PHASE I ENVIRONMENTAL SITE ASSESSMENT

2665 The Alameda
Santa Clara, California

Prepared for:

Kapital Partners, LLC

Prepared by:

Tetra Tech
17885 Von Karman Ave, Suite 500
Irvine, CA 92614

May 30, 2022

EXECUTIVE SUMMARY

Tetra Tech performed a Phase I Environmental Site Assessment (ESA) on behalf of Kapital Partners, LLC for the property located at 2665 The Alameda, Santa Clara, California (Subject Property; Figure 1). This Phase I ESA was completed to aid in the potential purchase of the Subject Property for development of student housing. This Phase I ESA was completed in general accordance with American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, E1527-13 and E1527-21* as well as All Appropriate Inquiries Final Rule 40 Code of Federal Regulations Part 312. The objective of this Phase I ESA is to identify Recognized Environmental Conditions (RECs), Historical RECs (HRECs), and Controlled RECs (CRECs) that affect the Subject Property.

The Subject Property is located at 2665 The Alameda and consists of a triangular parcel of fenced, vacant land in the city of Santa Clara and is identified by the Assessor Parcel Number 230-12-012. The Subject Property is bordered by The Alameda to the northeast, Park Avenue to the west, Bellomy Street to the northwest, and a Safeway parking lot to the south. Adjacent properties of note include various residence halls of Santa Clara University located to the east and northeast of the Property; a preschool and childcare center, Kids on Campus, to the northwest; University Cleaners to the southwest; and Pizza My Heart to the west.

To assess environmental conditions at the Subject Property, Tetra Tech reviewed land use history, geology, hydrogeology, and environmental records for the Subject Property and its general vicinity; conducted a visual site reconnaissance; and reviewed the completed questionnaires. During the course of performing this Phase I ESA, Tetra Tech identified the following RECs:

ASTM defines a REC as:

> *(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

The Subject Property is an active Leaking Underground Storage Tank (LUST) cleanup site under the San Francisco Bay Regional Water Quality Control Board (RWQCB). A former UNOCAL branded service station operated on the Subject Property from approximately 1930 to 1993. Site features included a station building, three product dispenser islands, four USTs, one waste oil UST, and a clarifier. In March 1993, the service station ceased operations and all above- and below-ground facilities were removed. Site assessments performed at the Subject Property since 1988 revealed petroleum hydrocarbon impacts to soil, soil vapor, and groundwater. A groundwater monitoring well network consisting of groundwater monitoring wells installed at and to the north of the Subject Property has been gauged and sampled generally on a quarterly basis since 1991. The groundwater flow direction beneath the Subject Property is predominantly to the north-northwest with a high variability in groundwater elevations since groundwater monitoring began. Remediation activities at the Subject

Property have included the use of absorbent socks, soil excavation, soil vapor extraction, groundwater extraction and treatment, injection of oxygen release compound to enhance bioremediation, biosparging, ozone sparging, and sulfate applications. A request for closure was made in May 2020 under the Low-Threat Underground Storage Tank Case Closure Policy; however, the RWQCB has not granted closure for the Subject Property. The results of the latest groundwater monitoring event conducted in March 2022 indicates significant petroleum impacts remain on the Subject Property and have migrated offsite to the northwest. The presence of petroleum products at the Subject Property due to a release and the lack of regulatory closure is considered a REC.

ASTM defines an HREC as:

> *A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

The HREC identified during the completion of this Phase I ESA is as follows:

A former gasoline service station located at 700 Bellomy Street (currently Pizza My Heart) is immediately west of the Subject Property across Park Avenue. A 2,500-gallon and a 750-gallon UST containing diesel/gasoline were discovered during excavation activities within the sidewalk of Park Avenue in 1994. Elevated concentrations of petroleum hydrocarbons were detected in soil samples collected from beneath the USTs and in groundwater. Three groundwater monitoring wells were installed at the northern portion of the property and within Park Avenue. The last groundwater monitoring event at this property was conducted in April 2002. Total Petroleum Hydrocarbons as gasoline (TPHg) was detected in groundwater samples at concentrations up to 2,630 micrograms per liter (µg/L) and benzene was detected in groundwater samples at concentrations up to 15.7 µg/L. The facility received a case closure letter from the Santa Clara Valley Water District on June 26, 2002 with the advisory that moderate levels of residual soil contamination exist in the vicinity of the former tank system beneath the sidewalk along Park Avenue. The release from the UST is considered a HREC as the petroleum impacts associated with the release from the property may have affected the Subject Property; however, the impacts have been addressed to the satisfaction of the regulatory authority.

ASTM defines a CREC as:

> *A recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

No CRECs were identified during the completion of this Phase I ESA.

1.0 INTRODUCTION

1.1 PURPOSE

Tetra Tech performed a Phase I Environmental Site Assessment (ESA) on behalf of Kapital Partners, LLC (Kapital Partners; the User) for the property located at 2665 The Alameda, Santa Clara, California (Subject Property). This Phase I ESA was completed for the potential purchase and development of the Subject Property as student housing. This Phase I ESA was completed in general accordance with American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, E1527-13 and E1527-21* as well as the All Appropriate Inquiries Final Rule 40 Code of Federal Regulations Part 312. The objective of this Phase I ESA is to identify Recognized Environmental Conditions (RECs), Historical RECs (HRECs), and Controlled RECs (CRECs) that affect the Subject Property.

1.2 SCOPE OF SERVICES

The scope of services was defined by Tetra Tech's proposal for the Subject Property dated December 8, 2021. The scope included a regulatory database review, historical and physical record review, interviews, a visual non-invasive site reconnaissance of the Subject Property and adjoining land, and preparation of this report.

1.3 SIGNIFICANT ASSUMPTIONS

Tetra Tech assumes that all information obtained from others for the Subject Property is correct and complete. Additionally, Tetra Tech assumes that the User provided Tetra Tech with all reasonably ascertainable prior environmental information concerning the Subject Property and that the User will read this report in its entirety.

1.4 LIMITATIONS AND EXCEPTIONS OF ASSESSMENTS

The findings and conclusions presented in this report are based on the procedures described in ASTM Practice *E1527-13 and E1527-21*. This report was prepared based on a review of data, as described therein, in accordance with generally accepted professional practices, applicable to work of similar nature and complexity of similar localities, at the time the services were performed. The scope of this report is limited in nature and intended to provide an evaluation of the current environmental conditions at the Subject Property at the time of the report preparation and does not constitute definitive review of all the potential environmental impairments and situations not otherwise ascertainable from the available information and observation.

It is important to recognize that even the most comprehensive scope of services may not detect all the environmental liabilities at a particular site. Therefore, nothing herein shall be construed as a representation or certification that the Subject Property is either fully characterized or is free of environmental impairments and/or contamination. This Phase I ESA conforms to the level of documentation required in ASTM Practice *E1527-13 and E1527-21*.

To prepare this report, Tetra Tech relied on information as discussed in the report, which it believes to be reliable (refer also to the Environmental Risk Information Services, Inc. [ERIS] Disclaimer, Appendix A).

Tetra Tech has endeavored to meet what it believes is the applicable standard of care for the services performed and, in doing so, is obliged to advise Kapital Partners of Phase I ESA limitations. Tetra Tech believes that providing information about limitations is essential to help clients identify and thereby manage risks.

This Phase I ESA did not include any inquiry with respect to radon, methane, asbestos-containing material, lead-based paint, lead in drinking water, formaldehyde, endangered species, wetlands, subsurface investigation activities or other services or potential conditions or features not specifically identified and discussed herein. It is noted that inquiry into the above environmental issues are not required to meet ASTM Standard *E1527-13 and E1527-21*. In those instances where additional services or service enhancements are included in the report as requested or authorized by the client, specific limitations attendant to those services are presented in the text of the report.

This report represents Tetra Tech's service to Kapital Partners as of the report date. In that regard, the report constitutes Tetra Tech's final document, and the text of the report may not be altered in any manner after final issuance of the same. Opinions relative to environmental conditions given in this report are based on information derived from the most recent site reconnaissance and from other activities described herein. Kapital Partners is herewith advised that the conditions observed by Tetra Tech are subject to change. Certain indicators of the presence of hazardous materials may have been latent or not present at the time of the most recent site reconnaissance and may have subsequently become observable. In a similar manner, the research effort conducted for a Phase I ESA is limited.

Further, the services herein shall in no way be construed, designed, or intended to be relied upon as legal interpretation or advice.

1.5 USER RELIANCE

This report is an instrument of service of Tetra Tech and includes research and a review of specified and reasonably ascertainable information and a reconnaissance of the Subject Property to identify RECs in general accordance with ASTM Standard *E1527-13 and E1527-21*. Tetra Tech's Phase I ESA was performed in accordance with generally accepted practices of the profession undertaken in similar studies at the same time and in the same geographical area, and Tetra Tech observed that degree of care and skill generally exercised by the profession under similar circumstances and conditions.

A User is defined by ASTM Practice *E1527-13 and E1527-21* as the party seeking to use Practice *E1527-13 and E1527-21* to complete an ESA of a Subject Property and may include a potential purchaser of land in the property, a potential tenant of the property, an owner of the property, a lender, or a property manager. The scope of services and the report have been completed on behalf of and for the exclusive use by Kapital Partners (the User) solely for their use and reliance in the Phase I ESA of the Subject Property Kapital Partners is the only party to which Tetra Tech has explained the risks involved and which has been involved in the shaping of the scope of services needed to satisfactorily manage those risks, if any, from Kapital Partner's point of view.

Accordingly, Tetra Tech's findings and opinions related in this report may not be relied upon by any party except for Kapital Partners without the consent of Tetra Tech.

2.0 SITE DESCRIPTION

2.1 SUBJECT PROPERTY LOCATION

The Subject Property is located at 2665 The Alameda and consists of a triangular parcel of fenced, vacant land in the city of Santa Clara and is identified by the Assessor Parcel Number 230-12-012 (Figure 1). The Subject Property is bordered by The Alameda to the northeast, Park Avenue to the west, Bellomy Street to the northwest, and a Safeway parking lot to the south. Adjacent properties of note include various residence halls of Santa Clara University located to the east and northeast of the Property; a preschool and childcare center, Kids on Campus, to the northwest; University Cleaners to the southwest; and Pizza My Heart to the west (Figure 2).

2.2 CURRENT USE OF PROPERTY

The Subject Property is currently a vacant dirt lot. The Subject Property is fenced on all sides with an entrance gate located on Park Avenue.

2.3 SITE IMPROVEMENTS

The Subject Property is currently vacant and unimproved. The Subject Property is in a mixed-use commercial/residential area in Santa Clara, California. Santa Clara lies south of the San Francisco Bay, between the cities of San Jose and Sunnyvale, California. The Subject Property was previously used as a gas station; however, the USTs and any associated features have been removed. Numerous soil vapor extraction and groundwater monitoring wells remain on the Subject Property. The Subject Property has fencing on all sides. A paved sidewalk is present on all sides of the Subject Property boundary, except the southeast where a parking lot is located.

2.4 CURRENT USES OF ADJOINING PROPERTIES

The term adjoining property, as defined by the ASTM standard, means properties that border or are contiguous or partially contiguous with the Subject Property, or would be so but for a street, road, or other public thoroughfare separating them. The adjoining properties include a preschool to the northwest, various student residence halls to the north and northeast, commercial establishments to the west and southwest, a drycleaner (University Cleaners) is located southwest of the Subject Property and a parking lot is located to the south and southeast.

3.0 USER PROVIDED INFORMATION

3.1 TITLE RECORDS

Title records were not provided to Tetra Tech by Kapital Partners for the Subject Property.

3.2 ENVIRONMENTAL LIENS, ACTIVITIES, OR USE LIMITATIONS

Kapital Partners, as the User of this Phase I ESA, indicated they are not aware of environmental cleanup liens against the Subject Property that are filed or recorded under federal, tribal, state, or local law. Kapital Partners has also indicated based on the past usage of the Subject Property, there may be potential activity use limitations, such as engineering controls, or land use restrictions or institutional controls that are in place on the Subject Property and/or have been filed or recorded in a registry under federal, state, or local law. Kapital Partners responses to the All Appropriate Inquiry User Questionnaire are included in Appendix B and have been incorporated into this Phase I ESA.

3.3 SPECIALIZED KNOWLEDGE

Kapital Partners, as the User of this Phase I ESA, indicated that it does not have any specialized knowledge or experience related to the Subject Property or nearby properties Kapital Partners is not involved in the same line of business as the current or former occupants of the subject property or on adjoining properties so it would have no knowledge of the chemicals and processes used by current or former occupants.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Kapital Partners, as the User of this Phase I ESA, have indicated that it is aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases. Kapital Partners is aware that the past use of the Subject Property has been for a gasoline station and that remediation activities have taken place, but it is not aware of specific chemicals that are or may have been present on the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Kapital Partners verified the price being paid for the area purchased reasonably reflects the fair market value of the Subject Property.

3.6 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

The Subject Property is owned by Chevron and is currently vacant.

3.7 REASONS FOR PERFORMING PHASE I ESA

The Phase I ESA was requested by Kapital Partners to evaluate existing environmental conditions, if any, as they pertain to the proposed purchase and development of the Subject Property for student housing.

4.0 RECORDS REVIEW

4.1 HISTORICAL USE INFORMATION

The purpose of the record review was to obtain and review reasonably ascertainable records that will help identify RECs. Tetra Tech contracted with ERIS to conduct a search of required federal, state, and tribal databases. A copy of the City Directory, Aerial Maps, Topography Maps, and Physical Settings Report generated on February 28, 2022, is included in Appendix C of this report.

4.1.1 Ownership Information

Owner/occupant questionnaire was not completed by Chevron. Based on the information gathered from various databases including the GeoTracker website, the lack of completed questionnaire is not considered a significant data gap.

4.1.2 Review of Aerial Photographs

Year	Property	Surrounding Properties	Sources
1931	A building is present on the Subject Property	N: CA-82 is present northeast of the Subject Property. There are several paved roads and developments. E: There appears to be construction of a large university building along with other university buildings. S: There appears to be a facility with several buildings immediately south of the Subject Property. Other vacant lots and residential buildings are present further south. W: The area immediately west of the Subject Property is a vacant lot. Further west there are residential buildings.	A(1931)
1939	The Subject Property appears to be in similar configuration to the previous year.	N: The Alameda and Park Avenue are now clearly paved. There are several paved roads and developments further north of the Property E: There appears to be construction of a large university building along with other university buildings. S: The buildings associated with the apparent facility south of the Subject Property are no longer present. A vacant lot further south has been graded. W: Buildings are now present in the lot immediately west of the Subject Property. Further west there are residential buildings.	A(1939)
1948	Several structures are now present on the Subject Property.	N: The area immediately north of the Subject Property consists of many small buildings E: Several university buildings are present in the immediate vicinity of the Subject Property. Other buildings are present further east. S: Several buildings and structures are now present in the lot immediately south of the Subject Property. Residential developments are present further south. W: The lot immediately west of the Subject Property now has several buildings present.	A(1948)

Year	Property	Surrounding Properties	Sources
1956	The Subject Property appears to be in similar configuration to the previous year.	N: Some of the buildings that were present north of the Subject Property have been cleared. The lot north of the Subject Property appears mostly vacant. E: The area immediately east of the Subject Property has a similar configuration to the previous aerials. S: Several buildings are present in the lot immediately south of the Subject Property. The area further south consists of paved roads and residential developments. W: The area immediately west of the Subject Property has a similar configuration to the previous aerial.	A(1956)
1960	A circular structure is now clearly present in the southern portion of the Subject Property. Several small square structures are present in the center of the Subject Property.	N: The area north of the Subject Property appears to be in similar configuration to the previous year, with the exception of the addition of several buildings in the lot to the north. E: The area immediately east of the Subject Property has a similar configuration to the previous year. S: The lot immediately south of the Subject Property appears to have more structures and development than the previous year. W: The area immediately west of the Subject Property has a similar configuration to the previous year.	A(1960)
1965	A rectangular structure is now present in the southern portion of the Subject Property. The square structures in the center of the Subject Property are no longer visible.	N: A parking lot and athletic facility is now clearly present further north of the Subject Property. Several buildings have been constructed immediately north of the Subject Property at the university. E: The area immediately east of the Subject Property has a similar configuration to the previous year. S: The structures present immediately south of the Subject Property have been removed and the Subject Property appears vacant except for a few small structures. W: The area immediately west of the Subject Property has a similar configuration to previous years. Washington Street is now visible further west of the Subject Property.	A(1965)
1968	The Subject Property appears to be in similar configuration to the previous year.	N: The area north of the Subject Property is in similar configuration to previous years. E: The area east of the Subject Property is in similar configuration to previous years S: A large building and a parking lot are now present in the lot immediately south of the Subject Property. W: The area west of the Subject Property is in similar configuration to previous years.	A(1968)
1974	The Subject Property appears to be in a similar configuration as the previous years.	N: The area north of the Subject Property is in similar configuration to previous years except for construction that appears to be taking place in the parking lot adjacent to the athletic facility. E: The area east of the Subject Property is in similar configuration to previous years. S: The area south of the Subject Property is in similar configuration to previous years. W: The area west of the Subject Property is in similar configuration to previous years.	A(1974)
1980	Several structures are visible on the Subject Property.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(1980)

Year	Property	Surrounding Properties	Sources
1987	The Subject Property appears to be in a similar configuration as the previous years.	N: The area north of the Subject Property is in similar configuration to previous years. E: The lot immediately east of the Subject Property has been cleared. S: The area south of the Subject Property is in similar configuration to previous years. W: The area west of the Subject Property is in similar configuration to previous years.	A(1987)
1993	There does not appear to be any buildings or structures present on the Subject Property.	N: The area north of the Subject Property is in similar configuration to previous years. E: The lot immediately east of the Subject Property appears vacant except for two buildings. S: The area south of the Subject Property is in similar configuration to previous years. W: The area west of the Subject Property is in similar configuration to previous years.	A(1993)
2003	The Subject Property appears to be in a similar configuration as the previous years.	N: The area north of the Subject Property is in similar configuration to previous years. E: The lot immediately east of the Subject Property now has several buildings and parking lots. Another baseball field has been constructed in the athletic facility. S: The area south of the Subject Property is in similar configuration to previous years. W: The area west of the Subject Property is in similar configuration to previous years.	A(2003)
2005	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2005)
2010	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2010)
2012	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2012)
2014	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2014)
2016	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2016)
2018	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2018)
2020	The Subject Property appears to be in a similar configuration as the previous years.	No significant changes could be discerned in the surrounding properties to the Subject Property.	A(2020)

N= North, E = East, S = South, W = West

Sources:
A = aerial photograph (year in parentheses)
NA = not applicable (no sources found)

No RECs were specifically identified from review of historical aerial photographs.

4.1.3 Review of Topographic Maps

A review of U.S. Geological Survey topographic maps was conducted for the years 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, and 2015. The 1889 Quadrangle includes the Monterey Line Railway, which runs from the northwest to the southeast in relation to the Subject Property. The Guadalupe River is also visible northeast of the Subject Property. Building developments are present to the west and to the southeast of the Subject Property. No significant changes could be discerned on the 1897 and 1899 Quadrangles from the 1889 Quadrangles. There are significant developments in the vicinity around the Subject Property on the 1953 Quadrangle. Santa Clara University and San Jose Municipal Airport are now visible north of the Subject Property. The lot immediately east of the Subject Property has water tanks, buildings, and athletic fields present. With the exception of building developments, no significant changes could be discerned on the 1961 Quadrangle. The 1968 Quadrangle shows the development of several buildings in the lots east and north of the Subject Property. No significant changes were notes in the 1973, 1980, and 2015 Quadrangles.

4.1.4 Review of City Directories

A review of city directories for the years 1930, 1935, 1940, 1945, 1950, 1955, 1961, 1966, 1971, 1976, 1981, 1987, 1990-1991, 1995-1996, 2001-2002, 1006, 2012, 2016, and 2020 was performed for 2550-2710 of The Alameda, 2850-3000 of Park Avenue and 700-799 of Bellomy Street. The results of the city directory search indicate mixed use of commercial and residential listings. Gas stations were listed at 2725 The Alameda from 1935 through 1955 under the names of Union Service Station (1935, 1940, and 1945), Rosensweig Henry gas station (1950), Faler's Union gas station (1955) and at 2665 The Alameda from 1961 through 1987 (inferred from the 1971 listing) under University Union Service (1961, 1966, 1971, 1976, 1981, 1987). Pacific Manufacturing was listed at 2610 The Alameda in 1935, 1940, 1945, 1950, 1955, and 1961.

4.2 PHYSICAL SETTING INFORMATION

The Subject Property is located within the Santa Clara Valley. The Santa Clara Valley is confined on the west by the Santa Cruz Mountains Coast Range and the east by the Diablo Range. The Valley is an alluvial basin that deposits into the San Francisco Bay to the north. Two major faults run along the basin, the San Andreas fault to the west and the Hayward and Calaveras faults to the east. The Valley is filled with Jurassic-aged volcanic and metamorphic rocks, Franciscan Complex and Coast Range ophiolite complex, which are in turn overlain by Pliocene-age marine strata of the Monterey Formation. Surficial deposits include Pliocene and younger non-marine strata, which are widespread in outcrops and in the subsurface of the southwestern Santa Clara Valley, include the Pliocene and Pleistocene Santa Clara Formation and overlying, unnamed Quaternary deposits.

Regionally, the Subject Property lies within the Santa Clara Subbasin of the Santa Clara Valley Groundwater Basin which has a surface area of approximately 240 square miles and is made up of permeable valley fill alluvium. The Subbasin's eastern and western geologic boundaries are formed by the impermeable bedrock of the Diablo Range and Santa Cruz Mountains, respectively. The Subbasin's northern geologic boundary is formed by contact with low permeability bay mud deposits

at San Francisco Bay, and the southern geologic boundary is the Coyote Narrows south of the City of San Jose. The Subbasin is filled with alluvium that has washed down from the surrounding mountains and range in thickness from about 200 feet along the Valley's edges to over 1,300 feet in the Valley's interior. The water-bearing formations of the Subbasin include the Santa Clara Formation and the Quaternary deposits which are the most important water-bearing units in the Subbasin. The permeability of the Valley alluvium is generally high and principally all large production wells derive their water from it (DWR 1975).

Previous assessments conducted on the Subject Property indicate soils in the vicinity consist primarily of clays interbedded with silts and silty sands to a depth of approximately 22 feet below ground surface (bgs). Soils observed from approximately 22 to 40 feet bgs consisted primarily of silty sands interbedded with silts. Silts and clayey silts with sand, fine sands, and gravelly sands interbedded with silty clays and gravelly clays were generally observed from 40 to 55 feet bgs. Silty clay and clayey silt were observed below 55 feet bgs (IT 2001). The Physical Settings Report from ERIS is included in Appendix A.

4.3 REGULATORY REVIEW

The purpose of the record review is to obtain and review reasonably ascertainable records that will help identify RECs. For this review, records were obtained from ERIS under order number 22022400175 on February 28, 2022 (ERIS 2022). The ERIS report is included in Appendix A. As noted under ASTM, information requested and not received within 20 days after the report date is not required to be incorporated into Phase I ESA reports. Remaining regulatory support data will be maintained with the Tetra Tech project file. The ERIS search area, as shown on ERIS Area/Corridor Report located in Appendix A, includes the Subject Property plus a minimum 1-mile radius.

PO – Subject Property Only

* Not all databases are listed in this table. A complete listing of databases searched are included in Appendix A.

4.3.1 Federal Database Information

Federal databases were searched for environmental records associated with the Subject Property and adjoining properties within a 1-mile radius, as listed in Table 1.

SEMS List 8R Archive Sites (SEMS ARCHIVE). The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. There are two archive sites listed on this database.

The *Santa Clara University* at 820 Alviso Street, 0.12 miles southwest of the Subject Property is listed on the SEMS Archive. The *PG&G Gas Plant Santa Clara* located at COR Benton and Railroad Avenue, 0.48 miles north of the Subject Property is also listed on the Archive. However, based on the nature of the listings, these facilities are not considered a REC to the Subject Property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS). CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA. The two archive sites listed on SEMS Archive Sites are also listed on this database.

The *Santa Clara University* at 820 Alviso Street, 0.12 miles southwest of the Subject Property is listed on the database. The *PG&G Gas Plant Santa Clara* located at COR Benton and Railroad Avenue, 0.48 miles north of the Subject Property is also listed on the database. However, based on the nature of the listings, these facilities are not considered a REC to the Subject Property.

CERCLIS – No Further Remedial Action Planned (CERCLIS NFRAP). An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site. There two archive sites listed on SEMS Archive Sites are also listed on this database.

The *Santa Clara University* at 820 Alviso Street, 0.12 miles southwest of the Subject Property is listed on the database. The *PG&G Gas Plant Santa Clara* located at COR Benton and Railroad Avenue, 0.48 miles north of the Subject Property is also listed on the database. However, based on the nature of the listings, these facilities are not considered a REC to the Subject Property.

Resource Conservation and Recovery Act (RCRA) Corrective Action Report. The Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) database identifies hazardous waste handlers with RCRA corrective action activity. There are two listings in this database.

FMC Corporation located at 1125 Coleman Avenue, 0.73 miles northeast of the Subject Property is noted as a small quantity generator. ERIS database shows a past release into soil and groundwater. A search on GeoTracker database indicates gasoline contamination at this facility. The Site was cleaned up under the oversight of San Francisco Bay RWQCB and Santa Clara Valley Water District. Although residual contamination exists at this site, the concentrations are below regulatory concern. The site received closure in 2001 and ERIS database shows institutional controls in place. This facility is not considered a REC to the Subject Property.

The *Former ECS* located at 705 Reed Street, 0.97 miles northwest of the Subject Property is listed on the database. The facility is listed as a small quantity generator with minor violations in the past related to facility standard, manifests/records reporting, container use and management. Based on the nature of the listing, this facility is not considered a REC to the Subject Property.

RCRA non-CORRACTS TSD Facilities (RCRA TSD). This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). There are seven listings in this database. None of the listings have any violation records and based on the nature of the listings, they are not considered RECs to the Subject Property.

RCRA Non-Generators (RCRA Non-Gen). The RCRA Non-Generators (RCRA Non-Gen) database includes information on sites that do not presently generate hazardous wastes. There are thirteen facilities within the search area that were listed as non-generators. None of the listed facilities hold records of violations. These listings are not considered RECs to the Subject Property.

Facility Index System/Facility Registry System (FINDS/FRS). The Facility Index System/Facility Registry System (FINDS) database contains both facility information and "pointers" to other sources of information that contain more detail. Four facilities were identified from the FINDS database:

- *Former UNOCAL #715* and *UNOCAL #0715* are located on the Subject Property and are listed on the database with a description of a former gasoline service station. This is further discussed in section 4.3.5. The contamination from the former fuel USTs on-the Subject Property is considered a REC.
- *Stuft Pizza* located at 700 Bellomy Street 0.02 miles west of the Subject Property is listed on the database. This facility is discussed above under 'EnviroStor Database'. A search on GeoTracker database shows information on UST removal and Site closure. A 2,500 gallon and a 750-gallon UST containing diesel/gasoline were discovered during excavation activities on the sidewalk of Park Avenue in 1994. They were found to be in demolished sections and the tanks were removed in January 1994. Soil samples were collected after the tank excavation at approximately 2 feet below the bottom of the tank as contamination was evident below the tank. Up to 350 ppm of Total Petroleum Hydrocarbons as diesel (TPHd) was detected at 15-16 feet bgs. Excavation of the contaminated soil included a depth of 18 feet below the pavement surface. At this depth, due to apparent instability, the excavation was ceased by the Fire Department. The tank was located close to the intersection of Bellomy street and Park Avenue, adjacent to the west of the Property, across Park Avenue. The groundwater flow is to the north and

northwest. The closure letter from Santa Clara Valley Water District for this facility indicates moderate levels of residual soil contamination exist in the vicinity of the former underground storage tank system beneath the sidewalk on Park Avenue (adjacent to the Property). This Facility is discussed further in Section 4.3.5. The facility received a case closure status in 2002 and this listing is considered a HREC for the Subject Property based on the proximity, presence of residual contamination and closure status.

- *Zycon Corporation* located at 390 Bellomy Street, is listed on the ERIS database under FINDS and marked adjacent to the Subject Property on the west. However, a search on GeoTracker shows the actual location is 0.2 miles northeast of the Subject Property. Four USTs were located at this Site. A 5,000 gallon and a 10,000-gallon diesel tank were removed in June 1993. A 750 gallon and a 1,500-gallon gasoline tanks were filled with slurry in August 1986. The initial soil samples indicated high levels of TPH once the tanks were removed. The tank pit area was over excavated, and the confirmation sampling indicated low or non-detect values of contamination. The Site received closure in June 1995. This listing is not considered a REC to the Subject Property based on proximity and hydrogeologic settings.

Formerly Used Defense Sites (FUDS). The Formerly Used Defense Sites (FUDS) database includes locations of FUDS properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers. *FMC Corporation* located 0.7 miles northeast of the of the Subject Property is listed on the database. No further information is available on this facility on ERIS database or the GeoTracker database. Based on the distance from the Subject Property and the nature of the listing, this listing is not considered a REC to the Subject Property.

Mineral Resource Data System (MRDS). The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the MRDS of the U.S. Geological Survey and the Mineral Availability System/Mineral Industry Locator System originated in the U.S. Bureau of Mines, which is now part of U.S. Geological Survey. *Hubble Sand and Gravel pit* is located 0.2 miles south southwest of the Subject Property and is associated with production of sand and gravel. *Hubble Quarry and Mill* is located 0.5 miles west of the Subject Property and is associated with Granite mining. These listings as presented are not considered a REC to the Subject Property.

Alternative Fueling Stations (ALT FUELS). A list of alternative fueling stations are made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. The list includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE) locations. There are six listings in this database within the search area around the Subject Property. These listings are not considered a REC to the Subject Property.

4.3.2 State Database Information

California databases was searched for environmental records associated with the Subject Property and adjoining properties within a 1-mile radius, as listed in Table 1.

State Response Sites (RESPONSE). The State Response Sites database identifies confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation. *AJ Commercial Laundry* located at 1173-1175 Campbell Avenue, 0.47 miles east of the Subject Property is listed on the database for contamination of groundwater.

The facility has two parcels, each approximately 1.0 acre. The 1175 Campbell Avenue is identified by Santa Clara County Assessor's Parcel Number 23013008. It has 2 warehouse type buildings, which are 19,000 square feet in size. The 1173 Campbell Avenue is identified by Santa Clara County Assessor's Parcel Number 23013009. It has 3 warehouse type buildings, which are 19,000 square feet in size. The buildings on the site were built in 1956/1957. The site is located approximately 4.5 miles northwest of downtown San Jose, California. The surrounding area consists of mixed commercial/industrial and residential developments. DTSC issued an Imminent and Substantial Endangerment Order for the Site on June 27, 2006 after a Site investigation in May 2005 revealed elevated levels of petroleum compounds, metals, and chlorinated volatile organic compounds in the groundwater. In January 2010, a dual-phase extraction system was operated for 9 months, removing contaminated groundwater and soil vapor. In May 2015, another round of extraction started and ran for approximately one year. Groundwater, soil vapor, and soil samples have been collected from the Site at various times since 2005. Further investigation is planned at the Site to evaluate potential off-Site impacts. Based on the hydrogeology and the proximity of the facility, this is listing is not considered a REC to the Subject Property.

EnviroStor Database (ENVIROSTOR). The ENVIROSTOR Data Management System provided by the DTSC includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/ Investigation sites. This database is state equivalent of the Comprehensive Environmental Response, Compensation and Liability Information System.

Twenty-six sites within the search radius were listed on the ENVIROSTOR database. Some of the listings are discussed in detail:

- *Hadco Santa Clara, Inc*. located at 445 El Camino Real is located 0.31 miles north east of the Subject Property. A search on GeoTracker database indicates the site is currently an unoccupied former auto repair and commercial gasoline service station. An unauthorized release was reported in November 1986 following the removal of two gasoline underground storage tanks (USTs) in July of 1986. An unknown volume of soil was excavated to a depth of 12 feet below grade and disposed of off-site. Several rounds of investigation and sampling, including the installation of 12 monitoring wells, have adequately defined the nature and extent of the contaminant plume. Remediation included soil excavation, completed in 1986, and soil vapor extraction with air sparging conducted between January 2013 and September 2014. The most recent groundwater sampling data report concentrations that satisfy the groundwater criteria of the Low-Threat Case Closure Policy. The facility received case closure as of August 2016.

- *Santa Clara University Physical Plant* located at 731 Campbell avenue is 0.35 miles northeast of the Subject Property. This approximately 1-acre facility is situated in an industrial area of the city. The site was used in the past variously as a swine farm, a pear storage facility, and a laundry. Subsequently Santa Clara University developed it to its current use in the 60's and purchased it in 1981. Site soils bgs have been found contaminated with TPH (Total Petroleum Hydrocarbons) as gasoline (600 ppm) diesel (2900 ppm), oil and grease (2200 ppm). Due to the presence of leaky underground fuel tanks that were installed by the past operators of the site. The leaky tanks and most of the contaminated site soils have been excavated after determining the extent of contamination and removed for off-site disposal. Post removal sampling indicate substantial reduction of residual contamination (TPH 174). Groundwater has been contaminated with gasoline (12 ppm), diesel (11 ppm), benzene (0.24 ppm), toluene (0.064 ppm), ethylbenzene (0.0015 ppm) and xylene (0.470 ppm). Contamination was discovered by the University in 1980 during tank renovation.
- *Owens Illinois Glass Co* located at 1185 Campbell Avenue, 0.39 miles east of the Subject Property is listed on the database. However, no further information is available on GeoTracker or EnviroStor databases.
- *Custom Food Machinery* located at 1180-1184 Campbell Avenue; 0.43 miles East northeast of the Subject Property is listed on the database. A past usage of this site for industrial machinery manufacturing including the repair of transformers led to contamination of soil and groundwater. A leak resulted from a 5,000-gallon diesel UST at the Site and the tank was removed in June 1991. The Santa Clara Valley Water District recommended case closure based on soil samples collected during tank excavation, over excavation, soil treatment and the relative low permeability of soils encountered in the region. The site cleanup status shows it was closed in August 1992.
- The *TW Smith Plumbing Supply* located at 1200 Campbell Avenue, 0.44 miles east northeast of the Subject Property is listed on the database. A search on EnviroStor database indicates several leaking USTs in the past that were removed. A 1,000 gallon and a 10,000-gallon gasoline tank were removed in 1989. Although contaminants were left in the soil, they were determined to be below the Environmental screening levels and the case received closure in 1995. Additional USTs were removed in 1999 and contamination remains at the site. However, based on soil sampling results from 2000, the Santa Clara Valley Water District granted closure for this case in April 2001.
- *Blue's Roofing Company* located at 1181 Campbell Avenue, 0.45 miles east of the Subject Property is listed on the database. In May 1996, three 2,000-gallon UST (two contained gasoline and one diesel) were removed from the site. Although the tanks appeared to not have holes or damages, the groundwater samples indicated contamination. Annual monitoring of groundwater was conducted until 2011. The Santa Clara Valley Water District staff concluded that the impacted groundwater is restricted to the vicinity of former tanks and the groundwater plume has stabilized. Natural attenuation was assumed to occur based on reducing concentrations in groundwater samples noted over time. Based on these findings, the San Francisco Bay RWQCB issued the following

statement "*Residential contamination in both soil and groundwater could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The District and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation and installation of water wells. This notification shall include a statement that residual contamination exists on the Subject Property and list all mitigation requirement. The levels of residual contamination and any associated site risk are expected to reduce with time*" and granted closure to this case in May 2004.

- *Kilman Sales* located at 1179 Campbell Avenue, 0.45 miles east of the Subject Property is listed on the database. A search on the EnviroStor database indicates no records of releases or spills at this facility.
- AJ Commercial Laundry / All Chem Supply is located at 1173-1175 Campbell Avenue, 0.47 miles east of the Subject Property. DTSC issued an Imminent and Substantial Endangerment Order for the Site on June 27, 2006 after a Site investigation in May 2005 revealed elevated levels of petroleum compounds, metals, and chlorinated volatile organic compounds in the groundwater. In January 2010, a dual-phase extraction system was operated for 9 months, removing contaminated groundwater and soil vapor. In May 2015, another round of extraction started and ran for approximately one year. Groundwater, soil vapor, and soil samples have been collected from the Site at various times since 2005. The site shows an 'Active' cleanup status on the database.
- *Safway* located at 1177 Campbell Avenue, is 0.49 miles east of the Subject Property. Safway is a scaffolding company and there is no record of releases or spills at this site.
- *Variety Metal Finishing, Inc* located at 1166 Campbell Avenue, 0.5 miles east of the Subject Property is listed on the database. The cleanup Status shows "Inactive-Needs Evaluation". However, no additional information is available on the EnviroStor Database.
- *Santa Clara Police Station* located at 501 El Camino Real, 0.52 miles north northwest of the Subject Property is listed on the database. Coal gas used to power streetlights and to generate electricity was generated on site from 1890s through the 1930s. This led to contamination of soil with lead, nickel, and PAHs. Currently, the site has land use restrictions and the site cleanup status shows "Certified / Operation and Maintenance as of 12/8/2000".
- *Precision Specialties* located at 1158 Campbell Avenue is 0.54 miles east of the Subject Property. The database does not indicate any records of releases at this facility. However, use of hazardous materials and poor housekeeping practices indicate that the potential for release exists. The potential contaminants include TPHg, TPHd, TCE and PCE.
- *Silicon Valley Microelectronics* located at 1150 Campbell avenue is 0.54 miles east of the Subject Property. No evidence of release was recorded at this facility.
- *Variety Metal Finishing* located at 1166 Campbell Avenue is 0.54 miles east of the Subject Property. During San Jose Fire Department file review, an inspection report for September 1993 revealed that a release of chemicals (cyanide plating bath, nickel sulfate tank) had occurred to secondary containment. Since the site has a tiered permit, it is subject to corrective action. The site has a cleanup status of "Inactive-needs evaluation".

- *FMC Corporation Ordnance Plant* located at 1125 Coleman Avenue is 0.66 miles northeast of the Subject Property. The site was used from 1905 to 1996 as FMC Corporation. Research, development, and manufacturing of military tracked vehicles was conducted at the site, primarily under U.S. Department of Defense contracts from 1951 to 1996 when the facility closed. The site operated an on-site landfill (1/4-acre) from 1946 to 1979. The 1125 Coleman address consisted of two areas, the North Test Track and the Central Plant. The site is undergoing a Resource Conservation and Recovery Act (RCRA) Facility Investigation pursuant to a Corrective Action Consent Agreement (CACA), Docket HWCA FY 95/96-2002 with the Department of Toxic Substances Control (DTSC). An Interim Remedial Measures Work Plan was approved December 18, 2000 for the Central Plant area. Shallow soil samples detected total petroleum hydrocarbons (TPH) and metals (manganese, hexavalent chromium). Contaminated soil was excavated to industrial standards and disposed off-site. A groundwater investigation is also on-going at the site under DTSC oversight. Identified contaminants included volatile organic compounds (VOCs), total petroleum hydrocarbons (grease and diesel) and metals (arsenic, hexavalent chromium, and manganese). A dual phase extraction (DPE) system, with approximately 80 wells, has been installed. It treats the soil vapor and groundwater with granular-activated carbon units. The treated water is discharged under a NPDES permit.

Based on the proximity and the hydrogeologic settings, the facilities listed under the EnviroStor database are not considered a REC to the Subject Property.

EnviroStor Hazardous Waste Facilities (HWP). The Hazardous Waste Facilities (HWP) database contains detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor. There are four sites listed on this database and all are located greater than 0.7 miles from the Subject Property. These listings are not considered RECs to the Subject Property.

Leaking Underground Storage Tank (LUST). The Leaking Underground Storage Tank (LUST) database contains leaking underground storage tank listings.

The Subject Property is listed on the database for leaking USTs. The Subject Property is a former Unocal-branded service station located on the southeastern corner at the intersection of The Alameda and Park Avenue in Santa Clara, California. The service station operated from approximately 1930 to 1993. Previous site features included a station building, three product dispenser islands, three underground storage tanks (USTs) to the northwest of the former dispenser islands, one smaller UST near the northwestern corner of the former station building, one waste oil UST near the western edge of the former station building, and a clarifier at the southern corner of the former station building. Historical site activities include the removal and replacement of USTs in 1951 and 1968; repair of a leaking pump coupling that resulted in an estimated release of 2,378 gallons of product in 1964; investigation of evidence of UST leakage in 1968; and repair of a product line leak in 1981 (Arcadis 2020). The total quantity of fuel released is unknown. The contamination from the former LUSTs is considered a REC to the Subject Property.

Stuft Pizza located at 700 Bellomy Street 0.02 miles west of the Subject Property is listed on the database. This facility is discussed above under 'EnviroStor Database'. A search on GeoTracker database shows information on UST removal and Site closure. A 2,500 gallon and a 750-gallon UST containing diesel/gasoline were discovered during excavation activities on the sidewalk of Park Avenue in 1994. They were found to be in demolished sections and the tanks were removed in January 1994. Soil samples were collected after the tank excavation at approximately 2 feet below the bottom of the tank as contamination was evident below the tank. Up to 350 ppm of TPHd was detected at 15-16 feet bgs. Excavation of the contaminated soil included a depth of 18 feet below the pavement surface. At this depth, due to apparent instability, the excavation was ceased by the Fire Department. The tank was located close to the intersection of Bellomy street and Park Avenue, adjacent to the west of the Property, across Park Avenue. The groundwater flow is to the north and northwest. The closure letter from Santa Clara Valley Water District for this facility indicates moderate levels of residual soil contamination exist in the vicinity of the former underground storage tank system beneath the sidewalk on Park Avenue (adjacent to the Property). The facility received a case closure status in 2002 and this listing is considered a HREC for the Subject Property based on the proximity and the presence of residual contamination.

Zycon Corporation located at 390 Bellomy Street, is listed on the ERIS database under LUST and marked adjacent to the Subject Property on the west. However, a search on GeoTracker shows the actual location is 0.2 miles northeast of the Subject Property. Four USTs were located at this Site. A 5,000 gallon and a 10,000-gallon diesel tank were removed in June 1993. Earlier, a 750 gallon and a 1,500-gallon gasoline tanks were filled with slurry in August 1986. The initial soil samples indicated high levels of TPH once the tanks were removed. The tank pit area was over excavated and the confirmation sampling indicated low or non-detect values of contamination. The Site received closure in June 1995. This listing is not considered a REC to the Subject Property based on proximity and hydrogeologic settings.

Santa Clara University located at 2795 The Alameda, 0.07 miles northwest of the Property, is listed on the database. Three USTs were removed from this facility in September 1986. A 6,000 gallon and a 4,000-gallon gasoline tank; and a 400-gallon waste oil tank. Although some residual contamination is present at this facility, the site received case closure in November 1999. Based on hydrogeology and proximity, this listing is not a REC to the Subject Property.

Musso Property located at 2491 The Alameda, 0.14 miles east southeast of the Subject Property is listed as LUST cleanup site. Three 1,000-gallon tanks containing gasoline were removed in January 1984. Severe corrosion of the tanks led to contamination of soil and groundwater. Soil samples were not taken at the time of tank removal since it was not required during that time period. However, site investigations began in 1990 and the contamination appears to be localized. After remedial activities, the site still contains residual TPH in the soil and shallow groundwater beneath the site. The site received closure in April 1999. Based on the localized contamination and the proximity to the Subject Property, this listing is not considered a REC.

Gasco 007 located at 2391 The Alameda, 0.18 miles east southeast of the Subject Property is listed as a LUST cleanup site. Three 5,000-gallon USTs and one 12,000-gallon UST containing gasoline were removed in 1992. This was followed by over excavation of soil to a depth of 29 feet bgs. Based on

groundwater monitoring results over time, the Santa Clara Valley Water District concluded that the plume is adequately characterized and relatively stable. The site received closure in January 1999 with a note indicating residual petroleum hydrocarbon contamination in groundwater is present beneath the site and likely off-site. However, the contamination is localized. This listing is not a REC to the Subject Property.

Highway 82 Segment 5 located at 2245 The Alameda, 0.24 miles east southeast of the Subject Property is listed as a LUST cleanup site. Three USTs with unknown contents were removed in October 1994. Residual contamination present on the site includes TPHg and the facility received case closure in September 2008. Based on the closure status and the proximity, this listing does not constitute a REC to the Subject Property.

The remaining listings on the LUST database all have case closure status and are located over 0.3 miles from the Subject Property. Based on the proximity and the hydrogeologic settings in the region, these listings are not considered a REC to the Subject Property.

Historical Hazardous Substance Storage Information Database (HHSS). The Historical Hazardous Substance Storage (HHSS) database contains information collected in the 1980s from facilities that stored hazardous substances. *Union Oil SS 07165* located on the Subject Property are listed on HHSS along with *Texaco* located at 2795 The Alameda, 0.07 miles northwest of the Subject Property. The listings by itself are not considered a REC to the Subject Property.

Statewide Environmental Evaluation and Planning System (UST SWEEPS). The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board. The Subject Property is listed on the database along with *Gasco Service Station* located at 2391 The Alameda, 0.18 miles from the Subject Property. The listings by itself are not considered a REC to the Subject Property.

Aboveground Storage Tanks (AST). A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). *500 El Camino Real* located 0.23 miles west northwest of the Subject Property is listed on the database. This is not considered a REC to the Subject Property.

Delisted Storage Tanks (DELISTED CTNK). Delisted Storage Tanks (DELISTED CTNK) database contains a list of storage tank sites that were removed by the SWRCB in California Environmental Protection Agency (CalEPA) and the Cal FIRE Office of State Fire Marshal. There are 28 listings on the database and none of them are a REC for the Subject Property based on distance and hydrogeologic settings.

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions (LUR). The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions. There is one listing on this database within the search radius. *Custom Food Machinery* located at 1180-1184 Campbell

Avenue is 0.43 miles east northeast of the Subject Property. A portion of the property has land use restrictions and this facility is also discussed previously as a listing in 'EnviroStor' Database.

Deed Restrictions and Land Use Restrictions (DEED). A list of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker are made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. There is one listing on the database for *BART System Silicon Valley Berryessa Extension Project* located 0.48 miles from the Subject Property. This is not considered a REC to the Subject Property.

Voluntary Cleanup Program (VCP). A list of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. There are 2 listings under this database, both *Custom Food Machinery* and *Blue's Roofing* are discussed earlier in the report. These listings are not a REC to the Subject Property.

Geotracker Cleanup Program Sites (CLEANUP SITES). A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). There are five facilities listed on this database. Based on distance from the Property, these listings are not a REC.

Historical Hazardous Substance Storage Container Information (HIST TANK). The SWRCB maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. There are five listings on this database including two on the Subject Property. The other listings include *Market Distributors* at 290 Bellomy Street, *Texaco* and *Gasco Service station*. These facilities are discussed in detail in multiple database listings earlier. This listing is not considered a REC for the Subject Property.

CALSITES Database (CALSITES). This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. The *Santa Clara Police Station* and the *Owens Illinois Glass Company* are listed on the database. These facilities are discussed in detail earlier under the EnviroStor database. They are not a REC to the Subject Property.

EnviroStor Inspection, Compliance, and Enforcement (INSP COMP ENF). A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor. There are two listings on the database and based on distance from the Property, they are not a REC.

Hazardous Waste Manifest Data (HAZNET). A list of hazardous waste manifests received each year by DTSC. The database identified ten listings within the search area including 3 listings on the Subject Property. Based on the nature of the listings, they are not considered a REC for the Subject Property.

Historical Hazardous Waste Manifest Data (HIST MANIFEST). A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992.

Both the Subject Property and the adjacent facility located at 700 Bellomy Street are listed on this database. Based on the nature of the listings, they are not considered a REC for the Subject Property.

California Environmental Reporting System (CERS) Hazardous Waste Sites (CERS HAZ). The list of sites in the CalEPA Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA Large Quantity Hazardous Waste Generator. The following facilities are listed as CERS Hazardous Waste Sites:

- *Pizza my Heart (Stuft Pizza)* at 700 Bellomy Street
- *Safeway* at 2605 The Alameda
- *Taco Bell* at 2555 The Alameda

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites (DELIST HAZ). This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. Two facilities are listed on the database.

4.3.3 County Database Information

Santa Clara County – Local Oversight Program Listing (LOP SANTACLARA). The LOP SANTACLARA database consists of a list of Underground Storage Tank (LUST) facilities in Santa Clara County. The facilities listed on this database are discussed earlier under the LUST database.

Santa Clara County – Historic Solvent Case Listing (HSOL SANTACLARA). The HSOL SANTACLARA database contains records for solvent and toxic release cases in Santa Clara County. There are two facilities listed on this database. *Santa Clara University* located at 500 El Camino Real is 0.23 miles from the Subject Property. *Summerhill Development* is located at 2655 Park Avenue and is 0.18 miles from the Subject Property and no further information is available on this listing. Based on the distance and the hydrogeologic setting, these listings are not considered a REC to the Subject Property.

4.3.4 Orphan Sites

Sites for which the records searched do not contain sufficient address or information to evaluate their locations relative to the search radius are considered “orphan sites.” The ERIS did not identify any Orphan Sites within the search area.

4.3.5 Other Records Reviewed

As documented for several listings, Tetra Tech reviewed additional environmental documents associated with the Subject Project and surrounding sites. Relevant documents reviewed are referenced below and available for review on the GeoTracker website under Case T0608501511 for the Subject Property and Case T0608501041 for the adjacent property located at 700 Bellomy Street.

Previous Phase I ESA

A previous Phase I ESA was conducted by PHR Environmental Consultants in May 1992 at the Subject Property (PHR 1992; Appendix D). The Phase I ESA report indicated that the Subject Property consisted of a gasoline service station and a mini-service maintenance shop with a three-bay metal and brick service station building. According to this report, UNOCAL purchased the property in December 1929 from Pacific Manufacturing Company for the purpose of constructing a service station. A survey tracing dated 1929 indicated a building located at the north corner of the Subject Property, however, no information was found regarding this building. This building was demolished and developed into a two-bay metal service station in 1930.

The multiple fuel leaks that occurred over time are also mentioned on the Phase I ESA report. The report mentions the following recommendations:

- The client may wish to continue with the ongoing environmental investigation.
- The client may wish to conduct soil sampling at the location of the previous waste oil UST.

Project Area Document Review

Previous work included removal and replacement of USTs in 1951 and in 1968, repair of a leaking pump coupling that resulted in an estimated release of 2,378 gallons of product in 1964, investigation of evidence of UST leakage in 1968, and repair of a product line leak in 1981 (Stantec 2012). The overall quantity of fuel released is unknown.

In 1988, during replacement of blending valves beneath the dispenser islands, soil impacted by petroleum hydrocarbons were observed, soil samples were collected, and 18 drums of impacted soil was excavated. In January 1991, four exploratory borings (U-A through U-D) were advanced.

In June 1991, four groundwater monitoring wells (U-1 through U-4) were installed. In February 1992, two on-site groundwater monitoring wells (U-5 and U-7) and three off-site groundwater monitoring wells (U-6, U-8, and U-9) were installed. In August 1992, seven on-site groundwater monitoring wells (U-10 through U-15 and U-18) and two off-site groundwater monitoring wells (U-16 and U-17) were installed.

In March 1993, the service station closed operations and all above- and below-ground facilities were removed. Two 10,000-gallon gasoline USTs; one 8,000-gallon diesel UST; a waste oil UST; product lines; the product dispenser islands; and the station building were removed. The final excavation also included removal of approximately 840 cubic yards of soil.

In the following years from May 1995 to December 1997 five extraction wells (U-4, U-12, U-13, U-15, and U-18) were utilized for groundwater extraction and treatment. In October 1995, a SVE system began operation at the Subject Property using four extraction wells (U-12, U-13, U-15, and U-18). Five additional SVE wells (UV-2, UV-3, UV-4, UV-5, and UV-6) were installed in November 1996 and connected to the SVE system in 1997. The SVE system was stopped in March 1998.

In 1996, Oxygen Release Compound was added to wells U-8, U-9, and U-17 in an attempt to enhance bioremediation. A biosparge remediation system operated at the Subject Property from September 1998 to August 2001 utilizing wells U-1 through U-4, U-10, U-11, U-14, U-15, and UV-1 through UV-6 (ENSR 2005).

A low-flow ozone sparge system operated at the Subject Property from February 2003 to October 2006 utilizing sparge points SP-1 through SP-4. The system reportedly supplied ozone at a concentration of approximately 125 parts per million (ppm) to groundwater at flow ranging from 3 to 6 cubic feet per minute. Stantec was unable to locate any additional information regarding the operation or shutdown of this system. Following ozone injection, free product was observed in well U-1 from March through December 2007. In 2004, ENSR performed a Resistivity and Induced Polarization (Res/IP) Survey to further identify and characterize the extent of soil contamination at the Subject Property.

In the following years, more borings were advanced to assess the extent of contamination and groundwater monitoring was conducted. In 2015, sulfate application to the subsurface was achieved through placement in or injection into 33 borings. A total of 24 borings were completed as permeable filled borings (PFBs) in proximity to target wells U-1, U-3, U-4, and U-18 to maximize effectiveness of sulfate to assist in bioremediation of benzene. Nine borings were advanced as high pressure injection (HPI) borings. A gypsum solution with a concentration of approximately 1,200 milligrams per liter (mg/L) was injected under high pressure in the HPI borings near wells U-12 and U-15 and in the areas between the target wells to remediate a larger area.

The Subject Property currently has a status of “Open-Remediation as of 9/28/2016” on the Geotracker database.

Surrounding Area Document Review

University Cleaners, a laundry/ dry cleaning facility is located at 2925 Park Avenue, adjacent to the Subject Property on the southwest. Tetra Tech contacted the business on March 28, 2022 and were informed that there are no on-site dry-cleaning operations at this location, and they conduct their dry-cleaning operations at an off-site facility. This facility is not listed on GeoTracker or other databases. This facility is not considered a REC to the Subject Property.

Stuft Pizza located at 700 Bellomy Street, adjacent to the Subject Property on the west is listed on the LUST database. A search on GeoTracker database shows information on UST removal and Site closure. A 2,500 gallon and a 750-gallon UST containing diesel/gasoline were discovered during excavation activities on the sidewalk of Park Avenue in 1994. They were found to be in demolished sections and the tanks were removed in January 1994. Soil samples were collected after the tank excavation at approximately 2 feet below the bottom of the tank as contamination was evident below the tank. Up to 350 ppm of TPHd was detected at 15-16 feet bgs. Excavation of the contaminated soil included a depth of 18 feet below the pavement surface. At this depth, due to apparent instability, the excavation was ceased by the Fire Department. A Phase II ESA conducted in 1999 at this facility indicates four soil borings around the former tank excavation site. The contamination appeared to be highest in boring B2, on Park Avenue between the Subject Property and the former tank excavation area on 700 Bellomy Street. The contamination from the Subject Property was indicated as a potential source of cross-contamination in the Phase II ESA conducted at 700 Bellomy Street. The tank was located close to the intersection of Bellomy Street and Park Avenue, adjacent to the west of the Property, across Park Avenue. The groundwater flow is to the north and northwest. The closure letter from Santa Clara Valley Water District for this facility indicates moderate levels of residual soil contamination exist in the vicinity of the former underground storage tank system beneath the

sidewalk on Park Avenue (adjacent to the Property). The last groundwater monitoring event at this site was conducted in 2002 and results pointed to natural attenuation of hydrocarbons in three monitoring wells installed. The results indicate TPHg values up to 2,630 ppb in MW2. The facility received a case closure status in 2002 and this listing is considered a HREC for the Subject Property based on the proximity and the presence of residual contamination.

5.0 SITE RECONNAISSANCE

A site reconnaissance was completed by Mike Ferrif of Tetra Tech on March 7, 2022. During the site reconnaissance, Mr. Ferrif was assisted onto the Subject Property by Asha Turman of Arcadis and met prospective purchasers of the Subject Property Anjuli Habbas and Kapil Nanda. Weather at the time of the site reconnaissance was sunny and clear with an ambient air temperature of approximately 62 degrees Fahrenheit.

5.1 GENERAL SITE SETTING AND OBSERVATIONS

The Subject Property is in Santa Clara, California, and encompasses approximately 0.46 acres (Figure 1). Additional details observed during the site reconnaissance are discussed below and documented in photographs presented in Appendix E.

5.2 SITE RECONNAISSANCE OBSERVATIONS

The objective of the site reconnaissance was to obtain information about the Subject Property and surrounding properties indicating the likelihood of RECs associated with the Subject Property. This includes describing the general Site setting and obtaining photographs of the Subject Property which document the site reconnaissance. The photographs taken during this site reconnaissance are included in Appendix E.

5.3 METHODOLOGY AND LIMITATIONS

The site reconnaissance consisted of a visual assessment of the Subject Property and a curbside review of adjacent properties and was conducted consistent with the methodology specified in ASTM *E1527-13 and E1527-21*. The purpose of the site reconnaissance was to evaluate the Subject Property for evidence of current or previous activities that may have resulted in adverse environmental impacts. The following subsections detail visual observations of the Subject Property and other potential sources of contamination identified during the site reconnaissance. All portions of the Subject Property were accessible to Tetra Tech personnel and no specific limitations to our inspection were noted. Subject Property features identified during the site reconnaissance are illustrated in Figure 3.

5.4 CURRENT PROPERTY USE

The Subject Property consists of approximately 0.46 acres of land that formerly hosted a gas station located at 2665 The Alameda in Santa Clara, Santa Clara County, California. The former gas station structures have been removed and the Subject Property is currently vacant and unimproved. The perimeter of the Subject Property is fenced with gates on the east and west sides. Twenty-four monitoring wells were observed within the fenced area of the Subject Property.

5.5 PAST PROPERTY USE

The Subject Property formerly hosted a gas station located at 2665 The Alameda in Santa Clara.

5.6 OBSERVATIONS

5.6.1 Interior and Exterior Observations

At the time of the site reconnaissance by Tetra Tech, the Subject Property did not host any structures.

5.6.2 Chemical Usage/Waste Storage

Tetra Tech did not observe any areas of the Subject Property that were utilized for chemical storage and/or hazardous waste storage.

5.6.3 Abandoned or Unidentified Containers

Tetra Tech did not observe abandoned and/or unidentified containers at the Subject Property. No staining or evidence of releases were observed regarding containers during the Site reconnaissance.

5.6.4 Catch Basins, Pits, Ponds, Lagoons and Drains

No catch basins, pits, ponds, lagoons, and/or drains were observed during the site reconnaissance.

5.6.5 Dry Wells

No evidence of dry wells was observed at the Site during the site reconnaissance.

5.6.6 Soil Staining

No evidence of soil staining was observed at the Site during the site reconnaissance.

5.6.7 Vegetative Stress

No evidence of vegetative stress outside normal California drought conditions was observed at the site during the Site reconnaissance.

5.6.8 Sheens

No surface water was present on the Subject Property during reconnaissance. No evidence of sheens was observed.

5.6.9 Soil Disturbance

No areas of recent soil disturbance were observed during the site reconnaissance. Based on the Subject Property history, underground storage tanks (USTs), associated piping, fuel pumps and gas station buildings were removed from the Subject Property. At the time of the site reconnaissance, grasses and weeds covered almost all of the Subject Property with small patches of asphalt visible beneath the soil in the southeast portion of the Subject Property.

5.6.10 Odors

No noticeable odors were detected during the site reconnaissance however when monitoring wells U-12, U-14 and U-18 were opened to confirm they were accessible, a petroleum odor was observed coming from those wells.

5.6.11 Underground Storage Tanks

The Subject Property is known to have formerly hosted a gas station with USTs. The USTs have been removed and 24 monitoring wells remain onsite. No evidence of current or abandoned USTs or associated piping was observed on the Subject Property.

5.6.12 Aboveground Storage Tanks

No evidence of the presence of existing or previous ASTs was observed on the Subject Property during the site reconnaissance.

5.6.13 Oil and Gas Wells/Activities

No evidence of the presence of existing or previous oil and gas wells or pipelines was observed on the Subject Property during the site reconnaissance.

5.6.14 Polychlorinated Biphenyl-Containing Materials

No PCB-containing materials were observed during the site reconnaissance.

5.6.15 Monitoring Wells and Soil Borings

Twenty-four monitoring wells were observed onsite during the site reconnaissance (Appendix E). An additional six monitoring wells were observed off-site, primarily to the west and north. Several of the monitoring wells were opened to check condition and one onsite well (UV-4) was found to have been filled with flaked bentonite (or a similar substance). A petroleum odor was observed from wells U-12, U-14 and U-18 when opened.

5.6.16 Spills/Releases

As discussed above, several monitoring wells were observed at the Property, particularly in the northern portion, indicating a release of some kind had occurred. No other evidence of spills or releases were observed during the site reconnaissance.

5.6.17 Surface Debris

A small amount of litter was observed at the Property, primarily along the fence lines. No other surface debris was observed during the site reconnaissance.

5.6.18 Hydraulic Equipment

No hydraulic equipment was observed during the site reconnaissance.

5.6.19 Air Compressor Usage

No air compressor equipment was observed during the site reconnaissance.

5.6.20 Asbestos-Containing Materials

The Subject Property did not host any structures at the time of the site reconnaissance. No suspect asbestos-containing materials were observed.

5.6.21 Lead-Based Paint and Other Lead-Containing Materials

The Subject Property did not host any structures at the time of the site reconnaissance. No suspect lead-based paint or other lead-containing materials were observed.

5.6.22 Lead in Drinking Water

No drinking water is supplied to the Subject Property. Any drinking water supplied to the Subject Property is expected to comply with state standards, such that lead is unlikely to be present at elevated levels. No information was provided or obtained suggesting elevated lead levels in drinking water at or near the Subject Property.

5.6.23 Microbial Growth and Moisture Intrusion

The Subject Property did not host any structures at the time of the site reconnaissance therefore microbial growth and moisture intrusion are not a concern.

5.6.24 Waste Disposal

Tetra Tech did not observe evidence of waste disposal at the Subject Property during the site reconnaissance.

5.6.25 Wastewater Discharges

No wastewater discharges were observed on the Subject Property during the site reconnaissance.

5.6.26 Storm Water Discharges

No stormwater drains or grates were observed on the Subject Property during the site reconnaissance however stormwater drains were present in the roadways adjacent to the Subject Property.

5.6.27 Utilities

No utilities are currently provided to the Subject Property.

5.7 CURRENT USE OF ADJOINING PROPERTIES

The Subject Property is surrounded by on three sides by roadways with a large parking lot to the south. The surrounding properties are a mixture of commercial and residential. Santa Clara University housing and other buildings are located across The Alameda, north and east of the Subject Property and a large grocery store and parking lot occupy the area south of the Subject Property. A mixture of commercial and residential properties are adjacent to the southwest and west of the Subject Property including a drycleaners (University Cleaners) southeast of the Subject Property. The adjacent property northwest of the Property across Park Avenue is a daycare (Kids on Campus).

5.8 PAST USE OF ADJOINING PROPERTIES

Past uses of the adjoining properties are discussed in Section 5.8.

5.8.1 Adjacent Property and Vicinity Findings

Adjacent properties of note include various residence halls of Santa Clara University located to the east and northeast of the Property; Kids on Campus preschool to the northwest; a dry-cleaning facility

to the southwest and various commercial establishments to the northwest, west and south of the Subject Property.

6.0 INTERVIEWS

6.1 USER QUESTIONNAIRE

The ASTM Standard *E1527-13 and E1527-21* requires that the users of an ESA provide certain information for incorporation into the ESA report. Therefore, in order to meet the All Appropriate Inquiry rule, Chevron were asked to provide responses to questions presented in the User Questionnaire (Appendix B). The User verified the purchase price (or lease price) for the Subject Property reflects the fair market value. The completed Landowner Questionnaire was not received by Tetra Tech.

6.2 AGENCY RECORDS

The following agencies and government databases were contacted for information related to environmental issues associated with the Site and surrounding properties:

- City of Santa Clara
- Santa Clara Valley Water District
- Santa Clara Fire Department
- Bay Area Air Quality Management District
- Department of Toxic Substances Control (DTSC)

Regulatory correspondence documents are provided as Appendix B.

City of Santa Clara

On February 25, 2022, Tetra Tech filled out a records request form online and reached out to the City of Santa Clara in an effort to obtain any records that include groundwater or soil sampling reports/analytical results, reports of spills of petroleum or hazardous chemicals (both closed and open), ASTs and USTs closure reports/certificates, inspection reports, wastewater permits, air permits, building permits, and reports of chemical odors or fumes. The agency responded on March 7, 2022 with site inspection records and soil reports. The agency responded again on April 4, 2022 with further documentation related to the site and surrounding properties including geotechnical investigation reports. The documents are provided in Appendix B.

Santa Clara Valley Water District

On February 28, 2022, Tetra Tech reached out to the Santa Clara Valley Water District in an effort to obtain any records that include groundwater or soil sampling reports/analytical results, reports of spills of petroleum or hazardous chemicals (both closed and open), ASTs and USTs closure reports/certificates, inspection reports, wastewater permits, air permits, building permits, and reports of chemical odors or fumes. The agency responded on March 8, 2022, indicating that they possess some well permits pertaining to the Subject Property and provided a link to their well information GIS tool. However, no documents were provided. Tetra Tech considers it unlikely that any further records from this agency would alter the conclusions or recommendations of this report.

Santa Clara Fire Department

On March 25, 2022, Tetra Tech reached out to the Santa Clara Fire Department for any records that include groundwater or soil sampling reports/analytical results, reports of spills of petroleum or hazardous chemicals (both closed and open), ASTs and USTs closure reports/certificates, inspection reports, wastewater permits, air permits, building permits, and reports of chemical odors or fumes. The agency responded the same day by directing the request to the City of Santa Clara. At the time of this report, the agency did not respond with records related to the Subject Property or the surrounding sites. Tetra Tech believes that further records from this agency would be unlikely to alter the recommendations or conclusions of this report, and the lack of information does not represent a significant data gap.

Bay Area Air Quality Management District

On February 28, 2022, Tetra Tech reached out to the Bay Area Air Quality Management District in an effort to obtain any records that include groundwater or soil sampling reports/analytical results, reports of spills of petroleum or hazardous chemicals (both closed and open), ASTs and USTs closure reports/certificates, inspection reports, wastewater permits, air permits, building permits, and reports of chemical odors or fumes. The District responded on February 28, 2022 indicating no records were found for the Subject Property. However, at the time of this report, the agency did not respond to records request for the surrounding properties. Tetra Tech considers it unlikely that any further records from this agency would alter the conclusions or recommendations of this report and concludes that the lack of this information does not represent a significant data gap.

Department of Toxic Substances Control

On March 3, 2022, Tetra Tech reached out to DTSC for any records that include groundwater or soil sampling reports/analytical results, reports of spills of petroleum or hazardous chemicals (both closed and open), ASTs and USTs closure reports/certificates, inspection reports, wastewater permits, air permits, building permits, and reports of chemical odors or fumes. The agency mailed a response with facility records for one of the sites located near the Subject Property. A scanned copy of the document is included in Appendix B.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Tetra Tech performed a Phase I Environmental Site Assessment (ESA) for Kapital Partners, LLC at 2665 The Alameda, Santa Clara, California (Property). This Phase I ESA was completed for the potential purchase and development of the Subject Property as student housing. This Phase I ESA was completed in general accordance with American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, E1527-13 and E1527-21* and All Appropriate Inquiries Final Rule 40 Code of Federal Regulations Part 312. The objective of this Phase I ESA was to identify RECs, HRECs, and CRECs that affect the Subject Property.

To assess environmental conditions at the Property, Tetra Tech reviewed site land use history, geology, hydrogeology, and environmental records for the Subject Property and its general vicinity; conducted a visual site reconnaissance; and reviewed the completed User Questionnaire.

The Subject Property is located at 2665 The Alameda and consists of a triangular parcel of land in the city of Santa Clara and is identified by the APN: 230-12-012. The Subject Property is bordered by the Alameda to the northeast, Park Avenue to the west, Bellomy street to the northwest, and a parking lot to the south. The Subject Property is currently undeveloped and vacant except for some monitoring wells. The Subject Property is fenced on all sides and access is on Park Avenue street.

Based on the site reconnaissance performed on March 7, 2022, the ERIS regulatory database review, city directory search, historical aerial and topographic map review, and the completed User Questionnaire, review of the California Geotracker database, and review of other documents made available, the following were identified:

ASTM defines a REC as:

> *(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

The RECs identified during the completion of this Phase I ESA are as follows:

The Subject Property is an active Leaking Underground Storage Tank (LUST) cleanup site under the San Francisco Bay Regional Water Quality Control Board (RWQCB). A former UNOCAL branded service station operated on the Subject Property from approximately 1930 to 1993. Site features included a station building, three product dispenser islands, four USTs, one waste oil UST, and a clarifier. In March 1993, the service station ceased operations and all above- and below-ground facilities were removed. Site assessments performed at the Subject Property since 1988 revealed petroleum hydrocarbon impacts to soil, soil vapor, and groundwater. A groundwater monitoring well network consisting of groundwater monitoring wells installed at and to the north of the Subject Property has been gauged and sampled generally on a quarterly basis since 1991. The groundwater flow direction beneath the Subject Property is predominantly to the north-northwest with a high variability in

groundwater elevations since groundwater monitoring began. Remediation activities at the Subject Property have included the use of absorbent socks, soil excavation, soil vapor extraction, groundwater extraction and treatment, injection of oxygen release compound to enhance bioremediation, biosparging, ozone sparging, and sulfate applications. A request for closure was made in May 2020 under the Low-Threat Underground Storage Tank Case Closure Policy; however, the RWQCB has not granted closure for the Subject Property. The results of the latest groundwater monitoring event conducted in March 2022 indicates significant petroleum impacts remain on the Subject Property and have migrated offsite to the northwest. The presence of petroleum products at the Subject Property due to a release and the lack of regulatory closure is considered a REC.

ASTM defines an HREC as:

> *A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

The HREC identified during the completion of this Phase I ESA is as follows:

A former gasoline service station located at 700 Bellomy Street (currently Pizza My Heart) is immediately west of the Subject Property across Park Avenue. A 2,500-gallon and a 750-gallon UST containing diesel/gasoline were discovered during excavation activities within the sidewalk of Park Avenue in 1994. Elevated concentrations of petroleum hydrocarbons were detected in soil samples collected from beneath the USTs and in groundwater. Three groundwater monitoring wells were installed at the northern portion of the property and within Park Avenue. The last groundwater monitoring event at this property was conducted in April 2002. Total Petroleum Hydrocarbons as gasoline (TPHg) was detected in groundwater samples at concentrations up to 2,630 micrograms per liter (µg/L) and benzene was detected in groundwater samples at concentrations up to 15.7 µg/L. The facility received a case closure letter from the Santa Clara Valley Water District on June 26, 2002 with the advisory that moderate levels of residual soil contamination exist in the vicinity of the former tank system beneath the sidewalk along Park Avenue. The release from the UST is considered a HREC as the petroleum impacts associated with the release from the property may have affected the Subject Property; however, the impacts have been addressed to the satisfaction of the regulatory authority.

ASTM defines a CREC as:

> *A recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

No CRECs were identified during the completion of this Phase I ESA.

8.0 LIMITATIONS

This report was compiled based partially on information supplied to Tetra Tech from outside sources and other information in the public domain. The conclusions and opinions herein are based on the information Tetra Tech obtained in compiling the report. This information is on file at Tetra Tech's office in Irvine, California. Tetra Tech makes no warranty as to the accuracy of statements made by others that may be contained in the report; nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation and differing conclusions could be reached. Tetra Tech does not assume responsibility for discovery and elimination of hazards that could cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or fulfillment of client's obligations under local, state, or federal laws, or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from site reconnaissance and records examined.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 Code of Federal Regulations Part 312.10.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the All Appropriate Inquires in conformation with the standards and practices set forth in 40 Code of Federal Regulations Part 312. The resume of Tetra Tech personnel preparing the Phase I ESA is provided in Appendix F.

Prepared by

Tetra Tech, Inc.

Carl Lenker, P.E.
Project Manager

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 21-036
Local Case No: 07S1W02Q02f
Begin Date: 6/10/1988
Lead Agency: SANTA CLARA COUNTY LOP
Local Agency: SANTA CLARA COUNTY LOP
CUF Case: YES
Potential COC: Gasoline
How Discovered: UST System Modification
Stop Method: Repair Product Piping
Stop Description:
Case Worker: GOR
File Location: All Files are on GeoTracker or in the Local Agency Database

Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered Description:
Calwater Watershed Name: Santa Clara - Palo Alto (205.50)
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:
Calenviroscreen Score: 56-60%
Site History:

1988 – In May, a leak was found during piping modification work. It is stated that the leak appeared to be old. A soil sample was collected and reported to contain 48 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 1,400 ppm TPH as Diesel (TPHd), and 0.3 ppm Toluene. A report of this sampling was not found in the file. 1991 – In June, 4 groundwater monitoring wells (U1 through U4) were installed to depths of 60-65 feet below the ground surface (ft bgs). 17 soil samples were collected and reported to contain maximum concentrations of 4,400 ppm TPHg, 4.1 ppm TPHd, 21 ppm Benzene, 95 ppm Toluene, 40 ppm Ethylbenzene, and 160 ppm Xylenes. Periodic sampling of the monitoring wells began at this time. At this time, the report stated that this gas station has been in operation for approximately 45 years. 1992 – In February, 5 monitoring wells (U5 through U9) were installed to 40 ft bgs on and offsite. 17 soil samples were collected and reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). The new wells were incorporated into the monitoring program. In February, well U1 was reported to have measurable Free Product (FP) on the groundwater. In August, 19 groundwater wells (U10 through U18) and 1 soil vapor extraction well (UV1) were installed to maximum depths of 40 ft bgs. The soil vapor well was completed to 30 ft bgs. 48 soil samples were collected and reported to contain maximum concentrations of 5,400 ppm TPHg, 71 ppm Benzene, 280 ppm Toluene, 77 ppm Ethylbenzene, and 400 ppm Xylenes for samples collected from well U13 located near the USTs and along the piping. In October, a soil vapor extraction (SVE) test was conducted onsite. Additionally, an air sparge test was also conducted at this time. 1993 – In May, 4 underground storage tanks (USTs) and associated piping and dispensers were removed from the site. The service station was demolished following UST removal. During station demolition, another unknown 100-gallon UST was found near the station building and removed. Also removed was a concrete oil/water separator. 6 soil samples were collected from the fuel UST excavation from depths of 14-14.5 ft bgs. These samples were reported to have maximum concentrations of 1,800 ppm TPHg, 5.9 ppm Benzene, 2.1 ppm Toluene, 3.3 ppm Ethylbenzene, 2.5 ppm Xylenes and 95 ppm TPH as Oil (TPHo). 10 soil samples were collected along the piping from 3-6.5 ft bgs. And were reported to contain maximum concentrations of 5,300 ppm TPHG, 0.27 ppm Benzene, 39 ppm Toluene, 78 ppm Ethylbenzene, 710 ppm Xylenes and 57 ppm TPHo. 1 soil sample was collected from 8.5 ft bgs beneath the waste oil UST and reported to contain 15 ppm TPHg,19, ppm Toluene, 0.08 ppm Xylenes, 5 ppm TPHo, 120 ppm Total Oil and Grease (TOG), 59 ppm Acetone, and 6 ppm Tetrachloroethene (PCE). 1 soil sample was collected from 6 ft bgs beneath the oil/water

separator and was not reported to have concentrations of the COCs present above the laboratory reporting limits. 1 soil sample was collected from 5 ft bgs beneath the unknown UST and reported to contain 260 ppm TPHg, 0.35 ppm Toluene, 1.8 ppm Ethylbenzene, 480 ppm Xylenes, 7,200 ppm TPHo, 15,000 TOG, 380 ppm Acetone, and 520 ppm Naphthalene. Soil was excavated and 2 additional samples were collected from 10.5 ft bgs. These deeper samples were reported to have maximum concentrations of 46 ppm TPHg, 0.43 ppm Benzene, 0.42 ppm Toluene, 0.27 ppm Ethylbenzene, 1.5 ppm Xylenes, 1,100 ppm TPHo, and 1,000 ppm TOG. The analysis of the deeper samples did not include Volatile Organic Compounds (VOCs). Approximately 532 cubic yards of soil were removed from the site in association with the UST removals. Prior to backfilling the fuel UST excavation, perforated horizontal PVC piping was placed within the excavation with vertical risers exposed at the ground surface. In December, wells U12, U13, U14 and U18 were reported tohave FP present on the groundwater. 1995 – In June, groundwater extraction operations began at the site and continued through December 1997. It is estimated that 924,481 gallons of groundwater were treated and 227 pounds of TPH and 46 pounds of Benzene were removed. In October, a SVE system began operations at the site and continued through March 1998. It is estimated that the SVE removed 762 pounds of TPH and 6.1 pounds of Benzene. 1996 – It is noted during the June groundwater sampling event that ORC socks were in wells U8, U9 and U17. The socks were mentioned in the groundwater monitoring reports until the December 1997 sampling event where there was no mention of socks. In November, 5 shallow soil vapor extraction wells (UV2 through UV6) were installed due to rising groundwater across the site. 15 soil samples were collected and reported to have maximum concentrations of 860 ppm TPHg, 4.8 ppm Benzene, 2.1 ppm Toluene, 2 ppm Ethylbenzene, 8.1 ppm Xylenes, and 150 ppm TPH as Diesel (TPHd). 1998 – In September, air sparging was started onsite through August 2001. 2001 – A Corrective Action Plan (CAP) was prepared. In the CAP it is stated that groundwater across the site has risen approximately 13 feet over the last 7 years. It also states that there is a groundwater ridge running east-west across the site. The CAP recommended the use of air sparge with SVE to remediate the site. A subsequent review of the CAP by another consultant recommended ozone sparge to remediate the site. 2002 – In November, 4 ozone sparge wells (SP1 through SP4) were installed to depths of 42-62 ft bgs. Well U19 was installed near well U1 and screened from 57-62 ft bgs. This well was installed to assess whether well U1 was acting as a conduit for FP movement up the soil column. Soils encountered in U19 were a continuous sequence of clays, which was not consistent with the interbedded soils encountered in previous investigations. The lack of FP and similar dissolved hydrocarbon concentrations in well U19 suggests that the accumulation of FP in well U1 is not due to high dissolved hydrocarbon concentrations in the lower plume. 6 soil samples were collected from U19 and the reporting limit for most sample was raised significantly. The maximum detections reported were 850,000 ppm TPHg, 20,000 ppm Ethylbenzene, 53,000 ppm Xylenes, and 0.054 ppm Methyl tert-Butyl Ether (MtBE). 2003 – In February, an ozone injection system was started onsite and operated through October 2006. 2004 – In May, a resistivity and induced polarization survey was completed at the site. The survey was conducted to see if this method could identify areas of contamination. 2008 – In October, wells U2 and U5 were destroyed due to a long history of low or non-detectable concentrations of COCs. Well UV4 was destroyed due to an obstruction. And wells U6, U9 and U16 were destroyed due to their location in the public right-of-way.

Site History:	

1988 – In May, a leak was found during piping modification work. It is stated that the leak appeared to be old. A soil sample was collected and reported to contain 48 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 1,400 ppm TPH as Diesel (TPHd), and 0.3 ppm Toluene. A report of this sampling was not found in the file.

1991 – In June, 4 groundwater monitoring wells (U1 through U4) were installed to depths of 60-65 feet below the ground surface (ft bgs). 17 soil samples were collected and reported to contain maximum concentrations of 4,400 ppm TPHg, 4.1 ppm TPHd, 21 ppm Benzene, 95 ppm Toluene, 40 ppm Ethylbenzene, and 160 ppm Xylenes. Periodic sampling of the monitoring wells began at this time.

At this time, the report stated that this gas station has been in operation for approximately 45 years.

1992 – In February, 5 monitoring wells (U5 through U9) were installed to 40 ft bgs on and offsite. 17 soil samples were collected and reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). The new wells were incorporated into the monitoring program.

In February, well U1 was reported to have measurable Free Product (FP) on the groundwater.

In August, 19 groundwater wells (U10 through U18) and 1 soil vapor extraction well (UV1) were installed to maximum depths of 40 ft bgs. The soil vapor well was completed to 30 ft bgs. 48 soil samples were collected and reported to contain maximum concentrations of 5,400 ppm TPHg, 71 ppm Benzene, 280 ppm Toluene, 77 ppm Ethylbenzene, and 400 ppm Xylenes for samples collected from well U13 located near the USTs and along the piping.

In October, a soil vapor extraction (SVE) test was conducted onsite. Additionally, an air sparge test was also conducted at this time.

1993 – In May, 4 underground storage tanks (USTs) and associated piping and dispensers were removed from the site. The service station was demolished following UST removal. During station demolition, another unknown 100-gallon UST was found near the station building and removed. Also removed was a concrete oil/water separator.

6 soil samples were collected from the fuel UST excavation from depths of 14-14.5 ft bgs. These samples were reported to have maximum concentrations of 1,800 ppm TPHg, 5.9 ppm Benzene, 2.1 ppm Toluene, 3.3 ppm Ethylbenzene, 2.5 ppm Xylenes and 95 ppm TPH as Oil (TPHo).

10 soil samples were collected along the piping from 3-6.5 ft bgs. And were reported to contain maximum concentrations of 5,300 ppm TPHG, 0.27 ppm Benzene, 39 ppm Toluene, 78 ppm Ethylbenzene, 710 ppm Xylenes and 57 ppm TPHo.

1 soil sample was collected from 8.5 ft bgs beneath the waste oil UST and reported to contain 15 ppm TPHg,19, ppm Toluene, 0.08 ppm Xylenes, 5 ppm TPHo, 120 ppm Total Oil and Grease (TOG), 59 ppm Acetone, and 6 ppm Tetrachloroethene (PCE).

1 soil sample was collected from 6 ft bgs beneath the oil/water separator and was not reported to have concentrations of the COCs present above the laboratory reporting limits.

1 soil sample was collected from 5 ft bgs beneath the unknown UST and reported to contain 260 ppm TPHg, 0.35 ppm Toluene, 1.8 ppm Ethylbenzene, 480 ppm Xylenes, 7,200 ppm TPHo, 15,000 TOG, 380 ppm Acetone, and 520 ppm Naphthalene. Soil was excavated and 2 additional samples were collected from 10.5 ft bgs. These deeper samples were reported to have maximum concentrations of 46 ppm TPHg, 0.43 ppm Benzene, 0.42 ppm Toluene, 0.27 ppm Ethylbenzene, 1.5 ppm Xylenes, 1,100 ppm TPHo, and 1,000 ppm TOG. The analysis of the deeper samples did not include Volatile Organic Compounds (VOCs).

Approximately 532 cubic yards of soil were removed from the site in association with the UST removals. Prior to backfilling the fuel UST excavation, perforated horizontal PVC piping was placed within the excavation with vertical risers exposed at the ground surface.

In December, wells U12, U13, U14 and U18 were reported to have FP present on the groundwater.

1995 – In June, groundwater extraction operations began at the site and continued through December 1997. It is estimated that 924,481 gallons of groundwater were treated and 227 pounds of TPH and 46 pounds of Benzene were removed.

In October, a SVE system began operations at the site and continued through March 1998. It is estimated that the SVE removed 762 pounds of TPH and 6.1 pounds of Benzene.

1996 – It is noted during the June groundwater sampling event that ORC socks were in wells U8, U9 and U17. The socks were mentioned in the groundwater monitoring reports until the December 1997 sampling event where there was no mention of socks.

In November, 5 shallow soil vapor extraction wells (UV2 through UV6) were installed due to rising groundwater across the site. 15 soil samples were collected and reported to have maximum concentrations of 860 ppm TPHg, 4.8 ppm Benzene, 2.1 ppm Toluene, 2 ppm Ethylbenzene, 8.1 ppm Xylenes, and 150 ppm TPH as Diesel (TPHd).

1998 – In September, air sparging was started onsite through August 2001.

2001 – A Corrective Action Plan (CAP) was prepared. In the CAP it is stated that groundwater across the site has risen approximately 13 feet over the last 7 years. It also states that there is a groundwater ridge running east-west across the site. The CAP recommended the use of air sparge with SVE to remediate the site. A subsequent review of the CAP by another consultant recommended ozone sparge to remediate the site.

2002 – In November, 4 ozone sparge wells (SP1 through SP4) were installed to depths of 42-62 ft bgs. Well U19 was installed near well U1 and screened from 57-62 ft bgs. This well was installed to assess whether well U1 was acting as a conduit for FP movement up the soil column. Soils encountered in U19 were a continuous sequence of clays, which was not consistent with the interbedded soils encountered in previous investigations. The lack of FP and similar dissolved hydrocarbon concentrations in well U19 suggests that the accumulation of FP in well U1 is not due to high dissolved hydrocarbon concentrations in the lower plume. 6 soil samples were collected from U19 and the reporting limit for most sample was raised significantly. The maximum detections reported were 850,000 ppm TPHg, 20,000 ppm Ethylbenzene, 53,000 ppm Xylenes, and 0.054 ppm Methyl tert-Butyl Ether (MtBE).

2003 – In February, an ozone injection system was started onsite and operated through October 2006.

2004 – In May, a resistivity and induced polarization survey was completed at the site. The survey was conducted to see if this method could identify areas of contamination.

2008 – In October, wells U2 and U5 were destroyed due to a long history of low or non-detectable concentrations of COCs. Well UV4 was destroyed due to an obstruction. And wells U6, U9 and U16 were destroyed due to their location in the public right-of-way.

Regulated Programs

EI ID:	10661491	**EI Description:**	Chemical Storage Facilities

Violations

Violation Date:	01/02/2019	**Violation Source:**	CERS
Violation Program:	HMRRP	**Violation Division:**	Santa Clara City Fire Department
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)		
Violation Notes:			

Returned to compliance on 07/30/2020. Liquid carbon dioxide is reported in pounds rather than gallons on the Hazardous Materials Inventory. Amend submittal to report the quantity of liquid carbon dioxide in gallons.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 01/02/2019 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara City Fire Department
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Notes:

Returned to compliance on 07/30/2020. Employee HMBP training documentation was not available for review during inspection. Provide copies of employee training documentation to SCFD for review.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date: 01/02/2019 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 07/30/2020. DISREGARD THE CORRECTIVE ACTION NOTES ABOVE AND BELOW THIS VIOLATION AND ADDRESS THE FOLLOWING DEFICIENCY: The facility was notified of deficiencies in the Hazardous Materials Business Plan (HMBP) submittal via the California Environmental Reporting System (CERS) on 5/3/2018, but did not correct any of the identified deficiencies and re-submit. Upon being notified of deficiencies in an HMBP, the facility shall electronically submit a corrected HMBP within 30 days from the date of the notice. Immediately correct all deficiencies identified in CERS and in this inspection report and re-submit [HSC 25508(a)(2)].

Violation Description:

Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 10/16/2014 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara City Fire Department
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Notes:

Returned to compliance on 03/04/2016.

Violation Description:

Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 01/02/2019 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 07/30/2020. The Unified Program Agency/CUPA phone number is incorrect in the Emergency Response and Training Plan phone number list. Amend to identify Santa Clara Fire Department as the CUPA and amend Plan to include SCFD's phone number, (408)615-4970.

Violation Description:

Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.

Violations

Violation Date: 01/02/2019
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Santa Clara City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 07/30/2020. The Business Owner/Operator Identification page does not have an environmental contact associated with the facility listed.

Violation Description:

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violations

Violation Date: 01/02/2019
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Santa Clara City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 07/30/2020. The HMBP site map does not have a north orientation, evacuation staging area, location of emergency response equipment (e.g. fire extinguishers, pull stations, alarms, etc), and all emergency shut-offs (e.g. water, CO2).

Violation Description:

Failure to complete and electronically submit a site map with all required content.

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No:
Local Case No:
Begin Date: 10/17/1988
Lead Agency: SANTA CLARA COUNTY LOP
Local Agency: SANTA CLARA COUNTY LOP
CUF Case: YES
Potential COC: Gasoline
How Discovered:
Stop Method:
Stop Description:
Case Worker: UST
File Location: All Files are on GeoTracker or in the Local Agency Database

Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered Description:

Calwater Watershed Name: Santa Clara - Palo Alto (205.50)
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:
Calenviroscreen Score: 41-45%
Site History:

Waste Code Description: SILVER

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F007
Waste Code Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Hazardous Waste Handler Details

Sequence No: 6
Receive Date: 20001012
Handler Name: HADCO SANTA CLARA, INC.
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Hazardous Waste Handler Details

Sequence No: 7
Receive Date: 20020225
Handler Name: SANMINA SANTA CLARA
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Waste Code Details

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 131
Waste Code Description: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

Hazardous Waste Code: 132
Waste Code Description: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

Hazardous Waste Code: 135
Waste Code Description: Unspecified aqueous solution

Hazardous Waste Code: 171
Waste Code Description: Metal sludge (see 121)

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 213
Waste Code Description: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Hazardous Waste Code: 343
Waste Code Description: Unspecified organic liquid mixture

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 491
Waste Code Description: Unspecified sludge waste

Hazardous Waste Code: 711
Waste Code Description: Liquids with cyanides > 1000 mg/l

Hazardous Waste Code: 792
Waste Code Description: Liquids with pH < 2 with metals

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D003
Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D004
Waste Code Description: ARSENIC

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004,

AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F007
Waste Code Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Sub Area:
Sub Area Link:
Document Type: Site Screening
Date Completed: 3/18/1993
Comments: This approximately 1-acre facility is situated in an industrial area of the city. The site was used in the past variously as a swine farm, a pear storage facility, and a laundry. Subsequently SCU developed it to its current use in the 60's and purchased it in 1981. Site soils below ground surface have been found contaminated with TPH (Total Petroleum Hydrocarbons) as gasoline (600 ppm) diesel (2900 ppm), oil and grease (2200 ppm). Due to the presence of leaky underground fuel tanks that were installed by the past operators of the site. The leaky tanks and most of the contaminated site soils have been excavated after determining the extent of contamination and removed for off-site disposal. Post removal sampling indicate substantial reduction of residual contamination (TPH 174). Groundwater has been contaminated with gasoline (12 ppm), diesel (11 ppm), benzene (0.24 ppm), toluene (.064 ppm), ethylbenzene (.0015 ppm) and xylene (0.470 ppm). Contamination was discovered by SCU in 1980 during tank renovation. DTSC files were reviewed. No RWQCB/US EPA file was located. County has report on the site and it is in DTSC files. Role of RWQCB has been deferred to County. County has active lead role on this facility. Extent of contamination currently unknown.

Date Completed: 9/21/1990
Comments: SITE STARTED AS A HOG FARM IN THE 1950S, ALSO FRUIT STORAGE, GREENHOUSE, PAINT SHOP. CURRENTLY, IT IS USED AS THE PHYS- ICAL PLANT FACILITY FOR THE UNIVERSITY. LEAKY UNDERGROUND STORAGE TANKS & OTHER SPILLAGES CAUSED CONTAMINATION OF SUR- FACE & SUBSURFACE. TANKS & CONTAMINATED SOILS REMOVED (TPH 100 PPM, 174 PPM FROM SIDES & BOTTOM OF TANKS) TO A DEPTH OF 34' BELOW GRADE & TRANSPORTED TO CLASS I LANDFILL. THE SITE HAS BEEN BACKFILLED WITH IMPORTED CLEAN DRAIN ROCK & UNCON- TAMINATED EXCAVATED SOIL FROM SITE. SITE SCREENING DONE PENDING: SITE REFERRED TO SANTA CLARA COUNTY.

Comments:

SIGNED A VOLUNTARY CLEANUP AGREEMENT WITH THE CITY OF SANTA CLARA FOR OVERSIGHT/APPROVAL OF A REMOVAL ACTION WORKPLAN AND IT IMPLEMENTATION. THE REMOVAL ACTION WILL ALLOW THE CITY TO CONSTRUCT A NEW POLICE STATION AT THE SITE. CONSTRUCTION OF THE STATION IS SCHEDULED TO BEGIN IN FEBRUARY 1998.
Approved Removal Action Workplan which proposes to consolidate soils contaminated with polynueclear aromatic hydrocarbons from operation of a town gas plant. Soils will be consolidated under asphalt parking area. A notice of exemption was filed for the project.

Background:

The Site is identified by Assessor's Parcel Number 230-6-0. The site is a flat, open field of approximately 4.7 acres, bounded on two sides by roadways, one side by a railroad yard, and one side by a flat open field of approximately 4.5 acres. The site contains 5 old buildings (of approximately 3900, 2800, 1200, 1100, and 400 square feet, respectively) which are scheduled for demolition by the end of 1997.
The site was used by the City of Santa Clara as a Utility Yard from approximately 1890 through the 1960's. From the 1890's through the 1930's coal gas was generated at this site, first to power gas street lights and later to generate electricity for the electric street light system. The on- ite structures were used for the City for storage since the 1960's.
Reports, containing the results of environmental media sampling conducted at the Site, indicate that the soil is contaminated with hazardous substances, including Polynuclear Aromatic Hydrocarbons (PNAs) and lead.

Site History:

A previous Fuel Leak Case (07S1W02K01f) was opened at this site. This case was associated with the removal of 4 underground storage tanks (USTs) at a former gasoline retail station in 1986 and 1994. The case was closed on 10/23/00. At the time of closure, residual contamination remained in soil (4,700 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 3.5 ppm Benzene, 50 ppm Toluene, 25 ppm Ethylbenzene, and 260 ppm Xylenes) and groundwater (1,200 parts per billion (ppb) TPHg, 24 ppb Benzene, 3.3 ppb Toluene, 38 ppb Ethylbenzene, and 99 ppb Xylenes) at the site. 2003 – In May, a 1,000-gallon UST was found onsite and removed. 4 soil samples (P-1 through P-4) were collected from the excavation; 2 from each end at 6-inches and 2 feet below the bottom of the UST. The soil samples were analyzed for TPHg, TPH as Diesel (TPHd), TPH as Motor Oil (TPHmo), Oil and Grease (O&G), Pesticides, Polychlorinated Biphenyls (PCBs), LUFT Metals, Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compounds (SVOCs). The maximum concentrations reported were 5,900 ppm TPHg, 1,400 ppm TPHd, 81 ppm Ethylbenzene, 32 ppm Toluene, 44 ppm Naphthalene, 500 ppm Trichlorofluoromethane, 390 ppm 1,2,4-Trimethylbenzene, 120 ppm 1,3,5 trimethylbenzene, 46 ppm n-Propylbenzene, 3.7 ppm p-isopropyl benzene, 22 ppm 2 Methylnaphthalene, 1.6 ppm Cadmium, 38 ppm Chromium, 67 ppm Lead, 60 ppm Nickel, and 37 ppm Zinc. All other constituents were not reported to be present above the laboratory reporting limits. In June, 6 hand auger borings (B1 through B6) were advanced between 13 and 16 feet below the ground surface (ft bgs). Two soil samples were collected from each boring at varying depths and were analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs and LUFT Metals. Maximum concentrations reported were 11,000 ppm TPHg, 1,200 ppm TPHd, 55 ppm Ethylbenzene, 48 ppm Naphthalene, 510 ppm 1,2,4-Trimethylbenzene, 170 ppm 1,3,5-Trimethylbenzene, 45 ppm n-Butyl Benzene, 76 ppm n-Propyl Benzene, 26 ppm p-Isopropyl Benzene, 0.34 ppm Tert-butyl Benzene, and 4.7 ppm 2-Methylnaphthalene. Metals were detected at similar levels to the previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits. Groundwater was encountered in the borings and grab groundwater samples were collected from each open boring and analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs, and LUFT Metals. The maximum concentrations reported were 38,000 ppb TPHg, 13,000 ppb TPHd, 3,500 ppb Benzene, 4,200 ppb Ethylbenzene, 450 ppb Toluene, 11,000 ppb Xylenes, 580 ppb n Butylbenzene, 760 ppb Isopropylbenzene, 540 ppb p-Isopropylbenzene, 720 ppb Naphthalene, 1,500 ppb n-Propylbenzene, 9,100 ppb 1,2,4-Trimethylbenzene, 2,700 ppb 1,3,5 Trimethylbenzene, 51 ppb 2-Methylnaphthalene, 22 ppb Benzoic Acid, 210 ppb Cadmium, 2,600 ppb Chromium, 730 ppb Lead, 3,900 ppb Nickel, and 3,500 ppb Zinc. All other constituents were not reported to be present above the laboratory reporting limits. 2004 – In July, 4 groundwater monitoring wells (MW-1 through MW-4) were installed onsite. 5 soil samples were collected from each boring at various depths. Soil samples were reported to have up to 150 ppm TPHg, 21 ppm TPHd, 0.3 ppm Benzene, 1.9 ppm Ethylbenzene, 32 ppm Toluene, 1.6 ppm Naphthalene, 8.9 ppm Trichlorofluoromethane, 0.26 ppm Isopropylbenzene, 7.6 ppm 1,2,4-Trimethylbenzene, 2.1 ppm 1,3,5-Trimethylbenzene, 0.8 ppm n-Propylbenzene, 0.26 ppm p-Isopropyl Benzene. Metals were reported at similar concentrations as previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits. Quarterly groundwater monitoring began at this site in July 2004 and continued through February 2006. In July, the maximum concentrations reported in groundwater were 2,000 ppb TPHg, 480 ppb TPHd, 11 ppb Benzene, 54 ppb Ethylbenzene, 96 ppb Xylenes, 0.71 ppb 1,2-Dichloroethane (DCA), 8.6 ppb sec-Butylbenzene, 13 ppb Isopropylbenzene, and 17 ppb n-Propylbenzene. 2006 – In February, groundwater samples collected at the site during the last groundwater monitoring event were reported to have up to 700 ppb TPHg, 190 ppb TPHd, 2.2 ppb Benzene, 14 ppb Ethylbenzene, 6.9 ppb Xylenes, 1 ppb DCA, 4.4 ppb sec-Butylbenzene, 4.7 ppb Isopropylbenzene, and 3.7 ppb n-Propylbenzene. 2007 – In October, a soil vapor study was completed and the groundwater monitoring wells were sampled. Maximum concentrations reported for groundwater were 930 ppb TPHg, 260 ppb TPHd, 260 ppb Benzene, 52 ppb Ethylbenzene, 5.9 ppb Toluene, 0.71 ppb DCA, 5 ppb sec-Butylbenzene, 6.5 ppbIsopropylbenzene, and 1.8 ppb n-Propylbenzene. The constituents detected in the soil gas did not exceed the Environmental Screening Levels.

Site History:

A previous Fuel Leak Case (07S1W02K01f) was opened at this site. This case was associated with the removal of 4 underground storage tanks (USTs) at a former gasoline retail station in 1986 and 1994. The case was closed on 10/23/00. At the time of closure, residual contamination remained in soil (4,700 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 3.5 ppm Benzene, 50 ppm Toluene, 25 ppm Ethylbenzene, and 260 ppm Xylenes) and groundwater (1,200 parts per billion (ppb) TPHg, 24 ppb Benzene, 3.3 ppb Toluene, 38 ppb Ethylbenzene, and 99 ppb Xylenes) at the site.

2003 – In May, a 1,000-gallon UST was found onsite and removed. 4 soil samples (P-1 through P-4) were collected from the excavation; 2 from each end at 6-inches and 2 feet below the bottom of the UST. The soil samples were analyzed for TPHg, TPH as Diesel (TPHd), TPH as Motor Oil (TPHmo), Oil and Grease (O&G), Pesticides, Polychlorinated Biphenyls (PCBs), LUFT Metals, Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compounds (SVOCs). The maximum concentrations reported were 5,900 ppm TPHg, 1,400 ppm TPHd, 81 ppm Ethylbenzene, 32 ppm Toluene, 44 ppm Naphthalene, 500 ppm Trichlorofluoromethane, 390 ppm 1,2,4-Trimethylbenzene, 120 ppm 1,3,5 trimethylbenzene, 46 ppm n-Propylbenzene, 3.7 ppm p-isopropyl benzene, 22 ppm 2 Methylnaphthalene, 1.6 ppm Cadmium, 38 ppm Chromium, 67 ppm Lead, 60 ppm Nickel, and 37 ppm Zinc. All other constituents were not reported to be present above the laboratory reporting limits.

In June, 6 hand auger borings (B1 through B6) were advanced between 13 and 16 feet below the ground surface (ft bgs). Two soil samples were collected from each boring at varying depths and were analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs and LUFT Metals. Maximum concentrations reported were 11,000 ppm TPHg, 1,200 ppm TPHd, 55 ppm Ethylbenzene, 48 ppm Naphthalene, 510 ppm 1,2,4-Trimethylbenzene, 170 ppm 1,3,5-Trimethylbenzene, 45 ppm n-Butyl Benzene, 76 ppm n-Propyl Benzene, 26 ppm p-Isopropyl Benzene, 0.34 ppm Tert-butyl Benzene, and 4.7 ppm 2-Methylnaphthalene. Metals were detected at similar levels to the previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits.

Groundwater was encountered in the borings and grab groundwater samples were collected from each open boring and analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs, and LUFT Metals. The maximum concentrations reported were 38,000 ppb TPHg, 13,000 ppb TPHd, 3,500 ppb Benzene, 4,200 ppb Ethylbenzene, 450 ppb Toluene, 11,000 ppb Xylenes, 580 ppb n Butylbenzene, 760 ppb Isopropylbenzene, 540 ppb p-Isopropylbenzene, 720 ppb Naphthalene, 1,500 ppb n-Propylbenzene, 9,100 ppb 1,2,4-Trimethylbenzene, 2,700 ppb 1,3,5 Trimethylbenzene, 51 ppb 2-Methylnaphthalene, 22 ppb Benzoic Acid, 210 ppb Cadmium, 2,600 ppb Chromium, 730 ppb Lead, 3,900 ppb Nickel, and 3,500 ppb Zinc. All other constituents were not reported to be present above the laboratory reporting limits.

2004 – In July, 4 groundwater monitoring wells (MW-1 through MW-4) were installed onsite. 5 soil samples were collected from each boring at various depths. Soil samples were reported to have up to 150 ppm TPHg, 21 ppm TPHd, 0.3 ppm Benzene, 1.9 ppm Ethylbenzene, 32 ppm Toluene, 1.6 ppm Naphthalene, 8.9 ppm Trichlorofluoromethane, 0.26 ppm Isopropylbenzene, 7.6 ppm 1,2,4-Trimethylbenzene, 2.1 ppm 1,3,5-Trimethylbenzene, 0.8 ppm

n-Propylbenzene, 0.26 ppm p-Isopropyl Benzene. Metals were reported at similar concentrations as previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits.

Quarterly groundwater monitoring began at this site in July 2004 and continued through February 2006. In July, the maximum concentrations reported in groundwater were 2,000 ppb TPHg, 480 ppb TPHd, 11 ppb Benzene, 54 ppb Ethylbenzene, 96 ppb Xylenes, 0.71 ppb 1,2-Dichloroethane (DCA), 8.6 ppb sec-Butylbenzene, 13 ppb Isopropylbenzene, and 17 ppb n-Propylbenzene.

2006 – In February, groundwater samples collected at the site during the last groundwater monitoring event were reported to have up to 700 ppb TPHg, 190 ppb TPHd, 2.2 ppb Benzene, 14 ppb Ethylbenzene, 6.9 ppb Xylenes, 1 ppb DCA, 4.4 ppb sec-Butylbenzene, 4.7 ppb Isopropylbenzene, and 3.7 ppb n-Propylbenzene.

2007 – In October, a soil vapor study was completed and the groundwater monitoring wells were sampled. Maximum concentrations reported for groundwater were 930 ppb TPHg, 260 ppb TPHd, 260 ppb Benzene, 52 ppb Ethylbenzene, 5.9 ppb Toluene, 0.71 ppb DCA, 5 ppb sec-Butylbenzene, 6.5 ppbIsopropylbenzene, and 1.8 ppb n-Propylbenzene. The constituents detected in the soil gas did not exceed the Environmental Screening Levels.

Assembly District: 28 **Latitude:** 37.349463
Senate District: 10 **Longitude:** -121.93035
School District:
APN: 230-14-07

Cleanup Status: CERTIFIED / OPERATION & MAINTENANCE AS OF 3/26/2009
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY US EPA
Site Type: VOLUNTARY CLEANUP
Office: CLEANUP BERKELEY
Past Use that Caused Contam: MANUFACTURING - INDUSTRIAL MACHINERY, TRANSFORMER REPAIR
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL
Site History:

Structural drawings indicate that the buildings located on the Site were constructed around 1953 to 1954. The facility located on 1180 Campbell was operated by the Stokely Van Camp for the production and storage of frozen food until the mid-1980's. In 1982, the site was purchased by Custom Food Machinery (CFM). CFM's operation involved refurbishing and rebuilding food processing machinery and equipment for resale. CFM operated a machine shop and parts storage area in Building 3 and where hazardous materials were stored. CFM operated the facility until December 1991. The facility appeared to be vacated in 1993 when it was leased to MMAD. MMAD Partnership purchased the Site in 1995. Tenants in the buildings include: HA Distributing Corp, Odyssey Enterprises Inc; Primo Packagaing Co. and Paper Materials Co. at 1180 Campbell from 1996 to 2000; Dale's Trucking Company at 1184 Campbell from 1996 to present; AIT Freight Company at 1184 Campbell in 2000. Presently, building 1 (1180 Campbell) and Building 2 (1182 Campbell) are a single structure currently occupied by CPS'Odyssey Complete Packaging Solutions (Odyssey). The buildings are currently used for packaging, crating and warehousing. Building 3 (1184 Campbell), the smallest of the three buildings, is located at the rear of the property. The current owner operated the facility as a trucking business until July 1999. It is currently leased by On Time Transport and Ryan's Express Freight. The owner still uses some portions of the property for snowmobile and jet-ski repair, restoration of classic automobiles, and material storage. The property is surrounded by mixed uses including commercial and residential.

Potential Contamin of Concern:

1,2,4-TRICHLOROBENZENE POLYCHLORINATED BIPHENYLS (PCBS) TETRACHLOROETHYLENE (PCE)

Status: CERTIFIED / OPERATION & MAINTENANCE - LAND USE RESTRICTIONS
Program Type: VOLUNTARY CLEANUP
CalEnviroScreen Score: 56-60%

Title: Removal Action Completion Report
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43200021&doc_id=5016993
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Removal Action Completion Report
Date Completed: 8/11/2006
Comments: Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

Date Completed: 5/11/2006
Comments: The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling results indicate HRC is reducing concentrations on chemicals of concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.

Site Type: VOLUNTARY CLEANUP
Office: CLEANUP BERKELEY
Past Use that Caused Contam: MANUFACTURING - INDUSTRIAL MACHINERY, TRANSFORMER REPAIR
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL
Potential Contamin of Concern:

1,2,4-TRICHLOROBENZENE POLYCHLORINATED BIPHENYLS (PCBS) TETRACHLOROETHYLENE (PCE)

Site History:

Structural drawings indicate that the buildings located on the Site were constructed around 1953 to 1954. The facility located on 1180 Campbell was operated by the Stokely Van Camp for the production and storage of frozen food until the mid-1980's. In 1982, the site was purchased by Custom Food Machinery (CFM). CFM's operation involved refurbishing and rebuilding food processing machinery and equipment for resale. CFM operated a machine shop and parts storage area in Building 3 and where hazardous materials were stored. CFM operated the facility until December 1991. The facility appeared to be vacated in 1993 when it was leased to MMAD. MMAD Partnership purchased the Site in 1995. Tenants in the buildings include: HA Distributing Corp, Odyssey Enterprises Inc; Primo Packagaing Co. and Paper Materials Co. at 1180 Campbell from 1996 to 2000; Dale's Trucking Company at 1184 Campbell from 1996 to present; AIT Freight Company at 1184 Campbell in 2000. Presently, building 1 (1180 Campbell) and Building 2 (1182 Campbell) are a single structure currently occupied by CPS'Odyssey Complete Packaging Solutions (Odyssey). The buildings are currently used for packaging, crating and warehousing. Building 3 (1184 Campbell), the smallest of the three buildings, is located at the rear of the property. The current owner operated the facility as a trucking business until July 1999. It is currently leased by On Time Transport and Ryan's Express Freight. The owner still uses some portions of the property for snowmobile and jet-ski repair, restoration of classic automobiles, and material storage. The property is surrounded by mixed uses including commercial and residential.

Date Completed: 5/11/2006
Comments: The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling results indicate HRC is reducing concentrations on chemicals of concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.

Sub Area:
Sub Area Link:
Document Type: Removal Action Completion Report
Date Completed: 8/11/2006
Comments: Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

1,2,4-TRICHLOROBENZENE POLYCHLORINATED BIPHENYLS (PCBS) TETRACHLOROETHYLENE (PCE)

Site History:

Structural drawings indicate that the buildings located on the Site were constructed around 1953 to 1954. The facility located on 1180 Campbell was operated by the Stokely Van Camp for the production and storage of frozen food until the mid-1980's. In 1982, the site was purchased by Custom Food Machinery (CFM). CFM's operation involved refurbishing and rebuilding food processing machinery and equipment for resale. CFM operated a machine shop and parts storage area in Building 3 and where hazardous materials were stored. CFM operated the facility until December 1991. The facility appeared to be vacated in 1993 when it was leased to MMAD. MMAD Partnership purchased the Site in 1995. Tenants in the buildings include: HA Distributing Corp, Odyssey Enterprises Inc; Primo Packagaing Co. and Paper Materials Co. at 1180 Campbell from 1996 to 2000; Dale's Trucking Company at 1184 Campbell from 1996 to present; AIT Freight Company at 1184 Campbell in 2000. Presently, building 1 (1180 Campbell) and Building 2 (1182 Campbell) are a single structure currently occupied by CPS'Odyssey Complete Packaging Solutions (Odyssey). The buildings are currently used for packaging, crating and warehousing. Building 3 (1184 Campbell), the smallest of the three buildings, is located at the rear of the property. The current owner operated the facility as a trucking business until July 1999. It is currently leased by On Time Transport and Ryan's Express Freight. The owner still uses some portions of the property for snowmobile and jet-ski repair, restoration of classic automobiles, and material storage. The property is surrounded by mixed uses including commercial and residential.

Area Link:
Sub Area:
Sub Area Link:
Document Type: Fieldwork
Date Completed: 5/11/2006
Comments: The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling results indicate HRC is reducing concentrations on chemicals of concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.

Sub Area Link:
Document Type: Removal Action Completion Report
Date Completed: 8/11/2006
Comments: Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

Site History:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

The site is located at 1200-1202 Campbell Avenue, San Jose, Santa Clara County, California 95126. The site has two single-story warehouse type buildings, which are 20,727square feet in The building at the front is used as sales office and showroom. The concrete building at the back is used for storage. A temporary/make shift storage shed is attached to the building at the back. There is paved parking area at the front of the site. The paved area at the back is used both as parking and storage for of various plumbing materials. The site is fenced and surrounded by drive-ways all around the buildings. There are two gates on both sides of the front building restricting access to the back of the site. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists of primarily industrial/commercial businesses. Adjacent to the northeast boundary of the property is the Southern Pacific Railroad Newhall Yard. Beyond the Railroad to the northeast are the FMC Corporation Facility and San Jose International Airport. To the south across Campbell Avenue is Sanmina Corporation. To the southeast are Odyssey Complete Packaging Solutions, On Time Transport, and Ryan's Express Freight. The site is referred to Santa Clara Valley Water District because of several leaking underground storage tanks.

Site History:

The site has one single-story warehouse type building, which is 23,480 square feet in size. The building is split into three tenant areas. The front of the property is fenced off and used as a storage area for scaffolding material. There is a small landscaped area and a parking lot at the front of the building. A drive-way on the northwest side of the site leads to the back of the building to a paved area which is used as a storage yard and has one aboveground propane tank and a fueling station. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists of mixed commercial/industrial and residential developments. Adjacent to the northwest boundary of the property is Sanmina Corporation. Beyond Sanmina Corportation to the northwest is Stephen Schott Stadium. To the northeast across Campbell Avenue are Silicon Valley Microelectronics, Precision Specialties, Variety Metal Finishing and Southern Pacific Railroad Newhall Yard. Beyond the Railroad to the northeast is the former FMC Corporation Facility and San Jose International Airport. Adjacent to the southeast boundary of the property are A.J. Commercial Laundry and ALL Chem Supply and to the southwest are residential buildings. Prior to 1981, it was a vacant lot owned by Owens Illinois. In 1981, South Bay Construction started developing the property. Cobalt Associates has been the owner of the property since 1986. Blue's Roofing Company (Blue's) occupied the building at 1181 Campbell Avenue since 1981. Blue's specializes in commercial roofing and waterproofing. Past tenants include a towing company (Ray's Towing Service), a general contractor and an RV repair service.

Cleanup Status: NO FURTHER ACTION AS OF 10/19/2007
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
School District:
Past Use that Caused Contam: FUEL - VEHICLE STORAGE/ REFUELING
Potential Media Affected: NO MEDIA AFFECTED
Potential Contamin of Concern:

NO CONTAMINANTS FOUND

Site History:

The site has one single-story warehouse type building, which is 23,480 square feet in size. The building is split into three tenant areas. The front of the property is fenced off and used as a storage area for scaffolding material. There is a small landscaped area and a parking lot at the front of the building. A drive-way on the northwest side of the site leads to the back of the building to a paved area which is used as a storage yard and has one aboveground propane tank and a fueling station. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists of mixed commercial/industrial and residential developments. Adjacent to the northwest boundary of the property is Sanmina Corporation. Beyond Sanmina Corportation to the northwest is Stephen Schott Stadium. To the northeast across Campbell Avenue are Silicon Valley Microelectronics, Precision Specialties, Variety Metal Finishing and Southern Pacific Railroad Newhall Yard. Beyond the Railroad to the northeast is the former FMC Corporation Facility and San Jose International Airport. Adjacent to the southeast boundary of the property are A.J. Commercial Laundry and ALL Chem Supply and to the southwest are residential buildings. Prior to 1981, it was a vacant lot owned by Owens Illinois. In 1981, South Bay Construction started developing the property. Cobalt Associates has been the owner of the property since 1986. Blue's Roofing Company (Blue's) occupied the building at 1181 Campbell Avenue since 1981. Blue's specializes in commercial roofing and waterproofing. Past tenants include a towing company (Ray's Towing Service), a general contractor and an RV repair service.

Status: NO FURTHER ACTION

Site History:

The Irvine Company's Mission Town Center is currently on hold and inactive. The proposed project is located on an approximately 5.7-acre project site at the intersection of Benton Street and El Camino Real in the southeastern portion of the City of Santa Clara. The site is presently occupied by a mix of land uses, including light industrial uses such as a self-storage complex and auto repair shop, single and multifamily residential uses, office, and a restaurant. The applicant proposed to demolish the existing buildings on the project site and construct a mixed-use residential development project that would consist of 385 apartment units, approximately 10,000 square feet of conditioned amenity and leasing space, three distinct private open space areas, and about 27,000 square feet of ground floor retail. Parking would be provided in a 6 story parking structure, with one story below grade. The residential building would be slab-on-grade construction, while the commercial building would be podium construction with wood framing above. The project included a General Plan Amendment (to Santa Clara Station Very High Density Residential), a rezoning to Planned Development, and vacation of two streets (Sherman and Fremont). The project Environmental Impact Report was scheduled to be distributed for review in mid November 2015 with approval obtained in early January 2016. The project would then go to Planning Commission in early February 2016 with City Council approval scheduled for February 23, 2016. Project construction was scheduled to begin demolition on August 1, 2016 with project completion in February 2019. The project includes improvements to off-site utilities, including construction of 12 and 24-inch water mains in The Alameda and Harrison Street; rerouting a storm drain around the project site to the east along Benton Street and then to the north along El Camino Real. The new segment of storm drain would be upsized as part of the proposed project to 72 inches to maintain prior capacity. Finally, the project would extend the 8 inch recycled water main approximately 500 linear feet within Fremont Street from the intersection of Fremont and Alviso Street to the project frontage on the east side of the intersection of The Alameda and Fremont Street.

Potential Contamin of Concern:

1,2-DICHLOROETHYLENE (CIS) TPH-GAS TETRACHLOROETHYLENE (PCE) TRICHLOROETHYLENE (TCE) VINYL CHLORIDE

Site History:

The property has two parcels, each approximately 1.0 acre. 1175 Campbell Avenue is identified by Santa Clara County Assessor's Parcel Number 23013008. It has 2 warehouse type buildings, which are 19,000 square feet in size. 1173 Campbell Avenue is identified by Santa Clara County Assessor's Parcel Number 23013009. It has 3 warehouse type buildings, which are 19,000 square feet in size. The buildings on the site were built in 1956/1957. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists of mixed commercial/ industrial and residential developments. DTSC issued an Imminent and Substantial Endangerment Order for the Site on June 27, 2006 after a Site investigation in May 2005 revealed elevated levels of petroleum compounds, metals, and chlorinated volatile organic compounds in the groundwater. In January 2010, a dual-phase extraction system was operated for 9 months, removing contaminated groundwater and soil vapor. In May 2015, another round of extraction started and ran for approximately one year. Groundwater, soil vapor, and soil samples have been collected from the Site at various times since 2005. Further investigation is planned at the Site to evaluate potential off-Site impacts, but work has been paused due to lack of funding. 9/2021, NY

Sub Area Link:
Document Type: Correspondence
Date Completed: 5/2/2016
Comments: DTSC sent a letter to 1175 Campbell Avenue, LLC, the responsible party, that approved the updated project schedule outlined in a February 10, 2016 letter from GeoRestoration, Inc. DTSC agreed that the dual-phase extraction system should run until the Bay Area Air Quality District permit expired at the end of May 2016. After system shutdown, soil sampling would be performed after a one-month period to provide data to assess the progress of remedation.

Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER)
Site History:

The property has two parcels, each approximately 1.0 acre. 1175 Campbell Avenue is identified by Santa Clara County Assessor's Parcel Number 23013008. It has 2 warehouse type buildings, which are 19,000 square feet in size. 1173 Campbell Avenue is identified by Santa Clara County Assessor's Parcel Number 23013009. It has 3 warehouse type buildings, which are 19,000 square feet in size. The buildings on the site were built in 1956/1957. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists of mixed commercial/ industrial and residential developments. DTSC issued an Imminent and Substantial Endangerment Order for the Site on June 27, 2006 after a Site investigation in May 2005 revealed elevated levels of petroleum compounds, metals, and chlorinated volatile organic compounds in the groundwater. In January 2010, a dual-phase extraction system was operated for 9 months, removing contaminated groundwater and soil vapor. In May 2015, another round of extraction started and ran for approximately one year. Groundwater, soil vapor, and soil samples have been collected from the Site at various times since 2005. Further investigation is planned at the Site to evaluate potential off-Site impacts, but work has been paused due to lack of funding. 9/2021, NY

Potential Contamin of Concern:

1,2-DICHLOROETHYLENE (CIS) TPH-GAS TETRACHLOROETHYLENE (PCE) TRICHLOROETHYLENE (TCE) VINYL CHLORIDE

Status: ACTIVE
Program Type: STATE RESPONSE

Sub Area Link:
Document Type: Correspondence
Date Completed: 5/2/2016
Comments: DTSC sent a letter to 1175 Campbell Avenue, LLC, the responsible party, that approved the updated project schedule outlined in a February 10, 2016 letter from GeoRestoration, Inc. DTSC agreed that the dual-phase extraction system should run until the Bay Area Air Quality District permit expired at the end of May 2016. After system shutdown, soil sampling would be performed after a one-month period to provide data to assess the progress of remedation.

Dry cleaning operations for 60 years and discontinued in 2013. The dry cleaner was located centrally within a strip mall. In 2011 when the PCE dry cleaning machine was removed, the SCFD required soil sampling as part of the facility closure activity. Shallow soil samples were collected and reported to contain PCE. Additionally, grab groundwater samples were collected at that time from wells present within the facility.

Site History:			

The case includes oversight during the Santa Clara Valley Transportation Authority's (VTA) Silicon Valley Rapid Transit (SVRT) project that will extend the existing BART system from Fremont to Milpitas, San Jose and Santa Clara. In 2020, Phase I is complete through Berryessa in San Jose. Phase 2 will start from Berryessa to Santa Clara. The design includes plans for a new BART maintenance facility and a Santa Clara Station to be built on the former UPRR yard. VTA purchased the Site from UPRR and is now the current owner. The Site is approximately 47.5 acres of land that straddles the city limits of San Jose and Santa Clara. The Site is more than one mile in length and is bounded on the north by Brokaw Road and on the south by Newhall Street (see Site Location Map). The Site formerly had numerous sets of rails on the western side, which were removed. Land use in the surrounding area is a mix of residential, commercial, and industrial use. In 2002, 2003, and 2007, the Authority conducted soil and groundwater investigations on the Site. Soils on the Site, generally within the upper 3 feet, were found to contain petroleum hydrocarbons and certain heavy metals, including arsenic, lead, and mercury. The concentrations of these chemicals of potential concern (COPCs) in shallow soil generally exceed environmental regulatory screening levels (ESLs). Below approximately 3 feet across the Site, the levels are generally below their ESLs. Shallow groundwater at the Site was found to be impacted by volatile organic compounds from an off-site source. Shallow groundwater beneath the Site is not currently used as a source of drinking water. The San Jose Water Company supplies drinking water to the area. Construction activities at the Project will likely expose contaminated soils, groundwater, and/or other hazardous materials where they could be a potential concern to human health and the environment; therefore, management plans and/or remedial action plans have been prepared and completion reports will be submitted. The Regional Water Board's August 12, 2013, February 2, 2012, July 26, 2011, and October 21, 2008, letters (Letters) approved the remediation activities during the Project. The letters require a completion report. The February 2, 2012, letter also required a deed restriction to ensure that future workers and others are aware of post-construction conditions. Phase I BART extension completed in 2017 for Fremont, Milpitas and Berryessa/San Jose (aka C700 project). In 2018, a completion report documenting the excavation areas, and soil encapsulated areas was submitted and is under review by the Regional Water Board. Two deed restrictions have been recorded in Alameda and Santa Clara County. One deed restriction is pending. Case closure letter will be issued after all deed restrictions are recorded. Future BART extension construction will have a site management plan and remedial action plan. The remedial action plan was implemented during construction. Phase II BART extension is underway, and a remedial action plan and contaminant management plan have been approved by the Regional Water Board. A fact sheet was issued to the general public, which received no comments.

Site History:

The case includes oversight during the Santa Clara Valley Transportation Authority's (VTA) Silicon Valley Rapid Transit (SVRT) project that will extend the existing BART system from Fremont to Milpitas, San Jose and Santa Clara. In 2020, Phase I is complete through Berryessa in San Jose. Phase 2 will start from Berryessa to Santa Clara.

The design includes plans for a new BART maintenance facility and a Santa Clara Station to be built on the former UPRR yard. VTA purchased the Site from UPRR and is now the current owner. The Site is approximately 47.5 acres of land that straddles the city limits of San Jose and Santa Clara. The Site is more than one mile in length and is bounded on the north by Brokaw Road and on the south by Newhall Street (see Site Location Map). The Site formerly had numerous sets of rails on the western side, which were removed. Land use in the surrounding area is a mix of residential, commercial, and industrial use.

In 2002, 2003, and 2007, the Authority conducted soil and groundwater investigations on the Site. Soils on the Site, generally within the upper 3 feet, were found to contain petroleum hydrocarbons and certain heavy metals, including arsenic, lead, and mercury. The concentrations of these chemicals of potential concern (COPCs) in shallow soil generally exceed environmental regulatory screening levels (ESLs). Below approximately 3 feet across the Site, the levels are generally below their ESLs. Shallow groundwater at the Site was found to be impacted by volatile organic compounds from an off-site source. Shallow groundwater beneath the Site is not currently used as a source of drinking water. The San Jose Water Company supplies drinking water to the area.

Construction activities at the Project will likely expose contaminated soils, groundwater, and/or other hazardous materials where they could be a potential concern to human health and the environment; therefore, management plans and/or remedial action plans have been prepared and completion reports will be submitted. The Regional Water Board's August 12, 2013, February 2, 2012, July 26, 2011, and October 21, 2008, letters (Letters) approved the remediation activities during the Project. The letters require a completion report. The February 2, 2012, letter also required a deed restriction to ensure that future workers and others are aware of post-construction conditions.

Phase I BART extension completed in 2017 for Fremont, Milpitas and Berryessa/San Jose (aka C700 project). In 2018, a completion report documenting the excavation areas, and soil encapsulated areas was submitted and is under review by the Regional Water Board. Two deed restrictions have been recorded in Alameda and Santa Clara County. One deed restriction is pending. Case closure letter will be issued after all deed restrictions are recorded. Future BART extension construction will have a site management plan and remedial action plan. The remedial action plan was implemented during construction.

Phase II BART extension is underway, and a remedial action plan and contaminant management plan have been approved by the Regional Water Board. A fact sheet was issued to the general public, which received no comments.

Site History:

The site is located at 1177 Campbell Avenue, San Jose, Santa Clara County, California 95126. The Site property consists of 2.67 acres. The site has one single-story warehouse type building, which is 23,480 square feet in size. The building is split into three tenant areas. The front of the property is fenced off and used as a storage area for scaffolding material. There is a small landscaped area and a parking lot at the front of the building. A drive-way on the northwest side of the site leads to the back of the building to a paved area which is used as a storage yard and has one aboveground propane tank and a fueling station. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists of mixed commercial/industrial and residential developments. Adjacent to the northwest boundary of the property is Sanmina Corporation. Beyond Sanmina Corportation to the northwest is Stephen Schott Stadium. To the northeast across Campbell Avenue are Silicon Valley Microelectronics, Precision Specialties, Variety Metal Finishing and Southern Pacific Railroad Newhall Yard. Beyond the Railroad to the northeast is the former FMC Corporation Facility and San Jose International Airport. Adjacent to the southeast boundary of the property are A.J. Commercial Laundry and ALL Chem Supply and to the southwest are residential buildings. Prior to 1981, it was a vacant lot owned by Owens Illinois. In 1981, South Bay Construction started developing the property. Since 1986, Cobalt Associates became the owner of the property. From approximately 1981 to 1989, Kadas LTD, Barbary Coast Furniture occupied the site. Since June 2001 to present, Safway Services, Inc. occupied the Site. Safway is a nationwide scaffolding company with over 70 company-owned branches and offers scaffold sales, rental, labor services, training, engineering, design and computerized inventory management. The facility at 1177 Campbell Avenue is used for the purpose of distribution of construction equipment to job sites.

RB Case No:
Local Case No: 2016-24s
Begin Date: 6/7/2016
File Location: All Files are on GeoTracker or in the Local Agency Database
Lead Agency: SANTA CLARA COUNTY LOP
Stop Method:
CUF Case: NO
Case Worker: GOR

Local Agency: SANTA CLARA COUNTY LOP
Potential COC: Cyanide
Potential Media of Concern: Soil
How Discovered:
How Discovered Description:
Stop Description:
CalWater Watershed Name: Santa Clara - Palo Alto (205.50)
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:
CalEnviroScreen Score: 56-60%
Site History:

The site was the location of a plating shop that recently closed. Shallow soil samples beneath the plating shop location reported cyanide and other metals above screening levels. Additionally, grab groundwater and soil vapor samples throughout the property reported detections of VOCs. The RP plans to remediate the soil hot spots through excavation.

Site History:

The 4.7-acre Site was used by the City of Santa Clara as a utility yard from approximately 1890 through the 1960s. Coal gas used to power gas street lights and to generate electricity was generated onsite from the 1890s through the 1930s. The City of Santa Clara remains the current owner of the property, which is currently used as the Santa Clara Police Headquarters building.

Document Type: Removal Action Workplan
Date Completed: 1/26/1998
Comments: Sample results from a soil quality evaluation conducted in 1997 under DTSC oversight indicated lead, nickel, and polynuclear aromatic hydrocarbons (PAHs) including but not limited to anthracene, benzo(a)pyrene, and pyrene were found in soil. Lead contaminated soil was found to be the major issue, with concentrations up to 4,100 mg/kg. The RAW required consolidation and capping of impacted soil as well as underground tank removal and capping.

Document Type: 5 Year Review Reports
Date Completed: 3/23/2016
Comments: ATC, on the behalf of the City of Santa Clara, performed a 5-year review of the capped consolidation cells. A site visit was conducted on December 14, 2015 to assess the City's compliance with the Land Use Covenant and the Operation and Maintenance Agreement requirements for the consolidation cells. The asphalt consolidation area cap appeared to be well- maintained and in good condition, and there appeared to be no significant drainage problem affecting the consolidation cells. Based on a technical assessment as part of the 5-year review, it was concluded that the site remedial actions remain protective of human health and the environment.

Document Type: Removal Action Completion Report
Date Completed: 5/4/1999
Comments: The remedial actions consisted of debris removal, excavation and encapsulation of 5,560 cubic yards of lampblack and metal contaminated soil in two onsite consolidation areas, excavation and offsite disposal of approximately 5,720 cubic yards of hydrocarbon impacted soil, removal of a 400-gallon underground storage tank and other concrete debris, as well as proper closure and destruction of four previously unknown onsite abandoned water supply wells. A two-foot cap of clean material including the parking lot baserock layer asphalt concrete layer was then installed over the excavated and consolidated lampblack impacted soil. The impacted soils were consolidated under an asphalt parking area.

Document Type: Operation and Maintenance Report
Date Completed: 2/19/2013
Comments: The City of Santa Clara conducted an annual inspection and submitted the annual summary report as required by section 1.02 of the Land Use Covenant and section 2.4 of the Operation and Maintenance Agreement. About 20 feet of small cracks were observed in the asphalt of the parking lot over the cells where contaminated soil is contained. The cracks are small and will not let significant water penetrate the asphalt. The City Street Department plans to seal the cracks when the weather is drier and warmer.

Past Use that Caused Contam: NONE
Potential Media Affected: NO MEDIA AFFECTED
Site History:

The site is located at 1150 Campbell Avenue, San Jose, Santa Clara County, California 95126. The site has one single-story warehouse type building, which is 29,808 square feet in size. The building is split into three tenant sites: Silicon Valley Microelectronics and Precision Specialties occupy the front of the building, Variety Metal Finishing occupies the back of the building. The site is located approximately four and one half miles northwest of downtown San Jose, California. The surrounding area consists primarily of industrial/ commercial businesses. Adjacent to the northeast boundary of the property is the Southern Pacific Railroad Newhall Yard. Beyond the Railroad to the northeast is the FMC Corporation Facility and San Jose International Airport. To the south across Campbell Avenue are Blues Roofing, Kilman Sales, and Safway. Adjacent to the northwest boundary are Odyssey, On Time Transport, and Ryan's Express Freight. To the southeast construction works are in progress for Pulte Homes. To the southeast are large warehouse type buildings with fenced area (1140 Campbell Avenue). Silicon Valley Microelectronics (SVM) has occupied the site since April 2000. The suite was used as a metal plating shop earlier but was vacant for a year before SVM occupied the site. SVM is a distributor and supplier of wafers made of silicon, gallium arsenide, indium phosphide, and silicon carbide and used the subject property as a sales office and with a warehouse for product storage, shipping and receiving. They do not generate any hazardous waste and there was no report of release for this business. They moved out of this location as of May 15, 2005.

TPH-DIESEL TPH-GAS TETRACHLOROETHYLENE (PCE) TRICHLOROETHYLENE (TCE)

Site History:

The site is located at 1166 Campbell Avenue, San Jose, Santa Clara County, California 95126. The site has three single-story warehouse type building, which are 29,808 square feet in size. The building is split into three tenant sites: Silicon Valley Microelectronics and Precision Specialties occupy the front of the building; Variety Metal Finishing (Variety) occupies the back of the building. The surrounding area consists primarily of industrial/ commercial businesses. The property is owned by Campbell Avenue Associates. Variety Metal Finishing Inc. (Variety) has occupied the business since 1987. Variety has been in metal finishing business since 1986. They use several electroplating processes such as: gold plating, silver plating, nickel plating, tin plating, copper plating, passivate, soft and hard anodizing. During San Jose Fire Department file review, an inspection report for September 1993 revealed that a release of chemicals (cyanide plating bath, nickel sulfate tank) had occurred to secondary containment. Since the site has a tiered permit, it is subject to corrective action. The site is referred to Hazardous Waste Management Plan (HWMP).

CYANIDE (FREE) METALS PETROLEUM VOLATILE ORGANICS (8260B VOCS)

Site History:

The site, located to the west of San Jose Municipal Airport, was in operation from 1905 to 1996 as FMC Corporation. Research, development, and manufacturing of military tracked vehicles was conducted at the site, primarily under U.S. Department of Defense contracts from 1951 to 1996 when the facility closed. The site operated an on-site landfill (1/4-acre) from 1946 to 1979. The 1125 Coleman address consisted of two areas, the North Test Track and the Central Plant. The site is undergoing a Resource Conservation and Recovery Act (RCRA) Facility Investigation pursuant to a Corrective Action Consent Agreement (CACA), Docket HWCA FY 95/96-2002 with the Department of Toxic Substances Control (DTSC). An Interim Remedial Measures Work Plan was approved December 18, 2000 for the Central Plant area. Shallow soil samples detected total petroleum hydrocarbons (TPH) and metals (manganese, hexavalent chromium). Contaminated soil was excavated to industrial standards and disposed off-site. A groundwater investigation is also on-going at the site under DTSC oversight. Identified contaminants included volatile organic compounds (VOCs), total petroleum hydrocarbons (grease and diesel) and metals (arsenic, hexavalent chromium, and manganese). A dual phase extraction (DPE) system, with approximately 80 wells, has been installed. It treats the soil vapor and groundwater with granular-activated carbon units. The treated water is discharged under a NPDES permit.

Potential Contamin of Concern:

1,1,1-TRICHLOROETHANE (TCA) 1,4-DIOXANE TPH-MOTOR OIL TRICHLOROETHYLENE (TCE)

Site History:

FMC operated a facility at the site for the design, production, and testing of military tracked vehicles under US Department of Defense contracts from 1951 to 1997. FMC was a hazardous waste storage and treatment facility under an interim status document and the facility was certified closed in November 1996. The Site is comprised of three areas—Test Track Area (TTA), Central Plant Area (CPA), and Plant No. 7 Area—that have been investigated and remediated separately. FMC proposed the final corrective measures for the TTA and CPA in November 2001 and December 2005 Corrective Measures Study Reports, respectively. Groundwater impacted with volatile organic compounds continues to be pumped and treated by FMC. Most of the Plant No. 7 Area is a shopping complex. The San Jose Earthquakes Avaya Stadium is located in the CPA and commercial buildings are being constructed on a portion of the TTA.

Sub Area Link: https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=80001683&site_id=2008874
Document Type: Monitoring Report
Date Completed: 9/29/2017
Comments: The downgradient investigation was implemented to determine the extent of the volatile organic compound (VOC) plume to the north of the Central Plant Area. The groundwater samples collected from hydropunch locations at the San Jose International Airport confirmed that VOCs have migrated beyond the sentinel wells and into the Airport. Additional investigation at the Airport is not planned due to access limitation due to the Airport runways. FMC plans to continue monitoring the sentinel wells as part of their groundwater monitoring program.

Document Type: Soils Management Plan
Date Completed: 11/14/2007
Comments: The Soil Management Plan outlines the procedures for management of subsurface soil and groundwater that may brought to the surface and is intended to provide for the protection of workers and occupants during construction and redevelopment activities. The Plan identifies the location of the groundwater extraction and treatment system and monitoring wells in order to protect their integrity, presents general health and safety guidelines for Site construction or maintenance workers, and summarizes the portions of the Land Use Covenant that are relevant to the management of soil groundwater, and soil vapor that may be generated by future activities at the Site.

Sub Area Link: https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=80001683&site_id=2008874
Document Type: Operation and Maintenance Report
Date Completed: 12/16/2019
Comments: DTSC conditionally approved the 2018 Central Plant Area Groundwater Monitoring Report. The Report did not adequately address our comment regarding groundwater containment (General Comment 2 and Specific Comment 1). While the Report does not require further revision, DTSC recommend that the 2019 Annual Groundwater Monitoring Report discuss how the containment of the existing groundwater extraction and treatment system will be evaluated beyond the hand-drawn groundwater elevation contours. This may include hydraulic modeling or aquifer testing. A plan for evaluating the continued effectiveness of the remedy was recommended.

Document Type: Technical Workplan
Date Completed: 6/10/2014
Comments: The Work Plan presents details for the destruction and replacement of groundwater monitoring wells TW2-55 and TW59-SC in the Central Plant Area. These two monitoring wells were buried and damaged during activities related to the construction of the San Jose Earthquakes soccer stadium. The monitoring wells were located, but could not be repaired. Two new monitoring wells are to be installed near the original wells.

Sub Area Link: https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=80001683&site_id=2008875
Document Type: Operation and Maintenance Report
Date Completed: 5/10/2010
Comments: From January 15th through February 11th, the system was off for short periods of time due to power failures. Each time this occurred, a technician was sent to the site to restart the system as soon as possible. These power failures corresponded with severe weather events. Additionally, on March 17th, the system was off for 18 hours due to an overloaded variable frequency drive (VFD). The VFD was repaired and the system was restarted on March 18th. The total flow volume discharged to the storm drain from the system during this quarter, based on daily average flow volumes, was 2,077,904 gallons. No exceedances to the NPDES permit were observed.

Calenviro Screen Percentile Sc: 66-70%
Site Facility Type: CLOSED
Facility History:
Assembly District: 25
Senate District: 10
Census Tract: 6085505100

This property is the former site of the FMC Corporation. FMC operated a facility for the design, production, and testing of military tracked vehicles under US DOD contracts from 1951 to 1997. FMC was a hazardous waste storage and treatment facility under an interim status and certified closed in November 1996. Closure of the site involved dividing the site into areas. The Test Track Area and the Central Plant Area have been closed to industrial standards. Groundwater is impacted with organic contaminants and continues to be pumped and treated by FMC with oversight from DTSC. Both the Test Track Area and the Central Plant Area are now owned by the City of San Jose. The Plant 7 Area on the eastern portion of the site is now owned by Arcadia. On the western end is the last remnant of the FMC Corporation, an industrial facility run by the BAE Corporation which took over operations from FMC.

Hazardous Waste Code: D028
Waste Code Description: 1,2-DICHLOROETHANE

Hazardous Waste Code: D029
Waste Code Description: 1,1-DICHLOROETHYLENE

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: D040
Waste Code Description: TRICHLORETHYLENE

Hazardous Waste Code: F001
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F019
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Title: Bradford Manufacturing Company-Reed and Grant Streets Property RA Completion Report
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60001129&doc_id=60253580
Area Name:
Area Link:

Sub Area:
Sub Area Link:
Document Type: Removal Action Completion Report
Date Completed: 3/1/2013
Comments: The Report documents the removal action, which consisted of excavating soil contaminated with arsenic and total petroleum hydrocarbons in the first two feet of soil, backfilling with clean imported fill, and confirmation soil sampling. Since residual soil contamination above levels that allow for unrestricted land use remains deeper than two feet below the ground surface, the remedy includes a Land Use Covenant restricting sensitive land uses on the site and requiring a soil management plan if soil deeper than two feet is disturbed.

Title: Bradford Manufacturing Company-Reed and Grant Streets Property Supplemental Investigation Report extension request
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60001129&doc_id=60256353
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: *Correspondence - Received
Date Completed: 10/7/2010
Comments: The extension is being requested because delays in completing the building demolition and debris disposal continue to prevent access to soil sampling locations. Extension request was granted. New due date for the Supplemental Site Investigation Report is December 1, 2010.

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner: No
Smelting, Melting and Refining: No
Underground Injection Control: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 19830219
Handler Name: ALL METALS INC DBA ECS REFINING
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Notification

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 19900430
Handler Name: E C S REFINING (DBA)
Federal Waste Generator Code: 2
Generator Code Description: Small Quantity Generator
Source Type: Annual/Biennial Report

Site Facility Type: NON-OPERATING - PERMIT AUTHORITY: Standardized
Facility History:
Assembly District: 25
Senate District: 10
Census Tract: 6085505202

QUARTERLY UPDATE
Quarterly Update Period: January to March 2021
Facility Closure
DTSC received the final certified closure report and accepted the closure certification. Hazardous waste is no longer being treated or stored at this location and the final facility closure is complete. The facility previously operated under a Standardized Hazardous Waste Facility permit that expired on January 8, 2019. The facility ceased operations on June 29, 2018 during bankruptcy proceedings.
FACILITY DESCRIPTION/HISTORY
ECS Refining was located at 705 Reed Street in Santa Clara. ECS was a metal recycler that operated a hazardous waste storage and treatment facility to reclaim precious and base metals from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous waste. The site was entirely paved and fenced. The facility was located in a developed industrialized area near the San Jose International Airport. The area is zoned for heavy industry by the City of Santa Clara. The facility transported hazardous wastes to the facility for recycling. Two company trucks picked up hazardous and non-hazardous wastes throughout Northern California daily. In addition, third party trucks made pickups and deliveries of hazardous and non-hazardous wastes several times daily. ECS had been operating at this location since 1979. The City of Santa Clara Historical District, a mixed use residential and commercial area, is located approximately 0.5 mile southwest, the University of Santa Clara is located within 1 mile southeast, and there are a few residences located 0.25 mile from this former facility.
PERMITTING REGULATORY DESCRIPTION/HISTORY
ECS received Standardized Permit Interim Status in 1993 and was issued a Standardized Hazardous Waste Facility Permit with an effective date of December 30, 1997. The permit expired on December 30, 2007. ECS submitted a timely renewal application in December 2006 . A renewal Standardized Permit was issued on January 9, 2009 with an expiration of January 8, 2019. The Series A Standardized Permit authorized ECS to operate a hazardous waste storage and treatment facility to reclaim precious and base metals from photochemical wastes, metal-bearing wastewaters, tin/lead solder dross and related wastes from electronic manufacturing, and other metal-bearing solid hazardous wastes. Since the permit was issued in 1997, the Facility submitted four Class 1 modifications for minor operational changes and permit application updates, and had closed most of the 27 permitted units, including administrative closure of six units never operated or constructed.

Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Zip	ERIS ID

No unplottable records were found that may be relevant for the search criteria.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Dec 30, 2021

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Dec 30, 2021

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Dec 30, 2021

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Dec 30, 2021

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Dec 30, 2021

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Nov 17, 2021

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Nov 17, 2021

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Nov 17, 2021

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Nov 17, 2021

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Nov 17, 2021

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Nov 17, 2021

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Nov 17, 2021

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Dec 30, 2021

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Dec 30, 2021

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jul 26, 2021

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Aug 20, 2021

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Dec 30, 2021

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Nov 16, 2021

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jan 6, 2022

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jan 6, 2022

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jan 6, 2022

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 2, 2022

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 6, 2022

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 17, 2021

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 20, 2021

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 17, 2021

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Oct 20, 2021

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Oct 20, 2021

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Oct 20, 2021

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jan 3, 2022

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Dec 9, 2021

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Jan 25, 2022

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Dec 8, 2021

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Dec 8, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jan 6, 2022

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Oct 20, 2021

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jan 6, 2022

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Oct 20, 2021

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Feb 11, 2022

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks: DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 12, 2021

Delisted Tribal Underground Storage Tanks: DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Oct 12, 2021

County

Santa Clara County - Historic Solvent Case Listing: HSOL SANTACLARA

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing: LOP SANTACLARA

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks: UST SANTACLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Oct 27, 2021

Santa Clara County - CUPA Facilities List: CUPA SANTACLARA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Mar 13, 2021

Santa Clara County - City of San Jose Hazardous Material Facilities: HAZ SANJOSE

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Oct 15, 2020

Santa Clara County - Gilroy City CUPA Facilities List: CUPA GILROY

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Jan 5, 2022

Santa Clara County - Sunnyvale City CUPA List: CUPA SUNNYVALE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jul 16, 2019

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites: PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Jan 11, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations https://pfasproject.com/pfas-contamination-site-tr acker/

Government Publication Date: Dec 12, 2019

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 22, 2021

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Oct 20, 2021

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Oct 14, 2021

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 2, 2021

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites: URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Dec 21, 2021

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Apr 13, 2021

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Jan 20, 2022

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Oct 20, 2021

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: May 20, 2021

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Apr 29, 2021

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jan 6, 2022

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Aug 1, 2021

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 17, 2021

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Dec 8, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Oct 20, 2021

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Dec 17, 2021

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Dec 15, 2021

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Oct 20, 2021

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2019

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix B—User Questionnaire / Landowner Questionnaires and Agency Requests

From: Public Records
To: Ramalingam, Vidhya
Subject: Public Records Request No. 2022-02-0352
Date: Monday, February 28, 2022 9:33:34 AM

CAUTION: This email originated from an external sender. Verify the source before opening links or attachments.

Dear Vidhya Ramalingam,

Thank you for your request. We have searched our records and have no records that respond to your below request for:

2655 The Alameda
2655 The Alameda
Santa Clara

If you have any questions or concerns, please call or e-mail me.

Sincerely,

Public Records Request Number: 2-030122-04

Location(s): 2655 The Alameda, Santa Clara, CA 95050; APNs: 230-12-071, 269-44-044, 269-44-091, 269-38-080, 269-44-082, 269-44-067, 269-38-109, 269-38-108, 269-44-039, 230-11-043, 230-13-023, 230-12-072, 269-44-068 & 269-38-111

Dear Ms. Ramalingam,

We have received your Public Records Act Request at the Department of Toxic Substances Control (DTSC). Upon thorough review of our files, we found no records pertaining to the site(s) referenced above.

For information regarding public reports on hazardous waste shipments of generators, transporters, and TSDFs, you can access our Hazardous Waste Tracking System (HWTS) online at: https://hwts.dtsc.ca.gov/. Select the “Reports” tab for search options. If you are interested in retrieving detailed reports, please contact the HWTS unit via e-mail: hwtsreports@dtsc.ca.gov or phone: 1-800-618-6942. Customized reports may require a fee. For copies of manifests, please send an e-mail to mcr@dtsc.ca.gov.

In addition, the DTSC provides access to public records online via Envirostor; another data management system that tracks our efforts in cleanup, permitting, enforcement, and investigation of known/suspected hazardous waste sites and facilities. The available data is updated in real-time. You can access Envirostor online at www.envirostor.dtsc.ca.gov. Navigate the website easily by clicking the "How to Use Envirostor" tab, then selecting the option “Take a Tour”. If you have any questions or would like further information regarding your request, please contact me via phone: 510-540-3800 or e-mail: Berkeleyfileroom@dtsc.ca.gov.

PUBLIC RECORDS ACT REQUEST – PRA # 1-030122-04

Dear Ms. Ramalingam:

On March 3, 2022, the Department of Toxic Substances Control (DTSC) received your Public Records Act request for records pertaining to the following property(s):

500 El Camino Real
Santa Clara, California 95053-0001

The search on the above address, conducted in DTSC's "Electronic Devices Online System - For Notification and Reporting Requirements," resulted in the enclosed information on **Santa Clara University, GreenMouse Recycling, & Santa Clara University** that are associated with the property(s).

Should you have any questions regarding this matter, please feel free to contact me via electronicwaste@dtsc.ca.gov.

Sincerely,

Laura Helfrich

Dear Requestor:

On March 1, 2022 the Department of Toxic Substances Control (DTSC) received your email of March 1, 2022 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to this request for **2605, 2705, & 2795 The Alameda, 745 Bellomy St, and 500 El Camino Real**. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at http://hwts.dtsc.ca.gov. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at hwtsreports@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

DTSC's E-Waste unit may have records that pertain to this request for **500 El Camino Real**. "E-Waste" refers to any unwanted electronic device or Cathode Ray Tube (CRT) and is classified as universal waste. E-Waste frequently contains hazardous materials, predominantly lead and mercury, and is produced by households, businesses, governments, and industries. I have forwarded your Public Records Act request to that unit for further processing. Please contact them by email at electronicwaste@dtsc.ca.gov if you are interested in this information.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-3611 or via email at PubReqAct@dtsc.ca.gov.

Sincerely,
Tee Xiong

USER QUESTIONNAIRE FOR PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Name: Alameda Project

Address(es): 2665 The Alameda, Santa Clara CA 95050

City, State, Zip Code:

APN(s): 230-12-012

Reason for Phase I ESA: land acquisition

Signature:

Anjuli N. Habbas

Signature

Anjuli N. Habbas - Partner

Print Name and Title

Kapital Partners, CCC

Company Name (Please Print)

2/24/22

Date

1. **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)**

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes___ No ✓

If yes, please provide as much detail as possible about the liens against the property and provide copies of any related reports or paperwork.

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)**

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes ✓ No___

If yes, please provide as much detail as possible about the AULs present and provide copies of any related reports or paperwork.

Former gas station so local zoning ordinance prohibits certain uses.

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes___ No ✓

If yes, please provide as much detail as possible about the specialized knowledge or experience and provide copies of any related reports or paperwork.

4. **Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Yes ✓ No___

If no, please provide as much detail as possible about the difference between the expected and actual purchase price, and any reasons this difference may be present. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

5. **Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

(a.) Do you know the past uses of the property?

Yes ✓ No ____

(b.) Do you know of specific chemicals that are present or once were present at the property?

Yes ____ No ✓

(c.) Do you know of spills or other chemical releases that have taken place at the property?

Yes ✓ No ____

(d.) Do you know of any environmental cleanups that have taken place at the property?

Yes ✓ No ____

If yes, please provide as much detail as possible and provide copies of any related reports or paperwork.

Former Chevron Station, clean up commenced in 1990's. See GeoTracker.

6. **The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?

Yes ✓ No ____

If yes, please provide as much detail as possible about the indicators of releases, and provide copies of any related reports or paperwork.

Based on former testing results, contamination still likely.

7. Is/Are/Were there any of the following?

Subject: Records Request - 2655 The Alameda Santa Clara - Phase I ESA

Good morning,

We are representing a client with interests in a property located in Santa Clara, CA. We are preparing a Phase I Environmental Site Assessment and request relevant environmental documents and permits that include: Fire records, Site Inspection Records/Notice of Violations, Spills, groundwater or soil sampling reports/analytical results, Underground/ Above ground Storage Tanks, Hazardous Materials, Wastewater Discharge Permits, Solid Waste Disposal Permits, Building permits, reports of chemical odors/fumes and Well Installation information for the following APNs of the Site and some of the surrounding areas:

***Site APNs*: 230-12-012**
Surrounding Areas APNs: 230-12-071, 269-44-044, 269-44-091, 269-38-080, 269-44-082, 269-44-067, 269-38-109, 269-38-108, 269-44-039, 230-11-043, 230-13-023, 230-12-072, 269-44-068,
269-38-111,

The Site is located at: 2655 The Alameda, Santa Clara, CA 95050

Please contact me if there are any or no records found. If there are any questions regarding this request, please call me directly at 919-348-5067 or Vidhya.ramalingam@tetratech.com. Thank you for your time and help.

Sincerely,

Vidhya Ramalingam, Ph.D | Environmental Engineer

WELL DESTRUCTION APPLICATION

FC 198 (01-23-98) (DP 4-301)

Please describe, in detail, the proposed destruction method: pressure grout.
Place an amount of neat cement grout, equel to 150% of the casing volume, into well.
or Pressurize well with 25 psi of air for 15 minutes

I understand that all work is to be done in accordance with the District Well Ordinance, the District Well Standards, and the conditions of this permit. I also certify that the information given in this permit is correct to the best of my knowledge.

Signature of Well Owner/Agent:	Print Name:	Date:
[signature]	GEORGE HERBST	7/2/02
Signature of Driller/Agent: [signature]	Print Name: Ben Welsted	Date: 7/2/02
Signature of Consultant (if any):	Print Name:	Date:

Please allow 10 working days to process this

DISTRICT USE ONLY

The District has approved the following destruction methods for the well described in this permit:

☒ Pressure Grout Method (as outlined in Standards). Screen interval(s): 10'-25'

OR

☒ Drill out well to a total depth of 25' feet, with a minimum bore of 8" inches.

☐ Bail and/or drill out well to a total depth of _____ feet and back fill.
(If total depth is unknown, driller must determine total depth during clean out of well.)

☐ Well casing must be perforated at the following depths: _____

☐ Other: _____

SIGNATURES

I understand and agree that all work associated with this permit is required to be done in accordance with Santa Clara Valley Water District (District) Well Ordinance 90-1, the District Well Standards, and the conditions of this permit (see page 2). I certify that the information given in this permit is correct to the best of my knowledge and that the signature below, whether original, electronic, or photocopied, is authorized and valid, and is affixed with the intent to be enforceable. I also certify that a right of entry/encroachment agreement has been formalized between the well owner and property owner, if parties differ. I also understand that it is my responsibility, as the well owner, to notify the District of any changes in the purpose of this well, from which, is indicated on this application.

WELL CONSTRUCTION APPLICATION

DISTRICT WELL PERMIT NO.: 10W00326

Based on information on this application and attachment(s) hereto (if any) and subject to approval noted below, permission is hereby granted to construct (drill) the described well. Permission to start work may be withheld until a field check verifies all statements made on application by permittee and is also subject to the "General" and "Special" Conditions stated below.

SANTA CLARA COUNTY DEPARTMENT OF ENVIRONMENTAL HEALTH APPROVAL (Water Supply Well Only)

NOTE: Department of Environmental Health approval must be granted before this application will be accepted by Santa Clara Valley Water District.

Approved by: , R.E.H.S	☐ Approved as submitted ☐ Approved as corrected
	Date:

SITE PLAN

A 8½" x 11" paper site plan **must** be attached to this application, including:

1. Location of site features, including major buildings, landscaped areas, tank fields, existing wells, etc.
2. North arrow and scale
3. Location of proposed well with dimensions in feet from well to nearest cross streets.

GENERAL CONDITIONS

A. **District** (telephone 408-265-2607, ext. 2660) **must be notified a minimum of one working day before construction of the annular seal**. An authorized District representative must be on site to witness the construction of the annular seal. This requirement may be waived by an authorized District representative. If the District waives the inspection requirement, the District may request the permittee(s) to furnish certification, under penalty of perjury, that the well was constructed in accordance with the District Well Standards and with the permit conditions.

B. Permittee agrees to construct, operate, and maintain the well according to provisions of the latest District Ordinance and the latest published revisions of District Well Standards to the end that this well will not cause pollution or contamination of groundwater or otherwise jeopardize the health, safety, or welfare of the people of the District.

C. This permit is valid only for the purpose specified herein. Well construction methods authorized under this permit may not be changed except by written approval of an authorized District representative, and only if the District believes that such a change will result in equal or superior compliance with the District and State Well Standards (e.g., if the District representative finds that site conditions warrant such a change).

D. This permit is only valid for the Assessor's Parcel No. indicated on it.

E. This permit may be voided if it contains incorrect information. If the permit is voided after work has begun, the well or boring that was constructed under this permit must be destroyed in accordance with District and State Well Standards.

F. If any work associated with this permit will take place on District property/easement, an encroachment or construction permit must be granted by the District's Community Projects Review Unit (telephone 408-265-2607, ext. 2589).

G. Before the well constructed under this permit can be used as a drinking water source, its use must be approved by the regulatory agency with authority over such use (typically the Santa Clara County Department of Environmental Health or the State of California Department of Public Health). A completed Well Inventory Form must also be approved.

H. If the well constructed under this permit cannot be or is not being used for its intended purpose, permittee is hereby required to destroy the well according to the District Well Standards and under permit from the District. Any test holes drilled under this permit must be destroyed within 24 hours of completion of testing activities. Destruction activities must be completed according to District standards. District must be notified a minimum of 24 hours prior to destruction.

I. Within 30 days of the completion of the well construction activities, the driller or consultant identified on this permit shall fully complete State of California DWR Form 188 and mail the original to the District's Wells and Water Production Unit.

J. The permittee(s) shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend, and hold the District, its officers, agents, and employees, free and harmless from any and all expense, cost, and liability in connection with or resulting from the granting or exercise of this permit including, but not limited to, property damage, personal injury, and wrongful death.

K. Permittees are required to be in full compliance with Cal/OSHA California Labor Code Section 6300.

L. A current C-57 Water Well Drilling Contractor's License is required for the construction of all wells.

M. Permittee, permittee's contractors, consultants, or agents shall be responsible to assure that all materials or waters generated during drilling, well construction, well development, pump testing, or other activities associated with this permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on- or off-site storm sewers, dry wells, or waterways. Such materials/waters must not be allowed to move off the property where the work is being completed.

N. The driller and consultants (if applicable) shall have an active copy of their Worker's Compensation Insurance on file with District.

O. This permit shall expire if not exercised within 180 calendar days of its approval, unless an extension of the permit expiration date is granted by an authorized District representative.

P. This permit must be kept on site during all activities associated with it and shall immediately be presented to an authorized District representative upon request.

SPECIAL CONDITIONS

Community Projects Review Unit Approval (if needed):	CPRU Permit No.:
Approved by:	Date: 6-22-10

Please allow 10 working days to process this application.

PROFESSIONAL GEOLOGIST JAMES PATRICK MAY NO. 9021 STATE OF CALIFORNIA

GEO FORM 304 30-6426 THE ALAMEDA.GPJ SUNCOR DATA TEMPLATE.GDT 8/16/10

From:	Yolanda Cervantes
To:	Ramalingam, Vidhya; Mike Duffy
Cc:	Usha Chatwani
Subject:	RE: Records Request - 2655 The Alameda Santa Clara - Phase I ESA-RfPR 2022-5326 Request for Research/Reminder
Date:	Wednesday, March 9, 2022 9:17:35 AM
Attachments:	image001.png image002.png image003.png image004.png image005.png image006.png image007.png image008.png image009.png image010.png

CAUTION: This email originated from an external sender. Verify the source before opening links or attachments.

Hello Vidhya,

Thank you for your email. Based on your response, the district has no records responsive to your request. However, I would like to once again provide you with the following information and resources available regarding underground storage tanks, which may be useful to you in your research:

The oversight responsibility for investigations and clean-up of releases from underground storage tanks was transferred from the Santa Clara Valley Water District to the Santa Clara County Department of Environmental Health as of July 1, 2004. DEH files on leaking underground storage tanks have been transferred to the State Water Resources Control Board's GeoTracker database. Case files are available online at https://geotracker.waterboards.ca.gov/.

For more information, see Santa Clara County's file review page (https://www.sccgov.org/sites/hazmat/programs/smp/Pages/review.aspx)
We also recommend that you visit the Department of Toxic Substances Control's EnviroStor website for additional information related to non-DEH cleanup cases within the County at http://www.envirostor.dtsc.ca.gov/public/.

Solvent and toxic release sites in Santa Clara County are primarily regulated by the following Agencies:

- San Francisco Bay Regional Water Quality Control Board (Case data available through GeoTracker)
- California Department of Toxic Substances Control (Case data available through EnviroStor)
- United States Environmental Protection Agency (Case data for Superfund sites available through EPA)
- Central Coast Regional Water Quality Control Board (Case data available through GeoTracker)
- Local Fire Departments may also maintain records.

We do provide some solvent case files at: https://www.valleywater.org/node/789; however, please note that these files may be incomplete and not up-to-date. These files are not maintained by the district. For complete case files, including the most recently submitted reports, contact the regulatory agency overseeing the case.

Regards,

Yolanda

Subject: RE: Records Request - 2655 The Alameda Santa Clara - Phase I ESA-RfPR 2022-5326 Request for Research/Reminder

Mike,

The link you sent me is quite useful. Thank you. Based on our conversation, I understand that the agency only has records on wells and does not have any information related to: "Site Inspection Records/Notice of Violations, Spills, groundwater or soil sampling reports/analytical results, Underground/ Above ground Storage Tanks, Hazardous Materials, Wastewater Discharge Permits, Solid Waste Disposal Permits, Building permits, reports of chemical odors/fumes"

If there is no other information available other than the well permits, there is no need to continue with the original request. However, if you do have anything other than the well permits, we would like to receive that.

Sincerely,

Vidhya Ramalingam, Ph.D | Environmental Engineer

Hi Vidhya,

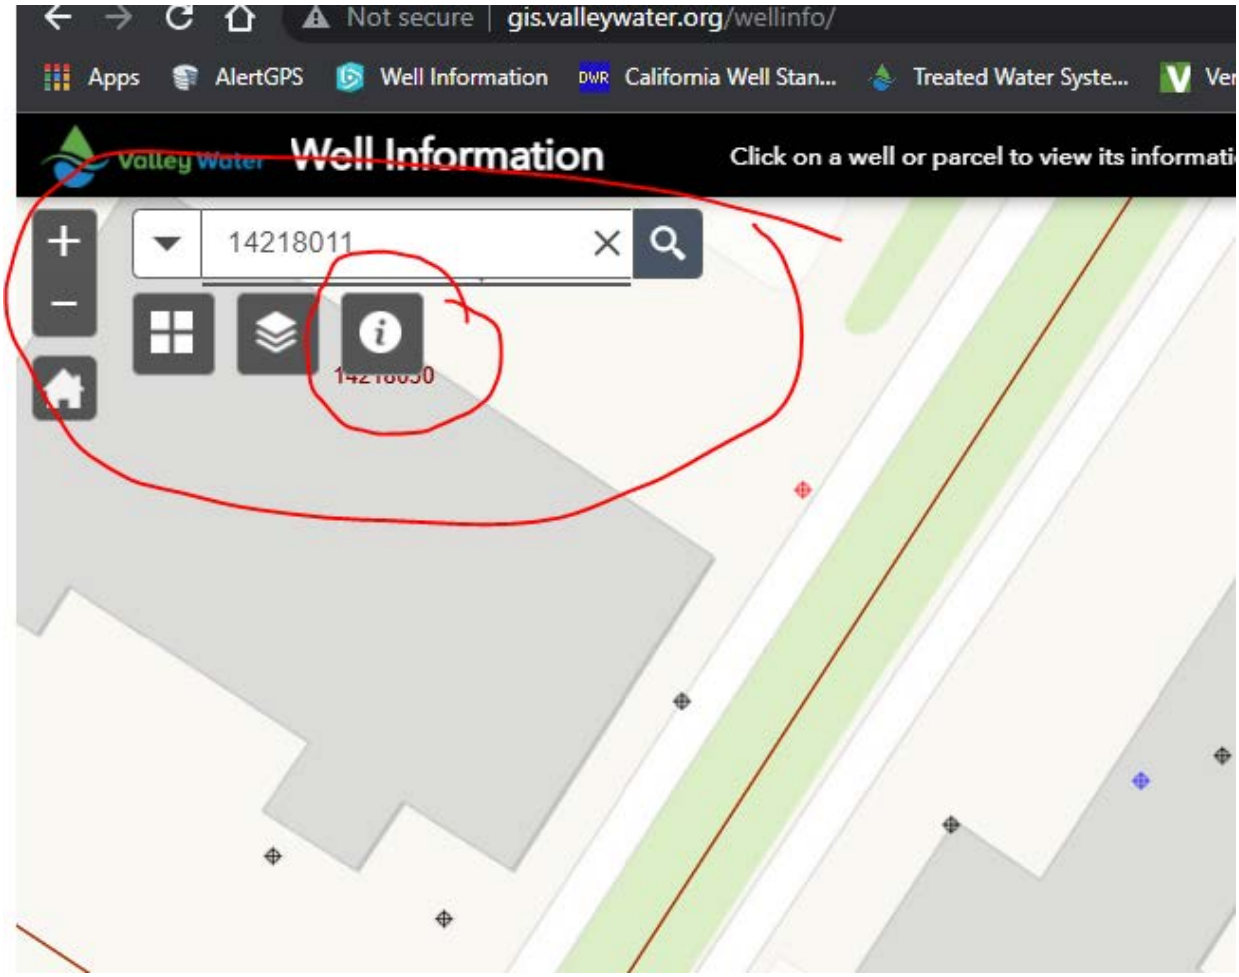

It was a pleasure talking with you.

Per our conversation, I have attached examples of a couple of the well permits for wells that are, or were, located on the properties (many are destroyed). Because pulling and copying the large amount of records associated with your request requires us a large amount of work to complete, please only request information that is germane to your needs and is actionable.

The link below will take you to our Well Information tool that can be used to view the locations of the wells on the property, view attribute data for each well, and create tables of the data associated with the wells. The tool should be opened in Google Chrome.

https://gis.valleywater.org/wellinfo/

Once in the tool, you can use the drop-down menu to search for well information using an APN, or address (use "Santa Clara County" to search by street address). The "i" button will give direction on how to run reports, etc.

Subject: FW: Records Request - 2655 The Alameda Santa Clara - Phase I ESA-RfPR 2022-5326 Request for Research

Hi Mike,

We received the request below today. The only portion of the request I am asking you to research in wells. I did preliminary research in GIS and found that there are wells located at the following apn's:

- 230-12-012
- 230-12-071
- 269-44-067
- 269-38-108
- 230-11-043
- 230-13-023

Do you have records for the wells located on these properties? An initial response is due to the requestor on 3/10/22, but if believe you will need additional time, please let me know. Responsive records can be placed here: \\SRVFILE1\global\Temporary\Current Month\RfPRs\2022-5326

Thanks,

Yolanda

Subject: Records Request - 2655 The Alameda Santa Clara - Phase I ESA

Good morning,

We are representing a client with interests in a property located in Santa Clara, CA. We are preparing a Phase I Environmental Site Assessment and request relevant environmental documents and permits that include: Site Inspection Records/Notice of Violations, Spills, groundwater or soil sampling reports/analytical results, Underground/ Above ground Storage Tanks, Hazardous Materials, Wastewater Discharge Permits, Solid Waste Disposal Permits, Building permits, reports of chemical odors/fumes and Well Installation information for the following APNs of the Site and some of the surrounding areas:

***Site APNs*: 230-12-012**
Surrounding Areas APNs: 230-12-071, 269-44-044, 269-44-091, 269-38-080, 269-44-082, 269-44-067, 269-38-109, 269-38-108, 269-44-039, 230-11-043, 230-13-023, 230-12-072, 269-44-068,
269-38-111,

The Site is located at: 2655 The Alameda, Santa Clara, CA 95050

Please contact me if there are any or no records found. If there are any questions regarding this

request, please call me directly at 919-348-5067 or Vidhya.ramalingam@tetratech.com. Thank you for your time and help.

RE: CITY DIRECTORY RESEARCH
Kapital Partners, LLC - 2655 The Alameda, Santa Clara, CA
Kapital Partners, LLC - 2655 The Alameda, Santa Clara, CA Santa Clara, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

2550-2710 of The Alameda
2850-3000 of Park Ave
700-799 of Bellomy St

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo (2015)

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

ERIS

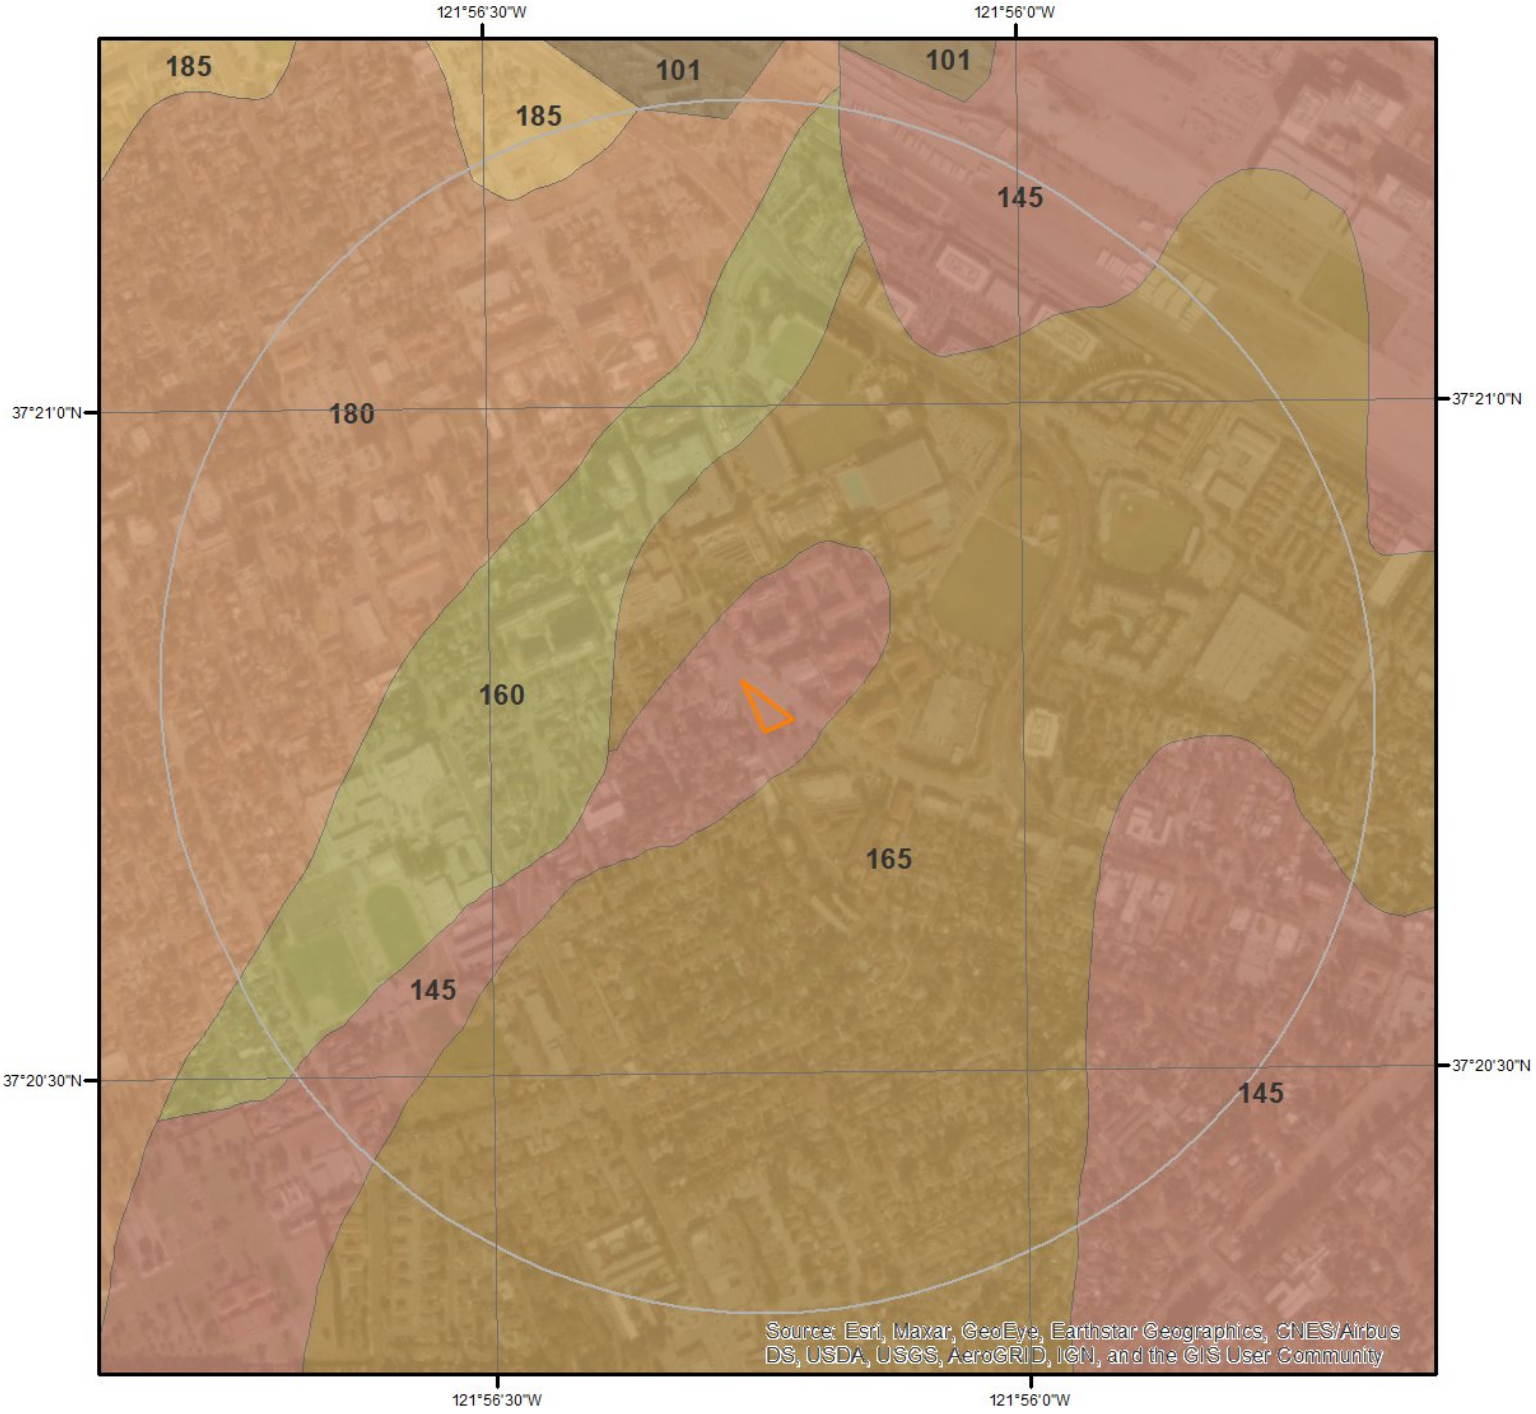

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

N

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 101 (36.79%)

Map Unit Name:	Urban land, 0 to 2 percent slopes, basins
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 101 - Urban land, 0 to 2 percent slopes, basins

Component: Urban land (98%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Xerorthents (2%)
Generated brief soil descriptions are created for major components. The Xerorthents soil is a minor component.

Map Unit 145 (25.18%)

Map Unit Name:	Urbanland-Hangerone complex, 0 to 2 percent slopes, drained
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Hangerone(25%)

horizon A1(0cm to 24cm)	Clay
horizon A2(24cm to 42cm)	Clay
horizon Bw(42cm to 68cm)	Clay
horizon Bk(68cm to 88cm)	Clay
horizon Ck(88cm to 115cm)	Clay loam
horizon C(115cm to 183cm)	Gravelly loam
horizon 2Ab(183cm to 225cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 145 - Urbanland-Hangerone complex, 0 to 2 percent slopes, drained

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Hangerone (25%)
The Hangerone, drained component makes up 25 percent of the map unit. Slopes are 0 to 2 percent. This component is on urban land, basin floors, basins. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is

moderate. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 2s. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 15 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Clear Lake (2%)
Generated brief soil descriptions are created for major soil components. The Clear Lake soil is a minor component.

Component: Bayshore (2%)
Generated brief soil descriptions are created for major soil components. The Bayshore soil is a minor component.

Component: Embarcadero (1%)
Generated brief soil descriptions are created for major soil components. The Embarcadero soil is a minor component.

Map Unit 160 (1.39%)

Map Unit Name:	Urbanland-Clear Lake complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	
Major components are printed below	
Clear Lake(25%)	
horizon Ap1(0cm to 23cm)	Silty clay
horizon Ap2(23cm to 36cm)	Silty clay
horizon Bw(36cm to 82cm)	Silty clay
horizon Bss(82cm to 127cm)	Silty clay
horizon C(127cm to 167cm)	Silty clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 160 - Urbanland-Clear Lake complex, 0 to 2 percent slopes

Component: Urban land (65%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Clear Lake (25%)
The Clear Lake component makes up 25 percent of the map unit. Slopes are 0 to 2 percent. This component is on basin floors, basins. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is very high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 2s. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 2 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Hangerone (5%)
Generated brief soil descriptions are created for major components. The Hangerone soil is a minor component.

Component: Campbell (5%)
Generated brief soil descriptions are created for major components. The Campbell soil is a minor component.

Map Unit 165 (20.13%)

Map Unit Name:	Urbanland-Campbell complex, 0 to 2 percent slopes, protected
Bedrock Depth - Min:	

Soil Information

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Campbell(20%)

horizon Ap(0cm to 25cm)	Silt loam
horizon A1(25cm to 60cm)	Silt loam
horizon A2(60cm to 80cm)	Silty clay loam
horizon A3(80cm to 97cm)	Silty clay loam
horizon 2A(97cm to 130cm)	Silty clay loam
horizon 2Bw1(130cm to 180cm)	Silty clay
horizon 2Bw2(180cm to 200cm)	Silty clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 165 - Urbanland-Campbell complex, 0 to 2 percent slopes, protected

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Campbell (20%)
The Campbell, protected component makes up 20 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, alluvial plains. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 1 This soil does not meet hydric criteria. The soil has a very slightly saline horizon within 30 inches of the soil surface.

Component: Clear Lake (5%)
Generated brief soil descriptions are created for major soil components. The Clear Lake soil is a minor component.

Component: Newpark (5%)
Generated brief soil descriptions are created for major soil components. The Newpark soil is a minor component.

Map Unit 180 (11.88%)

Map Unit Name: Urbanland-Newpark complex, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Newpark(20%)

horizon Ap(0cm to 20cm)	Silty clay loam
horizon A1(20cm to 45cm)	Silty clay loam
horizon A2(45cm to 68cm)	Silty clay loam
horizon Ck1(68cm to 91cm)	Silty clay loam
horizon Ck2(91cm to 132cm)	Silty clay loam
horizon C1(132cm to 160cm)	Fine sandy loam
horizon C2(160cm to 200cm)	Fine sandy loam

Component Description:

Minor map unit components are excluded from this report.

Soil Information

Map Unit: 180 - Urbanland-Newpark complex, 0 to 2 percent slopes

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Newpark (20%)
The Newpark component makes up 20 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, alluvial plains. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 1 This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 5 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Still (5%)
Generated brief soil descriptions are created for major components. The Still soil is a minor component.

Component: Elpaloalto (5%)
Generated brief soil descriptions are created for major components. The Elpaloalto soil is a minor component.

Map Unit 185 (4.63%)

Map Unit Name:	Urban Land - Bayshore complex, 0 to 2 percent slopes, drained
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	
Major components are printed below	
Bayshore(20%)	
horizon A1(0cm to 7cm)	Loam
horizon A2(7cm to 30cm)	Loam
horizon ABt(30cm to 66cm)	Loam
horizon ABtk(66cm to 96cm)	Sandy clay loam
horizon Ck(96cm to 129cm)	Sandy clay loam
horizon C(129cm to 154cm)	Gravelly sandy loam

Component Description:

Minor map unit components are excluded from this report.

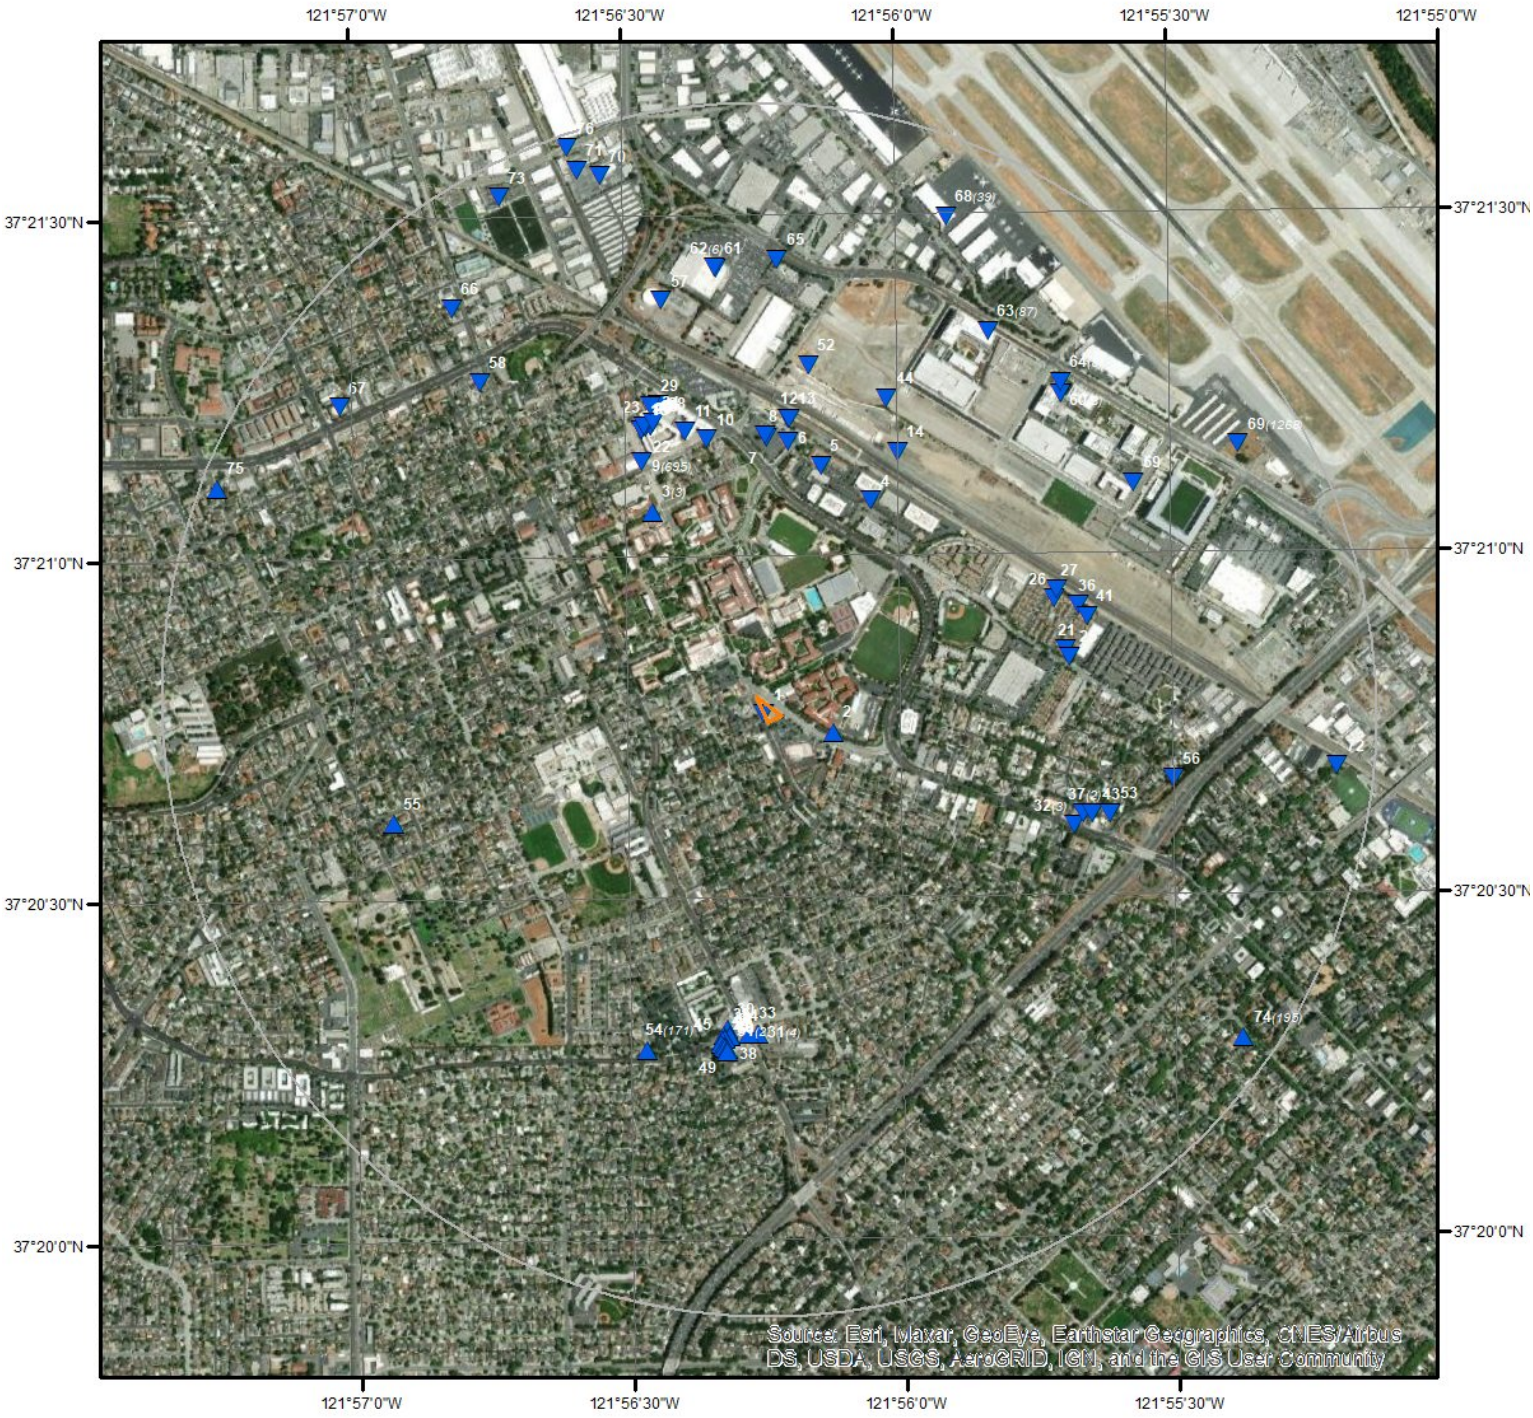

Map Unit: 185 - Urban Land - Bayshore complex, 0 to 2 percent slopes, drained

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Bayshore (20%)
The Bayshore component makes up 20 percent of the map unit. Slopes are 0 to 2 percent. This component is on urban land, basin floors, basins. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 1 This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 15 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Hangerone (10%)
Generated brief soil descriptions are created for major components. The Hangerone soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SANTA CLARA* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SANTA CLARA* County

No Measures/Homes:	77
Geometric Mean:	0.7
Arithmetic Mean:	1.4
Median:	1
Standard Deviation:	1.9
Maximum:	9.2
% >4 pCi/L:	9
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. 1.0 EXECUTIVE SUMMARY

Unocal has operated a service station at the subject site since 1930. The original station had two gasoline USTs located near the north corner of the property. A UST was added in 1948 and manifolded to the other two USTs. The original station was demolished and a new station with new USTs was constructed in 1951. The new station contained two gasoline USTs located near the north corner of the property, and a waste oil UST located east of the station building. Another gasoline UST was added in 1962. In 1964 a leaking pump coupling resulted in the loss of approximately 2,378 gallons of product. There was no record of environmental testing or cleanup in connection with this incident.

The current station was constructed in 1968. It appears from the available documents that one of the existing USTs was left in place and one UST was added. A new waste oil UST was installed in a new location. The documents indicate that the two USTs which were removed may have been leaking. A 10,000-gallon fiberglass UST was added in 1979, and the existing 10,000-gallon UST was converted to diesel. The diesel UST was converted back to gasoline, but the available documents do not indicate when this took place. A line leak was discovered and repaired in 1981. The available documents do not mention the quantity of product lost or any cleanup undertaken.

Contaminated soil was discovered under the pump islands and removed during the installation of blend valves in 1988. The Santa Clara Valley Water District requested an environmental investigation in 1991 to determine the extent of ground water contamination caused by the 1988 incident. Four ground water monitoring wells were installed in 1991 and hydrocarbon and benzene contamination were discovered. Five additional ground water monitoring wells were installed in February 1992 to define the extent of contamination. The LUST list indicates that a preliminary workplan has been submitted. The available documents do not indicate the current status of the environmental investigation. The client may wish to continue with the ongoing environmental investigation and may wish to consider additional subsurface testing in the location of the previous waste oil UST.

1.1 Historic Tank Location Summary: All gasoline USTs at the subject site have been located near the

north corner of the property. The original waste oil UST was located east of the station building; the current waste oil UST is west of the station building. The site currently contains one 8,000-gallon steel UST installed in 1962, one 10,000-gallon steel UST installed in 1968, one 10,000-gallon fiberglass UST installed in 1979, and one 550-gallon waste oil UST installed in 1968.

2.0 RESEARCH METHOD AND SOURCES

The purpose of this investigation was to determine whether any current or past uses of the study site, Unocal Station No. 0715, 2665 The Alameda, Santa Clara, Santa Clara County, California, are likely to have caused hazardous substances or wastes to come onto or below the subject property, or whether nearby property uses have exposed the site to residual contamination.

Four members of PHR's professional staff conducted the Phase I investigation in May 1992. Kathryn Purcell, supervised by Ronald Nye, Registered Environmental Assessor and AHERA-certified asbestos inspector, conducted the site inspection. Wendy Riggs and Dana Burall, Research Assistants, performed land-use research, which included the examination of documents contained in the Unocal corporate files. Agency files concerning possible inspections, violations, or other activities were reviewed, as well as published lists of contaminated sites. Lois Werner, Research Assistant, prepared the final report.

The conclusions of this study reflect PHR's opinion based on the sources cited only. These sources are believed, but not guaranteed, to be reliable. PHR is not responsible for information withheld by agencies, client, or other informant.

3.0 SITE DESCRIPTION

3.1 Site Usage and Property Description: The site inspection was conducted on May 12, 1992. The property contains an operating self- and full-service gasoline service station and mini-service maintenance shop. The triangular-shaped property is located on the south corner of the intersection of Park Avenue and The Alameda, and contains approximately 18,500 square feet. The neighborhood is a mixture of commercial, light industry, and residential. [See Site Location Map] The site contains a three-bay metal and brick service station building with one

detached canopy over three pump islands. The property is 100 percent covered by building, asphalt, and concrete. [See Site Plan]

3.2 **Easements and Utilities:** No easements were mentioned in the available documents. The site is served by municipal utilities.

3.3 **Electrical Transformers and Capacitors:** There are power poles located on the southern, northern and eastern perimeters. The site inspector did not observe any transformers onsite.

3.4 **Ground Water:** Ground water encountered during the installation of monitoring wells in 1991 stabilized at approximately 29 feet below grade and is believed to be confined or semi-confined. Soil underlying the site consists primarily of silty clays, clayey silts and sandy silts. [Pacific Environmental Group, 2-12-92]

3.5 **Surface Water (streams, wetlands, ponds, etc.):** No surface water was observed by the site inspector.

3.5.1 **Historic Wetlands:** The site inspector observed no evidence of wetlands during the site visit; there appeared to be no creek or river within 100 feet of the study site. No documentation has been found in the Unocal corporate files indicating that the study site was located within a wetlands area at the time of purchase or that the site has been subject to flooding or erosion during Unocal's tenure.

3.6 **Sanitary Sewers:** The station is served by the municipal sewer system.

3.6.1 **Septic Tanks/Leach Fields:** No evidence of septic tanks or leach fields was found in the available documents or during the site inspection.

3.7 **Process Wastewater:** According to Albert Balistreri, station attendant, the station generates wastewater during washdown of the service bays and hosing down the island areas. No engine cleaning is done at the site. [Interview with K. Purcell, 5-12-92]

3.8 **Subsurface sumps, clarifiers and drainage lines:** The floor drains in the service bays are cleaned out weekly. These drains are connected to a sump/clarifier located outside the bays on the south side of the building. Albert Balistreri did not know whether the sump is also cleaned when

the drains are cleaned, or the name of the company which performs the work. [Interview with K. Purcell, 5-12-92]

3.9 **Ongoing Site Mitigation:** There are six groundwater monitoring wells at the site. The wells are monitored quarterly.

4.0 STORAGE TANKS

4.1 **Aboveground:** The station contains one air pressure tank for the air compressor.

4.2 **Underground (USTs):** The site contains two 10,000-gallon gasoline USTs and one 8,000 gasoline UST located near the north corner of the property, and one 550-gallon waste oil UST located at the west side of the building. [See Site Plan] According to the station attendant, one of the gasoline USTs is not in use and contains three inches of water. [Interview with K. Purcell, 5-21-92]

5.0 ASBESTOS-CONTAINING BUILDING MATERIALS (ACBM)

No readily identifiable ACBM were observed.

6.0 DESCRIPTION OF MANUFACTURING PROCESSES AND MATERIALS USED

6.1 **Manufacturing Processes:** The station dispenses gasoline and performs smog checks and simple tune-ups.

6.2 **Raw Materials Usage, Quantity and Storage:** The station attendant on duty at the time of the site inspection declined to give information on inventory or volume of materials.

7.0 WASTE GENERATION AND MANAGEMENT

7.1 **Generation and Storage:** According to Albert Balistreri, station attendant, waste oil is minimal and is recycled by North Cal. Oil filters are seldom, or never, disposed of from the site, no information was available on method of disposal. Spent coolant is taken offsite by an unknown party. Used batteries are picked up monthly by Unocal. Used tires are stored in a closed bin at the back of the building, no information was available on disposal practices. [Interview with K. Purcell, 5-12-92]

7.2 **Waste Treatment and Disposal:** The dumpster is serviced by Mission Trail Garbage Company.

7.3 **Housekeeping:** Both the interior and the exterior of the station were clean and free of debris or staining.

8.0 SITE HISTORY

Unless otherwise noted, all information in the history section of this report was found in Unocal corporate files.

Unocal purchased the subject property in December 1929 from Pacific Manufacturing Company for the purpose of constructing a service station. A survey tracing dated 1929 shows that the property contained a building located on the north corner. No information on the type or use of the building was found in the available documents. [See Historic Station Plans, Survey Drawing]

The building was demolished and a two-bay metal service station was constructed at the site and opened in May 1930. The station had two pump islands and one 1,000-gallon gasoline UST and one 550-gallon gasoline UST located near the north corner of the property. The 1930 station plan does not show a waste oil UST but does indicate that six 30-gallon aboveground lube tanks were located at the northeast pump island. [See Historic Station Plan, 1930]

A restaurant building was constructed on surplus property along the south side of the site in 1931 or early 1932. In 1933 two visible pumps were removed from the site and were replaced with metered pumps. The station yard was paved in 1935.

A 4,000-gallon UST was installed in the area of the original USTs in 1948. All three USTs were manifolded together to deliver one product.

The original station building was demolished in 1951 and the USTs removed. A new two-bay, five island station was constructed. The new station utilized the entire property, including the area which had formerly contained the restaurant. A 6,000-gallon gasoline UST and a 4,000-gallon gasoline UST were installed in a location slightly to the south of that of the original USTs. A waste oil UST was installed at the east side of the building. [See Historic Station Plans, 1950]

The station was sold to Lenders Investment Corporation and leased back by Unocal in September 1955.

In January 1962 an 8,000-gallon gasoline UST was installed north of the existing USTs, two pump islands were removed, and a steel canopy was installed over the remaining three pump islands. New pumps were installed at the islands and the building was modernized. [See Historic Station Plan, 1962]

In July 1963 it was reported that gasoline had spilled from the vent line at the top of the building during product delivery to the 8,000-gallon UST. It was determined that this was an isolated occurrence, possibly due to overfilling. No report was found in the available documents of any contamination resulting from this incident.

Between July and October 1964 approximately 2,378 gallons of premium product leaked from a damaged submergible pump coupling. The faulty coupling was repaired in October 1964. A small leak was discovered in the regular submergible pump coupling at about this same time and was repaired promptly with little product loss. There is no mention of any environmental investigation or cleanup in connection with these incidents.

The station was demolished and a new Type 300R building with detached canopy over three pump islands was constructed in December 1968. The new station contained one 10,000-gallon gasoline UST and one 8,000-gallon UST. Available documents appear to indicate that the 8,000-gallon UST remained from the previous station and that at least one of the USTs which were removed was leaking. The new waste oil UST was relocated to the west side of the building. The pump islands and dispensers remained from the previous station.

The sale and leaseback agreement with Lenders Investment Corporation was canceled in March 1969 and title to the property was reconveyed to Union Oil.

The subject station was substituted for another Union station in a sale and leaseback agreement with Burtis Corporation in August 1973.

A 10,000-gallon fiberglass UST was added in 1979. The revised station plans were not found, but the

available documents indicate that the new UST was installed north of the existing USTs. Apparently the new UST was used for unleaded product and the existing 10,000-gallon UST was converted to diesel.

Routine tightness testing in October 1981 indicated that the super system was not tight. A leak was found in the product lines and the lines were replaced. No record was found of the quantity of product lost or of any cleanup attempted at the time.

Tightness testing in June 1985 indicated that the diesel UST was leaking. The system was retested two days later and found to be tight.

Contaminated soil was discovered under the dispensers during the installation of blend valves in May 1988. A Unocal memorandum dated October 1988 reports that 18 barrels of contaminated soil were removed from the site, and that no further action was required by local agencies at that time.

The sale and leaseback agreement with Burtis Corporation was canceled in July 1990 and title to the property was reconveyed to Unocal.

In January 1991 the Santa Clara Valley Water District reopened the case of the leak discovered during blend valve installation in 1988 and requested a site investigation to determine the extent of ground water contamination. Four groundwater monitoring wells were installed by Pacific Environmental in June 1991. Ground water samples taken in December 1991 were found to contain hydrocarbon concentrations ranging from 19,000 parts per billion (ppb) to 150,000 ppb. Benzene concentrations ranged from 7,300 ppb to 31,000 ppb. Because no hydrocarbons as diesel had been observed in previous samplings at the site, the samples were not analyzed for total hydrocarbons as diesel. Five additional wells were installed in February 1992 to provide information on the extent of the contamination, three of these were installed off-site. [Pacific Environmental Group, Inc., February 1992]

Information on the current status of the investigation was not found in the available documents.

9.0 ADJACENT AND NEARBY LAND USES

9.1 Adjacent Land Uses: North of the site, across the intersection, are offices and classrooms of the University of Santa Clara. East of the site, across The Alameda, is vacant property. South of the site are a residential area and some commercial establishments. West of the site are commercial establishments and residences.

9.2 Significant Nearby Land Uses: Nearby residences could constitute sensitive receptors. A dry cleaning business across Park Avenue, and what appear to be excavated gas station sites two blocks southeast of the site could be environmentally significant.

9.3 Endangered Species Habitat: No information was found in the Unocal corporate files or elsewhere that suggests that the study site is located in or near the habitat of a species classified as threatened or endangered by the California Fish and Game Commission (state list), the U. S. Secretary of the Interior or the U. S. Secretary of Commerce (federal list).

10.0 REGULATORY AGENCY SEARCHES

10.1 Site Compliance History: Bay Area Air Quality Management District Permit No. 8468, City of Santa Clara Fire and Business license No. 36018, Public Health Permit No. 9722-E, and OSHA Air Tank Permit No. A-91599 were displayed at the site.

A written request was made to the Santa Clara County Department of Environmental Health, for any information concerning the use or release of hazardous substances at the site. The agency had not responded prior to the report deadline, but any pertinent information will be forwarded as soon as it is made available.

10.2 Agency Lists: The following regulatory agency lists of contaminated sites and sites using hazardous substances were examined to determine whether there was anything known about adjacent or nearby properties that would indicate the possibility of contamination from an offsite source:

NPL	U.S. EPA. Superfund sites.	January 1992

CERCLIS	U.S. EPA. Potential Superfund sites.	January 1992
AWP	California EPA. Sites authorized for cleanup under the California Annual Work Plan.	October 1991
LUST	California Regional Water Resources Control Board. Leaking Underground Storage Tanks.	Various
SWIS	California Waste Management Board. Lists active and inactive sanitary landfills and disposal sites.	July 1991
CASITES	California EPA. Abandoned Site Program.	October 1991

The subject site is reported on the LUST list as having submitted a preliminary workplan. In addition, there are eleven sites within a one-half mile radius reported:

University of Santa Clara, 820 Alviso Street, northwest of the site. Reported on CERCLIS as no further action planned on most recent event.

Gasco No. 007, 2391 The Alameda, within a quarter mile southeast of the study site. Reported on the LUST list as having no action currently underway.

Musso Estate, 2491 The Alameda, within a quarter mile southeast of the study site. Reported on the LUST list as having a preliminary site assessment underway.

PG&E Gas Plant Santa Clara, Benton at Railroad Avenue within one-quarter to one-half mile north of the site. Reported on CERLIS as no further action planned on most recent event record.

Woodside/Newhall Investors, 1130 Campbell Avenue, one-quarter to one-half mile northeast of the study site. Reported on the LUST list as having a preliminary site assessment underway.

Santa Clara University, 751 Campbell Avenue, one-quarter to one-half mile north of the study site. Reported on the LUST list as having a preliminary site assessment underway.

Unknown, 509 Benton Street, one-quarter to one-half mile north of the study site. Reported on the LUST list as having no action currently underway.

Rotten Robbie, 25 Washington Street, one-quarter to one-half mile southwest of the study site. Reported on the LUST list as having pollution characterization underway.

Exxon, 36 Washington Street, one-quarter to one-half mile southwest of the study site. Reported on the LUST list as having submitted a preliminary site assessment workplan.

Guerrera's Automotive, 3305 The Alameda, one-quarter to one-half mile northwest of the study site. Reported on the LUST list as having no action currently underway.

Unknown, 733 Benton Street, one-quarter to one-half mile northwest of the study site. Reported on the LUST list as having no action currently underway.

Section 13.4 of this report contains a full synopsis of the results of the agency search.

11.0 DISCUSSION AND RECOMMENDATIONS

11.1 Discussion: Unocal has operated a service station at the subject site since 1930. In 1964 a leaking pump coupling resulted in the loss of approximately 2,378 gallons of product, but no cleanup was mentioned in the available documents. The current station was constructed in 1968. A product line leak was discovered and repaired in 1981. The available documents do not mention the quantity of product lost or any cleanup undertaken.

Contaminated soil was discovered under the pump islands and removed during the installation of blend valves in 1988. The Santa Clara Valley Water District requested an environmental investigation in 1991 to determine the extent of ground water contamination caused by the 1988 incident. After four ground water monitoring wells were installed in 1991, hydrocarbon and benzene contamination were discovered. Five additional ground water monitoring wells were installed in February 1992 to define the extent of contamination. The LUST list

indicates that a preliminary workplan has been submitted. The available documents do not indicate the current status of the environmental investigation.

11.2 **Recommendations:** Based on these findings, the following recommendations are made:

1) The client may wish to continue with the ongoing environmental investigation.

2) The client may wish to conduct soil sampling at the location of the previous waste oil UST.

The decision to conduct additional environmental research rests with the client's assessment of the risks.

12.0 SOURCES

12.1 Aerial Photographs:

Aerial photographs dated August 1967; street level photographs dated 1936 and 1962; and undated photographs, Unocal corporate files.

12.2 Documents and Secondary Sources:

Unocal files, including: real estate, station history files, maintenance and construction, environmental and tank replacement. Los Angeles, City of Industry, and San Ramon.

Appendix F—Resumes of Environmental Professionals

TETRA TECH

Carl Lenker, PE, QSD
Senior Environmental Engineer

EXPERIENCE SUMMARY

Mr. Lenker is an environmental engineer with more than 15 years of environmental consulting experience consisting of performing environmental compliance, conducting Phase I and II environmental site assessments (ESAs), treatability studies, feasibility studies, pilot testing, and remedial design work. He has conducted over 50 Phase I ESAs. He also has experience with the design and installation of several remediation technologies including slurry walls, soil excavation, soil vapor extraction, dual-phase extraction, in-well air sparging, groundwater aeration, in situ chemical oxidation, and in situ bioremediation. Mr. Lenker manages a variety of projects to satisfy client objectives.

EDUCATION

BS, Chemical Engineering, University of Michigan, 2001

MS, Environmental Engineering, University of Michigan, 2003

AREA OF EXPERTISE

Site remediation and project management

REGISTRATIONS/ CERTIFICATIONS

Professional Civil Engineer, California, 2008 (C72516)

Qualified SWPPP Developer

Sustainable Remediation Forum

OFFICE

Irvine, California

YEARS OF EXPERIENCE

Over 15

RELEVANT EXPERIENCE

NRG Energy, Daggett Solar Power Facility, San Bernardino County, CA. Performed senior review of the Phase I ESA for the proposed Daggett Solar Power Facility encompassing approximately 3,393 acres of land in San Bernardino County. The Phase I ESA was completed in general accordance with the ASTM Standard E2247-16.

WSS Phase I ESA Portfolio, Southern California, CA. Assisted with conducting and managing the preparation of Phase I ESAs for a portfolio of 11 commercial properties throughout Southern California. The Phase I ESA reports were prepared within 3 weeks.

Blythe Energy SPCC, Blythe, CA. Prepared a Spill Prevention, Control and Countermeasure (SPCC) Plan for a 520-megawatt natural gas-fired, combined cycle power plant in Blythe, California. Performed the site visit and documented the location and size of oil products at the facility including above-ground and underground storage tanks. Calculated secondary containment volumes to confirm adequate containment. Prepared emergency response action plan and spill control and clean-up equipment list.

North County Transit District SPCC, Various Locations. Prepared SPCC plans for several train fueling, maintenance, and operations facilities in southern California. Facilities were up to 18 acres in size with numerous chemical storage areas. Developed a template to streamline the preparation of the SPCC plan.

Griffon Corporation, Site Characterization and Remedial Activities, Rancho Dominguez, CA. Managed a remedial-focused investigation and remediation activities to address chlorinated solvents in soil and groundwater. The groundwater plume is commingled with impacts from adjacent properties. Utilized MIP technology to determine the horizontal and vertical limits of the source area for remediation and to evaluate potential offsite impacts. Remediation of the soil impacts are being conducted utilizing a SVE system, while groundwater impacts will be treated by the pneumatic emplacement of sand slurry mixed with potassium permanganate due to the presence of a tight silt formation.

Prologis, Site Characterization and Remedial Activities, Commerce, CA. Managed this contract to remediate carbon tetrachloride impacts in soil beneath an operating 650,000 square foot warehouse. Included the operation and maintenance of a 1,000 cfm SVE system which was able to remediate the soil vapor impacts within six months of operation, as originally designed, and a No Further Action Letter was issued by the Los Angeles

County Fire Department after confirmation soil vapor sampling indicated no detectable vapor concentrations beneath the warehouse.

IHP Capital Partners, Site Characterization and Remedial Activities, Northridge, CA. Provided a technical review for the site characterization and prepared a Remedial Action Plan to treat residual PCE, Freon-113, and benzene impacts utilizing a SVE system. The impacts associated with a former aerospace parts manufacturing facility that operated on the property. Worked closely with the Los Angeles County Fire Department to expedite the investigation and remedial activities to allow for redevelopment of the property for residential use.

Confidential Client, In-Situ Perchlorate and Hexavalent Chromium Treatment Bench-Scale and Treatability Studies, Henderson, NV. Project engineer responsible for preparing the work plan and conducting several bench-scale and treatability studies. The treatability studies include the evaluation of in situ chemical reduction, in situ biological reduction, soil flushing, and vacuum enhanced recovery technologies to address hexavalent chromium, chloroform, chlorate, and perchlorate impacts to soil and groundwater.

Griffon Corporation, Background Arsenic Evaluation and Feasibility Study, Frankfort, NY. Developed and implemented a plan under the NYSDEC and NYSDOH to conduct a background soil evaluation to demonstrate elevated arsenic and metal concentrations in on-site soil and groundwater are largely naturally occurring and not attributable to over 100 years of historical operations. The results of the background soil evaluation will be incorporated into a feasibility study to refine the areas requiring remedial evaluation potentially resulting in over $1M in savings for the client.

Port of Los Angeles, Aeration System Design for Enhanced Biodegradation, San Pedro, CA. Designed an aeration system to enhance biodegradation of petroleum impacts at the Port of Los Angeles. The aeration system consists of 22 horizontal injection wells with screen lengths ranging from 60 to 130 feet. Performed detailed head loss calculations to minimize head loss over the entire length of conveyance piping. Designed the well screen to allow for equal air distribution throughout the entire screened interval. Selected an appropriate air compressor to meet the flow rate and pressure requirements. Developed an innovative cycling strategy to minimize potential air emissions and to ensure aeration only occurs when sufficient water is present due to the location within the tidal zone where elevations vary up to 8 feet in a day.

Sunset Waste, LNAPL Remediation and Vapor Mitigation at an Existing Shopping Center, San Diego, CA. Prepared and implemented a Remedial Action Plan to address LNAPL and dissolved-phase groundwater impacts beneath an existing shopping center. The Remedial Action Plan outlined the remediation program consisting of injecting persulfate and oxygen release compounds through both horizontal and vertical injection wells to treat the dissolved-phase petroleum hydrocarbon impacts as well as LNAPL recovery strategies. A Vapor Mitigation Plan was also developed and implemented to mitigate the potential for vapor intrusion to the on-site tenants. A vapor barrier, Retro-Coat®, was installed in one of the suites due to the presence of elevated indoor air concentrations.

KTR Capital Partners, Site Characterization and Remedial Activities, Commerce, CA. Senior Project Engineer responsible for providing technical review of the site characterization and remedial investigation as well as preparing the Feasibility Study, Remedial Action Plan, and construction drawings for the installation of a 1,000 cfm SVE system to treat wide-spread carbon tetrachloride impacts. Coordinated the SVE system installation efforts with the construction manager to minimize impact to site grading activities and the construction of a 650,000 square foot warehouse.

Deerfield Realty, Remediation Project, Menlo Park, CA. Senior Project Engineer responsible for the oversight of investigation and remediation activities under the regulatory oversight of the San Mateo County Health Services and the California Regional Water Quality Control Board – San Francisco Bay Region. Conducted and coordinated activated persulfate injections and pre- and post-injection soil and groundwater sampling under a guaranteed fixed-price remediation contract.
