1 Executive Summary

Dudek conducted a Phase I Environmental Site Assessment (ESA) for 400 East Rolling Oaks Drive in Thousand Oaks, California (subject property); see Figure 1, Subject Property Location. The subject property is currently vacant and was historically developed as a preschool/child development center with a playground, ballcourt, swimming pool, and parking lot. The subject property is comprised of two parcels totaling 4.75 acres identified by Assessor Parcel Numbers (APNs) 681-0180-275 and 681-0180-265.

Information gathered for this report indicated the following:

- According to building permit records and historical sources (Section 8), the site was first developed in 1973 as a preschool facility with a school, swimming pool, ballcourt, playground, and parking lot. The building was demolished, and the pool filled in with soil in 2018. The building foundation, ballcourt, filled in pool, and various walkways remain on the subject property.
- The subject property operated as a preschool facility from 1975 through 2017. The subject property has been vacant since 2018.
- A total of 13 release sites were reported within a ½ mile of the subject property. Of these, 12 were related to leaking underground storage tanks (LUST) and one related to illegal dumping on a nearby property. All 13 sites have a closed regulatory status and are assumed to be downgradient from the subject property. As such, these sites are unlikely to impact the environmental condition of the subject property.
- According to a Proposition 65 Spill Report, dated May 8, 1992 and included in agency records reviewed, 1 to 15 gallons of gasoline were poured onto the parking lot at the subject property. The gasoline was reported to have evaporated, and no action was taken. Given the de minimis spill volume and age, environmental impacts to the subject property are unlikely.

This assessment revealed no evidence of RECs, historical RECs, controlled RECs, or significant data gaps in connection with the subject property.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21). This report summarizes the research and findings of the Phase I ESA. Data gaps, which were determined not to be significant, are discussed in Section 13, Limitations.

The following non-ASTM-scope considerations were identified:

- Vinyl floor tiles and associated mastic were observed on the remaining concrete building slab on the subject property. Many building materials commonly contained asbestos until the late 1970s, and a smaller list of building materials contained asbestos in the 1980s. A full ban on asbestos products didn't occur until 2019. Therefore, based on the date the previous building was constructed (1973), there is a potential for asbestos-containing materials to be present in associated building materials.

Subject Property Location

400 East Rolling Oaks Boulevard Phase I Environmental Site Assessment

2 Introduction

This Phase I Environmental Site assessment (ESA) was performed according to the guidelines stipulated in the ASTM Standard E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM 2021). This Phase I ESA is being conducted on behalf of City of Thousand Oaks as part of environmental due diligence associated with the redevelopment of the subject property.

2.1 Assessment Procedure and Scope of Investigation

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews federal (U.S. Environmental Protection Agency [EPA]), state, county, and local lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consisted of (1) a reconnaissance of the subject property; (2) a search of regulatory agency records; (3) a review of available historical aerial photographs, topographic maps, Sanborn fire insurance maps, city directory listings, and building department records; (4) interviews with the owner of the subject property and user of this report; and (5) preparation of this Phase I ESA report detailing the findings of the investigation.

These activities were conducted to identify recognized environmental conditions (RECs). The term *recognized environmental condition* means the presence or likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release, likely release, past release, or material threat of a future release to the environment.

The term *controlled recognized environmental condition* (CREC) is an environmental condition that would have been considered a REC in the past but that has been remediated and received risk-based closure by a regulatory agency (i.e., received a “no further action” letter) where residual contamination remains in place. Furthermore, the term *CREC* is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls) due to residual on-site contamination.

The term *historical recognized environmental condition* (HREC) is an environmental condition that would have been considered a REC in the past but that has been remediated and received unrestricted residential use closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

The term *REC* is not intended to include de minimis conditions. De minimis conditions are conditions that generally do not present a material risk of harm to public health or the environment and thus would not be subject to an enforcement action if brought to the attention of governmental agencies.

2.2 Qualifications of Environmental Professionals

This Phase I ESA was prepared by Brandon Page, hydrogeologist and Nicole Peacock, senior environmental engineer. Qualifications for Mr. Page and Ms. Peacock are included in Appendix A.

I, Nicole Peacock, declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of Title 40 of the Code of Federal Regulations, Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in Title 40 of the Code of Federal Regulations, Part 312.

3 Site Location

The subject property is located at 400 East Rolling Oaks Drive in Thousand Oaks, Ventura County, California. The subject property is currently vacant with the foundation/slab of a former preschool facility, a soil-filled swimming pool, former playground area and ballcourt, and parking lot. The subject property is comprised of 4.75 acres on two parcels identified by APNs 681-0180-275 and 681-0180-265. Subject property features are shown on Figure 2.

The subject property is bounded on the north by East Rolling Oaks Drive and a medical center; on the east by an electric transmission line and a residential property; on the south by undeveloped property; and on the west by Los Padres Drive and medium-density residential properties. Surrounding properties include a multi-building medical center complex and US 101 to the north; low-density residential properties to the east and south; and low- to medium-density residential properties to the west.

FIGURE 2

Subject Property Features

400 East Rolling Oaks Boulevard Phase I Environmental Site Assessment

4 Environmental Setting

4.1 Topography and Geology

The subject property is located in south-central Thousand Oaks, approximately 0.15 miles south of US 101, along the northern edge of the Santa Monica Mountains.

General topographic information for the subject property and the surrounding area was obtained from a review of topographic maps (Appendix B), the Environmental Data Resources (EDR) Radius Map Report (Appendix C), and a site visit. The southern portion of the subject property consists of a moderately sloped hill grading into a relatively flat area on the northern portion. There is an overall northwestern downward gradient. The subject property sits at an average elevation of 839 feet above mean sea level.

No subsurface geologic investigations were performed as part of this Phase I ESA. According to the EDR Radius Map Report (Appendix C), the subject property is underlain by the Azule gravelly loam in the northern flat portion and the Gilroy clay loam in the southern sloped portion. Both soils are characterized as having slow infiltration rates and being well drained.

4.2 Groundwater

According to the EDR Radius Map Report, 193 water wells are located within 1 mile of the subject property. No groundwater wells were mapped on the subject property. During the site reconnaissance Dudek did not observe any wells located on the subject property. Of the 193 wells within 1 mile of the subject property, 176 are monitoring wells, one is an irrigation well, and 16 have unknown uses. No public supply or municipal wells are mapped within 1 mile of the subject property.

The nearest cluster of groundwater monitoring wells are located approximately 2,000 feet west of the subject property at the intersection of East Rolling Oaks Drive and South Moorpark Road. There are 4 monitoring wells in this cluster that were installed during a leaking underground storage tank (LUST) investigation at a former 76 Station. According to information on GeoTracker, groundwater flow near this first cluster of wells was determined to be toward the northeast during the last quarterly monitoring event completed in June 2006; groundwater depths ranged from 24.96 feet below ground surface (ft bgs) to 29.15 ft bgs during the June 2006 monitoring event (TRC, 2006). A separate cluster of wells located approximately 2,000 feet north-northeast of the subject property along East Thousand Oaks Boulevard were installed during a LUST investigation at a former gas station. According to information available on GeoTracker, groundwater near this second cluster of 18 wells was determined to flow toward the west during the last quarterly monitoring event completed in March 2013. Depths to groundwater in these 18 wells varied from 5.78 ft bgs to 11.31 ft bgs during the March 2013 monitoring event (Hayden, 2013).

4.3 Agricultural Use

The subject property is not currently used for agricultural purposes. Historical resources (see Section 8) indicate the subject property has not been used for agricultural purposes since at least 1947.

5 Public Agency Records Search

The regulatory database search gives a listing of sites within up to a 1-mile radius of the subject property ("target property" is the term used by EDR) that are known to be chemical handlers or hazardous waste generators or have reported releases of hazardous substances or petroleum products. Information in these listings includes the location of the site relative to the subject property, type of potential environmental concern present, and the status of the site. On November 9, 2022, EDR provided the database search for this Phase I ESA.

Table 1 summarizes databases that were searched and provide information on hazardous materials and petroleum products on or near the subject property. The comprehensive list of databases is included in the EDR Radius Map Report (Appendix C).

The following sections list the databases that were searched and search distances from the subject property, as well as the number of sites identified.

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Subject Property Listed?	Number of Surrounding Sites Listed
NPL	National Priorities List (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL	Sites proposed for NPL	1 mile	No	0
Delisted NPL	NPL Deletions	1 mile	No	0
CERCLIS – Federal Facility	Comprehensive Environmental Response, Compensation, and Liability Information System for the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) with U.S. Environmental Protection Agency Federal Restoration and Reuse Office involvement	0.5 miles	No	0
CERCLIS – SEMS	CERCLA Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP (SEMS ARCHIVE)	No Further Remedial Action Planned – CERCLA SEMS Archive	0.5 miles	No	0
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	0
RCRA TSDF	RCRA – Transportation, Storage, and Disposal Facilities	0.5 miles	No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	1
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	1
RCRA-VSQG	RCRA Very Small Quantity Generators	0.25 miles	No	0
ERNS	Emergency Response Notification System	Target property	No	0
LUCIS	Land Use Control Information System – Institutional Control/Engineering Control	0.5 miles	No	0

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Subject Property Listed?	Number of Surrounding Sites Listed
US ENG CONTROLS	Federal sites with Engineering Controls	0.5 miles	No	0
US INST CONTROLS	Federal sites with Institutional Controls	0.5 miles	No	0
RESPONSE	State- and Tribal-Equivalent CERCLIS – Confirmed Release List	1 mile	No	0
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	0
LUST	State Leaking Underground Storage Tank	0.5 miles	No	22
Indian LUST	Tribal LUST	0.5 miles	No	0
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	1
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	3
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0
FEMA UST	Federal Emergency Management Agency (FEMA) owned Registered UST	0.25 miles	No	0
Indian VCP	Voluntary Cleanup on Tribal Land	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup	0.5 miles	No	1
Brownfields	State and Tribal Brownfields	0.5 miles	No	0
	Additional environmental records, including local lists	*Varies*	*Yes*	*78*

Note: The search distances in the EDR report and listed in this table are equal to or greater than the search distances required by ASTM E1527-21.

5.1 Subject Property

The subject property was identified in the following databases searched by EDR: FINDS, HAZNET, and HWTS. The listings were associated with the following current or former subject property occupants or contractors: Kimberly Krunch, Los Robles Regional Medical Center, Rolling Oaks Child Development, and Tiles Development Center Inc.

The listings are due to hazardous waste generation (HWTS, HAZNET) and other permitted sites (FINDS). These listings are administrative in nature and do not necessarily indicate a release of hazardous materials to the environment. These listings indicated the following for the subject property:

- Waste generated on the subject property for off-site disposal included 9.2 tons of asbestos containing materials (ACM) removed during demolition of the former preschool building in 2018.
- A listing on the FINDS database for insecticide, fungicide, and/or rodenticide use.

Given the administrative nature of these listings and lack of reported chemical storage or violations, impacts to the subject property are unlikely.

5.2 Adjoining and Nearby Properties

One hundred three sites with 26 unique addresses were identified within 1 mile of the subject property. Of these, 14 unique sites were identified as adjoining the subject property or have a regulatory file that indicates a release of hazardous substances or petroleum products to the environment with the potential to impact the subject property (LUST, CPS-SLIC, ENVIROSTOR, CORTESE, and VCP). Twelve of the 14 sites were located more than ¼ mile hydrogeologically downgradient from the subject property and had release cases that were closed by the lead regulatory agency; therefore, it is unlikely that these sites have impacted the subject property. For the remaining two sites, the site name, address, database listings, relative location (approximate distance and direction) as measured from the nearest edge of the subject property, and discussion of the site status are included in Table 2. Potential impacts to the subject property are evaluated based on distance from the subject property, known groundwater gradients, and status of the regulatory listing provided. Information presented in Table 2 was gathered from the EDR Radius Report and from documents available for review on GeoTracker (SWRCB 2022).

Other listings in the EDR report are administrative in nature and do not necessarily represent a release of hazardous materials or petroleum products to the environment or are at such distance that they are not likely to impact the subject property. Therefore, the sites not discussed in the table are unlikely to have impacted the environmental conditions of the subject property.

Table 2. Evaluation of Nearby Sites

Site Name and Address	Database Listings	Relative Location with Respect to Subject Property	Case Status	Flow Direction and Relative Gradient to SP
Adjoining Properties				
Thousand Oaks Surgical Hospital 401 East Rolling Oaks Drive	AST, CERS TANKS, VENTURA CO. BWT, MED WASTE VENTURA, RCRA NonGen/NLR, CERS	250 feet north	Not Applicable	Downgradient (based on information from a nearby site)
An aboveground storage tank (AST) is reported onsite, however, no other information, including capacity, is reported. The Thousand Oaks Surgical Hospital has received 12 violations between 2017 and 2019. Violations included failure to dispose of hazardous waste at a facility which has a permit, failure to send legible copy of hazardous waste manifest within 30 days of waste shipment, failure to annually review and certify business plan, failure to submit an emergency response plan and procedures for a release or threatened release, failure to provide annual or initial training to employees in safety procedures in the event of a release, failure to establish a business plan when handling waste quantities above reportable levels, and failure to keep a copy of each manifest for three years following waste acceptance by the transporter. These violations are administrative in nature and were all returned to compliance within three months of the reported violation. No spills or releases were reported. Given the administrative nature of the listings and the location of the site across the street from the subject property, an impact to the subject property is unlikely.				

Table 2. Evaluation of Nearby Sites

Site Name and Address	Database Listings	Relative Location with Respect to Subject Property	Case Status	Flow Direction and Relative Gradient to SP
Nearby Sites				
Rosen Property 236 Quails Trail	ENVIROSTOR, VCP	850 feet west-northwest	Completed – No Further Action	Northwest, Downgradient (based on information from nearby site reports)
The Rosen Property is listed on the voluntary cleanup program (VCP) database due to a painting contractor illegally dumping of paint solvents into a water meter box on a residence. Impacts to soil and soil vapor were reported. A site investigation was completed in 1994 indicating that the site was remediated. No Further Action status was granted in November 1994. No other information is available. Given that only soil impacts were reported, the distance from the subject property, and the current regulatory status; an impact to the subject property is unlikely.				

5.3 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the subject property. The EDR report identified 1 unmapped site. Dudek reviewed the site, Mobil Oil SS#11 located at 1 Thousand Oaks Boulevard, and determined that it is unlikely to have impacted the subject property as it is located more than ¼ mile downgradient of the subject property and the release case was closed by the lead regulatory agency.

6 Interviews

6.1 Site Representative Interview

Matt Cova, representative for the subject property, completed the Property Background Information Questionnaire for the subject property on April 13, 2023. The completed questionnaire was provided to Dudek by Amy Commans, Vice President of Community, Employer & Government Relations for Los Robles Health System. Mr. Cova stated that the property is vacant and prior buildings on the subject property have been demolished. He stated that the subject property was previously a daycare facility/child development center and that the prior site buildings were demolished between May 2011 and July 2014. Mr. Cova stated that the subject property has not been used for industrial purposes and that chemicals have not been stored in quantities greater than 5 gallons on the subject property. He is not aware of any spills, stained soils, storage tanks, agricultural use, or prior assessments of the subject property. He stated that there are no wells, septic tanks, transformers, or wastewater discharge on the subject property.

6.2 User-Provided Information

Dudek sent the following questions to the User of this report. Answers to these questions fulfill the requirement of Sections 6.2 through 6.6 of the ASTM Standard E1527-21. Justine Kendall, Associate Planner for the City of Thousand Oaks, responded on March 15, 2023.

1. **Question:** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

   Response: No.

2. **Question:** Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

   Response: No.

3. **Question:** As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   Response: No.

4. **Question:** If the purchase price of the subject property was below fair market value, did this occur because contamination was/is known or believed to be present at the property?

   Response: Purchase Price Unknown.

5. **Question:** Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? (a) Do you know the past uses of the property, (b) do you know of specific chemicals that are present or once

were present at the property, (c) do you know of spills or other chemical releases that have taken place at the property, or (d) do you know of any environmental cleanups that have taken place at the property?

Response: No (a) Yes, children's activity club (b) No (c) No (d) No

6. **Question:** As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   Response: No.

6.3 Local Agency Records

6.3.1 City of Thousand Oaks

6.3.1.1 Building Division

Dudek accessed the City of Thousand Oaks Building Division online permit database to search for records of permits for the subject property. Records reviewed for the subject property included original building, electrical, and plumbing permits, various miscellaneous structure permits, pool construction permit, plumbing repair permits, permit for construction of a handicap ramp, roofing repair permit, and building demolition permits. Based on available records, the preschool facility was constructed in 1973 and demolished in 2018. No permits for underground storage tanks (USTs), clarifiers, or sumps were identified. Copies of the records are presented in Appendix D.

6.3.1.2 Zoning and Land Use

Dudek accessed the City of Thousand Oaks Zoning Map for information about zoning of the subject property and surrounding properties (Appendix D). The subject property is zoned R-E which corresponds with rural exclusive. The northern adjoining property is zoned C-O (commercial office). The eastern adjoining property is zoned R-1 (single-family residence). The southern adjoining property is zoned O-S (open space). The western adjoining property is zoned R-3 (multifamily residential).

6.3.2 Ventura County Resource Management Agency

Dudek contacted the Ventura County Resource Management Agency (RMA) on November 8, 2022, to obtain files relating to any UST removals, hazardous waste cleanups, or hazardous waste discharge. A response was received on November 15, 2022, stating that no records were found for the subject property address (Appendix D).

Dudek also accessed the RMA online records database on November 8, 2022, for files relating to the subject property (RMA, 2022). One Proposition 65 Spill Report, dated May 8, 1992, was found for the subject property. The report states that 1 to 15 gallons of gasoline were poured onto the parking lot at 400 East Rolling Oaks Drive. The gasoline was reported to have evaporated, and no action was taken. Given the de minimis spill volume and age, environmental impacts to the subject property are unlikely.

6.3.3 Regional Water Quality Control Board

Dudek contacted the Los Angeles Regional Water Quality Control Board (RWQCB) on November 8, 2022, to obtain records of spills, tanks, or other releases that may have impacted the environmental conditions on the subject property. The Los Angeles RWQCB responded on November 17, 2022, stating that no records were found for the subject property address (Appendix D).

Dudek accessed GeoTracker, the State Water Resources Control Board (SWRCB) online database, to search for contaminated sites/release cases on or near the subject property (SWRCB 2022). No contaminated sites/release cases were found on the subject property. Additional nearby release sites were identified; information about relevant release sites is presented in Section 5.2.

6.3.4 Department of Toxic Substances Control

Dudek contacted the Department of Toxic Substance Control (DTSC) on November 8, 2022, to obtain records of cleanup, permitting, enforcement, or investigations that may have impacted the environmental conditions on the subject property. The DTSC responded on November 14, 2022, stating that no records were found for the subject property address (Appendix D).

Dudek searched the DTSC EnviroStor database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination (DTSC 2022). The subject property was not identified in the database. There was one site identified within 1.0 mile of the subject property. The site, Rosen Property (236 Quails Trail), is discussed in Section 5.2. As mentioned in Section 5.2, this site is not expected to impact the environmental conditions of the subject property.

6.3.5 CalRecycle Solid Waste Information System

Dudek reviewed the California Department of Resources Recycling and Recovery (CalRecycle) Solid Waste Information System online database (CalRecycle 2022). The database has information for all solid waste facilities, operation, and disposal sites in California. No sites were identified on or within 1 mile of the subject property.

6.3.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the California Environmental Protection Agency Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2022). Data sources for the portal include California Environmental Reporting System, the Department of Toxic Substances Control EnviroStor, the State Water Resources Control Board GeoTracker, California Integrated Water Quality System, and the Federal Toxics Release Inventory.

California Environmental Protection Agency sites are generally administrative in nature and identifies sites that have environmental permits or that handle hazardous materials or generate hazardous waste, but that do not necessarily have an uncontrolled release of hazardous substances to the environment.

The subject property was not identified on the CalEPA Regulated Site Portal.

One adjoining site was identified adjoining the subject property to the north.

Thousand Oaks Surgical Center: This site is the northern adjoining property (250 feet north) located at 401 East Rolling Oaks Drive. The site is listed for an AST and as a chemical storage facility. Further details, including violations, are discussed in Section 5.2.

6.3.7 California Geologic Energy Management Division

Dudek reviewed the California Geologic Energy Management Division database on November 25, 2022 (CalGEM 2022). No oil or gas wells were mapped on or within 1 mile of the subject property.

6.3.8 National Pipeline Mapping System

Dudek searched the National Pipeline Mapping System online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under the Department of Transportation Pipeline and Hazardous Material Safety Administration jurisdiction (NPMS 2022).

No hazardous materials or natural gas transmission pipelines were identified on the subject property or within 1 mile of the subject property.

7 Site Reconnaissance

A site reconnaissance was conducted on November 10, 2022, by Brandon Page of Dudek. The site reconnaissance consisted of walking the subject property, taking notes on observations, and taking photographs. Photographs are presented in Appendix E. Mr. Page was accompanied by Amy Commans, of Los Robles Health System, during the site reconnaissance.

7.1 Description of Subject Property and Surroundings

The subject property consists of a 4.75-acre parcel of land bordered to the north by East Rolling Oaks Drive and a medical office building (Photograph 1), the east by single family residences and an electric transmission line (Photograph 2), the south by undeveloped open space (Photograph 3), and the west by Los Padres Drive and an apartment complex (Photograph 4). The subject property is accessed from East Rolling Oaks Drive and Los Padres Drive (Photographs 5 and 6). The subject property includes a foundation/slab of a former daycare facility, a soil-filled swimming pool, ball court, parking lot, and undeveloped land (Photographs 7 through 10). The subject property is fenced along the perimeter to restrict public access (Photograph 11).

Dudek observed all portions of the subject property. No structures were present on the subject property, however, the foundation and slab of the former preschool building including vinyl floor tile, five floor drains, and utility stub-outs were observed (Photographs 12 through 14). A swimming pool deck, floor drains, and associated plumbing were observed east of the slab (Photographs 15 and 16). The swimming pool appears to have been filled with soil without demolition of the pool infrastructure (Photograph 17). A concrete-lined stormwater conveyance adjacent to Los Padres Drive and a second conveyance draining the southern slope of the subject property were observed (Photographs 18 and 19). Concrete sidewalks, unpaved walkways, and stairs made of railroad ties were observed in various locations on the subject property (Photographs 20 and 21).

An electric transmission line was observed along the eastern subject property boundary. Adjacent to the transmission line, located on the subject property, were ten power poles and associated guy-wire anchors that were cut off at ground level (Photographs 22 and 23). No pole-mounted transformers were observed on the subject property. Municipal water, sewer, and storm drains were observed along East Rolling Oaks Drive (Photographs 24 and 25). A low area in the northeastern corner of the subject property drains through a culvert into a municipal stormwater conveyance system (Photograph 26). Underground electric utilities were observed along the northern subject property boundary (Photograph 27).

The main areas of interest noted during the site reconnaissance are described in the following section.

7.2 Summary of Observations

Potable Water Supply or Source

Water lines were observed on the subject property along East Rolling Oaks Drive (Photograph 24).

Sewage Disposal System

A sewer line was observed beneath East Rolling Oaks Drive (Photograph 28). Storm drains and manholes were observed during the site reconnaissance.

Wetlands and Natural Waterways

No wetlands or natural waterways were observed on the subject property.

Surface Water Discharge

Stormwater from the southern slope and western portions of the subject property flows to the stormwater conveyance ditch along Los Padres Drive. Stormwater from the eastern portions of the subject property flows into a low area in the northeast corner of the subject property that drains into the municipal stormwater system through a culvert (Photograph 26).

Distressed Vegetation

Several dead trees were observed in the landscaping along the northern portion of the subject property.

Indications of Solid Debris Storage

No signs of solid debris storage were observed on the subject property. Debris (organic and de minimis roadside litter) was observed blocking the stormwater conveyance culvert adjacent to Los Padres Drive (Photograph 29).

Hazardous Material and Petroleum Product Use and Storage

No hazardous material or petroleum product storage or use was observed on the subject property.

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored pools or flowing water were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

No groundwater wells, cisterns, cesspools, or septic tanks were observed on the subject property.

Polychlorinated Biphenyl-Containing Items

No transformers or any equipment containing hydraulic oil were observed on the subject property.

Sumps or Ponds

No sumps or ponds were observed on the subject property.

Abnormal Odor

No abnormal odors were noted on the subject property.

Surface Staining, Corrosion, and Soil Disturbances

A 12 ft wide by 12 ft long excavation into the hillside above the ballcourt was observed (Photograph 30). There was no indication of any buried materials. No staining or other soil disturbances were observed during the site reconnaissance.

Tanks, Drums, Totes, and Intermediate Bulk Containers

No drums, storage tanks, totes, or other bulk containers were observed on the subject property.

Agricultural Use

The subject property is not currently used for agricultural purposes. Historical resources (see Section 8) indicate the subject property has not been used for agricultural purposes since at least 1947.

Off-Site Sources

No indications of off-site sources impacting the subject property were observed.

Fill Material

Fill material was not observed on the subject property.

Unidentified Substance Containers

No unidentified substance containers were observed on the subject property.

Pipelines

No hazardous materials or natural gas pipelines were identified on the subject property. Metal pipelines (1 inch diameter) were observed in various places throughout the subject property, appearing to connect to three drinking water fountains located along the walking trails and ballcourt (Photographs 31 and 32).

8 Site History

Based on a review of the historical aerial photographs, topographic maps, city directory, and agency records, the subject property was undeveloped until 1973, when a preschool facility was constructed. The preschool building was demolished in 2018.

There are gaps in site history between 1903 and 1921, 1921 and 1943, 1947 and 1953, 1953 and 1959, 1959 and 1967, 1967 and 1978, 1978 and 1985, 1994 and 2002. This constitutes a data failure and is discussed further in Section 13.

First use of the northern-adjoining property consisted of commercial development by 2002. First use of the eastern-adjoining property consisted of residential development by 2002. First use of the western-adjoining property consisted of medium-density residential development by 1978.

8.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1947, 1953, 1959, 1967, 1978, 1985, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 (Appendix F). Dudek also reviewed aerial photographs from Google Earth for 2020 (Google Earth 2022). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 3.

Table 3. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
1947	The subject property appears to be undeveloped. A natural surface water runoff drainage ditch is visible along the western border of the subject property.	The adjoining properties to the north, east, south, and west appear to be undeveloped. A small, two-lane paved road (Thousand Oaks Blvd) is visible approximately ¼ mile north of the subject property. Approximately 5 structures are present ¼ mile north of the subject property, along the paved road. North-south trending dirt roads are visible to the east and west of the subject property.
1953	The subject property appears similar to the 1947 aerial photograph.	The adjoining properties appear similar to the 1947 aerial photograph. A four-lane divided highway (US 101) is visible to the north of the subject property. Further residential development is visible to the north of the subject property, along Thousand Oaks Boulevard.
1959	The subject property appears similar to the 1947 aerial photograph.	The adjoining properties appear similar to the 1953 aerial photograph. Several new paved roads (Rimrock Road, Sundown Road, Saddle Trail) appear on the surrounding property to the east of the subject property. Along the new roads to the east of the subject property, residential development is visible.
1967	The subject property appears similar to the 1959 aerial photograph. A small dirt access road intersects the northwestern corner of the subject property.	A series of dirt roads are visible on the northern-, eastern-, and western-adjoining properties. Additional residential development is visible along Rimrock Road to the east of the subject property. Commercial

Table 3. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
		development is visible between US 101 and Thousand Oaks Boulevard to the north of the subject property.
1976 (see Section 8.2)	The subject property appears to have been developed with a building. The aerial photograph resolution is too low to determine any other subject property developments.	East Rolling Oaks Boulevard is visible along the northern property boundary. Los Padres Drive and an apartment complex are visible to the west of the subject property. The remaining adjoining properties to the north, south, and east appear similar to the 1967 aerial photograph. Additional single family residences are visible to the east of the subject property. Additional apartment buildings appear to be under development to the west of the subject property. Commercial developments are visible along the north and south sides of Thousand Oaks Boulevard.
1978	A building, swimming pool, parking lot, landscaping, ballcourt, and concrete sidewalks are visible. The concrete stormwater conveyances draining the southern slope and running along the western property boundary are visible. Four unidentified small structures and an area of soil disturbance are visible in the southeastern corner of the subject property.	The adjoining and surrounding properties appear similar to the 1976 aerial photograph.
1985	The subject property appears similar to the 1978 aerial photograph, with denser vegetation along the eastern and northern property boundaries.	Adjoining properties appear similar to the 1978 aerial photograph. The apartment buildings and residential developments to the west of the subject property that were under development in 1978 appear to be complete. Additional residential development is visible approximately ¼ mile south of the subject property.
1989	The subject property appears similar to the 1985 aerial photograph.	Adjoining properties appear similar to the 1985 aerial photograph.
1994	The subject property appears similar to the 1989 aerial photograph, with the addition of a graded area or parking area in the southwestern portion of the subject property.	The northern-adjoining property appears to be under development. A commercial development is visible to the northwest of the subject property. Additional commercial development is visible along Thousand Oaks Boulevard approximately ¼ mile north of the subject property.
2002	The subject property appears similar to the 1994 aerial photograph.	The adjoining property to the north appears to be under commercial development, a road and traffic circle are visible along with apparent grading of the site. Residential development of the eastern-adjoining property appears to have occurred.
2005	The subject property appears similar to the 2002 aerial photograph.	A large commercial building and parking lot are visible on the northern adjoining property. The remaining adjoining and surrounding properties appear similar to the 2002 aerial photograph.
2009	Two small storage sheds or vehicles are visible near the southeastern corner of the	The adjoining and surrounding areas appear similar to the 2005 aerial photograph; however, one additional

Table 3. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
	subject property. A dirt access road/trail is visible from Los Padres Drive to the southeastern corner of the subject property. A soil disturbance is visible on the eastern property boundary, just to the east of the swimming pool.	commercial building is visible on the northern adjoining property.
2012	The subject property appears similar to the 2009 aerial photograph.	The adjoining and surrounding areas appear similar to the 2009 aerial photograph.
2016	The potential storage sheds in the southeastern corner of the subject property are no longer visible. The remainder of the subject property appears similar to the 2012 aerial photograph.	The adjoining and surrounding areas appear similar to the 2012 aerial photograph.
2020	The daycare building appears to have been demolished and the swimming pool filled in with soil. The remainder of the subject property appears similar to the 2016 aerial photograph.	The adjoining and surrounding areas appear similar to the 2016 aerial photograph.

Note: See Appendix F for corresponding aerial photographs. The 2020 Google Earth photo is available online and therefore is not included in Appendix F.

8.2 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1900, 1903, 1921, 1943, 1947, 1950, 1951, 1967, 1976, 1981, 2012, 2015, and 2018 (Appendix B). The topographic maps are a historical source that can be used to document the prior use of the subject property and surrounding area. The topographic maps are described in Table 4.

Table 4. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
1900	The subject property appears undeveloped and sloping gently to the northwest.	An east-west trending road (Thousand Oaks Boulevard) is depicted approximately ¼ mile north of the subject property. An ephemeral stream is depicted parallel to the road flowing to the west. No structures are depicted on the map.
1903	The subject property is similar to its appearance in the 1900 topographic map.	The adjoining and surrounding properties are similar to their appearance in the 1900 topographic map.
1921	The subject property is similar to its appearance in the 1903 topographic map.	The adjoining and surrounding properties are similar to their appearance in the 1903 topographic map.
1943	The subject property is similar to its appearance in the 1921 topographic map.	Unimproved north-south trending roads are depicted to the east and west of the subject property. Structures are depicted along Thousand Oaks Boulevard to the north of the subject property.

Table 4. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
1947	The subject property is similar to its appearance in the 1943 topographic map.	The adjoining and surrounding properties are similar to their appearance in the 1943 topographic map.
1950	The subject property topography is mapped in greater detail. The eastern side appears to drain to the east into an ephemeral drainage. The western side appears to drain to the west.	An ephemeral stream is depicted along the eastern subject property boundary. The unimproved road to the east of the subject property is now depicted as an improved road. US 101 is depicted ¼ mile north of the subject property as under construction. The Conejo Valley Airport is depicted approximately ½ mile northwest of the subject property. Additional development is visible along Thousand Oaks Boulevard to the north of the subject property.
1951	The subject property is similar to its appearance in the 1950 topographic map.	The adjoining and surrounding properties are similar to their appearance in the 1950 topographic map.
1967	The subject property is similar to its appearance in the 1951 topographic map. A trail is depicted as crossing the northwestern corner of the subject property.	A series of trails are depicted on the northern-, eastern-, and western-adjoining properties. Development of Rimrock Road is depicted to the east of the subject property. Commercial development is visible between US 101 and Thousand Oaks Boulevard and to the north of Thousand Oaks Boulevard. The Conejo Valley Airport is no longer depicted northwest of the subject property, it appears to have been replaced with Los Robles Greens Golf Center.
1976	The 1976 image is an aerial photograph and is discussed in Table 3 above.	
1981	A structure is depicted along the western property boundary.	East Rolling Oaks Boulevard is depicted to the north of the subject property. Los Padres Drive is depicted to the west of the subject property. Additional residential development is depicted along Rimrock Road. Substantial commercial development is depicted north of Thousand Oaks Boulevard, approximately ½ mile north of the subject property.
2012	The subject property is similar to the 1981 topographic map. Structures are no longer depicted on the topographic map.	The adjoining and surrounding areas appear similar to the 1981 topographic map. A hospital is depicted on the northern adjoining property.
2015	The subject property is similar to its appearance in the 2012 topographic map.	The adjoining and surrounding properties are similar to their appearance in the 2012 topographic map.
2018	The subject property is similar to its appearance in the 2015 topographic map.	The adjoining and surrounding properties are similar to their appearance in the 2015 topographic map.

Note: See Appendix B for corresponding topographic maps.

8.3 Fire Insurance Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the subject property and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits.

The Sanborn Map Report lists the subject property as an unmapped property; no additional information was included in the report. The Sanborn Map Report is provided in Appendix G.

8.4 City Directory

City directory listings were requested from EDR (Appendix H). Findings for the subject property and for adjoining property addresses are summarized in Table 5.

Table 5. City Directory Listings

Address	Date	Listings
Subject Property		
400 (East) Rolling Oaks Drive	2017, 2014, 2009, 2004, 2002, 1999, 1994, 1985	Rolling Oaks Child Development Center, Young Set Club, Early Learning Center of Conejo Valley
	1993, 1986, 1985, 1975	Young Set Club
	1975	Conejo Youth Employment Service
Adjoining Property to the West		
300 Rolling Oaks Drive	2017, 2014, 2009, 2004, 2002, 1999, 1994	Residential Apartment Complex (Los Robles Apartments)
Adjoining Property to the North		
401 and 415 Rolling Oaks Drive	2017, 2014, 2009, 1999	Medical Office Center (Doctors and Practices listed)

Adjoining residential properties to the east, along Rimrock Road, were not included in the City Directory search.

9 Previous Environmental Site Assessments

No previous environmental assessments were provided to Dudek during this Phase I ESA.

10 Vapor Encroachment

Dudek evaluated vapor encroachment to determine whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, site reconnaissance, local regulatory agency responses), as discussed in this report, was also considered. The vapor encroachment condition (VEC) assessment was conducted in accordance with ASTM E2600-15 Guidance (ASTM 2015). The EDR Radius Map Report (Appendix C) was used to evaluate listed contaminated sites as identified in federal, state, and local databases. A VEC assessment report is provided in Appendix I.

Dudek reviewed a list of sites as identified in federal, state, and local databases as they relate to the subject property. Information obtained from other sources (historical reports, geologic and hydrogeological information, site reconnaissance, interviews, local regulatory agency responses), as discussed in this report, were also considered. Based on the information reviewed, there are no sites mapped upgradient of the subject property. As such, no VEC is reported.

11 Non-ASTM Considerations

This section discusses non-ASTM scope considerations that were included in this Phase I ESA based on the conditions at the subject property. These items are not required to be evaluated per the ASTM Standard but may still pose environmental health and safety risks.

Asbestos

Asbestos has been specifically designated a hazardous substance pursuant to CERCLA Section 102, but abatement costs are generally not recoverable under CERCLA. Many building materials commonly contained asbestos until the late 1970s, and a smaller list of building materials contained asbestos in the 1980s, such as drywall, joint compounds, vinyl flooring, roofing, asbestos-cement products, and stucco. Under the Toxic Substances Control Act, EPA banned the use of asbestos in many products, with partial bans occurring in 1989 and 1993. However, a full ban of asbestos products did not occur until 2019. Therefore, if a building was constructed prior to 1989, it is likely it contains asbestos. If it was constructed between 1989 and 2019, it is less likely asbestos is present, but there is still a chance that asbestos was used.

No structures are present on the subject property; however, vinyl floor tiles were left intact on the slab after demolition of the preschool building. These tiles and associated mastic adhesive could contain asbestos.

Lead-Based Paint

Paint manufacturers frequently used lead as a primary paint ingredient through the 1940s and gradually decreased its use in the 1950s and 1960s. The federal department of Housing and Urban Development estimates 30% of homes built in the United States before 1978 contain some lead-based paint. The Consumer Product Safety Commission prohibited the use of lead-based paints in residential buildings in 1978; however, the use of lead-based paints in commercial and industrial buildings is not prohibited.

No structures are present on the subject property.

Radon

Radon is a radioactive gas that is produced from the natural decay of uranium, radium, and thorium in soil, rock, and groundwater. When radon becomes trapped in buildings and concentrations accumulate, exposure to radon can be a concern.

The EDR report presents radon test results for the vicinity of the subject property. The EPA radon zone for Ventura County is 1, which corresponds with average expected indoor radon levels >4 picocuries per liter (pCi/L). The federal radon action level is 4 pCi/L. While the county as a whole has average radon levels above the action level, all reported test sites (10 sites) in the local zip code (91361) have radon concentrations below the action level, with an average radon concentration of 0.85 pCi/L in the first floor living area.

12 Findings and Conclusions

Information gathered for this report indicated the following:

- According to building permit records and historical sources (Section 8), the site was first developed in 1973 as a preschool facility with a school, swimming pool, ballcourt, playground, and parking lot. The building was demolished, and the pool filled in with soil in 2018. The slab, foundation, ballcourt, filled in pool, and various walkways remain on the subject property.
- The subject property operated as a preschool facility from 1975 through 2017. The subject property has been vacant since 2018.
- A total of 13 release sites were reported within a ½ mile of the subject property. Of these, 12 were related to leaking underground storage tanks and one related to illegal dumping on a nearby property. All 13 sites have a closed regulatory status and are assumed to be downgradient from the subject property. As such, these sites are unlikely to impact the environmental condition of the subject property.
- According to a Proposition 65 Spill Report, dated May 8, 1992 and included in agency records reviewed, 1 to 15 gallons of gasoline were poured onto the parking lot at the subject property. The gasoline was reported to have evaporated, and no action was taken. Given the de minimis spill volume and age, environmental impacts to the subject property are unlikely.

Dudek performed this Phase I ESA of the subject property at 400 East Rolling Oaks Drive in Thousand Oaks, California in conformance with the scope and limitations of the ASTM E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This assessment revealed no evidence of RECs, historical RECs, or controlled RECs in connection with the subject property. This report summarizes the research and findings of the Phase I ESA. Data gaps, which were determined not to be significant, are discussed in Section 13, Limitations.

The following non-ASTM-scope considerations were identified:

- Vinyl floor tiles and associated mastic were observed on the remaining concrete building slab on the subject property. Many building materials commonly contained asbestos until the late 1970s, and a smaller list of building materials contained asbestos in the 1980s. A full ban on asbestos products didn't occur until 2019. Therefore, based on the date the previous building was constructed (1973), there is a potential for asbestos-containing materials to be present in associated building materials.

13 Limitations

13.1 Data Gaps and Data Failures

As defined in ASTM E1527-21, a data failure is a failure to achieve the historical research objective required by the ASTM Standard even after reviewing the standard historical resources which are reasonably ascertainable and likely to be useful. A data failure is a type of data gap.

The following data failure was identified for this Phase I ESA:

- Historical resources were not available between 1903 and 1921, 1921 and 1943, 1947 and 1953, 1953 and 1959, 1959 and 1967, 1967 and 1978, 1978 and 1985, 1994 and 2002 which are greater than the 5-year interval required by the ASTM Standard. While this is a data failure, based on the site history, available historical and regulatory information, and present-day use, Dudek has determined this data failure is not a data gap.

As defined in ASTM E1527-21, a data gap is the lack of or inability to obtain information required by this practice despite good faith efforts. A data gap is considered significant when it affects the ability of the environmental professional to identify recognized environmental conditions. No data gaps were identified.

13.2 Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, as reflected in the discussion in this report of the visual observations of the subject property and vicinity and documentation reviewed and, based on the foregoing, our interpretation of this information and these documents. Dudek makes no warranty, guarantee, or representation, express or implied, as to statements made by others or information included in documentation reviewed or otherwise provided to Dudek, as described in this report. This report does not purport to identify or describe all potential contamination or other issues related to the environment respecting the subject property and/or the vicinity. Likewise, it is understood that it is possible that conditions or contamination exist at the subject property or in the vicinity that are not identified in this Phase I ESA.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services in the same or similar geographical locality. This report, including its conclusions and/or recommendations, are intended exclusively and solely for the purpose outlined herein and for the client identified hereunder. This report may not be relied upon by any other person or entity without the express advance written consent of Dudek specifically identifying such person or entity. Dudek reserves the right to further condition any such third-party use based on matters it deems appropriate under the circumstances, in its sole discretion.

This report is subject to the conditions and restrictions and limitations described in ASTM E1527-21.

In accordance with Section 4.6.1 of ASTM E1527-21, this Phase I ESA is valid as a general matter for not longer than 180 days from the date of the first interview, first review of government records, or first visual inspection. If this Phase I ESA has been prepared for the purposes of a transaction, the report must have been completed no more than 180 days prior to the transaction date to be considered viable. Otherwise, the report must be updated or revised in accordance with ASTM E1527-21.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

THOUSAND OAKS PATHOL EPA ID:: CAR000304550	351 ROLLING OAKS DR.	NW 0 - 1/8 (0.116 mi.)	E51	131

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 22 LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 50 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

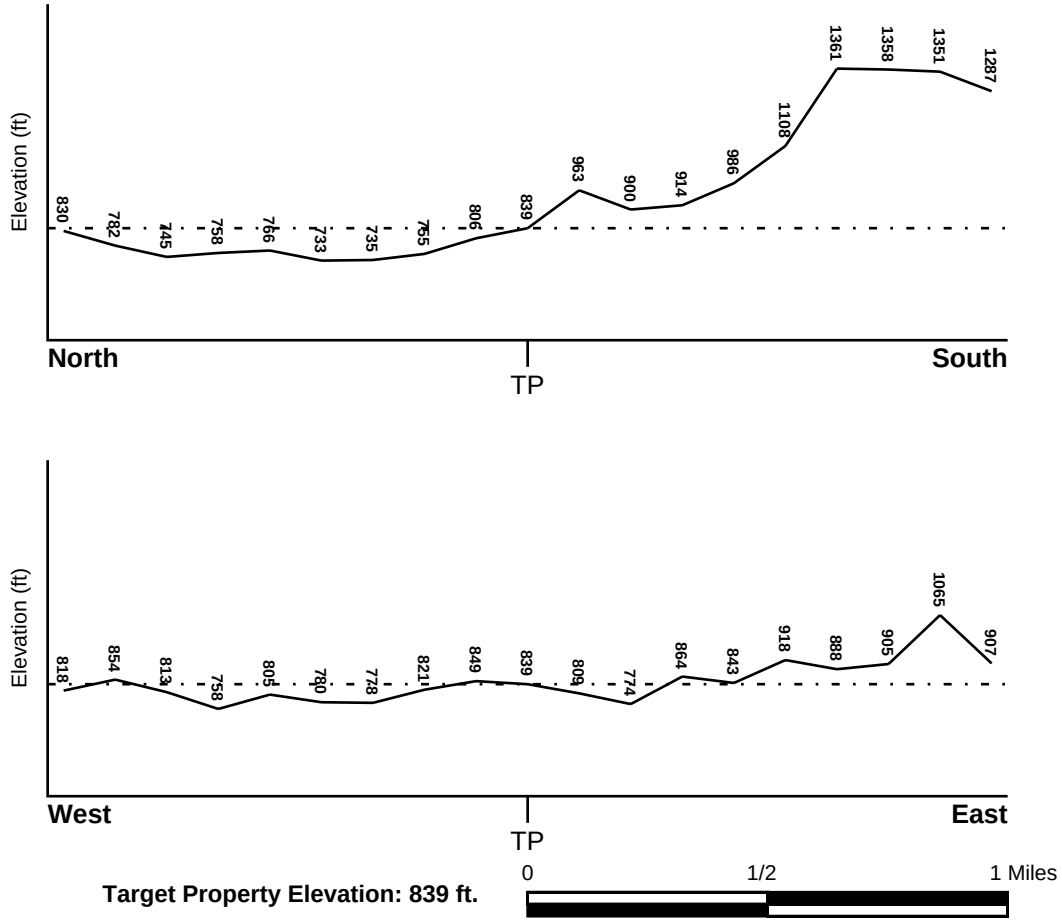

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 839 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06111C0986E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06111C0967E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
THOUSAND OAKS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

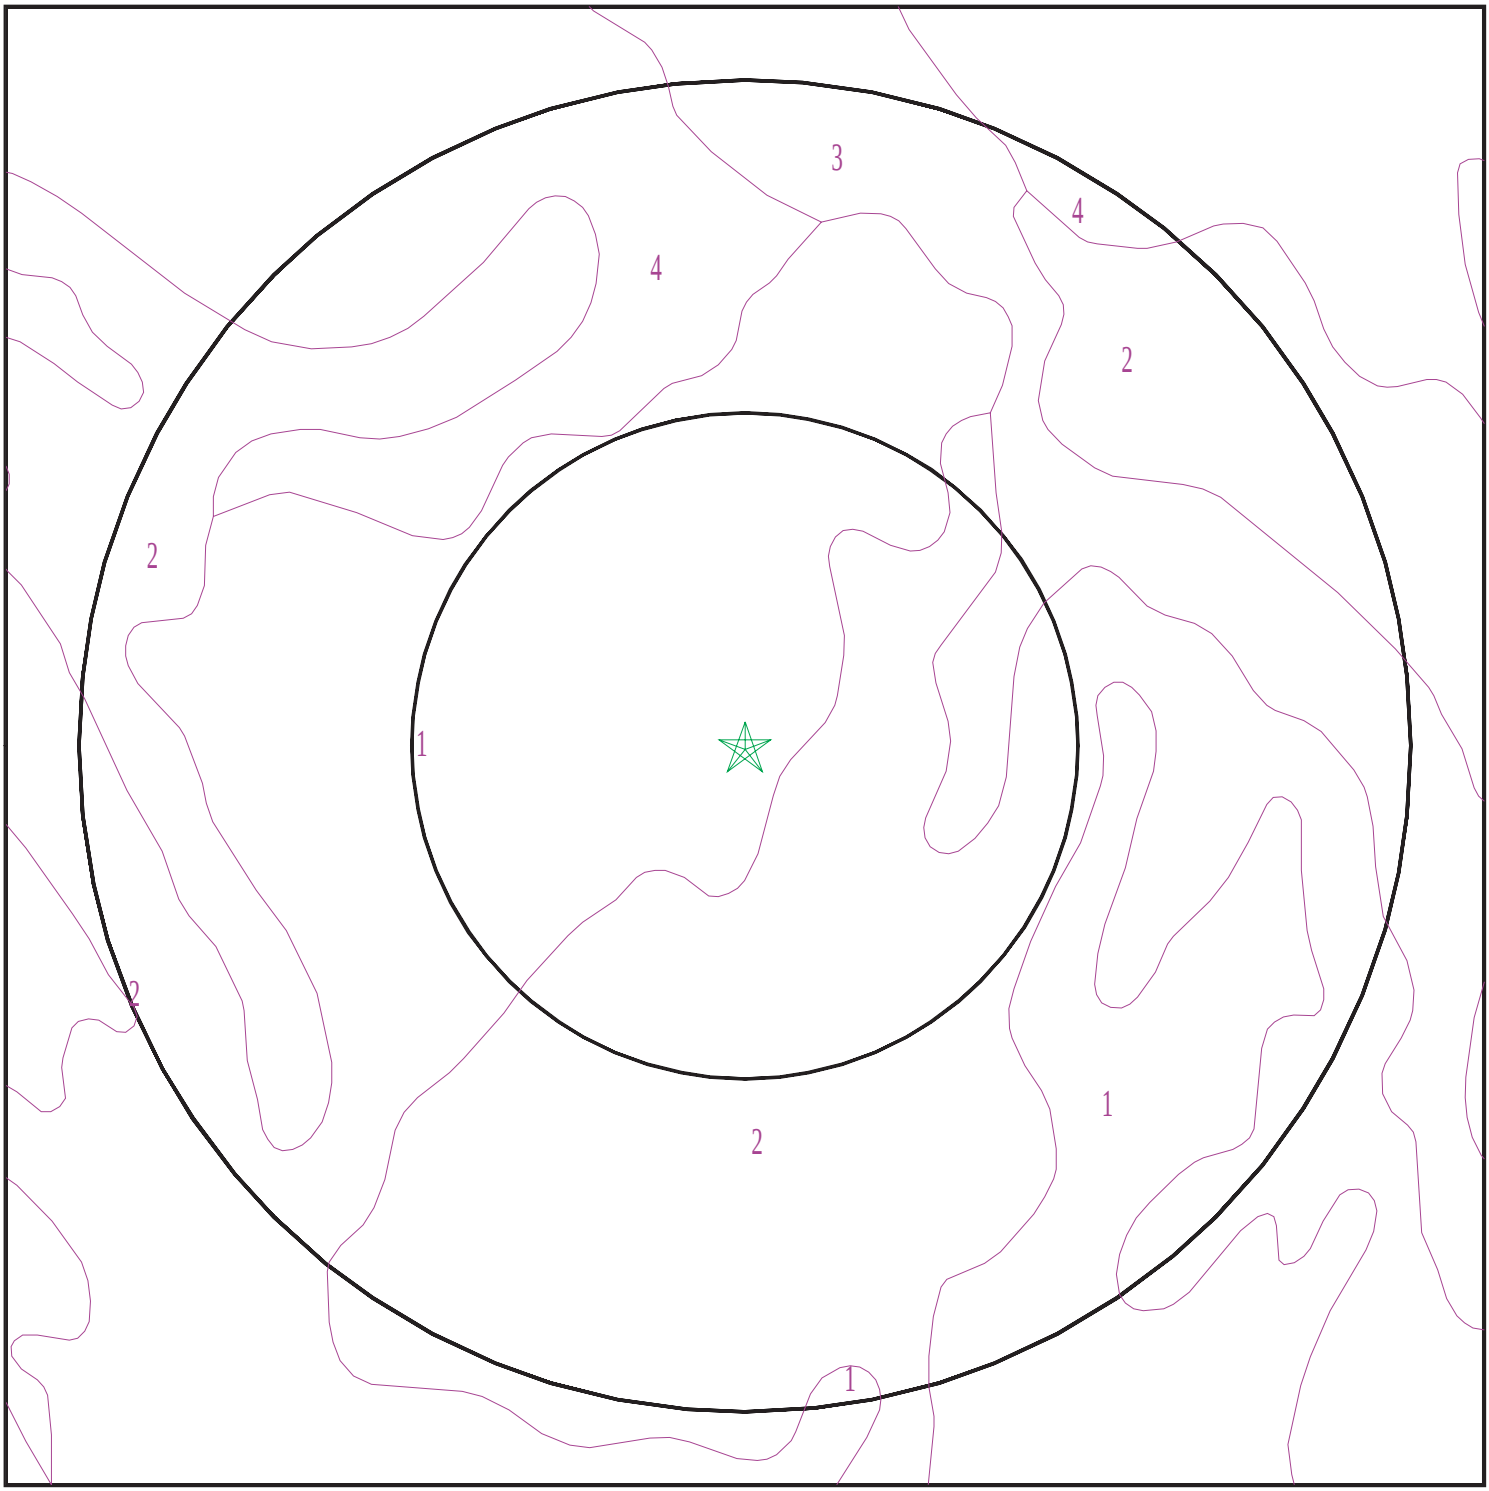

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Azule

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1
2	9 inches	40 inches	gravelly sandy clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1
3	40 inches	59 inches	gravelly sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1

Soil Map ID: 2

Soil Component Name: GILROY

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:
2	9 inches	20 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:
3	20 inches	25 inches	unweathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: Cropley

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	27 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 4

Soil Component Name: GILROY

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 77 inches

Depth to Watertable Min: > 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Dear Requestor:

We have received your Public Records Act Request from the Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs Data Management System. It tracks our cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 714-4845337 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

Julie Chandler

Public Records Request Number: PR3-110822-12

Location: 400 E. Rolling Oaks Drive, Thousand Oaks, CA 91361

Dear Ms. Peacock:

On November 8, 2022, the Department of Toxic Substances Control (DTSC) received your email of the same date] requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the site/facility referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at http://hwts.dtsc.ca.gov. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at hwtsreports@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 818-717-6521 or via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Robert Hardison
Records Mgmt. Asst. Coordinator

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # DCEA-4C5A-B5C4

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
