OUR COMMITMENT TO SUSTAINABILITY | ESA helps a variety of public and private sector clients plan and prepare for climate change and emerging regulations that limit GHG emissions. ESA is a registered assessor with the California Climate Action Registry, a Climate Leader, and founding reporter for the Climate Registry. ESA is also a corporate member of the U.S. Green Building Council and the Business Council on Climate Change (BC3). Internally, ESA has adopted a Sustainability Vision and Policy Statement and a plan to reduce waste and energy within our operations. This document was produced using recycled paper.

EXECUTIVE SUMMARY

Morningside High School Site Upgrade and Woodworth Elementary School Demolition Project – Cultural Resources Assessment Report

Environmental Science Associates (ESA) has been retained by the Inglewood Unified School District (District) to prepare a cultural resources assessment for the Morningside High School Site Upgrade and Woodworth Elementary School Demolition Project (Proposed Project) in support of an Initial Study/Mitigated Negative Declaration (IS/MND). The Proposed Project involves improvements to portions of the existing Morningside High School (Project Site or existing campuses). The District is the lead agency pursuant to the California Environmental Quality Act (CEQA).

A records search was conducted on August 13, 2021, by staff at the California Historical Resources Information System – South Central Coastal Information Center housed at California State University, Fullerton, and included a review of all recorded cultural resources and previous studies within the Project Site and a 0.50-mile radius. The records search results indicate that approximately less than 5 percent of the 0.50-mile records search radius and none of the Project Site have been included in previous cultural resources surveys. The records search results also indicate that one historic architectural resource has been previously recorded within a 0.50-mile radius of the Project Site. No historic architectural resources have been previously recorded within the Project Site. No archaeological resources have been previously recorded within the Project Site or a 0.50-mile radius.

The California Native American Heritage Commission conducted a Sacred Lands File search on August 3, 2021, yielding negative results.

Given the fact that the Project Site is developed with buildings, a parking lot, athletic facilities, and covered by sod, and lacks lacking ground surface visibility, a pedestrian survey was not conducted.

No known archaeological resources were identified within the Project Site, and the Proposed Project would have no impact on known archaeological resources. The archaeological sensitivity assessment concluded that there is a low potential for encountering subsurface prehistoric and historic-period archaeological resources during Project-related ground-disturbing activities. However, since the Project includes ground-disturbing activities, there remains a possibility that buried archaeological resources or human remains could be encountered. Recommended mitigation measures, which include construction worker training and procedures to follow in the

event of a discovery, are provided in the *Conclusions and Recommendations* section at the close of this report to reduce potential impacts to unknown archaeological resources and human remains to less than significant levels under CEQA.

MORNINGSIDE HIGH SCHOOL SITE UPGRADE AND WOODWORTH ELEMENTARY SCHOOL DEMOLITION PROJECT

Cultural Resources Assessment Report

Introduction

Environmental Science Associates (ESA) has been retained by the Inglewood Unified School District (District) to conduct a cultural resources assessment for the Morningside High School Site Upgrade and Woodworth Elementary School Demolition Project (Proposed Project) in support of an Initial Study/Mitigated Negative Declaration (IS/MND). The Proposed Project involves improvements to portions of the existing Morningside High School and Woodworth Elementary (Project Site or existing campuses). The District is the lead agency pursuant to the California Environmental Quality Act (CEQA).

ESA personnel involved in the preparation of this report are as follows: Monica Strauss, MA, RPA, project director; Candace Ehringer, MA, RPA, Principal Investigator; Fatima Clark, BA, report author; and Stephan Geissler, GIS specialist. Resumes of key personnel are included in **Appendix A**.

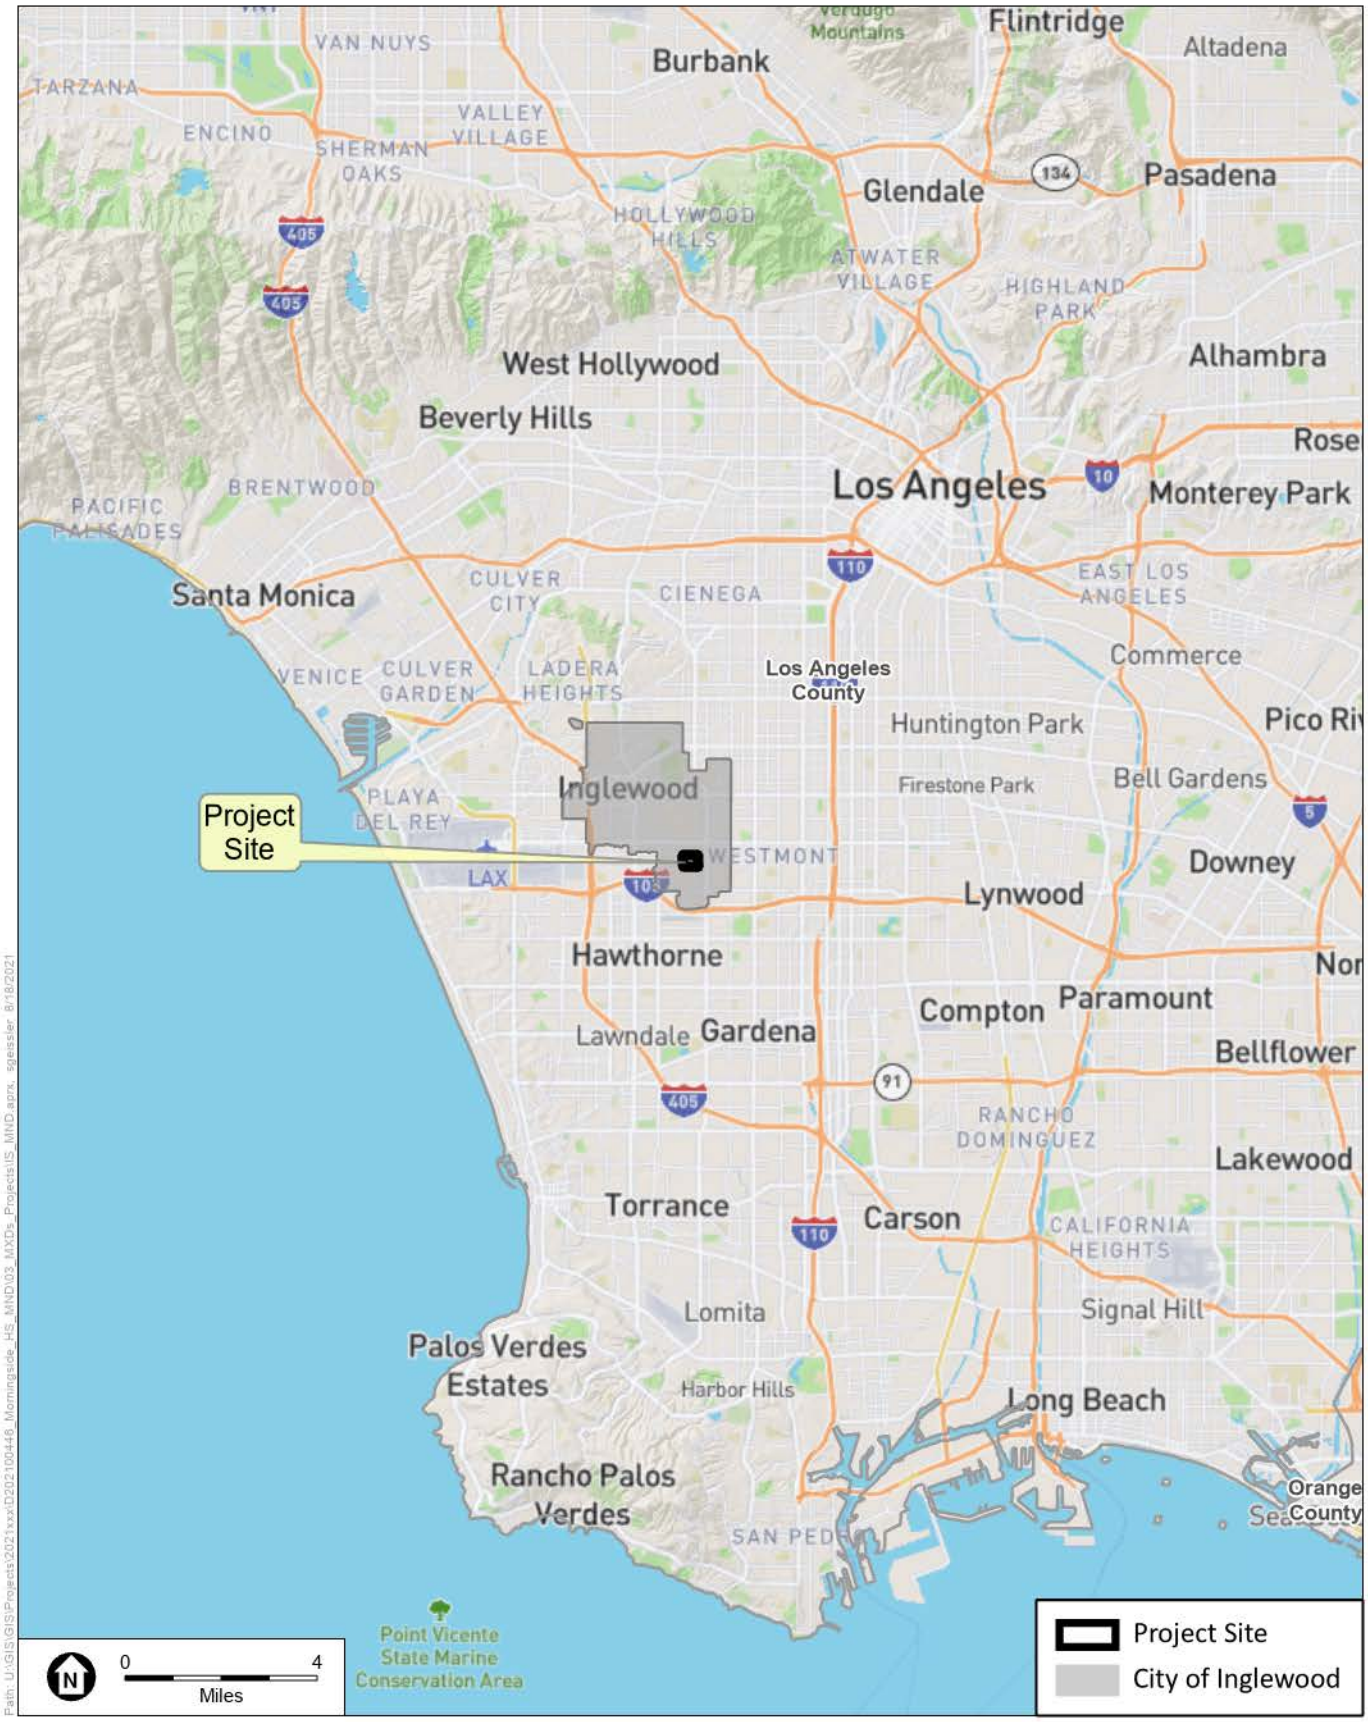
Project Location

The 54-acre Project Site is located just south of the community of Morningside Park, in the southeastern portion of the City of Inglewood within Los Angeles County, California (**Figure 1**). The existing Morningside High School campus is approximately 48 acres and is located entirely within Assessor's Parcel Number (APN) 4030-033-901. The existing Woodworth Elementary School campus is approximately 6 acres and is located within APN 4030-033-903. The Project Site is bounded to the north by West 104th Street, residential homes, and commercial uses. Yukon Avenue South and residential homes are located to the west of the Project Site, with residential homes and West 108th Street to the south. Additionally, Woodworth-Monroe TK-8 Academy and South 10th Avenue are located to the east of the Project Site (**Figure 2)**. Specifically, the Project Site is located in Section 3 of Township 3 South, Range 14 West on the Inglewood, CA U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle (**Figure 3**).

Project Description

The Proposed Project includes demolition of 14 buildings and hardscape on the Woodworth Elementary School campus and demolition of 13 buildings and hardscape (including 12 tennis courts and 6 basketball courts) on the Morningside High School campus. The Woodworth

Elementary School campus is currently vacant after operations were merged with Monroe Middle School in 2019, creating the Woodworth-Monroe TK-8 Academy. The Proposed Project would also adjust the boundaries of the Morningside High School campus, reducing the campus by 17-acres (the remaining 23 acres of land on the eastern portion of the Project Site, as shown in Figure 2, is owned by the District and is proposed to be leased). Construction of new facilities would also occur within the Morningside High School campus, including a relocated track and football/soccer field (including expanded seating at the bleachers), tennis courts, basketball courts, shotput and discus areas, a softball field, and a baseball field. Stadium lighting, electronic scoreboards, and public announcement (PA) systems are proposed at the football field, softball field, and baseball field. The Proposed Project would also include a ticketing and concessions building, a visitor team storage and restroom building, and a home team storage and restroom building. Additionally, proposed circulation improvements include an expansion of the existing northwest parking lot and fire lane, a new parking lot near the proposed baseball field and a new parking lot at the proposed football field and expanded internal pedestrian walkways leading to a proposed safe dispersal area. Landscaping and utility improvements would also be included throughout the proposed Morningside High School campus. The Proposed Project's demolition activities are depicted on **Figure 4**, while the Proposed Project components are shown on **Figure 5**.



Setting

Natural Setting

The Project Site is located within the Los Angeles physiographic basin, which is bounded on the north by the Santa Monica and San Gabriel Mountains, on the east and southeast by the Santa Ana Mountains and the San Joaquin Hills, and on the west and south by the Pacific Ocean. The Los Angeles basin is part of the Peninsular Ranges Geomorphic Province, which extends north to the San Gabriel Mountains and south into the tip of Baja California, Mexico. The Province is "characterized by alluviated basins, elevated erosion surfaces, and northwest-trending mountain ranges bounded by northwest trending faults" (Koury Engineering & Testing, Inc. 2020: 6).

Prehistoric Setting

Based on recent research in the Southern California region (Douglass et al. 2016), the following prehistoric chronology has been divided into four general time periods: the Paleocoastal Period (12,000 to 8,500 Before Present [B.P.]), the Millingstone Period (8,500 to 3,000 B.P.), the Intermediate Period (3,000 to 1,000 B.P.), and the Late Period (1,000 B.P. to Anno Domini [A.D.] 1542). This chronology is manifested in the archaeological record by particular artifacts and burial practices that indicate specific technologies, economic systems, trade networks, and other aspects of culture.

Paleocoastal Period (12,000–8,500 B.P.)

While it is not certain when humans first came to California, their presence in Southern California by about 9,600 cal B.C. has been well documented. At Daisy Cave, on San Miguel Island, cultural remains have been radiocarbon dated to between 11,100 and 10,950 B.P. (Byrd and Raab 2007). During this time period, the climate of Southern California became warmer and more arid and the human population, residing mainly in coastal or inland desert areas, began exploiting a wider range of plant and animal resources (Byrd and Raab 2007). In the Project vicinity, evidence of Paleocoastal occupation is sparse, and none has been confirmed by scientific dating methods (such as radiocarbon dating) (Douglass et al. 2016).

Millingstone Period (8,500–3,000 B.P.)

During this time period, there is evidence for the processing of acorns for food and a shift toward a more generalized economy. The first evidence of human occupation in the Los Angeles area dates to at least 9,000 years B.P. and is associated with the Millingstone cultures (Wallace 1955; Warren 1968). Millingstone cultures were characterized by the collection and processing of plant foods, particularly acorns, and the hunting of a wider variety of game animals (Byrd and Raab 2007; Wallace 1955). Millingstone cultures also established more permanent settlements that were located primarily on the coast and in the vicinity of estuaries, lagoons, lakes, streams, and marshes where a variety of resources, including seeds, fish, shellfish, small mammals, and birds, were exploited. Early Millingstone occupations are typically identified by the presence of handstones (manos) and millingstones (metates), while those Millingstone occupations dating later than 5,000 B.P. contain a mortar and pestle complex as well, signifying the exploitation of acorns in the region. Cogged stones (cog-shaped stones) and disocidals (stone discs) are also indicative of the Millingstone Period.

In the vicinity of the Project Site, sites that date to this time period appear to have been small settlements or campsites reflecting resource gathering groups exploiting nearby lagoon or marshland (inland swamp) resources and specialized resource processing (such as shellfish). There is a gap in the archaeological record between 6,000 and 5,000 B.P., which suggests that the Project Site vicinity was sparsely occupied or abandoned during this time frame (Douglass et al. 2016).

Intermediate Period (3,000–1,000 B.P.)

During this time period, many aspects of Millingstone culture persisted, but a number of socioeconomic changes occurred (Erlandson 1994; Wallace 1955; Warren 1968). The native populations of Southern California were becoming less mobile and populations began to gather in small sedentary villages with satellite resource-gathering camps. Increasing population size necessitated the intensified use of existing terrestrial and marine resources (Erlandson 1994). Evidence indicates that the overexploitation of larger, high-ranked food resources may have led to a shift in subsistence, towards a focus on acquiring greater amounts of smaller resources, such as shellfish and small-seeded plants (Byrd and Raab 2007). This period is characterized by increased labor specialization, expanded trading networks for both utilitarian and non-utilitarian materials, and extensive travel routes. Trade increased dramatically during this period, with asphaltum (tar), seashells, and steatite being traded from Southern California to the Great Basin. Use of the bow

and arrow spread to the coast around 1,500 B.P, largely replacing the dart and atlatl (Homburg et al. 2014). Increasing population densities, with ensuing territoriality and resource intensification, may have given rise to increased disease and violence between 3,300 and 1,650 B.P. (Raab et al. 1995).

The Intermediate Period is characterized by a lack of manos, metates, and core tools, an increase in the use of mortars and pestles, and the introduction of stone-lined earthen ovens. There is a wider variety and increased numbers of projectile points, and flexed burials are common (Douglass et al. 2016).

In the Project Site vicinity, the population density increased, possibly as a result of the migration of eastern desert Takic peoples into the Los Angeles Basin, which is postulated to have begun by the end of the late Millingstone period and to have continued into the late Intermediate period. The Takic incursion resulted in the introduction of new material culture and mortuary practices, and an increase in genetic variation, population, number of sites, and focus on terrestrial resources. Changes in climate may also have contributed to the increased occupation of the area, as a wetter environment led to increased biological diversity. During this time, the Ballona wetlands (located approximately 5.75 miles northwest of the Project Site) shifted from an open embayment to a more closed, brackish environment. Lowland sites were likely occupied on a seasonal or semi-permanent basis as resource processing camps, with semi-permanent settlements on the bluff tops. Other important local developments during this time period include organized site structure with designated areas for different types of activities, and the rise of the mourning ceremony with the ritual destruction and burial of ground stone and the deceased's personal possessions. Local settlement patterns reflect functional rather than social differentiation (Douglass et al. 2016).

Late Period (1,000 B.P.–A.D. 1542)

The Late Period is associated with the florescence of the Gabrielino, who are estimated to have had a population numbering around 5,000 in the pre-contact period. The Gabrielino occupied what is presently Los Angeles County and northern Orange County, along with the southern Channel Islands, including Santa Catalina, San Nicholas, and San Clemente (Kroeber 1925). This period saw the development of elaborate trade networks and use of shell-bead currency. Fishing became an increasingly significant part of subsistence strategies at this time, and investment in fishing technologies, including the plank canoe, are reflected in the archaeological record (Erlandson 1994; Raab et al. 1995). Settlement at this time is believed to have consisted of dispersed family groups that revolved around a relatively limited number of permanent village settlements that were located centrally with respect to a variety of resources (Koerper et al. 2002).

In contrast to other parts of Southern California, occupation of sites in the Project Site vicinity appears to decrease during the early Late period, probably due to changing climate that resulted in an overall decline in precipitation, and episodic drought and flooding (the onset of the Late Period coincided with the medieval climatic anomaly [or MCA], a period of extended drought that occurred between A.D. 800 and 1350) (Douglass et al. 2016).

Ethnographic Setting

The Project Site is situated within land traditionally occupied by the Gabrielino (including the Tongva and Kizh). The following summary is not intended to provide a comprehensive account of this group, but is instead a brief historical overview based on available information from resources cited below.

Gabrielino (or Tongva and Kizh)

The term "Gabrielino" is a general term that refers to those Native Americans who were sent by the Spanish to the Mission San Gabriel Arcángel. (Bean and Smith 1978). Two indigenous terms are commonly used by tribal groups to refer to themselves and are preferred by descendant groups: Tongva and Kizh (Heizer 1968). Prior to European colonization, the Gabrielino occupied a diverse area that included: the watersheds of the Los Angeles, San Gabriel, and Santa Ana rivers; the Los Angeles basin; and the islands of San Clemente, San Nicolas, and Santa Catalina (Bean and Smith 1978). Their neighbors included the Chumash and Tataviam to the north, the Juañeno to the south, and the Serrano and Cahuilla to the east. The Gabrielino are reported to have been second only to the Chumash in terms of population size and regional influence (Bean and Smith 1978). The Gabrielino language was part of the Takic branch of the Uto-Aztecan language family.

The Gabrielino Indians were hunter-gatherers and lived in permanent communities located near the presence of a stable food supply. Subsistence consisted of hunting, fishing, and gathering. Small terrestrial game was hunted with deadfalls, rabbit drives, and by burning undergrowth, while larger game such as deer were hunted using bows and arrows (Bean and Smith 1978). Community populations generally ranged from 50 to 100 inhabitants, although larger settlements may have existed. The Gabrielino are estimated to have had a population numbering around 5,000 in the pre-contact period (Kroeber 1925). The Late Prehistoric period, spanning from approximately 1,500 years B.P. to the mission era, is the period associated with the florescence of the Gabrielino (Wallace 1955). Coming ashore near Malibu Lagoon or Mugu Lagoon in October of 1542, Juan Rodriguez Cabrillo was the first European to make contact with the Gabrielino Indians. Maps produced by early explorers indicate that at least 26 Gabrielino villages were within proximity to known Los Angeles River courses, while an additional 18 villages were reasonably close to the river (Gumprecht 2001).

Historic Setting

The following section presents a brief overview of the region's history. For a detailed history on the City of Inglewood and Morningside High School, please see *Morningside High School Site Upgrade Project: Historic Resources Assessment* prepared by ESA (2022) for the Proposed Project.

Spanish Period (A.D. 1542–1821)

Although Spanish explorers made brief visits to the Southern California region in 1542 and 1602, sustained contact with Europeans did not commence until the onset of the Spanish Period. In 1769 Gaspar de Portolá led an expedition from San Diego, passing through the Los Angeles

Basin and the San Fernando Valley, on its way to the San Francisco Bay (McCawley 1996). Father Juan Crespi, who accompanied the 1769 expedition, noted the suitability of the Los Angeles area for supporting a large settlement. This was followed in 1776 by the expedition of Father Francisco Garcés (Johnson and Earle 1990).

In the late 18th century, the Spanish began establishing missions in California and forcibly relocating and converting native peoples. Mission San Gabriel Arcángel was founded on September 8, 1771, and Mission San Fernando Rey de España on September 8, 1797. By the early 1800s, the majority of the surviving Gabrielino population had entered the mission system, either at San Gabriel or San Fernando. Mission life offered some degree of security in a time when traditional trade and political alliances were failing and epidemics and subsistence instabilities were increasing (Jackson 1999). This lifestyle change also brought with it significant negative consequences for Gabrielino health and cultural integrity.

On September 4, 1781, *El Pueblo de la Reina de los Angeles* was established not far from the site where Portolá and his men camped during their 1769 excursion, with a land grant of 28 acres issued to California Governor Felipe de Neve in 1781 (Gumprecht 2001). The pueblo was first established in response to the increasing agricultural needs of Spanish missions and presidios in Alta California. The original pueblo consisted of a central square surrounded by 12 houses and a series of agricultural fields. Thirty-six fields occupied 250 acres between the town and the river to the east (Gumprecht 2001).

By 1786, the flourishing pueblo attained self-sufficiency and funding by the Spanish government ceased. Fed by a steady supply of water and an expanding irrigation system, agriculture and ranching grew, and by the early 1800s the pueblo produced surplus wheat, corn, barley, and beans for export. A large number of livestock, including cattle and sheep, grazed in the surrounding lands (Gumprecht 2001).

The Protohistoric Period (A.D. 1540–1770) and the Mission Period (A.D. 1769–1830) largely fall within this period, and are the terms often used in the archaeological record to refer to sites occupied during these two timeframes.

Mexican Period (A.D. 1821–1848)

Mexico gained its independence from Spain in 1821 (Gumprecht 2001). Mexico promoted the settlement of California with the issuance of land grants. In 1833, Mexico began the process of secularizing the missions, reclaiming the majority of mission lands and redistributing them as land grants. According to the terms of the Secularization Law of 1833 and Regulations of 1834, at least a portion of the lands would be returned to the Native populations, but this did not always occur (Milliken et al. 2009).

Many ranchos continued to be used for cattle grazing by settlers during the Mexican Period. Hides and tallow from cattle became a major export for Californios[1], many of whom became

[1] Spanish speaking, Catholic persons of Latin American descent born in Alta California between 1769 and 1848.

wealthy and prominent members of society. The Californios led generally easy lives, leaving the hard work to vaqueros and Indian laborers (Pitt 1994; Starr 2007).

The Rancho Period (A.D. 1834–1848) falls within this period, and is often used in the archaeological record to refer to sites occupied during this timeframe.

American Period (A.D. 1848–Present)

Mexico ceded California to the United States as part of the Treaty of Guadalupe Hildalgo in 1848. California officially became one of the United States in 1850. While the treaty recognized right of Mexican citizens to retain ownership of land granted to them by Spanish or Mexican authorities, the claimant was required to prove their right to the land before a patent was given. The process was lengthy and generally resulted in the claimant losing at least a portion of their land to attorney's fees and other costs associated with proving ownership (Starr 2007).

When the discovery of gold in northern California was announced in 1848, a huge influx of people from other parts of North America flooded into California and the population of Los Angeles County tripled between 1850 and 1860. The increased population provided an additional outlet for the Californios' cattle. As demand increased, the price of beef skyrocketed and Californios reaped the benefits. However, a devastating flood in 1861, followed by droughts in 1862 and 1864, led to a rapid decline of the cattle industry; over 70 percent of cattle perished during these droughts (McWilliams 1946; Dinkelspiel 2008). These natural disasters, coupled with the burden of proving ownership, caused many Californios to lose their lands during this period. Former ranchos were subsequently subdivided and sold for agriculture and residential settlement (Gumprecht 2001; McWilliams 1946).

Los Angeles County was connected to the transcontinental railroad via San Francisco on September 5, 1876, and the population again exploded. The Southern California region would experience its greatest growth in the 1880s when two more direct rail connections to the East Coast were constructed. The Southern Pacific completed its second transcontinental railway, the Sunset Route from Los Angeles to New Orleans, in 1883 (Orsi 2005). In 1885, the Santa Fe Railroad completed a competing transcontinental railway to San Diego, with connecting service to Los Angeles (Mullaly and Petty 2002). The resulting fare wars led to an unprecedented real estate boom. Despite a subsequent collapse of the real estate market, the population of Los Angeles increased 350 percent from 1880 to 1890 (Dinkelspiel 2008). The Los Angeles region continued on its upward trajectory in the first few decades of the 20th century with the rise of tourism, automobile travel, and the movie industry (McWilliams 1946).

Regulatory Framework

State

California Environmental Quality Act

CEQA is the principal statute governing environmental review of projects occurring in the state and is codified at Public Resources Code (PRC) Section 21000 et seq. CEQA requires lead agencies to determine if a proposed project would have a significant effect on the environment,

including significant effects on historical or unique archaeological resources. Under CEQA (Section 21084.1), a project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

The *CEQA Guidelines* (Title 14 California Code of Regulations [CCR] Section 15064.5) recognize that historical resources include: (1) a resource listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources (California Register); (2) a resource included in a local register of historical resources, as defined in PRC Section 5020.1(k) or identified as significant in a historical resource survey meeting the requirements of PRC Section 5024.1(g); and (3) any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California by the lead agency, provided the lead agency's determination is supported by substantial evidence in light of the whole record. The fact that a resource does not meet the three criteria outlined above does not preclude the lead agency from determining that the resource may be an historical resource as defined in PRC Sections 5020.1(j) or 5024.1.

If a lead agency determines that an archaeological site is a historical resource, the provisions of Section 21084.1 of CEQA and Section 15064.5 of the *CEQA Guidelines* apply. If an archaeological site does not meet the criteria for a historical resource contained in the *CEQA Guidelines*, then the site may be treated in accordance with the provisions of Section 21083, which is as a unique archaeological resource. As defined in Section 21083.2 of CEQA a "unique" archaeological resource is an archaeological artifact, object, or site, about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

- Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information;
- Has a special and particular quality such as being the oldest of its type or the best available example of its type; or,
- Is directly associated with a scientifically recognized important prehistoric or historic event or person.

If an archaeological site meets the criteria for a unique archaeological resource as defined in Section 21083.2, then the site is to be treated in accordance with the provisions of Section 21083.2, which state that if the lead agency determines that a project would have a significant effect on unique archaeological resources, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place (Section 21083.1(a)). If preservation in place is not feasible, mitigation measures shall be required. The *CEQA Guidelines* note that if an archaeological resource is neither a unique archaeological nor a historical resource, the effects of the project on those resources shall not be considered a significant effect on the environment (*CEQA Guidelines* Section 15064.5(c)(4)).

A significant effect under CEQA would occur if a project results in a substantial adverse change in the significance of a historical resource as defined in *CEQA Guidelines* Section 15064.5(a). Substantial adverse change is defined as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of a historical resource would be materially impaired" (*CEQA Guidelines* Section 15064.5(b)(1)). According to *CEQA Guidelines* Section 15064.5(b)(2), the significance of a historical resource is materially impaired when a project demolishes or materially alters in an adverse manner those physical characteristics that:

A. Convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register; or

B. Account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in a historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

C. Convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a Lead Agency for purposes of CEQA.

California Register of Historical Resources

The California Register is "an authoritative listing and guide to be used by State and local agencies, private groups, and citizens in identifying the existing historical resources of the State and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change" (PRC Section 5024.1[a]). The criteria for eligibility for the California Register are based upon National Register of Historic Places (National Register) criteria (PRC Section 5024.1[b]). Certain resources are determined by the statute to be automatically included in the California Register, including California properties formally determined eligible for, or listed in, the National Register.

To be eligible for the California Register, a prehistoric or historic-period property must be significant at the local, state, and/or federal level under one or more of the following four criteria:

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
2. Is associated with the lives of persons important in our past;
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
4. Has yielded, or may be likely to yield, information important in prehistory or history.

A resource eligible for the California Register must meet one of the criteria of significance described above, and retain enough of its historic character or appearance (integrity) to be recognizable as a historical resource and to convey the reason for its significance. It is possible that a historic resource may not retain sufficient integrity to meet the criteria for listing in the National Register, but it may still be eligible for listing in the California Register.

Additionally, the California Register consists of resources that are listed automatically and those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed on the National Register and those formally determined eligible for the National Register;
- California Registered Historical Landmarks from No. 770 onward; and,
- Those California Points of Historical Interest that have been evaluated by the OHP and have been recommended to the State Historical Commission for inclusion on the California Register.

California Health and Safety Code Section 7050.5

California Health and Safety Code Section 7050.5 requires that in the event human remains are discovered, the County Coroner be contacted to determine the nature of the remains. In the event the remains are determined to be Native American in origin, the Coroner is required to contact the Native American Heritage Commission (NAHC) within 24 hours to relinquish jurisdiction.

California Public Resources Code Section 5097.98

California PRC Section 5097.98, as amended, provides procedures in the event human remains of Native American origin are discovered during project implementation. PRC Section 5097.98 requires that no further disturbances occur in the immediate vicinity of the discovery, that the discovery is adequately protected according to generally accepted cultural and archaeological standards, and that further activities take into account the possibility of multiple burials. PRC Section 5097.98 further requires the NAHC, upon notification by a County Coroner, designate and notify a Most Likely Descendant (MLD) regarding the discovery of Native American human remains. The MLD has 48 hours from the time of being granted access to the site by the landowner to inspect the discovery and provide recommendations to the landowner for the treatment of the human remains and any associated grave goods.

In the event that no descendant is identified, or the descendant fails to make a recommendation for disposition, or if the land owner rejects the recommendation of the descendant, the landowner may, with appropriate dignity, reinter the remains and burial items on the property in a location that will not be subject to further disturbance.

California Government Code Sections 6254(r) and 6254.10

These sections of the California Public Records Act were enacted to protect archaeological sites from unauthorized excavation, looting, or vandalism. Section 6254(r) explicitly authorizes public agencies to withhold information from the public relating to "Native American graves, cemeteries, and sacred places maintained by the Native American Heritage Commission." Section 6254.10 specifically exempts from disclosure requests for "records that relate to archaeological site information and reports, maintained by, or in the possession of the Department of Parks and Recreation, the State Historical Resources Commission, the State Lands Commission, the Native American Heritage Commission, another state agency, or a local agency, including the records that the agency obtains through a consultation process between a Native American tribe and a state or local agency."

Assembly Bill 52 and Related Public Resources Code Sections

Assembly Bill (AB) 52 was approved by California State Governor Edmund Gerald "Jerry" Brown, Jr. on September 25, 2014. The act amended California PRC Section 5097.94, and added PRC Sections 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2, and 21084.3. AB 52 applies specifically to projects for which a Notice of Preparation (NOP) or a Notice of Intent to Adopt a Negative Declaration or Mitigated Negative Declaration (MND) will be filed on or after July 1, 2015. The primary intent of AB 52 is to include California Native American Tribes early in the environmental review process and to establish a new category of resources related to Native Americans that require consideration under CEQA, known as tribal cultural resources. PRC Section 21074(a)(1) and (2) defines tribal cultural resources as "sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American Tribe" that are either included or determined to be eligible for inclusion in the California Register or included in a local register of historical resources, or a resource that is determined to be a tribal cultural resource by a lead agency, in its discretion and supported by substantial evidence. On July 30, 2016, the California Natural Resources Agency adopted the final text for tribal cultural resources update to Appendix G of the CEQA Guidelines, which was approved by the Office of Administrative Law on September 27, 2016.

PRC Section 21080.3.1 requires that within 14 days of a lead agency determining that an application for a project is complete, or a decision by a public agency to undertake a project, the lead agency provide formal notification to the designated contact, or a tribal representative, of California Native American Tribes that are traditionally and culturally affiliated with the geographic area of the project (as defined in PRC Section 21073) and who have requested in writing to be informed by the lead agency (PRC Section 21080.3.1(b)). Tribes interested in consultation must respond in writing within 30 days from receipt of the lead agency's formal notification and the lead agency must begin consultation within 30 days of receiving the tribe's request for consultation (PRC Sections 21080.3.1(d) and 21080.3.1(e)).

PRC Section 21080.3.2(a) identifies the following as potential consultation discussion topics: the type of environmental review necessary; the significance of tribal cultural resources; the significance of the project's impacts on the tribal cultural resources; project alternatives or appropriate measures for preservation; and mitigation measures. Consultation is considered concluded when either: (1) the parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or (2) a party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached (PRC Section 21080.3.2(b)).

If a California Native American tribe has requested consultation pursuant to Section 21080.3.1 and has failed to provide comments to the lead agency, or otherwise failed to engage in the consultation process, or if the lead agency has complied with Section 21080.3.1(d) and the California Native American tribe has failed to request consultation within 30 days, the lead agency may certify an EIR or adopt an MND (PRC Section 21082.3(d)(2) and (3)).

PRC Section 21082.3(c)(1) states that any information, including, but not limited to, the location, description, and use of the tribal cultural resources, that is submitted by a California Native

American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public without the prior consent of the tribe that provided the information. If the lead agency publishes any information submitted by a California Native American tribe during the consultation or environmental review process, that information shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public.

Local

City of Inglewood General Plan

The City of Inglewood's General Plan does not identify any goals or policies related to cultural resources.

Archival Research

South Central Coastal Information Center Records Search

On August 13, 2021, a records search for the Proposed Project was conducted by staff at the California Historical Resources Information System - South Central Coastal Information Center housed at California State University, Fullerton. The records search included a review of all recorded cultural resources and previous studies within the Project Site and a 0.50-mile radius. The Archaeological Determinations of Eligibility list was also reviewed.

Previous Cultural Resources Investigations

The records search results indicate that seven cultural resources studies have been conducted within a 0.50-mile radius of the Project Site. Approximately less than 5 percent of the 0.50-mile records search radius and none of the Project Site have been included in cultural resources surveys. Of the seven previous studies, one study (LA-2904) overlaps the Project Site. LA-2904 consisted of conducting archival research for the *West Basin Water Reclamation Project*; however, the Project Site was not subject to pedestrian survey (Stickel 1993).

Previously Recorded Cultural Resources

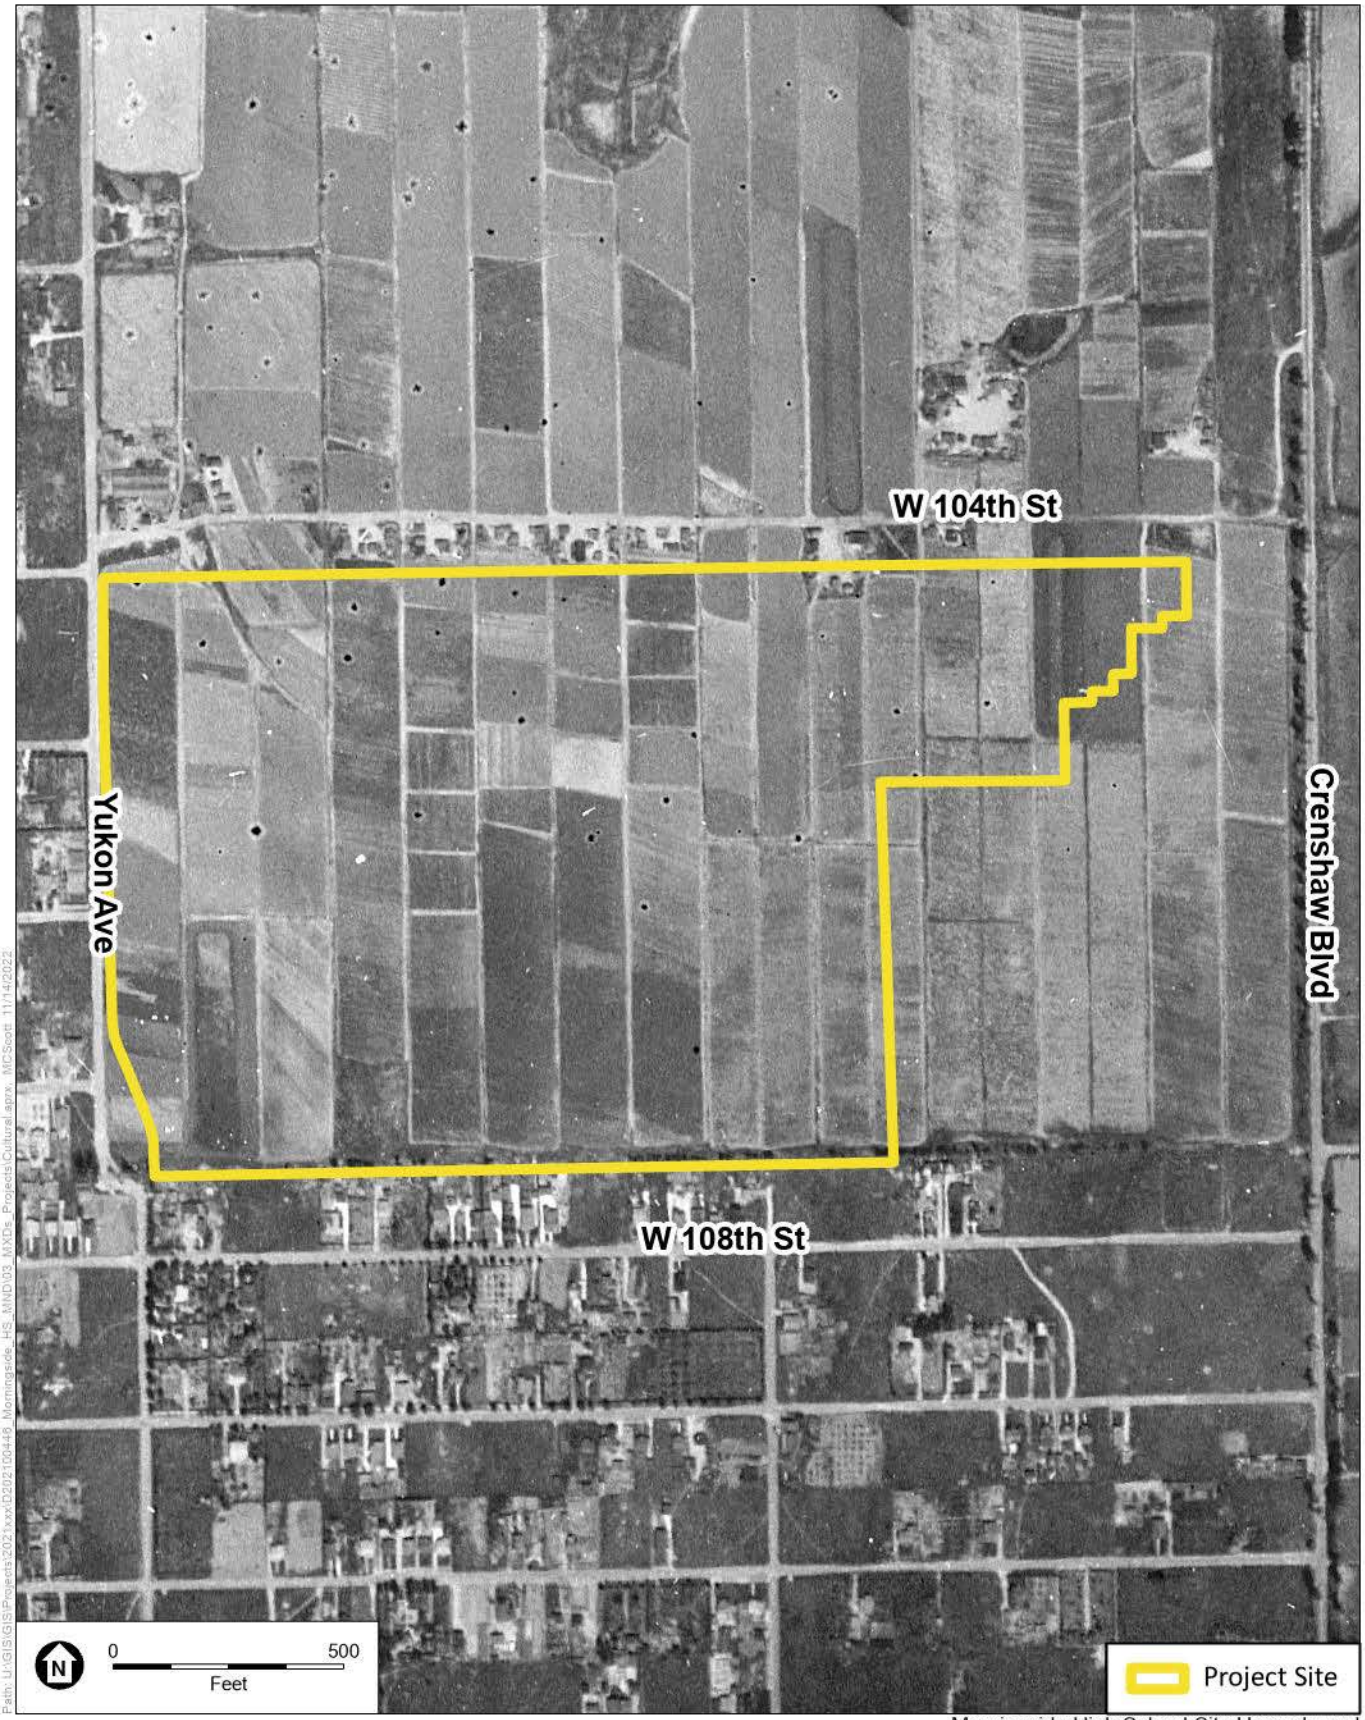
The records search results indicate that one historic architectural resource (P-19-190076) has been previously recorded within a 0.50-mile radius of the Project Site. P-19-190076 is located approximately 0.40 miles to the northeast of the Project Site and consists of a wooden utility pole. No historic architectural resources have been previously recorded with the Project Site. No archaeological resources have been previously recorded within the Project Site or a 0.50-mile radius.

Sacred Lands File Search

The NAHC maintains a confidential Sacred Lands File (SLF) which contains sites of traditional, cultural, or religious value to the Native American community. The NAHC was contacted on July 16, 2021, to request a search of the SLF. The NAHC responded to the request in a letter dated

August 3, 2021. The results of the SLF search conducted by the NAHC were negative (**Appendix B**). The District will consult with appropriate tribes per AB 52 requirements to identify potential tribal cultural resources. The results of this consultation will be summarized in the IS/MND.

Historic Maps and Aerial Photographs



Historic maps and aerial photographs were examined to provide historical information about land uses of the Project Site and to contribute to an assessment of the Project Site's archaeological sensitivity. Available topographic maps include the 1896 Redondo 15-minute quadrangle and the 1924 Inglewood 7.5-minute quadrangle (TopoView 2021). Historic aerial photographs were available for the years 1928, 1934, 1938, 1941, 1947, 1952, 1956, 1963, 1972, 1980, 1994, 2004, 2010, 2018, and 2021 (Bing Maps 2021; historicaerials.com 2021; UCSB 2021). Sanborn Fire Insurance maps do not show coverage of the Project Site.

Review of the 1896 historic topographic map shows the Project Site and immediate vicinity as mostly undeveloped; however, roads are already observed north, south, east, and west of the Project Site. The closest body of water to the Project Site is Aguaje de la Centinela, located approximately 2 miles northwest of the Project Site. The 1924 historic topographic map continues showing the Project Site as undeveloped; however, areas to the south and west are observed as subdivided into lots and developed with structures.

The 1928 historic aerial photograph depicts the Project Site in agricultural uses (fields) with the area just to the north developed with farm-related buildings and structures. The northeast portion of the Project Site is also depicted as developed with at least three farm-related buildings/structures (**Figure 6**). The areas further north, and to the east and southeast, are also in agricultural uses. Residential uses are shown to the south and west of the Project Site. The 1934, 1938, and 1941 historic aerial photographs depict largely the same conditions as the 1928 aerial, with the exception of some additional structures in the northeast portion and with residential uses increasing over the years in the surrounding areas (**Figures 7-9**). On the 1947 historic aerial photograph, there appear to be some small structures in the northwest corner of the Project Site and the structures in the northeast portion depicted in the previous aerial photographs appear to have been removed (**Figure 10**).

The 1952 historic aerial photograph depicts Morningside High School in the Project Site, with approximately eight structures shown in the western portion of the Project Site and a track shown in the southwestern corner of the Project Site. The 1956 historic aerial photograph depicts additional school buildings and parking lots within Morningside High School and approximately six buildings associated with the Woodworth Elementary School in the northeast portion of the Project Site (**Figure 11**).

The 1963 historic aerial photograph shows additional school buildings and a baseball field within Morningside High School and an additional L-shaped building within Woodworth Elementary School. Additional facilities, including basketball and tennis courts, are observed in subsequent aerial photographs from 1972, 1980, 1994, 2004, 2010, 2018, and 2021.

Geologic Map Review

Geological mapping of the Venice and Inglewood quadrangles indicate that the Project Site is underlain by Quaternary older alluvium (Qoa) sediments, described as "gray to light brown pebble-gravel, sand, and silt-clay" (Dibblee and Minch 2007) from the Pleistocene (2,588,000 to 11,700 years ago).

Geotechnical Investigation Review

A *Limited Geotechnical Investigation Report* (Geotechnical Report) was prepared for the Proposed Project by Koury Engineering & Testing, Inc. (2020). A total of 10 soil test borings (B-1 through B-10) were drilled (using a truck-mounted hollow-stem auger drilling equipment) at different locations within the Morningside High School campus down to depths ranging between 6.5 and 41.5 feet below ground surface. Fill soils were found between 2 and 5 feet below ground surface at the boring locations. Underneath the fill soils, alluvial deposits were encountered. However, the Geotechnical Report does not make a distinction between younger and older alluvium (Koury Engineering & Testing, Inc. 2020).

Archaeological Sensitivity Assessment

Prehistoric Archaeological Resources

The records search through the California Historical Resources Information System - South Central Coastal Information Center indicates that no prehistoric archaeological resources have been previously recorded within the Project Site or a 0.50-mile radius and the SLF search through the NAHC yielded negative results. However, the radius and Project Site have never been subject to systematic survey. Review of historic topographic maps also indicate that no bodies of water, which could have provided a fresh water source to inhabitants, were located in close proximity to the Project Site. The closest body of water was located approximately 2 miles away. Additionally, review of the geologic map indicates that the surface of the Project Site is underlain by Quaternary older alluvium sediments dating to the Pleistocene (2,588,000 to 11,700 years ago). These conditions suggest that the Project Site likely lacks the potential to contain subsurface deposits dating to the latest Pleistocene and Holocene (11,700 years ago to present) – the period for which there is widely accepted evidence for people in Southern California. Additionally, if any prehistoric resources once existed in the Project Site, these are expected to have remained at or near the surface. Past disturbances, including grading and the construction of the existing school, have likely displaced or destroyed resources if any once existed. Therefore, ESA considers the Project Site to have a low sensitivity for buried prehistoric archaeological resources.

Historic-Period Archaeological Resources

A review of historic aerial photographs indicates that the majority of the Project Site contained agricultural fields prior to its development as a high school and middle school. The Project Site also contained some small non-agricultural related structures that may have once been present in the northwest corner of the Project Site (where a parking lot will be constructed) and agricultural-related structures in the northeast corner (where only demolition of existing structures will occur). However, it is highly likely that if any historic-period agricultural related resources (such as

housing, barns, or outbuildings) once existed within the northeast and northwest portions of the Project Site that these have been destroyed during grading and construction for the existing schools. As such, ESA considers the Project Site to have a low sensitivity for buried historic-period archaeological resources. Nevertheless, the area immediately north and outside of the Project Site is known to have contained farm-related buildings and structures, which appear to have been demolished when West 104th Street was extended. Any buried features related to these structures, such as privies or trash pits, are possibly underneath West 104th Street, since grading for roads is typically known to be shallow, and therefore this type of activity would not have disturbed or displaced deeper archaeological deposits. **Figure 12** illustrates the alignment of West 104th Avenue as it relates to the Project Site and the farm-related buildings and structures just to the north of the Project Site, as shown on the 1947 and 2022 historic aerial photographs.

Conclusions and Recommendations

No known archaeological resources were identified within the Project Site, and the Proposed Project would have no impact on known archaeological resources. The archaeological sensitivity assessment concluded that there is a low potential for encountering subsurface prehistoric and historic-period archaeological resources during Project-related ground-disturbing activities. However, since the Project includes ground-disturbing activities, there remains a possibility that buried archaeological resources or human remains could be encountered. The following mitigation measures are recommended in order to reduce potential impacts to unknown archaeological resources and human remains to less than significant levels under CEQA.

Mitigation Measure CUL-1: Prior to start of ground-disturbing activities, the Inglewood Unified School District (District) shall retain a Qualified Archaeologist (defined as meeting the Secretary of the Interior's Professional Qualification Standards for archaeology) to prepare cultural resources sensitivity training for construction personnel. The Qualified Archaeologist, or their designee, shall instruct all onsite construction personnel on the types of archaeological resources that may be encountered and the procedures to follow in the event of an inadvertent discovery of archaeological resources or human remains. The District shall ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.

Mitigation Measure CUL-2: In the event of the unanticipated discovery of archaeological materials, the District or its contractor shall immediately cease all work activities in the area (within approximately 100 feet) of the discovery until it can be evaluated by the Qualified Archaeologist. Construction shall not resume until the Qualified Archaeologist has conferred with the District on the significance of the resource. If it is determined that the discovered archaeological resource constitutes a historical resource or unique archaeological resource pursuant to CEQA, avoidance and preservation in place shall be the preferred manner of mitigation. Preservation in place maintains the important relationship between artifacts and their archaeological context and also serves to avoid conflict with traditional and religious values of groups who may ascribe meaning to the resource. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In the event that preservation in place is determined to be infeasible and data recovery through excavation is the only feasible mitigation available, an Archaeological Resources Data Recovery and Treatment Plan shall be prepared and implemented by the Qualified Archaeologist that provides for the adequate recovery of the scientifically consequential information contained in the archaeological resource. The District shall consult with the appropriate Native American tribal representatives in determining treatment for prehistoric or Native American resources to ensure cultural values ascribed to the resources, beyond those that are scientifically important, are considered. The treatment plan shall include provisions for the final disposition of the recovered resources, which may include onsite reburial, curation at a public, non-profit institution, or donation to a local Native American tribe, school, or historical society.

Mitigation Measure CUL-3: If human remains are encountered unexpectedly during implementation of the Proposed Project, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to PRC Section 5097.98. If the

remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission (NAHC). The NAHC shall then identify the person(s) thought to be the Most Likely Descendent (MLD). The MLD may, with the permission of the land owner, or his or her authorized representative, inspect the site of the discovery of the Native American remains and may recommend to the owner or the person responsible for the excavation work means for treating or disposing, with appropriate dignity, the human remains and any associated grave goods. The MLD shall complete their inspection and make their recommendation within 48 hours of being granted access by the land owner to inspect the discovery. The recommendation may include the scientific removal and nondestructive analysis of human remains and items associated with Native American burials. Upon the discovery of the Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located, is not damaged or disturbed by further development activity until the landowner has discussed and conferred, as prescribed in this mitigation measure, with the MLD regarding their recommendations, if applicable, taking into account the possibility of multiple human remains. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment.

If the NAHC is unable to identify a MLD, or the MLD identified fails to make a recommendation, or the landowner rejects the recommendation of the MLD and the mediation provided for in Subdivision (k) of Section 5097.94, if invoked, fails to provide measures acceptable to the landowner, the landowner or their authorized representative shall inter the human remains and items associated with Native American human remains with appropriate dignity on the facility property in a location not subject to further and future subsurface disturbance.

Monica has successfully completed dozens of cultural resources projects throughout California and the greater southwest, where she assists clients in navigating cultural resources compliance issues in the context of CEQA, NEPA, and Section 106. Monica has extensive experience with archaeological resources, historic buildings and infrastructure, landscapes, and Tribal resources, including Traditional Cultural Properties. Monica manages a staff of cultural resources specialists throughout the region who conduct Phase 1 archaeological/ paleontological and historic architectural surveys, construction monitoring, Native American consultation, archaeological testing and treatment, historic resource significance evaluations, and large-scale data recovery programs. She maintains excellent relationships with agency staff and Tribal representatives. Additionally, Monica manages a general compliance monitoring team who support clients and agencies in ensuring the daily in-field compliance of overall project mitigation measures.

Relevant Experience

County of Los Angeles, Department of Public Works, Rancho Los Amigos South Campus EIR, Downey. CA. *Project Manager*. The County of Los Angeles (County) proposes redevelopment of a portion of the Rancho Los Amigos (RLA) South Campus which is located in the City of Downey. The 74-acre RLA South Campus was the home of the "Los Angeles County Poor Farm" that was established in 1880s to provide room and board to indigent citizens in exchange for agricultural labor, then served as an infirmary and later evolved into a hospital facility in 1932. The RLA South Campus functioned as a major hospital complex from 1956 to the 1990s, when it was abandoned. The RLA South Campus is currently unoccupied and has been designated as the RLA Historic District in the National Register of Historic Places. The County is proposing redevelopment of a 21-acre portion of the RLA South Campus with County uses, including a Sheriff's Station Crime Laboratory, Internal Services Department Headquarters, and Probation Department Headquarters. The project will include supporting parking and installation of utilities and other features on a site that has been abandoned for nearly 30 years. Building demolition and/or repurposing or relocation of existing buildings will be required. ESA is leading the CEQA process on behalf of the County, including preparation of all technical studies in support of a full-scope EIR for the RLA South Campus Project. This includes a Historic District Evaluation, archaeological surveys, traffic, water supply, arborist services, and all other CEQA-required topics. ESA is also serving in an Executive Consultant role to the County, to advise on other potential future projects at the RLA Campus.

County of Los Angeles, Department of Public Works, Arroyo Seco Bike Path Phase I Cultural Resources Evaluation, Los Angeles, CA. *Project Director.* Working for the County of Los Angeles, Department of Public Works in connection with a project to make improvements to the Arroyo Seco Channel, Monica

managed all aspects of Section 106 review in accordance with Caltrans Cultural Resources Environmental guidelines. Monica and her team evaluated the Arroyo Seco Channel, identified character-defining features, informed the design of channel improvements to retain such features, and addressed the channels' potential for eligibility as part of a larger Los Angeles Country water management district. She developed the research strategy, directed the field teams, and prepared cultural resources assessment documentation for approval by Caltrans and FHWA, as well as the cultural resources section for a Mitigated Negative Declaration.

Los Angeles Department of Water and Power La Kretz Innovation Campus, Los Angeles County, CA. *Project Director.* The project involved the rehabilitation of the 61,000-square-foot building located at 518-524 Colyton Street, demolition of the building located at 537-551 Hewitt Street, and construction of an open space public plaza and surface parking lot, and involved compliance with Section 106 of the National Historic Preservation Act and consultation with the California State Historic Preservation Officer. ESA is providing archaeological monitoring and data recovery services and is assisting LADWP with meeting their requirements for Section 106 of the National Historic Preservation Act. Monica is providing oversight to archaeological monitors and crew conducting resource data recovery and laboratory analysis, and is providing guidance to LADWP on meeting Section 106 requirements.

Los Angeles Unified School District (LAUSD) Florence Nightingale Middle School Historic Architectural Review, Los Angeles County, CA. *Cultural Resources Project Director*. Monica managed the historical analysis of the LAUSD Florence Nightingale Middle School. The analysis included a cultural resources survey that photo-documented buildings that would be affected by the project. The project includes HVAC replacement to a 1967 Classroom Buildings, kitchen upgrades within the 1937 Domestic Science/Cafeteria Building, and improvements to the 1965 chiller yard. Florence Nightingale Middle School was previously recommended eligible for listing in the California Register.

Viewpoint School, Tennis Courts and Park, Calabasas, CA. *Cultural Resources Project Director.* ESA is working with the City of Calabasas to prepare an IS/MND to support the development of the proposed Viewpoint School Tennis Courts and Parking Lots project, which includes the development of three sites (Peters, Brown, and Castle Oak) that would become part of the school campus property. Improvements entail installation of six tennis courts (including an accessory building), additional campus parking in three areas, and the renovation of two existing residential structures, one to accommodate offices for school administration and the second to provide a primary residence to the school principal. The project would remove the Peter's property building and appurtenant structures, redevelop the interior of the Castle Oaks property to accommodate the administrative offices, and update the Brown residence to accommodate the principal's primary residence. ESA is preparing three technical studies to support the IS/MND, including air quality, cultural resources, greenhouse gas emissions, and noise. ESA peer reviewed the biological resource reports and traffic study that were prepared to support the document. Monica provided technical and compliance oversight to the cultural resources staff.

AEP AB 52 Tribal Perspective Training presented by the San Manuel Band of Mission Indians and Morongo Band of Mission Indians, 2017

Candace is a cultural resources project manager with 22 years of experience in California. She provides technical and compliance oversight for archaeological survey, evaluation, and treatment; built environment studies, including the documentation and evaluation of buildings, structures, and districts; Tribal resources consultations; and paleontological resources survey and sensitivity assessments. Candace also has experience working with agencies and Tribes to identify Traditional Cultural Properties and tribal cultural resources. She is skilled in the evaluation, analysis of effects, and development of measures to avoid, minimize, or mitigate adverse effects for archaeological, historic, tribal, and paleontological resources under Section 106 and CEQA.

Candace manages multi-disciplinary cultural resources projects and is adept at building teams of specialists that are uniquely qualified for the project at hand. Her project work includes experience in every county in Southern California, as well as many in the Central Coast, Central Valley, and Northern California regions. She is proficient in the areas of CEQA, NEPA, Section 106, and AB 52 compliance, and routinely provides planning and strategic guidance to clients on complex projects within the larger scope of state and federal regulations.

Relevant Experience

California Department of Water Resources, Castaic Dam High Intake Tower Bridge Retrofit Project, Los Angeles County, CA, 2019-2020. *Cultural Resources Project Manager*. Candace managed the preparation of a cultural resources technical study in support of an IS/MND, and participated in AB 52 consultation with California Native American tribes. The consulting tribe identified tribal cultural resources in the project area. Candace worked with the tribe and DWR cultural staff to address tribal concerns and incorporate mitigation designed to reduce impacts to less than significant.

Pajaro Valley Water Management Agency, Watsonville Slough System Managed Aquifer Recharge and Recovery Projects, Santa Cruz County, CA, 2019-2020. *Cultural Resources Project Manager.* Candace is managing the preparation of a cultural resources study in support of the project EIR, including archival research, Native American outreach, survey, and testing. Several significant prehistoric archaeological sites of concern to local Native American tribes are within the vicinity of project elements. Candace is analyzing impacts to these sites as historical resources and tribal cultural resources, and is developing alternatives and mitigation to avoid or reduce impacts pursuant to CEQA.

Los Cerritos Wetlands Restoration Program, Los Angeles and Orange Counties, CA, 2017-2020. *Cultural Resources Project Manager.* Candace managed the preparation of a cultural resources technical study in support of a

Programmatic EIR. The Los Cerritos Wetlands has been identified as a tribal cultural landscape of significance to local California Native American tribes. Candace assisted the lead agency with AB 52 consultation, analyzed potential impacts to historical, archaeological, and tribal cultural resources, and developed mitigation to minimize impacts. The program would restore wetland, transition, and upland habitats throughout the approximately 503-acre Los Cerritos Wetlands Complex.

California Department of Toxic Substances (DTSC), Topock Compressor Station Remediation CEQA Services, Mohave County, AZ and San Bernardino County, CA, 2012-2019. *Cultural Resources Project Manager*. Candace managed the preparation of cultural resources EIR sections analyzing impacts to historical, archaeological and tribal resources. She also assisted with Native American consultation, including participating in field visits and meetings with tribal representatives. The project is located within the Topock Traditional Cultural Property, and the project was highly scrutinized by regional Native American tribes since they attach cultural and religious significance to the area. ESA prepared several CEQA documents in support of the project, tiering off the Program EIR. The project would remediate groundwater and soil contamination caused by hexavalent chromium and other chemicals.

California State Coastal Conservancy, Ballona Wetlands Restoration Project, Los Angeles, CA, 2012-2019. *Archaeologist*. Candace provided support for the cultural resources component of the project, which involved field survey and excavation, archival research, geoarchaeological assessment, SHPO and USACE consultation, and reporting. The area is considered exceptionally sensitive to local Native American groups, requiring extensive consultation and coordination between local tribes, the California Department of Parks and Recreation, and USACE. The Ballona Wetlands once occupied a 2,000-acre expanse of critical coastal habitat and included some of the most diverse wetland habitat types in the Los Angeles Basin. The Ballona Wetlands Restoration EIR/EIS evaluated four alternatives that included the following key elements: ecosystem restoration, flood and stormwater management, public access improvements, infrastructure and utility modifications, a full-scale implementation and restoration program, a state-of-the-art monitoring and adaptive management program, and ongoing operations and maintenance activities.

Pajaro Valley Water Management Agency, Basin Management Plan College Lake Integrated Resources Management Plan EIR, Watsonville, Santa Cruz County, CA, 2017-2019. *Cultural Resources Project Manager.* Candace managed the preparation of cultural resources studies in support of the project, which included archival research, Native American outreach, survey, and monitoring of geotechnical work. She led the field survey and authored the technical report in compliance with Section 106 and CEQA. The project is in an area of known cultural resources sensitivity, and is an area of concern to several Native American tribes. Candace analyzed impacts to historical, archaeological, and tribal cultural resources. The project would consist of a new weir structure and intake pump station, a water treatment plant, and a 5.5-mile-long pipeline to convey treated water to agricultural uses in the Pajaro Valley.

California Department of Water Resources, Lake Perris Seepage Recovery, Riverside County, CA, 2018-2019. *Principal Investigator.* Candace served as Principal Investigator for a Phase I cultural resources study conducted in compliance with CEQA. Tasks included archival research, survey, subsurface archaeological sensitivity assessment, analysis of direct and indirect effects to the National Register-Colorado River Aqueduct, reporting, and preparation of the cultural resources and tribal cultural resources sections of the EIR. The proposed project would collect water that is currently seeping out of Lake Perris through an integrated recovery well system, and then provide the recovered water to the Metropolitan Water District of Southern California.

California Department of Water Resources, Lake Perris Seepage Recovery, Riverside County, CA, 2018-2019. *Principal Investigator.* Candace served as Principal Investigator for a Phase I cultural resources study conducted in compliance with CEQA. Tasks included archival research, survey, subsurface archaeological sensitivity assessment, analysis of direct and indirect effects to the National Register-Colorado River Aqueduct, reporting, and preparation of the cultural resources and tribal cultural resources sections of the EIR. The proposed project would collect water that is currently seeping out of Lake Perris through an integrated recovery well system, and then provide the recovered water to the Metropolitan Water District of Southern California.

California Department of Water Resources, Lake Perris Emergency Release Facility, Riverside County, CA., 2016-2019 *Cultural Resources Project Manager*. Candace managed the preparation of a Phase I cultural resources study and cultural resources EIR section. Tasks included archival research, assistance with Native American outreach, survey, and reporting in compliance with CEQA. The project would modify the existing emergency outlet facility for the Perris Dam and construct a water conveyance facility to connect with the Perris Valley Channel in the event of a need for an emergency drawdown.

California Department of Water Resources, Los Robles Seismic Bridge Retrofit, Los Angeles County, CA, 2018. *Project Manager.* DWR requested that ESA prepare an expedited archaeological resources study for a seismic retrofit of the existing Los Robles Road Bridge at Quail Lake. Candace managed the preparation of the study, which included a records search, historic map and aerial photograph review, geoarchaeological review and sensitivity analysis, pedestrian survey, and technical report. ESA completed the study and delivered the report to DWR within 20 days of the request.

City of Temecula, Cypress Ridge Project EIR, Temecula, CA, 2016-2018. C*ultural Resources Project Manager.* Candace authored the cultural resources and tribal cultural resources sections of the EIR, and assisted with AB 52 consultation. Consultation resulted in the identification of a tribal cultural resource and development of mitigation to reduce impacts to less than significant. The project includes the development 245 detached/attached, cluster, and duplex/triplex units totaling approximately 439,341 square feet, conversion of an existing concrete drainage ditch to an infiltration basin, improvements to Pala Park, and off-site landscape improvements along Pechanga Parkway, and requires a General Plan Amendment, Tentative Tract Map, and zoning change.

Palmdale Water District (PWD) Water System Master Plan EIR, Los Angeles County, CA 2016-2018. *Cultural Resources Project Manager.* Candace managed the cultural resources studies, including the Phase I and Extended Phase I identification efforts. These efforts included archival research, an archaeological sensitivity assessment, field surveys, presence/absence testing, and reporting. Candace assisted PWD with AB 52 consultation with the San Manuel Band of Mission Indians, and coordinating with the San Manuel's CEQA lead. Candace authored the cultural resources and tribal cultural resources chapters of the EIR. The project would evaluate the existing water system deficiencies, future facility requirements, and would serve as a guideline for the planning of the build-out of the PWD's potable water system in the near-term (by 2020) or in the long-term (by 2021 to 2040). The project would involve construction of water system improvements throughout PWD's 47 square mile service area in the City of Palmdale, and outside of PWD boundaries in either the City of Palmdale or unincorporated Los Angeles County, in order to meet potable water system needs.

City of Morro Bay Water Reclamation Facility (WRF) CEQA Plus EIR, Morro Bay, CA, 2015-2018. *Cultural Resources Project Manager.* Candace provided peer review of cultural resources studies and authored the cultural resources and tribal cultural resources sections of the EIR, analyzing impacts to the numerous prehistoric sites in the project vicinity. The City of Morro Bay is proposing to build a WRF at a new inland location. The proposed WRF would provide wastewater treatment services for the City of Morro Bay and provide opportunities for beneficial reuse of advanced treated recycled water, including agricultural irrigation and groundwater replenishment. The proposed project includes all necessary pipeline collection and conveyance infrastructure needed to support the treatment facility. The existing Morro Bay-Cayucos Wastewater Treatment Plant would be decommissioned and replaced by the proposed WRF.

California Department of Water Resources, Pyramid Lake Maintenance, Los Angeles County, CA., 2016-2017. *Principal Investigator.* Candace managed the preparation of a cultural resources study, which included archival research, Native American outreach, field survey, geoarchaeological review, a sensitivity analysis, reporting, and coordination with Angeles National Forest staff. The projects consisted of installing a warning siren at Frenchman's Flat Campground, repairing an existing bathroom at Emigrant Landing swim beach, and revegetating the Los Alamos Campground Loop 4 within the Pyramid Lake area of the Angeles National Forest, requiring compliance with Section 106.

California Department of Water Resources, Castaic Lake Drawdown, Los Angeles County, CA, 2014-2016. *Principal Investigator.* Candace served as Principal Investigator for the project. She developed research questions and survey strategies, participated in the survey, oversaw documentation and evaluation of identified resources, and provided senior review of the report. The project was conducted to comply with mitigation after a drawdown of the water level at Castaic Lake during an extended period of drought in California. Portions of the project were located on lands administered by the Angeles National Forest, U.S. Bureau of Land Management, and California State Parks, requiring permitting and compliance with both State and Federal laws.

Los Angeles Department of Water and Power, Owens Lake Master Project – Cultural Resources Services, Inyo County, CA, 2014-2015. *Cultural Resources Project Manager.* Candace managed the preparation of cultural resources sensitivty maps, which documented archaeological, historical, Native American, and paleontological resources on the Owens Lake bed. Candace also assisted with the development of Cultural Resources Protection Criteria designed to protect sensitive cultural resources during implementation of the Master Project. LADWP is currently working to identify an environmentally sustainable approach to dust control at Owens Lake. LADWP is seeking to avoid impacts to cultural resources by considering their locations during the project development and planning stage.

City of Temecula, Altair Specific Plan EIR, Archaeological Services, Riverside County, CA, 2014-2015. *Principal Investigator.* Candace served as the Principal Investigator for an Archaeological Investigation Report. The study included geoarchaeological review, preparation of a research design, subsurface exploration of impact areas with higher sensitivity for archaeological resources, and preparation of a technical report. She co-authored the cultural resources section of the EIR, which analyzed impacts to the National Register-listed Luiseño Ancestral Origin Landscape Traditional Cultural Property. The project would construct a pedestrian-oriented residential community with up to 1,750 mixed density residential units within walking or cycling distance of Old Town Temecula.

California Department of Water Resources, Pearblossom Solar, Los Angeles County, CA, 2013-2015. *Cultural Resources Project Manager.* Candace managed the preparation of a Phase I cultural resources study for the project. The project includes installation of approximate 70-acres of photovoltaic solar panels. The study resulted in the identification of three historic-period archaeological sites and one historic resource (Pearblossom Pumping Plant complex). The archaeological resources were recommended ineligible for the National Register and California Register. The plant complex is considered a contributing element of the California Aqueduct, a National Register-eligible resource. The study concluded that the project would not cause a substantial adverse change in the significance of the California Aqueduct and no further work was recommended.

California Department of Water Resources, Cantua Creek Stream Group Improvements, Fresno County, CA, 2013-2014. *Project Manager*. Candace managed archaeological, historic, and paleontological resources studies in compliance with Section 106 and CEQA. She led a field survey of an approximate 1,867-acre area and served as the primary report author. The project includes a series of improvements to the San Luis Canal of the California Aqueduct, including raising existing/constructing canal embankments, pump pads, and roadbeds, a new concrete weir, sediment removal, and relocation of existing utilities. The U.S. Bureau of Reclamation and the California Department of Water Resources were the lead agencies.

California Department of Water Resources, Perris Dam Mitigation Area, Riverside County, CA, 2012-2013. *Cultural Resources Project Manager*. Candace managed a Phase I cultural resources study for a proposed biological mitigation area. Tasks included archival research, survey, and reporting. The study

concluded that the area is sensitive for archaeological resources and additional work was recommended. The project includes a creation/restoration program within the Western Riverside County Regional Conservation Authority mitigation area with the purpose of creating/restoring riparian habitat that is biologically equivalent or superior to that which is being impacted as a result of the Perris Dam Remediation Program being carried out at Lake Perris.

California Department of Water Resources, Serrano Beach Project, Los Angeles County, CA, 2012. *Project Manager*. Candace managed a Phase I cultural resources study, including archival research, survey, and report. DWR proposes to repair culverts along the Serrano Beach access road near the Pyramid Lake Vista Del Lago Visitors Center, replacement of a fence surrounding an existing water tank, and installation of a new water pipeline near the Warne Powerplant. The project is located within the Angeles National Forest, requiring compliance with Section 106 of the National Historic Preservation Act.

CERTIFICATIONS/ REGISTRATION

Orange County Certified Archaeologist

Fatima has 12 years of hands-on archaeological experience and is practiced in project management and client and agency coordination. Her field experience is complimented by the course study and participation in numerous archaeological excavations in California, Arizona, and Peru. Fatima has written California Environmental Quality Act (CEQA)-level technical reports, Environmental Impact Report (EIR) sections, Initial Study (IS) sections, archaeological peer reviews, archaeological monitoring reports, and reports pursuant to California Department of Transportation (Caltrans) requirements. She is also experienced in performing archaeological testing, site recordation, laboratory analysis, pedestrian surveys, records searches through several California Historical Resources Information Systems-Information Centers, and monitoring for a wide variety of projects, including mixed-use, residential, and energy, water, and road infrastructure projects. In addition to her archaeology background, Fatima has been cross-trained in conducting paleontological surveys and monitoring and has co-authored and managed associated reports.

Relevant Experience

Hillcrest Real Estate, LLC., Universal Hilton City, Universal City, CA (2020). *Archaeologist*. Fatima was in charge of preparing the Cultural Resources Assessment and EIR section for the project pertaining to CEQA. Fatima also coordinated the preparation of the Paleontological Resources Assessment. The project will include a new 20-story Hotel Expansion Building (with 395 guest rooms and a spa limited to guests and 250 non-guest members) with a new single-level lobby connecting to the Existing Hotel Building. The Project is located near the entrance of Universal Studios.

Irvine Ranch Water District, Syphon Reservoir Improvement Project, Orange County, CA (2018-2019). *Archaeologist.* Fatima was in charge of conducting archival research, pedestrian survey, and served as one of the lead authors of the Cultural Resources Assessment Report, pursuant to CEQA and Section 106. The survey for the study led to the relocation of two previously recorded prehistoric archaeological sites and the recordation of five additional resources, including one prehistoric isolate, one historic-period archaeological resource, and three historic architectural resources.

City of Santa Monica, Miramar Hotel Redevelopment EIR, Santa Monica, CA (2019). *Archaeologist*. Fatima was in charge of conducting archival research and preparing the Phase I Archaeological Resources Assessment for the project pertaining to CEQA. Fatima also coordinated the preparation of the Paleontological Resources Assessment. The project includes adaptive reuse of the historic Palisades Building and replacement of other buildings in order to provide a mixed-use luxury hotel with new food and beverage facilities, open space, spa,

meeting facilities, and retail space, along with residential units on the upper floors of the new buildings.

California Pacific Homes, Oaks at Monte Nido, Santa Monica Mountains, Unincorporated Los Angeles County, CA (2019-2020). *Archaeologist.* Fatima was in charge of conducting archival research, the archaeological and paleontological pedestrian survey, the preparation of the Phase I Archaeological Resources Assessment pertaining to CEQA, and assisted with the preparation of Paleontological Resources Assessment. The pedestrian survey yielded the identification of a sandstone boulder that contains a fossil impression of the skull of a small-toothed cetacean "dolphin" and the identification of fossilized shells of pelecypods (e.g., bivalves such as clams, mussels, oysters, and cockles) and gastropods (e.g., snails and slugs). The project proposes the development of 15 single-family residences on separate individual recorded parcels within the Monte Nido Community, along the scenic route of Piuma Road.

Sandstone Properties, Inc., 11469 Jefferson Hotel Project, Culver City, CA (2019). *Archaeologist.* Fatima was in charge of conducting the archival research, survey, and subsurface sensitivity assessment for archaeological resources. The project is within an area of archaeological sensitivity, and the study identified those areas with a higher likelihood to contain subsurface resources based on a review of environmental, geologic, and historic data. The project would develop a five-story, 175-room boutique hotel with below-grade parking, and would require demolition of existing commercial structures.

California Department of Water Resources, Lake Perris Seepage Recovery, Riverside County, CA (2019). *Archaeologist.* Fatima was in charge of the following tasks: archival research, survey, subsurface archaeological sensitivity assessment, analysis of direct and indirect effects to the National Register-Colorado River Aqueduct, and preparation of the Cultural Resources Assessment Report in compliance with CEQA. The proposed project would collect water that is currently seeping out of Lake Perris through an integrated recovery well system, and then provide the recovered water to the Metropolitan Water District of Southern California.

Los Angeles Department of Water and Power, Manhattan Wellfield On-Site Hypochlorite Generation Station, Los Angeles, CA (2019). *Archaeologist*. Fatima was in charge of preparing the Cultural Resources Assessment Report in compliance with CEQA and Section 106. Tasks included delineation of an Area of Potential Effects (APE), archival research, Native American outreach, desktop geoarchaeological review and subsurface sensitivity assessment, survey, reporting. The project would upgrade the existing chlorination station at Manhattan Wellfield to an on-site hypochlorite.

City of Burbank, Avion Project, Burbank, CA (2018). *Archaeologist.* Fatima was the lead author for the Cultural Resources Assessment Report and prepared the Cultural Resources section for the EIR. The project is a mixed-use development consisting of creative offices, creative industrial, retail, and a hotel located within a 61-acre Project area, which was once developed with the Lockheed-Martin B-6 site.

California Department of Water Resources, Los Robles Road Bridge Seismic Retrofit Project, Quail Lake, Los Angeles County (2018). *Archaeologist.* Fatima conducted the archival research, pedestrian survey and was the lead author for the Archaeological Resources Survey Report for the project, which pertains to CEQA. The project consisted of the seismic retrofitting of the existing Los Robles Road Bridge, which crosses the West Branch of the California Aqueduct.

Los Angeles Unified School District, San Pedro High School Comprehensive Modernization Project, Los Angeles, CA (2017-2018). *Archaeologist*. Fatima was the lead author for the Archaeological and Paleontological Resources report for the project pursuant to CEQA. The project is a site-specific school upgrade and modernization project being completed by the Los Angeles Unified School District under the School Upgrade Program. In addition to writing the report, Fatima was also the lead preparer of the Cultural Resources section of the EIR.

Los Angeles Unified School District, Burroughs Middle School Comprehensive Modernization Project, Los Angeles, CA (2018). *Archaeologist*. Fatima was the lead author for the Archaeological and Paleontological Resources report for the project pursuant to CEQA. The project would include: demolition of the Shop Building, Cafeteria/classroom buildings, and approximately 14 classrooms located in portable (relocatable) buildings; and construction of approximately 34 general and specialty classrooms, support spaces, and a new Food Services Building and Lunch Shelter. The proposed project would also include modernization and seismic retrofits to the Administration/auditorium Building, the Classroom Building, and the Gymnasium Building.

City of Burbank, Town Center Project, Burbank, CA (2018). *Archaeologist.* Fatima was in charge of preparing the Cultural Resources Assessment Report for the project. The Project is a comprehensive redevelopment of the Burbank Town Center property that would introduce a new mix of uses intended to create an integrated urban community atmosphere promoting live, work and play in Downtown Burbank.

California Water Service Company, Palos Verdes Peninsula Water Reliability Project, Palos Verdes Peninsula, CA (2017). *Archaeologist*. Fatima assisted in the preparation of the Phase I Cultural Resources Assessment report, conducted records searches and conducted the pedestrian survey for this project pursuant to Section 106. The project proposed to construct new potable water pipelines and a new booster pump station to improve overall system reliability in the Palos Verdes Peninsula.

Santa Margarita Water District, San Juan Watershed Project, San Juan Capistrano and Dana Point, CA (2017). *Archaeologist.* Fatima was the lead author for the Phase I Cultural Resources Studies for the project compliant with CEQA and Section 106 of the National Historic Preservation Act. Besides being the lead author for the report, Fatima conducted the records searches, pedestrian survey, prepared the Cultural Resources section of the EIR, and conducted

coordination with the Orange County Flood Control District in order to acquire an encroachment permit to conduct the pedestrian survey. The project is to be constructed in multiple phases. The first phase (Phase I) would include installation of three rubber dams and control buildings within San Juan Creek. Subsequent phases include additional dams within San Juan Creek and Arroyo Trabuco, recycled water recharge facilities, and additional upgrades to existing groundwater recovery facilities.

California Department of Transportation, La Costa Chevron, Encinitas, CA (2013-2017). *Project Manager.* Fatima led the archaeological services for the La Costa Chevron Project in Encinitas, which addressed Chevron-created erosion onto a Caltrans right-of-way. Because of the project site's location within a recognized archaeological site, Caltrans required an Extended Phase I (XPI). ESA conducted an XPI archaeological excavation to determine the presence or absence of archaeological deposits (and their horizontal and vertical extent) where the drainage improvements were expected to occur. Managing the company's role as a subcontractor to a larger engineering firm, Fatima coordinated with the prime consultant, the Native American groups in the area, and Caltrans. She was in charge of conducting archaeological testing, served as the primary author of the XPI, prepared the Environmentally Sensitive Area Action Plan and the Historic Resources Compliance Report.

Lennar Homes, Aidlin Property Residential Project, Los Angeles County, CA (2016). *Archaeologist.* Fatima was in charge of preparing the Section 106 report for the project. The proposed project would include the development of 102 single-family dwellings, three parks, the widening of Pico Canyon Road, and associated supporting infrastructure including local roadways, water tanks and a pump station, water quality treatment basins, and an emergency secondary fire access road. The project would also require the grading of natural topography, including slopes in order to remediate existing geologic conditions and to create stable building pads and roadways.

Lennar Homes, Aidlin Property Residential Project, Los Angeles County, CA (2014). *Archaeologist.* Fatima conducted the historical records searches through the CHRIS, pedestrian survey, the preparation of the CEQA cultural resources assessment report. The proposed project consists of a residential development on approximately 230 acres of land in an unincorporated area of Los Angeles County, California.

Southern California Edison, Archaeological Services/Contingent Employee (2008–2013), Southern California, CA. Fatima worked at Southern California Edison (SCE) as a full-time in-house consulting archaeologist in the Deteriorated Poles Program, GO 131-D Program and for the Valley South Subtransmission Project (VSSP). Fatima was in charge of managing work sent to outside consultants for surveys and preparation of archaeological reports and coordinating with consultants and SCE staff. Fatima also conducted over 100 archaeological reviews, including records searches, field surveys, project coordination, report writing for projects subject to the rules and regulations of the California Public Utilities Commission (CPUC) and thus also following CEQA-mandated requirements.

Re: Morningside High School Site Upgrade Project, Los Angeles County

Dear Ms. Clark:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

MORNINGSIDE HIGH SCHOOL SITE UPGRADE PROJECT

Historic Resources Assessment and Impacts Analysis

Executive Summary

Environmental Science Associates (ESA) has been retained by Cordoba Corporation (or Client) to prepare a Historic Resources Assessment (Report) for the proposed Morningside High School Site Upgrade Project (Project). The proposed Project involves improvements to the existing Morningside High School (Project Site or campus), including demolition of 10 buildings and hardscape (including 12 tennis courts and 6 basketball courts) and the construction of a relocated track and football/soccer field, tennis courts, basketball courts, shotput and discus areas, a softball field, and a baseball field. Stadium lighting, electronic scoreboards, and public announcement systems are proposed at the football field, softball field, and baseball field. The Project also includes vehicle and pedestrian circulation improvements, parking lot improvements, utility improvements, and landscape improvements. The focus of this Report is to identify and evaluate whether any significant historical resources are located on the Morningside High School (Morningside HS) campus for compliance with the California Environmental Quality Act (CEQA). The campus is located at 10500 Yukon Avenue South, within the City of Inglewood (City), Los Angeles County (County), California on assessor parcel number (APN) 4030-033-901. The Inglewood School District (District) is the lead agency pursuant to CEQA.

ESA evaluated Morningside HS for potential eligibility for listing in the National Register of Historic Places (National Register) and California Register of Historical Resources (California Register) as a potential historic district. Because the school property is governed by the District, and because the City of Inglewood does not have a preservation ordinance or local landmarks designation program and has not developed criteria for designation, Morningside HS was not evaluated for local eligibility. As a result of ESA's research and survey investigations, the 16 early buildings comprising Morningside HS (Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T) and its surrounding site are recommended eligible as a historic district under National Register Criteria A and C, and California Register Criterion 1 and 3. The period of significance for the potential district is 1950-1956 for its architectural significance and 1962-1969 for its association with significant patterns of history and historic events. The campus retains its integrity from both periods of significance to convey its significant historical and architectural associations, as summarized below.

Under National Register Criterion A and California Register Criterion 1, Morningside HS is associated with the challenges of public-school integration in California and within the City of Inglewood itself. Due to several key events, including the end of discriminatory housing policies, the movement of Black Angelenos to certain parts of Inglewood, and the Watts riots of 1965, the quickly changing racial demographics at the high school similarly reflected the quickly changing racial demographic of the City and its communities alike. The period of significance for Morningside HS's integration ranges from 1962 to 1969, which spans the arc of the first Black students enrolling at the school to the establishment of the Black Student Union, which also largely corresponded with the broader shift in the City's racial demographics.

Under National Register Criterion C and California Register Criterion 3, Morningside HS is eligible as an example of an intact clusterplan Postwar Modern Functionalist School plant that is reflective of a distinctive multiple-building southern California public high school campus, and as a mid-century era high school in the City of Inglewood. Further, the property conveys a strong association with two prominent Los Angeles area master architects, Ralph C. Flewelling and Walter L. Moody Architects, and Balch Bryan Perkins Hutchason, Architects. Based upon this finding of architectural significance, a period of significance has been identified as 1950 to 1956, beginning in 1950 with the construction of the first permanent building began and ending in 1956 when the expansion and second building campaign was completed.

The following 16 buildings contribute to the eligibility of Morningside HS as a historic district under National Register Criteria A and C, and California Register Criteria 1 and 3: Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T and the associated campus landscape are considered contributors to the potential Morningside HS historic district. Therefore, the contributing buildings comprising Morningside HS and associated landscape with covered walkways and playing fields are assigned a California Historic Resources Status Codes of 3D, "Appears eligible for NR as a contributor to a NR eligible district through survey evaluation," and 3CD, "Appears eligible for CR as a contributor to a CR eligible district through a survey evaluation."

Lastly, none of the buildings, landscape elements, or recreational facilities on campus appear to rise to the threshold of individual distinction to be individually eligible for the National Register or California Register on their own historical or architectural merits. However, further research in the future may uncover information on significant historic events that may have taken place in specific buildings or landscape areas within the campus that may require further evaluation.

As the property is considered a historical resource pursuant to CEQA, an impacts analysis for the proposed Project was conducted pursuant to the CEQA Guidelines Title 14, Article 5, Section 15064.5. Under Section 15064.5 (b) (3), a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties (36 CFR Part 68, 1995), shall be considered as mitigated to a level of less than significant impact on the historical resource. Therefore, the proposed Project was also reviewed for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties, specifically, the Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings (Weeks and Grimmer, 1995) (Standards). Since the project is in the concept design stage and final design and full construction plans are not

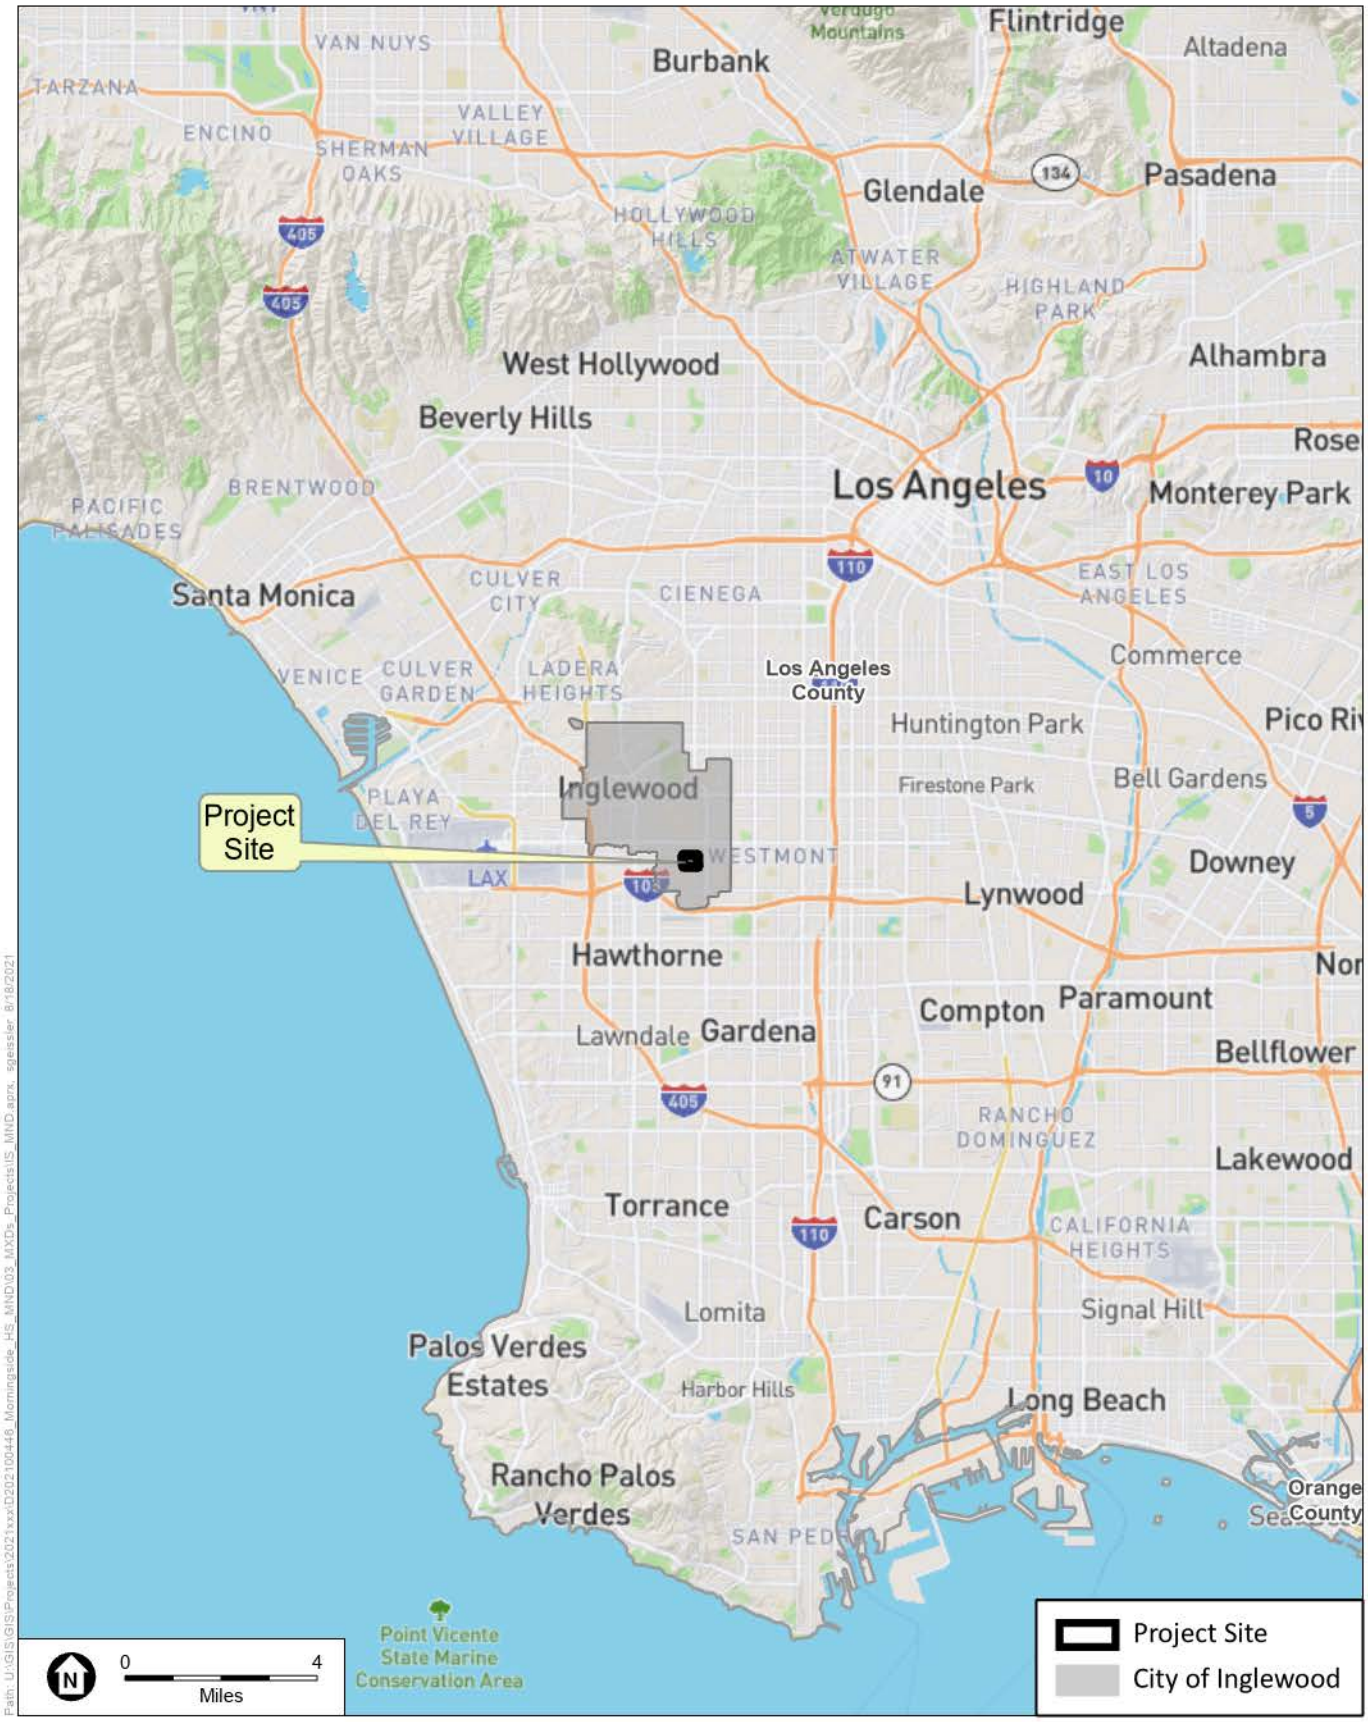
yet available, only a general level of analysis could be performed. Our analysis of the Proposed project found that the Project would have a less than significant impact on historical resources because the majority of the potential historic district (75%) would be retained. There are 16 contributing buildings and the Project would remove four of them. Furthermore, this analysis found that the proposed Project is largely in conformance with the Standards but does not fully conform because of the Project would demolish four contributing school buildings and include tenant improvements in contributing Building U, Auditorium which are part of the potential historic district that is considered a historical resource pursuant to CEQA. In addition, a new Building L would be constructed to replace the existing original Building L. Under the proposed Project, the tenant improvements to Building U, Auditorium may affect some of its character-defining features and could cause an adverse effect to its eligibility as a contributing building in the potential district. Therefore, mitigation measures are recommended to reduce potential impacts to less than significant. It is recommended that once final design and 90-100% construction plans become available for Building U, Auditorium they would be reviewed by a qualified architectural historian for conformance with the Standards. Furthermore, it is recommended that the potential historic district be documented in a recordation report in accordance with the Historic American Building Survey (HABS) guidelines. In addition, for features that would be removed or altered in Building U, Auditorium, it is recommended that they considered for salvage, reuse and/or interpretation, and that an interpretation program such as a permanent on-campus exhibit be developed to preserve the significant history of the school for educational purposes. With these mitigation recommendations incorporated, the proposed Project would have a less than significant impact on historical resources after project completion.

Introduction

Location

Morningside HS is located just south of the community of Morningside Park, in the southeastern portion of the City of Inglewood within Los Angeles County, California. As shown in **Figure 1,** *Regional Location*, the Project Site is located approximately 0.9 mile north of Interstate (I-)105, approximately 1.8 miles east of I-405, and approximately 2.7 miles west of I-110. The entire 16.86-acre campus is considered to constitute the Project Site. The Project Site is located entirely within Assessor's Parcel Number (APN) 4030-033-901.

The Project Site is bounded to the north by West 104th Street, residential homes, and commercial uses. Yukon Avenue South and residential homes are located to the west of the Project Site, with residential homes and West 108th Street to the south. Additionally, Monroe Middle School, Woodworth Imagine Learning Magnet Elementary School, and South 10th Avenue are located to the east of the Project Site, as shown in **Figure 2,** *Project Location*.



Research and Field Methodology

Professionals involved in the preparation of this report are as follows: Margarita Jerabek-Bray, Ph.D. provided senior technical and compliance oversight; and report authors were Alison Garcia Kellar, M.S., senior architectural historian, and Anokhi Varma, M.S., architectural historian. Each of these contributing authors meet the *Secretary of the Interior's Professional Qualification*

Standards in history and architectural history. Ms. Garcia Kellar authored the report under the direction of Dr. Jerabek-Bray. Professional qualifications are provided in **Appendix A**.

The following tasks were performed:

- A pedestrian survey and digital photography was undertaken on August 8, 2021, to document the existing conditions of the campus and the surrounding vicinity.
- Site-specific research on the campus was conducted utilizing building plans, *Los Angeles Times*, Newspapers.com, select Morningside HS yearbooks, the Collection of Inglewood Local History Photographs, the Los Angeles Public Library Photo Collection, and other published sources.
- Review and analysis of ordinances, statutes, regulations, bulletins, and technical materials relating to federal and state, designation assessment processes, and related programs.
- Completion of a historic resource assessment of the potential historic resource based upon criteria used by the National Register and the California Register.
- Review and analysis of the proposed project for compliance with CEQA impacts thresholds pursuant to CEQA Guidelines Title 14, Article 5, Section 15054.5.

Regulatory Framework

Historical resources fall within the jurisdiction of the federal, state, and local designation programs. Federal laws provide the framework for the identification, and in certain instances, protection of historical resources. Additionally, state and local jurisdictions play active roles in the identification, documentation, and protection of such resources within their communities. The National Historic Preservation Act (NHPA) of 1966, as amended and the California Public Resources Code (PRC), Section 5024.1, are the primary federal and state laws and regulations governing the evaluation and significance of historical resources of national, state, regional, and local importance. Descriptions of these relevant laws and regulations are presented below. The City of Inglewood does not have a historic preservation ordinance and does not maintain a local designation program, and therefore the Morningside HS campus was evaluated under federal and state criterion.

Federal

National Historic Preservation Act of 1966

The principal federal law addressing historic properties is the National Historic Preservation Act (NHPA), as amended (54 USC 300101 et seq.), and its implementing regulations (36 CFR Part 800). Section 106 requires a federal agency with jurisdiction over a proposed federal action (referred to as an "undertaking" under the NHPA) to take into account the effects of the undertaking on historic properties, and to provide the Advisory Council on Historic Preservation (ACHP) an opportunity to comment on the undertaking.

The term "historic properties" refers to "any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register" (36 CFR Part 800.16[*l*][1]). The implementing regulations (36 CFR Part 800) describe the process for identifying and evaluating historic properties, assessing the potential adverse effects of federal undertakings on historic properties, and seeking to develop measures to avoid, minimize, or mitigate adverse effects. The Section 106 process does not require the preservation of historic properties; instead, it is a procedural requirement mandating that federal agencies take into account effects to historic properties from an undertaking prior to approval.

The steps of the Section 106 process are accomplished through consultation with the State Historic Preservation Officer (SHPO), federally-recognized Indian tribes, local governments, and other interested parties. The goal of consultation is to identify potentially affected historic properties, assess effects to such properties, and seek ways to avoid, minimize, or mitigate any adverse effects on such properties. The agency also must provide an opportunity for public involvement (36 CFR 800.1[a]). Consultation with Indian tribes regarding issues related to Section 106 and other authorities (such as NEPA and Executive Order No. 13007) must recognize the government-to-government relationship between the Federal government and Indian tribes, as set forth in Executive Order 13175, 65 FR 87249 (Nov. 9, 2000), and Presidential Memorandum of Nov. 5, 2009.

National Register of Historic Places

The National Register was established by the NHPA of 1966, as "an authoritative guide to be used by federal, State, and local governments, private groups and citizens to identify the Nation's historic resources and to indicate what properties should be considered for protection from destruction or impairment" (36 CFR 60.2) (U.S. Department of the Interior 2002). The National Register recognizes a broad range of cultural resources that are significant at the national, state, and local levels and can include districts, buildings, structures, objects, prehistoric archaeological sites, historic-period archaeological sites, traditional cultural properties, and cultural landscapes. As noted above, a resource that is listed in or eligible for listing in the National Register is considered "historic property" under Section 106 of the NHPA.

To be eligible for listing in the National Register, a property must be significant in American history, architecture, archaeology, engineering, or culture. Properties of potential significance must meet one or more of the following four established criteria:

A. Are associated with events that have made a significant contribution to the broad patterns of our history;

B. Are associated with the lives of persons significant in our past;

C. Embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

D. Have yielded, or may be likely to yield, information important in prehistory or history.

In addition to meeting one or more of the criteria of significance, a property must have integrity. Integrity is defined as "the ability of a property to convey its significance" (U.S. Department of the Interior, 2002). The National Register recognizes seven qualities that, in various combinations, define integrity. The seven factors that define integrity are location, design, setting, materials, workmanship, feeling, and association. To retain historic integrity a property must possess several, and usually most, of these seven aspects. Thus, the retention of the specific aspects of integrity is paramount for a property to convey its significance.

Ordinarily religious properties, moved properties, birthplaces or graves, cemeteries, reconstructed properties, commemorative properties, and properties that have achieved significance within the past 50 years are not considered eligible for the National Register unless they meet at least one of the four significance criteria listed above, one of the Criteria Considerations (A-G), in addition to meeting at least one of the and possessing integrity (U.S. Department of the Interior, 2002).

State

California Environmental Quality Act

CEQA is the principal statute governing environmental review of projects occurring in the state and is codified at Public Resources Code (PRC) Section 21000 et seq. CEQA requires lead agencies to determine if a proposed project would have a significant effect on the environment, including significant effects on historical or unique archaeological resources. Under CEQA

(Section 21084.1), a project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

The *CEQA Guidelines* (Title 14 California Code of Regulations [CCR] Section 15064.5) recognize that historical resources include: (1) a resource listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources (California Register); (2) a resource included in a local register of historical resources, as defined in PRC Section 5020.1(k) or identified as significant in a historical resource survey meeting the requirements of PRC Section 5024.1(g); and (3) any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California by the lead agency, provided the lead agency's determination is supported by substantial evidence in light of the whole record. The fact that a resource does not meet the three criteria outlined above does not preclude the lead agency from determining that the resource may be an historical resource as defined in PRC Sections 5020.1(j) or 5024.1.

If a lead agency determines that an archaeological site is a historical resource, the provisions of Section 21084.1 of CEQA and Section 15064.5 of the *CEQA Guidelines* apply. If an archaeological site does not meet the criteria for a historical resource contained in the *CEQA Guidelines*, then the site may be treated in accordance with the provisions of Section 21083, which is as a unique archaeological resource. As defined in Section 21083.2 of CEQA a "unique" archaeological resource is an archaeological artifact, object, or site, about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

- Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information;
- Has a special and particular quality such as being the oldest of its type or the best available example of its type; or,
- Is directly associated with a scientifically recognized important prehistoric or historic event or person.

If an archaeological site meets the criteria for a unique archaeological resource as defined in Section 21083.2, then the site is to be treated in accordance with the provisions of Section 21083.2, which state that if the lead agency determines that a project would have a significant effect on unique archaeological resources, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place (Section 21083.1[a]). If preservation in place is not feasible, mitigation measures shall be required. The *CEQA Guidelines* note that if an archaeological resource is neither a unique archaeological nor a historical resource, the effects of the project on those resources shall not be considered a significant effect on the environment (*CEQA Guidelines* Section 15064.5[c][4]).

A significant effect under CEQA would occur if a project results in a substantial adverse change in the significance of a historical resource as defined in *CEQA Guidelines* Section 15064.5(a).

Substantial adverse change is defined as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of a historical resource would be materially impaired" (*CEQA Guidelines* Section 15064.5[b][1]). According to *CEQA Guidelines* Section 15064.5(b)(2), the significance of a historical resource is materially impaired when a project demolishes or materially alters in an adverse manner those physical characteristics that:

A. Convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register; or

B. Account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in a historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

C. Convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a Lead Agency for purposes of CEQA.

In general, a project that complies with the Secretary of the Interior's Standards (Weeks and Grimer, 1995) is considered to have mitigated its impacts to historical resources to a less-than-significant level (*CEQA Guidelines* Section 15064.5[b][3]).

California Register of Historical Resources

The California Register is "an authoritative listing and guide to be used by State and local agencies, private groups, and citizens in identifying the existing historical resources of the State and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change" (PRC Section 5024.1[a]). The criteria for eligibility for the California Register are based upon National Register criteria (PRC Section 5024.1[b]). Certain resources are determined by the statute to be automatically included in the California Register, including California properties formally determined eligible for, or listed in, the National Register.

To be eligible for the California Register, a prehistoric or historic-period property must be significant at the local, state, and/or federal level under one or more of the following four criteria:

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
2. Is associated with the lives of persons important in our past;
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
4. Has yielded, or may be likely to yield, information important in prehistory or history.

A resource eligible for the California Register must meet one of the criteria of significance described above, and retain enough of its historic character or appearance (integrity) to be recognizable as a historical resource and to convey the reason for its significance. It is possible that a historic resource may not retain sufficient integrity to meet the criteria for listing in the National Register, but it may still be eligible for listing in the California Register.

Additionally, the California Register consists of resources that are listed automatically and those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed on the National Register and those formally determined eligible for the National Register;
- California Registered Historical Landmarks from No. 770 onward; and,
- Those California Points of Historical Interest that have been evaluated by the OHP and have been recommended to the State Historical Commission for inclusion on the California Register.

Other resources that may be nominated to the California Register include:

- Historical resources with a significance rating of Category 3 through 5 (those properties identified as eligible for listing in the National Register, the California Register, and/or a local jurisdiction register);
- Individual historical resources;
- Historical resources contributing to historic districts; and,
- Historical resources designated or listed as local landmarks, or designated under any local ordinance, such as an historic preservation overlay zone.

The City of Inglewood

The City of Inglewood does not have a preservation ordinance; however, the General Plan includes goals for the preservation and reuse of historic resources. The General Plan includes goals for the City's unique districts within the Downtown Transit Oriented District (TOD) area, each with their own unifying character or identity that should be preserved and enhanced: Historic Downtown, Civic Center, TechTown, Beach Avenue, Fairview West, Hillcrest and Queen Street. The General Plan recognizes the Fairview Heights neighborhood as historic and includes goals to preserve its historic character. The General Plan requires the preservation of buildings that have been designated as historic and encourages the reuse of other historic buildings.[1] Further, the Los Angeles Conservancy states:

"The City prepared a historic resource survey in 1998 that focused on Inglewood's downtown area. The "Main Street Inglewood Survey, 1998" surveyed a total of 112 potentially eligible properties that are located within the area bounded by La Brea Avenue to the west, Locust Street to the east, Florence Avenue to the north, and Hillcrest Boulevard to the south. While the City has not commissioned a survey update by professional preservation consultants, the Centinela Valley

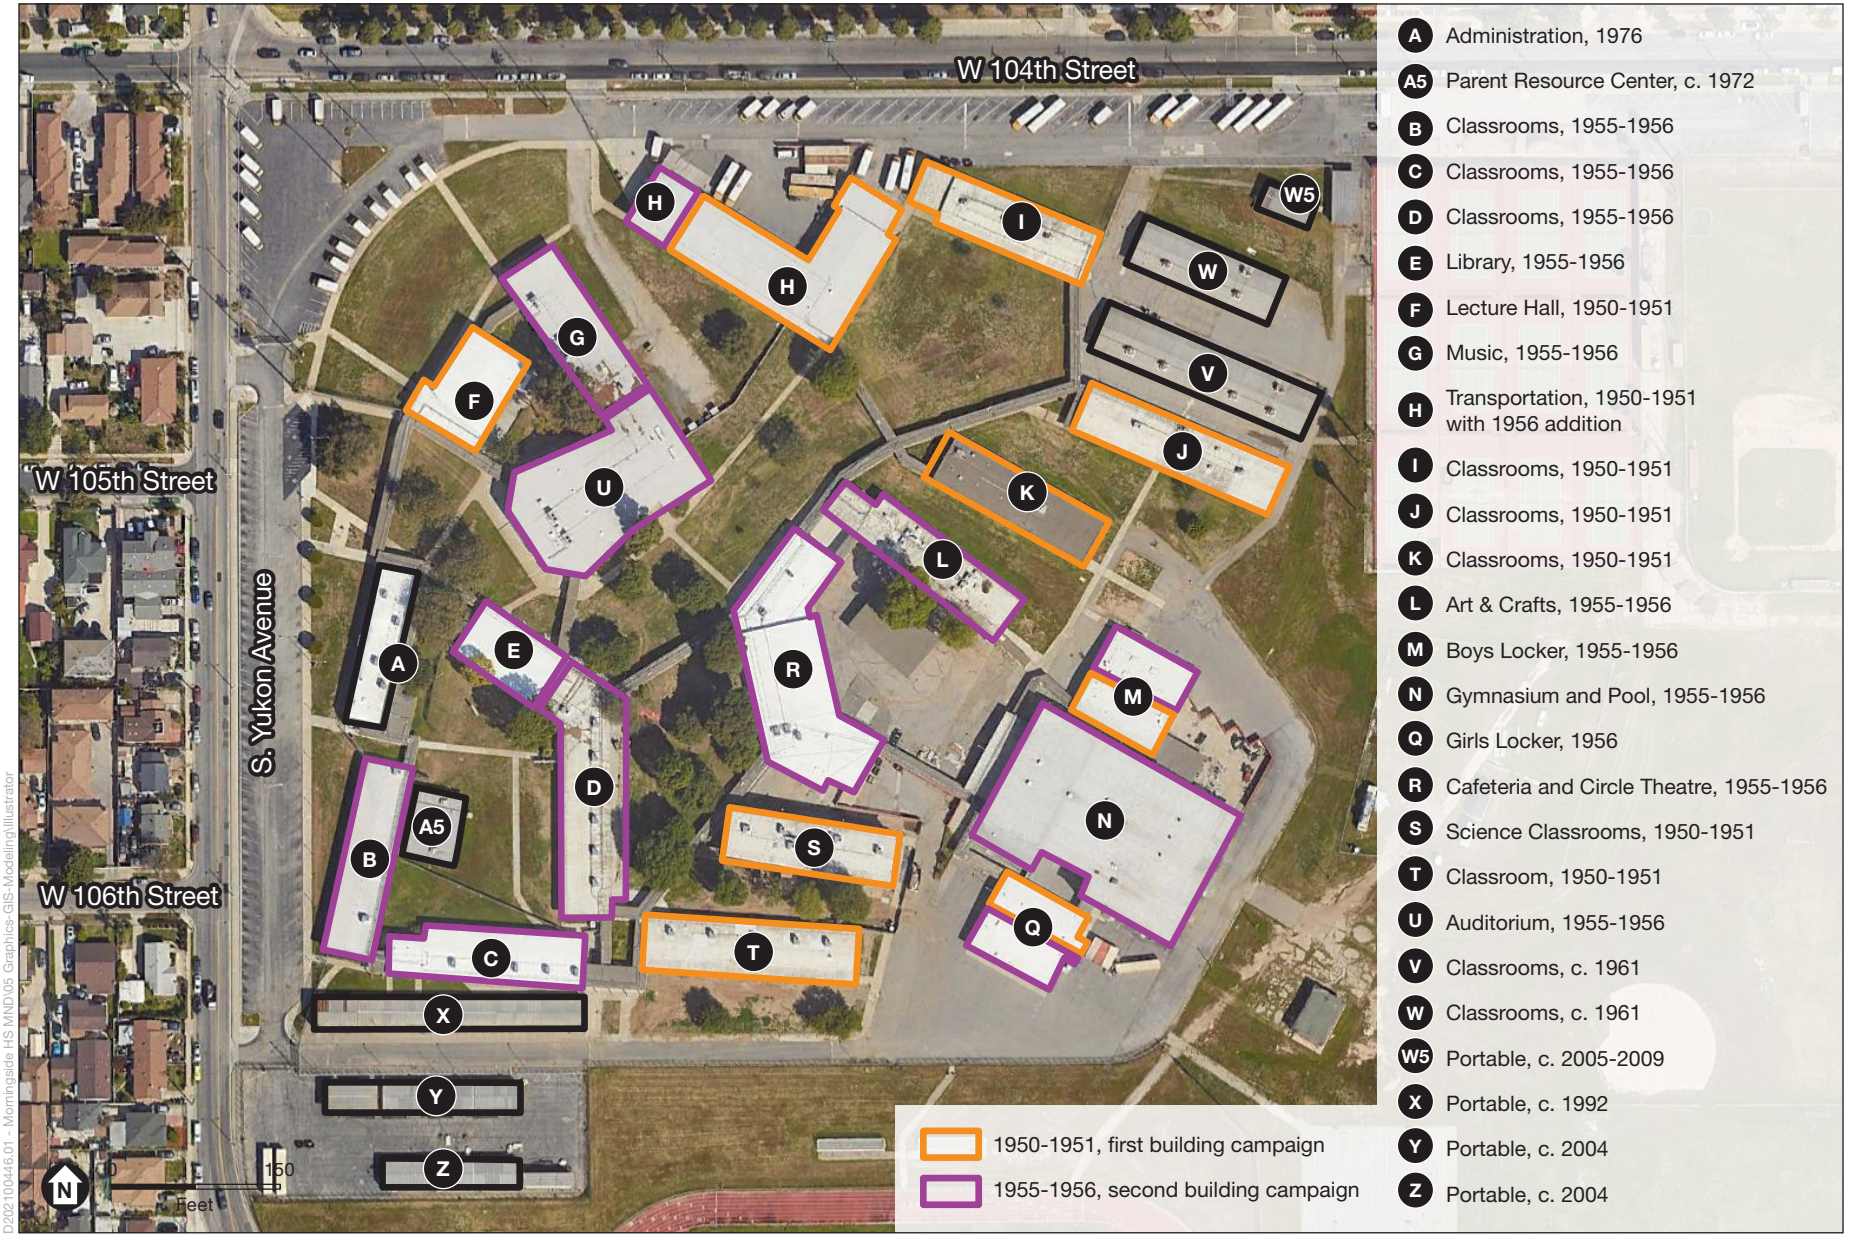
Historical Society is currently preparing a windshield survey of the northwest residential area of the city."[2]

Historic Context

This thematic historic context presents the history of the region and Morningside HS, and was developed to document and support the identification and evaluation of historic architectural resources. Research indicates Morningside HS is associated with the following historical and architectural themes: (1) History of Inglewood: Settlement, Development and Growth (1822-present), (2) Inglewood Unified School District: Early History, Establishment and Expansion (1905-prsesent), (3) Mid-Century Modernism/Regional Modernism (1945-1960): Postwar Modern Functionalist School Plants, and (4) African American Migration Patterns/Communities of South Los Angeles and Inglewood, and Integration at Morningside High School (1962-1969). The Campus buildings configuration and construction dates are shown in **Figure 3**, *Morningside High School Building Site Map.*

The History of Inglewood: Settlement, Development and Growth (1822–Present)



During the rancho period, the area that is now the City of Inglewood was part of the *Rancho Aguaje de la Centinela* and the *Rancho Sausal Redondo*. A year after Mexico gained independence from Spain and control of California in 1822, Los Angeles resident Antonio Avila received a land grant for *Rancho Sausal Redondo* and grazed cattle there as well. The rancho encompassed the areas that are now the Cities of Redondo Beach, Inglewood, Hawthorne, El Segundo, Lawndale, Manhattan Beach and Hermosa Beach. In 1834 Ygnacio Machado, one of the original leather jacket soldiers that escorted settlers to Los Angeles, built the Centinela Adobe. The Centinela Adobe was in the center of what became a 2,200-acre ranch on a portion of the *Rancho Sausal Redondo*. Machado had moved onto what he claimed was still public land, which was granted to him as the *Rancho Aguaje de la Centinela*.

Soon after, Machado traded the *Rancho Aguaje de la Centinela* for a keg of whiskey and a home in the Pueblo of Los Angeles. The property traded hands many times and was eventually acquired by a Scottish nobleman named Robert Burnett, who eventually added the much larger *Rancho Sausal Redondo* to his holdings and once again combined the ranchos. Burnette eventually returned to Scotland and leased the ranch to a Canadian immigrant who was considered by many to be the founding father of Inglewood: Daniel Freemen. In spite of drought and other hardship Freeman successfully farmed barley on the ranch, and purchased it from Burnette with gold in 1885. Freeman went on to become a major land developer in Inglewood.[3]

Centinella Springs (California Historical Landmark 363), or Aguaje de Centinela, was a valued source of spring water for the *Rancho Aguaje de la Centinela* and was described as continuously existing since the Pleistocene Era. The site is still located at the corner of Centinela Avenue and Florence Boulevard.[4]

Excursion trains from Los Angeles brought many prospective land buyers to Inglewood and it was able to grow to 300 residents by 1888. On May 21, 1888, a school opened with 33 students. Around this time, businesses, including Mrs. Belden's Boarding House, two grocery stores, a drug store, a planning mill, a wagon repair shop, a plumbing shop, a livery stable, and five real estate offices, were built on Commercial Street (now La Brea).[5] With a population of about 1,200, Inglewood was incorporated on February 10, 1908.

On the evening of June 21, 1920, a large earthquake struck Inglewood. While there was a lot of damage to buildings, there was no loss of life. The next few days saw a large number of tourists coming to Inglewood to view the damage. The climate impressed the visitors who had previously never been to Inglewood, and many settled there. The population grew to 3,286 in 1920, and in the next two years the population doubled, making Inglewood the fastest growing city in the nation at that time.[6]

The Andrew Bennett Ranch was leased by the City of Los Angeles and converted into Mines Field in 1927, the airport of Los Angeles. National Air Races were held on Mines Field in 1927, and the first passenger flight landed in 1928. In 1929, the Graf Zeppelin (a German hydrogen filed ridged airship) landed on the Mines Field.[7]

The 1932 Olympic Games were held in Los Angeles, and three Inglewood High School alumni won medals. Many buildings in Inglewood were used as training facilities, and the marathon route went through the town.[8] Until World War II, Inglewood had largely been supported by agricultural industry. The defense industries, in response to WWII, transformed Inglewood into an urban community when industrial activities brought more people to live in the city. In 1946, major airlines moved operations to the Los Angeles International Airport (LAX) airport and two new hangers needed to be constructed.[9] In 1949, the airport was designated as an intercontinental air terminal by the federal government.[10]

In 1967, The Forum was opened as the home of the Los Angeles Lakers of the National Basketball Association and the Los Angeles Kings of the National Hockey League. It also hosted a number of events such as concerts, rodeos, boxing, the circus, and ice shows.[11] The Forum underwent a rehabilitation, was listed on the National Register and the California Register, and

reopened in 2014. Additionally, at that time, The Form underwent an adaptation from an arena primarily designed for sporting events to an arena primarily used for music and entertainment events.

In the 1970s, a new health center was built on Manchester, and high-rise office buildings were constructed on La Brea. A new civic center was dedicated in 1973. Airport Park View Motel opened between Hollywood Park Race Track and The Forum.[12] Many senior housing developments were also built in Inglewood during the 1970s.

More recent developments include the closure of the Hollywood Park Race Track, in 2013, and demolition of the track in 2016. A new NFL stadium, the SoFi Stadium, is part of a new 298-mixed-use development in Inglewood that includes commercial office space, retail, a hotel, residential units and outdoor parks was recently constructed and is now in operation.[13] The stadium is home to the Los Angeles Chargers and the Los Angeles Rams, and recently hosted Super Bowl LVI and will host the Opening and Closing Ceremonies of the Olympic Games in 2028.

Inglewood Unified School District: Early History, Establishment and Expansion (1905–Present)

Originally, the Inglewood Union High School District was separate from the Inglewood School District.[14] The Inglewood Union High School District began in 1905 and its territory included all of Inglewood, Jefferson (later Lennox), Hawthorne, Lawndale, Hyde Park, El Segundo, and the Wiseburn School District.[15] El Segundo withdrew from the Inglewood Union High School District on November 22, 1925, and formed the El Segundo High School District.

The Inglewood Union High School District's name was changed to the Centinela Valley Union High School District in November of 1944. Roughly ten years later, in July of 1954, Inglewood's two high schools - Inglewood High School and Morningside High School - withdrew from the Centinela Valley Union High School District and formed the Inglewood Unified School District.[16] This establishment may have been the result of the post-World War II population boom, as a similar pattern of expansion was evident within the Los Angeles City school districts with the formation of the nearby Los Angeles Unified School District by 1960, during the same period.[17]

The Centinela Valley Union High School District still exists today, and is presently a component of the El Camino Community College District.[18] Today, the Inglewood Unified School District is

comprised of five elementary schools, seven transitional kindergarten to 8th grade schools (TK-8), one middle school, four high schools, and an adult school.[19]

Mid-Century Modernism/Regional Modernism (1945–1960): Postwar Modern Functionalist Schools

The Morningside HS campus was designed and constructed in two building campaigns, the first designed by Ralph C. Flewelling and Walter L. Moody Architects between 1950 and 1951; and the second designed by Balch, Bryan, Perkins and Hutchason, Architects between 1955 and 1956. As identified in the Los Angeles Unified School District context, the Mid-Century Modernism, or Regional Modernism style was discussed as follows:

> Mid-Century Modernism, or Regional Modernism, represents a middle ground between the formal, machine-age aesthetic of the International Style and a regional idiom reflecting local precedent and identity. In the postwar period through the 1960s, as practiced in Southern California, Mid-Century Modernism took its cues from the region's first-generation modernist architects such as Richard Neutra, Rudolph Schindler, Gregory Ain, Frank Lloyd Wright, and Harwell Hamilton Harris. In the postwar period, second-generation practitioners such as Raphael Soriano, Whitney Smith, and A. Quincy Jones, among many others, established Los Angeles as a center for innovative architectural design and culture.
>
> Mid-Century Modernism is characterized by an honest expression of structure and function, with little applied ornament. Aesthetic effect is achieved through an asymmetrical but balanced, rhythmic design composition, often expressed in modular post-and-beam construction. Whether wood or steel, post-and-beam construction allowed for open floor plans, ease of expansion, and generous expanses of glazing to heighten indoor-outdoor integration. Infill panels of wood or glass are common, with glazing often extending to the gable. Buildings are generally one to two-stories, with an emphasis on simple, geometric forms. Capped with low-pitched gabled or flat roofs, a Mid-Century Modern building often displays wide eaves and cantilevered canopies, supported on spider-leg or post supports. Sheathing materials vary, with wood, stucco, brick and stone, or steel-framing and glass. Windows are generally flush-mounted, with metal frames.
>
> This style was seen in postwar institutional and commercial buildings, as well as residences, from 1945 until circa 1975, when Title 24 restrictions on the use of glass curtailed the expansive glazing that characterizes the style. Typical Character-Defining Features:
>
> - Horizontal design composition and massing; generally one to two stories
> - Simple, geometric volumes
> - Flat or shed roof, often with wide, cantilevered overhangs
> - Exterior materials include stucco, brick, or concrete

[19] Inglewood Unified School District, "About Us: Our Schools," Inglewood Unified School District website, inglewoodusd.com/apps/pages/index, accessed April 4, 2022.

- Modular design and planning
- Aesthetic qualities derive from use of simply treated materials and excellent craftsmanship
- Direct expression of structural systems, often in wood or steel post-and-beam
- Lack of historicizing ornament
- Generous expanses of fenestration, including bands of grouped multi-light windows
- Extensive use of sheltered exterior corridors, with flat or slightly sloped roofs supported by posts, piers, or pipe columns[20]

The Postwar Modern Functionalist School Plant, 1945–1969

With the construction of the second building campaign (1955-1956) designed by Balch Bryan Perkins and Hutchason, Architects the campus was considered to be a "complete school plant" with the addition of several classrooms in addition to key buildings, such as Building E, Library; Building N, Gymnasium and Pool; Building R, Cafeteria and Circle Theatre; and Building U, Auditorium.[21] As identified in the Los Angeles Unified School District context, Postwar Modern Functionalist School Plant, 1945–1969 theme was discussed as follows:

> By the 1950s, many of the design ideas considered experimental in the 1930s had matured and become the national standard for schools. Stylistically, schools might include some historicist detailing reflecting popular styles (such as Colonial Revival). But, overall, a unified campus design, building types and plans that accommodated a high degree of indoor-outdoor integration, ample outdoor spaces, and sheltered corridors marked the typology as the mature version of the functionalist school plant. The priority remained the creation of a domestic scale for schools. Campuses displayed a one-story massing for elementary schools, and up to two stories for middle and high schools. Site plans, which often featured a decentralized, pavilion-like layout, lacked the formality and monumentality that characterized earlier eras of school design.
>
> School types expressive of these ideals include the finger-plan (1940s–1950s) and clusterplan (1950s), and variations on their basic themes. Combinations of these basic forms, which flexed according to available lot size and school enrollment, are also evident.
>
> For LAUSD, the postwar years brought another round of reform as well as unprecedented expansion. Given the postwar classroom shortage, many campuses were constructed quickly, from standardized plans used districtwide, in designs that convey some of these ideas. The most intact and well-designed campuses among these, though, uniquely represent this era of reform and the midcentury modern school.[22]

African American Migration Patterns/Communities of South Los Angeles and Inglewood, and Integration at Morningside High School (1962–1969)

Noting the change in racial demographics at Morningside HS is an important part of the school's history. The African American migration patterns in Los Angeles and moreover Inglewood, coupled with District-wide efforts to desegregate the City's schools transformed the high school's student body within a period of about 10 years.

Discriminatory housing covenants, which are contractual agreements that prohibit the lease, purchase, or occupation of a piece of property based on race, prevented Black residents from inhabiting many Los Angeles neighborhoods as early as 1902. An 1892 California Supreme Court case ruled that although state and municipal governments could not prohibit someone from buying property based on their race, individual property owners were free to racially discriminate when entering into residential contracts with a potential buyer. This court decision provided the foundation for the first racially motivated covenant filed in Los Angeles in 1902. Concurrently, the Los Angeles Realty Board campaigned to include racially restrictive land covenants on as many new developments in the city as possible. These covenants could be so severe that the deed title could revert to the original owner if the covenant was broken even if the property had already been sold multiple times.[23]

Where Black Angelenos settled was also influenced by federal policy. In 1934, the National Housing Act was passed, which allowed the Federal Housing Authority (FHA) to commission the Home Owners Loan Corporation to survey neighborhoods across America and rank them from "A" to "D" on a scale of "desirable" to "least desirable." Those neighborhoods that were given a rating of "A" were colored green while those given a ranking of "D" were colored red, indicating that those neighborhoods were considered a higher loan risk. The "D" rated neighborhoods were overwhelmingly those whose residents were predominately non-white. This practice was called redlining and it made it impossible for a person of color to live in a green zone or get an FHA backed loan in a red area, enshrining housing inequality into federal and economic policy.[24] As a result of redlining, those contractors who wanted to build new homes in redlined neighborhoods could not get FHA insured loans, which only funded new construction. The result of this policy was to "doom urban neighborhoods with escalating African American populations to decline in promoting all-white suburban neighborhoods."[25]

During the 1930s period, the population of Los Angeles, especially the number of Black residents in the city, boomed. African Americans were able to settle in Jefferson Park and West Adams, and even further west to the Crenshaw, Leimert Park, and Baldwin Hills neighborhoods.[26] In the 1930s, the Black population of the Central Avenue corridor grew 39.2%, due in part to the

26 Ibid., 32.

expansive nature of discriminatory housing covenants.[27] Despite overt threats of violence and systemic discrimination, Black Angelenos still led the nation in initiating lawsuits to eliminate racially restrictive covenants into the 1930s.[28]

The post-World War II period saw another substantial increase in Los Angeles' Black population due to an increased demand for labor in the war industry. At this time, Black Angelenos were largely moving into neighborhoods adjoining the Central Avenue corridor, yet due to limitations on where they could reside, conditions of the corridor deteriorated rapidly due to overcrowding and disinvestment.[29] Simultaneously, the influx of new Black migrants moving to Los Angeles settled in the same area which was already "overcrowded… [and] poorly serviced by the City."[30]

This period also saw substantial legal victories for Black Angelenos that began to pave the way for more equitable residential settlement. While the effects of redlining and racial covenants continue to impact urban development to this day, the Supreme Court declared housing covenants unconstitutional through two court cases in 1948 and in 1953, finally allowing for more fluid residential mobility for African Americans in Los Angeles.[31] As a result, gradually through the 1950s, the southern portion of Los Angeles, from Watts and westward to Inglewood and the Crenshaw District, became increasingly African American.[32] The school's racial demographics also changed quickly in the subsequent years, as White neighbors in Morningside Park Neighborhood began to leave in large numbers while the Watts riots of 1965 motivated middle-class Blacks to move further west. Professor Josh Sides wrote that "As the 1950s gave way to the early 1960s, neighborhoods were desegregated, and several of the leading Black churches were beginning to wield political influence in civic affairs." Notably, African Americans had transformed their status in Los Angeles by the early 1960s, as "Their protests were widespread, their demands were well known, and their political influence — if still uneven — was undeniable. Most important, African Americans participated in daily urban life in ways that would have been impossible two decades earlier."[33]

In the fifty years that followed the lifting of housing restrictions, middle-class African Americans continued to move out of previously inhabited neighborhoods and into other areas, including Compton. More affluent Black residents, now unrestricted by covenants, left the Central Avenue corridor and South Central Los Angeles. Neighborhood demographic information indicates that the Corridor remained home to residents with less economic security and more barriers to higher education than those who left.[34] It is during the 1960s that the last large exodus of African Americans from the American South was occurring, which was part of a nation-wide

34 "SurveyLA Citywide Historic Context Statement: African American History of Los Angeles," 33.

phenomenon called the "Great Migration" (1910-1970) during which Black Americans moved from southern states to the north, Midwest, and west in great numbers to escape Jim Crow and find economic opportunities. The African American migrant population in Los Angeles grew by more than 50% during the 1960s, which occurred while there was increasing competition for remaining manufacturing work by new immigrants from Latin America and Asia.[35] Civil unrest in 1965 due to economic structural changes to the community encouraged remaining white families, and Black residents who could afford it, to move out of the older South Los Angeles neighborhoods.[36] Inglewood's reputation as a primarily African American community occurred after the Watts Riots in 1965, at a time when Black residents from south Los Angeles sought new beginnings in what had been a predominantly white suburb which sat just outside the formerly middle class beach communities along the Santa Monica Bay.[37]

In the 1960s and 70s, cities like Inglewood, Carson, and Gardena, and in the San Fernando Valley, and even more distant areas and counties became destinations where middle class Black residents could gain further occupational opportunities and income.[38] Inglewood experienced a period of growth during this period, and took on a more metropolitan look, with new commercial high-rise buildings and a modern civic center.[39] By the 1990s the hindrances to pursue the California Dream of suburban residency and employment for African Americans had substantially dissipated due to the successions of events from the 1940s to 1960s - beginning with legal victories related to housing covenants and employment discrimination coupled with the growth of fair housing organizations across the country.[40] While the 1960 census recorded only 29 Black residents among Inglewood's 63,390 total residents, the Black population climbed to 11.2% by 1970 and then skyrocketed to 56% by 1980 before it fell back to about 51.8% in 1990.[41] By the 2010 census, Inglewood was and remains around 50.6% Latino, while the Black population shrank to 46%, and further to under 41% by 2021.[42]

Integration at Morningside High School, 1962–1969

Racial discrimination and segregation in housing were reflected in the demographics of schools in southern California throughout the early 20th century.[43]As the City of Inglewood and the Inglewood Unified School District do not have developed historic context statements, the following information regarding the Civil Rights Movement and how it affected the Los Angeles Unified School District (LAUSD) is included for its relevance due to the LAUSD's physical proximity to the Inglewood Unified School District and are therefore parallel movements. Further, the two districts experienced the challenges of integration at the same time, as

restrictions regarding discriminatory housing policies were deemed illegal nationally in the 1960s. Regarding the LAUSD and the Civil Rights Movement theme as discussed in the LAUSD's historic context statement:

> This theme of significance begins with the filing of the landmark U.S. Supreme Court case Brown v. The Board of Education, Topeka, Kansas. Although Brown v. Board of Education addressed state laws that did not exist in California—namely, laws allowing for racially segregated public schools—this case and the Civil Rights Movement helped generate and focus attention on related issues in Los Angeles. Issues touched on racial division and cultural identity, equal access, and how to create more balance and diversity in public schools. Signaling the end of this period of significance is the U.S. Supreme Court decision effectively ending mandatory school busing as a solution to racial imbalance in California's public schools. Although this issue continued to form part of the social context for LAUSD, this period captures an era of intense debate and activism on the part of community members, parents, politicians and jurists, as well as teachers and administrators.[44]

By the 1960 U.S. Federal Census, Inglewood did not have any Black residents.[45] Inglewood was then still largely divided along racial lines along Prairie Avenue.[46] While a series of state and federal laws made housing discrimination illegal, the City of Inglewood became truly integrated after the 1965 Watts riots after which middle-class Blacks moved farther west in search of a place to collectively lay down community roots.[47] By 1967, Black Inglewood residents were primarily living in the Morningside Park neighborhood, adjacent to campus, and almost all Blacks in the City were living east of Prairie Avenue. [48]

In 1962, the first three Black students enrolled at Morningside HS, which had been previously all white.[49] Integration at Morningside HS proved to be exceptionally challenging for students, teachers, and the District - and each of these groups were involved in dedicated attempts to ease racial tensions during this difficult transitional period. By 1966, a summary of a recent parent teachers association meeting was published in a local newspaper - in which Inglewood Unified School District teachers attended in order to discuss human relation and ethnic assimilation at the local schools.[50] Later that year, a panel was held at Morningside HS where between 200 and 250 Black students and an undisclosed number of white students were in attendance to discuss challenges with integration. According to all of the panelists, "The main problem…is a lack of communication between student leaders and troublemakers." [51] By 1967, Morningside HS had a 17% Black student population, and an overall 25.9% combined minority student population.[52] In 1968, an advisory report was created for the Inglewood Unified School District's Board of

Education, in order to discuss "pupil distribution,…educational opportunity and intergroup relations as indicators of inequality, the 'color blind' vs 'color conscious' issue, a survey of staff attitudes and staff training and sensitivity."[53] Other sections were devoted to community relations and way of improving racial balance, with recommendations were included. After several months of debate, in 1969, a Black Student Union had been formed at the school, where all students were given a forum to discuss racial tensions and mediation. Students had a platform to discuss racial issues and concerns among themselves, by getting to know one another.[54]

Beginning in 1970, students were bused within the Inglewood Unified School District in order to achieve racial balance in the schools.[55] Director of urban affairs for the District, Deweylene Fields, was responsible for developing programs that would promote District integration, which she defined "as bringing children together and easing racial tension."[56] Fields noted that "Our job is to provide programs that enhance busing by working more with kids and not being concerned with the views of the citizens," with the goal of bringing about integration, rather than desegregation which mandated that children of differing races should attend school together.[57] Morningside HS was mostly Black by this time, and by the end of the 1973 school year, several student-led organizations, including pep squads, the student council and cheerleading squads, had become integrated with Fields noting, "the kids worked it out."[58] Bussing ended in the District in 1977.[59]

There were many court cases in the 1960s and 1980s period related to integration plans and mandatory bussing, among other topics related school desegregation across the country, and throughout southern California. According to the LAUSD historic context statement, the issues of "racial imbalance, cultural sensitivity in hiring practices and curricula, and encouraging diversity continued to shape the local - and state- level conversations about public schools through the 1960s, into the 1980s, and beyond…In this way, civil rights, ethnic identity, culture, and equal access shaped the sociopolitical context for school districts such as LAUSD in this period."[60]

Student ethnic demographics slowly started to shift and by 1991, Morningside HS was about half African American and half Latino. This transition in racial demographics prompted new concerns and discussions at the school and throughout the District, as student stereotypes and cultural norms between among differing ethnic groups were at times at odds both at school and within the larger Los Angeles County community. In 1993, student-led discussions were promoted by the County Department of Mental Health's $8.3 million efforts to help students process what happened after the 1992 Los Angeles riots, where large-scale burning and looting occurred in

response to the racially motivated profiling and beating of a young black man, Rodney King, by Los Angeles police.[61] In an effort to prevent something similar from happening again, the County sent counselors to local schools, including Morningside HS, to "coax discussions about racism's subtle effects and resentments simmering."[62] A "student forum" was held where Morningside HS administrators encouraged teacher and students to come up with their own solutions. During this period, roughly 60 students met regularly to discuss racial relations openly; while Morningside HS teachers met to discuss organizing events to familiarize students with traditions from a variety of cultures that might otherwise be ignored, in an effort to garner mutual understanding and compassion.[63]

Archival Research

South Central Coastal Information Center Records Search

A cultural resources records search was conducted at the South Central Coastal Information Center (SCCIC) at California State University, Fullerton on August 13, 2021. The records search included the Morningside HS campus and a 0.5-mile radius. The SCCIC houses the pertinent archaeological and historic site and survey information necessary to determine whether cultural resources are known to exist within the project area. The records search included a review of all recorded historic built environment sites and the California Historical Resources Information System (CHRIS), which includes the National Register, the California Register, California Historical Landmarks and California Points of Historical Interest. The City of Inglewood does not have a historic preservation ordinance and does not maintain a local designation program.

The results of the records search indicate one (1) structure appears to be within a half-mile radius of Morningside HS, which are presented in **Table 1**. Due to the sensitive nature of archaeological resources, locational information is not disclosed within the body of this document. The records search results information is included in **Confidential Appendix C.**

Previous Evaluations of Morningside High School

Morningside HS has not been previously evaluated for historical significance. The property it is not listed in the State of California Built Environment Resource Directory (BERD) for the County of Los Angeles. Morningside HS is not listed in the National or California Registers, or locally designated as a County of Los Angeles Historical Landmark. The campus does not appear to be situated in a designated historic district.

Previously Recorded Cultural Resources

A records search for the proposed project was conducted by ESA staff on December 14, 2022, through the California Built Environment Resources Database (BERD). The BERD replaces the former Historic Properties Directory (HPD) that previously provided evaluation status information for resources processed through the OHP. The records search included a review of all previously documented historic architectural resources and studies within a 0.5-mile radius of the Project.

The BERD record search showed eleven historical architectural resources that have been previously recorded within a 0.5-mile radius of the Project Site (**Table 2**). However, nine of the properties identified in the BERD have an assigned California Historical Resource Status Code of 6Y, which indicates that the properties were "Determined ineligible for NR by consensus through Section 106 process – Not evaluated for CR or local listing," while two properties has a status code of 7R indicating that it was "Identified in Reconnaissance Level Survey or in an Area of Potential Effect (APE): Not evaluated" (Resource Status Code). None of these properties have not been formally evaluated for the California Register. The Proposed Project would not be visible from the eleven historical architectural resources because of intervening development and would not cause any physical visual impacts to them.

Potentially Eligible Historic Resources

The following three potentially eligible properties were identified in ESA's windshield survey of the surrounding area, and are located within 0.5 miles of the Project Site. They have not been previously identified in a historic survey and are not included in the BERD.

10701 S. 10th Avenue, Los Angeles County Fire Department City of Inglewood Fire Station 170

The Los Angeles County Fire Department City of Inglewood Fire Station #170, located at 10701 S. 10th Avenue, is a one-story fire station constructed in 1956.[64] Located approximately 0.43 miles southeast of the Project Site, the property has not been identified in a previous survey and is not included in the BERD. Designed by Pasadena architect Marion J. Varner, the new 4,000 square-foot fire station was constructed "because of expanded residential, business and industrial construction in the city."[65] Mid-Century Modern in style, the precast concrete paneled structure included electric aluminum doors, an equipment room, dormitory, shop, office, lobby, chief's room, locker and shower rooms, kitchen combination dining-recreation-classroom and a hose-drying tower.[66] The building may be potentially significant as a civic structure that contributes to the City of Inglewood's rapid growth in the post-World War II era, and for its Mid-Century Modern architectural style. The fire station building at 10701 S. 10th Avenue would have no view of the Project Site to the northwest.

3620 W. 102nd Street, Aku Aku Polynesian

According to the Los Angeles County Assessor's Office website, the Hollywood Point Apartment building, located at 3620 W. 102nd Street, is a two-story multi-family apartment building constructed in 1965. Located approximately 0.14 miles northwest of the project site, the property has not been identified in a previous survey and is not included in the BERD. Originally known as the Aku Aku Polynesian, the themed apartment building was marketed in *The Los Angeles Times* as "A Polynesian Paradise," and was touted for having a tropical garden with a Tiki rope bridge, and as "one of the most exciting innovations of plush living ever designed."[67] The

64 "Start of New Fire Station in Inglewood Set," *The Los Angeles Times*, May 6, 1956.

building was soundproofed and completely furnished with built-ins and drapes.[68] Residential amenities included a large pool, men's and women's sauna and bath, an underground recreation room and a pool table. The building may be potentially significant as an example of mid-century themed roadside architecture as applied to a multi-family apartment building in the City of Inglewood. The apartment building at 3620 W. 102nd Street would have no view of the Project Site to the southeast.

3921 and 3947 W. 104th Street, Lockhaven Christian School

The Inglewood Southside Christian Church complex, located at 3921 and 3947 W. 10th Street, is a multi-building property including a church, community center building and a parking lot with landscaped areas. According to the Los Angeles County Assessor's Office website, the complex was originally constructed in 1951 with additions constructed in 1956 and 1966. Located approximately 0.48 miles west of the project site, the property has not been identified in a previous survey and is not included in the BERD. Originally known as the Lockhaven Christian School, the school was founded in 1949 and was one of the first full-time schools of the Christian Church in California.[69] Today, the complex is operated by the Inglewood Southside Christian Church. The complex may be potentially significant for its association with mid-century patterns of development and as a community center in the City of Inglewood. The Inglewood Southside Christian Church complex would have no view of the Project Site to the southeast.

Woodworth Elementary School

ESA documented and evaluated the Woodworth Elementary School campus for historic significance and determined that the property does not appear eligible as a historic resource pursuant to CEQA (**Appendix G**).

Additional Research

Additional site-specific research was conducted on Morningside HS utilizing the following sources: City directories, plans and aerial photographs, historical photographs and articles from historical *The Los Angeles Times, Star Tribune, Evening Vanguard* newspapers, the Los Angeles County Assessor website, and other published sources. Research was conducted at the Morningside HS campus library, inside Building E, Library and with the Inglewood Public Library.

Historic maps and aerial photographs were examined to provide historical information about Morningside HS and the land uses surrounding the campus. Historic aerial photographs taken in 1928, 1934, 1941, 1956, and 1971 were examined. There are no Sanborn Maps that cover this portion of Inglewood.

Original architectural drawings obtained from the District provide a construction history of Morningside HS from 1950 to 2020 and were essential in preparing the construction history context for Morningside HS. A summary of the early architectural drawings on file at the District

68 "Advertisement: Just Completed- Award Winning Polynesian Paradise Aku Aku," *The Los Angeles Times*, December 11, 1965.

69 "Lockhaven Christian School Founder Dies in Oklahoma," *The Los Angeles Times*, February 28, 1982.

are compiled in **Table 3**. There were no building permits available for the campus; however, all pertinent historic building plans available for the campus are included as **Appendix D**. The earliest plan on file dated to 1950, was for a single Building H, which was part of the campus' first building campaign, which was constructed between 1950 and 1951.

Morningside High School Establishment and Construction History

Prior to the original construction of the Morningside HS, the land was largely undeveloped with farmed fields encompassing the majority of the future campus parcel, with modest homesteads lining present-day West 104th Street by 1941 (**Figure 3**). The population boom that the Inglewood area experienced following the end of World War II paralleled similar patterns of growth around the nation and in neighboring Los Angeles, which have been well documented.[70] In 1955, editors at the *Architectural Forum* magazine noted that the rapidly increasing population of school-aged children had made school construction, along with housing, the most widely discussed architectural challenge following the war. The City of Inglewood was no exception to this pattern of growth.

Originally part of the Centinela Valley High School District, planning for Morningside HS in began in 1949, with construction commencing the following year. The construction contract was awarded to the Crown Construction Company. Prior to construction of the Morningside HS campus, which was then referred to as a "complete school plant," costs were estimated to be $3,000,000.[71] As initially intended, Morningside HS was to consist of "two units on one campus to split a large student body into separate, self-sustaining units." [72] According to superintendent H. Fred Heisner, "the ideal high school contains 1,000 students, but conditions require these schools to have as many as 2,5000 [students]," which indicates that Morningside HS was initially

70 "Los Angeles Unified School District: Historic Context Statement, 1870 to 1969," 71.

71 "Contract Awarded for High School," *The Los Angeles Times*, September 29, 1950; and "Centinela Plans to Split High School Campus," *The Los Angeles Times*, November 21, 1949.

72 "Centinela Plans to Split High School Campus," 1949.

planned to accommodate a much larger capacity.[73] However, Morningside HS was principally constructed in two building campaigns, roughly 5 years apart which each included 10 buildings.

The first building campaign, which spanned from 1950 to 1951, included present-day Buildings F, H, I, J, K, S, T, and portions of Buildings M and Q (**Figure 4**).[74] See **Table 4** with the Morningside HS campus original building names, architects, and construction dates. This initial portion of the Morningside HS campus was designed by the Pasadena and Lancaster-based firm of C. Flewelling and Walter L. Moody Architects. According to a newspaper article, the campus was to include an auditorium, shops, a library, an administration building, a gymnasiums, and science buildings to be constructed centrally, with classroom buildings on either side, accompanied by outdoor covered walkways, open-air lockers, and was to include "other advanced ideas in planning," yet not all of these structures were built initially.[75]

TABLE 4
ORIGINAL MORNINGSIDE HS BUILDINGS

Building	Architect	Construction Date
Building B, Classroom	Balch Bryan Perkins Hutchason, Architects	1955-1956
Building C, Classroom	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building D, Classrooms/ Building E, Library	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building F, Lecture Hall	Ralph C. Flewelling and Walter L. Moody	1950–1951
Building G, Music/ Building U, Auditorium	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building H, Transportation	Ralph C. Flewelling and Walter L. Moody	1950–1951
Building I, Classrooms	Ralph C. Flewelling and Walter L. Moody	1950–1951
Building J, Classrooms	Ralph C. Flewelling and Walter L. Moody	1950–1951
Building K, Classrooms	Ralph C. Flewelling and Walter L. Moody	1950–1951
Building L, Arts & Crafts	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building M, Boys Locker Room	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building N, Gymnasium and Pool	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building Q, Girls Locker Room	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building R, Cafeteria and Circle Theatre	Balch Bryan Perkins Hutchason, Architects	1955–1956
Building S, Science Classrooms	Ralph C. Flewelling and Walter L. Moody; addition by Balch Bryan Perkins Hutchason, Architects	1950–1951, with addition 1955–1956
Building T, Classrooms	Ralph C. Flewelling and Walter L. Moody	1950–1951

A groundbreaking ceremony took place the Morningside HS campus in October of 1950.[76] Some of the first classrooms consisted of large canvas tents with dirt floors as construction was still

75 "Centinela Plans to Split High School Campus," 1949.

76 "Start of School Building Marked," *The Los Angeles Times*, October 13, 1950.

underway at the beginning of the school year in fall of 1951 (**Figure 5**). The school opened in 1951.[77] By 1952, a track and football field roughly in the same location as today was visible in aerial photographs, located immediately south of the school buildings. Morningside HS' first three administrators - principal John Waldman, girl's vice principal Lois Stegan, and boy's vice principal Robert Burley - all had been on the faculty of Inglewood High School.[78] Neighboring Clyde Woodworth Elementary School (Woodworth ES) located to the east of Morningside HS, along W. 104th Street, was constructed in 1953 with permanent building additions continuing through 1959.

In 1957, a building contract was awarded to the Harvey N. Nicholas Co. for Morningside HS building additions as part of the campus' second building campaign for the lowest bid of $1,538,000. The additions that comprised the second building campaign were designed by Balch Bryan Perkins Hutchison, Architects and included a library, 17 to 23 classrooms, an auto shop, a 1,500-seat gymnasium, cafeteria, 1,000-seat auditorium and health center (**Figures 6 and 7**).[79] The campus additions were to increase capacity to 1,500 students, and were to complete the building program, which was designed to fit within the existing 10 buildings from the first building campaign (**Figure 8**).[80] New landscape features included covered walkways connecting all building units to one another along a "gently sloping mall opening onto four large social courts where student groups may gather. The buildings [were] laid out on the inside, or enclosed campus principle [sic], instead of the finger-type plan," allowing for student circulation within the centralized grouping of buildings.[81] In the southern portion of the site, it appears that the track and football field became more defined and that basketball courts were constructed as part of this building campaign (**see Figure 8**). Buildings B, C, D/E, G, L, N, R, V, and W were constructed as part of the second building campaign, along with smaller additions to expand Buildings H, M, and Q.

In September of 1955, while the second building campaign was underway, the school year again began in canvas tents which accommodated about 30% of the school's 1,325 students as the permanent buildings were not yet complete (**Figure 9**).[82] Once the second building campaign was complete, embossed metal plaques distinguishing the first building campaign from the second were installed in several buildings, commemorating the Morningside HS campus expansion (**Figure 10**). Construction of the second building campaign was largely completed by 1956.

Despite the addition of 10 new buildings to the campus, by 1957, Morningside HS was experiencing "peak enrollment" which forced the school to hold classes and study sessions on the stage in Building U, Auditorium; Building N, Gymnasium and Pool; Building R, Cafeteria; and in

77 Morningside High School, "About Us," Morningside HS website, https://mhs.inglewoodusd.com/apps/pages/index.jsp?uREC_ID=1470514&type=d&pREC_ID=1624110, accessed May 5, 2022.

corridors of Building F, Lecture Hall.[83] In preparation for the 1957–1958 school year, two wood frame portable buildings were relocated from Warren Elementary School to Morningside HS to help relieve classroom shortages.[84] The portables were placed near Building N, Gymnasium and Pool. By the late 1950s period, all schools in the District were experiencing an increase in enrollment, yet Morningside HS was "probably the hardest hit" by the influx of students.[85] Further, in 1959, an unspecified number of additional movable portable buildings were constructed at Morningside HS which were to include wood floors, ramps, fluorescent lighting, and gas heating.[86] Two classrooms were converted to science laboratories, and four new portable classroom buildings were constructed in 1961, including Building W, which remains extant today (**Figure 11**).[87] Canvas and wood tent structures were again used for several months while the new classroom facilities were finished.[88] Also in 1961, a Polio immunization clinic sponsored by the Los Angeles County Medical Association, Inglewood Council PTA, and the Inglewood Unified School District was held at an unspecified location at the Morningside HS campus.[89]

In 1963, a potential 14-acre $200,000 recreation complex with tennis courts and lighting was proposed at newly acquired land located immediately east of the campus.[90] In 1964, four small portables were to be placed on campus for use as a headquarters for the Inglewood Cadet Squadron 71, Civil Air Patrol, which appear to have been constructed in the southwest portion of the site (**Figure 12**).[91] 1960s era photographs illustrate the campus and students roughly 15 to 20 years after construction of the first building campaign (**Figures 13 and 14**). Aerial photographs indicate the construction of outdoor recreational facilities in the northeastern portion of the property with the construction of a baseball diamond by 1963, and tennis courts between 1963 and 1971 (**Figure 15**). A 1973 yearbook image illustrates students with original brick walls built as part of the second building campaign (**Figure 16**).

The history of later alterations of the school buildings is associated in part with jet aircraft noise from Los Angeles Airport. For a period of about 15 years between 1960 and 1975, the jet noise from planes arriving to and taking off from LAX and its disruption on Morningside HS classes and activities was widely written about in the local newspapers. The concern about flight paths crossing over the campus lead to the country's first congressional hearing on jet aircraft noise. A hearing was conducted by a congressional Subcommittee of the Transportation and Aeronautics Committee of the U. S. House of Representatives at Morningside HS to study the possibility of abating noise at the school buildings due to the increasing number of jet planes using the LAX airport and flying directly over campus.[92] During this study, Inglewood citizens were given the opportunity to express their complaints and to suggest possible solutions to the annoyance, in which they also proposed legal action as a means of correcting the noise. Supervisors passed resolutions asking the federal government to study the problem, and Chamber of Commerce and city officials in nearby cities also added their support to plans for noise relief. Noise suppressor plans were also studied and the district attorney's office conducted its own investigation on the noise problem.[93] By 1972, California Senator Alan Cranston announced his plan to introduce a bill to congress, the Cranston Bill, from a press conference at Morningside HS. The bill proposed to cut noise from commercial aircraft by one third by retrofitting jet engines with sound proofing materials within the years that were to follow.[94]

As this was occurring, reporters interviewed Morningside HS teachers, one who noted that she hadn't been able to give diction to her classes in the five years that she had worked at the school, as nearly 500 jets passed over campus every 24 hours.[95] Some local students experienced roaring jets as often as every other minute, which caused hearing loss and was to blame for many fights at school due to the lack of ability to communicate effectively with consistent overhead noise.[96] Later in 1972, the Airport Authority provided matching funds to schools to soundproof classrooms, yet most remained unsoundproofed.[97] Assembly Judiciary Committee hearings later in the year held at the Morningside HS campus called for a moratorium on nuisance suits against LAX, in which residents were expected efforts to fight against noise pollution and Inglewood officials were to present testimony against the legislation.[98] Newspaper articles mentioning the school and jet noise virtually ceased after this announcement, yet problems with sound abatement at the campus continued for the next nearly 50 years. The District later settled a lawsuit with LAX in which school funds were used to "seal up" most classrooms in which air conditioning and heating systems were added.[99]

In 1975, a student arsonist set Building A, Administration, which was part of the school's first building campaign, on fire. The blaze destroyed two-thirds of the building causing between $200,000 and $312,000 worth of damages. A 15-year-old boy admitted to setting the building on fire in an effort to destroy school records – yet permanent school records, which were kept in a vault, were not damaged.[100] A new building was constructed to replace the destroyed structure the following year to designs by architect Willis K. Hutchason, who was involved in the second building campaign in the mid-1960s (**Figures 17 and 18**). The new building had the same footprint as the original was designed to be vandal proof and windowless with heavy metal roll down shutters to protect building from break-in entry.[101] The unadorned block-wall construction included a new health service space with a room for student counseling. Elaborate sound attenuation features at new Building A noticeably reduced noise of jets flying to and from LAX.[102] However, the sound proofing was only applied to the new building, and the noise

continued to be "a constant aggravation to the 3,000 students and teachers in the school's un-soundproofed main buildings," according to a *Los Angeles Times* article.[103]

In 1978, a public bid request for a sound attenuation project at the Morningside HS campus was announced, however there are no plans on file associated with such a project during this period.[104] A newspaper article from 1979 noted that the District wanted to earmark profit from a land sale to address the immediate need to refurbish deteriorating facilities at the Morningside HS campus.[105] This appears to be the first public mention of the deteriorating conditions at Morningside HS campus, which would lead to many additional articles to be published on the subject over the decades that followed. For example, a 1983 newspaper article profiled issues with broken heaters during a cold spell in January which prompted students to wear ski jackets into class.[106] District maintenance supervisor Gene Robinson noted that since Morningside HS was directly under the flight pattern, "There's more jet ash, spillage (of fuel), and we have to change filters more. If you don't, you start losing compressors, belts, motors, and other things," noting that the attrition of the heating systems at the campus was related to the prominence of consistent overhead jets.[107] When these systems would fail, due to lack of budget for maintenance, teachers would open up doors and windows which would negate the limited sound attenuation systems that were in place.[108]

By 1990, the school's deteriorating condition led to a series of student-led protests, the largest of which involved a 500 student-staged walkout to protest what they described as "substandard conditions" at Morningside HS, to which the District Superintendent George McKenna agreed.[109] The students marched to District headquarters and "complained of campus conditions, poor security, short supply of textbooks, inadequacy of substitute teachers, and vandalism in the bathrooms."[110] McKenna agreed to upgrade the campus installation of lights and to hire an exterminator to control the severe gopher infestation. Students followed up after the protest and joined an Inglewood school board meeting to make demands.[111]

Morningside HS was then considered by the District to be its most troubled school. In addition to the deteriorating condition of the buildings, crime was rampant with Inglewood police noting that the neighborhood had one of the highest crime rates in the city.[112] Newspaper articles from 1990 noted that when the school opened in the 1950s, it was known for "its state-of-the-art campus and quality instruction," and was "once described as having a country-club atmosphere, and to the neighborhood that surrounds it."[113] Yet this was in stark contrast with the 1990s state of

Morningside HS, which as a result of budget cuts had reduced maintenance staff from more than 20 to only 4 staff members. Frustrated administrators and teachers pointed out that conditions had been steadily worsening for years, and that costly upgrades were needed to refurbish the campus.[114]

In 1990, Building U, Auditorium was renamed in honor of late Olympian and Morningside HS alumna, Flo Hyman (see **Figure 65**).[115] Plans for alterations including mechanical, plumbing, and electrical upgrades all campus buildings were created in 1991 by Davis, Duhaime Associates, Architects. In 1998, prolific basketball player and Morningside HS alumni, Lisa Leslie dedicated the "Lisa Leslie Sports Complex," at Morningside HS which included a "42,000 square foot court with 12 baskets," which may have involved renovations to existing Building N, Gymnasium and Pool, or renovations to the outdoor basketball court located in the southeastern portion of the site.[116] In 1999, exploratory oil drilling was to begin at the Morningside HS campus, located immediately southeast of the baseball diamond.[117] The City's mayor, Roosevelt Dorn, proposed a 5,000-student learning center as the Morningside HS site, then referred to as "weedy and dilapidated," which was to potentially include a new high school, science and math magnet, technical school, and performing arts theatre, in addition to a state-of-the-art oil and gas facility.[118] If the exploratory effort at the campus had produced flowing oil sources, through a lease program, the District would have potentially been able to have a revenue stream. It is not clear what the results of the proposed exploratory efforts were.

In 2002, the Mollenhauer Group created an extensive architectural survey of the campus which included an as-built site plan of all campus buildings, topography, and landscape features. The campus most recently underwent renovation and modernization efforts to numerous buildings from July 2019 to April 2021 as part of the Los Angeles World Airports (LAWA) sound insulation program. The LAWA upgrades included interior and exterior sound attenuation improvements. These improvements involved heating/ventilation/air conditioning (HVAC) upgrades, and replacement doors, windows, ceilings, flooring, lighting, and fire alarm and low-voltage upgrades to buildings A, B, C, D/E, F, G, R, S, and T. In this, teaching spaces were insulated for sound mitigation and all areas that were susceptible to sound transmission were reinforced.[119] In addition, ADA upgrades were made in Buildings A, C, D, F, R, S, and T and for associated walkways near Buildings A, B, C, D/E, F, G, R, S, and T.

ADDED FACILITIES—Inglewood Unified School District is soon to build 10 new buildings (indicated by X's in above picture) costing $1,400,000 for the Morningside High School in Inglewood. Entire plant will have student capacity of 1500. Designed by Architects Balch-Bryan-Perkins-Hutchinson, the new buildings will include an, auditorium, a gymnasium, an indoor swimming pool and other facilities.

Ralph C. Flewelling and Walter L. Moody Architects, 1950–1951

Ralph C. Flewelling was born in 1894 in St. Louis, Michigan. He obtained a bachelor of science degree from Wesleyan University in 1916 and pursued graduate studies at the Massachusetts Institute of Technology the following year.[120] Flewelling began his career with H. M. Patterson in Los Angeles between 1921 and 1923 and then worked with William Lee Woollett, between 1924 and 1925.[121] Flewelling later established his own firm, Ralph C. Flewelling, Architect in the mid-1920s and worked as a sole practitioner until Flewelling & Moody, Architects was established roughly 20 years later in 1945.[122] He became a member of the American Institute of Architects (AIA) in 1927. Notable works from Flewelling's early career included the United States Post Office in Beverly Hills in 1933, and the Fisher Gallery of Fine Arts and the School of Architecture at the University of Southern California in 1939. He became an AIA fellow in 1941.

Walter Leland Moody was born in 1897 in Santa Monica, California. He received his Bachelor of Arts degree from the University of California, Berkeley in 1920. He began his career as a draftsman at Pierpont & Walter Davis between 1921 and 1924, and then worked for Allied Architectural Association of Los Angeles between 1924 and 1925. He formed his own practice focused on residential work which operated between 1928 and 1940.

Flewelling and Moody partnered together to form Ralph C. Flewelling and Walter L. Moody Architects, which was active between 1945 and 1960, and incorporated in 1957.[123] With offices in Pasadena and Lancaster during this period, the firm designed the original building campaign for the Morningside HS campus which was constructed between 1950 and 1951.[124] In 1961, the firm became Flewelling, Moody, and Horn, Architects briefly when the two joined with architect Aubrey Horn. By 1964, magazine articles highlighting the firm's work credited the firm as "Flewelling and Moody," the firm's earlier name.[125] Flewelling ran the firm from 1959 to 1990. In the early 2000s, other firm principals included Michael P. Stahlheber and Ara Zenobians.[126] The firm is known for their educational projects and master plans in Southern California. Notable projects designed by the firm included: Santa Ana Junior College (1948) (presently); Paradise Canyon School, La Cañada (1949); Morningside High School, Inglewood (1950–1951, the first building campaign); Hawthorne High School (1954); School of Medicine at USC and Master Plan (1960); Jet Propulsion Laboratory California Institute of Technology (Caltech) and Master Plan (c. 1960s); and the Millikan Memorial Library at Caltech (1968).

Balch Bryan Perkins Hutchason

William Glenn Balch, AIA and Louis L. Bryan

William Glenn Balch was a founding partner of Balch Bryan Perkins Hutchason (BBPH). He was born in Pasadena, California to his father William C. Balch, a carpenter, and his mother, Anna S. Houck Balch, a homemaker.[127] In 1921, Balch married Lena Balch; the couple eventually had three children.[128] Shortly after his marriage, Balch worked as a draftsman for his brother, Clifford A. Balch, from 1922 until 1928 while attending the University to Southern California where he earned his B. Arch degree in 1928. After graduating, Balch worked as a draftsman for Walker and Eisen in Los Angeles from 1929 to 1934.

Balch began working as a designer for H. L. Gogerty from 1934 until 1946, where he met Louis L. Bryan, an architect who designed the Santa Ana Country Club Clubhouse along with Samuel Wyvill in 1924.[129] John Loring Perkins and Willis Hutchason, who later became partners in the firm BBPH (discussed further below), also worked at H. L. Gogerty during this time and it appears that the experience at H. L. Gogerty was formative in the future partners' practice. The firm of H. L. Gogerty designed more than 350 schools in Southern California through its years of operation (1923 – 1968), as well as jails, office buildings, shopping centers. The founder, Gogerty, was the recipient a national achievement award from the American Institute of Architects for his design and development of gliding acoustical walls that allowed for flexible classroom construction.[130] While not currently extant on the Elementary Buildings, original drawings on the north elevation indicate the presence of acoustic tiles.

Balch and Bryan

William Balch and Louis Bryan left the firm of H. L. Gogerty to start the firm Balch and Bryan, the precursor to BBPH, in 1946. The firm operated under this name until 1953.[131] John Loring Perkins, also left H. L. Gogerty in 1946 to work at Balch and Bryan, although he was not yet a partner.[132]

John Loring Perkins was born in South Dakota and his father. Robert A. Perkins, was also an architect. John Perkins earned his B. Arch from the University of Minnesota in 1941. Prior to moving to Los Angeles, he worked as a designer for Giffels and Valet Architects and Engineers in Detroit (1942–1943), which focused on military buildings at the time of John's employment. He also worked as a draftsman for the Metcalf -Hamilton, Kansas City Bridge Companies from 1943 to 1944. By 1944, John Perkins was living in Los Angeles and working for H. L. Gogerty.

[127] "Balch, William Glenn," *Los Angeles Times*, March 16, 1989.; and PCAD, "William Glenn Balch (Architect)," Pacific Coast Architecture Database, N.D., https://pcad.lib.washington.edu/person/743/, accessed May 4, 2022.

[131] "Architects Named for Trona Unified School District," *San Bernadino County Sun*, July 23, 1950.

[132] PCAD, "John Loring Perkins (Architect)," Pacific Coast Architecture Database, N.D., https://pcad.lib.washington.edu/person/1672/, accessed May 6, 2022.

He became a designer at Balch and Bryan beginning in 1945, until he became a partner in the firm in 1953.[133]

While the firm designed numerous public and institutional buildings, they remained focused on school design. In 1950, for example, Balch and Bryan were named architects for the Trona Unified School District. They were appointed following a meeting by the board of trustees. They are also architects for the Lone Pine school District, the Owens Valley Unified School District, and the Inyo County superintendent of schools. Both Balch and Bryan were former associates of H. L. Gogerty, who had been the Trona District's architect prior to the partners taking over. [134]

While the firm designed many schools, they also appear to have been prolific designers of movie theater and drive-in theaters. Examples include the 1949 Rancho Theater of Arvin, an 874-seat movie theater in Arvin, California[135]; the Terrace Drive-in Theater in Bakersfield, California (demolished);[136] the drive-in theater in San Pedro in 1949 (demolished);[137] and the Gilmore Theater formerly located on West 3rd Street at Fairfax Avenue in Los Angeles in 1948 (demolished).[138]

Balch, Bryan, Perkins and Hutchason, Architects, 1955–1956

In 1953, John Perkins was promoted to partner and Willis Hutchason also joined the firm as a partner to form Balch Bryan Perkins and Hutchason, Architects (BBPH). Willis K. Hutchason, AIA, studied at the University of California, Berkeley and the University of Southern California. Like his professional partners, Hutchason was employed by H. L. Gogerty, working at the firm from 1945 until he joined BBPH in 1953.[139]

Like its predecessor firm, BBPH specialized in large-school school design for elementary, middle, and high schools throughout California. The firm designed myriad academic buildings and campuses, notably building improvements at the Mayfield Senior High School in 1954, two years before the construction of the Elementary Building at Mayfield Junior School.[140] Additional projects completed by BBPH include: Colfax Avenue School in North Hollywood (1951); Oak Grove School in La Canada (1952); Wilson Elementary School in Tulare (1954); Pacoima Junior High School (1955), Ventura College in Ventura (1956), Fontana High School (1959), Alder Junior High School in Fontana (1960), and William Howard Taft High School in Canoga Park (1960).[141] BBPH designed 10 additions to the Morningside HS campus, which is considered to be the school's second building camping. These additions completed the campus,

and included Buildings B, C, D/E, G, L, N, R, V, and W, along with smaller additions to expand Buildings H, M, and Q. The buildings designed for this campus were stylized examples of Mid-Century Modernism/Regional Modernism, and the resulting campus is an example of a Postwar Modern Functionalist School Plant.

From 1955 to 1956, while he was a partner in BBPH, William Balch also served as President of the AIA's Southern California chapter.[142] He was elected vice president for 1956 of the California Council of Architects.[143] In 1962, Balch was named a Fellow of the AIA.[144]

Balch Hutchason Perkins, 1975

By 1958, the firm became Balch Hutchason Perkins.[145] The firm remained actively involved with school construction, including an addition to the Horace Mann Elementary School located in Beverly Hills in 1968.[146] Additional projects by the firm include Fontana High School in Fontana (1958), William H. Taft High School in Los Angeles (1960), Alder Junior High School in Fontana (1959), Tumbleweed High School in Palmdale (1959), William H. Taft High School in Los Angeles (1960), and Claremont High School in Claremont (1961).[147] Later works included Lawry's Prime Rib Restaurant, La Cienega (1970), Griswold's Restaurant and the Smorgasbord, Claremont (1973); Lawry's Prime Rib Restaurant in Beverly Hills (1977), and Frank Hall, Pomona College in Claremont (1982).[148] Willis K. Hutchason and Associates, an offshoot of Balch Hutchason Perkins, designed Building A at Morrningside HS, the administrative building which replaced the original building that burned by a student arsonist in 1975. Hutchason retired in 1996 died in 2007.[149]

Ralph Johnson, Morningside HS alumnus

Ralph Johnson, born in 1951, is an American musician who is best known as an original member of the band Earth, Wind & Fire. Johnson attended and graduated from Morningside HS in the mid-to late-1960s.[150] Growing up with musically included parents, he was involved in musical bands throughout in elementary, middle, and high school.[151] At Morningside HS, he was involved in the Morningside HS Marching Band Drum Corps, likely in addition to other on-

campus organizations.[152] Johnson became involved with a local veteran showcase in 1968 and continued to hone his skills, and by 1971 he auditioned for and joined the revamped band Earth, Wind & Fire as an original member, vocalist and percussionist.[153] The band signed with Columbia Records the following year and experienced tremendous success over the following decades. The band's pop breakthrough in 1975 was the song "That's the Way of the World," which topped the Billboard 200 albums for three weeks.[154] Top Billboard and award-winning songs that Johnson was involved as a member of Earth, Wind & Fire included, "Shining Star," "Sing a Song," "Boogie Wonderland," "After the Love Has Gone," and "Let's Groove."[155] The band took a hiatus in 1984, during which time Johnson participated in the production of Motown's Temptations hit single, "Treat Her Like a Lady."[156] Johnson's solo projects have included a conceptual jazz ensemble, in addition to musical collaborations with numerous artists and producers as a singer, songwriter, producer, percussionist, composer, and vocalist. Johnson has six GRAMMY awards, and the band was inducted into the National Association for the Advancement of Colored People (NAACP) Image Hall of Fame in 1993, and given a star on the Hollywood Walk of Fame in 1995.[157]

Lisa Leslie, Morningside HS alumna

Lisa Leslie, born in 1972 in Compton, California is an American former professional basketball player. Leslie attended Morningside HS from 1986 to 1990. During this time, she led the Morningside women's basketball team state championship victory twice, securing the 1989 and 1990 state titles.[158] In the summer of 1989, she played for the USA Junior World Championship team. During her senior year of high school at Morningside HS in 1990, Leslie scored 101 points in the first half of a game against South Torrance High School.[159] This game, played at Building N, Gymnasium and Pool, made national press, as the final score was 102 to 24, and the coach of the opposing team did not allow his team to play for the second half, in which Leslie would have broken a national record had the game not ended at half time.[160] She went on to study at the University of Southern California, where she aided the team to get into four National Collegiate Athletic Association (NCAA) tournaments, and was named National Player of the Year in 1994.[161] She signed to the Los Angeles Sparks WNBA basketball team in 1997, where she remained for her entire career. In 1998, Leslie dedicated the "Lisa Leslie Sports Complex," at

Morningside HS.[162] The complex was noted to have included a "42,000 square foot court with 12 baskets." The location of this complex was unclear, and either refers to renovations to existing Building N, Gymnasium and Pool, or renovations to the existing basketball court located in the southeastern portion of campus.[163] Leslie became the WNBA's second all-time leading scorer, and won four consecutive gold medals as the U.S. Olympic Women's Basketball Team in 1996, 2000, 2004, and 2008.[164] She won the WNBA title in 2001 and 2002, and earned three MVP awards in 2001, 2004, and 2006. She retired from the WNBA in 2009, and was inducted into the Naismith Memorial Basketball Hall of Fame in 2015 and into the U. S. Olympic & Paralympic Hall of Fame in 2019.[165] She has made appearances on popular TV shows, commentated for on-air basketball broadcasts, coaches, and is a part-owner of the Los Angeles Sparks. Leslie is considered to be one of the greatest basketball players of all time.[166]

Architectural Resources Survey

A historic architectural resources survey of the Morningside HS was conducted by ESA architectural historian Alison Garcia Kellar, M.S., on August 19, 2021. Detailed notes and digital photographs were taken and the survey work utilized the survey methodology of the State Office of Historic Preservation (OHP). Morningside HS was documented on California Department of Parks and Recreation (DPR) 523 form series (**Appendix B**).

Site

The campus currently includes the following classroom buildings: Buildings B, C, E, G, I, J, K, L, S, T, V, and W. In addition to classroom buildings, the campus includes Building A, Administration; Building H, Transportation; Building M, Girls Locker Room; Building N, Gymnasium and Pool; Building Q, Boys Locker Room; Building R, Cafeteria; Building U, Auditorium. The existing campus buildings are labeled as Buildings A through W as shown on **Figure 3,** *Morningside High School Building Site Plan,* and are generally located in the northwestern portion of the overall site.

Extensive original features include tennis courts and a baseball field with fencing and a brick dugout structure which are located east of the classroom buildings, adjacent to West 104th Street (**Figures 19 and 20**). A football field and basketball courts are located to the south of classroom buildings (**Figure 21**), adjacent to Yukon Avenue South and residential homes. Landscaping includes shade trees, flowers, and shrubbery located toward the center of campus, sloping areas toward the northern portion of the site, and grassy areas in between walkways and at the aforementioned recreational fields **(Figures 22 and 23**). Hardscaped elements include brick

Building A, Administration

Building A, Administration is located in the western portion of the Morningside HS site, adjacent to the campus' main entrance gate (**Figure 27**). The structure was constructed in 1976 to designs by Willis K. Hutchason and Associates to replace the former administration building that burned in a fire. The building was designed to be "vandal proof" and windowless to protect against break-in entry.[167] Building A is one-story in height and a rectangular footprint, and horizontal massing (**Figure 28**). It was constructed with concrete masonry units and includes a flat roof with composition gravel sheathing. The building includes multi-lite metal framed windows with counters that have metal rollup doors at the east elevation (**Figure 29**). Flat, corrugated metal covered walkways supported by square columns wrap along the building's north, east, and south elevations. Building A includes two murals on the west elevation: one with the Inglewood Unified School District emblem, and the other that includes a lion mascot and reads: "Morningside Monarchs" and includes the year that the school began, 1951. The interior includes concrete flooring, dropped ceilings, and gypsum board partition walls (**Figures 30 and 31**). The rooms are oriented along a centralized corridor.

Building A5, Parent Resource Center

Building A5, Parent Resource Center is located in the southwestern portion of the site, adjacent to Building B (**Figures 32 and 33**). According to aerial photographs, the structure was constructed around 1972. Building A5 is one-story in height and has a rectangular footprint, and monolithic massing (**Figure 34**). While there were no original plans on file, and it appears that the building is of brick and stucco construction, and includes a flat roof with composition gravel sheathing which overhangs slightly at the west elevation. The building includes metal slider windows in varying sizes with metal security bars, and two flush metal hollow core doors which are oriented along the west elevation.

Building B, Classrooms

Building B, Classrooms is located in the southwestern portion of the site. The structure was constructed between 1955 and 1956 as part of the second building campaign designed by Balch Bryan Perkins Hutchason, Architects. The building is similar to Buildings C and L. Building B is one-story in height and is rectangular in footprint with horizontal massing (**Figures 35 and 26**). The building has a slab foundation, and a gently sloping gabled roof which is covered with composition roofing material. The roof includes wood fascia and overhangs over the east and west elevations forming a covered walkway at the east elevation (**Figures 37 and 38**). The building includes stucco siding and contemporary replacement ribbon windows and replacement metal hollow core doors. The rooms face onto the east elevation and are accessible directly from the covered walkway.

Building C, Classrooms

Building C, Classrooms is located in the southwestern portion of the site. The structure was constructed between 1955 and 1956 as part of the second building campaign designed by Balch Bryan Perkins Hutchason, Architects, and is similar to Buildings B and L. Building C is one-story in height and is rectangular in footprint with horizontal massing (**Figures 39 and 40**). The building has a slab foundation, and a gently sloping gabled roof clad in composition roofing material. The roof includes wood fascia and overhangs over the north and south elevations forming a covered walkway at the south elevation (**Figure 41**). The building includes stucco siding and contemporary replacement ribbon windows and replacement metal hollow core doors. Classrooms face onto the south elevation and are accessible directly from the covered walkway.

Building D, Classrooms and Building E, Library

Building D, Classrooms and Building E, Library, which are connected to one another, is in the southwestern portion of the site (**Figures 42 and 43**). The structure was constructed between 1955 and 1956 as part of the second building campaign designed by Balch Bryan Perkins Hutchason, Architects and houses the library at the northern end and a wing of classrooms at the southern end (**Figure 44**). The library portion is also known as the Mallory L. Matthews Memorial Library (**Figures 45 to 47**). Building E, Library and Building D, Classrooms is one-story in height, and is slightly L-shaped in footprint with horizontal massing (**Figure 48**). The building has a slab foundation and a hipped roof, with Building D's roof sitting lower than Building E's roof. The roof includes wood fascia and overhangs along the elongated sides of the building forming a covered walkway along the northeast and east elevations. The building includes wood framing, stucco siding and contemporary replacement ribbon windows and casement windows and replacement metal hollow core doors. Rooms face onto the northeast and east elevations and are accessible directly from the covered walkway. The building has recently undergone upgrades and includes concrete floors, new acoustical paneling doors and smaller reading rooms (**Figures 49 and 50**). The library retains original bookshelves, cabinetry, and countertops (**Figures 51 and 52**).

Building F, Lecture Hall

Building F, Lecture Hall is located in the northwestern portion of the site and is accessed from the main campus entrance along Yukon Avenue South (**Figure 53**). The structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects. Building F is roughly L-shaped in plan and is a one-story double height building that includes two volumes – a lower height volume that serves as a lobby, and a double height volume that includes the lecture hall space (**Figures 54 and 55**). Both volumes have flat roofs with overhanging eaves, while the lecture hall has a sloped roof with a curved fascia board. The building has a slab foundation with concrete columns, with brick walls throughout. The east elevation includes concrete staircase that sits underneath a polygonal-shaped overhang that is supported by pilotis. The building includes limited fenestration and has aluminum frame window assemblies with glass double doors, transoms and sidelites at two entrances located at the east and west elevations. Wood flooring, brick walls, and dropped ceilings are present throughout and the lecture hall space includes sloped flooring, fixed seating and a raised stage (**Figures 56 to 58**).

Building G, Music; and Building U, Auditorium

Building G, Music and Building U, Auditorium, which are connected internally to one another, is located in the northwestern portion of site. The structure was constructed between 1955 and 1956 as part of the second building campaign designed by Balch Bryan Perkins Hutchason, Architects. The building has an irregular footprint that is comprised of a polygonal shaped auditorium, with a rectangular extrusion of classrooms that projects northwest. The building sits on a graded portion of the site which accommodates sloped auditorium seating. Building G, Music and Building U, Auditorium has a slab foundation with concrete columns, with brick walls throughout. Each portion has its own roof.

Building G, Music

Building G, Music is a one-story wing of a larger building, which extends northwest from Building U, Auditorium (**Figures 59 and 60**). The wing sits on a graded portion of the site and includes contemporary replacement metal hollow core doors and ribbon windows, while some original steel frame multilite window configurations remain (**Figure 61**). The building includes a gently sloping gabled roof clad in composition roofing material. The roof includes wood fascia with projecting eaves, and overhangs over the northwest and southwest elevations. The overhangs form a covered walkway over classroom entrances along the southwest elevation. At the interior, classroom spaces are stepped for music practice and performance, and include individual practice rooms (**Figures 62 and 63**). The interior has recently been rehabilitated with new linoleum flooring, ceilings, and acoustical wall paneling (**see Figures 68 and 67**).

Building U, Auditorium

Building U, Auditorium includes a double-height lobby and auditorium space, which extends south from Building G, Music. Building U is also known as the Flo Hyman Auditorium, named after an Olympic volleyball player alumna. This portion of the building sits on a graded portion of the site and is windowless in the auditorium portion (**Figure 64**) and includes original aluminum floor-to-ceiling casement window and single lite door assemblies at two distinctive bays which frame either end of the northwest-southeast-oriented lobby (**Figures 65 to 66**). Each lobby entrance includes a set of concrete steps and metal handrails. Additionally, smaller aluminum multilite windows remain. The lobby includes replacement linoleum flooring and original wood frame display cases (**Figure 67**). The auditorium space includes the original seating configuration, two sets of wood staircases leading to a wood stage, and a wood proscenium (**Figures 70 to 74**). Original stage curtain mechanical equipment remains.

Building H, Transportation

Building H, Transportation is located in the northern portion of the site. The structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects (**Figure 75**). The building was originally used as a shop building and included a woodworking area and a general shop as originally designed. A small, rectangular northwestern-most portion of the building is an addition, constructed between 1955 and 1956 as designed by Ralph C. Flewelling and Walter L. Moody Architects, which extended internal shop space (**Figure 76**). The building is presently used to service and repair Inglewood Unified School District school buses. Building H includes brick construction and a slab foundation. The roof is generally flat with a gentle sloping gable which is oriented northwest and southeast. Generous eaves and angular fascia board extend from the roof and form overhangs along the southwest and southeast elevations (**Figures 77 and 78**). A vertical wood louvered screen sits at the southeast facade, which is attached to a brick retaining wall that leads to a set of concrete steps (**Figure 79**). Original steel frame multilite window are present throughout the building, along with rollup garage doors, and flush panel metal hollow core doors. Smaller brick and wood frame storage additions sit at the eastern and western ends (**see Figures 75 and 76)**. The interior of Building H includes space for employees, cranes, and painted brick walls and is industrial in character (**Figures 81 and 82**).

Building I, Classrooms

Building I, Classrooms is located in the northeastern portion of the site. The structure was constructed in between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects (**Figure 83**). Building I is similar in design to Buildings J, K, and T, which were also constructed between 1950 and 1951. Building I includes brick construction and a slab foundation, with brick planters along the northeast elevation. Its butterfly roof appears generally flat and is oriented northwest and southeast. Generous eaves with an angular fascia board extend from the roof and form overhangs along the northeast and southwest elevations (**Figure 84**). Original floor-to-ceiling steel frame ribbon window assemblies are present along the northeastern elevation, along with steel frame ribbon window assemblies as transoms along the southwestern elevation. The southwestern elevation also includes flush panel metal hollow core doors that lead to the classrooms and restrooms directly off of the covered walkway. The northwestern portion includes a wood-sided addition, similar to a portable (**Figure 85**). The interior of Building I includes acoustical ceiling tiles, linoleum flooring, and painted brick walls (**Figures 86 and 87**).

Building J, Classrooms

Building J, Classrooms is located in the northeastern portion of the site. The structure was constructed in between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects (**Figure 88**). Building J is similar in design to Buildings I, K, and T, which were also constructed between 1950 and 1951. Building J includes brick construction and a slab foundation, with brick planters along the northeast elevation. Its butterfly roof appears generally flat and is oriented northwest and southeast. Generous eaves with an angular fascia board extend from the roof and form an overhang along the southwest elevation (**Figures 89 and 90**). Original floor-to-ceiling steel frame ribbon window assemblies are present along the northeastern elevation, along with smaller steel frame ribbon window assemblies as transoms along the southwestern elevation. The southwestern elevation also includes flush panel metal hollow core doors that lead to the classrooms and restrooms directly off of the covered walkway. The interior of Building I includes acoustical ceiling tiles, carpeted flooring, and painted brick walls (**Figures 91 and 92**).

Building K, Classrooms

Building K, Classrooms is located in the northeastern portion of the site (**Figure 93**). The structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects. The building was originally used for home economics classes. Building K is similar in design to Buildings I, J, and T, which were also constructed between 1950 and 1951 . Building K includes brick construction and a slab foundation, with brick planters along the northeast elevation (**Figure 94**). Its butterfly roof appears generally flat and is oriented northwest and southeast. Generous eaves with an angular fascia board extend from the roof and form an overhang along the southwest elevation (**Figure 95**). Original floor-to-ceiling steel frame ribbon window assemblies are present along the northeastern elevation, along with smaller steel frame ribbon window assemblies as transoms along the southwestern elevation. The southwestern elevation also includes flush panel metal hollow core doors that lead to the classrooms and restrooms directly off of the covered walkway.

Building L, Arts & Crafts

Building L, Classrooms is located in the central portion of the site. The structure was constructed between 1955 and 1956 as part of the second building campaign, designed by Balch Bryan Perkins Hutchason, Architects. The building was originally used for arts and crafts classes. The building is similar to Buildings B and C. Building L is one-story in height and is rectangular in footprint with horizontal massing (**Figures 96 and 97**). The building has a slab foundation, and a gently sloping gabled roof which is clad in composition roofing material. The roof includes wood fascia and overhangs over the northeast and southwest elevations forming a covered walkway at the southwest elevation (**Figures 98 and 99**). The building includes stucco siding and aluminum metal frames which are currently boarded up, along with all door openings. The rooms face onto the southwest elevation and are accessible directly from the covered walkway.

Building M, Boys Locker

Building M, Boys Locker is located in the eastern portion of the site (**Figure 100**). The northern portion of the structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects. The southern portion of the structure was added on in 1956 as part of the second building campaign, designed by Balch Bryan Perkins Hutchason, Architects (**Figure 101**). Building M is a one-story in height brick structure which is generally square in footprint. The original portion of the building resembles Buildings B, C, and L in its gently sloping gabled roof, which include wood fascia and overhangs forming a covered walkway along the southwestern elevation (**Figure 102**). The addition to the building sits at the northern elevation and extends the sloping roof form. The building includes original multilite aluminum windows and flush panel metal hollow core doors.

Building N, Gymnasium and Pool

Building N, Gymnasium and Pool is located in the southeastern portion of the site (**Figure 103**). The structure was constructed between 1955 and 1956 as part of the second building campaign, designed by Balch Bryan Perkins Hutchason, Architects. The building includes signage indicating, "Bennis S. Albright, Michael Van Woy Memorial Gym" (**Figure 104**). The building is rectangular in footprint and includes a slab foundation, concrete columns, steel beams, and brick walls throughout. Building N is comprised of two volumes, a one-story lobby volume that includes a low-pitched front facing gabled roof, and a larger double-height volume that includes a basketball court gymnasium and a swimming pool with a low-pitched gabled roof and wide eaves and exposed steel beams. The lobby volume includes original multilite ribbon windows, and casement transom windows above a pair of flush panel doors, that sit recessed in the western elevation. Large rollup garage doors sit along the north elevation, and a wood-sided shed roof extends from this elevation as well (**Figures 105 and 106**). New contemporary casement windows were being added into the eastern wall at the time of the site visit (**Figures 107 and 108**). The lobby volume interior includes contemporary laminate flooring and original wood frame display cases (**Figure 109**). A plaque at the interior indicates that the Dennis S. Albright and Michael Van Woy Memorial Gym was dedicated by students in 1976 (**Figure 110**). The western portion of the double-height volume at Building N includes a basketball court and gymnasium space with wood floors and wood retractable seating (**Figure 111**). The eastern portion of the double-height volume includes a subsurface swimming pool with stadium seating above which was undergoing renovations at the time of the site visit (**Figure 112**).

Building Q, Girls Locker

Building Q, Girls Locker is located in the southeastern portion of the site (**Figure 113**). The southern portion of the structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects. The northern portion of the structure was added on in 1956 as part of the second building campaign, designed by Balch Bryan Perkins Hutchason, Architects (**Figure 114**). Building Q is a one-story in height brick structure which is generally square in footprint. The original portion of the building resembles Buildings B, C, and L in its gently sloping gabled roof, which include wood fascia and overhangs and forma generous covered walkway along the northeastern elevation (**see Figure 115**). The addition to the building sits at the southern elevation and extends the sloping roof form. The building includes original multilite aluminum windows and flush panel metal hollow core doors. At the interior, casement benches and metal lockers, along with tiled showers comprise the locker room (**Figure 116**).

Building R, Cafeteria

Building R, Cafeteria is located in the central portion of the site (**Figure 117**). The structure was constructed between 1955 and 1956 as part of the second building campaign, designed by Balch Bryan Perkins Hutchason, Architects. Building R is roughly C-shaped and includes a central double-height portion which houses the cafeteria, with two one-story flanking wings that house a circle theatre and a student store at the north and the kitchen at the south (**Figures 118 to 119**). The building includes a slab foundation, concrete columns, steel beams, and brick walls throughout. There are three different rooflines at Building R, with the two flanking wings having gently gabled roofs, while the central volume has a sloped roof which is supported by concrete columns, delineating three bays at the cafeteria. Contemporary casement windows and ribbon window assemblies are found throughout out the building, along with flush metal hollow core doors. At the interior, there is contemporary linoleum and acoustical ceiling tiles, with painted brick walls (**Figures 120 to 122**).

Building S, Science Classrooms

Building S, Science Classrooms is located in the southern portion of the site (**Figure 123**). The structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects. The only two-story classroom building on campus, Building S was designed for science classes. The building is rectangular in footprint and is generally monolithic in its massing. Despite the additional story, Building S is similar in design to Buildings I, J, and K, which were also constructed between 1950 and 1951, yet like building T, Building S has recently undergone upgrade modifications. Its butterfly roof appears generally flat and is oriented east and west. Generous eaves with an angular fascia board extend from the roof and form overhangs along the south elevation which are supported by rounded pilotis (**Figure 124**). Two covered exterior staircases are located along the south elevation, along with contemporary replacement railing at the second-floor exterior walkway. Replacement contemporary floor-to-ceiling ribbon window assemblies are present along the north elevation (**Figure 124**), along with smaller contemporary ribbon window assemblies as transoms along the south elevation. The south elevation includes contemporary flush panel metal hollow core doors that lead to the classrooms and restrooms directly off the covered walkway. The interior of Building S includes new acoustical ceiling tiles, new linoleum flooring, and original wood desks, draws, and cabinetry (**Figures 126 and 127**).

Building T, Classrooms

Building T, Classrooms is located in the southern portion of the site (**Figure 128**). The structure was constructed between 1950 and 1951 as part of the first building campaign, designed by Ralph C. Flewelling and Walter L. Moody Architects. Building T is similar in design to Buildings I, J, and K, which were also constructed between 1950 and 1951, yet building T has recently undergone upgrade modifications. Building T includes brick construction and a slab foundation, with brick planters, brick piers that distinguish three bays, and flush metal hollow core doors along the north elevation. Its butterfly roof appears generally flat and is oriented east and west. Generous eaves with an angular fascia board extend from the roof and form an overhang along the south elevation (**Figures 129 and 130**). Original floor-to-ceiling steel frame ribbon window assemblies are present along the north elevation, along with smaller steel frame ribbon window assemblies as transoms along the south elevation. The south elevation also includes flush panel metal hollow core doors that lead to the classrooms and restrooms directly off of the covered walkway. The interior of Building T includes contemporary acoustical ceiling tiles, carpeted flooring, and painted brick walls (**Figures 131 and 132**).

Building V, Classrooms

Building V, Classrooms is located in the northeastern portion of the site (**Figure 133**). According to aerial photographs and plans for nearby Building W, Building V was constructed around 1961. Built roughly five years after Buildings B, C, and L, which were part of a larger building campaign, Building V shares several characteristics with the aforementioned buildings, including its one-story height, rectangular footprint, and an elongated, horizontal massing. The building has a slab foundation, wood gabled ends at the north and south elevations, with stucco along the north and south elevations. The gabled roofline is gently sloping gabled which clad in composition roofing material. The roof includes wood fascia and overhangs over the north and south elevations forming a covered walkway at the south elevation (**Figure 134**). Building V includes original ribbons of steel casement windows, many of which have been painted over. There are single flush panel doors along the south elevation, each of which has a concrete landing and/or concrete stairs. Similar to Building W, the building appears to have been constructed as a portable structure. The interior includes linoleum flooring, acoustical ceiling tiles, and gypsum walls (**Figure 135**).

Building W, Classrooms

Building W, Classrooms is located in the northeastern portion of the site (**Figure 136**). According to aerial photographs and original plans, the structure was constructed in 1961 as a portable building addition designed by architect H. L. Gogerty, F.A.I.A. Built roughly five years after Buildings B, C, and L, which were part of a larger building campaign, Building W shares several characteristics with the aforementioned buildings, including its one-story height, rectangular footprint, and an elongated, horizontal massing. The building has a slab foundation, wood gabled ends at the north and south elevations, with stucco along the north and south elevations. The gabled roofline is gently sloping gabled which clad in composition roofing material. The roof includes wood fascia and overhangs over the north and south elevations forming a covered walkway at the south elevation (**Figure 137**). Building V includes original ribbons of steel casement windows, many of which have been painted over. There are single flush panel doors along the south elevation, each of which has a concrete landing and/or concrete stairs. Nearby Building V appears to have been constructed at the same time as Building W. The interior includes linoleum flooring, acoustical ceiling tiles, and gypsum walls (**Figure 138**).

Eligibility Assessment

In order to qualify for eligibility, Morningside HS must possess significance under one or more of the applicable National Register and California Register criteria and retain sufficient integrity to convey its historical significance.

Significance Evaluation

ESA evaluated the Morningside HS campus, with its 26 structures and the associated campus landscape for potential eligibility for listing in the National Register and California Register as a

potential historic district. Morningside HS was evaluated against the following historical and architectural themes: (1) History of Inglewood: Settlement, Development and Growth (1822–present), (2) Inglewood Unified School District: Early History, Establishment and Expansion (1905–present), (3) Mid-Century Modernism/Regional Modernism (1945–1960): Postwar Modern Functionalist School Plants, and (4) African American Migration Patterns/Communities of South Los Angeles and Inglewood, and Integration at Morningside High School (1962–1969). The period of significance for the potential district is 1950–1956 for its architectural significance and 1962–1969 for its association with significant patterns of history and historic events.

Morningside HS Campus

Criterion A/1: Events

Construction on Morningside HS campus in Inglewood began in 1950 during a period of immense population growth and relocation in southern California and across the country following the end of World War II. The school, which totaled about 20 buildings, was built in two building campaigns, yet shortly after construction additional classroom portable buildings were required in order to keep up with the growing student population. While classroom construction was underway, several fall semesters began by utilizing large canvas tents and other larger lecture hall and auditorium spaces as overflow classrooms on several occasions in the 1950s. Much of the campus as it is recognized today was constructed by the end of the second building campaign which was complete by 1956.

Morningside HS was the site of significant integration challenges related to school integration, as initiatives to ease racial tensions and promote ethnic diversity were undertaken by student-led groups, school teachers and administers, and the District. Nationally, discriminatory housing policies that promoted redlining were deemed illegal in the early 1960s. The lifting of these policies and regulations allowed Black families to move to different parts of previously all-White Inglewood. In 1962, the first three Black students enrolled at Morningside HS. The school's racial demographics changed quickly in the subsequent years, as White neighbors in Morningside Park Neighborhood began to leave in large numbers while the Watts riots of 1965 motivated middle-class Blacks to move further west to lay down community roots. Morningside HS student-led groups, teacher-initiated efforts, and Inglewood Unified District officials discussed and debated the impacts of racial tension and ethnic assimilation which were widely documented in newspapers in the mid-1960s. These efforts relay a sense of tension and urgency to address the inequalities and stressors that integration while increasing diversity brought about at Morningside HS. By 1967, Black Inglewood residents were nearly all living in the Morningside Park neighborhood, adjacent to campus. The development of the Black Student Union at Morningside HS in 1969, which was open to students of all ethnicities, signaled the school and the District's willingness to allow students to have a permanent platform – not just as a one-off forum or focused study – but a definite organized group in which sensitive issues and topics related to easing racial tension and understanding could be discussed among students, empowering them to organize and attempt to resolve their own race-related issues and misunderstandings together. As such, the Morningside HS campus appears to be eligible for listing under National Register Criteria A and California Register Criteria 1 for historic patterns of development in the City of Inglewood and for its historic association with California's history of public-school integration

during the Civil Rights era, as a site of significant integration initiatives, challenges and community activities related to school integration in Inglewood.

Morningside HS was the site of at least one congressional subcommittee of the U.S. House of Representatives hearing to discuss and study the noise problems on campus, which took place in 1960. According to a newspaper article, the disruption from airplane noise over the campus lead to the country's first congressional hearing on the subject. Twelve years later, California Senator Alan Cranston announced his intention to present a bill to congress, the Cranston's Bill, which proposed to cut noise from commercial aircraft by retrofitting jet engines with sound proofing materials. It appears that the Airport Authority, and LAX subsequently provided monetary compensation to retrofit school buildings in the District for sound attenuation projects, however it is unclear if the Cranston Bill was ever passed into law. As such, the congressional hearing that occurred as a result of the jet plane noise on the Morningside HS campus does not rise to a level of significance at the National or State level for eligibility under Criterion A/1 for its association with congressional hearings related to jet noise.

A singular event that occurred at the Morningside HS campus included a Polio immunization clinic sponsored by the Los Angeles County Medical Association, Inglewood Council PTA, and the Inglewood Unified School District in 1961.[168] Polio clinics would have been occurring all over the country during this period, and Morningside HS being a single host site to immunize local Inglewood residents does not rise to a level of significance at the National or State level for eligibility under Criterion A/1 for singular events.

According to newspaper articles, the campus was considered for oil drilling as a means of additional income for the District, beginning as early as the 1960s through as recently as the 2000s. While it is unclear what the results of exploratory oil drilling on the campus were, it does not appear that exploratory drilling would qualify as a significant event at the National or State level for eligibility under Criterion A/1 for its association with speculative oil drilling.[169]

Building U, Auditorium, constructed between 1955 and 1956 hosted several school and community events, some of which were one-offs and some reoccurring throughout the years. Early examples of events in the 1950s through to the 1970s included the Regional Band and Orchestra Festival, State Band and Orchestra Association, West Los Angeles County Musical Festival, Town Hall meetings, televised Miss Los Angeles County pageants, and other local events.[170] It does not appear that any of these events at Building U, Auditorium would qualify as

168 "Polio clinic set at Morningside high school," *Southwest Topics-Wave*, April 30, 1961.

169 "Oil Feud," *The Los Angeles Times*, June 8, 1962.

170 "Azusa H.S. Band Rated 'Superior'," *Daily News-Post and Monrovia News-Post*, May 1, 1957; "Selected as Judges For Music Festival," *The San Bernardino County Sun*, March 28, 1958; "Knight Will Lead Panel at Town Hall," *The Los Angeles Times*, January 3, 1960; "Beauty pagent [sic.] finals planned," *Southwest Topics-Wave*, April 9, 1961; and "Special Sight," *Daily News-Post*, March 19, 1963.

a significant event at the National or State level for eligibility under Criterion A/1 for its association.

Criterion B/2: Significant Persons

Over the course of the school's 72-year history, several alumni of Morningside HS have emerged as significant figures in their professional vocations. Most notably are athletes, including Flo Hyman, for whom Building U, Auditorium was renamed for after her passing; Lisa Leslie, Los Angeles Sparks (Women National Basketball Association, WNBA) basketball player; and Byron Scott Los Angeles Lakers (National Basketball Association, NBA) basketball player. Ralph Johnson, singer, songwriter, musician and producer, who is most well-known as the percussionist for Earth, Wind & Fire graduated from Morningside HS, however, his productive life is not associated with the school, as his accomplishments and the overall arc of his career have occurred after he graduated. Additionally, John Arrillaga, Silicon Valley real estate developer and philanthropist; and Jackie Goldberg, politician and LAUSD board member, have been successful Morningside HS alumni in their respective fields.

As discussed above, Leslie is a decorated former basketball player with many accolades in the sport to her name. She was an exceptional player when she played for Morningside HS in the 1980s, and only continued her athletic trajectory in the years that followed, attaining four Olympic gold medals, multiple MVP awards, and being inducted into two Halls of Fame. Shortly after beginning her career with the Los Angeles Sparks team, she dedicated her namesake sports complex to the Morningside HS campus, in 1998. As an athlete, Leslie is considered to be one of the greatest of all time in her field. While it appears that Leslie is a significant person associated with the Morningside HS campus as she began her career there, her productive life is not associated with the school, these accomplishments and the overall arc of her career have occurred after she graduated within the past 45 years, and as such, do not meet the California State Office of Historic Preservation's age threshold guideline for California Register listing consideration, and also do not meet the National Park Service's age threshold requirement – which is longer – of 50 years.

As such, Morningside HS does not appear to satisfy National Register Criteria B or California Register Criteria 2 for eligibility related to a historic personage. Morningside HS is further not identified with the productive life of significant individual District teachers, principals, administrators, or any other persons important in our past.

Criterion C/3: Design/Construction

While the Morningside HS campus was constructed in two building campaigns (1950–1951 and 1955–1956), both campaigns fall within the period of significance for the Mid-Century Modernism/Regional Modernism context, 1945–1960.

The campus is an intact example of a Postwar Modern Functionalist School Plant and falls within the period of significance for the architectural theme. While the campus was constructed in two building campaigns (1950–1951 and 1955–1956), it is clear from a review of aerial photographs and site plans that the campus was designed under a master plan. While the master plan was not located, the completion of the second building campaign included the construction of several key

buildings that were placed in between classroom buildings that were constructed as part of the first building campaign, including Buildings Building E, Library; Building N, Gymnasium and Pool; Building R, Cafeteria and Circle Theatre; and Building U, Auditorium, which are each oriented either to a main entrance point, or to other buildings indicating that circulation and movement of students, teachers, administrators, and the public was considered during the design of the campus plant. Morningside HS is expressive of a clusterplan Functionalist school plant due to the orientation previously mentioned. Ample outdoors spaces, sheltered corridors, and a decentralized overall plan are some of its distinctive characteristics. The campus was built quickly during both building campaigns, with emphasis on campaign completion before the beginning of the school years, in order to aptly accommodate the large volume of enrolled students. As such, the campus is reflective of an intact Mid-Century Modern, Postwar Modern Functionalist School Plant.

Further to this, 16 of the 24 buildings on the Morningside HS campus, and its landscape features including its covered walkways, brick planters, football and baseball fields, were constructed during the campus' period of significance for architecture. These 16 buildings were designed by prominent Los Angeles area architects Ralph C. Flewelling and Walter L. Moody in 1950–1951, and by Balch Bryan Perkins Hutchason, Architects in 1955–1956. The 16 buildings associated with the two early Mid-Century modern building campaigns are included in **Table 4** above.

The seven extant buildings constructed as part of the first building campaign, including Building F, Lecture Hall; Building H, Transportation; Building I, Classrooms; Building J, Classrooms; Building K, Classrooms; Building S, Science Classrooms, and Building T, Classrooms, were constructed between 1950 and 1951 to designs by Ralph C. Flewelling and Walter L. Moody Architects. These buildings are notable modest in their design, comprised of mostly elongated classroom buildings as compared to the buildings that comprise the second building campaign. The eleven extant buildings as part of the second building campaign, including Building B, Classrooms; Building C, Classrooms; Building E, Classrooms; Building E, Library; Building G, Music; Building L, Arts & Crafts; Building M, Boys Locker; Building N, Gymnasium and Pool; Building Q, Girls Locker; Building R, Cafeteria and Circle Theatre; and Building U, Auditorium, were designed by Balch Bryan Perkins Hutchason, Architects. The grouping of buildings constructed as part of the second building campaign included classrooms in addition to more prominent buildings, such as Building U, Auditorium; Building N, Gymnasium and Pool' and Building R, Cafeteria and Circle Theatre, which each include more stylized elements of the Mid-Century Modern style as designed by Balch Bryan Perkins Hutchason, Architects, who were designing other campuses and master plans at the time.

These 16 buildings and their related site features, including the associated landscape with covered walkways and playing fields, represent the distinguishable architectural identity of Morningside HS from 1950 to 1955, that would otherwise individually would lack distinction. The collection of buildings and site features appear to be eligible as a historic district under California Register Criterion 3, as being reflective of distinctive southern California public school architecture from the post-World War II area articulated in the Mid-Century Style and for their strong association with two prominent Los Angeles-area notable architects. As an intact example of its style and type, Morningside HS appears to be eligible for listing on the National Register of Historic Places

under Criterion C at the state and local level of significance, and the California Register of Historical Resources under Criterion 3.

Criterion D/4: Data Potential

Morningside HS is not likely to yield any information important to prehistory or history. Therefore, Morningside HS does not meet the above criterion.

Integrity Analysis

The National Register and California Register recognizes a property's integrity through seven aspects or qualities: location, design, setting, materials, workmanship, feeling, and association. Eligible properties should retain several, if not most, of these aspects. Both registers require that a resource retain sufficient integrity to convey its significance, and the property must retain the essential physical features that enable it to convey its historical identity. Integrity is based on significance and understanding why a property is important. National Register Bulletin 15 states that "only after significance is fully established can you proceed to the issue of integrity."[171] Morningside HS has been identified as a historic district significant under National Register Criteria A and California Register Criteria 1 for its historical association with the patterns of development in the City of Inglewood, and for its historical association with California's history of public school integration. Based upon these significance findings, a secondary period of significance ranges from 1962 to 1969, which references the general period of racial integration at Morningside HS.

The school campus has also been identified as a historic district under the National Register Criteria C and California Register Criteria 3 for its embodiment of the Mid-Century Modern style as applied to a clusterplan Postwar Modern Functionalist School Plant, and for its association with notable architects Ralph C. Flewelling and Walter L. Moody, and by Balch Bryan Perkins Hutchason, Architects. Based upon these significance findings, the primary period of significance ranges from 1950 to 1965, during which time the first and second building construction campaigns were completed.

The grouping of 16 historic-period buildings remains the same, and the property has not been relocated. The property retains integrity of location. The school continues to express the aesthetic and historic feeling of a Mid-Century Modern clusterplan campus, constructed two building campaigns spanning from 1950 through to 1965, including its recreation fields and paved covered pathways. The buildings have undergone minor upgrades, per requirements for compliance with safety and access over time including replacements of surface materials that have outlived their reasonable service life, as would be expected with high-wear environments. Portions of the campus have recently undergone building upgrades, which were conducted with in-kind window and door replacements, and new compatible finishes. These modifications have not altered the design of the buildings, and as a result, the buildings retain a high level of integrity for their original simple workmanship and materials as evidenced in the limited remaining built-in cabinetry, cantilevered overhangs, and overall building massing, footprint, and configuration.

[171] National Park Service, "National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation," U.S. Department of the Interior, 1995, 45.

A review of early photographs, including aerials, and limited building plans for the eligible contributing buildings confirms that much of the original designs remain intact, with modifications as mentioned above, that have not affected circulation or usage over time. As such, the property retains integrity of design. The property retains its integrity of association, as Morningside HS still operates as a high school, as it has since its construction. The property retains historic integrity of location, feeling, material, workmanship an association.

While later buildings including Building A; Building A5; Buildings V and W, Classrooms; and portable Buildings W5, X, Y, and Z were constructed on the campus after 1965, these structures do not overwhelm the campus and its historic low-story buildings, and they sit peripherally on the edges of property, away from the core cluster of the campus. Building A, Administration was constructed with similar features, massing, and footprint as the original 1950–1951 building which burned in its place. The property retains ample recreational areas and continues to have plantings along Yukon Avenue and toward the center of the campus, as were present during the period of significance. Further, the property's boundaries have remained the same since its period of significance. In summary, Morningside HS Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T and its associated landscape and playing fields retains historic integrity for its location, setting, design, workmanship, materials and association. As a result, the campus retains historic integrity.

Findings and Conclusions

Historic Resource Evaluation Findings

ESA evaluated Morningside HS for potential eligibility for listing in the National Register and California Register as a historic district.

The extant seven earliest buildings comprising Morningside HS constructed as part of the first building campaign, (including Building F, Lecture Hall; Building H, Transportation; Building I, Classrooms; Building J, Classrooms; Building K, Classrooms; Building S, Science Classrooms, and Building T, Classrooms) were constructed on a former grouping of agricultural properties in the City of Inglewood during a period of immense population growth. In an attempt to keep up with the need to accommodate more students, Morningside HS' second building campaign was completed by 1956, which included eleven extant buildings (Building B, Classrooms; Building C, Classrooms; Building D, Classrooms; Building E, Library; Building G, Music; Building L, Arts & Crafts; Building M, Boys Locker; Building N, Gymnasium and Pool; Building Q, Girls Locker; Building R, Cafeteria and Circle Theatre; and Building U, Auditorium). In this, the 1950s era Morningside HS campus expanded over time to educate the rising number of school-aged students in Inglewood during a period of rapid growth.

In the 1960s, Morningside HS experienced significant challenges during integration, as initiatives to ease racial tensions and promote ethnic diversity were undertaken by student-let groups, school teachers and administrators, and the District. These efforts relay both a sense of tension and urgency to address the inequalities and stressors that integration and diversity brought about at Morningside HS. Due to several key events, including the end of discriminatory housing policies, the movement of Black Angelenos to certain parts of Inglewood, and the Watts riots of 1965, the

quickly changing racial demographics at the high school similarly reflected the quickly changing racial demographic of the City and its communities alike. As the campus was the site of difficult integration challenges during the Civil Rights era, the Morningside HS campus appears to be eligible for listing under National Register Criteria A and California Register Criteria 1 for historic patterns of development in the City of Inglewood and for its historic association with California's history of public-school integration. The period of significance for Morningside HS's integration ranges from 1962 to 1969, which spans the arc of the first Black students enrolling at the school, to the establishment of the Black Student Union, which also largely corresponded with a shift in the City's racial demographics. As associated with a pattern of development significant to regional and local history, these 16 extant buildings collectively appear to be eligible as a historic district in the National Register under Criterion A, and in the California Register under Criterion 1.

When viewed together, the Morningside HS with its associated site features is reflective of design trends and changes of the post-World War II period as the campus grew to accommodate an influx of students in the area. As a result of this, the campus has a period of significance which ranges from the construction of the first permanent building in 1950, up through the construction of the last permanent building as part of the second building campaign in 1956. Together, these 16 buildings, and associated landscape features including concrete walkways, covered walkways, outdoor green spaces, and playfields, appear to be eligible as a historic district under National Register Criteria C and California Register Criteria 3, as being reflective of distinctive a multiple-building southern California public school campus, and as a mid-century era high school in the City of Inglewood. Constructed after the end of World War II, the campus is articulated in the Mid-Century Modern style that is reflective of Modernist indoor-outdoor school planning principles of the era, as an example of a clusterplan Postwar Modern Functionalist School Plant. Further, the property conveys a strong association with two prominent Los Angeles area master architects, Ralph C. Flewelling and Walter L. Moody Architects, and Balch Bryan Perkins Hutchason, Architects. Both architectural firms achieved distinction in the Los Angeles area for their school and master plan commissions articulated in modern styles. The designs of buildings at this public-school campus are notable within both firms' larger prolific bodies of extant work for their application of contemporary design motifs to a multi-building high school campus plant. As such, the 16 early buildings comprising Morningside HS (Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T) and its surrounding site features appear eligible as a historic district under the National Register under Criterion C, and California Register under Criterion 3 for the campus' embodiment of distinctive characteristics of a period, and as works of master Los Angeles area architectural firms.

The property retains historic integrity. In summary, Morningside HS Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T and its associated campus landscape retain historic integrity for its location, design, workmanship, materials, feeling, and association, and marginal historic integrity for its modified setting. As a result, the property retains overall historic integrity.

Lastly, none of the buildings on the campus appear to rise to the threshold of individual distinction to be individually eligible for the National Register of Historic Places or California Register of Historic Resources on their own historical or architectural merits.

Character Defining Features Analysis

The potential Morningside HS campus historic district, comprised of 18 buildings and associated landscape features, was designed and constructed in two building campaigns, the first designed by Ralph C. Flewelling and Walter L. Moody Architects between 1950 and 1951; and the second designed by Balch, Bryan, Perkins and Hutchason, Architects between 1955 and 1956.

Extensive original outdoor amenity features include a baseball field with fencing and a brick dugout structure which are located east of the classroom buildings, adjacent to West 104th Street. Tennis courts, which were constructed later, are located in the northern portion of the site. A football field and basketball courts are located to the south of classroom buildings, adjacent to Yukon Avenue South, with residences located further south. Landscaping includes shade trees, flowers, and shrubbery located toward the center of campus, sloping areas toward the northern portion of the site, and grassy areas in between walkways and at the aforementioned recreational areas. Hardscaped elements include brick planters and brick walls, interconnected concrete pathways, walkway coverings with metal awning structures supported by metal poles, paved concrete areas, concrete steps with metal handrails, metal fencing, asphalt paved parking lots, and a metal shade structure with picnic tables.

Prior to construction of the Morningside HS campus, which was then referred to as a "complete school plant," costs were estimated to be $3,000,000.[172] As initially intended, Morningside HS was to consist of "two units on one campus to split a large student body into separate, self-sustaining units."[173] Original landscape features included covered walkways connecting all building units to one another along a "gently sloping mall opening onto four large social courts where student groups may gather. The buildings [were] laid out on the inside, or enclosed campus principle [sic], instead of the finger-type plan," allowing for student circulation within the centralized grouping of buildings.[174] In the southern portion of the site, it appears that the track and football field became more defined and that basketball courts were constructed as part of this building campaign.

Character-defining features of the Mid-Century Modern style present in the plant campus type at Morningside HS are as follows:

Campus Site Character-Defining Features

- Extensive use of sheltered exterior corridors, with flat or slightly sloped roofs supported by posts, piers, or pipe columns
- Mature trees throughout
- Expansive lawns of manicured grass
- Sloped topography of site

[172] "Contract Awarded for High School," *The Los Angeles Times*, September 29, 1950; and "Centinela Plans to Split High School Campus," *The Los Angeles Times*, November 21, 1949.

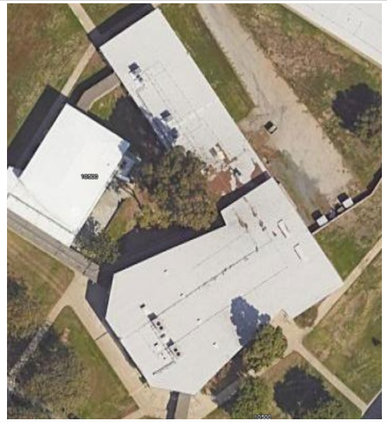
[173] "Centinela Plans to Split High School Campus," 1949.

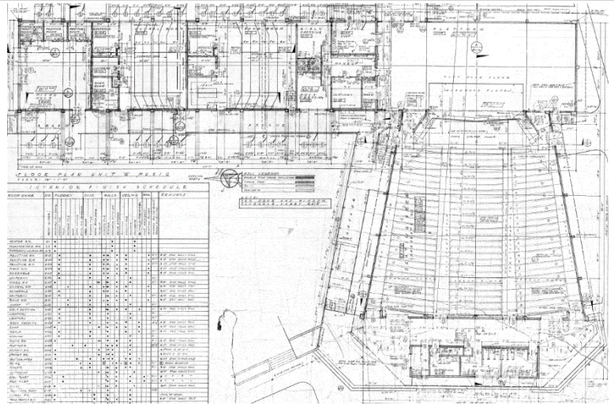
[174] "Morningside School to Have 10 New Units," *The Los Angeles Times*, November 14, 1954.

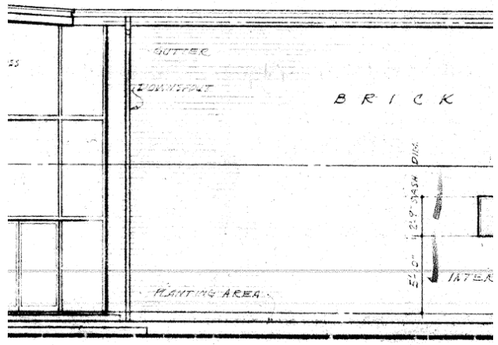
- Football field with surrounding track
- Concrete walkways and circulation patterns
- Concrete steps and metal handrails
- Flagpole along Yukon Avenue
- Parking lot along Yukon Avenue

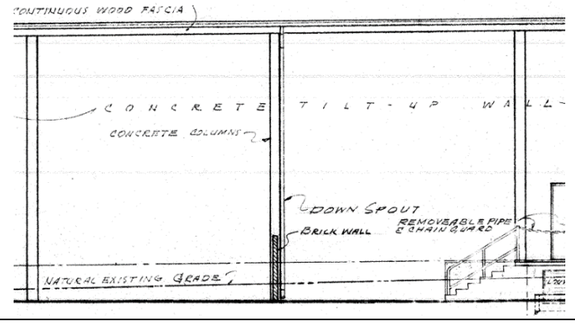
Campus Architectural Character-Defining Features

- Horizontal design composition and massing; generally one to two stories
- Simple geometric volumes
- Flat or shed roof, often with wide, cantilevered overhangs
- Exterior materials include stucco, brick, or concrete
- Modular design
- Aesthetic qualities derive from use of simply treated materials and excellent craftsmanship
- Direct expression of structural systems, often in wood or steel post-and-beam
- Lack of historicizing ornament
- Generous expanses of fenestration, including bands of grouped multi-light aluminum and steel frame windows[175]

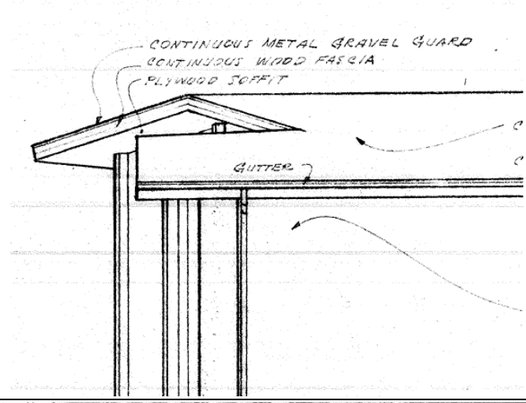


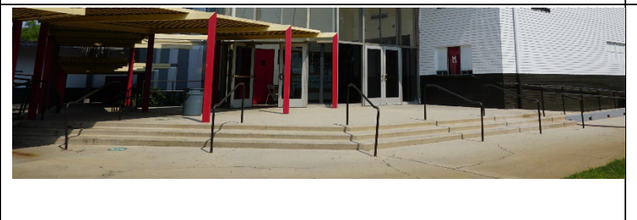


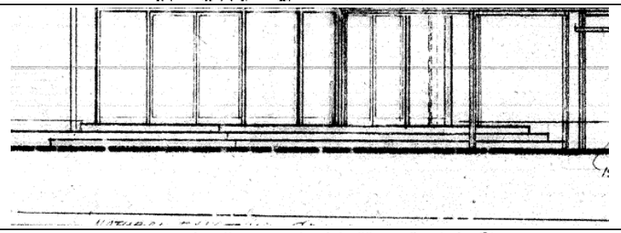


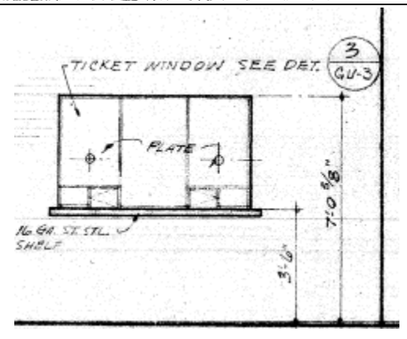


Building U, Auditorium Character-Defining Features

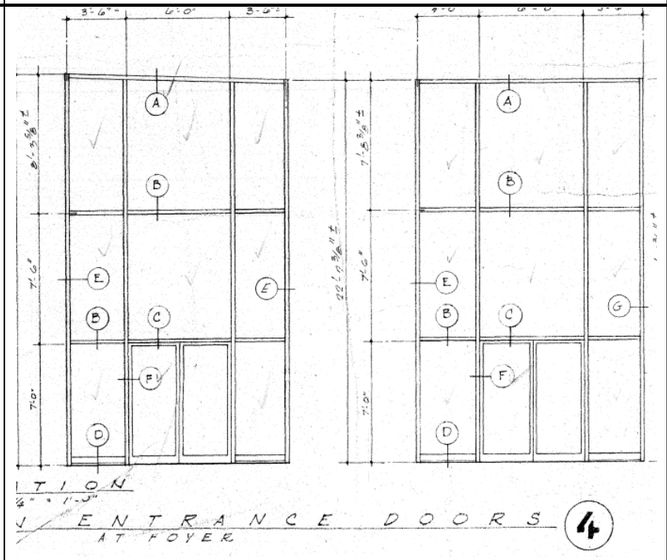








As Building U, Auditorium (which is a part of Building G, Music/ Building U, Auditorium) contributes to the potential district as gathering place both for the campus and for the public, a character-defining features matrix that identifies both exterior and interior features is included as **Table 5** for potential future planning and design purposes for the proposed Tenant Improvements. The matrix identifies individual features and includes a current image and historic drawings excerpts for each, assigns significance (primary or contributing), any future renovation work should be designed in conformance with the Secretary of the Interior's Standards for Rehabilitation, and in order to protect the integrity and significance of the historical resource the removal or alteration of character defining features and materials should be avoided as far as feasible.



[175] "Los Angeles Unified School District: Historic Context Statement, 1870 to 1969," 126–127.

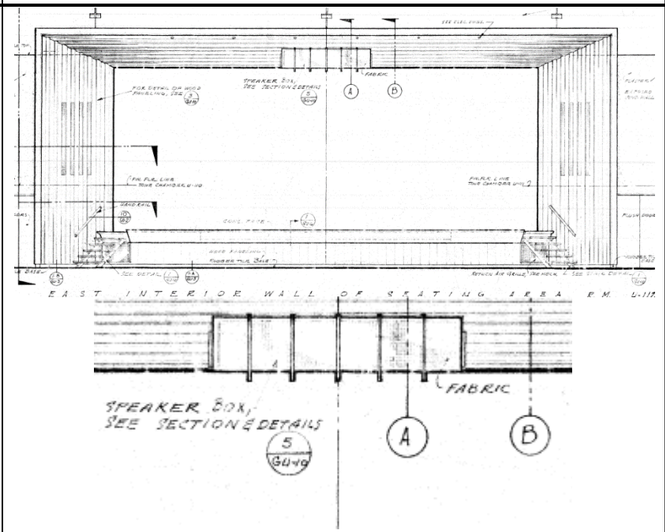
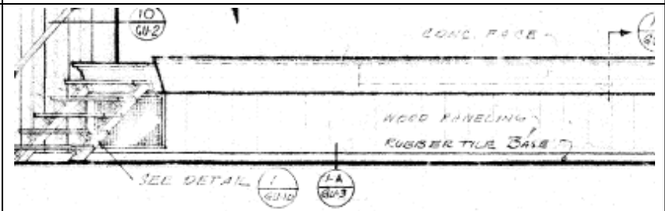
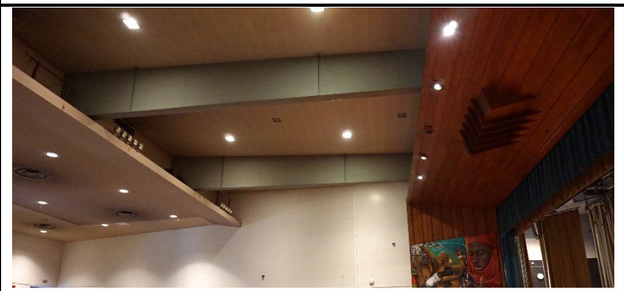
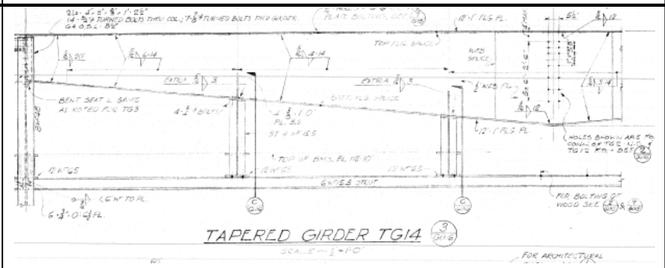
5	Double height aluminum bay windows at foyers with rounded metal columns	 		Primary

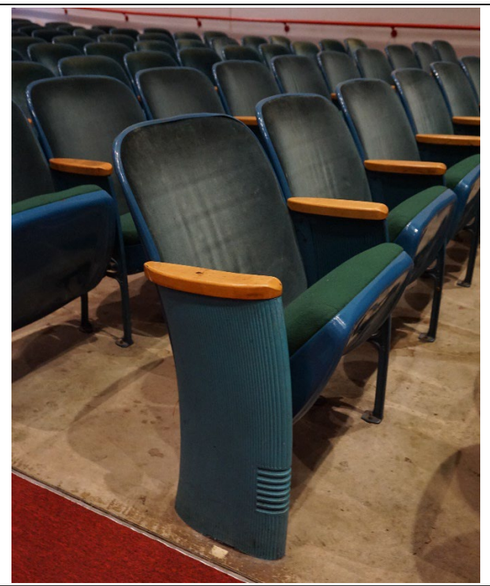




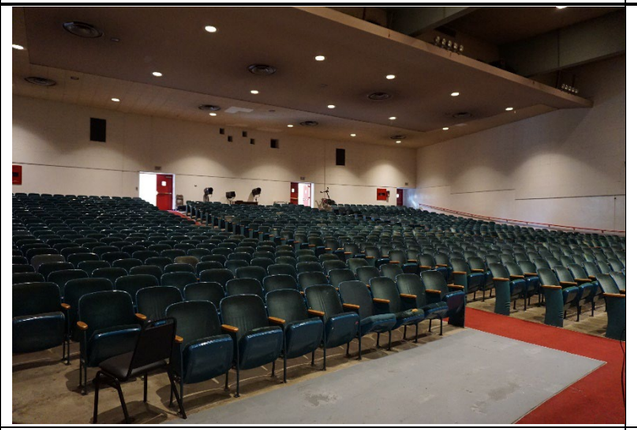
Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
6	Steel sash windows (some have been replaced)			Contributing
7	Glazed entrance doors			Primary

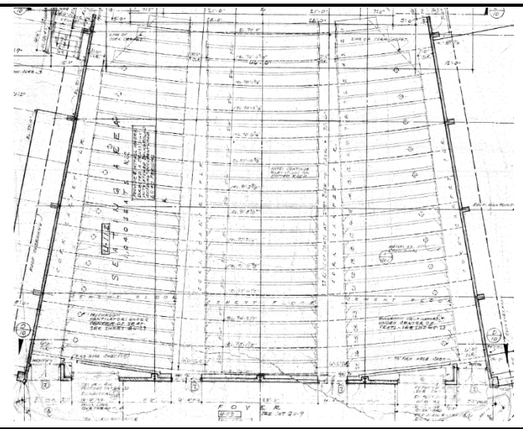




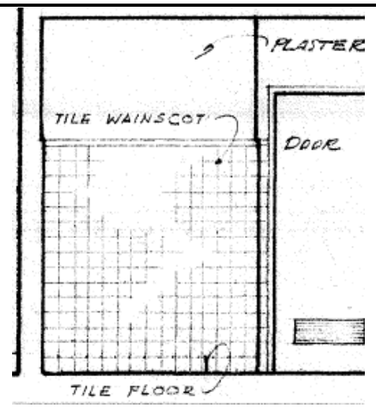


Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
8	Foyer with double height entrance and hallway corridor			Primary
9	Brick (has been painted)			Primary





Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
10	Wood display cases	 		Contributing
11	Commemorative metal plaque			Contributing



Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
12	Interior doors with single lite and vent			Contributing
13	Raised wood stage			Primary
14	Control panel			Contributing

Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
15	Metal and wood stairs at stage. (*handrail replaced*)	 		Contributing

Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
16	Wood proscenium with speaker box with concrete/ stucco behind			Primary
17	Concrete face, wood paneling, rubber tile stage base			Contributing

Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
18	Exposed tapered girders with wood ceiling and can lighting			Primary
19	Rows of auditorium seating with wood arm caps, fluted end panels, and metal legs *(seat cushion upholstery replaced)*			Primary

Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
20	Configuration of seating with central and flanking aisles			Primary
21	Dressing room cabinetry and counter tops	 		Contributing

Feature No.	Character-Defining Feature	Current image	Historic photograph, drawing, or plan	Significance (Primary or Contributing)
22	Restroom wall and floor tilework. (*Stalls, sinks, and tile on wall behind sinks replaced*)			Contributing

CEQA Impacts Analysis

Identified below are the thresholds for determining the significance of environmental effects on historical resources are derived from the CEQA Guidelines as defined in §15064.5. Pursuant to this guidance, a project with an effect that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment. A project that would physically demolish, destruct, relocate or alter the integrity and significance of a historical resource or its immediate surroundings, either directly or indirectly, such that its eligibility for listing in the National Register or California Register would no longer be maintained, is considered a project that would result in a significant impact on the historical resource.

CEQA Guidelines

According to the State *CEQA Guidelines*, Section 15064.5(b) a project involves a "substantial adverse change" in the significance of the resource when one or more of the following occurs:

- Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired.
- The significance of a historical resource is materially impaired when a project:
  A. Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or
  B. Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
  C. Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

Under CEQA, a proposed development must be evaluated to determine how it may impact the eligibility of a district, structure(s) or a site for designation as a historic resource. The Secretary of the Interior's Standards were developed to evaluate and approve work for federal grants for historic buildings and then for the federal rehabilitation tax credit (see 36 CFR Section 67.7). Likewise, CEQA recognizes the value of the Standards by using them to demonstrate that a project may be approved without an EIR if a project complies with the Standards. In effect, CEQA has a "safe harbor" by providing either a categorical exemption or a negative declaration for a project which meets the Standards (see State *CEQA Guidelines* Section 15331 and 15064.5[b][3]). Alternatively, however, if a project does not strictly comply with the Standards and substantial evidence demonstrates that the project would not detract from the integrity and significance of a historical resource in an adverse manner and if the historical resource would remain eligible for

listing and/or retain its designation after project completion, an EIR may not be necessary because impacts to the historical resource under CEQA could still be less than significant.

Methodology

Under CEQA, the evaluation of impacts to historical resources consists of a two-part inquiry: (1) a determination of whether the Project Site contains or may otherwise impact any historic resource(s), and, if so, (2) a determination of whether the Project would result in a "substantial adverse change" in the significance of the identified resource or resources.[176]

Historic Resources Identified and Analyzed

The Morningside HS campus was evaluated for historical significance as a potential historic district and ESA determined that the campus acquired significance at the state and national level for its association with the Mid-Century Modern style, the notable architects C. Flewelling and Walter L. Moody Architects and Balch Bryan Perkins Hutchison, Architects, and later, for its association with integration at the school and within the City of Inglewood. Of the total 15 resources identified in the archival record search and historic resources evaluation, the project has a potential to directly impact the potentially eligible Morningside HS historic district which includes 16 contributing buildings including Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T which are located within the project site. None of the identified or potential historical resources located within a 0.5-mile radius of the Project site or Project vicinity would be impacted directly or indirectly by the project.

Project Description

ESA's qualified architectural historians reviewed various site plans for the Proposed Project developed between 2020 and 2022 prepared for the Inglewood Unified School District Board of Education by Lionakis (**Figures 143–149**). Final design plans and construction plans have not been developed yet, except for new Building L. The Project plans are included in **Appendix E.** The proposed Project involves improvements to the Morningside HS campus and demolition of the existing Woodworth Elementary School campus (collectively referred to as the existing Project Site or existing campuses).

The Woodworth ES campus is currently vacant after operations were merged with Monroe Middle School in 2019, creating the Woodworth-Monroe TK-8 Academy. The Morningside HS campus is currently in operation.

Proposed modifications to Morningside HS include:

- The demolition of 13 buildings (including Buildings I, J, K, L, V, W, W5, a service building, and five portable buildings) and hardscape (including 12 tennis courts and 6 basketball courts) (**Figures 143 and 144**). Of these, Buildings I, J, K, and L are contributing to the potential Morningside HS historic district, while Buildings V, W, W5, a service building and five portables are non-contributing.

[176] Pub. Res. Code § 21084.1; CEQA Guidelines § 15064.5

- The construction of new athletic facilities including a relocated track and football/soccer field, tennis courts, basketball courts, shotput and discus areas, a softball field, a baseball field, a ticketing and concessions building, a visitor team storage and restroom building, and a home team storage and a restroom building (**Figure 145**).
- Proposed circulation improvements include an expansion of the existing northwest parking lot and fire lane, a new parking lot near the proposed baseball field, a new parking lot at the proposed football field, and expanded internal pedestrian walkways leading to a proposed safe dispersal area. Landscaping and utility improvements would also be included throughout the campus (see **Figure 145**)
- Additional campus modernization improvements include exterior upgrades to multiple buildings and walkways within the campus (**Figure 146**), including the replacement of outdated exterior soffits (rafter beams) and canopies, roofing, fire hydrants, accessibility signage, ornamental and chain-link fencing, and drinking fountain and water bottle filling stations throughout campus.
- The replacement of contributing Building L with a new building, new lunch shelter, with new surrounding landscaping including paving (**Figures 147–149**)
- Unspecified, future exterior and interior improvements to the contributing Building G, Music/Building U, Auditorium and contributing Building H, Transportation.

Analysis of the Project

Impacts Analysis

Would the project cause a substantial adverse change in significance of a historical resource as defined in CEQA §15064.5?

Direct Impacts

Under CEQA, the changes to each contributing building and its setting within the potential historic district would only cause a substantial adverse change if they would materially impair the historical resource's (i.e. historic district) ability to convey its significance to the degree that it would no longer be eligible for inclusion in the California Register. What follows is an analysis of the extent to which the proposed Project has the capacity to impair the historical resource (i.e. historic district) to this extent.

Less Than Significant Impact after Mitigation.

The Morningside HS campus was identified as potentially eligible for listing as a historic district under National Register Criteria A and C, for its association with events that have made contributions to the broad patterns of California and Inglewood's history and cultural heritage, as well as for its architectural merit as a post-World War II (Mid-Century Modern) Modern school in Inglewood that was designed by two prominent Los Angeles area architectural firms, C. Flewelling and Walter L. Moody Architects and Balch Bryan Perkins Hutchison Architects. The potential historic district includes 16 extant buildings (Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T) and its surrounding site (campus landscape and playfields), which were constructed between 1950 and 1956. Therefore, the 16 buildings and associated campus landscape and playfields that comprise the potentially eligible historic district are collectively considered to be a historical resource pursuant to CEQA. Designed over the course of two building campaigns which formed the existing cluster-plan type Postwar Modern Functionalist School plant, extant Buildings F, H, I, J, K, S, T, and portions of Buildings M and Q were constructed during the first building campaign to designs by C. Flewelling and Walter L. Moody Architects between 1950 and 1951, while extant Buildings B, C, D/E, G/U, L, M, N, and R, with smaller additions to expand Buildings H, M, and Q were constructed during the second building campaign to designs by Balch Bryan Perkins Hutchison, Architects between 1955 and 1956. Further, Morningside HS is associated with the challenges of public-school integration from 1962 to 1969 in California and within the City of Inglewood itself.

The property has two periods of significance, the first ranging from 1950 to 1956 which encompasses the two original Mid-Century Modern style campus construction campaigns, and the second ranging from 1962 to 1969 which encompasses the challenges of racial integration at Morningside HS, which spans the arc of the first Black students enrolling at the school to the establishment of the Black Student Union. This second period of significance also largely corresponds with the broader shift in the City's racial demographics, as discussed in the historic context above. Character-defining site features include covered walkways, mature trees, expansive lawns, sloped topography, football field with surrounding track, concrete walkways and circulation patterns, and the flagpole and parking lot along Yukon Avenue. Character-defining architectural features present of the existing contributing buildings that comprise Morningside HS include horizontal composition and massing, simple geometric volumes, flat or shed roofs with cantilevered overhangs, exterior stucco, brick, or concrete, modular design, direct expression of structural systems, lack of ornament, and generous expanses of fenestration articulated in aluminum and steel frame windows.

Demolition of Buildings I, J, K, and L

Proposed work would include the demolition of Buildings I, J, K, and L in order to make space to construct new playfields, including a football field and tennis courts, in addition to a new building that would replace Building L, which will be discussed below. Of these four buildings to be removed, three were constructed as part of the first building campaign between 1950 and 1951, designed by Ralph C. Flewelling and Walter L. Moody Architects, and one was constructed as part of the second building campaign, designed by Balch Bryan Perkins Hutchason, Architects. Of the total 16 contributors that comprise the potential district, 4 would be demolished under the Project, and 12 contributors would remain. Therefore 75% of the original campus as constructed between 1950 and 1956 would remain intact. The proposed Project would retain 12 buildings constructed between 1950 and 1956, a collection that would aptly reflect both of the two original building campaigns, and would retain the majority of the character-defining architectural features of the 12 buildings as enumerated above, leaving their integrity largely unimpaired. However, the demolition of Buildings I, J, K, and L would be considered an adverse effect. The Project has generally been designed in conformance with the Standards and the buildings and campus landscape that would be retained under the Project would still collectively retain sufficient historic significance and historic integrity from the original period of significance and the majority of the potential district (75%) would be retained. As a result, Morningside HS would still convey its significant historical and architectural associations for eligibility as a potential historic district after project completion. Thus, the Project would not fully conform with the Standards because 4 contributing buildings would be demolished and the Building U, Auditorium which is a prominent architectural feature and a public gathering space would be potentially altered.

New Construction, Building L

A new Building L would be constructed in the location of the existing contributing Building L. Extant Building L is structurally unsound and is not safe to occupy and would be demolished. The new Building L would be designed generally within the existing footprint of the existing Building L, and would be oriented similarly, facing south. The design of the new construction while contemporary in style, would reflect the surrounding contributing Modern style buildings

including Building R, Cafeteria with its horizontal orientation and regularly spaced bays, and Building N, Gymnasium and Pool with its gabled and recessed entrance – which are the two closest contributors to the proposed new construction. Proposed new Building L has been carefully and deliberately designed to be compatible with the surrounding historic district, as it includes several architectural features that reference the unadorned, utilitarian original Mid-Century Modern Morningside HS buildings found at the campus including a partially flat canopy roof, generally rectangular footprint, a single-directionally oriented facade, monolithic volumes, regularly spaced bays, and horizontally oriented groupings of multi-lite windows. As new Building L has been designed in conformance with Standards 9 and 10, as analyzed below, it would have a less than significant indirect impact on the potential Morningside HS historic district that would be retained and rehabilitated. However, since it would replace an existing contributing building that would be demolished, new Building L would result in a direct adverse impact on the potential historic district. As discussed above, the majority of the potential district (75%) would be retained. Furthermore, the design of new Building L would conform with Standards 9 and 10 and would reduce potential impacts of the new construction to the historic district as far as feasible.

New Site Modifications

The extant playfields, including the contributing baseball diamond (c. 1950), contributing basketball courts (c. 1960) and non-contributing tennis courts (c. 1970), would be demolished. The playfields that would be demolished and reconstructed in the location of former contributing Buildings I, J, and K. Further site modification work would include the repair of sidewalks and access ramps, and security fence modifications and additions. Select covered walkways would be demolished, while the majority of them would be repaired to their original condition. The demolition of the baseball diamond and basketball courts, which are contributing features to the potential historic district, would be considered an adverse effect. However, new playfields with the same function would be constructed on the campus and would continue in the same use. Further, the new associated smaller concession structures would be low scale and compatible in a minimal, utilitarian style. The damaged and deteriorating covered walkways would be retained and repaired, and overall, the majority of the extant contributing covered walkways would remain. Therefore, the proposed Project would have an adverse effect to the campus playfields and associated site features including the covered walkways.

Exterior and Interior Modifications to Building G/U, Auditorium and Building H

The proposed changes to Buildings G/U and H would include the potential removal of original finishes and replacement with contemporary finishes, windows, doors, flooring, and insulation. Teaching spaces would be modernized. While it may be necessary to demolish/alter several of the identified interior character-defining features in order to modernize Buildings G/U and H, the removal of some interior contributing features would generally not compromise the overall integrity of the contributing buildings or the campus as a potentially eligible historical resource as these changes would largely conform with the Standards and impacts under CEQA would be less than significant because the buildings would retain sufficient integrity as contributors to the potential historic district. However, the proposed tenant improvements of Building U, Auditorium have a potential to result in an adverse effect because contributing character-defining features may be removed or altered.

Conclusion

The Project would have a less than significant direct impact on historical resources because the majority of the potential historic district (75%) would be retained. There are 16 contributing buildings and the Project would remove four of them. Furthermore, this analysis found that the proposed Project is largely in conformance with the Standards but does not fully conform because the Project would demolish four contributing school buildings and would include tenant improvements to contributing Building U, Auditorium, that may adversely affect its character-defining features. In addition, a new Building L would be constructed to replace the existing original Building L. Therefore, mitigation measures are required to reduce potential impacts to less than significant. It is recommended that once final design and 90-100% construction plans become available for Building U, Auditorium, final design plans be reviewed by a qualified architectural historian for conformance with the Standards. Furthermore, it is recommended that the potential historic district be documented in a recordation report in accordance with the Historic American Building Survey (HABS) guidelines. In addition, for features that would be removed or altered in Building U, Auditorium, it is recommended that they be considered for salvage, reuse and/or interpretation, and that an interpretation program such as a permanent on-campus exhibit be developed to preserve the significant history of the school for educational purposes. **With these mitigation recommendations incorporated, the proposed Project would have a less than significant impact on historical resources after project completion.**

Indirect Impacts

Historic Built Environment

The Proposed Project was analyzed to determine if it would result in a substantial adverse change to the integrity of potentially eligible historical resources within the immediate surroundings of the Project Site. Currently, there are no National or California register-listed historic resources located adjacent to the Project Site. There were three identified potential historic resources within a 0.5-mile radius of the Project Site, including: 10701 S. 10th Avenue, Los Angeles County Fire Department City of Inglewood Fire Station 170; 3620 102nd Street, Aku Aku Polynesian; and 3921 and 3947 W. 104th Street, Lockhaven Christian School. These three potential resources are described earlier in the report, and none would have views of the Project Site nor would they be physically impacted by the proposed Project. **As such, indirect impacts would be less than significant.**

Secretary of the Interior's Standards Review

Under CEQA, a project that follows the Secretary of the *Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing, Historic Buildings or the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* (1995), Weeks and Grimmer, shall be considered as mitigated to a level of less than a significant impact on the Historical Resource.[177] The Proposed Project involves improvements to a potential district that is considered historically significant due to its association with events that have made contributions to the broad patterns of

[177] California Environmental Quality Act, 15064.5 (b)(3).

California's and Inglewood's history and for its architectural merit. Therefore, pursuant to CEQA, the Proposed Project needs to be evaluated for its conformance with the Standards.

As previously described earlier in this report, the subject property contains a collection of historic-period educational buildings that comprise a historic district that is considered to be a potential historical resource for the purposes of CEQA. The Project would rehabilitate Buildings G/U and L, which are contributing Buildings to the potential historic district. The Project would also construct several new buildings including Building L, and structures including a new concession stand and playfield support structures, and reconfigure the playfields by constructing a new baseball diamond and basketball courts.

Standard 1*: A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.*

Under the Project, the subject property would continue to operate as a high school and be used as it was historically. While modernization of the existing original buildings will be necessary, these improvements would require minimal change to their distinctive materials, features, spaces and spatial relationships. Two of the contributing playfields, the baseball diamond and basketball courts, would be removed, and new facilities would be constructed on campus, allowing for the same original use to continue on the Project Site. Since the subject property would continue to be used as it was historically, and would require limited change to the original buildings and campus that comprise the potential historic district and the majority of the potential district would be retained (75%), the Project would result in a minimal change to the potential historic district and would conform with Standard 1.

Standard 2*: The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.*

Buildings I, J, K, and L, or four of the sixteen buildings that contribute to the potential Morningside HS historic district would be demolished as part of the Project in order to consolidate the campus, and to make space for the construction of replacement playfields and associated smaller structures. This would allow for 75% of the contributing building constructed between 1950 and 1956 to remain upon Project completion, reflecting a substantial amount of character-defining features at the property. Additional changes to rehabilitate select canopies and walkways would further support the historic use of the property, and reinforce original distinctive materials and spatial relationships.

Exterior and interior modifications to Building G/U and Building H would be undertaken sensitively, to compliment the existing historic character by replacing materials in-kind or compatibly, and retaining original character-defining features as possible. The Project would substantially conform to Standard 2 because all exterior and some interior features at the remaining Buildings G/U and H would remain intact and preserved.

However select demolition of four contributing Buildings I, J, K, and L and associated playfields would involve the loss of original historic character. Therefore, the Project would not fully conform to Standard 2.

Standard 3*: Each property will be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.*

The proposed Project does not involve the construction of buildings or elements that include conjectural features from other buildings. The proposed campus improvements include rehabilitation and new construction that would allow the campus to continue operation at a smaller scale. Campus improvements would maintain existing footpaths and canopies, while removing others, in addition to relocating the baseball diamond. Proposed new Building L has been designed as a contemporary building that reflects the existing Mid-Century Modern campus but does not copy features and include contemporary building fabric and space planning such that it would be recognized as a physical record of its time. As such, the Project would conform with Standard 3.

Standard 4*: Changes to a property that have acquired historic significance in their own right will be retained and preserved.*

Morningside HS was largely constructed over the course of two building campaigns, one between 1950 to 1951, and the second between 1955 and 1956. These two building campaigns comprise the first period of significance, which ranges from 1950 to 1956 and is associated with notable architects and as a Mid-Century Modern style school plant. Sixteen buildings remain as part of the first period of significance. The second period of significance is 1962 to 1969, which encompasses the challenges of racial integration at Morningside HS. The 16 extant buildings were present during the second period of significance, during which time no additional buildings were constructed. The project would retain and preserve 12 of the buildings constructed as part of the later construction campaign, which acquired significance for their association with the Mid-Century Modern style, the notable architects C. Flewelling and Walter L. Moody Architects and Balch Bryan Perkins Hutchison, Architects, and later, for their association with integration at the school and within the City of Inglewood. However due to the demolition of four contributing Buildings I, J, K, and L and associated playfields, the Project would not conform with Standard 4.

Standard 5*: Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.*

The Project would retain 12 of the contributing buildings that comprise the potential Morningside HS historic district, in addition to landscaped features and playfields. At the contributing buildings this would include the retention of: horizontal design composition and massing; generally one to two stories; simple geometric volumes; flat or shed roof, often with wide, cantilevered overhangs; exterior materials including stucco, brick, and concrete; modular design; aesthetic qualities derived from use of simply treated materials and excellent craftsmanship; direct expression of structural systems, often in wood or steel post-and-beam; lack of historicizing ornament; and generous expanses of fenestration, including bands of grouped multi-light

aluminum and steel frame windows. The campus site character-defining features that contribute to the potential historic district which would be retained as part of the Project include repair of select sheltered canopies and retention of select concrete walkways; the retention of: the football field with surrounding track, mature trees; select expansive lawns; sloped site topography; and the parking lot along Yukon Avenue. However, several canopies and existing site features would be removed as part of the Proposed project, including the existing baseball diamond, basketball courts, and select canopies. The existing football field and surrounding track would be upgraded in keeping with the original configuration and design. As such, overall, the project would preserve the majority of the character-defining features. Thus, overall, the physical features, materials, finishes, and construction techniques that characterize the Morningside HS campus will remain. As such, the Project would conform with Standard 5.

Standard 6*: Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*

The Project proposes to retain many of the original character-defining features at Morningside HS, including 75% of the contributing structures. The proposed Project includes the rehabilitation of select canopies along the walkways, and tenant improvements and upgrades to Buildings G/U and H. However, it will be necessary to remove or alter some interior features in order to modernize the school buildings for continued use. Repair or replacement of original doors or other features shall conform with the Standards, and features to be retained shall be repaired or if deteriorated beyond repair shall be replaced in kind. The District shall follow the rehabilitation guidelines for specific materials and features related to Building G/U in the CDF matrix (**Appendix E**). Where damaged, character-defining features shall be repaired rather than replaced, and if deteriorated beyond repair, they shall be replaced in-kind. Documentary evidence on the historic appearance and construction history of the school would be provided in the HABS reports under Mitigation Measure MM-HR-1.

Standard 7*: Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.*

The Project shall not employ any chemical or physical treatments that would cause damage to historic materials. If chemical or physical treatments are necessary and appropriate, they will be undertaken using the gentlest means possible. As stipulated by MM-HR-4, a qualified preservation consultant or conservator shall be consulted as part of the preservation planning and/or construction monitoring process, prior to undertaking any chemical for physical treatments. With inclusion of this condition, the Project would conform with Standard 7.

Standard 8*: Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.*

Ground disturbing activity that would occur under the proposed Project would involve excavation in the northeast portion of the campus. While most of the Project Site has been impacted by previous construction, proposed activities may impact previously undisturbed ground. These

actions have the potential to encounter previously unidentified, buried archaeological deposits. As such, implementation of the Proposed Project could cause a substantial adverse change in the significance of an archaeological resource, if resources are found during construction, and therefore mitigation would be required. As further detailed below, mitigation measures would include retaining a qualified archaeologist to evaluate unanticipated discoveries.

Standard 9*: New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*

As discussed above, Building L has been designed to be compatible with the historic campus and would reinforce spatial relationships that characterize the property as it would be constructed in place of the existing Building L. Further, the new building would be differentiated from the old, existing Building L in order to protect the integrity of the potential historic district. The new construction would involve the erection of a one-story stand-alone classroom building located centrally within the historic Morningside HS campus. Building L would reference Building R, Cafeteria with its horizontal orientation and regularly spaced bays, and Building N, Gymnasium and Pool with its gabled and recessed entrance – which are the two closest contributors to the proposed new construction. Proposed Building L has been carefully and deliberately designed to be compatible with the remaining historic district, as it includes several architectural features that reference the simple, utilitarian original Mid-Century Modern Morningside HS buildings found at the campus including a partially flat canopy roof, generally rectangular footprint, a single-directionally oriented facade, monolithic volumes, regularly spaced bays, and horizontally oriented groupings of multi-lite windows. The new building would be differentiated from the remaining contributing buildings in its contemporary concrete siding and finish, new windows, and contemporary space planning at the interior, which will allow for modern school functions to occur. The one-story height and elongated volumes of the proposed new Building L would be compatible in scale, massing and articulation with the majority of the original remaining buildings on campus. The new building would be designed in a manner that would complement the remaining Morningside HS campus by referencing several historic character-defining features, including general footprint, orientation, and volume, while still reading as a contemporary building due to the new design program and contemporary material palate to suite a 21st century high school. In this manner, the new construction would support spatial relationships that characterize the property and utilize compatible materials, features, size, scale, proportion and massing to protect the integrity of the remaining historic district and its environment.

Proposed new canopies would be constructed in locations where existing original canopies are too deteriorated to repair. Proposed new canopies would follow the footprint and height of the original, and would be differentiated from the original canopies in their materiality and detailing. Additional improvements at the campus would include the demolition of existing playing fields, and their construction in a different, but adjacent portion of the campus. The reconfiguration and modernization of the new playing fields would continue the functional uses of the playing fields.

Associated utilitarian concession structures would likewise be compatible and would not alter or destroy the existing spatial relationships on campus.

However, since the Project is still in design development, it is possible that additional potential impacts may occur as a result of proposed tenant improvements to the Auditorium, therefore it is recommended that additional plan reviews be completed by a qualified architectural historian of the final design and construction plans, and that construction monitoring be conducted by a qualified architectural historian due to the potential for unanticipated discoveries, to ensure conformance with the Standards and reduce potential impacts as far as feasible as required by CEQA.

Standard 10*: New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*

If the proposed new classroom building, Building L, and the campus improvements as mentioned above would be demolished in the future, the essential form and integrity of the potential historic district consisting of Buildings B, C, D/E, F, G/U, H, M, N, Q, R, S, and T would remain unimpaired. Therefore, the Project would conform to Standard 10.

Conclusion and Recommendations

ESA reviewed Project plans prepared by Lionakis issued between 2020 and 2022 for conformance with the Secretary of the Interior's Standards. The Proposed Project would modernize the existing Morningside HS, which would include the demolition of Buildings I, J, K, and L, the construction of a new one-story classroom structure, Building L, modifications to Buildings G/U and H, the construction of new playfields, and other campus and landscape improvements. All of the existing exterior historic character-defining features on remaining Buildings B, C, D/E, F, H, M, S, Q, R, S, and T would be retained and preserved and would be unaffected by the project. With implementation of the mitigation measures, the Project would not materially impair Buildings B, C, D/E, F, G/U, H, M, S, Q, R, S, and T or significantly alter the identified character-defining features of the buildings or of the landscape that contribute to their significance as contributing resources to the potential historic district. The Project would retain and preserve the horizontal design composition and massing; generally one to two stories; simple geometric volumes; flat or shed roof, often with wide, cantilevered overhangs; exterior materials including stucco, brick, and concrete; modular design; aesthetic qualities derived from use of simply treated materials and excellent craftsmanship; direct expression of structural systems, often in wood or steel post-and-beam; lack of historicizing ornament; and generous expanses of fenestration, including bands of grouped multi-light aluminum and steel frame windows; in addition to the football field with surrounding track, mature trees; select expansive lawns; sloped site topography; and the parking lot along Yukon Avenue.

Our analysis of the Proposed project found that the Project would have a less than significant direct impact on historical resources because the majority of the potential historic district (75%) would be retained and it would remain eligible after project completion. There are 16 contributing buildings and the Project would remove four of them. Furthermore, this analysis found that the

proposed Project is largely in conformance with the Standards but does not fully conform because of the Project would demolish four contributing school buildings and would include tenant improvements to contributing Building U, Auditorium, that may adversely affect its character-defining features. In addition, a new Building L would be constructed to replace the existing original Building L, but its design would conform with Standards 9 and 10 and would be compatible with the surrounding district. Therefore, due to the potential adverse impacts and because the project does not fully conform with the Standards, mitigation measures are recommended to reduce potential impacts as far as feasible.

It is recommended that the potential historic district be documented in a recordation report in accordance with the Historic American Building Survey (HABS) guidelines (MM-HR-1). The required HABS report has been completed by ESA and this mitigation measure has been satisfied. As future exterior and interior plans for the modifications to Building U, Auditorium are not finalized, it is further recommended that once final design and 90-100% construction plans become available for Building U, Auditorium they would be reviewed by a qualified architectural historian for conformance with the Standards (MM-HR-2). In addition, for features that would be removed or altered in Building U, Auditorium, it is recommended that they considered for salvage, reuse and/or interpretation, and that an interpretation program such as a permanent on-campus exhibit be developed to preserve the significant history of the school for educational purposes (MM-HR-3). Demolition activities and unforeseen circumstances that may arise during construction have the potential to damage character-defining features of the potential historic district and of Building U, Auditorium. Therefore, construction monitoring by a qualified preservation consultant is recommended to ensure potential damage would be avoided and that the project would be completed in conformance with the Standards. Additionally, during construction relevant final finish details and preservation treatment decisions may still need to be determined and would need to be reviewed for conformance with the Standards (MM-HR-4). With these mitigation recommendations incorporated, the proposed Project would have a less than significant impact on historical resources after project completion.

Mitigation Measures

Given the determination of eligibility concluded as a result of the study presented above, and in consideration of the evolution of the conceptual design being formulated for the Project implementation, the following measures would be required to mitigate impacts to historical resources to a level of less than significant for purposes of CEQA. Should close collaboration between the design team and ESA be instituted in following the measures outlined below, it is anticipated that the project would result in less than significant impacts in accordance with CEQA.

> **MM-HR-1:** Prior to the issuance of a building permit for the proposed Project, a recordation document that shall record the 16 eligible buildings and associated campus landscape and playfields within the identified potential historic district shall be commissioned by the applicant and prepared in accordance with Historic American Buildings Survey (HABS) Level III requirements. The recordation document shall be prepared by a qualified architectural historian who satisfies the Secretary of the Interior's Professional Qualification Standards for Architectural History pursuant to 36 CFR 61.

This document shall include a historical narrative on the architectural and historical importance of the building and its contributions to the history of the area and educational institutions. The document shall also record the existing appearance of the buildings in professional large format photographs. The buildings' exteriors, representative interior spaces, character-defining features, as well as the property setting and contextual views will be documented. The report shall record the history of the subject property and its physical condition, both historic and current, through site plans, historic maps, and photographs, as well as current photographs, written data, and text. The documentation will be organized in the HABS "short form" format to include the following sections: name, location, significance, description, history, sources, historians, project information, sketch map, and index of photographs. Selected photographic copies or original photographic prints (pursuant to HABS guidelines) of historic images showing the subject property and original surroundings will be included. Archival copies of the completed report shall be distributed to 1) the South Central Coastal Information Center (SCCIC) at California State University, Fullerton, 2) the Inglewood Public Library, and 3) the Morningside HS Library. The lead agency governing the Project is the Inglewood School District who would be responsible for ensuring that this mitigation measure is completed prior to the issuance of a grading permit and/or building permit for the proposed Project.

The required HABS report has been completed by ESA and this mitigation measure has been satisfied.

MM-HR-2: The applicant shall retain a qualified preservation consultant, meeting the Secretary of the Interior's Professional Qualifications Standards Architectural History, Architecture, or Historic Architecture pursuant to 36 CFR 61 and who has at least 10 years of experience in design review and collaboration applying the Standards (Qualified Preservation Professional) to review the final plans for all new proposed construction for Building U, Auditorium, to ensure conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards). Once the final design and the 90-100% construction plans become available, respectively, they shall be reviewed by a Qualified Preservation Professional for conformance with the Standards for Rehabilitation. Upon completion of the final design plans, and upon completion of the 90-100% construction plans, respectively, the Qualified Preservation Professional shall submit a draft report to and shall make recommendations necessary to bring the design into conformance with the Standards as far as feasible. After the applicant has made the final revisions, the Qualified Preservation Professional shall review the final construction plans and prepare a final report documenting conformance with the Standards. The final plan review report shall be submitted to the District along with the final plan set prior to project approval and issuance of a grading permit and/or building permit. The lead agency governing the Project is the Inglewood School District who would be responsible for ensuring that this mitigation measure is completed prior to the issuance of a grading permit and/or building permit for the proposed Project.

MM-HR-3: The applicant shall commission a qualified architectural historian to complete and assist the District implement a salvage and interpretation program. The architectural historian shall prepare a salvage inventory of character-defining features that would be removed or altered in Building U, Auditorium, that would be appropriate for salvage and reuse and/or interpretation. The applicant shall review the salvage inventory to determine which items may be feasible for reuse as a part of the proposed Project. Selected items identified for reuse will be incorporated into the project plans and reviewed for conformance with the Standards under MM-HR-2. The applicant shall also consider whether any of the items identified for salvage can be included in an interpretation program or in an on-campus exhibit. The remaining items shall be donated to a local history museum or other appropriate repository or donated to the public. Any remaining items shall then be disposed of. In addition, the applicant shall commission development and installation of an interpretive exhibit such as a permanent on-campus exhibit to display and explain the significant history of the school for educational purposes. The lead agency governing the Project is the Inglewood School District who would be responsible for ensuring that this mitigation measure is completed once the building construction has been substantially completed and prior to the issuance of an occupancy permit for the proposed Project.

MM-HR-4: Demolition activities and unforeseen circumstances that may arise during construction have the potential to damage character-defining features of the potential historic district and of Building U, Auditorium. Therefore, the applicant shall commission a Qualified Preservation Professional meeting the Secretary of the Interior's Professional Qualifications Standards Architectural History, Architecture, or Historic Architecture pursuant to 36 CFR 61 and who has at least 10 years of experience in design and construction review to conduct construction monitoring to ensure potential damage would be avoided and that the project would be completed in conformance with the Standards. Additionally, during construction relevant final finish details and preservation treatment decisions may still need to be determined and shall be reviewed for conformance with the Standards. The Qualified Professional shall conduct a kick off meeting with the demolition contractor, architect and general contractor prior to commencement of construction to review the demolition plan, methods and protection measures. Once demolition is complete, the Preservation Consultant shall conduct monitoring visits at pertinent intervals when construction activities have a potential to affect character-defining features, materials or finishes. The Preservation Professional shall address questions about preservation treatment and project details that arise during construction and provide treatment recommendations for conformance with the Secretary of the Interior's Standards for Rehabilitation. Each monitoring visit shall be documented in a monitoring report that shall be provided to the applicant's architect and contractor, and to the District. Once construction has been completed, the Preservation Professional shall conduct a final site walk and prepare a substantial completion report that shall document project conformance with the Standards. The lead agency governing the Project is the Inglewood School District who would be responsible for ensuring that this mitigation measure is completed prior to the issuance of an occupancy permit for the proposed Project.

Preparers' Qualifications

ESA

Margarita Jerabek-Bray, PhD

Historic Resources Director

EDUCATION

Ph.D., Art History, University of California, Los Angeles

M.A., Architectural History, School of Architecture, University of Virginia

Certificate of Historic Preservation, School of Architecture, University of Virginia

B.A., Art History, Oberlin College

32 YEARS EXPERIENCE

AWARDS

2020 Gold Nugget Merit Award, PCBC, Best Rehabilitation Project

2018 Merit Award, Environmental Analysis Document, Association of Environmental Professionals

2016 Preservation Design Award, Interpretive Exhibit, California Preservation Foundation

2014 Preservation Award, Los Angeles Conservancy

2014 Westside Prize, Westside Urban Forum

2014 Design Award: Westside Urban Forum

2012 Preservation Design Award, California Preservation Foundation

Margarita Jerabek-Bray, Ph.D., has 32 years of professional practice in the United States with an extensive background in historic preservation, architectural history, and historical archaeology. She specializes in American Architecture, Modern and Contemporary Architecture, Urban History and Design, and Cultural Landscape, and is a regional expert on Southern California architecture. Her qualifications and experience meet and exceed the Secretary of the Interior's Professional Qualification Standards in History, Architectural History, and Archaeology. Margarita assists clients with strategic advice and historic preservation consultation services to support project success. Highly experienced and solution oriented, she provides historic resources management and preservation consultation services for all stages of project development, from due diligence through planning and design, to preparation of required documentation for environmental review and permitting. She provides expert historic preservation services for environmental review and, when necessary, implements mitigation requirements and preservation treatment measures.

Margarita is a highly experienced and respected authority in the evaluation, management and treatment of historic properties, and is expert in the preparation of legally defensible documentation for compliance with Sections 106 and 110 of the National Historic Preservation Act (NHPA), National Environmental Policy Act (NEPA), Section 4(f) of the Department of Transportation Act, California Environmental Quality Act (CEQA), and local ordinances and planning requirements. She has managed and conducted hundreds of projects for public and private clients throughout California and the United States, and as primary investigator she has authored numerous historic resources technical reports, plan reviews, HABS/HAER/HALS reports, salvage inventories, rehabilitation plans, relocation plans, construction monitoring reports, interpretive programs, as well as curated exhibits, provided input for interpretive websites and assisted in the development of content for documentary films.

Margarita Directs ESA's Southern California Historic Resources Practice, leading a team of historians, architectural historians, and preservation specialists who are a part of ESA's more than 30-member Cultural Resources Group. She has conducted a broad range of planning and technical studies for development projects throughout Southern California. Her relevant on-call contracts with various agencies, policy documents, environmental compliance work, and historic preservation projects are summarized below.

PROFESSIONAL AFFILIATIONS

California Preservation Foundation

Santa Monica Conservancy

Society of Architectural Historians, Life Member

American Institute of Architects (AIA), National Allied Member

Neutra Institute, Fellow

Relevant Experience

Agency On-Call Preservation Contracts. Margarita currently manages ESA's on-call preservation consulting contracts with the City of Santa Monica, City of Hermosa Beach, and serves as principal investigator for historic resources for our on-call contracts with the City of Los Angeles's Department of Public Works Bureau of Engineering, and Los Angeles Unified School District.

Policy Documents. Margarita has contributed her preservation planning expertise to several projects including **Lincoln Specific Plan** (Whittier), and **CPA-7** (Culver Studios). Her knowledge of preservation policy and law is also demonstrated in the **Citywide Survey and General Plan Update** completed by ESA for the City of Hermosa Beach, and the **Culver City General Plan Update**.

City of Santa Monica On-Call Historic Preservation Services, Santa Monica, CA. *Project Manager/Principal Architectural Historian.* Dr. Jerabek is the primary point of contact and contract administrator for ESA's on-call contract for historic preservation services with the City of Santa Monica. Under her 12-year tenure, ESA's historic division has prepared hundreds of studies including **preliminary assessments, landmark assessments, structure of merit assessments, Secretary of the Interior's Standards plan reviews** and preservation recommendations, **landscape assessments, character-defining features reports** and **CEQA impacts analyses**.

Historic Resources and Preservation Consultation Service for Santa Monica City Hall, City of Santa Monica, CA. *Project Manager/Principal Architectural Historian.* Prepared a **Section 106 Effects Evaluation** report and provided mitigation services pursuant to a **Memorandum of Agreement for Structural Seismic Upgrades, ADA Improvements, Relocation of Wood Paneling, and Adaptive Re-use of the Historic Jail** under a grant from the Federal Emergency Management Administration (FEMA). Dr. Jerabek was the primary point of contact, provided project management and agency coordination, and served as principal architectural historian for the project. ESA prepared a **HABS report** for the historic jail located in the northeast wing of City Hall; conducted **Plan Reviews** and provided preservation recommendations for the seismic upgrades; reviewed proposed ADA improvements and provided recommendations to avoid impacts; reviewed the wood paneling relocation plans and worked with the City to select a qualified master craftsman and conducted construction monitoring for the project; reviewed the jail rehabilitation project for conversion of the two-story jail into an IT Center and offices and provided design consultation for conformance with the Standards, including in-kind replacement of the historic windows; curated, designed and oversaw installation of an interpretive exhibit in the IT Center lobby. Follow-on services for the City included **Preservation Consultation and Monitoring** for restoration of the entrance to City Hall, and **Paint Analysis** and color recommendations for repainting City Hall. Dr. Jerabek also conducted a **Landscape Analysis** and provided **Plan Reviews** for the City's **Ken Genser Square** and **Tongva Park** projects that received a 2014 *Design Award* from the Westside Urban Forum.

City of Hermosa Beach On-Call Historic Preservation Services. *Project Director.* ESA has performed a number of surveys, Certificate of Appropriateness, and CEQA compliance reviews for historic structures while serving as a historic preservation consultant for the City of Hermosa Beach. Projects include historic resources surveys on three of the oldest commercial buildings in the downtown area of Hermosa Beach for the City of Hermosa Beach: **Bank of America Building** at 90 Pier Avenue, the **Hermosa Hotel** at 26 Pier Avenue, Art Deco-style **Community Center**, and the Neoclassical Revival-style **Bijou Theatre** located at

1221-1227 Hermosa Avenue. ESA prepared a comprehensive assessment of each building, and reviewed all plans for compliance under the local preservation ordinance and CEQA, which stipulate the use of the Secretary of the Interior's Standards for Rehabilitation as mitigation. Upon implementation of rehabilitation work on the Bijou, ESA also monitored all construction work until final completion. ESA was later commissioned to undertake a Certificate of Appropriateness and CEQA compliance review of interior tenant improvements to the Bijou Theater for conformance with the Secretary of the Interior's Standards. ESA has carried out site reviews of the work to examine the scope and nature of selective demolition and new construction, provided guidance on technical preservation matters, and undertook a substantial completion review of the works. Most recently, ESA provided project review for tenant improvements, and conducting construction monitoring and oversight for restoration of ornamental plasterwork in the Bijou Building. Additionally, ESA provided paint analysis and restoration treatment recommendations for the Art Deco-style Hermosa Beach Community Center.

Hermosa Beach General Plan Update and EIR, City of Hermosa Beach, CA. *Project Manager for Cultural Resources/Principal Architectural Historian.* Managed ESA's Cultural Resources scope of work and collaborated with Raimi & Associates and PMC to provide consulting services to the City of Hermosa Beach for preparation of a **Comprehensive Integrated General Plan and Coastal Land Use Plan Update and EIR Focused on Sustainability and Low Carbon Future**. Directed city-wide reconnaissance survey to identify potentially eligible historical resources. Developed historic contexts and themes for the City's historical resources. Reviewed and provided recommendations for revisions to the preservation ordinance. Provided input for preparation of historic preservation goals and policies for the General Plan update. Managed preparation of the cultural resources technical report, and oversaw preparation of the historic resources, archaeological and paleontological discussions and analyses for the EIR.

City of Long Beach, Environmental Consultation and HABS Documentation. Margarita has assisted the City of Long Beach by preparing documentation for the **City Hall and Library Complex HABS** and associated landscape plaza; she provided historic resources support for the City's EIR, and prepared documentation for the **Atlantic Theater HABS** and an **Interpretive Exhibit** for installation in the new North Long Beach Public Library.

City of Whittier, Preservation Consultation Services for the Public Library Rehabilitation Project. Margarita lead a **Historical Resources Assessment and Impacts Analysis** and provided design consultation for rehabilitation of the Modern-style Whittier Library. Constructed in 1958, the property is significant for its association with Mid-Century Modernism, postwar period institutional properties, and architect William Henry Harrison. ESA found that the library possesses sufficient historical significance and architectural merit to convey its significant as an individual resource under National Register Criteria A and C. Margarita's role on the project was to direct and manage the ESA project team, coordinate with the architect and City, provide review and internal quality assurance/quality control to the ESA team in the preparation of both the Historic Resources Assessment to evaluate the significance and integrity of the building, as well as for the plan review that was conducted to evaluate the proposed project's conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties, and hearing attendance. ESA is

currently completing a **HABS report** as baseline documentation for the rehabilitation project.

City of Burbank, Historic Preservation Consultation Services. Margarita directed preparation of ESA's historic resources technical report and CEQA impacts analysis, and prepared the historic section of the **IS/MND for the Burbank Reservoir No. 1 Replacement Project**, which evaluated the eligibility of the Burbank Reservoir facility and analyzed the potential impacts of the Project for compliance with the CEQA. Margarita directed preparation of ESA's historic resources technical report and historic resources EIR section for the **Burbank Bob Hope Airport Replacement Terminal Project EIR**, which evaluated the eligibility of the buildings and structures for eligibility as a potential historic district and as individual resources, and analyzed the potential impacts of the Project for compliance with the CEQA. While the Airport did not appear eligible as a historic district, ESA evaluated 11 hangars and buildings over 45 years in age as potential individual resources. The majority of the buildings and structures were found ineligible, however, Hangars 1 and 2, which are the earliest intact hangars, were recommended eligible for the National Register, California Register, and for local listing. Under contract with the City of Burbank, Margarita managed and conducted a historic resources impacts analysis and plan review for **Rehabilitation of the Casting Building** as a Fitness Center, by Marmol Radziner and Associates, AIA, located in the Disney Studio's Historic District. The Project repurposed and expanded the existing 4,000 square feet Casting Building on the Studio Lot by about 8,700 square feet for an Employee Fitness Center adjacent to the historic Commissary. Margarita provided design consultation for conformance with the Secretary of the Interior's Standards to rehabilitate the Casting Building as a fitness center. To reduce potential impacts, Margarita prepared a HABS report to record the Casting Building in professional large format HABS photographs and a narrative history and description of the building.

SoCal Historic Resource Surveys. Margarita has managed and conducted several large historic resources survey projects including three surveys for the **Adelante-Eastside** (Boyle Heights), **Wilshire Center/Koreatown**, and **Normandie 5** redevelopment areas that were among the earliest to utilize *SurveyLA* tools and methods and to employ the Multiple Property Documentation Approach, working in close collaboration with the Los Angeles Office of Historic Resources. These surveys have been incorporated into the **Los Angeles Citywide Survey**. Other notable accomplishments include **Hermosa Beach Citywide Survey**, and **Santa Monica North of Wilshire Survey** for which she served as Project Director.

Mills Act Applications and Architectural Conservation. Margarita has assisted applicants in Los Angeles, Beverly Hills and West Hollywood with the preparation of Mills Act Applications. Her expertise in the preservation of Modern architecture is represented by the Landmark nomination and Mills Act Application for Victor Gruen's **Rosenstiel Residence**, 1210 Coldwater Canyon Drive in Beverly Hills. Her forward-looking landmark nomination for a Mills Act application for the Post-Modern **Sun Tech Townhomes** in Santa Monica, illustrates her broad ranging knowledge in resources of the recent past. Her conservation and interpretation skills are represented by the award-winning **Montebello Home Savings and Loan** project that involved cleaning and restoration of the historic bank building and art works designed by Millard Sheets Studio, and design and installation of a 5-panel interpretive exhibit and rediscovery of a lost tapestry originally designed for the building, for which she received a *California Preservation Design Award, 2016*. Her in-depth and award-winning preservation work includes the **RMS Queen Mary Survey of Fine**

and Decorative Art, the **RMS Queen Mary Historic Structure Report**, and the **Queen Mary Conservation Management Plan** (*California Preservation Foundation Preservation Design Award, 2012*).

Environmental Documentation and Compliance with CEQA. Margarita has prepared a full range of CEQA documentation for historic preservation projects throughout greater Los Angeles including Categorical Exemption Letters, assessments and plan reviews for Certificates of Appropriateness, Initial Studies/MNDs, Focused EIRs, and EIRs. A partial list of important environmental documents for projects in Los Angeles involving substantial historical analysis completed by Dr. Jerabek-Bray includes the **LAX Specific Plan Amendment Study EIR, Academy of Motion Pictures Project EIR, The New Century Plan EIR for Westfield, Washington Square EIR, Sunset Doheny Mixed-Use EIR, One Santa Fe Mixed-Use MND, Lindbrook & Gayley Mixed-Use MND, 6230 Sunset Mixed-Use Project EIR, Hollywood Center EIR, Palladium EIR, Sunset and Crescent Heights EIR, and Yucca and Argyle EIR**. In Santa Monica she contributed to the **Fairmont Miramar Hotel & Bungalows Revitalization Plan EIR, St. John's Health Center Development Agreement Addendum EIR, Santa Monica Pier Gangway Project and Phase 4 Structural Upgrade**, and CEQA support for the **Santa Monica-Malibu Unified School District-Wide Facilities Plan**. In Pasadena her experience includes the **Glenarm Power Plant Repowering Project EIR**. In Long Beach she provided expertise and support for the **Art Exchange Redevelopment Project EIR** support, and the **Golden Shore Master Plan EIR**.

Educational Facilities and University Campuses, CA. *Principal Investigator/Project Manager.* Dr. Jerabek-Bray has conducted numerous evaluations of school and university campuses throughout Southern California. Under ESA's on-call contract with the Los Angeles Unified School District, she has managed and completed over 30 task orders involving historic resources, including campus assessments, character-defining features analysis, and project reviews for compliance with CEQA. For example, Margarita managed and conducted preparation of a historic resources technical report for Jefferson High School and provided preservation design consultation for this site-specific school upgrade and modernization project under the District's School Upgrade Program (SUP). The proposed project included the rehabilitation of existing character-defining buildings and landscapes, demolition and removal of non-contributing buildings, and construction of new facilities. Rehabilitation work included modernization and seismic upgrade to existing buildings. Because the school site is considered a historical resource under CEQA, Margarita provided design consultation for conformance with the Secretary of the Interior's Standards to reduce potential project impacts to less than significant. Once project plans were developed, Margarita oversaw review of the proposed project by ESA historic staff and completed impacts analysis findings regarding potential project impacts to identified historical resources that would be affected by the project. Margarita also provided project management, oversight and contributed to the preparation of CEQA and NEPA procedural guidelines to help the Los Angeles Unified School District (LAUSD) to comply with the historical resources requirements of CEQA and NEPA, and to implement practical approaches to preserving culturally significant resources whenever possible. The LAUSD's Office of Environmental Health and Safety requested the preparation of CEQA and NEPA guidelines, in addition to design guidelines and treatment approaches, specifically in support of the School Upgrade Program, and generally to guide ongoing repair and maintenance work on these sites. The guidelines build upon the District's ongoing efforts to identify historical

resources, including the recently updated Historic Context Statement, survey of 55 campuses, creation of an ArcGIS-compatible database with current and previous survey results, and a Historic Resources Inventory. Dr. Jerabek-Bray worked with LAUSD and facilities staff to determine the scope, class, and type of projects that would impact historical resources and need to be addressed in the procedural guidelines. As a final work product, Dr. Jerabek-Bray authored a CEQA and NEPA procedural guidelines document that included the following sections: introduction, regulatory setting, environmental setting, project description, management and planning guidelines, procedural low charts for CEQA and NEPA/Section 106, and standard mitigation measures.

Margarita served as the project manager and principal investigator for the district-wide cultural resources survey for Long Beach Unified School District (LBUSD) which included the evaluation of 70 potentially eligible District school facilities for listing in the National Register and California Register, and included preservation guidelines for the district-wide facilities modernization program. She conducted CEQA Compliance reviews for select projects including rehabilitation of Long Beach Polytechnic Auditorium and Woodrow Wilson Auditorium. Margarita completed a district-wide historic resources survey for the Santa Monica Unified School District, and provided preservation consultation for modernization and additions to selected school sites.

As part of the larger USC Master Plan Project Margarita prepared a historic resources analysis for the USC Student Union Project IS/MND evaluating the Formalist Modern Norman Topping Center and impacts to the adjacent Commons Building and surrounding historic district. She also prepared a HABS report for the Schoenburg Institute at USC. Other HABS reports for educational facilities include the Gymnasium at the University of La Verne, and the Administration Building at Harvard-Westlake Academy.

Harkham Hillel Hebrew Academy Renovation and Expansion Project, Historic Resources Assessment and Impacts Analysis, Beverly Hills, CA. *Principal Investigator/Project Manager*: Margarita directed the historic significance analysis of two school buildings—the original Oakhurst Building designed by master architect Sydney Eisenshtat in 1963 in the Modern Style and the Doheny Building constructed in 1989 and designed by Harshad Patel. She oversaw preparation of an intensive-level Historic Resource Assessment Report for the two buildings in accordance with the California Office of Historic Preservation's requirements for preparing historic resource evaluation reports. ESA found that the Oakhurst Building is eligible for listing on the National Register of Historic Places and the California Register of Historical Resources under criteria A/1 and C/3, but it did not meet the requirements for local eligibility under the City of Beverly Hills criteria. The client plans to rehabilitate the existing buildings, which would be updated for current use and continue to function as school buildings. The proposed project would add two additions to the rear of the property in order to accommodate additional classroom and gymnasium space. Margarita oversaw preparation of a character-defining features analysis and provided design consultation for conformance with the Secretary of the Interior's Standards to reduce potential project impacts to less than significant. She also conducted an impacts analysis of the proposed project and prepared a preservation plan that was incorporated into the project as a project design feature to ensure the project would meet the Secretary's Standards for Rehabilitation. The project has been reviewed and approved by the City of Beverly Hills as an Initial Study/Mitigated Negative Declaration.

Rehabilitation of the Dunbar Hotel, 4255 S. Central Avenue, Los Angeles, CA. *Project Manager/Principal Architectural Historian.* As a Project Manager, Dr. Jerabek-Bray directed a careful space-by-space inventory of character-defining features (including all windows) associated with the Dunbar Hotel's period of significance (1928-1970). This included photo documentation of each feature along with a written description, condition, and treatment options. ESA recorded 425 character- defining features and spaces into an electronic database. Dr. Jerabek was principal author for the rehabilitation report that included a project description, methods, historical background and construction history, accompanied by historic photographs, an architectural description of existing conditions, a maintenance plan for high-integrity features, a restoration plan for low-integrity features, and a replication plan. The written report also provided a list of any issues and concerns that should be taken into account during the building rehabilitation and for the long-term preservation of the Dunbar Hotel. The hotel reopened in June 2013 as a senior living facility amidst local fanfare, "An encore for the historic Dunbar Hotel," Los Angeles Times, June 11, 2013. The project was the recipient of the 2014 *Westside Prize* from the Westside Urban Forum and recipient of a 2014 *Preservation Award* from the L.A. Conservancy.

Historical Resources and Preservation Consulting Services for The Culver Studios, Culver City, CA. *Project Manager/Principal Architectural Historian.* Since late 2014, Dr. Jerabek-Bray and ESA' s Historic Resources Practice has provided a suite of services including historical resources evaluation, environmental review and documentation, and historic preservation consultation services for the CPA-6 Specific Plan, and the CPA-7 Specific Plan known as "The Innovation Plan," a blueprint for the future of The Culver Studios. Dr. Jerabek is the point of contact for historic services, attends client and city meetings, attends public hearings, provides technical direction and advice, directs and conducts the preparation of report deliverables, directs and conducts construction monitoring, and acts as the City's preservation officer for the Innovation Plan. The Plan will transform the 14.3-acre Studio into a new media production hub, keeping the Studio on the vanguard of changing production practices in the entertainment industry. The Culver Studios is a motion picture studio in downtown Culver City established in 1919 by Thomas Ince, and eventually became the home of RCA, one of the "Big Eight" major motion picture companies in the Los Angeles metropolitan area. The Studio was the production site of historically significant motion pictures like King Kong, Gone with the Wind, and Citizen Kane. The Innovation Plan will restore and re-group historic structures adjacent to the Mansion, build new support buildings near existing historic sound-stages, and establish a creative campus in the core of the 14.3-acre studio lot. The Studio's 100-year history will be showcased, historic bungalows will be preserved, and original landscaping in front of the Mansion will be restored. The Innovation Plan balances the need to provide state-of-the-art studio facilities, while retaining the Studio's unique ambiance and prominent place in the community. ESA surveyed and evaluated the Studio's historical resources, provided input to the development of The Plan to reduce impacts to historical resources, completed HABS report for Bungalows S, T, U and V, prepared a Relocation and Rehabilitation Plan for the bungalows, conducted construction monitoring for relocation of the bungalows, conducted plan reviews for tenant improvements to the Mansion and associated historic buildings in the historic core, conducted a landscape analysis, and provided documentation and input for the landscape restoration. ESA also prepared the environmental documentation for The Innovation Plan EIR, and is

implementing the mitigation program for historical resources including HABS documentation of Stages 2/3/4 and a salvage program, preparation of a preservation plan for the Studio, and development of an interpretive program for the Studio.

Historic Resources and Preservation Consultation Services for the Redevelopment of the Fred C. Nelles State Reform School, Whittier, CA. *Project Manager/Principal Architectural Historian.* The Fred C. Nelles Correctional Facility is a listed California State Landmark, and is significant as the state's first reform school for boys. The 1920s-1930s Tudor Revival-style campus is currently vacant and will soon be redeveloped as a multi-use residential and commercial project, "The Groves", entitled under the certified Lincoln Specific Plan EIR. For over a decade, Dr. Jerabek-Bray has been providing Historic Resources and Preservation Consultation services to the developer, Brookfield Homes. Work began with preparation of a historic resources assessment report to clarify the regulatory status and assessed the potential eligibility of a historic district. No district was found to be present, but eight individual resources were identified. Margarita conducted an opportunities and constraints analysis and provided input to the developer on managing impacts to historic resources and the feasibility of adaptive reuse of the individual buildings for the project. She directed preparation of feasibility studies for the EIR, that were peer reviewed by the City's consultants. She provided peer review of the Lincoln Plan EIR on behalf of the developer, and attended city meetings and hearings for the EIR. Once the EIR was certified, she worked with the developer's architect to prepare rehabilitation plans for the individual resources to be retained and adaptively reused. The rehabilitation plans were peer reviewed by the City and the City's preservation consultant. She directed ESA's historic team in the completion of a HABS/HALS for the campus, with photography by Positive Image. She also worked with Eye-Glass Productions on a documentary film, and oral histories. Dr. Jerabek-Bray assisted the client to implement a full suite of mitigation measures including a heritage trail, a signage program, oral histories, salvage program, and construction monitoring for rehabilitation historic buildings. She recently completed consultation services and construction monitoring for adaptive reuse of the school's Commissary as a community center (The Commons), which is the first historic building to be restored. The Commons project received a Gold Nugget merit award (2020) for best rehabilitation project from Pacific Coast Builders Conference (PCBC).

Home Savings and Loan Art and Architecture Conservation Services, Interpretive Exhibit, Montebello, CA. *Project Manager/Principal Investigator*. Margarita provided project management and oversight for the conservation work of the art and architecture and an interpretive exhibit for the Montebello branch of Home Savings and Loan Association. Constructed in 1973, the Montebello branch was designed by Millard Sheets (1907–1989), an accomplished, nationally prominent artist and designer, with integrated art works by the Millard Sheets Design Company. The building and art works were preserved in preparation for the building's new use as a medical office by PIH Health. ESA provided oversight for the conservation work undertaken by Preservation Arts. Additionally, Margarita assisted with the development of a project schedule, conducted conservation monitoring and documentation, and provided project oversight during the implementation of the conservation project to ensure that the cleaning and repair of the art works and exterior architectural materials was conducted in accordance with accepted standards for art and architectural conservation work, that the work completed is of acceptable quality, and that the project stayed on schedule and within budget. After the conservation work was completed, she oversaw the development of an interpretive exhibit to

beautify the interior and protect the building's important art, architecture, and history. The exhibit contains professionally mounted permanent narrative panels and photographic enlargements with captions illustrating the key information about the Montebello Branch and its historic use. One of the highlights of the interpretive exhibit is a reproduction of the original tapestry hung its original location for which ESA coordinated with the Mingei International Museum. The project was the recipient of a prestigious 2016 *Preservation Design Award* from the California Preservation Foundation.

Rancho Los Amigos South Campus EIR, County of Los Angeles, Department of Public Works, Downey. CA. *Project Manager/Principal Architectural Historian*. The County of Los Angeles (County) proposes redevelopment of a portion of the Rancho Los Amigos (RLA) South Campus which is located in the City of Downey. The 74-acre RLA South Campus was the home of the "Los Angeles County Poor Farm" that was established in 1880s to provide room and board to indigent citizens in exchange for agricultural labor, then served as an infirmary and later evolved into a hospital facility in 1932. The RLA South Campus functioned as a major hospital complex from 1956 to the 1990s, when it was abandoned. The RLA South Campus is currently unoccupied and has been designated as the RLA Historic District in the National Register of Historic Places. The County is proposing redevelopment of a 21-acre portion of the RLA South Campus with County uses, including a Sheriff's Station Crime Laboratory, Internal Services Department Headquarters, and Probation Department Headquarters. The project will include supporting parking and installation of utilities and other features on a site that has been abandoned for nearly 30 years. Building demolition and/or repurposing or relocation of existing buildings will be required. ESA lead the CEQA process on behalf of the County, including preparation of all technical studies in support of a full-scope EIR for the RLA South Campus Project. This included a Historic District Evaluation, archaeological surveys, traffic, water supply, arborist services, and all other CEQA-required topics. ESA is also served in an Executive Consultant role to the County, to advise on other potential future projects at the RLA Campus.

Alison Garcia Kellar

Senior Architectural Historian

UCDavis Undergraduate Design Studio Lectures: 'Historic Preservation in Northern California,' 2014 and 'PennDesign Thesis: 20th Century

Alison is a senior architectural historian with 9 years of professional and academic experience with a background in historic preservation, design, and museum collections. Her work with historic resources and cultural heritage in California has included managing and authoring historic resource assessments, National Register Nominations, historic structure reports, feasibility studies, Federal Historic Preservation Tax Credit applications, in addition to extensive archival research and resource documentation. Alison applies her understanding of preservation design and historic interiors to inform impacts analyses of proposed development and recommendations for adaptive reuse.

Relevant Experience

Whittier Public Library Historic Resources Assessment, Whittier CA. *Senior Architectural Historian.* Alison was the lead author of the Historic Resources Assessment which determined that the library is significant as an individual resource under National Register Criteria A and C. Constructed in 1958, the property is significant for its association with Mid-Century Modernism, postwar period institutional properties, and architect William Henry Harrison. Alison assembled the construction history for the library and the Whittier Civic Center. She created a detailed character-defining features analysis identifying significant and contributing features at the property's interior, exterior, and site. Alison coordinated with the project architect to ensure that the project met the SOI Standards in order to meet community's contemporary needs while respecting the building's historic character. Alison authored and oversaw the production of a HABS report to document the library building prior to selective demolition and project construction.

Earl Carroll Theatre Historic Structure Report, Los Angeles, CA. *Senior Architectural Historian.* Alison was the lead author of the Historic Structure Report created for the rehabilitation of the historic Earl Carroll Theatre in Hollywood. Constructed in 1938, the property is significant for its association with owner-operator Earl Carroll, Hollywood nightlife, and architect Gordon B. Kaufmann. The theatre is a listed LA Historic-Cultural Monument and has been identified as eligible for the National Register. In recent years, the theatre has been rented by television network studios as sound stages, and as a result some public areas have been modified over time. Alison conducted supplemental in-depth research, participated with the creation of a detailed interior and exterior character-defining features analysis, and assisted with the analysis of the theatre's current condition. She developed recommendations in compliance with the SOI standards that sensitively guide stakeholders with ongoing preservation efforts.

Alpine Village Preservation Consulting Services, Unincorporated Los Angeles County, CA. *Senior Architectural Historian.* Alison was the lead author of the preliminary historical significance evaluation determination for the Alpine Village complex, a European-style shopping center located near Torrance, California. Comprised of seven buildings constructed between 1969 and 1974, the complex is an example of an increasingly rare type of roadside architecture, and retains high historic integrity. Alison participated in conducting in-depth construction chronology research, determining the complex's period of significance, and identified both interior and exterior character-defining features for the property to help guide ongoing planning efforts.

1202 3rd Street Promenade Preservation Consulting, Santa Monica, CA. *Senior Architectural Historian*. Constructed in 1949 as a JC Penny department store, the commercial building was designed in the Late Moderne style. ESA previously worked to produce a Landmark Assessment Report, and today, the property is recognized as a City of Santa Monica Landmark. Alison conducted a SOI Standards conformance review of a proposed tenant improvement project for a Certificate of Appropriateness.

1221 Hermosa Avenue Preservation Consulting, Hermosa Beach, CA. *Senior Architectural Historian*. ESA serves as a historic preservation consultant to the City of Hermosa Beach, and has a longstanding relationship with the building at 1221 Hermosa Boulevard, known as the Bijou Building. The building is a former historic theatre and bank designed in the NeoClassical Revival style, constructed in 1923. Alison evaluated proposed tenant improvement modifications including the removal of non-original features and the retention of original features related to original theatre and bank uses. Alison has conducted design reviews which included an understanding of all modifications to the space over time, character-defining features analyses, and reviews of proposed plans against CEQA thresholds and the SOI Standards for compliance. Alison is currently participating with overseeing the construction monitoring efforts for the theatre space as part of this ongoing project.

Celes King III Swimming Pool Historic American Building Survey, Los Angeles, CA. *Senior Architectural Historian, Deputy Project Manager.* ESA was hired to conduct HABS documentation for the City of Los Angeles Park and Recreation Department. Constructed in the early 1960s, the Celes King III Swimming Pool was designed by architect Albert Criz in the Mid-Century Modern-Expressionist style. Alison conducted in-depth research related to the history of the surrounding recreational complex, construction of the swimming pool, architect, and neighboring communities.

3325 Monterey Road CEQA Impacts Analysis and Design Review, San Marino, California. *Senior Architectural Historian.* A two-story Art Deco style single-family residence, constructed in 1927 in San Marino, California was determined to be a historic resource. Proposed modifications to the residence included a two-story rear addition and building rehabilitation. Alison assisted with preservation design consultation and conducted a plan review for conformance with the SOI Standards for the proposed project. She coordinated with the project architect to better convey preservation components of the proposed work into the drawing

set for city review. The review required a character-defining features analysis to determine the level of significance of the remaining features.

Benjamin Franklin Elementary School Historic Resource Evaluation and Mitigated Negative Declaration, San Diego, CA. *Senior Architectural Historian.* Alison conducted an HRA for the 1930s, 40s, and 50s-designed elementary school campus. The property was found to be a historic district eligible for its association with the post-war development of the Kensington neighborhood, and for its association with two master San Diego architects. The proposed project was reviewed for compliance with the Secretary of the Interior's Standards, and a CEQA analysis was performed, resulting in the Mitigation Measures and design considerations for future construction within the district. Alison authored and oversaw the production of a HABS report to document the campus and its buildings prior to project construction.

Marston Middle School Historic Resource Evaluation, San Diego, CA. *Senior Architectural Historian.* Alison conducted an HRA for 1954 constructed middle school campus. Comprised of seven buildings, the property was found to be a historic district eligible for its association with the post-war development of Clairemont, and for innovative master planned campus that exemplified indoor-outdoor Mid-Century Modern schools of the era. The proposed project to modify the campus and upgrade the historic buildings was reviewed for compliance with the SOI Standards, and a CEQA analysis was performed, resulting in the Mitigation Measures and design considerations for future construction within the district.

Universal Hilton Historic Resources Technical Report and Environmental Impacts Report for 555 W Universal Terrace Parkway, Los Angeles, CA. *Senior Architectural Historian.* The Universal Hilton Hotel was designed by master architect, William L. Pereira in 1983 in the Postmodern style. As one of Pereira's final commissions, the hotel building was originally part of a master plan and was designed to accommodate visitors to the expanding Universal Theme Parks. Alison conducted in-depth architect and postmodern style research, and evaluated the property for historic significance as part of the Historic Resources Technical Report.

California Department of Water Resources, Pools 20/21 and 17/18 Liner and Embankment Raise Project, Coalinga, CA. *Senior Architectural Historian.* Alison conducted the reconnaissance-level windshield survey to document potentially eligible historic resources present at the California Aqueduct project site. A character-defining features table and historic contexts are being produced for the evaluation which will evaluate potentially eligible resources under applicable national, state, and local criteria. Alison is serving as a co-author on the cultural resources report and will conduct an analysis of the potential for indirect effects to eligible resources.

Cross Creek Cultural Resources Assessment, Malibu, CA. *Senior Architectural Historian.* The owner of several parcels of undeveloped land along Cross Creek in Malibu requested a feasibility-level Cultural Resources Assessment study prior to determining a desired program for development. The former agrarian land included four industrial buildings. Alison conducted extensive archival research, reviewing County-issued building permits and historic aerial photographs in order

to document the property's development over time. Alison authored developmental contexts related to the residential and commercial development of the former agricultural land at the project site. The property was evaluated for historic significance under local, state, and national framework, which aided to assist the client with future planning for the site.

Los Cerritos Wetlands Restoration Plan Program, Cultural Resource Assessment, Seal Beach, CA. *Senior Architectural Historian.* The Los Cerritos Wetlands Restoration EIR project will reinstate historic wetlands to a previously developed oil rig/production site that has been in operation since the early 20th century. As part of the larger restoration plan program, ESA was hired to conduct a cultural resources study to observe, document, and prepare preliminary mitigation measures related to identified built environment resources. Alison collaborated with the archeology team during a field visit to identify potential sites for later investigative studies. She reviewed historic aerial photographs, and conducted research to determine the companies and general ages of oil-industry related infrastructure including oil rigs, operations sheds, and decommissioned tank farms. Mitigation recommendations presented for the structures included Historic Resource Assessment reports to be conducted in the future.

1101 N. Vermont Avenue Historic Resource Assessment, Los Angeles, CA. *Senior Architectural Historian.* The client is proposing to redevelop a site with a previously identified historic resource, a Mediterranean Revival commercial building constructed in the 1920s. Alison oversaw and co-authored the production of a Historic Resource Evaluation (HRA) to establish the building's historic significance, which included extensive research about the building, its site, associated designers, relevant patterns of development, and an analysis of the building's historic integrity. Upon completion of the HRA report, the optional service of design advice and preservation guidance may be employed to assist the client in the preparation of a CEQA impacts analysis, Standards review, and mitigation recommendations as the client moves forward to redevelop the property while maintaining a portion or all of the historic resource intact.

McDonnell Hall/Our Lady of Guadalupe Chapel Historic Structure Report, San Jose, CA. *Architectural Historian, Project Manager.* Constructed as a parish church in 1914, the building moved to its current location in 1953. Here, the building served as a newly formed Catholic Mission, the Center of Our Lady of Guadalupe. The property is associated with civil rights activist and labor rights leader Cesar Chavez, and the mid-20th century Mexican American civil rights movement. Alison assisted with the research, production, and design recommendations, including bringing the building back to its appearance during its period of significance, which required a meticulous analysis of the building's historic integrity. The property today is listed as a National Historic Landmark.

Historic YMCA Hotel Preservation Consulting in the Embarcadero, San Francisco, CA. *Senior Architectural Historian, Project Manager.* Built in the early 20th century, the building was formerly a YMCA hotel used by young navy men and is currently a hotel along the waterfront with an adjacent YMCA recreational center. The hotel was proposing modifications which included rehabilitation work and reconfiguring the interior lobby space. Alison researched and documented the interior evolution by reviewing old plans, movies filmed on-location, post

cards, and existing fabric. She established the building's construction chronology with a focus on the building's public spaces at the interior, overseeing the entire production of the report and created recommendations to update the client's proposed plans which included acceptable sensitive modifications to historic features and recommendations for potential future demolition.

Palo Alto History Museum Historic Preservation Consulting, Palo Alto, CA. *Architectural Historian.* The Spanish Revival style Roth Building was the original location of the Palo Alto Medical Foundation. The former medical building is undergoing a conversion into a local history museum with gallery space, interpretive areas, and archival and study rooms. Alison assisted with secondary research efforts of both the medical foundation and the building, upon modifications to the museum's scope of work. She conducted a Part 2 Federal historic rehabilitation tax credit application review which included recommendation to best comply with the Secretary of the Interior's Standards for Historic Preservation.

Half Moon Bay Barn and Jail Museum Historic Resource Evaluation and Preservation Consulting, Half Moon Bay, CA. *Senior Architectural Historian, Project Manager.* The City of Half Moon Bay was working with a local historical society to implement a history museum at the site of its early 20th century jail and adjacent barn. Alison conducted an in-depth historic resource assessment then reviewed proposed plans for buildings and site modifications to accommodate gallery space, offices, and archival storage. Coordinating with project architects, she assisted with the creation of recommendations for project compliance with the Secretary of the Interior's Standards for Rehabilitation

Toscano Hotel Preservation Consulting, Sonoma State Historic Park, Sonoma, CA. *Senior Architectural Historian.* The two-story wood framed Toscano Hotel was constructed in the 1850s and is a contributing resource to the Sonoma Plaza National Historic Landmark District and the Sonoma Plaza National Register Historic District. Alison conducted Secretary of the Interior's Standards reviews of proposed changes to the interior of the building. Proposed changes included the conversion of a portion of the building from a hotel saloon museum display area into a retail concession area for the California State Parks. Project recommendations included sensitive design solutions to maintain original features.

Golden Gate Village Historic Resource Evaluation, Marin City, CA. *Senior Architectural Historian, Project Manager.* The Golden Gate Village low-income housing complex was constructed in 1958 to house many of the former Marinship workers and their families. Designed by notable mid-century designers including Aaron G. Green, John Carl Warnecke, and Lawrence Halprin, the property serves as an example of a well-designed housing complex, significant as a product of post-war urban development and for its prominent mid-century designers. Alison performed the site visit and conducted research through local and private archival repositories, plan analysis, and interviews, to produce the report narrative and historic evaluation for the property. Today, the property is listed on the National Register of Historic Places.

Lockheed Missiles and Space Historic American Building Survey (HABS), Sunnyvale, CA. *Architectural Historian, Project Manager.* The Lockheed Martin Space Systems Company had an important association with the development of the defense industry and advanced communications systems in the San Francisco Bay Area. Large-scale technological contributions to defense-related pursuits were achieved here through aerospace manufacturing, research, and development. Subject buildings were utilitarian, constructed of concrete tilt-up construction and were representative of industrial buildings developed for sensitive defense purposed of the era. Alison conducted a site visit, coordinated professional photography, and conducted extensive archival research to create the narrative for the HABS documentation in accordance with NPS standards. She assisted in providing the client with mitigation measures and coordinated with municipal agencies throughout the project development and submission process.

Delta Feasibility Study, Walnut Grove, CA. *Senior Architectural Historian, Project Manager.* Three historic buildings were identified for feasibility studies, including the adaptive reuse of a church for artist live/work and performance/gallery space; the adaptive reuse of a one-roomed school house into a community center; and the construction of a park to commemorate Asian American Heritage. Work included a market demand analysis, conceptual plan, cost estimate, and potential partnerships and funding. Serving as the project manager and primary author, Alison coordinated site visits and served as the day-to-day contact for the sub consultant team. She undertook extensive primary source research, she assisted with the creation of rehabilitation recommendations.

915 Laurel Avenue Preservation Consulting, San Mateo, CA. *Architectural Historian.* Alison conducted a Historic Resource Assessment of a one-story Spanish Revival home, and later performed a Secretary of the Interior's Standards review of proposed modifications to add more square footage to the historic home. Guided the property owner to refine their concept while working closely with San Mateo Panning to come to an agreeable solution for the historic property to maintain its aesthetic within the neighborhood, while achieving more space.

630 Purissima Street Historic Resource Assessment and Preservation Consulting, Half Moon Bay, CA. *Senior Architectural Historian, Project Manager.* Alison conducted a Historic Resource Assessment and an analysis of proposed modifications to an early 20th century Craftsman-style home. Working closely with the City of Half Moon Bay, she provided the building owner with design recommendations and guidance compliant with the Secretary of the Interior's Standards for Rehabilitation.

1303 North Central Avenue Historic Resource Assessment, Glendale, CA. *Senior Architectural Historian.* Alison oversaw and conducted the HRA for a 1960s multi-family apartment complex located in the West Glendale neighborhood. Comprised of three two-story interrelated structures and a central open-air courtyard, work included an intensive field visit to the property site, research at local repositories and the Glendale Planning Division, original plan review, and a thorough understanding of existing related context statements. While the project was reflective of a garden apartment of its era, ESA determined that the property did not rise to a level of historic significance warranted for listing on the National Register or California Register.

311 and 317 5th Street, Huntington Beach Historic Resource Assessment and CEQA Impacts Analysis, Huntington Beach, CA. *Senior Architectural Historian.* Alison prepared an HRA for two subject buildings, followed by CEQA and SOI analyses for their proposed redevelopment. The HRA includes a shared property development for the two adjacent parcels, one which is improved with a Craftsman-style residence, and the other improved with a Zigzag Moderne commercial building. Research included an analysis of previously prepared historic surveys of the area, extensive property research, and historic integrity. Recommendations for the project to better comply with the SOI Standards and with CEQA regulations were created.

930 S. Mansfield Historic Resource Assessment and CEQA Impacts Analysis, Los Angeles, CA. *Senior Architectural Historian.* Alison coordinated efforts to prepare an HRA which included an update to the surrounding historic district and an impacts analysis for a proposed project. Several contributing structures in the Mediterranean Revival and Spanish Revival residential historic district had recently been demolished or heavily altered. Alison conducted a design review of a proposed contemporary 6-story multi-family project at the project site that would sit amidst the extant low-profile revival style buildings in the historic district. Alison created recommendations for a more compliant new project design within the district.

The 48-acre campus currently includes the following classroom buildings: Buildings B, C, E, G, I, J, K, L, S, T, V, and W. In addition to classroom buildings, the campus includes Building A, Administration; Building H, Transportation; Building M, Girls Locker Room; Building N, Gymnasium and Pool; Building Q, Boys Locker Room; Building R, Cafeteria; Building U, Auditorium. The existing campus buildings are Buildings A through W, and are generally located in the northwestern portion of the overall site. Extensive original features include tennis courts and a baseball field with fencing and a brick dugout structure which are located east of the classroom buildings, adjacent to West 104th Street. A football field and basketball courts are located to the south of classroom buildings, adjacent to Yukon Avenue South and residential homes. [See Continuation Sheets]

***D3. Detailed Description** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.):

Landscaping includes shade trees, flowers, and shrubbery located toward the center of campus, sloping areas toward the northern portion of the site, and grassy areas in between walkways and at the aforementioned recreational fields. Hardscaped elements include brick planters and brick walls, interconnected concrete pathways, walkway coverings with metal awning structures supported by metal poles, paved concrete areas, concrete steps with metal handrails, metal fencing, asphalt paved parking lots, and a metal shade structure with picnic tables. [See Continuation Sheets]

***D4. Boundary Description** (Describe limits of district and attach map showing boundary and district elements.):

Located in the Morningside Park neighborhood of Inglewood, the parcel that comprises the Morningside HS campus is generally rectangularly shaped and bound to the north by W. 104th Street, to the west by Yukon Avenue, to the south by residential development, and to the east by Woodworth Elementary School and Monroe Middle School. The contributing buildings sit in the northwestern portion of the campus parcel. [See Continuation Sheets for map with boundary and district elements]

***D5. Boundary Justification:**

Extents of parcel owned by Inglewood Unified School District.

D6. Significance: Theme History of Inglewood: Settlement, Development and Growth (1822-present); Inglewood Unified School District: Early History, Establishment and Expansion (1905-prsesent); Mid-Century Modernism/Regional Modernism (1945-1960): Postwar Modern Functionalist School Plants, and; African American Migration Patterns/Communities of South Los Angeles and Inglewood, and Integration at Morningside High School (1962-1969) **Area** Inglewood
Period of Significance 1950-1956; 1962-1969 **Applicable Criteria** 1/A, 3/C
(Discuss district's importance in terms of its historical context as defined by theme, period of significance, and geographic scope. Also address the integrity of the district as a whole.)

Under National Register Criterion A and California Register Criterion 1, Morningside HS is associated with the challenges of public-school integration in California and within the City of Inglewood itself. Due to several key events, including the end of discriminatory housing policies, the movement of Black Angelenos to certain parts of Inglewood, and the Watts riots of 1965, the quickly changing racial demographics at the high school similarly reflected the quickly changing racial demographic of the City and its communities alike. The period of significance for Morningside HS's integration ranges from 1962 to 1969, which spans the arc of the first Black students enrolling at the school to the establishment of the Black Student Union, which also largely corresponded with the broader shift in the City's racial demographics. [See Continuation Sheets]

Affiliation and Address:
Environmental Science Associates, 550 W. C Street, Ste. 750, San Diego, CA 92101

***D3. Description (continued)**:

The following 16 buildings contribute to the eligibility of Morningside HS as a historic district under National Register Criteria A and C, and California Register Criteria 1 and 3: Buildings B, C, D/E, F, G/U, H, I, J, K, L, M, N, Q, R, S, and T and the associated campus landscape are considered contributors to the potential Morningside HS historic district.

Character-defining features of the Mid-Century Modern style present in the plant campus type at Morningside HS are as follows:

Campus Site Character-Defining Features

- Extensive use of sheltered exterior corridors, with flat or slightly sloped roofs supported by posts, piers, or pipe columns
- Mature trees throughout
- Expansive lawns of manicured grass
- Sloped topography of site
- Football field with surrounding track
- Concrete walkways and circulation patterns
- Concrete steps and metal handrails
- Flagpole along Yukon Avenue
- Parking lot along Yukon Avenue

Campus Architectural Character-Defining Features

- Horizontal design composition and massing; generally one to two stories
- Simple geometric volumes
- Flat or shed roof, often with wide, cantilevered overhangs
- Exterior materials include stucco, brick, or concrete
- Modular design
- Aesthetic qualities derive from use of simply treated materials and excellent craftsmanship
- Direct expression of structural systems, often in wood or steel post-and-beam
- Lack of historicizing ornament
- Generous expanses of fenestration, including bands of grouped multi-light aluminum and steel frame windows[1]

Morningside High School Establishment and Construction History

Prior to the original construction of the Morningside HS, the land was largely undeveloped with farmed fields encompassing the majority of the future campus parcel, with modest homesteads lining present-day West 104th Street by 1941. The population boom that the Inglewood area experienced following the end of World War II paralleled similar patterns of growth around the nation and in neighboring Los Angeles, which have been well documented.[2] In 1955, editors at the *Architectural Forum* magazine noted that the rapidly increasing population of school-aged children had made school construction, along with housing, the most widely discussed architectural challenge following the war. The City of Inglewood was no exception to this pattern of growth.

Originally part of the Centinela Valley High School District, planning for Morningside HS in began in 1949, with construction commencing the following year. The construction contract was awarded to the Crown Construction Company. Prior to construction of the Morningside HS campus, which was then referred to as a "complete school plant," costs were estimated to be $3,000,000.[3] As initially intended, Morningside HS was to consist of "two units on one campus to split a large student body into separate, self-sustaining units." [4] According to superintendent H. Fred Heisner, "the ideal high school contains 1,000 students, but conditions require these schools to have as many as 2,5000 [students]," which indicates that Morningside HS was initially planned to accommodate a much larger capacity.[5] However, Morningside HS was principally constructed in two building campaigns, roughly 5 years apart which each included 10 buildings.

The first building campaign, which spanned from 1950 to 1951, included present-day Buildings F, H, I, J, K, S, T, and portions of Buildings M and Q.[6] This initial portion of the Morningside HS campus was designed by the Pasadena and Lancaster-based firm of C. Flewelling and Walter L. Moody Architects. According to a newspaper article, the campus was to include an auditorium, shops, a library, an administration building, gymnasiums and science buildings to be constructed centrally, with classroom buildings on either side, accompanied by outdoor covered walkways, open-air lockers, and was to include "other advanced ideas in planning," yet not all of these structures were built initially.[7]

A groundbreaking ceremony took place the Morningside HS campus in October of 1950.[8] Some of the first classrooms consisted of large canvas tents with dirt floors as construction was still underway at the beginning of the school year in fall of 1951. The school opened in 1951.[9] By 1952, a track and football

field roughly in the same location as today was visible in aerial photographs, located immediately south of the school buildings. Morningside HS' first three administrators - principal John Waldman, girl's vice principal Lois Stegan, and boy's vice principal Robert Burley - all had been on the faculty of Inglewood High School.[10] Neighboring Clyde Woodworth Elementary School (Woodworth ES) located to the east of Morningside HS, along W. 104th Street, was constructed in 1953 with permanent building additions continuing through 1959.

In 1957, a building contract was awarded to the Harvey N. Nicholas Co. for Morningside HS building additions as part of the campus' second building campaign for the lowest bid of $1,538,000. The additions that comprised the second building campaign were designed by Balch Bryan Perkins Hutchison, Architects and included a library, 17 to 23 classrooms, an auto shop, a 1,500-seat gymnasium, cafeteria, 1,000-seat auditorium and health center.[11] The campus additions were to increase capacity to 1,500 students, and were to complete the building program, which was designed to fit within the existing 10 buildings from the first building campaign.[12] New landscape features included covered walkways connecting all building units to one another along a "gently sloping mall opening onto four large social courts where student groups may gather. The buildings [were] laid out on the inside, or enclosed campus principle [sic], instead of the finger-type plan," allowing for student circulation within the centralized grouping of buildings.[13] In the southern portion of the site, it appears that the track and football field became more defined and that basketball courts were constructed as part of this building campaign. Buildings B, C, D/E, G, L, N, R, V, and W were constructed as part of the second building campaign, along with smaller additions to expand Buildings H, M, and Q.

In September of 1955, while the second building campaign was underway, the school year again began in canvas tents which accommodated about 30% of the school's 1,325 students as the permanent buildings were not yet complete.[14] Once the second building campaign was complete, embossed metal plaques distinguishing the first building campaign from the second were installed in several buildings, commemorating the Morningside HS campus expansion. Construction of the second building campaign was largely completed by 1956.

Despite the addition of 10 new buildings to the campus, by 1957, Morningside HS was experiencing "peak enrollment" which forced the school to hold classes and study sessions on the stage in Building U, Auditorium; Building N, Gymnasium and Pool; Building R, Cafeteria; and in corridors of Building F, Lecture Hall.[15] In preparation for the 1957–1958 school year, two wood frame portable buildings were relocated from Warren Elementary School to Morningside HS to help relieve classroom shortages.[16] The

portables were placed near Building N, Gymnasium and Pool. By the late 1950s period, all schools in the District were experiencing an increase in enrollment, yet Morningside HS was "probably the hardest hit" by the influx of students.[17] Further, in 1959, an unspecified number of additional movable portable buildings were constructed at Morningside HS which were to include wood floors, ramps, fluorescent lighting, and gas heating.[18] Two classrooms were converted to science laboratories, and four new portable classroom buildings were constructed in 1961, including Building W, which remains extant today.[19] Canvas and wood tent structures were again used for several months while the new classroom facilities were finished.[20] Also in 1961, a Polio immunization clinic sponsored by the Los Angeles County Medical Association, Inglewood Council PTA, and the Inglewood Unified School District was held at an unspecified location at the Morningside HS campus.[21]

In 1963, a potential 14-acre $200,000 recreation complex with tennis courts and lighting was proposed at newly acquired land located immediately east of the campus.[22] In 1964, four small portables were to be placed on campus for use as a headquarters for the Inglewood Cadet Squadron 71, Civil Air Patrol, which appear to have been constructed in the southwest portion of the site.[23] 1960s era photographs illustrate the campus and students roughly 15 to 20 years after construction of the first building campaign. Aerial photographs indicate the construction of outdoor recreational facilities in the northeastern portion of the property with the construction of a baseball diamond by 1963, and tennis courts between 1963 and 1971. A 1973 yearbook image illustrates students with original brick walls built as part of the second building campaign.

The history of later alterations of the school buildings is associated in part with jet aircraft noise from Los Angeles Airport. For a period of about 15 years between 1960 and 1975, the jet noise from planes arriving to and taking off from LAX and its disruption on Morningside HS classes and activities was widely written about in the local newspapers. The concern about flight paths crossing over the campus lead to the country's first congressional hearing on jet aircraft noise. A hearing was conducted by a congressional Subcommittee of the Transportation and Aeronautics Committee of the U. S. House of Representatives at Morningside HS to study the possibility of abating noise at the school buildings due to the increasing number of jet planes using the LAX airport and flying directly over campus.[24] During this study, Inglewood citizens were given the opportunity to express their complaints and to suggest possible solutions to the annoyance, in which they also proposed legal action as a means of correcting the noise. The Board of Supervisors passed resolutions asking the federal government to study the problem, and Chamber of Commerce and city officials in nearby cities also added their support to plans for noise relief. Noise suppressor plans were also studied and the district attorney's office conducted its own investigation

on the noise problem.[25] By 1972, California Senator Alan Cranston announced his plan to introduce a bill to congress, the Cranston Bill, from a press conference at Morningside HS. The bill proposed to cut noise from commercial aircraft by one third by retrofitting jet engines with sound proofing materials within the years that were to follow.[26]

As this was occurring, reporters interviewed Morningside HS teachers, one who noted that she hadn't been able to give diction to her classes in the five years that she had worked at the school, as nearly 500 jets passed over campus every 24 hours.[27] Some local students experienced roaring jets as often as every other minute, which caused hearing loss and was to blame for many fights at school due to the lack of ability to communicate effectively with consistent overhead noise.[28] Later in 1972, the Airport Authority provided matching funds to schools to soundproof classrooms, yet most remained unsoundproofed.[29] Assembly Judiciary Committee hearings later in the year held at the Morningside HS campus called for a moratorium on nuisance suits against LAX, in which residents were expected efforts to fight against noise pollution and Inglewood officials were to present testimony against the legislation.[30] Newspaper articles mentioning the school and jet noise virtually ceased after this announcement, yet problems with sound abatement at the campus continued for the next nearly 50 years. The District later settled a lawsuit with LAX in which school funds were used to "seal up" most classrooms in which air conditioning and heating systems were added.[31]

In 1975, a student arsonist set Building A, Administration, which was part of the school's first building campaign, on fire. The blaze destroyed two-thirds of the building causing between $200,000 and $312,000 worth of damages. A 15-year-old boy admitted to setting the building on fire in an effort to destroy school records – yet permanent school records, which were kept in a vault, were not damaged.[32] A new building was constructed to replace the destroyed structure the following year to designs by architect Willis K. Hutchason, who was involved in the second building campaign in the mid-1960s. The new building had the same footprint as the original was designed to be vandal proof and windowless with heavy metal roll down shutters to protect building from break-in entry.[33] The unadorned block-wall construction included a new health service space with a room for student counseling. Elaborate sound attenuation features at new Building A noticeably reduced noise of jets flying to and from LAX.[34] However, the sound proofing was only applied to the new building, and the noise continued to be "a

constant aggravation to the 3,000 students and teachers in the school's un-soundproofed main buildings," according to a *Los Angeles Times* article.[35]

In 1978, a public bid request for a sound attenuation project at the Morningside HS campus was announced, however there are no plans on file associated with such a project during this period.[36] A newspaper article from 1979 noted that the District wanted to earmark profit from a land sale to address the immediate need to refurbish deteriorating facilities at the Morningside HS campus.[37] This appears to be the first public mention of the deteriorating conditions at Morningside HS campus, which would lead to many additional articles to be published on the subject over the decades that followed. For example, a 1983 newspaper article profiled issues with broken heaters during a cold spell in January which prompted students to wear ski jackets into class.[38] District maintenance supervisor Gene Robinson noted that since Morningside HS was directly under the flight pattern, "There's more jet ash, spillage (of fuel), and we have to change filters more. If you don't, you start losing compressors, belts, motors, and other things," noting that the attrition of the heating systems at the campus was related to the prominence of consistent overhead jets.[39] When these systems would fail, due to lack of budget for maintenance, teachers would open up doors and windows which would negate the limited sound attenuation systems that were in place.[40]

By 1990, the school's deteriorating condition led to a series of student-led protests, the largest of which involved a 500 student-staged walkout to protest what they described as "substandard conditions" at Morningside HS, to which the District Superintendent George McKenna agreed.[41] The students marched to District headquarters and "complained of campus conditions, poor security, short supply of textbooks, inadequacy of substitute teachers, and vandalism in the bathrooms."[42] McKenna agreed to upgrade the campus installation of lights and to hire an exterminator to control the severe gopher infestation. Students followed up after the protest and joined an Inglewood school board meeting to make demands.[43]

Morningside HS was then considered by the District to be its most troubled school. In addition to the deteriorating condition of the buildings, crime was rampant with Inglewood police noting that the neighborhood had one of the highest crime rates in the city.[44] Newspaper articles from 1990 noted that when the school opened in the 1950s, it was known for "its state-of-the-art campus and quality instruction," and was "once described as having a country-club atmosphere, and to the neighborhood that

surrounds it."[45] Yet this was in stark contrast with the 1990s state of Morningside HS, which as a result of budget cuts had reduced maintenance staff from more than 20 to only 4 staff members. Frustrated administrators and teachers pointed out that conditions had been steadily worsening for years, and that costly upgrades were needed to refurbish the campus.[46]

In 1990, Building U, Auditorium was renamed in honor of late Olympian and Morningside HS alumna, Flo Hyman.[47] Plans for alterations including mechanical, plumbing, and electrical upgrades all campus buildings were created in 1991 by Davis, Duhaime Associates, Architects. In 1998, prolific basketball player and Morningside HS alumni, Lisa Leslie dedicated the "Lisa Leslie Sports Complex," at Morningside HS which included a "42,000 square foot court with 12 baskets," which may have involved renovations to existing Building N, Gymnasium and Pool, or renovations to the outdoor basketball court located in the southeastern portion of the site.[48] In 1999, exploratory oil drilling was to begin at the Morningside HS campus, located immediately southeast of the baseball diamond.[49] The City's mayor, Roosevelt Dorn, proposed a 5,000-student learning center as the Morningside HS site, then referred to as "weedy and dilapidated," which was to potentially include a new high school, science and math magnet, technical school, and performing arts theatre, in addition to a state-of-the-art oil and gas facility.[50] If the exploratory effort at the campus had produced flowing oil sources, through a lease program, the District would have potentially been able to have a revenue stream. It is not clear what the results of the proposed exploratory efforts were.

In 2002, the Mollenhauer Group created an extensive architectural survey of the campus which included an as-built site plan of all campus buildings, topography, and landscape features. The campus most recently underwent renovation and modernization efforts to numerous buildings from July 2019 to April 2021 as part of the Los Angeles World Airports (LAWA) sound insulation program. The LAWA upgrades included interior and exterior sound attenuation improvements. These improvements involved heating/ventilation/air conditioning (HVAC) upgrades, and replacement doors, windows, ceilings, flooring, lighting, and fire alarm and low-voltage upgrades to buildings A, B, C, D/E, F, G, R, S, and T. In this, teaching spaces were insulated for sound mitigation and all areas that were susceptible to sound transmission were reinforced.[51] In addition, ADA upgrades were made in Buildings A, C, D, F, R, S, and T and for associated walkways near Buildings A, B, C, D/E, F, G, R, S, and T.

D6. Significance (continued):

Under National Register Criterion C and California Register Criterion 3, Morningside HS is eligible as an example of an intact clusterplan Postwar Modern Functionalist School plant that is reflective of a distinctive multiple-building southern California public high school campus, and as a mid-century era high school in the City of Inglewood. Further, the property conveys a strong association with two prominent Los Angeles area master architects, Ralph C. Flewelling and Walter L. Moody Architects, and Balch Bryan Perkins Hutchason, Architects. Based upon this finding of architectural significance, a period of significance has been identified as 1950 to 1956, beginning in 1950 with the construction of the first permanent building began and ending in 1956 when the expansion and second building campaign was completed.

The utility pole was constructed prior to 1965. No major alterations were noted.
***B7. Moved?** X **No** Yes Unknown Date: Original Location
***B8. Related Features:** None
B9a. Architect: Unknown **b. Builder:** Unknown
***B10. Significance:** Public Utility Development **Area:** Inglewood **Period of Significance:** pre-1965-Present **Property Type:** Public Utility **Applicable Criteria:** A
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
The Southern California Joint Pole Committee was formed in the early twentieth century and the various utility organizations joined across the state of California. No other state has a similar method for dealing with joint use. Only the Southern and Northern California Associations allow utilities that qualify for membership to buy the necessary space to construct their systems on existing utility poles, rather than having to construct new poles or lease space from the utility that built the pole. This has minimized the construction of new utility poles, distributed maintenance costs among utilities and facilitated the deployment of new technology. The utility pole under investigation is part of the system stretching across the Los Angeles area and is part of the continuing residential and commercial development of the region. The pole appears to have maintained its integrity of design, however, over the decades, new equipment has been added and replaced by newer technology.

B11. Additional Resource Attributes: (List attributes and codes) None

Integrity Statement

In regard to the seven aspects of integrity – location, design, setting, materials, workmanship, feeling and association – the c. pre-1965 Modern style utility pole on this property has retained its original location. The utility pole has not been moved. The setting, feeling, and association have basically remained intact as the residential area surrounding the structure has not changed substantially. No major changes from 1965 to the present have altered the original neighborhood setting, feeling and association. The design, materials and workmanship of the structure have basically remained intact. The integrity level is good and the condition of the utility pole is good.

National Register of Historic Places Eligibility Evaluation

The property was assessed under National Register of Historic Places **Criterion A** for its potential significance as part of any historic trends or events that may have made a significant contribution to the broad patterns of our history. The utility pole was constructed as part of the overall continuing commercial and residential development of the Inglewood area which began in the 1880s and continues to the present time. There is no significant trend or event associated with the property. **Therefore, the property does not appear to meet the criteria for significance under Criterion A: Event.**

The property was assessed under National Register of Historic Places **Criterion B** for its potential significance and association with a person of importance in national history. There is no evidence to suggest that any of the persons associated with the construction or development of the utility pole were considered important in the history of the property or nation. None of the persons associated with the property appear to be historically significant at the level necessary to meet the criteria for National Register of Historic Places. **Therefore, the property does not appear to meet the criteria for significance under Criterion B: Person.**

The property was assessed under National Register of Historic Places **Criterion C** for its potential significance as a property which embodies the distinctive characteristics of a type, period, method of construction or style of Modern architecture, represents the work of a master architect, builder or craftsman, possesses high artistic values, or represents a significant or distinguishable entity whose components lack individual distinction. The utility pole is a standard example of the main characteristics of the standard utility pole. The pole's style does not rise to a level of significance to qualify for the National Register of Historic Places as it was built from standard plans and displays no distinguishing characteristics. The utility pole is not an example of the work of a master architect, builder or craftsman as no architect or contractor was identified. Therefore, the utility pole cannot be considered to represent the work of a master architect, builder or craftsman. **Therefore, the property does not appear to meet the criteria for significance under Criterion C: Architecture as a good example of Modern style of utility pole architecture.**

The property was assessed under National Register of Historic Places **Criterion D** for its potential significance and its ability to convey information. The property does not yield, or may not be likely to yield, information important in prehistory or history. In order for buildings, structures, or objects to be significant under Criterion D, they need to "be, or must have been, the principal source of information." This is not the case with this property. **Therefore, the property does not appear to meet the criteria for significance under Criterion D: Information Potential.**

In summary, the property does not appear to qualify for the National Register of Historic Places under any of the above criteria. Therefore, the utility pole is not considered to be an historic resource for the purposes of the NHPA. The property was not accessed for eligibility under the California Register or local Inglewood Register eligibility.

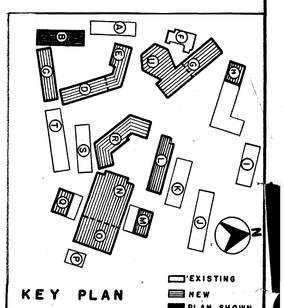
GENERAL NOTES

(APPLIES TO ALL H.&V. DWGS.)

UNLESS OTHERWISE NOTED, THE FOLLOWING APPLIES TO ALL DRAWINGS:

ALL HORIZONTAL RUNS OF PIPING AND/OR DUCTS SHALL BE INSTALLED IN THE FURRED CEILING OR FURRED WALL SPACE OF THE FLOOR PLAN ON WHICH IT IS SHOWN. UNLESS SPECIFICALLY INDICATED OTHERWISE.



REFER TO ARCHITECT'S DRAWINGS AND DETAILS FOR EXACT LOCATION OF ALL PLUMBING FIXTURES, PARTITIONS, EQUIPMENT, ETC.

THIS CONTRACTOR SHALL CHECK WITH ALL OTHER CONTRACTORS SO THAT NO INTERFERENCES SHALL OCCUR AND THE WORK OF EACH CONTRACTOR MAY BE COORDINATED WITH THE WORK OF EACH CONTRACTOR. AS NO EXTRAS WILL BE ALLOWED ANY CONTRACTOR FOR CHANGES MADE NECESSARY BY INTERFERENCE WITH THE WORK OF OTHER TRADES.

THE HORIZONTAL DIMENSIONS OF ALL DUCTS AND GRILLES ARE GIVEN FIRST.

CAUTION NOTE
INSTALL ONE (1) NO. 60 SIGN AT EACH FLUE TERMINATION AS PER DETAIL ON DWG. NO. SP-2

FOR GENERAL NOTES, SYMBOLS, & ABBREVIATIONS REFER TO PLOT PLAN DRAWING NO. SP-2.

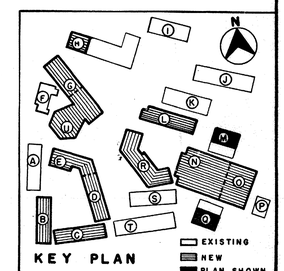
SHEET MQ-4
B.O. 70



△ REFERENCE NOTES - SHEET MQ-5

1. INSTALL FEBCO NO. 25 - 1½ REMOTE VALVE IN EACH WATER LINE. VALVES SHALL BE CONTROLLED BY ONE FEBCO 5-S SOLENOID VALVE, 120 V., 1Ø INSTALLED AT THE VALVE LOCATION. COLD WATER SUPPLY TO SOLENOID VALVE SHALL BE FITTED WITH ½ SHUT-OFF COCK. COLD WATER SUPPLY TO SOLENOID VALVE AND VALVE DISCHARGE LINES SHALL BE ¾" SOFT COPPER TUBE. DISCHARGE LINES SHALL BE TERMINATED AT POINT TO SPILL IN SHOWER ROOM GUTTER.
2. CONNECT TWO (2) COLD WATER LINES TO NEW 3" SIZE COLD WATER MANIFOLD Ⓛ. CONNECT TWO (2) HOT WATER LINES TO NEW 2" SIZE HOT WATER MANIFOLD AT TOP OF TANK Ⓑ. EXISTING TANK COUPLING SHALL BE REPLACED WITH NEW 2" SIZE COUPLING. ALL BRANCH LINES SHALL BE VALVED AT THEIR MANIFOLD.
3. CONNECT NEW LOW PRESSURE GAS LINE TO EXISTING SYSTEM.
4. HOT WATER DISCHARGE LINE FROM HEATER △ SHALL BE CONNECTED THRU A GATE VALVE TO A NEW COUPLING INSTALLED AT THE END OF THE TANK Ⓑ, 10" FROM TOP. RETURN LINE SHALL BE CONNECTED TO A NEW COUPLING INSTALLED AT END OF TANK Ⓑ, 10" FROM BOTTOM, THRU A GATE VALVE AND BELL AND GOSSETT SIZE, 1½", FLANGED, ½ H.P. CIRCULATING PUMP TO HEATER △. ALL PIPING SHALL BE 1½" SIZE.
5. LAARS MODEL LCG 1401, 309,000 B.T.U. INPUT WATER HEATER INSTALLED COMPLETE AND OPERATIVE WITH 3" SIZE VENT THRU ROOF AND 1" SIZE GAS CONNECTION. RELIEF VALVE DISCHARGE SHALL BE PIPED UNDIMINISHED IN SIZE TO SPILL AT EXISTING FLOOR SINK LOCATED UNDER STORAGE TANK Ⓑ. DISCHARGE LINE SHALL NOT BE TRAPPED.
6. MAKE ¾" GAS CONNECTION TO 240,000 B.T.U. INPUT DUCT FURNACE INSTALLED BY H. & V. CONTRACTOR.
7. MAKE ¾" GAS CONNECTION TO 200,000 B.T.U. INPUT DUCT FURNACE INSTALLED BY H. & V. CONTRACTOR.
8. EXISTING 50G GAL STORAGE TANK (42"Ø x 93") SHALL BE FITTED WITH NEW COUPLINGS TO ACCOMODATE NEW PIPING AND AQUASTAT INSTALLATION. NEW WELDED COUPLINGS SHALL EXTEND ½" INSIDE TANK SHELL TO ACT AS BUTT STOP FOR LINING MATERIAL TO BE APPLIED TANK SHALL BE LINED WITH HEBCO PORCELAIN HOT WATER TANK LINING APPLIED BY TRAINED WORKMAN OF HOW E. BAKER CO., LOS ANGELES 23.
9. THREE (3) EXISTING SHOWERS AND TWO (2) EXISTING FLOOR DRAINS SHALL BE REMOVED.
10. EXISTING ¾" HOSE BIBB SHALL BE RELOCATED TO EXTERIOR WALL.
11. INSTALL NEW 3" SIZE COLD WATER MANIFOLD. REPLACE EXISTING COLD WATER MAKE-UP LINE TO TANK Ⓑ WITH NEW 2" SIZE LINE AND TANK COUPLING. BRANCH LINE SHALL BE VALVED AT MANIFOLD.
12. A MINNEAPOLIS-HONEYWELL L-4414A DIRECT ACTING AQUASTAT FOR CONTROL OF HEATER △ SHALL BE INSTALLED 10" BELOW TANK CENTERLINE AT END OF TANK CLOSEST TO THE EXISTING COLD WATER INLET. CONTROL WIRING TO PUMP, HIGH LIMIT CONTROL AND MAGNETIC GAS VALVE ON HEATER SHALL BE IN ACCORDANCE WITH HEATER MANUFACTURERS WIRING DIAGRAM. CONDUIT, DISCONNECT SWITCH AND ALL INTERCONNECTING WIRING WILL BE FURNISHED AND INSTALLED BY THE ELECTRICAL CONTRACTOR.
13. MAKE ½" GAS CONNECTION TO 65,000 B.T.U. INPUT UNIT HEATER INSTALLED BY H. & V. CONTRACTOR.
14. CONTROL SWITCH FOR REMOTE VALVES △. CONDUIT SWITCH AND ALL INTERCONNECTING WIRING TO SOLENOID VALVES WILL BE FURNISHED AND INSTALLED BY THE ELECTRICAL CONTRACTOR.
15. ROUGH-IN FOR AUTOMATIC WASHER - 2" "P" TRAP WITH 2"Ø STANDPIPE, ½ H. AND ½ C.
16. DISCONNECT GAS TO EXISTING HYDROTHERM AND REMOVE BRANCH GAS LINE.
17. ¾Ø H.B. INSTALLED IN POTTER-ROEMER HOSE BIBB BOX.
18. PLUMBING CONTRACTOR SHALL REMOVE EXISTING SHOWERS & PIPING AS REQUIRED FOR NEW DOOR. CAP LINES AS REQ'D. - SEE DWG. NO. MQ-1.

FOR GENERAL NOTES, SYMBOLS, & ABBREVIATIONS REFER TO PLOT PLAN DRAWING NO. SP-2.

INSTALL APPROVED SIGN AT BLDG. GAS SHUT-OFF COCK - SEE PLOT PLAN DRAWING NO SP-2.
