PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Menifee Assemblage
APNs 330-180-010 and 330-180-046
Menifee, CA 92585

Report Date: August 13, 2021
Partner Project No. 21-330210.1

Prepared for:

Danbe Real Estate Advisors
523 Main Street
El Segundo, California 90245

PARTNER
Engineering and Science, Inc.

August 13, 2021

Mr. Wayne Bush
Danbe Real Estate Advisors
523 Main Street
El Segundo, California 90245

Subject: Phase I Environmental Site Assessment
Menifee Assemblage
APNs 330-180-010 and 330-180-046
Menifee, Ca. 92585
Partner Project No. 21-330210.1

Dear Mr. Bush:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (619) 925-9672.

Sincerely,

DRAFT

Mark Lambson
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Danbe Real Estate Advisors for the property located at APNs 330-180-010 and 330-180-046 in Menifee, Riverside County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Danbe Real Estate Advisors with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of Goetz Road and the west side of Wheat Street within a mixed undeveloped/residential area of Riverside County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	APNs 330-180-010 and 330-180-046 (No assigned address), Menifee, California
Property Use:	Vacant
Land Acreage (Ac):	8.72 Ac
Number of Buildings:	0
Assessor's Parcel Number (APN):	330-180-010 and 330-180-046
Site Assessment Performed By:	G. Rob Loomer of Partner
Site Assessment Conducted On:	July 27, 2021

The subject property is currently unoccupied with no observed or reported onsite operations. The subject property is undeveloped land consisting of a small concrete slab, open soil, and limited debris.

According to available historical sources, the subject property has been undeveloped as early as 1901.

The immediately surrounding properties consist of undeveloped land and residences to the north across unpaved Corsica Lane; undeveloped land to the south; undeveloped land and a residence to the east across unpaved Wheat Street; and a single-family residential development to the west beyond a narrow strip of undeveloped land and across Goetz Road.

According to the Water Resources Data Report for Riverside County, published by the *EMWD* dated 2021, the Subject Property is located within the Mills service area with estimated ground water levels from 40 to 60 feet below ground surface. According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the north.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of APNs 330-180-010 and 330-180-046 in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at APNs 330-180-010 and 330-180-046 in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject

property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment, or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Danbe Real Estate Advisors engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Danbe Real Estate Advisors. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any

course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at APNs 330-180-010 and 330-180-046 in Menifee, California, is located on the east side of Goetz Road and the west side of Wheat Street. According to the Riverside County Assessor, the subject property is legally described as Tax Map 330, Block 180 as Parcels 010 and 046, and has been owned by the current owner since at least 2018.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is designated for Economic Development Corridor – Northern Gateway (EDC-NG) by the city of Menifee.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed undeveloped/residential area of Riverside County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Undeveloped land along the west side and residences (25025 and 25151 Wheat Street and 25232 Corsica Way) beyond unpaved Corsica Way along the east side.
South: Undeveloped land.
East: A residence (26420 Wheat Street) beyond unpaved Wheat Street.
West: A strip of undeveloped land and Paved Goetz Road beyond which isa single-family residential development.

The adjacent property to the north was identified as a RCRA NonGen site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Romoland, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 1,467 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the north. The subject property is depicted on the 2012 map as undeveloped.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the north. The nearest surface water in the vicinity of the subject

property is the San Joaquin River channel located approximately 1.0 mile north-northwest of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Eastern Municipal Water District (EMWD) serves the subject property vicinity. The sources of public water for the City of Menifee are surface water from the Colorado River and public wells through the Menifee desalters converting salty groundwater to potable water.

According to the Water Resources Data Report for Riverside County, published by the *EMWD* dated 2021, the Subject Property is located within the Mills service area with estimated ground water levels from 40 to 60 feet below ground surface.

2.4.3 Geology/Soils

The subject property is situated within the northwest margin of a slightly elevated plain termed the east Riverside Mesa and is underlain by 400 to 500 feet of unconsolidated Pleistocene age alluvium composed of coarse gravel, sand, silt and clay. These sediments are derived primarily from the Cretaceous plutonic rocks of the Southern California Batholiths which crop out as the Box Springs Mountains to the east, the La Loma Hills to the north, and the Jurupa Mountains to the west of the subject property.

Based on information obtained from the Riverside County conducted by the United States Department of Agriculture, Soil Conservation Service (1971) has classified the soils beneath the subject property and vicinity as being Hanford coarse sandy loam with estimated slopes between two and nine percent. The Hanford soil series is considered to be a well-drained, coarse sandy loam textured soil with a depth of at least 60 inches. General characteristics of the Hanford soil include moderately rapid permeability and a slightly acid soil reaction. Depth to the seasonal high-water table is greater than five feet.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06065C2055H, dated August 18, 2014, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1901-Present	Aerial Photographs, Interviews, Topographic Maps, City Directories and Onsite Observations	Undeveloped land

The subject property has been undeveloped throughout its researched history. No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) in July 2021. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date: 1938, 1949, 1953, 1961, 1967, 1974, 1978 and 1985 Scale: 1'=500"	
Subject Property:	Undeveloped ungraded land with no visible structures and an unpaved or paved road to the west.
North:	Undeveloped ungraded land with no visible structures.
South:	Undeveloped ungraded land with no visible structures.
East:	Undeveloped ungraded land with no visible structures.
West:	Undeveloped ungraded land with no visible structures beyond road.

Date: 1989, 1994, 1997 and 2002 Scale: 1'=500"	
Subject Property:	Undeveloped ungraded land with no visible structures and a paved road to the west.
North:	Undeveloped ungraded land with no visible structures.
South:	Undeveloped ungraded land with no visible structures.
East:	Developed with a single-family residence beyond an unpaved road.
West:	Undeveloped ungraded land with no visible structures beyond road.

Date: 2006, 2009, 2012 and 2016 Scale: 1'=500"	
Subject Property:	Undeveloped ungraded land with no visible structures besides a small concrete pad near the center of the site and a paved road to the west and an unpaved road to the east.
North:	Undeveloped land and residences beyond an unpaved road.
South:	Undeveloped graded land with no visible structures.
East:	Developed with a single-family residence beyond an unpaved road.
West:	Developed with a single-family residential development beyond road.

Copies of aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) in July 2021. Sanborn map coverage was not available for the subject property.

A copy of the "No Coverage" document is included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) in July 2021 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for APNs 330-180-010 and 330-180-046 (Subject Property)

Year(s)	Occupant Listed
1971-2019	No listings of any addresses that could be associated with the subject property

Based on the city directory review, no environmentally sensitive listings were identified for the subject property.

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1971-2017	No listings of any adjacent addresses

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) in July 2021. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1901, 1942, 1943, 1947, 1953, 1973, 1979 and 2012

Subject Property:	Undeveloped land
North:	Undeveloped
South:	Undeveloped
East:	Undeveloped
West:	Undeveloped beyond road

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	On-line database
Agency Address:	www.dtsc.ca.gov
Agency Phone Number:	NA
Date of Contact:	July 27, 2021
Method of Communication:	On-line
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC database.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	Riverside County Environmental Health Department (RCEHD)
Point of Contact:	Ms. Suzanne Cauffiel
Agency Phone Number:	(951) 358-5055
Date of Contact:	July 27, 2021
Method of Communication:	Telephone
Summary of Communication:	This department has file information relating to USTs and hazardous materials and wastes dating back to as far as 1986. According to RCEHD representative Ms. Suzanne Cauffiel, a charge of $79 per unique site address is charged to research for environmental records and that the processing time can take between two to four weeks. This municipality no longer allows public access to municipal files for research purposes, and files or documents are not *readily available* or *reasonably ascertainable* without these excessive fees or charges, which is beyond the scope of this *Report*. Due to the absence of addresses, no records are researchable.

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	Riverside County Fire Prevention (RCFP)
Point of Contact:	Mr. Walter Brandes
Agency Address:	210 W. San Jacinto Avenue, San Jacinto, California
Agency Phone Number:	(951) 940-6900
Date of Contact:	July 27, 2021
Method of Communication:	Telephone

Summary of Communication:	The RCFP files are not reasonably ascertainable for review; however, the Riverside County Environmental Health Department (RCEHD) is the lead agency for USTs and hazmat (see above).

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Air Quality Management District (AQMD)
Agency Address:	AQMD.gov
Agency Phone Number:	NA
Date of Contact:	July 27, 2021
Method of Communication:	On-line
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Agency Address:	http://www.swrcb.ca.gov/rwqcb4/
Agency Phone Number:	NA
Method of Communication:	On-line
Date of Contact:	July 27, 2021
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	Menifee Building Department (MBD)
Point of Contact:	Molly Binnall
Agency Address:	29714 Haun Road, Menifee, California
Agency Phone Number:	(951) 672-6777
Date of Contact:	July 27, 2021
Method of Communication:	In Person
Summary of Communication:	Ms. Binnall indicated that no building permits or certificates of Occupancy were noted for the subject property as no address had yet been assigned.

4.1.7 Planning Department

Regulatory Agency Data

Name of Agency:	Menifee Planning Department (MPD)
Point of Contact:	Russell Brown
Agency Address:	29714 Haun Road, Menifee, California
Agency Phone Number:	(951) 672-6777
Date of Contact:	July 27, 2021
Method of Communication:	In Person
Summary of Communication:	According to records reviewed, the subject property is zoned Economic Development Corridor – Northern Gateway (EDC-NG) by the City of Menifee.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Agency Address:	http://maps.conservation.ca.gov/doms/
Agency Phone Number:	NA
Date of Contact:	July 27, 2021
Method of Communication:	On-line
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Riverside County Assessor (RCA)
Agency Address:	http://www.asrclkrec.com/Assessor/AssessorServices.aspx
Agency Phone Number:	NA
Date of Contact:	July 27, 2021
Method of Communication:	On-line
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Numbers (APNs) 330-180-010 and 046, totaling 8.72 acres, and ownership has been vested in the current owner since at least 2018.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
Federal NPL or Delisted NPL Site	1.00	N	N	N

4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

4.2.3 Adjacent Property Listings

The adjacent property to the north is identified as a RCRA NonGen site in the regulatory database report, as discussed below:

- The property, identified as Norman Carmichael at 25151 Corsica Lane, is located adjacent to the north of the subject property. This site was verified to be a non-generator in 2020. No violations were reported. Based on the type of listing, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Danbe Real Estate Advisors (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
AAI User Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since at least 2018, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a prospective purchaser, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mark Bachli, site contact and developer, provided no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Bachli, the subject property is undeveloped land, but had no knowledge of its history.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	G. Rob Loomer
Site Assessment Conducted On:	July 27, 2021

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for APNs 330-180-010 and 330-180-046 (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Mark Bachli	Developer	(310) 428-3302	No

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

No sanitary discharges were noted on the subject property. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the open soil surfaces towards the public right of ways. The subject property is not currently connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

No heating or cooling systems were noted.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

No domestic wastewater systems were noted. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

Due to the undeveloped nature of use of the subject property, ACMs were not considered within the scope of this assessment.

6.3.2 Lead-Based Paint (LBP)

Due to the undeveloped nature of use of the subject property, LBP was not considered within the scope of this assessment.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 3. Due to the undeveloped nature of use of the subject property, radon was not considered within the scope of this assessment.

6.3.4 Lead in Drinking Water

A public water system is not currently provided to the subject property.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of APNs 330-180-010 and 330-180-046 in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at APNs 330-180-010 and 330-180-046 in Menifee, Riverside County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NATIVE PLANT	***202 ETHANAC***	***NNE 1/4 - 1/2 (0.377 mi.)***	***4***	***18***

Database: LUST REG 8, Date of Government Version: 02/14/2005
Facility Status: Case Closed
Global ID: T0606500254

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
JAMES LABAN	3821 JUNIPER LANE	SSW 1/8 - 1/4 (0.223 mi.)	2	11

Lower Elevation	Address	Direction / Distance	Map ID	Page
NORMAN CARMICHAEL	25151 CORSICA LANE	NE 0 - 1/8 (0.012 mi.)	1	9

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/15/2021

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

North Map:	5641330 PERRIS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

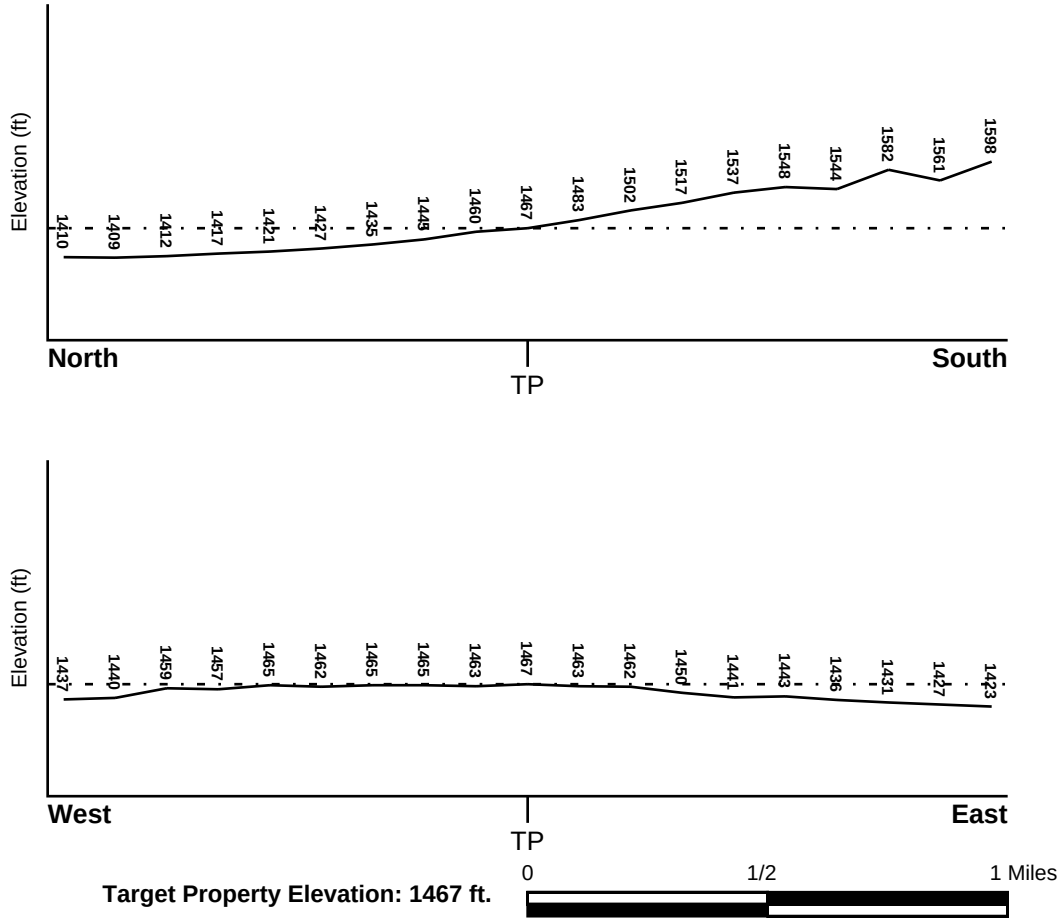

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1467 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C2055H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C1440H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: AULD

Soil Surface Texture: clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	27 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	44 inches	48 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: BUCHENAU

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	7 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
3	44 inches	61 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: CAJALCO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	12 inches	18 inches	loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	18 inches	61 inches	weathered bedrock	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 4

Soil Component Name: LAS POSAS

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D: QUALIFICATIONS/INSURANCE

Education

M.S. and B.S. Petroleum Engineering**,** University of Wyoming, Laramie
A.A. Engineering**,** San Joaquin Delta College, Stockton, California

Registrations

Registered Environmental Property Assessor (REPA)
AHERA Building Inspector

Highlights

Over 25 years performing Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II Subsurface Investigations, Asbestos Surveys, Lead-based Paint Surveys, Radon Studies, Mold Assessments, Lead-in-water sampling and analysis, Property Condition Assessments (PCAs), Small Loan PCAs, Construction Progress Monitoring and Regulatory Compliance Assessments.

Experience Summary

Mr. Loomer has over 30 years of experience in the environmental and engineering industries. He has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats.

- Personally performed more than 5,000 ESAs and PCAs on properties in over 30 states throughout the country.
- Performed multiple Phase II subsurface investigations at environmentally suspect properties to verify the presence and degree of subsurface impact.
- Assisted lenders with Construction Loan Monitoring (CLM) on numerous properties to determine appropriate draw amounts during the construction/renovation processes.
- Monitored and interpreted Measurement While Drilling (MWD) mud pulse telemetry systems. Worked with drillers and directional staff to achieve predetermined targets for both on-shore and offshore gas and oil exploration in the Gulf of Mexico.
- Designed tilt-up buildings and lifting systems to withstand various forces and loads. Duties included management of technical staff and design analysis.

Finally, Mr. Loomer's diversity across residential, industrial, municipal, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the West region of the United States.

Summary of Professional Experience

Ms. Vosovic has more than 14 years of experience in the environmental consulting field and has worked in various disciplines, including environmental due diligence, NEPA compliance, lead-based paint and asbestos assessment, and LUST monitoring and reporting. Ms. Vosovic has performed hundreds of Phase I ESAs. She has also served as senior reviewer for NEPA compliance documents, with thousands of reports reviewed. She has tracked and managed the regulatory compliance for hundreds of microwave sites for a major telecommunications carrier.

Ms. Vosovic is well versed in EPA's All Appropriate Inquiry and ASTM E1527-13. She is knowledgeable in due diligence reporting standards, including Fannie Mae DUS, Freddie Mac, and HUD. Ms. Vosovic has conducted Phase I ESAs on a wide range of properties. Site assessment experience includes agricultural properties, semiconductor manufacturing facilities, fueling and automobile repair facilities, chemical distribution facilities, landfills, oil well fields, telecommunications sites, and shopping centers with dry cleaning facilities. She has scoped projects, mentored field personnel, identified environmental risks, and regularly provides detailed reports within demanding deadlines.

Ms. Vosovic is responsible for conducting all aspects of Phase I Environmental Site Assessments including proposal writing, staffing projects, client liaison, site reconnaissance and record reviews. Ms. Vosovic also provides management and QA/QC review of Phase I ESAs and Transaction Screens, and is focused on providing exemplary client service. Ms. Vosovic is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. Ms. Vosovic displays excellent technical writing and editing skills, attention to detail, and excels at providing concise, logical conclusions and recommendations.

Project experience for Ms. Vosovic includes the following:

- Provided senior review for thousands of NEPA Screening Reports, Environmental Assessments, Section 106 Reports, SHPO consultation packets, NEPA Audit Reports, and

other related documents for various telecommunications industry clients. NEPA Technical Manager for multiple telecommunications industry clients in the western United States. Served as the primary point of contact with multiple state and federal agencies.

- Assisted in subsurface investigations at heavily industrialized and commercially developed properties. Subsurface investigations included the installation of soil borings, characterization of soils, and subsequent sampling of soil and groundwater. Oversaw geophysical surveys.

- Evaluated proposed microwave installations, LTE installations and underlying support structures for compliance with environmental, FAA, and FCC regulations. Tracked and managed over 700 microwave sites in two markets. Worked closely with the client, construction managers, turf vendors, engineers, and RF safety engineers to obtain and track regulatory compliance documentation.

- Managed a database and scheduled quarterly reporting for 45 leaking underground storage tank (LUST) cases under regulatory direction. Prepared Groundwater Monitoring Reports, NPDES Quarterly Reports, Subsurface Investigation Reports, Remediation Work Plans, Sensitive Receptor Surveys, and UST Cleanup Fund submittals. Collected soil and groundwater samples for laboratory analysis.

- Performed regulatory compliance audits for a major telecommunications carrier. Provided solutions and established protocols for ensuring compliance.

- Laboratory Instructor for Introductory Geology and Environmental Science courses at California State University, Chico.

Education

Bachelor of Arts, Public Administration & Economics, San Diego State University

Highlights

Over 20 years of experience in the environmental and engineering consulting industry
Property Condition Assessments (PCAs)
Fannie Mae, Freddie Mac, and HUD due diligence

Experience Summary

Mr. Lambson is a true veteran of the commercial real estate services industry. He has over 20 years of experience managing and performing environmental and engineering consulting projects on a national level. Mr. Lambson serves as a Principal for Partner and is located in Partner's San Diego County office. Mr. Lambson currently provides client management and consulting to a nationwide client base and specializes in advising "equity" clients during the acquisition phase of commercial property transactions in the U.S., Mexico, and Canada.

Mr. Lambson has assisted clients on over 10,000 commercial real estate transactions throughout his career. His due diligence resume includes experience at all levels, and includes advising REITs, developers, property managers, retail companies, commercial real estate brokers, mortgage brokers, attorneys, lenders, universities, and real estate investment groups with the following nationwide services:

- Property Condition Assessments (PCAs)
- Individual Building System Inspections for Roof, Mechanical Electrical Plumbing (MEP), Elevator, Structure, Façade, and ADA/Accessibility
- Phase I Environmental Site Assessments (ESAs)
- Phase II Subsurface Investigations (Soil and groundwater sampling and analysis)
- Phase III Environmental Remediation Services
- Asbestos, Lead, Radon, Mold Sampling
- Seismic and Structural Assessments (PMLs)
- Energy Audits, Benchmarking, AB1103 Energy Disclosure, and LEED-related services
- Hydrology, Water Conservation and Efficiency
- Fannie Mae / Freddie Mac / HUD Due Diligence
- Geotechnical and Soils Reports
- Zoning Reports
- ALTA Surveys

APN 330-180-029
25025 Corsica Lane
Menifee, California 92585
Partner Project No. 21-335922.1

Dear Mr. Bush:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at 619-925-9672 or MLambson@partneresi.com.

Sincerely,

DRAFT

Mark Lambson

Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Danbe Real Estate Advisors for the property located at 25025 Corsica Lane in Menifee, Riverside County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Danbe Real Estate Advisors with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located north of Corsica Lane and west of Wheat Street within a residential area of Riverside County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address(es):	25025 Corsica Lane, Menifee, California
Property Use:	Residential
Land Acreage (Ac):	1.82 Ac
Number of Buildings:	One dwelling; two sheds, and one steel framed garage
Number of Floors:	One
Gross Building Area (SF):	1,782
Date of Construction:	2002
Assessor's Parcel Number (APN):	330180029
Type of Construction:	Metal and wood framed
Current Tenants:	Residential
Site Assessment Performed By:	Jeremy Russell of Partner
Site Assessment Conducted On:	October 4, 2021

The subject property is currently occupied by residential development. Onsite operations consist of one single-story manufactured dwelling, two tool sheds, and one metal frame detached garage. In addition to the current structures, the subject property is also improved with a horse corral, a septic system located on the north side of the dwelling, and a water well located on the southeast corner.

According to available historical sources, the subject property was structurally unimproved as early as 1901; developed for agricultural uses between 1950 and circa 2000; and redeveloped for residential use circa 2002. Tenants on the subject property have included private residents (2002-present).

The immediately surrounding properties consist of undeveloped land and residential properties to the north; Agricultural land to the south across Corsica Lane; residential properties to the east; and agricultural land to the west.

Partner observed one water well located on the southeast corner of the subject property. According to a plate on the well housing, the well depth on July 30, 2018, was 250 feet bgs, and the static water depth was 49 feet bgs.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 25025 Corsica Lane in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property.

Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 25025 Corsica Lane in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in

order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Danbe Real Estate Advisors engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope, and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Danbe Real Estate Advisors. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such

unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was unable to determine the property use at strict 5-year intervals, which constitutes a data gap. Except for recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner submitted Freedom of Information Act (FOIA) requests to the City of Menifee for information pertaining to development records for the subject property. Riverside County Department of Environmental Health was contacted regarding the on-site septic system and well water system As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 25025 Corsica Lane in Menifee, California is located north of Corsica Lane and west of Wheat Street. According to the Riverside County Assessor, the subject property is legally described as

> "*1.82 ACRES NET IN PAR 1 PM 086/031 PM 14619 Subdivision Name PM 14619 Acres 001.82 NET Lot Type Parcel Parcel 1 Rec Map Type Parcel Map Map Plat B 086 Map Plat P 031 Manuf Name GOLDENWEST Year 2002 Serial Number GOCA21L29633A Decal Number 8691651 HCD 364578 Serial Number GOCA21L29633B HCD 364579*".

Ownership was identified on a provided title report as Rivera.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by a residential development. Onsite operations consist of one single-story manufactured dwelling, two tool sheds, and one metal frame detached automobile garage. In addition to the current structures, the subject property is also improved with a horse corral, a septic system located on the north side of the dwelling, and a water well located on the southeast corner.

The subject property is designated zoned Economic Development Corridor - Northern Gateway (EDC-NG) by the City of Menifee.

The subject property was not identified in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Riverside County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties	
North:	Undeveloped land and residential dwellings
South:	Agricultural land
East:	Residential dwelling (25151 Corsica Lane)
West:	Agricultural land

The adjacent property to the east was identified as a RCRA NonGen / NLR site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Romoland, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 1,460 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the northeast. The subject property is depicted on the 1979 map as undeveloped.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the northeast. The nearest surface water in the vicinity of the subject property is the San Jacinto River located approximately two miles northwest of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Eastern Municipal Water District serves the subject property vicinity. The sources of public water for Menifee are surface waters from the State Water Project and groundwater from EMWD wells.

Partner observed one water well located on the southeast corner of the subject property. According to a plate on the well housing, the well depth on July 30, 2018, was 250 feet bgs, and the static water depth was 49 feet bgs.

2.4.3 Geology/Soils

The subject property is situated within the Perris Plain of the northern Peninsular Ranges geomorphic province of the State of California. The uppermost geologic formation underlying the soils at the subject property are late Cenozoic alluvial sedimentary deposits. The deposits comprise the underlying stratigraphy and consists mostly of gravel, sand, silt, and clay deposited in stream channel, point bar, and alluvial fan environments. The deposits are estimated to be over 2000 feet. The Cenozoic deposits unconformably overlie Cretaceous sedimentary rocks or basement rocks.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey database, the subject property is mapped as the Auld clay, 2 to 8 percent slopes. The soil series consists of moderately deep, well drained, clay, loam, overlying weathered bedrock. These soils are on hills.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06065C2055H, effective on 08/18/2014, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1901	Topographic Maps	Structurally unimproved
1938-2004	Aerial Photographs, Topographic Maps	Agricultural and residential
2002-Present	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations	Existing residence

Tenants on the subject property include residential occupants (2002-Present). No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on September 30, 2021. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date: 1938		***Scale: 1"=500'***
Subject Property:	Appeared undeveloped	
North:	Appeared undeveloped	
South:	Appeared undeveloped	
East:	Appeared undeveloped	
West:	Appeared undeveloped	

Date: 1949, 1953		***Scale: 1"=500'***
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1961		***Scale: 1"=500'***
Subject Property:	Appeared developed for agricultural use (dry farming)	
North:	Appeared developed for agricultural use (dry farming)	
South:	Appeared developed for agricultural use (dry farming)	
East:	Appeared developed for agricultural use (dry farming)	
West:	Appeared developed for agricultural use (dry farming)	

Date: 1967, 1974, 1978,1985, 1989		***Scale: 1"=500'***
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1994, 1997	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	No significant changes visible. Developed with what appeared to be a residential property further north.
South:	No significant changes visible
East:	No significant changes visible. Developed with what appeared to be residential properties further east.
West:	No significant changes visible

Date: 2002	***Scale: 1"=500'***
Subject Property:	Small buildings appear on the northwest corner. No other significant changes visible
North:	No significant changes visible
South:	No significant changes visible
East:	Developed with what appeared to be a residential property
West:	No significant changes visible

Date: 2006	***Scale: 1"=500'***
Subject Property:	Developed with what appears to be a residential structure on the south side, and two smaller structures on the east and north sides
North:	Developed with what appeared to be one structure and three or four smaller structures
South:	No significant changes visible
East:	No significant changes visible
West:	No significant changes visible. Developed with what appeared to be residential tract houses further west

Date: 2009	***Scale: 1"=500'***
Subject Property:	Developed with what appeared to be an additional structure adjacent south of the residential structure
North:	No significant changes visible
South:	No significant changes visible
East:	No significant changes visible
West:	No significant changes visible

Date: 2012, 2016	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	No significant changes visible
East:	No significant changes visible
West:	No significant changes visible

Copies of reviewed aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on September 30, 2021. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on October 05, 2021, for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 25025 Corsica Lane (Subject Property)	
Year(s)	**Occupant Listed**
1971, 1976, 1980, 1985, 1990, 1995, 2000, 2005	No listings
2010, 2014, 2017	Kenneth MacPherson

According to the city directory review, the subject property has been occupied by a residential tenant since at least 2010.

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
1971, 1976, 1980, 1985, 1990, 1995, 2000	No listings (25151 Corsica Lane)
2005, 2010, 2014, 2017	Norman Carmichael

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on September 30, 2021. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1901	
Subject Property:	Undeveloped
North:	Undeveloped
South:	Undeveloped
East:	Undeveloped
West:	Undeveloped

Date: 1942, 1943, 1953, 1973, 1979	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Environmental Protection Agency (CalEPA), Department of Public Health
Point of Contact:	Not Provided
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	926 323 2514
Date of Contact:	October 1, 2021
Method of Communication:	Online
Summary of Communication:	The CalEPA manages the following State agencies: *Air Resources Board (ARB), Department of Resources Recycling and Recovery (CalRecycle), Department of Pesticide Regulation (DPR), Department of Toxic Substances Control (DTSC), Office of Environmental Health Hazard Assessment (OEHHA), and the State Water Resources Control Board (SWRCB)*. These agencies are discussed individually, where applicable, in the following sections. The subject property was not identified for records maintained by CalRecycle, for pesticides with the DPR databases or for hazardous substance risk evaluation by the OEHHA.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	Riverside County Environmental Health Department (RCEHD)
Point of Contact:	Not Provided
Agency Address:	4080 Lemon Street, Riverside, California
Agency Phone Number:	(951) 955-8980
Date of Contact:	October 1, 2021
Method of Communication:	Email
Summary of Communication:	The RCEHD is the Certified Unified Program Agency (CUPA) for Riverside County. The RCEHD CUPA is responsible for overseeing the six hazardous materials programs in the County: *Inspecting facilities that handle hazardous materials, generate hazardous waste, treat hazardous waste, own/operate underground storage tanks, own/operate aboveground petroleum storage tanks, or handle other materials subject to the California Accidental Release Program (CalARP)*. Partner also submitted a request for records of the septic system and water well. At the time of this report the RCDEH had not responded to Partner's request.

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	Riverside County Fire Department (RCFD)
Point of Contact:	Not Provided
Agency Address:	210 West San Jacinto Avenue, Menifee, CA
Agency Phone Number:	(760) 940 6900
Date of Contact:	October 1, 2021
Method of Communication:	Telephone
Summary of Communication:	According to the RCFD, no records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RCFD. Such records are maintained by the RCEHD.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	South Coast Air Quality Management District (SCAQMD)
Point of Contact:	N/A
Agency Address:	21865 Copley Drive, Diamond Bar, California
Agency Phone Number:	909 396 2000
Date of Contact:	October 1, 2021
Method of Communication:	http://www3.aqmd.gov/webappl/fim/prog/search.aspx
Summary of Communication:	The subject property was not identified on the SCAQMD database website. No Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines were on file for the subject property with the SCAQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Santa Ana Regional Water Quality Control Board (SARWQCB)
Point of Contact:	N/A
Agency Address:	3737 Main Street, Riverside, California
Agency Phone Number:	909 782 4130
Date of Contact:	October 2, 2021
Method of Communication:	http://geotracker.waterboards.ca.gov/
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the SARWQCB.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	N/A
Agency Address:	5796 Corporate Avenue, Cypress, California
Agency Phone Number:	714 484 5300
Date of Contact:	October 1, 2021
Method of Communication:	http://hwts.dtsc.ca.gov/report_search.cfm?id=5
Summary of Communication:	The subject property was not identified on the DTSC Hazardous Waste Tracking System (HWTS) for disposal of hazardous wastes or the EnviroStor database for known release cases.

4.1.7 Building Department

Regulatory Agency Data	
Name of Agency:	City of Menifee Building Department (MBD) via City Clerk
Point of Contact:	Ms. Sarah Manwaring
Agency Address:	29844 Haun Road Menifee, CA 92586
Agency Phone Number:	951-723-3708
Date of Contact:	October 1, 2021
Method of Communication:	Email
Summary of Communication:	At the time of this report the RCDEH had not responded to Partner's request. Partner also accessed the County of Riverside Transportation and Land Management Agency Online Services database. No other building information was identified on the database. The following information was obtained:

Building Records Reviewed for 25025 Corsica Lane (Subject Property)		
Year(s)	**Owner/Applicant**	**Description**
2002	Robertson Rae	Permits BMR021151 and BMR021152 issued to install one manufactured house and permanent foundation on 25025 Corsica Lane

4.1.8 Planning Department

Regulatory Agency Data	
Name of Agency:	City of Menifee Planning Department (MPD)
Point of Contact:	N/A
Agency Address:	101 North D Street, Menifee, CA
Agency Phone Number:	951 943 6100
Date of Contact:	October 1, 2021
Method of Communication:	Online zoning map
Summary of Communication:	According to records reviewed, the subject property is zoned Economic Development Corridor - Northern Gateway (EDC-NG) by the City of Menifee.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Geologic Energy Management (CalGEM)
Point of Contact:	N/A
Agency Address:	801 K Street, Sacramento, California
Agency Phone Number:	(916) 324-0850
Date of Contact:	October 1, 2021
Method of Communication:	Online http://maps.conservation.ca.gov/doggr/#openModal
Summary of Communication:	According to the CalGEM interactive website no oil, gas, or geothermal wells were identified on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Riverside County Assessor (RCA)
Point of Contact:	N/A
Agency Address:	2720 Gateway Drive, Riverside, CA 92507
Agency Phone Number:	N/A
Date of Contact:	September 30, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 330180029 that totaled 1.82 acres. No ownership information was identified on the reports for the subject property.

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources were provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	**Y**	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N

4.2.2 Subject Property Listings

The subject property was not identified in the regulatory database report.

4.2.3 Adjacent Property Listings

The adjacent property to the east was identified as a RCRA NonGen / NLR site, as discussed below:

- The property, identified as NORMAN CARMICHAEL at 25151 Corsica Lane, is located adjacent to the east of the subject property. This site was listed on the RCRA NonGen / NLR database for generation of hazardous wastes. No violations or evaluations were reported. Based on the lack of releases or violations associated with the permitting and the regulatory status, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Danbe Real Estate Advisors (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
AAI User Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**

Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property, Mr. George Rivera, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or

petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Rivera, the subject property was developed in 2002 for residential use. Mr. Rivera had no knowledge of the prior use of the subject property. Mr. Rivera further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

Mr. Rivera identified a subgrade septic system installed on the north side of the dwelling, and a water well located on the southeast corner of the subject property. According to Mr. Rivera, the septic system and water well were installed prior to acquisition of the subject property.

5.1.2 Interview with Report User

Mr. Mark Bachli, Danbe Real Estate Advisors, the client, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. According to Mr. Bachli, the subject property has been developed for residential use. Prior to that, the subject property was undeveloped. Mr. Bachli further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

5.1.3 Interview with Key Site Manager

The owner is the key site manager. His interview id found above.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was provided with title records for review as part of this assessment.

COMMITMENT FOR TITLE INSURANCE, 25025 Corsica Lane, Menifee, CA by First American Title Insurance Company (April 2021)

No environmental liens or AULs were identified for the subject property.

Copies of pertinent pages are included in Appendix B of this report.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Jeremy Russell
Site Assessment Conducted On:	October 4, 2021

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 25025 Corsica Lane (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. George Rivera	Owner/Occupant	Not provided	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in trash cans located on the subject property. An independent solid waste disposal contractor removes the solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into an onsite septic system. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the ground surface toward topographic lower areas on and around the subject property. The subject property is not connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity/natural gas provided by Southern California Edison and Southern California Gas Company. The mechanical system is

comprised of a split system with a central unit and interior air-handler and exterior condenser units. Hot water is provided by an individual natural gas water heater.

6.1.5 Wells and Cisterns

No aboveground evidence of cisterns was observed during the site reconnaissance.

Partner observed one water well located on the southeast corner of the subject property. According to a plate on the well housing, the well depth on July 30, 2018, was 250 feet bgs, and the static water depth was 49 feet bgs. According to Mr. Rivera, the water well was installed prior to acquisition of the subject property.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of an onsite septic system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

An onsite septic system was observed on the subject property. According to Mr. Rivera, the septic system was installed prior to acquisition of the subject property and he had no information pertaining to the capacity of the septic tank.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*"

2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

No potential PCB-containing equipment (transformers, interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent, or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No sumps or clarifiers were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 2002. As such, an asbestos evaluation was not required by the Client's scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey:

Suspect ACMs			
Suspect ACM	**Location**	**Friable Yes/No**	**Physical Condition**
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings, it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a private water well is operated on the subject property. Refer to Section 6.1.5 for further discussion. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors, and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

The subject property is located on the northwest corner of the intersection of N. Menifee Boulevard and Walnut Avenue within a mixed commercial/residential area of Riverside County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address(es):	25025 Corsica Lane, Menifee, California
Property Use:	Commercial
Land Acreage (Ac):	7.42 Ac
Number of Buildings:	27
Number of Floors:	One and two
Gross Building Area (SF):	154,450
Net Rentable Area (SF):	154,450
Date of Construction:	2004/2018
Assessor's Parcel Number (APN):	305030050 and 305030055
Type of Construction:	Metal and wood framed
Current Tenants:	APN 330-180-029
Site Assessment Performed By:	Jeremy Russell of Partner
Site Assessment Conducted On:	October 4, 2021

The subject property is currently occupied by APN 330-180-029 for commercial use. Onsite operations consist of 1,037 self-storage units in 27 buildings. The two-story building on the southeast corner of the subject property is used for rental operations and a two-story residential apartment for the onsite manager. In addition to the current structures, the subject property is also improved with concrete-paved driveways and parking areas, storm water drains, and minimal landscaping. One of the storage units is used for onsite storage of maintenance equipment and supplies. Small quantities of hazardous substances including spray lubricants, paint thinner, etc. were observed stored in a flammable materials cabinet.

According to available historical sources, the subject property was formerly undeveloped as early as 1901; developed for agricultural uses between 1938 and circa 2004; and redeveloped with the current improvements in 2004 and expanded with additional structures in 2018. Tenants on the subject property have included self-storage businesses (2004-present).

The immediately surrounding properties consist of commercial properties to the north; commercial properties to the south across Walnut Avenue; residential properties to the east across N. Menifee Boulevard; and commercial properties to the west.

According to a previous subsurface investigation conducted on a nearby property (SUNNYEDGE DISPOSAL, 2750 N. Menifee Boulevard and Case #T0606500303), the depth of groundwater in the vicinity of the subject property was reported to be approximately 163 feet below ground surface (bgs).

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 25025 Corsica Lane in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 25025 Corsica Lane in Menifee, Riverside County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

First American	ALTA Commitment for Title Insurance
Commitment	ISSUED BY **First American Title Insurance Company** File No: NCS-1057922-B-SA1

COMMITMENT FOR TITLE INSURANCE

Issued By

FIRST AMERICAN TITLE INSURANCE COMPANY

NOTICE

IMPORTANT-READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions; and the Commitment Conditions, ***First American Title Insurance Company***, a Nebraska Corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Policy Amount and the name of the Proposed Insured.

If all of the Schedule B, Part I-Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

First American Title Insurance Company

Dennis J. Gilmore, President

Greg L. Smith, Secretary

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS

(a) "Knowledge" or "Known": Actual or imputed knowledge, but not constructive notice imparted by the Public Records.
(b) "Land": The land described in Schedule A and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
(c) "Mortgage": A mortgage, deed of trust, or other security instrument, including one evidenced by electronic means authorized by law.
(d) "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
(e) "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
(f) "Proposed Policy Amount": Each dollar amount specified in Schedule A as the Proposed Policy Amount of each Policy to be issued pursuant to this Commitment.
(g) "Public Records": Records established under state statutes at the Commitment Date for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge.
(h) "Title": The estate or interest described in Schedule A.

2. If all of the Schedule B, Part I—Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:
(a) the Notice;
(b) the Commitment to Issue Policy;
(c) the Commitment Conditions;
(d) Schedule A;
(e) Schedule B, Part I—Requirements; and
(f) Schedule B, Part II—Exceptions.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company shall not be liable for any other amendment to this Commitment.

5. LIMITATIONS OF LIABILITY

(a) The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
  (i) comply with the Schedule B, Part I—Requirements;
  (ii) eliminate, with the Company's written consent, any Schedule B, Part II—Exceptions; or
  (iii) acquire the Title or create the Mortgage covered by this Commitment.
(b) The Company shall not be liable under Commitment Condition 5(a) if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.
(c) The Company will only have liability under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.
(d) The Company's liability shall not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Conditions 5(a)(i) through 5(a)(iii) or the Proposed Policy Amount.
(e) The Company shall not be liable for the content of the Transaction Identification Data, if any.
(f) In no event shall the Company be obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.
(g) In any event, the Company's liability is limited by the terms and provisions of the Policy.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT

(a) Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.
(b) Any claim must be based in contract and must be restricted solely to the terms and provisions of this Commitment.
(c) Until the Policy is issued, this Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.
(d) The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.
(e) Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.
(f) When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT HAS BEEN ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for the purpose of providing closing or settlement services.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. ARBITRATION

Arbitration provision intentionally removed.

SCHEDULE A

1. Commitment Date: April 09, 2021 at 7:30 AM
2. Policy to be issued:

   (a) ☒ 2006 ALTA® Standard Owner Policy
   Proposed Insured: To Be Determined
   Proposed Policy Amount: $ To Be Determined

   (b) ☐ 2006 ALTA® Policy
   Proposed Insured:
   Proposed Policy Amount: $

   (c) ☐ 2006 ALTA® Policy
   Proposed Insured:
   Proposed Policy Amount: $

3. The estate or interest in the Land described or referred to in this Commitment is

   Fee

4. The Title is, at the Commitment Date, vested in:

   Jorge Rivera and Beatriz Rivera, husband and wife as joint tenants

5. The Land is described as follows:

   See Exhibit "A" attached hereto and made a part hereof

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

Commitment No.: NCS-1057922-B-SA1

SCHEDULE B, PART I

Requirements

All of the following Requirements must be met:

A. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

B. Pay the agreed amount for the estate or interest to be insured.

C. Pay the premiums, fees, and charges for the Policy to the Company.

D. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

E. Releases(s) or Reconveyance(s) of Item(s): 12, 13 and 14

F. Other: None

G. You must give us the following information:
   a. Any off record leases, surveys, etc.
   b. Statement(s) of Identity, all parties.
   c. Other: None

The following additional requirements, as indicated by "X", must be met:

[X] H. Provide information regarding any off-record matters, which may include, but are not limited to: leases, recent works of improvement, or commitment statements in effect under the Environmental Responsibility Acceptance Act, Civil Code Section 850, et seq.

The Company's Owner's Affidavit form (as provided by the company) must be completed and submitted prior to close in order to satisfy this requirement. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

[] I. An ALTA/NSPS survey of recent date, which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys, must be submitted to the Company for review. This Commitment will then be subject to such further exceptions and/or requirements as may be deemed necessary.

This page is only a part of a 2016 ALTA® Commitment for Title Insurance issued by First American Title Insurance Company. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I-Requirements; Schedule B, Part II-Exceptions.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

[] J. The following LLC documentation is required from:

(i) a copy of the Articles of Organization
(ii) a copy of the Operating Agreement, if applicable
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Company Consent to the current transaction

[] K. The following partnership documentation is required **:**

(i) a copy of the partnership agreement, including all applicable amendments thereto
(ii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iii) express Partnership Consent to the current transaction

[] L. The following corporation documentation is required:

(i) a copy of the Articles of Incorporation
(ii) a copy of the Bylaws, including all applicable Amendments thereto
(iii) a Certificate of Good Standing and/or other evidence of current Authority to Conduct Business within the State
(iv) express Corporate Resolution consenting to the current transaction

[] M. Based upon the Company's review of that certain partnership/operating agreement dated **Not disclosed** for the proposed insured herein, the following requirements must be met:
Any further amendments to said agreement must be submitted to the Company, together with an affidavit from one of the general partners or members stating that it is a true copy, that said partnership or limited liability company is in full force and effect, and that there have been no further amendments to the agreement. This Commitment will then be subject to such further requirements as may be deemed necessary.

[] N. A copy of the complete lease, as referenced in Schedule A, #3 herein, together with any amendments and/or assignments thereto, must be submitted to the Company for review, along with an affidavit executed by the present lessee stating that it is a true copy, that the lease is in full force and effect, and that there have been no further amendments to the lease. This Commitment will then be subject to such further requirements as may be deemed necessary.

[X] O. Approval from the Company's Underwriting Department must be obtained for issuance of the policy contemplated herein and any endorsements requested thereunder. This Commitment will then be subject to such further requirements as may be required to obtain such approval.

[] P. Potential additional requirements, if ALTA Extended coverage is contemplated hereunder, and work on the land has commenced prior to close, some or all of the following requirements, and any other requirements which may be deemed necessary, may need to be met:

[] Q. The Company's "Indemnity Agreement I" must be executed by the appropriate parties.

Commitment No.: NCS-1057922-B-SA1

SCHEDULE B, PART II

Exceptions

THIS COMMITMENT DOES NOT REPUBLISH ANY COVENANT, CONDITION, RESTRICTION, OR LIMITATION CONTAINED IN ANY DOCUMENT REFERRED TO IN THIS COMMITMENT TO THE EXTENT THAT THE SPECIFIC COVENANT, CONDITION, RESTRICTION, OR LIMITATION VIOLATES STATE OR FEDERAL LAW BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, GENDER IDENTITY, HANDICAP, FAMILIAL STATUS, OR NATIONAL ORIGIN.

The Policy will not insure against loss or damage resulting from the terms and provisions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I-Requirements are met.

2. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

3. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.

4. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.

5. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.

6. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

7. General and special taxes and assessments for the fiscal year 2021-2022, a lien not yet due or payable.

8. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

14. A deed of trust to secure an original indebtedness of $372,000.00 recorded April 07, 2021 as Instrument No. 2021-0219133 of Official Records.

Dated:	March 31, 2021
Trustor:	Jorge Rivera and Beatriz Rivera, husband and wife as joint tenants
Trustee:	Fidelity National Title Company
Beneficiary:	Mortgage Electronic Registration Systems, Inc. ("MERS"), as Nominee for
Lender:	Broker Solutions, Inc. dba New American Funding, a corporation organized and existing under the laws of California

15. Any defects, liens, encumbrances or other matters which name parties with the same or similar names as Jorge Rivera. The name search necessary to ascertain the existence of such matters has not been completed. In order to complete this preliminary report or commitment, we will require a statement of information.

16. Water rights, claims or title to water, whether or not shown by the Public Records.

17. Rights of parties in possession.

Copyright 2006-2016 American Land Title Association. All rights reserved.

The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

ALERT - CA Senate Bill 2 imposes an additional fee of $75 up to $225 at the time of recording on certain transactions effective January 1, 2018. Please contact your First American Title representative for more information on how this may affect your closing.

NOTE to proposed insured lender only: No Private transfer fee covenant, as defined in Federal Housing Finance Agency Final Rule 12 CFR Part 1228, that was created and first appears in the Public Records on or after February 8, 2011, encumbers the Title except as follows: None

1. Taxes for proration purposes only for the fiscal year 2020-2021.

First Installment:	$1,945.33, PAID
Second Installment:	$1,945.33, PAID
Tax Rate Area:	026-199
APN:	330-180-029

2. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Single Family Residence known as 25025 Corsica Lane, Menifee, CA.

3. According to the public records, there has been no conveyance of the land within a period of twenty four months prior to the date of this report, except as follows:

   A document recorded April 07, 2021 as Instrument No. 2021-0219132 of Official Records.

From:	Mayolo Fernando Ramirez, husband and wife as joint tenants and Brandi Patricia Ramirez
To:	Jorge Rivera and Beatriz Rivera, husband and wife as joint tenants

4. The policy contemplated by this report/commitment will not insure the title to any mobilehome or manufactured home that may be located on the land. The Company will consider issuing such coverage only upon the customer's specific request.

5. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

The map attached, if any, may or may not be a survey of the land depicted thereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of this Commitment or the Policy, if any, to which the map is attached.

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NORMAN CARMICHAEL	25151 CORSICA LANE	ESE 0 - 1/8 (0.012 mi.)	1	9

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2021

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

25025 CORSICA LANE
SUN CITY, CA 92585

TARGET PROPERTY COORDINATES

Latitude (North):	33.738093 - 33° 44' 17.13''
Longitude (West):	117.221075 - 117° 13' 15.87''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	479521.3
UTM Y (Meters):	3732945.2
Elevation:	1459 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641314 ROMOLAND, CA
Version Date:	2012
North Map:	5641330 PERRIS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

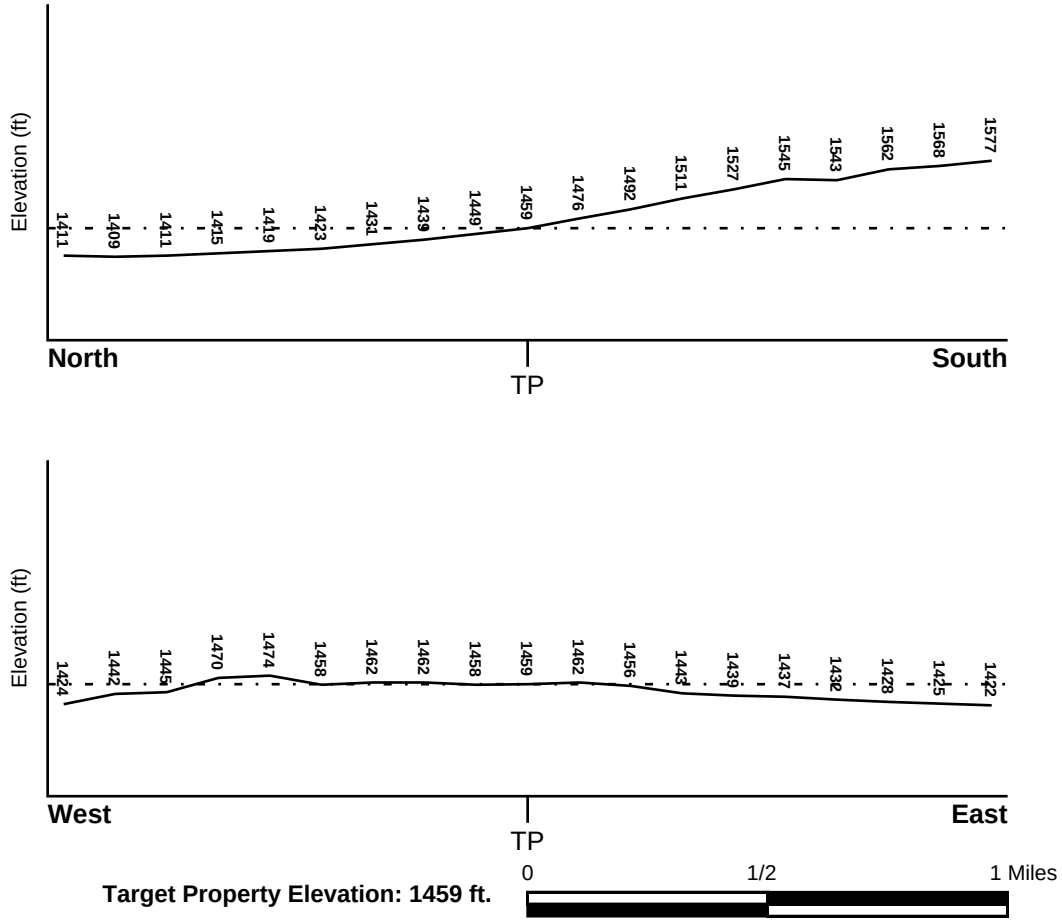

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1459 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C2055H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C1440H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: AULD

Soil Surface Texture: clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	27 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	44 inches	48 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: LAS POSAS

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	11 inches	31 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	31 inches	53 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: BUCHENAU

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	7 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
3	44 inches	61 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 4

Soil Component Name: CAJALCO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX D: QUALIFICATIONS/INSURANCE

PARTNER

Education

Bachelor of Science, Geology, University of Texas at Austin

Highlights

29 years in the environmental assessment business
7 years performing Phase II Environmental Site Assessments and Remediation
10 years performing project management on local and nationwide commercial real estate transactions for multiple national clients
12 years performing Phase I Environmental Site Assessments, Transaction Screen Assessments, including Freddie Mac and Fannie Mae.

Experience Summary

Mr. Russell has 29 years of experience in the environmental service industry. He has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Russell has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II and III Subsurface Investigations, Remediation Design projects, Limited Asbestos Surveys, Lead-based Paint Surveys, Radon Studies, Mold Assessments, and Lead-in-water sampling and analysis.

Mr. Russell has managed numerous subsurface investigations to assess and cleanup the horizontal and vertical extent of soil and groundwater contamination. Mr. Russell has prepared Remediation Feasibility Studies, Work Plans and Remedial Action Plans for numerous projects that involved soil vapor extraction, LNAPL extraction and bioremediation. Mr. Russell conducted Preliminary Endangerment Assessments to evaluate potential contamination concerns on 10 proposed California public school sites. After review of report findings, the California Department of Toxic Substances Control determined all sites were suitable for developments. Mr. Russell has extensive experience conducting site assessments on large sections of vacant land for the purpose of evaluating and mapping planned developments. Mr. Russell has completed the California Desert Tortoise Environmental Awareness Training.

In addition, Mr. Russell has provided on behalf of clients interface with regulatory agencies and provided regulatory guidance and compliance with Cal-EPA, California Department of Toxic Substances Control (DTSC), California State Water Resources Control Board (SWRCB), and county and municipal regulations.

Finally, Mr. Russell's diversity across residential, industrial, municipal, and commercial environments are a major contribution to Partner Engineering and Science's Associate team in the Southwest region of the United States.

Project Experience

Wind Energy Development, Mojave Desert, Tehachapi Mountains, Colorado Desert, CA. Conducted Phase I ESA reports on over 30 new and previously existing wind turbine energy sites covering a total of approximately 40 square miles of land from the high desert Antelope Valley and Tehachapi Mountains in Kern County, CA, to sites in the area of Palm Desert and Palm Springs, CA.

Mojave Solar Project, Lockhart/Harper Lake, CA. Conducted Phase I ESA on the project Solar Energy Generating Station (SEGS) Harper Lake, which is designed to generate approximately 178 Megawatts of electricity from solar energy from two SEGS. When developed in 1990 it was the largest solar energy generation plant in the world. The SEGS are solar thermal plants, using reflective parabolic troughs (mirrors) to generate heat, then steam, then electrical power. The facility is comprised of approximately 1,000 acres of rows of parabolic troughs, two SEGS, and numerous operations support buildings.

DreamWorks Animation Campus, Glendale, CA. Conducted Phase I ESA on the world-famous DreamWorks Animation property. Developed in 1997, onsite operations consist of five buildings where DreamWorks creates and innovates 3D animated feature films, original TV series, and shorts, interactive media, live entertainment, themed experiences, consumer products, publishing, and technology. In addition to the current structures, the campus is improved with a restaurant, parking garage, manmade ponds and streams, courtyards, associated landscaping.

Meadowbrook Park & Tower Apartments, San Bernardino, California, CA. Conducted Phase I ESA Fannie Mae scope of work on the Housing and Urban Development (HUD) senior housing facility. The property consists of 267 residential apartment units in 18 buildings, including an 8-story tower apartment building. In addition to the current structures, the property is improved with a one-story office building, a one-story laundry building, two playgrounds, and three asphalt-paved surface parking lots, along with landscaped areas. The facility was developed in 1971. Historically, the southwest portion of the property was previously developed in 1972 with commercial buildings associated with the apartment development. In addition, the current parking lot on the southern portion of the subject property was previously developed with a parking structure that included surface parking and one level of subterranean parking.

Indoor Air Quality Assessment

Summary of Professional Experience

Mr. Bettelyoun has 17 years of experience in the environmental and industrial hygiene service industries. He has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Bettelyoun has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II Subsurface Investigations, Asbestos Surveys, Lead-based Paint Surveys and Indoor Air Quality (IAQ) studies.

Representative Phase I/II Environmental Site Assessment Project Experience:

- West Coast Bank - Various Sites, Oregon, Phase I ESAs
- US Bancorp - Various sites in Oregon and Washington - Phase I ESAs
- Marine Midland Bank; New York, New York-Project engineer for Phase I ESA on 13,000-acre farm/ranch in Southern Oregon, including aerial overflight, field reconnaissance, records review, and reporting, with emphasis on adjoining property use. The site was purchased by the Nature Conservancy and set aside for natural reclamation.
- First Union Bank; Cleveland, Ohio-Project engineer for Phase I ESA of 42 acres in Portland, Oregon, intended for about 500,000-square-foot retail shopping mall. Project included field reconnaissance, records review, and reporting.
- Waban Inc; Irvine, California-Project engineer for Phase I ESA on manufacturing facility including field reconnaissance, records review, and reporting.
- Lincoln Asset Management; Dallas, Texas-Project engineer for Phase I ESA on office building, apartment complex, and shopping center including field reconnaissance, records review, and reporting.
- CE John Company; Various Sites, Oregon, Washington, California, Utah-Phase I ESAs.
- City of Milwaukie, Oregon; Various Sites, Willamette River, Oregon-Phase I ESAs.
- Les Schwab Tire Company; Various Sites, Oregon, Washington, California-Phase I ESAs.

- Pacific One Bank; Thirty Sites, Oregon, Washington, Idaho-Phase I ESAs.
- Prestige Care; Various Sites, Oregon, Washington, Arizona, California-Phase I ESAs.
- Suburban Propane; Various Sites, Oregon, Washington-Phase I ESAs.
- Bank of the West, Various sites in Oregon and Washington - Phase I ESAs
- McCormick Pier Apartments; Portland, Oregon - Project engineer for Phase I and Phase II ESA for high profile apartment acquisition.

Representative Asbestos Survey Project Experience

- City of New York School System; New York-Asbestos inspector in charge of re-inspection teams for the City of New York school system campuses. Duties included accounting for asbestos materials, assessing their condition, sampling materials, and providing drawings for each building.
- David Douglas/Tigard/Hillsboro/Portland Public School Districts, Oregon - Project Engineer/Management Planner for AHERA asbestos surveys for four school districts. Responsibilities included semi-annual re-inspection and appropriate management planner responses to changes in asbestos-containing materials in school facilities.
- Port of Portland; Various Sites, Oregon-Asbestos Surveys for marine and airport facilities.
- Sears Stores; Albany, New York-Project engineer for asbestos survey on retail facilities, including identification/sampling of suspected asbestos materials, sample location drawings, and report preparations.
- State of Oregon; Department of General Services, Oregon-Asbestos Surveys of over 1,500 buildings.
- US Coast Guard; Various Sites, Oregon, Washington, Alaska, Hawaii-Asbestos/Lead Paint Surveys.

Representative Lead-Based Paint Survey Project Experience

- Bank United of Texas; Aloha, Oregon-Inspector technician for XRF lead and radon testing for apartment complex.
- Mason County; Shelton, Washington-Project Manager for XRF lead testing at historical residential property. Developed abatement and disposal options.
- US Coast Guard; Various Sites, Oregon, Washington, Alaska, Hawaii-Asbestos/Lead Paint Surveys.

Finally, Mr. Bettelyoun's diversity across residential, industrial and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the Pacific Northwest region of the United States.

Education

Bachelor of Arts, Public Administration & Economics, San Diego State University
Executive MBA Program, 2000-2003

Highlights

Over 20 years of experience in the environmental and engineering consulting industry
Property Condition Assessments (PCAs)
Fannie Mae, Freddie Mac, and HUD due diligence

Experience Summary

Mr. Lambson is a true veteran of the commercial real estate services industry. He has over 20 years of experience managing and performing environmental and engineering consulting projects on a national level. Mr. Lambson serves as a Principal for Partner and is located in Partner's San Diego County office. Mr. Lambson currently provides client management and consulting to a nationwide client base and specializes in advising "equity" clients during the acquisition phase of commercial property transactions in the U.S., Mexico, and Canada.

Mr. Lambson has assisted clients on over 10,000 commercial real estate transactions throughout his career. His due diligence resume includes experience at all levels, and includes advising REITs, developers, property managers, retail companies, commercial real estate brokers, mortgage brokers, attorneys, lenders, universities, and real estate investment groups with the following nationwide services:

- Property Condition Assessments (PCAs)
- Individual Building System Inspections for Roof, Mechanical Electrical Plumbing (MEP), Elevator, Structure, Façade, and ADA/Accessibility
- Phase I Environmental Site Assessments (ESAs)
- Phase II Subsurface Investigations (Soil and groundwater sampling and analysis)
- Phase III Environmental Remediation Services
- Asbestos, Lead, Radon, Mold Sampling
- Seismic and Structural Assessments (PMLs)
- Energy Audits, Benchmarking, AB1103 Energy Disclosure, and LEED-related services
- Hydrology, Water Conservation and Efficiency
- Fannie Mae / Freddie Mac / HUD Due Diligence
- Geotechnical and Soils Reports
- Zoning Reports
- ALTA Surveys

Building Sciences

Property Condition Assessment, MEP Report, Roof Report, Elevator Report, Structural and Seismic Assessment for a high-profile Class A office campus acquisition in the San Francisco Bay Area

ADA Compliance and Accessibility Reviews for a national bank branch portfolio

Fannie Mae Property Condition / Physical Needs Assessment services for a 5400-unit multifamily portfolio in Nevada

Environmental Assessments
Phase I and Phase II Environmental Assessments for a 75-acre aerospace facility in the Northwest United States

Over 500 Phase I Environmental Site Assessments for a national fast-food chain

Environmental consulting for over 1 million acres of desert land in California, Nevada, and Arizona

Land Surveys
ALTA Surveys for 2400-unit apartment portfolio in the Midwest

Multi-Site Portfolios
113-site office portfolio acquisition for a national REIT

122-site hotel portfolio for a national lending institution

55-site hotel portfolio acquisition for a private investment group

68-site healthcare portfolio acquisition for a national REIT

50-site country club/golf course acquisition for a private investment group

Energy and Water Efficiency
Energy & Water consulting for a national property owner that operates and manages 30 retail and office centers on the West Coast and Texas

Subject: Phase I Environmental Site Assessment
Menifee 4.5 Acres
Goetz Road (APN 330-180-006)
Menifee, California 92585
Partner Project No. 21-340533.1

Dear <Client Contact>:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (619) 925-9672.

Sincerely,

Mark Lambson
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Danbe Real Estate Advisors for the property located at Goetz Road (APN 330-180-06) in Menifee, Riverside County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Danbe Real Estate Advisors with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of Goetz Road within a residential area of Riverside County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address(es):	Goetz Road (APN 330-180-006), Menifee, California
Property Use:	Vacant
Land Acreage (Ac):	4.5 Ac
Number of Buildings:	None
Number of Floors:	N/A
Gross Building Area (SF):	N/A
Net Rentable Area (SF):	N/A
Date of Construction:	N/A
Assessor's Parcel Number (APN):	330-180-006
Type of Construction:	N/A
Current Tenants:	N/A
Site Assessment Performed By:	Tatjana McCondichie of Partner
Site Assessment Conducted On:	October 25, 2021

The subject property currently consists of vacant land.

According to available historical sources, the subject property was formerly undeveloped as early as 1938; developed with agricultural land between 1961 and circa 1967; and undeveloped since 1974.

The immediately surrounding properties consist of undeveloped land to the north; undeveloped land to the south; residential to the east; and residential to the west across Goetz Road.

According to the Regional Water Quality Control Board (RWQCB), the depth to groundwater in the vicinity of the subject property is inferred to be approximately 11 feet below ground surface (bgs) and groundwater flow is inferred to be toward the north.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Goetz Road (APN 330-180-006) in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at Goetz Road (APN 330-180-006) in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject

property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Danbe Real Estate Advisors engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Danbe Real Estate Advisors. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any

course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to Riverside County Department of Environmental Health (RCDEH) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at Goetz Road (APN 330-180-006) in Menifee, California is located on the east side of Goetz Road. According to the Riverside County Assessor, the subject property is legally described as 4.50 ACRES IN LOT 781 MB 014/091 ROMOLA FARMS 9 Lot 781 Subdivision Name ROMOLA FARMS 9 Acres 004.50 Lot Type Lot Rec Map Type Map Book Map Plat B 014 Map Plat P 091.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently undeveloped.

The subject property is designated for residential development by the City of Menifee.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a residential area of Riverside County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Undeveloped land
South: Undeveloped land
East: Residential/livestock (25025 Corsica Lane)
West: Goetz Road beyond which is residential

No adjacent properties were identified in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Romoland, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 1,459 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the north. The subject property is depicted on the 1979 map as undeveloped.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the north. The nearest surface water in the vicinity of the subject property is the San Jacinto River located approximately 4,725 feet northwest of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Eastern Municipal Water District (EMWD) serves the subject property vicinity. According to a representative of the EMWD, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for Menifee are surface water surface water supplied solely from northern California through the State Water Project.

According to a previous subsurface investigation conducted on nearby properties, the depth to groundwater in the vicinity of the subject property has been measured at approximately 11 feet below ground surface (bgs). According to topographic map interpretation, groundwater in the vicinity of the subject property is inferred to flow toward the north.

2.4.3 Geology/Soils

The subject property is situated within the Santa Ana River Valley of the Peninsular Ranges geomorphic province of the State of California. The uppermost geologic formation underlying the soils at the subject property is the Quaternary Alluvium. The Quaternary Alluvium comprises the underlying stratigraphy and consists mostly of sand, silt and clay deposited in fluvial environments. The thickness of the Quaternary Alluvium is estimated to be over 200 feet. The Quaternary Alluvium is underlain by the Pleistocene and older formations.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as the Buchenau and Auld series. The Buchenau series have very dark gray, moderately alkaline, calcareous medium textured A horizons and grayish brown, moderately alkaline and calcareous, medium to moderately fine B2 horizons that overlie a strongly lime cemented hardpan at moderate depth. The Auld series consists of deep, well drained soils formed in residuum from basic igneous rocks. Auld soils are on foothills and uplands. The mean annual precipitation is about 14 inches and the mean annual temperature is about 62 degrees F.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Numbers 06065C2055H dated August 18, 2014, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1938-1953	Aerial Photographs	Undeveloped/Native land
1961-1967	Aerial Photographs	Agricultural
1974-Present	Aerial Photographs, Interviews, Onsite Observations,	Undeveloped

The subject property parcel appears to have historically been used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The duration of apparent agricultural activities appears to have been limited to the 1960s. The subject property has not undergone large scale site development activities or grading that would minimize direct contact to any potential remaining concentrations in the soil. However, based on the limited duration of agricultural use, if any, this historical use is not expected to represent a significant environmental concern.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on October 12, 2021. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	***1938***	***Scale:***	***1"=500'***
Subject Property:	Undeveloped land		
North:	Undeveloped land		
South:	Undeveloped land		
East:	Undeveloped land		
West:	Undeveloped land across roadway		

Date:	***1949, 1953***	***Scale:***	***1"=500'***
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	No significant changes visible		
East:	No significant changes visible		
West:	No significant changes visible		

Date:	***1961, 1967***	***Scale:***	***1"=500'***
Subject Property:	Appears to be agriculturally developed		
North:	Appears to be agriculturally developed		
South:	Appears to be agriculturally developed		
East:	Appears to be agriculturally developed		
West:	Appears to be agriculturally developed across roadway		

Date: 1974, 1978, 1985		*Scale: 1"=500'*
Subject Property:	Undeveloped land	
North:	Undeveloped land	
South:	Undeveloped land	
East:	Undeveloped land	
West:	No significant changes visible	

Date: 1989, 1994, 1997, 2002		*Scale: 1"=500'*
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	Undeveloped land across roadway	

Date: 2006, 2009, 2012, 2016		*Scale: 1"=500'*
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	Appears to be occupied by a rural residence	
West:	Appears to be occupied by a residential development across a roadway	

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on October 12, 2021. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on October 20, 2021 for past names and businesses that were listed for the subject property and adjacent properties. Based on the absence of a physical address, city directories were not identified for the subject property. Adjacent properties were not included in the City Directory report; however, based on the undeveloped and/or residential nature of the adjacent properties, this data gap is not considered significant.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on October 12, 2021. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1901	
Subject Property:	Undeveloped
North:	Undeveloped
South:	Undeveloped
East:	Undeveloped
West:	Undeveloped

Date:	***1942, 1943, 1947, 1953, 1973, 1979, 2012***
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	N/A
Agency Address:	5796 Corporate Avenue, Cypress, California
Agency Phone Number:	(714) 484-5300
Date of Contact:	October 27, 2021
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	Riverside County Department of Environmental Health (RCDEH)
Point of Contact:	NA
Agency Address:	4065 County Circle Drive-Room 104, Perris, California
Agency Phone Number:	(951) 358-5055
Date of Contact:	October 27, 2021
Method of Communication:	Online Request
Summary of Communication:	As of the date of this report, Partner has not received a response from the RCDEH for inclusion in this report. Based on the known history, the RCDEH is not expected to have records that would change the conclusions of this report.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Air Quality Management District (AQMD)
Point of Contact:	N/A
Agency Address:	21865 Copley Dr, Diamond Bar, California
Agency Phone Number:	(909) 396-2000
Date of Contact:	October 27, 2021
Method of Communication:	Online
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	Records Clerk
Agency Address:	3737 Main Street, Riverside, California
Agency Phone Number:	(951) 782-4130

Regulatory Agency Data

Date of Contact:	October 27, 2021
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.5 Building Department

Regulatory Agency Data

Name of Agency:	City of Menifee Building and Safety Department
Point of Contact:	Records Clerk
Agency Address:	29844 Haun Rd, Menifee, CA 92586
Agency Phone Number:	(951) 672-6777
Date of Contact:	October 12, 2021
Method of Communication:	Faxed Request
Summary of Communication:	The subject Property has never been structurally developed. No permits were identified.

4.1.6 Planning Department

Regulatory Agency Data

Name of Agency:	Menifee Planning Department (MPD)
Point of Contact:	Records Clerk
Agency Address:	29844 Haun Rd, Menifee, CA 92586
Agency Phone Number:	(951) 672-6777
Date of Contact:	October 12, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is zoned Economic Development Corridor -Northern Gateway (EDC-NG) development by the City of Menifee.

4.1.7 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	N/A
Agency Address:	801 K Street, Sacramento, California
Agency Phone Number:	(916) 322-1080
Date of Contact:	October 27, 2021
Method of Communication:	Online
Summary of Communication:	According to DOGGR, no oil and/or gas wells are located on or adjacent to the subject property.

4.1.8 Assessor's Office

Regulatory Agency Data

Name of Agency:	Riverside County Assessor (RCA)
Point of Contact:	N/A

Regulatory Agency Data

Agency Address:	2720 Gateway Drive, Perris, California
Agency Phone Number:	(951) 955-6200
Date of Contact:	October 27, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 330-180-006 that comprises 4.5 acres of land. No records regarding property ownership, building size, and utility information for the subject property was available from the Riverside County Assessor's Office.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N

4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

4.2.3 Adjacent Property Listings

The adjacent properties are not identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Danbe Real Estate Advisors (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
AAI User Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a prospective purchaser, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Mark Bachli, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Bachli, the subject property has always been undeveloped.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Tatjana McCondichie
Site Assessment Conducted On:	October 25, 2021

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for Goetz Road (APN 330-180-006) (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Mark Bachli	Key Site Manager	(213) 929-5046	No

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

As the subject property is vacant land, solid waste is not currently generated onsite. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

As the subject property is vacant land, no sanitary discharges are currently generated onsite.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by infiltration into the unpaved ground surface.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Department of Agriculture; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

As the subject property is vacant land, heating and cooling systems were not observed onsite. However, natural gas and electricity in the surrounding area is provided by Southern California Gas Company and the Southern California Edison, respectively.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

As the subject property is vacant land, domestic wastewater is not currently generated at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

Due to the absence of structures on the subject property, ACMs were not considered within the scope of this assessment.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Due to the absence of structures on the subject property, LBP was not considered within the scope of this assessment.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Eastern Municipal Water District (EMWD) serves the subject property vicinity. According to a representative of the EMWD, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for Menifee are surface water surface water supplied solely from northern California through the State Water Project. According to the 2020 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Due to the absence of structures on the subject property, a mold assessment was not conducted.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion.

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of Goetz Road (APN 330-180-006) in Menifee, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

- This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at Goetz Road (APN 330-180-006) in Menifee, Riverside County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # F40C-47AB-AA4D

PO # 21-340533.1

Project 21-340533.1

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: F40C-47AB-AA4D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

E D R is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL ..... National Priority List
Proposed NPL ..... Proposed National Priority List Sites
NPL LIENS ..... Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ..... National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ..... Federal Facility Site Information listing
SEMS ..... Superfund Enterprise Management System

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE ..... Superfund Enterprise Management System Archive

Federal RCRA CORRACTS facilities list

CORRACTS ..... Corrective Action Report

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF ..... RCRA - Treatment, Storage and Disposal

Federal RCRA generators list

RCRA-LQG ..... RCRA - Large Quantity Generators
RCRA-SQG ..... RCRA - Small Quantity Generators
RCRA-VSQG ..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ..... Land Use Control Information System

US ENG CONTROLS ..... Engineering Controls Sites List
US INST CONTROLS ..... Institutional Controls Sites List

Federal ERNS list

ERNS ..... Emergency Response Notification System

State- and tribal - equivalent NPL

RESPONSE ..... State Response Sites

State and tribal landfill and/or solid waste disposal site lists

SWF/LF ..... Solid Waste Information System

State and tribal leaking storage tank lists

INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land
CPS-SLIC ..... Statewide SLIC Cases

State and tribal registered storage tank lists

FEMA UST ..... Underground Storage Tank Listing
UST ..... Active UST Facilities
AST ..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST ..... Underground Storage Tanks on Indian Land

State and tribal voluntary cleanup sites

INDIAN VCP ..... Voluntary Cleanup Priority Listing
VCP ..... Voluntary Cleanup Program Properties

State and tribal Brownfields sites

BROWNFIELDS ..... Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

RGA LUST ..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ELEMENTARY SCHOOL NO Facility Id: 60000776 Status: Inactive - Withdrawn	***FENCE POST DRIVE/RAM***	***S 1/2 - 1 (0.729 mi.)***	***4***	***17***

Lower Elevation	Address	Direction / Distance	Map ID	Page
MONUMENT RANCH SITE Facility Id: 70000024 Status: No Further Action	***GOETZ ROAD / ETHANAC***	***N 1/4 - 1/2 (0.309 mi.)***	***2***	***11***

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NATIVE PLANT	***202 ETHANAC***	***NNE 1/4 - 1/2 (0.341 mi.)***	***3***	***15***

Database: LUST REG 8, Date of Government Version: 02/14/2005
Facility Status: Case Closed
Global ID: T0606500254

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NORMAN CARMICHAEL	25151 CORSICA LANE	E 0 - 1/8 (0.062 mi.)	1	9

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NATIVE PLANT	***202 ETHANAC***	***NNE 1/4 - 1/2 (0.341 mi.)***	***3***	***15***

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021

Next Scheduled EDR Contact: 01/10/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2021

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021
Date Data Arrived at EDR: 03/23/2021
Date Made Active in Reports: 05/19/2021
Number of Days to Update: 57

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/22/2021

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 03/24/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012
North Map:	5641330 PERRIS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK→ - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

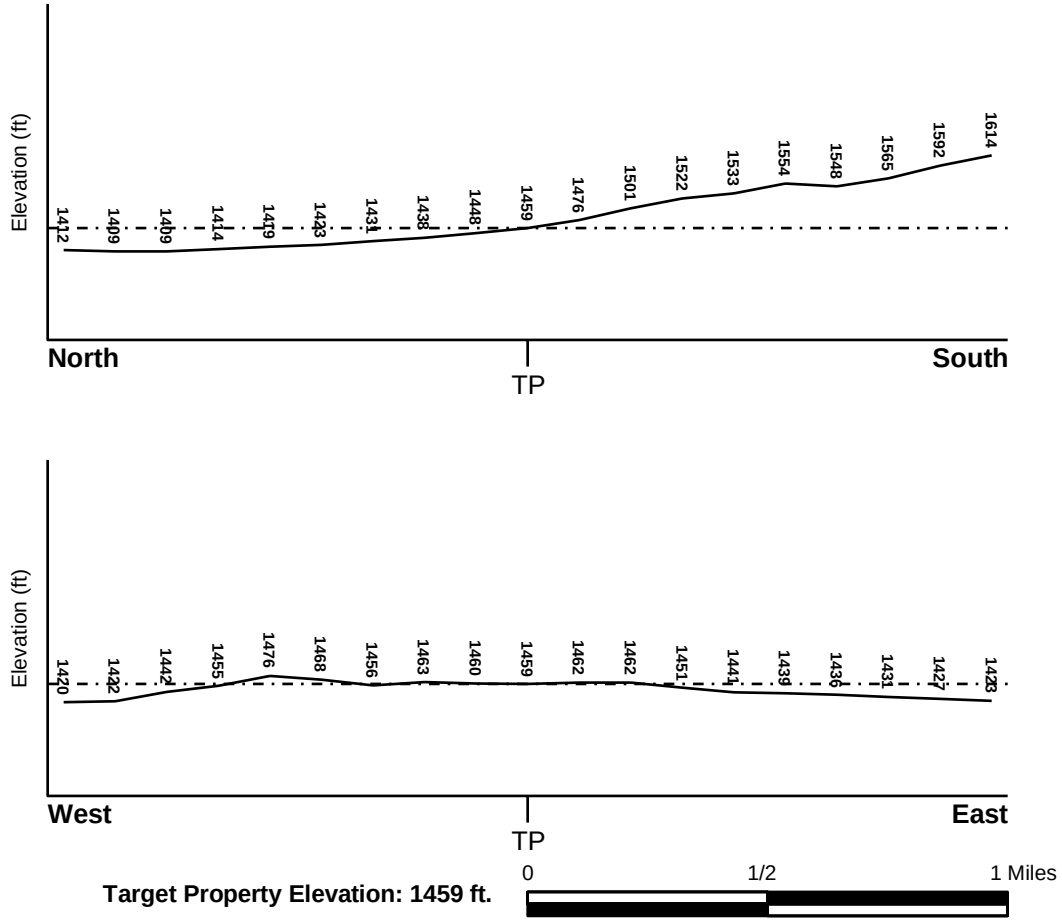

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK→ - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C2055H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C1440H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW→

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK→ - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK→ - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: AULD

Soil Surface Texture: clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	27 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	44 inches	48 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: BUCHENAU

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	7 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
3	44 inches	61 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: LAS POSAS

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PARTNER

Tatjana McCondichie
Partner Associate

Education

Associates Degree of Language Arts, Olympia-Morata-Gymnasium (Germany)

Highlights

13 years in the due diligence industry conducting Phase I Environmental Site Assessments

Experience Summary

Ms. McCondichie has over 13 years of experience in the environmental industry. She has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Ms. McCondichie has experience in environmental and air quality related fields and has conducted over 100 Phase I Environmental Site Assessment (ESA) projects.

In addition, Ms. McCondichie has performed and managed environmental site assessments on various industrial, commercial, institutional and residential properties. Assessments included limited and comprehensive surveys for asbestos, lead-based paint and lead-in-drinking-water analysis. She has also managed subsurface investigations to determine the presence of contamination in soil; prepared written reports in formats prescribed by various fiduciary institutions and performed peer reviews on environmental site assessments completed by other environmental firms.

Finally, Ms. McCondichie's diversity across residential and commercial environments is a major contribution in the Southwest region of the United States.

Education

B.S., Environmental Science, California State University, Chico

Training

OSHA 40-Hour HAZWOPER
AHERA Building Inspector training
California Department of Health Services/USEPA Lead Inspector/Assessor

Highlights

More than 17 years of experience in the environmental consulting field
More than 17 years experience in environmental due diligence, NEPA compliance, lead-based paint and asbestos assessment, and LUST monitoring and reporting
Knowledgeable in due diligence reporting standards, including Fannie Mae DUS, Freddie Mac, and HUD
Site assessment experience includes agricultural properties, semiconductor manufacturing facilities, fueling and automobile repair facilities, chemical distribution facilities, landfills, oil well fields, telecommunications sites, and shopping centers with dry cleaning facilities

Experience Summary

Ms. Vosovic has more than 17 years of experience in the environmental consulting field and has worked in various disciplines, including environmental due diligence, NEPA compliance, lead-based paint and asbestos assessment, and LUST monitoring and reporting. Ms. Vosovic has performed, reviewed, and managed thousands of Phase I ESAs. She has also served as senior reviewer for NEPA compliance documents, with thousands of reports reviewed. She has tracked and managed the regulatory compliance for hundreds of microwave sites for a major telecommunications carrier.

Ms. Vosovic is well versed in EPA's All Appropriate Inquiry and ASTM E1527-13. She is knowledgeable in due diligence reporting standards, including Fannie Mae DUS, Freddie Mac, and HUD. Ms. Vosovic has conducted Phase I ESAs on a wide range of properties. Site assessment experience includes agricultural properties, semiconductor manufacturing facilities, fueling and automobile repair facilities, chemical distribution facilities, landfills, oil well fields, telecommunications sites, and shopping centers with dry cleaning facilities. She has scoped projects, mentored field personnel, identified environmental risks, and regularly provides detailed reports within demanding deadlines.

Ms. Vosovic is responsible for conducting all aspects of Phase I Environmental Site Assessments including proposal writing, staffing projects, client liaison, site reconnaissance and record reviews. Ms. Vosovic also provides management and QA/QC review of Phase I ESAs and Transaction Screens, and is focused on providing exemplary client service. Ms. Vosovic is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. Ms. Vosovic displays excellent technical writing and editing skills, attention to detail, and excels at providing concise, logical conclusions and recommendations.

Project Experience

Served as the primary Project Manager and Phase I Environmental Site Assessment Reviewer for multiple lender and equity clients and for thousands of properties including addressing soil, soil vapor, and/or

groundwater contamination concerns, lead-based paint and asbestos-related concerns, evaluation of PCB-containing equipment, review of UST compliance and release cases, management of radon sampling and mitigation activities, and the development of Operations and Maintenance programs.

Provided senior review for thousands of NEPA Screening Reports, Environmental Assessments, Section 106 Reports, SHPO consultation packets, NEPA Audit Reports, and other related documents for various telecommunications industry clients. NEPA Technical Manager for multiple telecommunications industry clients in the western United States. Served as the primary point of contact with multiple state and federal agencies.

Assisted in subsurface investigations at heavily industrialized and commercially developed properties. Subsurface investigations included the installation of soil borings, characterization of soils, and subsequent sampling of soil and groundwater. Oversaw geophysical surveys.

Evaluated proposed microwave installations, LTE installations and underlying support structures for compliance with environmental, FAA, and FCC regulations. Tracked and managed over 700 microwave sites in two markets. Worked closely with the client, construction managers, turf vendors, engineers, and RF safety engineers to obtain and track regulatory compliance documentation.

Managed a database and scheduled quarterly reporting for 45 leaking underground storage tank (LUST) cases under regulatory direction. Prepared Groundwater Monitoring Reports, NPDES Quarterly Reports, Subsurface Investigation Reports, Remediation Work Plans, Sensitive Receptor Surveys, and UST Cleanup Fund submittals. Collected soil and groundwater samples for laboratory analysis.

Performed regulatory compliance audits for a major telecommunications carrier. Provided solutions and established protocols for ensuring compliance.

Speaking

Introductory Geology and Environmental Science, CSU Chico, Chico, California. Laboratory Instructor for Introductory Geology and Environmental Science courses at California State University, Chico.

Highlights

Over 20 years of experience in the environmental and engineering consulting industry
Property Condition Assessments (PCAs)
Fannie Mae, Freddie Mac, and HUD due diligence

Experience Summary

Mr. Lambson is a true veteran of the commercial real estate services industry. He has over 20 years of experience managing and performing environmental and engineering consulting projects on a national level. Mr. Lambson serves as a Principal for Partner and is located in Partner's San Diego County office. Mr. Lambson currently provides client management and consulting to a nationwide client base and specializes in advising "equity" clients during the acquisition phase of commercial property transactions in the U.S., Mexico, and Canada.

Mr. Lambson has assisted clients on over 10,000 commercial real estate transactions throughout his career. His due diligence resume includes experience at all levels, and includes advising REITs, developers, property managers, retail companies, commercial real estate brokers, mortgage brokers, attorneys, lenders, universities, and real estate investment groups with the following nationwide services:

- Property Condition Assessments (PCAs)
- Individual Building System Inspections for Roof, Mechanical Electrical Plumbing (MEP), Elevator, Structure, Façade, and ADA/Accessibility
- Phase I Environmental Site Assessments (ESAs)
- Phase II Subsurface Investigations (Soil and groundwater sampling and analysis)
- Phase III Environmental Remediation Services
- Asbestos, Lead, Radon, Mold Sampling
- Seismic and Structural Assessments (PMLs)
- Energy Audits, Benchmarking, AB1103 Energy Disclosure, and LEED-related services
- Hydrology, Water Conservation and Efficiency
- Fannie Mae / Freddie Mac / HUD Due Diligence
- Geotechnical and Soils Reports
- Zoning Reports
- ALTA Surveys

Building Sciences

Property Condition Assessment, MEP Report, Roof Report, Elevator Report, Structural and Seismic Assessment for a high-profile Class A office campus acquisition in the San Francisco Bay Area

ADA Compliance and Accessibility Reviews for a national bank branch portfolio

Fannie Mae Property Condition / Physical Needs Assessment services for a 5400-unit multifamily portfolio in Nevada

Environmental Assessments
Phase I and Phase II Environmental Assessments for a 75-acre aerospace facility in the Northwest United States

Over 500 Phase I Environmental Site Assessments for a national fast-food chain

Environmental consulting for over 1 million acres of desert land in California, Nevada, and Arizona

Land Surveys
ALTA Surveys for 2400-unit apartment portfolio in the Midwest

Multi-Site Portfolios
113-site office portfolio acquisition for a national REIT

122-site hotel portfolio for a national lending institution

EXECUTIVE SUMMARY

This firm conducted a Phase I Environmental Site Assessment (ESA) for a proposed industrial development located at the southeast corner of the intersection at Ethanac and Evans Roads in Menifee, California. This Phase I ESA was conducted in conformance with American Society for Testing and Materials (ASTM) E1527-13, and All Appropriate Inquiries (AAI) set forth in 40 CFR (Code of Federal Regulations) part 312. This Phase I ESA also incorporates the procedures set forth in the recently approved ASTM E1527-21.

Based on our interviews, subject property reconnaissance, and review of historical aerial photographs and topographic maps, the subject property was vacant land dating back to the early 1900s, with dryland and/or irrigated farming dating back to at least 1938, continuing to the present day. Relatively recent farming practices have been reportedly performed without the use of chemicals, including fertilizers, herbicides, and pesticides.

There are three sites, not including the subject property, listed in environmental regulatory databases within 1 mile of the subject property. Based on our research and Vapor Encroachment Screen (VES), no environmentally impaired properties have current or former releases of hazardous substances and/or petroleum products that are known to have migrated to and/or impacted the subject property, and therefore, a vapor encroachment condition (VEC) can be ruled out for the subject property.

The agricultural farming use of the subject property is an environmental concern, however, it is not anticipated to have an adverse environmental impact to the planned industrial development of the subject property.

The only way to confirm our opinion regarding the impact to soils at the subject property from agricultural farming use would be to perform soil sampling and subsequent laboratory analysis and data evaluation for arsenic and organochlorine pesticides.

This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the subject property.

INTRODUCTION

During December 2021 to March 2022, a Phase I ESA was conducted by this firm for a proposed industrial development, Assessor's Parcel Number (APN) 331-060-018, located at the southeast corner of the intersection at Ethanac and Evans Roads in Menifee, Riverside County, California. The subject property is currently vacant land with agricultural use (farming), and is planned for industrial development.

The Phase I ESA was conducted in conformance with the Standard Practice for Environmental Site Assessments: Phase I ESA Process, ASTM E1527-13, and AAI set forth in 40 CFR Part 312. The purpose was to identify RECs that may be associated with the subject property. A REC means: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A controlled recognized environmental condition (CREC) is a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition (HREC) is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). An HREC is not a REC. A de minimis condition is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC. This Phase I ESA also incorporates the procedures set forth in the recently approved ASTM E1527-21, which is pending approval from the United States Environmental Protection Agency for its compliance with AAI.

The approximate location of the subject property within its regional setting is presented on an Index Map (Figure 1).

The findings of our Phase I ESA, as well as our opinions, conclusions, and recommendations, are presented within the following sections of this report.

NON-SCOPE CONSIDERATIONS

The following list (not all-inclusive) of environmental issues are outside the scope of ASTM E1527-13 and E1527-21, and AAI:

- Asbestos-containing building materials unrelated to releases into the environment;
- Biological agents;
- Cultural and historic resources;
- Ecological resources;
- Endangered species;
- Flood zone;
- Health and safety;
- High voltage power lines or other sources of electromagnetic radiation;
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment;
- Industrial hygiene;
- Lead-based paint unrelated to releases into the environment;
- Lead in drinking water;
- Methane;
- Mineral resources;
- Mold or microbial growth conditions;
- Natural hazards;
- Naturally-occurring radon;
- PCB (polychlorinated biphenyl)-containing building materials (including interior fluorescent light ballasts, paint, and caulk);
- Regulatory compliance;
- Substances not defined as hazardous substances (including some substances referred to as emerging contaminants) unless or until such substances are classified as a CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) hazardous substance; and
- Wetlands.

METHODOLOGY AND PROCEDURES

The following list is a summary of the methodology and procedures used during this Phase I ESA:

- Previously prepared professional reports, including environmental, geotechnical, etc., were reviewed as available for the subject property and/or adjoining properties.

- Per ASTM E1527-13 and E1527-21, and AAI, User provided information, as available, was evaluated with respect to subject property history, usage, and environmental concerns.

- A general review of the physical setting of the subject property, including topography, geology, and groundwater hydrology, was performed. This review, in part, provides information regarding the potential for groundwater to be contaminated, the potential pathways for contaminant transport, and the potential for a vapor encroachment condition.

- Historical maps, aerial photographs, fire insurance maps, city directory information, and other records and information were researched and examined, as available and warranted, to investigate the use of the subject property and surrounding area.

- As available, person(s) knowledgeable about the subject property were interviewed to obtain any known information regarding property usage and potential environmental concerns.

- Concurrent with our public and governmental agency interviews and literature research, a reconnaissance of the subject property and observations of adjoining properties were conducted. The reconnaissance was conducted in order to determine current uses of the subject property and adjoining properties and the potential for soil and/or possible groundwater contamination based on aboveground visual observation.

- During this Phase I ESA, public regulatory agencies, potentially including environmental, building, etc., were contacted directly or online research for information regarding permits, underground storage tanks (USTs), hazardous materials incidents, and general information about the subject property and where

warranted, adjoining properties, to ascertain present and past uses with respect to environmental concerns.

- Federal, state, local, tribal, and proprietary lists and databases were reviewed to ascertain the presence of known environmentally impaired sites at the subject property or within the immediate area, and to determine their impact, if any, to the subject property.

- As part of the Phase I ESA, a Vapor Encroachment Screen was conducted to evaluate whether a vapor encroachment condition exists, based on the information obtained during the Phase I ESA.

- More details regarding the above methodology and procedures are described in other sections of this report.

USER PROVIDED INFORMATION

ASTM E1527-13 and E1527-21 defines a User as the party seeking to use Practice E1527 to complete an environmental site assessment of the (subject) property. A User may include, without limitation, a potential purchaser of (subject) property, a potential tenant of (subject) property, an owner of the (subject) property, a lender, or a property manager.

Under ASTM E1527-13 and E1527-21, and AAI, specific tasks are assigned to the User that will help identify the possibility of RECs in connection with the subject property. AAI requires these tasks be performed by or on behalf of a party seeking to qualify for a landowner liability protection to CERCLA liability. These tasks do not require the technical expertise of an Environmental Professional, and are generally not performed by Environmental Professionals performing a Phase I ESA. The User may provide the information gathered from these tasks, including the following:

- Any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state or local law;

- Any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law;

- Specialized knowledge or experience (that is material to RECs in connection with the property) of the User related to the subject property or nearby properties (for example, is the User involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that the User would have specialized knowledge of the chemicals and processes used by this type of business);

- Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (reason for significantly lower purchase price, such as contamination is known or believed to be present at the subject property);

- Commonly known or reasonably ascertainable information about the subject property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases (such as the past uses of the subject property, specific chemicals that are present or once were present at the subject property, spills or other chemical releases that have taken place at the subject property, and any environmental cleanups that have taken place at the subject property);

- Any obvious indicators that point to the presence or likely presence of contamination at the subject property, based on the knowledge and experience of the User related to the subject property; and

- Other information, including the reason why the Phase I ESA is required and/or is being performed, the type of property and type of property transaction (sale, purchase, exchange, etc.), the complete and correct address for the subject property, the scope of services desired for the Phase I ESA, identification of all parties who will rely on the Phase I ESA report, identification of the site contact and how the contact can be reached, any special terms and conditions which must be agreed upon by the Environmental Professional, and any other knowledge or experience with the subject property that may be pertinent to the Environmental Professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the subject property and its environmental condition).

A User Questionnaire was completed by one of the current owners (a User) of the subject property. The information provided in the completed questionnaire does not suggest any RECs, HRECs, or CRECs are associated with the subject property. Farming is indicated

to have occurred at the subject property since 2014. No environmental cleanups nor environmental site assessments have been conducted since ownership began in 1988, per the completed questionnaire. A copy of the completed User Questionnaire is provided in Appendix A.

Environmental Cleanup Liens and Activity and Use Limitations

Under AAI and ASTM E1527-13, a search for environmental cleanup liens and AULs must be conducted, typically by a User. We were not provided this information by a User. However, the subject property, whose researched historical use has been vacant farm land, did not appear in the state and/or federal liens, deed, or activity/use limitation databases in The Environmental Data Resources, Inc. (EDR) Radius Map™ Report with Geocheck® (Appendix F), and no records were found for the subject property on file with the County of Riverside Department of Environmental Health (CRDEH), which suggests there are no environmental cleanup liens or AULs associated with the subject property.

PHYSICAL SETTING

Topography

The subject property consists of relatively planar land that is relatively flat, with a very gentle fall to the northwest. Elevations across the subject property are estimated to be approximately 1,418 to 1,419 feet above mean sea level (amsl).

Regional Geology

The subject property lies along the north-central portion of the Perris block of the northern Peninsular Ranges geologic province of southern California. While the Perris block is considered to be a relatively stable structural block, it is bounded by active faults. These faults include the Elsinore fault zone on the west, the San Jacinto fault zone on the east, and the Cucamonga fault zone on the north. The Perris block is underlain by rocks of the Peninsular Ranges batholith, a very large mass of crystalline igneous rocks of Cretaceous age and with no known floor, and by prebatholithic metasedimentary and metavolcanic rocks of older ages.

The Perris block has a series of erosional surfaces, marked by low topographic relief and capped with unconsolidated alluvial sediments stripped from the surrounding highlands. The subject property and immediate surrounding properties were mapped by the California

Division of Mines and Geology as being underlain by deposits of old alluvial fan deposits of late to middle Pleistocene age, described as reddish brown, gravel and sand alluvial fan deposits, indurated, and highly dissected. These deposits, in places, include thin layers of Holocene age (Morton et al., 2003).

The interior of the Perris Plain is considered to be relatively stable with few known active faults. However, this plain is bounded by active faults. These include the Elsinore fault zone on the west, the San Jacinto fault zone on the northeast, the San Andreas fault zone on the north, and the Agua-Tibia fault zone on the south. As the subject property is located near the western margin of the Perris Plain, the Elsinore fault is the closest known active fault in relation to the subject property. At its closest approach, the Elsinore fault is located approximately 9 miles southwest of the subject property (USGS, 2022a).

Groundwater Hydrology

In order to estimate the approximate depth to groundwater in the local area of the subject property, a search was conducted for local groundwater well level measurements within the water well database information provided in the California Department of Water Resources (CDWR) Water Library Data website (CDWR, 2022).

The closest well in the CDWR database is an Eastern Municipal Water District (EMWD) well, State Well No. 05S03W16K001S (Well “EMWD14429”), located approximately 0.4 mile to the south-southwest of the subject property. Groundwater level data for this well was limited to one reading in October 2021. A measuring point elevation of 1,425± feet amsl was reported. The depth to groundwater from the measuring point was approximately 62 feet (elevation of 1,363± feet amsl). Two other wells are located within approximately 0.6 mile of the subject property. One of these wells, State Well No. 05S03W17A001S, located west-southwest of the subject property, has groundwater level data limited to one reading in 1995. A measuring point elevation of 1,424± feet amsl was reported. The depth to groundwater provided was 22 feet bgs (elevation of 1,402± feet amsl). The second of these wells, Well “EMWD12765” (no State Well No. reported), located south-southwest of the subject property, has groundwater level data ranging from October 2011 to October 2012. A measuring point elevation of 1,428± feet amsl was reported. The depth to groundwater from the measuring point has ranged from approximately 66 to 70 feet (elevations from 1,358± to 1,362± feet amsl).

Based on the above groundwater elevations and subject property elevation around 1,418 feet amsl, groundwater beneath the subject property is anticipated to be present at

depths ranging from approximately 16 to 60 feet bgs. The most recent groundwater level data suggests the current depth to groundwater beneath the subject property is on the order of 50 to 60 feet bgs.

Based on the fall in local ground surface topography towards the San Jacinto River approximately 1.5 miles northwest of the subject property, groundwater beneath the subject property is estimated to flow in a northwesterly direction.

HISTORY OF SITE USAGE

To obtain a history of previous subject property usage, a search was conducted as warranted and resources were available for historical fire insurance and topographic maps or images, aerial photographs or images, County Assessor's parcel information, building records, and city directory information. An attempt was made to contact persons knowledgeable of the use and history of the subject property.

Sanborn Fire Insurance Maps

No coverage of historical fire insurance maps was available for the subject property. The Certified Sanborn® Map Report from EDR, which indicates the subject property is unmapped, is provided in Appendix B.

Historical Topographic Maps

Online historical topographic map images of the subject property and surrounding properties were reviewed for the years 1901, 1942, 1943, 1953, 1954, 1968, 1973, 1975, 1979, 1985, 2012, 2015, and 2018 (NETR, 2022; USGS, 2022b).

The 1901 map image is derived from a map at a scale of 1:125,000. This map image appears to show the subject property as vacant land along the south side of an east-west road along the alignment for present day Ethanac Road. There is a residence-sized structure shown near the subject property and along the south side of Ethanac Road. It appears this structure is offsite to the west and across the present day Evans Road. Otherwise, the surrounding properties are indicated to be vacant land. Approximately 1,950 feet to the east is a north-south road along the present day I-215 Highway.

The 1942 and 1943 map images, derived from maps at a scale of 1:62,500, show the subject property and immediate surrounding properties as vacant land. The residence-sized structure previously shown near and west of the subject property is absent. Approximately 930 feet to the southeast, a linear drainage feature is shown, likely an artificial, earthen channel. Within the local vicinity of the subject property are several residence-sized structures, including three along the artificial drainage channel.

The 1953, 1954, and 1968 map images are essentially the same, derived from maps at a scale of 1:24,000, and show the subject property and surrounding properties as vacant land. The road along Ethanac Road bordering the subject property to the north is indicated to be a paved road. The road to the east along the present day I-215 Highway is labeled with 395 (United States Route Highway).

The 1973 and 1975 map images are essentially the same, derived from maps at a scale of 1:24,000, and show the subject property and surrounding properties as vacant land. Frontage roads along the present day Case Road and Encanto Drive run along side United States Route 395 and flare out to meet Ethanac Road, likely to accommodate future highway on- and off-ramps.

The 1979 and 1985 map images are essentially the same, derived from maps at a scale of 1:24,000, and show the subject property and surrounding properties as vacant land. A dirt road is depicted leading south from Ethanac Road along the present day Evans Road, bordering the subject property to the west. Another dirt road (Barnett Road) is depicted leading north from Ethanac Road approximately 800 feet east-northeast of the subject property and near the highway frontage road (Case Road).

The map images from 2012, 2015, and 2018 are essentially the same, derived from maps at a scale of 1:24,000. These map images generally do not show structural features. Based on the infrastructure shown, increased structural development has occurred in areas away from the subject property, but within the local vicinity.

Aerial Photograph Review

Digital aerial photograph images provided by EDR, from 1938, 1949, 1953, 1961, 1967, 1978, 1985, 1989, 1997, 2002, 2006, 2009, 2012, and 2016, at a scale of roughly 1"=500', were reviewed to investigate the past use of the subject property and surrounding properties. Google Earth Pro computer program recent (2002 to 2021) and online (NETR, 2022) historical digital aerial images were used to enhance our review and/or provide

supplementary review. Copies of the historical aerial photograph images provided by EDR with the approximate boundaries of the subject property are provided in Appendix C.

A brief summary of the subject property and surrounding conditions during the various times, largely as reflected in the EDR aerial photograph images, is given below.

The EDR 1938 digital aerial photograph image shows the subject property and surrounding properties are vacant land that may be under dryland farming. An east-west dirt road is located along the present day Ethanac Road near and north of the subject property. A north-south linear feature, apparently the boundary transition between fields, is evident along the present day Evans Road. Approximately 750 feet to the southeast is an apparent artificial, earthen drainage channel which heads southwest, and then south-southwest.

The EDR 1949 digital aerial photograph image shows the subject property and adjoining properties largely the same as in the 1938 aerial image. However, the properties to the northwest, north, and northeast beyond the present day Ethanac Road are being farmed with an irrigated crop(s). Among these fields for irrigated crop(s) are small, narrow, artificial, earthen drainage channels, possibly irrigation or storm water related. The dirt road along Ethanac Road has been widened.

The EDR 1953 digital aerial photograph image shows the subject property and immediately surrounding properties as mostly dry farm land with crops recently harvested. The linear feature along the present day Evans Road is more pronounced. The property to the north and northeast across the dirt road along Ethanac Road either has a dryland crop present before harvest or may be fallow. The acreage of irrigated crops has been reduced generally to the north beyond Ethanac Road. The previously shown artificial, earthen drainage channel to the southeast appears largely gone, and most of it is farmed over with dryland crop(s).

The EDR 1961 digital aerial photograph image shows the subject property and adjacent properties to the east, southeast, and south as fallow dry farm land. Linear patterns of vegetation are evident along the former drainage channel to the southeast. The linear feature along Evans Road now appears to be a narrow, dirt road.

The EDR 1967 digital aerial photograph image shows the subject property and most or all surrounding properties with dryland crop(s). The dirt road along Ethanac Road is widened, apparently in concert with road construction over 600 feet to the east and northeast along Ethanac and Case Roads.

The EDR 1978 digital aerial photograph image shows the subject property and surrounding properties with irrigated crops. Ethanac Road is now paved along the north side of the subject property. The dirt road along Evans Road is widened and more distinct. Over 1,000 feet to the west of the subject property and south of Ethanac Road, two single-family residences have been built or may still be under construction.

The EDR 1985 digital infrared aerial photograph image is of somewhat poor to moderate quality, but the subject property and adjacent properties to the east, southeast, and south have irrigated crops present. There appears to be an artificial, earthen drainage channel between the subject property and dirt road along Evans Road to the west, across which is now an apparent horse ranch with race track, corral areas, and two structures, likely including a single-family residence and barn or stables. Properties generally north of Ethanac Road appear to be under dryland farming. Approximately 670 feet to the east-northeast of the subject property, near and northwest of the intersection at Ethanac and Case Roads, appears to be a roughly trapezoidal earthen basin of some kind. Over 800 feet to the southeast and south-southeast of the subject property there appear to be residences that have been constructed.

The EDR 1989 digital infrared aerial photograph image is of better quality than the previous image. The subject property and surrounding properties appear to be largely the same as previously shown. The properties generally north of Ethanac Road have irrigated crops. The earthen basin to the east-northeast near the intersection at Ethanac and Case Roads has been truncated, is now more triangular, and apparently has water in it.

The EDR 1997 digital aerial photograph image shows the subject property and immediate surrounding properties largely the same as previously shown. The subject property and adjacent properties to the east, southeast, and south are under dryland farming. The adjoining properties across Ethanac Road to the northwest, north, and northeast appear to be fallow. The basin to the east-northeast has expanded to the north. Over 1,300 feet to the east there appears to have been a gasoline station built, situated along the west side of a new on-ramp associated with the I-215 Highway.

The EDR 2002 digital infrared aerial photograph image shows the subject property and immediate surrounding properties largely the same as previously shown. The subject property and adjoining properties to the north, northeast, east, southeast, south, and southwest appear fallow. The basin to the east-northeast appears filled in.

The EDR 2006 digital aerial photograph image shows the subject property and immediate surrounding properties largely the same as previously shown. All properties, including the subject property, shown previously with farming appear fallow.

The EDR 2009 digital aerial photograph image shows the subject property and adjoining properties to the north, east, southeast, and south as bare soil. However, there are soil furrows running east to west across the subject property and adjacent property to the east, likely for an irrigated crop. The horse ranch to the west across Evans Road has added structures, including apparent canopies and a large, rectangular structure. There is an irrigated crop field to the northwest across Ethanac Road, likely alfalfa. Over 700 feet to the east-northeast, the south end of a retail center (present day “Perris Crossing”), which appears to include a gasoline station, is now present, extending to the north. This retail center, along the west and northwesterly sides of Case Road, is largely complete, but portions are still under construction. Ethanac Road is a widened, divided road coincident and just west of this newly constructed retail center. Adjacent to the west of the far south end of the retail center, and approximately 370 feet northeast of the subject property, is an apparent artificial, earthen channel, likely for storm water drainage. There are concrete features at the west and east ends of this channel which is oriented roughly east to west.

The EDR 2012 digital aerial photograph image shows the subject property and adjoining properties essentially the same as previously shown. Most of the subject property and adjacent property to the east, excluding the south end, appear fallow. The far south end of the subject property and adjacent properties to the east, southeast, and south have an irrigated crop present, possibly alfalfa. Adjoining properties to the southwest and northwest appear to have or recently had irrigated crops. The storm water channel previously noted to the northeast appears to be full of water, and appears wider than previously shown.

The EDR 2016 digital aerial photograph image shows the subject property and adjoining properties largely the same as previously shown. Most of the subject property, excluding the south end, is either fallow or has an irrigated crop, possibly alfalfa. The south end of the subject property and extending offsite to the south has an irrigated row crop present. Another irrigated row crop is present across Evans Road to the southwest. Adjacent to the east of the subject property, and apparent extending beneath and daylighting on the north side of Ethanac Road, is a wide, artificial, earthen channel for storm water drainage. Along both sides of the channel are apparent gravel-covered, dirt access roads. Concrete head wall structures are located along this channel near Ethanac Road.

The Google Earth Pro digital aerial images from 2016 to 2021 show the subject property and adjoining properties largely the same as previously shown. The subject property and adjoining properties to the south, southwest, and northwest underwent changes in vegetation patterns, and were either bare soil, fallow, and/or under dryland or irrigated crop farming. The adjoining or nearby properties to the north, northeast, and east beyond the storm drain channels have remained vacant land, mostly with bare soil. By February 2018, two concrete drive ramp features were added to the wide earthen storm water channel adjacent to the east of the subject property and across Ethanac Road. Between February 2018 and August 2019, road work was performed along Ethanac Road, including widening, dividing, and partial improvement of the paved roadway. By August 2018, a gasoline station was constructed approximately 0.25 mile east-northeast of the subject property between Ethanac Road, Case Road, and off-ramp for the I-215 Highway.

County Assessor's Parcel, Property, and Ownership Information

The subject property is defined by APN 331-060-018, comprising a total of 7.51 acres of property. This parcel is listed as residential land (Homesite/5-19.9 acres) with no associated address (County of Riverside Assessor, 2022). The transfer history suggests the subject property was last purchased in 1988. No property owner name/entity information was available.

A copy of the Assessor's Parcel Map is presented on Figure 2 with the approximate boundaries of the subject property.

Building Permit Records

Based on historical research, including topographic map and aerial photograph images, and recent site reconnaissance, the subject property has historically been vacant land with no known permanent structures or buildings present. An online search of County of Riverside building records yielded no records (County of Riverside, 2021; County of Riverside Transportation and Land Management Agency, 2021).

City Directory Information

Historical city directory information was not researched, as the subject property and surrounding properties have been largely vacant throughout their researched history, except for the horse ranch to the west across Evans Road.

Interview

On December 31, 2022, Mr. Mathew L. Hunt with this firm submitted interview questions by email to the real estate broker for the property transaction for the subject property. On January 3, 2022, one of the current subject property owners, Mr. Joong H. Choh, emailed responses to these questions. Based on his answers, the subject property was purchased in 1988, with periodic farming of wheat with no herbicides or pesticides used. Mr. Choh stated there are no onsite wells. He is unaware of underground tanks or structures at the subject property, and knows of no environmental contamination issues at the subject property or surrounding properties. Mr. Choh provided us with the contact information for Mr. Donald Bean, the onsite tenant farmer, if we needed more information regarding onsite farming practices.

On January 5, 2022, Mr. Mathew L. Hunt with this firm interviewed Mr. Cassidy Bean, son of Mr. Donald Bean. Mr. Cassidy Bean indicated no fertilizer is used onsite for their wheat crops grown onsite which is sometimes irrigated. He indicated the previous onsite farmer, Mr. Clyde Smith, farmed wheat dating back to the 1970s, possibly earlier. Reportedly, Mr. Smith used no chemicals for his wheat crop.

SITE RECONNAISSANCE

Site reconnaissance was conducted by Mr. Mathew L. Hunt with this firm on January 13, 2022. To orient our subject property reconnaissance, a copy of a recent color aerial image was obtained for our use. This Recent Color Aerial Image with approximate site boundaries is presented on Figure 3.

The subject property encompasses approximately 7.5 acres at the southeast corner of the intersection at Ethanac and Evans Roads, and is vacant, undeveloped land. The south end, approximately the lower 1/6th of the subject property, is the north end of a field with an alfalfa crop. This crop seems generally healthy with sporadic evidence of stressed plants. Along the north side of the alfalfa field onsite is a strip of a high concentrations of weeds (mostly common mallow). The remainder of the subject property is disced soil in various states, some very recently disced and some with weeds growing. This area of the subject property is mostly bare soil at ground surface. Along the east subject property boundary, where it borders an area that includes an open, wide storm water drainage channel, is an approximate 6-foot high metal chain-link fence. Tumbleweeds are growing against this fence. Along this fence are survey stakes and yellow paint.

The only evident onsite utility is underground telecommunications running through the far north end and along the roadway for Ethanac Road. Other utilities were observed to be located along the periphery of the subject property, including utility poles and lines along the west boundary, an approximate 1-foot white plastic irrigation pipe along the west boundary, and some type of apparent vent structure, possibly related to a water utility of some type, observed along the curving northeast boundary among tumbleweeds approximately 62 feet south of the paved road for Ethanac Road. A similar vent structure was observed along a sidewalk on the north side of Ethanac Road. A pole-mounted, electrical transformer was observed on a utility pole with no signs of leakage near the southwest corner of the subject property. A sign for recycled water near this pole and the 1-foot irrigation line suggests the irrigation line may be utilizing recycled water.

Small amounts of non-hazardous trash and debris were observed onsite, mostly windblown, but some illegally dumped, including a tire, paper, plastic, glass, styrofoam, cardboard, wood, metal, and small pieces of concrete and asphalt.

No evidence of the following were observed onsite, except as mentioned above: petroleum products, solvent degreasers, aboveground storage tanks, underground storage tanks, heating oil use, drums, unidentified containers with hazardous substances/petroleum products, pools of liquid likely to contain hazardous substances/petroleum products, polychlorinated biphenyls (PCBs), stressed vegetation, fill areas with solid waste, sumps, pits/ponds/lagoons, wells, and stormwater and/or wastewater generated from industrial/manufacturing processes. No strong, pungent, or noxious odors were detected.

Adjoining Properties

The subject property is located in a historically rural agricultural area that has begun replacement over time with commercial and high density residential developments. Ethanac Road, a divided, 4-lane, asphalt concrete-paved, partially improved roadway borders the subject property to the north. Adjacent to the west is a strip of property that includes a drainage or low area, utility poles and lines, and an approximate 1-foot white plastic irrigation line partially exposed, followed by a dirt road along Evans Road. During our reconnaissance of the subject property, drainage water was actively bubbling up into to small drainage channels which merged into one, flowing to the north to a low-lying area within this strip of offsite property. The source of this water appeared to be wash or rinse water from an active wash rack at the horse ranch (“Rancho Fortunado”) across Evans Road to the west of the subject property. The low-lying area within the strip of offsite property likely accumulate storm water during significant precipitation events.

These drainage waters do not appear to reach the subject property. A 5-quart plastic container with approximately 1 gallon of waste oil and no associated soil staining or other signs of leakage was observed towards the north end of the strip of offsite property. To the southwest across Evans Road and adjacent to the south of the subject property are alfalfa crops. Adjacent to the east is a wide storm water drainage channel, followed by vacant land. This wide storm drainage channel emerges north of Ethanac Road, across from the subject property. Another, smaller storm drain channel or possibly narrow basin is present to the northeast and across Ethanac Road. The properties to the north and northeast across Ethanac and beyond the storm water drainage channels are vacant land. To the northwest across Ethanac Road and the wide storm water channel is a field with an irrigated crop, likely alfalfa.

Color photographs of the subject property and adjoining properties are provided in Appendix D.

REGULATORY AGENCY RECORDS REVIEW

For records relating to environmental compliance and hazardous materials/waste within the County of Riverside, the CRDEH generally is the lead agency. The California State Water Quality Control Board, Santa Ana Region (CRWQCB-SAR) or CRDEH may be the lead agency for soil and/or groundwater investigations and remediation. These agencies were contacted, directly or online, for records they may have for the subject property and/or nearby properties. Online South Coast Air Quality Management District (SCAQMD) and California DTSC records were also searched.

County of Riverside Department of Environmental Health

On December 28, 2021, a request was emailed to the CRDEH to review records for an address range (26300-26700) along Ethanac Road, inclusive of the address at 26481 Ethanac Road for the offsite horse ranch to the west across Evans Road and coincident with the subject property and nearby properties. In a letter dated January 12, 2022, the CRDEH indicated no records were found. A copy of the CRDEH records response letter is provided in Appendix E.

California Regional Water Quality Control Board - Santa Ana Region

The California State Water Resources Control Board maintains the online GeoTracker database, which includes CRWQCB-SAR records for: 1) cleanup sites, including

leaking underground storage tank (LUST) sites, cleanup program sites, military cleanup sites, and California Department of Toxic Substances Control (DTSC) cleanup sites; 2) permitted facilities, including waste discharge requirements sites, permitted USTs, DTSC hazardous waste sites, land disposal sites, irrigated lands regulatory program sites, and oil/gas sites; and 3) other sites, including project sites, non-case information sites, sampling points - public, and field points. This database was searched for records that may pertain to the subject property and adjoining properties (California State Water Resources Control Board, 2022).

No sites were found at the subject property. The closest plotted site is Circle K Store #2706013 located at 3150 Case Rd, Building I, approximately 790 feet east-northeast of the subject property. This site is a UST site with no apparent reports of leakage.

California Department of Toxic Substances Control

The online California DTSC Hazardous Waste Tracking System (HWTS) was searched for hazardous waste manifest records available for the subject property and adjoining or nearby properties along Ethanac and Evans Roads (California DTSC, 2022). No records were found for the subject property or nearby properties.

South Coast Air Quality Management District

Online SCAQMD records (Facility INformation Detail [FIND] database) were searched for the subject property and adjoining or nearby properties along Ethanac and Evans Roads (SCAQMD, 2022). No records were found for the subject property or nearby properties.

ENVIRONMENTAL DATABASE REVIEW

EDR was contacted to provide an environmental database search for the subject property (“target property” in EDR’s database report). The database search provides information regarding landfills, USTs, hazardous waste generators, etc., at the subject property and surrounding properties in accordance with ASTM Standards and AAI. Three sites, not including the subject property, were found in EDR’s search of available government records within the respective search radii. A copy of the EDR database report, which provides a complete list of the federal, state, tribal, and proprietary records searched, is provided in Appendix F.

ENVIROSTOR

The California DTSC Site Mitigation and Brownfields Reuse Program's ENVIROSTOR database identifies sites that have known contamination or sites for which there may be reasons to investigate further. There is one ENVIROSTOR site listed 0.5 mile from the subject property. This site, The Club K-8 School at Evans Road and Nova Lane, is a school investigation site for property with an agricultural use history, including row crops. Preliminary Endangerment Assessment was conducted in April 2003, with a regulatory closure ("No Further Action") status as of April 2003.

UST

The UST database is maintained by the State Water Resources Control Board (SWRCB), and lists all registered USTs. This database lists one site, Emarra, Inc. at 1765 Ethanac Road which is located approximately 0.6 mile east of the subject property. The database erroneously indicates this site is located approximately 26 feet north-northwest of the subject property, as the latitude and longitude coordinates plot this site within the Ethanac Road street. Three USTs permitted under the CRDEH are indicated to be present at this site with no other pertinent information.

CERS HAZ WASTE

The CERS HAZ WASTE (California Environmental Protection Agency (Cal EPA) Regulated Site Hazardous Waste) database is a listing of sites in the Cal EPA Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA Large Quantity Hazardous Waste Generator programs. This database lists one site, Emarra, Inc. at 1765 Ethanac Road which is located approximately 0.6 mile east of the subject property. As previously stated, the database plots this site in error as being approximately 26 feet north-northwest of the subject property. This site is listed as a hazardous waste generator.

CERS TANKS

This database is a list of sites in the California Environmental Protection Agency Regulated Site Portal which fall under the Aboveground Petroleum Storage and UST regulatory programs. One CERS TANKS site, Emarra, Inc. at 1765 Ethanac Road, is listed in this database. This site is located approximately 0.6 mile east of the subject property.

As previously stated, the database plots this site in error as being approximately 26 feet north-northwest of the subject property. This site is indicated to have UST(s) present.

RCRA NonGen/NLR

RCRAInfo is EPA's comprehensive information system that includes selective information on sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. Non-Generators do not presently generate hazardous waste. One site, Waste Management of Moreno Valley (incorrectly spelled as Marino Valley) at 26824 Ethanac Road, is listed in this database over 0.1 mile east-northeast of the subject property with no listed violations.

Orphan Summary

The Orphan Summary within the EDR database report, which is a list of all sites whose location is not readily identified (mapped), and may be at or near the subject property, was reviewed. No sites are listed in the Orphan Summary at or adjoining the subject property. The only site listed is a Home Depot located 0.3 mile northeast of the subject property.

Other Databases

California Geologic Energy Management Division

The California Geologic Energy Management Division (CalGEM) maintains a list of all producing and abandoned oil and gas wells within the State of California. We reviewed the online CalGEM Well Finder, which indicates no abandoned or producing gas and/or oil wells have been located within 1 mile of the subject property (CalGEM, 2022).

VAPOR ENCROACHMENT EVALUATION

As part of this Phase I ESA, a VES was conducted to determine if a VEC exists, based on the information obtained during the Phase I ESA. A VEC is the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property (i.e., subject property).

Vapor Encroachment Screen

A VES, comprised of Tier 1 screening, was conducted by this firm for the subject property. The VES was conducted in general accordance with the Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, ASTM E2600-15. Although not required to satisfy the requirements of the Phase I ESA under ASTM E1527-13, ASTM E2600-15 was chosen as a methodology to evaluate potential contaminant vapor concerns at or adjoining the subject property.

The subject property historical use has been rural residential and agricultural use (dryland farming). The subject property is located in a historically rural, agricultural area that has increasingly become replaced with commercial and high density residential development. The subject property and surrounding area are anticipated to be underlain by near surface fill/topsoil and older alluvial fan soil materials comprised of interbedded gravels and sands with varying amounts of clays and silts. Based on the local geology and groundwater hydrology, groundwater, historically reported to be more shallow than 30 feet bgs, is considered to be a potential source of impacted soil vapor into the shallow soils of the subject property.

Based on the results of Tier 1 screening, utilizing The EDR Radius Map™ Report with GeoCheck® and research of the history of the subject property and adjoining properties, no sites within 0.33 mile of the subject property were identified as current and/or former potential sources of soil vapor intrusion or encroachment, such as leaking (current or former) USTs, dry cleaners, etc. Based on the results of the VES, Tier 1 screening, a VEC at the subject property can be ruled out.

FINDINGS

Based on our interviews, subject property reconnaissance, and review of historical aerial photographs and topographic maps, the subject property was vacant land dating back to the early 1900s, with dryland and/or irrigated farming dating back to at least 1938, continuing to the present day. Relatively recent farming practices have been reportedly performed without the use of chemicals, including fertilizers, herbicides, and pesticides.

There are three sites, not including the subject property, listed in environmental regulatory databases within 1 mile of the subject property. Based on our research and Vapor Encroachment Screen, no environmentally impaired properties have current or former releases of hazardous substances and/or petroleum products that are known to have

migrated to and/or impacted the subject property, and therefore, a vapor encroachment condition can be ruled out for the subject property.

Data Gaps

Under AAI and ASTM E1527-13 and E1527-21, data gaps that remain after the conduct of all required activities must be identified. The source of information consulted to address the data gaps should be identified, and the significance of the data gaps with respect to our ability to identify conditions indicative of releases or threatened release of hazardous substances on, at, in, or to the property should be addressed.

There are no significant data gaps remaining after our conduct of AAI and ASTM E1527-13 and E1527-21.

OPINIONS

The agricultural farming use of the subject property is not anticipated to have an adverse environmental impact to the planned industrial development of the subject property.

CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM 1527-13 and E1527-21, and AAI, of a proposed industrial development, APN 331-060-018, located at the southeast corner of the intersection of Ethanac and Evans Roads in Menifee, California, the subject property. This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the subject property.

The agricultural farming use of the subject property is an environmental concern which can be addressed by sampling and analysis of the onsite soils.

ADDITIONAL INVESTIGATION

The only way to confirm our opinion regarding the impact to soils at the subject property from agricultural farming use would be to perform soil sampling and subsequent laboratory analysis and data evaluation for arsenic and organochlorine pesticides.

STATEMENT OF QUALIFICATIONS

Mr. John Leuer is the President of LOR Geotechnical Group, Inc., founded in 1988. As a cofounder and President of the company, Mr. Leuer has managed LOR through hundreds of Phase I Environmental Site Assessments, as well as numerous Phase II Environmental Site Assessments and remediation projects, primarily remedial excavation. Mr. Leuer has over 30 years experience in the geotechnical and environmental fields. Mr. Leuer has substantial experience coordinating projects for many city, county and state agencies, as well as in the public sector, gaining a reputation for being responsive to clients needs while providing strong technical expertise. LOR Geotechnical Group, Inc. is one of three firms that previously provided report review for underground storage tank closure for the County of San Bernardino, Fire Department Hazardous Materials Division.

Mr. Leuer holds a B.S. in Civil Engineering from Cal State University at Northridge. He is a registered Geotechnical and Civil Engineer in the State of California. Mr. Leuer is a member of the American Society of Civil Engineers.

Mr. Mathew L. Hunt has over 20 years experience in the environmental field. Mr. Hunt works under LOR Geotechnical Group's environmental operations and has conducted over 350 Phase I Environmental Site Assessments for the private and public sectors. The properties have ranged from agricultural to residential to commercial/industrial. In addition to his experience with environmental assessments for property transfers, he has worked on projects that require mitigation prior to development. Mr. Hunt is well versed in hazardous waste sampling and characterization methodologies in soil and groundwater regimes for groundwater monitoring, site assessment, and site remediation. Projects have ranged from leaking USTs at gasoline stations to commercial and government (including Superfund/CERCLA sites) projects involving metals, perchlorate, and solvents.

Mr. Hunt has a B.S. in soil science from California Polytechnic State University, San Luis Obispo and a M.S. in soil and water science from the University of California, Riverside.

LIMITATIONS

This report was prepared solely for the use and benefit of LOR's client, Compass Danbe Real Estate Partners II, LLC, and their assigns, lenders, and affiliates. They may release this information to third parties, who may use and rely upon this information at their discretion. However, any use of or reliance upon this information by a party other than

Compass Danbe Real Estate Partners II, LLC, and their assigns, lenders, and affiliates, shall be solely at the risk of such third party and without legal recourse against LOR Geotechnical Group, Inc.; its subsidiaries and affiliates; or their respective employees, officers, or directors; regardless of whether the action in which recovery of damages is sought is based upon contract, statute, or otherwise.

The content and conclusions provided by LOR in this assessment are based on information collected during our investigation, which may include, but is not limited to, visual site inspections, interviews with the site owner, regulatory agencies and other pertinent individuals, a review of available public documents, and our professional judgement based on said information at the time of preparation of this document. Any subsurface samples results and observations presented herein are considered to be representative of the area of investigation; however, soil conditions may vary between sample locations and may not necessarily apply to the general site as a whole. If future subsurface or other conditions are revealed which may vary from these findings, the newly-revealed conditions must be evaluated and may invalidate the conclusions of this report.

This report has been prepared in accordance with generally accepted practices using standards of care and diligence normally practiced by recognized consulting firms performing services of a similar nature. LOR Geotechnical Group, Inc. (LOR) is not responsible for the accuracy of information provided by other individuals or entities which is used in this report. This report presents our professional judgement based upon data and findings identified in this report, and the interpretation of such data based upon our experience and background, and no warranty, either expressed or implied, is made. The conclusions presented are based upon the current regulatory climate and may require revision if future regulatory changes occur.

TIME LIMITATIONS

The findings of this report are valid as of this date. Changes in the condition of a property can, however, occur with the passage of time, whether they be due to natural processes or the work of man on this or adjacent properties. In addition, changes in the Standards-of-Practice and/or Governmental Codes may occur. Due to such changes, the findings of this report may be invalidated wholly or in part by changes beyond our control. Therefore, this report should not be relied upon after a significant amount of time without a review by LOR Geotechnical Group, Inc., verifying the suitability of the conclusions and recommendations.

Report Viability

Based on ASTM E1527-13 and E1527-21 and AAI, certain components of this report are no longer valid after 180 days of their being performed, including: 1) interviews with past and/or present subject property owners, operators, and/or occupants; 2) visual inspection of the subject property and adjoining properties; 3) review of federal, tribal, state, and local government records; and 4) declaration by the Environmental Professional. Once this 180-day period has expired for any of the above components, this report should be updated or revised to meet the requirements for continued viability under the ASTM and AAI standards. Further, it is the User's responsibility to complete a search for recorded environmental cleanup liens, which is a fifth component that is no longer valid after 180 days. If requested, LOR can also perform the search for recorded environmental cleanup liens.

The above components, excluding the search for recorded environmental cleanup liens, have been performed by Mr. Mathew L. Hunt, an Environmental Professional with LOR, on the following dates:

- Interviews - January 3, 2022
- Visual inspection of subject property and adjoining properties - January 13, 2022
- Review of government records - January 5, 2022
- Declaration of Environmental Professional - March 17, 2022

CLOSURE AND ENVIRONMENTAL PROFESSIONAL STATEMENTS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR part 312.

We appreciate this opportunity to be of service and trust this report provides the information desired at this time. Should questions arise, please do not hesitate to contact this office.

Respectfully submitted,
LOR Geotechnical Group, Inc.

Mathew L. Hunt

Completed ASTM E1527-13 User Questionnaire

APN 331-060-018
Menifee, California

LOR Project No. 23798.2

E1527–21

USER QUESTIONNAIRE

INTRODUCTION

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the User must conduct the following inquiries required by 40 Code of Federal Regulations (CFR) §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by Environmental Protection Agency (EPA) Brownfield Assessment and Characterization grantees. The User should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

(1.) Environmental liens that are filed or recorded against the *subject property* (40 CFR § 312.25).

Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the *subject property* under federal, tribal, state or local law?

None as far as current owners know.

(2.) Activity and use limitations that are in place on the *subject property* or that have been filed or recorded against the *subject property*.

Did a search of land title records (or judicial records where appropriate) identify any activity and land use limitations (AULs), such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the *subject property* and/or have been filed or recorded against the *subject property* under federal, tribal, state, or local law?

None as far as current owners know.

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR § 312.28).

Do you have any specialized knowledge or experience related to the *subject property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *subject property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

None, as far as current owners Know.

(4.) Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated (40 CFR § 312.29).

Does the purchase price being paid for this *subject property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *subject property*?

N/A

(5.) Commonly known or *reasonably ascertainable* information about the *subject property* (40 CFR § 312.30).

Are you aware of commonly known or reasonably ascertainable information about the *subject property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, (a.) Do you know the past uses of the *subject property*? (b.) Do you know of specific chemicals that are present or once were present at the *subject property*? (c.) Do you know of spills or other chemical releases that have taken place at the *subject property*? (d.) Do you know of any environmental cleanups that have taken place at the *subject property*?

(a)Empty land during current ownership. Since 2014, the property was leased the tenant farmer, Mr.Donald Bean,P.O.Box 263,Nuevo, CA ,92567-263, Tel: 951-928-0844 CP:951-205-6726 Fax:951-928-9854)

(b)&(C) WE are not aware of any chemicals nor any spillage on the property...

(d)There has been no environmental claean-ups during the current ownership, as far as we know.

6.) The degree of obviousness of the presence of likely presence of contamination at the *subject property*, and the ability to detect the contamination by appropriate investigation (40 CFR § 312.31).

Based on your knowledge and experience related to the *subject property*, are there any obvious indicators that point to the presence or likely presence of releases at the *subject property*?

No history of contamination. No release as far as we, owners know.

In addition to the above information, certain information should be collected, if available, and provided to the *environmental professional* conducting the Phase I Environmental Site Assessment (ESA). This information is intended to assist the *environmental professional*, but is not necessarily required to qualify for one of the LLPs. The information includes:

(a) The reason why the Phase I ESA is being performed:

ESA has never been performed during the current ownership, since 1988.

(b) The type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.:

(1) Easement for public road & drainage(2006)---in the county public record

(2) Grant Deed to Riverside County Flood Control & Water Conservation District(2005) --- in the county public record

(c) The complete and correct address for the *subject property* (a map or other documentation showing *subject property* location and boundaries is helpful):

Parcel No: 331-060-018
Lots 1228 & 1229 of Romola Farm No.12(Ethank Rd & Evans Rd)

(d) The scope of services desired for the Phase I ESA (including whether any parties to the *property* transaction may have a required standard scope of services or whether any considerations beyond the requirements of Practice E1527 are to be considered):

Not applicable

(e) Identification of all parties who will rely on the Phase I ESA report:

Not applicable

(f) Identification of the *subject property* site contact and how the contact can be reached:

Scott Forest(WestMar Commercial Real Estate Ph: 951-491-6300X 307 or CP:760-310-4965)

Joong H . Choh(One of 2 owners in Illinois). CP:847-636-9799

(g) Any special terms and conditions which must be agreed upon by the *environmental professional*:

Please notify above individuals prior to start the Environemental Site Assessment, as necessary.

(h) Any other knowledge or experience with the *subject property* that may be pertinent to the *environmental professional* (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the *subject property* and its environmental condition):

See section (5).

There has been no history of environmental site assessment during current ownership.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by LOR Geotechnical Group, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX D

Color Site Photographs

PHOTO 1 - Northeasterly view towards a utility pole located offsite and near the southwest corner of the subject property. No evidence of leakage was observed at the pole-mounted, electrical transformer.

PHOTO 2 - The "RECYCLED WATER" sign to the right is located near the base of the utility pole shown in the previous photograph. This sign appears to be associated with the 1-foot diameter, white plastic irrigation pipe shown in the upper left of the photograph. This pipe along with the nearby utility pole are estimated to be located near and offsite to the west of the subject property.

PHOTO 3 - View facing north from at/near the estimated southwest corner of the subject property. The white evident at the bottom of the lower left portion of the photograph is another exposed portion of the 1-foot, plastic irrigation pipe that appears to utilize recycled water. The dirt road to the left runs along the right-of-way for Evans Road. Between this dirt road and the subject property includes an area with a drainage or low-lying area, the 1-foot irrigation pipe, and utility poles and lines.

PHOTO 4 - View to the right of that shown in the previous photograph, facing northeast, looking across and beyond the subject property. The dark green vegetation in the lower middle and right portions of the photograph is part of an alfalfa crop located in the south end of the subject property, extending offsite to the south.

PHOTO 5 - View to the right of that shown in the previous photograph, facing east along the south boundary of the subject property.

PHOTO 6 - View to the right of that shown in the previous photograph, facing offsite to the southeast. The taller, mature trees in the background, left of center, mark the location of a former residence over 850 feet southeast of the subject property.

PHOTO 7 - View to the right of that shown in the previous photograph, facing offsite to the south, with the dirt road along Evans Road to the right (west). The crop on both sides of Evans Road is alfalfa.

PHOTO 8 - View to the right of that shown in the previous photograph, facing southwest. At/near the right photograph edge is a dirt road heading west from Evans Road.

PHOTO 9 - View to the right of that shown in the previous photograph, facing west, looking offsite across Evans Road towards a mobile home in the southeast corner of a horse ranch ("Rancho Fortunado"). To the left (south) of the horse ranch is a tractor and other equipment associated with farming, including sprinkler pipe.

PHOTO 10 - View to the right of that shown in the previous photograph, facing offsite across Evans Road towards the horse ranch. The offsite structure to the right appears to be a barn or stables.

PHOTO 11 - View facing north, looking across and beyond the subject property, standing near the middle of the south subject property boundary. Sporadic distressed alfalfa plants are evident, though no distressed vegetation was observed in large, concentrated areas.

PHOTO 12 - View facing west from the estimated southeast corner of the subject property, looking across and beyond the subject property. In the background to the right is the offsite horse ranch.

PHOTO 13 - View to the right of that shown in the previous photograph, facing northwest across and beyond the subject property. As shown across most of the near background, much of the subject property is bare soil at ground surface.

PHOTO 14 - View to the right of that shown in the previous photograph, facing north from the estimated southeast corner of the subject property. To the right (east) of the metal chain-link fence is a gravel/dirt access road, followed by an artificial, earthen storm water drainage channel, along the opposite (east) side of which is another gravel/dirt access road. The concrete feature to the right along the east side of this channel is an entrance ramp to the channel bottom for vehicles and/or equipment.

PHOTO 15 - View to the right of that shown in the previous photograph, looking offsite to the northeast. Within the background to the left is a retail center ("Perris Crossing") located over 700 feet from the subject property. This retail center includes a Circle K gasoline station with a 7-Eleven gasoline station across the street along Case Road.

PHOTO 16 - View to the right of that shown in the previous photograph, facing offsite to the east. Within the central photograph background is a Union 76 gasoline station situated on the west side of the I-215 Highway right-of-way, located over 0.25 mile from the subject property.

PHOTO 17 - View facing north from the southeast corner of the portion of the subject property that is mostly bare soil. In the background to the right is a concrete head wall for the offsite storm water drainage channel, before it goes underground and beneath Ethanac Road, emerging on the other (north) side.

PHOTO 18 - View to the left of that shown in the previous photograph, facing northwest across and beyond the mostly bare portion of the subject property.

PHOTO 19 - View to the left of that shown in the previous photograph, facing west, looking along the transition from the mostly bare soil portion of the subject property (right) to the south end (left) with the north end of an alfalfa crop that extends offsite to the south. The northernmost vegetation shown here to the right of photograph center appears to be mostly weeds (common mallow).

PHOTO 20 - The feature shown is located along the curving northeast boundary of the subject property approximately 62 feet south of the paved road for Ethanac Road, and may be a vent associated with some type of underground water utility. This vent appears to be located immediately offsite.

PHOTO 21 - Southeasterly view from the estimated northeast corner of the subject property, looking along the curving northeast subject property boundary. The apparent utility vent feature shown in the previous photograph is located immediately left of photograph center among the group of tumbleweeds.

PHOTO 22 - View to the right of that shown in the previous photograph, facing southwest across and beyond the subject property. A path of recently disced soil is evident within the mostly bare soil portion of the subject property.

PHOTO 23 - View to the right of that shown in the previous photograph, facing west along the north subject property boundary. To the right is Ethanac Road, an asphalt concrete-paved, 4-lane roadway.

PHOTO 24 - Northwesterly view to the right of that shown in the previous photograph, looking offsite and across Ethanac Road. Across Ethanac Road at photograph center, the earthen storm water drainage channel daylights or emerges from underground.

PHOTO 25 - View to the right of that shown in the previous photograph, facing north across Ethanac Road, looking towards vacant land on the other side.

PHOTO 26 - View to the right of that shown in the previous photograph, facing northeast, looking across Ethanac Road towards a storm water drainage channel or basin on the other side which is difficult to discern. Across much of the middle of the background, from the central portion of the photograph and extending to the right edge, is the Perris Crossing retail center.

PHOTO 27 - View facing east from near the estimated northwest corner of the subject property.

PHOTO 28 - View to the right of that shown in the previous photograph, facing southeast across and beyond the subject property.

PHOTO 29 - View to the right of that shown in the previous photograph, facing south along the west subject property boundary.

PHOTO 30 - View to the right of that shown in the previous photograph, facing offsite to the west and across Evans Road. The north side of the offsite horse ranch across Evans Road to the west is shown to the left.

PHOTO 31 - View to the right of that shown in the previous photograph, looking to the north across Ethanac Road. The concrete visible running left to right across the lower portion of the photograph and beyond Ethanac Road is a ramp entrance structure similar to that shown to the left in **PHOTO 15**.

PHOTO 32 - The yellow 5-gallon bucket and nearby gray 5-quart motor oil container are within the Evans Road right-of-way offsite. The bucket is empty. The gray container appears to be contain approximately 1 gallon of waste oil. No signs of waste oil leakage was observed.

PHOTO 33 - Shown along the east side of Evans Road (dirt road) are two small drainage channels that feed into a low area. The water shown in these drainage channels may be wash water from the horse ranch across Evans Road. Horses were observed being washed or rinsed off while water bubbled up into these small drainage channels. It does not appear that this water is reaching the subject property.

PHOTO 34 - View facing west in line with the small drainage channel shown in the upper portion of the previous photograph. An active wash rack for horses is evident across Evans Road to the left and along the east side of the offsite horse ranch.

PHOTO 35 - This offsite, lower-lying area shown along the east side of Evans Road has water running along it, fed by the small drainage channels shown in the two previous photographs. This area likely also accumulates storm water during significant precipitation events.

PHOTO 36 - View facing north from near the southwest corner of the portion of the subject property that is mostly bare soil. The west subject property boundary is estimated to be roughly in line with the overhead power line to the right (east).

PHOTO 37 - View to the right of that shown in the previous photograph, facing northeast, looking across the subject property and beyond.

PHOTO 38 - View to the right of that shown in the previous photograph, facing east, looking along the transition from the mostly bare soil portion of the subject property (left) to the south end (right) with the north end of an alfalfa crop that extends offsite to the south. The northernmost vegetation shown here near photograph center appears to be mostly weeds (common mallow).

CRDEH Records Response Letter
Dated January 12, 2022

County of Riverside

DEPARTMENT OF ENVIRONMENTAL HEALTH

KEITH JONES, DIRECTOR

RELEASE OF RECORDS RESPONSE

January 12, 2022

Service Request No: 53447

LOR Geotechnical
6121 Quail Valley Ct.
Riverside, CA 92507
Attn; Mathew L. Hunt

Your request concerning **Hazardous Materials Management Records** has been received and a file search has been conducted. The appropriate action has been taken.

Site Address	City	Records Found
26300 – 26700 Ethanac Rd.	**Menifee**	☐ **YES** ☒ **NO**
THIS IS NOT AN INVOICE	**Estimated Cost**	**$0.00**

If no records are found, no further action will be taken.

If records are found, please contact our office at (951) 358-5055 to schedule a file review appointment. Records will be available for 30 days from the date of this letter, after which a new Records Request will need to be submitted.

** There is a clerical records research fee of **$.50 for the first page, plus $.10 per additional page **Records will not be made available until this fee is paid****

Other fees may apply

Note: Additional time for processing may be required

Appointments are scheduled in one (1) hour increments, not to exceed two (2) hours.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

THE CLUB K-8 SCHOOL Facility Id: 33010067 Status: No Further Action	***EVANS ROAD/NOVA LANE***	***S 1/2 - 1 (0.500 mi.)***	***4***	***17***

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

EMARRA, INC	***1765 ETHANAC RD***	***NNW 0 - 1/8 (0.005 mi.)***	***A2***	***9***

Local Lists of Registered Storage Tanks

CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CERS TANKS list, as provided by EDR, and dated 07/15/2021 has revealed that there is 1 CERS TANKS site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EMARRA, INC	***1765 ETHANAC RD***	***NNW 0 - 1/8 (0.005 mi.)***	***A2***	***9***

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EMARRA, INC (Continued) **S124437950**

Violation Source:	CERS
Site ID:	521879
Site Name:	EMARRA, INC
Violation Date:	02-27-2020
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 03/20/2020. OBSERVATION: The chemical inventory description page submitted for Carbon Dioxide (CO2) contained incorrect information. CO2 has a store pressure "Above Amient". Observed a liquified CO2 tank at the facility. The CO2 tank should be reported in gallons, not cubic feet and the physical state updated to "liquid" with the storage updated to "Tank Inside Building". The Propane should also be updated with a physical state of "liquid" and reported in gallons. CORRECTIVE ACTION: Owner/operator shall update the chemical inventory pages for CO2 and Propane and submit to the statewide information management system (e.g. CERS) at http://cers.calepa.ca.gov. Please refer to a current Safety Data Sheet (SDS) for guidance.

Citation:	HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description:	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.

EMARRA, INC (Continued) **S124437950**

Violation Notes: Returned to compliance on 06/17/2020. OBSERVATION: Observed UST tank information pages for all three (3) tanks submitted in CERS to be inaccurate and/or missing information. Please reference CERS notes to correction the pages as needed. Each tank information page has different items to correct. CORRECTIVE ACTION: Owner/operator shall make the corrections noted in CERS to the UST tank information pages and re-submit updated forms in CERS.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

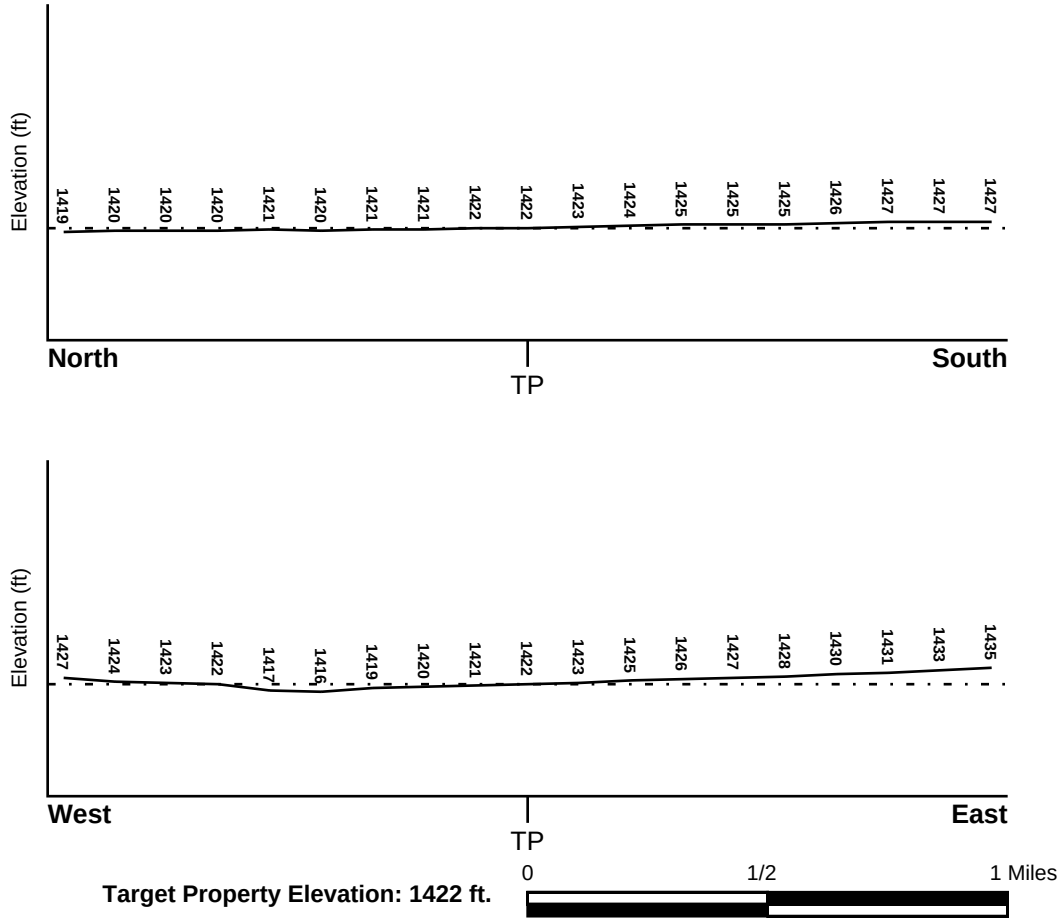

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C2055H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C1440H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: EXETER

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	16 inches	37 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	37 inches	50 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
4	50 inches	59 inches	stratified sandy loam to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: MADERA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	18 inches	25 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	25 inches	37 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	37 inches	61 inches	stratified coarse sandy loam to clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: GREENFIELD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	25 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Subject: Phase I Environmental Site Assessment
Proposed Industrial Development
26201 Wheat Street
APN 330-180-012
Menifee, Riverside County, California

Attached herewith is the Phase I Environmental Site Assessment (ESA) conducted by this firm for the subject property located in Menifee, California.

This Phase I ESA was planned and executed based upon a scope of services generally outlined in our Proposal dated December 20, 2021, and other written and verbal communication.

We appreciate the opportunity to provide this environmental assessment for the subject property. If you have any questions or comments regarding this assessment, please do not hesitate to contact this firm at your convenience.

EXECUTIVE SUMMARY

This firm conducted a Phase I Environmental Site Assessment (ESA) for a proposed industrial development located at 26201 Wheat Street in Menifee, California. This Phase I ESA was conducted in conformance with American Society for Testing and Materials (ASTM) E1527-13, and All Appropriate Inquiries (AAI) set forth in 40 CFR (Code of Federal Regulations) part 312. This Phase I ESA also incorporates the procedures set forth in the recently approved ASTM E1527-21.

Based on our interview, subject property reconnaissance, and review of historical aerial photographs and topographic maps, the subject property was vacant land dating back to the early 1900s, with dryland farming possibly occurring from at least as far back as 1938 to as late as the 1960s and possibly 1970s. The current rural residential development began around 1988, and at present, includes a mobile home, aboveground propane tank, underground septic tank, a groundwater production well, an old mobile office trailer structure, a garage/shop building, and other outbuildings and sheds.

Numerous onsite containers up to 55 gallons in capacity, though mostly 5 gallons or less, are suspected to include hazardous materials and/or wastes, including waste oil, gasoline or diesel fuels, hydraulic or motor oils, grease, solvents, paints, herbicide, insecticide, and fertilizers. A few areas were observed with heavy hydrocarbon-stained soils, likely from waste oils, that appeared to be limited in extent.

There are five sites, not including the subject property, listed in environmental regulatory databases within 1 mile of the subject property. Based on our research and Vapor Encroachment Screen (VES), no environmentally impaired properties have current or former releases of hazardous substances and/or petroleum products that are known to have migrated to and/or impacted the subject property, and therefore, a vapor encroachment condition (VEC) can be ruled out for the subject property.

Based on the history of the subject property, we do not anticipate any significant environmental impact to the subject property. Our review of historical aerial photograph images indicates onsite farming practices were limited to dryland farming, possibly as early as 1938 to as late as the 1970s. Based on this, we do not suspect significant impacts to onsite soils from pesticides, as dryland farming, which appears to have been the only historical farming method used onsite, is not an economically intensive operation, and therefore, residual pesticides at the subject property are not anticipated or not anticipated to be present in concentrations exceeding regulatory screening levels. The Interim

Guidance for Sampling Agricultural Properties by the California Department of Toxic Substances Control (DTSC) indicates properties that clearly qualify as dryland farming do not need further investigation for pesticides or metals (DTSC, 2008). The onsite observed heavy hydrocarbon-stained surface soils, likely from waste oil, appear to be a de minimis condition.

This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the subject property.

Based on the results of our Phase I ESA, additional environmental investigation of the subject property is not warranted.

If the onsite groundwater production well is not going to be used as part of the planned development, it should be abandoned/destroyed in accordance with the requirements of the County of Riverside Department of Environmental Health.

All of the onsite containers with hazardous materials and wastes should be lawfully transported off the subject property for proper reuse, recycling, and/or disposal.

INTRODUCTION

During December 2021 to March 2022, a Phase I ESA was conducted by this firm for a proposed industrial development, Assessor's Parcel Number (APN) 330-180-012, located at 26201 Wheat Street in Menifee, Riverside County, California. The subject property is currently a rural residential property. The subject property is planned for development with an industrial building roughly 80,000 to 100,000 square feet in area, and will include parking areas and drives and roughly 10 to 11 loading docks.

The Phase I ESA was conducted in conformance with the Standard Practice for Environmental Site Assessments: Phase I ESA Process, ASTM E1527-13, and AAI set forth in 40 CFR Part 312. The purpose was to identify RECs that may be associated with the subject property. A REC means: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A controlled recognized environmental condition (CREC) is a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition (HREC) is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). An HREC is not a REC. A de minimis condition is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC nor a CREC. This Phase I ESA also incorporates the procedures set forth in the recently approved ASTM E1527-21, which is pending approval from the United States Environmental Protection Agency for its compliance with AAI.

The approximate location of the subject property within its regional setting is presented on an Index Map (Figure 1).

The findings of our Phase I ESA, as well as our opinions, conclusions, and recommendations, are presented within the following sections of this report.

NON-SCOPE CONSIDERATIONS

The following list (not all-inclusive) of environmental issues are outside the scope of ASTM E1527-13 and E1527-21, and AAI:

- Asbestos-containing building materials unrelated to releases into the environment;
- Biological agents;
- Cultural and historic resources;
- Ecological resources;
- Endangered species;
- Flood zone;
- Health and safety;
- High voltage power lines or other sources of electromagnetic radiation;
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment;
- Industrial hygiene;
- Lead-based paint unrelated to releases into the environment;
- Lead in drinking water;
- Methane;
- Mineral resources;
- Mold or microbial growth conditions;
- Natural hazards;
- Naturally-occurring radon;
- PCB (polychlorinated biphenyl)-containing building materials (including interior fluorescent light ballasts, paint, and caulk);
- Regulatory compliance;
- Substances not defined as hazardous substances (including some substances referred to as emerging contaminants) unless or until such substances are classified as a CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) hazardous substance; and
- Wetlands.

METHODOLOGY AND PROCEDURES

The following list is a summary of the methodology and procedures used during this Phase I ESA:

- Previously prepared professional reports, including environmental, geotechnical, etc., were reviewed as available for the subject property and/or adjoining properties.

- Per ASTM E1527-13 and E1527-21, and AAI, User provided information, as available, was evaluated with respect to subject property history, usage, and environmental concerns.

- A general review of the physical setting of the subject property, including topography, geology, and groundwater hydrology, was performed. This review, in part, provides information regarding the potential for groundwater to be contaminated, the potential pathways for contaminant transport, and the potential for a vapor encroachment condition.

- Historical maps, aerial photographs, fire insurance maps, city directory information, and other records and information were researched and examined, as available and warranted, to investigate the use of the subject property and surrounding area.

- As available, person(s) knowledgeable about the subject property were interviewed to obtain any known information regarding property usage and potential environmental concerns.

- Concurrent with our public and governmental agency interviews and literature research, a reconnaissance of the subject property and observations of adjoining properties were conducted. The reconnaissance was conducted in order to determine current uses of the subject property and adjoining properties and the potential for soil and/or possible groundwater contamination based on aboveground visual observation.

- During this Phase I ESA, public regulatory agencies, potentially including environmental, building, etc. were contacted directly or online research for information regarding permits, underground storage tanks (USTs), hazardous materials incidents, and general information about the subject property and where

warranted, adjoining properties, to ascertain present and past uses with respect to environmental concerns.

- Federal, state, local, tribal, and proprietary lists and databases were reviewed to ascertain the presence of known environmentally impaired sites at the subject property or within the immediate area, and to determine their impact, if any, to the subject property.

- As part of the Phase I ESA, a Vapor Encroachment Screen was conducted to evaluate whether a vapor encroachment condition exists, based on the information obtained during the Phase I ESA.

- More details regarding the above methodology and procedures are described in other sections of this report.

CONCURRENT INVESTIGATION

A Preliminary Geotechnical and Infiltration Feasibility Investigation (PGIFI) was conducted by this firm concurrently with this Phase I ESA (LOR Geotechnical Group, Inc., 2022). This investigation included the placement of five (5) geotechnical exploratory soil borings ranging in depths from approximately 15.5 to 41 feet below the ground surface (bgs) across the subject property. Two (2) additional soil borings to evaluate infiltration feasibility were advanced within the northeast portion of the subject property in relative close proximity to the north boundary to a depth of approximately 8 feet bgs. Although done specifically to address the engineering properties of the onsite soils, no subsurface structures, unusual odors, or stained soils were noted in the borings. Fill/topsoil materials up to approximately 1 foot thick were noted. Granitic bedrock was encountered at depths ranging from approximately 6.5 to 10 feet bgs. Groundwater was not encountered to the maximum exploratory depth at approximately 41 feet bgs. The detailed results and evaluation of our PGIFI were submitted to the client under a separate report.

USER PROVIDED INFORMATION

ASTM E1527-13 and E1527-21 defines a User as the party seeking to use Practice E1527 to complete an environmental site assessment of the (subject) property. A User may include, without limitation, a potential purchaser of (subject) property, a potential tenant of (subject) property, an owner of the (subject) property, a lender, or a property manager.

Under ASTM E1527-13 and E1527-21, and AAI, specific tasks are assigned to the User that will help identify the possibility of RECs in connection with the subject property. AAI requires these tasks be performed by or on behalf of a party seeking to qualify for a landowner liability protection to CERCLA liability. These tasks do not require the technical expertise of an Environmental Professional, and are generally not performed by Environmental Professionals performing a Phase I ESA. The User may provide the information gathered from these tasks, including the following:

- Any environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state or local law;

- Any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law;

- Specialized knowledge or experience (that is material to RECs in connection with the property) of the User related to the subject property or nearby properties (for example, is the User involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that the User would have specialized knowledge of the chemicals and processes used by this type of business);

- Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (reason for significantly lower purchase price, such as contamination is known or believed to be present at the subject property);

- Commonly known or reasonably ascertainable information about the subject property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases (such as the past uses of the subject property, specific chemicals that are present or once were present at the subject property, spills or other chemical releases that have taken place at the subject property, and any environmental cleanups that have taken place at the subject property);

- Any obvious indicators that point to the presence or likely presence of contamination at the subject property, based on the knowledge and experience of the User related to the subject property; and

- Other information, including the reason why the Phase I ESA is required and/or is being performed, the type of property and type of property transaction (sale, purchase, exchange, etc.), the complete and correct address for the subject property, the scope of services desired for the Phase I ESA, identification of all parties who will rely on the Phase I ESA report, identification of the site contact and how the contact can be reached, any special terms and conditions which must be agreed upon by the Environmental Professional, and any other knowledge or experience with the subject property that may be pertinent to the Environmental Professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the subject property and its environmental condition).

A User Questionnaire was provided to a representative of the client (a User), but a completed questionnaire was not received as of the date of this report. However, it is our understanding that the client is having a Phase I ESA prepared for consideration of acquiring the subject property for industrial development. The client representative did provide an ALTA Commitment for Title Insurance document dated November 30, 2021, which is discussed below. Also provided were digital map documents, including an ALTA Survey Map and Conceptual Site Plan with an industrial development scheme shown. The ALTA Survey Map, which shows many subject property features, including structures, is presented on Figure 2.

The ALTA Commitment for Title Insurance document indicates the current owner of the subject property is Rita Mae Hale, Trustee of the Family Trust of Rita Mae Hale, dated November 9, 2021. A review of the ALTA Commitment for Title Insurance document revealed nothing regarding environmental concerns.

Environmental Cleanup Liens and Activity and Use Limitations

Under AAI and ASTM E1527-13, a search for environmental cleanup liens and AULs must be conducted, typically by a User. We were provided an ALTA Commitment for Title Insurance document which does not indicate there are environmental cleanup liens or AULs associated with the subject property; however, this type of title search does not always yield information regarding environmental cleanup liens or AULs, and a more thorough search of land title and deed documents is required to confirm the presence or absence of such information. The subject property, whose researched historical use has been rural residential and dryland farm use, did not appear in the state and/or federal liens, deed, or activity/use limitation databases in The Environmental Data Resources,

Inc. (EDR) Radius Map™ Report with Geocheck® (Appendix G), and no records were found for the subject property on file with the County of Riverside Department of Environmental Health (CRDEH), which suggests there are no environmental cleanup liens or AULs associated with the subject property.

PHYSICAL SETTING

Topography

The subject property consists of relatively planar land with a gentle fall to the north-northwest. Elevations across the subject property are estimated to reach a high of approximately 1,448 feet above mean sea level (amsl) in the far southeastern portion in/near the southeast corner to a low of approximately 1,440 feet amsl in the far northwestern portion near the northwest corner.

Regional Geology

The subject property lies along the north-central portion of the Perris block of the northern Peninsular Ranges geologic province of southern California. While the Perris block is considered to be a relatively stable structural block, it is bounded by active faults. These faults include the Elsinore fault zone on the west, the San Jacinto fault zone on the east, and the Cucamonga fault zone on the north. The Perris block is underlain by rocks of the Peninsular Ranges batholith, a very large mass of crystalline igneous rocks of Cretaceous age and with no known floor, and by prebatholithic metasedimentary and metavolcanic rocks of older ages.

The Perris block has a series of erosional surfaces, marked by low topographic relief and capped with unconsolidated alluvial sediments stripped from the surrounding highlands. The subject property and immediate surrounding properties were mapped by the California Division of Mines and Geology as being underlain by deposits of very old alluvial fan deposits of middle to early Pleistocene age (Morton et al., 2003).

The interior of the Perris Plain is considered to be relatively stable with few known active faults. However, this plain is bounded by active faults. These include the Elsinore fault zone on the west, the San Jacinto fault zone on the northeast, the San Andreas fault zone on the north, and the Agua-Tibia fault zone on the south. As the subject property is located near the western margin of the Perris Plain, the Elsinore fault is the closest known active

fault in relation to the subject property. At its closest approach, the Elsinore fault is located approximately 13.0 kilometers (8.1 miles) southwest of the subject property.

Site Geologic Conditions

The subject property is underlain by alluvial soils and igneous bedrock. These materials are locally covered by a thin layer artificial fills/topsoil. The various earth materials encountered onsite during our past geotechnical and infiltration feasibility investigation are described below (LOR, Geotechnical Group, Inc., 2022).

Fill/Topsoil

Fill/topsoil materials were encountered to depths of approximately 1 foot. The fill/topsoil materials are believed to be associated with current and past weed abatement (discing) practices at the site. As encountered, the fill/topsoil materials were comprised of silty sands which were predominantly brown to red-brown, dry, and in a loose state. Locally, deeper fills are anticipated to be present, primarily associated with the existing, onsite structural improvements.

Older Alluvium

Older alluvial materials were encountered underlying the fill materials described above within all of our exploratory borings. The older alluvial soils encountered were a maximum of approximately 9 feet in thickness and rest upon bedrock materials. These units were noted to mainly consist of sandy silt, silty sand, and minor units of lean clay with sand. The older alluvial materials were in a relatively medium/medium dense to very stiff/very dense state. Expansion index testing indicated that these materials will have a very low to nearly low expansion potential when used as compacted fill.

Bedrock

Igneous bedrock materials were encountered within all of our exploratory borings at depths of approximately 6.5 to 10 feet bgs. The igneous bedrock was typically coarse grained, highly to moderately weathered upon first encounter and becoming less weathered with depth, dry to damp, and in a hard to very hard state.

Groundwater Hydrology

Groundwater was not encountered within our recent, onsite geotechnical investigation soil borings to a maximum exploratory depth of approximately 41 feet bgs (LOR, Geotechnical Group, Inc., 2022).

In order to estimate the approximate depth to groundwater in the local area of the subject property, a search was conducted for local groundwater well level measurements within the Cooperative Well Measuring Program, Spring 2021 (Watermaster Support Services et al., 2021). This database contains depth to groundwater measurements dating back to 1993. We also conducted a search of the water well database information provided in the California Department of Water Resources (CDWR) Water Library Data website (CDWR, 2022).

The only database with nearby well records was the CDWR database. One well, State Well No. 05S03W17A001S, located approximately 1 kilometer (0.62 mile) to the east-southeast was identified. Groundwater level data for this well was limited to one reading in 1995. A measuring point elevation of 1,424± feet amsl was reported. The depth to groundwater provided was 22 feet bgs (elevation of 1,402± feet amsl).

As shown on Figure 2, the lowest elevation of the subject property is 1,440 feet amsl. Based on the information above, groundwater in the local vicinity of the subject property appears to be at depths on the order of 40 feet bgs. Groundwater may seep into the bedrock beneath the subject property and local vicinity along fractures and joints within the bedrock. The presence of hard bedrock beneath the subject property (and local vicinity) generally precludes the development of groundwater conditions or a groundwater table. Any groundwater that might be encountered during subject property development would likely be the result of infiltration of surface waters/irrigation waters traveling downward into the bedrock along these joints and fractures.

HISTORY OF SITE USAGE

To obtain a history of previous subject property usage, a search was conducted as warranted and resources were available for historical fire insurance and topographic maps or images, aerial photographs or images, County Assessor's parcel information, building records, and city directory information. An attempt was made to contact persons knowledgeable of the use and history of the subject property.

Sanborn Fire Insurance Maps

No coverage of historical fire insurance maps was available for the subject property. The Certified Sanborn® Map Report from EDR, which indicates the subject property is unmapped, is provided in Appendix A.

Historical Topographic Maps

Historical topographic map images from the quadrangles that include the subject property and surrounding local region, provided by EDR from 1901, 1942, 1943, 1947, 1953, 1967, 1973, 1979, 2012, 2015, and 2018, at a scale of approximately 1" = 2,200', were reviewed. The EDR Historical Topographic Map Report, with the approximate subject property boundaries shown on the topographic map images, is provided in Appendix B.

The 1901 map image, derived from a map at a scale of 1:125,000, shows the subject property and immediate surrounding properties as vacant land. A road, likely a dirt road, is shown crossing through the west portion of the subject property, oriented generally southeast to northwest. This dirt road terminates offsite over 600 feet to the northwest at the intersection of two roads, present day Ethanac and Goetz Roads. Scattered structures of residence size are shown within the local region. The San Jacinto River is indicated to be approximately 3,000 feet northwest of the subject property.

The 1942 and 1943 map images, derived from maps at a scale of 1:62,500, show the subject property and local surrounding region largely the same. The road previously depicted crossing through the subject property is absent.

The 1947 map image, derived from a map at a scale of 1:50,000, shows the subject property and local surrounding region essentially the same as in the 1942 and 1943 map images.

The 1953 map image, derived from maps at a scale of 1:24,000, shows the subject property and local surrounding region largely the same. Goetz Road, approximately 550 feet to the west, is indicated to be a paved road, while Ethanac Road roughly the same distance to the north may be a well defined dirt road east of Geotz Road and a more poorly defined dirt road west of it.

The 1967 map image, derived from a map at a scale of 1:24,000, does not provide coverage of the subject property and surrounding properties. The area that is shown is

over 3,000 feet to the northwest, north, and northeast of the subject property. The area shown includes a section of the San Jacinto River and the Perris Valley Airport.

The 1973 and 1979 map images, derived from maps at a scale of 1:24,000, show the subject property and surrounding properties essentially the same as in the 1953 map image.

The 2012, 2015, and 2018 map images, derived from maps at a scale of 1:24,000, generally do not show structural features, but the infrastructure shown suggests significant development has occurred in the local region. All three images show Wheat Street bordering the subject property to the east and the east terminus of Ruffian Road near and west of the northwest corner of the subject property.

Aerial Photograph Review

Digital aerial photograph images provided by EDR, from 1938, 1949, 1953, 1961, 1967, 1974, 1978, 1985, 1989, 1997, 2002, 2006, 2009, 2012, and 2016, at a scale of roughly 1"=500', were reviewed to investigate the past use of the subject property and surrounding properties. Google Earth Pro computer program recent (2002 to 2021) and online (NETR, 2022) historical digital aerial images were used to enhance our review and/or provide supplementary review. Copies of the historical aerial photograph images provided by EDR with the approximate boundaries of the subject property are provided in Appendix C.

A brief summary of the subject property and surrounding conditions during the various times, largely as reflected in the EDR aerial photograph images, is given below.

The EDR 1938 digital aerial photograph image shows the subject property and surrounding properties as vacant land. Most or all of the subject property and adjacent properties to the north, northeast, east, and southeast appear to have been disced, and may be under dryland farming. Approximately 580 feet west of the subject property is a north-south dirt road along the present day Goetz Road. Another dirt road approximately 640 feet to the north is present along the present day Ethanac Road. No structures are evident in the areas shown, however, over two dozen apparent trees west of the intersection of the dirt roads at Ethanac and Goetz Roads, along/near the south side of Ethanac Road, suggest a past residence may have been formerly present.

The EDR 1949 digital aerial photograph image shows the subject property and adjoining properties largely the same as in the 1938 aerial image. However, it appears more discing

at the subject property and surrounding properties has occurred. Based on the field at the northwest corner of Ethanac and Goetz Roads (dirt roads) which appears to be evident with a dryland crop, it is possible the subject property and surrounding properties have been disced for a purpose other than dryland farming.

The EDR 1953 digital aerial photograph image shows the subject property and surrounding properties essentially the same as previously shown. The dirt road along the present day Goetz Road is difficult to discern, and may be poorly paved or have natural revegetation occurring.

The EDR 1961 digital aerial photograph image shows the subject property and surrounding properties essentially the same as previously shown. The dirt road along Goetz Road is more discernible than previously shown, with periodic linear features along the sides, likely vegetation.

The EDR 1967 digital aerial photograph image shows the subject property and surrounding properties very clearly under dryland farming. A dirt road, essentially bordering the subject property to the east, is now present along the present day alignment for Wheat Street. The dirt roads along Ethanac and Goetz Roads have been widened.

The EDR 1974 digital aerial photograph image is of very poor quality. It appears the subject property and surrounding properties are not under dryland farming, with the dirt road along the present day Wheat Street alignment remaining.

The EDR 1978 digital aerial photograph image shows the subject property and surrounding properties disced, possibly with a dryland crop present or one was present recently. A single-family residence, with ranch style architecture and oriented southeast to northwest, has been added near the south side of Ethanac Road approximately 480 feet north of the subject property. Beyond this residence, on the other side of Ethanac Road, is a large circular pattern with a linear feature that likely is an irrigation sprinkler line on wheels which moves to irrigate the circular crop area.

The EDR 1985 digital infrared aerial photograph image is of somewhat poor to moderate quality, but the subject property and adjoining properties are shown as vacant land that is not being farmed. Additional single-family residences have been added over 850 feet east-northeast of the subject property and along/near the south side of Ethanac Road. Encompassing and extending beyond the previously shown circular crop area north

of Ethanac Road is a plant nursery operation. Goetz Road now appears to be an asphalt-paved, unimproved, 2-lane road.

The EDR 1989 digital infrared aerial photograph image is of better quality than the previous image. The present day onsite mobile home has been constructed in the east central portion of the subject property. There are numerous smaller objects onsite, particularly in the west central portion of the subject property. These objects likely include vehicles, equipment, trailers, and/or smaller structures. The onsite, present day main entrance dirt drive is evident. The immediate surrounding properties and many nearby properties remain vacant land with some vegetation patterns suggesting land division has occurred, likely for residential properties. Additional residences have been added along/near the south side of Ethanac Road which is now an asphalt-paved, unimproved, 2-lane road. An east-west alignment of high voltage power lines and towers is evident approximately 1,300 feet south of the subject property.

The EDR 1997 digital aerial photograph image shows the subject property and surrounding properties essentially the same. Canopies have been added to the east and west sides of the onsite mobile home. The lawn area for the front yard of the onsite mobile home is evident, along with the row of pine trees near the east side. Numerous other trees and smaller objects are evident at the subject property. It appears the present day, onsite garage/storage building and lean-to structure just north of the west side of the garage/storage building are present. The present day old mobile office trailer structure may be present, but if so, appears to be slightly south and west of its current location. Over 600 feet to the south of the subject property, two residences have been added along Wheat Street. Over 700 feet to the west-northwest of the subject property, beyond Goetz Road, are linear rows of vegetation, possibly part of a plant nursery operation. Disturbed soils and piles of soils are evident west and north of these rows of vegetation. The plant nursery operation to the north across Ethanac Road appears to be gone.

The EDR 2002 digital infrared aerial photograph image is of poor to moderate quality. The garage/shop building has been added to the subject property, just west of the north side of the mobile home. The old mobile office trailer structure appears to be located in its present day location. Overall, the main present day, onsite structures appear to be evident, and the subject property is shown largely as it is at present day. There are numerous objects on the property adjacent to the south, apparently divided into two portions. The slightly larger of these portions, located to the east along the west side of Wheat Street, appears to include two rectangular-shaped residences which are likely mobile homes. The dirt road (Aaron Alan Drive) along the south side of the adjacent properties to

the south appears evident. The area to the west-northwest beyond Goetz Road is absent of activity, with the rows of vegetation and disturbed or piled soils no longer evident. Approximately 0.25 mile south-southwest of the subject property, along the west side of Goetz Road, a new tract of single-family residences is under construction.

The EDR 2006 digital aerial photograph image is of moderate quality. The subject property appears essentially the same as previously shown. Four single-family residences on roughly 1-acre lots have been added adjacent to the west of the subject property. These residences are situated along the south side of Ruffian Road, a gravel/dirt road. The slightly smaller property previously shown adjacent to the south of the west portion of the subject property has been divided in two, with single-family residences now present. Over 480 feet to the east-northeast and to the south of the subject property, single-family residences have been added. The tract of single-family residence to the south-southwest, previously shown under construction, has been completed. Another completed tract of single-family residences is present at the southwest corner of the intersection of Ethanac and Goetz Roads. A third tract of single-family residences is under grading approximately 1,500 feet to the south of the subject property.

The EDR 2009 digital aerial photograph image is of moderately good quality. The subject property and surrounding properties appear essentially the same as previously shown. Much of Goetz Road shown has been widened, as has Ethanac Road west of Goetz Road. A tract of single-family residences is under grading at the northwest corner of the intersection of Ethanac and Goetz Roads.

The EDR 2012 digital aerial photograph image shows the subject property and surrounding properties essentially the same as previously shown. The dirt road along Wheat Street has been widened.

The EDR 2016 digital aerial photograph image shows the subject property and surrounding properties essentially the same as previously shown. The tract of single-family residences at the northwest corner of the intersection of Ethanac and Goetz Roads has been completed.

The Google Earth Pro digital aerial images from 2016 to 2021 show the subject property and surrounding properties largely the same as previously shown. The larger property previously shown adjacent to the south of the subject property was very recently divided into two, some time between August 2019 and August 2021. The previously vacant west half appears to be under storage use, including storage containers, trailers, and vehicles.

The residences previously shown in the east half are either gone and replaced with or were reconfigured into an “L”-shaped single-family residence. From around February 2018 to August 2021, a tract of single-family residences was completed northeast of the intersection at Ethanac Road and Wheat Street. Around this same time, Ethanac Road was expanded to a divided, 4-lane, asphalt-paved, partially improved roadway.

County Assessor’s Parcel, Property, and Ownership Information

The subject property is defined by APN 330-180-012, comprising a total of 4.85 acres of property. This parcel is listed as a manufactured home lot with associated address at 26201 Wheat Street (County of Riverside Assessor, 2021).

A copy of the Assessor’s Parcel Map is presented on Figure 3 with the approximate boundaries of the subject property.

Based on information provided by the client, previously discussed in the **USER PROVIDED INFORMATION** section of this Phase I ESA report, it is our understanding that Rita Mae Hale, Trustee of the Family Trust of Rita Mae Hale, dated November 9, 2021, is the current owner of the subject property. Based on County Assessor property transfer history, which does not list the owners involved, it appears the current owner of the subject property has owned it dating back to at least 1987.

Building Permit Records

An online search of County of Riverside building records resulted in five building permit records associated with the subject property APN 330-180-012 (County of Riverside, 2021; County of Riverside Transportation and Land Management Agency, 2021). An online records request, submitted to the County of Riverside Building and Safety Department on December 30, 2021, yielded three of the five building permit records searched online. The five building permit records date from 1988 to 2001, and include permits related to mobile or manufactured home site preparation, permanent foundation for mobile or manufactured home, install 1,368 square foot mobile or manufactured home, extend electrical line for shop, and 30-foot by 40-foot metal garage.

On December 31, 2021, a public records request for building permit records was submitted to the City of Menifee for the subject property address at 26201 Wheat Street. The City released the available records online on January 4, 2022. Three pages of records were available, related to an April 2009 permit to replace air conditioning and furnace units.

City Directory Information

Historical EDR city directory information (image report) for listings along Wheat Street, which borders the subject property to the east, and along Aaron Alan Drive which is an east-west dirt/gravel road approximately 320 feet to the south of the subject property, were reviewed. The researched listings were from 1971 to 2017, with available listings spanning from 1990 to 2017. The EDR-City Directory Image Report is provided in Appendix D.

Listings for the subject property address at 26201 Wheat Street were available from 1990 under Jack Hale and Rita Hale, from 1995 under Rita Hale, from 2000 under Jack Hale, from 2005 and 2010 under Jack C. Hale, and from 2014 under April L. Hale-Bellmyer.

The listings for adjacent or adjoining, offsite properties are residential, with no commercial or industrial listings.

Interview

On January 13, 2022, Mr. Mathew L. Hunt with this firm interviewed Ms. Rita Hale, current owner of the subject property. Ms. Hale indicated the subject property was purchased in 1986, and has been used for rural residential purposes, including raising chickens, with no commercial activity. The subject property was vacant land when purchased, and based on volunteer trees that previously emerged onsite, Ms. Hale thought the subject property may have been previously used to grow fig trees.

Aside from the garage/shop building just northwest of the onsite mobile home, the buildings or small structures are used for storage. The old mobile structure west of the garage/shop building and lean-to structure had former use as a commercial office trailer, and had been used onsite to store auto parts, including for Jeeps.

The septic tank and leach field associated with the onsite mobile home was indicated to be west of the south portion of the mobile home.

Ms. Hale is unaware of aboveground or underground tanks having been present at the subject property, except for the aboveground propane tank and underground septic tank associated with the mobile home.

She indicated there are “backyard” mechanics at the offsite, adjacent properties to the south.

SITE RECONNAISSANCE

Site reconnaissance was conducted by Mr. Mathew L. Hunt with this firm on January 13 and 20, 2022. To orient our subject property reconnaissance, a copy of a recent color aerial image was obtained for our use. This Recent Color Aerial Image with approximate site boundaries is presented on Figure 4. Also indicated in Figure 4 are locations with storage of suspected hazardous materials and/or wastes.

The subject property encompasses approximately 4.85 acres, and is largely vacant land with a core area with structures and stored items within the central portion of the subject property. The structures include a mobile home, garage/shop building, garage/storage building, an old mobile office trailer structure, a lean-to structure, and two sheds. Some concrete flatwork is associated with the mobile home, garage/shop building, and the garage/storage building. Two motorhomes, a vehicle trailer, a travel trailer, three pickup trucks, a car, a tractor, a box truck, and a few flatbed trailers are present. Along the subject property boundaries are fence lines, with fencing comprised of wooden or steel posts and metal chain-link or metal wire. At the entrance with drive off of Wheat Street, along the east subject property boundary, is wrought fencing and double gate. Other internal fencing is present, including for a front yard associated with the mobile home and a north-south alignment of two segments of fencing (wood and wire) just west of the middle of the subject property. The subject property is mostly bare with some areas where grass and weeds have recently grown. Landscaped vegetation includes a lawn in the front yard of the mobile home, bushes and ornamental plants around the mobile home and along the entrance drive off of Wheat Street, and mature trees in various areas of the subject property, including a line a pine trees along the east side of the front yard for the mobile home.

Onsite utilities include an aboveground propane tank located just west of the southwest corner of the mobile home. Underground lines from a utility pole along Wheat Street near the northeast subject property corner provide electric and telecommunications service. An underground septic tank and leach lines are reportedly present west of the southwest mobile home corner. A groundwater production well, utilized for onsite water, both domestic and irrigation of landscaped vegetation, is located in a wooden well house approximately 55 feet southeast of the mobile home. This well is estimated to be approximately 8 inches in diameter with a downhole pump and associated pressure tank.

Various items are stored within the central portion of the subject property, including various personal and household items, tools, parts, and equipment. At least a couple dozen tires were noted.

Multiple locations with suspected hazardous materials and/or wastes were observed, including the garage/shop building (inside and outside along the north side), garage/storage building, in the northernmost shed, in front of the southernmost shed, and in a partially yellow colored, steel storage structure or cabinet. Several locations of suspected hazardous materials and/or wastes outside and away from structures were also noted. The suspected hazardous materials and/or wastes were observed in numerous containers up to 55 gallons in capacity, though were mostly 5 gallons or less, and include waste oil, gasoline or diesel fuels, hydraulic or motor oils, grease, solvents, paints, herbicide, insecticide, and fertilizers. A few areas were observed with heavy hydrocarbon-stained soils, likely from waste oils, that appeared to be limited in extent. These areas are located near the northwest and northeast corners of the garage/shop building and near the west side of the old mobile office trailer structure.

No evidence of the following were observed onsite, except as mentioned above: petroleum products, solvent degreasers, aboveground storage tanks, underground storage tanks, heating oil use, drums, unidentified containers with hazardous substances/petroleum products, pools of liquid likely to contain hazardous substances/petroleum products, polychlorinated biphenyls (PCBs), stressed vegetation, fill areas with solid waste, sumps, pits/ponds/lagoons, wells, and stormwater and/or wastewater generated from industrial/manufacturing processes. No strong, pungent, or noxious odors were detected.

Adjoining Properties

The subject property is located in a historically rural agricultural area that has been replaced over time with increasingly dense residential development. Wheat Street, a wide, distinct dirt road borders the subject property to the east. Adjacent to the southwest, northwest, and north, and across Wheat Street to the northeast, east, and southeast are vacant properties. Adjacent to the west of the subject property are four roughly 1-acre residential lots with single-family residences along the south side Ruffian Road, a dirt/gravel road. Adjacent to the south of the subject property are four roughly 1-acre residential lots with a few single-family residences along the north side of Aaron Alan Drive, a dirt/gravel road.

Color photographs of the subject property and adjoining properties are provided in Appendix E.

REGULATORY AGENCY RECORDS REVIEW

For records relating to environmental compliance and hazardous materials/waste within the County of Riverside, the CRDEH generally is the lead agency. The California State Water Quality Control Board, Santa Ana Region (CRWQCB-SAR) or CRDEH may be the lead agency for soil and/or groundwater investigations and remediation. These agencies were contacted, directly or online, for records they may have for the subject property and/or nearby properties. Online South Coast Air Quality Management District (SCAQMD) and California DTSC records were also searched.

County of Riverside Department of Environmental Health

On December 22, 2021, requests were emailed to the CRDEH to review records for address ranges along Aaron Alan Drive, Ruffian Road, and Wheat Street, including the subject property address at 26201 Wheat Street. In letters dated January 4, 2022, the CRDEH indicated no records were found. Copies of the CRDEH records response letters are provided in Appendix F.

California Regional Water Quality Control Board - Santa Ana Region

The California State Water Resources Control Board maintains the online GeoTracker database, which includes CRWQCB-SAR records for: 1) cleanup sites, including leaking underground storage tank (LUST) sites, cleanup program sites, military cleanup sites, and California Department of Toxic Substances Control (DTSC) cleanup sites; 2) permitted facilities, including waste discharge requirements sites, permitted USTs, DTSC hazardous waste sites, land disposal sites, irrigated lands regulatory program sites, and oil/gas sites; and 3) other sites, including project sites, non-case information sites, sampling points - public, and field points. This database was searched for records that may pertain to the subject property and adjoining properties (California State Water Resources Control Board, 2022).

No sites were found at the subject property. The closest plotted sites are located approximately 1,000 feet west-northwest of the subject property. These sites, Ceres Farm West Worm Farm and Perris Greenwaste, both addressed 3202 Goetz Road, are closed land disposal sites. The Ceres Farm West Worm Farm was a municipal solid waste landfill that was closed as of January 2001, with no other pertinent information. The Perris Greenwaste site is indicated to have been a composting facility with an apparent erroneous closure date in January 1965.

California Department of Toxic Substances Control

The online California DTSC Hazardous Waste Tracking System (HWTS) was searched for hazardous waste manifest records available for the subject property and adjoining or nearby properties along Aaron Alan Drive, Ethanac Road, Ruffian Road, and Wheat Street (California DTSC, 2022). No records were found for the subject property or nearby properties.

South Coast Air Quality Management District

Online SCAQMD records (Facility INformation Detail [FIND] database) were searched for the subject property and adjoining or nearby properties along Aaron Alan Drive, Ethanac Road, Ruffian Road, and Wheat Street (SCAQMD, 2022). No records were found for the subject property or nearby properties.

ENVIRONMENTAL DATABASE REVIEW

EDR was contacted to provide an environmental database search for the subject property ("target property" in EDR's database report). The database search provides information regarding landfills, USTs, hazardous waste generators, etc., at the subject property and surrounding properties in accordance with ASTM Standards and AAI. Five sites, not including the subject property, were found in EDR's search of available government records within the respective search radii. A copy of the EDR database report, which provides a complete list of the federal, state, tribal, and proprietary records searched, is provided in Appendix G.

ENVIROSTOR

The California DTSC Site Mitigation and Brownfields Reuse Program's ENVIROSTOR database identifies sites that have known contamination or sites for which there may be reasons to investigate further. There are two ENVIROSTOR sites listed over 0.1 mile from the subject property. The closest site, Monument Ranch Site at Goetz and Ethanac Roads, is a school investigation site for property with an agricultural use history, including orchard and row crops. Preliminary Endangerment Assessment was conducted in 2006, with a regulatory closure ("No Further Action") status as of June 2006.

LUST

The SWRCB maintains a list of all leaking underground storage tanks (LUST) within the state. According to the SWRCB LUST database, there is one site (listed twice) located over 0.1 mile from the subject property. This site, Native Plant at 202 (East) Ethanac (Road), is listed with a soil-only gasoline regulatory case which was closed in November 1993.

SCH

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose. One site, Monument Ranch Site at Goetz and Ethanac Roads, is listed in the SCH database over 0.1 mile from the subject property. Similar information to that discussed above in the ENVIROSTOR subsection of this Phase I ESA report is listed in the SCH database.

SWEEPS UST

The Statewide Environmental Evaluation and Planning System (SWEEPS) database is a UST listing that was updated and maintained by a company contracted by the SWRCB. This database lists one site, Native Plants, Inc. at 25160 Ethanac Road, located over 0.1 mile from the subject property. This site is listed with two USTs, including a 5,000-gallon regular unleaded gasoline tank and a 10,000-gallon regular unleaded gasoline tank.

HIST UST

The SWRCB maintains the Historical UST (HIST UST) list which contains active and inactive underground storage tank locations. This database lists the same site listed in the SWEEPS UST database, but shown under Rodeffer Investments - Wholesale. The USTs listed include a 1/8-inch steel, 500-gallon waste oil tank, a 1/8-inch steel, 5,000-gallon unleaded gasoline tank, and a 1/8-inch steel, 10,000-gallon diesel tank. All three USTs were reportedly installed in 1980.

CA FID UST

The California Facility Inventory Database (FID) contains a historical listing of active and inactive UST locations from the SWRCB. This database lists the same site as in the SWEEPS UST and HIST UST databases, shown under Native Plants, Inc. This site is listed as active.

RCRA NonGen/NLR

RCRAInfo is EPA's comprehensive information system that includes selective information on sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. Non-Generators do not presently generate hazardous waste. One site, Norman Carmichael at 25151 Corsica Lane, is listed in this database over 0.1 mile from the subject property with no listed violations.

Cortese

The Cortese list is for sites designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites). One site, Native Plant at 202 (East) Ethanac (Road) over 0.3 mile from the subject property, is listed in the Cortese database. This same site is listed in the LUST database, and is listed in the Cortese database with a closed LUST regulatory case.

HIST CORTESE

The historical Cortese (HIST CORTESE) list, no longer updated, is a historical listing from the State Water Resource Control Board (LUST database), the Integrated Waste Board (SWF/LS database), and the Department of Toxic Substances Control (CALSITES database). One site, Native Plant at 202 Ethanac (Road), is listed in this database over 0.1 mile from the subject property. The database listing indicates the site was a LUST site, but no other information is provided.

Orphan Summary

The Orphan Summary within the EDR database report, which is a list of all sites whose location is not readily identified (mapped), and may be at or near the subject property, was reviewed. No sites are listed in the Orphan Summary.

Other Databases

California Geologic Energy Management Division

The California Geologic Energy Management Division (CalGEM) maintains a list of all producing and abandoned oil and gas wells within the State of California. We reviewed the online CalGEM Well Finder, which indicates no abandoned or producing gas and/or oil wells have been located within 1 mile of the subject property (CalGEM, 2022).

VAPOR ENCROACHMENT EVALUATION

As part of this Phase I ESA, a VES was conducted to determine if a VEC exists, based on the information obtained during the Phase I ESA. A VEC is the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property (i.e., subject property).

Vapor Encroachment Screen

A VES, comprised of Tier 1 and 2 screening, was conducted by this firm for the subject property. The VES was conducted in general accordance with the Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, ASTM E2600-15. Although not required to satisfy the requirements of the Phase I ESA under ASTM E1527-13, ASTM E2600-15 was chosen as a methodology to evaluate potential contaminant vapor concerns at or adjoining the subject property.

The subject property historical use has been rural residential and agricultural use (dryland farming). The subject property is located in a historically rural, agricultural area that has increasingly become replaced with single-family residential tract development. The subject property and surrounding area are anticipated to be underlain by near surface fill/topsoil and older alluvial soil materials comprised of sandy silts, silty sands, and minor units of lean clays with sands, overlying relatively shallow igneous bedrock (granitic). Based on the local geology and groundwater hydrology, groundwater, historically reported to be as shallow as 40 feet bgs, is considered to be a potential source of impacted soil vapor into the shallow soils of the subject property.

Based on the results of Tier 1 screening, utilizing The EDR Radius Map™ Report with GeoCheck® and research of the history of the subject property and adjoining properties,

Monument Ranch Site (ENVIROSTOR/SCH site) and Native Plant (LUST site), within 0.33 mile of the subject property, were identified as current and/or former potential sources of soil vapor intrusion or encroachment, such as leaking (current or former) USTs, dry cleaners, etc. Based on the results of the VES, Tier 1 screening, a VEC at the subject property cannot be ruled out.

Based on Tier 2 screening, the critical distance of 100 feet for all chemicals of concern, screens out both of the sites listed above. Therefore, based on the results of VES, Tier 2 screening, a VEC at the subject property can be ruled out.

FINDINGS

Based on our interview, subject property reconnaissance, and review of historical aerial photographs and topographic maps, the subject property was vacant land dating back to the early 1900s, with dryland farming possibly occurring from at least as far back as 1938 to as late as the 1960s and possibly 1970s. The current rural residential development began around 1988, and at present, includes a mobile home, aboveground propane tank, underground septic tank, a groundwater production well, an old mobile office trailer structure, a garage/shop building, and other outbuildings and sheds.

Numerous onsite containers up to 55 gallons in capacity, though mostly 5 gallons or less, are suspected to include hazardous materials and/or wastes, including waste oil, gasoline or diesel fuels, hydraulic or motor oils, grease, solvents, paints, herbicide, insecticide, and fertilizers. A few areas were observed with heavy hydrocarbon-stained soils, likely from waste oils, that appeared to be limited in extent.

There are five sites, not including the subject property, listed in environmental regulatory databases within 1 mile of the subject property. Based on our research and Vapor Encroachment Screen, no environmentally impaired properties have current or former releases of hazardous substances and/or petroleum products that are known to have migrated to and/or impacted the subject property, and therefore, a vapor encroachment condition can be ruled out for the subject property.

Data Gaps

Under AAI and ASTM E1527-13 and E1527-21, data gaps that remain after the conduct of all required activities must be identified. The source of information consulted to address the data gaps should be identified, and the significance of the data gaps with respect to our

ability to identify conditions indicative of releases or threatened release of hazardous substances on, at, in, or to the property should be addressed.

There are no significant data gaps remaining after our conduct of AAI and ASTM E1527-13 and E1527-21.

OPINIONS

Based on the history of the subject property, we do not anticipate any significant environmental impact to the subject property. Our review of historical aerial photograph images indicates onsite farming practices were limited to dryland farming, possibly as early as 1938 to as late as the 1970s. Based on this, we do not suspect significant impacts to onsite soils from pesticides, as dryland farming, which appears to have been the only historical farming method used onsite, is not an economically intensive operation, and therefore, residual pesticides at the subject property are not anticipated or not anticipated to be present in concentrations exceeding regulatory screening levels. The Interim Guidance for Sampling Agricultural Properties by the California Department of Toxic Substances Control (DTSC) indicates properties that clearly qualify as dryland farming do not need further investigation for pesticides or metals (DTSC, 2008). The observed heavy hydrocarbon-stained surface soils, likely from waste oil, appear to be a de minimis condition.

CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 and E1527-21, and AAI, of a proposed industrial development located at 26201 Wheat Street in Menifee, California, the subject property. This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the subject property.

ADDITIONAL INVESTIGATION

Based on the results of our Phase I ESA, additional environmental investigation of the subject property is not warranted.

RECOMMENDATIONS

If the onsite groundwater production well is not going to be used as part of the planned development, it should be abandoned/destroyed in accordance with the requirements of

the County of Riverside Department of Environmental Health.

All of the onsite containers with hazardous materials and wastes should be lawfully transported off the subject property for proper reuse, recycling, and/or disposal.

STATEMENT OF QUALIFICATIONS

Mr. John Leuer is the President of LOR Geotechnical Group, Inc., founded in 1988. As a cofounder and President of the company, Mr. Leuer has managed LOR through hundreds of Phase I Environmental Site Assessments, as well as numerous Phase II Environmental Site Assessments and remediation projects, primarily remedial excavation. Mr. Leuer has over 30 years experience in the geotechnical and environmental fields. Mr. Leuer has substantial experience coordinating projects for many city, county and state agencies, as well as in the public sector, gaining a reputation for being responsive to clients needs while providing strong technical expertise. LOR Geotechnical Group, Inc. is one of three firms that previously provided report review for underground storage tank closure for the County of San Bernardino, Fire Department Hazardous Materials Division.

Mr. Leuer holds a B.S. in Civil Engineering from Cal State University at Northridge. He is a registered Geotechnical and Civil Engineer in the State of California. Mr. Leuer is a member of the American Society of Civil Engineers.

Mr. Mathew L. Hunt has over 20 years experience in the environmental field. Mr. Hunt works under LOR Geotechnical Group's environmental operations and has conducted over 350 Phase I Environmental Site Assessments for the private and public sectors. The properties have ranged from agricultural to residential to commercial/industrial. In addition to his experience with environmental assessments for property transfers, he has worked on projects that require mitigation prior to development. Mr. Hunt is well versed in hazardous waste sampling and characterization methodologies in soil and groundwater regimes for groundwater monitoring, site assessment, and site remediation. Projects have ranged from leaking USTs at gasoline stations to commercial and government (including Superfund/CERCLA sites) projects involving metals, perchlorate, and solvents.

Mr. Hunt has a B.S. in soil science from California Polytechnic State University, San Luis Obispo and a M.S. in soil and water science from the University of California, Riverside.

LIMITATIONS

This report was prepared solely for the use and benefit of LOR's client, Compass Danbe Real Estate Partners II, LLC, and their assigns, lenders, and affiliates. They may release this information to third parties, who may use and rely upon this information at their discretion. However, any use of or reliance upon this information by a party other than Compass Danbe Real Estate Partners II, LLC, and their assigns, lenders, and affiliates, shall be solely at the risk of such third party and without legal recourse against LOR Geotechnical Group, Inc.; its subsidiaries and affiliates; or their respective employees, officers, or directors; regardless of whether the action in which recovery of damages is sought is based upon contract, statute, or otherwise.

The content and conclusions provided by LOR in this assessment are based on information collected during our investigation, which may include, but is not limited to, visual site inspections, interviews with the site owner, regulatory agencies and other pertinent individuals, a review of available public documents, and our professional judgement based on said information at the time of preparation of this document. Any subsurface samples results and observations presented herein are considered to be representative of the area of investigation; however, soil conditions may vary between sample locations and may not necessarily apply to the general site as a whole. If future subsurface or other conditions are revealed which may vary from these findings, the newly-revealed conditions must be evaluated and may invalidate the conclusions of this report.

This report has been prepared in accordance with generally accepted practices using standards of care and diligence normally practiced by recognized consulting firms performing services of a similar nature. LOR Geotechnical Group, Inc. (LOR) is not responsible for the accuracy of information provided by other individuals or entities which is used in this report. This report presents our professional judgement based upon data and findings identified in this report, and the interpretation of such data based upon our experience and background, and no warranty, either expressed or implied, is made. The conclusions presented are based upon the current regulatory climate and may require revision if future regulatory changes occur.

TIME LIMITATIONS

The findings of this report are valid as of this date. Changes in the condition of a property can, however, occur with the passage of time, whether they be due to natural processes or the work of man on this or adjacent properties. In addition, changes in the Standards-of-

Practice and/or Governmental Codes may occur. Due to such changes, the findings of this report may be invalidated wholly or in part by changes beyond our control. Therefore, this report should not be relied upon after a significant amount of time without a review by LOR Geotechnical Group, Inc., verifying the suitability of the conclusions and recommendations.

Report Viability

Based on ASTM E1527-13 and E1527-21 and AAI, certain components of this report are no longer valid after 180 days of their being performed, including: 1) interviews with past and/or present subject property owners, operators, and/or occupants; 2) visual inspection of the subject property and adjoining properties; 3) review of federal, tribal, state, and local government records; and 4) declaration by the Environmental Professional. Once this 180-day period has expired for any of the above components, this report should be updated or revised to meet the requirements for continued viability under the ASTM and AAI standards. Further, it is the User's responsibility to complete a search for recorded environmental cleanup liens, which is a fifth component that is no longer valid after 180 days. If requested, LOR can also perform the search for recorded environmental cleanup liens.

The above components, excluding the search for recorded environmental cleanup liens, have been performed by Mr. Mathew L. Hunt, an Environmental Professional with LOR, on the following dates:

- Interviews - January 13, 2022
- Visual inspection of subject property and adjoining properties - January 13, 2022
- Review of government records - January 4, 2022
- Declaration of Environmental Professional - March 17, 2022

CLOSURE AND ENVIRONMENTAL PROFESSIONAL STATEMENTS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR part 312.

We appreciate this opportunity to be of service and trust this report provides the information desired at this time. Should questions arise, please do not hesitate to contact this office.

Respectfully submitted,
LOR Geotechnical Group, Inc.

Mathew L. Hunt

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by LOR Geotechnical Group, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 73A4-4DFA-925F

PO # 23796.2

Project 26201 Wheat Street

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 73A4-4DFA-925F

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX E

Color Site Photographs

PHOTO 1 - View to the east-southeast from the northwest corner of and looking across the subject property. Within the central portion of the photograph, from right to left, are a travel trailer, vehicle trailer, an old mobile structure, the north end of the garage/shop, and a small shed.

PHOTO 2 - Southerly view to the right of that shown in the previous photograph, looking along the west end of the subject property. In the middle and left far background are roughly 1-acre residential lots along the north side of Aaron Alan Drive. Right (west) of the west subject property boundary and fence line to the right is a single-family residence and detached garage or shop building which are situated on a roughly 1-acre residential lot on the south side of the east terminus of Ruffian Road.

PHOTO 3 - View to the right of that shown in the previous photograph, facing west along Ruffian Road, a dirt/gravel road. To the left of and along the south side of Ruffian Road are single-family residences on roughly 1-acre lots.

PHOTO 4 - View facing south-southwest from the central portion of the north subject property boundary. Onsite, from right to left are a vehicle trailer, travel trailer, pickup truck, a box truck, and old mobile structure.

PHOTO 5 - View to the left of that shown in the previous photograph, facing south. Shown onsite, from right to left, are an old mobile structure, a shed, a lean-to structure, garage/storage building, garage/shop building, and a mobile home.

PHOTO 6 - Southerly view from the northeast corner of the subject property, looking across the east end of the subject property. Running across the middle of most of the photograph is the entrance and associated drive into the subject property. The dirt road to the far left is Wheat Street.

PHOTO 7 - View to the right of that shown in the previous photograph, facing west-southwest, looking across the subject property.

PHOTO 8 - View to the right of that shown in the previous photograph, facing west-northwest across the vacant land adjacent to the north of the subject property.

PHOTO 9 - View to the right of that shown in the previous photograph, facing offsite to the north along Wheat Street, the dirt road to the right running into the background. Near the lower left corner of the photograph is a flyover “X”.

PHOTO 10 - View to the right of that shown in the previous photograph, looking offsite to the east across Wheat Street (dirt road). Residences are visible in the far background.

PHOTO 11 - View to the right of that shown in the previous photograph, looking to the south along Wheat Street. The subject property east fence line and entrance are evident to the right (west).

PHOTO 12 - View facing north-northwest from the southeast corner of the subject property, looking across the east end of the subject property. Beyond the row of pine trees to the left is the onsite mobile home.

PHOTO 13 - View to the left of that shown in the previous photograph, facing west-northwest, looking across the subject property. Just left of photograph middle is a small structure which is a groundwater well house.

PHOTO 14 - View to the left of that shown in the previous photograph, looking offsite to the south along Wheat Street. At the right photograph edge is a single-family residence which is situated on a roughly 1-acre lot adjacent to the south of the east end of the subject property and located along the north side of Aaron Alan Drive, a dirt/gravel road.

PHOTO 15 - View facing west towards the entrance into the subject property off of Wheat Street.

PHOTO 16 - View facing east along the entrance dirt drive into the subject property, looking towards the entrance shown in the previous photograph.

PHOTO 17 - Southeasterly view towards the onsite mobile home situated within the east central portion of the subject property. Near the right photograph edge is an aboveground propane tank located in the general location of the septic tank for the mobile home.

PHOTO 18 - View facing southwest towards the front of the onsite mobile home and associated fenced yard. The well house shown in the next photograph is visible to the left in this photograph at the far south end of the fenced yard.

PHOTO 19 - Easterly view looking towards the onsite groundwater well house located immediately outside of at the south side of the fenced yard shown in the previous photograph.

PHOTO 20 - View inside the groundwater well house shown in the previous photograph. The groundwater well is the approximate 8-inch plastic casing to the left. To the right is a blue water pressure tank. This groundwater production well is being used to produce domestic water and irrigation water for landscaped vegetation.

PHOTO 21 - View facing east along the south side of the subject property, standing just east of the middle of the subject property. The onsite groundwater well house is evident in the background to the left. The closest offsite property to the right (south) with green grass and weeds has no apparent single-family residence on it, but includes storage units.

PHOTO 22 - View to the left of that shown in the previous photograph, facing north-northeast. To the left is the southern section of a north-south internal fence line just east of the middle of the subject property. At the left photograph edge, along the fence line, is a grapevine, beyond and to the right of which is a citrus tree, possibly orange.

PHOTO 23 - View to the left of that shown in the previous photograph, facing north-northwest.

PHOTO 24 - View to the left of that shown in the previous photograph, facing west across the south side of the west portion of the subject property.

PHOTO 25 - Southeasterly view from the southwest portion of the subject property, looking towards offsite, adjacent residential properties to the south.

PHOTO 26 - Southwesterly view to the right of that shown in the previous photograph, looking towards the offsite, single-family residence situated on the roughly 1-acre lot adjacent to the south of the west end of the subject property.

PHOTO 27 - View facing east-northeast from the southwest corner of the subject property, looking across the subject property.

PHOTO 28 - View to the left of that shown in the previous photograph, facing north along the west subject property boundary. The offsite residence to the left (west) is the same partially shown at the right edge of **PHOTO 2** and left edge of **PHOTO 3**.

PHOTO 29 - View to the left of that shown in the previous photograph, facing offsite to the west-northwest. The shop or garage building shown is associated with the offsite residence shown to the left in the previous photograph.

PHOTO 30 - View to the left of that shown in the previous photograph, looking offsite to the southwest.

PHOTO 31 - On, underneath, or near the round table are plastic and metal containers ranging in size from 1 pint to 5 gallons in capacity. These containers include solid and liquids, including paint, linseed oil, and Diazinon (insecticide). The black 5-gallon metal can in front of the table has some type of hardened material in it. The 5-gallon metal fuel cans underneath the table to the right appear empty. The tree trunk shown is that of the largest tree in the west central portion of the subject property.

PHOTO 32 - The six plastic 55-gallon drums shown to the left, near and south of the table and containers shown here and in the previous photograph, are unlabeled and mostly empty. The gray drums was noted to have a small amount (around 1 to 2 gallons) of liquid in it.

PHOTO 33 - View facing southeast, looking towards a shed and box truck located along the west side of the internal north-south fence line in the central portion of the subject property. The box truck was previously shown in the upper right portion of **PHOTO 23**.

PHOTO 34 - View inside the back of the box truck shown in the previous photograph. Numerous personal items appear to be present.

PHOTO 35 - View inside the shed shown to the left in **PHOTO 33**. Numerous items are present, including tires, metal and wood items, a trash can, a lawn edger, banquet tables, and plastic containers.

PHOTO 36 - View facing northeast towards an old mobile structure approximately 22 feet north of the shed shown to the left in **PHOTO 33**. This structure was reportedly used offsite as a commercial office trailer. Onsite it was reportedly used to store auto parts, including those for Jeeps.

PHOTO 37 - View inside the sliding glass door opening shown to the right in the previous photograph, looking to the right. Numerous metal items are present.

PHOTO 38 - View to the left of that shown in the previous photograph, looking across the inside of the old mobile structure. The glass door to the right was likely removed from the opening shown to the right in **PHOTO 36**. Other items present include box springs for a bed, wooden boxes, wooden displays with peg boards, indoor-outdoor carpeting, and a child's car seat.

PHOTO 39 - Closeup view looking towards the ground along the west side of the old mobile structure near the sliding glass door opening. On the ground is oil-stained plywood with relatively minor oil-stained soils nearby. Beneath the mobile structure, the white 5-gallon plastic bucket shown has approximately 4.5 gallons of waste oil in it. Down and to the left and near this 5-gallon bucket is a plastic 5-gallon gasoline container on its side, cut out on the side, with oily water in it.

PHOTO 40 - The 5-gallon metal can shown to the left on its side is located near the northwest corner of the old mobile structure. On the ground near and down and to the right of the can is some type of hardened material. There is hardened material apparent inside the metal can as well.

PHOTO 41 - View facing north-northeast at a location approximately 70 feet north of the old mobile structure. Wooden pallets and concrete block are among the items here. Up and left of photograph center are a cardboard box with high pressure detergent for a car wash and nearby tubes of Lubriplate, apparently some type of grease.

PHOTO 42 - View facing north, looking towards a metal shed located approximately 24 feet northeast of the old mobile structure. This shed has bags of cement, concrete, and grout and numerous plastic or metal 5-gallon buckets in it.

PHOTO 43 - View inside the shed shown in the previous photograph. Over a dozen 5-gallon buckets are present, some empty and some with liquid in them. Some of the buckets are labeled, including for hydraulic oil, roof leak wet patch, and transmission fluid. No signs of leakage or chemical odor were noted.

PHOTO 44 - View facing south towards the north side of a lean-to structure situated between the old mobile structure (right, to the west) and garage/shop building (left, to the east) in the central portion of the subject property.

PHOTO 45 - View to the southwest towards the front side of the lean-to structure situated between the old mobile structure and garage/shop building. The metal storage structure to the right is shown in the previous photograph with a yellow side, and is shown open in the next photograph.

PHOTO 46 - Inside the metal storage structure shown to the right in the previous photograph are over half a dozen fuel containers, mostly metal. Two of the 5-gallon metal containers below have liquid in them.

PHOTO 47 - View facing south towards the north side of the garage/shop building east of the lean-to structure shown in **PHOTO 45**. This location includes containers up to 5 gallons in capacity that appear to contain waste oil, gasoline, diesel, grease, and glyphosate (herbicide). Heavy hydrocarbon staining (likely from waste oil) is evident on the steel plate/sheet in front of the white garage door and some soils on, along, or near the edge of the steel plate/sheet.

PHOTO 48 - Closeup of the area near the west (right) side of the garage door shown in the previous photograph. Heavy hydrocarbon staining is evident on the steel plate/sheet. On the small table next to the garage/shop building are two vehicle batteries.

PHOTO 49 - The location shown is immediately adjacent to the northwest of that shown in the previous photograph. Apparent heavy hydrocarbon-stained soils are present.

PHOTO 50 - Closeup of the area near the left (east) side of the garage door shown in **PHOTO 47**. Heavy hydrocarbon staining in soils and on the steel plate/sheet appears evident.

PHOTO 51 - View facing west-southwest towards a garage/storage building and metal shed south of the garage/shop building. In front of the metal shed to the left is a 5-gallon plastic bucket half full of liquid, apparently paint.

PHOTO 52 - View inside the metal shed shown to the left in the previous photograph. There is apparent oil staining on the concrete floor.

PHOTO 53 - View inside the door with a “STOP” sign in **PHOTO 51**. Various household or personal items are being stored.

PHOTO 54 - View inside the garage door shown to the right in **PHOTO 51**, looking to the left.

PHOTO 55 - View to the right of that shown in the previous photograph, inside the garage/storage building.

PHOTO 56 - View to the right of that shown in the previous photograph, looking along a work bench with small containers that include paints and linseed oil.

PHOTO 57 - View facing south, standing near the metal shed shown to the left in **PHOTO 51**. Along the concrete blocks to the left are several unlabeled, plastic or metal 5-gallon containers with liquids or solids, and may include fertilizers.

PHOTO 58 - View facing northwest, looking towards the south side of the garage/shop building. The metal containers near the building to the right are for propane. On the concrete to the left is a survey flyover “X”.

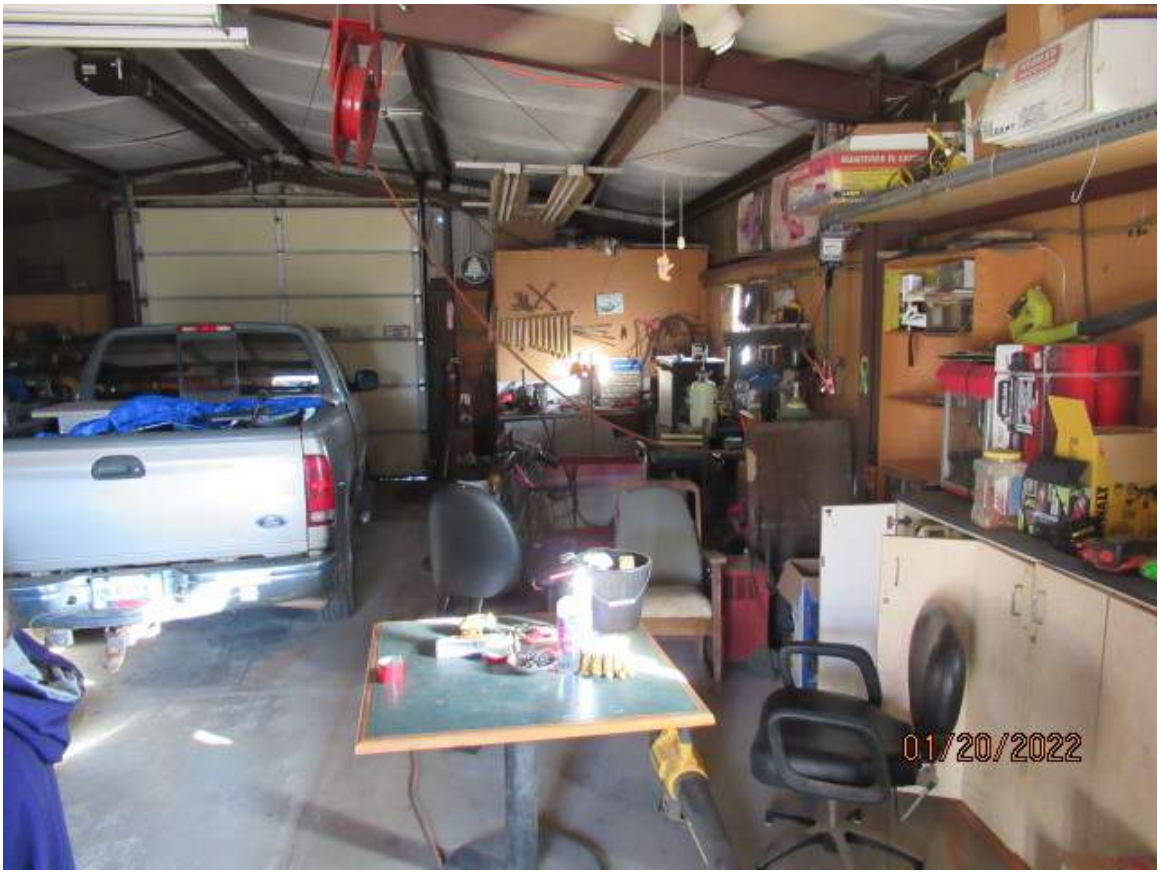

PHOTO 59 - View inside the man door shown in the previous photograph, looking north along the inside of the east portion of the garage/shop building.

PHOTO 60 - Northwesterly view to the left of that shown in the previous photograph. Most of the items present are typical garage type items, along with storage of personal items.

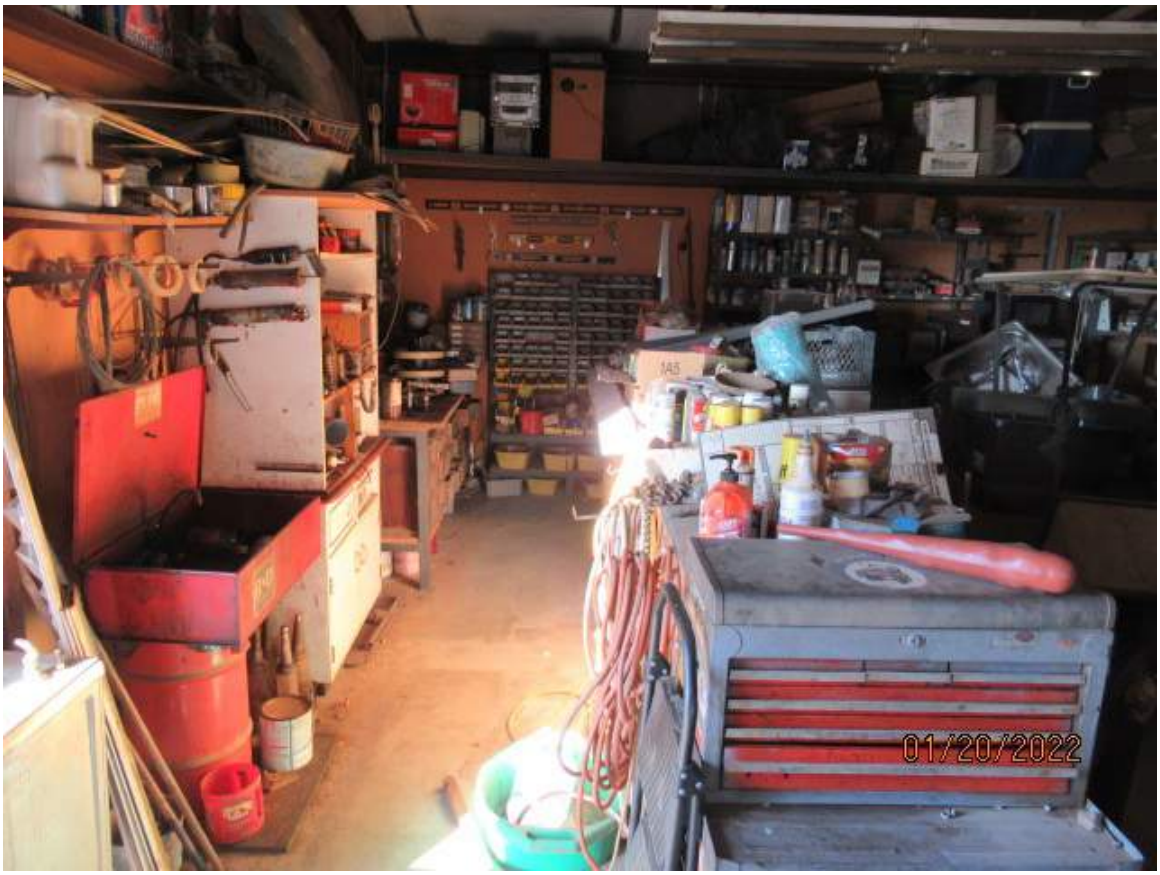

PHOTO 61 - View to the left of that shown in the previous photograph, facing west along the south end of the garage/shop building. To the left is a parts washer that apparently utilized diesel as a solvent. To the right are numerous 1-gallon and smaller containers, including spray cans, paint, and solvents, paint thinner, and/or paint stripper, including acetone.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-SQG ---------- RCRA - Small Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System

US ENG CONTROLS---------- Engineering Controls Sites List
US INST CONTROLS---------- Institutional Controls Sites List

Federal ERNS list

ERNS---------- Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE---------- State Response Sites

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF---------- Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST---------- Leaking Underground Storage Tanks on Indian Land
CPS-SLIC---------- Statewide SLIC Cases

Lists of state and tribal registered storage tanks

FEMA UST---------- Underground Storage Tank Listing
UST---------- Active UST Facilities
AST---------- Aboveground Petroleum Storage Tank Facilities
INDIAN UST---------- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP---------- Voluntary Cleanup Priority Listing
VCP---------- Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS---------- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

EXECUTIVE SUMMARY

RGA LUST ---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within

approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 07/22/2021 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MONUMENT RANCH SITE	***GOETZ ROAD / ETHANAC***	***NW 1/8 - 1/4 (0.166 mi.)***	***4***	***12***
Facility Id: 70000024 Status: No Further Action				

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

NATIVE PLANTS INC	***25160 ETHANAC RD***	***N 0 - 1/8 (0.120 mi.)***	***A1***	***9***
Status: A Tank Status: A Comp Number: 58515				

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there is 1 HIST UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
RODEFFER INVESTMENTS Facility Id: 00000042545	25160 ETHANAC RD., S	N 0 - 1/8 (0.120 mi.)	A2	10

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NATIVE PLANTS INC Facility Id: 33007127 Status: A	***25160 ETHANAC RD***	***N 0 - 1/8 (0.120 mi.)***	***A1***	***9***

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NORMAN CARMICHAEL	25151 CORSICA LANE	S 1/8 - 1/4 (0.174 mi.)	5	16

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 09/20/2021 has revealed that there is 1 Cortese site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NATIVE PLANT Cleanup Status: COMPLETED - CASE CLOSED	***202 E ETHANAC***	***NNW 1/4 - 1/2 (0.375 mi.)***	***6***	***19***

EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

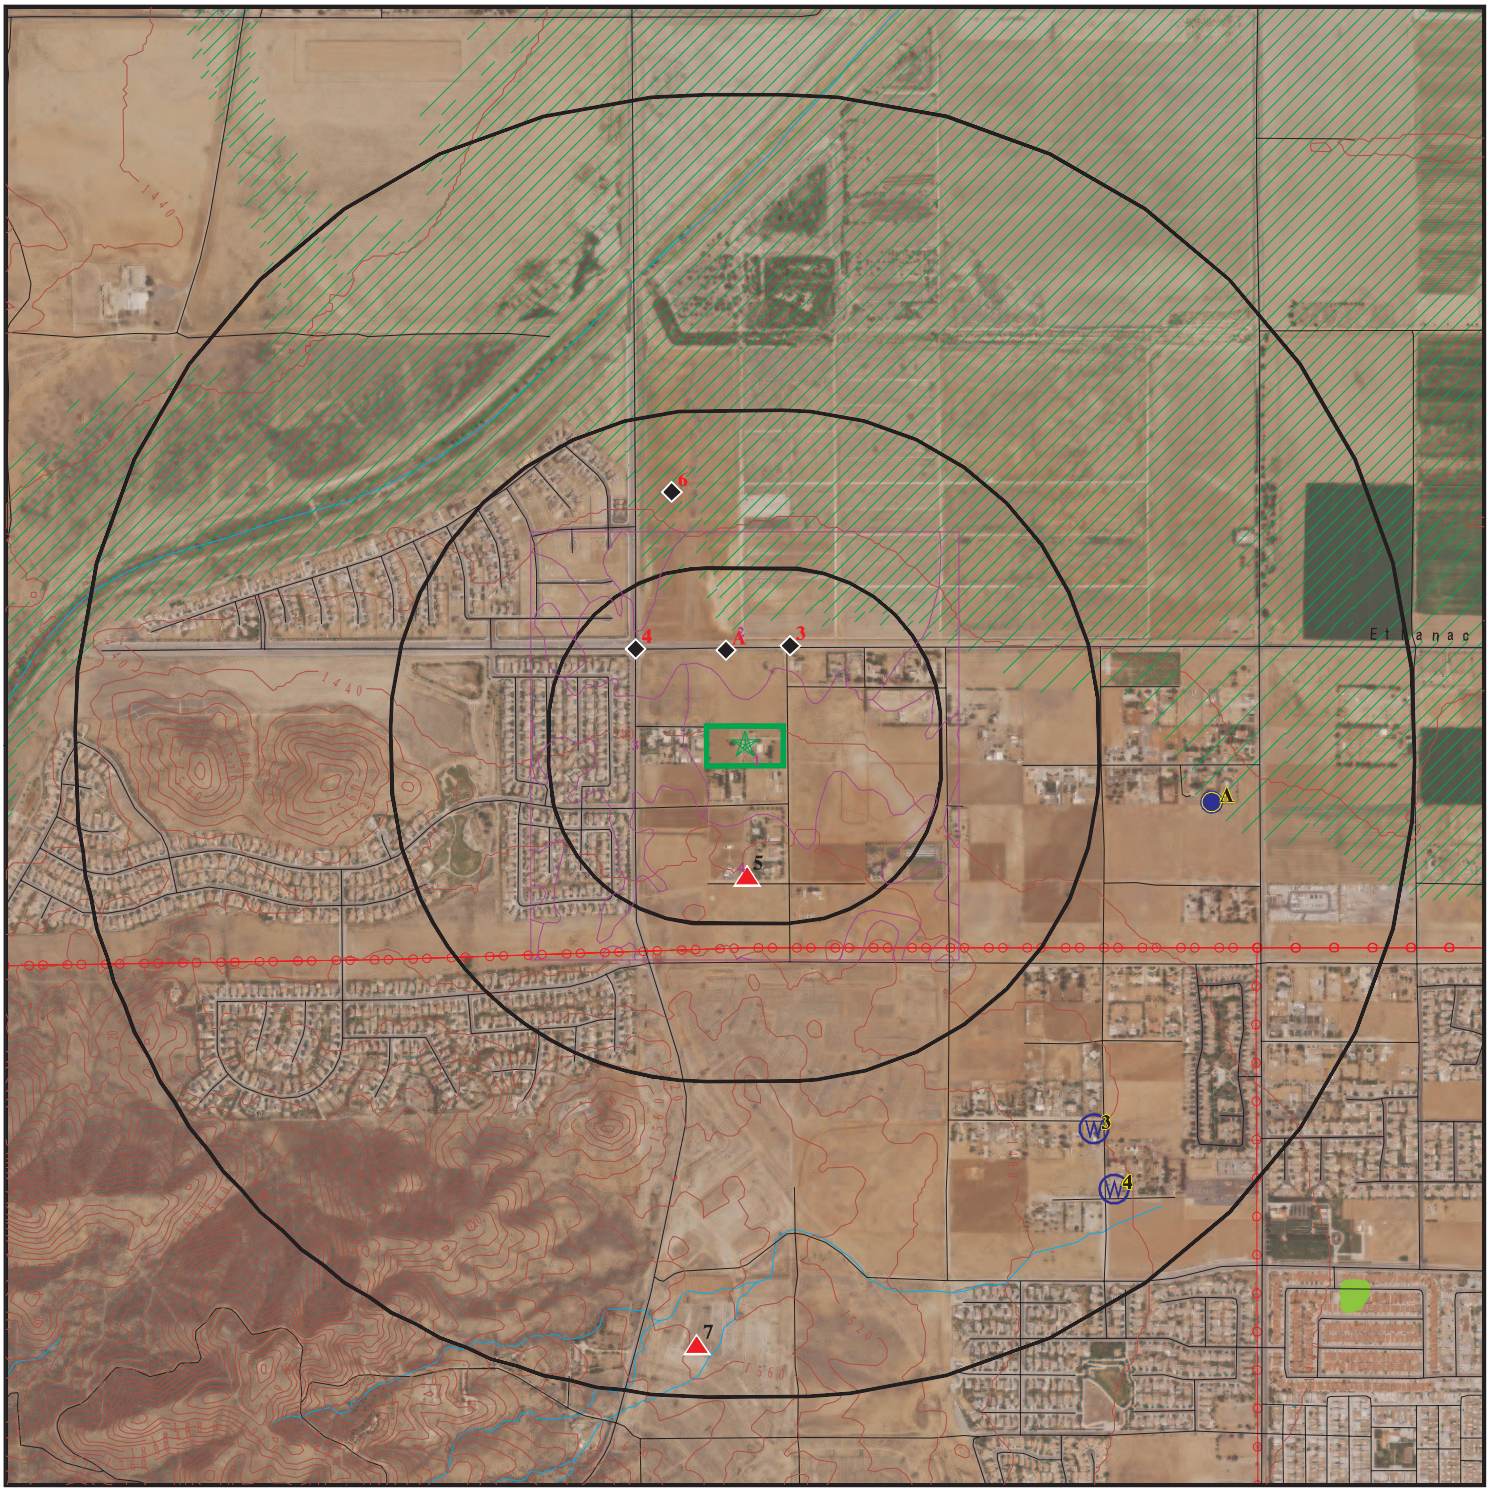

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007
Number of Days to Update: 40

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/23/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

North Map:	12015907 PERRIS, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

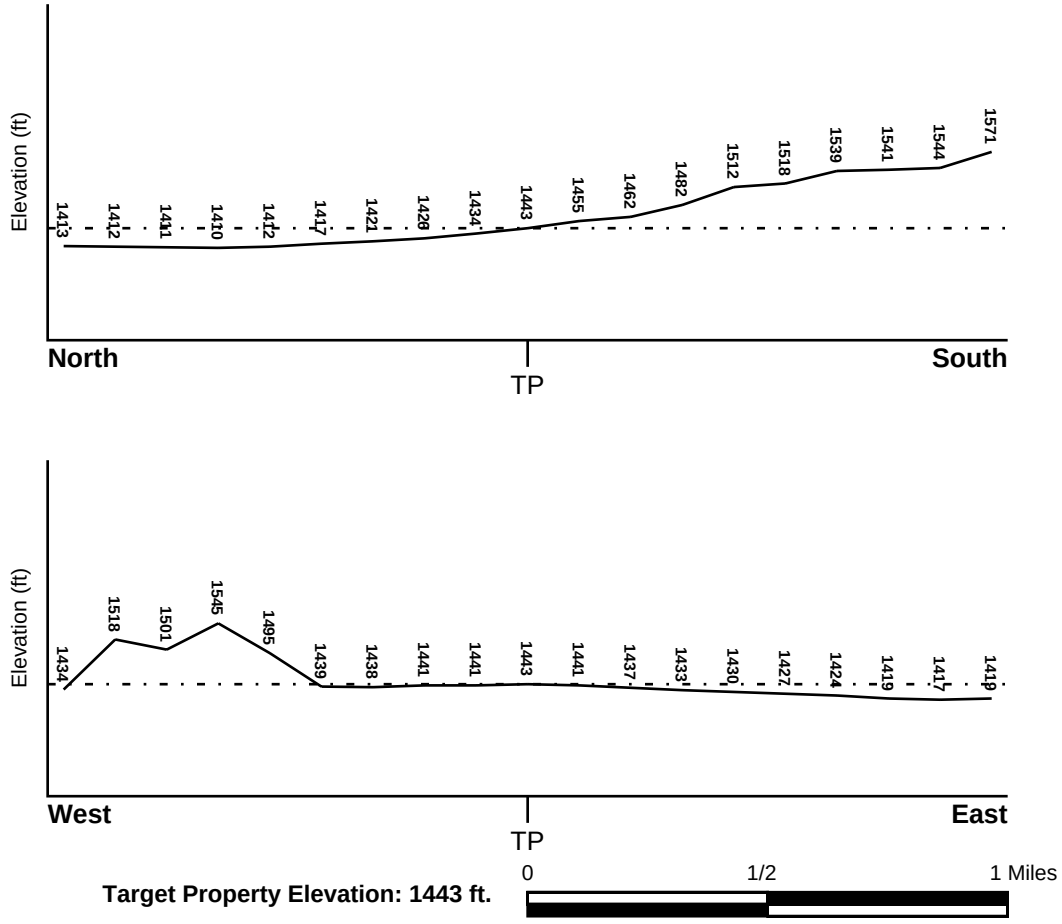

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1443 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C2055H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C1440H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: LAS POSAS

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	11 inches	31 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	31 inches	53 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: PORTERVILLE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:
2	7 inches	35 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:
3	35 inches	40 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.42 Min: 0.01	Max: Min:

Soil Map ID: 3

Soil Component Name: BUCHENAU

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	7 inches	44 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
3	44 inches	61 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 4

Soil Component Name: AULD

Soil Surface Texture: clay

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5
2	9 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
