SUBJECT: UPDATE PHASE I ENVIRONMENTAL SITE ASSESSMENT

205 East Valley Boulevard (APN: 5369-018-002 & 020), San Gabriel, CA 91776

CURRENT REFERENCE REPORT/LETTER(S)	REPORT NO.	DATE(S) OF DOCUMENT	PREPARED BY
Phase I Report	**253116**	**9/30/2016**	**Robin Environmental Management**

Gentlemen:

Robin Environmental Management (REM), on behalf of the seller Mr. Gary Lai, conducted Phase I environmental site assessment (phase I). The results of phase I investigation was presented in REM's phase I environmental site assessment report dated September 30, 2016. Per your request, MTC Engineering, Inc. (MTC) have reviewed this report and searched the available update data; and a representative of MTC visited the project site on November 3, 2017 and found site conditions had no significant change since the phase I environmental investigation was conducted by Robin Environmental Management in September 2016 (REM). This update report has been conducted in response to the request of Hazaens Realty Group.

1. SITE CONDITIONS AND SITE VISIT

A representative of MTC performed the site visit on November 3, 2017 to update site conditions. Base upon our site visual inspection of the property, the site is presently a roughly "L"-shaped lot, which is a fenced mainly asphalt/concrete-paved yard used by building contractor for construction equipment/materials storage. At the southwestern portion of the site, there is concrete foundation for formerly onsite building and currently housing a trailer office for building contractor. The impermeable surface consisting of concrete/asphalt pavement almost covered the entire site. No pits, ponds, swamps, lagoons, or dry wells were observed on the subject site. Presently, Swinerton Builders, who is contractor responsible for building under construction Sheraton Hotel project at the northeastern corner of Valley Blvd and Palm Avenue, occupied the trailer office at the southwestern portions of the site as construction field office and site main yard for construction equipment/materials storage. In the REM report, at the northwestern corner of the site, there was an openmouth apparently self-made wood container with a horizontally lying 55-gallon form oil drum shelved on its top for dispensing form oil into small containers being used to apply (be brushed) on wood products. There was

also a 55-gallon drum containing form oil on asphalt-paved ground next to the open-mouth wood container. Certain staining was noticed on asphalt pavement around this open-mouth wood container.

It should be noted that the form oil (Not a hazardous material, which is used for removal of the forms after concrete cured) addressed in the referenced REM Phase I report had been removed offsite and were verified by a MTC's field inspector on November 16, 2017 during site check.

1.1. Air Quality

No unusual smells, obnoxious odors, or visual emissions were observed during the inspection of the subject property. Neither air emission stacks nor paint booth were present, thus no pertinent permits were searched for the previous records of violation history and in our recent site check.

1.2. Asbestos-Containing Material (ACM)

Since the subject lot is currently with no permanent improvement structures, asbestos containing building materials are not one of environmental concerns.

1.3. Lead-Based Paint (LBP)

Since no permanent improvement structures are situated on the subject site, lead-based paint is not a potentially environmental concern either.

1.4. Polychlorinated Biphenyl (PCB's)

PCBs were commonly used as dielectric fluids in transformers, capacitors, and light ballasts prior to 1978. Due to their demonstrated toxicity and persistence in the environment, PCB manufactured in the United States was discontinued. Pole- or pad-mounted transformers were found in the vicinity of the subject site. They appear in good conditions without any sign of leakage. No PCB-containing hydraulic fluid trash compactor was noticed present on the subject site.

1.5. Underground and Above Ground Storage Tanks (UST and AST)

The visual inspection of the subject site revealed no evidence of surface or above ground features (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, sumps, spill, containment device, leak detection device, etc.) normally associated with underground storage tanks (USTs) or above ground storage tanks (ASTs). Furthermore, no USTs or ASTs were ever used on the subject site based on the EDR search report.

1.6. Fuel Islands and Hydraulic Hoist Units

The visual inspection of the subject site revealed no evidence of fuel islands, dispensers underground hydraulic hoist units either in operation or abandoned within the subject site.

1.7. Hazardous Materials Storage & Handling

During previous site inspection by the **REM,** at the northwestern corner of the site, there was an open-mouth apparently self-made wood container with a horizontally lying 55-gallon form oil drum shelved on its top for dispensing form oil into small containers being used to apply (be brushed) on wood products. There was also a 55-gallon drum containing form oil on asphalt-paved ground next to the open-mouth wood container. Certain staining was noticed on asphalt pavement around this open-mouth wood container. The noticed staining does not appear would induce significant impact to the subsurface environment of the subject site. The form oils were removed offsite as aforementioned.

1.8. Other Containers

No other containers indicating any sign of environmental concern were observed during the site inspection.

No sign of contamination was found at the subject site. No significant potential contamination sources were found during our site visit. The site photos taken from our site visit are attached in Appendix A.

2. GOVERNMENT RECORD SEARCH

Governmental records search was conducted by Environmental Data Resources, Inc. (EDR) to identify adjacent contaminated properties, which may impact the subject site. The database of the search was compiled from available information from county, state, and federal government agencies. The results of the governmental records search are attached in **Appendix B** and are summarized as follows:

2.1. Historical Land Use, Tenant, and Business Operation

The following research data from EDR were utilized by MTC to analyze historic use of ownership of the subject property.

2.1.1. Historical Aerial Photo Records

Historic aerial photo records for the subject site included in **Appendix B** show that the site was occupied by dwelling prior to at least 1952. From prior to 1964 to at least 1994, the site was with a commercial building in its southwestern portion and its associated paved parking. From prior to 2002 on, the site has been generally with its current settings.

2.1.2. Site Occupancy History

The EDR-City Directory Abstract indicates that El Monte Community Schools used the subject property in 1950; and Peppi and Charlies Capri occupied the subject property in 1960; at least from 1966 to 1985 Nam's Cantonese Cuisine occupied the subject property. No records are

available from 1985 to present. The EDR Building permit report indicates that no building permits of the subject site were identified. The Certified Sanborn Map Report shows that fire insurance maps covering the target property were not found.

The building contractor Swinerton Builders who have been working for the Sheraton Hotel construction project across the Palm Avenue since September 15, 2000 stores construction equipment/materials on the subject site. The Swinerton Builders will move out by the end of December 2017 according to the project manager Mr. Thomas Dutcher (contact Tel: (714) 251-1900).

2.2. Historical Hazardous Substance Usage and Environmental Issues at the Subject Property and Its Vicinity

Under current environmental regulations government agencies may place an environmental lien on the property with known contamination and no cleanup/mitigation activities apparently intended being conducted by the site owner upon the agency issued the cleanup enforcement order. The EDR Environmental Lien and AUL Search and the EDR Radius Report with GeoCheck were used by MTC to evaluate the historical hazardous substance usage and its environmental issues at the subject site and its vicinity. The EDR Environmental Lien and AUL Search indicate that no environmental lien and other activity and use limitations for the subject property were found. A search of available environmental records from governmental environmental leading agencies and others was conducted for the subject property and its vicinity properties within 1-mile radius and reported by EDR in the EDR Radius Report with GeoCheck. The EDR Radius Map Report with GeoCheck indicates that the subject property was not listed in any of the database searched by EDR. The vicinity properties listed in the database are summarized as follows:

a) Five (5) sites within approximately 0.25 miles of the subject property were found in the Federal RCRA Genarators List. All of them are located at lower elevations than that of the subject site.

b) Two (2) sites between 0.25 and 0.5 miles from the subject site listed in the State- and Tribal-equivalent CERCLIS. One is located cross gradient of the subject site about 0.46 miles away. The other is located lower elevation of the subject site about 0.4 miles away.

c) There are ten (10) LUST sites within approximately 0.5 miles of the subject property in the State and Tribal Leaking Underground Tank lists. One of them is located cross gradient of the subject site about 0.47 miles away. The others are located lower elevations that that of the subject site.

d) There are four (4) SLIC sites within approximately 0.5 miles of the subject site. All of them are located lower elevations than that of the subject site.

e) There is one (1) UST site within approximately 0.25 miles of the subject site, which is listed in the State and Tribal Registered Storage Tank Lists. The site is located lower elevation of the subject site.

f) There is one (1) SWRCY site within approximately 0.25 miles of the subject site, which is located lower elevation than that of the subject site.

g) There is one (1) SWEEPS UST site within approximately 0.25 miles of the subject site, which is located lower elevation than that of the subject site.

h) There is one (1) HIST UST site within approximately 0.25 miles of the subject site, which is located lower elevation than that of the subject site.

i) There is one (1) RCRA NonGen / NLR site within approximately 0.25 miles of the subject site, which is located lower elevation than that of the subject site.

j) There are six (6) HIST CORTESE sites within approximately 0.5 miles of the subject site, which is located lower elevation than that of the subject site.

k) There are seven (7) WIP sites within approximately 0.25 miles of the subject site. One of them is located cross gradient of the subject site about 0.1 miles away, the others are located lower elevation than that of the subject site.

2.3. Physical Settings

2.3.1. Topographic Information

EDR Topographic Map Library has been searched by EDR and historical United States Geological Survey (USGS) 7.5 and 15 Minute Topographic Maps covering the subject property location were provided in EDR Historical Topo Map Report attached in **Appendix B**. The historical USGS Topo Maps showed historical physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings. The historical USGS Topo Maps were used as Standard Physical Setting Sources to evaluate historical ground surface features and topographic gradient. The surface elevation of the subject site is approximately 336 feet above Mean Sea Level with a very gradual topographic down gradient generally towards south-southeast.

2.3.2. Geologic Settings

The San Gabriel Valley is a sediment-filled, east-trending structural trough situated along the southern flank of the San Gabriel Mountains. The San Gabriel Mountains are a major component of the Transverse Ranges geomorphic province of California and are comprised largely of plutonic and metamorphic rocks. Surficial geologic units include late Quaternary alluvial and fluvial sedimentary deposits and artificial fill. Based on the Seismic Hazards Zones Report 024-El Monte Quadrangle, these deposits around the subject site consist of varying amounts of sand, gravel, and silt layers that are incorporated within large, composite alluvial fans associated with the Alhambra, Rubio, Eaton, Arcadia, Santa Anita, and Sawpit washes.

2.3.3. Hydrogeologic Information

Based on the Seismic Hazards Zones Report 024-El Monte Quadrangle, historically groundwater generally flowed towards southeast. Depth to groundwater at the subject site is approximately 50 feet in accordance with the historically highest groundwater contours (plate 1.2). State Department of Water Resource Database indicates that depth to groundwater was 308.64 feet measured on July 3, 2013 in the State well (340925N1181304W001), which is located approximately 1.8 miles northwest of the subject site. EDR local/regional water agency records provide water well information and available groundwater monitoring results within 1 mile of the subject site. There are 6 Federal USGS wells and 15 State Database Wells in between ¼ and 1 mile to the subject site, and 2 State Oil/Gas wells were found in the State Oil/Gas Well Database between 0.5 miles to 1 mile to the subject property. No well was found on the site. Based on the available groundwater data, among all of contaminants of concern only tetrachloroethylene (PCE) higher than the State maximum concentration level was detected in State well (01S/12W-12K01S), which is located east-northeast of the subject site about ½ to 1 mile. However, the subject site is situated on the San Gabriel Groundwater Basin which has been classified by U.S. EPA as National Priority List (NPL) Cleanup site. In 1984 Federal EPA placed the San Gabriel Valley groundwater Basins on EPA's National Priority List of hazardous waste sites, making it eligible for cleanup funding under the federal Superfund program. Presently, U.S. EPA funds the cleanup of groundwater within this basin. U.S. EPA also funds the California Regional Water Quality Control Board-Los Angeles Region (RWQCB-LA) Follow-Up (or Well Investigation) Program to identify potential responsible parties (PRP's) for the regional groundwater degradation to share financial burden of costly cleanup. Historic site usage information search has been used by the RWQCB-LA Well Investigation Program (WIP) as a tool to identify sites within the San Gabriel Valley with past on-site manufacturing or business operations potentially using trichloroethylene (TCE) and PCE. Based on 2017 San Gabriel Valley Groundwater Cleanup Progress Report prepared by EPA Region 9 Superfund Program, the subject site is not within any plumes of dissolved phase volatile of compounds (VOC).

2.4. Radon

Radon can be generated from earth and rock beneath building structures, well water, and building materials themselves. Though there is no immediate health effect, it is considered to increase approximately 10% of lung cancer deaths in the United States. It is estimated national average is 1.5 picocuries per liter of air. However, levels as high as 200 picocuries per liter can be detected in some commercial buildings. According to the California-EPA Maps of Radon Zones, Los Angeles and Riverside County is classified as a "Zone 2" county having a predicted average screening level between 2-4 picocuries per liter of air. If indoor-air testing indicates radon levels exceeding 4 picocuries per liter, the U.S. EPA recommends remediation actions be considered. However, since there is no permanent closure space on the site and the subject site is located within a "Zone 2", Radon is not considered as a necessary component to be tested.

3. INTERVIEW WITH RELATED PERSONNEL

The property owner and site operator, the Swinerton Builders project manager Mr. Thomas Dutcher (contact Tel: (714) 251-1900) were contacted and/or interviewed during our field visit. on November 16, 2017. No known unauthorized releases have occurred since 2000.

4. DISCUSSION

Based on the results of data search, the subject site is not listed in any environmental database, and none of the listed environmental sites are located up gradient of the subject site either. The possibility of the hazardous substance to migrate from the listed environmental sites to the subject site via gravity drain or surficial runoff is very low.
According to Lawrence Livermore National Laboratory / University of California Reports on Leaking Underground Fuel Tanks (LUFT's), approximately ninety percent of dissolved petroleum products are found less than 280 feet in distance from the origination source, and most of these plumes are either stable or decreasing in distance. And seventy percent of the plume is in shallow groundwater less than 25 feet below the ground surface. However, the depth to groundwater at subject site is at least 50 feet and no known plumes are underneath the subject site based on available data, therefore, the health risk induced by contaminated groundwater is low.

Based on the detail map of EDR radius map report, only one vicinity site within 300 feet of the subject site, which address is 123 East Valley Boulevard, historically ever had an environmental issue although the case was closed on July 6, 2010. The potential contaminants of concern were TCE and PCE in soils at the vicinity site. TCE and PCE concentrations in soils were not reported or not posted on the GeoTracker database. The vicinity site is located approximately 100 feet to the subject site and lower elevation than that of the subject site. The possibility which the contaminants of concern TCE and PCE migrate to the subject site via soil media is very low.

Since historically there were buildings on the subject site although they had been demolished, the lead-based paint might be ever used for the previous building. It is possible that the elevated lead concentration in the onsite soil.

5. CONCLUSIONS AND RECOMMENDATIONS

Based on the updated information obtained from our review of available public records, site visit and interviews of the related people, MTC's conclusions and recommendations are as follows:

a) Under applicable federal and state environmental laws, the subject site presents a low level of risk in terms of the potential presence of the significant contamination issue resulting from hazardous materials.

b) There is a low likelihood that the site has been adversely impacted from onsite and/or offsite contamination sources.

c) Based on the reviewing of available soil, geology, and groundwater information, the potential possibility that offsite contamination from the reported sites impacts to the subject site is low.

d) No significant evidence of environmental concern was observed on the site. It is our opinion that no further investigations are necessary. But per the buyer's request, phase II investigation may be conducted to clarify any potential environmental issues for contaminants of concern TCE, PCE, and lead in onsite soils.

6. LIMITATIONS

This update report was prepared in accordance with generally accepted standards of technical practice for determination at the site.

Finding, conclusions and recommendations of this report with respect to hazardous waste potential are limited to the scope of work performed, and professional judgment concerning the significance of the data gathering during MTC's investigation, this report is not and should not be considered as a warranty or guarantee about the presence or absence of hazardous contaminants which may affect the subject site.

This update report including Phase I Environmental Site Assessment report has been prepared for the exclusive use of **Hazens Realty Group** and its representative for this specific project, and should not he used by' other parties without written consent of MTC.

We sincerely appreciate this opportunity to be of service. Should you have any questions pertaining to this report, please call the undersigned.

Respectfully submitted,

— 30 — Depth to ground water in feet

ONE MILE

SCALE

Sources of Contamination

The groundwater contamination is the result of decades of poor chemical handling and disposal practices by hundreds of industrial facilities. Most of the activities that led to the contamination probably occurred between the 1940s and 1970s, before the Superfund program was established and other environmental laws were adopted.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

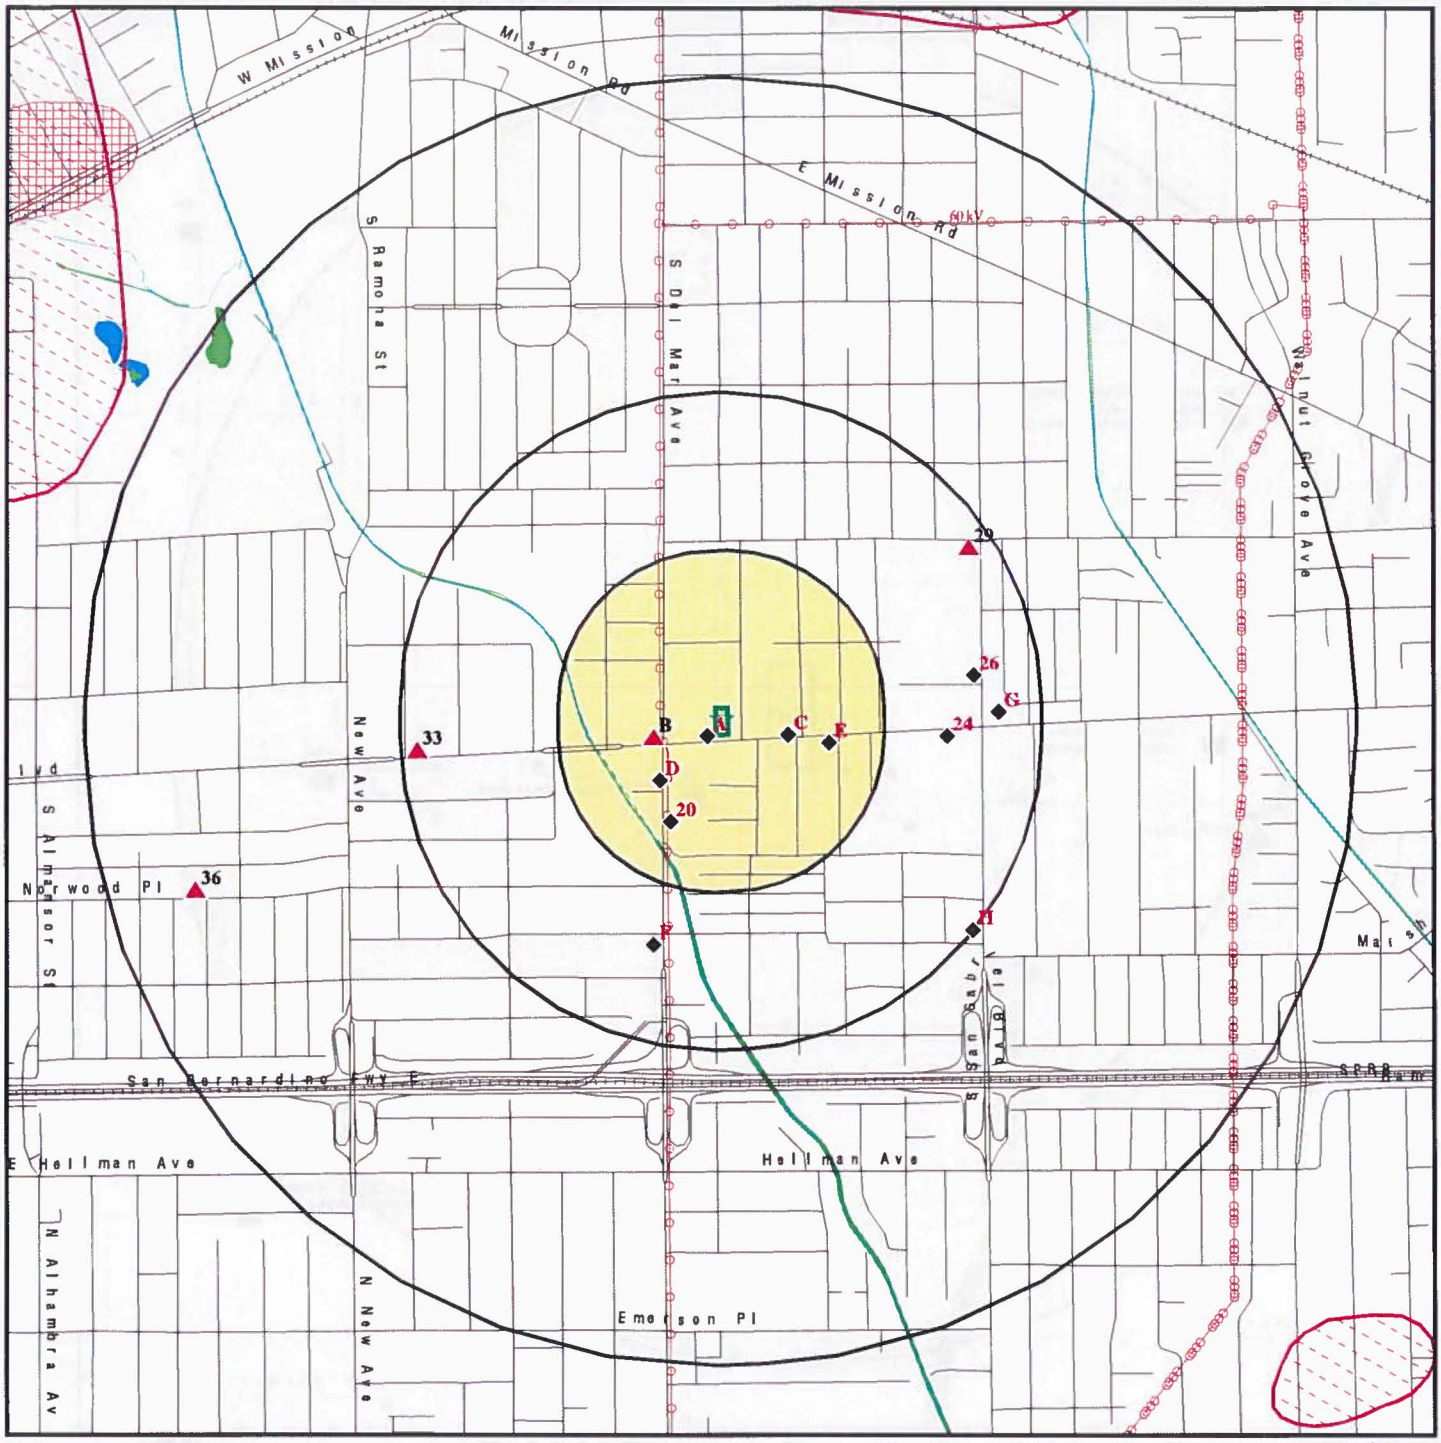

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/13/2017

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

205 E VALLEY BLVD
205 E VALLEY BLVD
SAN GABRIEL, CA 91776

TARGET PROPERTY COORDINATES

Latitude (North):	34.080274 - 34° 4' 48.99"
Longitude (West):	118.097973 - 118° 5' 52.70"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	398695.4
UTM Y (Meters):	3771406.0
Elevation:	337 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

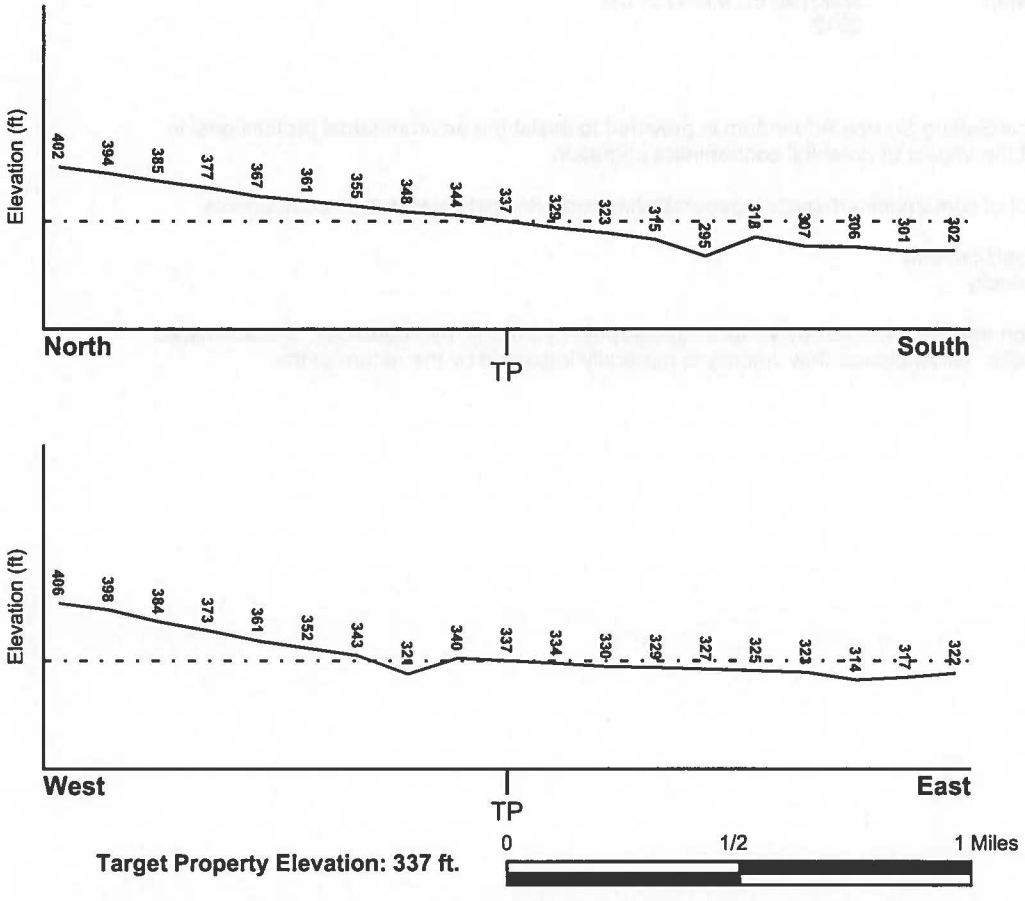

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1675F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL MONTE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

CA WELLS **1459**

Water System Information:

Prime Station Code:	01S/12W-12C01 S	User ID:	4TH
FRDS Number:	1910144007	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Untreated
Source Lat/Long:	340500.0 1180600.0	Precision:	Undefined
Source Name:	WELL 09		
System Number:	1910144		
System Name:	SAN GABRIEL CWD		
Organization That Operates System:			
	P.O. BOX 2227		
	ROSEMEAD, CA 91770		
Pop Served:	45000	Connections:	8559
Area Served:	SAN GABRIEL		

Sample Collected:	04-JAN-12	Findings:	23. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10-JAN-12	Findings:	22. MG/L

CA WELLS **1344**

Water System Information:

Prime Station Code:	01S/11W-07N01 S	User ID:	4TH
FRDS Number:	1910139014	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340500.0 1180500.0	Precision:	Undefined
Source Name:	ROSEMEAD (1957)		
System Number:	1910139		
System Name:	CAL. AMERICAN WATER CO.-SAN MARINO		
Organization That Operates System:	2020 HUNTINGTON DRIVE SAN MARINO, CA 91108		
Pop Served:	49353	Connections:	13902
Area Served:	SAN MARINO		
Sample Collected:	03-DEC-12	Findings:	2.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	04-DEC-12	Findings:	2.8 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	04-DEC-12	Findings:	2.8 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	04-DEC-12	Findings:	30. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02-JAN-13	Findings:	2.3 UG/L

CA WELLS **1471**

Water System Information:

Prime Station Code:	01S/12W-24D01 S	User ID:	4TH
FRDS Number:	1910001014	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340400.0 1180600.0	Precision:	Undefined
Source Name:	WELL 15		
System Number:	1910001		
System Name:	ALHAMBRA-CITY, WATER DEPT.		
Organization That Operates System:	111 SOUTH FIRST STREET ALHAMBRA, CA 91801		
Pop Served:	86300	Connections:	15956
Area Served:	ALHAMBRA		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	02-OCT-12	Findings:	1. UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	02-OCT-12	Findings:	28. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08-OCT-12	Findings:	22. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	15-OCT-12	Findings:	19. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	15-OCT-12	Findings:	270. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	22-OCT-12	Findings:	16. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05-NOV-12	Findings:	14. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12-NOV-12	Findings:	15. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	19-NOV-12	Findings:	21. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	26-NOV-12	Findings:	12. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03-DEC-12	Findings:	12. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10-DEC-12	Findings:	11. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04-FEB-13	Findings:	23. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	04-MAR-13	Findings:	15. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11-MAR-13	Findings:	9.8 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01-APR-13	Findings:	24. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03-APR-13	Findings:	0.56 MG/L
Chemical:	FLUORIDE (F) (NATURAL-SOURCE)		
Sample Collected:	03-APR-13	Findings:	14. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08-APR-13	Findings:	9.9 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	15-APR-13	Findings:	360. US
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	15-APR-13	Findings:	7.84
Chemical:	PH, LABORATORY		
Sample Collected:	15-APR-13	Findings:	140. MG/L
Chemical:	ALKALINITY (TOTAL) AS CACO3		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	15-APR-13	Findings:	180. MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	15-APR-13	Findings:	98. MG/L
Chemical:	HARDNESS (TOTAL) AS CACO3		
Sample Collected:	15-APR-13	Findings:	27.6 MG/L
Chemical:	CALCIUM		
Sample Collected:	15-APR-13	Findings:	7.12 MG/L
Chemical:	MAGNESIUM		
Sample Collected:	15-APR-13	Findings:	35. MG/L
Chemical:	SODIUM		
Sample Collected:	15-APR-13	Findings:	1.8 MG/L
Chemical:	POTASSIUM		
Sample Collected:	15-APR-13	Findings:	20. MG/L
Chemical:	CHLORIDE		
Sample Collected:	15-APR-13	Findings:	20. MG/L
Chemical:	SULFATE		
Sample Collected:	15-APR-13	Findings:	0.56 MG/L
Chemical:	FLUORIDE (F) (NATURAL-SOURCE)		
Sample Collected:	15-APR-13	Findings:	210. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	15-APR-13	Findings:	0.558
Chemical:	LANGELIER INDEX @ 60 C		
Sample Collected:	15-APR-13	Findings:	6.2e-002
Chemical:	LANGELIER INDEX AT SOURCE TEMP.		
Sample Collected:	15-APR-13	Findings:	10. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	15-APR-13	Findings:	11.8
Chemical:	AGGRSSIVE INDEX (CORROSIVITY)		
Sample Collected:	15-APR-13	Findings:	2200. MG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	22-APR-13	Findings:	10. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06-MAY-13	Findings:	9.7 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	13-MAY-13	Findings:	9.4 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	20-MAY-13	Findings:	10. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03-JUN-13	Findings:	10. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10-JUN-13	Findings:	10. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	17-JUN-13	Findings:	8.6 MG/L
Chemical:	NITRATE (AS NO3)		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	24-JUN-13	Findings:	11. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01-JUL-13	Findings:	11. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	15-JUL-13	Findings:	9.5 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	22-JUL-13	Findings:	11. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	05-AUG-13	Findings:	9.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	12-AUG-13	Findings:	9.4 MG/L

SUBJECT: PHASE II ENVIRONMENTAL SITE ASSESSMENT
205 East Valley Boulevard (APN: 5369-018-002 & 020)
San Gabriel, CA 91776

Gentlemen:

Per your request, MTC Engineering, Inc. (MTC) has performed an Environmental Phase II Investigation at the subject site. The purpose of this investigation was to reveal any potential environmental issues in surface and subsurface soils at the subject site. The accompanying environmental investigation report presents the findings and conclusions and recommendations of this investigation. .

We appreciate the opportunity for providing the professional service. If you have any questions regarding this report, please do not hesitate to contact us.

Respectfully submitted,
MTC ENGINEERING, INC.

MTC Engineering, Inc.
5924 TEMPLE CITY BLVD., TEMPLE CITY, CA 91780 / Toll Free: 1-888-MTC-ENGR

INTRODUCTION

As requested, MTC Engineering Inc. has performed an environmental phase II investigation at the subject site (**Figure 1**). The purpose of this investigation was to evaluate the on-site soil conditions regarding the environmental contamination for the property transaction.

1. SCOPE OF WORK

The followings have been performed for this environmental phase II investigation:

a) Site check and review of pertinent reports available. A site vicinity map is shown on **Figure 1**.

b) Drilling, logging, and sampling of two (2) borings at selected locations using direct push rig as shown on **Figure 2**. The boring logs are shown in **Appendix A**.

c) Laboratory testing of soil samples to determine their chemical test results. Laboratory analytical results are shown in **Appendix B**.

d) Preparation of this environmental Phase II report to present the findings and conclusions of this investigation.

2. SITE CONDITIONS

The subject site, 205 East Valley Boulevard (APN 5369-018-002 & 020), is a roughly "L"-shaped lot engulfing north-south trending rectangular 209-217 E Valley Blvd strip shopping center at the northwestern corner of (the east-west trending) Valley Boulevard and (the north-south trending) Palm Avenue to its southeast. The site is a fenced mainly asphalt/concrete-paved yard used by a building contractor. The subject site is bounded by commercial buildings on the west and north, by the Valley Boulevard on the south, and by the Palm Avenue and commercial buildings on the east.

The building contractor Swinerton Builders who have been working for the Sheraton Hotel construction project across the Palm Avenue since September 15, 2000 stores construction equipment/materials on the subject site. The Swinerton Builders will move out by the end of December 2017 according to the project manager Mr. Thomas Dutcher (contact Tel: (714) 251-1900). It should be noted that the form oil (Not a hazardous material, which is used for removal of the forms after concrete cured) addressed in the referenced Phase I report had been removed offsite and were verified by a MTC's field inspector on November 16, 2017 during site check.

Based on the results searched by the Environmental Data Resources, Inc.(EDR), the site is at an elevation of approximately 336 feet above the mean sea level. Based on the Seismic Hazards Zones Report 024-El Monte Quadrangle, historically groundwater generally flowed towards southeast. Depth to groundwater at the subject site is approximately 50 feet in accordance with the historically highest groundwater contours (**plate 1.2**).

3. FIELD EXPLORATIONS

Two borings were drilled onsite at selected locations on November 13, 2017. The soil borings were drilled by track-mounted direct push rig, which was operated by Kehoe Testing & Engineering, Inc., a licensed drilling contractor (C-57 licensed #786163). The stainless drive rod was equipped a soil sampler with a 2-foot long and 1.1-inch diameter acetate liner. The clear polymer liner was cut using a hacksaw. Teflon sheets along with vinyl caps were used to seal the soil sample. The sampler was decontaminated and a new liner was installed in the sampler in preparation for the next sampling interval. The sampler and drive rod string is then advanced to the next sampling interval. Soil samples were collected in 0.5 and 6, 11, 16, 21, 26, and 31 feet. The samples were sealed in Ziploc bags, stored in ice chest cooled with Blue Ice, and delivered to CHEMTEK Environmental Laboratories (a California State certified lab) for testing with Chain of Custody as **Appendix B**.

4. EARTH MATERIALS

The earth materials encountered during subsurface exploration consisted of asphalt concrete pavement, fill, and native soils. Approximately 2 to 3 inches of asphalt concrete pavement were on the ground surface.

4.1. FILL (AF)

Fill soils encountered from bottom of asphalt concrete pavement to 1.5 feet below ground surface (bgs) consisted of dark brown silty fine sand in moist and moderately dense conditions.

4.2. NATIVE SOIL (NS)

Native soil encountered from 1.5 to 31 feet bgs (the maximum depth explored) consisted mainly of light olive brown to light creamy brown to light gray brown silty fine sand in moist and moderately dense to dense conditions.

4.3. GROUNDWATER

No groundwater was encountered in any of the borings. Based on available documents, depth to groundwater has a minimum of 50 feet bgs.

5. CONCLUSIONS AND RECOMMENDATIONS

MTC has completed a Phase II Environmental Investigation at the site. Two soil borings were drilled at selected locations and soil samples were collected at depths of 0.5, 6, 11, 16, 21, 26, and 31 feet. Lead concentrations in soil samples B1@0.5' and B2@0.5' were analyzed using US EPA Method 6010B. Volatile organic compounds (VOCs) full scan was analyzed for soil samples B1@6.0', B1@11.0', B1@16.0', B2@6.0', B2@11.0', and B2@16.0' using US EPA Method. Soil samples B1@21.0', B1@26.0', B1@31.0', B2@21.0', B2@26.0', and B2@31.0' were put on-hold pending on the analytical results of VOCs in soil samples B1@6.0', B1@11.0', B1@16.0', B2@6.0', B2@11.0', and B2@16.0'. The lab analytical results are included in Appendix B.

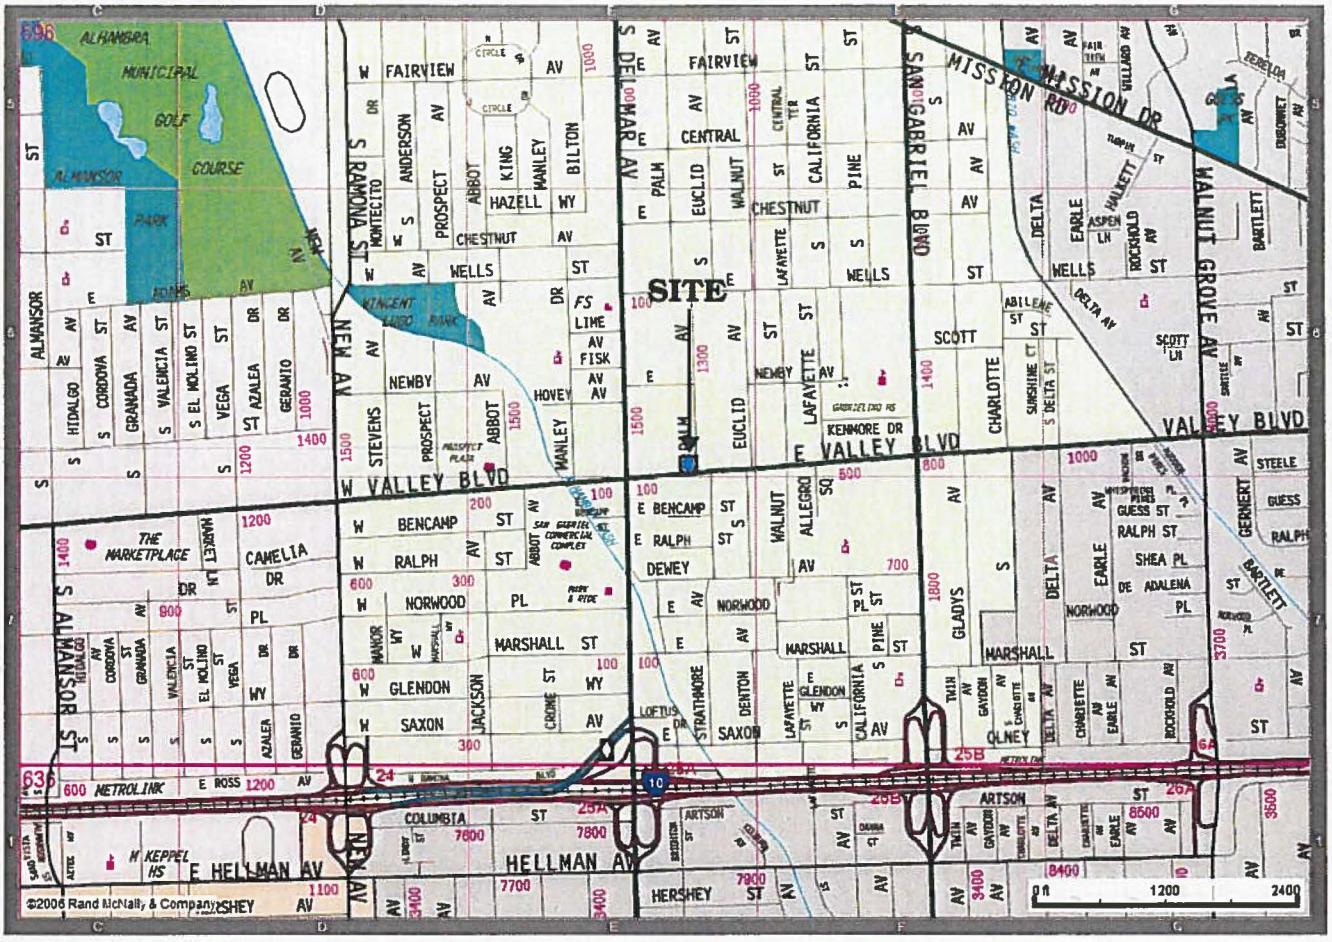

Based on the laboratory analytical results, none of VOCs was detected over reporting detectable limits in all of designated soil samples. Lead concentrations were 33.8 and 21.6 mg/kg detected in B1@0.5' and in B2@0.5', respectively. Based on the revised California Human Health Screening Level (CHHSL) for lead (2009), the screening levels of lead in soils are respectively 80 mg/kg for residential CHHSL and 320 mg/kg for commercial/industrial CHHSL. The detected lead concentrations in both soil samples are below the CHHSL criteria. In another word, VOCs and lead in soils are not compounds of concern for the residential and/or commercial development based on the lab analytic results.

It is our opinion that further environmental investigation is not recommended.

6. LIMITS AND LIABILITY

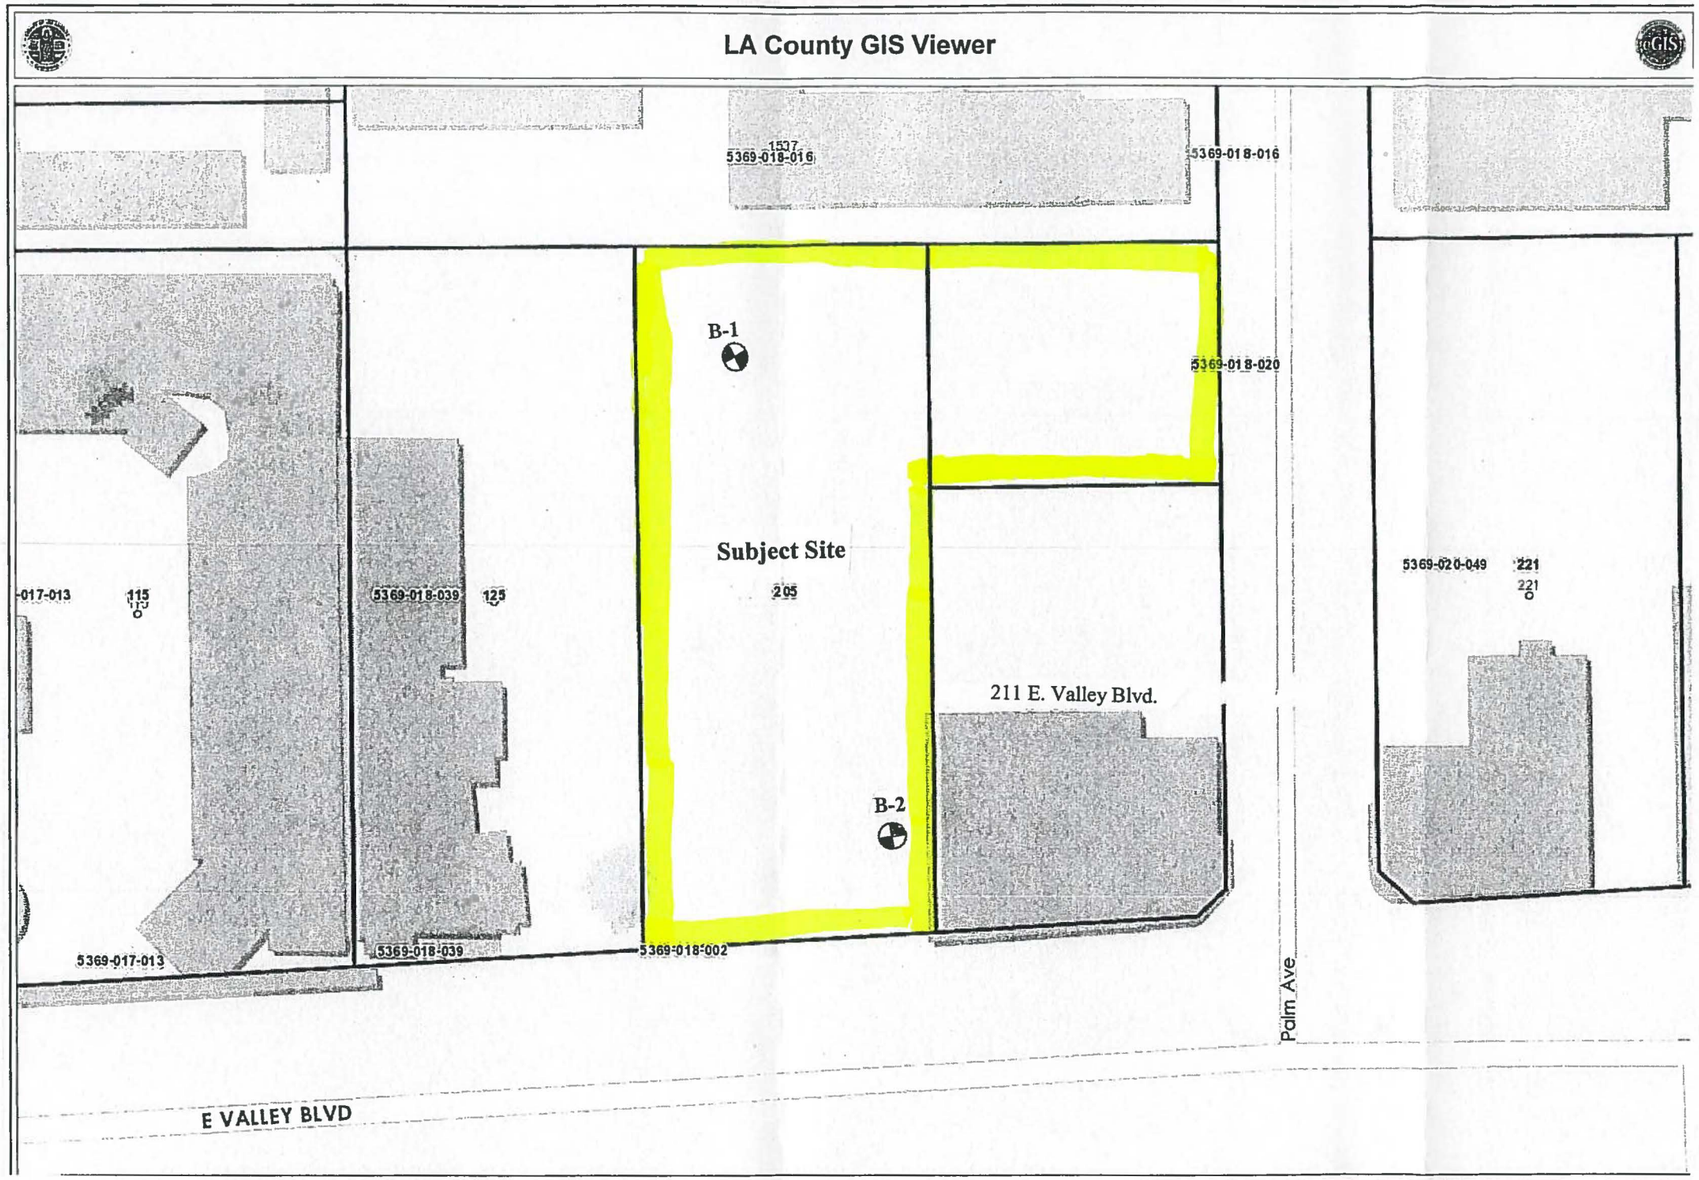

The conclusions and recommendations submitted in this report are based on our data research, subsurface exploration, laboratory analysis, and regulatory criteria. The findings, conclusions and recommendations in this report are considered valid as of the present date. However, changes in the conditions of the property can occur with the passage of time, due to natural process or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standard may occur. MTC is not responsible for all conditions found at or beneath the subject property or adjacent properties. Accordingly, portions of this report may be invalidated wholly or partially by the changes beyond our control.

This report is prepared for the exclusive use of the client, and opinions/recommendations contained in this report apply only to conditions existing when services were performed and are intended only for the client, purposes, locations, time frames, and project parameters indicated. No other warranties either expressed or implied are made as to the professional advice provided under the terms of this report.
