Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 09/19/2017. OBSERVATION: Manifest records show Used Antifreeze had accumulation time greater than 6 months (last disposed Aug 2016). Facility is also generating greater than 1000kg per month, generator status must change. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days. Going forward, the accumulation time limit for hazardous waste (excluding drained used oil filters) is 90 days. 9/19/2017: This violation was created in mistake, as they rarely generate antifreeze waste. While the manifest records may show it has been greater than 6 months since last disposal, they have not generated any since this time. Changing this status to "Not Resolvable."

Site History: In February of 1986 monitor wells were installed at this site following the loss of petroleum products and limited free product was found in some monitoring wells. This work was followed by more soil borings in 1987 and 1988 to assess the magnitude of the release. Six underground storage tanks (USTs) were removed in January 1999 along with 2,000 tons of petroleum impacted soil. In August of 2005, 19 additional soil borings were installed at this site to assess the extent of petroleum impacts. A successful soil vapor extraction (cleanup) test was completed in January of 2008. In October of 2008 Merced County approved a Corrective Action (cleanup) Plan for the site. December of 2008 saw completion of soil gas testing at the site and the identification of soil gas concentrations significantly in excess of health screening levels for respiratory exposure. In December of 2009 over 4,500 tons of impacted soil was removed from the site and work to start long-term soil vapor extraction (cleanup) is also underway. Additional soil gas testing has been approved to assess if existing vapor exposure risks exceed established screening levels under the on-site building (September 2010).

Violation Description: UST Program -General - Must include violation description, proper statute and regulation citation in the "comment" section.

Violation Notes: Returned to compliance on 06/20/2022. OBSERVATION: The owner/operator failed to conduct the overfill prevention equipment inspection by October 13, 2018 and a second inspection by October 31, 2021, per California Code of Regulations Title 23, Division 3, Chapter 16, Section 2637.2 and clarification provided in LG 150-3. The facility is required to have the overfill prevention equipment inspected every 36 months and within 30 days of the date of the completion of a repair. The overfill was performed on June 11, 2020 of the audible/visual alarm, and again on June 9, 2021 of the audible/visual alarm. The site needed to inspect the ball floats, as the single audible/visual alarm does not meet the requirements clarified in LG 150-3. The ball floats were found to not be in proper working order. CORRECTIVE ACTION: AllTech Petro and Gettler-Ryan installed flapper valves for each tank and performed the inspection on June 7, 2022. Within 30 days of this inspection, the results shall be provided to the CUPA. [Truncated]

Feature Description: The U.S. Government acquired 0.14 easement acres by deed on 26 April 1954 and acquired 1.31 fee acres by condemnation on 19 May 1958 for the Castle ILS Outer Marker Annex site. The total acquisition was 1.45 acres. The site was used by the Air Force as an off-base instrument landing facility for Castle Air Force Base (CAFB). The Air Force installed compass locators in support of aircraft landings. A small building may have also been constructed by DOD. The 1.45 acres were transferred by quitclaim deed in September 1976 to William Arnold Williams in exchange for 0.26 fee acres (Tract No. 499) at CAFB. In October 1988, Mr. Williams sold the site property to Mel Maxwell of Maxwell Enterprises, a property development company.

waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
