State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 10 LUST sites within

approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/15/2016 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

LA TIMES, TIMES MIRR Facility Id: 74612	1321 W WHOLESALE ST	0 - 1/8 (0.000 mi.)	B4	11

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there are 2 HAZNET sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	05/20/1993
Comments:	The Department completed review of the PEA. A Manufactured Gas Plant (MGP) was operated at the site in the late 1800s and early 1900s. Gas was produced from crude oil for distribution in the site area. Several companies operated at the site. In 1909, the site was owned by the Los Angeles Gas and Electric Corp., which merged with the Southern Calfornia Gas Company in 1937. SoCalGas owned the property until 1976, and sold to the current owners. The MGP was dismantled sometime before 1906. The byproducts from the manufactured gas operation were tars, oils, sludges, and lampblack. Elevated levels of polycyclic aromatic hydro- carbons (PAH), heavy metals such as lead and arsenic and cyanides were found at the site. The PEA concluded that there was contamination at the site above screening values. Therefore, the Department recommended that further investigation or assessment at the site was necessary.

Manufactured Gas Plants:

Site located at 725 Chemming Street, Los Angeles, California, approximately 2.5 acres. From 1887 util 1906 an oil gas plant was operated at site. MGP may have been converted to a natural gas storage site in approximately 1906. Records indicate that MMGP equipment may have been removed by 1930. Site is currently used as a Greyhound Bus parking lot.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Background Info:	The site is located at 590 South Santa Fe Avenue, Los Angeles, California. The site consists of two land parcels totaling approximately 2.68 actes of land and is located witin an indus-industrial portion of the City of Los Angeles. Historically the site has been used for chemeical or paint manufacturing. Not reported The site was formerly under the oversight of the California Regional Water Quality Control Board (CRWQCB). (CRWQCB) has overseen the site investiation and remediation since approximately 1986. Not reported Previous sampling activities have confirmed both soil and groundwater contamination. Contaminants of concern identified in the groundwater and soil include benzene, ethyl benzene, 1,1-dichlorethane, 1,1-dichloroethene, 4-methyl-2-pentanone (MIBK), toluene, and total xylene. The toluene, and xylene appear to be primarily located within the groundwater beneath the northern portion of the site whereas MIBK has been identified in the groundwater along the southwest corner of the site and may extend beyond the site boundary.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002753770

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	DHS has utilized Bond funds to complete the remedial action. DHS is currently undertaking appropriate cost recovery actions.
Site Description:	This site was previously used to scrap electrical transformers.
Hazardous Waste Desc:	Polychlorinated biphenyls (PCBs) were detected in the soil.
Threat To Public Health & Env:	The remedial action has been completed. Soil contaminated with PCBs was excavated and redisposed of in a licensed landfill. There is no threat to public health and the environment.
Site Activity Status:	In August, 1985, the RP, Mr. Rodney Dean, pled no contest to three felony counts of illegal storage, transportation and disposal of hazardous wastes. Mr. Dean's probation required that the cleanup of the site be completed and reported to the court. The RP retained a contractor for the cleanup and began the remedial actions. The contractors removed much of the contaminated soil. DHS completed the cleanup after the RP exhausted his financial resources. DHS is currently in the cost recovery stage.

RB Case Number:	1290
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Contaminated Surface / Structure, Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Chromium VI
Site History:	Plating operations started in the mid-1910s in the southwestern portion of the Site until 2005. Ace Plating owned and conducted plating related operations on the 11 contiguous parcels, specifically electrochemical coating of metal parts. Numerous assessments conducted at the site indicate that the soil is impacted with VOCs and metals. The soil vapor has been sampled throughout the Site with tetrachloroethene (PCE) concentrations at 5 feet below ground surface (bgs) ranging from 7.9 micrograms per liter (a%g/L) to 87 a%g/L. The soil vapor data is limited at depths greater than 30 feet bgs. At 60 feet bgs and below, PCE concentrations range from 39 a%g/L below the Assembly Room to 127 a%g/L offsite on Crocker Street. The lateral extent of shallow PCE greater than 12 a%g/L is only defined on the east side. The source of the PCE is unknown but slightly higher concentrations exist in the central portions of the Plating Rooms. Chromium concentrations ranged from 1.5 mg/kg to 4,300 mg/kg for total chromium and from 0.92 to 840 mg/kg for hexavalent chromium. The maximum concentrations were both collected from SSVW-2 at 1 foot bgs located in the alley between the Crocker Street and Towne Avenue buildings and is adjacent to the location of the former chromium tanks. Outside of the area impacted by the former chromium tanks, the maximum chromium concentration is 4200 mg/kg for total chromium and 94 mg/kg for hexavalent chromium at MW-1. Degreasers that contained PCE were utilized in Plating Rooms 1 and 2 from 1993 to 2001. The maximum PCE concentration is 0.150 mg/kg and was sampled 4 feet deep in the vicinity of the former nickel dip tank in Plating Room 2. Two groundwater monitoring wells have been installed. Hexavalent chromium was not detected above the laboratory detection limits in any of the groundwater samples collected. Tetrachloroethylene (PCE) and 1,1-dichloroethene are the only VOC detected in groundwater, with the maximum concentration detected in MW-3 at a concentration of 33 ug/L and 2.7 ug/L, respectively.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 09/04/1996
Comments: DTSC reviewed a Preliminary Endangerment Assessment for the site under a Voluntary Cleanup Agreement. Based on the information and data presented, DTSC determined that the hazardous constituents remaining at the site do not constitute a threat to human health or the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 09/13/1995
Comments: The Department received a Non-Emergency Hazardous Substance Release Report dated January 31, 1995. Review of the document indicates that the site is contaminated with elevated levels of heavy metals such as lead, copper and zinc. Foundry operations existed at the site from at least 1906 until 1990, operated by W.G. Grant & Co. Santa Fe Railway is the current owner of the site. RP removed USTs from the site without any regulatory agency oversight. Due to evidence of a release, DTSC is recommending that a PEA be conducted to evaluate the site. On September 13, 1995, DTSC notified the RP thereof.

Completed Date: 09/30/2009

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 10/17/2013
Comments: Site visit for LUC completed. Cap appears intact.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 10/21/2004
Comments: NOE completed for Removal Action Workplan which describes installation of asphalt cap and soil removal.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/10/2006
Comments: Removal Action included placement of an asphalt cover in the property area and removal of 97 tons of soil contaminated with lead and arsenic.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 10/21/2004
Comments: The RAW proposes to address the lead & arsenic contaminated soil by placing a four-inch asphalt cap on the property area (15,000 sq.ft.) and removing soil from nine impacted areas at the Site boundary. Implementation is scheduled for end of January 2005.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/15/2003
Comments: The Remedial Investigation is approved. The RI involved sampling of lead and other metals, and volatile organic compounds, particularly tetrachlorethene and 1,1,1-trichloroethane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/30/1998
Comments: Completed a Preliminary Assessment (PA) with sampling of the site under contract with U.S. EPA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/18/1997
Comments: Soil removal (excavation) of lead-contaminated soils. The Implementation Report for completion of the Emergency Removal Action by Quemetco at Area 3 (Coast Produce Warehouse) and Area 4 (Residential property at 2151 E. 14th Street) was approved. An estimated 120 tons of contaminated lead was excavated and disposed of off-site.

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	07/18/1997
Comments:	UPRR: A removal action workplan (RAW-UPRR) was approved for Union Pacific Railroad track areas along Lemon Street (between 10th & 14th Streets). These areas are designated as Areas 1 & 2. A Notice of Exemption was also filed with the OPR as required by the CEQA laws and guidelines. The RAW-UPRR included excavation, treatment and disposal of contaminated soils in the neighboring railroad right-of-way (track) areas of the International Lead Company site.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	06/25/1998
Comments:	Excavation, treatment and disposal of 2,500 tons of metal contaminated soil from the UPRR rail track areas. The Implementation Report of Emergency Removal Action by Dames & Moore for Areas 1 and 2 was approved.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	07/18/1997
Comments:	A removal action workplan (RAW-QUEMETCO) which proposed excavation and disposal of contaminated soils, was approved for Areas 3 and 4 (perimeter of Property and residential property). A Notice of exemption was also filed with the OPR as required by the CEQA laws and guidelines.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	11/07/1994
Comments:	DTSC received an information letter for 3 possible hazardous substance release sites allegedly associated with Quemetco/ RSR Corporation, a lead smelting company.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Technical Workplan
Completed Date:	02/10/2006
Comments:	Workplan for additional removal of soil is approved.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Workplan
Completed Date:	05/26/1998
Comments:	Workplan to delineate soil contamination approved

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Supplemental Site Investigation Workplan
Completed Date:	10/31/2000
Comments:	WP approved for further Soil and Soil gas investigation.

Alternate Address: 2182 EAST 11TH STREET
Alternate City,St,Zip: LOS ANGELES, CA 90021
Background Info: The Site is also known as the Western Lead and Metal Company Site. The Site is located in an industrial area near downtown Los Angeles and is surrounded by warehouses, food distributors, light manufacturing, and scrap metal recyclers. The Site is roughly bounded by 11th Street (Property), to the north, the Union Pacific Railroad right-of-way to the east, 14th Street, to the south, and Wilson Street to the west. The Site includes the property at 2182 East 11th Street, which was occupied by several different companies as a lead smelter from 1946 to 1965. The Western Lead Products Company operated a lead smelter on the Property from 1954 to 1960 under the name of Western Lead and Metal Company. After 1965, the Property was used for die-cast manufacturing operations. The Property is approximately 110 feet by 140 feet and is currently devoid of any buildings, and is secured by fencing. The other areas of the Site include: portions of the Union Pacific Railroad right-of-way, between 14th and 10th Streets; a narrow strip of the property occupied by Coast Produce; and a residencial property at the corner of Wilson and 14th Streets. Since 1991, several site assessments have been conducted. These assessments involved mostly surface soil sampling and analyses for metals including lead, antimony, and arsenic. In 1996, the Property was paved with three inches of asphalt to prevent exposure of the public to contaminated soil. In addition, DTSC collected several surface soil samples in the areas surrounding the Property. Extremely high levels of lead (up to 574,000 ppm), antimony (up to 14,000 ppm), and arsenic (up to 920 ppm) were detected in the narrow strip along the southern and western boundaries of the Property; high levels of lead, copper, and zinc were detected along the railroad right-of-way; and elevated levels of lead (up to 1,450 ppm) were detected on the residential property. A Consent Order (Imminent and Substantial Endangerment) was entered into with Quemetco Inc., (an RSR Subsidiary) and Union Pacific Railroad Company. As required by the Order, in 1977, Quemetco completed an Emergency Removal Action at Areas 3 and 4 which are located at the perimeter of the Property and the residential property. Union Pacific has also conducted an Emergency Removal Action at Areas 1 and 2 (railroad right-of-wau). The Remedial Investigation found the extent of metal contamination. Currently, the Draft RAW, which proposes to place a 4-inch asphalt cover on the Property area and excavate soil, from the Site boundary, has been approved. The 30 day Public Comment Period starts on August 23 and ends September 22, 2004.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/13/2003
Comments: DTSC approves PEA Report. The PEA investigative activities conducted at the former smelting site identified arsenic (3410 mg/kg), and lead (25,700 mg/kg). DTSC concluded that the current conditions (building and pavement intact, no exposed soil) at the Site does not pose a potential threat to industrial workers. Due to elevated levels of the above-mentioned metals in the soil, if there is any demolition of the buidling or parking lot, or development at the Site, the responsible party(s) will be required to submit a Removal Action Workplan or Remedial Action Plan to DTSC for approval.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/30/1998
Comments: Completed a Preliminary Assessment (PA) of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 11/07/1994
Comments: DTSC received an information letter for 3 possible hazardous substance release sites allegedly associated with Quemetco/RSR Corp, a lead smelter.

Completed Area Name: PROJECT WIDE

Manufactured Gas Plants:

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide,polycyclic aromatic hydrocarbons and heavy metals

Environmental Interest/Information System
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Manufactured Gas Plants:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were weere discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domesttic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a stanndby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Southern California Gas has entered into a consent order with DHS for oversight/monitoring of its cleanup efforts. DHS has budgeted $50,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with site cleanup.
Site Description:	The Olympic Base facility, currently owned by Southern California Gas Company, is the site of a former oil gasification "towne gas" plant.
Hazardous Waste Desc:	The wastes are generally characterized as polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Other constituents of concern are cyanide, lead, and semivolatile organics. Soil contamination is present at the site from the surface to a depth of 10 to 15 feet in both the northern and southern portions of the site.
Threat To Public Health & Env:	The primary concern is potential contamination of ground water. Usable ground water lies approximately 200 feet below the ground surface and the water table may rise to only 100 feet below the site. Ground water contamination has not been verified. Surface soil contamination may migrate offsite due to airborne particulates.
Site Activity Status:	The Southern California Gas Company has completed a remedial investigation/feasibility study.

Background Info:	The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were were discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domestic Gas Company purchased and took

OLYMPIC BASE (Continued) **S105689611**

over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a standby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility.
A Consent Order was signed in December 1986, which addressed the work needed to complete the Remedial Investigation/-Feasibility Study (RI/FS) process. The RI report was approved by the Department on September 17, 1987. The RI found that soil from about 2 to 12 feet below ground surface is contaminated. The contaminants are not readily vaporized, nor do they enter aqueous phase solution. Groundwater aquifers beneath the site are unsaturated to a depth of 90 feet. Air monitoring at the site does not indicate that the contaminants are emitting vapors to the air. SCG then submitted a FS report in May 1988. DHS has reviewed the FS report and requested a full Health Risk Assessment (HRA) based on appropriate biological receptors and exposure pathways on October 20, 1988. The HRA was approved by the Department on June 4, 1990. The FS was revised by SCG and the report approved on July 19, 1990.
The RP submitted a draft RAP on August 20, 1990, as requested by the Department. The Department has published a fact sheet on the findings of the RI/FS. The RAP meeting with the community was held on November 17, 1990 and the RAP was subsequently approved in January of 1991.
The RAP proposed an asphalt cap on the site, groundwater monitoring, and a deed restriction. Groundwater monitoring is necessary as the region the site is located in is currently experiencing a drought; however, if this should change the groundwater table will rise, possibly impacting the conclusions of the RI. The deed restriction, protected the integrity of the cap by limiting land use and excavation of the waste.
The Department directed the RP to prepare a Remedial Design and Implementation (RD&I) plan. The plan included engineering specifications for the asphalt cap, permits, and a schedule for completion of the cap. The cap will be repaired as necessary; necessary; it is expected to require replacement every ten years. This operation and maintenance program will last for 20 years.

Corrective Action Summary:

Event date: 06/30/1995
Event: RFA Completed

Event date: 06/30/1997
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 06/30/1997
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 07/09/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 07/09/2010
Event: CA550RC

Event date: 07/09/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

SOUTHERN CALIFORNIA GAS COMPANY (Continued) **1000166039**

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

West Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

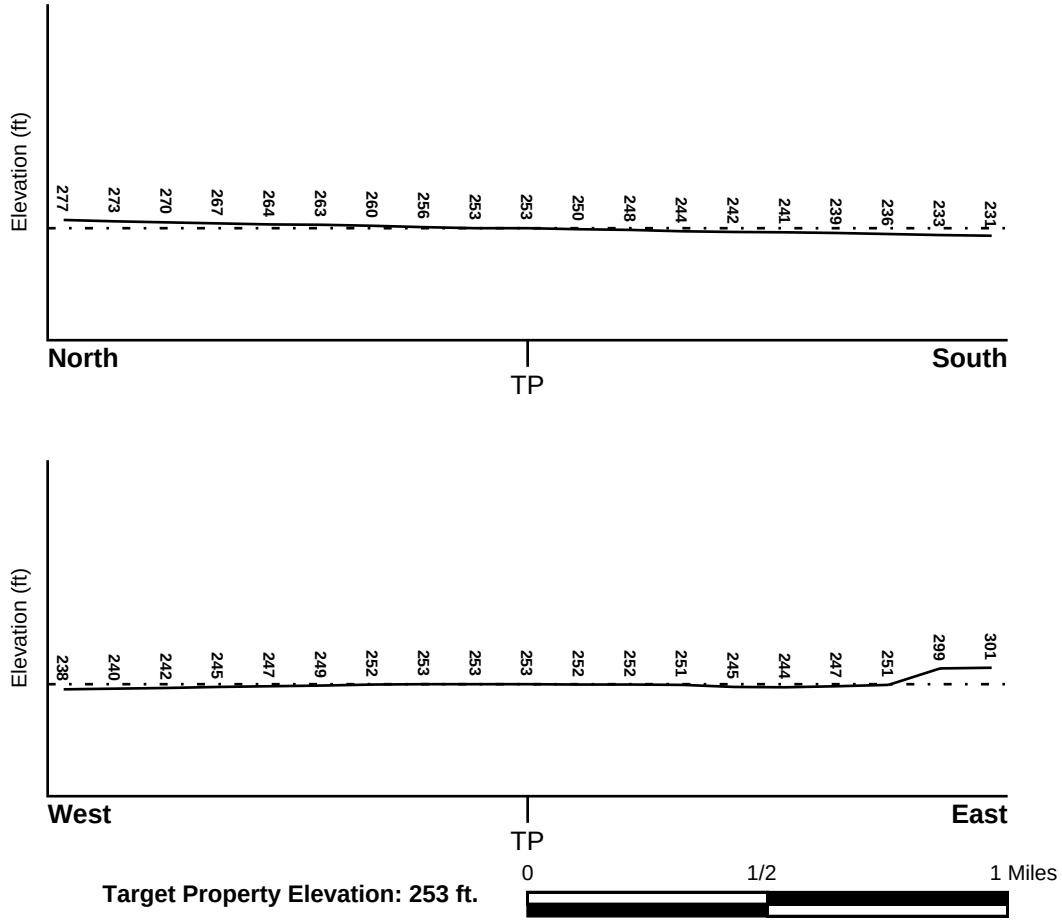
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1636F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1620F	FEMA FIRM Flood data
06037C1638F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NW
Site Name:	SO CALIF RAPID TRANSIT DISTRICT
Site EPA ID Number:	CAD981989841
Groundwater Flow Direction:	GENERALLY SE.
Measured Depth to Water:	approximately 37 feet.
Hydraulic Connection:	The uppermost aquifer at the site is the Gaspur aquifer. The Gaspur aquifer is hydraulically connected to underlying aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SSE	Not Reported
A2	1/2 - 1 Mile SW	Not Reported
A3	1/2 - 1 Mile SW	Not Reported
4	1/2 - 1 Mile East	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam

fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 3-22-90 Lic. Class A Lic. No. 508565 Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).]:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. 6A 1.16 Insurance Company _____

☐ Certified copy is hereby furnished.

☒ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Applicants Mailing Address 536 BANNING Wilmington Calif

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant's Signature _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (See Sec. 91.0202 LAMC)

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the City of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC)

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR part 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Steve W. Anderson, Environmental Professional
Staff Scientist / Site Assessor

Dawn Merrill, REA, Environmental Professional
Client Manager / Senior Reviewer

1.2 Findings and Conclusions Summary

ATC Associates Inc. (ATC) has performed this Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property.

FINDINGS AND CONCLUSIONS SUMMARY

8.6	**Additional User Requested Conditions**	No					

1. The property, under the name of former tenants Albert's Organics and Progressive Produce, was listed on the Facility and Manifest Database (HAZNET) as a generator of manifested waste. According to the HAZNET listing, in addition to waste oil, the wastes generated included liquids with halogenated organic compounds. According to the 2001 ESA by EMG, Progressive Produce formerly performed truck maintenance on the property. It is probable that the halogenated compounds refer to parts washer solvents. HAZNET does not track violators and, based on the absence of reported spills or the exact location of waste generation and storage, the reference to halogenated compounds at the property is not considered to represent a *recognized environmental condition*. The property is also listed as a registered underground storage tank (UST) facility. The property is not listed as a leaking UST (LUST) site.
2. According to Los Angeles Fire Department (LAFD) records, one 10,000-gallon diesel UST and one 10,000-gallon unleaded gasoline UST were removed from the western end of the property in 1990. As indicated in footnote 1, the property is not listed as a LUST site. No soil contamination was identified at the time the USTs were removed;

however, no closure letter was present in the LAFD file. Based on the absence of reported releases, the former USTs are not considered to represent a *recognized environmental condition* at this time.

3. Two pad-mounted and three pole-mounted Los Angeles Department of Water and Power (LADWP) transformers are located on the property. Additionally, 14 pole-mounted transformers are located above the sidewalks that border the property along East Sixth Street and Mill Street. Based on the age of the property improvements (1962 and 1973), it is possible that some of these contain polychlorinated biphenyls (PCBs). No evidence of leaks or damage were observed.
4. No direct evidence of septic systems was observed; however, the earliest confirmed record of a sewer connection at the property was 1922. Since the property has been at least partially developed since at least 1894, it is likely that some type of septic system has been present in the past.
5. Previous surveys have identified asbestos in at least four types of flooring and in roofing materials; however, it is possible that these specific asbestos-containing materials (ACMs) were removed. Nonetheless, suspect ACM was observed on the property. Based on the age of the property improvements (1962 and 1973), it is possible that ACM is present.
6. Based on the age of the property improvements (1962 and 1973), it is possible that lead-based paint (LBP) has been used on the property in the past. Apart from one area of damaged paint observed on the eastern exterior wall of the southern building, painted surfaces appeared to be in good condition.

Records Review

- No indication of a *recognized environmental condition*, *historical recognized environmental condition* or *de minimis condition* was identified for the property or adjoining properties during the review of review of property records.

- According to historical records reviewed, including Sanborn® fire insurance maps, city directories, aerial photographs, topographic maps, Building Department records, and information provided in prior environmental assessment reports, the northwestern quarter of the property was occupied sometime prior to 1894 by a lumberyard. The property underwent a complex sequence of development beginning in the early 1900s. By 1906, the lumberyard occupied approximately the western two-thirds of the northern half of the property and a large warehouse was present on the southeastern quarter of the property. The remainder of the property was vacant. The north-adjacent property was occupied by additional lumber yards and a box factory. The south-adjacent property was developed with several industrial buildings, including the Union Ice Company, which is still operating currently. Also circa 1906, two multi-tenant warehouse structures were constructed across the central portion of the property. Circa 1909, the northern edge of the property along Sixth Street was developed with a long, multi-tenant warehouse. This appears to have been extended in length the following year until it occupied nearly the entire width of the property between Alameda and Mill Streets. During the 1920s and 1940s several smaller structures were built on the property, including a scale house and toilet, a rooming house for employees and additional commercial storage and offices. The references to these structures in building permits cannot be correlated with certainty to the structures shown on Sanborn Maps. As shown on a 1950 Sanborn Map, at least six warehouse structures, five of which were multi-tenant, are shown on the property along with several very small buildings, including a restaurant, a shop, and what are believed to be toilets. Most of the occupants were produce warehouses, although at least five machine shops are discernible among the tenant spaces of the northern building, a building material warehouse and a chemical manufacturer are described on the two middle warehouses. The chemical manufacturer is not listed on the 1954 Sanborn Map, although the machine shops continue to be depicted. In 1962, the current building along Sixth Street (in its original configuration as two buildings), has been built. By 1970, the eastern half of the current southern building had been constructed. In 1973, the remaining older buildings were demolished

and the two northern buildings were connected and converted into a single structure. By at least 1976, the property appeared essentially as it does currently.

- The property address is listed as a registered UST facility on the Statewide Environmental Evaluation and Planning System (SWEEPS), California Facility Inventory Database (CA FID), and the Historical Underground Storage Tank (HIST UST) lists. The USTs were operated by a former tenant, Progressive Produce, located in the unit addressed as 1266 East Sixth Street. The property is not listed as a LUST site. According to historical building permits and fire department records, the USTs were removed in 1990. No impacted soils were identified; however, no closure letter appears to have been issued for the UST removals. The property is also listed on the Facility and Manifest Data (HAZNET) database as having generated manifested waste. The wastes generated were described as liquids with halogenated organic compounds (generated by Progressive Produce) and unspecified oil-containing waste (generated by a former occupant at 1330 East Sixth Street identified as Albert's Organics). HAZNET does not track violators and the presence of a facility on this database does not necessarily indicate that a problem exists at that facility. Progressive Produce reportedly conducted truck repair activities on-site. It is therefore considered likely that the halogenated organic wastes generated by Progressive Produce were spent solvents from a parts washer. Based on the nature of the wastes generated, the fact that neither listed tenant is currently present on the property and former waste storage locations are unknown in any case, the HAZNET listings are not considered to represent an environmental concern to the property.

- Based on distance, location with respect to the inferred groundwater gradient, medium affected and/or regulatory status, none of the nearby or adjacent sites identified on regulatory databases are considered to pose a significant risk of environmental impairment to the property.

- A 2001 Phase I ESA prepared by EMG, citing two previous asbestos surveys conducted in 1989 and 2000, identified asbestos in three types of resilient floor tile, one type of resilient sheet flooring, and roofing materials. The flooring materials were not observed by EMG during their site reconnaissance. It is not known what specific roofing materials were found to contain asbestos or whether they were subsequently abated.

- ATC's review of published radon data indicates that the property is located in a county designated by the EPA as Zone 2 for radon propensity. Zone 2 areas have a predicted radon concentration of greater than or equal to 2.0 picoCuries per liter of air (pCi/L) and less than or equal to 4.0 pCi/L. According to statistical data provided by Environmental Data Resources, Inc. (EDR), of Milford Connecticut, an EPA survey of 63 sites in Los Angeles County revealed two percent with radon concentrations in excess of 4.0 pCi/L. Based on these statistics and the industrial use of the property, radon is not considered to represent an environmental concern to the property and no additional investigations are recommended at this time.

- According to a recent annual water quality report, the potable water supplied to the property meets or exceeds all drinking water standards, including those for lead. Based on the fact that the water supplied to the property is from the municipality, lead in drinking water testing was not conducted for this Phase I ESA.

- According to the United States Fish and Wildlife Service (USFWS) wetlands mapper website, http://nwi.fws.gov, the nearest designated wetland is the channel of the Los Angeles River, located approximately 0.34 mile to the east-northeast of the property. Based on distance and the nature of the wetland, it is not considered to represent an environmental concern to the property.

Property Reconnaissance

- No indication of a *recognized environmental condition* or *historical recognized environmental condition* was visually or physically observed on the property or adjoining properties during the property reconnaissance.

- Chemical use on the property consists primarily of soaps and degreasers and propane for forklifts. Lesser amounts of paint, water treatment chemicals, a chemical ripener, and oil were noted. Soaps and degreasers were commonly stored in 55-gallon drums, often not within secondary containment. One 5-gallon container of oil (presumably waste oil) was observed on the sidewalk along the eastern side of the property. No stains were observed, but the container was placed next to a gutter storm drain. Additionally, what appeared to be a half-gallon container of motor oil had been spilled at the curb along Sixth Street and the release had entered the gutter, although no storm drain was observed nearby. This release is considered to be a *de minimis condition*.

- Two pad-mounted and three pole-mounted LADWP transformers are located on the property. Additionally, 14 pole-mounted transformers are located above the sidewalks that border the property along East Sixth Street and Mill Street. Based on the age of the property improvements (1962 and 1973), it is possible that some of these contain polychlorinated biphenyls (PCBs). No evidence of leaks or damage were observed.

- Suspect ACMs observed by ATC during the current site reconnaissance included wallboard/joint compound, acoustical ceiling panels, acoustical ceiling tiles, resilient floor tile, resilient sheet flooring, flooring mastics, baseboard and baseboard mastics, and roofing materials. Based on the age of the property improvements (1962 and 1973), it is possible that asbestos is present on the property. All suspect ACMs, including all friable materials, were observed to be in good condition.

Environmental Sampling

- No sampling was performed for this ESA.

1.3 Significant Data Gap Summary

The following is a summary of *significant data gaps* identified in this report.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		**Description**
3.5	**Current Uses of Adjoining Properties**	No *significant data gaps* identified.
4.2	**Environmental Liens or Activity and Use Limitations (AULs)**	No *significant data gaps* identified.
5.1	**Standard Environmental Records**	No *significant data gaps* identified.
5.2	**Physical Setting Sources**	No *significant data gaps* identified.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		**Description**
5.3	**Historical Records Sources**	No *significant data gaps* identified.
6.1	**Methodology and Limiting Conditions**	No *significant data gaps* identified.
7.0	**Interviews**	No *significant data gaps* identified.

1.4 Recommendations

Based on information collected from the Phase I ESA, ATC offers the following recommendations:

- ATC recommends that all suspect and identified ACMs be managed under an asbestos operations and maintenance (O&M) plan.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of ASTM Standard Practice E 1527-05 in connection with the property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in accordance with ASTM Standard Practice E 1527-05, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.

- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.

- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, non-hazardous solid wastes and wastewater.

- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties on the property.

- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.

The scope of the assessment also included consideration of the following environmental issues or conditions that are beyond the scope of ASTM Standard Practice E 1527-05:

- Mold screening to report the findings of a baseline survey of readily observable mold and conditions conducive to mold on the property identified by limited interview, document review and physical observation and to provide an opinion on whether an identified condition warrants further action. The scope of work for the mold screening was intended to be consistent with ASTM Standard Practice E 2418-06: S*tandard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process*. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to ATC in a timely manner. The physical observations were limited to certain heating, ventilation

and air conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, ATC observed the HVAC equipment room(s) and readily accessible mechanical rooms and, in buildings with package units in the ceiling. The mold screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The mold screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the mold screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Asbestos, consisting of the identification of suspect asbestos-containing material (ACM) in accessible areas and providing an opinion on the potential presence of asbestos based on the construction date of buildings on the property and visual observation of the condition of suspect ACM.

- Radon, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property.

- Lead in drinking water, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets or exceeds drinking water standards for lead.

- Lead-based paint (LBP), consisting of providing an opinion on the potential for LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.

- Wetlands, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.

- Flood plain, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.

2.3 Significant Assumptions

Any assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.

- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.

- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-05 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or

quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The *Environmental Professional* Statement is intended to document ATC's opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-05 and the scope of work for this assessment.

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E 1527-05, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-05 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Lowe Enterprises Investment Management, Inc., and any of its affiliates, and third parties authorized in writing by Lowe Enterprises Investment Management, Inc. and ATC, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of ATC, is at the sole risk and expense of such third party.

ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied. Unless otherwise agreed upon in writing by ATC and a third party, ATC's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of $1,000,000.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property consists of three contiguous parcels encompassing approximately 14.57 acres of land developed with two multi-unit warehouse buildings addressed as 1206-1338 East Sixth Street and 1205-1321 Wholesale Street. The buildings have a combined area of approximately 287,376 square feet. A legal description of the property was included with a lien search report for the property prepared by EDR, a copy of which is included in Appendix L. The Assessor's Parcel Numbers for the property are 5164-010-003, -004, and -005.

3.2 Surrounding Area General Characteristics

The surrounding area is generally level and developed with a mixture of commercial and industrial uses. The specific adjacent property uses are discussed in Section 3.5.

3.3 Current Use of the Property

The property is developed with two, one-story multi-unit warehouse buildings, associated paved yards and parking areas. The property is occupied almost entirely by food distributorships. The two exceptions are a vacant space and a toy distribution warehouse. The tenants are summarized in the following table:

East Sixth Street	
Occupant	**Address**
Heath & Lejeune	1206
United Potato	1230
Green West (A); Asian Fresh (B); Quan 9 (C)	1266
Valley Fruit & Produce	1320
Asia Jumbo	1334-1338
Wholesale Street	
Occupant	**Address**
Harvest Sensation	1205
Astro Food	1211
America Growers	1215
Eureka	1219
Vacant	1221
Delta Fresh	1225
A&F	1301A
T.G.H.	1301B (S ½)
Paramount Export	1305 and 1301B (N ½)
KC Specialties	1311
Always Green	1317
American Produce (aka Chiquita Fresh)	1321
Seashore West	1321B

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

PROPERTY IMPROVEMENTS	
Size of Property (approximate)	14.57 acres
Topography of Property	Generally level
Adjoining and/or Access/Egress Roads	East Sixth Street to the north; Mill Street to the east; and Alameda Street to the west. Wholesale Street, which is not visible as such, runs east-west across the southern parking lot parallel to the southern property building.
Paved Areas (including parking)	The entire property, apart from the building footprints, is paved with asphalt or concrete.
Unimproved Areas	None
Landscaped Areas	None
Surface Water	None
Potable Water Source	Los Angeles Department of Water and Power (LADWP)
Sanitary Sewer Utility	City of Los Angeles
Storm Sewer Utility	City of Los Angeles
Electrical Utility	LADWP
Natural Gas Utility	Southern California Gas
Current Occupancy Status	Approximately 96%
Unoccupied Buildings/Spaces	One (1221 Wholesale Street)
Number of Occupied Buildings	Two
General Building Description	Distribution warehouses
Number of Floors	One
Total Square Feet of Space (approximate)	287,376
Construction Completion Date (year)	1962 and 1973 (approximate)
Construction Type	Concrete tilt-up
Interior Finishes Description	Offices: walls: wallboard/joint compound, ceramic tile; ceilings: wallboard/joint compound, acoustical ceiling panels, and acoustical ceiling tiles; floors: resilient floor tile, resilient sheet flooring, carpeting, ceramic tile. Warehouses: unfinished concrete walls and floors; ceilings: exposed wooden beams with insulating foil.
Exterior Finishes Description	Painted concrete
Cooling System Type	Offices: None or window-mounted air conditioning units, supplemented by a few roof-mounted electric package units. Warehouses: none, except for cold storage rooms cooled by large dock-mounted refrigeration units and one cooling tower.
Heating System Type	None
Emergency Power	None

3.5 Current Uses of Adjoining Properties

The current uses of the adjoining properties were observed as follows:

North – Adjacent to the property to the north is East Sixth Street, across which are small- to mid-sized commercial and light-industrial industrial buildings. These include, from west to east (all of which are addressed on East Sixth Street), an office (1205), Garlic & Ginger Wholesale Distributors (1217), a small paved yard, a light-industrial building with no business name (1235), Downtownartistspace.com (1247-1259), a small industrial building with a faded sign saying 'Economy' (1261), a small industrial building with no name (1269), an office building with a sign saying 'film location' (1275), Altronics Import & Manufacturers (1281 and 1281½), an office building with no visible business name or address, a small industrial building under construction, and a large multi-tenant industrial building with no visible business name (1330).

East – Adjacent to the property to the east is Mill Street, across which is a large multi-story commercial building occupied by a firm identified as Iron Mountain (1340 East Sixth Street).

South – Adjacent to the south of the property is an abandoned railroad right-of-way across which are industrial buildings, which include, from west to east, Union Central Cold Storage (1525 Industrial Street), Fresco Foods (1567 Industrial Street), a warehouse with no name or address, a warehouse with no visible name (1581 Industrial Street), Drecar Enterprises Inc. (1601 Industrial Street), IBC Produce (1717 Industrial Street) and a small parking lot.

West – Adjacent to the property to the west is Alameda Street, across which are a municipal bus yard and associated office building (1130 Sixth Street and 624 South Central Avenue).

Two adjacent addresses, 1275 East Sixth Street, under the name of Aesthetic Frame Design, and 1525 Industrial Street, under the name of Union Central Cold Storage Inc., were listed as Resource Conservation and Recovery Act (RCRA) small-quantity generators of hazardous waste. A historical adjacent address, 1301 East Sixth Street, is listed as a RCRA Non-Generator. The east adjacent property at 1340 East Sixth Street, under the name of Metropolitan Distribution Center, is listed as a RCRA Non-Generator and as a registered UST site on the California Facility Inventory Database (CA FID), the Historical UST list (HIST UST), and the Statewide Environmental Evaluation and Planning System (SWEEPS). The west-adjacent bus station is listed as a registered UST facility on the UST, SWEEPS, and CA FID lists and as a leaking UST (LUST) site. The potential for these adjacent sites to impact the property adversely is discussed in Sections 5.1.1 and 5.1.2. No obvious concerns were observed on the remaining adjacent properties.

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Lowe Enterprises Investment Management, Inc. (User) with regard to the Phase I ESA. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

The User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

The User identified no environmental liens or AULs pertaining to the property.

Additionally, ATC requested a search for environmental liens and AULs affecting the property from EDR. The lien report did not identify environmental liens or AULs associated with the property. A copy of the lien search report is included in Appendix L.

4.3 Specialized Knowledge

The User identified no specialized knowledge regarding *recognized environmental conditions* associated with the property.

4.4 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

The User identified themselves as the property owner. A site map with most tenants indicated was also provided. The Property Manager was identified as Ms. Denise Lieberson, with Lowe Enterprises Real Estate Group.

4.6 Reason for Performing Phase I ESA

The User indicated that this ESA was being performed in connection with a proposed sale of the property.

4.7 Other User Provided Documents

Per ASTM Standard Practice E 1527-05, ATC obtained the documents listed below from the User. Further discussion may be found in Section 5.3.9 and relevant sections of this report.

OTHER USER PROVIDED DOCUMENTS		
Title	**Date (if known)**	**Author and/or Source (if known)**
Phase I Environmental Site Assessment of 6th Street and Alameda, 1206-1338 East 6th Street and 1205-1321 Wholesale Street, Los Angeles, California 90021	March 8, 2001	EMG

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by EDR, was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the property. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as a being within the approximate minimum search distance from the property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Property Listed?**	**Additional Sites Listed**
Federal National Priorities List (NPL)	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	No	0
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	2
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	0
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0
Federal RCRA Generators	Property & Adjoining	**Yes**	2
Federal Institutional Control/Engineering Control Registry	Property	No	N/A
Federal Emergency Response Notification System (ERNS) list	Property	No	N/A
State and Tribal NPL [RESPONSE and Bond Expenditure Plan (BEP)]	1 mile	No	2
State and Tribal CERCLIS (ENVIROSTOR)	½ mile	No	5
Facility and Manifest Data (HAZNET)	Property	**Yes**	N/A
State and/or Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	0
State and Tribal Leaking Underground Storage Tanks (LUST)	½ mile	No	10
California Spills, Leaks, and Incident Clean-Up (CA SLIC)	½ mile	No	2

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Property Listed?**	**Additional Sites Listed**
State and Tribal Registered Underground Storage Tanks (UST); Historical UST (HIST UST) list; California Facility Manifest Database (CA FID); and Statewide Environmental Evaluation and Planning System (SWEEPS)	Property & Adjoining	**Yes**	2
State and Tribal Institutional Control/Engineering Control Registry	Property	No	N/A
State and Tribal Voluntary Cleanup Site	½ mile	No	3

5.1.1 Federal Agency Database Findings

The property, under the name of a former tenant, Los Angeles Times, was listed on the RCRA Non-Generator database. The Los Angeles Times reportedly formerly occupied 1321 Wholesale Street. Non-generators do not presently generate hazardous waste (but presumably were former generators). No violations were of record. Based on the absence of violations and the fact that this tenant is no longer present, the listing of the property on the RCRA Non-Generator database is not considered to represent an environmental concern.

Two adjacent properties were listed on federal databases, as follows:

Aesthetic Frame Design
1275 East 6th Street
Los Angeles, California 90021
Distance/Direction-Gradient: Adjacent to the north / cross- to upgradient
Databases: RCRA Small-Quantity Generator
Regulatory Data Summary: No RCRA violations were reported.
Discussion: Based on the regulatory status and location with respect to the inferred groundwater gradient, the presence of the adjacent property on the RCRA small-quantity generator list is not considered to represent a concern to the property.

Union Central Cold Storage Inc.
1525 Industrial Street
Los Angeles, California 90021
Distance/Direction-Gradient: Adjacent to the south / cross-gradient
Databases: RCRA Small-Quantity Generator
Regulatory Data Summary: No RCRA violations were reported.
Discussion: Based on the regulatory status and location with respect to the inferred groundwater gradient, the presence of the adjacent property on the RCRA small-quantity generator list is not considered to represent a concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the remaining sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the property.

5.1.2 State and Tribal Database Findings

The property was listed on the HIST UST, CAL FID UST, and SWEEPS UST databases of registered USTs. The USTs were operated by Progressive Produce, formerly located in 1266 East Sixth Street. The property is not listed as a LUST site. According to historical building permits and fire department records (see Sections 5.3.7 and 5.1.3, respectively), the USTs were removed in 1990. No impacted soils were identified; however, no closure letter appears to have been issued for the UST removals. The property is also listed on the HAZNET database as having generated manifested waste. The wastes generated were described as liquids with halogenated organic compounds (generated by Progressive Produce) and unspecified oil-containing waste (generated by a former occupant at 1330 East Sixth Street identified as Albert's Organics). HAZNET does not track violators and the presence of a facility on this database does not necessarily indicate that a problem exists at that facility. According to a 2001 ESA of the property prepared by EMG (see Section 5.3.9), Progressive Produce formerly conducted truck repair activities on-site. It is therefore considered likely that the halogenated organic wastes generated by Progressive Produce were spent solvents from a parts washer. Based on the nature of the wastes generated, the fact that neither listed tenant is currently present on the property and former waste storage locations are unknown in any case, the HAZNET listings are not considered to represent an environmental concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the state or tribal agency databases are considered to represent a likely past, present or material threat of release on the property.

5.1.3 Local Environmental Records Sources

Los Angeles County Public Health Investigation (PHI)

ATC requested a search of available records pertaining to hazardous materials use and hazardous waste generation at the property from the PHI. The PHI responded that they have no records for the property addresses.

California Environmental Protection Agency, Department of Toxic Substances Control (DTSC)

According to the DTSC website, http://www.envirostor.dtsc.ca.gov, the DTSC has no files for the property nor any adjacent property.

Los Angeles Fire Department (LAFD)

ATC reviewed the UST file for the property at the LAFD. Two 10,000-gallon USTs, one for gasoline and the other for diesel, were removed from the property in May of 1990. Three soil samples were collected from beneath each UST and analyzed for total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as diesel (TPHd), as appropriate, and for the fuel constituents benzene, toluene, ethylebenzene, and total xylenes (BTEX). All soil samples had non-detectable concentrations for all analytes. No closure letter was present in the file.

ATC also requested a search of available records pertaining to USTs for all current and selected historical addresses. The LAFD responded that they had no records pertaining to the remaining property addresses.

Regional Water Quality Control Board (RWQCB)

According to the RWQCB GeoTracker website, http://geotracker.swrcb.ca.gov, no LUST sites or Spills, Leaks, Investigations, and Clean-Ups (SLIC) sites are located on the property.

South Coast Air Quality Management District (SCAQMD)

According to information contained on the SCAQMD website, http://www.aqmd.gov, the SCAQMD had records pertaining to two former and one current tenant, summarized as follows:

- Active permits held by American Produce (aka Chiquita) for 12 banana-ripening rooms at 1321 Wholesale Street. No violations were reported. No indications of releases of the chemical used in connection with the banana-ripening process were observed in this unit (see Section 6.2).

- An inactive permit formerly held by the Los Angeles Times for a spray booth and solvent in tenant space 1321 Wholesale Street. No violations were reported. While the former presence of a spray booth is potentially problematic, no paint stains or other indications of the former location of the spray booth were observed by ATC inside this tenant space. Accordingly, the former spray booth is not considered to represent a *recognized environmental condition*.

- A permit formerly held by Progressive Produce for gasoline dispensing operations. Progressive Produce occupied the address 1266 East Sixth Street, but it is known from diagrams that the USTs and dispensers were formerly located at the western end of the Sixth Street building. As previously discussed, based on the results of soil sampling at the time of the tanks' removal, the former USTs used by Progressive Produce are not considered to represent an environmental concern to the property.

Department of Planning and Zoning

According to the Los Angeles Zoning Department website, http://zimas.lacity.org, the property is zoned M3-1 for heavy manufacturing purposes, which appears to be appropriate for the property use.

5.2 Physical Setting Sources

5.2.1 Topography

According to the United States Geological Survey (USGS) 7.5-Minute Series Topographic map of the Los Angeles, California Quadrangle, the property is located at an approximate elevation of 249 feet above mean sea level. The area has a slope to the southwest of approximately 20 feet per mile.

A copy of the topographic map is included in Appendix A.

5.2.2 Geology

The property is situated on approximately 300 feet of unconsolidated and semi-consolidated Recent, Pleistocene-aged alluvial and marine sediments consisting of silts, sands, gravels, and clays. The upper half of this thickness is comprised of the Pleistocene Gaspur and Exposition Aquifers. These sediments overlie several thousand feet of consolidated sedimentary rocks which, in turn, rest on a probable basement complex of low-grade meta-igneous rocks of uncertain age and correlation (California Department of Water Resources, 1961; USGS, 1965).

5.2.3 Soils

According to the United States Department of Agriculture, Soil Conservation Service publication, *Report and General Soil Map, Los Angeles County*, soils of the property most likely belong to the Hanford Association. Hanford soils are over 60 inches deep, are well-drained, and have moderately rapid subsoil permeability. They have pale brown coarse sandy loam surface layers about eight inches thick, underlain by light yellowish-brown coarse sandy loam subsoil and a gravelly loamy coarse sand substratum. They are slightly acid to mildly alkaline throughout, and have an available water-holding capacity of 5.0 to 7.5 inches for 60 inches of soil depth. Shrink-swell potential is low and corrosivity for untreated steel is low.

5.2.4 Hydrology

According to information obtained from the GeoTracker website, http://geotracker.swrcb.ca.gov, the depth to groundwater at a LUST site located approximately 700 feet north of the property was approximately 97 feet below ground surface (bgs) in June of 2009. However, the presence of shallower, perched water cannot be ruled out with certainty. The direction of groundwater flow at that LUST site was reported to be toward the west-southwest.

Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

5.2.5 Other Physical Setting Sources

Flood Plain Map

According to information provided by Federal Emergency Management Agency (FEMA) website, http://www.fema.gov, the property is located in flood zone X, or areas outside of the 500-year flood zone. The community/panel number for the Flood Insurance Rate Map for the property is 06037C 1636F and the effective date is September 26, 2008.

A copy of the flood plain map is included in Appendix L.

Wetlands Map

According to the United States Fish and Wildlife Service (USFWS) wetlands mapper website, http://nwi.fws.gov, the nearest designated wetland is the channel of the Los Angeles River, located approximately 0.34 mile to the east-northeast of the property. Based on distance and the nature of the wetland, it is not considered to represent an environmental concern to the property.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

HISTORICAL USE SUMMARY				
Period	**Identified Historical Uses**		**Source(s)**	**Intervals/Comments**
	Property	**Surrounding Area**		
Prior to 1940	Vacant Commercial Institutional Industrial	Vacant Institutional Industrial	Aerial Photographs Topographic Maps Building Permits Sanborn Maps	1894 Sanborn Map is the earliest record identified. Data gaps of six years (1894-1900), six years (1900-1906), 14 years (1910-1924), and ten years (1928-1938). Site begins development for industrial purposes between 1900 and 1906. Apart from increasing development, no use changes across data gaps.
1940-1960	Industrial	Commercial Industrial Institutional	Aerial Photographs Topographic Maps City Directories Sanborn Maps	One nine-year data gap (1938-1947). No use changes across data gap.
1961-1980	Industrial	Commercial Industrial Institutional	Aerial Photographs Topographic Maps City Directories Sanborn Maps Building Permits	No data gaps. Current property buildings built 1962 and circa 1973.
1981 to present	Industrial	Commercial Industrial Institutional	Aerial Photographs Topographic Maps City Directories Building Permits	Two six-year data gaps (1981-1987) and (1996-2002). No use changes across data gaps.

Based on the absence of use changes across data gaps, the identified data gaps are not considered to have a significant impact on the determination of *recognized environmental conditions*.

5.3.1 Aerial Photographs

ATC reviewed available aerial photographs of the property and surrounding areas provided by EDR. Available aerial photographs ranged from 1928 to 2005. The following are descriptions and interpretations from the aerial photograph review.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1928, 1938 and 1947	1"=500', 1"=555' and 1"=666', respectively	**Property**: The northern two-thirds of the property is developed with three elongated multi-unit warehouse buildings and railroad spurs. The southern one-third of the property is developed with two large industrial buildings, concentrated in the eastern portion. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1956	1"=400'	**Property**: The northern two-thirds of the property is developed with three elongated multi-unit warehouse buildings and railroad spurs. The southern one-third of the property is developed with two three industrial buildings and one small square building. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1965	1"=666'	**Property**: The northernmost portion of the property along Sixth Street is developed with two elongated buildings, oriented end-to-end. These are the eastern and western portions of the current building. The center and southern portion of the property is developed with structures described in earlier photographs. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1976	1"=666'	**Property**: The property is developed with the two current structures and appears essentially as it does currently. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1989, 1994, 2002, and 2005	1"=666', 1"=666', 1"=666', and 1"=604', respectively	**Property**: The property appears essentially as it does currently. **Surrounding Area**: The adjacent properties appear essentially as they do currently.

The review of aerial photographs did not identify past uses indicating *recognized environmental conditions* at the property or surrounding area.

Copies of reproducible aerial photographs are included in Appendix F.

5.3.2 Fire Insurance Maps

ATC reviewed copies of available historical Sanborn Fire Insurance Maps (Sanborn Maps) provided by EDR. Sanborn Maps were reviewed for the years 1894, 1906, 1950, 1953, 1954, 1959, 1960, 1967, and 1970. The following are descriptions and interpretations from the Sanborn Map review. Copies of the Sanborn Maps reviewed are included in Appendix G.

SANBORN MAPS	
Year	**Comments**
1894	**Property**: Only the western end of the property is depicted. The northwestern corner of the property is occupied by a lumberyard. South of the lumberyard, along the western side of the property is an athletic park with a baseball diamond and grandstand. **Surrounding Area:** Adjacent to the north is the continuation of the lumberyard (Sixth Street has not been constructed). Adjacent to the west, across Alameda Street, is an electric railroad plant.
1906	**Property**: The western two-thirds of the northern half of the property is occupied by a lumberyard. A large warehouse is located on the southern half of the property on the southeastern corner. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are a lumberyard, a box factory, and a mattress warehouse. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several buildings occupied by the Union Ice Company and two storage buildings for cement. Adjacent to the property to the west is the Los Angeles Railway Company.
1950, 1953, 1954, 1959, and 1960	**Property**: The northern portion of the property along Sixth Street is developed with an elongated multi-tenant warehouse. Tenants depicted include produce warehouses, stores, and at least five machine shops. The remainder of the property is developed with four additional warehouses, three of which have multiple tenants as well as several small accessory buildings. A chemical manufacturer occupies a small tenant space of the east-central warehouse on the 1950 and 1953 Sanborn Maps, but is gone by 1954. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are numerous small to mid-sized commercial and industrial buildings. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several industrial buildings, including the Union Ice Company, various warehouses and a garage and automotive repair firm. Adjacent to the property to the west is the Los Angeles Transit Authority. The number of buildings on the west-adjacent site decreased through time. By at least 1959, the activity had switched from a train yard to a bus yard.
1967	**Property**: The property is developed with six warehouses, the northern two of which are the eastern and western portions of the current northern building. The remaining four warehouses are among those that were previously present on the property. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are numerous small to mid-sized commercial and industrial buildings, which include two chemical warehouses. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several industrial buildings, including the Union Ice Company, various warehouses and a garage and automotive repair firm. Adjacent to the property to the west is the Los Angeles Transit Authority bus yard.
1970	**Property**: The property is developed with six warehouses, the northern two of which are the eastern and western portions of the current northern building. The eastern half of the current southern building has replaced one of the earlier warehouses. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are numerous small to mid-sized commercial and industrial buildings, which include two chemical warehouses. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several industrial buildings, including the Union Ice Company, various warehouses and a garage and automotive repair firm. Adjacent to the property to the west is the Los Angeles Transit Authority bus yard.

The review of Sanborn Maps did not reveal the presence of *recognized environmental conditions* at the property. Although the prior presence of tenants such as machine shops and chemical manufacturers

represent problematic uses, based on the complete redevelopment of the property since these tenants were present, the former uses are considered to be notable findings but not *recognized environmental conditions*.

5.3.3 Property Tax Files

According to information on file with the Los Angeles County Assessor, the current owner of the property is Lowe 6th Street Properties, LLC, which acquired title in 1999. Other previous owners include Newlowe Properties (1988-1998) and Southern Pacific Company (1968-1988). No owners prior to 1968 were listed. The review of tax files did not identify *recognized environmental conditions* at the property.

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for this Phase I ESA.

5.3.5 Historical USGS Topographic Quadrangles

ATC reviewed available historical USGS Topographic Quadrangles for information regarding past uses of the property. Topographic maps were reviewed for the years 1900, 1913, 1928, 1953, 1966, 1972, 1981, and 1994. The 1900 and 1913 map editions both show the property as vacant except for one or two small structures at the western end. Widely-spaced structures are present to the north and south, and small structures are located to the west. The 1928 map shows five of the warehouse structures on the property. Industrial buildings are shown on all adjacent properties. The 1953 through 1994 map editions show the property and adjacent parcels with a pink shading indicative of a developed urban setting.

The review of historical USGS Topographic Quadrangles did not identify past uses indicating *recognized environmental conditions* at the property or the surrounding area. Copies of topographic maps are included in Appendix G.

5.3.6 City Directories

ATC reviewed historical city directories at the Los Angeles Central Library. Directories were reviewed for the years 1956, 1961, 1969, 1975, 1980, 1987, and 1996. ATC's findings are summarized in the following table:

CITY DIRECTORY SUMMARY	
Year	**Comments**
1956	**Property**: Sixth Street: 1204-Crane Auto Elec.; 1206-Butane Carburetor Serv.; 1220-Consolidated Produce; 1234-Claypool & Company, Stater Bros. Industrial Street: 1525-Central LA Trading, Union Central Stg.; 1581- Chariot Imp / Exp; 1601-Grand Int'l Ent.; 1717-Bowin & Son, General Produce Co., MCL Distribution.

The review of city directories did not identify past uses indicating *recognized environmental conditions* at the property or surrounding areas.

5.3.7 Building Department Records

ATC reviewed historical building department records at the Los Angeles Department of Building and Safety. Due to the large number of addresses associated with the property, ATC spot-checked building permits. Noteworthy permits observed included the following:

- The original building permits, dated June 1909, for a market building, 728 feet long and addressed between 1200 and 1300 East Sixth Street and a toilet building.

- A permit dated January 1910 for an unspecified new building at the rear of 1280-1336 East Sixth Street.

- Permits dated March 1924 for a scale house and toilet, and a building containing an employee boardinghouse and commercial stores.

- The original building permits, dated October 1962, for the eastern and western portions of the current structure at 1206-1338 East Sixth Street. A diagram accompanying this permit depicted two other elongated structures, 65 feet to the south, that were described as built in 1902 and 1906. These latter two buildings appear to be the multi-tenant structures shown on Sanborn Maps crossing the center of the property from east to west.

- A permit, dated July 1973, to connect the two buildings built in 1962 into a single structure. A diagram accompanying that permit also depicts the eastern portion of the current structure on Wholesale Street as a pre-existing building.

- A permit, dated March 1990, to backfill a UST excavation. Two USTs, described as a 5,000-gallon gasoline and a 10,000-gallon diesel UST, were located 70 and 80 feet south of East Sixth Street and 20 and 40 feet east of Alameda Street, respectively. As mentioned previously, UST records at the LAFD indicated that both USTs were 10,000 gallons in size.

- A permit dated 1948 for a warehouse at 1209 Wholesale Street.

- Permits dated January 1973 to demolish at least three older buildings on the center and southern portions of the property.

Apart from the reference to the former USTs, no permits were observed for features of potential environmental concern. As mentioned previously, based on the removal of the tanks and the absence of associated soil impacts, the former USTs are not considered to represent a *recognized environmental condition*. The review of building department records did not identify past uses indicating *recognized environmental conditions* at the property.

5.3.8 Zoning/Land Use Records

No historical zoning information was available for the property. The area appears to have been used for industrial purposes since at least the early 1900s.

5.3.9 Prior Reports

ATC was provided with one previous environmental report pertaining to the property. The report, entitled *Phase I Environmental Site Assessment of 6th Street and Alameda, 1206-1338 East 6th Street and 1205-1321 Wholesale Street, Los Angeles, California, 90021*, was prepared by EMG and dated March 8, 2001. Although EMG noted that the tenant that formerly operated the USTs, Progressive Produce at 1226

East Sixth Street, also conducted truck maintenance on-site, EMG did not identify *recognized environmental conditions* at the property and made no recommendations for additional assessment.

ATC makes no warranty, guaranty or certification regarding the quality, accuracy or reliability of any prior report provided to ATC and discussed in this Phase I ESA report. ATC expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to ATC and discussed in this Phase I ESA report.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property (if any) were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise. One tenant space, 1266C, occupied by Quan 9, a food distributorship, was locked and inaccessible. The weather during the site reconnaissance was sunny and warm. There were no visibility restrictions due to weather conditions.

6.2 Hazardous Substance Use, Storage, and Disposal

ATC conducted the site reconnaissance on April 1, 2010. ATC reviewed the property for hazardous materials storage and use, as well as indications that such materials may have been spilled or dumped. ATC was accompanied during the property visit by Mr. Gordon Howe of Lowe Enterprises Investment Management, Inc., and Mr. John Hirst, Chief Engineer at the Building for approximately four months.

All except two of the tenant spaces are occupied by distributors of produce or other food products. The remaining two are a vacant space and a warehouse occupied by a toy distributor, located in spaces 1221 and 1301B Wholesale Street, respectively.

Chemical use on the property consists generally of degreasers and soaps, janitorial supplies and maintenance materials such as paint, propane, and, in localized tenant spaces, water treatment chemicals, motor oil, and Ethyl-Gen, an alcohol-based chemical used to hasten the ripening of bananas.

Degreasers and soaps were generally stored in 55-gallon drums, often without secondary containment. No apparent spills were noted; however, since the primary use of these materials is floor washing, the absence of secondary containment is not considered to represent an environmental concern. In addition to these types of larger containers, janitorial supplies, in five-gallon containers or smaller, were observed inside most of the tenant spaces.

Water treatment chemicals were observed in two tenant spaces, 1321 Wholesale Street (occupied by American Produce, aka Chiquita Fresh), which utilizes a cooling tower located on the northern side of the warehouse exterior to refrigerate its fruit storage rooms, and 1301 Wholesale Street (occupied by a food distributor identified as A&F).

Propane fuel canisters for forklifts were present in nearly every unit. Most tenant spaces also had electric forklifts and charging stations. White staining on the concrete floor was observed near forklift chargers in 1205, 1215, 1221, and 1321B Wholesale Street. Heavy pitting of the concrete surface of the warehouse floor was observed near the batteries stored in 1215 Wholesale Street. The deterioration was not sufficient to create a pathway through the floor to the underlying soil.

Approximately four 5-gallon and eight 1-gallon containers of paint, two 1-gallon containers of adhesive and one gallon of brush cleaner were observed on the floor of an electric room at the southeastern corner of the southern building. No stains were observed in this area. Additionally, a large number of five-gallon containers of paint and at least three 1-gallon containers of thinner were being stored on the floor of the vacant unit at 1221 Wholesale Street. The containers were arranged on a drop cloth. A few paint drops were observed on the concrete floor of the unit. Based on the small quantity and absence of nearby floor drains, the stains are not considered to represent an environmental concern.

At least 18 boxes of alcohol-based ripener were stored inside and on top of flame-resistant cabinets within unit 1321 Wholesale Street. No indications of releases were observed.

ATC did not observe the generation of hazardous wastes at the property.

ATC reviewed the exterior portions of the property. No stained soils or vegetative stress suggestive of the release of hazardous substances were observed at the property; however, an area of oily sediment several feet in diameter was observed on the pavement near the base of the roof access ladder on the northern side of the northern building. It is not known what the source of the oil or grease in the sediment is, but based on the good condition of the pavement, this stained area is not considered to represent an environmental concern to the property.

6.3 Underground Storage Tanks (USTs)

ATC did not observe visual or documentary evidence of current USTs on the property. As mentioned previously, two 10,000-gallon USTs were removed in 1990 from a location at the western end of the northern property building. Soil samples collected at the time of removal did not detect impacted soil; however, no closure letter for the UST removals was present in the LAFD file.

6.4 Aboveground Storage Tanks (ASTs)

ATC did not observe visual or documentary evidence of current or former ASTs at the property.

6.5 Other Petroleum Products

Two 1-gallon containers of motor oil were observed on a shelf inside the unit at 1317 Wholesale Street. No indications of releases were observed.

One 5-gallon container of what appeared to be waste oil was observed on the sidewalk along Mill Street. This container appeared to be abandoned and it is not known if it was discarded by a property tenant. Although no stains were observed near the container, a storm drain was present in the gutter very near to where the container had been placed. Additionally, a one-gallon container of motor oil was observed on its side at the edge of the sidewalk along Sixth Street. An oil stain led from the container to the gutter. Based on the small amount of staining, this release is considered to be a *de minimis condition*.

6.6 Polychlorinated Biphenyls (PCBs)

Two pad-mounted LADWP transformers were observed at the property near the southeastern and northwestern corners of the southern property building. Based on the age of the property improvements, 1962 and 1973, it is possible that the transformers contain PCBs, although they appeared to be comparatively new. In addition, three pole-mounted transformers are located at the northwestern corner of the northern building. Additionally, a total of 14 pole-mounted transformers are located along the adjoining sidewalks of Mill Street and Sixth Street. Based on the age of the property improvements (1962 and 1973), is possible that some of these contain PCBs; however, ATC observed at least eight pole-mounted transformers, including two of the three located at the northwestern corner of the property, with markings identifying them as non-PCB per the manufacturer. No obvious indications of leaks or damage was observed in connection with the property transformers.

Another potential source of PCBs is the ballasts of fluorescent lights. Fluorescent lighting is present at the property. Based on the age of the property improvements (1962 and 1973), it is possible that PCB-containing ballasts are present. During the course of normal maintenance, ballasts should be inspected for labeling indicating their PCB content. In general, any ballast not specifically labeled as not containing PCBs is presumed to contain them and will require special disposal practices when eventually discarded.

PCBs have also been used as an additive in hydraulic fluid. No elevators or other hydraulic equipment were observed on the property.

6.7 Unidentified Substance Containers

ATC did not observe the presence of unidentified substance containers on the property.

6.8 Nonhazardous Solid Waste

Nonhazardous wastes generated at the property consist of typical municipal refuse, and food waste. Individual tenants are responsible for making their own arrangements for trash removal. Standard-sized dumpsters are located along the inner corridor between the two property buildings. All of these dumpsters were serviced by Consolidated or Waste Management. Each tenant questioned regarding waste removal frequency indicated that their dumpsters were emptied each weekday. Two roll-off dumpsters were observed at the property. These were located on the southern side of unit 1206 Sixth Street and the western side of 1205 Wholesale Street. The dumpsters are emptied by Consolidated and General Waste, respectively. These large dumpsters are emptied on an as-needed basis.

6.9 Waste Water

Apart from stormwater runoff and municipal sewage, no aqueous waste streams are generated at the property.

6.10 Waste Pits, Ponds and Lagoons

ATC did not observe evidence of waste pits, ponds or lagoons on the property.

6.11 Sumps

ATC did not observe evidence of sumps on the property.

6.12 Septic Systems

ATC did not observe evidence of a septic system on the property; however, according to a representative of the Los Angeles Sewer Department, the earliest record of a sewer permit associated with the property was dated 1922. While earlier, unrecorded sewer connections are possible, given the long period of occupancy, it is possible that septic systems were formerly located on the property. However, given that the existence (to say nothing of location) of any prior septic systems is speculative, as well as the subsequent redevelopment of the property, the possibility of prior septic systems is not considered to represent an environmental concern to the property.

6.13 Storm Water Management System

Storm water is conveyed from roofs by internal drains that discharge to the surrounding pavement. Storm runoff in parking and drive areas is conveyed by concrete drainage swales to storm drains located in parking lots or to the adjoining streets where it flows along the gutters to the nearest municipal storm drain.

6.14 Wells

ATC did not observe evidence of wells on the property.

7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

INTERVIEW SUMMARY				
Role	**Name**	**Title/Company**	**Years Assoc. With Property**	**Interview Type**
Site Escort	Mr. John Hirst	Chief Engineer / Lowe Enterprises Real Estate Group	Approximately four months	In person
Property representative	Ms. Denise Lieberson	Property Manager / Lowe Enterprises Real Estate Group	Approximately four months	By telephone

Not included in this listing are those governmental employees that were contacted solely for the purpose of retrieving public information pertaining to the property and who would not be expected to have first-hand knowledge of *recognized environmental conditions* at the property.

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview, if any) documented on Record of Communication forms in Appendix J.

8.0 OTHER ENVIRONMENTAL CONDITIONS

8.1 Asbestos-Containing Material (ACM)

Suspect ACMs observed by ATC during the current site reconnaissance included wallboard/joint compound, acoustical ceiling panels, acoustical ceiling tiles, resilient floor tile, resilient sheet flooring, flooring mastics, baseboard and baseboard mastics, and roofing materials. Based on the age of the property improvements (1962 and 1973), it is possible that asbestos is present on the property.

A previous environmental assessment by EMG included a review of an earlier asbestos survey conducted at the property in 1989 by Applied Geosciences, in which 21 samples of suspect ACMs, including wallboard/joint compound ceiling panels, flooring materials, and roofing materials were collected. Asbestos was detected in three types of floor tile and one type of sheet flooring. EMG did not describe the sample locations clearly. During their site reconnaissance, however, EMG noted that they did not observe the flooring in question and assumed that it had been removed. Additionally, EMG reviewed a 2000 Phase I ESA prepared by a firm identified as EGA. This Phase I included a limited asbestos survey. Suspect materials sampled by EGA included suspended ceiling tiles, wall materials, pipe wrap, and roofing materials. Asbestos was detected in the roofing materials, which were reportedly being encapsulated or replaced at the time of EGA's site visit.

8.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

ATC's review of published radon data indicates that the property is located in a county designated by the EPA as Zone 2 for radon propensity. Zone 2 areas have a predicted radon concentration of greater than or equal to 2.0 pCi/L and less than or equal to 4.0 pCi/L. According to statistical data provided by EDR, an EPA survey of 63 sites in Los Angeles County revealed two percent with radon concentrations in excess of 4.0 pCi/L. Based on these statistics and the non-residential use of the property, no additional investigations are recommended at this time.

8.3 Lead in Drinking Water

According to a recent annual water quality report, the potable water supplied to the property meets or exceeds all drinking water standards, including those for lead. Based on the fact that the water supplied to the property is from the municipality, lead in drinking water testing was not conducted for this Phase I ESA.

8.4 Lead-Based Paint (LBP)

Based on the age of the property improvements, it is possible that LBP has been used on the property in the past. Apart from one area of damaged paint observed on the eastern exterior wall of the southern building, painted surfaces appeared to be in good condition.

8.5 Mold Screening

ATC conducted a screening survey for mold conditions at the property. The screening consisted of limited interview and physical observation.

ATC spoke with Ms. Denise Lieberson, the Property Manager for approximately four months. Ms. Lieberson indicated that there have been no occurrences of, or surveys for mold of which she was aware. Accordingly, there was no mold-related documentation to review. Additionally, the Chief Engineer for the property, Mr. John Hirst, did not report any ongoing or former water intrusion events at the property.

During the site reconnaissance, ATC did not observe either suspect mold at the property or indications of current water intrusion events. One area of damaged ceiling tile and associated water staining was observed in the office area of 1206 East Sixth Street. According to the tenant, the leak causing the damage resulted from an air conditioner and occurred long ago. No other indications of current or former water intrusion were observed at the property.

8.6 Additional User Requested Conditions

There were no additional User-requested conditions researched for this assessment.

EXECUTIVE SUMMARY

Alta Environmental ("Alta") completed a Phase I Environmental Site Assessment (ESA) of the subject site located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street, in Los Angeles, California (Site). The ESA was performed in conformance with the scope and limitations of ASTM E1527-13 and AAI standards. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. The assessment was performed to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject site. These issues are considered recognized environmental conditions (RECs).

Site and Vicinity Description

The subject site is located within a commercial/industrial area of Los Angeles, California, at 1206-1338 East 6th Street and 1205-1321 Wholesale Street. The property is approximately 14.57 acres and is reportedly zoned as *M3-1* for heavy manufacturing purposes. The Assessor's Parcel Numbers for the property are 5164-010-003, 5164-010-004, and 5164-010-005. The subject property is bound to the north by East Sixth Street, to the west by South Alameda Street, to the south by two neighboring warehouses, and to the east by Mill Street.

At the time of our site visit, the subject property was developed with two elongated, multi-tenant warehouses, with loading docks on all sides. The northern building was approximately 104,676 square feet and the southern building was approximately 182,700 square feet. The tenant spaces were variously developed with large refrigerated storage rooms, general indoor storage areas, and office space. Floor drains were identified throughout each of the buildings; however, they were not identified in all tenant spaces. Based on date of construction, it is assumed that the building floor drains are connected to the local sanitary sewer system. Several storm water drains were located throughout the exterior of the property.

Site Use and History

Based on records reviewed as early as the 1890s, the subject property contained a lumberyard and mill on the northern portion of the property. Beginning in the early 1900s, development of additional buildings began along the southern portion of the subject property. By the late 1900s, the northern portion was developed with a long warehouse, though not the same as present-day. Two railroad spurs entering the subject property from the northwest appeared active as late as 1938, based on aerial photography. During the late 1940s to early 1950s, additional multi-tenant warehouse structures were developed. Among these tenants included multiple machine shops and a chemical manufacturer. In the early 1960s, the present-day northern warehouse was developed, with the present-day southern warehouse constructed in the early 1970s.

At the time of our site visit, the subject property was developed with two elongated, multi-tenant warehouses, with loading docks on all sides. The northern building was approximately 104,676 square feet and the southern building was approximately 182,700 square feet. These warehouses were utilized by various tenants to store, package, and ship produce such as fruit, vegetables, and flowers. Moderate truck traffic was observed at most tenant spaces.

Findings and Conclusions Summary

<u>Property Reconnaissance</u>

No RECs, HRECs, or de minimis conditions were identified on the property or observed on the adjacent properties during the property reconnaissance.

At the time of our site visit, the subject property was utilized by various tenants to store, package, and ship produce such as fruit, vegetables, and flowers. Moderate truck traffic was observed at most tenant spaces.

Chemical storage areas were observed throughout both warehouse buildings at each of the tenant spaces. Chemicals stored in these areas were limited to food industry cleaners, disinfectants, and floor degreasers. Container sizes ranged from 1-gallon bottles to 55-gallon drums, with each tenant space storing less than 300-gallons in total product. All drums were observed stored on secondary containment pallets. No significant staining or other indicators of potentially significant spills was observed.

An additional storage area was observed in the Umina Bros. Inc. tenant space where a small mobile parts washer and a 30-gallon drum of grease were identified. This area appeared to be utilized for light maintenance of forklifts. No significant staining or other indicators of potentially significant spills was observed.

No evidence of current septic tanks, aboveground storage tanks or underground storage tank use was observed on site at the time of the site reconnaissance.

Pole mounted transformers were observed at various locations during our site walk, including at the northwestern corner of the northern warehouse, at multiple locations along the northern and eastern perimeter of the subject site. Additionally, pad mounted transformers were identified at the southeast corner and the northwest corner of the southern warehouse. No significant staining or other indicators of potentially leaks or spills was observed.

Floor drains were observed in several of the tenant's loading and storage areas and storm water drains were observed throughout the outside areas of the subject property. Based on date of construction, it is assumed that the building floor drains are connected to the local sanitary sewer system. No significant staining or other indications of spills potentially flowing to the drains was observed.

No cooling towers, backup power generators, elevators, lifts, trash compactors, strong odors, pools of; liquid, significant surface staining, significant stressed vegetation, or solid waste dumping were observed during the site walk.

Records Review

No RECs, HRECs, or de minimis conditions were identified on the property or adjoining upgradient property during the records review.

According to EDR, the subject property is listed on a variety of the databases referenced in this report, including the Resource Conservation and Recovery Act – Small Quantity Generators (RCRA-SQG), California's Facility Inventory Database for Underground Storage Tanks (CA FID UST), Historical Underground Storage Tanks (HIST UST), Statewide Environmental Evaluation and Planning System Underground Storage Tanks (SWEEPS UST), Resource Conservation and Recovery Act Non-Generators (RCRA NonGen), Facility Index System Data Systems (FINDS), and Emissions Inventory Data (EMI) databases. These database entries do not in and of themselves indicate potential environmental concerns for the property.

The UST databases identified two underground-storage tanks, one containing diesel (10,000-gal capacity) and one containing regular-unleaded fuel (no capacity listed). The history, year of installment, or current status of these tanks are unknown. No indications of unauthorized releases were identified by the database review. A previous Phase I for the site (ATC, 2010) states that LAFD records indicate that the tanks were removed in 1990, and that no soil contamination was identified at the time the USTs were removed. The site is not listed as a LUST site.

Depth to first encountered groundwater beneath the subject site is approximately 90 to 100 feet below grade surface, with gradient flowing towards the southwest.

The EDR Environmental Lien and AUL Search report did not identify any environmental liens for the subject property. No oil/gas wells were identified on the subject site.

Alta submitted information requests to the various county and regional agencies that may have records with regard to environmentally-oriented concerns affecting the subject site, in accordance with ASTM E1527-13 requirements. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Department of Building and Safety, State of California Office of Environmental Health and Safety (OEHHA), and Los Angeles County Sanitation District. Should significant records be identified at a later date, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the records review is not expected to indicate additional environmental concerns.

Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Department of Building and Safety, State of California Office of Environmental Health and Safety (OEHHA), and Los Angeles County Sanitation District. Additionally, responses the User Questionnaire was not obtained from the current site user. However these data gaps are not considered significant, as related information was reviewed from other additional sources.

Conclusions

The subject property is located in an industrial/ commercial area and has been developed at least since 1894. Based on the review of historical records, Site reconnaissance, groundwater flow and direction, and the previous Phase I ESA, we conclude that there is no evidence of current or historical RECs or Controlled RECs in connection with the subject property.

1 INTRODUCTION

The purpose of this assessment was to evaluate the environmental condition of the site and to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner, or bona fide prospective purchaser under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13;
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312); and
3. 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

This report was prepared exclusively for use by Latham & Watkins LLP and SKMF LLC. This report may not be relied upon by any other person or entity without Alta Environmental's express written permission. The information, conclusions and recommendations described in this report apply to conditions existing at certain locations when services were performed and are intended only for the specific purposes, locations, time frames and project parameters indicated. Alta Environmental cannot be responsible for the impact of any changes in environmental standards, practices or regulations after performance of services.

1.1 Objectives

Alta's objective for this environmental assessment was to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject site. The assessment was done to meet ASTM Standard Practice E1527-13.

The assessment provided herein was determined based on the following:

1. Current and past property uses and occupancies;
2. Current and past uses of hazardous substances;
3. Waste management and disposal activities that could have caused releases or threatened releases of hazardous substances;
4. Current and past corrective actions and response activities undertaken to address past and on-going releases of hazardous substances;
5. Engineering controls;
6. Institutional controls; and
7. Evaluation of properties adjoining or located nearby the subject site that have environmental conditions that could have resulted in conditions indicative of releases or threatened releases of hazardous substances to the subject site.

1.2 Services

Alta performed the following services to assess the property:

1. Reviewed historical sources of information;
2. Searched for recorded environmental clean-up liens;
3. Reviewed Federal, State, Tribal, and local government records;
4. Visually inspected the site and the adjoining sites;
5. Evaluated any specialized knowledge or experience on the part of the purchaser;
6. Determined commonly known or reasonably ascertainable information about the property; and
7. Provided an opinion on the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.

1.3 Assumptions

Alta has assumed the following for the purposes of this assessment:

1. Information provided during any interview (written or oral) was accurate and correct;
2. Database information reviewed was accurate and correct;
3. Historical information reviewed was accurate and correct;
4. Information reviewed at any governmental agency was accurate and correct;
5. Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey (USGS) Topographic Maps; and
6. The property has been correctly and accurately identified by the client, client representatives, property contact, property owner, and/or property representatives.

1.4 Limitations

This assessment is limited to the standards set forth in ASTM Standard Practice E1527-13. This assessment specifically excludes assessment of the following:

1. Asbestos and asbestos-containing building materials;
2. Biological agents;
3. Cultural and historical resources;
4. Ecological resources;
5. Endangered species
6. Health and safety;
7. Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment;
8. Industrial hygiene;
9. Lead-Based Paint;
10. Lead in Drinking Water;
11. Mold;
12. Radon;
13. Regulatory compliance; and
14. Wetlands.

Considerations identified by ASTM as beyond the scope of a Phase I Environmental Site Assessment (ESA) may affect business environmental risk at a given property. These environmental issues or conditions may warrant assessment based on the type of property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluation. The conclusions presented in this report are based solely on the services described herein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No subsurface exploratory drilling or sampling of any kind was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical or physical analyses have been performed during the course of this Phase I ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted. As applicable, Alta Environmental has relied in good faith upon representations and information furnished by individuals with respect to operations and existing property conditions, to the extent that they have not been contradicted by data obtained from other sources. Accordingly, Alta Environmental accepts no responsibility for any deficiencies, omissions, misrepresentations, or fraudulent acts of persons interviewed.

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented (if any) as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. Alta makes no warranty, express or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

This Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. The assessment is not intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use and environmental liens. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit. Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations (if any) expressed in this report.

1.5 Terms

The following terms are used in this report:

- "Subject site", "subject property", or "Site" refers to the property within the approximate boundaries described in Section 2;
- "Immediate site vicinity" refers to properties adjacent to the site that share a common boundary with the subject site; and
- "Site vicinity" refers to the area within an approximate 1-mile radius of the property.
- "Recognized Environmental Conditions" (RECs) – The presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (*1*) due to release to the environment; (*2*) under conditions indicative of a *release* to the *environment*; or (*3*) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*.
- "Controlled Recognized Environmental Condition" (CREC) – A recognized environmental condition resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*). A condition identified as a *controlled recognized environmental condition* does not imply that the *environmental professional* has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.
- "Historical Recognized Environmental Condition" (HREC) – A past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

- "Migrate/migration" – For the purposes of this practice, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.
- "Hazardous Substances" – The term "hazardous substance" is used here in general accordance with its use as defined in the following statutes and their implementing regulations:

    -- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended; and

    -- Superfund Amendment and Reauthorization Act (SARA) of 1986, as amended.

The terms "material," "waste," and "substances" are used interchangeably, and no legal distinction is implied between the terms as used herein. The words "impact" or "impacted" are used to mean the effect or result of a release of a hazardous substance that could result in a hazardous waste being present at the property. Search distances for government agency lists were those designated by the ASTM Standard E 1527-13.

1.6 Professionals

This document has been prepared by an Environmental Professional as defined by the EPA, 40 CFR Part 312.10. All work performed for this assessment was performed by or under the direct supervision of an Environmental Professional.

2 SITE DESCRIPTION

Alta personnel performed a site reconnaissance on March 5, 2015. The following descriptions are based on information provided by the current site representatives and on observations made during that site visit. Representative site photographs are included in Appendix A. Site Location and Site Layout maps depicting the areas and features described in the following sections are presented as Figures 1 and 2.

2.1 Property Development and Use

2.1.1 Development

The subject site is located within a commercial/industrial area of Los Angeles, California, at 1206-1338 East 6th Street and 1205-1321 Wholesale Street (Figure 1). The property is approximately 14.57 acres and is reportedly zoned as *M3-1* for heavy manufacturing purposes. The Assessor's Parcel Numbers for the property are 5164-010-003, 5164-010-004, and 5164-010-005. The subject property is bound to the north by East Sixth Street, to the west by South Alameda Street, to the south by two neighboring warehouses, and to the east by Mill Street.

At the time of our site visit, the subject property was developed with two elongated, multi-tenant warehouses, with loading docks on all sides. The northern building was approximately 104,676 square feet and the southern building was approximately 182,700 square feet. The tenant spaces were variously developed with large refrigerated storage rooms, general indoor storage areas, and office space. Floor drains were identified throughout each of the buildings, however they were not identified in all tenant spaces. Based on date of construction, it is assumed that the building floor drains are connected to the local sanitary sewer system. Several storm water drains were located throughout the exterior of the property.

2.1.2 Use

At the time of our site visit, the subject property was utilized by various tenants to store, package, and ship produce such as fruit, vegetables, and flowers. Moderate truck traffic was observed at most tenant spaces.

2.2 Services

The utilities servicing the subject site are:

Electricity:	Los Angeles Department of Water and Power
Water:	Los Angeles Department of Water and Power
Gas:	Southern California Gas Company
Sewer:	City of Los Angeles

No indications of water wells or septic systems were identified during the site reconnaissance.

2.3 Hazardous Materials and Chemical Storage Areas

Chemical storage areas were observed in both warehouse buildings at each of the tenant spaces. Chemicals stored in these areas were limited to food industry cleaners, disinfectants, and floor degreasers. Container sizes ranged from 1-gallon bottles to 55-gallon drums, with each tenant space storing less than 300-gallons in total product. All drums were observed stored on secondary containment pallets. No significant staining or other indicators of potentially significant spills was observed.

An additional storage area was observed in Umina Bros where a small mobile parts washer and a 30-gallon drum of grease were identified. This area appeared to be utilized for light maintenance of forklifts. No significant staining or other indicators of potentially significant spills was observed.

2.4 Storage Tanks

2.4.1 Aboveground Storage Tanks

No evidence of current aboveground storage tanks use was observed onsite at the time of the site reconnaissance.

2.4.2 Underground Storage Tanks

No evidence of current underground storage tanks (USTs) use was observed onsite at the time of the site reconnaissance.

2.4.3 Septic Tanks

No evidence of septic tank use was observed on site.

2.5 Polychlorinated Biphenyls

Pole mounted transformers were observed at various locations during our site walk, including at the northwestern corner of the northern warehouse, at multiple locations along the northern and eastern perimeter of the subject site. Additionally, pad mounted transformers were identified at the southeast corner and the northwest corner of the southern warehouse. No significant staining or other indicators of potentially leaks or spills was observed.

2.6 Wastewater, Floor Drains, Sumps, and Clarifiers

Floor drains were observed in several of the tenant's loading and storage areas and storm water drains were observed throughout the outside areas of the subject property. No significant staining or other indications of spills potentially flowing to the drains was observed.

2.7 Mechanical Systems

2.7.1 Back-up Power Generation

No back-up power generators were observed on the subject property.

2.7.2 Cooling Towers

No cooling towers were observed on the subject property; however, multiple refrigeration units were identified at each of the tenant spaces.

2.7.3 Elevators, Lifts and Compactors

No elevators, lifts or trash compactors were observed on the subject property.

2.8 Odors

No strong, pungent, or noxious odors were identified during the course of this assessment.

2.9 Pools of Liquid

No standing surface water or other pits, ponds, or lagoons potentially containing hazardous substances or petroleum products were identified within the subject property.

2.10 Surface Staining

No significant staining or other indications of potential release of hazardous substances or petroleum products were observed during the site reconnaissance.

2.11 Stressed Vegetation

No significantly stressed vegetation or other indications of potential release of hazardous substances or petroleum products were observed during the site reconnaissance.

2.12 Solid Waste

No indications of unauthorized dumping was identified during the site walk.

2.13 Adjacent Sites

The subject site is located within an industrial area of Los Angeles, California, to the west of the Los Angeles River. The following land use in the near vicinity of the property was observed:

Direction	Property Name	Property Address	Business Operation
North:	Las Americas Hotel	1205 East 6th Street	Hotel
	Top Line Specialty Produce	1217 East 6th Street	Produce Wholesale
	Light-industrial building	1235 6th Street	Unknown
	Downtown Artist Space.com	1247-1259 East 6th Street	Rental Artist Studios
	Economy Supply	1261 East 6th Street	Retail
	The Unique Space	1269 East Sixth Street	Artist/Office Space rentals
	City Loft Film Location	1275 East Sixth Street	Loft Locations
	Alltronics Import & Manufacturers	1281 East Sixth Street	Arts and Crafts Manufacture
	Commercial Creative Office Space	1330 East Sixth Street	Office Space

Direction	Property Name	Property Address	Business Operation
East:	Lotte	1805 Industrial Street	Parking lot
	ETO Doors	1340 East Sixth Street	Door Retailer
South:	Union Central Cold Storage	1525 Industrial Street	Cold Storage
	Fresco Foods	1567 Industrial Street	Wholesale Produce
	Drecar Enterprises Inc	1601 Industrial Street	Party Supplies
	IBC Produce	1717 Industrial Street	Wholesale Produce
West:	Metro Division 1	1130 Sixth Street and 624 South Central Avenue	Bus Fleet

3 SITE SETTING

3.1 Topographic

The United States Geological Survey (USGS), [Los Angeles] 7.5 Minute Topographic Quadrangle map of the subject property and surrounding vicinity was reviewed. The elevation of the property is located at approximately 250 feet above mean sea level. The Site and the surrounding topography are relatively flat and slopes gently to the south. A copy of the USGS 7.5 Minute Topographic Quadrangle Map is included in Appendix B.

3.2 Regional Geology and Hydrology

The following description of regional geology and hydrology was developed based on information presented on the Regional Water Quality Control Board's online *Geotracker* database for offsite facilities located in the general vicinity of the subject property.

The subject property is located within the Central Basin of the Coastal Plain of the Los Angeles Groundwater Basin. The Central Basin is overlain by several features including the Downey, Santa Fe Springs, and Bouton Plains. The subject property is located in the northern portion of the Downey Plains. These plains are developed from sediments of the Rio Hondo and Los Angeles Rivers. It extends from the La Brea Plain and Elysian Hills to the north and the Dominguez Gap to the south. To the east, the Downey Plains are bounded to a group of low lying kills and to the west by the Montebello Plain, Whittier Narrows, and Santa Fe Springs Plain. The soil of the Downey Plain reportedly consists of Pleistocene-aged alluvial and marine sediments. These sediments consists of silts, sands, gravels, and clays.

Depth to first encountered groundwater beneath the subject site is approximately 90 to 100 feet below grade surface, with gradient flowing towards the southwest.

3.3 Flood Plain

According to Federal Emergency Management Agency flood plain data presented in the site-specific Environmental Data Resources (EDR) Geocheck Report, the subject property appears to be located outside of the 100-year flood zone and 500-year flood zone (EDR, 2015). The EDR Radius Report is presented as Appendix C.

3.4 Oil and Gas Wells

No oil/gas wells were identified on the subject site. According to the State of California, Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System (DOMS), the nearest well is identified as a "Plugged Dry Hole" located approximately 400 feet east of the

subject site and identified as the Phillips Petroleum Company “Signal-Standard-Exley” 1 (API 03720600). Appendix D presents a screen shot of the online mapping system.

4 USER-PROVIDED INFORMATION

Information obtained during the interview process is presented in the following sections.

4.1 Interview

Due to confidentially requests, Alta did not complete a site user interview. However, this information was identified in several other records.

4.2 Title Records

Title records were not provided by the site user representative. However, the EDR Lien and AUL Search report presented a copy of a Grant Deed for the subject property recorded on June 18, 1998 which grants to Lowe 6th Street Properties, LLC. Appendix E presents the EDR Lien and AUL report.

4.3 Clean-Up Liens

Knowledge of any clean-up liens against the subject site was not disclosed by those interviewed. Further, the EDR Environmental Lien and AUL Search report did not identify any environmental liens for the subject property (Appendix E).

4.4 Activities and Use Limitations

Knowledge of site-specific activities or use limitations were not disclosed by those interviewed. Further, according to the EDR Lien and AUL Search report, no Activity and Use Limitations are identified for the subject property (Appendix E).

4.5 Specialized Knowledge

No specialized knowledge was disclosed by those interviewed during the course of this Phase I investigation.

4.6 Commonly Known Information

No commonly known information was disclosed by those interviewed during the course of this Phase I investigation.

4.7 Previous Environmental Assessments

One previous environmental assessment was provided by Latham and Watkins for review (Appendix F).

Phase I Environmental Site Assessment, ATC Associates Inc., April 25, 2010

According to the provided report, ATC conducted an ASTM E1527-05 compliant Phase I ESA on behalf of Lowe Enterprises Investment Management, Inc. ATC’s report presented the following findings:

- No on-site or off-site RECs potentially affecting the subject property were identified.
- Two 10,000-gallon USTs (1-gasoline, 1-diesel) were reportedly removed from the western area of the subject property in 1990. Soil sampling reportedly identified no detectable concentrations of gasoline, diesel, benzene, toluene, ethylbenzene, or xylenes; however no closure records were identified.
- Progressive Produce, a previous tenant at 1266 East 6th Street, reportedly conducted vehicle maintenance onsite and generated waste halogenated organic compounds.

- Albert's Organics, a former tenant at 1330 East 6th Street, reportedly generated unspecified oil-containing waste.
- Previous asbestos surveys conducted by others identified multiple types of asbestos containing building materials within the subject property.

5 RECORDS REVIEW

Records (e.g. historical, regulatory agency, databases) were reviewed to evaluate possible activities that may have contributed to contamination of soil, groundwater, and/or soil vapor to the subject property.

5.1 Governmental Databases

Alta contracted EDR to perform a radius search of governmental databases for this project. The databases searched, the distances from the subject property, and the number of locations identified in each database is summarized in the table below and the database report is provided in Appendix C.

Database	Target Property	Search Distance (miles)	<1/8	1/8-1/4	1/4-1/2	>1/2	Total Identified

Alta conducted a review of the above-referenced databases and provides the following findings based on sites that have the potential to impact the subject property, with respect to the identified southwest groundwater flow direction (GeoTracker, 2015). Our findings are based on the assumption that a hazardous material released to the subsurface generally does not migrate laterally within unsaturated soil for a significant distance. Although a hazardous material can migrate in groundwater in a generally down-gradient direction, there are limitations to this interpretation such as groundwater depth, soil lithology and other subsurface barriers.

5.1.1 Subject Property Database Findings

According to EDR, the subject property is listed on a variety of the above-referenced databases, including the Resource Conservation and Recovery Act – Small Quantity Generators (RCRA-SQG), California's Facility Inventory Database for Underground Storage Tanks (CA FID UST), Historical Underground Storage Tanks (HIST UST), Statewide Environmental Evaluation and Planning System Underground Storage Tanks (SWEEPS UST), Resource Conservation and Recovery Act Non-Generators (RCRA NonGen), Facility Index System Data Systems (FINDS), and Emissions Inventory Data (EMI) databases. These database entries do not in and of themselves indicate potential environmental concerns for the property.

The UST databases identified two underground-storage tanks, one containing diesel (10,000-gal capacity) and one containing regular-unleaded fuel (no capacity listed). The history, year of installment, or current status of these tanks are unknown. No indications of unauthorized releases were identified by the database review.

5.1.2 Adjoining Property Database Findings

Aesthetic Frame Design – 1275 East 6th Street, Los Angeles, CA

This facility is located approximately 100 feet north and cross-gradient of the subject property, with respect to ground water flow direction. According to EDR, this facility is listed on the RCRA-SQG database for the generation of small quantities (generating more than 100 kilograms (kg), but less than 1,000 kg during a calendar month) of hazardous wastes. This facility was reported to recycle organic solids (1997) and dispose halogenated solvents at a transfer station (1993). No violations related to the generation of these wastes were reported. Based on this information, this facility is not considered an off-site environmental concern at this time.

Metro Division 1 Maintenance Facility – 1130 East 6th Street, Los Angeles, CA

This facility is located approximately 100 feet west and down to cross-gradient of the subject property, with respect to ground water flow direction. According to EDR, this facility is listed on the LUST, CA FID UST, and CA WDS databases. According to the LUST records, this property is a LUST Cleanup Site with a current status of "Open – Site Assessment" as of December 4, 2014. Records presented on the Geotracker database for this facility identify that reportedly limited petroleum hydrocarbons were released to the subsurface sometime prior to 2006. Since that time, various investigations and soil-vapor extraction events have occurred. A Los Angeles Regional Water Quality Control Board *Checklist to Closure* identified that, while the site does meet the *Low-threat Closure Policy* requirements, the case should be kept open until receipt of previous UST removal reports are submitted. Based on this information, this facility is not considered an off-site environmental concern at this time.

RTD Division 1 -Alameda – 624 S Central Avenue, Los Angeles, CA

This facility is believed to be same as the facility Division 1 –Alameda (1016 E Sixth Street) due to location, similarities of the facility name, and USTs listed. Additionally, there are three facilities with the same reported address as RTD Division 1-Alameda. These facilities are MTA, Southern California Rapid Transit District, and LA MTA Division 1. According to EDR, this property is listed on SWEEPS UST, UST, and LUST lists.

According to the SWEEPS UST records, there are fourteen (14) active underground-storage tanks. There were reportedly three diesel (two 10,000-gal, one 280-gal), one regular unleaded (10,000-gal), one waste oil (10,000-gal), one chemical use with unknown content (10,000-gal), and eight unknown use with unknown content tanks. The installation year, current status, or history of these tanks are not reported.

According to the LUST listings, there was a reported leaking underground-storage tanks. A leaking gasoline tank was discovered in 1986. The agencies of California Regional Water Quality Control Board and City of Los Angeles provided oversight of remediation activities. The impacted soil was excavated and disposed. The case was completed and closed in 1997. Based on identified fourteen USTs and former LUST not being upgradient of the site, this facility is not considered an off-site environmental concern at this time.

Metropolitan Distribution Centers – 1340 East 6th Street

This facility is located approximately 70 feet to the east and up-gradient of the subject of the subject property, with respect to groundwater flow direction. According to EDR, this facility was identified on the RCRA-NonGen, FINDS, CA FID UST, HIST UST, and SWEEPS UST databases. Based on records reviewed, there are four underground-storage tanks associated with this facility: a 10,000 gallon diesel UST, a 7,500 gallon diesel UST and two 300 gallon USTs listed as *Product*. These tanks were installed in 1970, with the exception of the 7,500-gallon tank which was installed in 1969. This facility is not list on the LUST database or on the Geotracker database, and no other records or other indications of potential

unauthorized releases or spills associated with the USTs have been identified. Based on this information, this facility is not considered a potential off-site environmental concern.

5.1.3 General Vicinity Database Findings

EDR identified a number of properties within the ASTM recommended approximate minimum search distance (AMSD) in the regulatory databases searched. Several of these listings (e.g., hazardous waste generators and registered USTs) by themselves are not necessarily indicative of an environmental concern and are therefore, not discussed herein. A number of sites appear on databases indicative of potential contamination concerns (e.g., LUST, Cortese, and EDR Historical Auto Service Stations, CORRACTS). Of these latter facilities, only the locations close enough (within 1/8 mile) to, or up-gradient of the subject property that require further scrutiny are discussed below.

M R Baker 601 - South Central Avenue, Los Angeles, CA

This property is located approximately 900 feet to the northwest and cross-gradient of the subject property, with respect to groundwater flow direction. According to EDR, this property is listed on the EDR Historical Auto Stations in 1937 as Gasoline and Oil Services. Based on the location and groundwater flow direction, this facility is not considered a significant environmental concern for the subject site.

Newman Bros Inc – 1387 East Seventh Street, Los Angeles, CA

This property is located approximately 600 feet to the southwest and down-gradient of the subject property, with respect to groundwater flow direction. According to EDR, this property is listed on the EDR Historical Auto Stations in 1942 as Gasoline and Oil Services. Based on the location and groundwater flow direction, this facility is not considered a significant environmental concern for the subject site.

Former Texaco Truck Stop – 1345 East Seventh Street, Los Angeles, CA

This property is located approximately 600 feet to the southwest and down-gradient of the subject property, with respect to groundwater flow direction. According to EDR, this property is listed on the HIST CORTESE and LUST. In 1992, a leak from an underground-storage tank was discovered. The potential media affected was the aquifer used for drinking water supply by non-petroleum hydrocarbon and other solvents. The agencies of California Regional Water Quality Control Board and City of Los Angeles overviewed the cleanup of this property. In 1998, the cleanup was completed and closed. Based on the location, groundwater flow direction, and status of the property, this facility is not considered a significant environmental concern for the subject site.

5.2 Regional Agency Offices

Alta submitted information requests to the various county and regional agencies that may have records with regard to environmentally-oriented concerns affecting the subject site, in accordance with ASTM E1527-13 requirements. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Department of Building and Safety, State of California Office of Environmental Health and Safety (OEHHA), and Los Angeles County Sanitation District. Should significant records be identified at a later date, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the records review is not expected to indicate additional environmental concerns. Appendix D presents the results of the agency requests.

Agency	Records Summary
Los Angeles County Public Health Investigation (PHI)	No records found

Agency	Records Summary
Division of Oil, Gas, and Geothermal Resources – DOMS	No oil or gas wells were identified within the subject property boundary. The nearest well identified is located approximately 400 feet east and identified from the Phillips Petroleum Company.
Regional Water Quality Control Board – GEOTRACKER	Subject Property No records found Adjacent Properties LA MTA Division 1 (624 S Central Avenue). LUST Cleanup Site. Cleanup Status is Completed – Case Closed. Metro Division 1 Maintenance Facility (1130 East 6th Street). LUST Cleanup Site. Cleanup Status is Open-Site Assessment.
Department of Toxic Substances Control – ENVIROSTOR	Subject Property No records found Adjacent Properties No records found
Los Angeles Department of Building and Safety	No response as of report date
Los Angeles Fire Department (LAFD)	Subject Property Accidental spill of approx. 2-5 gal of Tsunami Liquid 100 (31% Acetic Acid, 11% Peroxide, 15% Peroxy Acetate) at 1205 Wholesale Street, Los Angeles. Confined to property. This accidental is spill is considered a de minimis condition.

Agency	Records Summary
South Coast AQMD – FINDS	<u>Subject Property</u> American Produce (1321 Wholesale Street) • Permit to Operate – Banana Ripening Rooms. Active permit. No violations reported. No staining or evidence of release from chemical used to ripen bananas. Chiquita (1321 Wholesale Street) • Permit to Operate – Fruit and Veg Treating. Active permit. No violations reported. No staining or evidence of release from chemical used to ripen fruit and veg. LA Times (1321 Wholesale Street) • Permit to Operate – Spray Paint Booth. Inactive permit. No violations reported. No evidence of paint stains of indications of former location of spray paint booth were observed. Astro Food Service (1211 Wholesale Street) • No Permits/Equipment Listed Harvest Sensation (1205 Wholesale Street) • Plans & Excavation Progressive Produce Co (1266 East Sixth Street) • Permit to Operate – Gasoline Fueling & Dispensing Facility. Inactive Permit. No violations reported. As reported in ATC Phase I EST (2010), former USTs were removed in 1990. Closure letters were not found. <u>Adjacent Properties</u> Aesthetic Frame Design (1275 E Sixth Street) • No Permits/Equipment Listed Metropolitan Distribution Center (1130 E Sixth Street) • Permit to Operate – ICE (>500 HP) EM Elec Gen Diesel. Agency	Records Summary
Los Angeles County Sanitation District	No response as of report date

5.3 Historical Aerial Photographs

Sixteen historical aerial photographs of the property and surrounding area (from 1923 through 2012) were reviewed. The aerial photographs are presented in Appendix G, and summarized below.

Date	Description
1923	The subject property consists of three warehouse buildings along the northern portion, railroad spurs within the middle section, and large warehouse buildings along the southern portion. The subject property is bound to the north by East 6th Street, to the west by South Alameda Street, to the south by Wholesale Street, and to the east by Mill Street. The adjacent northern property is developed with several industrial buildings. A railroad lines appear to be located to the northwest. The western adjacent property is developed with multiple elongated buildings. The southern adjacent property contains multiple buildings. To the east, the adjacent property contains multiple elongated buildings. To the northeast, there are several aboveground-storage tanks.
1928	The subject property appears to be similar to the 1923 aerial photograph. The eastern adjacent property is becoming more developed with buildings. The surrounding areas also are developing with commercial/industrial buildings.
1938	The subject property appears to be similar to the 1928 aerial photograph. The southern adjacent property appears to be developed and similar to present day configuration.
1948	The subject property appears to be similar to the 1938 aerial photograph. The western adjacent property has redeveloped several buildings.
1952	The subject property appears to be developed with an additional building along the southern boundary on the western side. The surrounding areas appear to developing.
1964, 1972	The subject property now contains two larger, elongated buildings along the northern and central portion. To the northwest, a large commercial building has been developed. The western adjacent property now contains a large building with several rectangular containers The southern portion appears to be similar to the 1952 aerial photograph. The eastern adjacent property is developed and appears to be similar to the present day configuration. To the northeast, there appears to be several buildings.
1977, 1983	On the subject property, the two elongated building appear to be connected along the northern portion. Along the southern portion, a large commercial building has been developed. The subject property appears to be similar to the present day configuration.
1989	The subject property has appears to be similar. The northern and western adjacent properties have been developed and appear to be similar to present day configuration.
1994, 2002, 2005, 2009, 2010, 2012	The subject property and surrounding areas appear similar to the 1989 aerial photograph.

5.4 Historical Topographic Maps

Eleven historical topographic maps of the property and surrounding area from 1896 through 1994 were reviewed (Appendix B).

Date	Description
1896, 1900, 1901	The subject property and site vicinity are depicted as undeveloped land. Surrounding areas are developing.
1928	Four buildings and railroad lines on the subject property are depicted.
1953	The subject property appear to have railroad lines. To the northeast, there are two aboveground-storage tanks.
1966, 1972, 1981, 1994	The subject property to be similar to the 1953 topographic map. The oil tanks to the northwest do not exist.

5.5 Historical City Directory

Alta Environmental contracted EDR to conduct a search for historical city directory information for the subject site and general vicinity. In accordance with ASTM E1527-13, only those properties which are likely to indicate significant environmental concern for the subject property are discussed. The EDR City Directory report is presented in Appendix H and summarized in the following table.

Date	Description
Subject Property	
1338 East 6th Street	
2013	Always Fresh Trading Inc, KC Produce Corp
2008, 2006	AJ International Inc, Angelina's Freight, P & G Food Inc
2000	United Distributors
1981	Veltman Terminal Co Distribution
1971, 1967	Ben Carlip Juvni furniture & toys
1942	Greenberg restaurant
1937	Ripley restaurant
1334 East 6th Street	
2000	BTL Jordon Produce, E & T Produce Co, CA Watercress Inc
1330 East 6th Street	
1990	Miller Ed Co In
1326 East 6th Street	
1937	California cutting Die Works
1929	Excel Lite Mfg & Sales Co
1924	Sunset Mfg Co
1324 East 6th Street	
1924	Gaylord Chase H & CO
1322 East 6th Street	

Date	Description
1937	Pasadena Sanitary Products Co janitor supply
1933	Starr Wallace J Elzora steelwork
1929	Gordon Machinery & Manufacturing Co
1924	Salins Bros
1320 East 6th Street	
2013	Alberts Organics, Valley Fruit & Produce Company
2006	Alberts, Anco Fine Cheese
1318 East 6th Street	
1971	Mutual Wholesale Liquor
1942	Enns Arth D Ruby refrigerators
1937	Jones Geo trucking
1933	Industrial Products Co
1314 East 6th Street	
1933-1924	Duggan & Son CE and JJ truck manufacture
1268 East 6th Street	
2013	Kenny's Produce
2008	Green West Farm Inc
1266 East 6th Street	
2013	Asian Fresh Produce
2006	Hop Fu Produce
1206 East 6th Street	
2008	Garfield Produce Distributions, Artainable Cuisine, Farmer Brothers Co
2006	Artainable Cuisine, Garfield Produce & Heath
1967	Morton Salt Co, Simoniz Co
1957-1960	Butane Carburetor Service
1205 Wholesale Street	
2008-2013	ProAct Specialties
1211 Wholesale Street	
2008-2013	Astro Food Services
1219 Wholesale Street	
2008-2013	Eureka Specialties
1221 Wholesale Street	
2006	Apparel Inc, Sweet People
1311 Wholesale Street	
2008-2013	K & C Specialties
1321 Wholesale Street	
2013	American Produce Co
2008	Seashore West Inc

Date	Description
2006	Produce West, Seashore Fruit, Tom E Produce
Neighboring Properties	
1275 East 6th Street	
1991	Aesthetic Frame Design
1958-1967	Gold Manor Upholstery Mfg corp
1281 East 6th Street	
2006-2013	Alltronics
1958-1980	Three Star Smoked Fish Co Inc
1313 East 6th Street	
1975-1995	Madell & Co Inc Derail
1958	Affiliated metals & Supply Co
1340 East 6th Street	
2013	Western Imperial 2000
1967	Malmstrom Chemical Corp, Metropolitan Warehouse Co, Van Straaten Chemical Co
1965-1966	Nixon Baldwin Chemicals Inc
1962	Reminton Rand Division of Sperry Rand Corporation machine service
1958	Hall C P Co of California chemicals

5.6 Sanborn Fire Insurance Maps

Alta contracted EDR to provide available Sanborn Fire Insurance Maps. Twenty historical Sanborn maps of the property and surrounding area from 1894 through 1970 were reviewed (Appendix B).

Date	Description
1894	Subject Property In this Sanborn Map, only the western portion of the subject property is shown. The northern portion contains Willamette Steam and Lumber Mill with the lumber yard. South of the lumber yard/mill, there is an athletic park which contains a baseball ground and grandstand. Adjacent Properties To the north across East 6th Street, the lumber yard/mill is continued from the subject property. To the west at the intersection of South Alameda Street and East 6th Street, there is Los Angeles Consolidated Electrical Railroad Plant. The plant had contained a paint shop, tanks, and a car shed. The eastern adjacent properties are not depicted.
1900	Subject Property In this Sanborn Map, the subject property is not depicted. Adjacent Properties To the west across at the intersection of South Alameda Street and Wilde Street, there is a car house for Los Angeles Railroad Company

Date	Description
1906	Subject Property The northern portion contains L.W. Blinn Lumber Co., Consolidated Lumber Co, Eureka Planning Mill, and Western Planning Mill. The southern portion is undeveloped along western side. The southeastern portion of the property is developed with a warehouse which is used by Commercial Warehouse Company. Adjacent Properties To the north across East 6th Street, the lumber yard/mill is continued from the subject property. To the west at the intersection of South Alameda Street and East 6th Street, the Los Angeles Railroad Company has expanded. There is a power house that contains several generators, two fuel oil ASTs (7,500 BBLS each), frame cooling tower, and oil storage area. Additionally, there is a large area used as the car barn. To the south across from the railroad line, there are several buildings occupied by the Union Ice Company and two buildings used for concrete storage. To the east across Mill Street, there is a lumber yard/mill with a building on the northern portion.
1920	Subject Property In this Sanborn Map, the subject property is not depicted. Adjacent Properties To the west across at the intersection of South Alameda Street and Wilde Street is similar to the 1906 Sanborn Map.
1950, 1953, 1954, 1959, 1960	Subject Property The northern portion of the property is developed with a long, multi-tenant warehouse. These tenants include several machine shops (1950-1960 Sanborn maps). The northern central portion includes railroad lines. The southern central portion is developed with two long, multi-tenant warehouses. The western warehouse is occupied by Building Material Warehouse. The eastern warehouse is occupied by several storage tenants including a chemical manufacturer (1950, 1953 Sanborn maps). The southern portion contains a building by LA Union Terminal used as a production dock on the western side. Along the eastern side, a multi-tenant warehouse is developed. These tenants include California Warehouse Storage, Union Terminal Warehouse, and various other storage companies. Adjacent Properties To the north across East 6th Street, there are several stores. Further north is the L.A. Bureau of Power & Light. To the west at the intersection of South Alameda Street and East 6th Street, now there is Los Angeles Transit Lines. The northern portion of this facility contains a car yard with a spray paint booth. The central potion contains the trolley coach service buildings for Los Angeles Transit Lines, 1st Division. The southern portion contains the generators and car barn. In 1954, the generators have been removed. In 1960, the car barn has been replaced with truck and trailer parking lot. To the south across from the railroad lines, there are buildings occupied by the Union Ice Company and various warehouses. Further south, there is a chemical solution warehouse and service station. To the east across Mill Street, there is the Metropolitan Warehouse building.

Date	Description
1967	Subject Property The northern portion of the property is developed with two long multi-tenant warehouses. These tenants includes multiple machine shops, various produce storage, and refrigeration. The central portion is developed with two large buildings and railroad lines. The southern portion still contains a building by LA Union Terminal and a multi-tenant warehouse. Adjacent Properties To the north across East 6th Street, there are several commercial and industrial buildings, which include two chemical warehouses. To the northwest, there is an auto repair shop and service station. To the west of South Alameda Street, there is the Los Angeles Metropolitan Transit Authority Division No 1. The northern portion contains the bus service and bus yard. The central portion contains a service building. The southern portion contains truck and trailer parking. To the south of the railroad lines, there are buildings occupied by the Union Ice Company and various warehouses
1970	Subject Property The northern portion of the property is developed with two long warehouses which are used for storage. The central portion is developed with two large buildings and railroad tracks. The southwestern portion still contains a building used by LA Union Terminal and the. The southeastern portion contains a warehouse used by Metropolitan Warehouse Company, Southern Pacific, and The California Warehouse Storage. Adjacent Properties The adjacent properties are similar to the 1967 Sanborn Map.

6 FINDINGS

Alta Environmental has performed a Phase I Environmental Site Assessment for the subject property in conformance with the scope and limitations of ASTM Practice E 1527. Based on the site reconnaissance, review of historical and available documents, and interviews, Alta finds the following:

6.1 Current Site Activities

At the time of our site visit, the subject property contains two elongated, multi-tenant warehouses. These warehouses store, package, and ship produce such as fruit, vegetables, and flowers. Semi-truckers were constantly loading and unloading produce to various tenants throughout the day.

6.2 Historical Site Activities

Based on earliest records reviewed, the subject property contained a lumberyard/mill on the northern portion of the property. Beginning in the 1900s, development of buildings began along the southern portion. In the late 1900s, the northern portion was developed with a long warehouse. During the 1920s and 1940s, several smaller structures were built. In the late 1940s to early 1950s, several multi-tenant warehouse structures were developed. Among these tenants included machine shops and a chemical manufacturer. In the early 1960s, the current building on the northern portion was developed. The current building along the southern portion was constructed in the early 1970s.

Additionally, ATC Associates had reviewed historical building permits. The permits stated on-site USTs associated with the former tenant (Progressive Produce) were removed in 1990 and that no impacted soil was identified (ATC, 2010). The site is not listed on the LUST database.

6.3 Off-Site Activities

Current off-site activities include a variety of commercial and industrial uses, including artist studios, wholesale produce businesses, general retail, film industry, door manufacturing, and city and regional bus fleet maintenance.

Of these adjacent properties, several off-site properties were identified as potential environmental concerns. However, based on our review of available records, identified groundwater flow direction, and/or distances relative to the subject property for these identified sites, it is unlikely that soil, groundwater, and/or soil vapor contamination would occur at the subject property specifically due to these identified sites.

6.4 Data-Gaps

The ASTM Standard defines a data gap as “a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information.” A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Department of Building and Safety, State of California Office of Environmental Health and Safety (OEHHA), and Los Angeles County Sanitation District. Additionally, responses the User Questionnaire was not obtained from the current site user. However these data gaps are not considered significant, as related information was reviewed from other additional sources.

7 CONCLUSIONS

Alta Environmental (“Alta”) completed a Phase I Environmental Site Assessment (ESA) of the subject site located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street, in Los Angeles, California (Site). The ESA was performed in conformance with the scope and limitations of ASTM E1527-13 and AAI standards. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. The assessment was performed to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject site.

The subject property is located in an industrial/ commercial area and has been developed at least since 1894. Based on the review of historical records, Site reconnaissance, groundwater flow and direction, and the previous Phase I ESA, we conclude that there is no evidence of current or historical RECs or Controlled RECs in connection with the subject property.

8 QUALIFICATIONS AND SIGNATURE

I declare that, I, Mike Cassidy, to the best of my professional knowledge and belief, meet the definition of Environmental professional as defined in 40 CFR 312.10. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mike Cassidy, PG
Vice President, Site Assessment & Remediation
Branch Manager, Irvine Office

Resume and other supporting documentation are maintained on file at Alta.

Hazardous Waste Disposal:			
Reason for Performing ESA	Part of EIR process per CEQA		

Are you aware of any environmental liens that have been filed or recorded under Federal State, local or tribal law? If yes provide details.

□ Yes ☒ No

Are you aware of any activity or land use limitations (AULs), engineering controls or land use limitations that have been filed or recorded under Federal, State, Local or Tribal Law? If yes, provide details.

□ Yes ☒ No

Do you have any specialized knowledge of the property or experience related to the subject property or nearby properties so that you would have knowledge of chemicals or processes used at the property? If yes, provide details.

□ Yes ☒ No

Is the acquisition price differing from the fair market value of the property?
☒ Yes ☐ No
If there is a difference, have you considered a lower price is due to contamination known or believed to be present at the property? Please provide details.
☐ Yes ☒ No
Property was acquired in March of 2015, property values in the Arts District have risen since the acquisition.

As the user of this ESA, based on your knowledge and experience with the property, are there any obvious indications of the presence or likely presence of contamination at the property? If yes, provide details.
☐ Yes ☒ No

Are you aware of any information that would help the environmental professional identify conditions indicative of releases or potential releases, including past uses of the property, uses of chemicals at the property, or environmental cleanups that have taken place at the property? If yes, provide details.
☐ Yes ☒ No

Do you know of any pending, past or threatened litigation or administrative proceedings related to hazardous substances or petroleum products on, in or from the property or any notices regarding possible violations of environmental laws or possible liability related to hazardous substances or petroleum products? If yes, provide details.
☐ Yes ☒ No

Are there any chemical storage areas or hazardous material storage areas located at the subject property?
If yes, provide details.
☐ Yes ☒ No

Are there any current or historical Aboveground Storage Tanks or Underground Storage Tanks?
If yes, provide details.
☐ Yes ☒ No

Are there any current or historical wastewater treatment systems, clarifier/interceptor systems, or grease trap systems associated with the subject property? If yes, provide details.

☐ Yes ☒ No

Are you aware of the existence or location of the following documents related to the subject property, and if yes, can copies be made available for review by the Environmental Professional?

☒ Previous Environmental Site Assessment reports or Investigation reports
☐ Environmental Permits
☐ Registrations for underground storage tanks (USTs)
☐ Spill Prevention Containment and Contingency Plans (SPCC)
☐ Stormwater Pollution Prevention Plans (SWPPP)
☐ Risk Assessments
☐ Hydrogeologic Reports related to the property or surrounding area
☐ Notices of Violation from governmental agencies regarding past or current violations of environmental laws or related to environmental liens encumbering the property
☐ Hazardous waste manifests or generation reports
☐ Recorded land and activity use limitations
☒ Geotechnical Studies

Subject: Methane Gas Screening Survey Report
Sixth and Alameda LLC Development Site
1206-1338 East 6th Street and 1205-1321 Wholesale Street
Los Angeles, California

INTRODUCTION

Leighton and Associates, Inc. (Leighton) is pleased to present Sixth and Alameda LLC (6AM) this report summarizing the results of a methane gas screening survey for the property located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street in the City of Los Angeles, California (the Site or subject property) (Figure 1). The Site is located within the City of Los Angeles Methane Buffer Zone based on the City of Los Angeles, Department of Building and Safety (LADBS), Methane and Methane Buffer Zones Map. Leighton understands that 6AM intends to develop the site into a mixed-use residential and commercial property with multi-level subterranean parking.

The methane gas screening survey was completed to comply with the site testing requirements established in the LADBS *Site Testing Standards for Methane* (January 1, 2004; Document Number: P/BC 2014-101) (hereinafter, the LADBS Methane Standard). The LADBS Methane Standard establishes the standard protocol for site testing that provides design input data for methane mitigation systems required by Division 71 of the Los Angeles Building Code. Appendix A presents a list of the References reviewed for this report.

SITE DESCRIPTION

The Site is an approximately 14.57-acre property located southeast of the intersection of East 6th Street and South Alameda Street, at the addresses of 1206 through 1338 East 6th Street and 1205 through 1338 Wholesale Street in Los Angeles, California. The Los Angeles County Assessor's Office designates the Site as Assessor Identification Numbers (AINs) 5164-010-003, 5164-010-004, and 5164-010-005. The Site is developed with two east-west oriented and elongate rectangular warehouse buildings that are primarily occupied by tenants in the produce distribution industry. The buildings house multiple truck loading docks, and have a combined area of approximately 287,376 square feet. The existing buildings are surrounded by loading zones and paved parking areas.

6AM's planned redevelopment project will include 1,305 apartments, 431 condominiums, 412 hotel rooms, 250,000 square feet of offices, 23,000 square feet of gallery space, 128,000 square feet of shops and restaurants, as well as a school. Six 110-foot concrete structures are proposed for the eastern portion of the property and will be arranged in rows to mimic the industrial setting of the Los Angeles Arts District. The project will also include two 58-story towers on the western portion of the Site. Subterranean parking at the site will be constructed at five levels which will involve the removal of soils beneath the construction areas. The methane gas screening survey was designed to address the LADBS sampling requirements for methane based on the depth of each proposed parking level. In effect, the LADBS requires sampling for methane gas at depths 5 feet, 10 feet, and 20 feet beneath the base of the parking structure slabs. Figure 2 displays the multiple methane gas sampling locations at varying depths based on the 6AM projected parking level depths.

LADBS METHANE STANDARD TESTING REQUIREMENTS

The LADBS Methane Standard requires methane gas concentrations and pressure measurements for the gas probe tests. These include the following:

- There shall be at least one soil gas probes that for every 20,000 ft.^{2} or portion thereof of site area. Regardless of the area, all sites shall install a minimum of two gas probe sets.

- The site area of very large sites may be calculated as the area of the building footprint plus the area within 100 feet of the building perimeter.

- Each gas probes that shall consist of three probes, installed at approximate sampling depth of 5 feet, 10 feet, and 20 feet below the elevation of the lowest building slab or footing. Figure 2 shows the boring locations where the soil gas probe sets (i.e., three nested soil gas probes) were installed.

- Gas probe sets shall be installed a minimum of 12 inches above the groundwater level. Gas probe sets are not required to be installed below the ground water level.

- As it relates to recording methane and gas pressure data, the LADBS requires two sequential measurements taken with a minimum of 24-hour interval following placement of the gas probe sets. Soil gas samples shall not be collected during increasing barometric pressure from a pre-frontal weather condition.

- Site testing data shall be recorded on Form 1 - Certificate of Compliance for Methane Test Data and stamped by the California Professional Geologist or Engineer.

INVESTIGATIVE METHODOLOGY

The investigative methodology for the methane survey was developed to comply with the LADBS Methane Standard and included, and was limited to, the activities summarized below.

Pre-field Activities

Health and Safety Plan

A Site Specific Health and Safety Plan (HSP) was prepared for work performed at the Site. All onsite Leighton personnel signed the HSP acknowledging acceptance. The document was kept onsite at all times during the field activities. The HSP was prepared in compliance with the Occupational Safety and Health Administration (OSHA) Chapter 29 of the Code of Federal Regulations (29 CFR) 1910.120.

Underground Services Alert Notification and Private Subsurface Utility Survey

Underground Service Alert (USA; aka DigAlert) was contacted 48 hours prior to commencement of fieldwork to mark the location of public utilities that may enter the Site from nearby streets or public right-of-ways. The proposed boring locations were clearly marked in white paint prior to contacting USA. In addition, Spectrum Geophysics conducted a geophysical utility survey of the project area on August 3, 2017 to evaluate

for the presence of private subsurface utilities, anomalies, or structures near the proposed boring locations. The utility survey included the use of a Vivax transmitter with matched receiver, Schonstedt Mac Series hand-held magnetometer, Fisher TW-6 M-Scope shallow focus metal detector, Dynatel 500 Series transmitter with matched receiver, and a Noggin Cart Ground Penetrating Radar (GPR) unit. Systematic traverses with the aforementioned instruments were conducted to delineate the presence of detectable underground utilities in the vicinity of proposed boreholes. The findings of the survey were marked on the ground surface with paint. Boring locations that conflicted with underground utilities were relocated nearby. No utilities were encountered during the drilling associated with the methane survey.

Field Activities

Multi-Nested Soil Gas Probe Installation

Gas probe sets (hereinafter, multi-nested soil gas probes) at three depths were installed in 35 soil borings at the Site. As shown on Figure 2 and in accordance with LADBS requirements, the 35 soil borings were drilled based on the projected depths for the 6AM subterranean parking structure building slabs. Information provided by 6AM indicated that five different levels would be required for the subterranean parking structure. Accordingly and in accordance with LADBS requirements, the gas probes installed to evaluate for the presence of methane were required to be installed at depths of 5 feet, 10 feet, and 20 feet below the slab or mat footing. The depth of the nested probe installations ranged from 58 feet bgs to 93 feet bgs at the locations depicted on Figure 2.

The borings were advanced by BC2 Environmental using a truck-mounted roto-sonic drilling rig. Between August 16, 2017 and September 21, 2017, multi-nested soil gas probes B1 through B35, each containing three individual soil gas probes, were installed at the locations shown on Figure 2. The following table reflects the methane gas sampling approach recommended in the LADBS Methane Standard and presents the rationale for the probe installation depths and adjustments based on subsurface conditions encountered during drilling:

Boring/Probe ID	Nested Soil Gas Probe Sampling Depths	Rationale for Soil Gas Probe Sampling Depths
B1, B2, B11, B12, and B13	58, 63, and 73 feet bgs	Base of mat footing is 53 feet bgs
B14, and B27	63, 68, and 78 feet bgs	Base of mat footing is 58 feet bgs
B23 and B25	78, 83, and 93 feet bgs	Base of mat footing is 73 feet bgs
B4, B15, B16, B28, B29, B8, B9, B10, B20, B21, B22, B33, B34, and B35	43, 48 and 58 feet bgs	Base of mat footing is 38 feet bgs
B5, B6, B7, B17, B19, B30, B31, and B32	53, 58 and 68 feet bgs	Base of mat footing is 48 feet bgs
B3	63, 68, and 84 feet bgs	Fine-grained soil encountered at proposed sampling depth of 78 feet bgs
B18	53, 63, and 68 feet bgs	Fine-grained soil encountered at proposed sampling depth of 58 feet bgs
B24	78, 86, and 93 feet bgs	Fine-grained soil encountered at proposed sampling depth of 83 feet bgs
B26	52, 57,and 67 feet bgs	Perched/localized groundwater encountered at 73 feet bgs

The soil gas probes were constructed of ¼-inch Teflon tubing with a 1-inch polypropylene airstone implant at the terminus and a 3-way valve connected to the tubing at the surface. The probe implants were installed within 1 foot of clean sand at the target sampling depth within the 6-inch diameter borehole. One foot of dry granular bentonite was placed above the sand layer and 6 inches of hydrated bentonite was placed above the dry bentonite, with bentonite grout backfilled above the hydrated bentonite to the bottom of the next sand layer, repeating to the surface. Although the LADBS Methane Standard allows for the annular space in the boring to be backfilled with native soil, bentonite grout was used due to the quantity of gravel and cobbles present in the soil cuttings that could have increased the potential for bridging or voids within the annular space. The prevalence of gravelly/cobbly coarse-grained soils beneath the Site required the use of a rotosonic drilling rig to complete the soil gas probe installation, and as a result of the drilling methodology, the soil gas probes were allowed to equilibrate with existing soil conditions for a minimum of one week prior to sampling for methane gas. The locations of the soil gas probes are shown on Figure 2, and an example construction of the soil gas probes is presented in Figure 3.

Methane Gas Survey

The soil gas probes were installed and sampled in general conformance with the "*Advisory - Active Soil Gas Investigations*," published by the California Environmental Protection Agency DTSC (DTSC, July 2015). As noted in the section above, the soil gas probes were allowed to equilibrate for a minimum of one week before sampling.

Field Monitoring Instruments: Soil gas probes were monitored for the potential presence of methane and probe pressure during these events by Leighton using a hand-held, LandTec™ gas monitoring instrument Model GEM 2000+™ (GEM). The GEM has a minimum gas detection limit of 0.1 percent (%) and is equipped with a barometric pressure sensor with a pressure accuracy of approximately 5 millibars which is equivalent to 0.15 inches of mercury. The GEM was calibrated to a 15.0% (150,000 parts per million by volume [ppmv]) methane gas standard in the field prior to use. The GEM readings can be influenced by other hydrocarbon gases present within the sample (e.g., ethane, propane, butane, etc.). Page 12 of the GEM manual (LandTec™, 2010) notes "…*If there are other hydrocarbons present, the Methane reading will be higher (never lower) than the actual Methane concentration being monitored*."

At each soil gas probe, differential soil gas pressure readings were obtained in the field using a Dwyer Series 475 Mark III digital manometer (0-20 inches of water column) prior to testing. Additionally, barometric pressure readings were noted at each nested probe location prior to monitoring using the GEM. At each soil gas probe location and in accordance with the LADBS Methane Standard, the same methane monitoring methodology was repeated a minimum of 24 hours after the initial measurement. A summary of the field measurements is presented in Table 1 and in the Investigative Results section of this report.

Soil Gas Monitoring and Sampling Procedures: Prior to monitoring and sampling, an electric vacuum pump (set to draw 0.200 liters/min of soil gas at a maximum vacuum of 100-inches of water) was attached to the probe and at least three volumes were purged from each soil gas probe. Soil gas measured with the GEM from the probes which indicated possible methane gas concentrations above 0.0% volume were subsequently sampled and analytically tested for the presence of methane by using a fixed laboratory. The soil gas samples were obtained by drawing the sample through a Luer lock connection into an air-tight glass syringe, which was then transferred into a Tedlar bag for sample containment pending transport to the analytical laboratory.

Laboratory Analyses

An ELAP-certified analytical laboratory (Jones Environmental, Inc., Santa Fe Springs, CA) conducted soil gas sample analysis for methane from the Tedlar bags by using method ASTM D1946. The soil gas samples were analyzed within 6 hours of the collection time. Soil gas samples were collected for methane analysis from the following thirteen (13) probes which exhibited instrument response for possible methane above 0.0% volume:

- Probes B2 and B29 (each at 58 feet bgs),
- Probe B3 (at 63 feet, 68 feet, and 84 feet bgs),
- Probes B8 and B9 (each at 43 feet, 48 feet, and 58 feet bgs), and
- Probe B34 (at 48 feet and 58 feet bgs).

The soil gas samples collected from the three nested probes from probe B3 were also analyzed for volatile organic compounds (VOCs) by US EPA Method 8260B. This was performed after the laboratory reported that no methane was detected in the original sample. A summary of the analytical testing results is presented in the Investigative Results section of this report, and copies of the laboratory analytical reports and chain-of custody documentation are presented in Appendix B.

Investigation-Derived Wastes (IDW)

Fifty-six 55-gallon drums containing soil cuttings were produced during drilling activities that were completed between August 16, 2017 and September 21, 2017. All 56 drums were properly labeled, sealed and stored in a secure area designated by the property manager. On November 29, 2017, the 56 drums were removed by American Integrated Services, Inc. (AIS) and temporarily transferred to their storage yard on 30440 Agoura Road in Agoura Hills, California. On December 22, 2017, the drums were transported by AIS to the Soil Safe of California thermal desorption facility located at 12328 Hibiscus Avenue in Adelanto, California. Prior to removal of the drums, AIS collected soil samples from the drums for laboratory profiling purposes and submitted the soil samples to A & R Laboratories In Ontario, California (Appendix C). AIS noted in a November 27, 2017 email that the drummed soil cuttings would be managed as Nonhazardous Waste (Appendix C). AIS provided manifests documenting that the drummed soil cuttings were transported to their storage facility and subsequently transported and treated at the Soil Safe of California facility (Appendix D).

INVESTIGATIVE RESULTS

Geologic and Hydrogeologic Conditions

Soils encountered during the investigation consisted primarily of gravelly sands with some interbedded silty sand, fine to coarse grained sand and trace clay. Stained or odorous soil was not observed or noted. During boring advancement, boring B30 was moved approximately four feet northwest due to refusal encountered at the original B30 location at 4 feet bgs.

No groundwater was encountered in 34 of the 35 boring locations; however, perched groundwater was encountered at a depth of 73 feet bgs in Boring B26. To avoid installing the probes below the perched groundwater in Boring 26, the nested soil gas probes were installed at depths of 67 feet bgs, 57 feet bgs, and 52 feet bgs. Leighton researched records for highest measured groundwater elevation in the area of the Site. The highest groundwater elevation found was documented at an elevation of 157.89 feet above mean sea level, or approximately 96.5 feet bgs, in a 2009 study completed by Ami Adini & Associates, Inc. (AAA) for a facility located 0.2 miles north of the Site (AAA, 2009).

Field Pressure and Possible Methane Readings Using Field Instruments

Field differential pressure and methane measurements from the multi-nested soil gas probes are summarized in Table 1. The locations and depths of the soil gas probes in accordance with the proposed parking structure footing depths are shown on Figure 2. The possible methane and pressure measurements for the field screening program are organized by depth interval and are summarized below:

Footing Depth of 38 feet bgs (Probes B4, B8, B9, B10, B15, B16, B20, B21, B22, B28, B29, B33, B34, and B35):

- Using the GEM, possible methane concentrations were detected at 0.1% volume in probes B8 (at 43, 48, and 58 feet bgs), B9 (at 43 and 48 feet bgs), B29 (at 58 feet bgs), and B34 (at 48 and 48 feet bgs). A possible methane concentration of 0.2% volume was detected in probe B9 (at 58 feet bgs). Methane was not detected in any other soil gas probe locations or depths.

- Differential pressures ranged from -0.41 inches of water in probe B20 at 58 feet bgs to +0.66 inches of water in probe B16 at 43 feet bgs.

Footing Depth of 48 feet bgs (Probes B5, B6, B7, B17, B18, B19, B30, B31, and B32):

- Using the GEM, methane was not detected in any soil gas probe locations or depths
- Differential pressures ranged from -0.50 inches of water to +0.05 inches of water in probe B19, both measured from the probe installed at 68 feet bgs.

Footing Depth of 53 feet bgs (Probes B1, B2, B11, B12, and B13):

- Using the GEM, a possible methane concentration was detected at 0.1% volume in probe B2 at 58 feet bgs. Methane was not detected in any other soil gas probe locations or depths.
- Differential pressures ranged from -0.40 inches of water in probe B2 at 73 feet bgs to +0.32 inches of water in probe B1 at 73 feet bgs.

Footing Depth of 58 feet bgs (Probes B3, B14, and B27):

- Using the GEM, the maximum possible methane concentrations in probe B3 were detected at 0.1% volume at 63 feet bgs, 0.2% volume at 68 feet bgs, and 0.4% volume at 84 feet bgs. Methane was not detected in any other soil gas probe locations or depths.
- Differential pressures ranged from -0.44 inches of water in probe B3 at 84 feet bgs to +2.00 inches of water in probe B27 at 78 feet bgs.

Footing Depth of 73 feet bgs (Probes B23, B24, B25, and B26):

- Using the GEM, methane was not detected in any soil gas probe locations or depths.
- Differential pressures ranged from -1.18 inches of water in probe B23 at 93 feet bgs to +0.22 inches of water in probe B26 at 67 feet bgs. A reading of +5.70 inches of water was measured from boring B25 at 78 feet bgs; however, no indications of methane were noted on the GEM and this pressure reading appears to have been an anomaly.

Of the 105 soil gas probes monitored for methane, 13 had indications of possible methane gas based on the GEM field instrument. Each of the 13 soil gas probes where possible methane was indicated were sampled in the field and submitted to an analytical laboratory to assess for the presence of methane.

Analytical Test Results from Soil Gas Sampling

Methane - All 13 soil gas samples submitted for analytical testing were analyzed for methane by method ASTM D1946. Methane was not detected in any of the soil gas samples above the laboratory practical quantitation limit (PQL) of 0.01%, which is equivalent to 100 parts per million volume (ppmv).

LandTec, who manufactures the GEM, noted the following: "…*Some gas sensors are sensitive to more than one type of gas. Methane sensors, for example, measure hydro-carbon bonds, which are present in all hydrocarbons, such as Ethane, Propane, Butane and others. So, if these other gases are present, your GEM will read them as Methane, and therefore report more Methane than is actually present.*" (http://www.landtecna.com/faq/q-readings-cross-gas-effect/).

Other VOCs - To evaluate for the potential presence of other VOCs that could interfere with the methane readings noted on the GEM field instrument, the analytical laboratory was directed by Leighton to analyze the soil gas samples from boring B3 (i.e., B3-63', B3-68', and B3-84') for VOCs by EPA Method 8260B. Information related to the presence of VOCs detected in the three boring B3 soil gas samples (Appendix B) and additional soil gas samples subsequently analyzed for VOCs is summarized in a memorandum prepared by Geosyntec Consultants (Santa Barbara) and presented in Appendix E.

Discussion - Based on review of the fixed laboratory analytical test results conducted for the presence of methane, none of the soil gas samples had detectable concentrations of methane above the PQL established for methane (i.e., commonly called non-detect). Based on the presence of VOCs detected in the boring B3 soil gas samples (Appendix B), it is considered likely that the instrument responses for methane using the GEM were associated with interferences caused by non-methane VOCs. Information pertinent to the non-methane VOCs detected in the boring B3 and other soil gas samples is presented in Appendices B and E.

Leighton reviewed the LADBS's Table 1B - Mitigation Requirements for Methane Buffer Zone (LADBS October 13, 2008; Revised February 10, 2010). No methane mitigation improvements (i.e., Site Design Levels I through V) are required by LADBS because:

1. Methane was not detected in the soil gas samples analyzed by the laboratory.
2. None of the probe locations exhibited pressure measurements exceeding 2 inches of water column. Even if the detections using the GEM were actually methane, the

pressure measurements were not significant enough to require LADBS mitigation Site Design Level.

A completed LADBS Certificate of Compliance for Methane Test Data (Form 1, Part 1) is presented in Appendix F.

CONCLUSIONS AND RECOMMENDATIONS

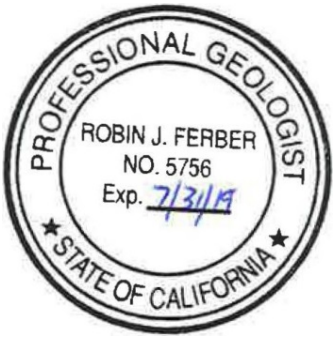
The purpose of the methane gas screening survey was to comply with the LADBS Methane Standard and to evaluate for the presence of methane in soil gas due to the Site's location within the City of Los Angeles Methane Buffer Zone. Three nested soil gas probes were installed in 35 boring locations at the Site resulting in a total of 105 soil gas probes. In accordance with LADBS requirements, field instruments were utilized to measure for the presence of possible methane gas and gas pressures. A total of 13 soil gas samples monitored with the GEM field instrument indicated the possible presence of methane at concentrations ranging from 0.1 % to 0.4%; however, when soil gas samples were collected and analyzed by an independent laboratory, none of the 13 soil gas samples contained detectable methane above the laboratory PQL.

Three of the 13 soil gas samples analyzed by the fixed laboratory were selected and analyzed for VOCs to assess if hydrocarbon interferences may have caused the false positives in the GEM instrument. Review of the test results for the three soil gas samples indicated the presence of non-methane VOCs.

None of the gas pressures exceeded 2 inches of water column at the probe locations where the GEM field instrument indicated the presence of methane.

Based on the LADBS the Mitigation Requirements for Methane Buffer Zone, no methane mitigation improvements (i.e., Site Design Levels I through V) are required because:

- Methane was not detected in the soil gas samples analyzed by the laboratory and
- None of the probe locations exhibited pressure measurements exceeding 2 inches of water column. Even if the detections using the GEM field instrument were actually methane, the pressure measurements were not elevated enough to require LADBS mitigation site design levels.



As required by the LADBS, a Certificate of Compliance for Methane Test Data (Form 1, Part 1) by a California Professional Geologist is presented in Appendix F.

LIMITATIONS

This methane gas screening survey was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the activities described herein, and are limited to the Site investigated. Opinions presented herein apply to property conditions existing at the time of our study and cannot necessarily be taken to apply to property conditions outside of the area investigated or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the site investigated, and the amount, type, distribution, and integrity of the information collected at the time of the investigation, and the methods utilized to collect and evaluate the data. Although Leighton has taken steps to obtain true copies of available information, we make no representation or warranty with respect to the accuracy or completeness of the information provided by others.

We appreciate the opportunity to assist Sixth and Alameda LLC on this important project. Please do not hesitate to call the undersigned if you have any questions regarding this report.

Respectfully submitted,

	9/14/2017	13:09	58	ND (0.0)	0.00	29.66	

Notes:

bgs = below ground surface
ND = Not detected at instrument detection limit (in parentheses)
0.1 = Methane concentration recorded above instrument detection limit
$+5.7^{1}$ = Anomalous differential pressure reading
Methane Concentration* = As noted in the report, the GEM instrument can be influenced by non-methane hydrocarbons.

Client Address:	17781 Cowan	**JEL Ref. No.:**	ST-11184
	Irvine, CA 92614	**Client Ref. No.:**	11723.001
Attn:	Robin Ferber	**Date Sampled:**	9/14/2017
		Date Received:	9/14/2017
Project Name:	6th & Alameda Methane Gas Survey	**Date Analyzed:**	9/14/2017
Project Address:	6th & Alameda	**Physical State:**	Soil Gas
	Los Angeles, CA		

ANALYSES REQUESTED

1. EPA 8260B – Volatile Organics by GC/MS + Oxygenates

Analytical – Soil Gas samples were analyzed using EPA Method 8260B that includes extra compounds required by DTSC/RWQCB (such as Freon 113). Instrument Continuing Calibration Verification, QC Reference Standards, Instrument Blanks and Sampling Blanks were analyzed every 12 hours as prescribed by the method. In addition, a Laboratory Control Sample (LCS) and Laboratory Control Sample Duplicate (LCSD) were analyzed with each batch of Soil Gas samples. All samples were injected into the GC/MS system within 6 hours of sampling.

2. ASTM D1946 – Methane

Analytical – Soil Gas samples were analyzed using ASTM D1946 by GC/TCD. All samples were injected into the GC/MS system within 6 hours of sampling.

Approval:

Carolyn Carroll

	Los Angeles		

ANALYSES REQUESTED

1. ASTM D1946 – Methane

Sampling – Soil Gas samples were collected in Tedlar bags.

Analytical – Soil Gas samples were analyzed using ASTM D1946 by GC/TCD. All samples were injected into the GC/MS system within 6 hours of sampling.

Approval:

Carolyn Carroll

Project Address:	6th & Alameda	**Physical State:**	Soil Gas
	Los Angeles, CA		

ANALYSES REQUESTED

1. ASTM D1946 – Methane

Analytical – Soil Gas samples were analyzed using ASTM D1946 by GC/TCD. All samples were injected into the GC/MS system within 6 hours of sampling.

Approval:

Colby Wakeman
QA/QC Manager

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

For any feedback concerning our services, please contact Jenny Jiang, Project Manager at 951.779.0310. You may also contact Ken Zheng, President at office@arlaboratories.com.

Memorandum

Date:	17 January 2018
To:	Paul Singarella, Esq., Latham & Watkins (Latham)
Copies to:	Jeffrey Sofferman, SunCal Management, LLC (SunCal)
From:	Mike Reardon, P.E., Geosyntec Consultants (Geosyntec) Robert Ettinger, (Geosyntec)
Subject:	Soil Vapor Volatile Organic Compound Data Evaluation Sixth Street and Alameda Development Los Angeles, California

Introduction

This memorandum presents the results of soil vapor sample analyses for volatile organic compounds (VOCs) collected at the Sixth Street and Alameda development site in the City of Los Angeles, California (the Site). This memorandum was prepared by Geosyntec Consultants (Geosyntec) on behalf of SunCal Management, LLC (SunCal) at the direction of Latham and Watkins (Latham).

Background

SunCal plans to redevelop the Site, comprised of approximately 15 acres (Figure 1) for mixed uses including the construction of seven buildings to support retail, office, hotel, residential and educational uses (Figure 1). Based on information provided by SunCal, each of the seven buildings will include between two and five levels of subterranean parking.

Three environmental assessments assessing the concentrations of VOCs in soil or soil vapor and/or methane in soil vapor have been conducted at the Site.

- In March 2015, six soil borings were drilled at the Site to assess conditions associated with former industrial activities as part of a Phase II investigation (Figure 2). The soil borings were drilled to depths of 20-feet below ground surface (bgs) for the collection of soil samples and soil vapor probes were installed at depths of 5, 10 and 15 feet bgs. Soil vapor samples were analyzed by an on-site mobile laboratory for VOCs. Detected VOCs were limited to

trichlorofluoromethane (Freon-11) and petroleum related chemicals toluene and m/p-xylenes. It was concluded that the detected concentrations of VOCs in soil vapor samples did not pose significant health risks for a residential setting [Leighton, 2015].

- In September 2017, soil vapor samples were collected to assess soil vapor conditions below the depths of the subterranean garages for the proposed development. This assessment included the drilling and installation of 35 multi-depth soil vapor probes (B1-B35) across the Site (Figure 3). At each location, three sampling ports were installed at depths ranging from 43 to 93 ft bgs. The sample depths were based on the proposed development plan in which the sample ports were constructed to represent soil vapor conditions at depths of 5, 10 and 20 feet below the future slab of the parking structure for each of the seven buildings. Samples were collected from each of the probes over a period of several days and the vapor samples were field screened for methane. Results of the field screening indicated low (0.1 to 0.4 percent by volume) concentrations of possible methane at six of the 35 locations (B2, B-3, B-8, B-9, B-21 and B-34). Based on the field screening results, samples were collected from the three soil vapor sampling points at location B-3 for VOC analysis. The analytical results of VOCs detected during this sampling event are summarized in Table 1 and the laboratory report is provided in Attachment A. Several VOCs including bromodichloromethane, carbon tetrachloride, chloroform, dichlorodifluoromethane, cis 1,2-dichloroethene, tetrachloroethene, trichloroethene, Freon-11, and methyl t-butyl ether (MTBE) were detected in these samples. The apparent detection of MTBE without the presence of other petroleum hydrocarbons (e.g., benzene, toluene, ethylbenzene, or xylene) is very unusual and as a result, the analytical results were suspect. Additionally, the low-level detections of carbon tetrachloride reported for these samples is not typically observed in deep soil gas at sites with no historical use of this compound. Consequently, resampling of these probes and additional soil vapor sampling was conducted to further explore the subsurface conditions.

- In November 2017, additional sampling was conducted. During this investigation, samples were collected from each of the depths at six soil vapor probe locations (B-2, B-3, B-8, B-9, B-29 and B-34). These locations were selected based on the field instrument readings from the September 2017 investigation. The November 2017 samples were collected in 1-liter summa canisters and were analyzed by a fixed laboratory for VOCs by EPA Method TO-

15. The analytical results of VOCs detected during this sampling event are summarized in Table 2 and the laboratory report is provided in Attachment A.

As shown in Table 3, the analytical results for some analytes for the November 2017 samples were significantly different from those collected from sample location B-3 in September 2017.

- MTBE was not detected in the second sampling event with fixed laboratory analysis. The laboratory that analyzed the November samples reported "an abundance of non-target analytes" in the sample collected from the location that previously reported the MTBE (B3-84, the deepest sample at location B-3). It is possible that this interference resulted in the anomalous result reported by Jones Environmental for the September 2017 sample.

- Carbon tetrachloride which was detected in each of the September 2017 samples was not detected in any of the November 2017 samples.

Based on these findings, the September 2017 results are considered anomalous and not representative of Site conditions. As such, the September 2017 VOC results are not appropriate for consideration in the site assessment and the data evaluation relied on the November 2017 results.

The environmental assessment of VOCs in soil vapor at the Site shows:

- Limited detections in the shallow soil vapor of Freon-11 and petroleum related chemicals toluene and m/p-xylenes.

- Detections in deep soil vapor of Freon-11 and low levels of other VOCs (generally less than 100 $\mu g/m^3$).

Collectively, these data do not indicate that the Site is a source of chlorinated solvent VOCs.

Vapor Intrusion Pathway Screening Evaluation

Vapor intrusion considers the potential migration of subsurface VOCs from soil gas to an overlying structure. A screening-level evaluation of the vapor intrusion pathway is conducted by comparing concentrations measured at site to conservative risk-based screening levels. California Department of Toxic Substances Control (DTSC) guidance [DTSC, 2011] was followed in the preparation of this screening evaluation. If Site data

are below conservative screening values, no further evaluation of the vapor intrusion pathway is warranted.

Screening values were calculated for each of the detected VOCs in the November 2017 samples. The screening values are the target indoor air concentrations for residential land use for each of the individual compounds divided by a default attenuation factor for new construction recommended by the California Department of Toxic Substances Control (DTSC).

- Target indoor air concentrations were taken from DTSC guidance [DTSC, 2017] when available. If a DTSC value was not available, United States Environmental Protection Agency (EPA) regional screening levels (RSLs) [EPA, 2017] or a surrogate value was used. Residential indoor air screening levels were used to represent the most sensitive future receptors that may be occupying the Site (e.g. residential and educational uses).

- Given the proposed design of the future buildings with multiple levels of subterranean parking beneath the occupied spaces each of the structures, the DTSC default attenuation factor for commercial buildings [DTSC, 2011] was used as a conservative value in this screening evaluation.

Table 4 includes a statistical summary of the VOC analytical results and the risk-based screening levels calculated following DTSC guidance. As shown on Table 3, none of the detected VOCs in soil vapor exceeded the Site-specific screening values. The screening assessment results conclude that the chemicals detected in the November samples do not indicate a vapor intrusion concern for the proposed development.

Summary and Conclusions

Soil vapor data was collected from the Site as part of three assessments. The first assessment focused on shallow (upper 20 ft) soil and soil vapor quality and the following assessments focused on deeper conditions (43-93 ft). Low levels of VOCs were detected in both the shallow and deeper assessments and these data do not indicate that the Site is a source of chlorinated solvent VOCs. Screening-level vapor intrusion pathway evaluations indicate that these concentrations do not indicate a vapor intrusion concern for the proposed development.

JONES ENVIRONMENTAL
LABORATORY RESULTS

Client:	Leighton & Associates	**Report date:**	9/14/2017
Client Address:	17781 Cowan Irvine, CA 92614	**JEL Ref. No.:** **Client Ref. No.:**	ST-11184 11723.001
Attn:	Robin Ferber	**Date Sampled:** **Date Received:**	9/14/2017 9/14/2017
Project Name:	6th & Alameda Methane Gas Survey	**Date Analyzed:**	9/14/2017
Project Address:	6th & Alameda Los Angeles, CA	**Physical State:**	Soil Gas

ANALYSES REQUESTED

1. EPA 8260B – Volatile Organics by GC/MS + Oxygenates

Analytical – Soil Gas samples were analyzed using EPA Method 8260B that includes extra compounds required by DTSC/RWQCB (such as Freon 113). Instrument Continuing Calibration Verification, QC Reference Standards, Instrument Blanks and Sampling Blanks were analyzed every 12 hours as prescribed by the method. In addition, a Laboratory Control Sample (LCS) and Laboratory Control Sample Duplicate (LCSD) were analyzed with each batch of Soil Gas samples. All samples were injected into the GC/MS system within 6 hours of sampling.

2. ASTM D1946 – Methane

Analytical – Soil Gas samples were analyzed using ASTM D1946 by GC/TCD. All samples were injected into the GC/MS system within 6 hours of sampling.

Approval:

Carolyn Carroll
Stationary Lab Manager

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

Air - GC/MS VOA

Qualifier	Qualifier Description
*	LCS or LCSD is outside acceptance limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 320-33413-1

Laboratory: TestAmerica Sacramento

Narrative

Job Narrative
320-33413-1

Receipt
The samples were received on 11/17/2017 11:20 AM; the samples arrived in good condition.

Air - GC/MS VOA
Method(s) TO-15: The continuing calibration verification (CCV) associated with batch 196652 recovered above the upper control limit for Vinyl acetate. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported.

Method(s) TO-15: The following sample was diluted due to the abundance of non-target analytes: B3-84' (320-33413-15). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	N/A	
Cooler Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

LADBS CERTIFICATE OF COMPLIANCE FOR METHANE TEST DATA FORMS

Leighton

FORM 1 - CERTIFICATE OF COMPLIANCE FOR METHANE TEST DATA

Part 1: Certification Sheet

Site Address: 1206-1338 E. 6th Street and 1205-1321 Wholesale Street
Legal Description: Tract: Vesting Tract No. 74111, AINs 5164-010-003, -004, and -005
Building Use: Proposed Commercial/Residential

Architect's, Engineer's or Geologist's Stamp:

Name of Architect, Engineer, or Geologist:
Wallace B. Sconiers, Jr., PG
Leighton & Associates
26074 Avenue Hall, Suite 21
Santa Clarita, CA 91355
Telephone: 661-705-3324

Name of Testing Laboratory:
Leighton & Associates, Inc.
City Test Lab License #: TA10240
Telephone: 949-250-1421

I hereby certify that I have tested the above site for the purpose of methane mitigation and that all procedures were conducted by a City of Los Angeles licensed testing agency in conformity with the requirements of the LADBS Information Bulletin P/BC 2014-101. Where the inspection and testing of all or part of the work above is delegated, full responsibility shall be assumed by the architect, engineer or geologist whose signature is affixed thereon.

Signed: _____ date 10-23-17

Required Data:

- Project is in the **Methane Buffer Zone**.
- Depth of ground water observed during testing: **Perched/localized GW at 73-80' = 0** feet below the Impervious Membrane.
- Depth of Historical High Ground Water Table Elevation*: **23.5** feet below the Impervious Membrane.
- Design Methane Concentration**: **100** parts per million in volume (ppmv).
- Design Methane Pressure***: **highest at 2.0 (anomalous reading at 5.7)** inches of water column.
- Site Design Level: (**Level I**, Level II, Level III, Level IV, Level V) with **2.0** inches of water column.

De-watering:

- De-watering (**is**) (is not) required per Section 7104.3.7.
- Pump discharge rate _____ cubic feet per minute per reference geology or soil report: **(n/a)** dated **(n/a)**.

Additional Investigation:

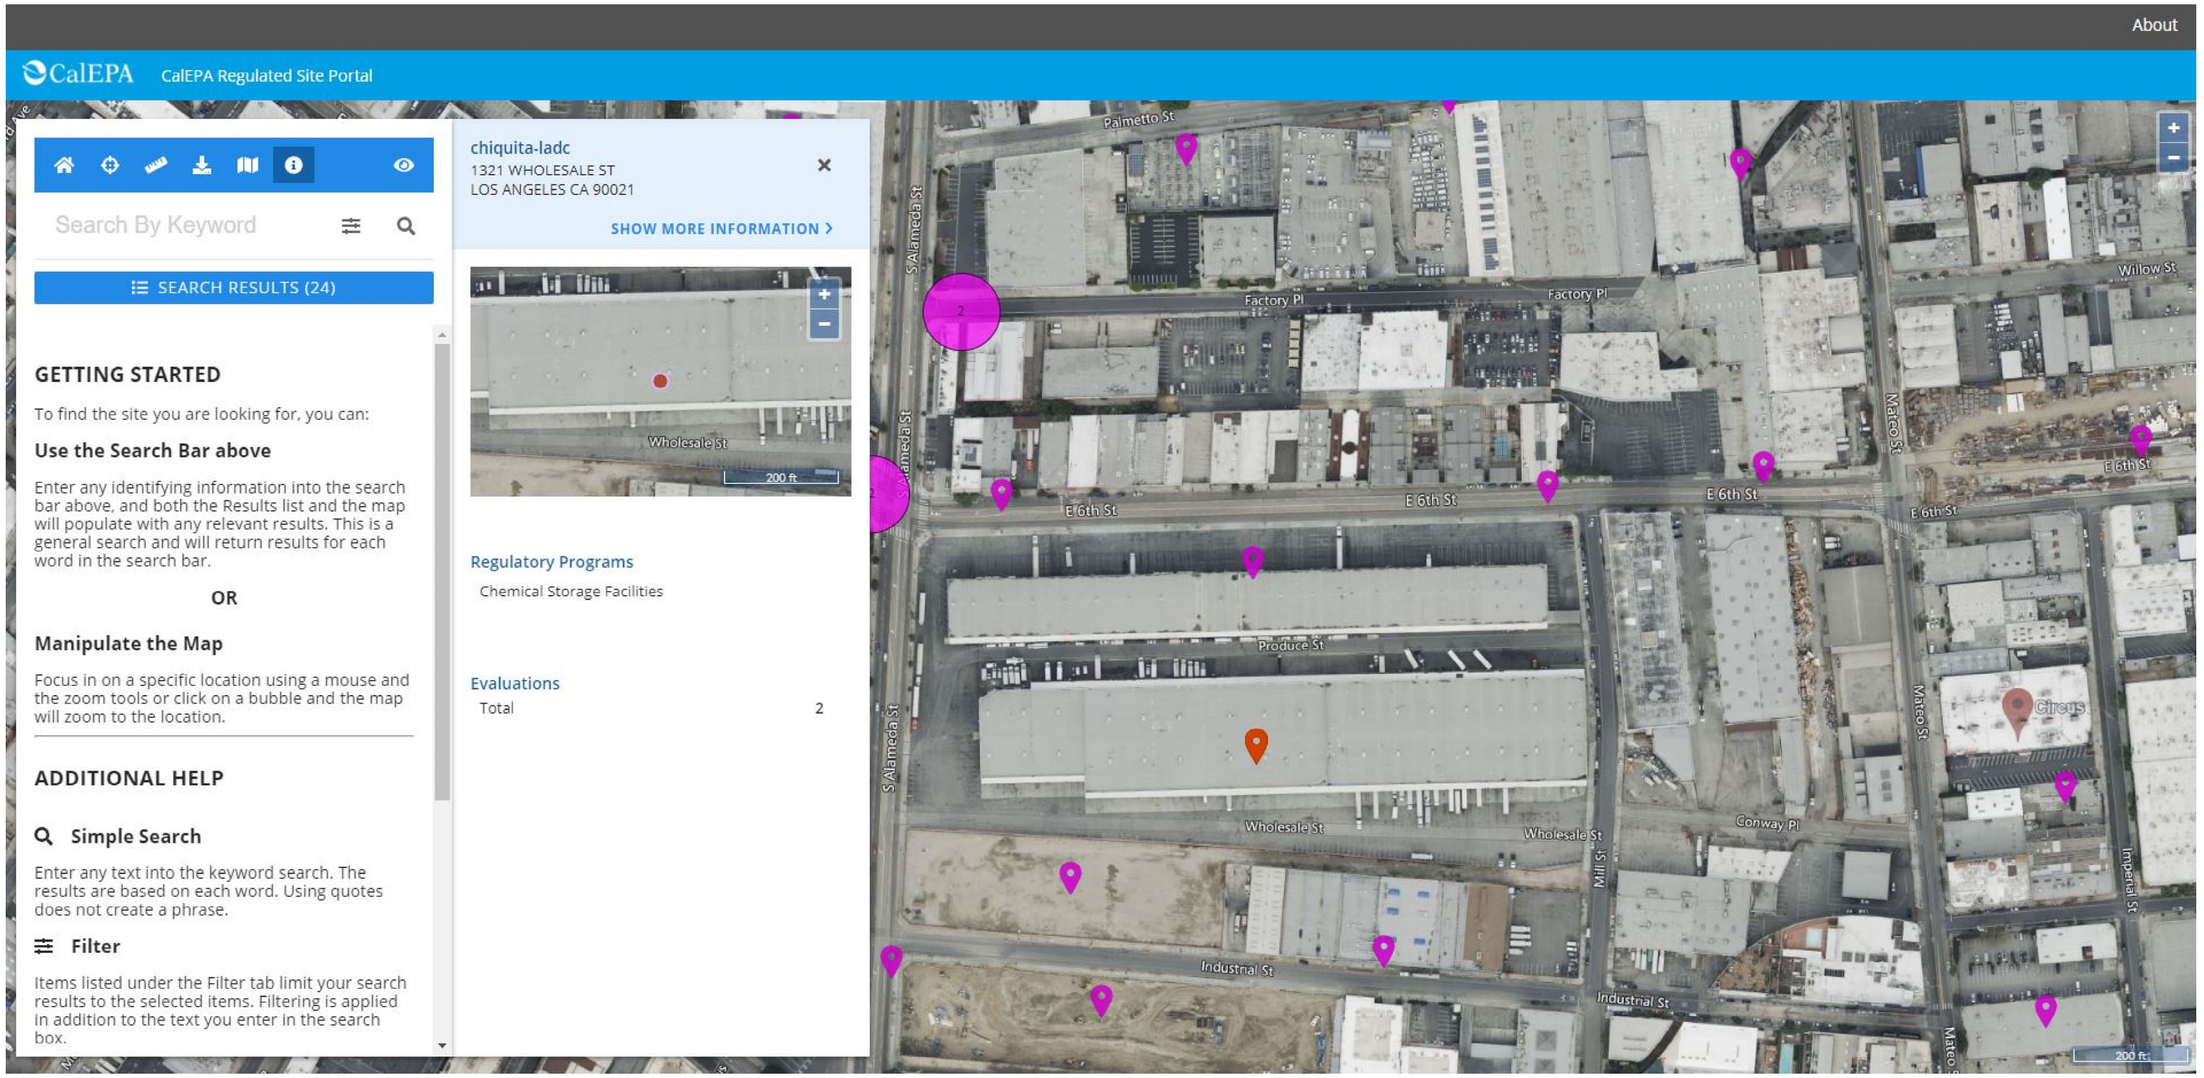
- Additional investigation (was) (**was not**) conducted.

Latest Grading on Site:

- Date of last grading on site (**was**) (was not) more than 30 days before Site Testing.
- See Attached explanation of the effect on soil gas survey results by grading operations **(n/a)**.

Notes:

* Historical High Ground Water Table Elevation shall mean the highest recorded elevation of ground water table based on historical records and field investigations as determined by the engineer for the methane mitigation system.



** Design Methane Concentration shall mean the highest recorded measured methane concentration from either Shallow Soil Gas Test or any Gas Probe Set on the site.

*** Design Methane Pressure shall mean the highest total pressure measured from any Gas Probe Set on the site.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities. For efficient handling of information internally and in the internet, conversion to this new format of code related and administrative information bulletins including MGD and RGA that were previously issued will allow flexibility and timely distribution of information to the public.

GETTING STARTED
To find the site you are looking for, you can:
Use the Search Bar above
Enter any identifying information into the search bar above, and both the Results list and the map will populate with any relevant results. This is a general search and will return results for each word in the search bar.
OR
Manipulate the Map
Focus in on a specific location using a mouse and the zoom tools or click on a bubble and the map will zoom to the location.
ADDITIONAL HELP
Simple Search
Enter any text into the keyword search. The results are based on each word. Using quotes does not create a phrase.
Filter
Items listed under the Filter tab limit your search results to the selected items. Filtering is applied in addition to the text you enter in the search box.

OFFICE OF THE CITY CLERK—CITY OF LOS ANGELES

PLEASE NOTE:

1. Field inspection by a member of this Department prior to covering of tanks and piping.

2. Pressure test of piping prior to covering. This must be done in the presence of the field inspector.

3. Final approval in writing shall be obtained from the field inspector before the installation may be placed in operation.

Section 57.04.03 requires that all auto fueling stations have a permit, which shall be secured from the City Clerk's Office, Room 101, City Hall.

Please contact Captain ~~Varney~~ WONNACOTT of our North Unit, telephone 485-5995, at least one working day in advance to make necessary arrangements for inspection.

Re: Progressive Produce,
1204-1266 East 6th Street, Los Angeles, California

Dear Pat:

This letter transmits information and results pertaining to the removal of two underground storage tanks at the subject Los Angeles site.

Please note that the actual capacity of Tank T2 was 10,000 gallons.

There was no field or laboratory indication of diesel fuel or gasoline contamination.

If you have any questions, please call Robert Ohm or me at (213) 389-8040.

2706 Wilshire Blvd., Ste. 200
Los Angeles, California 90057
Tel (213) 389-8040

NOT SAFE FOR HOT WORK
NOT SAFE FOR WORKERS
NOT TESTED FOR TOXICS.

SAFE TO COLD CUT TANKS INTO SCRAP USING HYDRAULIC/PNEUMATIC SHEARS.

In the event of any physical or atmospheric changes adversely affecting the STANDARD SAFETY DESIGNATIONS assigned to any of the above spaces, or if in any doubt, immediately stop all work and contact the undersigned Marine Chemist

QUALIFICATIONS: Transfer of ballast or manipulation of valves or closure equipment tending to alter conditions in pipe lines, tanks or compartments subject to gas accumulation, unless specifically approved in this Certificate, requires inspection and endorsement or reissue of Certificate for the spaces so affected. All lines, vents, heating coils, valves, and similarly enclosed appurtenances shall be considered "not safe" unless otherwise specifically designated.

STANDARD SAFETY DESIGNATIONS (partial list, paraphrased from NFPA 306-1980, Subsections 1-6.1 through 1-6.4, and Subsection 5-3.2).

SAFE FOR WORKERS: Means that in the compartment or space so designated: (a) the oxygen content of the atmosphere is at least 19.5 percent by volume, and that, (b) toxic materials in the atmosphere are within permissible concentrations; and that, (c) the residues are not capable of producing toxic materials under existing atmospheric conditions while maintained as directed on the Marine Chemist's Certificate.

NOT SAFE FOR WORKERS: Means that in the compartment or space so designated, the requirements of Safe for Workers has not been met.

SAFE FOR HOT WORK: Means that in the compartment so designated: (a) oxygen content of the atmosphere is at least 19.5 percent by volume, with the exception of inerted spaces or where external hot work is to be performed; and that, (b) the concentration of flammable materials in the atmosphere is below 10 percent of the lower flammable limit; and that, (c) the residues are not capable of producing a higher concentration than permitted by (b) above under existing atmospheric conditions in the presence of fire, and while maintained as directed on the Marine Chemist's Certificate; and further, that, (d) all adjacent spaces containing or having contained flammable or combustible materials have been cleaned sufficiently to prevent the spread of fire, or are satisfactorily inerted, or, in the case of fuel tanks or lube oil tanks or engine room or fire room bilges, have been treated in accordance with the Marine Chemist's requirements.

NOT SAFE FOR HOT WORK: Means that in the compartment so designated, the requirements of Safe for Hot Work have not been met.

CHEMIST'S ENDORSEMENT. This is to certify that I have personally determined that all spaces in the foregoing list are in accordance with NFPA 306-1980 Control of Gas Hazards on Vessels and have found the condition of each to be in accordance with its assigned designation.

"The undersigned acknowledges receipt of this Certificate under Section 2-3 of NFPA 306-1980 and understands conditions and limitations under which it was issued"

This Certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions

Overall Inspection Comments

Inspection Report

Consent to enter, inspect and take photographs was given by: Omar Villegas

Los Angeles Fire Department - Official Inspection Report
HAZARDOUS MATERIALS BUSINESS PLAN (HMBP)
FACILITY INSPECTION
200 N. Main Street
Los Angeles, CA 90012
(213) 978-3680

BUSINESS:	FACILITY ID:	NOTICE#:	INSPECTION DATE:
CHIQUITA/ FRESH EXPRESS	FA0019534	DANW03QBU	10/30/2018

Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected:

1. No violations found at time of inspection
2. Quantity of hazardous materials confirmed at time of inspection. Total quantity of ethylene varies on a daily basis. Periodic quantities on hand fall within the reportable threshold.

NOTE:
The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement:
**** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change.
For new CERS users, please follow the procedures below:
1. Log in to http://cers.calepa.ca.gov to create a user name and password. The approval will take 2-3 days and Confirmation will be send to the email provided.
2. Fill out owner/operator and business activity information on CERS. Verify that owner and business information in CERS is correct. Please remember to add your EPA ID number if you generate or store hazardous waste.
3. Complete your chemical inventory in CERS. All inventory equal or greater than 200 cubic feet of compressed gas, 55 gallons of liquid, or 500 pounds of solid, needs to be reported. This would include all containers of the same product added together. If you had a total of 11 containers of 5 gallons each the total would be 55 gallons and would need to be reported. In addition to your chemical inventory please upload a copy of your site map. A site map sample has been provided as reference.
4. Upload a copy of your Emergency Response Plan/Contingency Plan, in the plan section of CERS. A blank contingency plan is provided for your use if needed. An employee training sections is included in the contingency plan, please complete section or indicated if provided elsewhere in CERS.
As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section; inventory and site map section; and the contingency plan and employee training section. The CERS site has a very detailed help section for any questions that you may have.
**********Upon completion of the required CERS information please respond to this email for review and approval of your required CERS submittals. **********
Reports emailed to:

This report shall serve as a “NOTICE TO COMPLY” for Minor Violations, and a “NOTICE OF VIOLATION” for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

Violation Description:

Failure to complete and electronically submit an annotated site map with all required content (north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment). Updates to existing maps to meet these requirements shall be completed by January 1, 2015. HSC 25505(a)(2), 25508(a)(1)

Emergency Response Plan

9 Adequate completion and electronic submission of Emergency Response Plan and procedures

☐ NVO ■ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

CLASS II
COMPLY BY: 5/5/2016

Violation Description:

Failure to establish and electronically submit an adequate Emergency Response Plan and procedures in the event of a reportable release or threatened release of a hazardous material, including, but not limited to, all of the following:
(A) Immediate notification to the appropriate local emergency rescue personnel and to the unified program agency.
(B) Procedures for the mitigation of a release or threatened release to minimize any potential harm or damage to persons, property, or the environment.
(C) Evacuation plans and procedures, including immediate notice, for the business site. HSC 6.95 25505(a)(3), 25508(a)(1)

10 Actual or threatened release reported to the CUPA and the California OES Warning Center

☐ NVO ■ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

CLASS I
COMPLY BY: 5/5/2016

Violation Description:

Failure of business to provide an immediate, verbal report of a release or threatened release of a hazardous material to the CUPA and the California Office of Emergency Services (OES) Warning Center. HSC 6.95 25510(a)

Training

11 Training program submitted and adequate for the size of the business and materials handled

☐ NVO ■ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

MINOR
COMPLY BY: 5/5/2016

Violation Description:

Failure to include and electronically submit an adequate training program in the Hazardous Materials Business Plan (HMBP), which is reasonable and appropriate for the size of the business and the nature of the hazardous material handled. HSC 6.95 25505(a)(4), 25508(a)(1)

12 Initial and annual employee training completed, documented and records made available for 3 years

☐ NVO ■ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

MINOR
COMPLY BY: 5/5/2016

Violation Description:

Failure to (1) provide initial training and annual training, including refresher courses, to all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the Emergency Response Plan, and (2) document electronically or by hard copy and make available for a minimum of three years. HSC 6.95 25505(a)(4)

www.lafd.org

BUSINESS:	FACILITY ID:	NOTICE#:	INSPECTION DATE:
KC PRODUCE	FA0037726	DAUZJ3GME	04/05/2016

Observed the facility and inspected hazardous materials storage.

Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan.

The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

This report shall serve as a “NOTICE TO COMPLY” for Minor Violations, and a “NOTICE OF VIOLATION” for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation.

NOTE:
The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA
**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help section for any question that you may have.

**********Upon completion of the required CERS submittals and the resolution of all the above mentioned violations, please respond via email to the issuing inspector to have the submittals reviewed and the violations cleared. **********

HAZARDOUS MATERIALS SECTION
200 N. Main Street, Room 1780, Los Angeles , CA 90012

BUSINESS PLAN ANNUAL RENEWAL CERTIFICATION

Hazardous Materials Inventory Statement (HMIS)

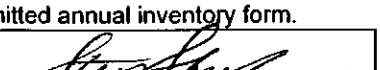
I certify that the attached HMIS reflects the handling of hazardous materials for the reporting year in accordance with the following conditions:

- ☐ **Delete**: Write "delete" on the HMIS next to any previously disclosed hazardous materials that are no longer used.
- ☒ **Revise**: Write the correct amounts, locations, or container type on the HMIS to reflect the accuracy of any previously reported hazardous materials.
- ☐ **EPCRA Compliance**: Fill in the EPCRA field with your signature on the HMIS for any hazardous material type and quantity identified on 40 CFR Part 355, Appendix A-The List of Extremely Hazardous Substances and Their Threshold Planning Quantities.
- ☐ **Add**: Complete one Hazardous Materials Inventory-Chemical Description Form to add each hazardous materials that you have not previously disclosed. Submit one form per chemical.
- ☐ **No Change**: The HMIS is accurate and complete.

Consolidated Contingency Plan (CCP)

I review the CCP every three years and certify that the CCP on file with your agency is accurate and current in accordance with the following conditions:

- ☒ **Modification**: Significant changes in facility personnel or operations required a revision of the CCP. Complete and submit changes of your CCP with this form.
- ☐ **Lost**: Complete and submit any parts of your CCP that were lost or damaged.
- ☐ **No Change**: There have not been any significant changes in the facility's personnel and operations that require a revision to the current CCP.



Cal-ARP Program

I reviewed the threshold quantities in Section 2770.5 of Title 19 of the California Code of Regulations and certify that any regulated substance on the attached HMIS accords with the following registration requirement:

- ☐ **Add**: Complete the Cal-ARP Program Regulated Substance Registration form only if the regulated substance is at or above the threshold quantity (TQ). Submit one form per chemical.
- ☐ **No Change**: The previously submitted registration for regulated substance(s) is accurate.

ANNUAL CERTIFICATION

I certify that the information submitted herein is complete and accurate. Also, no hazardous materials subject to the inventory requirements of Chapter 6.95 of the Health and Safety Code are being handled that are not listed on the most recently submitted annual inventory form.

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

AFTER the local emergency response personnel are notified, you shall then notify this Unified Program Agency and the Office of Emergency Services.

LOS ANGELES CITY FIRE DEPARTMENT 213-978-3680
California Emergency Management Agency: (800) 852-7550
National Response Center: (800) 424-8802

Information to be provided during Notification:

- ϖ Your Name and the Telephone Number from where you are calling.
- ϖ Exact address of the release or threatened release.
- ϖ Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- ϖ Material and quantity of the release, to the extent known.
- ϖ Current condition of the facility.
- ϖ Extent of injuries, if any.
- ϖ Possible hazards to public health and/ or the environment outside of the facility.

B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

Sincerely,

Sydney Van

FACILITY ADDRESS: 1336 E 6th st LA CA 90021

HAZARDOUS MATERIALS INSPECTION GUIDELINES:

OFFICE:

- ☑ Pull file, check history
- ☑ Check Envision to review notes, history or special instructions
- ☑ Print Inspection Packet, which includes:

1. BP 1
2. BP 8
3. UP Forms for updating chemical inventory
4. Business Plan Review
5. Packet should accompany you on the inspection, if inspection requires a phone call to gain entry, contact responsible party
6. Invoice, to see if facilities fees are current

INSPECTION: Upon Arrival

- ☑ Check address on facility, does the business name match what's listed on the BP1
- ☑ Check for visual hazards, placards, blocked egress, etc
- ☑ Make contact with responsible party
- ☑ Check to see if CUPA Permit is posted and current
- ☑ Update BP 1 and have responsible party sign verifying the information is correct
- ☑ Perform inspection to update chemical inventory on BP 8, for each updated chemical, **completely** fill out a (UP) Chemical Description Form
- ☑ Ensure the responsible party signs and dates BP 8
- ☑ Check for signs of illegal processes and illegal dumping, check dumpsters outside and drains
- ☑ If violations are found, Take photos of violations found
- ☑ Write a notice sighting violations and leave a copy with the responsible party
- ☑ Thank the responsible party for their time and exit the facility

RETURN TO OFFICE:

- ☑ Place a copy of completed notice in notice book on Capt Gatewood's desk
- ☑ Enter completed inspection into Envision with notes of who you met with and if a notices was written
- ☑ Any chemical inventory or processes not understood, check with RMPPS SPECIALIST OR THE INDUSTRIAL HYGENIST
- ☑ Prepare an F-290 packet if necessary
- ☑ Place completed inspection in the appropriate box for processing

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility...	If Yes, please complete these pages of the UP FORM....	
A. HAZARDOUS MATERIALS		
Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☐ YES ☒ NO 4	4 HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION 4 CONSOLIDATED CONTINGENCY PLAN (Section I and Site Map(s)) 4 TRAINING PLAN
B. UNDERGROUND STORAGE TANKS (USTs)		
1. Own or operate underground storage tanks?	☐ YES ☒ NO 5	4UST FACILITY 4UST TANK (one page per tank)
2. Intend to upgrade existing or install new USTs?	☐ YES ☒ NO 6	4UST FACILITY 4UST TANK (one per tank) 4UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank)
3. Need to report closing a UST?	☐ YES ☒ NO 7	4UST TANK (closure portion –one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: —any tank capacity is greater than 660 gallons, or —the total capacity for the facility is greater than 1,320 gallons?	☐ YES ☒ NO 8	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE		
1. Generate hazardous waste?	☐ YES ☒ NO 9	4 EPA ID NUMBER – provide at the top of this page. 4 As a generator, answer YES to Item E2b and complete Waste Generator Form.
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES ☒ NO 10	4 RECYCLABLE MATERIALS REPORT
3. Treat hazardous waste on site?	☐ YES ☒ NO 11	4 ONSITE HAZARDOUS WASTE TREATMENT – FACILITY 4 ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12	4 CERTIFICATION OF FINANCIAL ASSURANCE
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13	4 REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14	4 HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
E. LOCAL REQUIREMENTS [15]		
1. REGULATED SUBSTANCES		
Have Regulated Substances (RS) stored on site at greater than the threshold quantities established by the California Accidental Release Program (Cal ARP) ?	☐ YES ☒ NO 15a	In addition to Hazardous Materials requirements, complete: 4 Regulated Substance Registration 4 Risk Management Plan (when required)
2. OTHER REQUIREMENTS		
a. Have hazardous materials stored on site at or above a threshold amount established by a CUPA's or PA's local ordinance?	☒ YES ☐ NO 15b	4 Consult local CUPA or PA for added reporting requirements.
b. Required by a CUPA or PA to provide other information?	☐ YES ☒ NO 15c	4 Waste Generator Form (LA County)

SITE ADDRESS 1336 E. 6th street	103	CITY LA	104	ZIP CODE 90021	105

The Consolidated Contingency Plan provides businesses a format to comply with the emergency planning requirements of the following three written hazardous materials emergency response plans required in California:

- Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-2732),
- Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and,
- Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 and 2641).

This format is designed to reduce duplication in the preparation and use of emergency response plans at the same facility, and to improve the coordination between facility response personnel and local, state and federal emergency responders during an emergency. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be completed for your facility. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

PROGRAMS	SECTION(S) TO BE COMPLETED
Hazardous Materials Business Plan (HMBP)	Cover Page, Section I, and Site Map(s)
Hazardous Waste Generator (HWG)	Cover Page, Section I, and Site Map(s)
Underground Storage Tank (UST)	Cover Page, Sections I and II, and Site Map(s)
HMBP, HWG, UST	Cover Page, Sections I and II, and Site Map(s)

A copy of the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. Describe below where a copy of your Contingency Plan, including the hazardous material inventories and Site Map(s), is located at your business:

PLAN CERTIFICATION	
I certify under penalty of law that I have personally examined and I am familiar with the information provided by this plan and to the best of my knowledge the information is accurate, complete, and true.	
Printed Name of Owner/ Operator Tony Van	Title of Owner/Operator President
Signature of Owner/ Operator	Date 4/12/13

We appreciate the effort of local businesses in completing these plans and will assist in every possible way. If you have any questions, please contact your local CUPA or PA.

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

AFTER the local emergency response personnel are notified, you shall then notify this Unified Program Agency and the Office of Emergency Services.

Local Unified Program Agency: ( ) -
State Office of Emergency Service: (800) 852-7550 or (916) 262-1621
National Response Center: (800) 424-8802

Information to be provided during Notification:

- Your Name and the Telephone Number from where you are calling.
- Exact address of the release or threatened release.
- Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- Material and quantity of the release, to the extent known.
- Current condition of the facility.
- Extent of injuries, if any.
- Possible hazards to public health and/ or the environment outside of the facility.

B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

HOSPITAL/CLINIC:	PHONE NO:
USC Hospital	323 442-7920
ADDRESS: 1450 San Pablo Street

Unified Program (UP) Form
CONSOLIDATED CONTINGENCY PLAN

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

C. Private Emergency Response

DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM? ☐ Yes ☒ No

If yes, provide an attachment that describes what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

CLEANUP/DISPOSAL CONTRACTOR

List the contractor that will provide cleanup services in the event of a release.

NAME OF CONTRACTOR:	PHONE NO: - -
ADDRESS: N/A	
CITY:	ZIP CODE:

D. Arrangements With Emergency Responders

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

E. Evacuation Plan

1. The following alarm signal(s) will be used to begin evacuation of the facility *(check all which apply)*:

☑ Verbal ☐ Telephone *(including cellular)* ☐ Alarm System ☐ Public Address System ☐ Intercom
☐ Pagers ☐ ☐ Other *(specify)*:

2. ☑ Evacuation map is prominently displayed throughout the facility.

3. ☑ Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

F. Earthquake Vulnerability

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☐ Hazardous Waste/ Hazardous Materials Storage Areas ☐ Production Floor ☐ Process Lines
☐ Bench/ Lab ☐ Waste Treatment ☑ Other:

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☐ Utilities ☐ Sprinkler Systems ☐ Cabinets ☐ Shelves
☐ Racks ☐ Pressure Vessels ☐ Gas Cylinders ☐ Tanks
☐ Process Piping ☐ Shutoff Valves ☒ Other:

Unified Program (UP) Form
CONSOLIDATED CONTINGENCY PLAN

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

G. Emergency Procedures

Briefly describe your business standard operating procedures in the event of a release or threatened release of hazardous materials:

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

Only use propane for forklift only. Unused propanes store in a safe and cool area. All are secure locked.

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

Only store a limit amount of propanes for operation. Fire extinguishers and alert alarms are available.

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

Shut off and lock it. Call for Service and Replace it.

SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

IV. Emergency Equipment

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Location *	4. Description**
Personal Protective, Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators

SECTION II: UST EMERGENCY RESPONSE AND MONITORING PLAN

I. FACILITY IDENTIFICATION			
BUSINESS NAME KC Produce Corp. 3			FACILITY ID # 1
SITE ADDRESS 1336 E. 6th Street 103	CITY LA 104		ZIP CODE 90021 105

II. MONITORING PLAN AND PROCEDURES

1. The frequency of monitoring is as follows:

a. Tank: N/A

b. Piping: N/A

2. The methods and equipment (name and model) used for monitoring include:

a. Tank:

b. Piping:

3. The location (s) where monitoring will be performed include:

Attach one page plot plan showing:
1. Location of underground storage tanks, buildings, and property lines.
2. Location of monitoring points and the monitoring system is located.

4. The name(s) of responsible person (s) performing the monitoring and/or maintaining the equipment include:

5. The reporting format for all monitoring performed is as follows:

a. Tank:

b. Piping:

6. The preventative maintenance schedule for the monitoring equipment is:

yearly

7. The training necessary for the operation of UST systems, including piping and monitoring equipment includes:

Note: Training is scheduled and provided on _____ basis and training records for personnel are kept at the facility.

Be advised that this Emergency Response and Monitoring Plan must be kept at the UST location at all times. The local UST agency, CUPA or PA, must be notified within 30 days of any changes to the monitoring procedures. Consult your local UST agency for additional information on State and any local regulatory requirements concerning this Plan.

Unified Program (UP) Form
CONSOLIDATED CONTINGENCY PLAN

SITE MAP

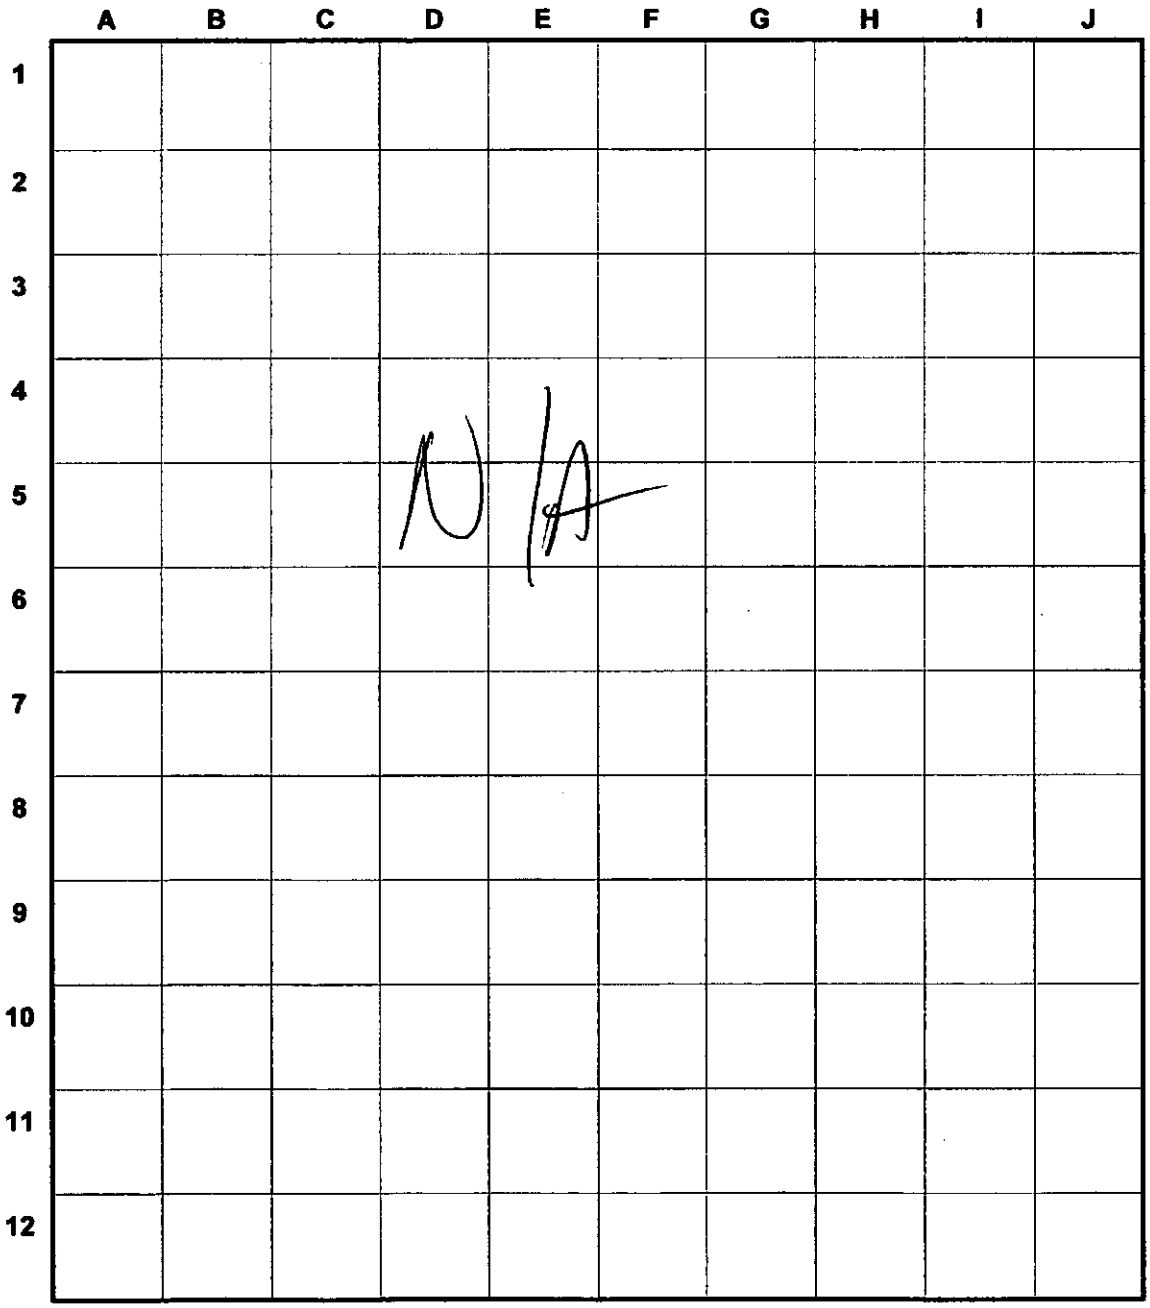
A site plan and storage map must be included with your Contingency Plan. For relatively small facilities, these documents may be combined into one drawing. Since these drawings are intended for use in emergency response situations, larger facilities *(generally those with complex and/or multiple buildings)* should provide an overall site plan and a separate storage map for each building/storage area. A blank Facility Site Map has been provided on the reverse side of this page. You may complete that page or attach any other drawing(s) which contain(s) the information required below.

1. **Site Plan:** This drawing shall contain, at a minimum, the following information:

   a. Site Orientation (north, south, etc.);
   b. Approximate scale *(e.g. "1 inch = 10 feet".)*;
   c. Date the map was drawn;
   d. Locations of all buildings and other structures;
   e. Parking lots and internal roads;
   f. Hazardous materials loading/unloading areas;
   g. Outside hazardous materials storage or use areas;
   h. Storm drain and sanitary sewer drain inlets;
   i. Wells for monitoring of underground tank systems;
   j. Primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas;
   k. Adjacent property use;
   l. Locations and names of adjacent streets and alleys;
   m. Access and egress points and roads.

2. **Storage Map(s):** The map(s) shall contain, at a minimum, the following information:

   a. General purpose of each section/area within each building *(e.g. "Office Area", "Manufacturing Area", etc.)*;
   b. Location of each hazardous material/waste storage, dispensing, use, or handling area *(e.g. individual underground tanks, aboveground tanks, storage rooms, paint booths, etc.)*. Each area shall be identified by a unique location code number, letter, or name *(e.g. "1", "2", "3"; "A", "B", "C", etc.)*;
   c. Entrances to and exits from each building and hazardous material/waste room/area;
   d. Location of each utility emergency shut-off point *(i.e. gas, water, electric.)*;
   e. Location of each monitoring system control panel *(e.g. underground tank monitoring, toxic gas monitoring, etc.)*.



3. **Map Legend**

Re: Installation of (1) 10,000 Gallon Atmospheric Tank for
Signal Oil Company
1229 Wholesale Street
Los Angeles, California

Enclosed is an approved copy of your drawing and our Permit #5954. This authorizes you to make the above installation, subject to the following conditions:

1. Field inspection by a member of this Department prior to covering of tanks and piping.

2. Pressure test of piping prior to covering. This must be done in the presence of the field inspector.

3. Location of dispenser control switch to be a minimum of 15 feet from dispenser.

4. Final approval in writing shall be obtained from the field inspector before the installation may be placed in operation.

Section 57.04.03 requires that all auto fueling stations have a permit, which shall be secured from the City Clerk's Office, Room 1, City Hall.

Please contact Captain N. Maricich of our Central Unit, telephone MA 8-6161, to make necessary arrangements for inspection.

WILLIAM L. MILLER, CHIEF ENGINEER

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/20/2021 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAR000243493

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 21 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there are 38 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 89 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 35 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that

there are 36 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-05-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (Serena Liu). Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.
Eval Division: Los Angeles City Fire Department

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:

Eval General Type:	Other/Unknown
Eval Date:	03-07-2019
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Received email from dmu stating site believes they are under reporting threshold. Confirmed with Omar site has at any point up to 144 gallons of ethylene. Omar will update CERS to reflect correct quantity. DMU informed to keep site in program.
Eval Division:	Los Angeles City Fire Department
Eval Program:	HMRRP
Eval Source:	CERS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-30-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Inspection Report Consent to enter, inspect and take photographs was given by: Omar Villegas Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. No violations found at time of inspection 2. Quantity of hazardous materials confirmed at time of inspection. Total quantity of ethylene varies on a daily basis. Periodic quantities on hand fall within the reportable threshold. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 42607
Site Name: LA COUNTY METROPOLITAN TRANSP DIV 1
Violation Date: 05-29-2019
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description: Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes: Returned to compliance on 07/05/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Facility did not test overfill protection before the October 13th 2018 deadline. CORRECTIVE ACTION: Overfill protection was tested on 10/12/2018 during monitor cert by Javier Soto with Tank Specialists. T2 (#6) 87 did not have a flapper valve. Facility pulled a permit to install a new flapper valve which was installed by Wayne Perry on 3/14/2019. Wayne Perry was unable to measure the ball float in T2 (#6) 87 to ensure the ball float is set higher than the flapper valve. Have a technician pull the ball float in T2 (#6) 87 to ensure the ball float is set higher than the flapper and if not remove the ball float so it does not interfere with the flapper valve function.

Citation:	22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes:	Returned to compliance on 02/10/2020. OBSERVATION: A written hazardous waste tank assessment has not been obtained for the Used antifreeze AST #2 tank system prior to placing system into service. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the Used antifreeze tank AST #2 system in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.

Site ID:	42607
Site Name:	LA COUNTY METROPOLITAN TRANSP DIV 1
Violation Date:	05-29-2019
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 05/29/2019. OBSERVATION: Facility's T2 (T6) 87 RJ FX1V MLLD failed to detect a release of 3.0 gallons per hour at 10 psi and restricting or shutting off the flow of product through the piping when a leak is detected. CORRECTED ON SITE: D5 like for like permit under SROOSMKP1 was issued and tester Javier Soto replaced failed DJ FX1V MLLD with new VR FX1V MLLD which was capable of detecting a release of 3.0 gallons per hour at 10 psi and restricting or shutting off the flow of product through the piping when a leak is detected.

Violation Description: Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
Violation Notes: Returned to compliance on 05/29/2019. OBSERVATION: Facility's T1 (T13) Diesel & T3 (#10) VR 420 sensor had a splice outside the junction box. The VR 420 sensor could not reach the lowest point in the interstitial space so an extra length of wire were spliced into it. CORRECTED ON SITE: D5 like for like permit under SROOSMKP1. Javier Soto with Tank Specialists replaced the VR 420 sensors with VR 460 sensors. The VR 460's were tested and sent monitoring console into alarm. The VR 460 sensor were replaced in the lowest point in the interstitial space in order to detect a leak at the lowest opportunity.

and calibration and maintenance records for such systems.
Violation Notes: Returned to compliance on 03/31/2017.
Violation Division: Los Angeles City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 42607
Site Name: LA COUNTY METROPOLITAN TRANSP DIV 1
Violation Date: 10-12-2018
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 03/22/2019. OBSERVATION: The ATG for T13 & 6 used as the overfill prevention system is not currently functional, it alarms the VR, but does set off the audible/visual alarm to alert the driver. CORRECTIVE ACTION: Immediately discontinue deposition of petroleum into this tank until the component is repaired or replaced by a properly licensed, trained, and certified contractor under permit and inspection of the CUPA. If the failed component canG t be replaced immediately, there is a possibility that T13 & 6 UST system may be red tagged to prevent fuel inputs.

Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 07/05/2019. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO inspections on 4/22/2019 and 1/25/2019 were past 30 days since last the previous DO inspection which happened on 3/14/2019 & 12/112018 respectively. Tank owner/operator did not fill in name in Section VI. CORRECTIVE ACTION: Ensure DO inspections are occurring at least every 30 days and have tank owner/operator print his name on the DO reports in Section VI.

Violation Program: UST
Violation Source: CERS

Site ID: 42607
Site Name: LA COUNTY METROPOLITAN TRANSP DIV 1
Violation Date: 05-29-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/05/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Facility did not test overfill protection before the October 13th 2018 deadline. CORRECTIVE ACTION: Overfill protection was tested on 10/12/2018 during monitor cert by Javier Soto with Tank Specialists. T2 (#6) 87 did not have a flapper valve. Facility pulled a permit to install a new flapper valve which was installed by Wayne Perry on 3/14/2019. Wayne Perry was unable to measure the ball float in T2 (#6) 87 to ensure the ball float is set higher than the flapper valve. Have a technician pull the ball float in T2 (#6) 87 to ensure the ball float is set higher than the flapper and if not remove the ball float so it does not interfere with the flapper valve function.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-29-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: LAFD Inspector Christopher Young on site this date 10/12/2018 to conduct routine inspection of underground storage tank facility. Monitoring System components were observed and verified this date. Consent to enter, inspect and take photographs was given on this date by Roger Uhden, Senior Environmental. Tank 1, 2, & 4 are located off of Alameda St south off of 6th st near the exit of the property. T3 is located Northwest side of property behind bus mechanics depot. Monitoring system certification and line test was conducted at this time. Monitoring certification was performed by Javier Soto with Tank Specialists, Monitoring System components were observed and verified on this date. Tester provided the following certifications: Javier Soto ICC: #8807602 Exp: 10/23/2019 VR: #B41506 Exp: 6/7/2020 VMI: #3070 Exp: 11/2/2019 The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs [Truncated]

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
