Completed Document Type: Removal Action Workplan
Completed Date: 10/21/2004
Comments: The RAW proposes to address the lead & arsenic contaminated soil by placing a four-inch asphalt cap on the property area (15,000 sq.ft.) and removing soil from nine impacted areas at the Site boundary. Implementation is scheduled for end of January 2005.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/15/2003
Comments: The Remedial Investigation is approved. The RI involved sampling of lead and other metals, and volatile organic compounds, particularly tetrachlorethene and 1,1,1-trichloroethane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/30/1998
Comments: Completed a Preliminary Assessment (PA) with sampling of the site under contract with U.S. EPA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/18/1997
Comments: Soil removal (excavation) of lead-contaminated soils. The Implementation Report for completion of the Emergency Removal Action by Quemetco at Area 3 (Coast Produce Warehouse) and Area 4 (Residential property at 2151 E. 14th Street) was approved. An estimated 120 tons of contaminated lead was excavated and disposed of off-site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: UPRR: A removal action workplan (RAW-UPRR) was approved for Union Pacific Railroad track areas along Lemon Street (between 10th & 14th Streets). These areas are designated as Areas 1 & 2. A Notice of Exemption was also filed with the OPR as required by the CEQA laws and guidelines. The RAW-UPRR included excavation, treatment and

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

disposal of contaminated soils in the neighboring railroad right-of-way (track) areas of the International Lead Company site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/25/1998
Comments: Excavation, treatment and disposal of 2,500 tons of metal contaminated soil from the UPRR rail track areas. The Implementation Report of Emergency Removal Action by Dames & Moore for Areas 1 and 2 was approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: A removal action workplan (RAW-QUEMETCO) which proposed excavation and disposal of contaminated soils, was approved for Areas 3 and 4 (perimeter of Property and residential property). A Notice of exemption was also filed with the OPR as required by the CEQA laws and guidelines.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 11/07/1994
Comments: DTSC received an information letter for 3 possible hazardous substance release sites allegedly associated with Quemetco/ RSR Corporation, a lead smelting company.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 02/10/2006
Comments: Workplan for additional removal of soil is approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 05/26/1998
Comments: Workplan to delineate soil contamination approved

Completed Area Name: PROJECT WIDE

Manufactured Gas Plants:

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide,polycyclic aromatic hydrocarbons and heavy metals

Environmental Interest/Information System
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

ROYAL PLATING CO (Continued) **1000148255**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Manufactured Gas Plants:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were weere discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domesttic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a stanndby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Southern California Gas has entered into a consent order with DHS for oversight/monitoring of its cleanup efforts. DHS has budgeted $50,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with site cleanup.
Site Description:	The Olympic Base facility, currently owned by Southern California Gas Company, is the site of a former oil gasification "towne gas" plant.
Hazardous Waste Desc:	The wastes are generally characterized as polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Other constituents of concern are cyanide, lead, and semivolatile organics. Soil contamination is present at the site from the surface to a depth of 10 to 15 feet in both the northern and southern portions of the site.
Threat To Public Health & Env:	The primary concern is potential contamination of ground water. Usable ground water lies approximately 200 feet below the ground surface and the water table may rise to only 100 feet below the site. Ground water contamination has not been verified. Surface soil contamination may migrate offsite due to airborne particulates.
Site Activity Status:	The Southern California Gas Company has completed a remedial investigation/feasibility study.

Background Info:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were were discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs).

The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domestic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a standby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility.

A Consent Order was signed in December 1986, which addressed the work needed to complete the Remedial Investigation/-Feasibility Study (RI/FS) process. The RI report was approved by the Department on September 17, 1987. The RI found that soil from about 2 to 12 feet below ground surface is contaminated. The contaminants are not readily vaporized, nor do they enter aqueous phase solution. Groundwater aquifers beneath the site are unsaturated to a depth of 90 feet. Air monitoring at the site does not indicate that the contaminants are emitting vapors to the air. SCG then submitted a FS report in May 1988. DHS has reviewed the FS report and requested a full Health Risk Assessment (HRA) based on appropriate biological receptors and exposure pathways on October 20, 1988. The HRA was approved by the Department on June 4, 1990. The FS was revised by SCG and the report approved on July 19, 1990.

The RP submitted a draft RAP on August 20, 1990, as requested by the Department. The Department has published a fact sheet on the findings of the RI/FS. The RAP meeting with the community

OLYMPIC BASE (Continued) **S105689611**

was held on November 17, 1990 and the RAP was subsequently approved in January of 1991.
The RAP proposed an asphalt cap on the site, groundwater monitoring, and a deed restriction. Groundwater monitoring is necessary as the region the site is located in is currently experiencing a drought; however, if this should change the groundwater table will rise, possibly impacting the conclusions of the RI. The deed restriction, protected the integrity of the cap by limiting land use and excavation of the waste.
The Department directed the RP to prepare a Remedial Design and Implementation (RD&I) plan. The plan included engineering specifications for the asphalt cap, permits, and a schedule for completion of the cap. The cap will be repaired as necessary; necessary; it is expected to require replacement every ten years. This operation and maintenance program will last for 20 years.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Corrective Action Summary:
Event date: 06/30/1995
Event: RFA Completed

Event date: 06/30/1997
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this

SOUTHERN CALIF GAS OLYMPIC BAS (Continued) **1000166039**

conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 06/30/1997
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 07/09/2010
Event: CA550RC

Event date: 07/09/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 07/09/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/30/2011

Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 10/10/2002
Comments: Tosco Corporation and DTSC signed and executed a VCA to charaterize and cleanup Block L of Sector C within the Aliso Street Former MGP Completion of characterization and cleanup cleanup is expected during the summer of 2003.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/10/2003
Comments: Block L - The Special initial Study described the proposed polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil remediation activity and its insignificant impact upon the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report

SO CAL GAS/ALISO SECTOR C, BLOCK L (Continued) **S107616211**

Completed Date:	02/27/2003
Comments:	Block L - PEA-E investigated the former manufactured gas plant and petroleum transfer site. VOCs, SVOCs, PAHs and hydrocarbons were found to impact the site. A Renivak Action Work Plan will address clean up of this contamination. PEA-E completion was delayed due to further Site Characterization activities and delays in receiving the Human Human Health Risk Assessment reports associated with the PEA-E.

Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	07/26/2004
Comments:	Block L - Polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil was excavated and thermally treated offsite. Site has been backfilled with clean soil. Subsurface contamination did not extend laterally to offsite areas. Contamination was found, as expected, at the ground water table, and will be addressed in a later, regional effort. As the soil was remediated to industrial cleanup goals, a deed restriction will limit use of the site, preventing residential or other sensitive uses on this parcel.

SO CAL GAS/ALISO SECTOR C, BLOCK L (Continued) **S107616211**

Alias Type: Envirostor ID Number

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 09/10/2003
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 12/07/2004
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 10/10/2002
Comments: Tosco Corporation and DTSC signed and executed a VCA to charaterize and cleanup Block L of Sector C within the Aliso Street Former MGP Completion of characterization and cleanup cleanup is expected during the summer of 2003.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/10/2003
Comments: Block L - The Special initial Study described the proposed polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil remediation activity and its insignificant impact upon the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/27/2003
Comments: Block L - PEA-E investigated the former manufactured gas plant and petroleum transfer site. VOCs, SVOCs, PAHs and hydrocarbons were found to impact the site. A Renivak Action Work Plan will address clean up of this contamination. PEA-E completion was delayed due to further Site Characterization activities and delays in receiving the Human Human Health Risk Assessment reports associated with the PEA-E.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/25/2004
Comments: Fieldwork completed

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 01/14/2014
Comments: Complete

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

SO CAL GAS/ALISO SECTOR C, BLOCK L (Continued) **S107616211**

Completed Document Type: Land Use Restriction
Completed Date: 12/03/2004
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/26/2004
Comments: Block L - Polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil was excavated and thermally treated offsite. Site has been backfilled with clean soil. Subsurface contamination did not extend laterally to offsite areas. Contamination was found, as expected, at the ground water table, and will be addressed in a later, regional effort. As the soil was remediated to industrial cleanup goals, a deed restriction will limit use of the site, preventing residential or other sensitive uses on this parcel.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 01/01/2001
Comments: Not reported

Future Area Name: PROJECT WIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/16/2014

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/16/2014

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/16/2014

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Varies

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

West Map:	34118-A3 HOLLYWOOD, CA
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

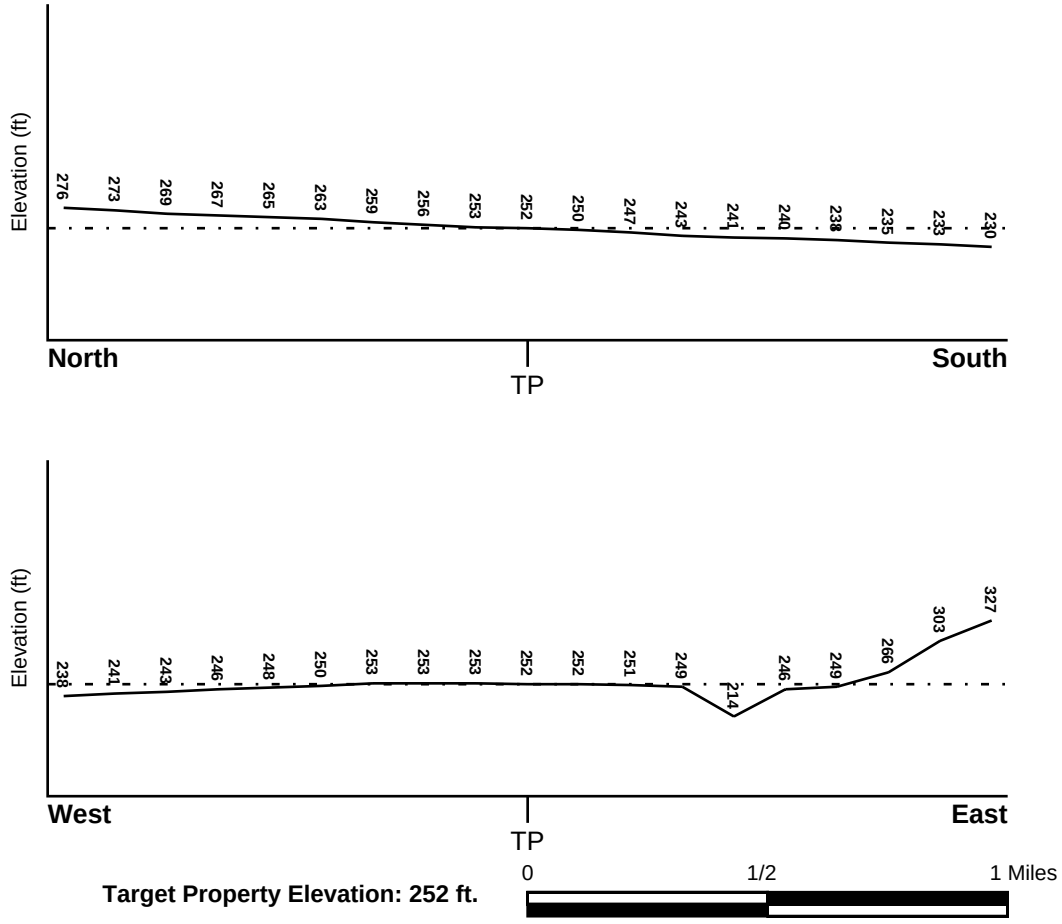
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NW
Site Name:	SO CALIF RAPID TRANSIT DISTRICT
Site EPA ID Number:	CAD981989841
Groundwater Flow Direction:	GENERALLY SE.
Measured Depth to Water:	approximately 37 feet.
Hydraulic Connection:	The uppermost aquifer at the site is the Gaspur aquifer. The Gaspur aquifer is hydraulically connected to underlying aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SSE	Not Reported
2	1/2 - 1 Mile East	SW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

PERMIT to OPERATE

9150 FLAIR DRIVE, EL MONTE, CALIFORNIA 91731

PERMIT NO.
M81073

Operation under this permit must be conducted in compliance with all information included with the initial application and the initial permit conditions. The equipment must be properly maintained and kept in good operating condition at all times. In accordance with Rule 206, this Permit to Operate or copy must be posted on or within 8 meters of equipment.

APPL. # 114539 CO. ID. 017534
SECTOR

LEGAL OWNER OR OPERATOR: PROGRESSIVE PRODUCE CO
EQUIPMENT LOCATED AT: 1266 E. 6TH ST
LOS ANGELES, CA 900210000

EQUIPMENT DESCRIPTION AND CONDITIONS:

R461 GASOLINE FUELING & DISPENSING FACILITY CONSISTING OF :
1. 01 GASOLINE STORAGE TANKS
2. 01 GAS DISPENSING NOZZLES
3. 03 VAPOR RECOVERY SYSTEM - BALANCE

PERMIT CONDITION:
PHASE I AND PHASE II VAPOR RECOVERY SYSTEMS MUST BE IN FULL OPERATION, WHENEVER THIS FACILITY IS IN USE. SUCH SYSTEMS MUST BE INSTALLED, OPERATED AND MAINTAINED TO MEET ALL CARB CERTIFICATION REQUIREMENTS.

This initial permit must be renewed by 10/16 ANNUALLY unless the equipment is moved, or changes ownership. If billing for annual operating fee is not received by expiration date, contact office above.

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26 of the Health and Safety Code of the State of California or the Rules of the Air Quality Management District. This permit cannot be considered as permission to violate existing laws, ordinances, regulations or statutes of other government agencies.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXHIBIT "A"

PARCEL 1: (Parcel A of Wholesale Street)

Lot "A" of Tract 1182, in the City of Los Angeles, County of Los Angeles, State of California, as per map recorded in Book 17, Page 124 of Maps, in the office of the County Recorder of said County.

PARCEL 2: (Parcel B of Wholesale Street)

Lot "I" of The Industrial Tract, in the City of Los Angeles, County of Los Angeles, State of California, as per map recorded in Book 5, Page 56 of Maps, in the office of the County Recorder of said County.

PARCEL 3: (Parcel III of Sixth and Alameda)

That portion of City Lands of Los Angeles, as per map recorded in Book 2, Pages 504 and 505 of Miscellaneous Records, in the office of the County Recorder of Los Angeles County, bounded and described as follows:

Beginning at a point in the East line of Alameda Street where the same is intersected by the South line of 60 foot strip of land conveyed by Caroline Shafer, to the City of Los Angeles for Sixth Street, by deed recorded in Book 2110, Page 131 of Deeds; thence along the South line of Sixth Street, North 88° 35' 30" East to the West line of Mill Street, as shown on map of The Industrial Tract, in the City of Los Angeles, County of Los Angeles, State of California, recorded in Book 5, Page 56 of said Maps; thence along the West line of Mill Street, South 04° 52' East 336 feet, more or less, to the Northeast corner of Lot "I" of said Industrial Tract; thence Westerly along the Northerly line of said Lot "I" and along the dividing line between the lands of Alice Shafer and Caroline Shafer, as partitioned between them, by deeds recorded in Book 755, Pages 57 to 60 of Deeds, 1177 feet, more or less, to a point in the Easterly line of Alameda Street; thence Northerly along said street line to the place of beginning.

EXCEPTING from Parcels 1, 2 and 3 above, all oil, mineral, gas and other hydrocarbon substances below a depth of 500 feet under the surface of the land, but without the right of surface entry or any other use of the land above such 500 foot depth, as reserved by Southern Pacific Transportation Company, in deed recorded October 12, 1988 as Instrument No. 88-1634144, Official Records.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR part 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Steve W. Anderson, Environmental Professional
Staff Scientist / Site Assessor

Dawn Merrill, REA, Environmental Professional
Client Manager / Senior Reviewer

1.2 Findings and Conclusions Summary

ATC Associates Inc. (ATC) has performed this Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property.

8.5	**Mold Screening**	No					
8.6	**Additional User Requested Conditions**	No					

1. The property, under the name of former tenants Albert's Organics and Progressive Produce, was listed on the Facility and Manifest Database (HAZNET) as a generator of manifested waste. According to the HAZNET listing, in addition to waste oil, the wastes generated included liquids with halogenated organic compounds. According to the 2001 ESA by EMG, Progressive Produce formerly performed truck maintenance on the property. It is probable that the halogenated compounds refer to parts washer solvents. HAZNET does not track violators and, based on the absence of reported spills or the exact location of waste generation and storage, the reference to halogenated compounds at the property is not considered to represent a *recognized environmental condition*. The property is also listed as a registered underground storage tank (UST) facility. The property is not listed as a leaking UST (LUST) site.
2. According to Los Angeles Fire Department (LAFD) records, one 10,000-gallon diesel UST and one 10,000-gallon unleaded gasoline UST were removed from the western end of the property in 1990. As indicated in footnote 1, the property is not listed as a LUST site. No soil contamination was identified at the time the USTs were removed;

however, no closure letter was present in the LAFD file. Based on the absence of reported releases, the former USTs are not considered to represent a *recognized environmental condition* at this time.

3. Two pad-mounted and three pole-mounted Los Angeles Department of Water and Power (LADWP) transformers are located on the property. Additionally, 14 pole-mounted transformers are located above the sidewalks that border the property along East Sixth Street and Mill Street. Based on the age of the property improvements (1962 and 1973), it is possible that some of these contain polychlorinated biphenyls (PCBs). No evidence of leaks or damage were observed.
4. No direct evidence of septic systems was observed; however, the earliest confirmed record of a sewer connection at the property was 1922. Since the property has been at least partially developed since at least 1894, it is likely that some type of septic system has been present in the past.
5. Previous surveys have identified asbestos in at least four types of flooring and in roofing materials; however, it is possible that these specific asbestos-containing materials (ACMs) were removed. Nonetheless, suspect ACM was observed on the property. Based on the age of the property improvements (1962 and 1973), it is possible that ACM is present.
6. Based on the age of the property improvements (1962 and 1973), it is possible that lead-based paint (LBP) has been used on the property in the past. Apart from one area of damaged paint observed on the eastern exterior wall of the southern building, painted surfaces appeared to be in good condition.

Records Review

- No indication of a *recognized environmental condition*, *historical recognized environmental condition* or *de minimis condition* was identified for the property or adjoining properties during the review of review of property records.

- According to historical records reviewed, including Sanborn® fire insurance maps, city directories, aerial photographs, topographic maps, Building Department records, and information provided in prior environmental assessment reports, the northwestern quarter of the property was occupied sometime prior to 1894 by a lumberyard. The property underwent a complex sequence of development beginning in the early 1900s. By 1906, the lumberyard occupied approximately the western two-thirds of the northern half of the property and a large warehouse was present on the southeastern quarter of the property. The remainder of the property was vacant. The north-adjacent property was occupied by additional lumber yards and a box factory. The south-adjacent property was developed with several industrial buildings, including the Union Ice Company, which is still operating currently. Also circa 1906, two multi-tenant warehouse structures were constructed across the central portion of the property. Circa 1909, the northern edge of the property along Sixth Street was developed with a long, multi-tenant warehouse. This appears to have been extended in length the following year until it occupied nearly the entire width of the property between Alameda and Mill Streets. During the 1920s and 1940s several smaller structures were built on the property, including a scale house and toilet, a rooming house for employees and additional commercial storage and offices. The references to these structures in building permits cannot be correlated with certainty to the structures shown on Sanborn Maps. As shown on a 1950 Sanborn Map, at least six warehouse structures, five of which were multi-tenant, are shown on the property along with several very small buildings, including a restaurant, a shop, and what are believed to be toilets. Most of the occupants were produce warehouses, although at least five machine shops are discernible among the tenant spaces of the northern building, a building material warehouse and a chemical manufacturer are described on the two middle warehouses. The chemical manufacturer is not listed on the 1954 Sanborn Map, although the machine shops continue to be depicted. In 1962, the current building along Sixth Street (in its original configuration as two buildings), has been built. By 1970, the eastern half of the current southern building had been constructed. In 1973, the remaining older buildings were demolished

and the two northern buildings were connected and converted into a single structure. By at least 1976, the property appeared essentially as it does currently.

- The property address is listed as a registered UST facility on the Statewide Environmental Evaluation and Planning System (SWEEPS), California Facility Inventory Database (CA FID), and the Historical Underground Storage Tank (HIST UST) lists. The USTs were operated by a former tenant, Progressive Produce, located in the unit addressed as 1266 East Sixth Street. The property is not listed as a LUST site. According to historical building permits and fire department records, the USTs were removed in 1990. No impacted soils were identified; however, no closure letter appears to have been issued for the UST removals. The property is also listed on the Facility and Manifest Data (HAZNET) database as having generated manifested waste. The wastes generated were described as liquids with halogenated organic compounds (generated by Progressive Produce) and unspecified oil-containing waste (generated by a former occupant at 1330 East Sixth Street identified as Albert's Organics). HAZNET does not track violators and the presence of a facility on this database does not necessarily indicate that a problem exists at that facility. Progressive Produce reportedly conducted truck repair activities on-site. It is therefore considered likely that the halogenated organic wastes generated by Progressive Produce were spent solvents from a parts washer. Based on the nature of the wastes generated, the fact that neither listed tenant is currently present on the property and former waste storage locations are unknown in any case, the HAZNET listings are not considered to represent an environmental concern to the property.

- Based on distance, location with respect to the inferred groundwater gradient, medium affected and/or regulatory status, none of the nearby or adjacent sites identified on regulatory databases are considered to pose a significant risk of environmental impairment to the property.

- A 2001 Phase I ESA prepared by EMG, citing two previous asbestos surveys conducted in 1989 and 2000, identified asbestos in three types of resilient floor tile, one type of resilient sheet flooring, and roofing materials. The flooring materials were not observed by EMG during their site reconnaissance. It is not known what specific roofing materials were found to contain asbestos or whether they were subsequently abated.

- ATC's review of published radon data indicates that the property is located in a county designated by the EPA as Zone 2 for radon propensity. Zone 2 areas have a predicted radon concentration of greater than or equal to 2.0 picoCuries per liter of air (pCi/L) and less than or equal to 4.0 pCi/L. According to statistical data provided by Environmental Data Resources, Inc. (EDR), of Milford Connecticut, an EPA survey of 63 sites in Los Angeles County revealed two percent with radon concentrations in excess of 4.0 pCi/L. Based on these statistics and the industrial use of the property, radon is not considered to represent an environmental concern to the property and no additional investigations are recommended at this time.

- According to a recent annual water quality report, the potable water supplied to the property meets or exceeds all drinking water standards, including those for lead. Based on the fact that the water supplied to the property is from the municipality, lead in drinking water testing was not conducted for this Phase I ESA.

- According to the United States Fish and Wildlife Service (USFWS) wetlands mapper website, http://nwi.fws.gov, the nearest designated wetland is the channel of the Los Angeles River, located approximately 0.34 mile to the east-northeast of the property. Based on distance and the nature of the wetland, it is not considered to represent an environmental concern to the property.

Property Reconnaissance

- No indication of a *recognized environmental condition* or *historical recognized environmental condition* was visually or physically observed on the property or adjoining properties during the property reconnaissance.

- Chemical use on the property consists primarily of soaps and degreasers and propane for forklifts. Lesser amounts of paint, water treatment chemicals, a chemical ripener, and oil were noted. Soaps and degreasers were commonly stored in 55-gallon drums, often not within secondary containment. One 5-gallon container of oil (presumably waste oil) was observed on the sidewalk along the eastern side of the property. No stains were observed, but the container was placed next to a gutter storm drain. Additionally, what appeared to be a half-gallon container of motor oil had been spilled at the curb along Sixth Street and the release had entered the gutter, although no storm drain was observed nearby. This release is considered to be a *de minimis condition*.

- Two pad-mounted and three pole-mounted LADWP transformers are located on the property. Additionally, 14 pole-mounted transformers are located above the sidewalks that border the property along East Sixth Street and Mill Street. Based on the age of the property improvements (1962 and 1973), it is possible that some of these contain polychlorinated biphenyls (PCBs). No evidence of leaks or damage were observed.

- Suspect ACMs observed by ATC during the current site reconnaissance included wallboard/joint compound, acoustical ceiling panels, acoustical ceiling tiles, resilient floor tile, resilient sheet flooring, flooring mastics, baseboard and baseboard mastics, and roofing materials. Based on the age of the property improvements (1962 and 1973), it is possible that asbestos is present on the property. All suspect ACMs, including all friable materials, were observed to be in good condition.

Environmental Sampling

- No sampling was performed for this ESA.

1.3 Significant Data Gap Summary

The following is a summary of *significant data gaps* identified in this report.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		**Description**
3.5	**Current Uses of Adjoining Properties**	No *significant data gaps* identified.
4.2	**Environmental Liens or Activity and Use Limitations (AULs)**	No *significant data gaps* identified.
5.1	**Standard Environmental Records**	No *significant data gaps* identified.
5.2	**Physical Setting Sources**	No *significant data gaps* identified.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		**Description**
5.3	**Historical Records Sources**	No *significant data gaps* identified.
6.1	**Methodology and Limiting Conditions**	No *significant data gaps* identified.
7.0	**Interviews**	No *significant data gaps* identified.

1.4 Recommendations

Based on information collected from the Phase I ESA, ATC offers the following recommendations:

- ATC recommends that all suspect and identified ACMs be managed under an asbestos operations and maintenance (O&M) plan.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of ASTM Standard Practice E 1527-05 in connection with the property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in accordance with ASTM Standard Practice E 1527-05, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.

- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.

- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, non-hazardous solid wastes and wastewater.

- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties on the property.

- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.

The scope of the assessment also included consideration of the following environmental issues or conditions that are beyond the scope of ASTM Standard Practice E 1527-05:

- Mold screening to report the findings of a baseline survey of readily observable mold and conditions conducive to mold on the property identified by limited interview, document review and physical observation and to provide an opinion on whether an identified condition warrants further action. The scope of work for the mold screening was intended to be consistent with ASTM Standard Practice E 2418-06: S*tandard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process*. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to ATC in a timely manner. The physical observations were limited to certain heating, ventilation

and air conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, ATC observed the HVAC equipment room(s) and readily accessible mechanical rooms and, in buildings with package units in the ceiling. The mold screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The mold screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the mold screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Asbestos, consisting of the identification of suspect asbestos-containing material (ACM) in accessible areas and providing an opinion on the potential presence of asbestos based on the construction date of buildings on the property and visual observation of the condition of suspect ACM.

- Radon, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property.

- Lead in drinking water, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets or exceeds drinking water standards for lead.

- Lead-based paint (LBP), consisting of providing an opinion on the potential for LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.

- Wetlands, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.

- Flood plain, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.

2.3 Significant Assumptions

Any assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.

- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.

- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-05 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or

quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The *Environmental Professional* Statement is intended to document ATC's opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-05 and the scope of work for this assessment.

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E 1527-05, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-05 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Lowe Enterprises Investment Management, Inc., and any of its affiliates, and third parties authorized in writing by Lowe Enterprises Investment Management, Inc. and ATC, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of ATC, is at the sole risk and expense of such third party.

ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied. Unless otherwise agreed upon in writing by ATC and a third party, ATC's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of $1,000,000.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property consists of three contiguous parcels encompassing approximately 14.57 acres of land developed with two multi-unit warehouse buildings addressed as 1206-1338 East Sixth Street and 1205-1321 Wholesale Street. The buildings have a combined area of approximately 287,376 square feet. A legal description of the property was included with a lien search report for the property prepared by EDR, a copy of which is included in Appendix L. The Assessor's Parcel Numbers for the property are 5164-010-003, -004, and -005.

3.2 Surrounding Area General Characteristics

The surrounding area is generally level and developed with a mixture of commercial and industrial uses. The specific adjacent property uses are discussed in Section 3.5.

3.3 Current Use of the Property

The property is developed with two, one-story multi-unit warehouse buildings, associated paved yards and parking areas. The property is occupied almost entirely by food distributorships. The two exceptions are a vacant space and a toy distribution warehouse. The tenants are summarized in the following table:

East Sixth Street	
Occupant	**Address**
Heath & Lejeune	1206
United Potato	1230
Green West (A); Asian Fresh (B); Quan 9 (C)	1266
Valley Fruit & Produce	1320
Asia Jumbo	1334-1338
Wholesale Street	
Occupant	**Address**
Harvest Sensation	1205
Astro Food	1211
America Growers	1215
Eureka	1219
Vacant	1221
Delta Fresh	1225
A&F	1301A
T.G.H.	1301B (S ½)
Paramount Export	1305 and 1301B (N ½)
KC Specialties	1311
Always Green	1317
American Produce (aka Chiquita Fresh)	1321
Seashore West	1321B

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

PROPERTY IMPROVEMENTS	
Size of Property (approximate)	14.57 acres
Topography of Property	Generally level
Adjoining and/or Access/Egress Roads	East Sixth Street to the north; Mill Street to the east; and Alameda Street to the west. Wholesale Street, which is not visible as such, runs east-west across the southern parking lot parallel to the southern property building.
Paved Areas (including parking)	The entire property, apart from the building footprints, is paved with asphalt or concrete.
Unimproved Areas	None
Landscaped Areas	None
Surface Water	None
Potable Water Source	Los Angeles Department of Water and Power (LADWP)
Sanitary Sewer Utility	City of Los Angeles
Storm Sewer Utility	City of Los Angeles
Electrical Utility	LADWP
Natural Gas Utility	Southern California Gas
Current Occupancy Status	Approximately 96%
Unoccupied Buildings/Spaces	One (1221 Wholesale Street)
Number of Occupied Buildings	Two
General Building Description	Distribution warehouses
Number of Floors	One
Total Square Feet of Space (approximate)	287,376
Construction Completion Date (year)	1962 and 1973 (approximate)
Construction Type	Concrete tilt-up
Interior Finishes Description	Offices: walls: wallboard/joint compound, ceramic tile; ceilings: wallboard/joint compound, acoustical ceiling panels, and acoustical ceiling tiles; floors: resilient floor tile, resilient sheet flooring, carpeting, ceramic tile. Warehouses: unfinished concrete walls and floors; ceilings: exposed wooden beams with insulating foil.
Exterior Finishes Description	Painted concrete
Cooling System Type	Offices: None or window-mounted air conditioning units, supplemented by a few roof-mounted electric package units. Warehouses: none, except for cold storage rooms cooled by large dock-mounted refrigeration units and one cooling tower.
Heating System Type	None
Emergency Power	None

3.5 Current Uses of Adjoining Properties

The current uses of the adjoining properties were observed as follows:

North – Adjacent to the property to the north is East Sixth Street, across which are small- to mid-sized commercial and light-industrial industrial buildings. These include, from west to east (all of which are addressed on East Sixth Street), an office (1205), Garlic & Ginger Wholesale Distributors (1217), a small paved yard, a light-industrial building with no business name (1235), Downtownartistspace.com (1247-1259), a small industrial building with a faded sign saying 'Economy' (1261), a small industrial building with no name (1269), an office building with a sign saying 'film location' (1275), Altronics Import & Manufacturers (1281 and 1281½), an office building with no visible business name or address, a small industrial building under construction, and a large multi-tenant industrial building with no visible business name (1330).

East – Adjacent to the property to the east is Mill Street, across which is a large multi-story commercial building occupied by a firm identified as Iron Mountain (1340 East Sixth Street).

South – Adjacent to the south of the property is an abandoned railroad right-of-way across which are industrial buildings, which include, from west to east, Union Central Cold Storage (1525 Industrial Street), Fresco Foods (1567 Industrial Street), a warehouse with no name or address, a warehouse with no visible name (1581 Industrial Street), Drecar Enterprises Inc. (1601 Industrial Street), IBC Produce (1717 Industrial Street) and a small parking lot.

West – Adjacent to the property to the west is Alameda Street, across which are a municipal bus yard and associated office building (1130 Sixth Street and 624 South Central Avenue).

Two adjacent addresses, 1275 East Sixth Street, under the name of Aesthetic Frame Design, and 1525 Industrial Street, under the name of Union Central Cold Storage Inc., were listed as Resource Conservation and Recovery Act (RCRA) small-quantity generators of hazardous waste. A historical adjacent address, 1301 East Sixth Street, is listed as a RCRA Non-Generator. The east adjacent property at 1340 East Sixth Street, under the name of Metropolitan Distribution Center, is listed as a RCRA Non-Generator and as a registered UST site on the California Facility Inventory Database (CA FID), the Historical UST list (HIST UST), and the Statewide Environmental Evaluation and Planning System (SWEEPS). The west-adjacent bus station is listed as a registered UST facility on the UST, SWEEPS, and CA FID lists and as a leaking UST (LUST) site. The potential for these adjacent sites to impact the property adversely is discussed in Sections 5.1.1 and 5.1.2. No obvious concerns were observed on the remaining adjacent properties.

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Lowe Enterprises Investment Management, Inc. (User) with regard to the Phase I ESA. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

The User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

The User identified no environmental liens or AULs pertaining to the property.

Additionally, ATC requested a search for environmental liens and AULs affecting the property from EDR. The lien report did not identify environmental liens or AULs associated with the property. A copy of the lien search report is included in Appendix L.

4.3 Specialized Knowledge

The User identified no specialized knowledge regarding *recognized environmental conditions* associated with the property.

4.4 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

The User identified themselves as the property owner. A site map with most tenants indicated was also provided. The Property Manager was identified as Ms. Denise Lieberson, with Lowe Enterprises Real Estate Group.

4.6 Reason for Performing Phase I ESA

The User indicated that this ESA was being performed in connection with a proposed sale of the property.

4.7 Other User Provided Documents

Per ASTM Standard Practice E 1527-05, ATC obtained the documents listed below from the User. Further discussion may be found in Section 5.3.9 and relevant sections of this report.

OTHER USER PROVIDED DOCUMENTS		
Title	**Date (if known)**	**Author and/or Source (if known)**
Phase I Environmental Site Assessment of 6th Street and Alameda, 1206-1338 East 6th Street and 1205-1321 Wholesale Street, Los Angeles, California 90021	March 8, 2001	EMG

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by EDR, was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the property. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as a being within the approximate minimum search distance from the property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Property Listed?**	**Additional Sites Listed**
Federal National Priorities List (NPL)	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	No	0
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	2
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	0
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0
Federal RCRA Generators	Property & Adjoining	**Yes**	2
Federal Institutional Control/Engineering Control Registry	Property	No	N/A
Federal Emergency Response Notification System (ERNS) list	Property	No	N/A
State and Tribal NPL [RESPONSE and Bond Expenditure Plan (BEP)]	1 mile	No	2
State and Tribal CERCLIS (ENVIROSTOR)	½ mile	No	5
Facility and Manifest Data (HAZNET)	Property	**Yes**	N/A
State and/or Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	0
State and Tribal Leaking Underground Storage Tanks (LUST)	½ mile	No	10
California Spills, Leaks, and Incident Clean-Up (CA SLIC)	½ mile	No	2

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Property Listed?**	**Additional Sites Listed**
State and Tribal Registered Underground Storage Tanks (UST); Historical UST (HIST UST) list; California Facility Manifest Database (CA FID); and Statewide Environmental Evaluation and Planning System (SWEEPS)	Property & Adjoining	**Yes**	2
State and Tribal Institutional Control/Engineering Control Registry	Property	No	N/A
State and Tribal Voluntary Cleanup Site	½ mile	No	3

5.1.1 Federal Agency Database Findings

The property, under the name of a former tenant, Los Angeles Times, was listed on the RCRA Non-Generator database. The Los Angeles Times reportedly formerly occupied 1321 Wholesale Street. Non-generators do not presently generate hazardous waste (but presumably were former generators). No violations were of record. Based on the absence of violations and the fact that this tenant is no longer present, the listing of the property on the RCRA Non-Generator database is not considered to represent an environmental concern.

Two adjacent properties were listed on federal databases, as follows:

Aesthetic Frame Design
1275 East 6th Street
Los Angeles, California 90021
Distance/Direction-Gradient: Adjacent to the north / cross- to upgradient
Databases: RCRA Small-Quantity Generator
Regulatory Data Summary: No RCRA violations were reported.
Discussion: Based on the regulatory status and location with respect to the inferred groundwater gradient, the presence of the adjacent property on the RCRA small-quantity generator list is not considered to represent a concern to the property.

Union Central Cold Storage Inc.
1525 Industrial Street
Los Angeles, California 90021
Distance/Direction-Gradient: Adjacent to the south / cross-gradient
Databases: RCRA Small-Quantity Generator
Regulatory Data Summary: No RCRA violations were reported.
Discussion: Based on the regulatory status and location with respect to the inferred groundwater gradient, the presence of the adjacent property on the RCRA small-quantity generator list is not considered to represent a concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the remaining sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the property.

5.1.2 State and Tribal Database Findings

The property was listed on the HIST UST, CAL FID UST, and SWEEPS UST databases of registered USTs. The USTs were operated by Progressive Produce, formerly located in 1266 East Sixth Street. The property is not listed as a LUST site. According to historical building permits and fire department records (see Sections 5.3.7 and 5.1.3, respectively), the USTs were removed in 1990. No impacted soils were identified; however, no closure letter appears to have been issued for the UST removals. The property is also listed on the HAZNET database as having generated manifested waste. The wastes generated were described as liquids with halogenated organic compounds (generated by Progressive Produce) and unspecified oil-containing waste (generated by a former occupant at 1330 East Sixth Street identified as Albert's Organics). HAZNET does not track violators and the presence of a facility on this database does not necessarily indicate that a problem exists at that facility. According to a 2001 ESA of the property prepared by EMG (see Section 5.3.9), Progressive Produce formerly conducted truck repair activities on-site. It is therefore considered likely that the halogenated organic wastes generated by Progressive Produce were spent solvents from a parts washer. Based on the nature of the wastes generated, the fact that neither listed tenant is currently present on the property and former waste storage locations are unknown in any case, the HAZNET listings are not considered to represent an environmental concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the state or tribal agency databases are considered to represent a likely past, present or material threat of release on the property.

5.1.3 Local Environmental Records Sources

Los Angeles County Public Health Investigation (PHI)

ATC requested a search of available records pertaining to hazardous materials use and hazardous waste generation at the property from the PHI. The PHI responded that they have no records for the property addresses.

California Environmental Protection Agency, Department of Toxic Substances Control (DTSC)

According to the DTSC website, http://www.envirostor.dtsc.ca.gov, the DTSC has no files for the property nor any adjacent property.

Los Angeles Fire Department (LAFD)

ATC reviewed the UST file for the property at the LAFD. Two 10,000-gallon USTs, one for gasoline and the other for diesel, were removed from the property in May of 1990. Three soil samples were collected from beneath each UST and analyzed for total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as diesel (TPHd), as appropriate, and for the fuel constituents benzene, toluene, ethylebenzene, and total xylenes (BTEX). All soil samples had non-detectable concentrations for all analytes. No closure letter was present in the file.

ATC also requested a search of available records pertaining to USTs for all current and selected historical addresses. The LAFD responded that they had no records pertaining to the remaining property addresses.

Regional Water Quality Control Board (RWQCB)

According to the RWQCB GeoTracker website, http://geotracker.swrcb.ca.gov, no LUST sites or Spills, Leaks, Investigations, and Clean-Ups (SLIC) sites are located on the property.

South Coast Air Quality Management District (SCAQMD)

According to information contained on the SCAQMD website, http://www.aqmd.gov, the SCAQMD had records pertaining to two former and one current tenant, summarized as follows:

- Active permits held by American Produce (aka Chiquita) for 12 banana-ripening rooms at 1321 Wholesale Street. No violations were reported. No indications of releases of the chemical used in connection with the banana-ripening process were observed in this unit (see Section 6.2).

- An inactive permit formerly held by the Los Angeles Times for a spray booth and solvent in tenant space 1321 Wholesale Street. No violations were reported. While the former presence of a spray booth is potentially problematic, no paint stains or other indications of the former location of the spray booth were observed by ATC inside this tenant space. Accordingly, the former spray booth is not considered to represent a *recognized environmental condition*.

- A permit formerly held by Progressive Produce for gasoline dispensing operations. Progressive Produce occupied the address 1266 East Sixth Street, but it is known from diagrams that the USTs and dispensers were formerly located at the western end of the Sixth Street building. As previously discussed, based on the results of soil sampling at the time of the tanks' removal, the former USTs used by Progressive Produce are not considered to represent an environmental concern to the property.

Department of Planning and Zoning

According to the Los Angeles Zoning Department website, http://zimas.lacity.org, the property is zoned M3-1 for heavy manufacturing purposes, which appears to be appropriate for the property use.

5.2 Physical Setting Sources

5.2.1 Topography

According to the United States Geological Survey (USGS) 7.5-Minute Series Topographic map of the Los Angeles, California Quadrangle, the property is located at an approximate elevation of 249 feet above mean sea level. The area has a slope to the southwest of approximately 20 feet per mile.

A copy of the topographic map is included in Appendix A.

5.2.2 Geology

The property is situated on approximately 300 feet of unconsolidated and semi-consolidated Recent, Pleistocene-aged alluvial and marine sediments consisting of silts, sands, gravels, and clays. The upper half of this thickness is comprised of the Pleistocene Gaspur and Exposition Aquifers. These sediments overlie several thousand feet of consolidated sedimentary rocks which, in turn, rest on a probable basement complex of low-grade meta-igneous rocks of uncertain age and correlation (California Department of Water Resources, 1961; USGS, 1965).

5.2.3 Soils

According to the United States Department of Agriculture, Soil Conservation Service publication, *Report and General Soil Map, Los Angeles County*, soils of the property most likely belong to the Hanford Association. Hanford soils are over 60 inches deep, are well-drained, and have moderately rapid subsoil permeability. They have pale brown coarse sandy loam surface layers about eight inches thick, underlain by light yellowish-brown coarse sandy loam subsoil and a gravelly loamy coarse sand substratum. They are slightly acid to mildly alkaline throughout, and have an available water-holding capacity of 5.0 to 7.5 inches for 60 inches of soil depth. Shrink-swell potential is low and corrosivity for untreated steel is low.

5.2.4 Hydrology

According to information obtained from the GeoTracker website, http://geotracker.swrcb.ca.gov, the depth to groundwater at a LUST site located approximately 700 feet north of the property was approximately 97 feet below ground surface (bgs) in June of 2009. However, the presence of shallower, perched water cannot be ruled out with certainty. The direction of groundwater flow at that LUST site was reported to be toward the west-southwest.

Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

5.2.5 Other Physical Setting Sources

Flood Plain Map

According to information provided by Federal Emergency Management Agency (FEMA) website, http://www.fema.gov, the property is located in flood zone X, or areas outside of the 500-year flood zone. The community/panel number for the Flood Insurance Rate Map for the property is 06037C 1636F and the effective date is September 26, 2008.

A copy of the flood plain map is included in Appendix L.

Wetlands Map

According to the United States Fish and Wildlife Service (USFWS) wetlands mapper website, http://nwi.fws.gov, the nearest designated wetland is the channel of the Los Angeles River, located approximately 0.34 mile to the east-northeast of the property. Based on distance and the nature of the wetland, it is not considered to represent an environmental concern to the property.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

HISTORICAL USE SUMMARY				
Period	**Identified Historical Uses**		**Source(s)**	**Intervals/Comments**
	Property	**Surrounding Area**		
Prior to 1940	Vacant Commercial Institutional Industrial	Vacant Institutional Industrial	Aerial Photographs Topographic Maps Building Permits Sanborn Maps	1894 Sanborn Map is the earliest record identified. Data gaps of six years (1894-1900), six years (1900-1906), 14 years (1910-1924), and ten years (1928-1938). Site begins development for industrial purposes between 1900 and 1906. Apart from increasing development, no use changes across data gaps.
1940-1960	Industrial	Commercial Industrial Institutional	Aerial Photographs Topographic Maps City Directories Sanborn Maps	One nine-year data gap (1938-1947). No use changes across data gap.
1961-1980	Industrial	Commercial Industrial Institutional	Aerial Photographs Topographic Maps City Directories Sanborn Maps Building Permits	No data gaps. Current property buildings built 1962 and circa 1973.
1981 to present	Industrial	Commercial Industrial Institutional	Aerial Photographs Topographic Maps City Directories Building Permits	Two six-year data gaps (1981-1987) and (1996-2002). No use changes across data gaps.

Based on the absence of use changes across data gaps, the identified data gaps are not considered to have a significant impact on the determination of *recognized environmental conditions*.

5.3.1 Aerial Photographs

ATC reviewed available aerial photographs of the property and surrounding areas provided by EDR. Available aerial photographs ranged from 1928 to 2005. The following are descriptions and interpretations from the aerial photograph review.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1928, 1938 and 1947	1"=500', 1"=555' and 1"=666', respectively	**Property**: The northern two-thirds of the property is developed with three elongated multi-unit warehouse buildings and railroad spurs. The southern one-third of the property is developed with two large industrial buildings, concentrated in the eastern portion. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1956	1"=400'	**Property**: The northern two-thirds of the property is developed with three elongated multi-unit warehouse buildings and railroad spurs. The southern one-third of the property is developed with two three industrial buildings and one small square building. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1965	1"=666'	**Property**: The northernmost portion of the property along Sixth Street is developed with two elongated buildings, oriented end-to-end. These are the eastern and western portions of the current building. The center and southern portion of the property is developed with structures described in earlier photographs. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1976	1"=666'	**Property**: The property is developed with the two current structures and appears essentially as it does currently. **Surrounding Area**: The adjacent properties to the north, east and south appear essentially as they do currently. The adjacent property to the west is developed with several industrial buildings.
1989, 1994, 2002, and 2005	1"=666', 1"=666', 1"=666', and 1"=604', respectively	**Property**: The property appears essentially as it does currently. **Surrounding Area**: The adjacent properties appear essentially as they do currently.

The review of aerial photographs did not identify past uses indicating *recognized environmental conditions* at the property or surrounding area.

Copies of reproducible aerial photographs are included in Appendix F.

5.3.2 Fire Insurance Maps

ATC reviewed copies of available historical Sanborn Fire Insurance Maps (Sanborn Maps) provided by EDR. Sanborn Maps were reviewed for the years 1894, 1906, 1950, 1953, 1954, 1959, 1960, 1967, and 1970. The following are descriptions and interpretations from the Sanborn Map review. Copies of the Sanborn Maps reviewed are included in Appendix G.

SANBORN MAPS	
Year	**Comments**
1894	**Property**: Only the western end of the property is depicted. The northwestern corner of the property is occupied by a lumberyard. South of the lumberyard, along the western side of the property is an athletic park with a baseball diamond and grandstand. **Surrounding Area:** Adjacent to the north is the continuation of the lumberyard (Sixth Street has not been constructed). Adjacent to the west, across Alameda Street, is an electric railroad plant.
1906	**Property**: The western two-thirds of the northern half of the property is occupied by a lumberyard. A large warehouse is located on the southern half of the property on the southeastern corner. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are a lumberyard, a box factory, and a mattress warehouse. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several buildings occupied by the Union Ice Company and two storage buildings for cement. Adjacent to the property to the west is the Los Angeles Railway Company.
1950, 1953, 1954, 1959, and 1960	**Property**: The northern portion of the property along Sixth Street is developed with an elongated multi-tenant warehouse. Tenants depicted include produce warehouses, stores, and at least five machine shops. The remainder of the property is developed with four additional warehouses, three of which have multiple tenants as well as several small accessory buildings. A chemical manufacturer occupies a small tenant space of the east-central warehouse on the 1950 and 1953 Sanborn Maps, but is gone by 1954. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are numerous small to mid-sized commercial and industrial buildings. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several industrial buildings, including the Union Ice Company, various warehouses and a garage and automotive repair firm. Adjacent to the property to the west is the Los Angeles Transit Authority. The number of buildings on the west-adjacent site decreased through time. By at least 1959, the activity had switched from a train yard to a bus yard.
1967	**Property**: The property is developed with six warehouses, the northern two of which are the eastern and western portions of the current northern building. The remaining four warehouses are among those that were previously present on the property. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are numerous small to mid-sized commercial and industrial buildings, which include two chemical warehouses. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several industrial buildings, including the Union Ice Company, various warehouses and a garage and automotive repair firm. Adjacent to the property to the west is the Los Angeles Transit Authority bus yard.
1970	**Property**: The property is developed with six warehouses, the northern two of which are the eastern and western portions of the current northern building. The eastern half of the current southern building has replaced one of the earlier warehouses. **Surrounding Area:** Adjacent to the north of the property, beyond Sixth Street, are numerous small to mid-sized commercial and industrial buildings, which include two chemical warehouses. The adjacent property to the east is not depicted. Adjacent to the property to the south is a railroad spur right-of-way, beyond which are several industrial buildings, including the Union Ice Company, various warehouses and a garage and automotive repair firm. Adjacent to the property to the west is the Los Angeles Transit Authority bus yard.

The review of Sanborn Maps did not reveal the presence of *recognized environmental conditions* at the property. Although the prior presence of tenants such as machine shops and chemical manufacturers

represent problematic uses, based on the complete redevelopment of the property since these tenants were present, the former uses are considered to be notable findings but not *recognized environmental conditions*.

5.3.3 Property Tax Files

According to information on file with the Los Angeles County Assessor, the current owner of the property is Lowe 6th Street Properties, LLC, which acquired title in 1999. Other previous owners include Newlowe Properties (1988-1998) and Southern Pacific Company (1968-1988). No owners prior to 1968 were listed. The review of tax files did not identify *recognized environmental conditions* at the property.

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for this Phase I ESA.

5.3.5 Historical USGS Topographic Quadrangles

ATC reviewed available historical USGS Topographic Quadrangles for information regarding past uses of the property. Topographic maps were reviewed for the years 1900, 1913, 1928, 1953, 1966, 1972, 1981, and 1994. The 1900 and 1913 map editions both show the property as vacant except for one or two small structures at the western end. Widely-spaced structures are present to the north and south, and small structures are located to the west. The 1928 map shows five of the warehouse structures on the property. Industrial buildings are shown on all adjacent properties. The 1953 through 1994 map editions show the property and adjacent parcels with a pink shading indicative of a developed urban setting.

The review of historical USGS Topographic Quadrangles did not identify past uses indicating *recognized environmental conditions* at the property or the surrounding area. Copies of topographic maps are included in Appendix G.

5.3.6 City Directories

ATC reviewed historical city directories at the Los Angeles Central Library. Directories were reviewed for the years 1956, 1961, 1969, 1975, 1980, 1987, and 1996. ATC's findings are summarized in the following table:

CITY DIRECTORY SUMMARY

Industrial Street: 1525-Central LA Trading, Union Central Stg.; 1581- Chariot Imp / Exp; 1601-Grand Int'l Ent.; 1717-Bowin & Son, General Produce Co., MCL Distribution.

The review of city directories did not identify past uses indicating *recognized environmental conditions* at the property or surrounding areas.

5.3.7 Building Department Records

ATC reviewed historical building department records at the Los Angeles Department of Building and Safety. Due to the large number of addresses associated with the property, ATC spot-checked building permits. Noteworthy permits observed included the following:

- The original building permits, dated June 1909, for a market building, 728 feet long and addressed between 1200 and 1300 East Sixth Street and a toilet building.

- A permit dated January 1910 for an unspecified new building at the rear of 1280-1336 East Sixth Street.

- Permits dated March 1924 for a scale house and toilet, and a building containing an employee boardinghouse and commercial stores.

- The original building permits, dated October 1962, for the eastern and western portions of the current structure at 1206-1338 East Sixth Street. A diagram accompanying this permit depicted two other elongated structures, 65 feet to the south, that were described as built in 1902 and 1906. These latter two buildings appear to be the multi-tenant structures shown on Sanborn Maps crossing the center of the property from east to west.

- A permit, dated July 1973, to connect the two buildings built in 1962 into a single structure. A diagram accompanying that permit also depicts the eastern portion of the current structure on Wholesale Street as a pre-existing building.

- A permit, dated March 1990, to backfill a UST excavation. Two USTs, described as a 5,000-gallon gasoline and a 10,000-gallon diesel UST, were located 70 and 80 feet south of East Sixth Street and 20 and 40 feet east of Alameda Street, respectively. As mentioned previously, UST records at the LAFD indicated that both USTs were 10,000 gallons in size.

- A permit dated 1948 for a warehouse at 1209 Wholesale Street.

- Permits dated January 1973 to demolish at least three older buildings on the center and southern portions of the property.

Apart from the reference to the former USTs, no permits were observed for features of potential environmental concern. As mentioned previously, based on the removal of the tanks and the absence of associated soil impacts, the former USTs are not considered to represent a *recognized environmental condition*. The review of building department records did not identify past uses indicating *recognized environmental conditions* at the property.

5.3.8 Zoning/Land Use Records

No historical zoning information was available for the property. The area appears to have been used for industrial purposes since at least the early 1900s.

5.3.9 Prior Reports

ATC was provided with one previous environmental report pertaining to the property. The report, entitled *Phase I Environmental Site Assessment of 6th Street and Alameda, 1206-1338 East 6th Street and 1205-1321 Wholesale Street, Los Angeles, California, 90021*, was prepared by EMG and dated March 8, 2001. Although EMG noted that the tenant that formerly operated the USTs, Progressive Produce at 1226

East Sixth Street, also conducted truck maintenance on-site, EMG did not identify *recognized environmental conditions* at the property and made no recommendations for additional assessment.

ATC makes no warranty, guaranty or certification regarding the quality, accuracy or reliability of any prior report provided to ATC and discussed in this Phase I ESA report. ATC expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to ATC and discussed in this Phase I ESA report.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property (if any) were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise. One tenant space, 1266C, occupied by Quan 9, a food distributorship, was locked and inaccessible. The weather during the site reconnaissance was sunny and warm. There were no visibility restrictions due to weather conditions.

6.2 Hazardous Substance Use, Storage, and Disposal

ATC conducted the site reconnaissance on April 1, 2010. ATC reviewed the property for hazardous materials storage and use, as well as indications that such materials may have been spilled or dumped. ATC was accompanied during the property visit by Mr. Gordon Howe of Lowe Enterprises Investment Management, Inc., and Mr. John Hirst, Chief Engineer at the Building for approximately four months.

All except two of the tenant spaces are occupied by distributors of produce or other food products. The remaining two are a vacant space and a warehouse occupied by a toy distributor, located in spaces 1221 and 1301B Wholesale Street, respectively.

Chemical use on the property consists generally of degreasers and soaps, janitorial supplies and maintenance materials such as paint, propane, and, in localized tenant spaces, water treatment chemicals, motor oil, and Ethyl-Gen, an alcohol-based chemical used to hasten the ripening of bananas.

Degreasers and soaps were generally stored in 55-gallon drums, often without secondary containment. No apparent spills were noted; however, since the primary use of these materials is floor washing, the absence of secondary containment is not considered to represent an environmental concern. In addition to these types of larger containers, janitorial supplies, in five-gallon containers or smaller, were observed inside most of the tenant spaces.

Water treatment chemicals were observed in two tenant spaces, 1321 Wholesale Street (occupied by American Produce, aka Chiquita Fresh), which utilizes a cooling tower located on the northern side of the warehouse exterior to refrigerate its fruit storage rooms, and 1301 Wholesale Street (occupied by a food distributor identified as A&F).

Propane fuel canisters for forklifts were present in nearly every unit. Most tenant spaces also had electric forklifts and charging stations. White staining on the concrete floor was observed near forklift chargers in 1205, 1215, 1221, and 1321B Wholesale Street. Heavy pitting of the concrete surface of the warehouse floor was observed near the batteries stored in 1215 Wholesale Street. The deterioration was not sufficient to create a pathway through the floor to the underlying soil.

Approximately four 5-gallon and eight 1-gallon containers of paint, two 1-gallon containers of adhesive and one gallon of brush cleaner were observed on the floor of an electric room at the southeastern corner of the southern building. No stains were observed in this area. Additionally, a large number of five-gallon containers of paint and at least three 1-gallon containers of thinner were being stored on the floor of the vacant unit at 1221 Wholesale Street. The containers were arranged on a drop cloth. A few paint drops were observed on the concrete floor of the unit. Based on the small quantity and absence of nearby floor drains, the stains are not considered to represent an environmental concern.

At least 18 boxes of alcohol-based ripener were stored inside and on top of flame-resistant cabinets within unit 1321 Wholesale Street. No indications of releases were observed.

ATC did not observe the generation of hazardous wastes at the property.

ATC reviewed the exterior portions of the property. No stained soils or vegetative stress suggestive of the release of hazardous substances were observed at the property; however, an area of oily sediment several feet in diameter was observed on the pavement near the base of the roof access ladder on the northern side of the northern building. It is not known what the source of the oil or grease in the sediment is, but based on the good condition of the pavement, this stained area is not considered to represent an environmental concern to the property.

6.3 Underground Storage Tanks (USTs)

ATC did not observe visual or documentary evidence of current USTs on the property. As mentioned previously, two 10,000-gallon USTs were removed in 1990 from a location at the western end of the northern property building. Soil samples collected at the time of removal did not detect impacted soil; however, no closure letter for the UST removals was present in the LAFD file.

6.4 Aboveground Storage Tanks (ASTs)

ATC did not observe visual or documentary evidence of current or former ASTs at the property.

6.5 Other Petroleum Products

Two 1-gallon containers of motor oil were observed on a shelf inside the unit at 1317 Wholesale Street. No indications of releases were observed.

One 5-gallon container of what appeared to be waste oil was observed on the sidewalk along Mill Street. This container appeared to be abandoned and it is not known if it was discarded by a property tenant. Although no stains were observed near the container, a storm drain was present in the gutter very near to where the container had been placed. Additionally, a one-gallon container of motor oil was observed on its side at the edge of the sidewalk along Sixth Street. An oil stain led from the container to the gutter. Based on the small amount of staining, this release is considered to be a *de minimis condition*.

6.6 Polychlorinated Biphenyls (PCBs)

Two pad-mounted LADWP transformers were observed at the property near the southeastern and northwestern corners of the southern property building. Based on the age of the property improvements, 1962 and 1973, it is possible that the transformers contain PCBs, although they appeared to be comparatively new. In addition, three pole-mounted transformers are located at the northwestern corner of the northern building. Additionally, a total of 14 pole-mounted transformers are located along the adjoining sidewalks of Mill Street and Sixth Street. Based on the age of the property improvements (1962 and 1973), is possible that some of these contain PCBs; however, ATC observed at least eight pole-mounted transformers, including two of the three located at the northwestern corner of the property, with markings identifying them as non-PCB per the manufacturer. No obvious indications of leaks or damage was observed in connection with the property transformers.

Another potential source of PCBs is the ballasts of fluorescent lights. Fluorescent lighting is present at the property. Based on the age of the property improvements (1962 and 1973), it is possible that PCB-containing ballasts are present. During the course of normal maintenance, ballasts should be inspected for labeling indicating their PCB content. In general, any ballast not specifically labeled as not containing PCBs is presumed to contain them and will require special disposal practices when eventually discarded.

PCBs have also been used as an additive in hydraulic fluid. No elevators or other hydraulic equipment were observed on the property.

6.7 Unidentified Substance Containers

ATC did not observe the presence of unidentified substance containers on the property.

6.8 Nonhazardous Solid Waste

Nonhazardous wastes generated at the property consist of typical municipal refuse, and food waste. Individual tenants are responsible for making their own arrangements for trash removal. Standard-sized dumpsters are located along the inner corridor between the two property buildings. All of these dumpsters were serviced by Consolidated or Waste Management. Each tenant questioned regarding waste removal frequency indicated that their dumpsters were emptied each weekday. Two roll-off dumpsters were observed at the property. These were located on the southern side of unit 1206 Sixth Street and the western side of 1205 Wholesale Street. The dumpsters are emptied by Consolidated and General Waste, respectively. These large dumpsters are emptied on an as-needed basis.

6.9 Waste Water

Apart from stormwater runoff and municipal sewage, no aqueous waste streams are generated at the property.

6.10 Waste Pits, Ponds and Lagoons

ATC did not observe evidence of waste pits, ponds or lagoons on the property.

6.11 Sumps

ATC did not observe evidence of sumps on the property.

6.12 Septic Systems

ATC did not observe evidence of a septic system on the property; however, according to a representative of the Los Angeles Sewer Department, the earliest record of a sewer permit associated with the property was dated 1922. While earlier, unrecorded sewer connections are possible, given the long period of occupancy, it is possible that septic systems were formerly located on the property. However, given that the existence (to say nothing of location) of any prior septic systems is speculative, as well as the subsequent redevelopment of the property, the possibility of prior septic systems is not considered to represent an environmental concern to the property.

6.13 Storm Water Management System

Storm water is conveyed from roofs by internal drains that discharge to the surrounding pavement. Storm runoff in parking and drive areas is conveyed by concrete drainage swales to storm drains located in parking lots or to the adjoining streets where it flows along the gutters to the nearest municipal storm drain.

6.14 Wells

ATC did not observe evidence of wells on the property.

7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

INTERVIEW SUMMARY				
Role	**Name**	**Title/Company**	**Years Assoc. With Property**	**Interview Type**
Site Escort	Mr. John Hirst	Chief Engineer / Lowe Enterprises Real Estate Group	Approximately four months	In person
Property representative	Ms. Denise Lieberson	Property Manager / Lowe Enterprises Real Estate Group	Approximately four months	By telephone

Not included in this listing are those governmental employees that were contacted solely for the purpose of retrieving public information pertaining to the property and who would not be expected to have first-hand knowledge of *recognized environmental conditions* at the property.

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview, if any) documented on Record of Communication forms in Appendix J.

8.0 OTHER ENVIRONMENTAL CONDITIONS

8.1 Asbestos-Containing Material (ACM)

Suspect ACMs observed by ATC during the current site reconnaissance included wallboard/joint compound, acoustical ceiling panels, acoustical ceiling tiles, resilient floor tile, resilient sheet flooring, flooring mastics, baseboard and baseboard mastics, and roofing materials. Based on the age of the property improvements (1962 and 1973), it is possible that asbestos is present on the property.

A previous environmental assessment by EMG included a review of an earlier asbestos survey conducted at the property in 1989 by Applied Geosciences, in which 21 samples of suspect ACMs, including wallboard/joint compound ceiling panels, flooring materials, and roofing materials were collected. Asbestos was detected in three types of floor tile and one type of sheet flooring. EMG did not describe the sample locations clearly. During their site reconnaissance, however, EMG noted that they did not observe the flooring in question and assumed that it had been removed. Additionally, EMG reviewed a 2000 Phase I ESA prepared by a firm identified as EGA. This Phase I included a limited asbestos survey. Suspect materials sampled by EGA included suspended ceiling tiles, wall materials, pipe wrap, and roofing materials. Asbestos was detected in the roofing materials, which were reportedly being encapsulated or replaced at the time of EGA's site visit.

8.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

ATC's review of published radon data indicates that the property is located in a county designated by the EPA as Zone 2 for radon propensity. Zone 2 areas have a predicted radon concentration of greater than or equal to 2.0 pCi/L and less than or equal to 4.0 pCi/L. According to statistical data provided by EDR, an EPA survey of 63 sites in Los Angeles County revealed two percent with radon concentrations in excess of 4.0 pCi/L. Based on these statistics and the non-residential use of the property, no additional investigations are recommended at this time.

8.3 Lead in Drinking Water

According to a recent annual water quality report, the potable water supplied to the property meets or exceeds all drinking water standards, including those for lead. Based on the fact that the water supplied to the property is from the municipality, lead in drinking water testing was not conducted for this Phase I ESA.

8.4 Lead-Based Paint (LBP)

Based on the age of the property improvements, it is possible that LBP has been used on the property in the past. Apart from one area of damaged paint observed on the eastern exterior wall of the southern building, painted surfaces appeared to be in good condition.

8.5 Mold Screening

ATC conducted a screening survey for mold conditions at the property. The screening consisted of limited interview and physical observation.

ATC spoke with Ms. Denise Lieberson, the Property Manager for approximately four months. Ms. Lieberson indicated that there have been no occurrences of, or surveys for mold of which she was aware. Accordingly, there was no mold-related documentation to review. Additionally, the Chief Engineer for the property, Mr. John Hirst, did not report any ongoing or former water intrusion events at the property.

During the site reconnaissance, ATC did not observe either suspect mold at the property or indications of current water intrusion events. One area of damaged ceiling tile and associated water staining was observed in the office area of 1206 East Sixth Street. According to the tenant, the leak causing the damage resulted from an air conditioner and occurred long ago. No other indications of current or former water intrusion were observed at the property.

8.6 Additional User Requested Conditions

There were no additional User-requested conditions researched for this assessment.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 01/13/2010 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 01/13/2010 has revealed that there are 21 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 02/08/2010 has revealed that there are 2 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/08/2010 has revealed that there are 14 ENVIROSTOR sites within approximately 1 mile of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 37 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 01/13/2010 has revealed that there are 11 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 8 Manufactured Gas Plants sites within approximately 1 mile of the target property.

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 9 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Manufactured Gas Plants:

Site located at 725 Chemming Street, Los Angeles, California, approximately 2.5 acres. From 1887 util 1906 an oil gas plant was operated at site. MGP may have been converted to a natural gas storage site in approximately 1906. Records indicate that MMGP equipment may have been removed by 1930. Site is currently used as a Greyhound Bus parking lot.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 2002-12-31 00:00:00
Comments: DTSC approved site characterization activities in December 2002. Contaminants of concern included PAH's & BTEX. A RAW involving excavation will be implemented for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 1993-05-20 00:00:00
Comments: The Department completed review of the PEA. A Manufactured Gas Plant (MGP) was operated at the site in the late 1800s and early 1900s. Gas was produced from crude oil for distribution in the site area.
Several companies operated at the site. In 1909, the site was owned by the Los Angeles Gas and Electric Corp., which merged with the Southern Calfornia Gas Company in 1937. SoCalGas owned the property until 1976, and sold to the current owners. The MGP was dismantled sometime before 1906. The byproducts from the manufactured gas operation were tars, oils, sludges, and lampblack. Elevated levels of polycyclic aromatic hydro- carbons (PAH), heavy metals such as lead and arsenic and cyanides were found at the site. The PEA concluded that there was contamination at the site above screening values. Therefore, the Department recommended that further investigation or assessment at the site was necessary.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 2002-12-31 00:00:00
Comments: DTSC approved site characterization activities in December 2002. Contaminants of concern included PAH's & BTEX. A RAW involving excavation will be implemented for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 1993-05-20 00:00:00
Comments: The Department completed review of the PEA. A Manufactured Gas Plant (MGP) was operated at the site in the late 1800s and early 1900s. Gas was produced from crude oil for distribution in the site area.
Several companies operated at the site. In 1909, the site was owned by the Los Angeles Gas and Electric Corp., which merged with the Southern Calfornia Gas Company in 1937. SoCalGas owned the property until 1976, and sold to the current owners. The MGP was dismantled sometime before 1906. The byproducts from the manufactured gas operation were tars, oils, sludges, and lampblack. Elevated levels of polycyclic aromatic hydro- carbons (PAH), heavy metals such as lead and arsenic and cyanides were found at the site. The PEA concluded that there was contamination at the site above screening values. Therefore, the Department recommended that further investigation or assessment at the site was necessary.

Completed Sub Area Name:	Not reported
Completed Document Type:	CEQA - Initial Study/ Neg. Declaration
Completed Date:	2003-03-18 00:00:00
Comments:	Special Initial Study, Negative Declaration, and De Minimis Impact Finding were prepared and made available for public review. No verbal or written comments were received. DTSC approved the CEQA documents on 3/18/2003. DTSC approved RAW on 3/18/03. Proposed removal activities consists of removing approximately 615 cubic yards of contaminated soil. Chemicals of potential concern previously identified in the soil include the following: Lampslack, PAH's, and BTEX. Removal Activities are anticipated to last approximately 30 days.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

LADWP PALMETTO CONSTRUCTION HEADQUARTERS (Continued) **1000597316**

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info:	The site is located at 590 South Santa Fe Avenue, Los Angeles, California. The site consists of two land parcels totaling approximately 2.68 actes of land and is located witin an indus- industrial portion of the City of Los Angeles. Historically the site has been used for chemeical or paint manufacturing. Not reported The site was formerly under the oversight of the California Regional Water Quality Control Board (CRWQCB). (CRWQCB) has overseen the site investiation and remediation since approximately 1986. Not reported Previous sampling activities have confirmed both soil and groundwater contamination. Contaminants of concern identified in the groundwater and soil include benzene, ethyl benzene, 1,1-dichlorethane, 1,1-dichloroethene, 4-methyl-2-pentanone (MIBK), toluene, and total xylene. The toluene, and xylene appear to be primarily located within the groundwater beneath the northern portion of the site whereas MIBK has been identified in the groundwater along the southwest corner

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:
Reponsible Party: COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: DHS has utilized Bond funds to complete the remedial action. DHS is currently undertaking appropriate cost recovery actions.
Site Description: This site was previously used to scrap electrical transformers.
Hazardous Waste Desc: Polychlorinated biphenyls (PCBs) were detected in the soil.
Threat To Public Health & Env: The remedial action has been completed. Soil contaminated with PCBs was excavated and redisposed of in a licensed landfill. There is no threat to public health and the environment.
Site Activity Status: In August, 1985, the RP, Mr. Rodney Dean, pled no contest to three felony counts of illegal storage, transportation and disposal of hazardous wastes. Mr. Dean's probation required that the cleanup of the site be completed and reported to the court. The RP retained a contractor for the cleanup and began the remedial actions. The contractors removed much of the contaminated soil. DHS completed the cleanup after the RP exhausted his financial resources. DHS is currently in the cost recovery stage.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	1995-09-13 00:00:00
Comments:	The Department received a Non-Emergency Hazardous Substance Release Report dated January 31, 1995. Review of the document indicates that the site is contaminated with elevated levels of heavy metals such as lead, copper and zinc. Foundry operations existed at the site from at least 1906 until 1990, operated by W.G. Grant & Co. Santa Fe Railway is the current owner of the site. RP removed USTs from the site without any regulatory agency oversight. Due to evidence of a release, DTSC is recommending that a PEA be conducted to evaluate the site. On September 13, 1995, DTSC notified the RP thereof.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	1996-09-04 00:00:00
Comments:	DTSC reviewed a Preliminary Endangerment Assessment for the site under a Voluntary Cleanup Agreement. Based on the information and data presented, DTSC determined that the hazardous constituents remaining at the site do not constitute a threat to human health or the environment.

Completed Area Name:	PROJECT WIDE

Alternate Address:	2182 EAST 11TH STREET
Alternate City,St,Zip:	LOS ANGELES, CA 90021
Background Info:	The Site is also known as the Western Lead and Metal Company Site. The Site is located in an industrial area near downtown Los Angeles and is surrounded by warehouses, food distributors, light manufacturing, and scrap metal recyclers. The Site is roughly bounded by 11th Street (Property), to the north, the Union Pacific Railroad right-of-way to the east, 14th Street, to the south, and Wilson Street to the west. The Site includes the property at 2182 East 11th Street, which was occupied by several different companies as a lead smelter from 1946 to 1965. The Western Lead Products Company operated a lead smelter on the Property from 1954 to 1960 under the name of Western Lead and Metal Company. After 1965, the Property was used for die-cast manufacturing operations. The Property is approximately 110 feet

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

by 140 feet and is currently devoid of any buildings, and is secured by fencing. The other areas of the Site include: portions of the Union Pacific Railroad right-of-way, between 14th and 10th Streets; a narrow strip of the property occupied by Coast Produce; and a residencial property at the corner of Wilson and 14th Streets. Since 1991, several site assessments have been conducted. These assessments involved mostly surface soil sampling and analyses for metals including lead, antimony, and arsenic. In 1996, the Property was paved with three inches of asphalt to prevent exposure of the public to contaminated soil. In addition, DTSC collected several surface soil samples in the areas surrounding the Property. Extremely high levels of lead (up to 574,000 ppm), antimony (up to 14,000 ppm), and arsenic (up to 920 ppm) were detected in the narrow strip along the southern and western boundaries of the Property; high levels of lead, copper, and zinc were detected along the railroad right-of-way; and elevated levels of lead (up to 1,450 ppm) were detected on the residential property. A Consent Order (Imminent and Substantial Endangerment) was entered into with Quemetco Inc., (an RSR Subsidiary) and Union Pacific Railroad Company. As required by the Order, in 1977, Quemetco completed an Emergency Removal Action at Areas 3 and 4 which are located at the perimeter of the Property and the residential property. Union Pacific has also conducted an Emergency Removal Action at Areas 1 and 2 (railroad right-of-wau). The Remedial Investigation found the extent of metal contamination. Currently, the Draft RAW, which proposes to place a 4-inch asphalt cover on the Property area and excavate soil, from the Site boundary, has been approved. The 30 day Public Comment Period starts on August 23 and ends September 22, 2004.

Completed Document Type:	Removal Action Workplan
Completed Date:	2004-10-21 00:00:00
Comments:	The RAW proposes to address the lead & arsenic contaminated soil by placing a four-inch asphalt cap on the property area (15,000 sq.ft.) and removing soil from nine impacted areas at the Site boundary. Implementation is scheduled for end of January 2005.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Completed Date: 2003-04-15 00:00:00
Comments: The Remedial Investigation is approved. The RI involved sampling of lead and other metals, and volatile organic compounds, particularly tetrachlorethene and 1,1,1-trichloroethane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 1997-07-18 00:00:00
Comments: UPRR: A removal action workplan (RAW-UPRR) was approved for Union Pacific Railroad track areas along Lemon Street (between 10th & 14th Streets). These areas are designated as Areas 1 & 2. A Notice of Exemption was also filed with the OPR as required by the CEQA laws and guidelines. The RAW-UPRR included excavation, treatment and disposal of contaminated soils in the neighboring railroad right-of-way (track) areas of the International Lead Company site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 1997-07-18 00:00:00
Comments: A removal action workplan (RAW-QUEMETCO) which proposed excavation and disposal of contaminated soils, was approved for Areas 3 and 4 (perimeter of Property and residential property). A Notice of exemption was also filed with the OPR as required by the CEQA laws and guidelines.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 2006-10-10 00:00:00
Comments: Removal Action included placement of an asphalt cover in the property area and removal of 97 tons of soil contaminated with lead and arsenic.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 2006-02-10 00:00:00
Comments: Workplan for additional removal of soil is approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 1998-05-26 00:00:00
Comments: Workplan to delineate soil contamination approved

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 2000-10-31 00:00:00
Comments: WP approved for further Soil and Soil gas investigation.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 1998-06-30 00:00:00
Comments: Completed a Preliminary Assessment (PA) of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 1994-11-07 00:00:00
Comments: DTSC received an information letter for 3 possible hazardous substance release sites allegedly associated with Quemetco/RSR Corp, a lead smelter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 2003-06-13 00:00:00
Comments: DTSC approves PEA Report. The PEA investigative activities conducted at the former smeltingsite identified arsenic (3410 mg/kg), and lead (25,700 mg/kg). DTSC concluded that the current conditions (building and pavement intact, no exposed soil) at the Site does not pose a potential threat to industrial workers. Due to elevated levels of the above-mentioned metals in the soil, if there is any demolition of the buidling or parking lot, or development at the Site, the responsible party(s) will be required to submit a Removal Action Workplan or Remedial Action Plan to DTSC for approval.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 2000-09-19 00:00:00
Comments: DTSC entered into a Voluntary Cleanup Agreement (Agreement) (Docket Number HSA-A 99/00-171) with Whittaker Corporation (Proponent) to conduct a Preliminary Endangerment Assessment.

Manufactured Gas Plants:

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide,polycyclic aromatic hydrocarbons and heavy metals

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/01/2009
Date Data Arrived at EDR: 01/14/2010
Date Made Active in Reports: 02/18/2010

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/01/2009

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/01/2009

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Next Scheduled EDR Contact: 05/24/2010
Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/19/2009

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2008

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

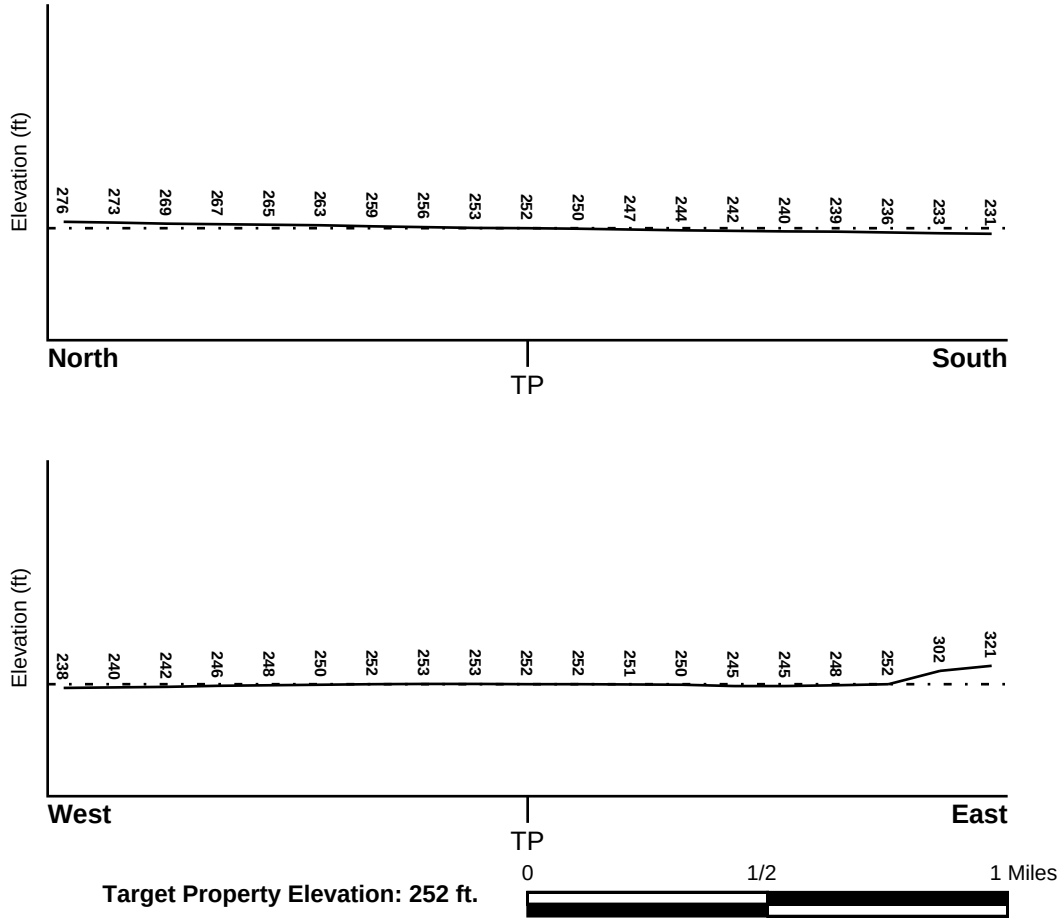
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NW
Site Name:	SO CALIF RAPID TRANSIT DISTRICT
Site EPA ID Number:	CAD981989841
Groundwater Flow Direction:	GENERALLY SE.
Measured Depth to Water:	approximately 37 feet.
Hydraulic Connection:	The uppermost aquifer at the site is the Gaspur aquifer. The Gaspur aquifer is hydraulically connected to underlying aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SSE	Not Reported
2	1/2 - 1 Mile East	SW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EMG Project No.: 78844
Date of Report: March 8, 2001
On-site Date: February 22, 2001

This report has been prepared for the purpose of acquiring Environmental information that may assist Bank of America, N.A., Bank of America Corporation and their affiliates in evaluating a request for an extension of credit (the "Mortgage Loan") to be secured by property. This information also may be used by any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan, any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan, any rating agency actually or prospectively rating any such securities, any indenture trustee, an any institutional provider(s) from time to time of any liquidity facility or credit support for such financings. In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, or prospectus in connection with a securitization or transaction involving the Mortgage Loan and/or such securities. This report has no other purpose and should not he relied upon by any other person or entity.

1. Certification

EMG has completed a Phase I Environmental Site Assessment of the 6th Street and Alameda property (the "Project"), located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street in Los Angeles, California 90021. The assessment was performed at the Client's request using the methods and procedures consistent with good commercial and customary practice designed to conform with acceptable industry standards.

This report may be relied upon by Bank of America, N.A., Bank of America Corporation and their affiliates in evaluating a request for an extension of credit (the "Mortgage Loan") to be secured by property. This information also may be used by any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan, any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan, any rating agency actually or prospectively rating any such securities, any indenture trustee, an any institutional provider(s) from time to time of any liquidity facility or credit support for such financings. In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, or prospectus in connection with a securitization or transaction involving the Mortgage Loan and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

This report is not for the use or benefit of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of EMG. In expressing the opinions stated in this report, EMG has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. Documentation and data provided by the Client, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that EMG assumes no responsibility or liability for their accuracy.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client or their representative have been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the on-site visit.

If you have any questions regarding this report, please contact the reviewer listed below at (800) 733-0660, Ext. 2718.

2. Summary

EMG performed a Phase I Environmental Site Assessment, that included on-site observations of the accessible areas of the 6th Street and Alameda property (the "Project"), on February 22, 2001. The Project is located at 1206-1338 East 6th Street and 1205-1321 Wholesales Street in Los Angeles, California 90021, and consists of approximately 14.57 acres of land.

The Project, originally constructed in 1962 and 1968, has been renovated numerous times over the years, and is currently a warehouse facility. Current facility operations include warehousing of various products, shipping and receiving, and administrative activities. The Project was a lumber yard prior to construction of the current improvements. Properties in the general vicinity of the Project include commercial and industrial land uses.

The following summarizes the independent conclusions representing EMG's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative have been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

2.1. Findings/Conclusions

Historical Review (Section 5)

- The review of the historical data available for the Project identified the following circumstance of environmental concern:

  - A tenant at the Project, Progressive Product, has been on-site since at least 1988. This tenant formerly conducted truck maintenance at the Project and stored drums of used motor oil on-site. Currently, all truck servicing is conducted off-site by Penske Oil. Drums of used oil were not observed during EMGs site visit. This past use of the Project is not anticipated to have impacted the environmental integrity of the Project.
  - Associated with truck maintenance, vehicle fueling was formerly conducted on-site by this tenant. However, the two underground storage tanks were removed from the Project in May of 1990. Soil contamination was not detected in the tank excavation. Based on the fact that these tanks have been removed and since no contamination was detected in the tank excavation, these former tanks are not anticipated to have impacted the environmental integrity of the Project.

Operational Activities (Section 6.1)

- EMG observed no circumstances of environmental concern associated with the operational activities at the Project. No further action or investigation is recommended regarding operational activities at the Project.

Hazardous Materials/Petroleum Products (Section 6.2)

- The Project is involved in the use of hazardous materials and petroleum products in the form of routine janitorial and maintenance supplies, propane, oxygen, and acetylene. The identified materials appear to be properly stored. The materials observed do not appear to pose a hazard to the Project, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the Project.

Wastes (Section 6.3)

- The Project does not generate, treat, store, or dispose of hazardous, medical, or regulated wastes. Furthermore, the non-hazardous solid and liquid wastes generated at the Project appear to be stored and disposed of properly. No further action or investigation is recommended regarding wastes at the Project.

Polychlorinated Biphenyls (PCBs) (Section 6.4)

- EMG identified four utility-owned transformers at the Project that are classified as "Non-PCB". This equipment appeared to be in good condition with no evidence of leaks. No further action or investigation is recommended regarding the transformers at the Project.

Asbestos-Containing Materials (ACM) (Section 6.5)

- Laboratory analysis of the samples collected indicated *"No Asbestos Detected"*. No further action or investigation is recommended regarding ACM at the Project.

Radon Gas (Section 6.6)

- Review of the United States Environmental Protection Agency (USEPA) Radon Map for the area of the Project identified that the Project is located in an area of moderate radon gas levels. In addition, based on the type of construction, the presence of commercial HVAC systems, and the commercial use of the buildings, there is reduced potential for the build-up of radon gas in the buildings at the Project. No further action or investigation is recommended with regard to radon gas levels at the Project.

Lead-Based Paint (LBP) (Section 6.7)

- LBP was not addressed due to the non-residential use of the Project. No further action or investigation is recommended with regard to LBP at the Project.

Lead in Drinking Water (Section 6.8)

- Based on the utility water quality report, the water at the Project is not expected to contain elevated levels of lead. No further action or investigation is recommended regarding lead in drinking water at the Project.

Storage Tanks/Pipelines (Section 6.9)

- No evidence of current storage tanks or pipelines (above or below ground) was identified. No further action or investigation is recommended regarding storage tanks or pipelines at the Project.

Surface Areas (Section 6.10)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Project.
- Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Project.

Regulatory Review (Section 7)

- Based on review of the regulatory database report, the Project is listed on the UST database as an inactive UST site. On-site evaluation and review of available information identified that two UST were removed from the Project in 1990. No further action or investigation is recommended regarding the regulatory review.
- Based on review of the regulatory database report, none of the listed sites are anticipated to adversely impact the Project. No further action or investigation is recommended regarding the regulatory review.

Adjacent Properties (Section 8)

- EMG identified no adjacent properties that are anticipated to have a negative impact on the environmental integrity of the Project. No further action or investigation is recommended regarding the adjacent properties.

2.2. Recommendations

No further action or investigation is recommended at this time.

3. Survey Approach/Purpose

EMG conducted an on-site Environmental Site Assessment of the Project that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On-site activities and/or interviews were conducted by Ms. Kimberly Belka, EMG Project Manager, with:

- Ms. Janet Epstein, On-site Point of Contact and Property Manager

Areas accessed included all tenant units; all common areas; all exterior areas (except the roofs); and the Project boundaries.

Weather conditions at the time of the Project assessment were cloudy, with temperatures in the low 60s (°F) and moderate winds.

EMG reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project which could have an adverse impact on the Project. In an attempt to determine whether historical uses of the Project and surrounding area have had an environmental impact on the Project, EMG interviewed individuals knowledgeable about the Project and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed at the Project. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-00 and the Bank of America Scope of Work. The scope of work included an evaluation of:

- The Project history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Project as identified through review of reasonably ascertainable standard historical sources.
- Physical characteristics of the Project as identified through review of reasonably ascertainable topographic, wetlands, flood plain, soils, geology, and ground water data.
- Current Project conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:
  - Facility storage tanks, drums, containers (above or below ground), etc.
  - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs

- The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes

■ A screening approach for the potential existence of:

- Asbestos, including the identification of all suspect materials in accessible areas (interior and exterior) and the collection and analysis of three bulk samples from homogeneous areas of suspect ACM. Any materials not sampled are considered suspect until tested and proven otherwise. Friable materials are those which can be easily crumbled or pulverized by hand pressure. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, but is intended to identify the potential for an asbestos hazard in accessible areas.

  The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Place* (the "Green Book"). Therefore, all materials listed in the Green Book which were installed prior to 1985.

  The laboratory reports list the samples taken from the Project and their subsequent analytical results using polarized light microscopy with dispersion staining *(Interim Method for Determination of Asbestos in Bulk Insulation Sample — USEPA 600/M4-82-020)* for asbestos. Analysis was performed using the "positive-stop" method, whereby analysis is stopped on a group of samples once the first positive sample is analyzed, and the entire homogeneous material is considered asbestos-containing.

- Radon gas propensity, through the review of the USEPA's Map of Radon Zones and radon gas concentrations through the exposure and analysis of canisters, using the charcoal liquid scintillation method for all residential properties.

- Lead-based paint for properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.

- Lead in water, based on information provided by the municipal water provider.

- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Project.

  The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Project and neighboring sites that may impact the Project. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard E 1527-00. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

4. Project Location/Description

The Project is located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street in Los Angeles, Los Angeles County, California 90021.

4.1. Project Description

The Project lands consist of approximately 14.57 acres.

The Project is currently a warehouse with 12 tenants. The Project was constructed in 1962 and 1968 in two phases and has been renovated numerous times over the years. Renovations reportedly consisted of various upgrades to tenant units. Project improvements consist of two structures and surface-level asphalt paved parking/drive areas.

The Project is serviced by public water and sanitary sewer systems. The Project is supplied with water from the City of Los Angeles. According to the utility 1999 Water Quality Report, the drinking water supplied to the Project is within federal, state, and local drinking water quality standards.

Hot water is generated by electrically powered water heaters. The associated piping was observed to be uninsulated.

HVAC systems observed consisted of the following:

- Heat and air-conditioning are supplied to the Project from electrically operated units. Conditioned air is distributed via thermostatically controlled, ducted supply and return systems. Where observed, duct work associated with the HVAC systems was uninsulated.

4.2. Miscellaneous Systems

- Tenant equipment — Large refrigeration equipment was noted in various tenant spaces at the Project. This equipment is not anticipated to impact the environmental integrity of the Project.
- Tenant equipment — Propane powered forklifts are located at the Project. This equipment is not anticipated to impact the environmental integrity of the Project.

4.3. Environmental Setting

4.3.1. Topography

Review of the Los Angeles, California Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 1966 (photorevised in 1981/94), indicated the following:

- The Project has an average elevation of approximately 240 feet above mean sea level. Elevations do not vary significantly across the Project lands. Slope in the general area of the Project is to the southeast.
- The Project area is shaded to represent a high-density developed area and the exact site improvements are not shown.
- The slope of the Project is estimated between approximately zero to five percent in a southeasterly direction. The nearest surface water feature, the Los Angeles River, is located approximately 0.5 mile east of the Project.

A copy of the topographic map is appended (Section 9).

4.3.2. Wetlands

Review of the National Wetlands Inventory (NWI) Map, published by the United States Fish and Wildlife Service and dated 2001, indicated the following:

- No wetland areas are indicated at the Project or adjacent properties.

A copy of the wetlands map was not available.

4.3.3. Floodplain

Review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency (FEMA) and dated 1980, indicated the following:

- The Project is located in Zone C, defined as an area of minimal flooding.

A copy of the flood plain map was not available.

4.3.4. Soils/Geology

Review of the Soil Survey of Los Angeles County, California published by the United States Department of Agriculture Soil Conservation Service (USDA SCS) and dated 1969, indicated the following:

- The Project is located in an area comprised of one soil type known as Yolo with estimated slopes between zero and five percent.
- The Yolo soil series is considered to be a well drained, loam or silt loam textured soil with a depth of at least 60 inches. General characteristics of the Yolo soil include moderately permeability and a moderately to slightly acidic soil reaction.

Review of the Los Angeles Sheet Geologic Map published by the California Division of Mines and Geology and dated 1991, indicated the following:

- The Project is located within the Los Angeles Peninsular Ranges geomorphic province. The Project is further located over a Quaternary geologic-aged formation consisting of recent clay, silt, sand and gravel, poorly stratified to well stratified which includes alluvial fan, flood plain and streambed deposits.

4.3.5. Groundwater Hydrology

Review of the California Department of Water Resources Data Report for Southern California and dated 1985, indicated the following:

- The Project is located within the Los Angeles County Coastal Plain ground water basin with estimated ground water levels between 70 and 100 feet below ground surface (bgs). This basin is composed of various aquifer formations. The shallowest formation is known as the Gaspur Aquifer which is located from five to 75 feet below ground surface.

Review of a previous report at the Project (Section 5.7) indicates that the ground water monitoring well closets to the Project is located over six blocks to the west. This well was last measured in 1957 and the depth to ground water was at 148.1 feet below ground surface.

Shallow ground water flow is expected to follow the ground level slope of surface elevations. The direction of this flow at the Project is anticipated to be toward the southeast.

Estimated ground water levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

5. Historical Review

Review of information available from the Los Angeles County Assessor's Office indicated that the Project is shown on tax map 5164, block 010 as parcels 03/04/05. A copy of the tax map is appended (Section 9).

5.1. Chain of Title

Review of the available deed records indicates that the Project has been owned by Lowe 6th Street Properties LLC since 1998. Deed records were researched back to 1932.

Review of available deed records did not identify any previous environmentally suspect ownership, easements, right of ways, or other environmental entries/restrictions associated with the Project.

Deeds and titles identified are listed in the table below.

Owner	Year Purchased
Lowe 6th Street Properties LLC	1998
Book missing	1997-1960
Southern Pacific Company	Prior to 1932

5.2. Prior Use Interviews

According to Ms. Epstein, On-site Point of Contact and Property Manager, the Project was developed in the 1960s into the current use. Ms. Epstein stated that the Project has been used as mainly for produce warehousing since the 1920s. Ms. Epstein indicated that she has been associated with the Project for approximately eight months.

5.3. Local Government Agency Record Review

EMG reviewed file information for the Project at the City of Los Angeles Fire Department. Records dating back to 1920s are maintained by this department. No information was available for the Project addresses requested.

EMG reviewed file information for the Project at the City of Los Angeles Building Department. Records dating back to the early 1900s are maintained by this department. This review indicated that the present building at the Project located on 6th Street was built in 1962. Older permits dating back to 1922 indicated that other warehouse facilities were located at the 1206 6th Street address. The review indicated that the building at the Project located on Wholesale Street was built in 1968. General building permits for the Project were on file, but did not reveal any information or condition that could impact the environmental integrity of the Project. No environmentally significant information was identified

Review of the available zoning records from the City of Los Angeles Department of Planning indicates that the Project is currently zoned for manufacturing use. The Project has maintained a manufacturing zoning designation since at least the 1920s. Records dating back to the early 1900s are maintained by this department. Available zoning records do not indicate the potential presence of past commercial, military, or industrial usage in conjunction with the Project lands.

5.4. Historical Maps

EMG reviewed available Sanborn maps dated 1906 and 1938 at the Los Angeles Central Library. Historical maps are detailed scale drawings that show the location and use of buildings and structures that occupied a given area.

Review of the 1906 historical map, indicated the following:

- The Project is improved with seven structures, surface-level parking and storage areas. Notations on the map indicate the Project was occupied by two lumber yards and a warehouse building. Vehicular access is available from the north, east, and west.
- The area north of the Project is not shown. The area east of the Project is not shown. The area south of the Project is shown as a warehouse (ice company). The area west of the Project is not shown.

The 1914 historical map, differs from the previous historical map in that:

- The Project is improved with five buildings which are all occupied by the Los Angeles Public Market Company as produce stores.

The 1938 historical map, differs from the previous historical map in that:

- The Project is improved with two structures and surface-level parking. Notations on the map indicate the buildings are used for machine shops and the storage of produce, fish, automobiles, apiary supplies, wallpaper, machinery, and beans.

No other historical maps were identified.

5.5. Historical City Directories

Historical city directories were reviewed for the Project at the Los Angeles Central Library. City directories have tenant listings by address. This review revealed the following information:

- **1975** — The Project 1206 East 6th Street address is listed as Champs Desert Foods, Donia Frank Company, and Pathfinder Trucking. The Project 1338 East 6th Street address is not listed. The Project 1205-1321 Wholesale Street addresses are not listed
- **1978** — The Project 1206 East 6th Street address is listed as Bayless Market, Donia Frank Company, and Pathfinder Trucking. The Project 1338 East 6th Street address is listed as Veltman Terminal. The Project 1205-1321 Wholesale Street addresses are not listed
- **1991** — The Project 1206 East 6th Street address is listed as Blue Pacific Storage, Butler LD, B&K Distribution, Heath and Lejeune, Pathfinder Trucking, and RC Trucking
- **1991** — The Project 1338 East 6th Street address is listed as Fukui Abe Produce. The Project 1205 Wholesale Street address is listed as Direct Produce Company and New Day Distribution
- **1996** — The Project 1206 East 6th Street address is listed as Blue Pacific Storage, Garfield Produce Distributors, M&S Trucking, Pathfinder Trucking, and Heath and Lejeune. The Project 1338 East 6th Street address is listed as United Distribution. The Project 1205-1321 Wholesale Street addresses are not listed

EMG identified older city directories dating back to 1884; however, these directories were not indexed by street address making further research impractical.

5.6. Aerial Photography

Review of the 1938 aerial photograph, available from Rupp Aerial Photography, indicated the following:

- The Project is improved with two warehouse-type structures, surface-level parking, and a rail spur. The buildings are situated in the north and south portions of the Project. Vehicular access is available from north, east, and west.
- The areas north, south, east, and west of the Project are commercial/industrial in nature.

The 1952 aerial photograph, available from Rupp Aerial Photography, does not differ significantly from the 1938 aerial photograph.

The 1964 aerial photograph, available from Rupp Aerial Photography, differs from the 1952 aerial photograph in that:

- The Project is improved with two structures, but the northern-most structure has been replaced with another warehouse-type structure located a little further to the south, and the rail spur appears to be gone.

The 1972 aerial photograph, available from Rupp Aerial Photography, differs from the 1964 aerial photograph in that:

- The eastern side of the southernmost warehouse located on the Project has been enlarged.

The 1985 aerial photograph, available from Rupp Aerial Photography, differs from the 1972 aerial photograph in that:

- The Project is improved with the two current structures and surface-level parking. The buildings are situated in the center portion of the Project.

The 1992 aerial photograph, available from Rupp Aerial Photography, does not differ significantly from the 1985 aerial photograph.

Copies of the aerial photographs were not available.

5.7. Previous Investigations/Assessments

EMG was provided with a previous Environmental Site Assessment (ESA) of the Southern Pacific Railroad Properties which consisted of an approximately 48.4 acre area which included the Project. For the purpose of this previous assessment, the Project was considered parcel 10. This report was prepared by Applied Geosciences, Inc. and dated September 11, 1988. The Scope of Work for this previous assessment consisted of a Phase I ESA and a Phase II ESA which consisted of collecting samples from 18 soil borings conducted throughout the 48.4 acres. Four of the boring were conducted at the Project. At the time of the previous assessment, the Project consisted of the two current structures which were used as produce warehouses. Pertinent information identified in that report is as follows:

- The Project was mainly used for produce storage with the exception of one tenant, Progressive Product, which had a potato processing facility at the Project. The process involved a chlorine tank which was used to disinfect the potatoes. This tank was reported to be pumped out daily by a licensed contractor.

- A maintenance shop was located in the southwestern portion of the Project in the area operated by Progressive Produce. Cleaning solvents, grease, motor oil, hydraulic oil, and cleaners were noted in the maintenance area. Furthermore, this tenant had a truck maintenance area near the southwest corner of the northern building. Six drums containing waste oil were stored in this location which were reported to be hauled off-site on an as-needed basis.

  During EMGs site assessment, conversations with the Plant Manager for Progressive Produce indicated that the chlorine water is drained to the sanitary sewer system every other day (See Section 6.3). Furthermore, EMG was informed that truck maintenance is no longer conducted at the Project. EMG did not observe the drums of waste oil described above.

- Two underground storage tanks were noted near Alameda Street on the western portion of the Project which were also associated with Progressive Produce. The tanks contained unleaded gasoline and diesel fuel and were used to fuel delivery trucks. The tanks were properly permitted, however there was no data to suggest they were in compliance with current testing and monitoring requirements. Applied Geoscience, Inc. recommended that these tanks comply with UST regulations.

- The subsurface investigation included conducting four soil borings at the Project (L10A, L12, L13, and L14). Boring L10A was drilled to 12.5 feet below grade and was located between the western end of the warehouse and the Progressive Produce vehicle servicing area. Boring L12 extended to 20 feet below grade and was located in the southeast corner of the Project. Boring L13 was drilled to 20 feet below grade on the south central portion of the Project. Boring L14 was drilled to 25 feet below grade on the western portion of the Project, near the USTs. Ground water was not encountered in any of the borings.
- The soils samples collected were analyzed by USEPA method 8240 for volatile organic compounds and for total petroleum hydrocarbons (TPH). The samples collected from boring L10A contained 0.005 and 0.020 ppm toluene, and 10 ppm TPH. The sample analyzed from L12 contained no VOCs and 16 ppm TPH. The sample analyzed from L13 did not contain VOCs or TPH. The sample analyzed from L15 did not contain TPH and VOC analysis was not provided. Geoscience concluded that the samples collected from the Project did not contain concentrations which would be considered hazardous according to the current regulatory guidelines.
- In addition, a sample (PP-1) was collected from the sewer line which was sampled for pesticides by EPA Method 8080. It appears that this sample was collected to determine if pesticides from the produce operations were impacting the water discharged to the sewer system. Pesticides were not detected in the water sample.

EMG was provided with an Environmental Site Assessment (ESA) of the Project prepared by Applied Geosciences, Inc. and dated August 4, 1989. At the time of the previous assessment, the Project consisted of the two current structures which were used as produce warehouses. Pertinent information identified in that report is as follows:

- Progressive Produce remained at the Project and conducted the same operations described in the previous report. A total of eight drums containing waste oil were stored near their maintenance area and staining was noted on the ground under the drums. Additional drums containing solvents and motor oil were noted inside of the shed.

  During EMGs site assessment, conversations with the Plant Manager for Progressive Produce indicated that truck maintenance is no longer conducted at the Project. EMG did not observe the drums of waste oil or solvents described above. Furthermore, it appears that this shed has been removed.

- Two fuel dispensers were noted associated with the USTs. The USTs were located southwest of Building A near a small shed. Records from the State Water Resources Control Board indicate that Progressive Produce Company is a registered owner of two underground storage tanks of approximately 10,000-gallons in capacity. Review of records at the Los Angeles Fire Department indicated that these tanks were not properly permitted with the fire department. According to a representative of Progressive Produce, Mr. Mike Pierson, permit applications were obtained from the Fire Department and he was soliciting bids for a monitoring program for these tanks. Applied Ecosciences Inc. recommended that Progressive Produce obtain a permit for compliance with existing State regulations for testing and monitoring of USTs in accordance with the permitting procedures of the City of Los Angeles Fire Department.

- This assessment included a survey for asbestos-containing materials (ACM). A total of 21 samples were collected from the wallboard/joint compound, ceiling panels, flooring materials, and roofing materials. All of the materials sampled were observed to be in good condition. Of the samples collected, four samples were analyzed to contain asbestos which included four types of flooring materials in building B. Brown and white floor tile in unit 1 of building B contained two percent Chrysotile, orange and red floor tile in unit 2 contained 25 percent Chrysotile, blue and green floor tile in Unit 13 contained seven percent Chrysotile, and tan and red flooring in Unit 13 contained five percent Chrysotile. It was estimated that 500 square feet of asbestos-containing floor tile and 275 square feet of asbestos-containing linoleum were located in Building B. Applied Ecosciences Inc. recommended an Operations and Maintenance (O&) Program for these materials.

  During EMGs site visit, these materials were not observed and it appears that they have since been removed.

EMG was provided with an Oversight of Underground Storage Tank Abandonment report for the Project prepared by Applied Geosciences, Inc. and dated June 27, 1990. The Scope of Work for this previous assessment consisted of a Phase I ESA. At the time of the previous assessment, the Project consisted of the two current structures which were used as produce warehouses. Pertinent information identified in that report is as follows:

- Prior to removal, the two USTs were emptied of product in May of 1990. When the tanks were uncovered, they were both noted to be constructed of steel. The first tank was 10,000 gallons in capacity and contained diesel fuel (T1) and the second 10,000-galllon tank contained gasoline (T2). No holes were noted in either of the tanks and odors were not present in the soils. In accordance with Los Angeles City Fire Department regulations, a total of six samples were collected (three from each excavation). No petroleum contamination was detected in any of the soil samples collected. A closure report was submitted to the Los Angeles City Fire Department on June 13, 1990. No further action was recommended by Applied Geosciences, Inc.

EMG was provided with a Phase I Environmental Site Assessment for the Project prepared by EGA and dated May 22, 2000. The Scope of Work for this previous assessment consisted of a Phase I ESA. At the time of the previous assessment, the Project consisted of the two current structures which were used as produce warehouses. Pertinent information identified in that report is as follows:

- The railroad spur was noted between the two building which had been abandoned. It should be noted that during EMGs site visit, this area existed as a paved drive area.
- EGA Consultants performed a limited survey for ACM. Samples were collected of the suspended ceiling tiles, wall materials, pipe wrap, and the roofing materials. Asbestos was identified in the roofing materials (up to 25 percent Chrysotile), which were being replaced or encapsulated at the time of their site visit.
- Building A contained seven units occupied by four produce distribution companies and three vacant units. Building B contained two units occupied by produce distribution companies, a Chinese food distributor, four import/export dealers, and four vacant units.
- One sample was collected from the exterior of Building B which was analyzed for lead-based paint. Lead as not detected in this sample.

5.8. Plans and Specifications

As-built/renovation-site plans, drawings, and specifications were not available for review at the Project.

5.9. Historical Summary

Based upon interviews and a review of chain of title information, local agency records, zoning records, historical maps, city directories, and aerial photographs; the previous Project uses include a lumber yard and warehouse (1906) and various warehousing activities since at least the 1920s, prior to the development of the current Project improvements in 1962 and 1968.

A tenant at the Project, Progressive Product, has been on-site since at least 1988. This tenant formerly conducted truck maintenance at the Project and stored drums of used motor oil on-site. Currently, all truck servicing is conducted off-site by Penske Oil. Drums of used oil were not observed during EMGs site visit. This past use of the Project is not anticipated to have impacted the environmental integrity of the Project.

Associated with truck maintenance, vehicle fueling was formerly conducted on-site by this tenant. However, the two underground storage tanks were removed from the Project in May of 1990. Soil contamination was not detected in the tank excavation. Based on the fact that these tanks have been removed and since no contamination was detected in the tank excavation, these former tanks are not anticipated to have impacted the environmental integrity of the Project.

6. Project Reconnaissance

6.1. Operational Activities/Noteworthy Tenants

The Project is a commercial warehouse facility and is occupied by the tenants listed in the Project Tenants Table below.

Project Tenants	
Name of Tenant	**Description of Operations**
1206-1338 East 6th Street	
Heath and Lejeune	Warehouse
United Distribution Incorporated	Warehouse
Progressive Produce Corporation	Warehouse
Schratter Foods	Warehouse
Land-Wa Food Incorporated	Warehouse
1205-1321 Wholesale Street	
ProArt	Warehouse
Wha Soo Boon Corporation	Warehouse
NKOK Incorporated/Ok Toys	Warehouse
Benito Toys	Warehouse
Paramount Export Company	Warehouse
Kairos Textiles	Warehouse
Cali Toys	Warehouse
American Produce	Warehouse

Considering the operations assessed at the Project, no environmental permits, registrations or notifications appear to be required.

6.2. Hazardous Materials/Petroleum Products Storage and Handling

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. The following products listed in the Observed Materials Table below were identified.

Observed Materials			
Type of Material	**Quantity**	**Name of Tenant - Storage Location**	**Use**
Routine janitorial and maintenance supplies	Retail size containers	All tenants	Project maintenance and upkeep
Propane	5-gallon containers	Most tenants	Forklifts
Oxygen and acetylene	Ten cylinders	American Produce	On-site construction activities

The identified chemicals, materials, and products were observed in their sealed, original containers and in designated storage areas. Materials appear to be properly stored.

No evidence of spills or staining were observed in the area of product storage/usage.

A maintenance shop is present in the tenant space occupied by Progressive Produce Corporation. This shop is used to maintain the on-site equipment in the plant. Conversations with the plant manager confirmed that truck maintenance is no longer conducted at the Project. He stated that all truck maintenance is conducted by Penske Oil at an off-site location.

6.3. Waste Generation, Treatment, Storage, and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. The Project is not involved in the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes. EMG identified the following waste generation listed in the Waste Generation Table below.

Waste Generation			
Type of Waste	**Generation Process**	**Name of Tenant - Pre-Disposal Storage**	**Disposal Method**
■ **Non-Hazardous Solid**			
Municipal trash	N/A	Dumpsters	Contracted waste hauler – Waste Management, Consolidated Services, Kustoff and Sons Disposal
■ **Non-Hazardous Liquid**			
Sewage	N/A	N/A	Municipal sanitary system

No evidence of spills or staining was observed in the area of waste generation or pre-disposal storage.

In addition to the materials listed above, one of the tenants at the Project, Progressive Produce, has a holding tank at the Project which contains chlorinated water used to disinfect potatoes. It was reported that every other day this tank is drained and the chlorinated water discharges to the sanitary sewer system.

No excessive odors or overflowing/excessive ground trash were noted in the vicinity of the dumpsters. No hazardous, regulated, or medical wastes were noted in the dumpsters.

6.4. Polychlorinated Biphenyls (PCBs)

The Project is supplied with underground and overhead secondary electrical service from one pad-mounted and three pole-mounted exterior electrical transformers. The transformers are designated as the property of the Los Angeles Department of Water and Power (DWP), the public utility. Contact with a utility representative indicated that the units are classified as non-PCB. The units should be periodically inspected for leakage. If leakage is visible, the Project owner/manager should contact the public utility, which will remediate the situation. Should the units have to be replaced, the utility is responsible, provided the cause is equipment failure, not customer misuse. No leakage of the transformers was observed at the time of the assessment.

No additional equipment with the potential to utilize dielectric or hydraulic fluid was observed during the site assessment.

6.5. Asbestos-Containing Materials (ACM)

As-built-renovation-site plans, drawings, and specifications were not available for review. However, prior assessments conducted at the Project indicate that various materials have previously been tested for asbestos content. Materials which were sampled to contain asbestos include the roofing materials, as well as four types of flooring materials. The flooring materials previously identified to contain asbestos were removed from the Project prior to EMGs site visit. In addition, the prior reports identified that the asbestos-containing roofing materials had been removed or encapsulated.

Random samples of the remaining suspect ACM which did not appear to be sampled in the previous assessments were collected. Each of the samples collected and the results of the associated laboratory analysis are listed in the Asbestos Screening Sampling Table below.

Asbestos Screening Sampling Table

No.	Material Type	Location	Friable	Condition	Analytical Results	Estimated Quantity
1A 1B	Floor tile	Wha Soo Boon Corporation Heath and Lejeune	No	Fair to Good	ND ND	300 SF

ND = No Asbestos Detected
SF = Square Feet

6.6. Radon Gas

Review of the USEPA's Radon Map for Los Angeles County, California indicated that the Project is located in an area of moderate radon propensity.

In addition, based on the type of construction, the presence of commercial HVAC systems, and the commercial use of the buildings, there is reduced potential for the build-up of radon gas in the buildings at the Project.

6.7. Lead-Based Paint (LBP)

LBP was not addressed due to the non-residential use of the Project.

6.8. Lead in Drinking Water

According to the local water utility 1999 Water Quality Report, the water supplied to the Project is within federal, state, and local drinking water quality standards (Section 4.1).

6.9. Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts in paved areas did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Project. However, two underground storage tanks have previously been removed from the Project which are discussed in Section 5.9.

No aboveground storage tanks (ASTs) were observed at the Project.

The manways and surface caps observed at the Project were for site services (i.e., domestic water, storm water, and sanitary sewer system).

Furthermore, review of currently installed mechanical equipment, and historical information concerning mechanical equipment, identified the use of alternate fuel sources (i.e., electric, natural gas) thereby eliminating the need for on-site fuel storage at the Project.

Interviews with persons knowledgeable of the Project did not identify any evidence of additional current or historic storage tanks (above or below ground) at the Project.

Visual observations did not identify any surface markings indicating the existence of subsurface product pipelines at the Project.

6.10. Surface Areas

Observations during EMG's assessment identified that the Project lands are graded to provide slope and swale to direct storm water away from the on-site buildings. The land surface of the Project slopes gently to the southeast. Surface water flow is in a southeasterly direction.

Visual observation of the Project and adjacent properties did not identify any evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Project.

Visual observations did not identify any evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Project.

Visual observations did not identify any surface water features including lagoons, ponds or other bodies of water at the Project. Storm water catch basins were noted along the south and east sides of the Project which receive runoff. No staining was noted in the catch basins.

Parking facilities consist of surface level asphalt pavement areas. Minor oil discharges were observed on the parking areas; however, the discharges are incidental in nature and corrective action is neither practical nor warranted.

Storm water from the roofs is directed to the surface via roof drains. Storm water from drive and parking surfaces is directed to storm drains via natural flow.

7. Regulatory Database Review

NPL, RCRA-TSD, RCRA-CORRACTS, SHWS, CERCLIS, NFRAP, SWF, LUST, UST, RCRIS-Generators, and ERNS listings were reviewed. Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, EMG concludes that the Project is listed on the UST database as a inactive UST site. Furthermore, the area search of the Project for sites listed in these databases identified various sites outlined in the Regulatory Agency Data Report Findings included in the Appendices, Section 9. Information about the listed sites is included in the following database discussions.

EMG also reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. Any identified unmappable site within the specified search radii is included and discussed in the corresponding database discussions that follow.

- **NPL Listing:** The National Priorities (Superfund) List is United States Environmental Protection Agency (USEPA's) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.
  - Based on review of the regulatory database report, neither the Project nor any sites within 1.0 mile of the Project were identified on the NPL database.

- **RCRA-TSD Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD database is a compilation by the USEPA of reporting facilities that transport, treat, store or dispose of hazardous waste.
  - Based on review of the regulatory database report, neither the Project nor any sites within 0.5 mile of the Project were identified on the RCRA-TSD database.

- **RCRA-CORRACTS Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Corrective Action-sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.
  - Based on review of the regulatory database report, neither the Project nor any sites within 1.0 mile of the Project were identified on the RCRA-CORRACTS database.

- **SHWS (CALSITE) Listing:** The CALSITE list is a comprehensive listing of sites which were considered to be a possible threat to the public health and welfare by the California Department of Toxic Substances Control (CDTSC). The CALSITE list can include any business or property which may utilize hazardous chemicals. The list does not necessarily imply environmental impairment. After a preliminary endangerment assessment, sites are assigned one of the following statuses: "Certified", "No Other Agency Lead", "Properties To Be Removed", "No Further Action", "Low Priority", "Medium Priority", or "High Priority". Contact with the CDTSC indicated that sites listed with a "Medium Priority" and "High Priority" status endangerment are the ASTM equivalent of a State Hazardous Waste Sites List. The "Other Agency Lead" status is a pointer to other sources which contain more detail. Based on listed status, the "Certified", "Properties To Be Removed", "No Further Action", and "Low Priority" sites are not anticipated to have a negative impact on the environmental integrity of the Project.

  - Based on review of the regulatory database report, the Project was not identified on the SHWS database; however, seven SHWS sites were identified within 1.0 mile of the Project.

    - **Bailey and Schmitz Company**
      2101 East 7th Street
      Distance: 0.49 mile
      Direction: East-southeast

    - **Santa Fe/W.A. Grant**
      2144 East 7th Street
      Distance: 0.60 mile
      Direction: East-southeast

    - **Fishking Processors/15th Street**
      1335 East 15th Street
      Distance: 0.94 mile
      Direction: Southwest

    Based on review of the USGS Topographic Map, these sites are located topographically cross-gradient from the Project and the estimated direction of ground water flow in the area of the sites is to the southeast, which is parallel to and away from the Project. Information in the SHWS database indicates the status of these three sites is no further action for CDTSC. Based on distance from the Project, the estimated direction of ground water flow, and the current regulatory status, these sites are not anticipated to adversely impact the environmental integrity of the Project.

- **So Cal Gas/LA Alameda MGP**
  725 Channing Street
  Distance: 0.26 mile
  Direction: South

- **Alco Cad-Plate Nickel Plating Corporation**
  1400 Long Beach Avenue
  Distance: 0.99 mile
  Direction: South-southwest

Based on review of the USGS Topographic Map, these sites are located topographically downgradient and cross-gradient from the Project and the estimated direction of ground water flow in the area of the site is to the southeast, which is away from the Project. Information in the SHWS database indicates a voluntary cleanup agreement as been completed for both of these sites. Based on distance from the Project and the estimated direction of ground water flow, these sites are not anticipated to adversely impact the environmental integrity of the Project.

- **Dean and Associates**
  700 South Santa Fe Avenue
  Distance: 0.49 mile
  Direction: East-southeast

  Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project and the estimated direction of ground water flow in the area of the site is to the southeast, which is parallel to and away from the Project. Information in the SHWS database indicates the remediation at this site has been completed and the site is only listed for cost recovery. Based on the distance from the Project, the estimated direction of ground water flow, and the current regulatory status, this site is not anticipated to adversely impact the environmental integrity of the Project.

➤ **International Lead Company**
2182 East 11th Street
Distance: 0.93 mile
Direction: South-southeast

Based on review of the USGS Topographic Map, this site is located topographically downgradient from the Project and the estimated direction of ground water flow in the area of the site is to the southeast, which is away from the Project. Information in the SHWS database indicates the site is in the final stages of remediation. Based on distance from the Project, the estimated direction of ground water flow, and the current status, this site is not anticipated to adversely impact the environmental integrity of the Project.

■ **CERCLIS Listing:** This database is a compilation of sites which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

- Based on review of the regulatory database report, neither the Project nor any sites within 0.5 mile of the Project were identified on the CERCLIS database.

■ **NFRAP Listing:** This database contains information regarding sites which have been removed from the USEPA CERCLIS database.

- Based on review of the regulatory database report, the Project was not identified on the NFRAP database. However, two NFRAP sites were identified within 0.5 mile of the Project. The identification of a site on the NFRAP database indicates that the regulatory agency with oversight required no further action (i.e., a case-closed status). The regulatory agency awards a case-closed status only when contamination, if any, has been investigated and/or remediated in accordance with currently accepted regulatory standards. As such, \these sites are not anticipated to adversely impact the environmental integrity of the Project. Therefore, no further action or investigation appears warranted.

- **SWF Listing:** This database is a comprehensive listing of all State Permitted Solid Waste Landfills.
  - Based on review of the regulatory database report, neither the Project nor any sites within 0.5 mile of the Project were identified on the SWF database.

- **Leaking Underground Storage Tanks (LUST)**
  - Based on review of the regulatory database report, the Project was not identified on the LUST database; however, a total of six LUST sites were identified on both the State and Region 4 LUST Lists within 1.0 mile of the Project. Of the six sites, five have a "case closed" regulatory status indicating the California Regional Water Quality Control Board (RWQCB) and local agency are in concurrence that no further work is necessary at the site. A "case-closed" status is awarded only when contamination, if any, has been investigated and/or remediated in accordance with currently accepted regulatory standards. Based on their current regulatory status, the "case closed" LUST sites are not anticipated to impact the Project. The status of the remaining site is as follows:

    ➢ **BASF Inmont/Sun Chemical**
    590 South Santa Fe Avenue
    Distance: 0.41 mile
    Direction: East

    Based on review of the USGS Topographic Map, this sites is located topographically cross-gradient from the Project and the estimated direction of ground water flow in the area of the site is to the southeast, which is parallel to and away from the Project. Based on the intervening distance from the Project and the estimated direction of ground water flow, this site is not anticipated to adversely impact the environmental integrity of the Project.

- **WDS Listing:** This database is a comprehensive listing of sites which have been issued waste discharge permits by the state.

  - Based on review of the regulatory database report, the Project was not identified on the WDS database; however, one WDS site was identified within 0.5 mile of the Project.

    - **GW-Plant 140**
      1330 North Willow
      Distance: 0.32 mile
      Direction: East-northeast

      Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project and the estimated direction of ground water flow in the area of the site is to the southeast, which is parallel to and away from the Project. Based on the intervening distance from the Project and the estimated direction of ground water flow, this site is not anticipated to adversely impact the environmental integrity of the Project.

- **Underground Storage Tanks (UST)**

  - Based on review of the regulatory database report, both the Project and one adjoining property were identified on the UST inventory:

    - **Progressive Produce Company**
      1266 East 6th Street
      Distance: N/A (The Project)
      Direction: N/A (The Project)

      The above site is the Project and is listed as being inactive. More information regarding the former USTs is included in Section 5.7.

➤ **RTD Division 1 - Alameda**
1130 East 6th Street
Distance: Adjacent
Direction: West

Based on review of the USGS Topographic Map, this site is located topographically cross-gradient from the Project and estimated ground water flow in the area of the site is to the southeast, which is away from the Project. This site was not identified on the LUST database. The UST database is merely a listing of all facilities that are required to register their USTs for tracking purposes and are not necessarily sites with reported contamination incidents. Based on current regulatory status, absence of reported releases, and estimated ground water flow, this site is not anticipated to adversely impact the environmental integrity of the Project.

➤ **Metropolitan Distribution Center**
1340 East 6th Street
Distance: Adjacent
Direction: North

Based on review of the USGS Topographic Map, this sites is located topographically upgradient from the Project and estimated ground water flow in the area of the site is to the southeast, and towards the Project. Information in the UST database indicates this site is inactive. Furthermore, this site was not identified on the LUST database. The UST database is merely a listing of all facilities that are required to register their USTs for tracking purposes and are not necessarily sites with reported contamination incidents. Based on current regulatory status and absence of reported releases, this site is not anticipated to adversely impact the environmental integrity of the Project.

- **RCRIS-Generator Listing:** The USEPA identifies and tracks hazardous waste from the point of generation to the point of disposal through the Resource Conservation and Recovery Information System (RCRIS). The RCRIS-Generators database is a compilation by the USEPA of facilities that report hazardous waste generation.

  - Based on review of the regulatory database report, the Project was not identified on the RCRIS-Generator listing. However, two adjoining properties, were identified on the RCRIS-Generator listing:

    - **Aesthetic Frame Design**
      1275 East 6th Street
      Distance: Adjacent
      Direction: North

    - **Union Central Cold Storage**
      1525 Industrial Street
      Distance: Adjacent
      Direction: South

    Based on review of the USGS Topographic Map, these sites are located topographically upgradient and downgradient from the Project and estimated ground water flow in the area of the sites is to the southeast, towards and away from the Project. Information in the RCRIS-Generator database indicates neither site has any identified violations or corrective actions. Furthermore, these sites were not identified on the any database which reports releases or spills such as the NPL, SHWS, or CERCLIS Listings. The RCRIS-Generator database is merely a listing of all facilities that, due to the amount of hazardous waste generated, are required to register with the USEPA for tracking purposes and are not necessarily sites with reported contamination incidents. These sites are not reported as being non-compliant with the requirements of the RCRA regulations. Based on the current regulatory status and absence of reported releases, these sites are not anticipated to adversely impact the environmental integrity of the Project.

- **Emergency Response Notification System (ERNS):** The ERNS is a national database used to collect information on reported releases of oil or hazardous substances.

  - Based on review of the regulatory database report, the Project was not identified on the ERNS database.

8. Adjacent Properties

The general vicinity of the Project consists of commercial and industrial land uses. The following adjacent properties were observed:

North — The Project is bordered to the north by 6th Street. Further north are an unidentified business, Global Trading Incorporated, Quality Bias Company, two vacant buildings, two unidentified businesses, two vacant buildings, and Dynamic Asia.

East — The Project is bordered to the east by Mill Street. Further east are Metro, DC Stages parking, and Ace Trading Company.

South — The Project is bordered to the south by Wholesale Street. Further south are G&H Luggage and Union Central Cold Storage.

West — The Project is bordered to the west by Alameda Street. Further west is Metro Bus Division 1.

Adjacent properties to the north and south were identified on the RCRIS-Generator database and adjacent properties to the north and west were identified on the registered UST database. None of these sites appear to have the potential to impact the environmental integrity of the Project. More information regarding these sites is included in the Regulatory Review discussion (Section 7).

REVIEWED BY Jean L. Mayes, Analyst

Samples analyzed by the EPA Test Method are subject to the inherent limitations of light microscopy including interference by matrix components. Gravimetric reduction and correlative analyses are recommended for all non-friable, organically bound materials. For calibrated visual estimate, 1% is the concentration at which there is a quantitative uncertainty. This report relates only to the items tested, must not be reproduced except in full with the approval of the lab, and must not be used to claim NVLAP or other government agency endorsement.

APPENDIX I

RESUMES

STEVE W. ANDERSON
Staff Geologist

EDUCATION

M.S., Geology
California State University, Northridge, 1992

B.A., Earth Science
California State University, Northridge, 1974

PROFESSIONAL SUMMARY

As a geologist in ATC's Monterey Park, California office, Mr. Anderson has had experience conducting environmental assessment and remediation projects since 1989. Mr. Anderson has performed Phase I site assessments in a wide range of residential, commercial, and industrial settings. He has designed and implemented sampling programs for subsurface assessments, asbestos, lead-in-drinking water, lead-in-paint, and radon. As a staff geologist, he is responsible for the day-to-day management of technical, field, engineering, design and construction personnel. Mr. Anderson has performed assessments, sampling projects, and remediation projects for large and small private clients.

SELECTED PROJECT EXPERIENCE

Environmental

- **Environmental Site Assessments / ITT Corporation / Los Angeles Area, CA.** Provided environmental site assessments of commercial properties.
- **Environmental Site Assessments / General Electric Capital Corporation / Los Angeles Area, CA.** Provided site assessments of commercial properties.
- **Environmental Site Assessments / J.E. Robert Companies / Various Locations, CA & AZ.** Provided site assessments of commercial and residential properties.
- **Environmental Site Assessments / Heitman Corporation / Southern CA.** Provided site assessments of residential properties.
- **Environmental Site Assessments / Multiple Financial Clients / Various Locations, Throughout CA.** Provided site assessment services for a number of individual lending institutions including, LaSalle Northwest National Bank, Metropolitan Life, Mitsui Manufacturers Bank, Union Bank, and Coast Federal Savings.
- **Remediation Management / Confidential Client / Commerce, CA.** Performed air monitoring for VOCs and fugitive dust during excavation and reclamation of a 200,000 cubic yard landfill.

- **Remediation Management / Chevron USA / El Segundo, CA.** Coordinated remediation of petroleum contaminated soils at the El Segundo Refinery.

- **Remediation Management / Unocal Corporation / Torrance, CA.** Coordinated remediation of lead-contaminated soil at Torrance Refinery.

- **Environmental Site Assessments / RREEF America L.L.C. / Phoenix, AZ.** Performed environmental assessments of industrial centers and residential properties.

TRAINING AND CERTIFICATIONS

- OSHA 40-Hour Hazardous Waste Operations
- OSHA 8-Hour Hazardous Waste Supervisor
- EPA AHERA-Certified Asbestos Building Inspector
- EPA AHERA-Certified Abatement Contractor/Supervisor/Competent Person

Highlights

- More than ten years ESA experience with an emphasis in client and portfolio management

"I wanted to give……special thanks and extend my appreciation for work well done. Your responsiveness and thoroughness in the review was recognized." **– Steve Luzkow, Environmental Risk Manager – Standard Federal Bank/ABN AMRO**

Dawn Merrill

Client Manager

Professional Summary

Ms. Merrill has more than ten years experience as an environmental consultant. She is responsible for managing and providing senior review of Phase I Environmental Site Assessments (ESAs). She also coordinates and manages portfolios of projects, which are often conducted by multiple ATC branches. In addition, Ms. Merrill serves as Client Manager for several of ATC's national clients.

Ms. Merrill has performed numerous ESAs throughout Southern California. Her duties included on-site visual inspections, public record searches, aerial photograph reviews, personal interviews, and preparation of technical reports.

Relevant Experience

Environmental Site Assessment / Client Manager / Real Estate Investment / Various Locations U.S.
Coordinated over 300 projects for this national real estate investment client. Included a weekly report of ongoing projects, facilitating all correspondence with the client and providing a senior level review of all ESA reports.

Environmental Site Assessments / Senior Reviewer & Client Manager / Real Estate Investment / Various Locations U.S.
As part of a nationwide team, managed approximately 150 of the 450 total Phase I ESAs conducted at existing grocery stores. The ESAs were completed in only six weeks. Services were provided prior to a large (and successful) real estate transaction.

Environmental Site Assessments / Project Manager / Real Estate Investment / Various Locations CA
Completed 31 Phase I ESAs in support of a real estate transaction for a portfolio of existing grocery stores. Phase I ESAs showed no environmental issues and transaction was successfully completed.

Environmental Site Inspections / Senior Reviewer & Project Manager / Commercial Bank / Various Locations, CA
Determined environmental risks associated with properties to assist client with property transaction and refinancing loans. Performed several site inspections and prior use reports according to client's standards for commercial properties. Continues to manage and review Phase I ESAs and related reports prepared for this client.

Environmental Site Inspections / Senior Reviewer & Coordinator / Retail / Various Locations, CA
Completed Phase I ESAs for a large portfolio of department stores in only four weeks. Managed and reviewed the assessments in support of a real estate transaction that was successfully completed.

Environmental Site Inspections / Senior Reviewer & Project Manager / Real Estate Management / Various Locations, CA
Managed and reviewed Phase I ESAs required for the client to achieve refinancing for a large portfolio of trucking rental facilities.

While several properties required Phase II surveys, the information provided allowed financing to be secured.

Environmental & Natural Resource Assessments / Site Assessor / Telecommunications / Various Locations, CA
Performed more than 20 modified Phase I ESAs, NEPA checklists and historical reports required for construction of cell phone towers. Services were provided in support of client's telecommunication service expansion and antenna placement.

Environmental Site Assessment / Site Assessor / School District / South Pasadena, CA
Performed Phase I ESA of residential property, as due diligence for a pending real estate transaction. Residential properties were to be demolished to make room for school expansion.

Professional Qualifications

Registrations

- Registered Environmental Assessor I, CA, I #07935, 2004

Training and Certifications

- EPA AHERA-Certified Asbestos Building Inspector
- OSHA 40-Hour Hazardous Waste Operations Training
- Certificate of Achievement, 16-Hour Microbial Investigations, Assessments and Remediation conducted by ATC, 2006

Education

West Chester University, West Chester, PA
B.S., Criminal Justice, 1993

RE: 1338 EAST SIXTH ST, LOS ANGELES CA 90021

I, the undersigned, being the Custodian or the Keeper of Records certify that a thorough search for the records you requested was carried out under my direction and control.

This search revealed no records.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, name, or classification; or were not located. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

If you have any questions regarding your request, please contact our office at (323) 890-7801.

Very truly yours,

ROBERT L. SMITH, Deputy Health Officer
Public Health Investigation

Report for All Water Quality Areas

Tables I-III list the results of water tests performed by LADWP and MWD from January to December 2008. LADWP tests for over 200 contaminants. These tables include only contaminants with values that are equal to or greater than the limit of detection.

How to Read the Tables

The constituents/contaminants found in the water served in your area are listed as follows:

- For San Fernando Valley Area – water test results are under the Los Angeles Aqueduct Filtration Plant, the Northern Combined Wells, and MWD Jensen Filtration Plant columns
- For Western Los Angeles Area – water test results are under the Los Angeles Aqueduct Filtration Plant column
- For Central Los Angeles Area – water test results are under the Los Angeles Aqueduct Filtration Plant and the Southern Combined Wells columns
- For Harbor/Eastern Los Angeles Area – water test results are under the MWD Jensen, Weymouth, and Diemer Filtration Plants columns

Some constituents/contaminants detected are reported on a citywide basis as required by the California Department of Public Health.
The unregulated contaminants reported on an area-wide basis are included for additional information on the water served in your area.

Calendar Year 2008 Water Quality Monitoring Results

Table I

Health-Based Primary Drinking Water Standards Contaminants Detected in Treated Water

Contaminants	Units	Los Angeles Filtration Plant		Northern Combined Wells		Southern Combined Wells		MWD Diemer Filtration Plant		MWD Jensen Filtration Plant		MWD Weymouth Filtration Plant		State and Federal Primary Standard (MCL or MRDL)	Meet Primary Standard?	State PHG or (Federal MRDLG or MCLG)	Major Sources in Our Drinking Water
		Range	Average	Range	Average	Range	Average	Range	Average	Range	Average	Range	Average

The EDR Environmental LienSearch™ Report

EDR® Environmental Data Resources Inc

440 Wheelers Farms Road
Milford, CT 06461
800.352.0050
www.edrnet.com

txtTitle

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GRANT DEED

A. F. N. F. CODE 94

The undersigned grantor declares:

TRANSFER TAX
NOT A PUBLIC RECORD

Documentary transfer tax is shown by an unrecorded separate affidavit pursuant to R&T Code § 11932

( ) computed on full value of property conveyed, or
(X) computed on full value, less value of liens and encumbrances remaining at time of sale.

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, NEWLOWE PROPERTIES, a California general partnership ("Grantor"), hereby GRANTS to LOWE 6TH STREET PROPERTIES, LLC,, a California limited liability company , the following described real property (the "Property") located in the County of Los Angeles, State of California:

SEE EXHIBIT "A" ATTACHED HERETO AND INCORPORATED HEREIN BY THIS REFERENCE

SUBJECT TO:

1. Taxes and assessments.

2. All other covenants, conditions, restrictions, reservations, rights, rights of way, easements, encumbrances, liens and title matters whether or not of record or visible from an inspection of the Property and all matters which an accurate survey of the Property would disclose.

LA981340.023/MHC/C3050-017/05-14-98/mcm

1804391-20

IN WITNESS WHEREOF, Grantor has caused this Grant Deed to be executed as of the 15th day of May, 1998.

NEWLOWE PROPERTIES,
a California general partnership

By: Metropolitan Life Insurance Company, a New York corporation, for and on behalf of its Developmental Properties Account, Managing General Partner

By: AEW Real Estate Advisors, Inc., its asset manager and advisor hereto duly authorized

EXHIBIT "A"

PARCEL 1: (Parcel A of Wholesale Street)

Lot "A" of Tract 1182, in the City of Los Angeles, County of Los Angeles, State of California, as per map recorded in Book 17, Page 124 of Maps, in the office of the County Recorder of said County.

PARCEL 2: (Parcel B of Wholesale Street)

Lot "I" of The Industrial Tract, in the City of Los Angeles, County of Los Angeles, State of California, as per map recorded in Book 5, Page 56 of Maps, in the office of the County Recorder of said County.

PARCEL 3: (Parcel III of Sixth and Alameda)

That portion of City Lands of Los Angeles, as per map recorded in Book 2, Pages 504 and 505 of Miscellaneous Records, in the office of the County Recorder of Los Angeles County, bounded and described as follows:

Beginning at a point in the East line of Alameda Street where the same is intersected by the South line of 60 foot strip of land conveyed by Caroline Shafer, to the City of Los Angeles for Sixth Street, by deed recorded in Book 2110, Page 131 of Deeds; thence along the South line of Sixth Street, North 88° 35' 30" East to the West line of Mill Street, as shown on map of The Industrial Tract, in the City of Los Angeles, County of Los Angeles, State of California, recorded in Book 5, Page 56 of said Maps; thence along the West line of Mill Street, South 04° 52' East 336 feet, more or less, to the Northeast corner of Lot "I" of said Industrial Tract; thence Westerly along the Northerly line of said Lot "I" and along the dividing line between the lands of Alice Shafer and Caroline Shafer, as partitioned between them, by deeds recorded in Book 755, Pages 57 to 60 of Deeds, 1177 feet, more or less, to a point in the Easterly line of Alameda Street; thence Northerly along said street line to the place of beginning.

EXCEPTING from Parcels 1, 2 and 3 above, all oil, mineral, gas and other hydrocarbon substances below a depth of 500 feet under the surface of the land, but without the right of surface entry or any other use of the land above such 500 foot depth, as reserved by Southern Pacific Transportation Company, in deed recorded October 12, 1988 as Instrument No. 88-1634144, Official Records.

SUBORDINATION, NON-DISTURBANCE AND ATTORNMENT AGREEMENT

APN: 5164-010-003, 004, 005

TITLE ORDER NO.: 6155165-27

BANK OF AMERICA, N.A.

Exhibit G

3

Subordination, Non-Disturbance and Attornment Agreement

THIS SUBORDINATION, NON-DISTURBANCE AND ATTORNMENT AGREEMENT (the "Agreement") is made as of this 6th day of November 2006, which date shall be the effective date of this Agreement, between TGH International Trading, Inc., a California corporation (the "Tenant") and BANK OF AMERICA, N.A., a national banking association, a wholly owned subsidiary of BankAmerica Corporation, and having its principal offices in Charlotte, North Carolina (together with its successors and/or assigns the "Lender").

The Tenant is the lessee under the lease described in Exhibit A attached hereto (as the same may from time to time be assigned, subleased, renewed, extended, amended, modified or supplemented, collectively the "Lease").

The Lender has previously made or is about to make a loan to Lowe 6th Street Properties, LLC, a California limited liability company or its successor and/or assigns with respect to the landlord's interest under the Lease (the "Landlord"), evidenced by a promissory note in the original principal amount of approximately $39,000,000 executed by the Landlord and payable to the Lender and secured by a first priority deed of trust, mortgage or deed to secure debt on certain real and personal property and improvements (the "Premises"), recorded or to be recorded in the appropriate records of Los Angeles County, California (the "Security Instrument").

The Lender has requested the Tenant to confirm the fact that the Lease is subject and subordinate to the Security Instrument.

The Tenant is willing to confirm the subordination of the Lease, provided it obtains assurance from the Lender that its possession of the premises demised under the Lease (the "Demised Premises), which Demised Premises is all or a portion of the Premises, and its right to use any common areas will not be disturbed by reason of or in the event of the foreclosure of the Security Instrument.

The Lender is willing to give such assurance.

NOW, THEREFORE, for and in consideration of the mutual agreements herein contained and other good and valuable consideration, the parties hereto do hereby mutually covenant and agree as follows:

1. The Tenant hereby subordinates the Lease and all terms and conditions contained therein and all rights, options, liens and charges created thereby to the Security Instrument and the lien thereof, and to all present or future advances under the obligations secured thereby and to all renewals, extensions, amendments, modifications and/or supplements of same, to the full extent of all amounts secured thereby from time to time.

2. So long as no event of default on the part of the Tenant under the Lease shall exist which would entitle the Landlord to terminate the Lease, or if such an event of default shall exist, so long as the Tenant's time to cure the default shall not have expired, the term of the Lease shall not be terminated or modified in any respect whatsoever and the Tenant's right of possession to the Demised Premises and its rights in and to any common areas and its other rights arising out of the Lease will all be fully recognized and protected by the Lender and shall not be disturbed, canceled, terminated or otherwise affected by reason of the Security Instrument or any action or proceeding instituted by the Lender to foreclose the

+ Unrecorded

07 0211309

Security Instrument, or any extension, renewal, consolidation or replacement of same, irrespective of whether the Tenant shall have been joined in any action or proceeding.

3. In the event that the Lender takes possession of the Premises, either as the result of foreclosure of the Security Instrument or accepting a deed to the Premises in lieu of foreclosure, or otherwise, or the Premises shall be purchased at such a foreclosure by a third party, the Tenant shall attorn to the Lender or such third party and recognize the Lender or such third party as its landlord under the Lease, and the Lender or such third party will recognize and accept the Tenant as its tenant thereunder, whereupon, the Lease shall continue in full force and effect as a direct lease between the Lender or such third party and the Tenant for the full term thereof, together with all extensions and renewals thereof, and the Lender or such third party shall thereafter assume and perform all of the Landlord's obligations, as the landlord under the Lease with the same force and effect as if the Lender or such third party were originally named therein as the Landlord; provided, however, that the Lender or such third party shall not be:

(a) liable for any act or omission of any prior landlord (including the Landlord), except to the extent the Lender was furnished notice and opportunity to cure the same in accordance with the provisions of this Agreement prior to taking possession of such Premises; or

(b) subject to any offsets or defenses which the Tenant might have against any prior landlord (including the Landlord), except to the extent the Lender was furnished notice and opportunity to cure the same in accordance with the provisions of this Agreement prior to taking possession of such Premises; or

(c) bound by any rent or additional rent which the Tenant might have paid for more than two (2) months in advance to any prior landlord (including the Landlord); or

(d) bound by any amendment or modification of the Lease not consented to in writing by the Lender.

4. Notwithstanding anything to the contrary in this Agreement or otherwise, in the event the Lender or a third party takes possession of the Premises as provided in paragraph 3 above, the liability of the Lender or such third party under the Lease shall be limited to the Lender's or such third party's, as the case may be, interest in the Premises, and upon any assignment or other transfer of the Lender's or such third-party's interest in the Premises, the Lender or such third party, as applicable, shall be discharged and released from any obligation or liability under the Lease arising or accruing after the date of such assignment or transfer.

5. Tenant agrees not to subordinate the Lease to any other lien or encumbrance which (i) affects the Premises under the Lease, or any part thereof, or (ii) is junior to the Security Instrument, without the express written consent of the Lender, and any such subordination or any such attempted subordination or agreement to subordinate without such consent of Lender, shall be void and of no force and effect.

6. Tenant agrees to provide copies of all notices given Landlord under the Lease to Lender at the following address:

Lender: Bank of America, N.A.
Attn: Capital Markets Servicing Group
NC1-026-06-01
900 West Trade Street, Suite 650
Charlotte, North Carolina 28255
Telephone: (866) 531-0957
Telecopy: (704) 317-0771

or to such other address as Lender shall designate in writing; and all such notices shall be in writing and shall be considered as properly given if (i) mailed to the addressee by first class United States mail, postage prepaid, registered or certified with return receipt requested, (ii) by delivering same in person to the

07 0011309

addressee, or (iii) by delivery to a third party commercial delivery service for same day or next day delivery to the office of the addressee with proof of delivery; any notice so given shall be effective, as applicable, upon (a) the third (3rd) day following the day such notice is deposited with the United States mail, (b) delivery to the addressee, or (c) upon delivery to such third party delivery service; and any notice given in any other manner shall be effective only if and when received by the addressee.

7. In the event Landlord shall fail to perform or observe any of the terms, conditions or agreements in the Lease, Tenant shall give written notice thereof to Lender and Lender shall have the right (but not the obligation) to cure such default. Tenant shall not take any action with respect to such default under the Lease (including without limitation any action in order to terminate, rescind or avoid the Lease or to withhold any rent or other monetary obligations thereunder) for a period of thirty (30) days following receipt of such written notice by Lender; provided, however, that in the case of any default which cannot with diligence be cured within such thirty (30) day period, if Lender shall proceed promptly to cure such default and thereafter prosecute the curing of such default with diligence and continuity, then the time within which such default may be cured shall be extended for such period as may be necessary to complete the curing of such default with diligence and continuity.

8. Nothing contained in this Agreement shall in any way impair or affect the lien created by the Security Instrument, except as specifically set forth herein.

9. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns; provided, however, that in the event of the assignment or transfer of the interest of the Lender to a party that assumes the Lender's obligations and liabilities hereunder, all obligations and liabilities of the Lender under this Agreement shall terminate, and thereupon all such obligations and liabilities shall be the responsibility of the party to whom the Lender's interest is assigned or transferred.

10. In the event of any litigation or other legal proceeding arising between the parties to this Agreement, whether relating to the enforcement of a party's rights under this Agreement or otherwise, the prevailing party shall be entitled to receive its reasonable attorney's fees and costs of suit from the non-prevailing party in such amount as the court shall determine.

LEGAL DESCRIPTION **EXHIBIT "A"**

9

All that certain real property situated in the County of Los Angeles, State of California, described as follows:

Parcel 1: (Parcel A of Wholesale Street)

Lot "A" of Tract No. 1182, in the City of Los Angeles, County of Los Angeles, State of California, as per map recorded in Book 17 Page(s) 124, of Maps, in the office of the County Recorder of said County.

Parcel 2: (Parcel B of Wholesale Street)

Lot "I" of The Industrial Tract, in the City of Los Angeles, County of Los Angeles, State of California, as per map recorded in Book 5 Page(s) 56, of Maps, in the office of the County Recorder of said County.

Parcel 3: (Parcel III of Sixth and Alameda)

That portion of City of Lands of Los Angeles, as per map recorded in Book 2 Pages 504 and 505 of Miscellaneous Records, in the office of the County Recorder of Los Angeles County, bounded and described as follows:

Beginning at a point in the East line of Alameda Street where the same is intersected by the South line of 60 foot strip of land conveyed by Caroline Shafer, to the City of Los Angeles for Sixth Street, by deed recorded in Book 2110, parallel 131 of Deeds; thence along the South line of Sixth Street, North 88° 35' 30" East to the West line of Mill Street, as shown on map of The Industrial Tract, in the City of Los Angeles, County of Los Angeles, State of California, recorded in Book 5 Page 56 of said Maps; thence along the West line of Mill Street, South 04° 52' East 336 feet, more or less, to the Northeast corner of Lot "I" of said Industrial Tract; thence Westerly along the Northerly line of said Lot "I" and along the dividing line between the lands of Alice Shafer and Caroline Shafer, as partitioned between them, by deed recorded in Book 755 Pages 57 to 60 of Deeds, 1177 feet, more or less, to a point in the Easterly line of Alameda Street; thence Northerly along said Street line to the point of beginning.

EXCEPTING from Parcels 1, 2 and 3 above, all oil, mineral, gas and other hydrocarbon substances below a depth of 500 feet under the surface of the land, but without the right of surface entry or any other use of the land above such 500 foot depth, as reserved by Southern Pacific Transportation Company, in deed recorded October 12, 1988 as Instrument No. 88-1634144, Official Records.

Assessor's Parcel Number(s) **5164-010-003; 5164-010-004; 5164-010-005**

APPENDIX M

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-05. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions.

de minimis conditions – are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions.*

historical recognized environmental condition(s) (HREC) - environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently. The final decision rests with the *environmental professional* and will be influenced by the current impact of the *historical recognized environmental condition* on the *property*. If a past release of any *hazardous substances* or *petroleum products* has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered a *historical recognized environmental condition*.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

threat to human health or the environment – a substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. An example might include a release of a *hazardous substance* in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment.

generally would not be the subject of an enforcement action – the likelihood that an environmental condition would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be less likely than not, then the condition is considered to be generally not the likely the subject of an enforcement action.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EDR Inquiry # 4217419.3

Contact: Valerie Bauer

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Alta Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Subject: Focused Soil and Soil Gas Screening Survey Report
1206-1338 East 6th Street and 1205-1321 Wholesale Street,
Los Angeles, California

INTRODUCTION

Leighton and Associates, Inc. (Leighton) is pleased to present SKMF, LLC (SKMF) and Latham & Watkins LLP (LW) this report summarizing the results of a focused soil and soil gas screening survey for the property located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street in the City of Los Angeles, California (the Site or subject property-Figure 1). The Site encompasses an area of approximately 14.57 acres and is developed with two rectangular warehouse buildings that are primarily occupied by tenants in the food distribution industry. The buildings house multiple truck loading docks, and have a combined area of approximately 287,376 square feet. The buildings are surrounded by loading zones and paved parking areas. The Site is located within the City of Los Angeles Methane Buffer Zone based on the City of Los Angeles Department of Building and Safety, Zone Information and Map Access System. Leighton understands that SKMF is in escrow to acquire the subject property and intends to develop the Site into a mixed use commercial and residential property with possible subterranean parking.

The purpose of this focused soil and soil gas screening survey was to screen for the potential presence of hazardous substances and petroleum products in soil and soil gas (including methane) beneath the subject property in the area of (1) the historical machine shops and (2) chemical manufacturing business that could have a significant financial impact on SKMF's plans to redevelop the Site. These two areas were identified in a 2010 Phase I Environmental Site Assessment (ESA) Report for the subject property (ATC, 2010). The focused area of the site investigated is depicted on Figures 2, 3 and 4. This results and conclusions of this report are limited to the areas investigated and do not include the entire 14.57–acre property.

Background Information

Previous environmental investigations were conducted at the subject property, and provided some information on historical use and possible environmental concerns. LW provided Leighton with a Phase I ESA prepared by ATC Associates, Inc. (ATC), dated April 25, 2010. ATC did not identify any recognized environmental conditions (RECs) during their Phase I ESA; however, historical machine shops (along the northern boundary of the Site) and a chemical manufacturer (near the central portion of the Site) were depicted on a 1950 Sanborn Map and in subsequent Sanborn Maps. Additionally, a historical railroad spur, oriented east to west, ran throughout the central portion of the Site from approximately the 1920s to the 1960s. Appendix A includes a list of references.

INVESTIGATIVE METHODOLOGY

The investigative methodology developed for this project includes, and is limited to, the activities summarized below.

Pre-field Activities

Health and Safety Plan

A Site Specific Health and Safety Plan (HSP) was prepared for work performed at the Site. All onsite Leighton personnel signed the HSP acknowledging acceptance. The document was kept onsite at all times during the field activities. The HSP was prepared in compliance with Title 8 Section 5192 of the California Code of Regulations (CCR), and the Occupational Safety and Health Administration (OSHA) Chapter 29 of the Code of Federal Regulations (29 CFR) 1910.120.

Underground Services Alert and Private Subsurface Utility Survey

Underground Service Alert (USA; aka DigAlert) was contacted 48-hours prior to commencement of fieldwork to mark the location of public utilities that may enter the Site from nearby streets. The locations of the proposed borings were clearly marked in white paint prior to contacting USA. Spectrum Geophysics conducted a geophysical utility survey of the project area on March 7, 2015, to evaluate for the presence of private subsurface utilities or structures near the proposed boring locations.

The purpose of the private geophysical survey was to assess the presence of detectable buried underground or anomalies utilities in the vicinity of proposed borings at the subject property. The survey included the use of a Geonics EM61 time domain instrument, Schonstedt GA-52 magnetic gradiometer, Fisher M-Scope TW-6 pipe and cable locator, RD8000 line tracer, and GSSI SIR 3000 Ground Penetrating Radar (GPR) unit using a 400 MHz transducer. Traverses with the aforementioned instruments were conducted along systematic traverses to delineate the presence of detectable underground utilities in the vicinity of proposed boreholes. The findings of the survey were marked on the ground surface with paint. Boring locations that conflicted with underground utilities were relocated nearby.

Field Activities

Soil Investigation

Six (6) soil borings were advanced to a depth of 20 feet below ground surface (bgs) at locations depicted on Figure 2. The borings were advanced using direct-push, truck-mounted equipment. A photoionization detector (PID) was used to screen soil cuttings for the presence of volatile organic compounds. Soil samples were collected and retained in acetate sleeves, sealed with Teflon tape and plastic end caps, placed in an ice-cooled chest for temporary storage, and transported to an Environmental Laboratory Accreditation Program (ELAP) certified laboratory for chemical analysis. Soil samples were collected at selected depths from the borings based on the following rationales:

Boring ID Number	Soil Sampling Depths	Rationale for Sampling
LB-1, LB-2, LB-3, and LB-4	5, 10, 15, and 20 feet bgs	Former Historical Machine Shop Locations
LB-5 and LB-6	2.5, 5, 10, 15, and 20 feet bgs	Former Chemical Manufacturing Business and Former Railroad Spur Location

Soil Gas Survey

Upon reaching the total depth of the borings (i.e., 20 feet bgs), soil gas probes were installed in each of the boreholes at depths of 5, 10, and 20 feet bgs. The soil gas probes were installed and sampled in general conformance with the "*Advisory - Active Soil Gas Investigations*," published by the California Environmental Protection Agency Department of Toxic Substances Control (DTSC, April 2012). The soil gas probes were allowed to equilibrate for two hours prior to sampling.

At each sampling location an electric vacuum pump (set to draw 0.200 liters/min of soil gas at a maximum vacuum of 100-inches of water) or dedicated disposable syringe was attached to the probe for purging prior to sampling. Soil gas samples were obtained by drawing the sample through a luer lock connection which connects the sampling probe to the sample container.

A tracer gas (isopropanol) was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. No leaks were detected during the soil gas sampling.

A purge volume test was conducted at the start of the soil gas survey in order to determine the optimal purge volume for sampling. Duplicate soil gas samples were obtained for soil gas analyses from each of the gas chromatograph mass spectrometer instruments (i.e., two total).

Laboratory Analyses

An ELAP certified mobile laboratory (American Analytics) was on Site during the survey for immediate soil gas sample analysis. Soil gas samples were injected into the onsite mobile laboratory gas chromatograph/purge and trap system after collection. Samples were analyzed for the tracer gas and volatile organic compounds (VOCs) by modified

EPA Method 8260B with a laboratory reporting limit at or below residential California Human Health Screening Levels (CHHSLs) [(1.0 microgram per liter (µg/L) or less]. Additionally, select soil gas samples from five of the six borings (borings LB-1 through LB-4 and boring LB-6) were collected in Tedlar bags from depths of 5, 10, or 20 feet bgs and analyzed for methane by EPA Method 8015 Modified.

Soil samples were transported to the American Analytics stationary laboratory for analysis with a 48-hour turnaround time. Soil samples collected from the Former Machine Shop Areas (LB-1 through LB-4) were analyzed for VOCs by EPA Method 8260B and total petroleum hydrocarbon carbon chain (TPH-CC) by EPA Method 8015 at all sample depths. The 5 foot bgs soil samples in these borings were also analyzed for the 17 metals listed in the California Code of Regulations, Title 22, Article 11 (CAM 17 Metals) by EPA Method 6010/7471. If the 5 feet bgs soil samples contained metal concentrations exceeding State of California or Federal hazardous waste criteria, the next deeper soil sample at that borehole would be analyzed for CAM 17 Metals.

Soil samples collected from the Former Chemical Manufacturing Business/Former Railroad Spur Area (LB-5 and LB-6) were analyzed for VOCs and TPH-CC at all sample depths. The 2.5 foot bgs soil samples in these borings were also analyzed for CAM 17 Metals and polynuclear aromatic hydrocarbons (PAHs) by EPA 8270. Additionally, the 2.5 feet bgs soil samples contained PAH concentrations exceeding U.S. EPA Region 9 Regional Screening Levels for residential soil (January 2015), and the next deeper soil samples (5 feet bgs) at borehole LB-5 and LB-6 were analyzed for PAHs.

Investigation-Derived Wastes (IDW)

A total of two 55-gallon drums were produced during the investigation activities on March 7, 2015. One drum contained soil cuttings produced during advancement of the soil borings and the second drum contained decontamination water used to clean the sample equipment between boring locations. Both drums were properly labeled, sealed and stored in a designated area, and will be profiled prior to offsite disposal by a licensed waste hauler. SKMF will retain the waste manifest for record keeping once the drums have been transported offsite and properly disposed.

INVESTIGATIVE RESULTS

Geologic and Hydrogeologic Conditions

Soils encountered during the investigation consisted primarily of gravelly sands with some interbedded, silty sand, fine to course sand and minor clay. Stained or odorous soil was not observed or noted. The maximum PID reading recorded during soil sampling was 5.9 parts per million (ppm), calibrated to hexane. During boring advancement, boring LB-5 was moved approximately 3 feet north due to refusal encountered at the original LB-5 location at 10 feet bgs.

Groundwater was not encountered to the total depth explored of 20 feet bgs during this investigation. Soil boring logs are presented in Appendix B.

Analytical Results of Soil Samples

The laboratory analytical reports and chain-of-custody documentation are presented in Appendix C. The analytical test results for soil samples are summarized in Tables 1 and 2. A summary of the PAHs detected in the soil samples analyzed is depicted on Figure 4. The soil sample analytical results are compared to U.S. EPA Region 9 Regional Screening Levels (RSLs) established for industrial and residential soil (January 2015), Department of Toxics and Substances Control (DTSC) arsenic background levels established for Southern California school sites (DTSC January 16, 2008), and/or Los Angeles Regional Water Quality Control Board (RWQCB) Maximum Soil Screening Levels (MSSLs) (RWQCB, Site Assessment and Cleanup Guidebook, May 1995) (Appendix A).

TPH-CC – The maximum TPH-CC concentration detected was 62 milligrams per kilogram (mg/kg) in soil sample LB-5 at 2.5 feet bgs and consisted primarily of oil range hydrocarbons. TPH-CC was not detected at concentrations exceeding its MSSL of 10,000 mg/kg (oil fraction).

VOCs – VOCS were not detected above their respective laboratory method reporting limits in any of the soil samples analyzed.

CAM-17 Metals – With the exception of arsenic, the CAM-17 metals were not detected at concentrations exceeding the U.S. EPA Region 9 RSLs referenced above. Arsenic levels were below California background concentrations.

PAHs – PAHs were detected in soil samples from borings LB-5 and LB-6 at or below Residential Soil RSLs with the exception of Benzo(a)Pyrene that was detected at 0.036 mg/kg in LB-5 at 2.5 feet bgs, and 0.031 mg/kg in LB-6 at 2.5 feet bgs. These detections slightly exceed the Residential Soil RSL of 0.015 mg/kg established for Benzo(a)Pyrene, but remained below the Industrial Soil RSL of 0.29 mg/kg. The 5 feet bgs soil samples analyzed from these borings were at or below the Residential Soil RSLs established for Benzo(a)Pyrene.

Analytical Results of Soil Gas Samples

The analytical test results for methane and VOCs in soil gas are summarized in Table 3. A summary of the VOCs detected in the soil gas samples analyzed is depicted on Figure 3. Analytical results for VOCs were compared to residential California Human Health Screening Levels (CHHSLs) for buildings constructed with engineered fill below sub-slab gravel (OEHHA, September 23, 2010). In addition, the VOCs detected in the soil gas samples were further evaluated using the DSTC's Vapor Intrusion Screening Model – Soil Gas (December 2014) using residential criteria.

Methane – Methane was not detected above the laboratory method detection limit in any of the soil gas samples analyzed.

VOCs - VOCs were not detected at concentrations exceeding residential CHHSLs. Trichlorofluoromethane (CFC-11), toluene, and m,p-Xylenes were detected in select soil gas samples, as discussed below.

Trichlorofluoromethane (TCFM or CFC-11) – CFC-11 was detected in soil gas samples collected from soil gas probes SVP-1, SVP-2, SVP-5 and SVP-6 (various depths) at a maximum concentration of 2.7 micrograms per liter (µg/L) in SVP-1 at 20 feet bgs. There is no CHHSL for this compound.

Toluene – Toluene was detected in SVP-2 at a maximum concentration of 0.18 µg/L at 10 feet bgs. This detection does not exceed the residential or industrial soil gas CHHSLs.

m,p-Xylenes – m,p-Xylenes were detected in SVP-2 at a maximum concentration of 0.21 µg/L at 10 feet bgs. This detection does not exceed the residential or industrial soil gas CHHSLs.

DTSC Vapor Intrusion Screening Model – Soil Gas Spreadsheet

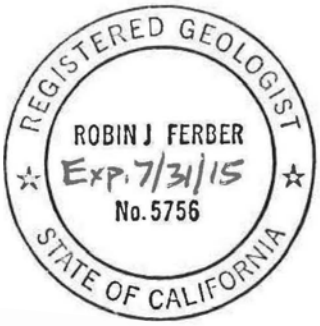
Using the DTSC Vapor Intrusion Screening Model – Soil Gas Spreadsheet (the model), Leighton entered the maximum concentration of TCFM, toluene, m-xylene, and p-xylene detected at each depth in the soil gas samples. The spreadsheets are presented in Appendix D. The model default values for each VOC were used with the exception of VOC concentration, sample depth, and selecting residential criteria. Leighton assumed the soil gas samples were collected from sandy soil. For a residential setting, a Cancer Risk greater than $1X10^{-6}$ and a Non-Cancer risk greater than 1.0 would both be considered unacceptable. When applied to the model, none of the soil gas sample detections represent an unacceptable cancer risk and/or a non-cancer risk for a residential setting.

CONCLUSIONS AND RECOMMENDATIONS

The purpose of the Focused Soil and Soil Gas Screening Survey was to screen for the potential presence of hazardous substances and/or petroleum products in soil and soil gas (including methane) beneath the Site in the area of (1) the historical machine shops and (2) chemical manufacturing business that could have a significant financial impact on SKMF's plans to redevelop the Site.

Soil sample analytical data indicates that soils tested in both the historical machine shop and chemical manufacturing areas do not contain TPH-CC above MSSLs or VOCs above Residential and Industrial Soil RSLs. The Benzo(a)Pyrene residential RSL exceedances in the historical chemical manufacturing business area samples at 2.5 feet bgs appear limited to shallow soil in this area and are not anticipated to pose significant human health or construction cost concerns.

Soil gas analytical results were compared to residential CHHSLs and applied to the DTSC's model and indicated that VOCs and methane were not detected at concentrations that would pose a significant human health risk in a residential setting or explosion hazard.



Based upon the results of this focused soil and soil gas investigation, Leighton concludes additional investigation is not warranted at this time for the areas investigated.

LIMITATIONS

This focused soil and soil gas investigation was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the activities described herein, and are limited to the portion of the Site investigated. Opinions presented herein apply to property conditions existing at the time of our study and cannot necessarily be taken to apply to property conditions outside of the area investigated or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the limited portion of the site investigated, and the amount, type, distribution, and integrity of the information collected at the time of the investigation, and the methods utilized to collect and evaluate the data. Although Leighton has taken steps to obtain true copies of available information, we make no representation or warranty with respect to the accuracy or completeness of the information provided by others.

We appreciate the opportunity to assist SKMF for this project. Please do not hesitate to call the undersigned if you have any questions regarding this report.

Respectfully submitted,

LEIGHTON AND ASSOCIATES, INC.

Re : 6th and Alameda

A93102 / 5C09028

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 03/09/15 08:05 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Eydie Schwartz

Project Manager

Special Notes

[1] = AA-C1 : The percent recovery for this analyte exceeds acceptance criteria.

[2] = QM-07 : The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.

[3] = QR-02 : The RPD result exceeded the QC control limits; however, both percent recoveries were acceptable. Sample results for the QC batch were accepted based on percent recoveries and completeness of QC data.

Re : 6th and Alameda

MB93101 / 5C09027

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 03/07/15 17:00 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Eydie Schwartz

Project Manager

EXECUTIVE SUMMARY

Alta Environmental ("Alta") completed a Phase I Environmental Site Assessment (ESA) of the subject site located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street, in Los Angeles, California (Site). The ESA was performed in conformance with the scope and limitations of ASTM E1527-13 and AAI standards. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. The assessment was performed to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject site. These issues are considered recognized environmental conditions (RECs).

Site and Vicinity Description

The subject site is located within a commercial/industrial area of Los Angeles, California, at 1206-1338 East 6th Street and 1205-1321 Wholesale Street. The property is approximately 14.57 acres and is reportedly zoned as *M3-1* for heavy manufacturing purposes. The Assessor's Parcel Numbers for the property are 5164-010-003, 5164-010-004, and 5164-010-005. The subject property is bounded to the north by East Sixth Street, to the west by South Alameda Street, to the south by two neighboring warehouses, and to the east by Mill Street.

At the time of our site visit, the subject property was developed with two elongated, multi-tenant warehouses, with loading docks on all sides. The northern building was approximately 104,676 square feet and the southern building was approximately 182,700 square feet. The tenant spaces were variously developed with large refrigerated storage rooms, general indoor storage areas, and office space. Floor drains were identified throughout each of the buildings; however, they were not identified in all tenant spaces. Based on date of construction, it is assumed that the building floor drains are connected to the local sanitary sewer system. Several storm water drains were located throughout the exterior of the property.

Site Use and History

Based on records reviewed, as early as the 1890s the subject property contained a lumberyard and mill on the northern portion of the property. Beginning in the early 1900s, development of additional buildings began along the southern portion of the subject property. By the late 1900s, the northern portion was developed with a long warehouse, though not the same as present-day. Two railroad spurs entering the subject property from the northwest appeared active as late as 1938, based on aerial photography. During the late 1940s to early 1950s, additional multi-tenant warehouse structures were developed. In the early 1960s, the present-day northern warehouse was developed, with the present-day southern warehouse constructed in the early 1970s. At the time of our site visit, the warehouses were utilized by various tenants to store, package, and ship produce such as fruit, vegetables, and flowers.

Findings and Conclusions Summary

<u>Property Reconnaissance</u>

No RECs, HRECs, or de minimis conditions were identified on the property or observed on the adjacent properties during the property reconnaissance.

At the time of our site visit, the subject property was utilized by various tenants to store, package, and ship produce such as fruit, vegetables, and flowers. Moderate truck traffic was observed at most tenant spaces.

Chemical storage areas were observed throughout both warehouse buildings at each of the tenant spaces. Chemicals stored in these areas were limited to food industry cleaners, disinfectants, and floor

degreasers. Container sizes ranged from 1-gallon bottles to 55-gallon drums, with each tenant space storing less than 300-gallons in total product. All drums were observed stored on secondary containment pallets. No significant staining or other indicators of potentially significant spills was observed.

No evidence of current septic tanks, clarifiers, interceptors, aboveground storage tanks, or underground storage tank use was observed on site at the time of the site reconnaissance.

Pole mounted transformers were observed at various locations during our site walk, including at the northwestern corner of the northern warehouse, at multiple locations along the northern and eastern perimeter of the subject site. Additionally, pad mounted transformers were identified at the southeast corner and the northwest corner of the southern warehouse. No significant staining or other indicators of potentially leaks or spills was observed.

Floor drains were observed in several of the tenant's loading and storage areas and storm water drains were observed throughout the outside areas of the subject property. Based on date of construction, it is assumed that the building floor drains are connected to the local sanitary sewer system. No significant staining or other indications of spills potentially flowing to the drains was observed.

No cooling towers, backup power generators, elevators, lifts, trash compactors, strong odors, pools of; liquid, significant surface staining, significant stressed vegetation, or solid waste dumping were observed during the site walk.

Records Review

No RECs, HRECs, or de minimis conditions were identified on the property or adjoining upgradient property during the records review.

According to EDR, the subject property is listed on a variety of the databases referenced in this report, including the Resource Conservation and Recovery Act – Small Quantity Generators (RCRA-SQG), California's Facility Inventory Database for Underground Storage Tanks (CA FID UST), Historical Underground Storage Tanks (HIST UST), Statewide Environmental Evaluation and Planning System Underground Storage Tanks (SWEEPS UST), Resource Conservation and Recovery Act Non-Generators (RCRA NonGen), Facility Index System Data Systems (FINDS), and Emissions Inventory Data (EMI) databases. These database entries do not in and of themselves indicate potential environmental concerns for the property.

The UST databases identified two underground-storage tanks, one containing diesel (10,000-gal capacity) and one containing regular-unleaded fuel (no capacity listed). The history, year of installment, or current status of these tanks are unknown. No indications of unauthorized releases were identified by the database review. A previous Phase I for the site (ATC, 2010) states that LAFD records indicate that the tanks were removed in 1990, and that no soil contamination was identified at the time the USTs were removed. The site is not listed as a LUST site.

Depth to first encountered groundwater beneath the subject site is approximately 90 to 100 feet below ground surface, with gradient flowing towards the southwest.

The EDR Environmental Lien and AUL Search report did not identify any environmental liens for the subject property. No oil/gas wells were identified on the subject site.

Alta submitted information requests to the various county and regional agencies that may have records with regard to environmentally-oriented concerns affecting the subject site, in accordance with ASTM E1527-13 requirements. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Fire Department, and Los Angeles County Sanitation District. Should significant records be identified at a later date, an

addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the records review is not expected to indicate additional environmental concerns.

Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Fire Department, and Los Angeles County Sanitation District. However, these data gaps are not considered significant, as related information was reviewed from other additional sources.

Conclusions

The subject property is located in an industrial/ commercial area and has been developed at least since 1894. Based on the review of historical records, Site reconnaissance, groundwater flow and direction, and the previous Phase I ESA, we conclude that there is no evidence of current or historical RECs or Controlled RECs in connection with the subject property.

Vapor Encroachment Conditions (VEC)

A Tier 1 vapor encroachment screen (VES) for potential chemicals of concern (COC) was completed for the subject property. The assessment was based on the ASTM published Standard Guide E 2600-15. The purpose of the VES was to evaluate for the potential for a vapor encroachment condition (VEC) which is the presence or likely presence of COC vapors in subsurface soils at the subject property caused by the release of vapors from contaminated soil or groundwater on or near the subject property. The results of the VES did not identify evidence of a VEC in connection with the subject property.

1 INTRODUCTION

The purpose of this assessment was to evaluate the environmental condition of the site and to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner, or bona fide prospective purchaser under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13;
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312); and
3. 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

This report was prepared exclusively for use by Sixth & Alameda, LLC. This report may not be relied upon by any other person or entity without Alta Environmental's express written permission. The information, conclusions and recommendations described in this report apply to conditions existing at certain locations when services were performed and are intended only for the specific purposes, locations, time frames and project parameters indicated. Alta Environmental cannot be responsible for the impact of any changes in environmental standards, practices or regulations after performance of services.

1.1 Objectives

Alta's objective for this environmental assessment was to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject site. The assessment was done to meet ASTM Standard Practice E1527-13.

The assessment provided herein was determined based on the following:

1. Current and past property uses and occupancies;
2. Current and past uses of hazardous substances;
3. Waste management and disposal activities that could have caused releases or threatened releases of hazardous substances;
4. Current and past corrective actions and response activities undertaken to address past and on-going releases of hazardous substances;
5. Engineering controls;
6. Institutional controls; and
7. Evaluation of properties adjoining or located nearby the subject site that have environmental conditions that could have resulted in conditions indicative of releases or threatened releases of hazardous substances to the subject site.

1.2 Services

Alta performed the following services to assess the property:

1. Reviewed historical sources of information;
2. Searched for recorded environmental clean-up liens;
3. Reviewed Federal, State, Tribal, and local government records;
4. Visually inspected the site and the adjoining sites;
5. Evaluated any specialized knowledge or experience on the part of the purchaser;
6. Determined commonly known or reasonably ascertainable information about the property; and
7. Provided an opinion on the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.

1.3 Assumptions

Alta has assumed the following for the purposes of this assessment:

1. Information provided during any interview (written or oral) was accurate and correct;
2. Database information reviewed was accurate and correct;
3. Historical information reviewed was accurate and correct;
4. Information reviewed at any governmental agency was accurate and correct;
5. Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey (USGS) Topographic Maps; and
6. The property has been correctly and accurately identified by the client, client representatives, property contact, property owner, and/or property representatives.

1.4 Limitations

This assessment is limited to the standards set forth in ASTM Standard Practice E1527-13. This assessment specifically excludes assessment of the following:

1. Asbestos and asbestos-containing building materials;
2. Biological agents;
3. Cultural and historical resources;
4. Ecological resources;
5. Endangered species
6. Health and safety;
7. Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment;
8. Industrial hygiene;
9. Lead-Based Paint;
10. Lead in Drinking Water;
11. Mold;
12. Radon;
13. Regulatory compliance; and
14. Wetlands.

Considerations identified by ASTM as beyond the scope of a Phase I Environmental Site Assessment (ESA) may affect business environmental risk at a given property. These environmental issues or conditions may warrant assessment based on the type of property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluation. The conclusions presented in this report are based solely on the services described herein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No subsurface exploratory drilling or sampling of any kind was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical or physical analyses have been performed during the course of this Phase I ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted. As applicable, Alta Environmental has relied in good faith upon representations and information furnished by individuals with respect to operations and existing property conditions, to the extent that they have not been contradicted by data obtained from other sources. Accordingly, Alta Environmental accepts no responsibility for any deficiencies, omissions, misrepresentations, or fraudulent acts of persons interviewed.

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented (if any) as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. Alta makes no warranty, express or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

This Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. The assessment is not intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use and environmental liens. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit. Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations (if any) expressed in this report.

1.5 Terms

The following terms are used in this report:

- "Subject site", "subject property", or "Site" refers to the property within the approximate boundaries described in Section 2;
- "Immediate site vicinity" refers to properties adjacent to the site that share a common boundary with the subject site; and
- "Site vicinity" refers to the area within an approximate 1-mile radius of the property.
- "Recognized Environmental Conditions" (RECs) – The presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (*1*) due to release to the environment; (*2*) under conditions indicative of a *release* to the *environment*; or (*3*) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*.
- "Controlled Recognized Environmental Condition" (CREC) – A recognized environmental condition resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*). A condition identified as a *controlled recognized environmental condition* does not imply that the *environmental professional* has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.
- "Historical Recognized Environmental Condition" (HREC) – A past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

- "Migrate/migration" – For the purposes of this practice, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.
- "Hazardous Substances" – The term "hazardous substance" is used here in general accordance with its use as defined in the following statutes and their implementing regulations:

    -- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended; and

    -- Superfund Amendment and Reauthorization Act (SARA) of 1986, as amended.

The terms "material," "waste," and "substances" are used interchangeably, and no legal distinction is implied between the terms as used herein. The words "impact" or "impacted" are used to mean the effect or result of a release of a hazardous substance that could result in a hazardous waste being present at the property. Search distances for government agency lists were those designated by the ASTM Standard E 1527-13.

1.6 Professionals

This document has been prepared by an Environmental Professional as defined by the EPA, 40 CFR Part 312.10. All work performed for this assessment was performed by or under the direct supervision of an Environmental Professional.

2 SITE DESCRIPTION

Alta personnel performed a site reconnaissance on May 16, 2017. The following descriptions are based on information provided by the current site representatives and on observations made during that site visit. Representative site photographs are included in Appendix A. Site Location and Site Layout maps depicting the areas and features described in the following sections are presented as Figures 1 and 2.

2.1 Property Development and Use

2.1.1 Development

The subject site is located within a commercial/industrial area of Los Angeles, California, at 1206-1338 East 6th Street and 1205-1321 Wholesale Street (Figure 1). The property is approximately 14.57 acres and is reportedly zoned as *M3-1* for heavy manufacturing purposes. The Assessor's Parcel Numbers for the property are 5164-010-003, 5164-010-004, and 5164-010-005. The subject property is bounded to the north by East Sixth Street, to the west by South Alameda Street, to the south by two neighboring warehouses, and to the east by Mill Street.

At the time of our site visit, the subject property was developed with two elongated, multi-tenant warehouses, with loading docks on all sides. The northern building was approximately 104,676 square feet and the southern building was approximately 182,700 square feet. The tenant spaces were variously developed with large refrigerated storage rooms, general indoor storage areas, and office space. Floor drains were identified throughout each of the buildings, however they were not identified in all tenant spaces. Based on date of construction, it is assumed that the building floor drains are connected to the local sanitary sewer system. Several storm water drains were located throughout the exterior of the property.

2.1.2 Use

At the time of our site visit, the subject property was utilized by various tenants to store, package, and ship produce such as fruit, vegetables, and flowers. Moderate truck traffic was observed at most tenant spaces.

2.1.3 Services

The utilities servicing the subject site are:

Electricity:	Los Angeles Department of Water and Power
Water:	Los Angeles Department of Water and Power
Gas:	Southern California Gas Company
Sewer:	City of Los Angeles

No indications of water wells or septic systems were identified during the site reconnaissance.

2.2 Hazardous Materials and Chemical Storage Areas

Chemical storage areas were observed in both warehouse buildings at each of the tenant spaces. Chemicals stored in these areas were limited to food industry cleaners, disinfectants, and floor degreasers. Container sizes ranged from 1-gallon bottles to 55-gallon drums, with each tenant space storing less than 300-gallons in total product. All drums were observed stored on secondary containment pallets. No significant staining or other indicators of potentially significant spills was observed.

2.3 Storage Tanks

2.3.1 Aboveground Storage Tanks

No evidence of current aboveground storage tanks use was observed onsite at the time of the site reconnaissance.

2.3.2 Underground Storage Tanks

No evidence of current underground storage tanks (USTs) use was observed onsite at the time of the site reconnaissance.

2.3.3 Septic Tanks

No evidence of septic tank use was observed on site.

2.4 Polychlorinated Biphenyls

Pole mounted transformers were observed at various locations during our site walk, including at the northwestern corner of the northern warehouse, at multiple locations along the northern and eastern perimeter of the subject site. Additionally, pad mounted transformers were identified at the southeast corner and the northwest corner of the southern warehouse. No significant staining or other indicators of potential leaks or spills was observed.

2.5 Wastewater, Floor Drains, Sumps, and Clarifiers

Floor drains were observed in several of the tenant's loading and storage areas and storm water drains were observed throughout the outside areas of the subject property. No significant staining or other indications of spills potentially flowing to the drains was observed. No evidence of sumps or clarifiers were observed or reported during the site reconnaissance.

2.6 Mechanical Systems

2.6.1 Back-up Power Generation

No back-up power generators were observed on the subject property.

2.6.2 Cooling Towers

No cooling towers were observed on the subject property; however, multiple refrigeration units were identified at each of the tenant spaces.

2.6.3 Elevators, Lifts and Compactors

No elevators or lifts were observed on the subject property.

Several cardboard box compactors were observed at several of the tenant spaces. The hydraulic equipment associated with these compactors are aboveground and were observed to be in good condition. No evidence of leaks or releases from these systems was observed during the site reconnaissance.

2.7 Odors

No strong, pungent, or noxious odors were identified during the course of this assessment.

2.8 Pools of Liquid

No standing surface water or other pits, ponds, or lagoons potentially containing hazardous substances or petroleum products were identified within the subject property.

2.9 Surface Staining

No significant staining or other indications of potential release of hazardous substances or petroleum products were observed during the site reconnaissance.

2.10 Stressed Vegetation

No significantly stressed vegetation or other indications of potential release of hazardous substances or petroleum products were observed during the site reconnaissance.

2.11 Solid Waste

No indications of unauthorized dumping was identified during the site walk.

2.12 Adjacent Sites

The subject site is located within an industrial area of Los Angeles, California, to the west of the Los Angeles River. The following land use in the near vicinity of the property was observed:

Direction	Property Name	Property Address	Business Operation
North:	Office (no signage)	1205 East 6th Street	Office
	Warehouse (no signage)	1217 East 6th Street	Warehouse
	Light-industrial building	1235 East 6th Street	Unknown
	Downtown Artist Space.com	1247-1259 East 6th Street	Rental Artist Studios

Direction	Property Name	Property Address	Business Operation
	Economy Supply	1261 East 6th Street	Retail
	Commercial (no signage)	1269 East 6th Street	Artist/Office Space rentals
	Commercial (no signage)	1275 East 6th Street	Loft Locations
	Alltronics Import & Manufacturers	1281 East 6th Street	Arts and Crafts Manufacture
	Commercial Creative Office Space	1330 East 6th Street	Office Space
East:	Lotte	1805 Industrial Street	Parking lot
	ETO Doors	1340 East 6th Street	Door Retailer
South:	Union Central Cold Storage	1525 Industrial Street	Cold Storage (vacant)
	Fresco Foods	1567 Industrial Street	Wholesale Produce
	Iron Triangle Brewing	1601 Industrial Street	Beer Brewery
	IBC Produce	1717 Industrial Street	Wholesale Produce
West:	Metro Division 1	1130 6th Street and 624 South Central Avenue	Bus Fleet

3 SITE SETTING

3.1 Topographic

The United States Geological Survey (USGS), [Los Angeles] 7.5 Minute Topographic Quadrangle map of the subject property and surrounding vicinity was reviewed. The elevation of the property is located at approximately 250 feet above mean sea level. The Site and the surrounding topography are relatively flat and slopes gently to the south. A copy of the USGS 7.5 Minute Topographic Quadrangle Map is included in Appendix B.

3.2 Regional Geology and Hydrology

The following description of regional geology and hydrology was developed based on information presented on the Regional Water Quality Control Board's online *Geotracker* database for offsite facilities located in the general vicinity of the subject property.

The subject property is located within the Central Basin of the Coastal Plain of the Los Angeles Groundwater Basin. The Central Basin is overlain by several features including the Downey, Santa Fe Springs, and Bouton Plains. The subject property is located in the northern portion of the Downey Plains. These plains are developed from sediments of the Rio Hondo and Los Angeles Rivers. It extends from the La Brea Plain and Elysian Hills to the north and the Dominguez Gap to the south. To the east, the Downey Plains are bounded to a group of low lying hills and to the west by the Montebello Plain, Whittier Narrows, and Santa Fe Springs Plain. The soil of the Downey Plain reportedly consists of Pleistocene-aged alluvial and marine sediments. These sediments consists of silts, sands, gravels, and clays.

According to groundwater information published on the California Geotracker webpage for a leaking underground storage tank release site on the western adjoining property, depth to first encountered groundwater beneath the subject site is approximately 90 to 100 feet below grade surface, with gradient flowing towards the southwest.

3.3 Flood Plain

According to Federal Emergency Management Agency flood plain data presented in the site-specific Environmental Data Resources (EDR) Geocheck Report, the subject property appears to be located outside of the 100-year flood zone and 500-year flood zone (EDR, 2015). The EDR Radius Report is presented as Appendix C.

3.4 Wetlands and Bodies of Water

No water bodies were observed on the subject or adjoining properties. According to map data published on the United States Department of Fish and Wildlife (USFW) National Wetlands Inventory, no national or state wetlands exist on the subject property or adjoining properties. A screen shot of the wetlands map is presented in Appendix D.

3.5 Oil and Gas Wells

No oil/gas wells were identified on the subject site. According to the State of California, Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System (DOMS), the nearest well is identified as a “Plugged Dry Hole” located approximately 400 feet east of the subject site and identified as the Phillips Petroleum Company “Signal-Standard-Exley” 1 (API 03720600). Appendix D presents a screen shot of the online mapping system.

4 USER-PROVIDED INFORMATION

Information obtained during the interview process and from the user questionnaire is presented in the following sections.

4.1 Title Records

Title records were not provided by the site user representative. However, the EDR Lien and AUL Search report presented a copy of a Grant Deed for the subject property recorded on May 24, 2015 which grants to Sixth and Alameda, LLC. Appendix E presents the EDR Lien and AUL report.

4.2 Clean-Up Liens

Knowledge of any clean-up liens against the subject site was not disclosed by those interviewed. Further, the EDR Environmental Lien and AUL Search report did not identify any environmental liens for the subject property (Appendix E).

4.3 Activities and Use Limitations

Knowledge of site-specific activities or use limitations were not disclosed by those interviewed. Further, according to the EDR Lien and AUL Search report, no Activity and Use Limitations are identified for the subject property (Appendix E).

4.4 Specialized Knowledge

No specialized knowledge was disclosed by those interviewed during the course of this Phase I investigation.

4.5 Commonly Known Information

No commonly known information was disclosed by those interviewed during the course of this Phase I investigation.

4.6 Previous Environmental Assessments

Two previous environmental assessment were provided for review (Appendix F).

Phase I Environmental Site Assessment, ATC Associates Inc., April 25, 2010

According to the provided report, ATC conducted an ASTM E1527-05 compliant Phase I ESA on behalf of Lowe Enterprises Investment Management, Inc. ATC's report presented the following findings:

- No on-site or off-site RECs potentially affecting the subject property were identified.
- Two 10,000-gallon USTs (1-gasoline, 1-diesel) were reportedly removed from the western area of the subject property in 1990. Soil sampling reportedly identified no detectable concentrations of gasoline, diesel, benzene, toluene, ethylbenzene, or xylenes; however, no closure records were identified.
- Progressive Produce, a previous tenant at 1266 East 6th Street, reportedly conducted vehicle maintenance onsite and generated waste halogenated organic compounds.
- Albert's Organics, a former tenant at 1330 East 6th Street, reportedly generated unspecified oil-containing waste.
- Previous asbestos surveys conducted by others identified multiple types of asbestos containing building materials within the subject property.

Phase I Environmental Site Assessment, Alta Environmental, March 17, 2015

According to the provided report, Alta conducted an ASTM E1527-13 compliant Phase I ESA on behalf of Latham and Watkins. Alta's report presented the following findings:

- No on-site, off-site, historical, or controlled RECs potentially affecting the subject property were identified.
- Two 10,000-gallon USTs (1-gasoline, 1-diesel) were reportedly removed from the western area of the subject property in 1990. Soil sampling reportedly identified no detectable concentrations of gasoline, diesel, benzene, toluene, ethylbenzene, or xylenes; however, no closure records (no further action letter) were identified.
- At the time of the site visit, the subject property was utilized by various tenants to store, package, and ship produce and flowers. Moderate truck traffic was observed at most tenant spaces.

5 RECORDS REVIEW

Records (e.g. historical, regulatory agency, databases) were reviewed to evaluate possible activities that may have contributed to contamination of soil, groundwater, and/or soil vapor to the subject property.

5.1 Governmental Databases

Alta contracted EDR to perform a radius search of governmental databases for this project. The distribution of listed sites with respect to the subject property is tabulated and mapped in EDR's Radius Map Report, which is appended. The reader is referred to the table, which can be found near the front of EDR's report.

Alta conducted a review of the above-referenced database reports and provides the following findings based on sites that have the potential to impact the subject property, with respect to the inferred southwesterly groundwater flow direction. Our findings are based on the assumption that a hazardous material released to the subsurface generally does not migrate laterally within unsaturated soil for a significant distance. Although a hazardous material can migrate in groundwater in a generally down-

gradient direction, there are limitations to this interpretation such as groundwater depth, soil lithology and other subsurface barriers.

5.1.1 Subject Property Database Findings

According to EDR, the subject property is listed on a variety of the above-referenced databases, including the Resource Conservation and Recovery Act – Small Quantity Generators (RCRA-SQG), California's Facility Inventory Database for Underground Storage Tanks (CA FID UST), Historical Underground Storage Tanks (HIST UST), Statewide Environmental Evaluation and Planning System Underground Storage Tanks (SWEEPS UST), Resource Conservation and Recovery Act Non-Generators (RCRA NonGen), Facility Index System Data Systems (FINDS), and Emissions Inventory Data (EMI) databases. These database entries do not in and of themselves indicate potential environmental concerns for the property.

The UST databases identified two underground-storage tanks, one containing diesel (10,000-gal capacity) and one containing regular-unleaded fuel (no capacity listed). The history, year of installment, or current status of these tanks are not reported; however, according to Los Angeles Building Department records, the tanks were removed in 1990. A copy of the tank backfill permit is included in Appendix D. No indications of unauthorized releases were identified by the database review.

5.1.2 Adjoining Property Database Findings

Aesthetic Frame Design – 1275 East 6th Street, Los Angeles, CA

This facility is located approximately 100 feet north and up-gradient of the subject property, with respect to ground water flow direction. According to EDR, this facility is listed on the RCRA-SQG database for the generation of small quantities (generating more than 100 kilograms (kg), but less than 1,000 kg during a calendar month) of hazardous wastes. This facility was reported to recycle organic solids (1997) and dispose halogenated solvents at a transfer station (1993). No violations related to the generation of these wastes were reported. Based on this information, this facility is not considered an off-site environmental concern at this time.

American President Lines LTD – 1301 East 6th Street, Los Angeles, CA

This facility is located approximately 100 feet to the north and up-gradient of the subject of the subject property, with respect to groundwater flow direction. According to EDR, this facility was identified on the RCRA-NonGen, FINDS, and ECHO databases. This facility has reported the disposal of organic solids and unspecified organic liquid mixtures. No spills, leaks, or violations are reported. Based on this information, this facility is not considered a potential off-site environmental concern.

Union Central Cold Storage, Inc. – 1525 Industrial Street, Los Angeles, CA

This facility is located on the southwestern adjoining property and down-gradient of the subject property, with respect to ground water flow direction. According to EDR, this facility is listed on the RCRA-SQG, FINDS, and ECHO database. The type(s) of waste generated at this facility were not identified. No violations or releases related to the generation of wastes at this facility were reported. Based on this information, this facility is not considered an off-site environmental concern at this time.

Metro Division 1 Maintenance Facility – 1130 East 6th Street, Los Angeles, CA

This facility is located approximately 100 feet west and down to cross-gradient of the subject property, with respect to ground water flow direction. According to EDR, this facility is listed on the LUST, CA FID UST, and CA WDS databases. According to the LUST records, this property is a LUST Cleanup Site with a current status of "Completed-Case Closed" as of July 15, 2016. Records presented on the Geotracker database for this facility identify that reportedly limited petroleum hydrocarbons were released to the

subsurface sometime prior to 2006. Since that time, various investigations, impacted soil removal, and soil-vapor extraction events have occurred. Based on this information, this facility is not considered an off-site environmental concern at this time.

This facility was also identified on the CHMIRS database. According to this database, a spill of 50 gallons of diesel fuel was reported at this facility on January 4, 1999. The Los Angeles Fire Department responded to the release; however, no further action, cleanup, or remediation was reported. Based on the nature of the release and the lack of required additional cleanup action reported, this listing is not considered to represent a recognized environmental condition in connection with the subject property.

RTD Division 1 -Alameda – 624 S Central Avenue, Los Angeles, CA

This facility is believed to be same as the facility Division 1 –Alameda (1016 E Sixth Street) due to location, similarities of the facility name, and USTs listed. Additionally, there are three facilities with the same reported address as RTD Division 1-Alameda. These facilities are MTA, Southern California Rapid Transit District, and LA MTA Division 1. According to EDR, this property is listed on SWEEPS UST, UST, and LUST lists.

According to the SWEEPS UST records, there are fourteen (14) active underground-storage tanks. There were reportedly three diesel (two 10,000-gal, one 280-gal), one regular unleaded (10,000-gal), one waste oil (10,000-gal), one chemical use with unknown content (10,000-gal), and eight unknown use with unknown content tanks. The installation year, current status, or history of these tanks are not reported.

According to the LUST listings, there was a reported leaking underground-storage tanks. A leaking gasoline tank was discovered in 1986. The agencies of California Regional Water Quality Control Board and City of Los Angeles provided oversight of remediation activities. The impacted soil was excavated and disposed. The case was completed and closed in 1997. Based on identified fourteen USTs and former LUST not being upgradient of the site, this facility is not considered an off-site environmental concern at this time.

Metropolitan Distribution Centers – 1340 East 6th Street

This facility is located approximately 70 feet to the east and up-gradient of the subject of the subject property, with respect to groundwater flow direction. According to EDR, this facility was identified on the RCRA-NonGen, FINDS, CA FID UST, HIST UST, and SWEEPS UST databases. Based on records reviewed, there are four underground-storage tanks associated with this facility: a 10,000 gallon diesel UST, a 7,500 gallon diesel UST and two 300 gallon USTs listed as *Product*. These tanks were installed in 1970, with the exception of the 7,500-gallon tank which was installed in 1969. This facility is not list on the LUST database or on the Geotracker database, and no other records or other indications of potential unauthorized releases or spills associated with the USTs have been identified. Based on this information, this facility is not considered a potential off-site environmental concern.

All NU ICE CO – 1549 Industrial Street

This facility is located approximately 70 feet to the south and down-gradient of the subject of the subject property, with respect to groundwater flow direction. According to EDR, this facility was identified on the RCRA-NonGen, FINDS, and ECHO databases. This facility has reported the disposal of waste oil and mixed oil. No spills, leaks, or violations are reported. Based on this information, this facility is not considered a potential off-site environmental concern.

5.1.3 General Vicinity Database Findings

EDR's report identified multiple off-site facilities within applicable ASTM search radii. Alta considered all of the listed sites unlikely to impact the subject site, based upon factors including (but not limited to):

- The nature of the listing;
- The use of the site;
- When the site was listed and its current listed status;
- The developmental density of the setting;
- The distance between the listed and subject sites as related to the distance that releases are likely to migrate based on local surface and subsurface drainage conditions;
- The presence of intervening drainage divides; and/or
- The inferred groundwater movement.

Additional details regarding two nearby properties is further discussed below.

Zimmerman Development – 560 Alameda, Los Angeles, CA 90013

This property is located approximately 546 feet to the northwest and cross-gradient of the subject property, with respect to groundwater flow direction. According to the SLIC database, a release of total petroleum as hydrocarbons (TPH) was reported at this property. The release was granted case closure/no further action status by the Los Angeles Regional Water Quality Control Board on September 23, 1999. This listing is not considered to represent a recognized environmental condition in connection with the subject property.

M R Baker 601 - South Central Avenue, Los Angeles, CA

This property is located approximately 900 feet to the northwest and cross-gradient of the subject property, with respect to groundwater flow direction. According to EDR, this property is listed on the EDR Historical Auto Stations in 1937 as Gasoline and Oil Services. Based on the location and groundwater flow direction, this facility is not considered a significant environmental concern for the subject site.

5.2 Regulatory Agency Record Review

Alta submitted information requests to the various county and regional agencies that may have records with regard to environmentally-oriented concerns affecting the subject site, in accordance with ASTM E1527-13 requirements. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Fire Department, and Los Angeles County Sanitation District. Should significant records be identified at a later date, an addendum to this report will be issued. Based on the quality of information obtained from other sources and known property uses, the records review is not expected to indicate additional environmental concerns. Appendix D presents the results of the agency requests.

Agency	Records Summary
Los Angeles County Public Health Investigation (PHI)	No Response at the time of this report.
Division of Oil, Gas, and Geothermal Resources – DOMS	No oil or gas wells were identified within the subject property boundary. The nearest well identified is located approximately 400 feet east and identified from the Phillips Petroleum Company.

Agency	Records Summary
Regional Water Quality Control Board – GEOTRACKER	Subject Property No records found Adjacent Properties LA MTA Division 1 (624 S Central Avenue). LUST Cleanup Site. Cleanup Status is Completed – Case Closed. Metro Division 1 Maintenance Facility (1130 East 6th Street). LUST Cleanup Site. Cleanup Status is Completed – Case Closed.
Department of Toxic Substances Control – ENVIROSTOR	Subject Property No records found Adjacent Properties No records found
Los Angeles Fire Department (LAFD)	No response as of report date
Los Angeles County Sanitation District	No response as of report date

5.3 Historical Records Review

Alta used USGS Topo maps, aerial photographs, fire insurance maps, and historical street directories to provide information about the history of the subject property and its surroundings. The resources Alta reviewed are tabulated below and presented in Appendix B.

Historical Resources		
Source Type	**Years Reviewed**	**Source**
USGS Topo Maps	1894, 1896, 1900, 1928, 1953, 1966, 1972, 1981, 1991/1994, and 2012.	USGS/EDR
Aerial Photograph(s)	1923, 1928, 1938, 1948, 1952, 1964, 1972, 1977, 1989, 1994, 2002, 2005, 2009, 2010, and 2012.	EDR
Fire Insurance Maps	1894, 1906, 1950, 1953, 1954, 1959, 1960, 1967, and 1970	EDR
Street Directories	1920 to 2013 at approximate 5- year intervals	EDR

5.3.1 Historical Aerial Photographs

Eleven historical topographic maps of the property and surrounding area from 1923 through 2012 were reviewed (Appendix B).

Date	Description
1923	The subject property consists of three warehouse buildings along the northern portion, railroad spurs within the middle section, and large warehouse buildings along the southern portion. The subject property is bound to the north by East 6th Street, to the west by South Alameda Street, to the south by Wholesale Street, and to the east by Mill Street. The adjacent northern property is developed with several industrial buildings. A railroad lines appear to be located to the northwest. The western adjacent property is developed with multiple elongated buildings. The southern adjacent property contains multiple buildings. To the east, the adjacent property contains multiple elongated buildings. To the northeast, there are several aboveground-storage tanks.
1928	The subject property appears to be similar to the 1923 aerial photograph. The eastern adjacent property is becoming more developed with buildings. The surrounding areas also are developing with commercial/industrial buildings.
1938	The subject property appears to be similar to the 1928 aerial photograph. The southern adjacent property appears to be developed and similar to present day configuration.
1948	The subject property appears to be similar to the 1938 aerial photograph. The western adjacent property has redeveloped several buildings.
1952	The subject property appears to be developed with an additional building along the southern boundary on the western side. The surrounding areas appear to be developing.
1964, 1972	The subject property now contains two larger, elongated buildings along the northern and central portion. To the northwest, a large commercial building has been developed. The western adjacent property now contains a large building with several rectangular containers. The southern portion appears to be similar to the 1952 aerial photograph. The eastern adjacent property is developed and appears to be similar to the present-day configuration. To the northeast, there appears to be several buildings.
1977	On the subject property, the two elongated building appear to be connected along the northern portion. Along the southern portion, a large commercial building has been developed. The subject property appears to be similar to the present-day configuration.
1989	The subject property appears to be similar. The northern and western adjacent properties have been developed and appear to be similar to present day configuration.
1994, 2002, 2005, 2009, 2010, 2012	The subject property and surrounding areas appear similar to the 1989 aerial photograph.

5.3.2 Historical Topographic Maps

Eleven historical topographic maps of the property and surrounding area from 1894 through 1994 were reviewed (Appendix B).

Date	Description
19894, 1896, 1900	The subject property and site vicinity are depicted as undeveloped land. Surrounding areas are developing.
1928	Four buildings and railroad lines on the subject property are depicted.

Date	Description
1953	The subject property appears to have railroad lines. To the northeast, there are two aboveground-storage tanks.
1966, 1972, 1981, 1994, and 2012	The subject property to be similar to the 1953 topographic map. The oil tanks to the northeast are no longer present.

5.3.3 Historical City Directory

Alta Environmental contracted EDR to conduct a search for historical city directory information for the subject site and general vicinity. In accordance with ASTM E1527-13, only those properties which are likely to indicate significant environmental concern for the subject property are discussed. The EDR City Directory report is presented in Appendix B and summarized in the following table.

Date	Description
Subject Property	
1338 East 6th Street	
2013	Always Fresh Trading Inc, KC Produce Corp
2008, 2006	AJ International Inc, Angelina's Freight, P & G Food Inc
2000	United Distributors
1981	Veltman Terminal Co Distribution
1971, 1967	Ben Carlip Juvni furniture & toys
1942	Greenberg restaurant
1937	Ripley restaurant
1334 East 6th Street	
2000	BTL Jordon Produce, E & T Produce Co, CA Watercress Inc
1330 East 6th Street	
1990	Miller Ed Co In
1326 East 6th Street	
1937	California cutting Die Works
1929	Excel Lite Mfg & Sales Co
1924	Sunset Mfg Co
1324 East 6th Street	
1924	Gaylord Chase H & CO
1322 East 6th Street	
1937	Pasadena Sanitary Products Co janitor supply
1933	Starr Wallace J Elzora steelwork
1929	Gordon Machinery & Manufacturing Co
1924	Salins Bros
1320 East 6th Street	
2013	Alberts Organics, Valley Fruit & Produce Company
2006	Alberts, Anco Fine Cheese

Date	Description
1318 East 6th Street	
1971	Mutual Wholesale Liquor
1942	Enns Arth D Ruby refrigerators
1937	Jones Geo trucking
1933	Industrial Products Co
1314 East 6th Street	
1933-1924	Duggan & Son CE and JJ truck manufacture
1268 East 6th Street	
2013	Kenny's Produce
2008	Green West Farm Inc
1266 East 6th Street	
2013	Asian Fresh Produce
2006	Hop Fu Produce
1206 East 6th Street	
2008	Garfield Produce Distributions, Artainable Cuisine, Farmer Brothers Co
2006	Artainable Cuisine, Garfield Produce & Heath
1967	Morton Salt Co, Simoniz Co
1957-1960	Butane Carburetor Service
1205 Wholesale Street	
2008-2013	ProAct Specialties
1211 Wholesale Street	
2008-2013	Astro Food Services
1219 Wholesale Street	
2008-2013	Eureka Specialties
1221 Wholesale Street	
2006	Apparel Inc, Sweet People
1311 Wholesale Street	
2008-2013	K & C Specialties
1321 Wholesale Street	
2013	American Produce Co
2008	Seashore West Inc
2006	Produce West, Seashore Fruit, Tom E Produce
Neighboring Properties	
1275 East 6th Street	
1991	Aesthetic Frame Design
1958-1967	Gold Manor Upholstery Mfg corp
1281 East 6th Street	
2006-2013	Alltronics

Date	Description
1958-1980	Three Star Smoked Fish Co Inc
1313 East 6th Street	
1975-1995	Madell & Co Inc Derail
1958	Affiliated metals & Supply Co
1340 East 6th Street	
2013	Western Imperial 2000
1967	Malmstrom Chemical Corp, Metropolitan Warehouse Co, Van Straaten Chemical Co
1965-1966	Nixon Baldwin Chemicals Inc
1962	Reminton Rand Division of Sperry Rand Corporation machine service
1958	Hall C P Co of California chemicals

5.3.4 Sanborn Fire Insurance Maps

Alta contracted EDR to provide available Sanborn Fire Insurance Maps. Twenty historical Sanborn maps of the property and surrounding area from 1894 through 1970 were reviewed (Appendix B).

Date	Description
1894	Subject Property In this Sanborn Map, only the western portion of the subject property is shown. The northern portion contains Willamette Steam and Lumber Mill with the lumber yard. South of the lumber yard/mill, there is an athletic park which contains a baseball park and grandstand. Adjacent Properties To the north across East 6th Street, the lumber yard/mill is continued from the subject property. To the west at the intersection of South Alameda Street and East 6th Street, there is Los Angeles Consolidated Electrical Railroad Plant. The plant had contained a paint shop, tanks, and a car shed. The eastern adjacent properties are not depicted.
1906	Subject Property The northern portion contains L.W. Blinn Lumber Co., Consolidated Lumber Co, Eureka Planning Mill, and Western Planning Mill. The southern portion is undeveloped along western side. The southeastern portion of the property is developed with a warehouse which is used by Commercial Warehouse Company. Adjacent Properties To the north across East 6th Street, the lumber yard/mill is continued from the subject property. To the west at the intersection of South Alameda Street and East 6th Street, the Los Angeles Railroad Company has expanded. There is a power house that contains several generators, two fuel oil ASTs (7,500 BBLS each), frame cooling tower, and oil storage area. Additionally, there is a large area used as the car barn. To the south across from the railroad line, there are several buildings occupied by the Union Ice Company and two buildings used for concrete storage. To the east across Mill Street, there is a lumber yard/mill with a building on the northern portion.

Date	Description
1950, 1953, 1954, 1959, 1960	Subject Property The northern portion of the property is developed with a long, multi-tenant warehouse. These tenants include several machine shops (1950-1960 Sanborn maps). The northern central portion includes railroad lines. The southern central portion is developed with two long, multi-tenant warehouses. The western warehouse is occupied by Building Material Warehouse. The eastern warehouse is occupied by several storage tenants including a chemical storage (1950, 1953 Sanborn maps). The southern portion contains a building by LA Union Terminal used as a production dock on the western side. Along the eastern side, a multi-tenant warehouse is developed. These tenants include California Warehouse Storage, Union Terminal Warehouse, and various other storage companies. Adjacent Properties To the north across East 6th Street, there are several stores. Further north is the L.A. Bureau of Power & Light. To the west at the intersection of South Alameda Street and East 6th Street, now there is Los Angeles Transit Lines. The northern portion of this facility contains a car yard with a spray paint booth. The central potion contains the trolley coach service buildings for Los Angeles Transit Lines, 1st Division. The southern portion contains the generators and car barn. In 1954, the generators have been removed. In 1960, the car barn has been replaced with truck and trailer parking lot. To the south across from the railroad lines, there are buildings occupied by the Union Ice Company and various warehouses. Further south, there is a chemical solution warehouse and service station. To the east across Mill Street, there is the Metropolitan Warehouse building.
1967	Subject Property The northern portion of the property is developed with two long multi-tenant warehouses. These tenants include multiple machine shops, various produce storage, and refrigeration. The central portion is developed with two large buildings and railroad lines. The southern portion still contains a building by LA Union Terminal and a multi-tenant warehouse. Adjacent Properties To the north across East 6th Street, there are several commercial and industrial buildings, which include two chemical warehouses. To the northwest, there is an auto repair shop and service station. To the west of South Alameda Street, there is the Los Angeles Metropolitan Transit Authority Division No 1. The northern portion contains the bus service and bus yard. The central portion contains a service building. The southern portion contains truck and trailer parking. To the south of the railroad lines, there are buildings occupied by the Union Ice Company and various warehouses
1970	Subject Property The northern portion of the property is developed with two long warehouses which are used for storage. The central portion is developed with two large buildings and railroad tracks. The southwestern portion still contains a building used by LA Union Terminal and the. The southeastern portion contains a warehouse used by Metropolitan Warehouse Company, Southern Pacific, and The California Warehouse Storage. Adjacent Properties The adjacent properties are similar to the 1967 Sanborn Map.

5.4 Interviews

Alta interviewed parties potentially having information about current and/or former conditions at the subject property. The parties and their affiliation are tabulated on the following page.

Interviews		
Name	**Affiliation**	**Role**
Mr. Jeffrey Sofferman	SunCal	Owner/User
Mr. David Sandel	CBRE	Key Site Manager

No evidence of a recognized environmental condition in connection with the subject property was reported during the abovementioned interviews. Pertinent information collected during these interviews has been incorporated throughout the report where appropriate. Interview records are presented in Appendix G.

6 NON-SCOPE CONSIDERATIONS

Per the authorized scope of work, items beyond the scope of ASTM E-1527-13 were not addressed as part of this assessment.

7 VAPOR ENCROACHMENT SCREENING

ASTM E1527-13 requires the Environmental Professional to evaluate the potential for vapor encroachment of chemicals of concern (COC) onto the subject property, and to determine if such vapor encroachment constitutes evidence of a recognized environmental condition on the subject property. The E1527-13 Standard Practice does not specifically state the methods that must be used to screen for potential vapor encroachment issues. However, ASTM has developed a separate Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-15), which outlines a ASTM E1527-13-compliant methodology to conduct vapor encroachment screening.

7.1 VES Methodology

The goal of conducting Vapor Encroachment Screening (VES) is to identify a vapor encroachment condition (VEC), which is defined as the presence or likely presence of chemicals of concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property. If a VEC is identified, the environmental professional must determine whether the VEC represents evidence of a Recognized Environmental Condition on the subject property under the context of the Phase I ESA Standard Practice. It should be noted that the identification of a VEC on the subject property does not necessarily indicate that a potential for migration of vapors into existing or proposed structures on the subject property is likely. The environmental professional will identify the VEC as a recognized environmental condition where the potential for vapor migration into structures is considered likely, or where the contaminant concentrations in the soil, groundwater, or soil vapors on the subject property are significant and likely to result in enforcement against on-site or off-site responsible parties.

The VES utilizes information regarding the potential presence of releases on or near the subject property that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. The VES Standard Guide requires the environmental professional to search for potential sites of concern within specific search radii. The area of concern search radius is 1,760 feet (1/3 mile) for non-petroleum contaminated sites and 528 feet (1/10 miles) for petroleum contaminated sites. The default search distances may be expanded or reduced in the upgradient, downgradient, or cross-gradient directions by the environmental professional based on experience in the local area and applying professional judgment to factors such as where a well-defined regional groundwater flow direction is identified, or whether other geologic features such as low

permeability soils or hydrogeologic boundaries such as rivers or streams exist which would tend to limit the potential for migration of groundwater or vapors in a particular direction.

7.2 VES Search Results

Alta identified 41 sites of potential concern within the VES search radii, based on our review of governmental database records, regulatory agency files, and historical resources referenced in Section 5.3. Of these 41 sites of potential concern, none are considered to represent evidence of a VEC based upon factors including (but not limited to):

- The nature of the listing;
- Post remedial action confirmatory soil/groundwater sampling data;
- The use of the site;
- When the site was listed and its current listed status;
- The developmental density of the setting;
- The distance between the listed and subject sites as related to the distance that releases are likely to migrate based on local surface and subsurface drainage conditions;
- The presence of intervening drainage divides; and/or
- The inferred groundwater movement and depth.

8 FINDINGS

Alta Environmental has performed a Phase I Environmental Site Assessment for the subject property in conformance with the scope and limitations of ASTM Practice E 1527. Based on the site reconnaissance, review of historical and available documents, and interviews, Alta finds the following:

8.1 Current Site Activities

At the time of our site visit, the subject property contains two elongated, multi-tenant warehouses. These warehouses store, package, and ship produce such as fruit, vegetables, and flowers.

8.2 Historical Site Activities

Based on earliest records reviewed, the subject property contained a lumberyard/mill on the northern portion of the property. Beginning in the 1900s, development of buildings began along the southern portion. In the late 1900s, the northern portion was developed with a long warehouse. During the 1920s and 1940s, several smaller structures were built. In the late 1940s to early 1950s, several multi-tenant warehouse structures were developed. Among these tenants included machine shops and a chemical manufacturer. In the early 1960s, the current building on the northern portion was developed. The current building along the southern portion was constructed in the early 1970s.

Additionally, ATC Associates had reviewed historical building permits. The permits stated on-site USTs associated with the former tenant (Progressive Produce) were removed in 1990 and that no impacted soil was identified (ATC, 2010). The site is not listed on the LUST database.

8.3 Off-Site Activities

Current off-site activities include a variety of commercial and industrial uses, including artist studios, wholesale produce businesses, general retail, film industry, door manufacturing, and city and regional bus fleet maintenance.

Of these adjacent properties, several off-site properties were identified as potential environmental concerns. However, based on our review of available records, identified groundwater flow direction, and/or distances relative to the subject property for these identified sites, it is unlikely that soil,

groundwater, and/or soil vapor contamination would occur at the subject property specifically due to these identified sites.

8.4 Data-Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps. At the time of this report, no response to the records review request has been received from the Los Angeles County Public Health Investigation (PHI), Los Angeles Fire Department, and Los Angeles County Sanitation District. Additionally, responses the User Questionnaire was not obtained from the current site user. However, these data gaps are not considered significant, as related information was reviewed from other additional sources.

9 CONCLUSIONS

Alta Environmental ("Alta") completed a Phase I Environmental Site Assessment (ESA) of the subject site located at 1206-1338 East 6th Street and 1205-1321 Wholesale Street, in Los Angeles, California (Site). The ESA was performed in conformance with the scope and limitations of ASTM E1527-13 and AAI standards. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. The assessment was performed to identify conditions indicative of releases and threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the subject site.

The subject property is located in an industrial/ commercial area and has been developed at least since 1894. Based on the review of historical records, Site reconnaissance, groundwater flow and direction, and the previous Phase I ESA, we conclude that there is no evidence of current or historical RECs or Controlled RECs in connection with the subject property.

10 QUALIFICATIONS AND SIGNATURE

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in 40 CFR 312.10. IS have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

ERIC FRASKE, PE

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Alta Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

RGA LUST---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 20 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 32 ENVIROSTOR sites within approximately 1 mile of the target property.
