Re: Phase I Environmental Site Assessment
1711 Harbor Avenue and 1515 West 17th Street
Long Beach, California 92337

To whom it may concern:

In accordance with Magnum Builders, Inc. request and authorization, Omega Environmental Services, Inc. (Omega) performed a review of potential environmental liabilities associated with the property located at 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, California, in November 2021. The purpose of this assessment was to identify potential environmental concerns associated with the property (exclusive of geologic stability or flood potential), building construction, and use. This investigation was conducted by Omega and consisted solely of the activities described in the Scope of Work section of this report. The findings, conclusions and recommendations presented herein are subject to the limitations discussed in Section 1.3 and the agreement for Environmental Consulting Services.

A brief report summarizing our findings is enclosed. Should you have any questions, please do not hesitate to contact the undersigned at your convenience. Omega appreciates the opportunity to be of professional services to Magnum Builders, Inc. on this project.

Sincerely,

Omega Environmental Services, Inc.

Khalid Mahmood
Project Director

EXECUTIVE SUMMARY

Omega Environmental Services, Inc. (Omega) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with ASTM 1527-13 for the property located at 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, California.

The Phase I Environmental Site Assessment is designed to provide Magnum Builders, Inc. (Magnum). an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the property. This assessment was conducted utilizing generally accepted ESA industry standards in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

The address of the subject property is 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, California (herein referred as subject property). The subject property is occupied by Custom Fiberglas Manufacturing Company DBA Snug Top. The subject property is in residential, commercial, and industrial area in the City of Long Beach, California. According to County of Los Angeles Assessor's Office, the assessor's parcel numbers (APNS) of the subject property are 7432-015-011 and 7432-014-030. The property located at 1711 Harbor Avenue consisting of offices, warehouse, products manufacturing, and storage areas is located at the northwest corner of 17th Street and Harbor Avenue. This portion of the property consists of 117,888 sq. ft. main building, 110,550 sq. ft. factory/warehouse area and 7,338 sq. ft. office space on a195,577 sq. ft. lot. The property located at 1515 W. 17th Street consists of 15,000 sq. ft. storage yard which is utilized to store camper shells and other products by Snug Top. The interiors of the buildings consist of vinyl tiles, carpet, wood and bare concrete and dry wood ceilings. All surrounding areas consist of residential, commercial, and industrial developments.

Access to the subject property is from Harbor Avenue to the east, Pacific Coast Highway to the north, and 17th Street to the south. Drainage is accomplished via drains located at the property which direct surface water to storm drains in the surrounding streets.

The subject property is bounded by Harbor Avenue to the east, beyond which are commercial and industrial developments, commercial and industrial developments to the north, beyond which are Pacific Coast Highway and other residential, commercial, and industrial developments, commercial and industrial development to the south and west.

At the time of site reconnaissance, the subject property was occupied by Custom Fiberglass Manufacturing Co., DBA Snug Top. Snug Top is engaged in the manufacturing of camper shells. The facility consists of products manufacturing, assembly, and storage rooms. During the site reconnaissance, several paint spray booths, hazardous materials/hazardous wastes storage rooms, a clarifier, drying ovens, boiler room, water tower, etc. were observed at the site. The paint spray booths are permitted with the South Coast Air Quality Management District. The hazardous wastes and sludge generated from manufacturing operations at the site are picked up by certified vendors for proper recycling/disposal.

During the site reconnaissance, it was observed that hazardous materials/hazardous wastes were associated with operations were present at the subject property.

The solid waste generated at the site is collected in trash dumpsters. During the site reconnaissance, no hazardous materials and/or hazardous wastes were noted in the trash dumpsters. The trash is picked up by Waste Management, Inc. for proper disposal.

Based on the original date of construction (built prior to 1982), there is a potential for asbestos in the construction materials. No asbestos sampling was performed as part of this assessment.

A review of Sanborn fire insurance maps dated 1950 and 1963 revealed a fuel oil tank located at the eastern side of the property, directly south of the gate. No records of installation and/or removal of the tank were found. Clayton Environmental Consultants (Clayton) prepared a Phase I Environmental Site Assessment (ESA) for the property in January 1996. Clayton stated in the Phase I ESA Report that "According to the owner of the subject property, JPD Holdings, the area of the observed underground fuel tank was repaved in January 1995. During the repavement, the old pavement was dug up and removed and the area was graded. No evidence of USTs was noted at that time. The property owner has owned the facility since approximately 1947 and has no records or recollection of this UST at the site." No evidence of a UST was observed during site reconnaissance.

Review of government database report indicated that the subject property tenant, Custom Hardtops/Custom Fiberglass Manufacturing Company DBA Snug Top (Snug Top), is listed as a hazardous waste generator on this database. In addition, Snug Top is listed on the Biennial Reporting System (BRS), CAL EPA Sites - CA, California Integrated Water Quality System (CIWQS) - CA, DOCKET, Environmental Compliance History Online (ECHO), EMI,-CA, Federal Registry System (FRS), HAZNET- CA, Integrated Compliance information System (ICIS), Inactive Permit Compliance System (PCS), Manifest EPA, National Pollutant Discharge Elimination System (NPDES) - CA , PCS Enf, PCS Facility, RCRA Large Quantity Generator (LQG), RFR,-CA, Stormwater, and Toxic Release Inventory System (TRIS) databases.

The database report indicated that Snug Top generates flammable wastes, waste oil and mixed oil, off-specification, aged or surplus organics, unspecified solvent mixtures, organic solids, aqueous solution with total organic residue, Non-RCRA hazardous waste liquids, waste paint, sludge, petroleum distillates, solvent naphtha, waste hydrochloric acid, aerosols, halogenated and non-halogenated solvents from paint spray booths and other manufacturing and cleaning/washing operations at the site. Several Notices of Significant Non-Compliance were issued against Snug Top. The notices of violations were related to storm water issues, the Failure to complete and submit Hazardous Materials Release Response Plans (HMRRP); and Clean/remove some fiberglass debris at back of the facility nearby storm drains.

FINDINGS

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during this assessment:

- Omega identified recognized environmental conditions (RECs) during this assessment. The RECs included the presence of hazardous materials and hazardous wastes used, stored, and generated onsite, operation of paint spray booths, a clarifier, and the potential underground fuel storage tank, etc. at the site.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that have been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during this assessment:

- Omega did not identify any controlled recognized environmental conditions during this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during this assessment:

- Omega did not identify any historical recognized environmental conditions during this assessment.

CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

Omega has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, Long Beach, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report. This assessment has revealed evidence of recognized environmental conditions. Additional investigation could assist in the analysis of the conditions.

1.0 INTRODUCTION

Omega Environmental Services, Inc. (Omega) was retained by Magnum Builders, Inc. to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, Long Beach (herein referred as subject property). The protocol used for this assessment is in general conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

On November 1, 2021, Omega conducted a site reconnaissance to assess the possible presence of petroleum products and hazardous materials at the subject property. Omega's investigation included a review of aerial photographs, historical city directories, a reconnaissance of adjacent properties, background research, and a review of available local, state, and federal regulatory records regarding the presence of petroleum products and/or hazardous materials at the subject property

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the Property. Omega understands that the findings of this study will be used by Magnum Builders, Inc. to evaluate a pending financial transaction in connection with the subject property.

1.2 Detailed Scope of Services

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E 1527-13. Omega warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions. No other warranties are implied or expressed.

1.3 Significant Assumptions

There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment, or which were not reasonably identifiable from the available information. Omega believes that the information obtained from the records review and the interviews concerning the site is reliable. However, Omega cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide Magnum Builders, Inc. with information relating to the subject property.

1.4 Special Terms and Conditions

This report is intended for the sole use of Magnum Builders, Inc. Any party other than Magnum Builders, Inc. who wishes to use this report to identify recognized environmental conditions in the process of making appropriate inquiry into the site or surrounding properties should notify Omega by executing the "Application of Authorization to Use" which follows this document. Based on the intended use of the report, Omega may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by Magnum Builders, Inc., or anyone else will release Omega from any liability resulting from the use of this report by any unauthorized party.

1.5 Limitations

To a large extent, the conclusions reached during this Phase I ESA rely on information gathered from public and private sources. The lack of evidence regarding the presence of hazardous materials resulting from a reasonable and mutually agreed-upon scope of work does not guarantee the absence of such materials. It only indicates that no hazardous materials were found as a result of the investigation. The limited nature of the scope of work for a Phase I ESA precludes Omega from providing any warranty or guarantee regarding the absence of hazardous materials. The report is not a guarantee that chemical contamination does not exist at or beneath the site. Omega has provided its best professional judgment and performed the agreed-upon services in accordance with standard and accepted consulting practices and procedures. The environmental conditions may vary considerably from those observed during this investigation. Should any additional data become available, these data should be reviewed by Omega and the conclusions presented herein modified as appropriate.

This report has been prepared in accordance with Omega's standard terms and conditions. No other warranty, expressed or implied, is made.

1.6 Limiting Conditions and Methodology Used

The environmental site assessment was performed in general accordance with the methodology set forth in ASTM Standard E-1527-13, Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process. There were no limiting conditions encountered during the Phase I ESA.

1.7 User Reliance

All reports, both verbal and written, are for the benefit of Magnum Builders, Inc. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of Omega.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The address of the subject property is 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, California (herein referred as subject property). The subject property is occupied by Custom Fiberglas Manufacturing Company DBA Snug Top. The subject property is in residential, commercial, and industrial area in the City of Long Beach, California. According to County of Los Angeles Assessor's Office, the assessor's parcel numbers (APNS) of the subject property are 7432-015-011 and 7432-014-030. The property located at 1711 Harbor Avenue consisting of offices, warehouse, products manufacturing, and storage areas is located at the northwest corner of 17th Street and Harbor Avenue. This portion of the property consists of 117,888 sq. ft. main building, 110,550 sq. ft. factory/warehouse area and 7,338 sq. ft. office space on a195,577 sq. ft. lot. The property located at 1515 W. 17th Street consists of 15,000 sq. ft. storage yard which is utilized to store camper shells and other products by Snug Top. The interiors of the buildings consist of vinyl tiles, carpet, wood and bare concrete and dry wood ceilings. All surrounding areas consist of residential, commercial, and industrial developments.

2.2 Site and Vicinity Characteristics

The address of the subject property is 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, California (herein referred as subject property). The subject property is occupied by Custom Fiberglas Manufacturing Company DBA Snug Top. The subject property is in residential, commercial, and industrial area in the City of Long Beach, California. According to County of Los Angeles Assessor's Office, the assessor's parcel numbers (APNS) of the subject property are 7432-015-011 and 7432-014-030. The property located at 1711 Harbor Avenue consisting of offices, warehouse, products manufacturing, and storage areas is located at the northwest corner of 17th Street and Harbor Avenue. This portion of the property consists of 117,888 sq. ft. main building, 110,550 sq. ft. factory/warehouse area and 7,338 sq. ft. office space on a195,577 sq. ft. lot. The property located at 1515 W. 17th Street consists of 15,000 sq. ft. storage yard which is utilized to store camper shells and other products by Snug Top. The interiors of the buildings consist of vinyl tiles, carpet, wood and bare concrete and dry wood ceilings.

The subject property is accessed from Harbor Avenue to the east, Pacific Coast Highway to the north, and 17th Street to the south. Drainage is accomplished via drains located at the property which direct surface water to storm drains in the surrounding streets.

2.3 Description of Structures

The property located at 1711 Harbor Avenue consisting of offices, warehouse, products manufacturing, and storage areas is located at the northwest corner of 17th Street and Harbor Avenue. This portion of the property consists of 117,888 sq. ft. main building, 110,550 sq. ft. factory/warehouse area and 7,338 sq. ft. office space on a 195,577 sq. ft. lot. The property located

at 1515 W. 17th Street consists of a 15,000 sq. ft. storage yard which is utilized to store camper shells and other Snug Top products. The interiors of the buildings consist of vinyl tiles, carpet, wood, and bare concrete and wood ceilings.

2.4 Current Use of the Property

At the time of site reconnaissance, the subject property was occupied by Custom Fiberglass Manufacturing Co., DBA Snug Top. Snug Top is engaged in the manufacturing of camper shells. The facility consists of products manufacturing, assembly, and storage rooms. During the site reconnaissance, several paint spray booths, hazardous materials/hazardous wastes storage rooms, a clarifier, drying ovens, boiler room, water tower, etc. were observed at the site. The paint spray booths are permitted with the South Coast Air Quality Management District. The hazardous wastes and sludge generated from manufacturing operations at the site are picked up by certified vendors for proper recycling/disposal.

2.5 Current Adjacent Properties

The subject property is bounded by Harbor Avenue to the east, beyond which are commercial and industrial developments, to the north, beyond which are Pacific Coast Highway and other residential, commercial and industrial developments to the south and west.

3.0 USER PROVIDED INFORMATION

Pursuant to ASTM E 1527-13, Omega requested the following site information from Mr. John (the Key Site Contact).

3.1 Title Records

Omega requested title records from the Key Site Contact; however, title records were not available at the site and were not provided to Omega for review.

3.2 Environmental Liens or Activity and Use Limitation

Omega requested information from the Key Site Contact regarding knowledge of environmental liens, activity and use limitations for the Property. The site contact was not aware of any environmental liens associated with the Property. In addition, the site contact had no knowledge of any use or activity limitations

3.3 Specialized Knowledge

Omega inquired with the Key Site Contact regarding any specialized knowledge of environmental conditions associated with the Property. The User and Key Site Manager were not aware of any environmental conditions associated with the Property.

3.4 Commonly Known or Reasonably Ascertainable Information

Omega inquired with the Key Site Contact regarding any commonly known or reasonably ascertainable information within the local community about the Property that is material to recognized environmental conditions in connection with the Property. The User and Key Site Manager were not aware of any information within the local community about the Property that is material to recognized environmental conditions in connection with the Property.

3.5 Valuation Reduction for Environmental Issues

Omega inquired with the Key Site Contact regarding any knowledge of reductions in property value due to environmental issues. The site contact was not aware of any valuation reductions associated with the Property.

3.6 Reason for Performing Phase I ESA

The purpose of this ESA was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the Property.

4.0 REGULATORY AGENCY RECORDS SEARCH

The purpose of Government database lists is to document the location of known Federal and State superfund sites or other known or potentially hazardous waste sites within a one-eighth to one mile radius of the subject property. The review will also serve to indicate the possibility that the subject property may become a "border zone property, defined as a property located within 2000 feet of a State-designated hazardous waste property.

Omega obtained a government record report prepared by Envirosite of Shelton, California. This computer-generated report is attached to this preliminary environmental site assessment report as Appendix B and consists of Government listed properties within a one-eighth to one-mile radius of the subject property which store and use hazardous materials or have had a release of hazardous materials to soil or groundwater. The study area for this preliminary environmental site assessment includes a one-eighth to one-mile radius for Federal, State, and Local database sources to meet the ASTM standards.

Appendix B includes a complete copy of the regulatory agency database search report generated by Envirosite select agency databases only. The accuracy of the results of the report in Appendix B is constrained by the limits of care and professional skill exercised by Omega. For completeness and quality control, additional agency records were investigated personally by Omega personnel. Omega makes no claims as to the completeness or accuracy of the referenced sources. Envirosite's review of these records can be only as current as their listings and may not represent the entire sum of known or potentially hazardous waste of contaminated sites.

Omega reviewed the following agency lists to evaluate whether there are sites within the study area that may pose potential environmental concerns relative to the site.

4.1 Federal Sources

4.1.1 Federal RCRA Non-Corracts TSD Facilities List

The EPA's Resources Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of reporting facilities that generate, transport, treat, store, or dispose of hazardous waste.

The subject property is not listed on this database. Three sites are listed on this database.

4.1.2 Federal CERCLIS List

United States Environmental Protection Agency (USEPA) Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) January 9, 1992 - CERCLIS provides information for businesses or properties that are on or being considered for the federal Superfund Program according to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Under this program, a business or property is identified, and a preliminary assessment is performed to assess whether the site shall become a federal Superfund site.

The subject property is not listed on this database. Sixteen sites are listed on this database.

4.1.2 CERCLIS-NFRAP

As of February 1995, CERCLIS sites designated No Further Remedial Action Planned (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

The subject property is not listed on this database. Seven sites are listed on this database.

4.1.3 Federal Facilities (FEDFAC)

As part of the CERCLA program, federal facilities with known or suspected environmental problems, the Federal Facilities Hazardous Waste Compliance Docket is tracked separately to comply with a Federal Court order.
No properties within a one-mile radius, including the subject property, appear on this list.

4.1.4 Federal RCRA CORRACTS Facilities List

The EPA maintains this database of RCRA facilities which are undergoing "corrective action". A "corrective action order" is issued pursuant to RCRA section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

The subject property is not listed on this database. Two sites are listed on this database.

4.1.5 Federal Delisted NPL Site List

The Federal Delisted National Priority List (NPL) sites are the United States Environmental Protection Agency's (USEPA) list of the sites that were delisted and no longer require action.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.6 Federal Landfill and/or Solid Waste Disposal Site Lists

The EPA maintains this database of RCRA facilities which are undergoing "corrective action". A "corrective action order" is issued pursuant to RCRA section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.1.7 Federal ERNS list

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported accidental releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the US Coast Guard, the National Response Center, and the Department of Transportation.

The subject property is not listed on this database.

4.1.8 Federal RCRA Generators list

The EPA's Resources Conservation and Recovery Act (RCRA) Program identifies small hazardous waste generator sites, who generate less than 100 kg/month of non-acutely hazardous waste and large hazardous waste generator sites, who generate more than 100 kg/month of non-

acutely hazardous waste. The RCRA Facilities database is a compilation by the EPA of reporting facilities that generate hazardous waste.

Review of government database report indicated that the subject property tenant, Custom Hardtops/Custom Fiberglass Manufacturing Company DBA Snug Top (Snug Top), is listed on this hazardous waste generator database. In addition, Snug Top is listed on the Biennial Reporting System (BRS), CAL EPA Sites - CA, California Integrated Water Quality System (CIWQS) - CA, DOCKET, Environmental Compliance History Online (ECHO), EMI,-CA, Federal Registry System (FRS), HAZNET- CA, Integrated Compliance information System (ICIS), Inactive Permit Compliance System (PCS), Manifest EPA, National Pollutant Discharge Elimination System (NPDES) - CA , PCS Enf, PCS Facility, RCRA Large Quantity Generator (LQG), RFR,-CA, Stormwater, and Toxic Release Inventory System (TRIS) databases.

The database report indicated that Snug Top generates flammable wastes, waste oil and mixed oil, off-specification, aged or surplus organics, unspecified solvent mixtures, organic solids, aqueous solution with total organic residue, Non-RCRA hazardous waste liquids, waste paint, sludge, petroleum distillates, solvent naphtha, waste hydrochloric acid, aerosols, halogenated and non-halogenated solvents from paint spray booths and other manufacturing and cleaning/washing operations at the site. Several Notices of Significant Non-Compliance were issued against Snug Top. The notices of violations related to storm water issues, failure to complete and submit Hazardous Materials Release Response Plans (HMRRP) and clean/remove some fiberglass debris at back of the facility nearby storm drains.

4.1.9 Federal National Priority List Sites

The Federal National Priorities List (NPL) sites are the United States Environmental Protection Agency's (USEPA) list of prioritized Superfund sites with significant risk to human health and the environment. These sites receive remedial funding under the Comprehensive Environmental Response, Conservation and Liability Act (CERCLA).

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.10 Federal Institutional Controls / Engineering Controls Registries

The EPA maintains this database of Sites with institutional or engineering controls related to Resource Conservation and Recovery Act.

No properties within a one-half quarter mile radius, including the subject property, appear on this list.

4.1.11 PCB Waste Handler Database (PCB)

The US EPA tracks generators, transporters, commercial stores and/or brokers and disposers of PCBs in accordance with the Toxic Substance Control Act.

The subject property is not listed on this database.

4.2 California State Sources

4.2.1 State and Tribal Registered Storage Tank Lists

The California State Water Regional Control Board, Office of Underground Storage Tanks maintains an inventory of registered aboveground and underground storage tanks.

The subject property is not listed on this database. Forty sites are listed on this database within 1/4 -mile radius of the subject property. It should be noted that potential for environmental concern is not necessarily present simply because a property is listed on this database.

4.2.2 State and Tribal Brownfield Sites

The Site Mitigation and Brownfield Reuse Database (SMBRD) identify certain potentially hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.3 State and Tribal – Equivalent CERCLIS

The California Water Quality Control Board, Division of Loan Grants maintains an inventory of sites with historical toxic pits that no longer are no longer in current agency list and toxic pits listing of Cleanup Act sites.

The subject property is not listed on this database. Twenty-one sites are listed within one-mile radius of the subject property. Based on the distance and status, the above listed sites are not considered a recognized environmental condition to the subject property.

4.2.4 State and Tribal – Equivalent NPL

The Site Mitigation and Brownfield Reuse Database (SMBRD) identify certain potentially hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk.

The subject property is not listed on this database. Two sites are listed on this database.

4.2.5 State and Tribal Leaking Underground Storage Tanks

The leaking underground storage tanks (LUST) list in the City of Long Beach is maintained by the Regional Water Quality Control Board (RWQCB), City of Long Beach Fire Department and County of Los Angeles Fire Department. The LUST list is a compilation of all investigations conducted in response to reports of hazardous materials leaking from USTs.

The subject property is not listed on this database. Forty sites are listed on this database.

4.2.6 State and Tribal Landfill and/or Solid Waste Disposal Sites

This list is maintained by the California Integrated Waste Management Board. In 1977, this list was created to identify active and inactive sanitary landfills, transfer stations, and disposal facilities.

The subject property is not listed on this database. One site is listed on this database.

4.2.7 State and Tribal Voluntary Cleanup Sites

This category contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.8 Local Brownfield Lists

The Site Mitigation and Brownfield Reuse Database (SMBRD) identify certain potentially hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.9 Local Lists Hazardous Waste / Contaminated Sites

The U.S. Department of Justice and Department of Toxic Substances Control maintain listing of clandestine drug lab locations, historical listing of clandestine drug lab locations, listing of meth and clandestine drug labs and listing of possible hazardous materials contamination sites on existing school properties.

No properties within a 1/4-mile radius, including the subject property, appear on this list.

4.2.10 Records of Emergency Release Reports

The Hazardous Material Report Incident Subsystem HMIRS of the Research and Special Programs Administration (RSPA) Hazardous Materials Information System was established in 1971 to fulfill the requirements of the Federal hazardous material transportation law. Part 171 of Title 49, Code of Federal Regulations (49 CFR) contains the incident reporting requirements of carriers of hazardous materials. An unintentional release of hazardous materials meeting the criteria set forth in Section 171.16, 49 CFR, must be reported on DOT Form 5800.1. The data from the reports received are subsequently entered in the HAZMAT database.

No properties within a one-mile radius, including the subject property, appear on this list.

4.2.11 Local Land Records

The Department of Toxic Substances Control maintains a listing of properties with environmental liens and deed restrictions.

The subject property is not listed on this database.

4.2.12 Local Lists of Landfill / Solid Waste Disposal Sites

This Database contains listing of local landfills and facilities which perform recycled material processing activities.

The subject property is not listed on this database. Nineteen sites are listed on this database.

4.2.13 Solid Waste Assessment Test

This program, provided for under the Calderon legislation, requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether the site has discharged hazardous substances which will impact the environment.

The subject property is not listed on this database.

4.2.14 Properties Needing Further Evaluation

This category of The Site Mitigation and Brownfields Reuse Program Database contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.15 Hazardous Waste and Substance Site List (CORTESE List)

The CORTESE List is compiled by the California State Office of Planning and Research and provides information concerning identified hazardous waste/substance sites within the State of California. The CORTESE List contains the following information:

- Records that have been compiled by the CAL-EPA DTSC. These are abandoned hazardous waste sites.

- Records that have been compiled by the Environmental Health Division of Cal EPA. These sites contain contaminated public drinking water wells that serve less than 200 connections (Small Wells) and more than 200 connections (large wells).

- Sites included under the Hazardous Substance Cleanup Bond Act, pursuant to Section 25356 of the California Health and Safety Code.

- Records compiled by the State Water Resources Control Board (WRCB). These are the sites of reported UST leaks that have been investigated by the WRCB.

- Records compiled by the California Waste Management Board. These are solid waste disposal facilities from which there is a known migration of hazardous wastes.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.16 Hazardous Materials System Industrial Waste List

The Los Angeles County Department of Public Works (LACDPW) maintains a listing of sites with industrial waste discharges.

No properties within a 1/4-mile radius, including the subject property, appear on this list.

4.3 Local Sources

4.3.1 City of Long Beach Department of Building and Safety

Records from the City of Long Beach Department of Building and Safety (CLBDBS) were reviewed for evidence indicating the developmental history of the subject property, and for the presence of documentation relative to hazardous materials or underground storage tanks (USTs). Following is a summary of records available at the CFDBS:

1515 W. 17th Street

Date	Description
4/24/1942	Application for 12’ X 18’ building. Proposed use is garage.
7/11/1959	Application for 1-story, 4-room 720 sq. ft. dwelling.

1711 Harbor Avenue

Date	Description
1/14/1974	Application for electrical permit.
12/4/1992	Earthquake reinforcement.
9/13/1996	Supplemental permit for spray booth #161.
1/1/2001	Complete work started on PJ# 290902 Install Foundation & EQ (54,000 CF)

9/20/2001	Install pit for paint spray booth exhaust.
1/2/2002	Install pit for paint spray booth.
6/8/2005	Tenant Improvement. Install interior walls @ Snug Top. The permit also indicated "VOID".

Copies of the building department records that were available are presented in Appendix C.

4.3.2 City of Long Beach Fire Department

Records from the City of Long Beach Fire Department (CLBFD) were requested for review for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. The records were not available at the time this report was prepared. Upon availability of records, if any, the report will be updated as deemed necessary.

4.3.3 City of Long Beach Environmental Health

Records from the City of Long Beach Environmental Health were requested for review for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. The records were not available at the time this report was prepared. Upon availability of records, if any, the report will be updated as deemed necessary.

4.3.4 County of Los Angeles Department of Public Works

Records from the County of Los Angeles Department of Public Works were requested for review for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.5 South Coast Air Quality Management District

A file review was conducted at the South Coast Air Quality Management District. A review of records indicated that permits have been issued to Custom Fiberglass manufacturing Co DBA Snug Top for the operation paint spray booths at the subject property.

4.3.6 Department of Toxic Substances Control

Records from the Department of Toxic Substances Control (DTSC) were reviewed. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.7 California Regional Quality Control Board- Santa Ana Region

Records from the California Regional Quality Control Board – Santa Ana Region were reviewed No records for the hazardous materials and/or USTs were found for the subject property.

5.0 ENVIRONMENTAL SETTING

5.1 Regional Physiographic Features

The site is located 0.5 miles west of Los Angeles River and 1.5 miles east of Dominguez Channel within the Coastal Plain of Los Angles, West Coast Basin. The elevation of the Site is approximately 10 feet above sea level (USGS Long Beach 7.5" Quadrangle) and topography in the vicinity of the Site slopes to the south/southeast.

5.2 Geology

Regionally the Site is located at the northern end of the Peninsular Ranges Geomorphic Province of California. This area of the province is characterized by deep alluvial deposits overlying marine sedimentary bedrock which is part of the Los Angeles Basin, as defined by Yerkes and others, 1965. The Los Angeles Basin is separated into three major blocks. The Site is situated near the southeastern portion of the Southwestern Block of the Los Angeles Basin, which is bound on the northeast by the active Newport-Inglewood Fault Zone. The nearest active fault is the Newport-Inglewood Fault Zone which is approximately 1-mile northeast of the Site.

In a natural state the Site was mantled with colluvial material which is usually 1.5 to 2 feet in thickness. Colluvial material consists of medium to dark brown clayey sand with some silt. The existing fill material placed during grading and construction consisted of gravelly sand imported to the Site, and silty sand derived from native alluvial material over excavated and incorporated into the imported material. The results of our field investigation indicate that the native alluvial sediments have been covered with graded native and imported gravelly and silty sand.

5.3 Hydrogeology

The underlying hydrologic units beneath the Site are comprised of Quaternary alluvium deposits consisting of unconsolidated to semi-consolidated alluvial clays, silts, with sandy layers including scattered gravel. The Gage aquifer and an unnamed aquiclude which are part of the Upper Pleistocene age Lakewood Formation lie beneath the recent alluvium. The Lakewood Formation is unconformably underlain by the Lower Pleistocene deposits of the San Pedro formation. The San Pedro Formation contains most of the important producing aquifers in the West Coast Basin. Both the Lynwood and Silverado aquifers are present in the site vicinity.

6.0 HISTORICAL SITE USAGE

A review of records available at the City of Long Beach Department of Building and Safety and County of Los Angeles County Assessor's Office indicated that the subject property was developed with the current structures in 1913, 1923, 1950 and 1959.

6.1 Aerial Photographs

Historical and current usage of the subject property and adjacent areas was investigated by reviewing aerial photographs provided by Envirosite.

The historical aerial photographs available from 1933 to 2018 were reviewed. No evidence of waste disposal, wetlands, wastes dumping, or debris on the subject site was observed in the historical aerial photographs reviewed by Omega.

Copies of the aerial photographs are presented in Appendix E.

6.2 Sanborn Fire Insurance Maps

These maps were prepared for fire insurance underwriting purposes and describe the construction and relative fire-resistance of buildings, depict the locations of fire-prevention devices, gasoline storage tanks, water lines, cistern, and any potentially flammable materials in the site vicinity over time. A search of sanborn fire insurance maps conducted by Envirosite indicated that mapping was done for the subject area. Following presents a summary of fire insurance maps:

Date	Description
1950	The map indicates that the subject property at 1711 Harbor Avenue is occupied Trailer Manufacturing and Trailer Assembly Facility Paint spray booths. A review of the Sanborn fire insurance map indicated presence of a fuel oil tank and showing fuel oil tank located at the eastern side of the property, directly south of the gate, is present. The property at 1515 W. 17th Street is occupied by a dwelling.
1963	Same as in 1963

Copies of the Sanborn maps are presented in Appendix E.

6.3 City Directories Records

City Directories have been published for many cities and towns across the United States since the 18th Century. Originally a list of town residents, the City Directory became a tool for locating individuals and businesses in a particular urban or suburban area. For each address within an area, City Directories list the name of each resident or, if a business operates from that address, the name, and the type of business. This historic overview of occupants of a given property is a valuable tool for companies involved in assessing the historic prior use of any resident or commercial property.

A review of city directories revealed that the property located at 1515 W. 17th Street was occupied by residential tenants in the past. The property located at 1711 Harbor Avenue has been occupied by Snug Top which has been engaged in the manufacturing of camper shells.

Copies of city directories are presented in Appendix G.

6.4 Historical Topographic Maps

Omega obtained historical topographic maps from Envirosite. A review of Topo Maps did not reveal production wells or other significant surface features on the topographic maps.

Copies of the Topographic Maps are presented in Appendix H.

6.5 Prior Assessment Reports

Previously prepared environmental site assessment report by Clayton was provided for Omega's review.

6.6 Zoning/Land Use Records

Records of the local government were reviewed to determine current and historical uses of the subject property permitted by the local government. According to the City of Long Beach Building Department, the subject property is zoned commercial.

6.7 Recorded Land Title Records

Review of a 50-year chain of title was not included in the scope of the assessment. A title report was requested from the Client but was not received prior to issuance of this report. As a result, the information required for review of recorded land title records is considered not to be readily ascertainable.

6.8 Additional Historical Record Sources

Historical use of the Property was researched using standard historical sources. No other research was conducted or deemed necessary for this assessment

6.9 Historical Use Information on Adjoining Properties

A review of the historical records revealed that the surrounding areas were used for residential and commercial purposes in the past.

6.10 Data Failure

The objective of historical research is to develop a history of the previous uses of the subject property and surrounding area, to help identify the likelihood release of hazardous substances as a result of past activities. The agreed scope of work requires the assessor to attempt to identify use of the Property at 5-year intervals from 1940 to the present, or, if the Property was already developed in 1940, to the first date of development, but recognizes that data failure frequently occurs, making this impossible. When data failure occurs, ASTM E 1527-13 requires the assessor to document the data failure and assess the potential impact on the ability of the EP to identify recognized environmental conditions.

Information developed during this assessment is adequate to satisfy the requirements of the scope of assessment. No related data failure has been identified.

7.0 SITE RECONNAISSANCE

On November 12, 2021, Omega personnel conducted an inspection of the site located at 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, Long Beach, to assess the current on-site activities that may pose potential impact to the subsurface conditions of the subject site.

During the site visit, Omega personnel inspected the subject site regarding potential environmental concerns including the presence of the UST's or AST's, spray booths, pits, clarifiers, and/or sumps, quantities and types of hazardous/toxic materials and wastes stored, treated, used, generated, or disposed of as part of present or previous tenants' business activities, unusual stains or odors, and knowledge of hazardous material spills on the subject site. The subject site was inspected for evidence of any staining and/or spills. Stains were observed at several areas of the property.

Environmental considerations associated with the site and the study area is discussed in the following sections.

7.1 Aboveground Storage Tanks

No aboveground fuel storage tanks were observed on the subject property during the site reconnaissance.

7.2 Underground Storage Tanks

Visual observation for manways, vent pipes, fill connections, concrete pads, and saw cuts in paved areas did not identify any surface connections or disturbances that would indicate the potential for an underground storage fuel tank (UST) installation at the subject site.

7.3 Water and Wastewater

The wastewater generated in the manufacturing and floor washing operations is collected in a clarifier and subsequently disposed of at a certified facility.

7.4 Hazardous Materials/Wastes

During the site reconnaissance, significant quantities of hazardous materials (i.e., paints, thinners, glues, resins, etc.) were observed at the subject property. Stains were observed at several areas of the property.

7.5 Air Emissions

During the site reconnaissance, several paint spray booths, boilers, and drying ovens were noted at the site. The paint spray booths, boilers and drying ovens were area permitted with the South Coast Air Quality Management District.

7.6 PCBs

In general, all PCB-designated transformers were required to be replaced with non-PCB-designated transformers when PCBs were designated as a carcinogen by the EPA in 1977. Transformers are currently classified as PCB-containing if their cooling oils contain greater than 50 milligrams per liter (ppm) total PCBs.
During the site reconnaissance, no pad-mounted electrical transformers were noted at the site.

7.7 Solid Waste

During the site reconnaissance, no solid waste or trash accumulation were noted at the site.

7.8 Asbestos Containing Materials (ACMs)

The potential for the presence of friable ACM was evaluated based on the age of the improvements, dates of renovation and other relevant information. Appendix G of the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book) was used as a guide in identifying suspect materials and the definition of suspect ACM and presumed asbestos containing material is taken from 29 CRF Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule. It should be noted that asbestos may still be utilized in some non-friable products, such as sheet vinyl flooring, vinyl floor tiles, floor tile mastic, joint compound, asbestos-cement board, and roofing materials, as these materials may still be manufactured and installed in the United States. The level of the preliminary evaluation performed was not designed to comply with the survey requirements of the Asbestos Hazard Emergency Response Act (AHERA), 40 Code of Federal Regulations (CFR) Part 763, National Emission Standard for Hazardous Air Pollutants

(NESHAP) 40 CFR 61, Occupational Safety and Health Administration (OSHA) 29 CFR Part 1926.1101, or other local, state or federal regulations, but has been conducted per accepted industry practices to satisfy the scope of work of the rating agencies and/or lenders. A finding in this report of "ACM is not a significant concern" or "No significant asbestos was identified" should not be interpreted as "the building is asbestos free".

Based on the original date of construction of buildings (built prior to 1982), there is potential for asbestos in the construction materials. No asbestos sampling was performed as part of this assignment.

7.9 Pesticides

No visual evidence of pesticides use on the property was observed during the site reconnaissance. A review of the historical aerial photographs did not reveal the presence of any agricultural activities and/or nursery at the subject site.

7.10 Radon

High radon readings are typically found and tested in areas of geologic activity, and in cold-weather climates where structures have inadequate ventilation and below grade construction. Radon levels of 4 picocuries per liter (pCi/L) or greater are considered significant readings.

The US EPA has prepared a map to assist National, State, and Local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L.

7.11 Wetland

There are no wetlands on the subject property or within the vicinity of the subject property. The review of aerial photographs, topographic maps and personal interviews with local agencies staff did not indicate the presence of wetlands site on the subject property, nor in the vicinity of the subject site.

7.12 Oil Wells

California Division of Oil and Gas (DOG) maps and records were researched for data regarding the presence of petroleum-producing properties and/or "wildcat" oil or gas wells in the site vicinity. No oil and gas wells were identified on the subject site.

7.13 Landfills

There are no landfills on the subject property or within the vicinity of the subject property. A review of historical aerial photographs, topographic maps, personal interviews with local agencies staff and government database report did not indicate the presence of landfills site on the subject property, nor in the vicinity of the subject site.

8.0 INTERVIEWS

8.1 Interviews with Owner

The owner was available for an interview at the time of the site inspection.

8.2 Interviews with Site Manager

The Key Site Contact was available for an interview at the time of the site inspection.

8.3 Interviews with Occupants

During the site reconnaissance, the site occupants were available for an interview at the time of the site inspection.

8.4 Interviews with Local Government Offices

City of Long Beach Department of Building and Safety

City of Long Beach Fire Department

County of Los Angeles Fire Department

County of Los Angeles Department of Public Works

South Coast Air Quality Management District

Department of Toxic Substances Control

California Regional Quality Control Board- Los Angeles Region

9.0 FINDINGS, CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

9.1 Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during this assessment:

- Omega identified recognized environmental conditions (RECs) during this assessment. The RECs included the presence of hazardous materials, hazardous wastes used, stored, and generated onsite, operation of paint spray booths, clarifier, potential underground fuel storage tank, etc. at the site.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during this assessment:

- Omega did not identify any controlled recognized environmental conditions during this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during this assessment:

- Omega did not identify any historical recognized environmental conditions during this assessment.

9.2 Conclusions, Opinions and Recommendations

Omega has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1711 Harbor Avenue & 1515 W. 17th Street, Long Beach, Long Beach, Los Angeles County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions in connection with the property Based on the findings of the Phase 1 environmental site assessment it is Omega's opinion that additional investigation could assist in the analysis of the conditions.

10.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312" and We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle :	2007
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	FLAMMABLE WASTE FROM PAINT OPERATION SPRAY EQUIPMENT CLEANING. CONTAINS ACETONE, XYLENE, TOLUENE, ETC
Primary NAICS :	336214 - Travel Trailer and Camper Manufacturing
Source Code :	G06 - Painting and coating (manufacturing, building, or maintenance)
Form Code :	W204 - Concentrated halogenated/ non-halogenated solvent mixture
Management Method :	H020 - Solvents recovery (distillation, extraction, etc)
Generation Tons :	5.2335
Managed Tons :	0
Shipped Tons :	5.2335
Received Tons :	0
Receiver ID :	CAD008252405
Receiver State :	CA
Shipper ID :	CAD981376908
Shipper State :	CA
Waste Minimization :	N/R
Waste Code List :	D001, F003, F005
Waste Code Group :	F1_5 - F001-F005 combinations
Waste Generation Type :	N/R

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
Source Description :	The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description : ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Source Description : RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Violation Date :	2020-11-12
Citation :	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Description :	Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.
Notes :	Corrective Actions: Within 30 days, provide records of inspections as outlined in your SPCC plan.

Description : Failure to complete and electronically submit a site map with all required content.

Notes : The site map title was for the wrong address (1543 W 16th St). Update the site map (1532 W Esther St) and resubmit it within 30 days.

Division : Long Beach Environmental Heath
Program : HMRRP
Source : CERS

Violation Date : 2020-11-12

Citation : HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2

Description : Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Notes :

Returned to compliance on 11/16/2020. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the required due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the required due date. The last HMBP review, update and submittal in CERS was 2-27-19 and was due by 2-27-20 . The business was able to update and submit the HMBP in CERS during this inspection. This violation is abated.

Division : Long Beach Environmental Heath
Program : HMRRP
Source : CERS

Violation Date : 2017-11-14

Citation : HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Description : Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Notes : Returned to compliance on 12/13/2017. OBSERVATION: FACILITY HAS NOT RECERTIFIED THEIR HAZARDOUS MATERIALS BUSINESS EMERGENCY PLAN (HMBEP) WITHIN THE LAST 12 MONTHS. CORRECTIVE ACTION: LON ON TO THE CALIF. ENVIRONMENTAL REPORTING SYSTEM (CERS) AND SUBMIT YOUR HMBEP ELECTRONICALLY.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violation Date : 2018-02-28

Citation : HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Description : Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Notes :

Returned to compliance on 03/30/2018. OBSERVATION: FACILITY DID NOT HAVE RECORDS OF EMPLOYEE TRAINING FOR THE MANAGEMENT OF HAZARDOUS MATERIALS INCLUDING HAZARDOUS WASTE. CORRECTIVE ACTION: WITHIN 30 DAYS, LOCATE TRAINING RECORDS AND MAKE AVAILABLE FOR RE-INSPECTION. IF ANNUAL REFRESHER TRAINING OR INITIAL TRAINING HAS NOT BEEN PROVIDED TO YOUR EMPLOYEES, IMMEDIATELY PROVIDE EMPLOYEE TRAINING FOR THE MANAGEMENT OF HAZARDOUS MATERIALS INCLUDING HAZARDOUS WASTE. EMPLOYEE TRAINING DOCUMENTATION TEMPLATE WAS PROVIDED TO FACILITY. YOU MAY USE THIS TEMPLATE TO DOCUMENT YOUR EMPLOYEE TRAINING. BE ADVISED, ANNUAL REFRESHER TRAINING IS REQUIRED FOR EMPLOYEES FOR THE MANAGEMENT OF HAZARDOUS MATERIALS.

Notes : OBSERVATION: NO INSPECTION OR TEST RECORDS WERE AVAILABLE FOR THE FACILITY'S ABOVEGROUND STORAGE TANKS. CORRECTIVE ACTION: CONDUCT AND DOCUMENT INSPECTIONS PER YOUR FACILITY'S SPILL PREVENTION CONTROL AND COUNTER MEASURE PLAN (SPCC).

Division : Long Beach Environmental Heath
Program : APSA
Source : CERS

Violation Date : 2018-02-28

Citation : HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507

Description : Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Notes :

OBSERVATION: The business failed to establish and implement a hazardous materials business emergency plan (HMBEP) for handling hazardous materials at or above the reportable threshold quantities. OBSERVED GREATER THAN 55 GALLONS/200 CUBIC FEET OF HAZARDOUS MATERIALS (MOTOR OIL, USED OIL, ANTI-FREEZE, PROPANE) ON-SITE DURING THE INSPECTION. CORRECTIVE ACTION: WITHIN 30 DAYS, LOG ON TO THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM AND CREATE A HAZARDOUS MATERIALS BUSINESS EMERGENCY PLAN. A COMPLETE PLAN CONSISTS OF FACILITY INFORMATION - BUSINESS ACTIVITIES, OWNER/OPERATOR IDENTIFICATION; HAZARDOUS MATERIALS INVENTORY AND SITE MAP; EMERGENCY RESPONSE AND TRAINING PLANS; AND ANY OTHER CUPA PROGRAMS YOU MAY BE SUBJECT TO. CERS INSTRUCTION GUIDANCE WAS PROVIDED TO FACILITY DURING THE INSPECTION.

Division : Long Beach Environmental Heath

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 133 - Aqueous solution with total organic residues 10 percent or more, 0.45453 tons to CAD099452708
2019: 221 - Waste oil and mixed oil, 0.00000 tons to CAD099452708
2019: 352 - Other organic solids, 0.90000 tons to AZR000520304
2019: 134 - Aqueous solution with total organic residues less than 10 percent, 0.42000 tons to CAD099452708
2018: 221 - Waste oil and mixed oil, 0.00000 tons to CAD099452708
2018: 352 - Other organic solids, 1.27500 tons to AZR000520304
2018: 134 - Aqueous solution with total organic residues less than 10 percent, 0.52500 tons to CAD099452708
2018: 352 - Other organic solids, 0.25000 tons to AZR000501510
2018: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080025711
2018: 213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.), 1.83480 tons to CAT080013352
2017: 221 - Waste oil and mixed oil, 75.449 tons to CAD099452708
2017: 221 - Waste oil and mixed oil, 63.707 tons to CAT080025711
2017: 352 - Other organic solids, 0.25 tons to AZR000501510
2017: 134 - Aqueous solution with total organic residues less than 10 percent, 0.147 tons to CAT080025711

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Violation Date :	2018-03-05
Citation :	HSC 6.11 25404(e)(4) - California Health and Safety Code, Chapter 6.11, Section(s) 25404(e)(4)
Description :	Failure to report program data electronically.
Notes :	Returned to compliance on 07/11/2018. CERS IS NOT UPDATED. OPERATOR WILL WORK WITH STEVE SANTOS TO GET IT CONPLIANCE.
Division :	Long Beach Environmental Heath
Program :	HW
Source :	CERS

Violation Date :	2018-02-28
Citation :	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Description :	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Notes :

Returned to compliance on 03/30/2018. OBSERVATION: FACILITY DID NOT HAVE RECORDS OF EMPLOYEE TRAINING FOR THE MANAGEMENT OF HAZARDOUS MATERIALS INCLUDING HAZARDOUS WASTE. CORRECTIVE ACTION: WITHIN 30 DAYS, LOCATE TRAINING RECORDS AND MAKE AVAILABLE FOR RE-INSPECTION. IF ANNUAL REFRESHER TRAINING OR INITIAL TRAINING HAS NOT BEEN PROVIDED TO YOUR EMPLOYEES, IMMEDIATELY PROVIDE EMPLOYEE TRAINING FOR THE MANAGEMENT OF HAZARDOUS MATERIALS INCLUDING HAZARDOUS WASTE. EMPLOYEE TRAINING DOCUMENTATION TEMPLATE WAS PROVIDED TO FACILITY. YOU MAY USE THIS TEMPLATE TO DOCUMENT YOUR EMPLOYEE TRAINING. BE ADVISED, ANNUAL REFRESHER TRAINING IS REQUIRED FOR EMPLOYEES FOR THE MANAGEMENT OF HAZARDOUS MATERIALS.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violation Date :	2019-11-20
Citation :	23 CCR 16 2665(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665(b)
Description :	"Failure to submit a copy of the overfill prevention equipment inspection results on the "Overfill Prevention Equipment Inspection Report Form" to the UPA within 30 days after the inspection. "

Notes :

OBSERVATION: Owner/operator failed to submit a copy of the overfill prevention equipment inspection results on the "Overfill Prevention Equipment Inspection Report Form" to the UPA within 30 days after the inspection. CORRECTIVE ACTION: Submit a copy of the overfill prevention equipment inspection results on the "Overfill Prevention Equipment Inspection Report Form" to the UPA within 30 days.

Notes :

The training certificate onsite has the wrong date. Also observed the new GM was not trained at start by UST DO. UST DO should be checking for new employees needing to be trained each inspection. Also, many reports are not signed by the UST Owner/Operator and lack documented response actions. Submit copy of the corrected training certificate and the newest training certificate within 30 days byt email to angela.samayoa@longbeach.gov

Description :

Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Notes :

OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. CORRECTIVE ACTION: Update all submittal elements effected by the change(s) and electronically submit the update to the California Environmental Reporting System (CERS), located at https://cersbusiness.calepa.ca.gov/Account/Signin within 30 days.

Source Description

Source Description :

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description
Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Citation : 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20

Description : Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.

Notes : PROVIDE MANIFESTS FOR 2019 AND SEVERAL MONTHS OF 2020.
Division : Long Beach Environmental Heath
Program : HW
Source : CERS

Violation Date : 2020-02-14

Citation : 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Description : Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Notes : Returned to compliance on 05/15/2020. CLEAN SOME MINOR SPILLS INSIDE THE SHOP REMOVE SOME DEBRIS AND JUNK INSIDE THE SHOP

Division : Long Beach Environmental Heath
Program : HW
Source : CERS

Violation Date : 2020-02-14

Citation : HSC 6.5 25201.16(f) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.16(f)

Description : Failure to comply with the applicable requirements related to accumulation and containment standards for universal waste aerosol cans.

Notes :

Returned to compliance on 05/15/2020. OBSERVATION: [Describe container and location] were found not labeled with the type of waste stored. Containers used to store aerosol cans shall be labeled or marked with one of the following phrases: "Universal Waste - Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans". CORRECTIVE ACTION: Immediately mark these containers and ensure that all containers of aerosol cans are marked in this manner. Submit documentation to the CUPA demonstrating what corrective actions were taken.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Classification :	Large Quantity Generator

Description :

Handlers that generate 1,000 kg or more of hazardous waste during any calendar month; or generate more than 1 kg of acutely hazardous waste during any calendar month; or generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1 kg of acutely hazardous waste at any time; or generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Last Date in Agency List :	2021-09-03

Owner/Operator Summary

Owner/Operator Name :	CROSBY & OVERTON
Owner/Operator Address :	1610 W. 17TH STREET, LONG BEACH, CA 90813

Source Description

Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 491 - Unspecified sludge waste, 29.51115 tons to ARD069748192
2019: 181 - Other inorganic solid waste, 0.42400 tons to NVT330010000
2019: 214 - Unspecified solvent mixture, 2.18900 tons to CAD008302903
2019: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 26.40000 tons to ARD069748192
2019: 551 - Laboratory waste chemicals, 3.54750 tons to NVT330010000
2019: 331 - Off-specification, aged or surplus organics, 30.28410 tons to NVT330010000
2019: 134 - Aqueous solution with total organic residues less than 10 percent, 0.00000 tons to NVT330010000
2019: 551 - Laboratory waste chemicals, 0.85000 tons to NVT330010000
2019: 181 - Other inorganic solid waste, 1.69750 tons to AZR000520304
2019: 541 - Photochemicals/photoprocessing waste, 0.75600 tons to NVT330010000
2019: 272 - Polymeric resin waste, 0.45870 tons to AZR000520304
2019: 122 - Alkaline solution without metals pH >= 12.5, 3.35685 tons to CAD008488025
2019: 223 - Unspecified oil-containing waste, 8.82000 tons to NVT330010000
2019: 131 - Aqueous solution (2 < pH < 12.5) containing reactive anions ..., 0.18700 tons to CAD028409019
2019: 343 - Unspecified organic liquid mixture, 16.16700 tons to AZR000520304
2019: 135 - Unspecified aqueous solution, 52.09500 tons to AZR000520304
2019: 223 - Unspecified oil-containing waste, 383.53200 tons to NVT330010000
2019: 513 - Empty containers less than 30 gallons, 614.47600 tons to NVT330010000

Hazardous Waste Summary
Waste Code / Name : 121 - Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)
122 - Alkaline solution without metals (pH > 12.5)
123 - Unspecified alkaline solution
131 - Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)
132 - Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)
133 - Aqueous solution with 10% or more total organic residues
134 - Aqueous solution with <10% total organic residues
135 - Unspecified aqueous solution
141 - Off-specification, aged, or surplus inorganics
151 - Asbestos-containing waste

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Description :

Per NRC report #878060, "Caller is reporting a material release from a tractor trailer truck due to a leak in the saddle tank. Caller suspects the truck was parked when the leak took place. Caller does not know exactly who the truck belongs to at this time. Time of incident: 2230 pst". Remedial actions: "The material was contained and clean up is underway". "20 gallons released, 3 gallons in water"

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. Violations

Violation Date : 2020-11-12

Citation : HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)

Description : Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.

Notes : OBSERVATION: Failure to submit a Tank Facility Statement or Business Plan. Facility has not completed a Hazardous Materials Business Emergency Plan (HMBEP) in the California Environmental Reporting System (CERS) for this facility. CORRECTIVE ACTION: Within 30 days, submit a tank facility statement and/or complete your Hazardous Materials Business Emergency Plan (HMBEP) in CERS.

Division : Long Beach Environmental Heath
Program : APSA
Source : CERS

Violation Date : 2020-11-12

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description :

Failure to provide appropriate secondary containment and/or diversionary structures or equipment for the following: bulk storage containers, mobile or portable containers, oil-filled equipment, piping and related appurtenances, mobile refuelers or non-transportation-related tank cars, and transfer areas, equipment and activities and ensure that the entire containment system, including walls and floor, are capable of containing oil and constructed so that any discharge will not escape the containment system before cleanup occurs.

Notes :

OBSERVATION: Failure to provide the appropriate general containment/diversionary structures/equipment for the following: bulk storage containers, mobile or portable containers, oil-filled equipment, piping and related appurtenances, mobile refuelers or non-transportation-related tank cars, and transfer areas. *During the inspection the containment berms on the Gaylord entrance of the tanker truck maintenance yard, as well as the Canal Entrance for this facility was observed as damaged and may not provide containment should a spill occur. CORRECTIVE ACTION: Repair and provide appropriate containment measures and/or diversionary structures/equipment capable of containing oil and constructed so that any discharge will not escape the containment system before cleanup occurs. Provide proof of corrective action to the Long Beach Fire CUPA within 30 days.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description : The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
