1.0 SUMMARY

Cameron-Cole, LLC (Cameron-Cole) has completed a Phase I Environmental Site Assessment (ESA) for an approximately 136-acre property located at 501 W. 16th Street, Chico, Butte County, California, hereinafter referred to as the “property” or “subject property”. The assessment was performed in accordance with the Master Environmental Services Agreement between Cameron-Cole, LLC and First Carbon Solutions (FCS) dated August 15, 2022 and authorized by Ms. Mary Bean on August 15, 2022. The scope of services generally conforms to the scope and limitations of the American Society for Testing and Materials International (ASTM International) Standard Practice for Environmental Site Assessments, Designation: E1527-21. The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the ASTM International Standard E1527-21, recognized environmental conditions (RECs) in connection with the subject property.

According to records maintained by the Butte County Assessor’s office, the subject property consists of multiple parcels of two adjacent sites. The northern site consists of assessor parcel numbers (APNs) 039-400-031, 039-400-016, 039-400-022, 039-400-023, 039-400-024, 039-400-025, 039-400-026, 039-400-027 and the southern site consists of a section of APN 039-410-25, along the western border. The northern site is primarily unused land with a large RV storage warehouse on the northern boundary, unused historic brick buildings near the western boundary, and an asphalt lot, used as part of soil remediation, to the southwest. The southern site is located just to the south of the northern site and separated by abandoned railroad tracks. The southern site is currently used as an orchard. The subject property is currently owned by the By Land Holding Co., LLC.

The goal of this Phase I ESA is to identify the presence or likely presence of hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a future release of any hazardous substances or petroleum products in, on or, at a property. The findings of this report are summarized below and may include known or suspect RECs, controlled RECs (CRECs), historical RECs (HRECs), or *de minimis* conditions identified during the performance of this Phase I ESA.

Cameron-Cole has performed a Phase I Environmental Site Assessment, in general conformance with the scope and limitations of ASTM International Standard E1527-21, for the property located at 501 W. 16th Street, Chico, Butte County, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has revealed the following REC, CREC, HREC, or significant data gaps in connection with the subject property as summarized below:

- According to the *Five-Year Review 2013 through 2017 Chico Remanufacturing Facility* report associated with the open cleanup case per CALEPA – CA, the subject property is currently being monitored for an onsite pentachlorophenol (PCP) groundwater contamination. A deed restriction is in place which prohibits the use of groundwater without Department of Toxic Substance Control (DTSC) approval. Additionally, an asphalt-capped pad near the western boundary is a remediation effort for arsenic contamination associated with removed rail spur ballast material from across the site. This asphalt cap is to remain intact with activity use limitations (AULs) applicable to this area as specified in the same deed restriction. The groundwater monitoring and AULs were identified by the CALEPA – CA database. Based on this information, it is the opinion of Cameron-Cole, the current AULs associated with the asphalt pad represents a CREC while the ongoing PCP groundwater monitoring represents a REC as defined by the applicable standard.

- Review of available regulatory databases records identified a HIST UST – CA listing associated with eight gasoline and diesel USTs were registered with Chico Remanufacturing in 1988. No information regarding the current status of the USTs was available. A significant data gap is associated with the absence of tank disposition and/or closure information, including analytical soil data that could help identify the presence or absence of subsurface contamination potentially associated with these unaccounted USTs. Based on Cameron-Cole's understanding the property is to be developed into residential development, this data gap and possibility that unidentified contamination could be present represents a REC to the subject property as defined by the applicable standard.
- The report also identifies the removal of 10,000 cubic yards of contaminated soil in 1992. The soil removal was to address contamination from various areas used at the Chico Remanufacturing Facility including, but limited to, two fuel oil bunkers, dry kilns, burn and dump areas, paint disposal pit, detention pond, etc. The soil was cleaned up to residential levels and approved by the DTSC in 1994. Based on this information, in the opinion of Cameron-Cole, the soil contamination has been addressed to the satisfaction of the regulatory agency constitute a HREC in connection with the subject property as defined by the applicable standard.
- According to a November 2021 Semi Annual Monitoring Report, an offsite TCE plume from an upgradient Victor Industries, extends beneath the subject property. This plume is actively monitored by the off-site responsible party. This site is also identified in the CERCLIS-HIST, SLIC REG 5 – CA, ENVIROSTOR – CA, and FED BROWFIELDS databases. In May 2021 soil vapor samples identified concentrations of PCE and benzene which exceeded the ESLs. In the opinion of Cameron-Cole, the Victor Industries TCE groundwater plume and corresponding PCE and benzene soil vapor concentrations constitutes a REC in connection with the subject property as defined by the applicable standard.
- According to 1988 Chico Press Gazette article trash piles were said to fill trenches along the eastern boundary and on the Ivy Street right of way and consisted of car batteries, drums of used motor oil, solvents and other industrial waste liquids, railroad ties, old vehicles, etc. It is also reported that Diamond burned trash in long trenches and covered the burn areas with dirt. A 1970 correspondence between the City of Chico and Diamond National Corporation indicates a 40'x40x5' area of buried trash was excavated near the northeast corner, on the Ivy Street right of way, and transported offsite. Interviews in the 1988 Gazette article state that debris witnessed in the other areas of the right of way were not removed. The 2017 Five-Year Review also identifies the Normal Avenue Dump, near the eastern boundary, and the South Orchard Burn Dump, near the southern boundary. A "teepee burner", used to burn lumber, was located adjacent to the Normal Avenue Dump. Based on the information provided, in the opinion of Cameron-Cole, the indications of trash and industrial waste being dumped, buried, and burn on site does constitute a REC in connection with subject property as defined by the applicable standard.
- According to the Envirosearch aerial maps, orchards have been present in the northern site periodically since 1941. The southern site appears to have only been used as an orchard since at least 1941. Historically, lead-arsenate was a commonly used pesticide from the late 1880s up to the 1960s. No documentation is available regarding pesticide use in the

orchards. As lead-arsenate and next generation organo-chlorine pesticides have a long residence life in surface soils at application areas, it is Cameron-Cole's opinion that the lack of documentation of pesticide use represents a significant data gap and REC considering the proposed residential development of the subject property.

This summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

2.0 INTRODUCTION

2.1 Purpose

Cameron-Cole performed a Phase I ESA for an approximately 136-acre property located at 501 W. 16th Street, Chico, Butte County, California in accordance with the Master Environmental Services Agreement between Cameron-Cole, LLC. and First Carbon Solutions (the Client) on behalf of the City of Chico Community Development Department (the User). The assessment was conducted in general conformance with the ASTM International Standard E1527-21 Standard Practice for Environmental Site Assessments. This ESA was designed to identify, to the extent feasible, the presence or likely presence of RECs in connection with the property.

The purpose of this Phase I ESA is to allow the “User” to benefit from one of the defenses referenced in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability: the innocent landowner defense, the contiguous property owner defense, or bona fide prospective purchaser defense. These defenses are collectively referred to as the “landowner liability protections,” or “LLPs”. ASTM International Standard E1527-21 constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B). Cameron-Cole considers FCS to be the Client and City of Chico Community Development Department. to be the “User” of this report.

The goal of this Phase I ESA is to identify RECs in connection with the subject property consistent with ASTM International Standard E1527-21. A REC is defined as:

1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment ; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

2.2 Detailed Scope of Services

This Phase I ESA was conducted in accordance with and the Master Environmental Services Agreement between Cameron-Cole, LLC and First Carbon Solutions and authorized by Ms. Mary Bean on August 15, 2022. The scope of services consists of completing a Phase I ESA in general accordance with ASTM International Standard E1527-21 and the Scope of Services specified in the Master Agreement.

2.3 Significant Assumptions

Historical resources, personal interviews, and federal and state agency files regarding site operations and past historical use have been considered when presenting Cameron-Cole’s findings and opinions. Cameron-Cole considers all information provided by our environmental database subcontractor regarding regulatory status of facilities to be current, accurate, and complete. Although Cameron-Cole made no independent investigation as to the accuracy and completeness of other information derived from secondary sources, Cameron-Cole assumes such information is reliable and representative of site conditions.

2.4 Limitations and Exceptions of Assessment

2.4.1 Site-Specific Limitations

Subsurface investigations were not conducted as part of this assessment. Over-grown vegetation limited the use of physical observation throughout sections of the site. Additionally, some areas were fenced off due to the use of goats grazing in those areas. Goat were used to clear the over-grown vegetation.

2.4.2 Data Gaps

A data gap is a lack of, or inability to, obtain information required by ASTM International Standard E1527-21 despite good faith efforts to gather such information. Data gaps may result from incompleteness in any of the activities required by ASTM International Standard E1527-21. According to the ASTM International Standard Practice E1527-21, data gaps are only significant if “other information and/or professional experience raise reasonable concerns involving the data gap”. Cameron-Cole was unable to acquire documents pertaining to prior monitoring and remediation efforts that occurred on the subject property. In the opinion of Cameron-Cole, several significant data gaps were encountered during the completion of this Phase I ESA.

2.4.3 General Limitations and Exceptions

The Phase I ESA is produced in accordance with customary principles and practices in the applicable fields of environmental science and engineering. Cameron-Cole is not responsible for conclusions, opinions, or recommendations made by others based upon the information presented herein.

Although industry standard practices are employed, Phase I ESAs are inherently limited, given that findings and conclusions are developed from limited site evaluation and research. In performing a Phase I ESA, Cameron-Cole can only rely upon those records regarding the subject property and surrounding properties which are available to the public and which can reasonably be obtained by Cameron-Cole. Cameron-Cole's opinions, conclusions and recommendations are therefore limited to those which can be derived from such available and reasonably obtainable records. It is often necessary for Cameron-Cole to rely on information prepared or obtained by others in order to complete the Phase I ESA. Cameron-Cole makes no warranty or representation as to the accuracy or completeness of information obtained from third parties. Additionally, changes may result with the passage of time with respect to characteristics of the subject property and those of surrounding properties. Cameron-Cole and its representatives do not warrant for or against future changes in operations or conditions, nor do they warrant for or against conditions present of a type or at a location not specifically addressed in the Phase I ESA.

Subject to the limitations stated herein, the opinions presented in Phase I ESA are valid for a period of 180 days from the date of issuance.

Air, soil, and groundwater testing are not part of the Phase I ESA Report. This Phase I ESA is not intended to establish whether air, soil, or groundwater contamination, or waste disposal is present or not present on the subject property or on surrounding properties. Knowledge of actual environmental conditions on the subject property or on any surrounding properties can only be obtained from air, soil, and groundwater testing, the installation of groundwater monitoring wells, and possible additional testing, all of which are outside the scope of the Phase I ESA.

Reasonable efforts were made within the scope of the Phase I ESA to identify the presence of underground storage tanks (USTs), aboveground storage tanks (ASTs), and ancillary equipment on or near the subject property. Limitations to the Phase I ESA exist regarding USTs and ASTs, in as much as information was obtained by Cameron-Cole solely through its review of unobstructed and readily accessible areas, database information, and interviews. Such methods (which are considered industry standard) do not preclude the actual presence of subsurface equipment (including USTs) or regulated materials that are hidden from view due to historical activity such as site paving, re-grading, construction, or debris pile storage. Similarly, it is possible that additional UST facilities not listed in regulatory database files may exist at the subject property or on properties adjacent to the subject property due to owner/operator registration negligence, filing errors with the state regulatory agency or other reasons over which Cameron-Cole has no control or ability to determine.

Conclusions in the Phase I ESA regarding potential environmental impact of properties and facilities surrounding the subject property are based upon reasonably available information obtained from environmental databases and inferred groundwater flow direction. Information on the depth to groundwater and its flow direction beneath the subject property is known due to the ongoing regional groundwater monitoring by the off-site Victor Industries investigation and cleanup which includes monitoring activities surrounding and beneath the subject property (see Section 7.1).

No environmental assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of a Phase I ESA is solely intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property, and this practice recognizes reasonable limits of time and cost. The Phase I ESA has been prepared for the exclusive use and benefit of FCS subject to the terms and conditions specified in the Master Environmental Services Agreement between Cameron-Cole, LLC. and FCS. The Phase I ESA is for the sole and exclusive use and benefit of FCS, our Client. Cameron-Cole makes no warranty as to the Phase I ESA except as to FCS's exclusive use of the Phase I ESA. The Client bears the sole responsibility for ensuring that the Phase I ESA is distributed or disseminated to only those third parties to whom FCS is strictly obligated by contract, law, regulation, or ordinance to provide it. Cameron-Cole disclaims any and all liability to any person or entity other than FCS who uses or relies on the Phase I ESA in any way whatsoever without the express written consent of both FCS and Cameron-Cole.

Third-party reliance letters may be issued upon request and upon payment of the then current fee for such letters, and only if Cameron-Cole, FCS, and the User provide express written consent for any such reliance letters.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The subject property is located at 500/501 W. 16th Street, Chico, Butte County, California. A Site Location Map is provided as Figure 1. According to records maintained by the Butte County Assessor's office, the subject property consists of multiple parcels of two adjacent sites. The northern site consists of assessor parcel numbers (APNs) 039-400-031, 039-400-016, 039-400-022, 039-400-023, 039-400-024, 039-400-025, 039-400-026, 039-400-027 and the southern site consists of a section of APN 039-410-25, along the western border.

3.2 Site and Vicinity Characteristics

The subject property consists of multiple parcels with plan surface area totaling 136-acres. The primary northern site consists of overgrown vacant land, a large RV storage warehouse near the northern boundary, unused historic brick buildings near the central western boundary, and an asphalt-capped lot near the southwest boundary (part of a previous surface soil remediation effort at this site). The southern site is located just to the south of the northern site and separated by an abandoned railroad spur. The southern site appears to be a vacated orchard, which at the time of the site reconnaissance was not planted with trees.

3.3 Current Uses of the Property

At the time of the site reconnaissance, the northern site is primarily unused with the exception of the warehouse near the northern boundary that is used as a RV storage facility. The southern site appears to only be used as an orchard though at the time of the site reconnaissance the field was not planted with trees.

3.4 Descriptions of Structures, Roads, and Other Improvements to the Site

The northern site can be accessed from the southwest via W 16th Street along the eastern boundary. The southern site can be accessed via a path between the two sites, along an abandoned railroad and current walking path.

North: Residential neighborhood
South: Residential neighborhood and agricultural lands.
East: Residential neighborhood and commercial land.
West: A railroad followed by agricultural lands.

4.0 USER PROVIDED INFORMATION

In order for the User to qualify for one of the LLPs offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, Section 6 of ASTM International Standard E1527-21 requires the User to provide the environmental professional the following information:

- The existence of environmental cleanup liens;
- Activity and Use Limitations (AULs) recorded against the subject property;
- Specialized knowledge or experience of the User;
- Relationship of the purchase price to the fair market value of the property if it were not contaminated;
- Commonly known or reasonably ascertainable information about the subject property; and
- The degree of obviousness of the presence of contamination at the subject property.

4.1 Title Records

A historical chain-of-title report and an environmental lien report were not provided by the User or obtained and reviewed by Cameron-Cole as part of the approved scope of services for this project. According to Mr. Mike Sawley, City of Chico Community Development Department, the property is owned by the "By Land Holding Co., LLC".

4.2 Environmental Liens or Activity and Use Limitations

Mr. Sawley indicated via a completed User Questionnaire that he was aware of AULs, such as engineering controls, land use restrictions, and institutional controls that have been filed or recorded on the subject property. The limitations are regarding the asphalt cap over the arsenic contaminated soils, and a prohibition on drafting groundwater from beneath the property for drinking-water purposes.

4.3 Specialized Knowledge

Mr. Sawley indicated he does possess specialized knowledge or experience that is material to RECs in connection with the subject property. He is aware of the arsenic and PCP contamination present onsite and the presence of an offsite TCE contaminated groundwater plume.

4.4 Commonly Known or Reasonably Ascertainable Information

Mr. Sawley was asked to provide any commonly known or reasonably ascertainable information within the local community about the subject property that is material to RECs in connection with the subject property. He states that the past uses of the property were a remanufacturing facility and railroad spur according to the DTSC reports.

4.5 Valuation Reduction for Environmental Issues

Mr. Sawley indicated he was not involved in the purchase of the property.

4.6 Owner, Property Manager, and Occupant Information

According to Mr. Sawley, the property is owned by the By Land Holdings Co, LLC.

4.7 Reason for Performing Phase I ESA

Mr. Sawley indicated via a User Questionnaire completed on August 22, 2022, that the reason for performing the Phase I ESA is to determine potential re-development concerns.

A copy of the questionnaire completed by the User representative is provided in Appendix B.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources and Review

Envirosite provided Cameron-Cole with a comprehensive government agency information search in accordance with ASTM International Standard E1527-21. The regulatory search information and a legend of the database acronyms are presented as Appendix C, Regulatory Agency Search Report. Maps depicting properties listed in the various databases searched by EnviroSite are also provided. The table below provides a summary of the federal records reviewed along with each record's approximate minimum search distance (AMSD) from the subject property (SP).

STANDARD ENVIRONMENTAL DATABASE RECORD SUMMARY

SUBJECT PROPERTY

The subject property was identified in the HIST UST – CA, CERCLIS NFRAP, CERCLIS-HIST, RCRA_LQG, RCRA_NONGEN, RCRA_SQG, SLIC REG 5 – CA, ENVIROSTOR – CA, HWG – CA, and LIENS - CA databases. Four addresses are associated with these database listings: 501 West 16th Street, End of 16th Street, West 16th Street, and 16th Street. The HIST UST – CA database is associated with a 6,000-gallon diesel underground storage tank (UST), two 6,000-gallon unleaded gasoline USTs, a 500-gallon diesel UST, a 12,000-gallon diesel UST, a 1,000-gallon unleaded gasoline UST, a 3,000-gallon diesel UST, and a 10,000-gallon UST registered to Chico Remanufacturing in 1988. No violations were identified in connection with this database listing. The CERCLIS NFRAP (no further remedial action planned) database states the subject property does not qualify for NPL (National Priorities List) based on existing information. The CERCLIS-HIST database is listed as state-lead cleanup, but no further information is provided. The RCRA_LQG, RCRA_NONGEN, and RCRA_SQG databases do not list the materials managed onsite, but all listings were reported to no violations or inspections. SLIC REG 5 – CA and ENVIROSTOR – CA databases are associated with the ongoing monitoring of an onsite pentachlorophenol (PCP) plume and arsenic contaminated soil. The HWG – CA database is associated with hazardous waste generated and all listings are currently marked as inactive. The LIENS – CA database is associated the restrictions related to the placement of the asphalt cap for arsenic contaminated soil and the current PCP groundwater monitoring.

HIST UST – CA

The UST (underground storage tank) databases include sites where a tank and any underground piping connected to the tank has at least 10 percent of its combined volume underground. HIST UST – CA database is a record of historical USTs. According to the EnviroSite Report, three HIST UST – CA sites are located within the AMSD of the subject property, including the subject property. Superior Dryers Inc Chico | Superior Dryers Inc, 2273 Normal Street | 2273 So Normal Street, is located 0.0237 miles (inferred up-gradient) from the subject property. One 1,000-gallon UST containing unleaded gasoline was installed in 1955. One 2,000-gallon UST, contents unknown, was installed in 1980. The current status of these USTs

were not disclosed in the database. Ed Wittmeier Ford | Ed Wittmeier Ford Linc Merc | Wittmeier Ed Ford Inc, Case 1, 1240 Park Avenue, is located 0.3584 miles (inferred up-gradient) from the subject property. One 550-gallon UST, containing unleaded gasoline, and two 2,000-gallon USTs, contents unknown, were installed prior to 1988. Exact installation dates and current status of the USTs were not provided. Two 1,000-gallon USTs were installed prior to 1988. Exact installation dates and current status of the USTs were not provided. Current status of the UST was not provided by the database.

CERCLIS NFRAP

CERCLIS NFRAP is a database pertaining to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) sites with No Further Remedial Action Planned from the CERCLIS program. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013. According to the Envirosearch report, there is one CERCLIS NFRAP site located on the subject property.

CERCLIS-HIST

CERCLIS-HIST database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013. According to the Envirosearch report, two CERCLIS-HIST sites are located within the AMSD of the subject property, including the subject property. Victor Industries – 20th Street | Victor Industries | DTSC 365 E 20th Street | 365 East 20th Street, is located 0.433 miles (inferred up-gradient) from the subject property. This is pertaining to the trichloroethylene (TCE) cleanup program associated with this site. According to the Victor Industries (20th Street) November 2021 Semi-Annual Groundwater Monitoring Report, contaminants were first detected in October 1984. TCE concentrations continue to be present in the groundwater and extend below the subject property.

LUST REG 5 – CA

LUST REG 5 -- CA are databases pertaining to LUST (Leaking Underground Storage Tanks). According to the Envirosearch report, there are seventeen LUST REG 5 – CA sites located within the AMSD of the subject property, not including the subject property. Superior Dryers Inc Chico | Superior Dryers Inc, 2273 Normal Street | 2273 So Normal Street, is located 0.0237 miles (inferred up-gradient) from the subject property. A leaking gasoline UST was report in June 1987 and in September 1987 the site cleanup is reported to be complete, and the case closed. Mulkey Property, 1746 Park Avenue, is located 0.3011 miles (inferred upgradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2006. Money Saver | Teig Chico Oil Inc | Frost Oil Ss Chico Case #2, 1645 Park Avenue, is located 0.3609 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2012. Frost Oil SS Chico | Frost Oil Company Inc | Frost Oil Ss Park Avenue Chico, 1645 Park Avenue, is located 0.3608 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 1990. Ed Wittmeier Ford | Ed Wittmeier Ford Linc Merc | Wittmeier Ed Ford Inc, Case 1, 1240 Park Avenue, is located 0.3584 miles (inferred up-gradient) from the subject property. Two cases are associated with this site. The site is listed as clean-up is complete, and the case closed as of 1997 and 2004. Wrex Products | Wrex Products Inc of Chico, 25 Wrex Ct | 25 Wrex Court, is located 0.3692 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 1992. Halldorson Appliance, 848 9th Street W | 848 W 9th Street | 848 West 9th, is located 0.3719 miles (inferred cross-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 1996. Butte County Public Works Dept, Locust Street, is located 0.4136 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is

complete, and the case closed as of 1993. Maruti Park Ave | Hunt Convenience Stores DBA Park Ave 76 | Park Avenue 76, 1105 Park Avenue, is located 0.424 miles north (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2015. Private Residence, Private Residence, is located 0.435 miles (inferred up-gradient) from the subject property. Two cases are associated with this site. The site is listed as clean-up is complete, and the case closed as of 2003 and 2015. Halimi Property, 1045 Park Avenue, is located 0.441 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2017. Flowserve Corporation, 844 Broadway, is located 0.451 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2015. Wagner Property | Springboard Biodiesel LLC | CLL, 2323 Park Avenue, is located 0.462 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 1996. Frosts Moneysaver | Frost Oil Inc, 2049 Fair Street, is located 0.465 miles (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2001. Chico Terminal | SFPP LP (Chico Terminal) | Kinder Morgan Energy Partners Lp (See Also Scp Case 2050093), 2570 Hegan Lane | 2570 Hegan Ln | 2570 Hegan Ln Exxon Additive Tank, is located 0.774 miles (inferred cross-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 2012. Bar-X Liquor, 925 Main Street, is located 0.492 miles north (inferred up-gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 1998. Chevron SS #91159 Chico, 110 9th Street W, is located 0.493 miles north-northwest (inferred up gradient) from the subject property. The site is listed as clean-up is complete, and the case closed as of 1996. Puritz Saving Center, 809 Oroville Ave, is located 0.499 miles north-northwest (inferred up-gradient, from the subject property. The site is listed as clean-up is complete, and the case closed as of 1996.

SLIC REG 5 – CA

SLICE REG 5 – CA is a list of Region 5 sites from GeoTracker Site Cleanup Program (formerly known as SLIC) database. According to the Envirosearch report there are four SLIC REG 5 – CA site located within the AMSD of the subject property, including the subject property. Victor Industries 20th Street PCE Plume, 365 & 395 20th Street E, is located 0.433 miles northeast (inferred up-gradient) from the subject property. This site is currently being monitored for a TCE plume that extends under subject property. Former Butte County Mosquito & Vector Control District Substation, 2460 Valine Ln., is located 0.4378 miles east (inferred up-gradient) from the subject property. The site status is listed as completed case closed as of 2011. Flowserve Corporation (Chico Southwest PCE Plume) | Flowserve Corporation - Chico | Flowserve Pump Division, 844 Broadway Street | 844 Broadway Street, APN 004-285-002-000, is located 0.451 miles north-northwest (inferred up-gradient) from the subject property. According to a 2014 Passive Soil Gas Sampling Report, a tetrachloroethene (PCE) plume extends from this site to the southwest but it does not extend to the subject property. The database currently has the site listed as currently open.

RCRA_NONGEN

RCRA_NONGEN is a database of Resource Conservation and Recovery Act listing of licensed non-generators. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. NonGenerators do not presently generate hazardous waste. According to the Envirosearch report, there are thirteen RCRA_NONGEN sites located within the AMSD of the subject property, including the subject property. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. John Hunt, 1724 Normal Avenue, is located 0.0508 miles north-northeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this

site. Mike Evans - Anchor Lands LLC, 228 W 22nd Street., Unit 1, is located 0.0582 miles east-northeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. Gregg Tremaine, 337 West 16th Street, is located 0.1261 miles north-northeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. State of Jefferson 4X4 Fab and Paint | Mikes Custom Body & Collision, 3 Commerce Ct Ste 120, is located 0.1268 miles east (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. David Rothe, 1514 Salem Street., is located 0.1573 miles north (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. Robert Trausch, 138 W. 21Street Street, is located 0.2014 miles east-northeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. No violations or inspections are reported for this site. Pmb Supply And Mfg Inc | PBM Supply & Mfg Inc (Chico,Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this site. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. No violations or inspections are reported for this site.

ENVIROSTOR – CA

ENVIROSTOR – CA is a database of historical listing of tank facilities that are subject to the California Aboveground Petroleum Storage Act. According to the report provided by Envirosite, there are sixteen sites listed in the Envirostor – CA database located within the AMSD of the subject property, including the subject property. Niagara Chemical Division-FMC Corp #2, 724 West 9th, is located 0.3571 miles northwest (inferred cross-gradient) from the subject property. The cleanup date provided is November 16, 1994. No is status is provided. Park Avenue Housing Partners LP | Park Avenue Apartments | 1297 Park Avenue Apartments, 1297 Park Avenue | 1297 Park Avenue 179 E. 12th Street, is located 0.4198 miles north (inferred cross-gradient) from the subject property. The cleanup date provided is January 3, 2021, and the status is currently listed as active. According to a November 2021 Work Plan report, the site is actively monitored for volatile organic compounds (VOCs) in near surface soil, but no VOCs are present in the groundwater. Chico Imports, Chico Imports | K & A Custom Plating of Chico | Chico Imports, 1430 Locust Street | 1430 Locust, is located 0.4257 miles north-northeast (inferred up-gradient) from the subject property. The database lists this site as historical, and the cleanup date is March 4, 1996. Site screening occurred on January 28, 1987. Current status is not provided. Victor Industries – 20th Street | Victor Industries | DTSC, 365 E 20th Street | 365 East 20th Street, is located 0.433 miles northeast (inferred up-gradient) from the subject property. The cleanup date provided is October 1, 1990, and the status is currently listed as active. This site is actively monitored due to TCE contamination from this site. Flowserve Corporation (Chico Southwest PCE Plume) | Flowserve Corporation - Chico | Flowserve Pump Division, 844 Broadway Street | 844 Broadway Street, APN 004-285-002-000, is located 0.451 miles north-northwest (inferred up-gradient) from the subject property. The cleanup date provided is March 4, 2014, and the status is currently listed as active. Chico - Skyway Subdivision Groundwater Plume, Hagen Lane/Skyway Avenue, is located 0.706 miles east-southeast (inferred cross-gradient) from the subject property. The cleanup date provided is October 1, 1990, and the status is currently listed as active. This is site actively monitored for a TCE plume and extends to the south of the subject property. Chico Scrap Metals Inc | Chico Scrap Metal Inc | Chico Scrap Metal – 20th Street, 878 E 20th Street | 878 East 20th Street | 878 East 20th Street, is

located 0.761 miles northeast (inferred up-gradient) from the subject property. The cleanup date provided is March 4, 2014, and the status is currently listed as active. This is actively monitored for polychlorinated biphenyls (PCBs), TPH motor oil and diesel in soil. No groundwater monitoring has occurred for this site. Chico Terminal | SFPP LP (Chico Terminal) | Kinder Morgan Energy Partners Lp (See Also Scp Case 2050093), 2570 Hegan Lane | 2570 Hegan Ln | 2570 Hegan Ln Exxon Additive Tank, is located 0.774 miles east-southeast (inferred cross-gradient) from the subject property. No status is provided about this site by the database. PG&E, Chico - 1 | Pacific Gas & Electric - Chico MGP | PG&E, 825 W 2nd Street, is located 0.781 miles northwest (inferred cross-gradient) from the subject property. The database has this site listed as certified/ operation & maintenance. This site is currently monitoring groundwater water for polycyclic aromatic hydrocarbons (PAHs); benzene, toluene, ethylbenzene, and xylenes (BTEX); total petroleum hydrocarbons as gasoline (TPH-g); and total petroleum hydrocarbons as diesel (TPH-d). According to a 2021 Groundwater Monitoring Report, the groundwater VOCs are below remediation goals. TPH-gasoline and TPH-diesel is present in onsite upgradient wells but not present in downgradient wells. Asbury Environmental Services | Asbury Environmental Services Chico | Northgate Petroleum Co, 2549 Scott Avenue, is located 0.801 miles east (inferred up-gradient) from the subject property. The site status is listed as operating permit. No further information is provided. Manufactured Gas Plant - Chico 2, 200-299 West 2nd Street, is located 0.817 miles northwest (inferred cross-gradient) from the subject property. The site status is listed as inactive and need evaluation. Asbury Environmental Services-Chico II LLC | Chico Drain Oil Service | World Oil Environmental Services - Chico II, 1618 W 5th Street | 1618 5th Street W | 1618 West 5th, is located 0.825 miles west-northwest (inferred cross-gradient) from the subject property. The site status is listed as no action. Manufactured Gas Plant - Chico 2, Portion of Block Bounded By Front (Now the Alignment For W 1Street Street.), W. 2Nd., Salem, And Sycamore (Now Normal Street.), is located 0.846 miles northwest (inferred cross-gradient) from the subject property. The site status is listed as inactive and need evaluation. Tosco Corporation, Chico Terminal | Santa Fe Pacific Pipelines Inc | Valley Wide Chemical Inc, Midway and Hegan Lanes | Midway & Hegan Ln | Midway Street & Hegan Lane, is located 0.937 miles east-southeast (inferred cross-gradient) from the subject property. This site is listed as historical with a cleanup date November 16, 1996. No further information is provided. Norge Village Cleaners | Norge Village Cleaners, 254 East First Street, is located 0.937 miles north-northwest (inferred cross-gradient) from the subject property. This site was monitored for possible PCE contamination and according to a 2007 Preliminary Endangerment Assessment-Equivalent Report PCE was not detected in the groundwater.

HWG – CA

HWG – CA is the Hazardous Waste Generator database provides a listing of hazardous waste generators. According to the report provided by EnviroSite, there are thirty-five sites listed in the HWG – CA database located within the AMSD of the subject property, including the subject property. Armstrong Residence, 1488 Chestnut Street, is located 0.0170 miles north-northwest (inferred up-gradient) from the subject property. No status is provided by the database. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.025 miles east (inferred up-gradient) from the subject property. Two accounts associated with this site are listed as inactive and one account is listed as active. County of Butte - Housing Authority, 1248 Hazel Street, is located 0.0331 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. John Hunt, 1724 Normal Avenue, is located 0.0508 miles north-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Mike Evans - Anchor Lands LLC, 228 W 22nd Street., Unit 1, is located 0.0582 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Lisa Torreano | Torreano, Lisa, 1932 Salem Street, is located 0.0964 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. County of Butte - Housing

Authority, 1233 - 1235 S Ivy Street, is located 0.0381 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. The site is listed as active. Gregg Tremaine, 337 West 16th Street, is located 0.1261 miles north-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Bent & Twisted Four Wheel Drive, 2284 W Ivy Street, is located 0.0951 miles east-southeast (inferred up-gradient) from the subject property. No status provided. Housing Authority of Chico, 1208 & 1212 Hazel, is located 0.1013 miles northwest (inferred up-gradient) from the subject property. No status provided. Robert Mortell, 230 W 20th Street, is located 0.1361 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Pacific Waterjet Cutting/Ca Storage Cons | Calif Storage Const Inc, 2288 Ivy Street, is located 0.1153 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Robb Fairchild Realtor, 228 W 21Street Street, is located 0.1387 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. California Water Service Co. - Ch 11, 315 W 16th Street, is located 0.1422 miles north-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Housing Authority of Chico, 1205 & 1207 Hazel, is located 0.0939 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. State of Jefferson 4X4 Fab and Paint | Mikes Custom Body & Collision, 3 Commerce Ct Ste 120, is located 0.1268 miles east (inferred up-gradient) from the subject property. Two accounts are associated with the site, one is inactive and the other is active. David Rothe, 1514 Salem Street., is located 0.1573 miles north (inferred up-gradient) from the subject property. The site is listed as active. Bp Solar International Inc, 180 Erma Ct Ste 150, is located 0.1487 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Borsting's, 14 Commerce Blvd #105, is located 0.1507 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Larry's Mobile Equipment Repair, 7 Commerce Ct Ste 100, is located 0.1573 miles east (inferred up-gradient) from the subject property. No status is provided. Ardis M Wilson, 134 W 22nd Street, is located 0.1839 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Robert Trausch, 138 W. 21Street Street, is located 0.2014 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Quality Water Specialists DBA Culligan of Chico | Butte City Csd, 2377 Ivy Street, is located 0.168 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Pmb Supply And Mfg Inc | PBM Supply & Mfg Inc (Chico,Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred) from the subject property. The site is listed as active. Lance Wright, 529 W 11th Street, is located 0.175 miles northwest (inferred cross-gradient) from the subject property. The site is listed as inactive. Heal, Dan, 1121 Chestnut Street, is located 0.1996 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. The site is listed as active. Chris Thompson, 123 W 22nd Street, is located 0.2356 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive.

FED BROWNFIELDS

FED BROWFIELDS is a listing of Federal brownfield remediation sites. According to the EPA, A brownfield is a property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. According to the report provided

by Envirosearch, there are five sites listed in the HWG – CA database located within the AMSD of the subject property, not including the subject property. Auto Doctor | Paul Quering Automotive | Williamson Properties, LLC, 2144 Park Avenue, is located 0.2984 miles east-northeast (inferred up-gradient) from the subject property. The database states that a Phase I assessment occurred in 2014. No further information is provided by the database. Chico Park Avenue Site, 1108 Park Avenue, is located 0.4094 miles north (inferred up-gradient) from the subject property. The database states that this site was operating for twenty years with known USTs containing gasoline that were abandoned in place with no verification as to whether releases had occurred. No previous environmental assessments have been performed at the site. Observations on the property revealed the presence of numerous small areas of oil-stained pavement, consistent with minor leaks of engine oil and fluids from parked cars. There is a possibility of the presence of lead and asbestos in construction materials in the on-site repair shop building. There is the possible presence of PCBs in the fluorescent light ballasts in the on-site repair shop building. Phase II ESA was not completed at the request of the property owner. Amazon.Com Services LLC Xte2 | 2336 Park Avenue, 2336 Park Avenue, is located 0.400 miles east (inferred up-gradient) from the subject property. The database states that a Phase I assessment occurred in 2014. No further information is provided by the database. Victor Site | Victor Industries -, 365 East 20th Street | 365 E 20th Street, is located 0.433 miles northeast (inferred up-gradient) from the subject property. This site is monitored for the TCE plume that does extend south and beneath the subject property. 2270 Fair | Work Training Center-Prestige Landscaping | Prestige Landscaping & Work Training Center, 2270 Fair Street, is located 0.445 miles east-northeast (inferred up-gradient) from the subject property. The database states that a Phase I assessment occurred in 2014. No further information is provided by the database.

5.2 Additional Environmental Records Sources and Review

The table below provides a summary of the other ascertainable records reviewed along with each record AMSD from the subject property.

SP = Subject property

SUBJECT PROPERTY

The subject property was identified in the ECHO, CALEPA SITES – CA, CIWQS – CA, CIWQS 2 – CA, CUPA_BUTTE COUNTY – CA, FA – CA, and HAZNET – CA databases. ECHO (EPA Enforcement and Compliance History Online) database to search for facilities in your community to assess their compliance with environmental regulations. As of 2022, no violations were identified. CALEPA SITES – CA is a database of California Environmental Protection Agency Regulated Sites from the Certified Unified Program Agencies (CUPA). This listing is regarding the continued onsite monitoring of PCPs and the arsenic contaminated soil. CIWQS – CA and CIWQS 2 – CA are databases that has the subject property listed as a cleanup program site. California Integrated Water Quality System database facilities listing which includes owner information, violations, inspections, and other regulatory matters. The subject property is listed as a historical CIWQS site and currently active as of June 2022. CUPA_BUTTE COUNTY – CA is a database listing of the Butte County Certified Unified Program Agency's hazardous material program sites. The status is listed as inactive and non-billable. FA – CA database is a listing of the Department of Toxic Substance Control's Financial Assurance report sites and facilities. No information is provided by the database. HAZNET – CA database is a listing of hazardous waste manifests from when hazardous waste is transported from generators to permitted recycling treatment storage or disposal facilities by registered hazardous waste transporters. The database lists the site as inactive.

CALEPA SITES – CA

CALEPA SITES – CA is a database of California Environmental Protection Agency Regulated Sites from the Certified Unified Program Agencies (CUPA). According to the Envirosearch report, there are seventeen CALEPA SITES – CA site located within the AMSD, including the subject property. Southeast Trunk Sewer Project 17-1, Midway and Estes, is located 0.0046 miles east-southeast (inferred cross-gradient) from the

subject property. No violations are reported. Superior Dryers Inc Chico | Superior Dryers Inc, 2273 Normal Street | 2273 So Normal Street, is located 0.0237 miles east (inferred up-gradient) from the subject property. Cleanup of an unauthorized release of petroleum hydrocarbons or petroleum surrogates, or byproducts from a Leaking Underground Storage Tank Cleanup. The cleanup is overseen by a local agency under the Local Oversight Program. The case is reported as closed as of 1987. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. This site has three violations reported. Two are pertaining to Hazardous Materials Release Response Plans (HMRRP) not being initialed during training and the second, HMRRP not being submitted electronically. The former is still listed as a violation and the latter is listed as returned to compliance. The third violation is pertaining to disposing of paint as solid waste and is listed as returned to compliance. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. No violations are reported. California Water Service Co. - Ch 11, 315 W 16th Street, is located 0.1422 miles north-northeast (inferred up-gradient) from the subject property. This site stores sodium hypochlorite. No violations are reported. Mike's Custom Body Works, 3 Commerce Court #120, is located 0.1267 miles east (inferred up-gradient) from the subject property. This site is listed as a smaller source air point pollution emitter. No violations are reported. Larry's Mobile Equipment Repair, 7 Commerce Ct # 100, is located 0.1626 miles east (inferred up-gradient) from the subject property. No information is provided. Pmb Supply And Mfg Inc | PBM Supply & Mfg Inc (Chico, Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred upgradient) from the subject property. This site stores hazardous waste including oil waste, coolant and antifreeze, and oil. No violations are reported. Platinum Powdercoating, 2389 Ivy Street, is located 0.198 miles east (inferred up-gradient) from the subject property. This site is listed as a smaller source air point pollution emitter. No violations are reported. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. This site stores hazardous chemicals. Nine violations have been reported pertaining to failures relating to safety protocols. All violations have been returned to compliance. Comanche Creek Greenway Improvement Project Phase 2, Meyers and Ivy Street, is located 0.2319 miles east-southeast (inferred up-gradient) from the subject property. No information is provided. The remaining sites are located down-gradient to the subject property.

CUPA_BUTTE COUNTY – CA

CUPA_BUTTE COUNTY – CA is a listing of the Butte County Certified Unified Program Agency's hazardous material program sites. According to the Envirosearch report, there are thirteen CUPA_BUTTE COUNTY – CA sites located within the AMSD, including the subject property. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. The status of the site is one account active and billable and other account is inactive and non-billable. Sprint - Sf03Ub326, 22 Overland Ct-Dayton Rd, is located 0.0382 miles west-northwest (inferred cross-gradient) from the subject property. The status of the site is inactive and non-billable. Austins Home Furnishing, 2270 Ivy Street, is located 0.0579 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Springboard Biodiesel, 2282 Ivy Street, is located 0.0617 miles east-southeast (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. The status of the site is active and billable. Pacific Waterjet

Cutting/Ca Storage Cons | Calif Storage Const Inc, 2288 Ivy Street, is located 0.1153 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Larry's Mobile Equipment Repair, 7 Commerce Ct # 100, is located 0.1626 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Ellison Painting, 11 Commerce Street # 4, is located 0.1588 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. The status of the site is inactive and non-billable. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. The status of the site is active and billable. The remaining sites are located down-gradient.

HAZNET – CA/ HIST HAZNET – CA

HAZNET – CA/HIST HAZNET -- CA are databases of hazardous waste manifests from when hazardous waste is transported from generators to permitted recycling treatment storage or disposal facilities by registered hazardous waste transporters. According to the report provided by Envirosearch, thirty-one HAZNET -- CA sites and nine HIST HAZNET – CA sites located within the AMSD, including the subject property. Armstrong Residence, 1488 Chestnut Street, is located 0.0322 miles north-northwest (inferred up-gradient) from the subject property. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. County Butte - Housing Authority, 1237-1239 Ivy Street, is located 0.0158 miles northwest (inferred cross-gradient) from the subject property. Lisa Torrealano | Torrealano, Lisa, 1932 Salem Street, is located 0.0964 miles east-northeast (inferred up-gradient) from the subject property. County Of Butte - Housing Authority, 1248 Hazel Street, is located 0.0331 miles northwest (inferred up-gradient) from the subject property. This site is listed as inactive. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. This site is listed as active. Bent & Twisted Four Wheel Drive, 2284 W Ivy Street, is located 0.0951 miles east-southeast (inferred up-gradient) from the subject property. This site is listed as active. Housing Authority of Chico, 1208 & 1212 Hazel, is located 0.1013 miles northwest (inferred up-gradient) from the subject property. This site is listed as inactive. Robert Mortell, 230 W 20th Street, is located 0.1361 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. This site is listed as inactive. Pacific Waterjet Cutting/Ca Storage Cons | Calif Storage Const Inc, 2288 Ivy Street, is located 0.1153 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. This site is listed as inactive. Robb Fairchild Realtor, 228 W 21st Street, is located 0.1387 miles east-northeast (inferred up-gradient) from the subject property. California Water Service Co. - Ch 11, 315 W 16th Street, is located 0.1422 miles north-northeast (inferred up-gradient) from the subject property. State Of Jefferson 4X4 Fab and Paint | Mikes Custom Body & Collision, 3 Commerce Ct Ste 120, is located 0.1268 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. Bp Solar International Inc, 180 Erma Ct Ste 150, is located 0.1487 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. Borsting's, 14 Commerce Blvd #105, is located 0.1507 miles east (inferred up-gradient) from the subject property. This site is listed as active. Larry's Mobile Equipment Repair, 7 Commerce Ct Ste 100, is located 0.1573 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. Ardis M Wilson, 134 W 22nd Street, is located 0.1839 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. Robert Trausch, 138 W. 21st Street, is located 0.2014 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. Quality Water Specialists DBA Culligan of Chico | Butte City Csd, 2377 Ivy Street, is located 0.168 miles east (inferred up-gradient) from the subject property. This site is

listed as active. Pmb Supply And Mfg Inc | PBM Supply & Mfg Inc (Chico, Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred) from the subject property. This site is listed as active. Lace Wright, 529 W 11th Street, is located 0.178 miles northwest (inferred cross-gradient) from the subject property. This site is listed as inactive. Heal, Dan, 1121 Chestnut Street, is located 0.1996 miles northwest (inferred up-gradient) from the subject property. This site is listed as inactive. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. This site is listed as inactive. This site is listed as active. Chris Thompson, 123 W 22nd Street, is located 0.2356 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. This site is listed as active. Unless otherwise noted, no status is provided for the listings in the database. Remaining sites are located downgradient to the subject property.

HWP – CA

HWP – CA is database listing of the Department of Toxic Substance Control's hazardous waste transporters and corrective action. According to the Envirosearch report, there are three HWP – CA sites with the AMSD of the subject property. Asbury Environmental Services | Asbury Environmental Services Chico | Northgate Petroleum Co, 2549 Scott Avenue, is located 0.801 miles east (inferred up-gradient) from the subject property. Asbury Environmental Services-Chico II LLC | Chico Drain Oil Service | World Oil Environmental Services - Chico II, 1618 W 5th Street | 1618 5th Street W | 1618 West 5th, is located 0.801 miles west-northwest (inferred cross-gradient) from the subject property. Asbury Environmental Services-Chico II LLC | World Oil Environmental Services - Chico II | Butte County Public Works Department, 1618 W 5th Street | 1618 W. 5th Street, is located 0.883 miles west (inferred cross-gradient) from the subject property. No information is provided by the database.

PFAS GAMA – CA

PFAS GAMA – CA is a database of PFOS and PFAS Groundwater Ambient Monitoring and Assessment Program (GAMA) well sampling program. According to the Envirosearch report, there are two PFAS GAMA – CA sites within the AMSD from the subject property. Ca0410002_010_010 | 0410002-010, 39.718794, -121.829537, is located 0.1477 miles north-northeast (inferred up-gradient) from the subject property. This site was samples for PFA compounds. Samples were collected from municipal wells. The number and location of samples was not specified. Ca0410002_005_005 | 0410002-005, 39.722333, -121.82611, is located 0.4269 miles north-northeast (inferred up-gradient) from the subject property. This site was samples for PFA compounds. Samples were collected from municipal wells. The number and location of samples was not specified.

5.3 Vapor Encroachment Condition Summary

Cameron-Cole conducted a review of available environmental records and conditions observed on the subject property and adjoining parcels to evaluate the potential for a vapor encroachment condition (VEC) to exist on the subject property. Based on the inferred groundwater gradient, depth to groundwater, and physical setting information, the potential for a VEC to exist on the subject property cannot be ruled out.

5.4 Unmappable Sites

The Envirosearch Report includes a summary of sites that may be located in the general area of the subject property; yet do not have adequate location addresses or latitude/longitude coordinates to pinpoint their location in relation to the subject property. Three listings for the unmappable sites were identified. The site was not observed in the vicinity of the subject property during the site reconnaissance.

5.5 Additional Environmental Record Sources

5.5.1 County Property Assessor/Appraiser

According to records maintained by the Butte County Assessor's office, the subject property consists of two adjacent sites. The northern site consists of APNs 039-400-031, 039-400-016, 039-400-022, 039-400-023, 039-400-024, 039-400-025, 039-400-026, 039-400-027 and the southern site consists of a section of APN 039-410-25, along the western border.

5.5.2 Fire/Police officials

Cameron-Cole contacted the Chico Fire Department on September 7, 2022, requesting records pertaining to fires or responses to incidents, spills, or releases of hazardous substances or petroleum products at, or in the immediate vicinity of the property. A response was received on September 7, 2022, stating the information could be obtained through the City of Chico Public Request Portal.

5.5.3 Other Record Sources

Cameron-Cole contacted the Butte County Environmental Health Division on September 7, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. A response was received on September 8, 2022, stating no records were found in association with the subject property.

Cameron-Cole contacted the Department of Toxic Substances Control on September 12, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. A response was received on September 13, 2022, stating no records were found in association with the subject property.

5.6 Physical Setting Sources

5.6.1 Topography

Figure 1 is a Site Location Map which includes information from the 2020 USGS 7.5 Minute Series, Chico quadrangle. The map was reviewed to establish the physical setting of the subject site and surrounding area. The site lies at approximately 190 ft above mean sea level and slopes gently to the southwest.

5.6.2 Soils/Geology

The Envirosearch report provides a summary of the United States Department of Agriculture (USDA) Soil Survey of the subject property's general area. According to the Envirosearch Report, the primary soil components on-site are identified as the Chico Series loam and clay loam with depths up to 203 inches. This is considered well drained with a low corrosion potential.

5.6.3 Hydrology

Based on topographic maps, and considering regional flow patterns, the groundwater flow in the vicinity of the site is inferred to be in a southwesterly direction. It must be noted that groundwater flow direction can be influenced by factors such as surface topography, underground structures, seasonal fluctuation, soil and

bedrock geology, and production wells which were not considered in this interpretation. According to the Victor Industries November 2021 Semi-Annual Groundwater Monitoring Report, the groundwater measurements and contours supports that the flow is to the southwest.

5.7 Historical Use Information

Available historical resources were consulted to develop a history of the previous uses of the property to help identify the likelihood of past uses having led to RECs in connection with the property. Copies of the aerial photographs, historical topographic maps, Fire Insurance Maps, and City Directory Report are provided in Appendix D.

5.7.1 Aerial Photographs

The aerial photographs described below previously furnished by Envirosite. Copies of the 1941, 1941, 1952, 1957, 1962, 1969, 1970, 1972, 1973, 1976, 1980, 1982, 1984, 1985, 1988, 1993, 1998, 2005, 2009, 2010, 2012, 2014, 2016, 2018, and 2020 aerial photographs are provided in Appendix D.

Date: 1941

Scale: 1" = 500'

Description of Subject Property: Orchards are present to the north and the east of the property. A number of commercial structures are present throughout the property. The southern site is agricultural.

Adjoining North: What appears to be a residential neighborhood.

Adjoining East: What appears to be agricultural land.

Adjoining South: What appears to be agricultural land

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: Agricultural land and residential neighborhoods

Date: 1941 through 1969

Scale: 1" = 500' and 1" = 1000'

Description of Subject Property: A number of commercial structures are present throughout the property. The southern site is agricultural.

Adjoining North: What appears to be a residential neighborhood.

Adjoining East: What appears to be agricultural land.

Adjoining South: What appears to be agricultural land

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: Agricultural land and residential neighborhoods

Date: 1970 through 1973

Scale: 1" = 500' and 1" = 1000'

Description of Subject Property: A number of commercial structures are present throughout the property. The southern site is agricultural. A large warehouse structure is present near the northern boundary.

Adjoining North: What appears to be a residential neighborhood.

Adjoining East: What appears to be commercial land

Adjoining South: What appears to be agricultural land
Adjoining West: A railroad followed by agricultural land.
Surrounding Area: Agricultural land and residential neighborhoods

Date: 1976 through 1988

Scale: 1" = 500' and 1" = 1000'

Description of Subject Property: A number of commercial structures are present throughout the property. The southern site is agricultural. What appears to be orchards are present along the northwestern, northeastern, and southeastern boundaries.

Adjoining North: What appears to be a residential neighborhood.

Adjoining East: What appears to be commercial land.

Adjoining South: What appears to be agricultural land

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: Agricultural land and residential neighborhoods

Date: 1993 through 1998

Scale: 1" = 500' and 1" = 1000'

Description of Subject Property: A number of structures have been removed from the site, leaving the large warehouse to the north and three structures in the central sections of the site. The southern site is agricultural. What appears to be orchards are present along the northwestern, northeastern, and southeastern boundaries.

Adjoining North: What appears to be a residential neighborhood.

Adjoining East: What appears to be commercial land.

Adjoining South: What appears to be agricultural land

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: Agricultural land and residential neighborhoods

Date: 2005 through 2020

Scale: 1" = 500' and 1" = 1000'

Description of Subject Property: A large warehouse to the north and a structure in the central sections of the site. There appears to be foundations of two structures in the central area. The southern site is agricultural. A large asphalt lot is present on the southwestern boundary. The site is primarily unused.

Adjoining North: What appears to be a residential neighborhood.

Adjoining East: What appears to be commercial land.

Adjoining South: What appears to be agricultural land

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: Agricultural land and residential neighborhoods

5.7.2 Fire Insurance Maps (Sanborn Maps)

The Fire Insurance Maps Report provided by EnviroSite indicated that coverage does exist for the subject property and vicinity. Copies of the 1909, 1921, 1949, and 1970 Sanborn Maps are provided in Appendix D. Many of the structures identified below are present in Figure 3.

Date: 1909

- The northeastern and eastern portions of the subject property were used as lumber pile storage. Alfalfa fields are marked in areas around the lumber piles and in various locations around the property.
- The southwestern to southern portion of the property the buildings are labeled as steam dry kiln, dressed lumber warehouse, box factory, sash & door factory, dry lumber shed, retail lumber, lumber storage, and general office. Toward the upper southwestern boundary of the property structures are labeled as a paint shop, two concrete oil sumps, boiler shed, and the Butte County RR Round House.

Date: 1921-1949

- The southwestern portion of the subject property there is a building labeled as the Former Machine Shop/Lumber Storage, Former Foundry/Storage, and Black Smith Shop. This building is present today. Adjacent to this building are structures labeled as Apiary Dept Storage, Planing Mill Building, Warehouse No. 1 and No. 2, Oil House and Auto Shed. The former match factory was located near the southwestern boundary. Adjacent to the match factory was a potash house, fuel bin, machine shop and an area labeled as "reserve fuel oil tank in ground".
- To the north the structures are labeled as Main Office, Auto shed, and Fairburn Hall Club House.

Date: 1970

- Adjacent to the Apiary Storage building, a structure is labeled as Steel Saw Dust Burner.
- To the south of the Match Factory and adjacent to the fuel bunkers, an area is labeled as "1,000,000-gallon asphalt-lined reservoir in ground".

5.7.3 Recorded Land Title Records

A historical chain-of-title report was not provided by the User of the report but was obtained by Cameron-Cole as part of the approved scope of services for this project. According to Mr. Sawley, the property is owned by the By Land Holdings Co., LLC.

5.7.4 Historic USGS Topographic Maps

The historic topographic maps described below were obtained from EnviroSite. Copies of the 1912, 1948, 1948/1969, 1948/1978, 1949, 1950, 2012, 2015, 2018, and 2021 topographic maps are provided in Appendix D.

Date: 1912 through 1950

Scale: 1:31680, 1:2400, 1:62500

Description of Subject Property: The northern site has a number of structures and is labeled "Diamond Match Factory". The southern site is agricultural land.

Adjoining North: No structures are noted but a number of roads are present.

Adjoining East: A number of small structures are present.

Adjoining South: Agricultural land.

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: A number of roads and neighborhoods are labeled to the north. The south is primarily agricultural land. Comanche Creek is to the south of the property.

Date: 2012 through 2021

Scale: 1:31680, 1:2400, 1:62500

Description of Subject Property: No structures are noted on the maps. The site is labeled "Diamond Match Factory". The southern site is agricultural land.

Adjoining North: No structures are noted but a number of roads are present.

Adjoining East: A number of small structures are present.

Adjoining South: Agricultural land.

Adjoining West: A railroad followed by agricultural land.

Surrounding Area: A number of roads and neighborhoods are labeled to the north. The south is primarily agricultural land. Comanche Creek is to the south of the property.

5.7.5 Local Street Directories

Historical street directories for the subject property and surrounding property addresses were provided by EnviroSite. A copy of the City Directory Report is provided in Appendix D.

501 W 16th Street

1964, 1968, 1973

- California Lumber Division
- Diamond National Corp
- Diamond National Mill

1978

- Remanufactured Wood Products
- Diamond International Corp

1988

- Louisiana Pacific

1993

- Vacant

W 16th and Chestnut

1934-35, 1940, 1945, 1950, and 1955

- Diamond Match Co
- Barber addition Diamond Match Co.

5.7.6 Building Department Records

Historical use of the subject property was researched using other standard historical sources. Therefore, Building Department records were not reviewed as part of this assessment.

5.7.7 Zoning/Land Use Records

Historical use of the subject property was researched using other standard historical sources. Therefore, historical Zoning/Land Use records were not reviewed as part of this assessment.

5.7.8 Prior Assessment Reports

Cameron-Cole was not provided with any previous ESA reports.

5.8 Historical Use Information on Adjoining Properties

The following is a summary of adjoining property historical uses based on a review of the historical records reviewed in Section 5.6.

North: Adjoining property to the north is depicted as residential dating back to at least 1941.

East: Adjoining property to the north is depicted as agricultural land until 1969 when the first structures are built by 1970.

South: Adjoining property to the south is depicted as depicted as residential since at least 1941.

West: Adjoining property to the west is depicted as a railroad followed agricultural land dating back to at least 1941.

In accordance with ASTM International E1527-21, 8.3.1, the objective of compiling and analyzing historical property information and developing a history of the previous uses of the subject property, adjoining properties, and surrounding area is to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the subject property. All obvious uses of the subject property must be identified from the present, back to the subject property's first developed use, or back to 1940, whichever is earlier. The report must describe all identified uses, justify the earliest date identified for the subject property's first developed use, and explain the reason for any gaps in the history of use. This task requires reviewing as many of the standard historical resources in 8.3.4.1 through 8.3.4.8 as are necessary and both reasonably ascertainable and likely to be useful. Data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objective has not been met. Data failure is not uncommon in trying to identify historical uses at 5-year intervals back to first use or 1940 (whichever is earlier). If the data failure represents a significant data gap to the Environmental Professional (EP), ASTM International Standard E1527-21 requires documentation of the impact of the data gap on the ability of the EP to identify RECs. No significant historical use information data gaps were encountered.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

The methodology used by the Cameron-Cole representative during the August 23, 2022, site reconnaissance consisted of visual observations of readily accessible areas of the subject property to determine the presence or absence of hazardous substance or petroleum product storage areas or spills as indicated by stressed vegetation, soil staining, storage tanks, drums, etc. In the northern site, areas of the property were fenced off due to the use of goats for vegetation clearing. In the southern site, the property could only be observed from the northern and western boundary as access to the property was not allowed at the time of the site reconnaissance.

6.2 General Site Setting

The subject property consists of two adjacent sites. The northern site is approximately 133 acres and according to the Butte County Assessor's office, the associated assessor parcel numbers (APNs) 039-400-031, 039-400-016, 039-400-022, 039-400-023, 039-400-024, 039-400-025, 039-400-026, and 039-400-027. The southern site is approximately 3 acres and consists of the western portion of APN 039-410-25. The northern site is primarily unused land with a large RV storage warehouse on the northern boundary, unused historic brick buildings near the central western boundary, and an asphalt lot, used as part of soil remediation, to the southwest. The site is primarily unused and covered with thick vegetation. The southern site is located just to the south of the northern site and separated by abandoned railroad tracks. The southern site is currently used as an orchard.

6.2.1 Geologic, Hydrogeologic, and Topographic Conditions

Based on topographic maps and observations, the subject area gently slopes to the southwest. Assuming groundwater flow follows topography, the shallow groundwater flow in the vicinity of the site is inferred to be to the south or southwesterly direction toward topographically lower land. According to the Victor Industries November 2021 Semi-Annual Groundwater Monitoring Report, the groundwater measurements and contours supports that the flow is to the southwest.

6.2.2 General Description of Structures

Near the northern boundary is large L-shaped warehouse. This warehouse is primarily used to store RVs. To the west of the warehouse is a small structure that is currently abandoned. The siding to the building is corrugated metal. At the central western section of the property at two historic brick buildings. These structures are unused and only contain the brick walls roof, no doors, or windows were observed. Adjacent to the brick buildings was a small wooden structure that appears to be a garage or maintenance shed. At the entrance to the subject property is a small wooden abandoned gatehouse and on the southern side of the entrance another small wooden building. The foundations to four buildings were observed near the brick buildings. Some debris near these foundations appear to have been burned. No building is present on the southern site.

6.2.3 Roads

The subject property can be accessed from the northeast on W 16th Street. The southern site can be access from Este Road and along a walking trail that runs parallel to the southern boundary of the northern site.

6.2.4 Potable Water Supply

The subject property is provided potable water service by the City of Chico.

6.2.5 Sewage Disposal System

The subject property is provided municipal sewer service by the City of Chico.

6.3 Interior and Exterior Observations

6.3.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

Cameron-Cole did not observe any hazardous substances and petroleum products in connection with identified uses were observed on the subject property during the August 23, 2022, site reconnaissance.

6.3.2 Storage Tanks

Cameron-Cole did observe an abandoned diesel tank during the site reconnaissance. This tank was once mounted to maintenance vehicles. This tank was empty. Another abandoned water tank was observed near the warehouse. A large, abandoned silo was observed along the north side of the warehouse.

6.3.3 Odors

Noticeable odors were not identified at the subject property at the time of the site reconnaissance.

6.3.4 Pools of Liquid

Cameron-Cole did not observe any pools of liquid on the subject property by during the site reconnaissance.

6.3.5 Drums

Cameron-Cole observed drums on the subject property by during the site reconnaissance. These drums were located inside of the storage warehouse but were either empty or contained general trash.

6.3.6 Hazardous Substance and Petroleum Product Containers Not in Connection with Identified Uses

No hazardous substances and petroleum product containers not in connection with identified uses were observed on the subject property during the site reconnaissance.

6.3.7 Unidentified Substance Containers

Unidentified (unlabeled) containers were not observed on the subject property at the time of the site reconnaissance.

6.3.8 Indicators of PCBs

Cameron-Cole did observe a pad mounted transformer adjacent to the large warehouse and two pole mounted transformers in the central sections of the subject property. There was no staining or corrosion observed.

6.4 Interior Observations

The interior of the warehouse was observed during the site reconnaissance. The buildings near the subject property entrance were boarded up and no observed. The interior of the historic brick buildings was empty and not in use. No structures are present on the southern site.

6.4.1 Heating/Cooling

Cameron-Cole did not observe any heating or cooling systems in the warehouse or in the maintenance shed.

6.4.2 Stains or Corrosion

Cameron-Cole did not observe any stains or corrosion in the warehouse. The maintenance shed is abandoned, and the floor is covered in garbage, but no obvious stains or corrosion was observed.

6.4.3 Drains and Sumps

Drain or sumps were not observed during the site reconnaissance.

6.5 Exterior Observations

6.5.1 Pits, Ponds, or Lagoons

Pits, ponds, and/or lagoons were not observed on the subject property by Cameron-Cole during the site reconnaissance.

6.5.2 Stained Soil or Pavement

De minimis oil staining of the warehouse parking lot was observed during the site reconnaissance.

6.5.3 Stressed Vegetation

The vegetation on the subject property was generally dry and was difficult to determine if any vegetation appeared stressed.

6.5.4 Solid Waste

Cameron-Cole did observe a dumper near the warehouse for trash removal. General debris around the site can be contributed to the removal of buildings or trespasser that come on to the site.

6.5.5 Wastewater

Cameron-Cole did not observe any wastewater on site.

6.5.6 Wells

Cameron-Cole did observe monitoring wells on the subject property at the time of site reconnaissance. According to the Victor Industries November Semi-Annual Groundwater Monitoring Report and the Barber Debris Temporary Handling Facility 2018 California Wildfires and Environmental Assessment Report, a number of monitoring well are present on the site. Due to the density of the vegetation, only two monitoring wells were observed during the site reconnaissance.

6.5.7 Septic Systems

Cameron-Cole did not observe any septic systems at the time of site reconnaissance.

7.0 INTERVIEWS

7.1 Site Owner/Occupants

Mr. Sawley provided several documents pertaining to the site history, past remediation and monitoring efforts, and current remediation and monitoring. According to the *Five-Year Review 2013 through 2017 Chico Remanufacturing Facility* report, the subject property is currently being monitored for an onsite plume of pentachlorophenol (PCP). A deed restriction is in place which prohibits the use of groundwater without Department of Toxic Substance Control (DTSC) approval. The asphalt lot near the western boundary is a remediation effort for arsenic contamination. This asphalt cap is to remain intact. The report also identifies the removal of 10,000 cubic yards of contaminated soil in 1992. The soil removal was to address contamination from various areas used at the Chico Remanufacturing Facility including, but limited to, two fuel bunkers, dry kilns, burn and dump areas, paint disposal pit, detention pond, etc. The soil was cleaned up to residential levels and approved by the DTSC in 1994.

According to a November 2021 Semi Annual Monitoring Report, an offsite TCE groundwater plume from an upgradient Victor Industries, extends below the southern section of the subject property. This plume is actively monitored by the off-site responsible party.

According to a May 2021 *Updated Statement of Subsurface Conditions at Barber Yard- Redevelopment Considerations* report, prepared by RCC Group, LLC (RCC), RCC conducted several due diligence activities on the subject property to assess the subsurface condition on the property in relation to the Victor Industries VOC plume. A soil vapor survey was conducted and concentrations of tetrachloroethene (PCE), benzene, and TPH-g were detected. PCE and benzene exceeded the Tier 1 Sub slab Environmental Screening Limits (ESLs).

A 1988 Chico Press Gazette article discusses the accounts, from Chico residents, of trash was piled along the boundaries of the subject property. These trash piles were said to fill trenches along the eastern boundary and on the Ivy Street right of way and consisted of car batteries, drums of used motor oil, solvents and other industrial waste liquids, railroad ties, old vehicles, etc. It is also reported that Diamond burned trash in long trenches and covered the burn areas with dirt. A 1970 correspondence between the City of Chico and Diamond National Corporation indicates a 40'x40x5' area of buried trash was excavated near the northeast corner, on the Ivy Street right of way, and transported offsite. Interviews in the 1988 Gazette article state that debris witnessed in the other areas of the right of way were not removed. The 2017 Five-Year Review also identifies the Normal Avenue Dump, near the eastern boundary, and the South Orchard Burn Dump, near the southern boundary. A "teepee burner", used to burn lumber, was located adjacent to the Normal Avenue Dump.

7.2 Past Owners, Operators, Occupants

Past owners, operators, or occupants were not interviewed for this ESA.

7.3 User

Mr. Mike Sawley, Principal Planner, City of Chico Community Development Department, completed the User Questionnaire. A summary of the responses is provided in Section 4.0, and a copy of the questionnaire is provided in Appendix B.

7.4 State and/or Local Government officials

Cameron-Cole contacted the Butte County Environmental Health Division on September 7, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state

hazardous waste database listing associated with the subject property. A response was received on September 9, 2022, stating no records were found in association with the subject property.

Cameron-Cole contacted the Department of Toxic Substances Control on September 12, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. A response was received on September 13, 2022, stating all documents associated with this site were available online through the Geotracker website.

Cameron-Cole contacted the City of Chico on September 7, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. On September 14 and 22, 2022, a number of documents associated with the subject property were provided. Many of these documents were previously provided by Mr. Sawley. The additional documents provided included the 1970 debris removal correspondence and 1997 DTSC letters regarding the current state of the asphalt cap and closure of two brick-lined fuel bunkers located in the southern section of the property, adjacent to the asphalt cap. The letter states that this area was approved for closure based on the investigation and remediation conducted in 1992. The DTSC did note to finalize closure soil confirmation soil samples would be required to determine the need for groundwater monitoring. Any documents regarding analytical results of 1992 remediation and the confirmation sampling were not obtained.

8.0 FINDINGS

The goal of this Phase I ESA is to identify the presence or likely presence of hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water on the property. The findings of this report are summarized below and may include known or suspect RECs, CRECs, HRECs, or *de minimis* conditions identified during the performance of this Phase I ESA.

- According to the *Five-Year Review 2013 through 2017 Chico Remanufacturing Facility* report, the subject property is currently being monitored for an onsite plume of pentachlorophenol (PCP). A deed restriction is in place which prohibits the use of groundwater without Department of Toxic Substance Control (DTSC) approval. The asphalt pad near the western boundary is a remediation effort for arsenic contamination. This asphalt cap is to remain intact.
- The report also identifies the removal of 10,000 cubic yards of contaminated soil in 1992. The soil removal was to address contamination from various areas used at the Chico Remanufacturing Facility including, but limited to, two fuel oil bunkers, dry kilns, burn and dump areas, paint disposal pit, detention pond, etc. The soil was cleaned up to residential levels and approved by the DTSC in 1994.
- According to a November 2021 Semi Annual Monitoring Report, an offsite TCE plume from an upgradient Victor Industries, extends below the southern section of the subject property. This plume is actively monitored by the off-site responsible party.
- According to a May 2021 *Updated Statement of Subsurface Conditions at Barber Yard-Redevelopment Considerations* report which is monitoring the Victor Plume in relation to the subject property, concentrations of PCE, benzene, and TPH-g were detected. PCE and benzene exceeded the Tier 1 Sub slab Environmental Screening Limits (ESLs).
- According to 1988 Chico Press Gazette article trash piles were said to fill trenches along the eastern boundary and on the Ivy Street right of way and consisted of car batteries, drums of used motor oil, solvents and other industrial waste liquids, railroad ties, old vehicles, and etc. It is also reported that Diamond burned trash in long trenches and covered the burn areas with dirt. A 1970 correspondence between the City of Chico and Diamond National Corporation indicates a 40'x40x5' area of buried trash was excavated near the northeast corner, on the Ivy Street right of way, and transported offsite. Interviews in the 1988 Gazette article state that debris witnessed in the other areas of the right of way were not removed. The 2017 Five-Year Review also identifies the Normal Avenue Dump, near the eastern boundary, and the South Orchard Burn Dump, near the southern boundary. A "teepee burner", used to burn lumber, was located adjacent to the Normal Avenue Dump.
- According to the Envirosearch aerial maps, orchards have been present in the northern site periodically since 1941. The southern site appears to have only been used as an orchard since at least 1941.

- The subject property was identified in the HIST UST – CA, CERCLIS NFRAP, CERCLIS-HIST, RCRA_LQG, RCRA_NONGEN, RCRA_SQG, SLIC REG 5 – CA, ENVIROSTOR – CA, HWG – CA, ECHO, CALEPA SITES – CA, CIWQS – CA, CIWQS 2 – CA, CUPA_BUTTE COUNTY – CA, FA – CA, HAZNET – CA and LIENS - CA databases of the regulatory records search report provided by Envirosearch. According to the HIST UST – CA database is associated with a 6,000-gallon diesel underground storage tank (UST), two 6,000-gallon unleaded gasoline USTs, a 500-gallon diesel UST, a 12,000-gallon diesel UST, a 1,000-gallon unleaded gasoline UST, a 3,000-gallon diesel UST, and a 10,000-gallon UST registered to Chico Remanufacturing in 1988.
- According to the Envirosearch Report, three HIST UST – CA sites are located within the AMSD of the subject property
- According to the Envirosearch report, there is one CERCLIS NFRAP site located on the subject property.
- According to the Envirosearch report, two CERCLIS-HIST sites are located within the AMSD of the subject property.
- According to the Envirosearch report, there are seventeen LUST REG 5 – CA sites located within the AMSD of the subject property.
- According to the Envirosearch report there are four SLIC REG 5 – CA site located within the AMSD of the subject property.
- According to the Envirosearch report, there are thirteen RCRA_NONGEN sites located within the AMSD of the subject property.
- According to the report provided by Envirosearch, there are sixteen sites listed in the Envirostor – CA database located within the AMSD of the subject property.
- According to the report provided by Envirosearch, there are thirty-five sites listed in the HWG – CA database located within the AMSD of the subject property, including the subject property.
- According to the report provided by Envirosearch, there are five sites listed in the FED BROWFIELDS database located within the AMSD of the subject property.
- According to the Envirosearch report, there are seventeen CALEPA SITES – CA site located within the AMSD.
- According to the Envirosearch report, there are thirteen CUPA_BUTTE COUNTY – CA sites located within the AMSD, including the subject property.
- According to the report provided by Envirosearch, thirty-one HAZNET -- CA sites and nine HIST HAZNET – CA sites located within the AMSD, including the subject property.
- According to the Envirosearch report, there are three HWP – CA sites with the AMSD of the subject property.
- According to the Envirosearch report, there are two PFAS GAMA – CA sites within the AMSD from the subject property.

9.0 OPINION

With reference to the foregoing section of this report (Section 8.0), the following Opinions are provided in connection with this assessment.

- According to the *Five-Year Review 2013 through 2017 Chico Remanufacturing Facility report* associated with the open cleanup case per CALEPA – CA, the subject property is currently being monitored for an onsite pentachlorophenol (PCP) groundwater contamination. A deed restriction is in place which prohibits the use of groundwater without Department of Toxic Substance Control (DTSC) approval. Additionally, an asphalt-capped pad near the western boundary is a remediation effort for arsenic contamination associated with removed rail spur ballast material from across the site. This asphalt cap is to remain intact with activity use limitations (AULs) applicable to this area as specified in the same deed restriction. The groundwater monitoring and AULs were identified by the CALEPA – CA database. Based on this information, it is the opinion of Cameron-Cole, the current AULs associated with the asphalt pad represents a CREC while the ongoing PCP groundwater monitoring represents a REC as defined by the applicable standard.
- The report also identifies the removal of 10,000 cubic yards of contaminated soil in 1992. The soil removal was to address contamination from various areas used at the Chico Remanufacturing Facility including, but limited to, two fuel oil bunkers, dry kilns, burn and dump areas, paint disposal pit, detention pond, etc. The soil was cleaned up to residential levels and approved by the DTSC in 1994. Based on this information, in the opinion of Cameron-Cole, the soil contamination has been addressed to the satisfaction of the regulatory agency constitute a HREC in connection with the subject property as defined by the applicable standard.
- According to a November 2021 Semi Annual Monitoring Report, an offsite TCE and PCE plume from an upgradient Victor Industries, extends below the southern section of the subject property. This plume is actively monitored. In the opinion of Cameron-Cole, the Victor Industries TCE plume constitutes a REC in connection with the subject property as defined by the applicable standard.
- According to a May 2021 *Updated Statement of Subsurface Conditions at Barber Yard-Redevelopment Considerations* report which is monitoring the Victor Plume in relation to the subject property, concentrations of PCE, benzene, and TPH-g were detected in soil vapor samples. PCE and benzene exceeded the Tier 1 Sub slab Environmental Screening Limits (ESLs). In the opinion of Cameron-Cole, the identified concentrations of PCE and benzene exceeds the ESLs and constitutes a REC in connection with the subject property as defined by the applicable standard.
- According to 1988 Chico Press Gazette article trash piles were said to fill trenches along the eastern boundary and on the Ivy Street right of way and consisted of car batteries, drums of used motor oil, solvents and other industrial waste liquids, railroad ties, old vehicles, and etc. It is also reported that Diamond burned trash in long

trenches and covered the burn areas with dirt. A 1970 correspondence between the City of Chico and Diamond National Corporation indicates a 40'x40x5' area of buried trash was excavated near the northeast corner, on the Ivy Street right of way, and transported offsite. Interviews in the 1988 Gazette article state that debris witnessed in the other areas of the right of way were not removed. The 2017 Five-Year Review also identifies the Normal Avenue Dump, near the eastern boundary, and the South Orchard Burn Dump, near the southeastern boundary. A "teepee burner", used to burn lumber, was located adjacent to the Normal Avenue Dump. Based on the information provided, in the opinion of Cameron-Cole, the historic waste management practices and lack of documentation of remediation and verification sampling constitute a REC in connection with subject property as defined by the applicable standard.

- According to the Envirosearch aerial maps, orchards have been present in the northern site periodically since 1941. The southern site appears to have only been used as an orchard since at least 1941. Historically, lead arsenate was a commonly used pesticide in orchards from as early as the late 1880s until the 1960s. No documentation is available regarding chemical use in the orchards. Considering the long residency of metals and legacy pesticides in shallow soils as well as the proposed residential development of the property, it is Cameron-Cole's opinion that this represents a REC.
- The subject property was identified in the HIST UST – CA, CERCLIS NFRAP, CERCLIS-HIST, RCRA_LQG, RCRA_NONGEN, RCRA_SQG, SLIC REG 5 – CA, ENVIROSTOR – CA, HWG – CA, ECHO, CALEPA SITES – CA, CIWQS – CA, CIWQS 2 – CA, CUPA_BUTTE COUNTY – CA, FA – CA, HAZNET – CA, LIENS – CA ECHO, CALEPA SITES – CA, CIWQS – CA, CIWQS 2 – CA, CUPA_BUTTE COUNTY – CA, FA – CA, and HAZNET – CA databases of the regulatory records search report provided by Envirosearch. According to the HIST UST – CA database, eight gasoline and diesel USTs were registered with Chico Remanufacturing in 1988. No information regarding the current status of the USTs was available. CALEPA SITES – CA is a database of California Environmental Protection Agency Regulated Sites from the Certified Unified Program Agencies (CUPA). This listing is regarding the continued onsite monitoring of PCPs and the arsenic contaminated soil. CIWQS – CA and CIWQS 2 – CA are databases that has the subject property listed as a cleanup program site. California Integrated Water Quality System database facilities listing which includes owner information, violations, inspections, and other regulatory matters. The subject property is listed as a historical CIWQS site and currently active as of June 2022. The identified CALEPA SITES – CA and data gap associated with the status of the HIST UST constitute a REC as defined by the applicable standard. There is one CERCLIS NFRAP site located on the subject property. CERCLIS NFRAP is a database pertaining to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) sites with No Further Remedial Action Planned from the CERCLIS program. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. In the opinion of Cameron-Cole, the identified CERCLIS NFRAP site does not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosearch report, two CERCLIS-HIST sites are located within the AMSD of the subject property. The subject property (previously discussed) and the Victor Industries – 20th Street were the two sites identified. Victor Industries | DTSC 365 E 20th Street | 365 East 20th Street, is located 0.433 miles (inferred up-gradient) from the subject property. This is pertaining to the trichloroethylene (TCE) cleanup program associated with this site. According to the Victor Industries (20th Street) November 2021 Semi-Annual Groundwater Monitoring Report, contaminants were first detected in October 1984. TCE concentrations continue to be present in the groundwater and extend below the subject property. In the opinion of Cameron-Cole, the Victor Industries TCE plume constitutes a REC in connection with the subject property as defined by the applicable standard.
- According to the Envirosearch report, there are seventeen LUST REG 5 – CA sites located within the AMSD of the subject property. The database has these seventeen sites listed as clean-up is complete. In the opinion of Cameron-Cole, the identified LUST REG 5 – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.
- According to the Envirosearch report there are four SLIC REG 5 – CA site located within the AMSD of the subject property, including the subject property. Victor Industries 20th Street PCE Plume, 365 & 395 20th Street E, is located 0.433 miles northeast (inferred up-gradient) from the subject property. This site is currently being monitored for a TCE plume that extends under subject property. Former Butte County Mosquito & Vector Control District Substation, 2460 Valine Ln., is located 0.4378 miles east (inferred up-gradient) from the subject property. The site status is listed as completed case closed as of 2011. Flowserve Corporation (Chico Southwest PCE Plume) | Flowserve Corporation - Chico | Flowserve Pump Division, 844 Broadway Street | 844 Broadway Street, APN 004-285-002-000, is located 0.451 miles north-northwest (inferred up-gradient) from the subject property. According to a 2014 Passive Soil Gas Sampling Report, a tetrachloroethene (PCE) plume extends from this site to the southwest but it does not extend to the subject property. The database currently has the site listed as currently open. In the opinion of Cameron-Cole, the Victor Industries TCE plume constitutes a REC in connection with the subject property as defined by the applicable standard. The remaining three identified SLIC REG 5 – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.
- According to the Envirosearch report, there are thirteen RCRA_NONGEN sites located within the AMSD of the subject property. All sites identified have no violations reported for the sites. In the opinion of Cameron-Cole, the thirteen RCRA_NONGEN sites do not constitute a REC in connection with the subject property as defined by the applicable standard.
- According to the report provided by Envirosearch, there are sixteen sites listed in the ENVIROSTOR – CA database located within the AMSD of the subject property. The subject property is one of the identified sites and has been previously discussed. Niagara Chemical Division-FMC Corp #2, 724 West 9th, is located 0.3571 miles northwest (inferred cross-gradient) from the subject property. The cleanup date provided is

November 16, 1994. No status is provided. Park Avenue Housing Partners LP | Park Avenue Apartments | 1297 Park Avenue Apartments, 1297 Park Avenue | 1297 Park Avenue 179 E. 12th Street, is located 0.4198 miles north (inferred cross-gradient) from the subject property. The cleanup date provided is January 3, 2021, and the status is currently listed as active. According to a November 2021 Work Plan report, the site is actively monitored for volatile organic compounds (VOCs) in near surface soil, but no VOCs are present in the groundwater. Chico Imports, Chico Imports | K & A Custom Plating of Chico | Chico Imports, 1430 Locust Street | 1430 Locust, is located 0.4257 miles north-northeast (inferred up-gradient) from the subject property. The database lists this site as historical, and the cleanup date is March 4, 1996. Site screening occurred on January 28, 1987. Current status is not provided. Victor Industries – 20th Street | Victor Industries | DTSC, 365 E 20th Street | 365 East 20th Street, is located 0.433 miles northeast (inferred up-gradient) from the subject property. The cleanup date provided is October 1, 1990, and the status is currently listed as active. This site is actively monitored due to TCE contamination from this site. Flowserve Corporation (Chico Southwest PCE Plume) | Flowserve Corporation - Chico | Flowserve Pump Division, 844 Broadway Street | 844 Broadway Street, APN 004-285-002-000, is located 0.451 miles north-northwest (inferred cross-gradient) from the subject property. The cleanup date provided is March 4, 2014, and the status is currently listed as active. Chico - Skyway Subdivision Groundwater Plume, Hagen Lane/Skyway Avenue, is located 0.706 miles east-southeast (inferred cross-gradient) from the subject property. The cleanup date provided is October 1, 1990, and the status is currently listed as active. This site is actively monitored for a TCE plume and extends to the south beneath the subject property. Chico Scrap Metals Inc | Chico Scrap Metal Inc | Chico Scrap Metal – 20th Street, 878 E 20th Street | 878 East 20th Street | 878 East 20th Street, is located 0.761 miles northeast (inferred up-gradient) from the subject property. The cleanup date provided is March 4, 2014, and the status is currently listed as active. This site is actively monitored for polychlorinated biphenyls (PCBs), TPH motor oil and diesel in soil. No groundwater monitoring has occurred for this site. Chico Terminal | SFPP LP (Chico Terminal) | Kinder Morgan Energy Partners LP (See Also Scp Case 2050093), 2570 Hegan Lane | 2570 Hegan Ln | 2570 Hegan Ln Exxon Additive Tank, is located 0.774 miles east-southeast (inferred cross-gradient) from the subject property. No status is provided about this site by the database. PG&E, Chico - 1 | Pacific Gas & Electric - Chico MGP | PG&E, 825 W 2nd Street, is located 0.781 miles northwest (inferred cross-gradient) from the subject property. The database has this site listed as certified/ operation & maintenance. This site is currently monitoring groundwater water for polycyclic aromatic hydrocarbons (PAHs); benzene, toluene, ethylbenzene, and xylenes (BTEX); total petroleum hydrocarbons as gasoline (TPH-g); and total petroleum hydrocarbons as diesel (TPH-d). According to a 2021 Groundwater Monitoring Report, the groundwater VOCs are below remediation goals. TPH-gasoline and TPH-diesel is present in onsite upgradient wells but not present in downgradient wells. Asbury Environmental Services | Asbury Environmental Services Chico | Northgate Petroleum Co, 2549 Scott Avenue, is located 0.801 miles east (inferred cross-gradient) from the subject property. The site status is listed as operating permit. No further information is provided. Manufactured Gas Plant - Chico 2, 200-299

West 2Nd Street, is located 0.817 miles northwest (inferred cross-gradient) from the subject property. The site status is listed as inactive and need evaluation. Asbury Environmental Services-Chico II LLC | Chico Drain Oil Service | World Oil Environmental Services - Chico II, 1618 W 5th Street | 1618 5th Street W | 1618 West 5th, is located 0.825 miles west-northwest (inferred cross-gradient) from the subject property. The site status is listed as no action. Manufactured Gas Plant - Chico 2, Portion of Block Bounded By Front (Now the Alignment For W 1Street Street.), W. 2Nd., Salem, And Sycamore (Now Normal Street.), is located 0.846 miles northwest (inferred cross-gradient) from the subject property. The site status is listed as inactive and need evaluation. Tosco Corporation, Chico Terminal | Santa Fe Pacific Pipelines Inc | Valley Wide Chemical Inc, Midway and Hegan Lanes | Midway & Hegan Ln | Midway Street & Hegan Lane, is located 0.937 miles east-southeast (inferred cross-gradient) from the subject property. This site is listed as historical with a cleanup date November 16, 1996. No further information is provided. Norge Village Cleaners | Norge Village Cleaners, 254 East First Street, is located 0.937 miles north-northwest (inferred cross-gradient) from the subject property. This site was monitored for possible PCE contamination and according to a 2007 Preliminary Endangerment Assessment-Equivalent Report PCE was not detected in the groundwater. Based on the review of the identified site it is Cameron-Cole's opinion that the Victor Industries TCE plume constitutes a REC in connection with the subject property as defined by the applicable standard. The remaining fourteen identified ENVIROSTOR sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the report provided by Envirosearch, there are thirty-five sites listed in the HWG – CA database located within the AMSD of the subject property, including the subject property. HWG – CA is the Hazardous Waste Generator database provides a listing of hazardous waste generators. According to the report provided by Envirosearch, there are thirty-five sites listed in the HWG – CA database located within the AMSD of the subject property, including the subject property. Armstrong Residence, 1488 Chestnut Street, is located 0.0170 miles north-northwest (inferred up-gradient) from the subject property. No status is provided by the database. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.025 miles east (inferred up-gradient) from the subject property. Two accounts associated with this site are listed as inactive and one account is listed as active. County of Butte - Housing Authority, 1248 Hazel Street, is located 0.0331 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. John Hunt, 1724 Normal Avenue, is located 0.0508 miles north-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Mike Evans - Anchor Lands LLC, 228 W 22nd Street., Unit 1, is located 0.0582 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Lisa Torreano | Torreano, Lisa, 1932 Salem Street, is located 0.0964 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. County of Butte - Housing Authority, 1233 - 1235 S Ivy Street, is located 0.0381 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste

110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. The site is listed as active. Gregg Tremaine, 337 West 16th Street, is located 0.1261 miles north-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Bent & Twisted Four Wheel Drive, 2284 W Ivy Street, is located 0.0951 miles east-southeast (inferred up-gradient) from the subject property. No status provided. Housing Authority of Chico, 1208 & 1212 Hazel, is located 0.1013 miles northwest (inferred up-gradient) from the subject property. No status provided. Robert Mortell, 230 W 20th Street, is located 0.1361 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Pacific Waterjet Cutting/Ca Storage Cons | Calif Storage Const Inc, 2288 Ivy Street, is located 0.1153 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Robb Fairchild Realtor, 228 W 21Street Street, is located 0.1387 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. California Water Service Co. - Ch 11, 315 W 16th Street, is located 0.1422 miles north-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Housing Authority of Chico, 1205 & 1207 Hazel, is located 0.0939 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. State of Jefferson 4X4 Fab and Paint | Mikes Custom Body & Collision, 3 Commerce Ct Ste 120, is located 0.1268 miles east (inferred up-gradient) from the subject property. Two accounts are associated with the site, one is inactive and the other is active. David Rothe, 1514 Salem Street., is located 0.1573 miles north (inferred up-gradient) from the subject property. The site is listed as active. Bp Solar International Inc, 180 Erma Ct Ste 150, is located 0.1487 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Borsting's, 14 Commerce Blvd #105, is located 0.1507 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Larry's Mobile Equipment Repair, 7 Commerce Ct Ste 100, is located 0.1573 miles east (inferred up-gradient) from the subject property. No status is provided. Ardis M Wilson, 134 W 22nd Street, is located 0.1839 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Robert Trausch, 138 W. 21Street Street, is located 0.2014 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. Quality Water Specialists DBA Culligan of Chico | Butte City Csd, 2377 Ivy Street, is located 0.168 miles east (inferred up-gradient) from the subject property. The site is listed as inactive. Pmb Supply And Mfg Inc | PBM Supply & Mfg Inc (Chico,Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred) from the subject property. The site is listed as active. Lance Wright, 529 W 11th Street, is located 0.175 miles northwest (inferred cross-gradient) from the subject property. The site is listed as inactive. Heal, Dan, 1121 Chestnut Street, is located 0.1996 miles northwest (inferred up-gradient) from the subject property. The site is listed as inactive. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. The site is listed as active. Chris Thompson, 123 W 22nd Street, is located 0.2356 miles east-northeast (inferred up-gradient) from the subject property. The site is listed as inactive. The database provides whether the site is currently active or inactive. No violation status is provided by the database. In the

opinion of Cameron-Cole, the thirteen thirty-five HWG – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the report provided by Envirosearch, there are five sites listed in the FED BROWFIELDS database located within the AMSD of the subject property. Auto Doctor | Paul Quering Automotive | Williamson Properties, LLC, 2144 Park Avenue, is located 0.2984 miles east-northeast (inferred up-gradient) from the subject property. The database states that a Phase I assessment occurred in 2014. No further information is provided by the database. Chico Park Avenue Site, 1108 Park Avenue, is located 0.4094 miles north (inferred up-gradient) from the subject property. The database states that this site was operating for twenty years with known USTs containing gasoline that were abandoned in place with no verification as to whether releases had occurred. No previous environmental assessments have been performed at the site. Observations on the property revealed the presence of numerous small areas of oil-stained pavement, consistent with minor leaks of engine oil and fluids from parked cars. There is a possibility of the presence of lead and asbestos in construction materials in the on-site repair shop building. There is the possible presence of PCBs in the fluorescent light ballasts in the on-site repair shop building. Phase II ESA was not completed at the request of the property owner. Amazon.Com Services LLC Xte2 | 2336 Park Avenue, 2336 Park Avenue, is located 0.400 miles east (inferred up-gradient) from the subject property. The database states that a Phase I assessment occurred in 2014. No further information is provided by the database. Victor Site | Victor Industries -, 365 East 20th Street | 365 E 20th Street, is located 0.433 miles northeast (inferred up-gradient) from the subject property. This site is monitored for the TCE plume that does extend south the subject property. 2270 Fair | Work Training Center-Prestige Landscaping | Prestige Landscaping & Work Training Center, 2270 Fair Street, is located 0.445 miles east-northeast (inferred up-gradient) from the subject property. The database states that a Phase I assessment occurred in 2014. No further information is provided by the database. In the opinion of Cameron-Cole, the Victor Industries TCE plume constitutes a REC in connection with the subject property as defined by the applicable standard. In the opinion of Cameron-Cole, the remaining four HWG – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.
- According to the Envirosearch report, there are seventeen CALEPA SITES – CA sites located within the AMSD, including the subject property. Southeast Trunk Sewer Project 17-1, Midway and Estes, is located 0.0046 miles east-southeast (inferred cross-gradient) from the subject property. No violations are reported. Superior Dryers Inc Chico | Superior Dryers Inc, 2273 Normal Street | 2273 So Normal Street, is located 0.0237 miles east (inferred up-gradient) from the subject property. Cleanup of an unauthorized release of petroleum hydrocarbons or petroleum surrogates, or byproducts from a Leaking Underground Storage Tank Cleanup. The cleanup is overseen by a local agency under the Local Oversight Program. The case is reported as closed as of 1987. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. This site has three violations reported. Two are pertaining to Hazardous Materials Release Response

Plans (HMRRP) not being initialed during training and the second, HMRRP not being submitted electronically. The former is still listed as a violation and the latter is listed as returned to compliance. The third violation is pertaining to disposing of paint as solid waste and is listed as returned to compliance. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. No violations are reported. California Water Service Co. - Ch 11, 315 W 16th Street, is located 0.1422 miles north-northeast (inferred up-gradient) from the subject property. This site stores sodium hypochlorite. No violations are reported. Mike's Custom Body Works, 3 Commerce Court #120, is located 0.1267 miles east (inferred up-gradient) from the subject property. This site is listed as a smaller source air point pollution emitter. No violations are reported. Larry's Mobile Equipment Repair, 7 Commerce Ct # 100, is located 0.1626 miles east (inferred up-gradient) from the subject property. No information is provided. Pmb Supply and Mfg Inc | PBM Supply & Mfg Inc (Chico, Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred upgradient) from the subject property. This site stores hazardous waste including oil waste, coolant and antifreeze, and oil. No violations are reported. Platinum Powder coating, 2389 Ivy Street, is located 0.198 miles east (inferred up-gradient) from the subject property. This site is listed as a smaller source air point pollution emitter. No violations are reported. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. This site stores hazardous chemicals. Nine violations have been reported pertaining to failures relating to safety protocols. All violations have been returned to compliance. Comanche Creek Greenway Improvement Project Phase 2, Meyers and Ivy Street, is located 0.2319 miles east-southeast (inferred cross-gradient) from the subject property. No information is provided. The remaining sites are located down-gradient to the subject property. In the opinion of Cameron-Cole, the remain seventeen CALEPA SITES – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the Envirosearch report, there are thirteen CUPA_BUTTE COUNTY – CA sites located within the AMSD, including the subject property. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. The status of the site is one account active and billable and other account is inactive and non-billable. Sprint - Sf03Ub326, 22 Overland Ct-Dayton Rd, is located 0.0382 miles west-northwest (inferred cross-gradient) from the subject property. The status of the site is inactive and non-billable. Austins Home Furnishing, 2270 Ivy Street, is located 0.0579 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Springboard Biodiesel, 2282 Ivy Street, is located 0.0617 miles east-southeast (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. The

status of the site is active and billable. Pacific Waterjet Cutting/Ca Storage Cons | Calif Storage Const Inc, 2288 Ivy Street, is located 0.1153 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Larry's Mobile Equipment Repair, 7 Commerce Ct # 100, is located 0.1626 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Ellison Painting, 11 Commerce Street # 4, is located 0.1588 miles east (inferred up-gradient) from the subject property. The status of the site is inactive and non-billable. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. The status of the site is inactive and non-billable. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. The status of the site is active and billable. The remaining sites are located down-gradient. In the opinion of Cameron-Cole, the thirteen CUPA_BUTTE COUNTY – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

- According to the report provided by Envirosearch, thirty-one HAZNET -- CA sites and nine HIST HAZNET – CA sites located within the AMSD, including the subject property. Armstrong Residence, 1488 Chestnut Street, is located 0.0322 miles north-northwest (inferred up-gradient) from the subject property. Wizard Manufacturing Inc., 2244 Ivy Street, is located 0.0303 miles east (inferred up-gradient) from the subject property. County Butte - Housing Authority, 1237-1239 Ivy Street, is located 0.0158 miles northwest (inferred cross-gradient) from the subject property. Lisa Torreano | Torreano, Lisa, 1932 Salem Street, is located 0.0964 miles east-northeast (inferred up-gradient) from the subject property. County Of Butte - Housing Authority, 1248 Hazel Street, is located 0.0331 miles northwest (inferred up-gradient) from the subject property. This site is listed as inactive. L & C Landscape Inc DBA Lamb & Carlson Commercial Landscape & Maint | North Valley Building Systems Inc | L&C Landscape Inc, 40 Seville Ct Ste 110 | 30 Seville Ct, is located 0.0972 miles east-southeast (inferred up-gradient) from the subject property. This site is listed as active. Bent & Twisted Four Wheel Drive, 2284 W Ivy Street, is located 0.0951 miles east-southeast (inferred up-gradient) from the subject property. This site is listed as active. Housing Authority of Chico, 1208 & 1212 Hazel, is located 0.1013 miles northwest (inferred up-gradient) from the subject property. This site is listed as inactive. Robert Mortell, 230 W 20th Street, is located 0.1361 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. This site is listed as inactive. Pacific Waterjet Cutting/Ca Storage Cons | Calif Storage Const Inc, 2288 Ivy Street, is located 0.1153 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. This site is listed as inactive. Robb Fairchild Realtor, 228 W 21st Street, is located 0.1387 miles east-northeast (inferred up-gradient) from the subject property. California Water Service Co. - Ch 11, 315 W 16th Street, is located 0.1422 miles north-northeast (inferred up-gradient) from the subject property. State Of Jefferson 4X4 Fab and Paint | Mikes Custom Body & Collision, 3 Commerce Ct Ste 120, is located 0.1268 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. Bp Solar International Inc, 180 Erma Ct Ste 150, is located 0.1487 miles east (inferred

up-gradient) from the subject property. This site is listed as inactive. Borsting's, 14 Commerce Blvd #105, is located 0.1507 miles east (inferred up-gradient) from the subject property. This site is listed as active. Larry's Mobile Equipment Repair, 7 Commerce Ct Ste 100, is located 0.1573 miles east (inferred up-gradient) from the subject property. This site is listed as inactive. Ardis M Wilson, 134 W 22nd Street, is located 0.1839 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. Robert Trausch, 138 W. 21 Street Street, is located 0.2014 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. Quality Water Specialists DBA Culligan of Chico | Butte City Csd, 2377 Ivy Street, is located 0.168 miles east (inferred up-gradient) from the subject property. This site is listed as active. Pmb Supply And Mfg Inc | PBM Supply & Mfg Inc (Chico, Ca) (Hav Dept), 2424 Ivy Street, is located 0.1781 miles east-southeast (inferred cross-gradient) from the subject property. This site is listed as active. Lace Wright, 529 W 11th Street, is located 0.178 miles northwest (inferred cross-gradient) from the subject property. This site is listed as inactive. Heal, Dan, 1121 Chestnut Street, is located 0.1996 miles northwest (inferred up-gradient) from the subject property. This site is listed as inactive. Butte County Mosquito & Vector Control District | Guillon Industrial Property Inc | Butte County Vector Control, 444 Otterson Dr, is located 0.21 miles east-southeast (inferred cross-gradient) from the subject property. This site is listed as inactive. This site is listed as active. Chris Thompson, 123 W 22nd Street, is located 0.2356 miles east-northeast (inferred up-gradient) from the subject property. This site is listed as inactive. PBM Supply & Mfg Inc, 324 Meyers Street, is located 0.2307 miles east-southeast (inferred up-gradient) from the subject property. This site is listed as active. Unless otherwise noted, no status is provided for the listings in the database. Remaining sites are located downgradient to the subject property. Based on the review of these sites and their distance and location relevant to the subject property it is Cameron-Cole's opinion that they do not constitute a REC as defined by the applicable standard.

- According to the Envirosearch report, there are three HWP – CA sites with the AMSD of the subject property. Asbury Environmental Services | Asbury Environmental Services Chico | Northgate Petroleum Co, 2549 Scott Avenue, is located 0.801 miles east (inferred up-gradient) from the subject property. Asbury Environmental Services-Chico II LLC | Chico Drain Oil Service | World Oil Environmental Services - Chico II, 1618 W 5th Street | 1618 5th Street W | 1618 West 5th, is located 0.801 miles west-northwest (inferred cross-gradient) from the subject property. Asbury Environmental Services-Chico II LLC | World Oil Environmental Services - Chico II | Butte County Public Works Department, 1618 W 5th Street | 1618 W. 5th Street, is located 0.883 miles west (inferred cross-gradient) from the subject property. No information is provided by the database. In the opinion of Cameron-Cole, the three HWP – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.
- According to the Envirosearch report, there are two PFAS GAMA – CA sites within the AMSD from the subject property. According to the Envirosearch report, there are two PFAS GAMA – CA sites within the AMSD from the subject property. Ca0410002_010_010 | 0410002-010, 39.718794, -121.829537, is located 0.1477

miles north-northeast (inferred up-gradient) from the subject property. This site was samples for PFA compounds. Samples were collected from municipal wells. The number and location of samples was not specified. Ca0410002_005_005 | 0410002-005, 39.722333, -121.82611, is located 0.4269 miles north-northeast (inferred up-gradient) from the subject property. This site was samples for PFA compounds. Samples were collected from municipal wells. The number and location of samples was not specified. These sites reported detections of perfluorohexanesulfonic acid (12 ng/L), perfluorobutanesulfonic acid (4.8 ng/L), perfluorooctanoic acid (5.6 ng/L and 26 ng/L). Based on this information, in the opinion of Cameron-Cole, the two PFAS GAMA – CA sites do not constitute a REC in connection with the subject property as defined by the applicable standard.

10.0 CONCLUSIONS

In summary, Cameron-Cole has performed a Phase I Environmental Site Assessment, in general conformance with the scope and limitations of ASTM International Standard E1527-21, for the property located at 501 W. 16th Street, Chico, Butte County, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. No significant data gaps were encountered that prevented Cameron-Cole from forming opinions specific to the assessment of the subject property. This assessment has revealed evidence of RECs in connection with the subject property.

- According to the *Five-Year Review 2013 through 2017 Chico Remanufacturing Facility* report associated with the open cleanup case per CALEPA – CA, the subject property is currently being monitored for an onsite pentachlorophenol (PCP) groundwater contamination. A deed restriction is in place which prohibits the use of groundwater without Department of Toxic Substance Control (DTSC) approval. Additionally, an asphalt-capped pad near the western boundary is a remediation effort for arsenic contamination associated with removed rail spur ballast material from across the site. This asphalt cap is to remain intact with activity use limitations (AULs) applicable to this area as specified in the same deed restriction. The groundwater monitoring and AULs were identified by the CALEPA – CA database. Based on this information, it is the opinion of Cameron-Cole, the current AULs associated with the asphalt pad represent a CREC while the ongoing PCP groundwater monitoring represents a REC as defined by the applicable standard.
- Review of available regulatory databases records identified a HIST UST – CA listing associated with eight gasoline and diesel USTs were registered with Chico Remanufacturing in 1988. No information regarding the current status of the USTs was available. A significant data gap is associated with the absence of tank disposition and/or closure information, including analytical soil data that could help identify the presence or absence of subsurface contamination potentially associated with these unaccounted USTs. Based on Cameron-Cole's understanding the property is to be developed into residential development, this data gap and possibility that unidentified contamination could be present represents a REC to the subject property as defined by the applicable standard.
- The report also identifies the removal of 10,000 cubic yards of contaminated soil in 1992. The soil removal was to address contamination from various areas used at the Chico Remanufacturing Facility including, but limited to, two fuel oil bunkers, dry kilns, burn and dump areas, paint disposal pit, detention pond, etc. The soil was cleaned up to residential levels and approved by the DTSC in 1994. Based on this information, in the opinion of Cameron-Cole, the soil contamination has been addressed to the satisfaction of the regulatory agency constitute a HREC in connection with the subject property as defined by the applicable standard.
- According to a November 2021 Semi Annual Monitoring Report, an offsite TCE plume from an upgradient Victor Industries, extends beneath the subject property. This plume is actively monitored by the off-site responsible party. This site is also identified in the CERCLIS-HIST, SLIC REG 5 – CA, ENVIROSTOR – CA, and FED BROWFIELDS databases. In May 2021 soil vapor samples identified concentrations of PCE and benzene

which exceeded the ESLs. In the opinion of Cameron-Cole, the Victor Industries TCE groundwater plume and corresponding PCE and benzene soil vapor concentrations constitutes a REC in connection with the subject property as defined by the applicable standard.

- According to 1988 Chico Press Gazette article trash piles were said to fill trenches along the eastern boundary and on the Ivy Street right of way and consisted of car batteries, drums of used motor oil, solvents and other industrial waste liquids, railroad ties, old vehicles, etc. It is also reported that Diamond burned trash in long trenches and covered the burn areas with dirt. A 1970 correspondence between the City of Chico and Diamond National Corporation indicates a 40'x40x5' area of buried trash was excavated near the northeast corner, on the Ivy Street right of way, and transported offsite. Interviews in the 1988 Gazette article state that debris witnessed in the other areas of the right of way were not removed. The 2017 Five-Year Review also identifies the Normal Avenue Dump, near the eastern boundary, and the South Orchard Burn Dump, near the southern boundary. A "teepee burner", used to burn lumber, was located adjacent to the Normal Avenue Dump. Based on the information provided, in the opinion of Cameron-Cole, the indications of trash and industrial waste being dumped, buried, and burn on site does constitute a REC in connection with subject property as defined by the applicable standard.
- According to the Envirosearch aerial maps, orchards have been present in the northern site periodically since 1941. The southern site appears to have only been used as an orchard since at least 1941. Historically, lead-arsenate was a commonly used pesticide from the late 1880s up to the 1960s. No documentation is available regarding pesticide use in the orchards. As lead-arsenate and next generation organo-chlorine pesticides have a long residence life in surface soils at application areas, it is Cameron-Cole's opinion that the lack of documentation of pesticide use represents a significant data gap and REC considering the proposed residential development of the subject property.

11.0 DEVIATIONS

There were no contractual excluded elements or deviations from the ASTM International Standard E1527-21

APPENDIX A

Photographs

500/501 W 16th Street
Chico, California
Project No.

Photograph 1. View of entrance to subject property from W 16th Street. Facing west.

Photograph 2. View of abandoned gatehouse at subject property entrance. Facing west.

Photograph 3. View of northeastern boundary and former Ivy Street easement. Facing north.

Photograph 4. View of northeastern boundary and former Ivy Street easement. Facing south.

Photograph 5. Entrance to storage warehouse near northeastern boundary.

Photograph 6. The interior of the storage warehouse. Primarily used for RV storage.

Photograph 7. View of abandoned wood planer previously used by the wood remanufacturing facility.

Photograph 8. View of northwestern section of the storage warehouse. Drums are empty.

Photograph 9. View of northwestern section of the storage warehouse. Drums are empty and crates filled with random debris.

Photograph 10. View of empty water tank near storage warehouse. Tank in the background is a water used by landscapers on site during reconnaissance.

Photograph 11. View of southern exterior wall of the storage warehouse. Abandoned remanufacturing equipment. An empty vehicle mounted diesel tank on the left. Facing north.

Photograph 12. View of abandoned wood chip silo long northern exterior wall of storage warehouse.

Photograph 13. View of pad-mounted transformer located on the south wall of the storage warehouse.

Photograph 14. View of abandoned utility building adjacent to storage warehouse.

Photograph 15. View of west wall of storage warehouse. Foreground is a pile of lumber, pipe scraps, tree and leaf litter, and an unlabeled empty drum. Facing northeast.

Photograph 16. View of empty containers labeled "Klerzyme 150", a food additive.

Photograph 17. View of fire hydrants near the northeast boundary. Facing east.

Photograph 18. View of the northeastern boundary. The Ivy Street right of way is located on the other side of the fence. Facing east.

Photograph 19. View of the northeastern section of the subject property and the current state of vegetation that is consistent throughout the property. Facing west.

Photograph 20. View of the southern boundary. Facing west.

Photograph 21. View of the southwest boundary. Facing southwest.

Photograph 22. View of remnant of the old pumphouse building foundation near the southern portion of the property. Facing south.

Photograph 23. View of the front exterior of the former engineering department building. Facing south.

Photograph 24. View of the interior of the former engineering department building. Facing south.

Photograph 25. View of a storage building, located to the west of the engineering building. Facing south.

Photograph 26. View of the interior of a storage building.

Photograph 27. View of the remnant building foundation located near the southern portion of the property. Facing west.

Photograph 28. View of a pole mounted transformer located near the northeastern boundary. Facing east.

Photograph 29. View of fire hydrants located near the engineering building. Facing northwest.

Photograph 30. View of former wood fuel storage building. Facing north.

Photograph 31. View of the interior of the former wood fuel storage building.

Photograph 32. View of monitoring well located near the w 16th Street Entrance.

Photograph 33. View of the adjacent properties along the southeastern boundary. Facing east.

Photograph 34. View of the abandoned railroad tracks along the southern boundary. The asphalt cap is in the background. Facing north.

Photograph 35. View of the orchard located on the northern boundary of the property. Facing northwest.

Photograph 36. View of the southern site. Active railroad along the western boundary. Facing south.

Photograph 37. View of the active railroad located along the western boundary of the southern site. Facing south.

Photograph 38. View of the abandoned railroad and current walking path located between the northern and southern site. Facing west.

APPENDIX B

User Questionnaire

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E1527-21 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Property Information.

Cameron-Cole/Client Project #: _____ Property Name: Diamond Match International

Property Address: 501 W 16th Street

City: Chico

State: CA

Zip: 95928

Property Owner Name: BY LAND HOLDING CO LLC

Please answer the following questions as completely as possible. Attach additional pages as needed.

1. **Reason for Completion.** Is the reason for performing the Phase I to satisfy one of the requirements for the innocent landowner defense under CERCLA AND/OR to understand potential environmental conditions that could materially impact the operation of the business associated with the parcel of commercial real estate?

_____ Yes _____ X No

Other (indicate if required for property transaction, sale, purchase, exchange, lending requirement, etc). Necessary to determine potential re-development concerns.

2. **Environmental Cleanup Liens.** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

_____ Yes _____ X No

If yes, describe or attach details of the lien _____

3. **Activity and Land Use Limitations.** Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

_____ X Yes _____ No

If yes, describe or attach details of the limitations: Asphalt cap over arsenic contaminated soils, and a prohibition on draft groundwater for drinking purposes.

PHASE I ESA USER'S QUESTIONNAIRE

4. **Specialized Knowledge or Experience.** As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

_____ Yes X No

If yes, describe or attach details of your specialized knowledge or experience _____

5. **Relationship of Purchase Price to Fair Market Value of Property.** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

 X Not applicable. User is not involved in a purchase of the property.

6. **Commonly Known or Reasonably Ascertainable Information.** Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

 X Yes (describe) Remanufacturing facility, railroad spur (according to online DTSC reports)
_____ No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

 X Yes (describe) Arsenic and pentachlorophenol (PCP) (according to online DTSC reports)
_____ No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

 X Yes (describe) Arsenic and pentachlorophenol (PCP) (according to online DTSC reports)
_____ No

Do you know of any environmental cleanups that have taken place at the property?

 X Yes (describe) Arsenic-laden soils were entombed under a 3-acre asphalt cap, and pentachlorophenol (PCP) was treated by pumping and (according to online DTSC reports)
_____ No

PHASE I ESA USER'S QUESTIONNAIRE

7. **The Degree of Obviousness of Contamination.** E1527-21 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?
☒ Yes (describe) The asphalt cap is an obvious sign, and the history of arsenic cleanup means presence of contamination is certain under that cap. The cap is higher in elevation at its center, a couple feet above the edges.
☐ No
8. **Availability of Previous Environmental Reports.** Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?
☒ Yes (please identify and provide copies, if available) I will provide copies of whatever I can locate that isn't available online, through the GeoTracker website.
☐ No
9. **Proceedings Involving the Property.** Are you aware of any proceedings involving the property? For example:
Are you aware of any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property?
☐ Yes (describe) _____
☒ No
- Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?
☐ Yes (describe) _____
☒ No
- Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
☒ Yes (describe) Imminent and Substantial Endangerment Determination, DTSC, see enclosures.
☐ No

Source Description

Source Description :

The Superfund Enterprise Management System (SEMS) integrates multiple legacy systems into a comprehensive tracking and reporting tool, providing data on the inventory of active and archived hazardous waste sites evaluated by the Superfund program. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description : DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

 Global ID : SL0600753056
 Region : REGION 5R

Site History :

Central Valley Regional Water Quality Control Board staff assists Department of Toxic Substances Control with this case. Diamond International formerly operated a wood products and wood treatment facility. Pollutants included metals, petroleum, chlorinated ethenes and phenols. Chlorinated ethenes and phenols impacted groundwater. From 1997 to 2003, Diamond International operated a pump-and-treat system, and continues to monitor groundwater.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
OSHA-OIS

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description**Source Description :**

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FRS (cont.)

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Sample Collection Date :	2022-01-13 07:50:00
Chemical Name :	Perfluorooctanoic sulfonate
Chemical Valid Value :	PFOS
Result :	28 NG/L
Reporting Limit :	N/R
Source Chemical Name :	2805
Source Well Depth (Ft) :	N/R
Source Top Depth of Screen (Ft) :	N/R
Source Bottom Depth of Screen (Ft) :	N/R
Source Analytical Method :	EPA 537.1
Source Datum :	N/R
Source Lab Note :	N/R

Sample Collection Date :	2022-01-13 07:50:00
Chemical Name :	Perfluorodecanoic acid
Chemical Valid Value :	PFNDCA
Result :	< NG/L
Reporting Limit :	N/R
Source Chemical Name :	2807
Source Well Depth (Ft) :	N/R
Source Top Depth of Screen (Ft) :	N/R

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description**Source Description :**

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Reg Measure Type : 401 Certification
Reg Measure Title : WQC 09/11/2013 for BCAG Transit Facility
Reg Measure Description : WQC for the acquiring a portion of 34 acres adjacent to the existing BCAG transite facility, located at Huss Lane. BCAG is required to install a new 48 inch diameter storm drain pipe and outfall along Camache Creek. The outfall will result in a cut of 60 cubic yards of material. Vegetated rip-rap will be placed surrounding the outfall.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

 Facility Waste Type : N/R
 Reg Measure ID : 441812
 Reg Measure Type : 401 Certification
 Reg Measure Title : 401 Cert for Union Pacific Railroad Company Omaha

Reg Measure Description :

UPRR proposes to replace the existing four-span, 61-foot long, timber stringer trestle ballast deck bridge with a three-span, 90-foot long, prestressed concrete box girder bridge. The existing bridge has been damaged by fire and the conditions are rapidly deteriorating. Construction activities will occur within an existing UPRR right-of-way (ROW) extending 100 feet to both sides of the mainline track alignment (200 feet total ROW width). The project limits include the project site, access route, and staging areas on all four corners of the bridge. Proposed activities below the OHWM of Comanche Creek include the removal of existing bents to grade level, the construction of two temporary causeways flanking both sides of the bridge, and the construction of a concrete pier (Pier 2) comprised of two drilled shafts. The causeways will consist of geofabric overlain with up to four 48-inch diameter corrugated metal pipe culverts covered by a minimum of two feet of Class 1 riprap.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

OSHA-OIS

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :	The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

FRS (cont.)

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report. The UORS is managed by the California Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Site History :

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

FRS (cont.)

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Future Use : N/R
 GP Funding Type ID : Hazardous
 Property Size : 0.6
 Local Parcel Number : 005-132-008

Former Use :

The site was an operating service state for approx. 20 ears with known USTs containing gasoline that were abandoned in place with no verification f whether releases had occurred. No previous environmental assessments have been performed at the site. Observations on the property revealed the presence of numerous small areas of oil-stained pavement, consistent with minor leaks of engine oil and fluids from parked cars. There is a possibility of the presence of lead and asbestos in construction materials in the on-site repair shop building. The is the possible presenc of PCBs in the fluorescsnt light ballasts in the on-site r3epair shop building. Phase II ESA was not completed at the request of the property owner.

Completed Activities

Completed Date : 2022-01-27
 Area Name : PROJECT WIDE
 Sub Area Name : N/R
 Document Type : Soils Management Plan

Comments : DTSC approved a Soil Management Plan to remove lead impacted
 contaminated soil from lead based paint.

Completed Date : 2021-11-29
 Area Name : PROJECT WIDE
 Sub Area Name : N/R
 Document Type : Site Characterization Workplan
 Comments : DTSC approved a work plan for additional characterization.

Completed Date : 2021-07-28
 Area Name : PROJECT WIDE
 Sub Area Name : N/R
 Document Type : Preliminary Endangerment Assessment Report

Comments : DTSC reviewed a PEA ad conditionally concurred with its findings. The
 site requires additional characterization.

Completed Date : 2021-02-10
 Area Name : PROJECT WIDE
 Sub Area Name : N/R
 Document Type : Standard Voluntary Agreement

Comments : DTSC and the proponent signed a voluntary cleanup agreement for
 DTSC to review a Preliminary Endangerment Equivalent document.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

 Global ID : T10000005941
 Region : REGION 5R

Site History :

The subject case is a fueling station and convenience store on a half-acre property at 1105 Park Avenue, Chico, Butte County. The site has been an automotive fueling station from the 1940s to the present day. In 1987, seven USTs were abandoned -- five were abandoned in place and two were removed. Three currently in-use 10,000-gallon USTs were installed in 1987 following the abandonments of the original seven USTs. On 25 April 2014 the Discharger submitted an Underground Storage Tank Unauthorized Release Report to Butte County Department of Environmental Health. The Discharger performed subsurface investigations using direct push methods between March 2014 and September 2015 reporting petroleum hydrocarbons and polychlorinated biphenyls (PCBs) in soil and groundwater samples above Water Quality Objectives (WQOs). While petroleum constituents exceeded WQOs, the site meets the closure eligibility requirements of the low threat closure policy. Based on site-specific soil data and the hydraulic parameters derived from a neighboring UST investigation, staff estimated the velocity of PCB migration is low (approximately 1.5x10⁻⁴ feet per year). Therefore, it is unlikely that the pollutants will affect drinking water supply wells or other receptors. On 5 October 2015 staff notified DTSC in writing of the PCBs at this site. Staff closed the case in October 2015.

RB Case Number : 040299
 Potential Media Affected : N/R

Potential Contaminants of Concern : Polychlorinated biphenyls (PCBs), Benzene, Diesel, Ethylbenzene, Gasoline, Naphthalene, Toluene, Xylene

Local Agency : N/R
 Local Case Number : N/R
 Lead Agency : CENTRAL VALLEY RWQCB (REGION 5R)
 File Location : Regional Board
 CUF Case : YES
 Caseworker : BB
 Case Type : LUST Cleanup Site
 How Discovered : N/R
 How Discovered Description : Subsurface Investigation
 Stop Method : Close and Remove Tank
 Stop Description : Tank Removal
 Calwater Watershed Name : Colusa Basin - Butte Basin (520.40)
 DWR Groundwater Subbasin Name : Sacramento Valley - Vina (5-021.57)
 Disadvantaged Community : Severely Disadvantaged Community
 Latitude : 39.724379
 Longitude : -121.831448

Source Description**Source Description :**

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

FRS Environmental Interest

Source and System ID : CA-ENVIROVIEW - 226399

SLIC REG 5 - CA

Facility Name : Victor Industries 20th Street PCE Plume
Facility Address : 365 & 395 20TH ST E, CHICO, CA
County : Butte

Site Details

Status Date : 2020-10-09
Status : Open - Assessment & Interim Remedial Action
Begin Date : 1988-11-29
Global ID : SL0600775062
Region : REGION 5R

Site History :

Victor Industries, a former metal tube and can manufacturing facility, produced flexible tubes and aerosol cans out of lead and aluminum. From 1958 to 1985, Victor Industries used TCE to clean their product-line machinery. The resulting solvent was allegedly dumped on the ground outside their manufacturing facility. These disposal practices resulted in a groundwater plume over one mile long. The extent of the groundwater plume is still being investigated under DTSC oversight. Additionally DTSC is overseeing pilot studies to enhance MNA.

RB Case Number : SLT5R953
Potential Media Affected : Aquifer used for drinking water supply
Potential Contaminants of Concern : * Chlorinated Hydrocarbons
Local Agency : DEPARTMENT OF TOXIC SUBSTANCES CONTROL
Local Case Number : 04360003

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report. The Superfund Enterprise Management System (SEMS) integrates multiple legacy systems into a comprehensive tracking and reporting tool, providing data on the inventory of active and archived hazardous waste sites evaluated by the Superfund program. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

Source Description :

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Site History :

Investigation into an unauthorized release of petroleum products has been ongoing at property identified as Butte County Assessor Parcel Number 005-102-018-000 since 2009. This property is located at the northwest corner of Park Avenue and East 11th Street in Chico, California and contains numerous commercial structures identified as 1045 Park Avenue, 1049 Park Avenue, 1051 Park Avenue, 1057 Park Avenue, 1087 Park Avenue, and 164 East 11th Street (Site). The Site was previously used as an auto service and repair shop, radiator shop, auto body and paint shop, dry cleaners and possibly service station. December 2009, 15 soil borings were installed to 20 feet. Soil and grab groundwater samples in showed the subsurface was impacted by petroleum hydrocarbons and or low-level volatile organic compounds. In January 2011, four monitoring wells were installed. In May 2011, four underground storage tanks (USTs) were removed. Approximately 20 cubic yards of impacted soil was removed during the removal of two of the USTs. Three soil-gas monitoring probes were installed in October 2014, between the contaminant plume and Oakdale School. Soil and groundwater samples showed that the subsurface was impacted by petroleum hydrocarbons and or low-levels of volatile organic compounds in the southern and southwestern portion of the Site. Soil-gas sampling results indicate that residual contamination associated with the former USTs does not pose a significant health risk from vapor intrusion into buildings located onsite or vapor intrusion into Oakdale School. Site investigations have adequately defined the lateral and vertical extent of soil and groundwater impacts. After public notification, the monitoring wells and soil-gas probes were properly destroyed in June 2017. The Site was closed under the Low-Threat Closure Policy in July 2017.

 Region : REGION 5R

Site History :

Butte County Mosquito and Vector Control District, Discharger, had identified organo-chlorine pesticides in shallow soils at their Chico Substation facility. Due to potential threats to underlying groundwater, Butte County Environmental Health Division referred the case to the Central Valley Regional Water Quality Control Board. Subsequently, the Discharger excavated polluted soils and collected confirmation samples for appropriate laboratory analyses. Results indicate that remaining potential threats on-site to underlying groundwater and human health are low. The Discharger transported polluted soils off-site for disposal at a Class III municipal landfill.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

 Status : Completed - Case Closed
 Begin Date : 2006-05-09
 Global ID : T0600789155
 Region : REGION 5R

Site History :

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

FRS (cont.)

Source Description :

In accordance with the federal Clean Air Act (CAA), EPA establishes fuel quality standards to help protect public health and the environment from harmful gas and particulate matter emissions from motor vehicles and engines. The Office of Transportation and Air Quality (OTAQ) has developed the registration and DC fuels online applications, implemented through EPA's Central Data Exchange (CDX), which provides online applications to assist the fuel manufacturing community with registration and compliance with reporting requirements.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Source Description

Source Description : The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
 Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

 Global ID : T0600700020
 Region : REGION 5R

Site History :

The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

RB Case Number : 040023
 Potential Media Affected : Aquifer used for drinking water supply
 Potential Contaminants of Concern : MTBE / TBA / Other Fuel Oxygenates
 Local Agency : BUTTE COUNTY
 Local Case Number : N/R
 Lead Agency : CENTRAL VALLEY RWQCB (REGION 5R)
 File Location : Regional Board
 CUF Case : NO
 Caseworker : EJR

Waste Details

Waste Line Number : 1
 Is DOT Hazardous : Y
 DOT ID Number : UN1263
 DOT Information : UN1263, WASTE PAINT, 3, PG II
 Non Waste Description : N/R
 Quantity : 55 Gallons
 Quantity Tons, Acute, Non-Acute : 0.2293578, 0, 0.2293578
 Quantity Kg, Acute, Non-Acute : 0, 208.03441
 Management Method : H141 - STORAGE, BULKING AND/OR TRANSFER OFF SITE
 Is EPA Waste : Y
 Federal Code : D001
 State Code : CA - 331

Waste Line Number : 2
 Is DOT Hazardous : Y
 DOT ID Number : NA3077
 DOT Information : NA3077, HAZARDOUS WASTE, SOLID, N.O.S., 9, PG III
 Non Waste Description : N/R
 Quantity : 55 Gallons
 Quantity Tons, Acute, Non-Acute : 0.2293578, 0, 0.2293578
 Quantity Kg, Acute, Non-Acute : 0, 208.03441
 Management Method : H141 - STORAGE, BULKING AND/OR TRANSFER OFF SITE
 Is EPA Waste : Y
 Federal Code : D018
 State Code : CA - 352

Waste Line Number : 3
 Is DOT Hazardous : N
 DOT ID Number : N/R
 DOT Information : N/R
 Non Waste Description : NONE, NON-RCRA HAZARDOUS WASTE, SOLIDS, N/A, NONE
 Quantity : 55 Gallons
 Quantity Tons, Acute, Non-Acute : 0.2293578, 0, 0.2293578
 Quantity Kg, Acute, Non-Acute : 0, 208.03441
 Management Method : H141 - STORAGE, BULKING AND/OR TRANSFER OFF SITE

Status :	Open - Remediation
Begin Date :	1987-09-29
Global ID :	SL375402884
Region :	REGION 5R

Site History :

Petroleum pipeline terminal with large above ground tank farm. Free phase oxygenated gasoline discovered on shallow groundwater in mid to late 1990s. Kinder Morgan Energy Partners, Dischargers, removed polluted soils and extracted free product near Tank #25 and an oil/water separator. MtBE and other fuel oxygenates were found to potentially threaten about 40 private domestic wells in the nearby Skyway Homes Subdivision. In 2003, Dischargers began a soil vapor extraction (SVE) system near the oil/water separator, southwest property corner, nearest the subdivision. In 2009, the Dischargers ceased SVE due to mitigated pollution. The Dischargers also further investigated subsurface conditions in detail. Based on results, shallowest groundwater flows south, potentially threatening the subdivision. Deeper groundwater flows southwest, away from the subdivision. The Dischargers have proposed a contingency plan for further fresh petroleum releases. Based on the plan, on 28 March 2012 the Executive Officer rescinded a Cleanup and Abatement Order and issued a Monitoring and Reporting Program.

Source Description

Source Description :

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosearch account representative for a complimentary site report containing all of the details available.

Violation Date : 2021-05-20

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.

Notes : No reference to the industry standard STI SP001 observed in the SPCC Plan for annual and monthly inspections; inspection forms provided in the SPCC Plan do not address all requirements of STI SP001. Corrective action: industry standard should be referenced for annual and monthly inspections; inspection forms should be corrected accordingly.

Division : Butte County Environmental Health

EnviroSite ID: 312534
EPA ID: CAL000827844

AST - CA **(cont.)**

Notes :

SPCC Plan on page 22 has a statement of liquid level sensing devices tested on the monthly basis during the monthly inspection of the facility, following the manufacturer's specifications. No manufacturer's specifications were available at the time of inspection to verify compliance with the requirement. Corrective action: manufacturer's specifications for liquid level sensing devices on ASTs should be obtained and inspections should be conducted in accordance with the SPCC Plan; a copy of the first inspection record should be provided to CUPA. SPCC Plan should be amended, if change in liquid level sensing devices testing procedures has been implemented.

Violation Date : 2021-05-20

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container's supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.

Notes :

Monthly and annual inspections have not been conducted according to the industry standard STI SP001. Corrective action: monthly and annual inspections of the tanks and portable containers should be conducted according to the industry standard; copies of the 2021 annual and one monthly tank and portable containers inspections according to STI SP001 standard should be provided to CUPA. STI SP001 standard inspection forms were provided to the operator at the time of inspection.

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to provide and maintain secondary containment for bulk storage tank installations (except for mobile refuelers and other non-transportation-related tank trucks) sufficient to hold the capacity of the largest container and sufficient freeboard for precipitation.

Notes :

SPCC Plan on page 6 has a statement of Tank farm #2 and the Drum Storage Area currently not having sufficient secondary containment capacity and shall be resolved with an addendum to follow. No resolution of adequacy of the secondary containment and/or addendum identified in SPCC Plan was observed. Corrective action: adequate secondary containment for all bulk storage containers should be provided; SPCC Plan should be amended to reflect the change.

AST - CA **(cont.)**

Notes :

SPCC Plan doesn't have the baseline determined for formal external inspections of the ASTs; no discussion of the formal external inspection according to the industry standard included in the SPCC Plan. Corrective action: discussion of the formal external inspection according to the industry standard should be included in the SPCC Plan; baseline should be determined based on the date of manufacture of the ASTs, if possible. If date of manufacture can't be found - baseline should be determined based on the last formal external inspection conducted by certified inspector.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Chemical Name : -20F Super Tech Windshield Washer Fluid
CAS Number : 67-56-1
Hazard Type(s) : N/R
Max Daily Amount / Unit : 12-59 Gallons
Average Daily Amount / Unit : 0-11 Gallons
Days Onsite : 365
Physical State(s) : Liquid, Mix

Chemical Name : AES Windshield Washer Solution
CAS Number : 7732-18-5
Hazard Type(s) : N/R
Max Daily Amount / Unit : 12-59 Gallons
Average Daily Amount / Unit : 0-11 Gallons

Map Id: 99
Direction: WNW
Distance: 0.825 mi., 4356 ft.
Elevation: 179 ft.
Relative: Lower

Source Description
 Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosearch account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080013352
 2019: 352 - Other organic solids, 5.77500 tons to CAD097030993
 2018: 223 - Unspecified oil-containing waste, 56.53686 tons to
 CAT080012602
 2018: 223 - Unspecified oil-containing waste, 44.20200 tons to
 CAL000282598
 2018: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080013352
 2018: 352 - Other organic solids, 3.81500 tons to AZR000515924
 2018: 352 - Other organic solids, 2.75000 tons to CAD097030993
 2017: 223 - Unspecified oil-containing waste, 215.32212 tons to
 CAT080012602
 2017: 352 - Other organic solids, 8.3175 tons to CAD097030993
 2017: 221 - Waste oil and mixed oil, 6572.9208 tons to CAT080013352
 2017: 223 - Unspecified oil-containing waste, 2.55621 tons to
 CAL000282598
 2017: 223 - Unspecified oil-containing waste, 2.12253 tons to
 CAT080013352
 2016: 221 - Waste oil and mixed oil, 628.7138 tons to CAD980887418
 2016: 223 - Unspecified oil-containing waste, 50.78643 tons to
 CAT080013352
 2016: 223 - Unspecified oil-containing waste, 23.352 tons to
 CAL000282598
 2016: 221 - Waste oil and mixed oil, 26.6304 tons to CAD980694103
 2016: 261 - Polychlorinated biphenyls and material containing PCBs,
 56.18657 tons to UTD981552177
 2016: 221 - Waste oil and mixed oil, 4768.4832 tons to CAT080013352
 2016: 352 - Other organic solids, 7.45 tons to CAD097030993
 2016: 223 - Unspecified oil-containing waste, 100.95153 tons to
 CAT080012602
 2015: 221 - Waste oil and mixed oil, 2967.04 tons to CAT080013352
 2015: 352 - Other organic solids, 5.875 tons to CAD097030993
 2015: 223 - Unspecified oil-containing waste, 20.53725 tons to
 CAT080012602
 2015: 223 - Unspecified oil-containing waste, 27.50532 tons to
 CAT080013352
 2015: 221 - Waste oil and mixed oil, 886.0574 tons to CAD980887418
 2014: 221 - Waste oil and mixed oil, 6034.6736 tons to CAT080013352
 2014: 352 - Other organic solids, 5.55 tons to CAD097030993

Source Description

Source Description :

In accordance with the federal Clean Air Act (CAA), EPA establishes fuel quality standards to help protect public health and the environment from harmful gas and particulate matter emissions from motor vehicles and engines. The Office of Transportation and Air Quality (OTAQ) has developed the registration and DC fuels online applications, implemented through EPA's Central Data Exchange (CDX), which provides online applications to assist the fuel manufacturing community with registration and compliance with reporting requirements.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste.

RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

RTC Enforcement ID : 21010
 Violation ID : 21005
 Submission Year : 2022
 Violation First Reported Date : 2019-12-16
 Contaminant Name : Revised Total Coliform Rule
 Rule Family : Total Coliform Rules
 Rule Group : Microbials
 Rule Name : Revised Total Coliform Rule
 Violation Type : Monitoring, Routine (RTCR)
 Is Health Based : N
 Is Major Violation : N
 Severity Indicator Count : N/R
 Public Notification Tier : 3
 Address Line 1 : 2357 Fair Street, CHICO, 95928
 Address Line 2 : N/R
 Compliance Status : Returned to Compliance
 RTC Date : 2022-03-14
 Enforcement Action Description : State Compliance achieved
 Admin Name : FORNOF, MELISSA
 Email Address : melissa@silverdollarfair.org

RTC Enforcement ID : 21011
 Violation ID : 21006
 Submission Year : 2022
 Violation First Reported Date : 2020-05-18
 Contaminant Name : Consumer Confidence Rule
 Rule Family : Consumer Confidence Rule
 Rule Group : Other
 Rule Name : Consumer Confidence Rule
 Violation Type : Consumer Confidence Report Complete Failure to Report
 Is Health Based : N
 Is Major Violation : N/R
 Severity Indicator Count : N/R

WELLS - GAMA - CA

California Groundwater Ambient Monitoring Assessment

State Water Resources Control Board

916-341-5791

Brings together datasets from California state agencies including: Public Health Water Resources and Pesticide Regulation as well as from the US Geological Survey Lawrence Livermore National Laboratory and the Water Boards. It shows results for untreated raw water in different types of wells for naturally-occurring and man-made chemicals.

FLOOD Q3

Flood data

Environmental Protection Agency

(202) 566-1667

Q3 Flood Data

HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Chico: (1920-2018)

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

W. 16th Street: (1920-2018)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1909, 1921, 1949, 1970

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

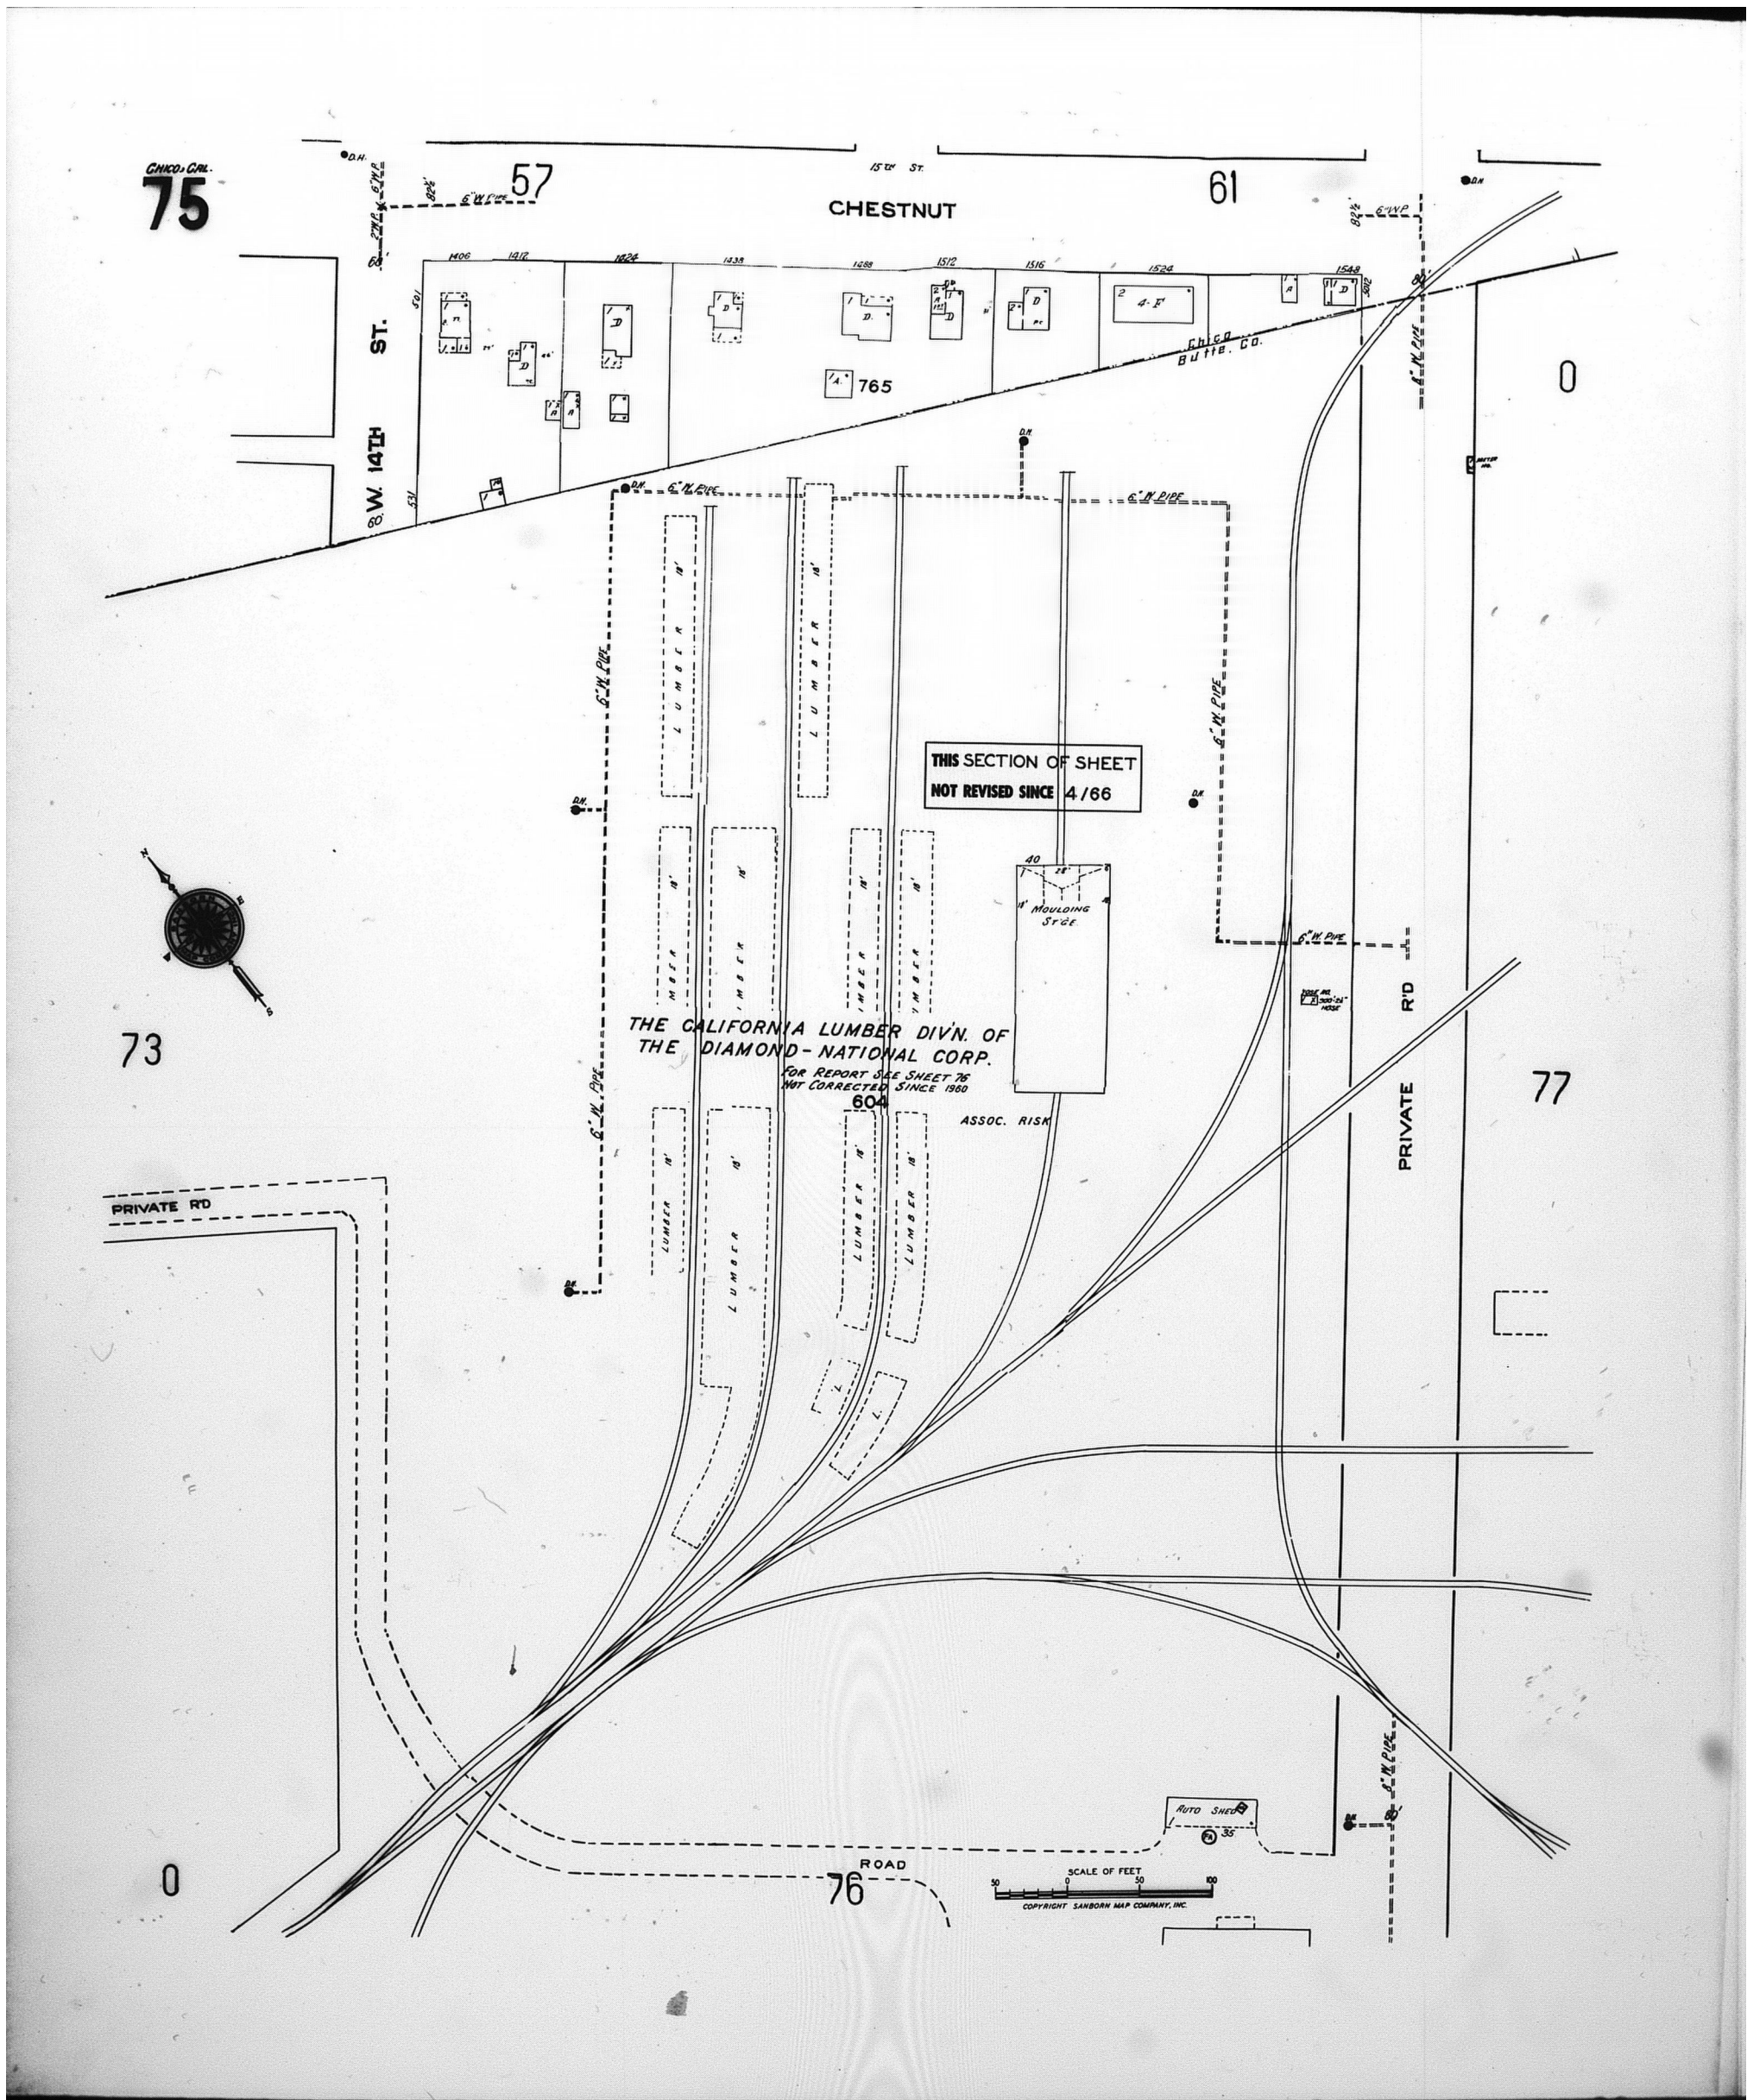

HIG Copyright Notice

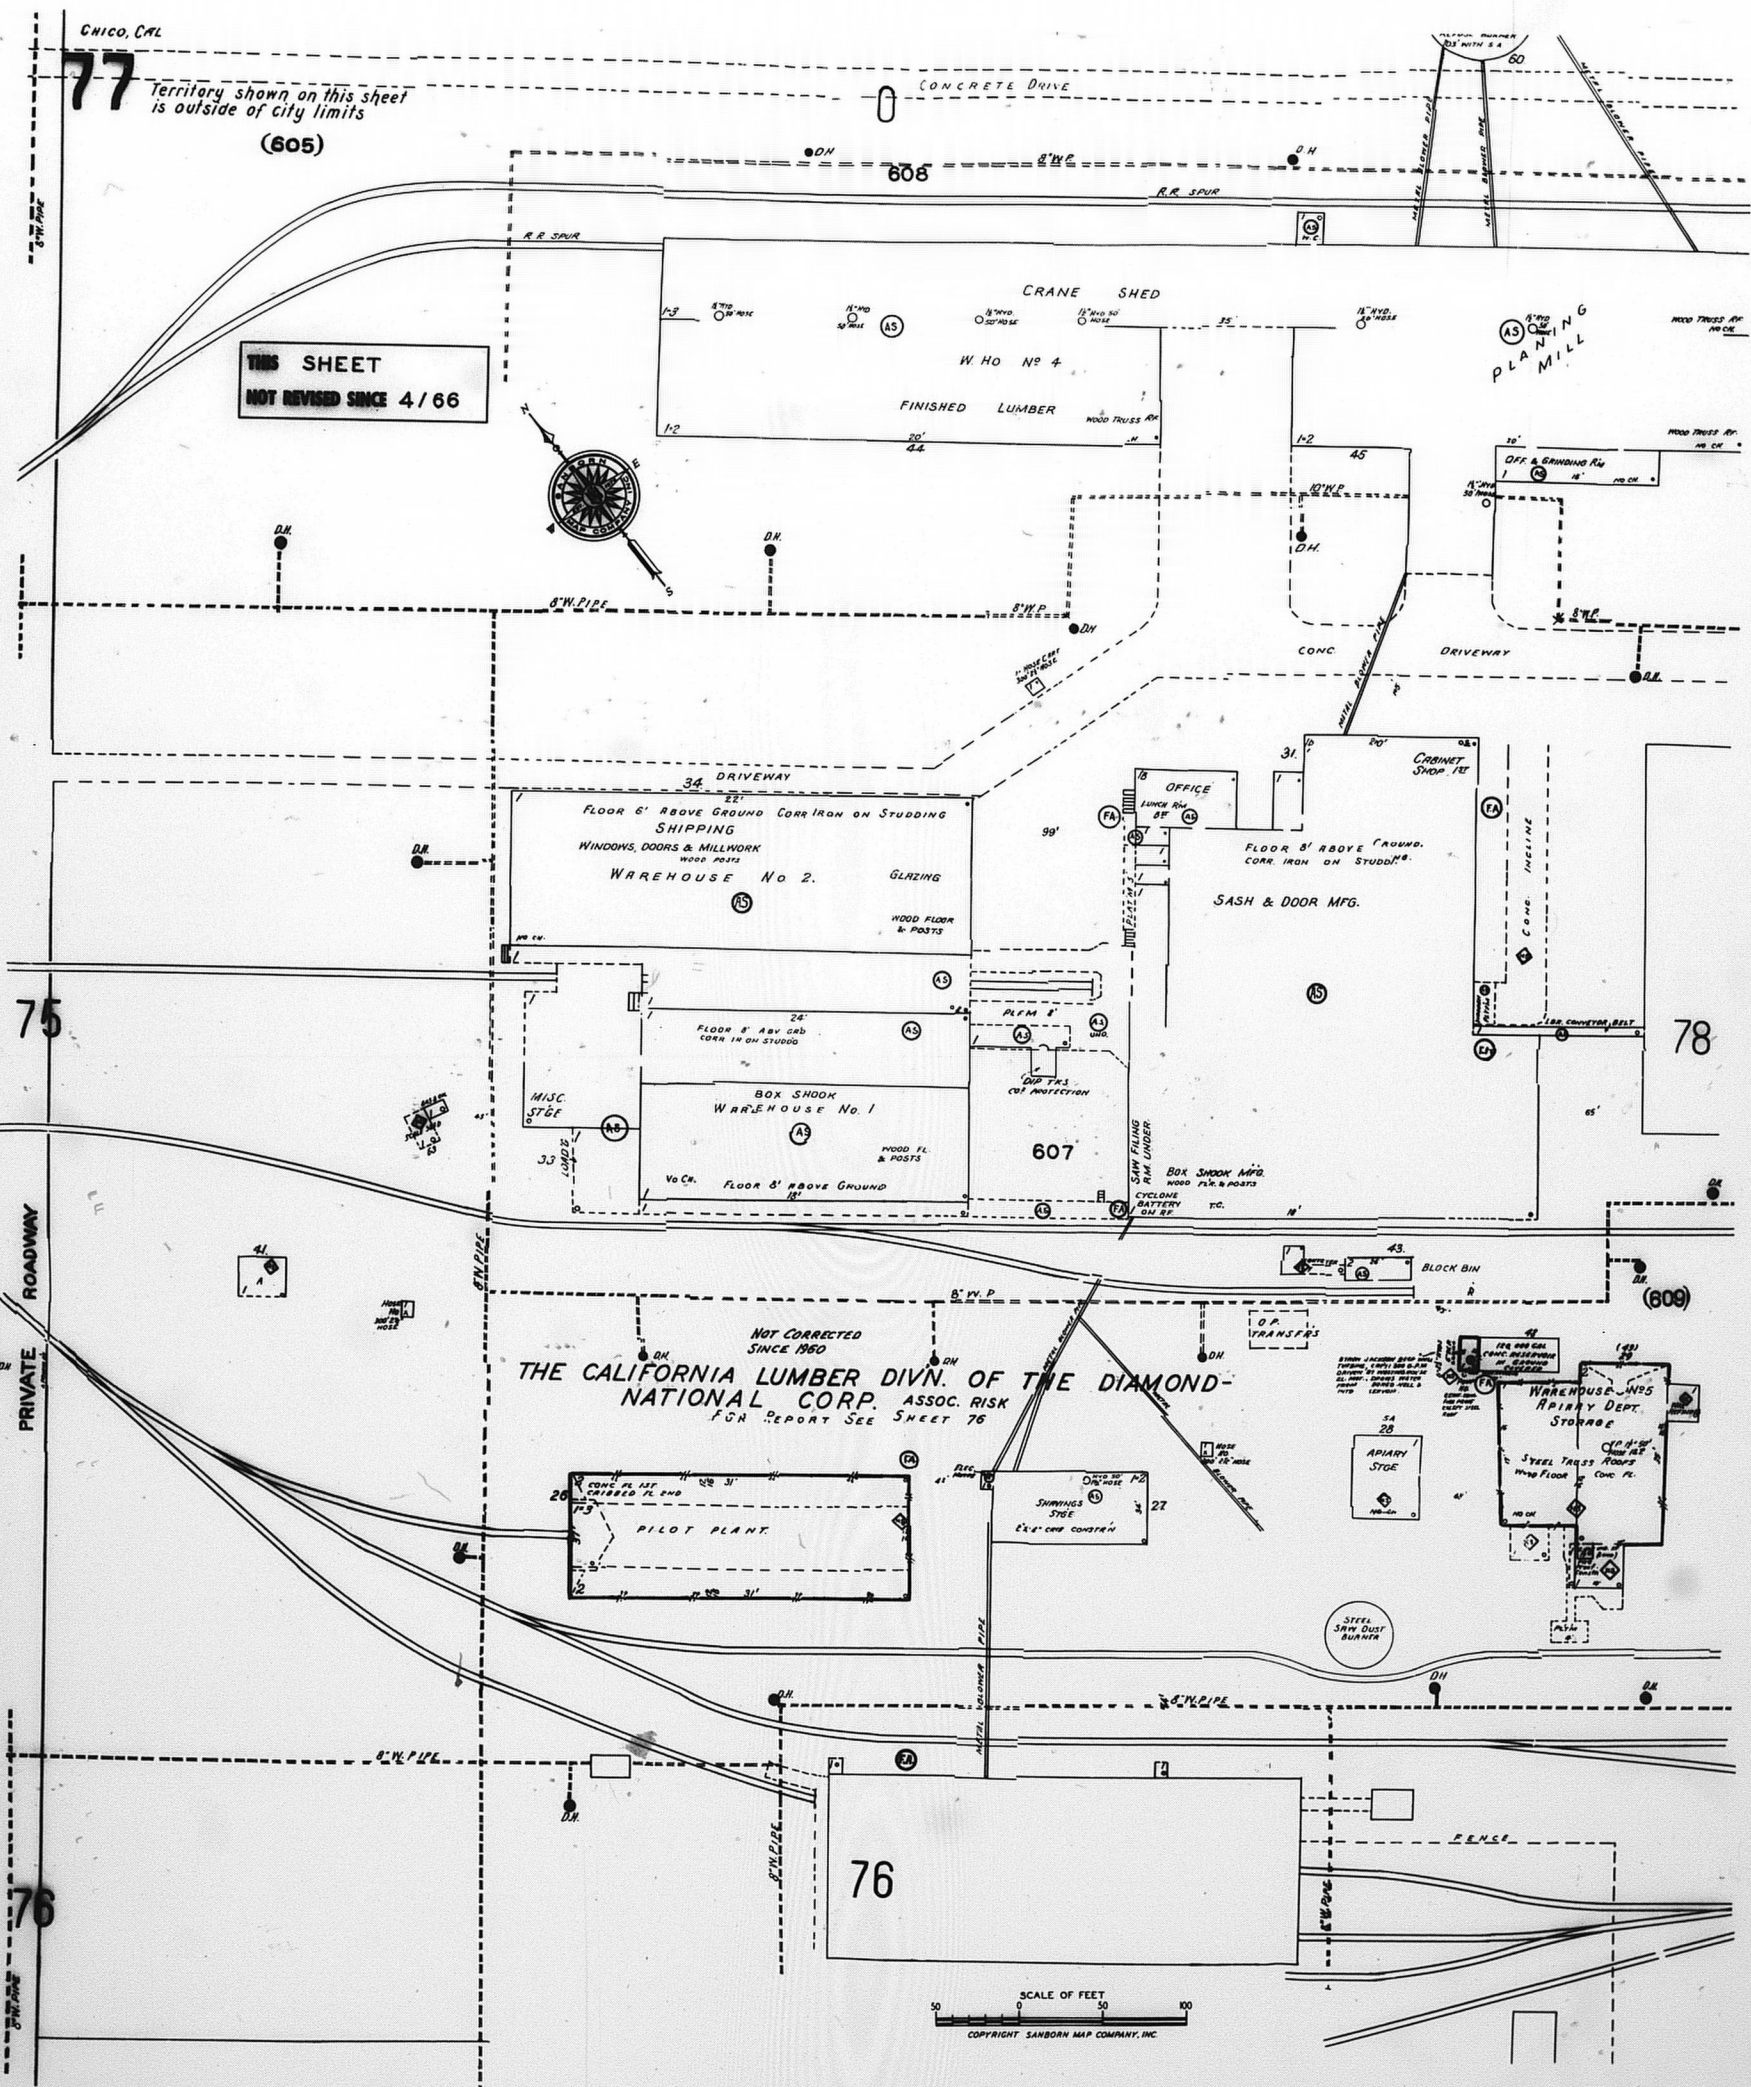

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2022 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

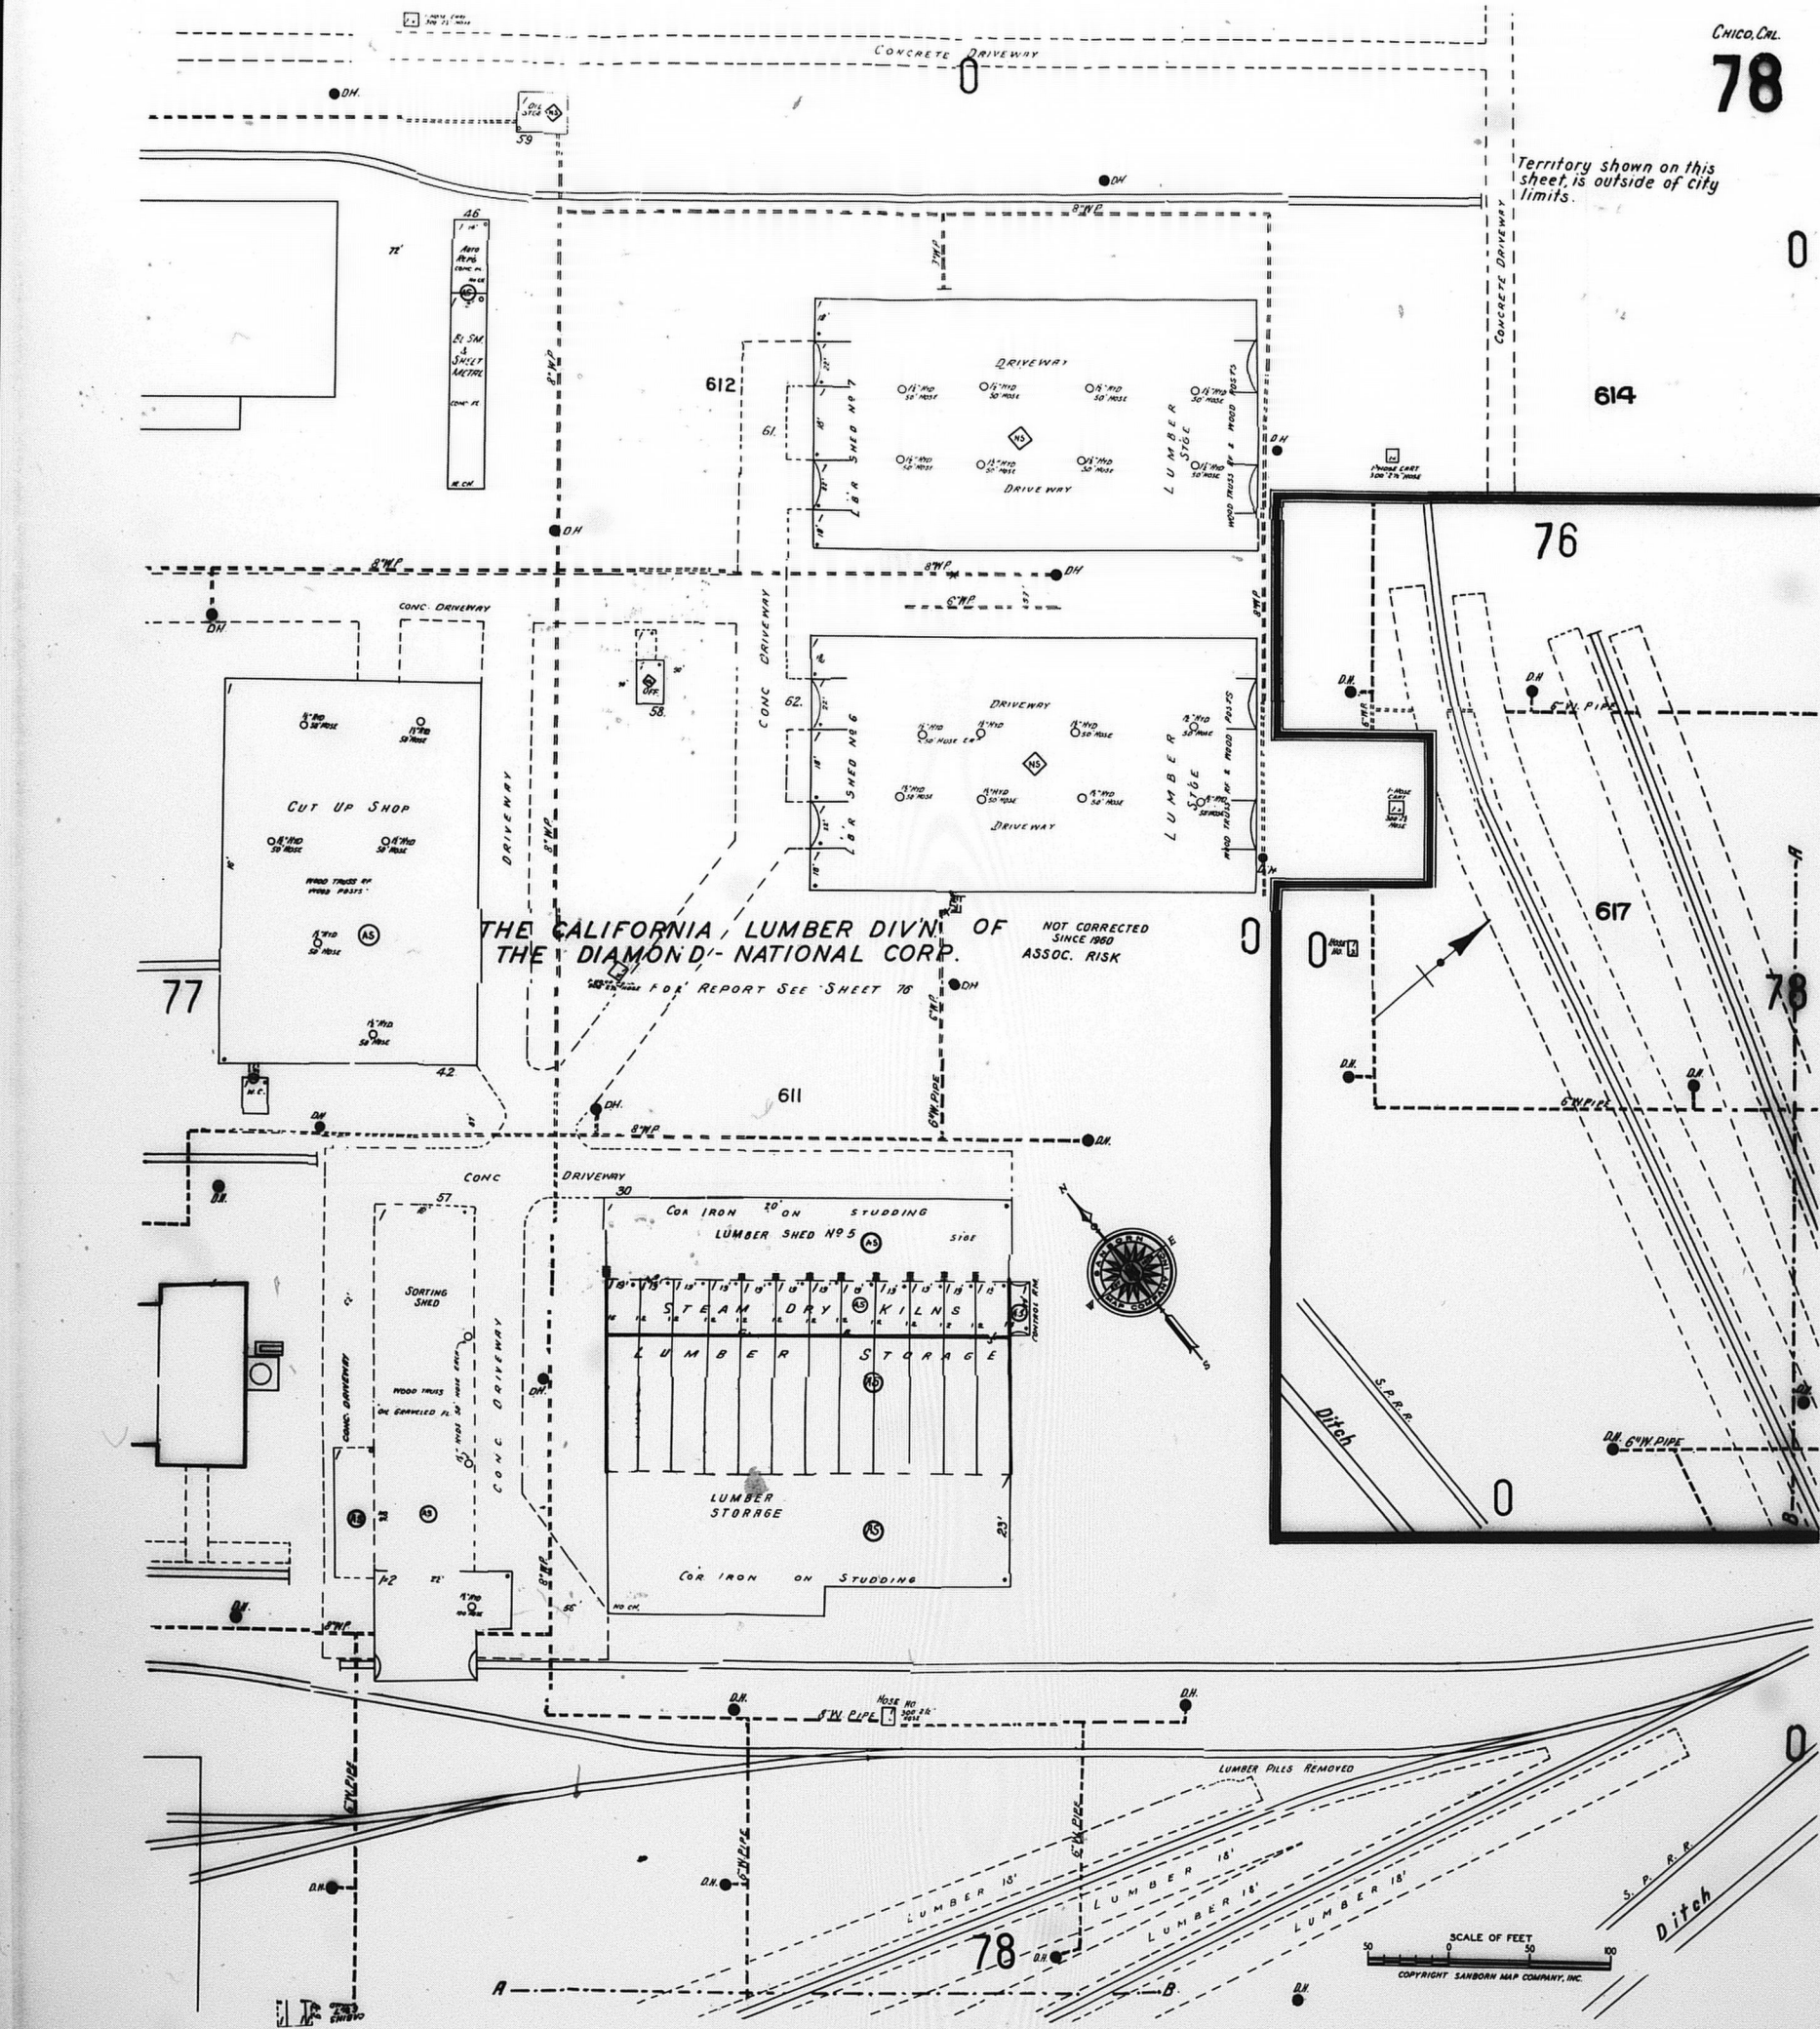

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

APPENDIX E

Interview Documentation

Interview with User

Date: June 22, 2022

Name: Mr. Mike Sawley

Title: Authorized Agent with

Interviewed by: Amy Robson, Cameron-Cole, LLC

Mr. Sawley was interviewed via a User Questionnaire completed on August 18, 2022. Mr. Sawley indicated he was aware that the subject property has been used as a car and RV dealership. Mr. Sawley indicated that he was not aware of chemical, hazardous substances, or petroleum. Mr. Sawley indicated that he was not aware of any AULs, such as engineering controls, land use restrictions, and institutional controls that have been filed or recorded on the subject property. Mr. Sawley indicated the reason for performing the Phase I ESA is to satisfy one of the requirements needed to preserve the landowner liability protections under CERCLA and/or to understand the potential environmental conditions that could materially impact the subject property.

A summary of the responses is provided in Section 4.0, and a copy of the questionnaire is provided in Appendix B.

Interview with Local officials

Date: August 9, 2022

Name: Katie Krahn

Title: Management Analyst,

Interviewed by: Amy Robson, Cameron-Cole, LLC

Cameron-Cole contacted the Chico Fire Department on August 9, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. A response was received on August 10, 2022 stating no records were found in association with the subject property.

Date: August 9, 2022

Name: Choua Her

Title: Staff Services Analyst

Interviewed by: Amy Robson, Cameron-Cole, LLC

Cameron-Cole contacted the Department of Toxic Substances Control on August 9, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. A response was received on August 11, 2022 stating no records were found in association with the subject property

Date: August 9, 2022

Name: office of Environmental Health Hazard Assessment

Title: N/A

Interviewed by: Amy Robson, Cameron-Cole, LLC

Cameron-Cole contacted the Department of Toxic Substances Control on August 9, 2022, requesting records regarding environmental violations, releases, or hazardous material or petroleum product storage, storage tanks, or other environmental concerns associated with the subject property and a reported state hazardous waste database listing associated with the subject property. A response was received not received before the completion of this report.

APPENDIX F

Professional Qualifications

Qualifications of Professionals

Amy Robson, Geologist II

Ms. Robson is a Geologist with Cameron-Cole for three years. Ms. Robson performs environmental field sampling including collection of groundwater samples from monitoring wells, collection of surface and subsurface soil samples, logging boreholes for lithology, performing well tests, and assisting with data analysis and development of presentations. She also prepares technical reports and presentations.

Education: B.S. in Geology, California State University, Chico, California, May 2019.
ASTM International Standard Practice E1527-21 Training Course for Phase I and Phase II Environmental Site Assessments

Certifications: Geologist-In-Training Certificate
40-hour Hazardous Waste Operations and Emergency Response Training
8-hour HAZWOPER Refresher

Robert Fagerness, PE, Senior Engineer

Mr. Fagerness has more than 33 years of experience conducting Phase I and II Environmental Site Assessments (ESAs), site remediation, environmental compliance, and permitting. His expertise includes collecting soil, groundwater, and soil vapor data; interpreting data; developing SWPPP and Spill Prevention Control and Countermeasure plans; conducting Hazardous Waste Tank Assessments; and providing various environmental permitting services, including human health risk evaluation and National Pollutant Discharge Elimination System (NPDES) permits. Mr. Fagerness is adept in project and construction management, environmental and subsurface investigations, and local, State, and federal agencies coordination. Mr. Fagerness has worked with numerous clients, including investors and lending institutions, in order to complete thousands of Phase I ESAs for property transactions as part of the due diligence process in compliance with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. He has assessed different property types, including commercial, industrial, and multi-family residential developments, as well as self-storage facilities, gas stations, automotive services developments, dry cleaners, day cares, and hotels.

Education: B.S. Environmental Resources Engineering University of California – Humboldt
M.S. Civil Engineering, University of California – Sacramento

Certifications: Licensed Civil Engineer California

1.0 Introduction

This Site Investigation Report has been prepared on behalf of the City of Chico City Community Development Department and First Carbon Solutions for an approximately 133-acre property located at 501 W. 16th Street, Chico, Butte County, California (the BYSP Area, Figure 1) as well as an approximately 13.5-acre off-site improvement area upon which a stormwater detention pond and associated storm drain alignment would be installed to serve the proposed project. Together the BYSP Area and the off-site improvement area constitute the Site for the purposes of this report. The Scope for this report was presented in the Site Investigation Work Plan (the work plan) (Cameron-Cole, 2022). This report describes the results of the investigation activities that were undertaken to address recognized environmental conditions (RECs) identified during the 2022 Phase I Environmental Site Assessment (Phase I ESA) (Cameron-Cole, 2022). This report includes the results of the soil gas, vapor pin, and soil sampling proposed in the work plan.

1.1 Background

The 133-acre BYSP Area (Figure 2) is owned by BY Land Holdings Co, LLC. The Diamond Match Company used the BYSP Area as a wooden match factory and lumber remanufacturing facility from 1903 to 1975. Louisiana-Pacific Corporation bought the BYSP Area in 1984 and operated the “Chico Remanufacturing Facility” until 1989. Louisiana-Pacific (L-P) sold the BYSP Area in 1999 (Vestra, 2017). The BYSP has been the subject of environmental evaluation and cleanup activities since 1989. The BYSP Area is currently being monitored by L-P as directed by the Department of Toxic Substances Control (DTSC) for onsite pentachlorophenol (PCP) groundwater contamination. Consequently, a deed restriction is in place which prohibits the use of groundwater without DTSC approval. However, DTSC has directed L-P to submit a workplan for further evaluation as a prior property owner. This work is outside of the scope of the Phase II and the CEQA process. Additionally, an asphalt-capped pad along the southwestern boundary of the BYSP Area is a remediation facility designed and approved to address arsenic contamination associated with the required removal of rail spur ballast material from across the BYSP Area. This asphalt cap is expected to remain intact with activity use limitations (AULs) applicable to this area of the BYSP Area as specified in the same deed restriction.

The BYSP Area is generally flat and is covered by a mixture of vegetation including remnant orchard trees, tall trees, and tall grasses. The BYSP Area was used by other owners for various agricultural processing and other commercial uses until all such uses terminated in 2004. Currently, uses consist primarily of abandoned structures and roadways in various states of disrepair, including an existing Recreational Vehicle (RV) storage warehouse located near the northern boundary. A number of unused buildings and remnant building foundations are still located throughout the BYSP Area, primarily toward its southwest portion. The 13.5-acre off-site improvement area, to the south of the main Site, has been used as an orchard as early as 1941.

BY Land Holdings Co, LLC has initiated the process with DTSC to engage in a Standard Agreement process in which DTSC will oversee the cleanup of residual waste soils existing in selected areas onsite. This activity is independent of the California Environmental Quality Act (CEQA) process.

1.2 Geologic Setting

The Site is located within the Great Valley Geomorphic Province. Geologic mapping indicates that this region is underlain by the Riverbank Formation, an alluvial fan deposit consisting of interbedded sands, silts and gravel, and further underlain by the Tuscan Formation, which is dominated by volcanic breccia, ash, and lahar deposits (DWR, 2014). Both Formations include multiple aquifers of varying thicknesses and groundwater productivity.

Based on onsite well data, groundwater levels in monitoring wells are estimated to range from approximately 125 to 129 feet above mean sea level (62 to 65 feet below ground surface [ft bgs] in the southwestern portion of the Site). According to the Victor Industries November 2021 Semi-Annual Groundwater Monitoring Report, the groundwater depth-to-water measurements and subsequent elevation contours support that the regional groundwater flow is to the southwest (AECOM, 2022).

1.3 Phase I Environmental investigation

A Phase I ESA was conducted in August 2022 to address and confirm, to the extent feasible pursuant to the American Society for Testing and Materials International (ASTM) Standard E1527-21, the presence of RECs in connection with the historical Site use.

As defined in the ASTM Standard, RECs may include the presence or likely presence of hazardous substances or petroleum products on the Site under conditions that indicate an existing release, a past

release, or a material threat of a future release of any hazardous substances or petroleum products in, on, or at the Site. The 2022 Phase I ESA identified four RECs.

For the purposes of this report, these areas of concern are identified as follows:

REC 1: Volatile Organic Compound (VOC) Plume

The Phase I ESA identified a VOC plume, originating from an off-site and upgradient source, which extends beneath the Site. This plume is actively monitored for trichloroethylene (TCE) by the DTSC on behalf of the former off-site responsible party, Victor Industries. A limited soil gas investigation performed, as a part of due diligence activities in 2021, identified the presence of tetrachloroethylene (PCE), benzene, and total petroleum hydrocarbons-gasoline (TPH-g) in soil gas at levels exceeding residential regional screening levels (RSLs).

REC 2: Historical Pesticide and Herbicide Application in Orchards

Historical aerial photographs have identified former stone fruit or almond orchards present on the Site since at least 1941. Lead-arsenate was a commonly used pesticide on stone fruit orchards from the late 1880s until the early 1960s. No documentation is available regarding actual pesticide use in the orchards. Assuming agrichemicals were applied in these orchards, lead-arsenate and next generation organo-chlorine pesticides have a long residence life in surface soils at application areas and therefore historical residues could remain onsite.

REC 3: Former Dump and Burn Areas

The Phase I ESA identified areas of former dump piles, consisting of household trash as well as industrial solid wastes, which reportedly had been burned and buried in selected locations at the Site. Additionally, historic Site maps and historical information provided in remedial assessment documents prepared for the DTSC have identified the Normal Avenue Dump, as near the eastern boundary at 20th Street, and the South Orchard Burn Area/Dump, near the southern boundary and north of Estes Road. A “teepee burner”, used to burn off-spec lumber pieces, was located adjacent to the Normal Avenue Dump.

REC 4: Historical Underground Storage Tanks (USTs)

As of 1988, eight on-site gasoline and diesel USTs were registered with the L-P Chico Remanufacturing Facility. A significant data gap is associated with the absence of tank disposition and/or closure information, including analytical soil data that could confirm and attempt to identify the presence or absence of subsurface contamination potentially associated with these unaccounted USTs.

1.4 Scope of work

1.4.1 Subsurface Scanning Investigation

The subsurface scanning investigation (SSI) was performed in November 2022 across the entire Site. The subsurface scanning investigation included scanning the entire Site with a combination of electromagnetic field detection and reflective induction equipment to identify potential subsurface anomalies. Areas identified during these scans were further investigated using ground penetrating radar (GPR). GPR imagery assists in defining the shape and dimensions of identified subsurface anomalies. The objectives of this scope of work were to identify areas of the Site that may be in conflict with planned soil vapor and/or drilling activities, identify the locations of buried debris within the dump and burn areas (REC 1 and REC 3), and identify the possible locations of former USTs that are unaccounted for at the Site (REC 4). Additionally, the SSI was conducted to inform the need for and locations of additional sampling and/or assessment required to further the understanding of the identified RECs. The results of the SSI are discussed in Section 2.1.

1.4.2 Soil Gas Investigation

A limited soil gas investigation performed as a part of due diligence activities initiated in January 2021 by RCC Group, LLC (RCC) identified the presence of PCE, benzene, and TPH-g in soil gas at levels exceeding residential environmental screening levels (ESLs) (Figure 5). To further refine the soil gas data set and identify potential priority areas of the Site, new soil gas wells were installed by Cameron-Cole in accordance with their work plan. The objective of the soil gas wells, and vapor pins were to refine the soil gas data set and to identify any priority areas of the Site that may require additional assessment of vapor intrusion risk or possible vapor mitigation measures associated with the groundwater VOC plume (REC 1). In November 2022, nine dual-nested soil gas wells (Figure 5) were installed each with two probes installed at 7 and 15 ft bgs in areas of the Site overlying the shallow groundwater VOC plume emanating from the former Victor Industries Site. Additionally, four vapor

pins were installed in areas with existing concrete slabs, two in abandoned buildings and two in concrete foundations of former structures, to assess whether VOCs may remain trapped beneath these surfaces due to the capping effect.

Soil gas samples were analyzed for VOCs by USEPA Method TO-15 and for helium using modified Method ASTM D-1946. Soil gas samples were collected following DTSC protocol provided in the July 2015 Advisory of Active Soil Gas Investigations (DTSC, 2015).

Soil gas samples were collected using the helium shroud method. Use of the helium shroud provides greater confidence that the samples collected for laboratory analysis were not compromised through the introduction of ambient air into the sample train. A detailed description of the helium shroud purge and sample procedure is included in the work plan.

The limited soil gas investigation by Cameron-Cole was conducted in November 2022. Soil gas samples for VOCs from the nine newly installed soil gas wells (BY-SG-13 through BY-SG-21) and four new vapor pins (BY-VP-21 through BY-VP-24) were collected between November 28 and 30, 2022. The results of the soil gas investigation are discussed in section 2.1.

1.4.3 Soil Investigation

Soil sampling was performed in November 2022 to further assess the significance of the historical herbicide and pesticide use in the former orchard areas (REC 2) and within the former dump and burn areas (REC 3) to assess the potential impacts from chemical residues that may still be present due to these historic activities, and were not adequately removed under DTSC oversight in 1993. Soil sample locations established in 2022 and 2023 were based off a general grid within the former orchard areas and the former burn and dump areas. This delineation was done to establish a relatively even distribution of sample locations with each historical source area. Figure 6 displays the locations of all soil samples collected in 2022 and 2023.

The November 2022 soil sampling activities included the following:

REC 2 Soil Samples

- Collected 60 soil samples within the former orchard areas from a depth of 0.5-1-ft bgs. A grid pattern with roughly 150 to 200 foot spacing was used to determine initial sampling locations. These locations were modified as needed in the field to avoid utilities, or other obstacles to sampling.
- Analyzed 60 samples for total lead and arsenic by USEPA Method 6010B.
- Analyzed 40 samples by USEPA Methods 8081 for organochlorine pesticides and polychlorinated biphenyls (PCBs), by USEPA Method 8141 for organophosphorus compounds, and by USEPA Method EPA 8151 for determining selected chlorinated acid herbicides.

REC 3 Soil Samples

- Collected 18 samples within the former dump and burn areas from a depth of 0.5-1-ft bgs.
- Analyzed samples for Total Petroleum Hydrocarbons as diesel and motor oil compounds (TPH-D/MO) by USEPA Method 8015, seventeen California Assessment Manual (CAM-17) metals by USEPA Method 6010/7471, pH by USEPA Method 9045 and polycyclic aromatic hydrocarbons (PAHs) by USEPA EPA Method 8270.
- No evidence of burning (i.e., charred soil or debris) was encountered during the SSI or soil gas borehole installed so no samples were collected for dioxin/furan compounds.

Additional soil samples were collected in March 2023 to further define the lateral and vertical distribution of arsenic and lead identified in select November 2022 soil samples. Further sampling for additional compounds was not performed as all previous results were non-detect for organic constituents.

The March 2023 soil sampling included the following:

- Collection of 18 soil samples from six new soil boring locations (three samples per boring) from the Normal Avenue Dump and vicinity. Soil samples were collected at depths of 0.5, 2.5, and 5 ft bgs to further characterize the vertical extent of observed impacts of arsenic and lead.
- Eight vertical samples at depths of 2.5 and 5 ft bgs, were collected from eight November 2022 surface samples in the Normal Avenue Dump.

- Collection of 12 samples from four new boring locations (three samples per boring) around the South Orchard Burn Area/Dump, at depth of 0.5, 2.5, and 5 ft bgs to further characterize the lateral and vertical extent of observed impacts.
- Collection of eight samples from four boring locations (two samples per boring) collected from previously sampled locations in the South Orchard Burn Area/Dump, at depths of 2.5 and 5 ft bgs to further characterize the vertical extent of observed impacts.
- Collection of three samples of brick-and-mortar found in debris piles in the Normal Avenue Dump, South Orchard Burn Area/Dump areas and near an existing structure. The locations were chosen based on brick-and-mortar debris available in each burn and dump area, and from an existing structure. This analysis was to evaluate if the material as a possible source for the observed arsenic and lead concentrations in soil. Brick-and-mortar samples collected from each area were similar in appearance and are assumed to be representative of brick debris found in selected locations within the BYSP Area.
- Analyzed samples for arsenic and lead by USEPA 6010B.

The results of the November 2022 and March 2023 soil samples are discussed in section 2.3.

1.5 Screening Levels

The United States Environmental Protection Agency (USEPA) has established regional screening levels (RSLs) for over 100 commonly encountered contaminants. The most recent iteration of the RSLs was published in November 2023 and includes screening levels for soil, groundwater and soil gas. Under most instances, it is unlikely the presence of a chemical in soil, soil gas, or groundwater at concentrations below the corresponding RSLs will pose a significant threat to human health, water resources, or the environment.

The screening levels used for this simple comparison analysis are as follows:

Soil Gas

For purposes of comparison with laboratory results presented for samples in this Phase II Investigation Report, screening levels for soil gas (Table 1) are the residential air human health risk levels published by the USEPA (2023) .

Soil

Soil screening levels (SSL) are also presented for comparison purposes in Table 2. For organic compounds, the SSLs listed are the Residential direct exposure human health risk levels for shallow soil, as published by the USEPA (2023). For metals, where consideration of background concentrations may be appropriate, soil screening levels are the upper bound concentrations as described in the Kearney Foundation Special Report *Background Concentrations of Trace and Major Elements in California Soils* (Kearney, 1996). Concentrations detected in collected soil samples, which occur within the published range of background values typically do not warrant further assessment. Metals detected in collected soil samples, which occur at concentrations higher than listed background levels were presented and compared to Residential direct exposure human health risk levels for shallow soil, as published by the USEPA (2023).

Generally speaking, the existing conditions documented in the Phase II Investigation efforts, which were conducted at former source areas in Fall 2022 and Winter 2023 confirmed that remedial investigations conducted by L-P between 1992 and 1995 were incomplete. As presented in Report Section 2.0 below, residual concentrations of selected hazardous substances remain onsite, in albeit a scattered distribution within the former source areas. These existing residual detections were anticipated by the DTSC in 1995, when the Final Remedial Action Plan was originally approved. In order to address the scattered distribution of residual hazardous substances detected onsite, the Owners initiated Scope of Work discussions with the DTSC staff in 2023 to resolve these existing conditions as a final determination regarding applicable screening levels prior to BYSP Area redevelopment.

2.0 Results

2.1 Subsurface Scanning Investigation

The SSI was performed in November 2022 to identify the locations of major subsurface infrastructure and other subsurface features within the Site. The findings of the SSI are presented in Figures 3 and 4 and Appendix B. As expected, the SSI identified active and abandoned water lines, active communication corridors, high and low voltage electric lines, an active natural gas line and an unknown polyvinyl chloride (PVC) utility housing.

Water Lines

Abandoned water lines were identified throughout the Site with the majority located along prior roadways and former building footprints. Active water lines consisting of PVC piping were identified along the access road extension of W 16th Street extending from the main entrance to the western boundary.

Communication Lines

Active communication lines were identified along the main road and connecting to the metal warehouse storage building, is in the northern section of the Site.

Electric Lines

An active high voltage electric line was identified along the northeastern side of the metal warehouse storage building, extending offsite to the northeast. An active low voltage electric line was identified along the southeastern side of the former prune drying and packing facility.

Gas Lines

An active natural gas line was identified along the northeastern side of the metal warehouse storage building, extending off site to the northeast.

Other

An unknown PVC utility was identified near the northeastern corner of the Site and extending about 250 ft from the eastern boundary adjacent to Normal Avenue.

Existing Monitoring Wells

Seven groundwater monitoring well clusters were identified throughout the Site. These wells are associated with groundwater monitoring conducted for the off-site and upgradient Victor Industries site (AECOM, 2022).

Subsurface Anomalies

Along the southwestern boundary, a number of areas of interest have been identified using ground penetrating radar (GPR) and the findings are presented in Figure 4 and Appendix B. A possible location of a UST was identified on Figure 4. The GPR identified three large cylindrical items (about

3-4 ft in diameter), probably metallic, and at 2-5 ft bgs. Soil gas well (BY-SG-25) was installed adjacent to the possible UST and TCE was detected at 7ft (7.9 ug/m^3) and 15 ft (13 ug/m^3) but below SLs. No other VOCs were concentrations were detected.

Nine points identified the presence of strata changes which indicate a change in subsurface materials (e.g., clay, sand, concrete), or possible soil disturbance. Two points are located adjacent to the possible UST, one point about 100 ft to the west, and five are located near the western boundary and west of the asphalt cap. Strata Change-2, -4, -5, -6, -7, and -8 identify horizons of potential clay, sand, asphalt, or miscellaneous debris. Strata Change-9, located along the southwestern boundary and near the main road, identifies a possible layer of reinforced concrete. Strata Change-1 and -3 indicate a change in material but materials were not specifically identified.

Two unknown anomalies were identified adjacent to the possible location of the referenced UST; however, the imaging does not clearly define the nature of the anomalies.

Ten unclassified points were identified and are likely associated with nonmetallic buried items such as wood, brick, and/or concrete.

2.2 Limited Soil Gas Investigations

Soil gas samples were collected following DTSC Advisory guidance (2015). Soil gas samples were analyzed for VOCs by USEPA Method TO-15 and for helium (tracer gas) using modified Method ASTM D-1946.

The limited soil gas investigation was conducted by Cameron-Cole in November 2022. Soil gas samples for VOCs from the nine newly installed soil gas wells (BY-SG-13 through BY-SG-20, BY-SG-25) and four new vapor pins (BY-VP-21 through BY-VP-24) were collected between November 28 and November 30, 2022. Several VOCs were identified in the collected samples and one sample of PCE exceeded RSL (11 ug/m^3).

Identified VOCs included the following:

- PCE (BY-SG-25 at both 7ft bgs and 15 ft bgs; BY-VP-24)
 - PCE exceeded RSL (11 ug/m^3) in BY-SG-25-15 ft (13 ug/m^3).
- 2,2,4-trimethylpentane (BY-SG-19 at 15 ft bgs)

- ethanol (BY-VP-21)
- Freon 11 (BY-SG-16 at both 7ft bgs and 15 ft bgs)
- hexane (BY-VP-21)

Soil gas analytical results are presented in Table 3 and certified laboratory analytical reports are included as Appendix C. Vapor pin results indicate that the potential capping effect (i.e., the potential for soil gas to accumulate beneath building foundations) associated with residual soil gas concentrations is not of concern.

2.3 Soil Sampling

2.3.1 November 2022 Soil Sampling

Soil sampling was performed in November 2022 to further assess the presence of the historical herbicide and pesticide use in the former orchard areas (REC 2), as well as the presence of total lead and arsenic within the former dump and burn areas (REC 3), resulting from these historic activities.

REC 2 Analytical Results

Surface soil sampling was performed for REC 2 from November 29 to December 1, 2022. A total of 60 primary samples and six duplicate samples were collected during this time. A summary of analytical results for REC 2 is presented in Table 5.

- Lead was detected above SSLs (>97 mg/kg) in nine surface soil samples (BY-REC2-SS-27, -28, -29, -30, -31, -45, -49, -52, and -53) with concentrations ranging from 100 mg/kg to 810 mg/kg.
- Arsenic was detected above background levels (>11 mg/kg) in 10 surface soil samples. (BY-REC2-SS-27, -28, -30, -31, -37 -45, -48, -49, -52, and -53) with concentrations ranging from 11 mg/kg to 40 mg/kg.
- Eight of the nine sample locations with elevated lead concentrations also detected elevated concentrations of arsenic.

- Additionally, the presence of historical pesticides 4,4'-DDD, 4,4'-DDE, 4,4'-DDT, and dieldrin were detected in several soil samples at concentrations significantly below their SSLs. Trace detections of these legacy compounds are not unusual on former agricultural use land parcels such as the historical orchards on the BYSP Area.

REC 3 Analytical Results

Soil Sampling for REC 3 was performed from November 28 to 29, 2022. A total of 18 primary samples and two duplicate samples were collected during this time. A summary of analytical results for REC 3 is presented in Tables 6 and 7.

- Lead was detected above SSLs in four samples (BY-REC3-SS-06, -07, -08, and -18) with concentrations ranging from 80 mg/kg to 780 mg/kg.
- Arsenic was detected above background levels in three samples (BY-REC3-SS-06, -10, and -18) with concentrations ranging from 15 mg/kg to 70 mg/kg.
- TPH-motor oil was detected at three sample locations. (BY-REC3-SS-02, -06, and -08) with concentrations below SSLs.
- No PAHs were detected in any samples.

REC 2 and REC 3 soil samples identified concentrations of lead and arsenic exceeding SSLs and were located primarily within or adjacent to boundaries of the former Normal Avenue Dump/ Burn Area and former South Orchard Dump/ Burn Area, Detected concentrations in soil samples occurred at depths of 0-0.5 ft bgs. Detections of TPH-mo and pesticides (4,4'-DDD, 4,4'-DDE, 4,4'-DDT, and dieldrin) concentrations were identified in several locations but at levels below SSLs. Other hazardous substances such as PAHs were not detected.

March 2023 Soil Sampling

In an attempt to further define the areas with elevated arsenic and lead concentrations in the historical source areas, additional soil samples were collected in March 2023. The sample locations are presented in Figure 6.

Normal Avenue Dump/Burn Area

Six borings (BY-MAR-SS-01, -02, -03, -04, -05, and -06) were installed to determine the southwestern and northeastern lateral extent of arsenic and lead concentrations observed in the November 2022 samples collected in Normal Avenue Dump/ Burn area. Samples from these borings were collected from 0.5, 2.5 and 5 ft. bgs. Surface soil samples were analyzed initially, with deeper samples held pending the results of the surface soil samples. Arsenic and lead concentrations in surface soil from these six borings were below SSLs, indicating the lateral extent of elevated concentrations of these metals is limited to the previously defined boundary. Deeper samples from these borings were not analyzed.

An additional four borings were installed within the Normal Avenue Dump/ Burn to vertically delineate the extent of surface soil impacts identified in November 2022 samples. Samples from these borings (BY-REC3-SS-06, -07, -08, and BY-REC2-SS-31) were collected at 2.5 and 5 ft. bgs. with the analysis of deeper samples held pending the results from the 2.5 ft. bgs. results. March 2023 soil results from the Normal Avenue Dump/ Burn Area at 2.5 ft, bgs did not contain concentrations of arsenic or lead exceeding SSLs. These data indicate the vertical extent of arsenic and lead at the Normal Avenue Dump/ Burn Area is limited to surface soils. Based upon these results, the deeper samples held at the laboratory were not analyzed.

South Orchard Dump/ Burn Area

Four borings (BY-MAR-SS-07, -08, -09, and -10) were installed to determine the western lateral extent of arsenic and lead concentrations observed in the November 2022 samples collected in South Orchard Dump/ Burn Area. Samples from these borings were collected from 0.5, 2.5 and 5 ft. bgs. Surface soil samples were analyzed initially, with deeper samples held pending the results of the surface soil samples. Arsenic and lead concentrations in surface soil from three of the 4 boring were below SSLs. One sample from a new sample location (BY-MAR-SS-08) exceeded arsenic and lead SSLs in the surface sample. Concentrations at 2.5 and 5 ft bgs were below SSLs.

An additional four borings were installed within the South Orchard Dump/ Burn Area to vertically delineate the extent of surface soil impacts identified in November 2022 samples. Samples from these borings (BY-REC2-SS-45, -49, -53, and BY-REC3-SS-18) were collected at 2.5 and 5 ft. bgs. with the analysis of deeper samples held pending the results from the 2.5 ft. bgs. results.

- Two samples at 2.5 ft bgs (BY-REC2-SS-45 and BY-REC3-SS-18) had exceedances of arsenic (72 mg/kg and 15 mg/kg, respectively) and lead (400 mg/kg and 2900 mg/kg, respectively).
- Arsenic and lead concentrations in BY-REC3-SS-18 at five feet bgs were below soil screening levels, indicating that arsenic and lead impacts at this location are limited to shallow depths.
- Concentrations of arsenic and lead for BY-REC2-SS-45 and BY-REC3-SS-18 at 5 ft bgs and BY-MAR-SS-08 at 2.5 ft bgs were below SSLs.

In the South Orchard Dump/ Burn Area, November 2022 and March 2023 arsenic and lead detected concentrations exceeding SSLs were identified in two distinct and separate areas. Samples BY-REC2-SS-49, -52, -53, and BY-MAR-SS-08, located along the western boundary of the South Orchard Burn Area/Dump, contained lead and arsenic in surface samples above SSLs but not at 2.5 ft bgs. Samples BY-REC3-SS-18 and BY-REC2-SS-45, located along the eastern boundary of the South Orchard Dump/ Burn Area, indicate arsenic and lead exceedances in surface and 2.5 ft bgs samples but not at 5 ft bgs.

Brick-and-Mortar Samples

Three samples of brick-and-mortar debris, found in the Normal Avenue Dump/Burn Area, South Orchard Dump/ Burn Area and existing historical structures. No concentrations of lead and arsenic exceeding SSL were identified in the brick-and-mortar samples and not a likely source of lead and arsenic contamination.

A summary of analytical results for November and March 2023 for all arsenic and lead concentrations are presented in Table 8.

2.4 QA/QC Samples

QA/QC samples are handled, prepared, and analyzed concurrently with primary samples to ensure that the procedures and equipment used to collect samples and generate data are operating within suitable accuracy under known, well-defined conditions. Both laboratory and field QA/QC

procedures are performed in accordance with the work plan. QA/QC samples collected in the field include trip blanks, duplicates, lab control spikes and results of the helium shroud samples.

Trip Blank

A trip blank is used to determine the contribution, if any, that ambient Site conditions may have on sample analytical results. Trip blanks were collected during soil gas sampling by submitting an unused sample cannister. The trip blank was analyzed for VOCs USEPA method TO-15. No detections were identified in the trip blank.

Duplicate Samples

The USEPA has established acceptance-rejection criteria for duplicate and replicate samples for the analysis of inorganic compounds ("*Laboratory Data Validation - Functional Guidelines for Evaluating Inorganic Analyses*", 1988). To determine whether duplicate or replicate sample results are acceptable, the relative percent difference (RPD) is calculated. If concentrations are greater than 10 units (mg/kg or ug/m³) and the RPD is less than 20%, the data is accepted, between 20%-50% the data is accepted but noted and greater than 50%, the data is rejected.

Soil Gas Duplicate Samples

During the event, two "blind" duplicate samples were collected at BY-SG-14-7 and BY-VP-23 and identified as DUP-A and DUP-B, respectively. No detections were identified in either the primary or duplicate samples.

Soil Duplicate Samples

Six duplicates were collected from the November 2022 REC 2 samples. All primary and duplicate concentrations were within 20%, within the acceptable range.

Four duplicates were collected from the November 2022 REC 3 samples. The concentrations for BY-REC3-SS-15 and duplicate BY-REC3-SS-215 were all between 20%-50% and the data is accepted but noted. The remaining primary and duplicate concentrations were within 20%.

Three duplicates were collected from the March 2023 arsenic and lead soil samples. The concentrations for BY-MAR-SS-10 and duplicate BY-MAR-SS-210 were between 20%-50%

and the data is accepted but noted. The remaining primary and duplicate concentrations were within 20%.

Helium Shroud Method

As specified in the 2022 work plan, soil gas samples were collected using the helium shroud method. Use of the helium shroud method provides greater confidence that the soil gas samples collected for laboratory analysis are not compromised through the introduction of ambient air into the sample train. The DTSC Advisory (2015) cites that “an ambient air leak up to 5% is acceptable if quantitative tracer testing is performed by shrouding.” A helium concentration of 20% to 30% was maintained in the shroud during purging and sampling. If 5% of shroud air was introduced to the shroud through a leak during sampling, then the sample would have a concentration of 1% or more of helium. Helium concentrations were all below 1%.

3.0 Conclusions and Recommendations

3.1 Subsurface Scanning Investigation

The SSI identified active and abandoned utility lines throughout the Site including active and abandoned water lines, an active communication line, active high and low voltage electric lines, an active natural gas line, and an unknown PVC utility. Several subsurface anomalies were also identified using GPR along the southwestern boundary, from the western end of W 16th Street to the north and the asphalt cap to the south. A possible UST was identified along with strata changes, unclassified, and unknown anomalies that may represent buried infrastructure or waste disposal. The GPR identified relatively large cylindrical items, possibly metallic, and roughly 3-4 ft bgs which indicates a possible location of a UST. A soil gas well was installed adjacent to the location of the possible UST anomaly; however, no VOC concentrations were detected.

The anomalies identified along the southwestern Site boundary may represent buried infrastructure or debris that may pose a concern during redevelopment of the Site. No visual evidence of hazardous materials contamination was observed in these areas. Similarly, the results of limited soil gas sampling confirmed there was no evidence of a historic hydrocarbon release. Nonetheless, an exploratory excavation of this area is recommended for inclusion as a Scope of Work Task within the DTSC Standard Agreement and implemented during the Site redevelopment. Specifically, such field activities would be conducted for example in accordance with a DTSC-approved “*Soil and Debris Management Plan*” pursuant to applicable laws and regulations to physically explore and confirm the nature of these anomalies prior to their physical disturbance and removal.

The “Soil and Debris Management Plan” (SDMP) would be a Program-level document that outlines the steps that would be undertaken to (a) document Site characterization according to the nature and extent of contamination that is present on the Site and (b) validate applicable screening levels before local development activities proceed. The SDMP would describe the range of field activities planned for the Site. If further investigations conducted during Site development indicate evidence of chemical/environmental hazards in Site soil conditions, then the SDMP would describe the standard procedures and measures acceptable to DTSC to ensure the Site is remediated in accordance with applicable DTSC standards.

As outlined in a DTSC Standard Agreement Scope of Work Task, the SDMP would initially be reviewed and approved by the DTSC (the anticipated regulatory oversight agency) such that it would serve as a long-term regulatory guidance document for future Site-specific activities. Such activities would include but not be limited to situations where Site surface soil and debris need further assessment and removal for appropriate offsite disposition. The field activities planned or anticipated for the Site would likely occur throughout the redevelopment process. Initially, field activities could include the anticipated focused evaluation and mitigation of Site RECs such as the former Normal Avenue Dump/ Burn Area. The SDMP would be a dynamic document, whereby an unusual or unanticipated field task could be described in a brief technical memorandum submitted to the DTSC for review, consideration, and “sign-off” approval within an “expedited” 10-working day or less timeframe. Using this approach for a SDMP would reassure the DTSC that all technical AULs are respected, and adequate Notifications of Field Activity are consistent within the required 7-day timeframe.

3.2 Soil Gas

With the exception of BY-SG-25-15ft, the November 2022 soil gas investigation did not identify VOCs in soil gas at concentrations exceeding conservative residential soil gas RSLs. The PCE result at BY-SG-25-15ft ($13 \mu\text{g}/\text{m}^3$) slightly exceeded the residential RSL ($11 \mu\text{g}/\text{m}^3$) but was below the residential ESL ($15 \mu\text{g}/\text{m}^3$). The significance of this result should be evaluated in the context of specific development plans at this location and in consultation with DTSC who will approve the final screening value.

3.3 Soil

The November soil samples identified concentrations of lead and arsenic exceeding SSL and background levels primarily within or adjacent to the reported location of the former Normal Avenue Dump/ Burn Area and former South Orchard Dump/ Burn Area at depths of 0-0.5ft bgs. Additional soil sampling in March 2023 confirmed that the vertical extent of arsenic and lead exceeding the SSL in this area was limited to surface soils within the former Normal Avenue Dump/ Burn Area. Within the former South Orchard Dump/ Burn Area, the vertical distribution of arsenic and lead exceeding SSLs was similarly limited to surficial soils, with the exception of one location in the southeast corner of the Site where arsenic and lead impacted waste soils extended to 2.5 ft. bgs.

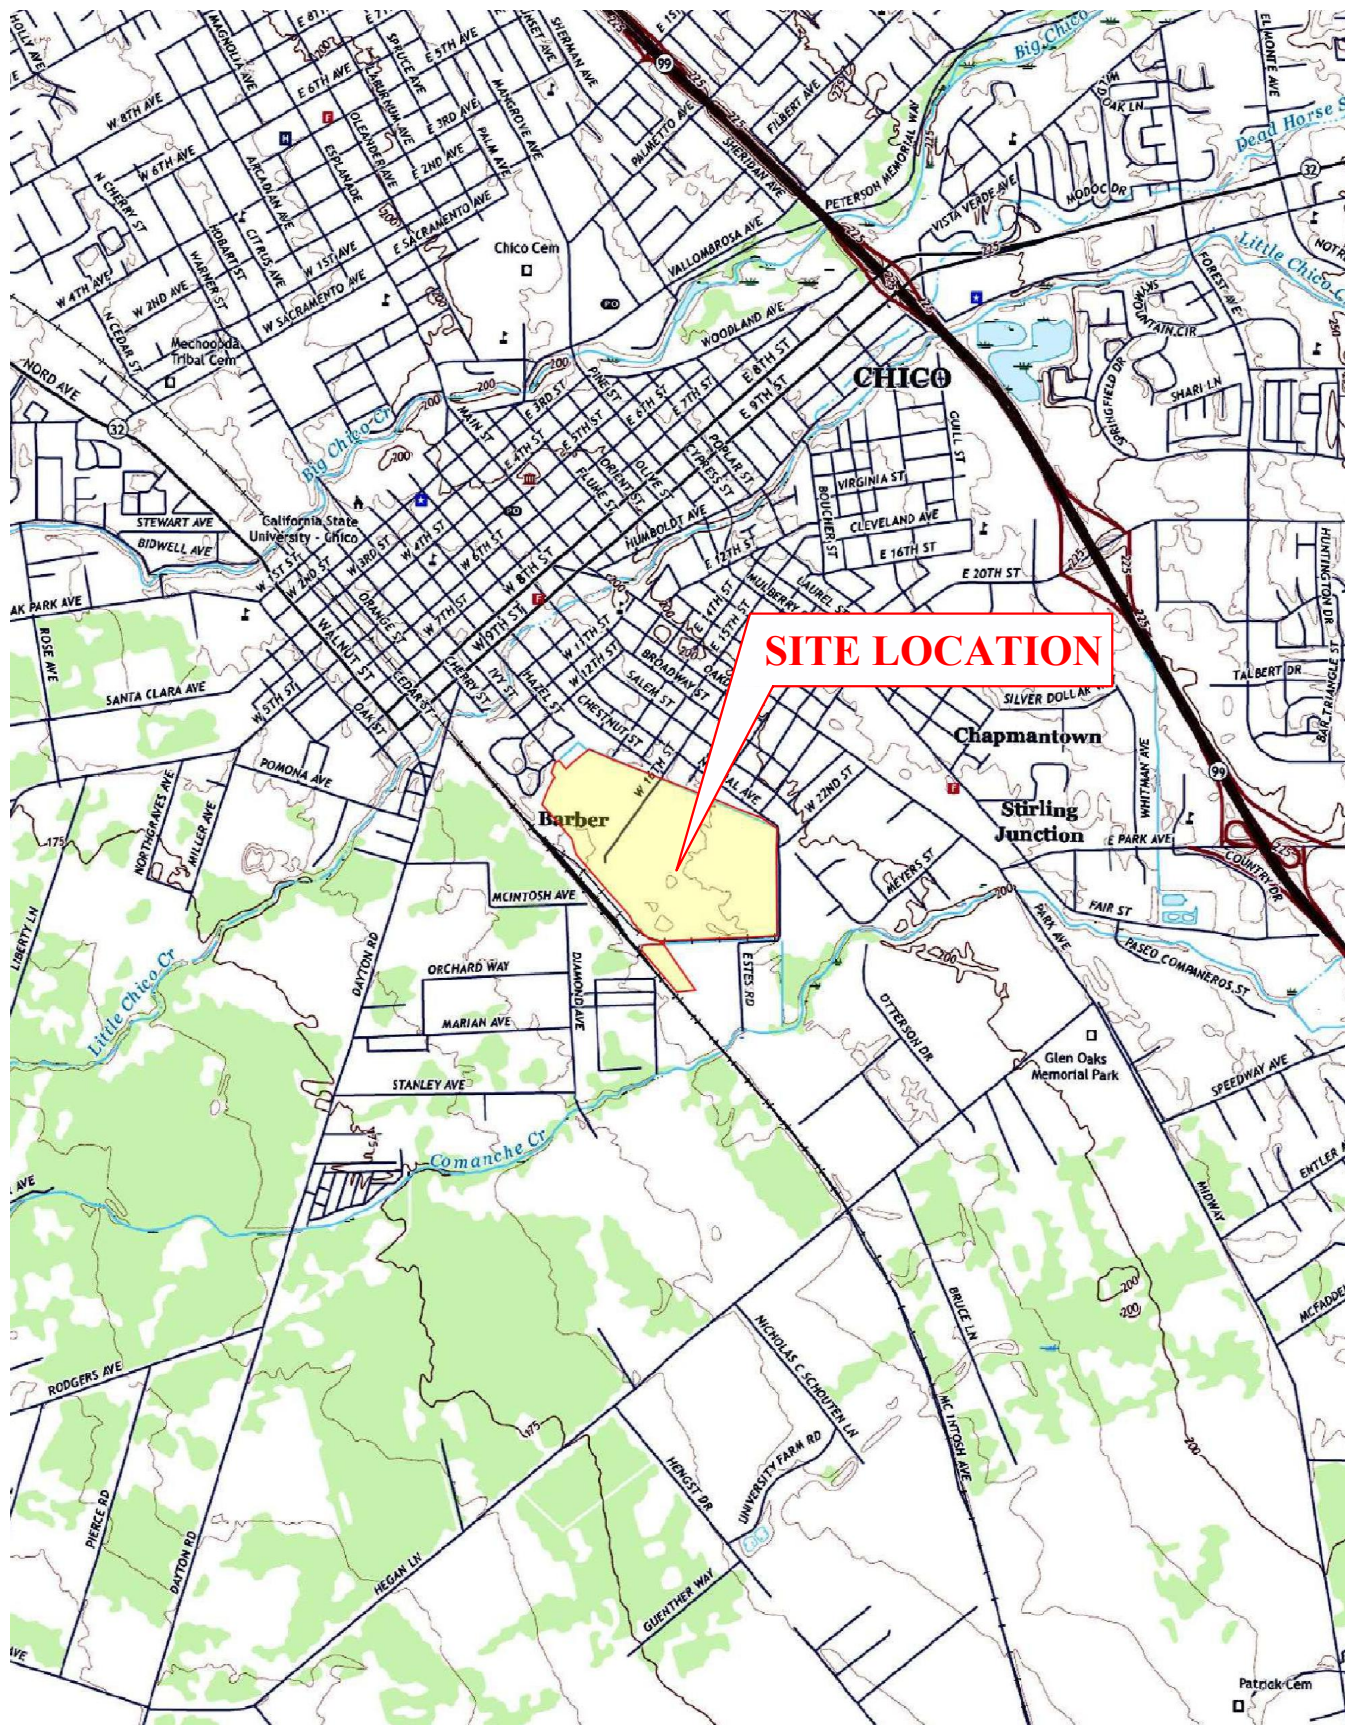

The presence of TPH-MO and traces of pesticides (4,4'-DDD, 4,4'-DDE, 4,4'-DDT, and dieldrin) concentrations were identified in several locations and all were traces of below SSLs. The REC 3 soil samples did not identify concentrations of PAHs or visual evidence of historic burning (i.e. charred soil or debris, ash layers). Consequently, additional testing for dioxins and furans was not performed in accordance with the 2022 work plan.

Another potential Scope of Work Task conducted under a planned DTSC Standard Agreement, would be a focused waste soils mitigation effort. A screening effort would be performed on the surface soils within the former Normal Avenue Dump/ Burn Area and the former South Orchard Dump/ Burn Area as conceptually delineated on Figure 2 and Figure 6. This mitigation effort would be performed to specifically identify, confirm, and remove residual waste soil containing elevated levels of arsenic and lead prior to Site redevelopment. The focused screening effort could be accomplished using field-level devices such as an X-ray fluorescence (XRF) spectrometer and carefully mapped field grids. This field screening activity could minimize the potential for over-excavation work, which would also reduce the potential for fugitive dust generation and drift. The XRF screening would be performed as described in the DTSC-approved SDMP, which provides details of the soil and ash debris screening. This screening activity would allow Site managers to plan for the necessary equipment and transportation bins needed to conduct excavation work, confirmation soil sampling, and the appropriate off-site disposal of chemically impacted soil, ash and debris.

NOTES

Bolded values exceed screening level

mg/kg- milligrams per kilograms

J-Estimated value is greater than reporting limit but less than the method detection limit

NOTES

Bolded values exceed screening level

mg/kg- milligrams per kilograms

J-Estimated value is greater than reporting limit but less than the method detection limit

NOTES

Bolded values exceed screening level

mg/kg- milligrams per kilograms

J-Estimated value is greater than reporting limit but less than the method detection limit

APPENDIX A

ADVISORY – ACTIVE SOIL GAS INVESTIGATIONS

Figure 1

Typical Single and Nested Soil Gas Probe Design & Purge Volume Calculation

Legend

BD = borehole diameter (inches)
 BLV = borehole linear volume (ml/ft)
 DBT = dry bentonite thickness (ft)
 DBV = dry bentonite volume (ml)
 ID = tubing inner diameter (inch)
 PV = purge volume (ml)
 ST = sand pack thickness (ft)
 SV = sand pack volume (ml)
 TL = tubing length (ft)
 TLV = tubing linear volume (ml/ft)
 TV = tubing volume (ml)
 PEEK = Polyetheretherketone

(1) $TV = TL \times TLV = (TL)$ _____

X 6 if tubing ID = 3/16" = _____ ml
 X 16 if tubing ID = 5/16" = _____ ml
 X ____ if tubing ID = ____" = _____ ml

(2) $DBV = DBT \times BLV = (DBT)$ _____

X 350 if BD = 2 1/8" = _____ ml
 X 820 if BD = 3 1/4" = _____ ml
 X ____ if BD = ____" = _____ ml

(3) $SV = ST \times BLV = (ST)$ _____

X 280 if BD = 2 1/8" = _____ ml
 X 660 if BD = 3 1/4" = _____ ml
 X ____ if BD = ____" = _____ ml

Note: porosity of 50% used for dry bentonite and 40% used for #3 sand pack to calculate BLV.

1 $PV = (1)TV + (2)DBV + (3)SV =$ _____ ml

APPENDIX B

Subsurface Investigation Results
Barber Yard
Chico, California

Subsurface Investigation and Interpretation
performed by
Forsite Engineering Surveys Inc.

Possible UST Signature

Possible UST Signature – 1

Large cylindrical items, probably metallic, roughly 3-4ft below ground surface. Yellow dots denote possible UST, pink dots denote unknown.

Subsurface Strata Changes

Strata Change – 1

Strata Change – 2

Sublayer of material change, purple dots identify "horizons". Potentially clay, sand, asphalt layer, or miscellaneous debris.

Strata Change - 3

Strata Change - 4

Sublayer of material change, purple dots identify "horizons". Potentially clay, sand, asphalt layer, or miscellaneous debris.

Strata Change – 5

Sublayer of material change, purple dots identify "horizons". Potentially clay, sand, asphalt layer, or miscellaneous debris.

Strata Change - 6

Sublayer of material change, purple dots identify "horizons". Potentially clay, sand, asphalt layer, or miscellaneous debris.

Strata Change – 7

Sublayer of material change, purple dots identify "horizons". Potentially clay, sand, asphalt layer, or miscellaneous debris.

Strata Change - 8

Sublayer of material change, purple dots identify "horizons". Potentially clay, sand, asphalt layer, or miscellaneous debris.

Strata Change – 9

Subsurface strata change, appears to be reinforced concrete.

Unkown Anomalies

Unkown Anomaly - 1

Unknown Anomaly - 2

Unclassified Areas of Interest

Unclassified – 1

Nonmetallic items, such as wood, brick, and concrete buried to approximately 7 feet below grade.

Unclassified – 2

Unclassified - 3

Unclassified - 4

Unclassified - 5

Unclassified - 6

Unclassified - 7

Unclassified - 8

Unclassified - 9

Unclassified - 10

APPENDIX C

Date of Report: 12/16/2022

Amy Robson

Cameron-Cole, LLC
2236 Mariner Square Drive Suite 500
Alameda, CA 94501

Client Project: [none]
BCL Project: Barber Yard - Chico
BCL Work Order: 2228870
Invoice ID: B465401

Enclosed are the results of analyses for samples received by the laboratory on 12/2/2022. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Van S", is written over a horizontal line.

Contact Person: Vanessa Sandoval
Client Service Rep

A handwritten signature in black ink, appearing to read "Stuart Buttram", is written over a horizontal line.

Stuart Buttram
Operations Manager

Certifications: CA ELAP #1186; NV #CA00014; OR ELAP #4032-001; AK UST101

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

Notes And Definitions

J	Estimated Value (CLP Flag)
MDL	Method Detection Limit
ND	Analyte Not Detected
PQL	Practical Quantitation Limit
A02	The difference between duplicate readings is less than the quantitation limit.
A10	Detection and quantitation limits were raised due to matrix interference.
Q01	Sample precision is not within the control limits.
Q02	Matrix spike precision is not within the control limits.
Q03	Matrix spike recovery(s) was(were) not within the control limits.
S09	The surrogate recovery for this compound was not within the control limits.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

All results listed in this report are for the exclusive use of the submitting party. Pace Analytical assumes no responsibility for report alteration, separation, detachment or third party interpretation.

Cameron-Cole, LLC
2236 Mariner Square Drive Suite 500
Alameda, CA 94501

Reported: 12/14/2022 13:58
Project: Barber Yard - Chico
Project Number: [none]
Project Manager: Amy Robson

Notes And Definitions

J	Estimated Value (CLP Flag)
MDL	Method Detection Limit
ND	Analyte Not Detected
PQL	Practical Quantitation Limit
A10	Detection and quantitation limits were raised due to matrix interference.
A17	Surrogate not reportable due to sample dilution.
A57	Chromatogram not typical of motor oil.
pH1:1	pH result reported on a 1:1 dilution of sample
Q03	Matrix spike recovery(s) was(were) not within the control limits.
S09	The surrogate recovery for this compound was not within the control limits.

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

All results listed in this report are for the exclusive use of the submitting party. Pace Analytical assumes no responsibility for report alteration, separation, detachment or third party interpretation.

Project Name: Barber Yard

Project #: 1723

Workorder #: 2212042B

Dear Ms. Amy Robson

The following report includes the data for the above referenced project for sample(s) received on 12/1/2022 at Eurofins Air Toxics LLC.

The data and associated QC analyzed by Modified ASTM D-1946 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics LLC. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Nazanin Khorrami at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Nazanin Khorrami

Project Manager

LABORATORY NARRATIVE
Modified ASTM D-1946
Cameron-Cole
Workorder# 2212042B

Twenty-five 1 Liter Summa Canister samples were received on December 01, 2022. The laboratory performed analysis via Modified ASTM Method D-1946 for Helium in air using GC/TCD. The method involves direct injection of 1.0 mL of sample.

Method modifications taken to run these samples are summarized in the table below. Specific project requirements may over-ride the EATL modifications.

<i>Requirement</i>	<i>ASTM D-1946</i>	<i>ATL Modifications</i>
Calibration	A single point calibration is performed using a reference standard closely matching the composition of the unknown.	A minimum of 5-point calibration curve is performed. Quantitation is based on average Response Factor.
Reference Standard	The composition of any reference standard must be known to within 0.01 mol % for any component.	The standards used by ATL are blended to a $\geq 95\%$ accuracy.
Sample Injection Volume	Components whose concentrations are in excess of 5 % should not be analyzed by using sample volumes greater than 0.5 mL.	The sample container is connected directly to a fixed volume sample loop of 1.0 mL on the GC. Linear range is defined by the calibration curve. Bags are loaded by vacuum.
Normalization	Normalize the mole percent values by multiplying each value by 100 and dividing by the sum of the original values. The sum of the original values should not differ from 100% by more than 1.0%.	Results are not normalized. The sum of the reported values can differ from 100% by as much as 15%, either due to analytical variability or an unusual sample matrix.
Precision	Precision requirements established at each concentration level.	Duplicates should agree within 25% RPD for detections > 5 X's the RL.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

There were no analytical discrepancies.

Definition of Data Qualifying Flags

Seven qualifiers may have been used on the data analysis sheets and indicate as follows:

B - Compound present in laboratory blank greater than reporting limit.

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the detection limit.

M - Reported value may be biased due to apparent matrix interferences.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Ms. Amy Robson

Cameron-Cole

2236 Mariner Square Drive

Suite 500

Alameda CA 94501

Project Name: Barber Yard

Project #: 1723

Workorder #: 2212042A

Dear Ms. Amy Robson

The following report includes the data for the above referenced project for sample(s) received on 12/1/2022 at Eurofins Air Toxics LLC.

The data and associated QC analyzed by TO-15 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics LLC. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Nazanin Khorrami at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Nazanin Khorrami

Project Manager

LABORATORY NARRATIVE
EPA Method TO-15
Cameron-Cole
Workorder# 2212042A

Twenty-five 1 Liter Summa Canister samples were received on December 01, 2022. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode.

Receiving Notes

There were no receiving discrepancies.

Analytical Notes

All Quality Control Limit exceedances and affected sample results are noted by flags. Each flag is defined at the bottom of this Case Narrative and on each Sample Result Summary page. Target compound non-detects in the samples that are associated with high bias in CCV analyses have not been flagged.

Dilution was performed on sample BY-SG-14-15 due to the presence of high level non-target species.

The Relative Percent Difference (RPD) of the LCS/LCSD analyzed on 12/14/22 exceeded acceptance limits for 1,2,4-Trichlorobenzene.

Definition of Data Qualifying Flags

Ten qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

M - Reported value may be biased due to apparent matrix interferences.

CN - See Case Narrative.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

COVENANT TO RESTRICT USE OF PROPERTY

ENVIRONMENTAL RESTRICTION

LOUISIANA PACIFIC CORPORATION - CHICO SITE

Section 35, T22N, R1E, MDB&M USGS 7.5' Chico Quad

This Covenant and Agreement ("Covenant") is made by and between Louisiana Pacific Corporation ("Covenantor"), a Delaware Corporation, who is the owner of record of certain property situated in the City of Chico, County of Butte, State of California, described in Exhibit "A" attached hereto and incorporated herein by this reference ("the Property") and the California Department of Toxic Substances Control (the Department"). Pursuant to Civil Code section 1471(c), the Department has determined that this Covenant is reasonably necessary to protect present or future human health or safety or the environment as a result of the presence on the land of hazardous materials as defined in Health and Safety Code ("H&SC") section 25260. The Covenantor and the Department, collectively referred to as the "Parties", hereby agree that the use of the Property be restricted as set forth in this Covenant.

ARTICLE I

STATEMENT OF FACTS

- 1.01 The Property is a former remanufacturing facility located on approximately 136 acres at the end of 16th Street in the City of Chico, California. The Property is bound on the north and northwest by residential areas within the city limits of Chico, the south and southwest by the Union Pacific Railroad and agricultural land, and the east by Estes Road and light industry.

Louisiana-Pacific Corporation (L-P Corp.) began a site investigation of the Property in 1989. The DTSC issued an Imminent and Substantial Endangerment Determination and Order for the Property in June 1991. The Order required L-P Corp. to conduct soil removal actions at several areas, and to complete a Remedial Investigation and Feasibility Study to support preparation of a Remedial Action Plan (RAP). Completion of the soil removal actions resulted in the majority of the onsite soil contamination being mitigated. Based on site information collected, three operable units were identified for further remediation in the RAP. These units include soil contamination of arsenic along 1.7 miles of onsite railroad track, groundwater contamination in the vicinity of the Concrete Impoundment (CI) area, and groundwater contamination in the vicinity of the Finished Wood Products Division (FWPD) area. This additional remediation was completed in accordance with the RAP and consisted of:

1. Excavating approximately 32,500 cubic yards of soil with arsenic concentrations in excess of 5.4 mg/kg from beneath the onsite railroad tracks and consolidation to a 2 acre onsite location, and capped with asphalt (the "Capped Property") The Capped Property is more particularly described in Exhibit "A" which is attached and incorporated by this reference. An Operation and Maintenance Agreement between the Parties will assure future maintenance of the cap.
2. Pumping and treating pentachlorophenol (PCP) contaminated groundwater to create a capture zone, treating the water with granular activated carbon to below 1 ug/l PCP, and discharging the treated water to an onsite dry well. Groundwater extraction, treatment, and monitoring continues in the vicinity of the CI. The groundwater extraction, treatment, and monitoring system is more particularly described in Exhibit "B" which is attached and incorporated by this reference. An Operation and Maintenance Agreement between the Parties will assure future operation and maintenance of the existing system.

Because arsenic and pentachlorophenol, which are hazardous substances as defined in Health and Safety Code ("H&SC") Section 25316, and which are also hazardous wastes as defined in H&SC Section 25117, and hazardous materials as defined in H&SC Section 25260, remain in the soil and groundwater in and under portions of the Property, the RAP provides that a deed restriction be recorded as part of the site remediation.

Arsenic and pentachlorophenol are carcinogens and are poisonous by ingestion. Human health risks are minimized by eliminating exposures by maintaining the asphalt cap over impacted soils and maintaining controls to ensure final mitigation of impacts to groundwater.

ARTICLE II

GENERAL PROVISIONS

- 2.01 Provisions to Run With the Land.** The Covenant sets forth protective provisions, covenants, restrictions, and conditions (collectively referred to as "Restrictions"), subject to which the Property and every portion thereof shall be improved, held, used, occupied, leased, sold, hypothecated, encumbered, and/or conveyed. Each and every Restriction: (a) runs with the land pursuant to H&SC section 25355.5(a)(1)(C); (b) inures to the benefit of and passes with each and every portion of the Property, (c) is for the benefit of, and is enforceable by the Department, and (d) is imposed upon the entire Property unless expressly stated as applicable only to a specific portion thereof.
- 2.02 Binding upon Successive Owners.** Pursuant to Civil Code section 1471(b), all successive owners of the Property are expressly bound hereby for the benefit of the Department.
- 2.03 Enforcement.** Failure of the Covenantor, Owner, or Occupant to comply with any of the Restrictions specifically applicable to it shall be grounds for DTSC, by reason of the Covenant, to require that the Owner modify or remove any Improvements constructed in violation of the Restrictions.

ARTICLE III

DEFINITIONS

- 3.01 DTSC.** "DTSC" shall mean the California State Department of Toxic Substances Control and shall include its successor agencies, if any.
- 3.02 Improvements.** "Improvements" shall mean all buildings, roads, driveways, regrading, and paved parking areas, constructed or placed upon any portion of the Property.
- 3.03 Occupants.** "Occupants" shall mean those persons entitled by ownership, leasehold, or other legal relationship to the right to occupy any portion of the Property.
- 3.04 Owner.** "Owner" shall mean the Covenantor, its successors in interest, and their successors in interest, including heirs, and assigns, who hold title to all or any portion of the Property.

ARTICLE IV

RESTRICTIONS APPLICABLE TO ENTIRE PROPERTY

- 4.01. Prohibited Activities.** No person shall remove or use any groundwater from the Property without prior written approval from the Department.
- 4.02. Non-Interference with Cap and Groundwater Extraction, Treatment, and Monitoring Systems.**
- (a) All uses and development of the Property shall preserve the integrity and physical accessibility of the Cap and the Groundwater Extraction, Treatment, and Monitoring Systems.
 - (b) Activities that may disturb the Cap or the Groundwater Extraction, Treatment, and Monitoring Systems shall not be permitted on the Property without prior review and approval by the Department.
 - (c) Covenantor shall notify the Department of each of the following: i) the type, cause, location and date of any damage to the Cap or the Groundwater Extraction, Treatment, and Monitoring Systems and (ii) the type and date of repair of such damage. Notification to the Department shall be made as provided below within ten (10) working days of both the discovery of any such disturbance and the completion of any repairs. Timely and accurate notification by any Owner or Occupant shall satisfy this requirement on behalf of all other Owners and Occupants.
- 4.03. Access for Department.** The Department shall have reasonable right of entry and access to the Property for inspection, monitoring, and other activities consistent with the purposes of this Covenant as deemed necessary by the Department in order to protect the public health or safety, or the environment.
- 4.04. Access for Implementing Operation and Maintenance.** The entities or persons responsible for implementing Operation and Maintenance of the Cap and the Groundwater Extraction, Treatment, and Monitoring Systems shall have reasonable right of entry and access to the Property for the purpose of implementing Operation and Maintenance until the Department determines that no further Operation and Maintenance is required.

ARTICLE V

RESTRICTIONS ON USE OF THE CAPPED PROPERTY

- 5.01 Prohibited Uses.** The Capped Property (as described in Exhibit A) is restricted to commercial or industrial use and shall not be used for other uses, including any of the following:
- (a) A residence, including any mobile home or factory built housing, constructed or installed for use as residential human habitation.
 - (b) A hospital for humans.
 - (c) A public or private school for persons under 21 years of age.
 - (d) A day care center for children.
- 5.02 Soil Management.** No excavation or removal off-site of any soils from the Capped Property shall be allowed without the prior approval of the Department. All excavated soils must be tested for any hazardous materials and managed in accordance with a Soil Management Plan and a Health and Safety Plan approved by the Department and all applicable provisions of state and federal law.

ARTICLE VI

CONVEYANCE OF PROPERTY

- 6.01 Conveyance of Property.** The Owner or Owners shall provide notice to DTSC not less than thirty (30) days after any sale, lease, or other conveyance of the Property, or an interest in the Property to a third person. DTSC shall not, by reason of the Covenant, have authority to approve, disapprove, or otherwise affect any sale, lease, or other conveyance of the Property except as otherwise provided by law, by administrative order, or by reason of this Covenant.
- 6.02 Incorporation Into Deeds and Leases.** Covenantor desires and covenants that the Restrictions set out herein shall be incorporated by reference in each and all deeds and leases of any portion of the Property.

VARIANCE AND TERMINATION

- ## ARTICLE VIII

To: Mr. Neil Sherman
Louisiana Pacific Corporation
P.O. Box 158 (#1 LP Drive)
Samoa, California 95564

Copy to: Department of Toxic Substances Control
Attention: James L. Tjosvold, P.E., Chief

Cleanup Operations Branch
10151 Croydon Way, Suite 3
Sacramento, California 95827-2106

Any party may change its address or the individual to whose attention a Notice is to be sent by giving written Notice in compliance with this paragraph.

- 8.03 Partial Invalidity.** If any portion of the Restrictions set forth herein or terms is determined to be invalid for any reason, the remaining portion shall remain in full force and effect as if such portion had not been included herein.
- 8.04 Article Headings.** Headings at the beginning of each numbered article of this Covenant are solely for the convenience of the parties and are not a part of the Covenant.
- 8.05 Recordation.** This instrument shall be executed by the Covenantor and by the Deputy Director, California Department of Toxic Substances Control. This instrument shall be recorded by the Covenantor in the County of Butte within ten (10) days of the date of execution.
- 8.06 References.** All references to Code sections include successor provisions.
- 8.07 Department References.** All references to the Department include successor agencies/departments or other successor entity.

IN WITNESS WHEREOF, the parties execute this Covenant as of the date set forth below.
