Phase I Environmental Site Assessment 800 and 825 Carlisle Way Sunnyvale, California

#### **SECTION 1: INTRODUCTION**

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 800 and 825 Carlisle Way in Sunnyvale, California (Site) as shown on Figures 1 and 2. This work was performed for David J. Powers & Associates in accordance with our November 18, 2022 agreement (Agreement).

#### 1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E1527-21 titled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule, 40 CFR Part 312). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the Site.

As defined by ASTM E1527-21, the term Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition<sup>1</sup> is not a recognized environmental condition.

We performed this Phase I ESA to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

#### 1.2 PROJECT BACKGROUND

Cornerstone Earth Group, Inc. (Cornerstone) understands that California Water Service previously operated a groundwater well at the Site. The well recently was removed. A 50,000-gallon water storage tank was removed in 2016. The proposed project consists of demolition of

A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

two existing chemical storage sheds, a booster pump, an electrical control panel and associated water mains. Once the facilities have been demolished, a new domestic water well, a new 50,000-gallon steel bolted tank, water main, chemical feed equipment and an emergency electrical power generator will be constructed.

#### 1.3 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant releases of hazardous materials to structures, soil, soil vapor or groundwater.
- Drive-by observation of adjoining properties to note readily apparent activities involving hazardous materials that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents on-Site or at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Historical research including review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of current and/or prior Site uses, including the current Site owner and occupant(s).
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10.

#### 1.4 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone can neither warrant nor guarantee that records obtained from or prepared by other parties, such as, but not limited to, regulatory agency records, interview responses, maps, related documents, and environmental reports prepared by others are accurate or complete. Cornerstone relied on the information obtained during this study unless we had actual knowledge that the information was incorrect or unless it was obvious that the information was incorrect based on other information obtained. We also assumed that the boundaries of the Site, based on information provided by David J. Powers & Associates, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

#### 1.5 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Ron L. Helm, C.E.G. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. Part 312. We have the specific

qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All Appropriate Inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

#### **SECTION 2: SITE DESCRIPTION**

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

## 2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the Site, based on information provided by David J. Powers & Associates.

Table 1. Location and Ownership

Assessor's Parcel No. (APN)	309-12-013
Reported Address/Location	800 and 825 Carlisle Way, Sunnyvale California
Owner	California Water Service Company
Approximate Lot Size	0.77 acres

#### 2.2 CURRENT/PROPOSED USE OF THE SITE

The current and proposed uses of the Site are summarized in Table 2.

**Table 2. Current and Proposed Uses** 

Current Use	Unutilized former municipal water supply well facility
Proposed Use	New municipal water supply well facility

## 2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be primarily residential. During the Site visit, adjoining properties were observed from the Site and from adjacent public thoroughfares. Based on our Site vicinity reconnaissance, adjoining property uses are summarized below in Table 3. No features, activities, uses or conditions on the adjoining properties were observed that are considered indicative of Recognized Environmental Conditions at the Site.

**Table 3. Adjoining Property Uses** 

North	Residential
South	Residential
East	Residential
West	Panama Public Park

#### **SECTION 3: USER PROVIDED INFORMATION**

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is David J. Powers & Associates. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions in connection with the Site, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

## 3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

A Preliminary Title Report by First American Title Company (dated February 26, 2021) was provided for our review. No environmental liens or AULs were listed in the title report.

# 3.2 SPECIALIZED KNOWLEDGE, COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with David J. Powers & Associates, we understand that David J. Powers & Associates does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions.

#### **SECTION 4: RECORDS REVIEW**

## 4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency database records provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E1527-21. A list of the database sources reviewed,

a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with respect to the Site. The customary practice is to review information from standard sources that is reasonably ascertainable within reasonable time and cost constraints.

## 4.1.1 On-Site Database Listings

The Site was not identified in the researched regulatory agency databases.

## 4.1.2 Adjoining Property Database Listings and Nearby Spill Incidents

Adjoining properties were not identified in any of the researched regulatory agency databases. Additionally, based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

#### 4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

## 4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 800 and 825 Carlisle Way at the Sunnyvale Building Department and Sunnyvale Fire Department. The Fire Department indicated that they have no files pertaining to the Site.

Building Department files included a permit (2000) for installation of a transformer by California Water Service; a letter (2001) approving the installation of mechanical equipment and sheds to store water disinfection chemicals (sodium hypochlorite and ammonia); a permit (2006) for the installation of cellular telephone equipment by Sprint; and a permit (2011) for perimeter fencing.

#### 4.2.2 Geologic Energy Management Division Maps

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Geologic Energy Management Division (CalGEM) website were reviewed. Review of the available map for the Site area did not show oil or gas wells on-Site or on the adjacent properties.

#### **SECTION 5: PHYSICAL SETTING**

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

#### **5.1 RECENT USGS TOPOGRAPHIC MAP**

A 2018 USGS 7.5-minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 148 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the northeast towards the San Francisco Bay.

## **5.2 HYDROGEOLOGY**

The California Department of Conservation Division of Mines and Geology Seismic Hazard Zone Report (2002) for the Site area indicates a historical high ground water depth in the Site vicinity of approximately 50 feet. Ground water beneath the Site likely flows generally to the northeast.

#### **SECTION 6: HISTORICAL USE INFORMATION**

The objective of the review of historical use information is to develop a history of the previous uses of the Site and adjoining properties in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the Site. The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The identification of obvious uses of adjoining properties also is required.

## **6.1 HISTORICAL SUMMARY**

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 4.

- Historical Aerial Photographs: We reviewed aerial photographs dated between 1939 and 2016 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B.
- Historical Topographic Maps: We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1897, 1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, 1995, 2012, 2015 and 2018; copies of historic topographic maps reviewed are presented in Appendix B.
- Historical Fire Insurance Maps: EDR reported that the Site was not within the coverage area of fire insurance maps.

**Table 4. Summary of Historical Source Information** 

Date	Source	Comments			
1897 to 1953	Topographic	c <b>Site:</b> No structures are depicted. The 1948 and 1953 topographic maps depict orchards on-Site.			
	maps				
		Adjoining Properties: The 1948 and 1953 topographic maps depict			
		orchards on adjoining parcels. Residences are shown to the north by 1953.			
1961, 1968, 1973 and 1980	Topographic maps	Site: A water tank is depicted on-Site.			
		Adjoining Properties: Residences are shown to the north. Panama			
		School is shown to the west. Orchards are depicted on other adjoining			
		parcels in 1961; by 1968 they are depicted as being within the urban			
		developed area of Sunnyvale.			
1995	Topographic	Site: A water tank is depicted on-Site.			
	map	·			
		Adjoining Properties: Panama park is shown to the west. Other			
		adjoining parcels are depicted as being within the urban developed			
		area of Sunnyvale.

1950 and 1956	photographs				
		Adjoining Properties: Shown to be occupied by orchards.			
		Residences are shown to the north by 1956.			
1963 to 2016	Aerial	<b>Site:</b> Shown to be occupied by an above ground water tank and			
	photographs	associated facilities.			
		Adjoining Properties: Residences are shown to the north, south and			
		east. Undeveloped land associated with a school is shown to the west.			
		The school buildings are shown to have been removed by 1982.			

## 6.1.1 City Directory Review

To obtain additional information regarding past uses of the Site and adjoining properties, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017.

The Site addresses were not identified in the researched city directories. Various individuals were listed as occupants of parcels to the north, south and east, suggesting residential use. The acquired city directory report is presented in Appendix C.

#### **SECTION 7: SITE RECONNAISSANCE**

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 5. Photographs of the Site are presented in Section 7.2.1.

#### 7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on December 16, 2022. The Site reconnaissance was conducted by walking representative areas of the Site, including the interiors of the on-Site structures, the periphery of the structures and the Site periphery. The Site also was observed from adjacent public thoroughfares. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects.

#### 7.2 OBSERVATIONS

At the time of our visit, the Site was observed to consist of an unutilized municipal water service facility consisting mainly of undeveloped land. Two small sheds that formerly contained water disinfecting chemicals were present, along with remnant water distribution piping and electrical controls. The chemical storage sheds were observed to contain an empty above ground storage tank (AST) for aqueous ammonia (19%) and an empty AST for sodium hypochlorite. Both ASTs were secondarily contained. No evidence of significant spills was readily apparent.

An on-Site fenced enclosure was observed to contain cellular telephone equipment operated by Sprint and an associated antenna. Three pole mounted electrical transformers also were observed on-Site. No evidence of transformer oil leaks was observed.

Table 5. Summary of Readily Observable Site Features

General Observation	Comments
Aboveground Storage Tanks	Observed as described above
Agricultural Wells	Not Observed
Air Emission Control Systems	Not Observed
Boilers	Not Observed
Burning Areas (waste burn pits or ash disposal areas)	Not Observed
Chemical Mixing Areas	Not Observed
Chemical Storage Areas	Observed as described above
Drainage Ditches	Not Observed
Drums, Totes, and Intermediate Bulk Containers	Not Observed
Elevators	Not Observed
Emergency Generators	Not Observed
Equipment Maintenance Areas	Not Observed
Fill Placement (i.e., fill used to build up the site elevations)	Not Observed
Groundwater Monitoring Wells	Not Observed
Hoods and Ducting (associated with chemical use)	Not Observed
Hydraulic Vehicle or Equipment Lifts	Not Observed
Incinerators	Not Observed
Petroleum Pipelines or Wells	Not Observed
Pits, Ponds, or Lagoons.	Not Observed
Railroad Lines	Not Observed
Row Crops or Orchards	Not Observed
Septic Systems or Cesspools	Not Observed
Solid Waste Disposal Areas (other than municipal trash containers)	Not Observed

Table 5 (Continued). Summary of Readily Observable Site Features

General Observation	Comments
Stained Soil or Pavement	Not Observed
Stains or Corrosion on Floors, Walls, or Ceilings	Not Observed
Standing Surface Water or Pools	Not Observed
Stockpiles of Soil or Debris	Not Observed
Stressed Vegetation (unrelated to the lack of water)	Not Observed
Strong, Pungent, or Noxious Odors	Not Observed
Sumps, Clarifiers, Oil-Water Separators, or similar structures	Not Observed
Transformers	Observed as described above
Underground Storage Tanks	Not Observed
Unidentified Substance Containers	Not Observed
Vehicle Maintenance Areas	Not Observed
Vehicle Wash Areas	Not Observed
Wastewater Neutralization Systems	Not Observed

The comment "Not Observed" does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

## 7.2.1 Site Photographs

Photograph 1. View of the Site looking east.

Photograph 3. Chemical storage sheds.

Photograph 2. View of the Site looking south.

Photograph 4. Cellular telephone equipment enclosure.

#### **SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS**

## 8.1 ENVIRONMENTAL QUESTIONNAIRE / CURRENT OWNER AND OCCUPANT INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire for completion by the Site owner. The completed questionnaire was not returned to us as of the date of this report. However, during our Site visit, Mr. Bob Cardoso, Chief Pump Operator with California Water Service Company, was interviewed regarding his knowledge of the Site. Mr. Cardoso indicated that he was not aware of any chemical spills at the Site or other environmental concerns. He stated that a former water supply well was recently destroyed and that the existing chemical storage sheds will be replaced with new facilities as part of the planned project.

#### **8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS**

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

#### 8.3 INTERVIEWS WITH STATE AND/OR LOCAL GOVERNMENT OFFICIALS

Per the ASTM Standard, a reasonable attempt should be made to interview at least one staff member of any one of the following types of state and/or local government agencies: fire department, health department, building department, or other agency having jurisdiction over hazardous waste disposal or other environmental matters in the area.

The Sunnyvale Building Department and Sunnyvale Fire Department were contacted during this study. The Fire Department is the Certified Unified Program Agency (CUPA) responsible for implementing California's Unified Hazardous Waste and Hazardous Materials Management regulatory program for properties within Sunnyvale. Files pertaining to the Site were requested from each of these agencies; a summary of the information obtained was discussed in Section 4.2.1.

# SECTION 9: FINDINGS, OPINIONS, AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general conformance with ASTM E1527-21 to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

## 9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site historically was occupied by an orchard. An above ground municipal water storage tank and associated equipment were installed at the Site by the early 1960s; the storage tank was removed in 2016. Two sheds for storage of water disinfection chemicals (sodium hypochlorite and ammonia) were added in approximately 2001. Cellular telephone equipment operated by Sprint was installed in approximately 2006.

#### 9.2 CHEMICAL STORAGE AND USE

Except for water disinfection chemicals, the Site does not appear to have historically been occupied by businesses that are typically associated with the use or storage of significant quantities of hazardous materials. Two chemical storage sheds remain at the Site that currently are not in use. Sodium hypochlorite and ammonia were previously stored in secondarily contained ASTs. No evidence of significant spills was readily apparent. The past chemical use/storage appears unlikely to have significantly impacted soil or groundwater at the Site. The Sunnyvale Fire Department should be contacted to evaluate permit requirements for any planned future chemical storage at the Site.

#### 9.3 AGRICULTURAL USE

The Site was used for agricultural purposes for several decades. Pesticides may have been applied to crops in the normal course of farming operations. Residual pesticide concentrations may remain in on-Site soil. Residual agricultural chemicals, if present, typically are limited to the upper few feet of soil and would not pose a significant threat to groundwater quality at the Site or to the operation of the planned water supply facility.

If excess soil will be generated for off-Site disposal during the planned construction activities, the excess soil should be appropriately sampled and tested for compounds of concern as required by the facility accepting soil planned for off-haul. This testing should include analyses for organochlorine pesticides and pesticide-related metals (lead and arsenic).

#### 9.4 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site.

#### 9.5 DATA GAPS

ASTM Standard E1527-21 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data gaps were identified during this Phase I ESA.

### 9.6 DATA FAILURES

As described by ASTM Standard E1527-21, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five-year intervals back to the first use or to 1940 (whichever is earlier). The ASTM Standard requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

## 9.7 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E1527-21 of 800 and 825 Carlisle Way, Sunnyvale, California. This assessment identified the following Recognized Environmental Conditions<sup>2</sup>.

• The Site historically was used for agricultural purposes. There is a potential that residual pesticides could remain in Site soil.

This assessment did not identify any Controlled Recognized Environmental Conditions<sup>3</sup> or Historical Recognized Environmental Conditions<sup>4</sup> associated with the Site.

## **SECTION 10: LIMITATIONS**

Cornerstone performed this Phase I ESA to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions associated with the Site. David J. Powers & Associates understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. David J. Powers & Associates understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E1527-21, Section 8.1.3). Due to inadequate address information,

Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

<sup>3</sup> A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

A previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory agency and meeting unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to any controls.

the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

David J. Powers & Associates may have provided Cornerstone environmental documents prepared by others. David J. Powers & Associates understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates and may not be reproduced or distributed without written authorization from Cornerstone. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

#### **10.1 REPORT VIABILITY**

Per ASTM E1527-21 and 40 CFR Part 312, a Phase I Environmental Site Assessment report is presumed to be viable when it is conducted within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction), provided that the following components of the inquiries were conducted or updated within 180 days prior to the date of purchase or the date of the intended transaction:

#### Task

Interview with current owner and occupant
Review of standard government environmental record sources
Visual observation of the Site and of adjoining properties
Declaration by the Environmental Professional
Searches for recorded environmental cleanup liens

#### **Date Competed**

December 16, 2022 November 22, 2022 December 16, 2022 December 19, 2022 User responsibility

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIFECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

## Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1

RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

#### Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

## Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 13 LUST sites within approximately 0.5 miles of the target property.

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 7 HIST LUST sites within approximately 0.5 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

## Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## **EXECUTIVE SUMMARY**

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Database: CUPA SANTA CLARA, Date o	f Government Version: 05/16/202	22		

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

**EDR ID Number** 

Summary Details:

Conditions at proposal June 24, 1988): Intersil, Inc., and Siemens Components have manufactured semiconductors for several years on two locations near one another covering 15 acres in Cupertino, Santa Clara County, California. The facilities are surrounded by residential, industrial, and business areas. Investigations conducted in 1982 as part of the California Regional Water Quality Control Board s underground tank leak detection program found organic solvents, including trichloroethylene, 1,1,1-trichloroethane, tetrachloroethylene, trichlorofluoroethane, and 1,1-dichloroethylene, in soils on the site and in ground water on and off the site. Contamination is believed to have resulted from locali ed spills and from leaking underground storage tanks, piping, and other equipment involving the two companies. More than 300,000 people obtain drinking water from public wells within 3 miles of the site. Siemens and Intersil began remedial investigations at the site in 1982 and 1983, respectively, under State supervision. The underground storage tanks were removed, and in 1983 a system was installed to extract gases from soil; the system was expanded in 1985. In June 1986, the California Regional Water Quality Control Board issued Waste Discharge Requirements under the California Water Code requiring both companies to determine the extent of contamination in ground water and soils. In July 1986, a system was installed to pump contaminated ground water in the uppermost aguifer to the surface and treat it. Since April 1988, a pump and treat system for the two uppermost aquifers has been in full-scale operation. Intersil stopped operations in 1988, and all remaining underground equipment was removed. Status August 30, 1990): In February 1990, the two companies released draft reports of remedial investigations/feasibility studies for the site and off-site downgradient areas. Interim off-site remedial activities are scheduled to begin in June 1990. Also in June 1990, the State plans to issue tentative site cleanup requirements and hear public comments on the proposed remedial action plan.

**EDR ID Number** 

site appears to be primarily associated with a neutralization sump and a chemical storage shed. The facility is

located within the Hillview-Porter region.

Detected soil contaminants include trichloroethene (TCE), dichloroethene (DCE), trichloroethane (TCA), and chlorobenzenes. Groundwater contaminants include TCE at 910 parts per billion (ppb), 1,1-DCE at 92 ppb, chloroform at 100 ppb,

and Freon at 63 ppb.

There are seven private wells and a creek downgradient of the site. There are two backup municipal supply wells within 1.5 miles of the site. Inhabitants of the residential area downgradient from the site are potential receptors for groundwater and surface water contamination.

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)): State Response. including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. STATE MASTER

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive,

ignitable or reactive substances and must be managed according to

applicable DOHS standards.

Primary Waste: CNWTRS Waste Type2: Not reported

Waste2: Contaminated Ground Water

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive,

ignitable or reactive substances and must be managed according to

applicable DOHS standards.

Secondary Waste: Not reported Secondary Waste Type: Not reported

Design Flow: 0
Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The POTW Does not have an approved pretreatment program. Some POTWs

may have local pretreatment programs that have not been approved by

the regional board and/or EPA.

Treat To Water: Moderate Threat to Water Quality. A violation could have a major

adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance

from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological

waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum

products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History:

Previous fuel leak case at this site that was closed on 4/24/91. The case was closed with residual soil contamination of 1 parts per

million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHq), 1 ppm TPH as Diesel (TPHd), and 30 ppm Total Oil and Grease (TOG). 1993 In September, 11 soil borings (UB through UL) were advanced to depths of 5-50 ft bgs onsite. 3 soil vapor extraction wells (UV1

through UV3) were also installed to 60-85 ft bgs. 51 soil samples were collected and reported to contain maximum concentrations of 13,000 ppm TPHq, 150 ppm Benzene, 1,200 ppm Toluene, 250 ppm Ethylbenzene, and 1,500 ppm Xylenes. The 3 soil samples collected in borings UG and UL were also analyzed for TPHd, TOG, Volatile Organic Compounds (VOCs), and Semi-Volatile Organic Compounds (SVOCs), which

were not reported to be present above the laboratory reporting limits. The highest concentrations were reported for soil samples collected from borings UB and UV2 advanced in the area of the former USTs. 1994 In January, a soil vapor extraction (SVE) test was

conducted on wells UV1 and UV2. Based on the results of the test, it

Map ID Direction Distance Elevation

Site

Database(s)

UNOCAL (Continued) U001594936

was recommended to utilize SVE to remediate the site. In March, 2 soil borings (UM and UN) were advanced to depths of 46.5 ft bgs onand offsite. 12 soil samples were collected and reported to have maximum concentrations of 0.067 ppm Benzene, 0.024 ppm Toluene, 0.01 ppm Ethylbenzene, and 0.047 ppm Xylenes. TPHg was not reported to be present in the samples above the laboratory reporting limits. No work was conducted between 1994 and 1997. In June 1996 following a meeting with the Santa Clara Valley Water District (oversight agency at that time), it was again recommended that SVE be implemented at the site. 1997 In October, a waste oil UST and a clarifier were removed from the site. 2 soil samples were collected from the waste oil UST excavation at 8 ft bgs and were reported to contain a maximum concentration of 2.1 ppm TPHd. VOCs, HVOCs and TOG were not reported to be present above the laboratory reporting limtis. 1998 In June, the dispensers and some piping were replaced. 6 soil samples were collected from 3.5-4 ft bgs and were not reported to have concentrations of the Constituents of Concern (COCs), except for one detection of Benzene (0.006 ppm) and Methyl tert Butyl Ether (MtBE) (0.15 ppm) in sample P1. 1999 In February, 3 borings (GP1 through GP3) were advanced onsite in the area of the dispensers to depths of 15-49 ft bgs. Groundwater was encountered at 41 ft bgs in boring GP1 during drilling. 9 soil samples were collected and reported to contain maximum concentrations of 740 ppm TPHq. 5.2 ppm Benzene. 12 ppm Toluene, 7.1 ppm Ethylbenzene, 45 ppm Xylenes, and 5.82 ppm MtBE in the sample collected from 40.5-41 ft bgs in GP1. A grab groundwater sample was collected from GP1 and was reported to contain 310,000 parts per billion (ppb) TPHg, 24,000 ppb Benzene, 45,000 ppb Toluene, 7,000 ppb Ethylbenzene, 37,000 ppb Xylenes, and 57,000 ppb MtBE. In April, 3 monitoring wells (MW1 through MW3) were installed onsite to 60.5 ft bgs. 9 soil samples were collected and reported to have low to non-detectable concentrations of the COCs. Following completion of the wells, groundwater was reported to be present between 43-44 ft bgs. Periodic groundwater monitoring began at the site. The highest concentrations of COCs in groundwater were reported for well MW1, which is located just north of the existing USTs. In August, during groundwater monitoring, free product (FP) was reported to be present in well MW1 and was measured to be approximately 1.21 feet thick. Weekly bailing of FP started in September and continued through April 2004. In October, FP was measured in well MW3 (located west of the dispenser islands) in addition to in well MW1. In September, a slug test was conducted and a 5-day dual phase extraction test was conducted. 2000 In March, 5 monitoring wells (MW4 through MW8) were installed on and offsite. The report of this investigation was not found in the file. In a later report, it is noted that 15 soil samples were collected and that there was only one detection of 0.006 ppm Toluene in the sample collected at 30 ft bgs in MW7 located along the southern boundary of the property. The wells were added to the groundwater monitoring program. In May, a Corrective Action Plan (CAP) proposing soil vapor extraction and groundwater extraction to remediate the site. In June, 3 groundwater extraction wells (EW1 through EW3) were installed onsite to 60 ft bgs around the existing USTs. 9 soil samples were collected and reported to have maximum concentrations of 25 ppm TPHg, 0.47 ppm Benzene, 1.6 ppm Toluene, 0.4 ppm Ethylbenzene, 2.6 ppm Xylenes, and 2.7 ppm MtBE. In July, FP was measured to be present in new well EW3. Between 2000 and 2004, only groundwater monitoring and FP bailing occurred at the site. 2004 In April, SVE system was started onsite. The groundwater

**UNOCAL** (Continued)

U001594936 extraction (GWE) system was not started due to electrical problems. The SVE system was shut down in July due to noise complaints. In November, a dual phase extraction (DPE) event was conducted for 55 hours on well MW1. The event removed approximately 6,500 gallons of groundwater and 7.1 gallons of TPH. 2005 In February, 4 soil borings (SB1 through SB4) were advanced onsite to 55 ft bgs. A report of this investigation was not found in the file. A later report notes that 6 soil samples were collected between 40-55 ft bgs and were reported to contain low to non-detectable concentrations of the COCs. In April, the SVE system was restarted and operated for less than 2 weeks when it was shut down again due to noise complaints. The system was restarted in May and set to run only during the day. It operated for approximately 13 days before it was found off again. The system was restarted at the end of June. In September, 2 monitoring wells (MW9 and MW10) were installed offsite and extraction well EW4 was installed onsite. 6 soil samples were collected and reported to contain maximum concentrations of 120 ppm TPHg, 1.3 ppm Benzene, 2.3 ppm Toluene, 1.5 ppm Ethylbenzene, 7.8 ppm Xylenes, and 1.9 ppm MtBE in samples collected in well EW4. The wells were added to the groundwater monitoring program. Between 2005 and 2007, SVE continued and routine groundwater monitoring continued at the site. 2007 In December, 6 ozone sparge wells (OS1 through OS6) were installed onsite to depths of 60-67 ft bas. 16 soil samples were collected and reported to contain maximum concentrations of 3,000 ppm TPHg, 14 ppm Benzene, 260 ppm Toluene, 49 ppm Ethylbenzene, 500 ppm Xylenes, 1.9 ppm MtBE, and 0.44 ppm Tert Butyl Alcohol (TBA) in the sample collected at 45 ft bgs in OS6. 2009 In May, 3 monitoring wells (MW11 through MW13) were installed onsite to 60 ft bgs. 9 soil samples were collected and reported to have maximum concentrations 15 ppm TPHd, 320 ppm TPHg, 0.59 ppm Benzene, 15 ppm Toluene, 9.3 ppm Ethylbenzene, 48 ppm Xylenes, 0.13 ppm MtBE, and 0.13 ppm TBA. The new wells were added to the groundwater monitoring program. In June, bi-weekly groundwater extraction events from well MW1 using a bailer were reported to have been conducted and continued through January 2010 to remove FP. Records of this work were not found and the total volume of groundwater and FP removed were not documented. It is estimated that overall, from 1999 through 2010, 112 gallons of FP was removed from the site. In September, two air sparge feasibility tests were conducted at the site. The results of the test indicated that sparging could be effectively implemented at the site. Oxygen injection commenced around this time. Oxygen was injected instead of ozone due to high influent vapor phase petroleum hydrocarbon concentrations. 2010 In August, damaged wells OS4 through OS6 were destroyed and replaced with wells OS4R through OS6R. 2011 In April, the SVE and air sparge systems were shut down. It is estimated that the system removed 43,260 pounds TPHg, 372 pounds Benzene, and 34 pounds of MtBE. In July, another CAP was submitted that recommended Monitored Natural Attenuation (MNA). Groundwater monitoring continued through 2013. 2013 In November, the final round of groundwater monitoring was conducted and reported maximum concentrations of 8,200 ppb TPHg, 930 ppb Benzene, 2.9 ppb Toluene, 480 ppb Ethylbenzene, 25 ppb Xylenes, 760 ppb MtBE, and 1,000 ppb TBA. Considerations and/or Variances: There is one active irrigation well located approximately 640 feet from the plume boundary. The consultant concluded that Based

on the limited lateral extent (less than 100 feet) of the

dissolved-phase petroleum hydrocarbon plume as defined by the groundwater monitoring well network, the distance of the irrigation

Distance

Elevation Site Database(s) EPA ID Number

UNOCAL (Continued) U001594936

well from the Site, and the depth of the screen interval of the irrigation well compared to depth-to-groundwater, it is unlikely that the irrigation well would be impacted by the dissolved-phase petroleum hydrocarbon plume associated with the Site. Multiple attempts were made to obtain access to sample the irrigation well and

were not successful.

Potential Contaminants of Concern: Gasoline

Site History: Previous investigations at the site have been conducted by EMCON

Associates, Inc. (EMCON), Pacific Environmental Group, Inc. (PEG), Toxichem Management Systems, Inc. (Toxichem), Shaw Environmental &

Infrastructure (Shaw), Cambria Environmental Technology, Inc. (Cambria), and Conestoga-Rovers & Associates (CRA). A summary of these investigations is provided below. 1984 Soil Investigation: On September 7, 1984, FMCON installed one 3-inch-diameter well (FW-1) of the control of the control

September 7, 1984, EMCON installed one 3-inch-diameter well (EW-1) on the northeast side of the underground storage tank (UST) complex in service at that time. Six soil samples were collected, and no total petroleum hydrocarbons as gasoline (TPHg) were detected in the soil samples. 1991 Soil Investigation: Seven exploratory borings (S-A through S-G) were drilled and sampled by PEG on April 3, 1991. The borings were drilled in anticipation of the replacement of the USTs.

The borings were located in the vicinity of the UST complex in service at that time and in the location of the proposed new UST complex. Details of this investigation were presented in PEGs May 6, 1991 site assessment report. 1999 Soil Investigation: Cambria drilled and sampled four exploratory borings (SB-1 through SB-4) in January 1999. Details of the investigation are presented in Cambrias March

22, 1999 Phase II Subsurface Investigation Report. 1999 UST Replacement: During May 1999, the USTs and associated product piping were replaced. Details of the investigation are presented in Cambrias August 26, 1999 Underground storage Tank and Product Piping Removal

August 26, 1999 Underground storage Tank and Product Piping Remova Closure Report. 1999 Well Destruction: Cambria destroyed well EW-1 located immediately northeast of the UST complex. Details of the well destruction are presented in Cambrias August 26, 1999 Well Abandonment Report. 2001 Site Assessment: Toxichem drilled two cone

penetration test (CPT) borings (CPT-1 and CPT-2) and one hand-auger

boring (HA-1) in the down-gradient groundwater direction from the USTs and product islands. Methyl tertiary-butyl ether (MTBE) concentrations of up to 16 milligrams per kilogram (mg/kg) were encountered in boring CPT-1 at 29 feet below grade (fbg). Details of the investigation are presented in Toxichems October 24, 2001 Site Assessment Report and Additional Site Investigation Work Plan. 2002

S106091049

Additional Site Assessments: On April 29 and 30, 2002, Toxichem installed three groundwater monitoring wells (MW-1, MW-2, and MW-3). MTBE was detected in the soil samples from all three monitoring wells at depths of 20 to 45 fbg. Maximum concentrations of 130,000 micrograms per liter (%g/L) MTBE and 29,000 %g/L tertiary butyl alcohol (TBA) were detected in the initial groundwater sample collected from MW-1. Between May 13 and 20, 2002, Toxichem drilled seven CPT borings (CPT-3 through CPT-9) in various depths and locations across the site. Borings CPT-3 to CPT-6 were drilled off site to depths ranging from 55 to 90 fbg. Borings CPT-7 to CPT-9 were drilled on site to depths ranging from 80 to 90 fbg. MTBE was detected in the soil sample from CPT-9 at 31 fbg. Maximum concentrations of 15,000 %g/L MTBE and 400 %g/L TBA were detected in the grab groundwater sample collected from CPT-3. A half-mile radius well survey was obtained from the Santa Clara Valley Water District (SCVWD). Three water-production wells and three extraction wells were identified within the survey radius. The closest water-producing well is located approximately 500 feet west-southwest of the site (upgradient). Details of this well survey and site assessment are documented in Toxichems July 15, 2002 Additional Site Assessment Report. 2002 Additional Site Assessment: On October 24 through 25, 2002, Toxichem drilled seven CPT borings (CPT-10 through CPT-16) in various depths and locations across the site. Borings CPT 10 through CPT-12 were advanced on site to approximately 75 fbg. Borings CPT 13 through CPT-16 were drilled off site to approximately 35 to 40 fbg. MTBE concentrations of 1.9 mg/kg and 3.8 mg/kg were detected in the soil samples from CPT-11 and CPT-12, respectively. MTBE concentrations were detected in all grab groundwater samples, with a maximum concentration of 21,000 %g/L at boring CPT 15. Details of this site assessment are documented in Toxichems December 12, 2002 Additional Site Assessment Report and Work Plan. 2003 Additional Site Assessment: Between February 3 and 5, 2003, Toxichem drilled and installed five monitoring wells (MW-4, MW-5, MW-6, MW-7A, and MW-7B). Wells MW-4 through MW-6 and MW-7A were installed to approximately 40 fbg. Well MW-7B was installed to approximately 60 fbg and is screened in the deeper water-bearing zone. MTBE concentrations were detected in soil samples from all wells with a maximum concentration of 13 mg/kg at MW 5. Only well MW-7B had a sufficient amount of groundwater for sampling, which yielded an MTBE concentration of 23 %g/L. Details of this site assessment are documented in Toxichems June 2, 2003 Additional Site Assessment and First Quarter 2003 Groundwater Monitoring Report. 2003 Feasibility Study: In July and August 2003, Shaw conducted a feasibility study at the subject site that included the consecutive performance of a groundwater extraction (GWE) test, a soil vapor extraction (SVE) test, and a simultaneous GWE and SVE test referred to as a dual-phase extraction (DPE) test on both shallow (perched) and deeper water bearing zones. Approximately 9.4 pounds of TPHg and 0.45 pounds of MTBE were removed from the vadose zone beneath the site. GWE activities removed approximately 0.006 pounds of MTBE from the groundwater in both the shallow (perched) and deeper water-bearing zones underneath the site. Based on the results of the tests, Shaw concluded that DPE would be a viable interim remedial method for the shallow water-bearing zone, while GWE would be a feasible remedial strategy in the deeper water-bearing zone. Details of the feasibility study are documented in Shaws April 14, 2004 Remedial Feasibility Testing Report, 2003 Soil and Groundwater Investigation: Shaw installed two additional wells (MW-8 and MW-9) to

#### S106091049

monitor groundwater in the shallow and deeper water-bearing zones. Details of the installation are presented in Shaws October 17, 2003 Well Installation Report. 2004 Interim Semi-monthly SVE: Starting on July 8, 2004, Shaw began implementing a periodic mobile SVE program on selected wells in the shallow water-bearing zone. On September 27, 2004, Shaw discontinued the periodic SVE events due to low hydrocarbon mass recovery. 2004 Corrective Action Plan (CAP): Shaw submitted a CAP to the SCVWD on August 24, 2004. The SCVWD approved implementation of the CAP; however, Shaw had not implemented the recommended GWE system prior to transfer of the site to Cambria in November 2006. Site concentrations are significantly reduced since the time the CAP was prepared. 2004 Off-Site Groundwater Investigation: On October 28 and 29, 2004, Shaw advanced five CPT borings (CPT-17 through CPT-21) in various locations off site which were drilled to approximately 60 fbg. Details of the installation are reported in Shaws March 8, 2005 Off-Site Exploratory Borings. 2005 Soil and Groundwater Investigation: Shaw installed three additional off-site wells (MW-10, MW-11, and MW-12) to monitor groundwater in the deeper water-bearing zone. The wells were installed down gradient of the site to continue assessment of the plume. Details of the installation are presented in Shaws September 1, 2005 Off-site Well Installation and Second Quarter 2005 Groundwater Monitoring and Sampling Report, 2006 Well Destruction: Shaw destroyed wells MW-2 and MW-5 located northeast of the UST complex. Details of the well destructions are presented in Shaws November 6, 2006 Well Destruction Report. 2008 Well Installation: CRA installed one on-site well (MW-13) to monitor groundwater in the deeper water-bearing zone. The well was installed down gradient of the UST complex to continue assessment in the potential source area. Details of the installation are presented in CRAs June 20, 2008 Subsurface Investigation Report. 2011 Site Conceptual Model (SCM): On July 29, 2011, CRA prepared and submitted an SCM for this site and requested case closure. Groundwater Monitoring Program: There are currently nine monitoring wells on site (MW 1, MW-3, MW-4, MW-6, MW-7A, MW-7B, MW-8, MW-9, and MW-13) and three off site monitoring wells (MW-10 through MW-12) located northeast of the site in Aloha Mobile Home Park. Groundwater sampling was suspended per Santa Clara County Department of Environmental Healths June 23, 2009 letter granting no further action pending a case closure review. As CRA recommended, we conducted a one-time groundwater monitoring event during the first quarter 2014. Wells MW-3, MW-7B, MW-9, MW-10, MW-11, MW-12, and MW 13 were redeveloped. Wells MW-1, MW-4, MW-6, MW-7A, and MW-8 were not redeveloped due to insufficient water. Wells MW-1, MW-3, MW-7B, MW-9, MW-10, MW-11, MW-12, and MW-13 were gauged and sampled on January 23, 2014. Wells MW-4, MW-6, MW-7A, and MW-8 could not be sampled due to insufficient water. Only 55 %g/L TPHg were detected in well MW-3. No other constituents of concern were detected in any groundwater samples from any of the well. 2014 Soil and Groundwater Investigation: CRA advanced one direct push boring and five cone penetration test borings to evaluate subsurface conditions on site near well MW-6 and down gradient of the site. Groundwater was not present in any boring location from 35 to 40 fbg, at depths consistent with the shallow-screened wells. CRA collected soil samples from borings CPT-22 through CPT-27 at depths correlating with historical impacts in shallow-screened wells. No COCs were detected. Details of the installation are presented in CRAs August 5, 2014 Subsurface Investigation Report and Closure Request.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Under the criteria of the Cal/EPA MOA, DTSC was determined the Comments:

appropriate lead agency for the Cupertino Village Cleaners Project.

Completed Area Name: **PROJECT WIDE** Completed Sub Area Name: Not reported Completed Document Type: Application Completed Date: 10/31/2006

Comments: Project is eligible for the AB 389 Process

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported Phase 1 Completed Document Type: Completed Date: 02/15/2006

Comments: The purpose of the Environmental Site Assessment Phase I is to

identify recognized environmental conditions in connection with the Cupertino Village Cleaners site. The term recognized environmental conditions, as defined in ASTM Standard Practice E-1527-00, means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any

hazardous substances or petroleum products into structures, onto the property, or in the ground, groundwater, or surface water of the

property.

Community Profile completed.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: AB 389 Response Plan

Completed Date: 02/24/2014

Comments: The response action selected in the Response Plan is continued

operation of the existing soil vapor extraction system that is on the Site. The system was installed as part of a pilot test. The Response Plan established both residential and commercial cleanup goals for tetrachloroethylene in subsurface and sub-slab soil vapor. PCE in soil vapor will be reduced to the extent practicable. A Land Use Covenant will be put in place to restrict any portion of the Site where the residential or unrestricted use cleanup goals are not

achieved.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Implementation Workplan

Completed Date: 04/26/2016

Comments: Cupertino Village LP plans to restart the soil vapor extraction (SVE)

system due to high concentrations of tetrachloroethylene in soil gas after rebound testing. The Work Plan describes the procedures to reconnect and restart the SVE system; the operation, maintenance, and monitoring of the SVE system; and the rebound testing and reporting of results. The SVE system will operate for three months and system monitor will occur monthly. Following 3 months of SVE system operation, the system will be shut down for rebound testing with soil

gas sampling at 1, 2, and 3 month intervals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/13/2019

Comments: The Report documents the implementation of the Soil Vapor Extraction

System Restart Work Plan; and summarizes results of 18-months of soil vapor extraction (SVE) "pulse" operation and maintenance, including

Map ID MAP FINDINGS
Direction

Distance

Elevation Site Database(s) EPA ID Number

# **CUPERTINO VILLAGE CLEANERS (Continued)**

S108054446

**EDR ID Number** 

soil vapor monitoring and statistical analysis of analytical results since restart of the SVE system in 2017. DTSC concurred with the Report's recommendation to continue operation of the SVE system on a "pulse" operation mode for an additional six months, with soil vapor sampling on a bimonthly frequency basis, from January 2019 through July 2019.

Distance EDR ID Number Elevation Site EDR ID Number Database(s) EPA ID Number

# **CUPERTINO VILLAGE CLEANERS (Continued)**

S108054446

Completed Document Type: Monitoring Report Completed Date: 09/22/2014

Comments: The Report summarizes the interim results of rebound testing being

implemented to determine if the operation of the soil vapor

extraction (SVE) system from November 2011 to March 2014 effectively

remediated the subsurface volatile organic compound (VOC) contamination. The rebound test sampling results showed a generally increasing concentration trend for tetrachloroethylene across the Site, but soil gas concentrations continued to be below the site-specific commercial cleanup goals. The increasing VOC concentrations indicated that equilibrium has not been reached and rebound testing is to continue. The SVE system may need to be restarted if an increasing concentration trend is observed during the

next sampling event.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/09/2020

Comments: DTSC concurs with Cupertino Village Cleaners recommendations to

shutting down the soil vapor extraction (SVE) system and initiating a rebound assessment in accordance with the approved Soil Vapor Extraction System Restart Work Plan (Northgate, 2016), and recommendations provided in the DTSC s Proven Technologies and Remedies Guidance - Remediation of Chlorinated Volatile Organic Compounds in Vadose Zone Soil (DTSC, 2010). The purpose of the rebound assessment is to evaluate whether the Cupertino Village Cleaners site s soil gas remedial action objectives (RAOs) have been

achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 12/08/2021

Comments: The Revised Final Work Plan provides the sampling methodology of

indoor air quality (IAQ) sampling activities to be conducted at two commercial buildings (Buildings) located in the vicinity of the Site. One building is currently occupied by the 99 Ranch Market and the other by Good Samaritan United Methodist Church and associated

Pre-School (Church Facility).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/08/2020

Comments: The Technical Memorandum summarizes the accessibility and current

condition of existing soil vapor monitoring points (SMPs) at the

Site. DTSC concurs with the Technical Memorandum s recommendations of inclusion of SMPs VMW-1A and VMP-1AA as part of the Cupertino Village

soil vapor extraction rebound testing program.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/05/2021

Comments: The Technical Memorandum discuss the presence of tetrahydrofuran

(THF) in soil vapor samples collected from soil vapor monitoring

Completed Document Type: AB 389 Response Plan

Completed Date: 02/24/2014

Comments: The response action selected in the Response Plan is continued

operation of the existing soil vapor extraction system that is on the Site. The system was installed as part of a pilot test. The Response Plan established both residential and commercial cleanup goals for tetrachloroethylene in subsurface and sub-slab soil vapor. PCE in soil vapor will be reduced to the extent practicable. A Land Use Covenant will be put in place to restrict any portion of the Site where the residential or unrestricted use cleanup goals are not

achieved.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Implementation Workplan

Completed Date: 04/26/2016

Comments: Cupertino Village LP plans to restart the soil vapor extraction (SVE)

system due to high concentrations of tetrachloroethylene in soil gas after rebound testing. The Work Plan describes the procedures to reconnect and restart the SVE system; the operation, maintenance, and monitoring of the SVE system; and the rebound testing and reporting of results. The SVE system will operate for three months and system monitor will occur monthly. Following 3 months of SVE system operation, the system will be shut down for rebound testing with soil

gas sampling at 1, 2, and 3 month intervals.

approval letter that soil vapor extraction is a feasible technology for the Site and directed that it be the remedy proposed in a Draft

Response Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/22/2014

Comments: The Report summarizes the interim results of rebound testing being

implemented to determine if the operation of the soil vapor

extraction (SVE) system from November 2011 to March 2014 effectively

remediated the subsurface volatile organic compound (VOC) contamination. The rebound test sampling results showed a generally increasing concentration trend for tetrachloroethylene across the Site, but soil gas concentrations continued to be below the site-specific commercial cleanup goals. The increasing VOC concentrations indicated that equilibrium has not been reached and rebound testing is to continue. The SVE system may need to be restarted if an increasing concentration trend is observed during the

next sampling event.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 12/09/2020

Comments:

DTSC concurs with Cupertino Village Cleaners recommendations to shutting down the soil vapor extraction (SVE) system and initiating a rebound assessment in accordance with the approved Soil Vapor Extraction System Restart Work Plan (Northgate, 2016), and recommendations provided in the DTSC s Proven Technologies and Remedies Guidance - Remediation of Chlorinated Volatile Organic Compounds in Vadose Zone Soil (DTSC, 2010). The purpose of the rebound assessment is to evaluate whether the Cupertino Village Cleaners site s soil gas remedial action objectives (RAOs) have been

achieved.

## SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/27/2022 Date Data Arrived at EDR: 11/01/2022 Date Made Active in Reports: 11/15/2022

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

### Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Next Scheduled EDR Contact: 01/02/2023 Data Release Frequency: Quarterly

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 02/23/2022 Date Data Arrived at EDR: 03/10/2022 Date Made Active in Reports: 03/10/2022

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/29/2022 Date Data Arrived at EDR: 08/18/2022 Date Made Active in Reports: 10/24/2022

Telephone: 202-564-6023 Last EDR Contact: 11/01/2022

Next Scheduled EDR Contact: 01/09/2023 Data Release Frequency: Semi-Annually

### **DEED: Deed Restriction Listing**

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/25/2022 Date Data Arrived at EDR: 08/25/2022 Date Made Active in Reports: 11/14/2022

### Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 01/03/2022 Date Data Arrived at EDR: 03/31/2022 Date Made Active in Reports: 11/08/2022

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

### PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

#### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022 Date Data Arrived at EDR: 08/08/2022 Date Made Active in Reports: 10/21/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Southeast Map: 12021561 SAN JOSE WEST, CA

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

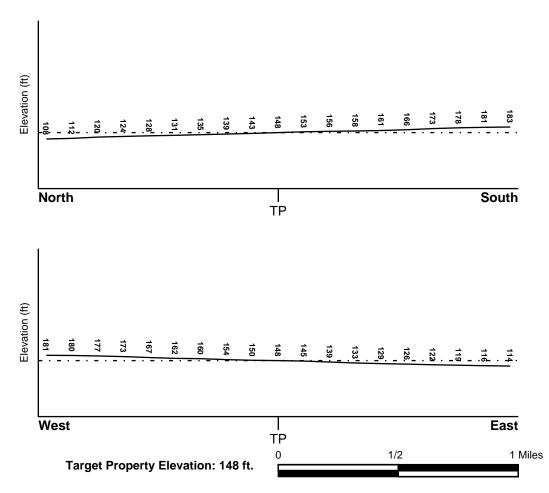

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

CUPERTINO YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Not Reported

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Soil Surface Texture:

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Cenozoic Category: Stratifed Sequence

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

clay loam

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information									
	Boundary			Classification					
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60		
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60		
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60		

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

# **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

# **EXECUTIVE SUMMARY**

# **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

As ummary of the information obtained is provided in the text of this report.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
