations, park-and-ride parking lots).	• Excavation and clearance from support structures (e.g. tiebacks, shoring, etc) • Ground movement • Drainage • Utility coordination • Access to property

Metro Coordination Process

Typical Stages of Metro Review and Coordination

Early coordination helps avoid conflicts between construction activities and transit operations and maximizes opportunities to identify synergies between the development project and Metro transit services that are mutually beneficial.

*Phases above may include fees for permits and reimbursement of Metro staff time for review and coordination.

Coordination Goal: Metro encourages developers to consult with the Development Review Team early in the design process to ensure compatibility with transit infrastructure and minimize operational, safety, and maintenance issues with adjacent development. The Development Review team will serve as a case manager to developers and other Third Parties to facilitate the review of plans and construction documents across key Metro departments.

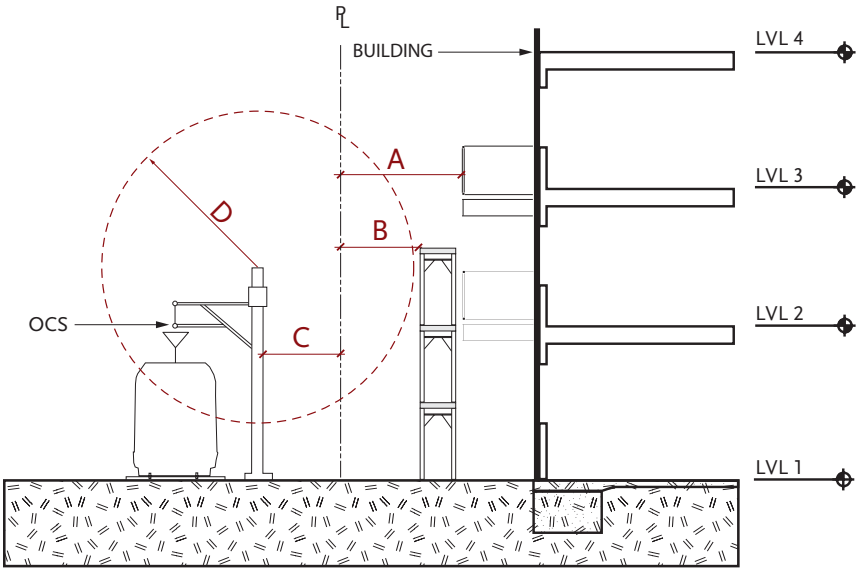
Level of Review: Not all adjacent projects will require significant review and coordination with Metro. The level of review depends on the Project's proximity to Metro, adjacency conditions, and the potential to impact Metro facilities and/or services. For example, development projects that are excavating near Metro ROW or using cranes near transit facilities require a greater level of review and coordination. Where technical review and construction monitoring is needed, Metro charges fees for staff time, as indicated by asterisk in the above diagram.

Permit Clearance: Within the City of Los Angeles, Metro reviews and clears Building & Safety permits for projects within 100 feet of Metro ROW, pursuant to Zoning Information 1117. To ensure timely clearance of these permits, Metro encourages early coordination as noted above.

To begin consultation, submit project information via an online In-Take Form, found on Metro's website. Metro staff will review project information and drawings to screen the project for any potential impacts to transit facilities or services, and determine if require further review and coordination is required. The sample sections on the facing page illustrate adjacency condition information that helps Metro complete project screening.

Contact:
Metro Development Review Team
Website: https://www.metro.net/devreview
Online In-take Form: https://jpropublic.metro.net/in-take-form
Email: devreview@metro.net
Phone: 213.418.3484

Sample Section: Adjacency Conditions



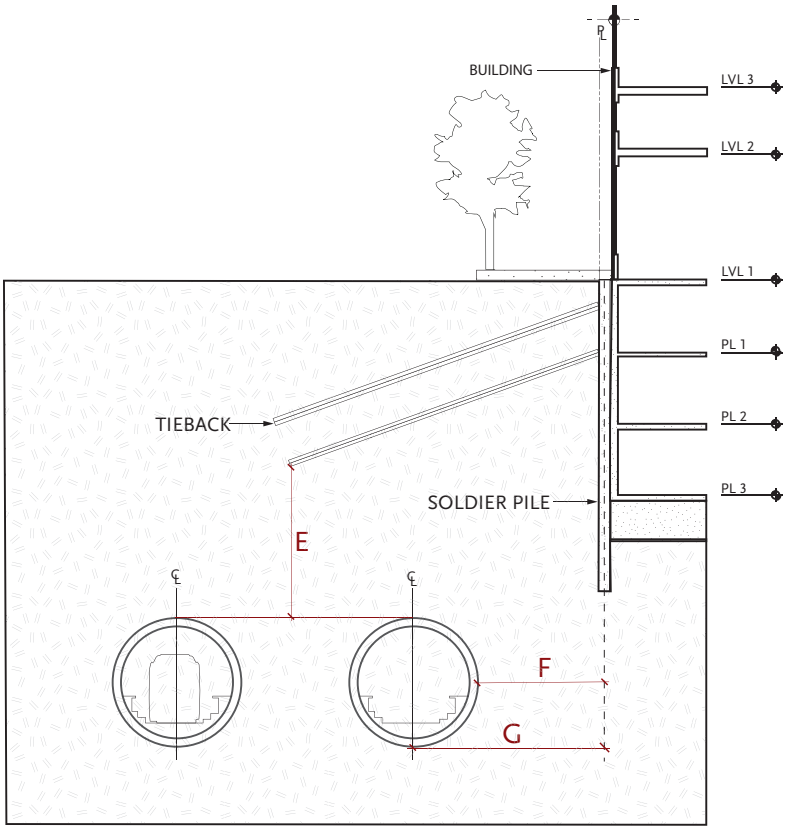
AT-GRADE CONDITION

A. Distance from property line to nearest permanent structure (e.g. building facade, balconies, terraces). Refer to Section 1.3 Building Setback of Handbook.

B. Distance from property line to nearest temporary construction structures (e.g. scaffolding).

C. Distance from property line to nearest Metro facility.

D. Clearance from nearest temporary and/or permanent structure to overhead catenary system (OCS). Refer to Section 1.4, OCS Clearance of Handbook.



BELOW-GRADE CONDITION

E. Vertical distance from top of Metro tunnel to closest temporary and/or permanent structure (e.g. tiebacks, foundation). Refer to Section 2.2, Proximity to Tunnels & Underground Infrastructure of Handbook.

F. Horizontal distance from exterior tunnel wall to nearest structure.

G. Horizontal distance from Metro track centerline to nearest structure.

Best Practices

Best Practices for Developer Coordination

Metro encourages developers of projects adjacent to Metro ROW and/or Real Estate Assets to take the following steps to facilitate Metro project review and approval:

1. **Review Metro resources and policies:** The Metro Development & Construction Coordination website and Handbook provide important information for those interested in constructing on, adjacent, over, or under Metro ROW, non-revenue property, or transit facilities. Developers and other Third Parties should familiarize themselves with these resources and keep in mind common adjacency concerns when planning a project.

2. **Contact Metro early during design process:** Metro welcomes the opportunity to provide feedback early in project design, allowing for detection and resolution of important adjacency issues, identification of urban design and system integration opportunities, and facilitation of permit approval. Metro encourages project submittal through the online In-Take Form to begin consultation.

3. **Maintain communication:** Frequent communication with Metro during project design and construction will reinforce relationships and allow for timely project completion. Contact us at devreview@metro.net or at 213.418.3484.

Best Practices for Local Jurisdiction Notification

To improve communication between Metro and the development community, Metro suggests that local jurisdictions take the following steps to notify property owners of coordination needs for properties adjacent to Metro ROW by:

- **Updating GIS and parcel data:** Integrate Metro ROW files into the City/County GIS and/or Google Earth Files for key departments (e.g. Planning, Public Works, Building & Safety) to notify staff of Metro adjacency and need for coordination during development approval process.Download Metro's ROW files here.

- **Flag Parcels:** Create an overlay zone as part of local Specific Plan(s) and/or Zoning Ordinance(s) to tag parcels that are within 100 feet Metro ROW and require coordination with Metro early during the development process [e.g. City of Los Angeles Zone Information and Map Access System (ZI-1117)].

- **Provide Resources:** Direct all property owners and developers interested in parcels within 100 feet of Metro ROW to Metro's resources (e.g. website, Handbook).

Metro
Downtown
Santa
Monica
E

Site Plan & Conceptual Design

Site Plan & Conceptual Design

1.1 Supporting Transit Oriented Communities

Transit-oriented communities (TOCs) are places that, by their design, make it more convenient to take transit, walk, bike or roll than to drive. By working closely with the development community and local jurisdictions, Metro seeks to ensure safe construction near Metro facilities and improve compatibility with adjacent development to increase transit ridership.

RECOMMENDATION: Consider site planning and building design strategies to that support transit ridership, such as:

- Leveraging planning policies and development incentives to design a more compelling project that capitalizes on transit adjacency and economy of scales.
- Programming a mix of uses to create lively, vibrant places that are active day and night.
- Utilizing Metro policies and programs that support a healthy, sustainable, and welcoming environment around transit service and facilities.
- Prioritizing pedestrian-scaled elements to create spaces that are comfortable, safe, and enjoyable.
- Activating ground floor with retail and outdoor seating/activities to bring life to the public environment.
- Reducing and screening parking to focus on pedestrian activity.
- Incorporating environmental design elements that help reduce crime (e.g. windows and doors that face public spaces, lighting).

The Wilshire/Vermont Metro Joint Development project leveraged existing transit infrastructure to catalyze a dynamic and accessible urban environment. This project accommodates portal access into the Metro Rail system and on-street bus facilities.

1.2 Enhancing Access to Transit

Metro seeks to create a comprehensive, integrated transportation network and supports infrastructure and design that allows safe and convenient access to its multi-modal services. Projects in close proximity to Metro's services and facilities present an opportunity to enhance the public realm and connections to/from these services for transit riders as well as users of the developments.

RECOMMENDATION: Design projects with transit access in mind. Project teams should capitalize on the opportunity to improve the built environment and enhance the public realm for pedestrians, bicyclists, persons with disabilities, seniors, children, and users of green modes. Metro recommends that projects:

- Orient major entrances to transit service, making access and travel safe, intuitive, and convenient.
- Plan for a continuous canopy of shade trees along all public right-of-way frontages to improve pedestrian comfort to transit facilities.
- Add pedestrian lighting along paths to transit facilities and nearby destinations.
- Integrate wayfinding and signage into project design.
- Enhance nearby crosswalks and ramps.
- Ensure new walkways and sidewalks are clear of any obstructions, including utilities, traffic control devices, trees, and furniture.
- Design for seamless, multi-modal pedestrian connections, making access easy, direct, and comfortable.

The City of Santa Monica leveraged investments in rail transit and reconfigured Colorado Avenue to form a multi-modal first/last mile gateway to the waterfront from the Downtown Santa Monica Station. Photo by PWP Landscape Architecture

1.3 Building Setback

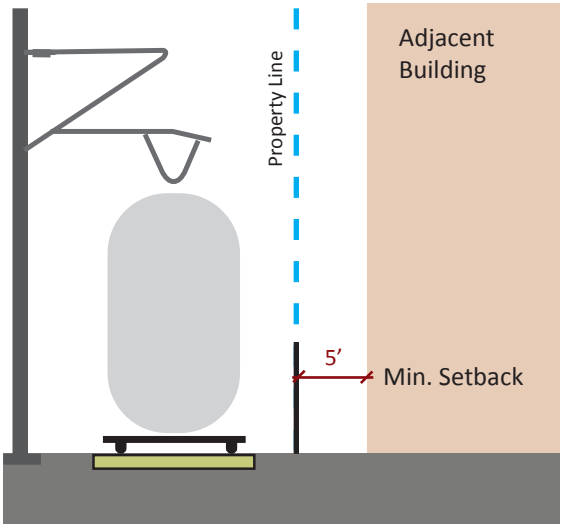
Buildings and structures with a zero lot setback that closely abut Metro ROW can pose concerns to Metro during construction. Encroachment onto Metro property to construct or maintain buildings is strongly discouraged as this presents safety hazards and may disrupt transit service and/or damage Metro infrastructure.

RECOMMENDATION: Include a minimum setback of five (5) feet from the property line to building facade to accommodate the construction and maintenance of structures without the need to encroach upon Metro property. As local jurisdictions also have building setback requirements, new developments should comply with the greater of the two requirements.

Entry into the ROW by parties other than Metro and its affiliated partners requires written approval. Should construction or maintenance of a development necessitate temporary or ongoing access to Metro ROW, a Metro Right of Entry Permit must be requested and obtained from Metro Real Estate for every instance access is required. Permission to enter the ROW is granted solely at Metro's discretion.

Coordination between property owners of fences, walls, and other barriers along property line is recommended. See Section 1.5.

Refer to Section 3.2 – Track Access and Safety for additional information pertaining to ROW access in preparation for construction activities.



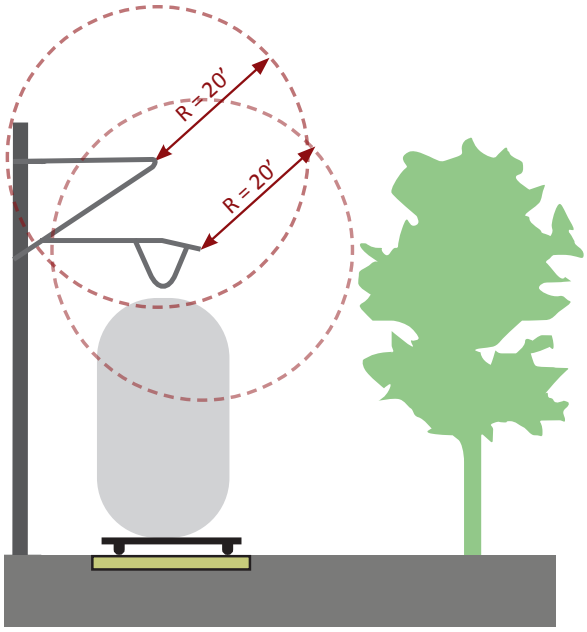
A minimum setback of five (5) feet between an adjacent structure and Metro ROW is strongly encouraged to allow project construction and ongoing maintenance without encroaching on Metro property.

1.4 Overhead Catenary System (OCS) Clearance

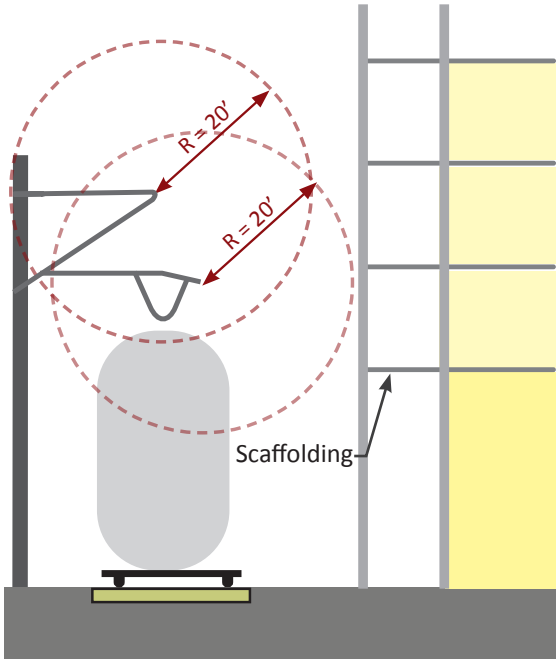
Landscaping and tree canopies can grow into the OCS above light rail lines, creating electrical safety hazards as well as visual and physical impediments for trains. Building appurtenances facing rail ROW, such as balconies, may also pose safety concerns to Metro operations as objects could fall onto the OCS.

RECOMMENDATION: Design project elements facing the ROW to avoid potential conflicts with Metro transit vehicles and infrastructure. Metro recommends that projects:

- Plan for landscape maintenance from private property and prevent growth into Metro ROW. Property owners will not be permitted to access Metro property to maintain private development.
- Design buildings such that balconies do not provide building users direct access to Metro ROW.
- Maintain building appurtenances and landscaping at a minimum distance of ten (10) feet from the OCS and support structures. If Transmission Power (TP) feeder cable is present, twenty (20) feet from the OCS and support structures is required. Different standards will apply for Metro Trolley Wires, Feeder Cables (wires) and Span Wires.



Adjacent structures and landscaping should be sited and maintained to avoid conflicts with the rail OCS.



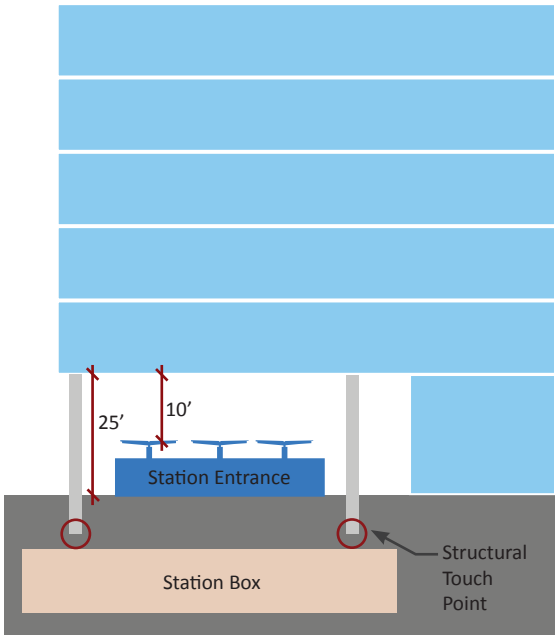
Scaffolding and construction equipment should be staged to avoid conflicts with the rail OCS.

1.5 Underground Station Portal Clearance

Metro encourages transit-oriented development. Where development is planned above station entrances, close coordination is needed for structural safety as well as access for patrons, operations, and maintenance. Below are key design rules of thumb for development planned to cantilever over an entrance to an underground Metro Rail station.

RECOMMENDATION:

1. Preserve 25 feet clearance at minimum from plaza grade and the building structure above.
2. Preserve 10 feet clearance at minimum between portal roof and building structure above.
3. Coordinate structural support system and touchdown points to ensure a safe transfer of the building loads above the station portal.
4. Coordinate placement of structural columns and amenities (e.g. signage, lighting, furnishings) at plaza level to facilitate direct and safe connections for people of all mobile abilities to and from station entrance(s).
5. Develop a maintenance plan for the plaza in coordination with Metro.



Projects that propose to cantilever over Metro subway portals require close coordination with Metro Engineering.

1.6 Shared Barrier Construction & Maintenance

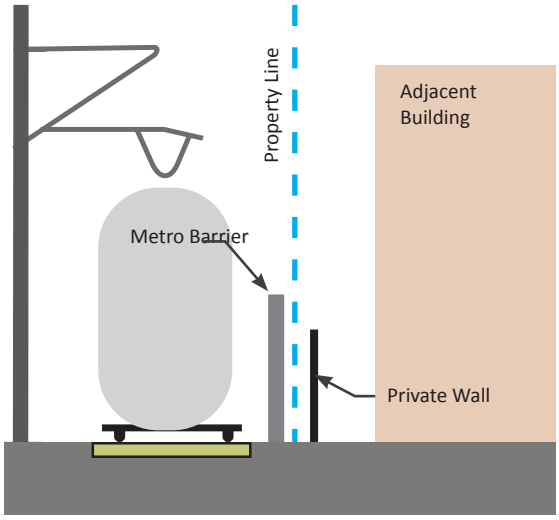
In areas where Metro ROW abuts private property, barrier construction and maintenance responsibilities can be a point of contention with property owners. When double barriers are constructed, the gap created between the Metro-constructed fence and a private property owner's fence can accumulate trash and make regular maintenance challenging without accessing the other party's property.

RECOMMENDATION: Coordinate with Metro Real Estate to create a single barrier condition along the ROW property line. With an understanding that existing conditions along ROW boundaries vary throughout LA County, Metro recommends the following, in order of preference:

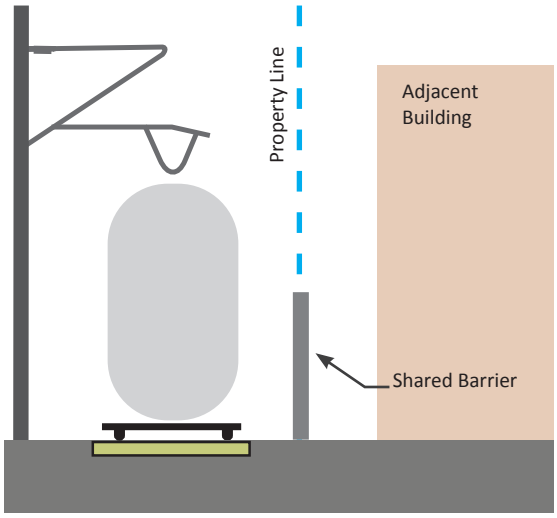
- **Enhance existing Metro barrier:** if structural capacity allows, private property owners and developers should consider physically affixing improvements onto and building upon Metro's existing barrier. Metro is amenable to barrier enhancements such as increasing barrier height and allowing private property owners to apply architectural finishes to their side of Metro's barrier.

- **Replace existing barrier(s):** if conditions are not desirable, remove and replace any existing barrier(s), including Metro's, with a new single "shared" barrier built on the property line.

Metro is amenable to sharing costs for certain improvements that allow for clarity in responsibilities and adequate ongoing maintenance from adjacent property owners without entering Metro's property. Metro Real Estate should be contacted with case-specific questions and will need to approve shared barrier design, shared financing, and construction.



Double barrier conditions allow trash accumulation and create maintenance challenges for Metro and adjacent property owners.



Metro prefers a single barrier condition along its ROW property line.

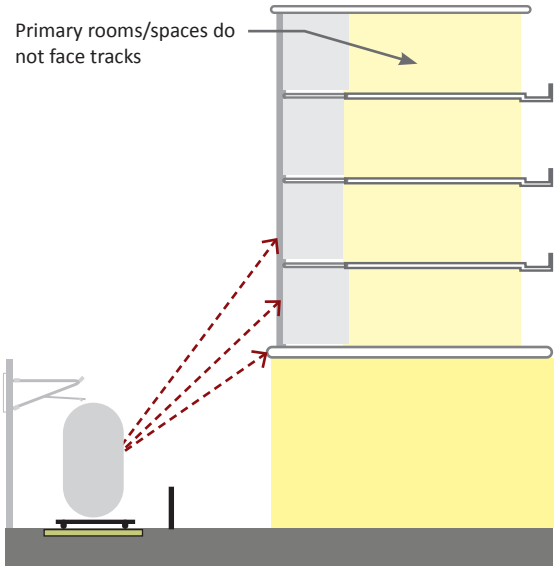
1.7 Project Orientation & Noise Mitigation

Metro may operate in and out of revenue service 24 hours per day, every day of the year, which can create noise and vibration (i.e. horns, power washing). Transit service and maintenance schedules cannot be altered to avoid noise for adjacent developments. However, noise and vibration impacts can be reduced through building design and orientation.

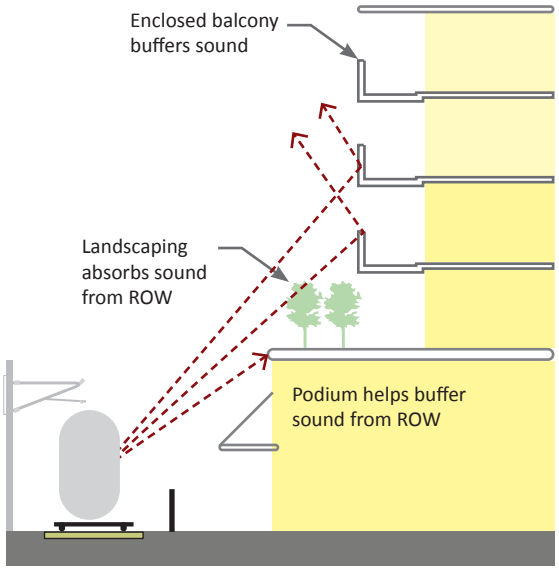
RECOMMENDATION: Use building orientation, programming, and design techniques to reduce noise and vibration for buildings along Metro ROW:

- Locate secondary or "back of house" rooms (e.g. bathrooms, stairways, laundry rooms) along ROW, rather than primary living spaces that are noise sensitive (e.g. bedrooms and family rooms).
- Use upper level setbacks and locate living spaces away from ROW.
- Enclose balconies.
- Install double-pane windows.
- Include language disclosing potential for noise, vibration, and other impacts due to transit proximity in terms and conditions for building lease or sale agreements to protect building owners/sellers from tenant/buyer complaints.

Developers are responsible for any noise mitigation required, which may include engineering designs for mitigation recommended by Metro or otherwise required by local municipalities. A recorded Noise Easement Deed in favor of Metro may be required for projects within 100 feet of Metro ROW to ensure notification to tenants and owners of any proximity issues.



Building orientation can be designed to face away from tracks, reducing the noise and vibration impacts.



Strategic placement of podiums and upper-level setbacks on developments near Metro ROW can reduce noise and vibration impacts.

1.8 At-Grade Rail Crossings

New development is likely to increase pedestrian activity at rail crossings. Safety enhancements may be needed to upgrade existing rail crossings to better protect pedestrians.

RECOMMENDATION: Coordinate with Metro, the California Public Utilities Commission (CPUC), and any other transit operators using the crossing (e.g. Metrolink) to determine if safety enhancements are needed for nearby rail crossings.

While Metro owns and operates the rail ROW, the CPUC regulates all rail crossings. Contact the CPUC early in the design process to determine if they will require any upgrades to existing rail crossings. The CPUC may request to review development plans and hold a site visit to understand future pedestrian activity. Metro's Corporate Safety Department can support the developer in coordination with the CPUC.

Gates and pedestrian arms are common types of safety elements for pedestrians at rail crossings.

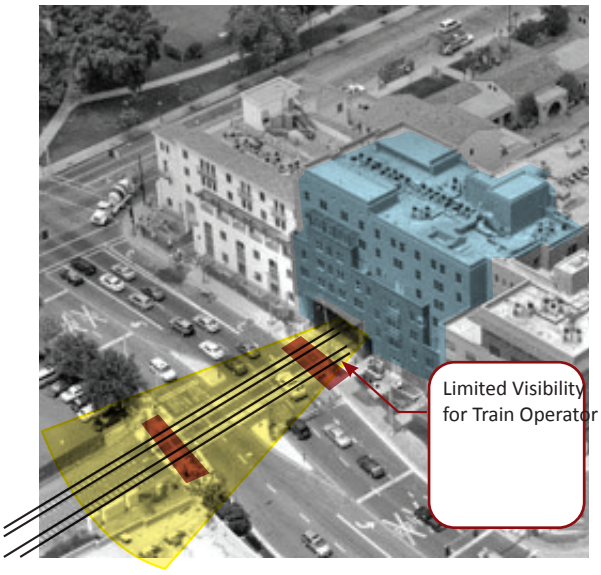
Safety elements of a gate and pedestrian arms have been constructed at the Monrovia Station.

1.9 Sight-Lines at Crossings

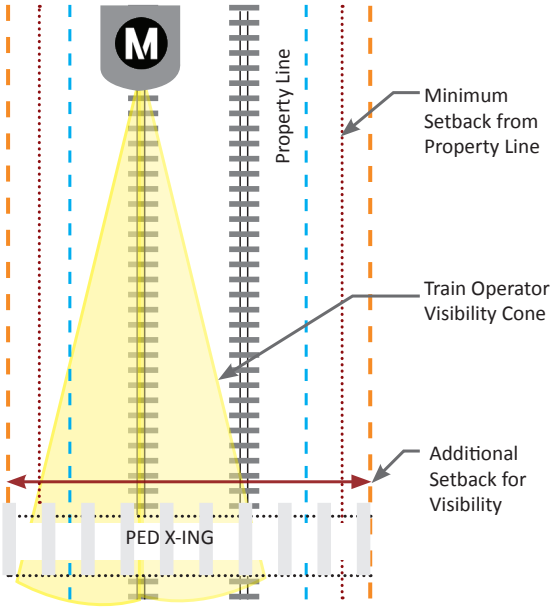
Developments adjacent to Metro ROW can present visual barriers to transit operators approaching vehicular and pedestrian crossings. Buildings and structures in close proximity to transit corridors can reduce sight-lines and create blind corners where operators cannot see pedestrians. This requires operations to reduce train speeds, which decreases efficiency of transit service.

RECOMMENDATION: Design buildings to maximize transit service sight-lines at crossings, leaving a clear cone of visibility to oncoming vehicles and pedestrians.

Metro Rail Operations will review, provide guidance, and determine the extent of operator visibility for safe operations. If the building envelope overlaps with the visibility cone near pedestrian and vehicular crossings, a building setback may be necessary to ensure safe transit service. The cone of visibility at crossings and required setback will be determined based on vehicle approach speed.



Limited sight-lines for trains approaching street crossings create unsafe conditions.



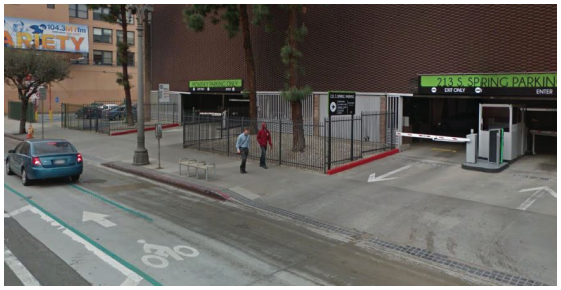
Visibility cones allow train operators to respond to safety hazards.

1.10 Driveway/Access Management

Driveways adjacent to on-street bus stops can create conflict for pedestrians walking to/from or waiting for transit. Additionally, driveways accessing parking lots and loading zones at project sites near Metro Rail and BRT crossings can create queuing issues along city streets and put vehicles in close proximity to fast moving trains and buses, which pose safety concerns.

RECOMMENDATION: Site driveways and other vehicular entrances to avoid conflicts with pedestrians, bicycles, and transit vehicles by:

- Placing driveways along side streets and alleys, away from on-street bus stops and transit crossings to minimize safety conflicts between active ROW, transit vehicles, and people, as well as queuing on streets.
- Locating vehicular driveways away from transit crossings or areas that are likely to be used as waiting areas for transit services.
- Placing loading docks away from sidewalks where transit bus stop activity is/will be present.
- Consolidating vehicular entrances and reduce width of driveways.
- Using speed tables to slow entering/exiting automobiles near pedestrians.
- Separating pedestrian walkways to minimize conflict with vehicles.
- Encouraging safe non-motorized travel.



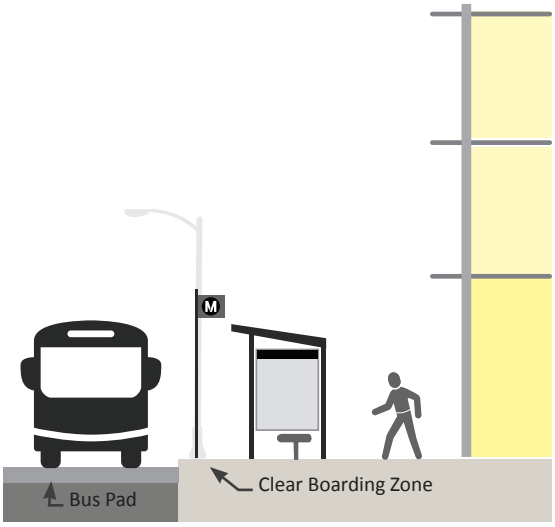
Driveways in close proximity to each other compromise safety for those walking to/from transit and increase the potential for vehicle-pedestrian conflicts.

1.11 Bus Stop & Zones Design

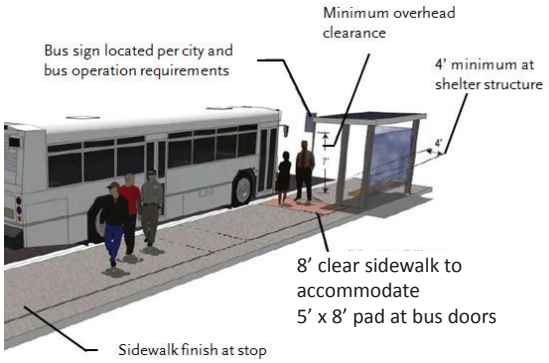
Metro Bus serves over 15,000 bus stops throughout the diverse landscape that is LA County. Typically located on sidewalks within public right-of-way owned and maintained by local jurisdictions, existing bus stop conditions vary from well-lit and sheltered spaces to uncomfortable and unwelcoming zones. Metro is interested in working with developers and local jurisdictions to create a vibrant public realm around new developments by strengthening multi-modal access to/ from Metro transit stops and enhancing the pedestrian experience.

RECOMMENDATION: When designing around existing or proposed bus stops:

- Review Metro's Transit Service Policy, which provides standards for design and operation of bus stops and zones for near-side, far-side, and mid-block stops.
- Review Metro's Transfers Design Guide for more information at https://www.metro.net/projects/station-design-projects/
- Accommodate 5' x 8' landing pads at bus doors (front and back door, which are typically 23 to 25 feet apart).
- Locate streetscape elements (e.g. tree planters, street lamps, benches, shelters, trash receptacles and newspaper stands) outside of bus door zones to protect transit access and ensure a clear path of travel.
- Install a concrete bus pad within each bus stop zone to avoid street asphalt damage.
- Replace stand-alone bus stop signs with bus shelters that include benches and adequate lighting.
- Design wide sidewalks (15' preferred) that accommodate bus landing pads as well as street furniture, landscape, and user travel space.
- Consider tree species, height, and canopy shape (higher than 14' preferred) to avoid vehicle conflicts at bus stops. Trees should be set back from the curb and adequately maintained to prevent visual and physical impediments for buses when trees reach maturity. Avoid planting of trees that have an invasive and shallow root system.



A concrete bus pad should be located at bus stops and bus shelters should be located along sidewalks to ensure an accessible path of travel to a clear boarding area.



Well-designed and accessible bus stops are beneficial amenities for both transit riders and users of adjacent developments.

Engineering & Technical Review

Engineering & Technical Review

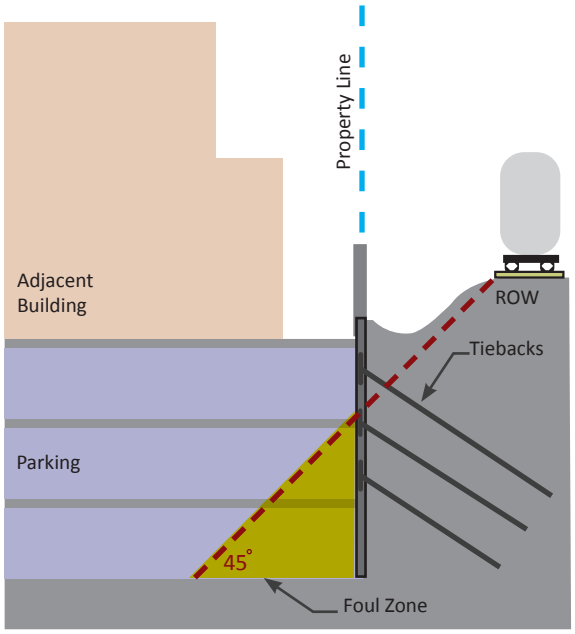
2.1 Excavation Support System Design

Excavation near Metro ROW has the potential to disturb adjoining soils and jeopardize support of existing Metro infrastructure. Any excavation which occurs within the geotechnical foul zone relative to Metro infrastructure is subject to Metro review and approval and meet Cal/OSHA requirements. This foul zone or geotechnical zone of influence shall be defined as the area below a track-way as measured from a 45-degree angle from the edge of the rail track ballast. Construction within this vulnerable area poses a potential risk to Metro service and requires additional Metro Engineering review.

RECOMMENDATION: Coordinate with Metro Engineering staff for review and approval of the excavation support system drawings and calculations prior to the start of excavation or construction. Tiebacks encroaching into Metro ROW may require a tieback easement or license, at Metro's discretion.

Any excavation/shoring within Metrolink operated and maintained ROW will require compliance with SCRRA Engineering standards and guidelines.

See page 7 for a sample section showing Metro adjacent conditions.



An underground structure located within the ROW foul zone would require additional review by Metro.

2.2 Proximity to Tunnels & Underground Infrastructure

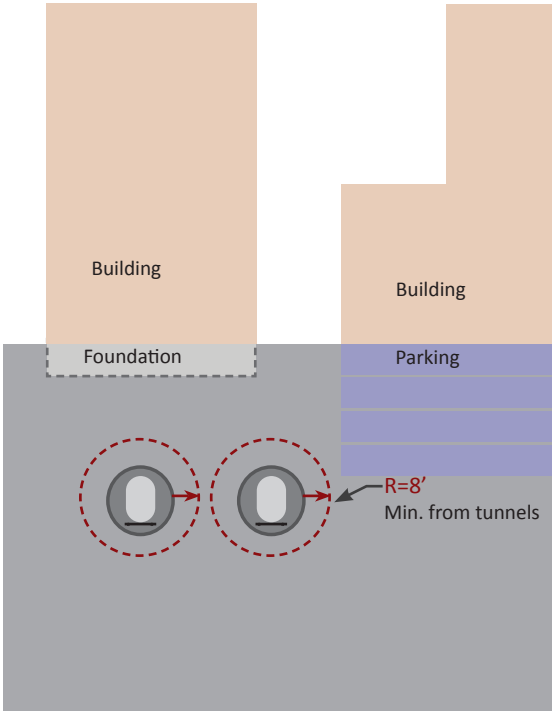
Construction adjacent to, over, or below underground Metro facilities (tunnels, stations and appendages) is of great concern and should be coordinated closely with Metro Engineering.

RECOMMENDATION: Coordinate with Metro early in the design process when proposing to build near underground Metro infrastructure. Metro typically seeks to maintain a minimum eight (8) foot clearance from existing Metro facilities to new construction (shoring or tiebacks). It will be incumbent upon the developer to demonstrate, to Metro's satisfaction, that both the temporary support of construction and the permanent works do not adversely affect the structural integrity, safety, or continued efficient operation of Metro facilities.

Dependent on the nature of the adjacent construction, Metro will need to review the geotechnical report, structural foundation plans, sections, shoring plan sections and calculations.

Metro may require monitoring where such work will either increase or decrease the existing overburden (i.e. weight) to which the tunnels or facilities are subjected. When required, the monitoring will serve as an early indication of excessive structural strain or movement. See Section 3.4, Excavation Drilling/Monitoring for additional information regarding monitoring requirements.

See page 7 for a sample section showing Metro adjacent conditions.

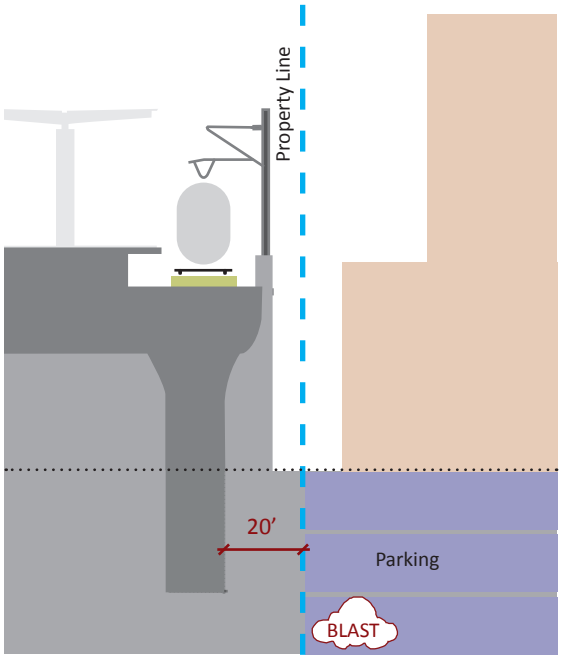


Adjacent project structures in close proximity to underground Metro infrastructure will require additional review by Metro.

2.3 Protection from Explosion/Blast

Metro is obligated to ensure the safety of public transit infrastructure from potential explosive sources which could originate from adjacent underground structures or from at-grade locations, situated below elevated guideways or near stations. Blast protection setbacks or mitigation may be required for large projects constructed near critical Metro facilities.

RECOMMENDATION: Avoid locating underground parking or basement structures within twenty (20) feet from an existing Metro tunnel or facility (exterior face of wall to exterior face of wall). Adjacent developments within this 20-foot envelope may be required to submit a Threat Assessment and Blast/Explosion Study for Metro review and approval.



An underground structure proposed within twenty (20) feet of a Metro structure may require a Threat Assessment and Blast/Explosion Study.

Construction Safety & Management

Construction Safety & Management

3.1 Pre-Construction Coordination

Metro is concerned with impacts to service requiring rail single line tracking, line closures, speed restrictions, and bus bridging occurring as a result of adjacent project construction. Projects that will require work over, under, adjacent, or on Metro property or ROW and include operation of machinery, scaffolding, or any other potentially hazardous work are subject to evaluation in preparation for and during construction to maintain safe transit operations and passenger well-being.

RECOMMENDATION: Following an initial screening of the project, Metro may determine that additional on-site coordination may be necessary. Dependent on the nature of the adjacent construction, developers may be requested to perform the following as determined on a case-by-case basis:

- Submit a construction work plan and related project drawings and specifications for Metro review.
- Submit a contingency plan, show proof of insurance coverage, and issue current certificates.
- Provide documentation of contractor qualifications.
- Complete pre-construction surveys, perform baseline readings, and install movement instrumentation.
- Complete readiness review and perform practice run of transit service shutdown per contingency plan.
- Designate a ROW observer or other safety personnel and an inspector from the project's construction team.
- Establish a coordination process for access and work in or adjacent to ROW for the duration of construction.

Project teams will be responsible for the costs of adverse impacts to Metro transit operations caused by work on adjacent developments, including remedial work to repair damage to Metro property, facilities, or systems. Additionally, a Construction Monitoring fee may be assessed based on an estimate of required level of effort provided by Metro.

All projects adjacent to Metrolink infrastructure will require compliance with SCRRA Engineering Standards and Guidelines.

Metro may need to monitor development construction near Metro facilities.

3.2 Track Access and Safety

Permission from Metro is required to enter Metro property for rail construction and maintenance along, above, or under Metro ROW as these activities can interfere with Metro utilities and service and pose a safety hazard to construction teams and transit riders. Track access is solely at Metro's discretion and is discouraged to prevent electrocution and collisions with construction workers or machines.

RECOMMENDATION: Obtain and/or complete the following to work in or adjacent to Metro Rail ROW:

1. **Construction Work Plan:** Dependent on the nature of adjacent construction, Metro may request a construction work plan, which describes means and methods and other construction plan details, to ensure the safety of transit operators and riders.

2. **Safety Training:** All members of the project construction team will be required to attend Metro Rail Safety Training before commencing work activity. Training provides resources and procedures when working near active rail ROW.

3. **Right of Entry Permit/Temporary Construction Easement:** All access to and activity on Metro property, including easements necessary for construction of adjacent projects, must be approved through a Right-of-Entry Permit and/or a Temporary Construction Easement obtained from Metro Real Estate and may require a fee.

4. **Track Allocation:** All work on Metro Rail ROW must receive prior approval from Metro Rail Operations Control. Track Allocation identifies, reserves, and requests changes to normal operations for a specific track section, line, station, location, or piece of equipment to allow for safe use by a non-Metro entity. If adjacent construction is planned in close proximity to active ROW, flaggers must be used to ensure safety of construction workers and transit riders.

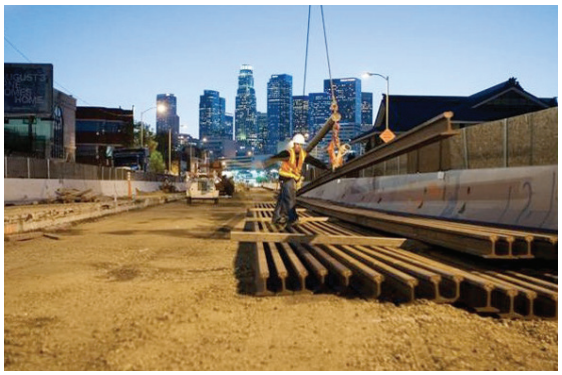
Trained flaggers ensure the safe crossing of pedestrians and workers of an adjacent development.

3.3 Construction Hours

Building near active Metro ROW poses safety concerns and may require limiting hours of construction which impact Metro ROW to night or off-peak hours so as not to interfere with Metro revenue service. To maintain public safety and access for Metro riders, construction should be planned, scheduled, and carried out in a way to avoid impacts to Metro service and maintenance.

RECOMMENDATION: In addition to receiving necessary construction approvals from the local jurisdiction, all construction work on or in close proximity to Metro ROW must be scheduled through the Track Allocation Process, detailed in Section 3.2.

Metro prefers that adjacent construction with potential to impact normal, continuous Metro operations take place during non-revenue hours (approximately 1am-4am) or during non-peak hours to minimize impacts to service. The developer may be responsible for additional operating costs resulting from disruption to normal Metro service.



Construction during approved hours ensures the steady progress of adjacent development construction and minimizes impacts to Metro's transit service.

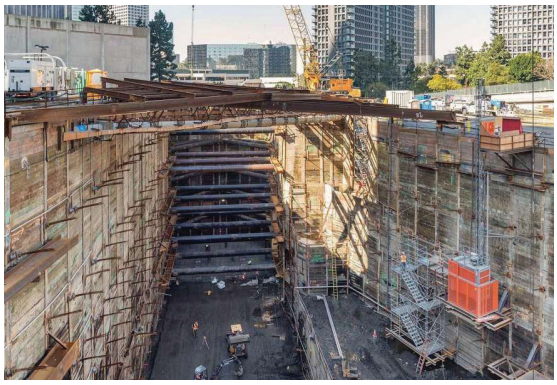
3.4 Excavation/Drilling Monitoring

Excavation is among the most hazardous construction activities and can pose threats to the structural integrity of Metro's transit infrastructure.

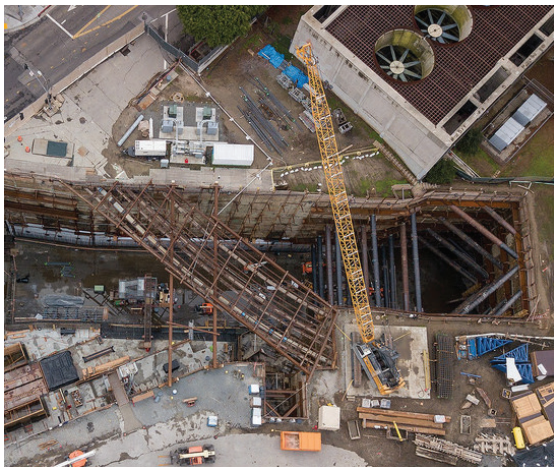
RECOMMENDATION: Coordinate with Metro Engineering to review and approve excavation and shoring plans during design and development, and well in advance of construction (see Sections 2.1 and 2.2).

Geotechnical instrumentation and monitoring will be required for all excavations occurring within Metro's geotechnical zone of influence, where there is potential for adversely affecting the safe and efficient operation of transit vehicles. Monitoring of Metro facilities due to adjacent construction may include the following as determined on a case-by-case basis:

- Pre- and post-construction condition surveys
- Extensometers
- Inclinometers
- Settlement reference points
- Tilt-meters
- Groundwater observation wells
- Movement arrays
- Vibration monitoring



Excavation and shoring plans must be reviewed by Metro to ensure structural compatibility with Metro infrastructure and safety during adjacent development construction.



A soldier pile wall used for Regional Connector station at 2nd/Hope.

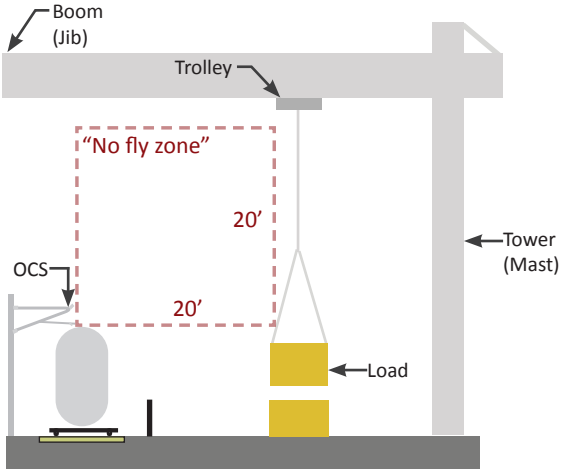
3.5 Crane Operations

Construction activities adjacent to Metro ROW may require moving large, heavy loads of building materials and machinery using cranes. Cranes referenced here include all power-operated equipment that can hoist, lower, and horizontally move a suspended load. To ensure safety for Metro riders, operators, and transit facilities, crane operations adjacent to Metro ROW must follow the safety regulations and precautions below and are subject to California Occupational Safety and Health Administration (Cal/OSHA) standards.

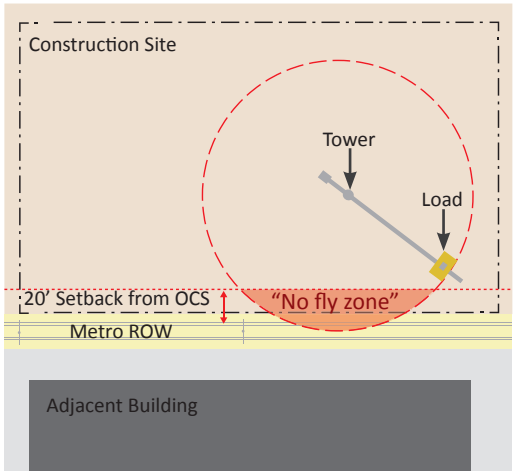
RECOMMENDATION:
Coordinate with Metro to discuss construction methods and confirm if a crane work plan is required. Generally, crane safety near Metro's ROW and facilities largely depends on the following factors: 1) Metro's operational hours and 2) swinging a load over or near Metro power lines and facilities. Note:

1. Clearance: A crane boom may travel over energized Metro OCS only if it maintains a vertical 20-foot clearance and the load maintain a horizontal 20-foot clearance.
2. Power: Swinging a crane boom with a load over Metro facilities or passenger areas is strictly prohibited during revenue hours. To swing a load in the "no fly zone" (see diagrams to right), the construction team must coordinate with Metro to de-energize the OCS.
3. Weathervaning: When not in use, the crane boom may swing 360 degrees with the movement of the wind, including over energized Metro OCS, only if the trolley is fully retracted towards the crane tower and not carrying any loads.
4. Process: Developers and contractors must attend Metro Track Allocation (detailed in Section 3.2) to determine if Metro staff support is necessary during crane erection and load movement.
5. Permit: Developers must apply for a Metro Right-of-Entry permit to swing over Metro facilities.

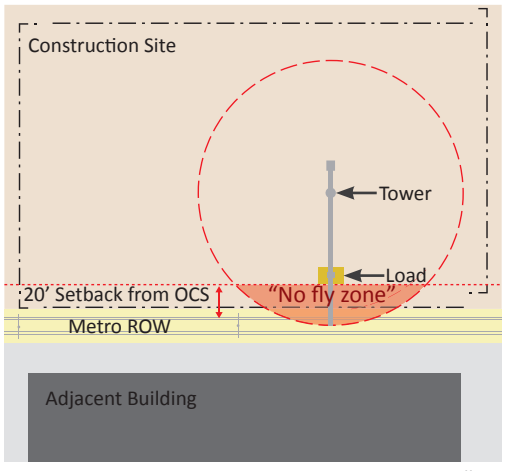
Project teams will bear all costs associated with impacts to Metro Rail operations and maintenance.



Cranes and construction equipment should be staged to avoid conflicts with the rail OCS.



Plan View: Crane swing and load are restricted near Metro ROW.



Plan View: While crane boom swings over "no fly zone," the trolley and load are retracted to maintain clearance from OCS.

3.6 Construction Barriers & Overhead Protection

During construction, falling objects can damage Metro facilities and pose a safety concern to the riders accessing them.

RECOMMENDATION: Erect vertical construction barriers and overhead protection compliant with Metro and Cal/OSHA requirements to prevent objects from falling into Metro ROW or areas designed for public access to Metro facilities. A protection barrier shall be constructed to cover the full height of an adjacent project and overhead protection from falling objects shall be provided over Metro ROW as necessary. Erection of the construction barriers and overhead protection for these areas shall be done during Metro non-revenue hours.

Overhead protection is required when moving heavy objects over Metro ROW or in areas designated for public use.

Constructed above is a wooden box over the entrance portal for overhead protection at the 4th/Hill Station.

3.7 Pedestrian & Emergency Access

Metro's riders rely on the consistency and reliability of access and wayfinding to and from stations, stops, and facilities. Construction on adjacent property must not obstruct pedestrian access, fire department access, emergency egress, or otherwise present a safety hazard to Metro operations, its employees, riders, and the general public. Fire access and safe escape routes within all Metro stations, stops, and facilities must be maintained at all times.

RECOMMENDATION: Ensure pedestrian and emergency access from Metro stations, stops, and transit facilities is compliant with the Americans with Disabilities Act (ADA) and maintained during construction:

- Temporary fences, barricades, and lighting should be installed and watchmen provided for the protection of public travel, the construction site, adjacent public spaces, and existing Metro facilities.
- Temporary signage should be installed where necessary and in compliance with the latest California Manual on Uniform Traffic Control Devices (MUTCD) and in coordination with Metro Art and Design Standards.
- Emergency exits shall be provided and be clear of obstructions at all times.
- Access shall be maintained for utilities such as fire hydrants, stand pipes/connections, and fire alarm boxes as well as Metro-specific infrastructure such as fan and vent shafts.

Sidewalk access is blocked for a construction project, forcing pedestrians into the street or to use less direct paths to the Metro facility.

3.8 Impacts to Bus Routes & Stops

During construction, bus stop zones and routes may need to be temporarily relocated. Metro needs to be informed of activities that require stop relocation or route adjustments in order to ensure uninterrupted service.

RECOMMENDATION: During construction, maintain or relocate existing bus stops consistent with the needs of Metro Bus Operations. Design of temporary and permanent bus stops and surrounding sidewalk areas must be compliant with the ADA and allow passengers with disabilities a clear path of travel to the transit service. Existing bus stops must be maintained as part of the final project. Metro Bus Operations Control Special Events Department and Metro Stops & Zones Department should be contacted at least 30 days before initiating construction activities.

Temporary and permanent relocation of bus stops and layover zones will require coordination between developers, Metro, and other municipal bus operators and local jurisdictions.

3.9 Utility Coordination

Construction has the potential to interrupt utilities that Metro relies on for safe operations and maintenance. Utilities of concern to Metro include, but are not limited to, condenser water piping, potable/fire water, storm and sanitary sewer lines, and electrical/ telecommunication services.

RECOMMENDATION: Coordinate with Metro Real Estate during project design to gauge temporary and permanent utility impacts and avoid conflicts during construction.

The contractor shall protect existing above-ground and underground Metro utilities during construction and coordinate with Metro to receive written approval for any utilities pertinent to Metro facilities that may be used, interrupted, or disturbed.

When electrical power outages or support functions are required, approval must be obtained through Metro Track Allocation in coordination with Metro Real Estate for a Right of Entry Permit.

To begin coordination with Metro Real Estate, visit www.metro.net/devreview and select the drop-down "Utility Project Coordination."

Coordination of underground utilities is critical to safely and efficiently operate Metro service.

3.10 Air Quality & Ventilation Protection

Hot or foul air, fumes, smoke, steam, and dust from adjacent construction activities can negatively impact Metro facilities, service, and users.

RECOMMENDATION: Ensure that hot or foul air, fumes, smoke, and steam from adjacent facilities are discharged beyond 40 feet from existing Metro facilities, including but not limited to ventilation system intake shafts and station entrances. Should fumes be discharged within 40 feet of Metro intake shafts, a protection panel around each shaft shall be required.

A worker breaks up concrete creating a cloud of silica dust.

Glossary

Cone of Visibility
A conical space at the front of moving transit vehicles allowing for clear visibility of travel way and/or conflicts.

Construction Work Plan (CWP)
Project management document outlining the definition of work tasks, choice of technology, estimation of required resources and duration of individual tasks, and identification of interactions among the different work tasks.

Flagger/Flagman
Person who controls traffic on and through a construction project. Flaggers must be trained and certified by Metro Rail Operations prior to any work commencing in or adjacent to Metro ROW.

Geotechnical Foul Zone
Area below a track-way as measured from a 45-degree angle from the edge of the rail track ballast.

Guideway
A channel, track, or structure along which a transit vehicle moves.

Heavy Rail Transit (HRT)
Metro HRT systems include exclusive ROW (mostly subway) trains up to six (6) cars long (450') and utilize a contact rail for traction power distribution (e.g. Metro Red Line).

Joint Development (JD)
JD is the asset management and real estate development program through which Metro collaborates with developers to build housing, retail, and other amenities on Metro properties near transit, typically through ground lease. JD projects directly link transit riders with destinations and services throughout LA County.

Light Rail Transit (LRT)
Metro LRT systems include exclusive, semi-exclusive, or street ROW trains up to three (3) cars long (270') and utilize OCS for traction power distribution (e.g. Metro Blue Line).

Measure R
Half-cent sales tax for LA County approved in November 2008 to finance new transportation projects and programs. The tax expires in 2039.

Measure M
Half-cent sales tax for LA County approved in November 2016 to fund transportation improvements, operations and programs, and accelerate projects already in the pipeline. The tax will increase to one percent in 2039 when Measure R expires.

Metrolink
A commuter rail system with seven lines throughout Los Angeles, Orange, Riverside, San Bernardino, Ventura, and North San Diego counties governed by the Southern California Regional Rail Authority (SCRRA).

Metro Adjacent Construction Design Manual
Volume III of the Metro Design Criteria & Standards, which outlines the Metro adjacent review procedure as well as operational requirements when constructing over, under, or adjacent to Metro facilities, structures, and property.

Metro Bus
Metro "Local" and "Rapid" bus service runs within the street, typically alongside vehicular traffic, though occasionally in "bus-only" lanes.

Metro Bus Rapid Transit (BRT)
High quality bus service that provides faster and convenient service through the use of dedicated ROW, branded vehicles and stations, high frequency and intelligent transportation systems, all-door boarding, and intersection crossing priority. Metro BRT may run within dedicated ROW or in mixed flow traffic on streets.

Metro Design Criteria and Standards
A compilation of documents that govern how Metro transit service and facilities are designed, constructed, operated, and maintained.

Metro Rail
Urban rail system serving LA County consisting of six lines, including two subway lines and four light rail lines.

Metro Rail Design Criteria (MRDC)
Volume IV of the Metro Design Criteria & Standards which establishes design criteria for preliminary engineering and final design of a Metro Rail Project.

Metro Transit Oriented Communities
Land use planning and community development program that seeks to maximize access to transportation as a key organizing principle and promote equity and sustainable living by offering a mix of uses close to transit to support households at all income levels, as well as building densities, parking policies, urban design elements, and first/last mile facilities that support ridership and reduce auto dependency.

Noise Easement Deed
Easement granted by property owners abutting Metro ROW acknowledging noise due to transit operations and maintenance.

Overhead Catenary System (OCS)
One or more electrified wires situated over a transit ROW that transmit power to light rail trains via pantograph, a current collector mounted on the roof of an electric vehicle. Metro OCS is supported by hollow poles placed between tracks or on the outer edge of parallel tracks.

Right of Entry Permit
Written approval granted by Metro Real Estate to enter Metro ROW and property.

Right of Way (ROW)
Legal right over property reserved for transportation purposes to construct, protect, maintain and operate transit services.

Southern California Regional Rail Authority (SCRRA)
A joint powers authority made up of an 11-member board representing the transportation commissions of Los Angeles, Orange, Riverside, San Bernardino and Ventura counties. SCRRA governs and operates Metrolink service.

Threat Assessment and Blast/Explosion Study
Analysis performed when adjacent developments are proposed within twenty (20) feet from an existing Metro tunnel or facility.

Track Allocation/Work Permit
Permit granted by Metro Rail Operations Control to allocate a section of track and perform work on or adjacent to Metro Rail ROW. This permit should be submitted for any work that could potentially foul the envelope of a train.

Wayfinding
Signs, maps, and other graphic or audible methods used to convey location and directions to travelers.

Kathleen King
Los Angeles City Planning
221 North Figueroa Street, Suite 1350
Los Angeles, CA 90012
Em: kathleen.king@lacity.org

RE: City of Los Angeles's The Bloc – 700 West 7th St. (Case # ENV-2021-9959-EIR)

Dear Kathleen King,

On behalf of the Southwest Mountain States Regional Council of Carpenters ("**Southwest Carpenters**" or "**SWMSRCC**"), my Office is submitting these comments for the City of Los Angeles's ("**City**") Notice of Preparation for The Bloc 700 West 7th St. project, Case #ENV-2021-9959-EIR ("**Project**").

The Southwest Carpenters is a labor union representing over 63,000 union carpenters in 10 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Individual members of the Southwest Carpenters live, work, and recreate in the City and surrounding communities and would be directly affected by the Project's environmental impacts.

The Southwest Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Southwest Carpenters incorporates by reference all comments raising issues regarding the Environmental Impact Report (EIR) submitted prior to certification of

the EIR for the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project's environmental documentation may assert any issue timely raised by other parties).

Moreover, the Southwest Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law ("**Planning and Zoning Law**") (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY'S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require the Project to be built using a local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

> [A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021 SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

> [L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California's workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.[1]

Furthermore, workforce policies have significant environmental benefits given that they improve an area's jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (GHG) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the "[u]se of a local state-certified apprenticeship program" can result in air pollutant reductions.[2]

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

> People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.[3]

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and

---

[1] California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf.

[2] South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10.

[3] California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, *available at* https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf

Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.[4] Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

> In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 ("**AB2011**"). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupations Safety and Health Administration. Recently, several

[4] Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, *available at* http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf.

construction sites have been identified as sources of community spread of COVID-19.[5]

Southwest Carpenters recommend that the Lead Agency adopt additional requirements to mitigate public health risks from the Project's construction activities. Southwest Carpenters requests that the Lead Agency require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon Southwest Carpenters' experience with safe construction site work practices, Southwest Carpenters recommends that the Lead Agency require that while construction activities are being conducted at the Project Site:

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.
- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.

[5] Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, *available at* https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx.

- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.[6]

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The Agency should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Southwest Carpenters has also developed a rigorous Infection Control Risk Assessment ("**ICRA**") training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.[7]

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise ("SWAPE") is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas ("GHG") emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model ("CalEEMod") is a "statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects."[1] CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.[2]

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[3]

[1] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[2] "California Emissions Estimator Model." CAPCOA, 2017, *available at:* http://www.aqmd.gov/caleemod/home.
[3] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled ("VMT") associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.[4]

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

> "$VMT_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$
>
> Where:
>
> n = Number of land uses being modeled."[5]

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

> "$\text{Emissions}_{pollutant} = VMT * EF_{running,pollutant}$
>
> Where:
>
> $\text{Emissions}_{pollutant}$ = emissions from vehicle running for each pollutant
>
> VMT = vehicle miles traveled
>
> $EF_{running,pollutant}$ = emission factor for running emissions."[6]

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.[7] In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act ("CEQA") requires that such changes be justified by substantial evidence.[8] The default number of construction-related worker trips is calculated by multiplying the

[5] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.
[6] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.
[7] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.
[8] CalEEMod User Guide, *available at:* http://www.caleemod.com/, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.[9] Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively."[10] Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.[11] The operational home-to-work vehicle trip lengths are:

> "[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings" (emphasis added). [12]

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).[13]

Worker Trip Length by Air Basin		
Air Basin	**Rural (miles)**	**Urban (miles)**
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	**16.47**	**11.17**
Minimum	**10.80**	**10.80**
Maximum	**19.80**	**14.70**
Range	**9.00**	**3.90**

[9] "CalEEMod User's Guide." CAPCOA, November 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

[11] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.
[12] "Appendix A Calculation Details for CalEEMod." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.
[13] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8-miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7-miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan ("Project") located in the City of Claremont ("City"). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.[14] In an effort to evaluate the potential for a local hire provision to reduce the Project's construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO_2e)	3,623
Amortized Construction GHG Emissions (MT CO_2e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO2e)	3,024
Amortized Construction GHG Emissions (MT CO_2e/year)	100.80
% Decrease in Construction-related GHG Emissions	***17%***

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project's urbanization level and location.

[14] "Appendix D Default Data Tables." CAPCOA, October 2017, *available at:* http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Village South Specific Plan (Proposed)

Los Angeles-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H_2O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. $41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: $10,000 grant awarded to San Diego State University.
Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. $100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. $20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: $10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: $15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. $500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey
Duarte et al, *Plaintiffs,* vs. United States Metals Refining Company et. al. *Defendant.*
Case No.: 2:17-cv-01624-ES-SCM
Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division
M/T Carla Maersk, *Plaintiffs,* vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS "Conti Perdido" *Defendant.*
Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237
Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants
Case No.: No. BC615636
Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants
Case No.: No. BC646857
Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado
Bells et al. Plaintiff vs. The 3M Company et al., Defendants
Case: No 1:16-cv-02531-RBJ
Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District
Phillip Bales et al., Plaintiff vs. Dow Agrosciences, LLC, et al., Defendants
Cause No 1923
Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa
Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants
Cause No C12-01481
Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois
Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants
Case No.: No. 0i9-L-2295
Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles
Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC
Case No.: LC102019 (c/w BC582154)
Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division
Brenda J. Cooper, et al., *Plaintiffs,* vs. Meritor Inc., et al., *Defendants*
Case Number: 4:16-cv-52-DMB-JVM
Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al.,, et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No,: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action N0. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant.*
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs,* vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs,* vs. BP Products North America, Inc., *Defendant.*
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal repesentatives, Parker, AZ.

Hagemann, M.F., 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

Hagemann, M.F., 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

Hagemann, M.F., 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

Hagemann, M.F., 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. A Chronology of MTBE in Groundwater and an Estimate of Costs to Address Impacts to Groundwater. Presentation to the annual meeting of the Society of Environmental Journalists.

Hagemann, M.F., 2002. An Estimate of the Cost to Address MTBE Contamination in Groundwater (and Who Will Pay). Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to a meeting of the U.S. EPA and State Underground Storage Tank Program managers.

Hagemann, M.F., 2001. From Tank to Tap: A Chronology of MTBE in Groundwater. Unpublished report.

Hagemann, M.F., 2001. Estimated Cleanup Cost for MTBE in Groundwater Used as Drinking Water. Unpublished report.

Hagemann, M.F., 2001. Estimated Costs to Address MTBE Releases from Leaking Underground Storage Tanks. Unpublished report.

Hagemann, M.F., and VanMouwerik, M., 1999. Potential Water Quality Concerns Related to Snowmobile Usage. Water Resources Division, National Park Service, Technical Report.

VanMouwerik, M. and **Hagemann, M.F**. 1999, Water Quality Concerns Related to Personal Watercraft Usage. Water Resources Division, National Park Service, Technical Report.

To: Kathleen.king@lacity.org

To whom it may concern,

Hope all is well, my name is Tania and I am an employee at One Medical located on the Bloc in Downtown Los Angeles. I have received your notice of preparation of an environmental impact report for case number: ENV-2021-9959-EIR. I wanted to submit my comments on certain things I don't agree with in regards to this project. The first thing being Charter Section 562 and LAMC Section 12.21. If you are building a total of 466 residential units, it only makes sense to provide everyone with a parking spot. The streets of Downtown Los Angeles are already known for having a bad reputation for traffic and parking and you will be contributing to that issue.
Secondly, Section 17.03 and 17.15, One Medical is a primary care facility and reducing the commercial parking will just not work for us at all. Our patients need somewhere to park that will be easy for them to access us. Also, the employees that work at the Bloc need parking as well and it doesn't seem fair to anyone to have to walk an extra unnecessary 700 ft to get to our cars. A lot of people who work at The Bloc do get out of work late at night, you are putting their safety at risk. Also, the sidewalks are already pretty congested so making them smaller would not benefit anyone. Next, we already don't have many trees in the downtown area and I know that you know that trees are very important to our environment. Lastly, the noise is not ideal for us, it will be a disruption to not only our providers but patients as well.

Thank you for your time.
Warmly,
Tania

EIR Comments ENV-2021-9959-EIR

2 messages

Eve Dorfman <edorfman@onemedical.com> Fri, Jan 13, 2023 at 4:33 PM
To: Kathleen.king@lacity.org

To whom it may concern,

My name is Eve and I am an employee at One Medical located on the Bloc in Downtown Los Angeles.

I have received your notice of preparation of an environmental impact report for case number: ENV-2021-9959-EIR.

I wanted to submit my comments on certain things I don't agree with in regards to this project. The first thing being Charter Section 562 and LAMC Section 12.21. If you are building a total of 466 residential units, it only makes sense to provide everyone with a parking spot. The streets of Downtown Los Angeles are already known for having a bad reputation for traffic and parking and you will be contributing to that issue. The current public transportation at the 7th St. Metro center is notoriously dangerous and unsanitary. The idea that luxury condo owners would subject themselves to that as their primary mode of transportation is ludicrous.

Secondly, Section 17.03 and 17.15, One Medical is a primary care medical facility and reducing the commercial parking will severely impact our ability to not only provide prompt care, but to operate business. Our patients need somewhere to park that will be easy for them to access us. Also, the employees that work at the Bloc come from all corners of Los Angeles that are not served by public transportation and need parking as well. It doesn't seem fair to anyone to have no temporary parking during the construction. A lot of people who work at The Bloc do get out of work late at night; you are putting their safety at risk. Also, the sidewalks are already pretty congested so failing to enlarge them would not benefit anyone. Next, we already don't have many trees in the downtown area and I know that you know that trees are very important to our environment. Lastly, the noise is not ideal for us, it will be a disruption to not only our providers but patients as well for several years to come.

Thank you for your time.

ENV-2021-9959-EIR The Bloc" - Residential Comments

2 messages

kingsley fasham <kingsleyfasham@msn.com> Tue, Jan 17, 2023 at 11:13 AM
To: "kathleen.king@lacity.org" <kathleen.king@lacity.org>

Dear Madame,

Thank you for asking for DTLA residential comments regarding “The Bloc” project to add 466 Dwellings.

It is good to increase the residency of DTLA, however, in order to raise the attractiveness for people to actually live in DTLA

the money would be better spent on improving the surrounding roads, shops and restaurants and clean up the city..

This construction does nothing to contribute to DTLA or its world wide image.

Looking forward to be able to comment on a “ Notice of Preparation of environmental Impact report” that substantially positively improves the environment and living condition of DTLA as a whole.

Mr & Mrs Fasham

Hi Kathleen,

Please don't take the theater away! I like the Alamo Drafthouse... 😳
On that note happy holidays and Merry Christmas 😄

Cheers.

Thomas

To: "kathleen.king@lacity.org" <kathleen.king@lacity.org>

Hi Kathleen,

Happy New Year.

I am reaching out to learn a bit more about the Bloc development site.

As I understand the office building, 700 S Flower and the Sheraton hotel are staying in place, but all of the other retail and theater will be redeveloped. Or perhaps the only redevelopment is from the office building towards 8th Street.

Can you let me know if this is correct or clarify which parts of the Bloc are staying in place and which parts are being redeveloped?

Thank you,

Heather Isenberg

Hi Heather-

The existing hotel and commercial uses would be retained with the exception of approximately 24,000 square feet of existing commercial (theater and retail uses) in the podium building that would be converted to residential uses. Additionally 466 residential units would be constructed within a new 53-story high-rise tower located above the existing 9-story podium building.

More detailed information can be found in the project's NOP.

Thanks-Kathleen

Subject: Comments on The Bloc Initial Study, ENV-2021-9951-EIR

Dear Ms. King:

I live in the Market Lofts at 9th & Hope. I have the following comments on the Initial Study:

> I think the study would have been improved by a definition of "podium building" (I had to look it up), and hope one is provided in the DEIR.
>
> I am happy to see that the proposed project will provide 466 much-needed additional dwelling units downtown. However, I'm concerned that, according to Table 2 on page 17, the project will eliminate almost 10% of existing retail square footage, presumably in the area where Macy's is currently located. This part of downtown has many restaurants and bars, but is seriously underserved when it comes to retail. I don't know what category a discussion of impact on retail would fall under--perhaps cultural resources or land use/planning--but I'd like to see it addressed in the forthcoming DEIR.
>
> I understand that the proposed dwelling units will be condominiums. Do the City's affordable housing requirements only apply to rentals, or must some of the proposed condominiums be priced and reserved for people with incomes below a certain threshold? I'd like to see this clarified in the DEIR.

I look forward to reviewing the DEIR in the future.

Sincerely yours,

Diane Kravif

Jeremy Parsons <jparsons@onemedical.com> Sat, Jan 14, 2023 at 9:03 AM
To: Kathleen.king@lacity.org

To whom it may concern,

My name is Jeremy, and I am a physician with One Medical, practicing from our clinic located at The Bloc in Downtown Los Angeles.

Our office received your notice of preparation of an environmental impact report for case number: ENV-2021-9959-EIR.

I wanted to submit my comments on certain things I don't agree with in regards to this project.

- Charter Section 562 and LAMC Section 12.21. If you are building a total of 466 residential units, it only makes sense to provide everyone with a parking spot. The streets of Downtown Los Angeles are already known for having a bad reputation for traffic and parking, and this proposal will be contributing to that issue.
- Section 17.03 and 17.15, One Medical is a primary care facility and reducing the commercial parking will just not work for us at all. Our patients need somewhere to park that will be easy for them to access us.
- The employees that work at The Bloc need parking as well, and it doesn't seem fair for anyone to have to walk an extra unnecessary distance to get to our cars. A lot of people who work at The Bloc do get out of work late at night, so the proposal would put their safety at risk.
- The sidewalks are already pretty congested so making them smaller would not benefit anyone.
- We already don't have many trees in the downtown area, and natural plant life is very important to our environment.

Thank you for your time.

Warm regards,
Jeremy Parsons
