Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

FRS ***(cont.)***

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violation Date : 2020-08-05

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to designate person who reports to management as accountable for discharge prevention at facility.

Notes :

Returned to compliance on 10/05/2020. OBSERVATION: Failure to designate a person accountable for discharge prevention and who reports to facility management. The person accountable for discharge prevention is no longer with the company (greater than 6 months). SPCC plan does not reflect the current person accountable for discharge prevention and who reports to management. CORRECTIVE ACTION: Designate a person accountable for discharge prevention and who reports to facility management and ensure that the SPCC plan is updated with the information. Re-inspection will be conducted on or after 09/5/2020.

Notes :

Returned to compliance on 08/05/2020. Facility has submitted a Hazardous Materials Business Emergency Plan (HMBEP) in the California Environmental Reporting System (CERS). CERS# 10128958. *See HMBEP report for additional comments. This violation was corrected on-site, as used oil AST was added to the chemical inventory. **NOTE: Facility's chemical inventory observed includes other material liquids that may be subject to APSA and SPCC, based on chemical mixture identified. Facility shall provide to the Long Beach Fire Department the most current Safety Data Sheets for all materials reported in the Hazardous Materials Inventory in CERS. Furthermore, facility shall consult with their Environmental consultant on the chemicals reported in CERS to evaluate if subject to federal SPCC requirements for oils reporting and/or petroleum oils for APSA reporting. Also may require a PE certification if total oils is above 10,000 gallons.

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : "Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container's supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."

Notes :

Returned to compliance on 11/17/2020. OBSERVATION: Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container's supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas. *Inspection records were not available. I observed an inspection checklist in the SPCC plan referencing STI SP001, however no inspections have been conducted or documented. *Per facility's SPCC plan, inspections are to be conducted monthly and annually. Facility is cites STI SP001 as the industry standard. CORRECTIVE ACTION: Immediately conduct inspections and testing as discussed in your facility's SPCC plan. Supervisor shall sign all inspections as required and outlined in SPCC plan. Maintain testing and inspection records as outlined in your SPCC plan and make available for review [Truncated]

Citation : HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Description :

Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Notes :

Returned to compliance on 08/05/2020. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. *During the inspection the following was observed: Facility has greater than 1320 gallons of petroleum in aboveground storage that is subject to the Aboveground Petroleum Storage Act (APSA). This activity has not been disclosed on the business activities in the Hazardous Materials Business Emergency Plan in the California Environmental Reporting System (CERS). Additionally, the following chemical inventory has not been reported in CERS. 1 - 550 gallon aboveground storage tank containing Used Oil. (capacity of the used oil tank was [Truncated]

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description : ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

(E-GGRT, accessible through an EPA web page, is used to submit annual reports in support of the EPA rule for mandatory reporting of greenhouse gases (GHG) by large GHG emissions sources. Implementation of 40 CFR part 98 is referred to as the greenhouse gas reporting program (GHGRP). This comprehensive, nationwide emissions data will provide a better understanding of the sources of GHGs and will guide development of the policies and programs to reduce emissions. The publically available data will allow reporters to track their own emissions, compare them to similar facilities, and aid in identifying cost effective opportunities to reduce emissions in the future.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 352 - Other organic solids, 0.50000 tons to AZR000521146
2018: 352 - Other organic solids, 0.40000 tons to AZR000515924
2017: 181 - Other inorganic solid waste, 0.0375 tons to NVT330010000
2017: 352 - Other organic solids, 0.2 tons to AZR000515924
2016: 331 - Off-specification, aged or surplus organics, 0.1485 tons to NVT330010000
2016: 352 - Other organic solids, 0.875 tons to AZR000515924
2016: 223 - Unspecified oil-containing waste, 0.9174 tons to AZR000515924
2016: 181 - Other inorganic solid waste, 0.45 tons to NVT330010000
2016: 352 - Other organic solids, 23 tons to AZC950823111
2015: 181 - Other inorganic solid waste, 0.1 tons to NVT330010000
2015: 181 - Other inorganic solid waste, 13.5 tons to AZR000515924
2015: N/R - Blank or unknown, tons to AZR000515924
2015: 352 - Other organic solids, 0.45 tons to AZR000515924
2015: 611 - Contaminated soil from site clean-up, 22.56 tons to AZC950823111
2014: 181 - Other inorganic solid waste, 20 tons to AZR000501510
2014: 181 - Other inorganic solid waste, 0.2 tons to NVT330010000
2014: 181 - Other inorganic solid waste, 15.1704 tons to AZC950823111
2014: 352 - Other organic solids, 2.15 tons to AZR000501510
2013: 181 - Other inorganic solid waste, 30.3408 tons to AZC950823111
2013: 352 - Other organic solids, 0.375 tons to AZR000501510
2013: 181 - Other inorganic solid waste, tons to CAC000254047
2012: 352 - Other organic solids, 0.375 tons to NVT330010000
2012: 352 - Other organic solids, 0.3375 tons to AZR000501510
2012: 181 - Other inorganic solid waste, 0.155 tons to NVT330010000
2011: 352 - Other organic solids, 1 tons to AZR000501510
2011: 181 - Other inorganic solid waste, 0.09 tons to NVT330010000
2010: 352 - Other organic solids, 0.6 tons to CAD982444481
2010: 352 - Other organic solids, 0.63 tons to AZR000501510
2010: 343 - Unspecified organic liquid mixture, 0.374 tons to ARD981057870
2009: 352 - Other organic solids, 1.05 tons to CAD982444481

Waste Activity Monitoring

Report Cycle :	2015
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	WASTE PAINT
Primary NAICS :	23799 - Other Heavy and Civil Engineering Construction
Source Code :	G06 - Painting and coating (manufacturing, building, or maintenance)
Form Code :	W209 - Paint, ink, lacquer, or varnish (fluid - not dried out or sludge)
Management Method :	H061 - Fuel blending prior to energy recovery at another site (waste generated either on-site or received from off-site)
Generation Tons :	0.0041251
Managed Tons :	0
Shipped Tons :	0.0041251
Received Tons :	0
Receiver ID :	ARD981057870
Receiver State :	AR
Shipper ID :	CAL000205280
Shipper State :	CA
Waste Minimization :	B - Cont. initiative to recycle waste on- or off-site
Waste Code List :	D001
Waste Code Group :	D001 - IGNITABLE WASTE
Waste Generation Type :	N/R

Report Cycle :	2015
Hazardous Waste Page Number :	2
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	PAINT DEBRIS (BARIUM, BRUSHES)
Primary NAICS :	23799 - Other Heavy and Civil Engineering Construction
Source Code :	G25 - Hazardous waste management - indicate management method (for residuals from regulated hazardous waste processes - enter the related H code)
Form Code :	W406 - Dried paint (paint chips, filters, air filters, other)
Management Method :	H132 - Landfill or surface impoundment that will be closed as landfill (to include prior treatment and/or stabilization)
Generation Tons :	0.15
Managed Tons :	0
Shipped Tons :	0.15
Received Tons :	0

Waste Minimization :	X - No waste minimization efforts were implemented for this waste
Waste Code List :	D001, D002
Waste Code Group :	ICR - D001-D003 combinations only
Waste Generation Type :	N/R
Report Cycle :	2015
Hazardous Waste Page Number :	6
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	MINERAL SPIRITS
Primary NAICS :	23799 - Other Heavy and Civil Engineering Construction
Source Code :	G11 - Discarding off-specification, out-of-date, and/or unused chemicals or products
Form Code :	W001 - Lab packs from any source not containing acute hazardous waste
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.
Generation Tons :	0.09
Managed Tons :	0
Shipped Tons :	0.09
Received Tons :	0

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :	All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2003: 221 - Waste oil and mixed oil, 1.938 tons to CAD099452708
2000: 352 - Other organic solids, 3.7 tons to CAT080033681
2000: 221 - Waste oil and mixed oil, 7.41 tons to CAD099452708
2000: 261 - Polychlorinated biphenyls and material containing PCBs, 0.221 tons to AZD983473539
2000: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.5445 tons to CAD008302903
2000: 261 - Polychlorinated biphenyls and material containing PCBs, 0.6061 tons to AZD983473539
2000: 343 - Unspecified organic liquid mixture, 0.187 tons to CAD099452708
2000: 223 - Unspecified oil-containing waste, 6.255 tons to CAD028409019
1999: 223 - Unspecified oil-containing waste, 0.5875 tons to CAD982444481
1999: 223 - Unspecified oil-containing waste, 0.075 tons to CAD028409019
1999: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.165 tons to CAD008302903
1999: 221 - Waste oil and mixed oil, 0.418 tons to CAD099452708
1999: 223 - Unspecified oil-containing waste, 7.506 tons to CAD028409019
1999: N/R - Blank or unknown, 7.7145 tons to CAD028409019
1999: 352 - Other organic solids, 2.215 tons to CAT080033681

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle :	2007
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	CONTAMINATED SOIL
Primary NAICS :	321114 - Wood Preservation
Source Code :	G32 - Cleanup of spill residues (infrequent, not routine)
Form Code :	W301 - Contaminated soil (usually from spill clean up, demolition, or remediation); see also W512
Management Method :	H132 - Landfill or surface impoundment that will be closed as landfill (to include prior treatment and/or stabilization)
Generation Tons :	19.4
Managed Tons :	0
Shipped Tons :	19.4
Received Tons :	0
Receiver ID :	NVT330010000
Receiver State :	NV
Shipper ID :	CAD008480204

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Hazardous Waste Summary

Waste Code / Name :

F032 - WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

Waste Activity Monitoring

Report Cycle :	2019
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	TOXIC HAZARDOUS WASTE, SOLID, FILTER CAKE GENERATED FROM WASTEWATER TREATMENT SLUDGE, CONTAINS CYANIDE
Primary NAICS :	332813 - Electroplating, Plating, Polishing, Anodizing, and Coloring
Source Code :	G23 - Wastewater treatment (sludge, filter cake, etc., including wastes from treatment before discharge by NPDES or POTW or by UIC disposal)
Form Code :	W506 - Cyanide-bearing sludges (not contaminated soils - W512)
Management Method :	H132 - Landfill or surface impoundment that will be closed as landfill (to include prior treatment and/or stabilization)
Generation Tons :	1.25
Managed Tons :	0
Shipped Tons :	1.25
Received Tons :	0
Receiver ID :	NVT330010000
Receiver State :	NV
Shipper ID :	CAR000197533
Shipper State :	CA
Waste Minimization :	A - Cont. initiative to reduce qty and/or toxicity
Waste Code List :	F006
Waste Code Group :	F006 - WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLA
Waste Generation Type :	N/R
Report Cycle :	2019
Hazardous Waste Page Number :	2
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	TOXIC HAZARDOUS WASTE, SOLID, CONTAMINATED PAINT FILTERS GENERATED FROM PAINT BOOTH, CONTAINS ACETONE AND CHROMIUM
Primary NAICS :	332813 - Electroplating, Plating, Polishing, Anodizing, and Coloring
Source Code :	G06 - Painting and coating (manufacturing, building, or maintenance)
Form Code :	W406 - Dried paint (paint chips, filters, air filters, other)

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
CEDRI is the EPA Compliance and Emissions Data Reporting Interface and combines data about emissions source tests, continuous emissions monitoring, and compliance and emissions reports.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
OSHA-OIS

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2011: 181 - Other inorganic solid waste, 0.025 tons to AZR000501510
2011: 214 - Unspecified solvent mixture, 0.198 tons to ARD981057870
2011: 181 - Other inorganic solid waste, 0.6 tons to NVT330010000
2010: 352 - Other organic solids, 0.045 tons to NVT330010000
2010: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.4 tons to ARD981057870
2010: 181 - Other inorganic solid waste, 3.475 tons to NVT330010000
2009: 352 - Other organic solids, 0.025 tons to NVT330010000
2009: 181 - Other inorganic solid waste, 2.95 tons to NVT330010000
2009: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.513 tons to ARD981057870
2008: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.165 tons to ARD981057870
2008: 352 - Other organic solids, 0.2 tons to NVT330010000
2008: 181 - Other inorganic solid waste, 8.7435 tons to NVT330010000
2007: 343 - Unspecified organic liquid mixture, 0.17 tons to CAD980884183
2007: 181 - Other inorganic solid waste, 6.535 tons to NVT330010000
2006: 181 - Other inorganic solid waste, 2.434 tons to NVT330010000
2006: 181 - Other inorganic solid waste, 1.3 tons to NVT330010000
2005: 181 - Other inorganic solid waste, 2.61 tons to NVT330010000
2005: 181 - Other inorganic solid waste, 4.5 tons to NVT330010000
2004: 181 - Other inorganic solid waste, 6 tons to NVT330010000
2004: 181 - Other inorganic solid waste, 6.75 tons to NVT330010000
2004: 181 - Other inorganic solid waste, 2 tons to NVT330010000
2003: 181 - Other inorganic solid waste, 7.5 tons to NVT330010000
2003: 181 - Other inorganic solid waste, 6.25 tons to NVT330010000
2003: 791 - Liquids with pH <= 2, 20.016 tons to CAD008488025
2002: 181 - Other inorganic solid waste, 3.75 tons to NVT330010000
2002: 181 - Other inorganic solid waste, 1 tons to NVT330010000
2001: 181 - Other inorganic solid waste, 1 tons to NVT330010000

Source Description

Source Description :

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

The EGRID contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.
The Energy Information Administration (EIA) is an independent agency within U.S. Department of Energy that develops surveys, collects energy data, and analyzes and models energy issues. The EIA-860 database supports the annual electric generator report and contains electric utility and non-utility (including independent power producers, combined heat and power producers, and other industrials) generator-specific plant data, including county and state location and ownership information.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Waste Activity Monitoring

Report Cycle :	2009
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	RESIDUAL FUNGICIDE (VANCIDE) RESULTING FROM FACILTY CLEANUP ACTIVITIES IN 2008
Primary NAICS :	32742 - Gypsum Product Manufacturing
Source Code :	G13 - Cleaning out process equipment (periodic sludge or residual removal from enclosed processes including internal scrubbing or cleaning)
Form Code :	W219 - Other organic liquid (specify in comments)
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.
Generation Tons :	0.3909508
Managed Tons :	0
Shipped Tons :	0.3909508
Received Tons :	0
Receiver ID :	CAD980884183

Source Description :	AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
Source Description :	ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring. The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description
Source Description : The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description : ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

The RFS Program encourages the blending of renewable fuels into our nation's motor vehicle fuel by establishing annual renewable fuel standards, responsibilities of refiners and other fuel producers, a trading system and other compliance mechanisms, and recordkeeping and reporting requirements. In addition to the rule, EPA has published a Regulatory Impact Analysis (RIA), which contains analyses of the economic and environmental impacts of the expanded use of renewable fuels under this program. A renewable fuel is defined as a motor vehicle fuel that is produced from plant or animal products or wastes, as opposed to fossil fuel sources. Renewable fuels include ethanol, biodiesel and other motor vehicle fuels made from renewable sources. Currently, FRS only includes facilities using ethanol fuels from the RFS registered facility list.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

In accordance with the federal Clean Air Act (CAA), EPA establishes fuel quality standards to help protect public health and the environment from harmful gas and particulate matter emissions from motor vehicles and engines. The Office of Transportation and Air Quality (OTAQ) has developed the registration and DC fuels online applications, implemented through EPA's Central Data Exchange (CDX), which provides online applications to assist the fuel manufacturing community with registration and compliance with reporting requirements.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Description :

****POTENTIAL RELEASE**** BP pressures up their pipelines before they flow product in them. A pumping movement went to a blocked in valve and they had a pressure spike. BP immediately shut down the pipeline, Line #71 which originates at the BP refinery in Carson and terminates at Marine Terminal 2 in Long Beach. BP has walked the line from start to finish and have found no leaks. BP performed an integrity test before restarting and the line did not hold the pressure. Decant oil was sent out and the flow was reversed back to the refinery to keep the product from becoming solid. The inventory check is a pretty good match (meaning the same amout came back as was sent out). BP is performing one more integrity check tonight. If the pressure does not hold BP will survey the line in the morning. BP will recontact OES with updates as needed.

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Violation Date :	2019-04-18
Citation :	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Description :	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Notes :	Returned to compliance on 04/25/2019. OBSERVATION: One 55-gallon drum containing hazardous waste used antifreeze located inside the maintenance shop was observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Citation : 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Description : Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Notes : Returned to compliance on 04/29/2019. OBSERVATION: Uniform Hazardous Waste Manifests for used oils, used antifreeze, and used and drained oil filters were not available on site for review during the inspection. CORRECTIVE ACTION: Locate a copy of all manifests for used oils, used antifreeze, and used and drained oil filters and submit copies to the CUPA.

Division : Los Angeles County Fire Department
Program : HW
Source : CERS

Violation Date : 2019-04-18

Citation : HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple

Description : Hazardous Waste Generator Program - Release/Leaks/Spills - General

Notes : Returned to compliance on 04/25/2019. Clean-up all releases/leaks/spills immediately. Observed minor oil spills and used absorbent left on the floor inside the maintenance shop. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the area listed above has been properly cleaned .

Violation Date : 2019-04-18

Citation : HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22

Description : Failure to properly manage used oil and/or fuel filters in accordance with the requirements.

Notes : Returned to compliance on 04/25/2019. OBSERVATION: 4 used oil filters located inside the maintenance shop were stored on the floor without a lid, label, and an accumulation start date. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.

Violation Date : 2019-04-18

Citation : 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Description : Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Notes :

Returned to compliance on 04/29/2019. OBSERVATION: The following containers of hazardous waste were observed with incomplete or no hazardous waste (HW) labels: - 1 x 55-gallon drum containing HW used antifreeze was observed open and without a proper HW label; - 1 x 55-gallon drum containing HW used oil was observed with an incomplete HW label; CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.

Source Description

Source Description :

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Source Description

Source Description :

The TX-TCEQ ACR is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Comments :

DTSC did not provide oversight of activity. DTSC did not review or approve report and conclusion. This Indoor Air Sampling and Analysis Report dated Jan. 22, 2009 is used for background information. This was performed on the Original BBP Main Site. It is now the Main Active Transfer Station-Allied Waste. This Indoor Air Sampling and Analysis Report dated Jan. 22, 2009 was required to be performed by the present land owner BFI who sold the property as part of the Real Estate Transaction-Phase I requirements to the new land owners.

Comments :

In a letter, dated August 2, 2006, DTSC determined that the primary activities of the Removal Action Workplan have been completed and that operation and maintenance activities pertaining to the asphalt and concrete paved areas are to be implemented. This removal action was an interim action in which portions of the Site were paved with asphalt and concrete to minimize potential risks to Site workers that could occur due to direct exposure to soil where chemical impacts are present.

Comments :

In a letter, dated March 22, 2005, the Final Removal Action Workplan (RAW), dated March 11, 2005, was approved. The RAW presents an interim action to cap approximately 127,700 square feet of unpaved areas with asphalt and concrete. This interim action will minimize potential exposure to contaminated soil. To prevent further delays to implement this removal action, DTSC approved a modification to the RAW to place asphalt on the RAW-proposed concrete portion in the same construction manner as proposed for other asphalt areas in a letter, dated January 27, 2006. DTSC determined that implementation of this modification does not significantly change the scope, performance, or cost of this interim action. On April 10, 2006, BKK proposed a different modification to the RAW; and DTSC conditionally accepted this latest proposal to modify the RAW in a letter, dated April 12, 2006. Basically, the proposal is to pave a specific area of the Site with concrete instead of asphalt. This modification does not significantly change the scope, performance, or cost of this interim action.

Document Type : Preliminary Assessment Report

Comments :

Preliminary Assessment Done (RCRA 3012): Basin By-Products is a subsidiary of Chancellor & Ogden. The site is surrounded by small businesses and industries. One of three sites in the vicinity was studied in a 1982 U.S.EPA FIT report. It is recommended that the FIT report be reviewed (project #68-01-6056-1). Site operations consist of liquid waste disposal including petroleum refining. Preliminary Assessment submitted to U.S. EPA.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violations

Violation Date :	2018-03-28
Citation :	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Description :	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Notes :

Returned to compliance on 06/11/2018. OBSERVATION: The business failed to complete and/or submit chemical inventory forms for all reportable hazardous materials on site. CORRECTIVE ACTION: Complete the chemical inventory forms for all reportable hazardous materials on site and submit a copy to the CUPA. You must update the Hazardous Materials Inventory in CERS to include the following: -NOS gas (Nitrogen / Propane) -Waste Gasoline Contaminated Solids -Fire Suppression AFFF Liquids

Division :	Long Beach Environmental Heath

Waste Activity Monitoring

Report Cycle :	2013
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	WASTE FLAMMABLE SOLID, ORGANIC, NOS, TANK FLOATING ROOF SEALS
Primary NAICS :	42471 - Petroleum Bulk Stations and Terminals
Source Code :	G19 - Other one-time or intermittent processes (specify in comments)
Form Code :	W409 - Other organic solids (specify in comments)
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.
Generation Tons :	1.4
Managed Tons :	0
Shipped Tons :	1.4
Received Tons :	0
Receiver ID :	CAD028409019
Receiver State :	CA
Shipper ID :	CAD040954521
Shipper State :	CA
Waste Minimization :	X - No waste minimization efforts were implemented for this waste
Waste Code List :	D001, D018

Incident Information

Incident Date Time :	2021-05-15 15:21:00
Type of Incident :	FIXED
Incident Cause :	EQUIPMENT FAILURE
Incident DTG :	OCCURRED
Incident Location :	N/R
Sequence Number :	1305152
Potential Flag :	N
Description of Incident :	THE CALLER STATES AND UNKNOWN AMOUNT OF OIL AND WATER MIXTURE IS LEAKING FROM THE FACILITY. THE MATERIAL HAS IMPACTED A STORM DRAIN THAT LEADS TO THE PACIFIC OCEAN.
Last Date in Agency List :	2021-08-07

Incident Response Summary

Date Time Received :	2021-05-15 18:37:00
Date Time Completed :	2021-05-15 18:43:00
Call Type :	Incident
Source :	TELEPHONE

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

In accordance with the federal Clean Air Act (CAA), EPA establishes fuel quality standards to help protect public health and the environment from harmful gas and particulate matter emissions from motor vehicles and engines. The Office of Transportation and Air Quality (OTAQ) has developed the registration and DC fuels online applications, implemented through EPA's Central Data Exchange (CDX), which provides online applications to assist the fuel manufacturing community with registration and compliance with reporting requirements.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Site History :

The site was used as the MTA Bus Division 12 facility. The site included several gasoline and diesel USTs, and associated product piping and dispensers. The site has been mainly impacted with TPH and MTBE. Soil matrix concentrations are up to 75.7 mg/kg of TPH as gasoline, 133,000 mg/kg of TPH as diesel, 27,000 mg/kg of TPH as heavy hydrocarbons. Groundwater contaminant concentrations are up to 2,300 µg/L of TPH as gasoline and 2,300 µg/L of MTBE. Depth to groundwater is approximately 12 feet bgs. Human Health Risk Assessment was submitted to OEHHA which suggested obtaining soil vapor samples for estimating vapor intrusion risk and hazard instead of groundwater concentrations.

RB Case Number :	1256
Potential Media Affected :	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern :	Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violations

Violation Date : 2020-08-20

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to promptly correct visible discharges and promptly remove any accumulations of oil in diked areas.

Notes : Returned to compliance on 09/03/2020. Identification of oil leak at Area 2 is identified on the inspection redords but there is no follow up. Please provide an update with resolution and photos of area been cleaned up.

Division : Los Angeles City Fire Department
Program : APSA
Source : CERS

Violation Date : 2020-05-21

Citation : 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)

Description : Failure to have an approved UST Monitoring Plan.

Map Id: BT337

AST - CA ***(cont.)***

Notes :

Returned to compliance on 05/21/2020. OBSERVATION: Tank Monitoring Plan Under Dispenser Containment (UDC) Monitoring in CERS indicates "NO" to "UDC Leak Alarm Triggers Automatic Pump Shutdown" AND "NO" to "Failure/Disconnection of UDC Monitoring System Triggers Automatic Pump Shutdown CORRECTIVE ACTION: Update Tank Monitoring Plan in CERS to indicate "YES" to "UDC Leak Alarm Triggers Automatic Pump Shutdown" AND "YES" to "Failure/Disconnection of UDC Monitoring System Triggers Automatic Pump Shutdown. Emailed Environmental Specialist Laura Markman to request CERS update. Reviewed updated 05/21/2020 UST Submittal later same date and confirmed corrections were completed. CORRECTED ON SITE.

Division : Los Angeles City Fire Department
Program : UST
Source : CERS

Violation Date : 2020-05-21

Citation : HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Description :

"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Notes :

Returned to compliance on 05/21/2020. OBSERVATION: Approximately 1/2 gallon of Diesel was observed in the Diesel Spill Bucket Container preventing the container from meeting the requirement to hold a minimum capacity of five gallons. CORRECTIVE ACTION: Diesel was removed from Bucket by Andre Grenier with CE Thomas. Make haz Waste Determination and handle liquid accordingly. Ensure Spill Container is maintained to hold a minimum capacity of five gallons. CORRECTED ON SITE.

Violation Date :	2015-06-17
Citation :	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Description :	Failure to properly close hazardous waste containers when not in active use.
Notes :	Returned to compliance on 06/17/2015. OBSERVATION: All hazardous waste containers shall be closed at all times except when adding or removing waste. Observed one container of used antifreeze with an open bung. Operator corrected on site. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
EPS
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
The RMP database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name :
133 - Aqueous solution with 10% or more total organic residues
134 - Aqueous solution with <10% total organic residues
135 - Unspecified aqueous solution
151 - Asbestos-containing waste
181 - Other inorganic solid waste
212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
221 - Waste oil and mixed oil
222 - Oil/water separation sludge
223 - Unspecified oil-containing waste
331 - Off-specification, aged, or surplus organics

Violation Date :	2017-10-30
Citation :	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Description :	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Citation :	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Description :	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Notes :	Returned to compliance on 12/05/2017. OBSERVATION: Uniform Hazardous Waste Manifests for used oils, absorbents, antifreeze, and oil filters were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for used oils, absorbents, and oil filters and submit copies to the CUPA.

Description :

Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Notes :

Returned to compliance on 12/08/2017. OBSERVATION: Observed multiple empty 55-gallon drums (9) located throughout the maintenance shop and yard all without a proper empty label. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Description :

Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Notes :

Returned to compliance on 12/08/2017. OBSERVATION: Observed multiple empty 55-gallon drums (9) located throughout the maintenance shop and yard all without a proper empty label. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Site Details

Status Date :	2010-03-26
Status :	Open - Assessment & Interim Remedial Action
Begin Date :	2002-01-01
Global ID :	SL0603741780
Region :	REGION 4

Site History :

The site was occupied from 1972 to 2002 by several automobile storage and wrecking facilities, and is currently vacant. Initial site investigations started in 2002, and as a result several excavations were conducted to remove soil impacted with total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), lead, and chromium. Groundwater investigations have been conducted since 2005. Groundwater is impacted with TPH and VOCs. Limited free product is present in shallow wells at approximately 7 feet below ground surface, and is removed on a monthly basis. In 2019, the Regional Board approved a workplan for a pilot test for injection of carbon substrates and bioaugmentation. On July 9, 2019, General Waste Discharge Requirements (WDR) were issued for the site. Injection activities are scheduled in 2020.

RB Case Number :	0747C4
Potential Media Affected :	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern :	Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride, Other Petroleum

Violations

Violation Date : 2018-09-18

Citation : 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Description : Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Notes : Returned to compliance on 09/26/2018. PROVIDE MISSING HAZARDOUS LABELS ON THE DRUMS. CORRECTED IT ON SITE.

Division : Long Beach Environmental Heath
Program : HW
Source : CERS

Violation Date : 2018-06-28

Citation : HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Description :

Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Notes :

Returned to compliance on 08/20/2018. OBSERVATION: OBSERVED REPORTABLE QUANTITIES OF HAZARDOUS MATERIALS THAT WERE NOT REPORTED IN FACILITY'S MOST RECENT HAZARDOUS MATERIALS INVENTORY SUBMITTAL IN CERS. (LAST SUBMITTAL WAS 04/23/18) OBSERVED THE FOLLOWING: ONE 1900 GALLON ABOVEGROUND VERTICAL TANK OF FIRE FIGHTING AGENT (ANSUL PROTEIN) AND ONE - 55 GALLON POLY-CONTAINER OF SULFURIC ACID (CORROSIVE) (PL-135). MATERIALS HAVE BEEN ON-SITE GREATER THAN 30 DAYS. CORRECTIVE ACTION: WITHIN 30 DAYS, UPDATE YOUR CHEMICAL INVENTORY IN THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) TO REFLECT THE OBSERVED CHEMICALS.

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to ensure that containment systems of diked areas in all bulk storage tank installations are either: 1. Sufficiently impervious to contain discharged oil until cleaned up. OR 2. Any discharge to a drainage trench system will be safely confined in a facility catchment basin or holding pond until cleaned up.

Notes :

Returned to compliance on 07/26/2018. OBSERVATION: THE CONCRETE DIKE WALL ON THE EAST SIDE OF THE FACILITY ADJACENT TO TANK 67011 AND TANK 43015 HAS CRACKS IN THE SEAM SEALING AREA. PHOTOS OF THE OBSERVED CRACKING OF THE SEAM SEALANT WERE TAKEN. PHOTOGRAPHS ARE PROVIDE WITH THIS REPORT TO THE FACILITY AS AN ATTACHMENT. NOTE: FACILITY'S MONTHLY INSPECTION REPORT DATED 06/26/18 STATED THAT THERE WERE NO DAMAGES TO THE CONCRETE DIKE, HOWEVER, LBFD OBSERVATION OF 06/28/18 OBSERVED CRACKS IN THE WALL AS STATED ABOVE. CORRECTIVE ACTION: Maintain/Install containment systems, including walls and floors to be sufficiently impervious to contain oil. PROVIDE PROOF OF CORRECTIVE ACTION TO THE CUPA WITHIN 30 DAYS.

Waste Activity Monitoring

Report Cycle :	2007
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	HAZARDOUS WASTE, SOLID, N.O.S. (BENZENE), 9, NA3077, PG III (CARBON BENZENE)
Primary NAICS :	42471 - Petroleum Bulk Stations and Terminals
Source Code :	G23 - Wastewater treatment (sludge, filter cake, etc., including wastes from treatment before discharge by NPDES or POTW or by UIC disposal)
Form Code :	W310 - Filters, solid adsorbents, ion exchange resins and spent carbon (usually from production, intermittent processes, or remediation)
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.

Pipeline 3 :	No
Vessel 3 (300 Tons) :	No

Description :

RP states, During loading operations of a tanker, the truck driver disconnected the dry-lock and an internal valve failed to close which caused the release of 60-70 gallons of crude oil. The truck driver manually closed the valve to stop the release. No waterways or storm drains were impacted. Secondary containment captured all of the release. Cleanup of the release has been completed by the reporting party.

Source Description

Source Description :	All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
Source Description :	ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

FRS ***(cont.)***

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description :

In accordance with the federal Clean Air Act (CAA), EPA establishes fuel quality standards to help protect public health and the environment from harmful gas and particulate matter emissions from motor vehicles and engines. The Office of Transportation and Air Quality (OTAQ) has developed the registration and DC fuels online applications, implemented through EPA's Central Data Exchange (CDX), which provides online applications to assist the fuel manufacturing community with registration and compliance with reporting requirements.

Hazardous Waste Summary

Waste Code / Name :	223 - Unspecified oil-containing waste 241 - Tank bottom waste 352 - Other organic solids
Waste Code / Name :	F038 - PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING. K048 - DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY. K050 - HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY. K051 - API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code / Name :

F037 - PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 07/09/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 10/05/2021

RCRA_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 07/09/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 10/05/2021

STATE, TRIBAL, AND FEDERAL REGISTERED STORAGE TANK LISTS

AST PBS: Bulk petroleum terminals with a total bulk storage capacity of 50,000 barrels or more.

Agency Version Date: 08/31/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/26/2021
Agency: Department of Homeland Security
Agency Contact: 202-853-5361
Most Recent Contact: 08/31/2021

EPA UST: Facilities listed in the EPA UST Finder database

Agency Version Date: 08/23/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/19/2021
Agency: EPA
Agency Contact: (202) 566-1667
Most Recent Contact: 08/23/2021

FEMA UST: FEMA underground storage tank listing

Agency Version Date: 04/16/2021
Agency Update Frequency: Varies
Planned Next Contact: 01/04/2022
Agency: FEMA
Agency Contact: 202-212-5283
Most Recent Contact: 10/08/2021

AST - CA: Listing of tank facilities that are subject to the California Aboveground Petroleum Storage Act

Agency Version Date: 04/12/2021
Agency Update Frequency: No update
Planned Next Contact: 12/29/2021
Agency: California Environmental Protection Agency Unified Program Section
Agency Contact: 916-327-5092
Most Recent Contact: 10/04/2021

FID UST - CA: The State Water Resource Control Board's Facility Inventory Database underground storage tank locations listing

Agency Version Date: 09/17/2021
Agency Update Frequency: Varies
Planned Next Contact: 12/14/2021
Agency: California Environmental Protection Agency
Agency Contact: 916-341-5791
Most Recent Contact: 09/17/2021

HIST AST - CA: Historical listing of tank facilities that are subject to the California Aboveground Petroleum Storage Act

Agency Version Date: 07/19/2019
Agency Update Frequency: Quarterly
Planned Next Contact: 10/19/2021
Agency: California Environmental Protection Agency Unified Program Section
Agency Contact: 916-327-5092
Most Recent Contact: 07/23/2021

HIST UST - CA: Historical UST listing

Agency Version Date: 04/02/2021
Agency Update Frequency: Varies
Planned Next Contact: 12/23/2021
Agency: State Water Resources Control Board
Agency Contact: 916-341-5791
Most Recent Contact: 09/24/2021

STATE, TRIBAL, AND FEDERAL REGISTERED STORAGE TANK LISTS (cont.)

UST - CA: Listing of active underground storage tank facilities

Agency Version Date: 09/10/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 12/07/2021
Agency: CA Gov geotracker state water resources control board
Agency Contact: N/R
Most Recent Contact: 09/10/2021

UST_CITY OF LONG BEACH - CA: City of Long Beach underground storage tank sites

Agency Version Date: 06/29/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/12/2021
Agency: City of Long Beach Fire Department
Agency Contact: 562-570-6782
Most Recent Contact: 08/17/2021

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/25/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 08/06/2021

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/29/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 08/06/2021

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 08/06/2021
Agency Update Frequency: Varies
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 08/06/2021

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 07/09/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 10/05/2021

FEDERAL RCRA CORRACTS FACILITIES LIST (cont.)

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 11/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 09/03/2021

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

RCRA_LQG: Resource Conservation and Recovery Act listing of licensed large quantity generators

Agency Version Date: 07/09/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 10/05/2021

RCRA_NONGEN: Resource Conservation and Recovery Act listing of licensed non-generators

Agency Version Date: 07/09/2021
Agency Update Frequency: Varies
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 10/05/2021

RCRA_SQG: Resource Conservation and Recovery Act listing of licensed small quantity generators

Agency Version Date: 07/09/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 10/05/2021

FEDERAL RCRA GENERATORS LIST (cont.)

RCRA_VSQG: Resource Conservation and Recovery Act listing of licensed very small quantity generators.

Agency Version Date: 07/09/2021
Agency Update Frequency: Varies
Planned Next Contact: 12/30/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 10/05/2021

FEDERAL NPL SITE LIST

NPL: List of priority contaminated sites among identified releases or threatened releases of hazardous substances pollutants or contaminants nationally

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

NPL EPA R1 GIS: Geospatial data for the Environmental Protection Agency Region 1 National Priority List subject to environmental regulation

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-2132
Most Recent Contact: 08/06/2021

NPL EPA R3 GIS: Geospatial data for the Environmental Protection Agency Region 3 National Priority List subject to environmental regulation

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-2132
Most Recent Contact: 08/06/2021

NPL EPA R6 GIS: Geospatial data for the Environmental Protection Agency Region 6 National Priority List subject to environmental regulation

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-2132
Most Recent Contact: 08/06/2021

NPL EPA R8 GIS: Geospatial data for the Environmental Protection Agency Region 8 National Priority List subject to environmental regulation

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-2132
Most Recent Contact: 08/06/2021

NPL EPA R9 GIS: Geospatial data for the Environmental Protection Agency Region 9 National Priority List subject to environmental regulation

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-2132
Most Recent Contact: 08/06/2021

PART NPL: Sites that are a part of an National Priority List site referred to as the parent site

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

FEDERAL NPL SITE LIST (cont.)

PROPOSED NPL: Sites that have been proposed for the National Priority List

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

SEMS_FINAL NPL: All Included National Priority List Sites

Agency Version Date: 08/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

Most Recent Revision:	2015

GEOHYDROLOGY DATA:

SUBJECT PROPERTY TOPOGRAPHY:

Topographic Gradient: South

DFIRM FLOOD ZONE:

	DFIRM Flood
Subject Property County:	Electronic Data:
LOS ANGELES	Yes - refer to the PROPERTY PROXIMITY MAP and AREA MAP
Flood Plain Panel at Subject Property:	06037C1962F (Eff. date 9/26/2008)
Additional Panels in search area:	06037C1961G (Eff. date 4/21/2021) 06037C1964F (Eff. date 9/26/2008) 06037C1963G (Eff. date 4/21/2021) 06037C1964G (Eff. date 4/21/2021)

FEMA FLOOD ZONE:

	FEMA Flood
Subject Property County:	Electronic Data:
LOS ANGELES	Yes - refer to the PROPERTY PROXIMITY MAP and AREA MAP
Flood Plain Panel at Subject Property:	0601360010B
Additional Panels in search area:	0601360020B 0601370108D 0601370105C

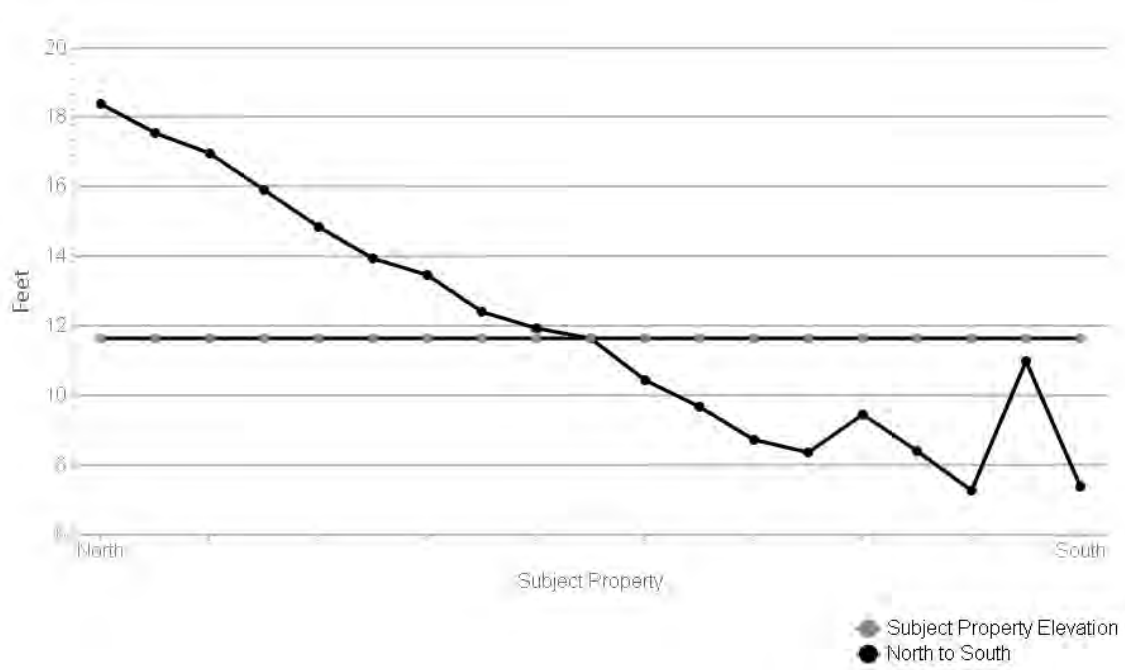
NATIONAL WETLAND INVENTORY:

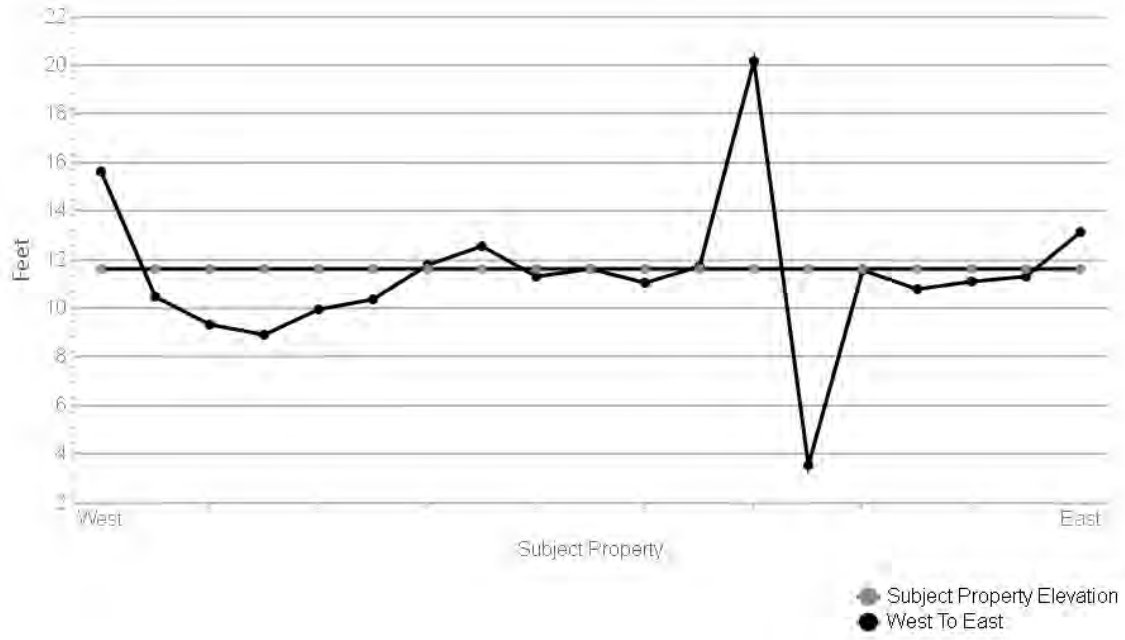
	NWI Electronic
NWI Quad at Subject Property:	Data Coverage:
Long Beach	Yes - refer to the Geological Findings Map

LITHOSTRATIGRAPHIC INFORMATION:

ROCK STRATIGRAPHIC UNIT:		GEOLOGIC AGE IDENTIFICATION
Era:	Cenozoic	Category: 4 Q Quaternary
System:	Quaternary	
Series:	Quaternary	
Code:	Q	

SURROUNDING ELEVATION PROFILES:





SUBJECT NAME: 1711 Harbor Avenue & 1515 W. 17th Street

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Application for Building Permit

FOR TYPE NO. 5 BUILDING

Cashier's Number	
Fee	2.00
Permit Number	9.4641
Date Received	
Date Issued	2-19-41

To the Department of Engineering of the City of Long Beach:

Application is hereby made to the Department of Engineering of the City of Long Beach, through the office of the Building Inspector, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions which are hereby agreed to by the undersigned applicant and which shall be deemed conditions governing issue the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure thereon described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure thereon described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Long Beach.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

(Use Ink or Indelible Pencil)

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Los Angeles South Coast; 1991-2018
Los Angeles South Central; 1991-2018
Los Angeles South Suburban; 1971-1986
Long Beach, CA; 1927, 1937-1968

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

Harbor Avenue (1937-2018)
17th Street West (1927, 1937-2018)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1914, 1950, 1963

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the “Site Specific HIG Data”) contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2021 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data

assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Los Angeles South Coast; 1991-2018
Los Angeles South Central; 1991-2018
Los Angeles South Suburban; 1971-1986
Long Beach, CA; 1927, 1937-1968

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

Harbor Avenue (1937-2018)
17th Street West (1927, 1937-2018)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1914, 1950, 1963

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the “Site Specific HIG Data”) contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2021 by Historical Information Gatherers, Inc. Research Summary for City Directory Abstract

Site Location
1711 Harbor Avenue & 1515 W. 17th Street
1711 Harbor Avenue
Long Beach, CA

Conducted For
Envirosite Corporation
2 Corporate Drive, Suite 450
Shelton, CT

HIG Project #
2056063
Client Project #
61809
Date Created
10/15/2021

Historical Information Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2018 Haines Los Angeles South Central

2011 Haines Los Angeles South Central

2006 Haines Los Angeles South Central

2001 Haines Los Angeles South Central

1996 Haines Los Angeles South Central

1991 Haines Los Angeles South Central

1986 Haines Los Angeles South Suburban

1981 Haines Los Angeles South Suburban

1976 Haines Los Angeles South Suburban

1971 Haines Los Angeles South Suburban

Abstract Section 1- This section includes the city directory data sorted by address.
