Violation Division:	Nevada County Environmental Health
Violation Program:	UST
Violation Source:	CERS
Site ID:	46133
Site Name:	Main Street Gas
Violation Date:	07-15-2014
Citation:	23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715
Violation Description:	Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.
Violation Notes:	Returned to compliance on 07/15/2014. Discussed with the operator that the Designated Operator did not have any notes about the fuel alarms on 2/7/14 and 4/25/14 and how they were handled.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	04-03-2017
Citation:	HSC 6.95 25510(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25510(a)
Violation Description:	Failure to report a release or threatened release of a hazardous material to the unified program agency and to OES.
Violation Notes:	Returned to compliance on 05/05/2017. Anonymous caller reported through CalEPA a leaking oil drum next to facility. Investigation determined owner had applied absorbant and was in the process of finding contractor to remove drum, but had not reported leak to CUPA. Owner given 24 hours to move drum inside and contain leak, and 15 days to dispose of oil. Oil covers some leaves on the ground but did not appear to penetrate into soil.

Violation Date: 04-03-2017
Citation: HSC 6.95 25510(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25510(a)
Violation Description: Failure to report a release or threatened release of a hazardous material to the unified program agency and to OES.
Violation Notes: Returned to compliance on 05/05/2017. Anonymous caller reported through CalEPA a leaking oil drum next to facility. Investigation determined owner had applied absorbant and was in the process of finding contractor to remove drum, but had not reported leak to CUPA. Owner given 24 hours to move drum inside and contain leak, and 15 days to dispose of oil. Oil covers some leaves on the ground but did not appear to penetrate into soil.

Name: SPRUCE CLEANERS (FORMER)
Address: 231 COLFAX AVENUE
City,State,Zip: GRASS VALLEY, CA 95944-6843
Region: STATE
Facility Status: **Completed - Case Closed**
Status Date: 12/03/2012
Global Id: SL0605777821
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
Lead Agency Case Number: Not reported
Latitude: 39.215945
Longitude: -121.058412
Case Type: Cleanup Program Site
Case Worker: GJD
Local Agency: NEVADA COUNTY
RB Case Number: SL0605777821
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: * Chlorinated Solvents - PCE
Site History: Spruce Cleaners operated as a dry cleaning business at this site from approximately 1985 to 1998. A Phase I Environmental Assessment identified the dry cleaning business use of PCE in closed-loop equipment, and a site visit/inspection noted no spills or visible staining. A Phase II Environmental Assessment was completed in 1999 and included soil samples from within the cleaners that contained PCE. Monitoring wells around the site documented low levels of PCE

SPRUCE CLEANERS (Continued) **1000424263**

and breakdown products, indicating that natural attentuation is taking place. However, groundwater samples taken from a mini-monitoring well installed through the building slab, and soil and soil gas samples collected from beneath the slab in March 2010, showed that PCE continued to persist beneath the slab and in indoor air at levels that were unacceptable for human occupancy. In a July 14, 2011 letter, Regional Water Board staff approved a Remedial Action Plan that included removal of a portion of the slab from the interior of the building, excavation of the most highly contaminated soil, installation of a sub-slab ventilation system, replacement of the slab and sealing the slab to prevent any PCE fumes from entering the building. The work approved in the Remedial Action Plan was completed during the winter and spring of 2012. Over 30 cubic yards of concrete and 576 cubic yards of soil was excavated from beneath the building's slab. Samples taken during the cleanup showed a small amount of PCE remained in the soil near the footing of the building and could not be removed, but samples of the groundwater did not contain any PCE. The sub-slab vent system was installed and the slab was repaired and sealed. Indoor samples taken after the clean up did not contain any PCE or its breakdown products. The Regional Water Board has conditionally closed this site as of October 2, 2012, subject to destruction of four remaining monitoring wells. The final No Further Action Letter was issued on December 3, 2012, after staff received notice of succesful destruction of all monitoring wells.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.35
Violation Description: Failure of the universal waste handler to properly process accumulated universal waste within a maximum accumulation time of one year and /or demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: 1) Placing the

DEMARTINI RV SALES (Continued) **S114002344**

universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; 2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; 3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; 4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; 5) Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or 6) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it became a waste or was received.

Violation Notes: Returned to compliance on 06/20/2016.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

	16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/06/2020. Monthly alarm history review by the D.O. does not include "Q" alarms for the Electronic Line Leak Detector.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US BROWNFIELDS:

Name:	IDAHO MARYLAND MINE
Address:	10344 CENTENNIAL DRIVE
City,State,Zip:	GRASS VALLEY, CA 95945
Recipient Name:	City of Grass Valley
Grant Type:	Assessment
Property Number:	09-550-32-000, 09-550-37-000, 09-550-38-000, 09-550-39-000, 09-550-40-000
Parcel size:	56.41
Latitude:	39.2225708
Longitude:	-121.0406022
HCM Label:	-

IDAHO MARYLAND MINE (Continued) **1010161903**

Map Scale:	-
Point of Reference:	-
Highlights:	Former Use: The irregular-shaped, approximately 57-acre site was previously part of the Idaho Maryland Mine, which is no longer in operation. A lumber mill (Hap Warnke Mill) currently operates in the northern portion of the Site, near the intersection of Idaho Maryland Road and Centennial Drive. The remainder of the Site is vacant, largely forested land. Evidence of former mining activities is most apparent on the northwestern portion of the Site where two concrete decanting towers and mine tailings were observed. Several trails and unimproved (unpaved) roads extend across the property, likely originally from historical use, but currently used by an extensive homeless population. The Site is surrounded by vacant land and light industrial and commercial uses.

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.
SUPERFUND (NON-NPL)

CITY HALL- POLICE STATION (Continued) **S104403201**

Case Worker:	VJF
RB Case Number:	290003
Local Agency:	NEVADA COUNTY
File Location:	Regional Board
Local Case Number:	Not reported
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

US BROWNFIELDS:
- Name: BITTON
- Address: 544 EAST MAIN STREET
- City,State,Zip: GRASS VALLEY, CA 95945
- Recipient Name: City of Grass Valley
- Grant Type: Assessment
- Property Number: 009-190-007-000
- Parcel size: .39
- Latitude: 39.22319715432024
- Longitude: -121.05400925883448
- HCM Label: -
- Map Scale: -
- Point of Reference: -
- Highlights: The Phase I ESA covers this property (Bitton) and the Sierra Terrace property. Previous subsurface investigations identified elevated metals concentrations in soil where sulphuret tailings were encountered, the presence of arsenic in surface water and groundwater samples, and elevated concentrations of VOCs in soil and groundwater associated with activities at an adjacent former dry cleaners/gas station. Former Use: The east portion of the property is a vacant, fenced gravel lot, and the west portion of the property is a vacant paved lot with an entrance from East Main Street. The property was used as an auto sales lot and for parking from the early 2000s until March 2018 and has been vacant since that time. The Hills Sulphuret Works property was constructed in 1862, and the sulphuret works

BITTON (Continued) **1026006585**

facility boundary included a portion of the property. The Hills Sulphuret Works discontinued operations in the site vicinity in the late 1800s to early 1900s. The area east of the subject property, along East Main Street, was developed with commercial buildings beginning in the 1930s. Businesses of potential environmental interest included a ranch and garden supply, auto body and repair shops, an auto dealership, a dry cleaner, and a gas station.

Property Description:	The east portion of the property is a vacant, fenced gravel lot, and the west portion of the property is a vacant paved lot with an entrance from East Main Street. The property was used as an auto sales lot and for parking from the early 2000s until March 2018 and has been vacant since that time. The Hills Sulphuret Works property was constructed in 1862, and the sulphuret works facility boundary included a portion of the property. The Hills Sulphuret Works discontinued operations in the site vicinity in the late 1800s to early 1900s. The area east of the subject property, along East Main Street, was developed with commercial buildings beginning in the 1930s. Businesses of potential environmental interest included a ranch and garden supply, auto body and repair shops, an auto dealership, a dry cleaner, and a gas station.

HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	The Phase I ESA covers this property (Bitton) and the Sierra Terrace property. Previous subsurface investigations identified elevated metals concentrations in soil where sulphuret tailings were encountered, the presence of arsenic in surface water and groundwater samples, and elevated concentrations of VOCs in soil and groundwater associated with activities at an adjacent former dry cleaners/gas station. Former Use: The east portion of the property is a vacant, fenced gravel lot, and the west portion of the property is a vacant paved lot with an entrance from East Main Street. The property was used as an auto sales lot and for parking from the early 2000s until March 2018 and has been vacant since that time. Past Use: Multistory	Not reported
Property Description:	The east portion of the property is a vacant, fenced gravel lot, and the west portion of the property is a vacant paved lot with an entrance from East Main Street. The property was used as an auto sales lot and for parking from the early 2000s until March 2018 and has been vacant since that time. The Hills Sulphuret Works property was constructed in 1862, and the sulphuret works facility boundary included a portion of the property. The Hills Sulphuret Works discontinued operations in the site vicinity in the late 1800s to early 1900s. The area east of the subject property, along East Main Street, was developed with commercial buildings beginning in the

BITTON (Continued) **1026006585**

1930s. Businesses of potential environmental interest included a ranch and garden supply, auto body and repair shops, an auto dealership, a dry cleaner, and a gas station.

Point of Reference:	-
Highlights:	The Phase I ESA covers this property (Bitton) and the Sierra Terrace property. Previous subsurface investigations identified elevated metals concentrations in soil where sulphuret tailings were encountered, the presence of arsenic in surface water and groundwater samples, and elevated concentrations of VOCs in soil and groundwater associated with activities at an adjacent former dry cleaners/gas station. Former Use: The east portion of the property is a vacant, fenced gravel lot, and the west portion of the property is a vacant paved lot with an entrance from East Main Street. The property was used as an auto sales lot and for parking from the early 2000s until March 2018 and has been vacant since that time. The Hills Sulphuret Works property was constructed in 1862, and the sulphuret works facility boundary included a portion of the property. The Hills Sulphuret Works discontinued operations in the site vicinity in the late 1800s to early 1900s. The area east of the subject property, along East Main Street, was developed with commercial buildings beginning in the 1930s. Businesses of potential environmental interest included a ranch and garden supply, auto body and repair shops, an auto dealership, a dry cleaner, and a gas station.

Title:	ACL R5-2015-0505 for Grass Valley City
Description:	ACL Order R5-2015-0505 issued in the amount of $209,000 to resolve violations of WDRs Order R5-2009-0067 and Order 2006-0003-DWQ. The Discharger is alleged to have violated Order R5-2009-0067 on 6 occasions with spills from unauthorized locations between June 2009 and May 2013, and Order 2006-0003-DWQ on 15 occasions with sanitary sewer overflows from December 2009 to January 2014. The Order

GRASS VALLEY WASTEWATER PLANT (Continued) **S106926859**

	requires the Discharger to pay $104,500 and considers $104,500 of the liability suspended pending completion of a supplemental environmental project (SEP).

Title:	NOV 06/05/2013 for Grass Valley City WWTP
Description:	The inspection was conducted on 4 April 2013 by PG Environmental, LLC, a USEPA contractor. In general, the facility was in good operating condition and in compliance with the WDRs. However, out of nine areas evaluated, the inspector found two areas to be marginal, The remaining even areas were found to be satisfactory. One violation of the WDRs was identified.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 04/09/2001
Comments: RA- DTSC provided oversight via an existing O & M Agreement, for the removal of approximately 550 Tons of Mercury contaminated soil. The soil was excavated during the construction of a clarifying basin.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 10/27/1994
Comments: Remedial Action Plan (RAP) - Approximately 105-135 cubic yards of mercury contaminated soil were discovered during excavation of a clarifier basin at the City of Grass Valley Waste Treatment Plan. The contaminated soil was encapsulated at an isolated section of the site. All possible exposure pathways were eliminated by the encapsulation. An O&M agreement and Land Covenant Agreement will be required. There was low public interest in this site. CEQA requirements were met.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/30/1994
Comments: PEA completed as part of the PEA\\RAP. The PEA identified approximately 135 cubic yards of Hg contaminated soil as req remediation. The PEA recommendation is for this soil to be encapsulated onsite. Pb contamination was found to be below PRGs. The RWQCB approved stabilization of lead contaminated soils for equilization basin #3.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Design
Completed Date: 06/13/1994
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/06/1993
Comments: The RWQCB found that the location of Equalization Basins at the Grass Valley Waste Treatment Plant (Site) was on top of old mill sands from

GRASS VALLEY CITY WWTP (Continued) **S100275222**

the former North Star Mine. Sampling of these sands determined that the sands contained soluble lead. The RWQCB required mitigative measures be taken. Further development of the Site found elemental mercury nort of the Equalization Basins and determined that human health issues may need to be evaluated and requested DTSC input. As a result of meetings between DTSC, RWQCB, Nevada County Health Dept., and the City of Grass Valley, the City of Gras Valley entered DTSC's Voluntary Cleanup Program. The Agreem was implemented between the City of Grass Valley and DTSC December 1, 1993.

Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	04/09/2001
Comments:	RA- DTSC provided oversight via an existing O & M Agreement, for the removal of approximately 550 Tons of Mercury contaminated soil. The soil was excavated during the construction of a clarifying basin.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	10/27/1994
Comments:	Remedial Action Plan (RAP) - Approximately 105-135 cubic yards of mercury contaminated soil were discovered during excavation of a clarifier basin at the City of Grass Valley Waste Treatment Plan. The contaminated soil was encapsulated at an isolated section of the site. All possible exposure pathways were eliminated by the encapsulation. An O&M agreement and Land Covenant Agreement will be required. There was low public interest in this site. CEQA requirements were met.

Completed Date:	10/06/1993
Comments:	The RWQCB found that the location of Equalization Basins at the Grass Valley Waste Treatment Plant (Site) was on top of old mill sands from the former North Star Mine. Sampling of these sands determined that the sands contained soluble lead. The RWQCB required mitigative measures be taken. Further development of the Site found elemental mercury nort of the Equalization Basins and determined that human health issues may need to be evaluated and requested DTSC input. As a result of meetings between DTSC, RWQCB, Nevada County Health Dept., and the City of Grass Valley, the City of Gras Valley entered DTSC's Voluntary Cleanup Program. The Agreem was implemented between the City of Grass Valley and DTSC December 1, 1993.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Type:	Cleanup Program Site
Case Worker:	DPL
Local Agency:	Not reported
RB Case Number:	SL186302986
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Tetrachloroethylene (PCE) has been detected in groundwater samples collected from monitoring wells located on the 10-Minute Lube site. Current remedial activities are focused on the adjacent Valet Cleaners site, which has been identified as a source of PCE pollution in groundwater. Based on review of monitoring data at both the Valet Cleaners site and 10 Minute Lube, Central Valley Water Board staff determined that there is no apparent source on the 10 Minute Lube site.

Name:	VALET CLEANERS
Address:	640 E. MAIN STREET
City,State,Zip:	GRASS VALLEY, CA
Region:	STATE
Facility Status:	**Open - Remediation**
Status Date:	10/03/2013
Global Id:	SLT5S3053341
Lead Agency:	CENTRAL VALLEY RWQCB (REGION 5S)
Lead Agency Case Number:	Not reported
Latitude:	39.2246154373461
Longitude:	-121.054412126541
Case Type:	Cleanup Program Site
Case Worker:	DPL
Local Agency:	Not reported
RB Case Number:	SLT5S305
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	Operations at a former dry cleaner resulted in the release of the dry cleaning chemical tetrachloroethylene (PCE) to the subsurface. A groundwater extraction well was installed in 2013 to extract and treat contaminated groundwater from beneath the Site.

Case Type: Cleanup Program Site
Case Worker: ZZZ
Local Agency: Not reported
RB Case Number: SLT5S762
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Under Investigation
Potential Contaminants of Concern: Other Petroleum
Site History: In 1999, a Phase 1 environmental investigation concluded that the property had been used as a gasoline service station prior to the 1960s. Dumping of motor oil may have occurred along the northern edge of the Site for vegetation suppression and/or dust control. In addition, a subsurface hydraulic lift was present at the site. In August 1999, trenches were excavated along the area where an underground storage tank (UST) was suspected of being located. One approximately 400-gallon UST was discovered in the area. The hydraulic lift and UST were excavated and removed in 1999. Soil investigations indicated concentrations of total oil and grease remained in Site soils and Nevada County directed additional investigations to assess the lateral and vertical extent of contamination. One groundwater sample contained a low concentration of nickel below the maximum contaminant level. Petroleum hydrocarbons were not detected in any of the groundwater samples collected. In 2001, about 25 cubic yards of contaminated soil was excavated at the Site. Site Status was updated to Completed - Case Closed following 18 January 2017 inactive case review. Central Valley Water Board staff considers the case closed as of 5 November 2002.

US BROWNFIELDS:

Name:	FERGUSON PROPERTY
Address:	474 AND 500 EAST BENNETT STREET
City,State,Zip:	GRASS VALLEY, CA 95945
Recipient Name:	City of Grass Valley
Grant Type:	Assessment
Property Number:	-
Parcel size:	4.6
Latitude:	39.21649
Longitude:	-121.050721
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	Former Use: Property Description: The approximate 4.6-acre property is developed with a residence and associated sheds in its northeastern portion, but largely undeveloped in the northwestern and southeastern portions. Remnants of a foundation from previous development are present in the northwestern portion of the property. History and Past Ownership: Current owner has owned the Property since 2003 during which time it has been used for residential purposes and to store construction fill. The residence has been on the property for more than 50 years. Approximately ten years ago, soil generated during the grading and construction of Springhill Storage at 150 Spring Hill Drive, approximately 3,700 feet northeast of the property, was placed on western portion of the property, and the area south of the residence. The previous owner, Mr. Rodgers (first name unknown), used the western portion of the property as a blacksmith shop to make tractor plows and other farming equipment for about 50 to 60 years. Mr. Rodgers stored various tractor parts, tires, metal debris, and other miscellaneous materials and equipment in the western portion of the property. The property was used by Nevada County as a maintenance yard sometime during the 1940s.

Property Description:	Property Description: The approximate 4.6-acre property is developed with a residence and associated sheds in its northeastern portion, but largely undeveloped in the northwestern and southeastern portions. Remnants of a foundation from previous development are present in the northwestern portion of the property. History and Past Ownership: Current owner has owned the Property since 2003 during which time it has been used for residential purposes and to store construction fill. The residence has been on the property for more than 50 years. Approximately ten years ago, soil generated during the grading and construction of Springhill Storage at 150 Spring Hill Drive, approximately 3,700 feet northeast of the property, was placed on western portion of the property, and the area south of the residence. The previous owner, Mr. Rodgers (first name unknown), used the western portion of the property as a blacksmith shop to make tractor plows and other farming equipment for about 50 to 60 years. Mr. Rodgers stored various tractor parts, tires, metal debris, and other miscellaneous materials and equipment in the western portion of the property. The property was used by Nevada County as a maintenance yard sometime during the 1940s.

Description: ABANDONED MINE LAND SITE WITH SULPHERET WORK AREA. Elevated concentrations of arsenic have beend detected in soil samples from teh sulpheret works area. Chlorinated solvents have reportedly been detected in groundwater adjacent to the western boundary of the Sierra Terrace site. Soil gas samples collected along the western and southern boundaries of the site indicated the presence of chlorinated solvents and benzene in the vadose zone soil gas.

Click Here:

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	11-06-2020
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

SIERRA NEVADA MEMORIAL HOSPITAL (Continued) **1000368686**

	16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 11/06/2020.

Completed Document Type: OPEA Consultation
Completed Date: 05/15/2018
Comments: DTAC reviewed the biological surveys and will summarize the information in the CEQA document.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 03/29/2018
Comments: DTSC and the city of Grass Valley signed a Voluntary Cleanup Agreement for DTSC to provide oversight for a removal action work plan and associated activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/25/2018
Comments: Geocon Consultants provided DTSC with a CHRIS report that determined there was a high potential for locating historic period cultural resources in the immediate vicinity or the proposed project area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 11/09/2018
Comments: DTSC mailed a cost estimate to the proponent for DTSC oversight for cost incurred from July 1, 2018 through June 30, 2019.

Completed Area Name: PROJECT WIDE

Parcel size: 53.73
Latitude: 39.217464
Longitude: -121.047582
HCM Label: -
Map Scale: -
Point of Reference: -
Highlights: Former Use: The irregular-shaped, approximately 50-acre Site is adjacent to the former Idaho Maryland Mine, which is no longer in operation. Prospect pits and a former sulphuret works are depicted on historic maps of the Site; however, evidence of these activities was no longer apparent. The western portion of the Site is pine forest, and the eastern portion is sparsely vegetated with predominately shrubs and grasses. Several trails and unimproved (unpaved) roads traverse the property, likely originating from historic use, but currently utilized by an extensive homeless population. Other surrounding properties consist of vacant land, and light industrial use.

Parcel size:	53.73
Latitude:	39.217464
Longitude:	-121.047582
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	Former Use: The irregular-shaped, approximately 50-acre Site is adjacent to the former Idaho Maryland Mine, which is no longer in operation. Prospect pits and a former sulphuret works are depicted on historic maps of the Site; however, evidence of these activities was no longer apparent. The western portion of the Site is pine forest, and the eastern portion is sparsely vegetated with predominately shrubs and grasses. Several trails and unimproved (unpaved) roads traverse the property, likely originating from historic use, but currently utilized by an extensive homeless population. Other surrounding properties consist of vacant land, and light industrial use.

BUOMA ERICKSON TOMS PROPERTY (Continued) **1024365358**

Map Scale:	-
Point of Reference:	-
Highlights:	Former Use: The irregular-shaped, approximately 50-acre Site is adjacent to the former Idaho Maryland Mine, which is no longer in operation. Prospect pits and a former sulphuret works are depicted on historic maps of the Site; however, evidence of these activities was no longer apparent. The western portion of the Site is pine forest, and the eastern portion is sparsely vegetated with predominately shrubs and grasses. Several trails and unimproved (unpaved) roads traverse the property, likely originating from historic use, but currently utilized by an extensive homeless population. Other surrounding properties consist of vacant land, and light industrial use.

File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Diesel
Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

QUIK STOP MARKET #107 (Continued) **S103983233**

Violation Date:	03-19-2019
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/19/2019. D.O. reports Oct - March were completed on time but none were signed by the operator. The store manager signed the unsigned reports on 3/19/19 during the inspection. -CC

OLD LAUSMAN MILL (Continued) **1024326407**

Highlights:	Former Use: The irregular-shaped, approximately 27-acre site is adjacent to the former Idaho Maryland Mine. The Site is vacant, partially forested land previously developed with a lumber mill (the Old Lausman Mill) that reportedly serviced the mine. Concrete foundations of former lumber mill buildings are present in the northwestern portion of the Site. Several trails and unimproved roads traverse the property, likely originally from historic use, but currently used primarily by the homeless. Other surrounding properties are vacant or developed with light industrial uses. A 5,000-gallon gasoline and 8,000-gallon diesel underground storage tank (UST), were reportedly removed from the Site in 2002 and a release was identified. Lead and hydrocarbon impacted soil was removed from the Site. Six groundwater monitoring wells were installed and monitored. In 2010, the Central Valley Regional Water Quality Control Board grated no further action for the regulatory case. No records were identified for the destruction of the groundwater monitoring wells.

Point of Reference:	-
Highlights:	Former Use: The irregular-shaped, approximately 27-acre site is adjacent to the former Idaho Maryland Mine. The Site is vacant, partially forested land previously developed with a lumber mill (the

OLD LAUSMAN MILL (Continued) **1024326407**

Old Lausman Mill) that reportedly serviced the mine. Concrete foundations of former lumber mill buildings are present in the northwestern portion of the Site. Several trails and unimproved roads traverse the property, likely originally from historic use, but currently used primarily by the homeless. Other surrounding properties are vacant or developed with light industrial uses. A 5,000-gallon gasoline and 8,000-gallon diesel underground storage tank (UST), were reportedly removed from the Site in 2002 and a release was identified. Lead and hydrocarbon impacted soil was removed from the Site. Six groundwater monitoring wells were installed and monitored. In 2010, the Central Valley Regional Water Quality Control Board grated no further action for the regulatory case. No records were identified for the destruction of the groundwater monitoring wells.

VILLAGE AT SOUTH AUBURN (Continued) **S108054497**

Amount Remaining: Not reported
APNS: 2926004000, 2927006000, 2927010000, 2928005000, 2928006000, 2928014000, 2935015000
Description: Former Mine Site that the City of Grass Valley would like to develop as a mixed use residential subdivision. The property is also impacted from mine operations off-site. A Removal Action Workplan was submitted in August of 2016 but was not accepted by DTSC due to ecological risk concerns from mercury in the soil. The Proponent is reviewing options on how to deal with this concern. (Updated 6/10/2019)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

APPENDIX B

Questionnaires

USER QUESTIONNAIRE[1]
PHASE I ENVIRONMENTAL SITE ASSESSMENT

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[2] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

User Information
Name: Bjorn Jones Title: City Engineer Company: City of Grass Valley Representing, if applicable: Signature: _____ Date: 2/25/22

Site Information
Site Name: Wolf Creek Trail Address: Various

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)
Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law? Unknown

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))
Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Unknown

[1] In accordance with Appendix X3 of ASTM E1527-21.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

User Questionnaire
(continued)

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?

No

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

N/A

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property?

No

(b) Do you know of specific chemicals that are present or once present at the property?

No

(c) Do you know of spills or other chemical releases that have taken place at the property?

No

(d) Do you know of any environmental cleanups that have taken place at the property?

No

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

No

ASTM E 1527-21 Questionnaire for Phase I Environmental Site Assessment (ESA)

(To be completed by the property owner, property manager, and/or or tenant of the property. Please return to NV5 by email, fax at (530) 478-1019 or by mail to: 792 Searls Ave., Nevada City, CA 95959)

Complete address for property or properties: Various

If applicable, please provide the name and contact information for the person completing this questionnaire.

Key Site Manage or Property Owner: Bjorn Jones 530-274-4353 Phone Number/Contact Info:

1. Are you aware of any environmental cleanup liens with respect to the property or any facility located on the property that are filed or recorded under federal, tribal, state or local law?	Yes	No ✓	Unknown	Comments:
2. Are you aware of any physical modifications to the property (e.g. slurry walls, capping, point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater?	Yes	No ✓	Unknown	Comments:
3. Are you aware of any land use restrictions or institutional controls (e.g. deed restrictions, restrictive covenants, easements, or zoning) in place at the site to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater?	Yes	No ✓	Unknown	Comments:
4. Are you aware of any legal or administrative restrictions (e.g. deed restrictions, restrictive covenants, easements, or zoning) on the use of, or access to, the site or facility to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment?	Yes	No ✓	Unknown	Comments:
5. Is the property or any adjoining property used for an industrial use?	Yes ✓	No	Unknown	Comments
6. To the best of your knowledge, has the *property* or any adjoining property been used for an industrial use in the past?	Yes ✓	No	Unknown	Comments:
7. Is the property or adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility?	Yes	No ✓	Unknown	Comments:
8. To the best of your knowledge has the property or any adjoining property been used in the past as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility?	Yes ✓	No	Unknown	Comments:

9. Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in the aggregate, stored on or used at the property or at the facility?	Yes ✓	No	Unknown	Comments:
10. Are there currently, or to the best of your knowledge have there been previously, any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes	No	Unknown ✓	Comments:
11. Has fill dirt or material been brought onto the property that originated from a contaminated site or that is of an unknown origin?	Yes	No	Unknown ✓	Comments:
12. Are there currently, or the best of your knowledge have there been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes	No ✓	Unknown	Comments:
13. Is there currently, or to the best of your knowledge, has there been previously, any stained soil on the property?	Yes	No	Unknown ✓	Comments:
14. Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located at the property?	Yes ✓	No	Unknown	Comments:
15. Are there currently, or to the best of your knowledge, have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground or adjacent to any structure located on the property?	Yes	No ✓	Unknown	Comments:
16. Are there currently, or to the best of your knowledge, have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?	Yes	No ✓	Unknown	Comments:
17. As applicable, what is the source of potable water for the property (i.e. City water, domestic well, local irrigation district, etc.)?	Please explain: City Water			
18. If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental health agency?	Yes	No ✓	Unknown	Comments:
19. Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property?	Yes	No	Unknown ✓	Comments:

20. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property of facility that indicated the presence of hazardous substances or petroleum products on, or contamination of the property or recommended further assessment of the property?	Yes	No	Unknown ✓	Comments:
21. Does the owner or occupant of the property know of any past, threatened or pending lawsuits or administrative proceedings concerning release or threatened release of any hazardous substance or petroleum products involving the property by an owner or occupant of the property?	Yes	No	Unknown ✓	Comments:
22. As applicable, please identify the method of sewage disposal for the property (i.e. city or county sewer system, leach field, etc.)? How long has the current sewage disposal system at the property been in use?	City Sewer System			
23. Does the property discharge waste water on or adjacent to the property other than storm water into a sanitary sewer system?	Yes ✓	No	Unknown	Comments:
24. To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property?	Yes	No	Unknown ✓	Comments:
25. Is there a transformer capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes	No	Unknown ✓	Comments:
26. Are you aware of any other commonly known or publicly available information within the local community about the property concerning recognized environmental conditions in connection with the property?	Yes	No	Unknown ✓	Comments:
27. Are you aware of any existing documents related to environmental conditions on the subject property (e.g. prior ESA reports, environmental reports, environmental permits, geotechnical reports, risk assessments, etc.)	Yes	No	Unknown ✓	Comments:
Signed: 	Name (please print): Bjorn Jones

APPENDIX C

Photographs

Photo 1 – Southwestern segment of proposed trail alignment on narrow greenbelt adjacent to SR 49/20, facing east.

Photo 2 – Densely vegetated greenbelt along southwestern segment of proposed trail alignment.

Photo 3 – Soil sample location (foreground) on trail alignment located northwest of Caltrans storage yard (background, upper right).

Photo 4 – Soil sample location WCT-1 between Wolf Creek and Caltrans storage yard (background, upper right).

Photo 5 – Household debris near Caltrans storage yard.

Photo 6 – Caltrans storage yard on SR 49/20 above and southeast of proposed trail. Storage yard contains aggregate materials, wood (green waste) materials, heavy equipment, construction materials and a storm water detention basin.

Photo 7 – Mixed organic and aggregate materials storage at Caltrans storage area.

Photo 8 – Soil sampling on trail alignment down slope of Caltrans storage yard in historically mapped vicinity of Golden Center Mine.

Photo 9 – Shallow soil conditions encountered on trail alignment near Caltrans storage yard.

Photo 10 – Storm water culvert discharging into Wolf Creek from SR 49/20.

Photo 11 – Steel conveyance pipe in Wolf Creek, facing southwest.

Photo 12 – City sewer line crossing over Wolf Creek northwest of the proposed subject trail.

Photo 13 – Household refuse on the proposed trail alignment near downtown Safeway.

Photo 14 – Proposed trail alignment adjacent to (right of) SR 49/20 entrance ramp.

Photo 15 – Wolf Creek and household debris near proposed trail alignment north-northwest of Railroad Avenue.

APPENDIX D

Laboratory Report

ANALYTICAL REPORT

January 21, 2022

NV5 - Nevada City, CA

Sample Delivery Group:	L1451504
Samples Received:	01/14/2022
Project Number:	4816A.00
Description:	Wolf Creek Trail

Report To: Jason Muir
792 Searls Ave
Nevada City, CA 95959

Entire Report Reviewed By:

Jennifer Gambill
Project Manager

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

CASE NARRATIVE

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

(dry)	Results are reported based on the dry weight of the sample. [this will only be present on a dry report basis for soils].
MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
RDL (dry)	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.
J6	The sample matrix interfered with the ability to make any accurate determination; spike value is low.

Mr. Muir is a California registered Civil Engineer and Geotechnical Engineer and holds a Master of Science in Environmental Engineering from the University of California at Berkeley. He has been in the industry for 23 years.

His professional background includes hazardous materials site characterization, risk assessment and remediation under CERCLA, mine permitting and reclamation under SMARA, and water quality evaluation and permitting under the California Water Code and Title 27. Mr. Muir performs predictive human health and ecological risk assessment to support hazardous materials site characterization and remediation.

Mr. Muir has provided characterization, risk assessment, remedial design and/or quality assurance for over three dozen sites regulated by the California Department of Toxic Substances Control (DTSC). He and his team have characterized abandoned mine lands totaling over 3,000 acres in northern California, and they have participated in eight USEPA Brownfield assessment and cleanup projects.

He and his team have performed more than 500 Phase I/II environmental site assessments including municipal, commercial, and transportation improvement projects, characterizing and mitigating environmental conditions related to hydrocarbon and solvent releases, unpermitted waste disposal sites, abandoned mine features, underground storage tanks, lead-containing paint, naturally occurring asbestos, aerially deposited lead and pesticide residuals pursuant to local, state, and federal guidelines.

Mr. Muir also performs geotechnical investigation; earth dam and waste containment design; landfill and mine permitting; reclamation planning; water quality monitoring, reporting and permitting; development of waste discharge requirements and water quality protection standards; storm water permitting; spill prevention, control and cleanup planning; and management of construction quality assurance and construction materials testing.

Project Experience

MALAKOFF DIGGINS STATE HISTORIC PARK, SEDIMENT AND MERCURY ABATEMENT INITIATIVE

Nevada County, California

Project manager for engineering evaluation of sediment and mercury control at Malakoff Diggins State Historic Park for a 330-acre hydraulic mining pit. Evaluated passive technologies including surface water interception and diversion, sediment retention, saddle dam construction and outlet design. Work was performed for The Sierra Fund and in conjunction with USGS. Current work at the site includes hazardous materials site characterization and surface water monitoring as a subconsultant to Golder Associates on behalf of the California Department of Parks and Recreation.

SR 49 DORSEY DRIVE INTERCHANGE

Grass Valley, California

Managed hazardous materials Phase II site characterization for heavy metals and obtained DTSC and county health department approval for this award-winning project. The project included construction of northbound and southbound on- and off-ramps from SR 49; re-alignment of an existing frontage road; and extensive cuts and fills up to 65 feet in height.

DTSC BEAR RIVER MILL SITE RDIP

Grass Valley, Ca

Currently project manager for site characterization and preparation of Remedial Design and Implementation Plan (RDIP) for approximately 15,000 cubic yards of mine waste rock and tailings to be consolidated at the former Bear River Sawmill site located centrally within the property. Previously developed land use controls and obtained DTSC certification for southern portion of the property on behalf of the County of Nevada, and performed a geotechnical engineering investigation for the proposed Nevada County Operations Center currently under design. Previously obtained DTSC certification for industrial use of the eastern and western portions of the property on behalf of Golder Associates.

DTSC/USEPA YUBA RIVER CHARTER SCHOOL HAZARDOUS MATERIALS ASSESSMENT AND CLEANUP

Grass Valley, California

Principal-in-charge and project manager for site characterization, risk assessment and remedial action planning related to an unpermitted disposal site. Site investigation, risk assessment and Removal Action Work Plan (RAW) were approved by DTSC for a new elementary school campus. The approved cleanup plan facilitated the award of a USEPA Brownfield cleanup grant of $600,000. Cleanup was performed in 2015. Performed remediation construction management and quality assurance, and the property was certified by DTSC for school construction. Currently managing construction materials testing for the new school.

USEPA BROWNFIELD ASSESSMENTS, STILES MILL AND PROVIDENCE MINE

Nevada City, CA

Performed predictive human health risk assessment of the historic Stiles Mill site and Providence Mine site, located on Deer Creek in Nevada City. The HHRAs supported two USEPA Brownfield cleanups that were performed in 2014 and 2015. The HHRAs were approved by USEPA with no revisions required. Third HHRA for Providence Quartz Mill Site is currently under review by DTSC.

DEER CREEK/STOCKING FLAT EE/CA

Nevada City, California

Project manager for site investigation related to an Engineering Evaluation/Cost Analysis (EE/CA) and Human and Ecological Risk Assessment (HERA) performed on behalf of the United States Bureau of Land Management (BLM). The assessment included characterization of hard rock and placer mine waste deposits, surface water quality, and sediment impact related to mercury and methylmercury. Work was performed in conjunction with USGS and URS Group.

USEPA BROWNFIELD CLEANUP DESIGN, SOUTH AUBURN STREET PROPERTIES

Grass Valley, California

Conducted hazardous materials site investigation (SI) to characterize heavy metals including mercury in a proposed residential area and wetland impacted by 16,000 cubic yards of mine tailings, as well as historical aerial deposition of contaminants from nearby historical milling processes. Services included SI, human health risk assessment (HHRA), ecological scoping assessment (ESA), ecological predictive assessment (PA) and validation study, and preparation of a cleanup plan (RAW).

USFS PITTSBURG-LIBERTY MILL SITE

Mono County, California

Project manager responsible for Integrated Site Assessment (ISA) of a former mill site associated with the Pittsburg-Liberty gold mine on behalf of the USDA Forest Service Region 4. The assessment included characterization of 30,000 cubic yards of processed mine tailings containing mercury, arsenic, and other heavy metals and an assessment of water quality impact.

DTSC SPRING HILL MINE

Grass Valley, Ca

Project manager responsible for a PEA and RAW approved by DTSC for the consolidation and capping of 60,000 cubic yards of mill tailings associated with a former tailings pond and associated mine waste rock. The approved cleanup plan allows most of the mine waste to be used as engineered fill for a proposed commercial center, while a portion of the tailings will be removed and disposed as Class I hazardous waste.

COMBIE RESERVOIR SEDIMENT AND MERCURY REMOVAL PROJECT

Meadow Vista, California

Performed the technical antidegradation analysis in 2012 on behalf of The Sierra Fund to facilitate project permitting by the California Regional Water Quality Control Board (CRWQCB). Project manager for sediment characterization performed in 2016 and 2017 on behalf of Nevada Irrigation District, including the development and oversight of an exploratory drilling and laboratory analysis program for total mercury, methylmercury and CAM 17 metals, technical review of laboratory data, data evaluation for quality control, and preparation of a technical summary report. Project manager for three-year sediment and mercury removal project, including oversight of permitting and regulatory compliance, water quality monitoring, performance monitoring and reporting.

MEADOW VISTA LANDFILL

Placer County, California

CQA engineer during landfill closure activities. Revised design of leachate collection and recovery system and facilitated improvements to gas extraction system, storm drain system and joint trench hydrostatic pressure release.

McCOURTNEY ROAD LANDFILL

Nevada County, California

Project manager for CM and CQA during facility improvements, including earthwork repairs and pump station installation, as well as post-closure monitoring and maintenance of the facility. Prepared Report of Waste Discharge and negotiated a reduction in leachate and groundwater monitoring during update of Waste Discharge Requirements. Prepared Final Closure Plan for surface impoundment and Post Closure Maintenance Plan for landfill units. Supervised settlement surveys and prepared liner repair plans and specifications to address settlement issues. Evaluated anomalous constituent concentrations in groundwater considering the interaction with landfill gas and leachate constituents. Performed hydrogeologic evaluation regarding drawdown in adjacent wells resulting from groundwater extraction at the facility. Project engineer for closure of two landfill units.

RIDGE ROAD REHABILITATION PROJECT

Sierra County, CA

Project manager in charge of hazardous materials Initial Site Assessment (ISA) and Site Investigation (SI) (Phase I/II Environmental Site Assessment) under Caltrans review for a 2.6-mile road improvement project in Sierra County. SI included soil sampling and analysis along the improvement corridor for aerially deposited lead (ADL), naturally occurring asbestos (NOA) and targeted assessment for historical mine features. Classified soil pursuant to Caltrans guidelines and provided management alternatives.

WATER QUALITY, MINING AND WASTE MANAGEMENT

Northern California

Project manager for the waste characterization and waste discharge requirements under Title 27 for numerous surface mines and waste management units in northern California. Working closely with the California Regional Water Quality Control Board, Mr. Muir has permitted mine sites and solid waste facilities in the counties of Calaveras, Nevada, Placer, Sierra, Siskiyou, and Yuba.

SIERRA COLLEGE EXPANSION PROJECT

Grass Valley, Ca

Project manager for the Phase I/II environmental site characterization associated with a Mitigated Negative Declaration for expansion of Sierra College's 100-acre Nevada County campus. Recognized environmental conditions included past waste management practices, lumber drying, and agricultural pesticide application

DTSC KEMPER ROAD SUBDIVISIONS

Auburn, Ca

Project manager for PEAs related to three proposed subdivisions and former orchard properties on Kemper Road in Auburn, California. DTSC granted "No Further Action" for two of the properties and approved a cleanup plan (RAW) for the third property.

TECHNICAL MEMORANDUM

DATE: September 1, 2021

TO: Derek Hitchcock, Senior Project Manager, Surf To Snow Environmental Resource Management, Inc.

FROM: Leslie Suen, Senior Engineer, LSC

SUBJECT: Wolf Creek Trail – Transportation Analysis

This document presents a discussion of traffic engineering and safety considerations with regards to planning-level alternatives for extension of the Wolf Creek Trail in Grass Valley, California. The Wolf Creek Trail currently runs from Glen Jones Park traveling south for 1.2 miles. The trail analyzed in this report starts at Glen Jones Park and extends just over 2 miles north and west to Idaho Maryland Road/Sutton Way. The preferred and alternative alignments are based on the RDG map dated 8/13/2021. As the trail will be used by both pedestrians and bicyclists, each section of the trail should provide full access for both bikes and peds. If the trail is a Class I separated bike trail, both bikes and peds use this facility together to travel in both directions. All other facilities like sidewalks or bike lanes or separated bikeway can only be used by one type of user and sometimes in only one direction. The goal would be that all types of users be able to use the trail along all sections.

First a tool kit or list of traffic treatments and facility types are described, focusing on where the trail crosses a roadway or is not separated from the roadway. Next, for the preferred alignment each trail-roadway crossing is described, and recommended treatments/markings are provided. Finally, general recommendations for the alternative routes are provided.

TOOL KIT OF TREATMENTS AND FACILITY TYPES

Trail Crossing Treatments

Crosswalk and Trail Crossing Striping Options

Standard crosswalk striping is two parallel lines as shown in Figure 1. This striping can be changed to increase the visibility of the crosswalk for both drivers and trail users. The continental or ladder striping is

recommended for all trail crossings. Additionally, green paint can be added to the striping in between the white strips to further increase visibility, as shown in Figure 2. Green paint on bikeways is becoming more common in California but has not been used to date in Grass Valley.

Rectangular Rapid Flashing Beacons (RRFB)

RRFBs are a pedestrian flasher option that is gaining popularity. RRFBs consist of a panel with two rectangular yellow LED lights that mounts underneath a typical crosswalk warning sign, as shown in Figure 3. The beacons can easily mount to a sign pole and can be solar powered, avoiding the need to run power lines. RRFBs are usually installed at mid-block crossings. A properly designed beacon system with active pedestrian activation will alert the approaching drivers that a pedestrian is definitely present and give him/her enough advance warning to yield comfortably. Installation of a RRFB has been shown to reduce vehicle/pedestrian crashes by up to 47 percent. There is not a threshold or warrant used for determining installation a RRFB. Instead, the professional literature provides guidance on factors that should be considered for installation. The RRFB would be considered appropriate when the roadway has a speed of less than 40 miles per hour and there are no driver sight distance issues.

Pedestrian Hybrid Beacons (PHB)

PHBs (also known as High intensity Activated crossWalK or HAWK signals) provides protected (controlled) pedestrian crossings, stopping traffic only as needed. The hybrid beacon is so named as it combines the warning aspects of a flashing beacon with the regulatory aspects of a traffic signal. The hybrid pedestrian beacon includes a regulatory red indication but is not as restrictive to vehicles as a full traffic signal. The hybrid beacon signal consists of overhead mounted signal heads for vehicles and pedestrian signal indications, as shown in Figure 3. The top row of the signal indications contains two adjacent red displays and below there is a single yellow indication. Hybrid beacons rest in a dark mode with the pedestrian indication displaying “Don’t Walk” until a pedestrian activates the beacon. When the pedestrian crossing is actuated (typically by a push button) the following signal sequence occurs:

- A yellow indication, of a duration consistent with standard signal timing procedures
- An all red indication, of sufficient length for most pedestrians to cross.
- A flashing red indication, providing additional time for slower pedestrians to cross while allowing drivers to proceed as if the signal was a Stop sign.
- Reversion to dark mode.

The advantage of this option is that it has a higher level of driver adherence while only generating traffic delays when needed by pedestrians. The California Manual on Uniform Traffic Control Devices (CAMUTCD) has a PHB warrant provided in Figure 4F-1 which takes into account the pedestrian crossing volume and the through vehicular volume.

Bikeway Classifications

Below is a description of each type of bikeway facility and in Figure 4 there is a photo example of each facility.

Class I Bikeway (Bike Path)
Class I bike paths are a completely separated facility for the exclusive use of bicycles and pedestrians with crossflow by motor vehicles minimized. They offer recreation or high-speed commute routes when motor vehicle and pedestrian conflicts are minimized. They are typically provided along rivers, ocean fronts, canals, utility right of way, abandoned railroad right of way, within school campuses, or within and between parks.

Class II Bikeway (Bike Lane)
Class II bike lanes are a stiped lane for one-way bike travel on a street or highway. They are established along streets in corridors where there is significant bicycle demand and where there are distinct needs that can be served. These are typically found in urban settings where the speed limit is 50 mph or lower. A buffer should be considered if the speed limit is above 35 mph. The ADT should be below 20,000 and a buffer should be considered if the ADT is above 10,000.

Class III Bikeway (Bike Routes)
Class III bike routes provides for shared use with motor vehicle traffic either to:
1. Provide continuity to other bicycle facilities (typically Class II); or
2. Designate preferred routes through high demand corridors

They are established with bike route signs and shared roadway markings (sharrows) along the route. The use of sidewalks as Class III bikeways is strongly discouraged.

Class IV Bikeway (Separated Bikeways)
Class IV separated bikeways provides for exclusive use of bicycles (cannot be used by pedestrians or vehicular traffic) and includes a horizontal and vertical separation required between the separated bikeway and through vehicular traffic. The separation may include, but is not limited to, grade separation, flexible posts, inflexible posts, inflexible barriers, or on-street parking.

RECOMMENDED TREATMENTS FOR PREFERRED ALIGNMENT

The preferred alignment is analyzed based on the RDG map dated 8/13/2021. Starting from the west, the new Wolf Creek Trail would start at the existing trailhead located on Allison Ranch Road just south of Freeman Lane. The trail would travel north and east to the intersection of Idaho Maryland Road/Sutton Way. Each trail roadway crossing is described and recommended treatments/markings are provided below.

Connection with Existing Trail and Trailhead Parking

This existing trailhead and parking are located in Glen Jones Park. This parking area will likely be sufficient for access to the new section of the trail. The new section of the trail will likely have different users than the existing section. The new section is being placed into a very constrained section of town and will have many roadway crossings. The many crossings will allow access on and off the trail for people that live and/or work near the trail. The users for the new trail will likely be people making short trips to/from downtown or short walking trips or using it to connect commute routes that previously used to be on the

roadway. It is less likely people will drive to the trail and therefore it is unlikely the trail will need additional parking. If a Class I bike path can be constructed from Glen Jones Park all the way to the Loma Rica development at Idaho Maryland Road/Sutton Way, increased trailhead parking may be needed.

Freeman Lane Trail Crossing

From the trailhead on Allison Ranch Road the trail would immediately cross Freeman Lane at a four-way stop-controlled intersection. The trail should cross the eastern leg (Freeman Lane) of the intersection which currently has a crosswalk with two parallel lines. The trail crossing includes crossing two westbound traffic lanes (a left-through lane and a right turn lane) and one eastbound travel lane. The following improvements are recommended with an example shown in Figure 5:

- Move the stop bar and stop sign back at least 4 feet and ideally 10 feet from the crosswalk based on CAMUTCD 3B.16.10. This is especially important given the dual westbound lanes. When drivers stop too close to crosswalks that cross multi-lane approaches, they place pedestrians at risk by blocking other drivers' views of pedestrians and by blocking pedestrians' views of vehicles approaching in the other lanes.
- Upgrade the striping to a high visibility crosswalk like continental striping.
- Add warning sign for 'bike and pedestrian trail crossing' using signs W11-15 and W11-15P at crossing and again as a warning to approaching driver adding sign W16-2ap. The distance this sign should be placed is defined in the CAMUTCD in Section 2C.05.
- Add R1-1 stop signs on the trail. (size = 18 inches x 18 inches)
- Optionally, add green paint to the crosswalk. If green paint is used for all roadway crossings it would increase the identification of the trail for users and vehicles. If the tunnel alignment is constructed the crossing at Freeman Lane would not be necessary.

Underpass Under SR 20

There is an existing 4-foot-wide sidewalk on both the east and west side of the underpass. The roadway width is 3 lanes or approximately 36 feet in total width. The roadway consists of a single lane in each direction with a turn lane at Freeman Lane and SR 20 westbound ramps intersections. Since the preferred alignment connects on the trail on the east side of the road both north and south of the underpass, the trail is recommended to stay on the east side of the underpass. The following improvements are recommended:

- Ideally, retaining walls would be installed beneath the underpass to widen the total roadway cross-section in order to provide a full Class I path through the underpass. This would accommodate both bike and pedestrian trail users. An example of this type of improvement can be found where SR 89 crosses under I-80 in Truckee, which was widened as part of a roundabout project.
- Alternatively, for bicycles, a Class IV two-way separated bike maybe possible in the existing width if the vehicle lanes are reduced to one in each direction. Green paint maybe be added to the bikeway as well to improve visibility. Pedestrians can't use this type of bikeway so they would need their own facility. The existing 4-foot sidewalks would be acceptable for pedestrian use,

though ideally they would be widened. If the Class IV bikeway was installed that would provide a buffer for the pedestrian on the existing sidewalk.

South Auburn Triangle Intersection

With the preferred alignment following Wolf Creek, the trail would be a Class I multipurpose path all the way to South Auburn Street. The trail would not need to cross any roadways along this section. When the trail reaches the downtown area behind Safeway the trail would need to be incorporated into the new design of the Triangle intersection which is being developed as a multi-leg oval shaped roundabout. *SR 174/SR 20 Intersection Analysis* (GHD, 2020) shows the preferred reconfiguration for this group of intersections as shown in Figure 6. To minimize vehicle/trail interactions the trail should cross three roadways: at the southbound on ramp, at South Auburn Street east of SR 20 and at Neal Street near Hansen Way as shown in Figure 6. This alignment should be marked with signs and possibly green paint at the crosswalks. In reality, trail users will travel in many directions in this area, entering and exiting the trail at this location. There is some concern that the trail crosses at the entrance to the westbound onramp, where drivers are tending to be accelerating and they might not be expecting a second crosswalk. But there is sufficient driver sight lines at this location and the curves of the roundabout will keep vehicle speeds down.

Along Hansen Way

Based on the GHD reconfiguration, Hansen Way will become a one-lane one-way northbound roadway. This would leave ample space to provide either a Class I bike path or a sidewalk and a Class IV separated bikeway. A Class I bike path at this location is recommended as southbound bicyclists along a one-way northbound roadway could be unexpected by drivers, which could be a potential safety issue.

Bank Street Trail Crossing

The existing intersection at Hansen Way/Bank Street has an all way stop with crosswalks, with two parallel line striping, on the north and south legs of the intersection. The following improvements are recommended:

- Add a crosswalk with high visibility striping like continental striping to the east leg of the intersection.
- Move the stop bar back at least 4 feet and ideally 10 feet back from the crosswalk.
- Add warning signs for 'bike and pedestrian trail crossing' using signs W11-15 and W11-15P at crossing and again as a warning to approaching driver adding sign W16-2ap. The distance this sign should be placed is defined in the CAMUTCD in Section 2C.05.
- Add R1-1 stop signs on the trail.
- Optional add green paint to the crosswalk.

Bennett Street Trail Crossing

The existing intersection at Hansen Way/Bennett Street has an all way stop with standard crosswalks on the south leg of the intersection. The following improvements are recommended:

- Add a crosswalk with high visibility striping like continental striping to the east leg of the intersection.

- The crosswalk should be located perpendicular to Bennet Street (not diagonally) to provide the shortest crossing distance. Exact location of the crosswalk will depend on where the trail is located on the north side of Bennett Street.
- Move the stop bar back at least 4 feet and ideally 10 feet back from the crosswalk.
- Add warning sign for 'bike and pedestrian trail crossing' using signs W11-15 and W11-15P at crossing and again as a warning to approaching driver adding sign W16-2ap. The distance this sign should be placed is defined in the CAMUTCD in section 2C.05.
- Provide R1-1 stop signs on the trail.
- Optionally, add green paint to the crosswalk.

Railroad Avenue Trail Crossing at Idaho Maryland Road

With the preferred alignment, along SR 49, the trail would be a Class I bike path and does not cross any roadways until Railroad Avenue at Idaho Maryland Road. The existing intersection at Railroad Avenue/Idaho Maryland Road is an all way stop with one crosswalk on the south leg across Railroad Avenue. The trail would use this crosswalk with the following upgrades:

- Move the stop bar back at least 4 feet and ideally 10 feet back from the crosswalk (on south leg)
- Add warning sign for 'bike and pedestrian trail crossing' using signs W11-15 and W11-15P at crossing and again as a warning to approaching driver adding sign W16-2ap. The distance this sign should be placed is defined in the CAMUTCD in section 2C.05.
- Provide R1-1 stop signs on the trail.
- Upgrade the striping to a high visibility crosswalk like continental striping.
- Optionally, add green paint to the crosswalk.

DeMartini RV Driveway Trail Crossing

With the preferred alignment along the creek, the trail would be a Class I bike path and does not cross any roadways until the DeMartini driveway. The DeMartini driveway is narrow and has minimal traffic but there is a large security gate across the road. The trail would stay on the south of the creek bridge, the crossing location relative to the gate should be discussed with the property owner. Since this crossing does not occur at an existing intersection the following measure are recommended at this location:

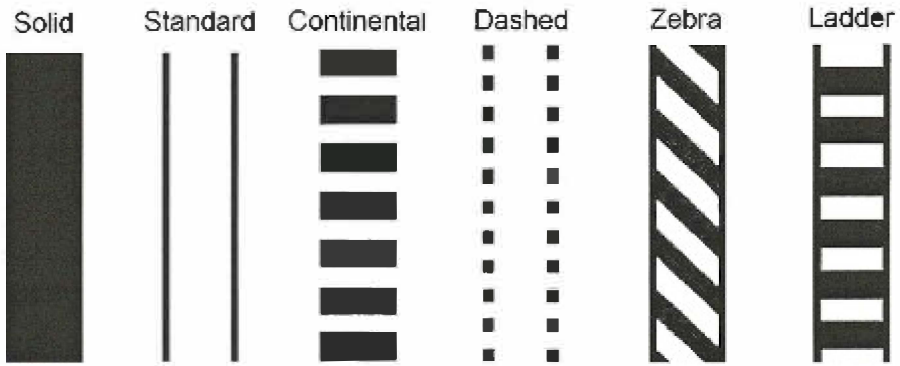
- Add a crosswalk with continental striping
- Add yield lines which consist of a row of solid white isosceles triangles pointing toward approaching vehicles on both approaches to the crosswalk at least 10 feet from the edge of the crosswalk and add a 'yield here to bikes and peds' (R1-5 or R1-5a) sign.
- Add warning sign for 'bike and pedestrian trail crossing' using signs W11-15 and W11-15P at crossing and again as a warning to approaching driver adding sign W16-2ap. The distance this sign should be placed is defined in the CAMUTCD in section 2C.05 based on the roadway speed.
- Consider adding R1-1 stop sign on the trail.
- Optionally, add green paint to the crosswalk.

Centennial Drive to Sutton Way

Idaho Maryland Road/Centennial Drive is a T intersection with two lanes on Centennial with stop sign control on that leg. Idaho Maryland Road is four-lanes to the west of Centennial (including a center lane and eastbound right turn lane) and three-lanes to the east of Centennial. This is the only trail crossing intersection that is not an all-way stop and therefore would need different measures. East of Centennial Drive, Idaho Maryland Road narrows to two lanes and continues as two lanes to Sutton Way. Since it is not possible to continue the trail as a Class I along the creek, it is recommended the trail cross Idaho Maryland Road west of Centennial. The crossing could use either a pedestrian hybrid beacon or a rectangular rapid flashing beacon to protect the crossing, as shown in Figure 3. The CAMUTCD Figure 4F-1 Pedestrian Hybrid Beacon warrant was applied to this location. Under existing conditions, the PHB warrant is not met, therefore we recommend a RRFB at this location.

Once the trail is on the north side of Idaho Maryland Road there are two options for connecting to Sutton Way. First the roadway could be widened, and the sidewalk removed to accommodate a Class I multipurpose path all the way to Sutton Way. The second option is to shift the trail north about 600 feet east of Centennial to the utility easement behind (north of) the commercial buildings to connect to Sutton Way. The alignment along the roadway is preferred as it is more direct and would require less tree removal/disturbance on or near private property. While the trail connection between Centennial Drive and Sutton way would currently have a low user demand, additional development in Loma Rica could increase demand significantly.

RECOMMENDED TREATMENTS FOR ALTERNATIVE ALIGNMENTS



All alternative alignments would require trail users to interact with vehicles substantially more than the preferred alignment. On any reach of the alignments, like the Mill Street reach, the alternative alignment follows the road. The roadways in the downtown area especially are very constrained, reducing the possibilities for the trail. If the trail was to be aligned on the road a different set of treatment would be required.

As most alignments would not allow for a separated bikeway or even a bike lane, therefore the only option for bikes would be a Class III bike route. There are some existing bike routes along the alternative alignments. It would be recommended that all bike routes provide updated and increase signage and add or increase the number of sharrow pavement markings. Additionally, route finding signs would become more important with a Class III bike route. Since pedestrians cannot use the bike route, sidewalks would need to be provided along at least one side of the street. At this point, with a bike route and a sidewalk, it is not really a trail anymore but a way to guide users to connect to other parts of the trail.

The alternative alignment for the Idaho-Maryland Reach would also need to be an on-street bicycle facility. As the road has a higher speed limit (30 miles per hour) than the rest of the corridor roadways and is wider, a Class II bike lane could be provided in this location. Additionally, for pedestrians existing sidewalks are provided along most of this roadway but there are some gaps in the existing sidewalks.

GENERAL NOTES:

1. THIS DESIGN IS BASED ON AVAILABLE LIDAR AND GIS DATA. FINAL DESIGNS WILL REQUIRE A DETAIL SURVEY AND MAY VARY FROM WHAT IS SHOWN IN THESE PLANS.
2. THE BIKE PATH MAY REQUIRE NARROWING WHERE THE PATH IS ADJACENT TO HIGHWAY 49 BETWEEN FREEMAN LANE AND NEAL STREET BASED ON THE RESULTS OF A DETAILED SURVEY. THE LIDAR DATA DOES NOT SHOW AN EXISTING RETAINING WALL OR AN OVERHEAD HIGHWAY SIGN FOR THE FREEMAN LANE OFF RAMP IN THIS LOCATION. THE PATH MAY REQUIRE ADJUSTMENT BASED ON THE ACTUAL LOCATION OF THESE FEATURES.
3. A CALTRANS DESIGN DECISION DOCUMENT IS ANTICIPATED FOR THIS PROJECT.
4. THE DESIGN FOR SEGMENT 2 STOPS SHORT OF THE PROPOSED ROUNDABOUT AT THE INTERSECTION OF SOUTH AUBURN STREET AND NEAL STREET. THE DESIGN TEAM WILL COORDINATE WITH THE ROUNDABOUT DESIGN TO ROUTE THE PATH THROUGH THE ROUNDABOUT TO THE INTERSECTION OF NEAL STREET AND HANSEN WAY.
5. ON IDAHO MARYLAND ROAD (SEGMENT 5) THE TRAIL NARROWS TO APPROXIMATELY 7.5-FT AT STATION 29+00 TO AVOID AN EXISTING BUILDING.

DOWNTOWN GRASS VALLEY STREET CROSSING.

COLORED PAVING

TINTED PAVING IN SUBDUED COLORS COMPLEMENT THE HISTORIC ARCHITECTURE OF DOWNTOWN GRASS VALLEY WHILE COMMUNICATING THE DIFFERENT USER ZONES WITHIN THE ROADWAY.

USE THE SAME COLOR TINTED PAVING IN DOWNTOWN GRASS VALLEY TO TINTED CONCRETE AND ASPHALT ON THE WOLF CREEK TRAIL, CREATING A VISUAL LINKAGE BETWEEN TOWN AND TRAIL.

EXISTING PRECEDENT PROPOSED FEATURES

DIFFERENT COLORED CYCLIST AND PEDESTRIAN PAVINGS DESIGNATE USAGE TYPE. BOULDER CREEK BIKE TRAIL. BOULDER, CO.

ANOTHER EXAMPLE OF PAVING USED TO REDUCE USER CONFLICT BY DISTINGUISHING SPACES FOR CYCLISTS AND PEDESTRIANS.

CONTRASTING PAVING COLORS GUIDE TRAIL USERS THROUGH INTERSECTIONS WITH A VISUAL CONNECTION TO THE ROUTE.

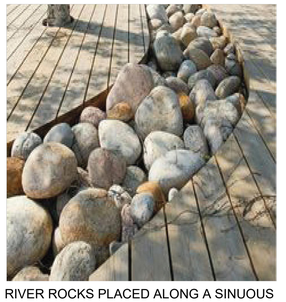
AERIAL VIEW OF AN INTERSECTION WITH PAVING COLOR CONTRAST. AUSTIN, TX.

USE A UNIQUE AND DISTINCTIVE COLOR FOR PAVING ALONG THE WOLF CREEK TRIAL TO SUPPORT TRAIL BRANDING AND TO DELINEATE USAGE ALONG THE TRAIL.

INSTALL COLORED PAVING FOR THE FIRST 50-FT AT INTERSECTIONS.

MATERIALS:

- TINTED CONCRETE AND ASPHALT
- CONTRASTING COLORS FOR PAINT STRIPING



COLOR PAVING 1
SCALE: NTS

ROCKS AND SMALL BOULDERS BORDER A CONCRETE TRAIL. WETLANDS PARK, LAS VEGAS, NV.

RIVER ROCKS ADD TEXTURE IN MEDIANS AND SMALL AREAS THAT ARE DIFFICULT TO MAINTAIN PLANTS.

RIVER ROCKS PLACED ALONG A SINUOUS CURVE ARE EVOCATIVE OF A CREEK.

INCORPORATE ROCKS AND SMALL BOULDERS AS A UNIFYING THEME ALONG THE TRAIL.

MATERIALS:

- RIVER ROCKS
- BOULDERS

TRAIL IDENTITY 2

EXISTING GABION WALLS AT NORTHSTAR MINING MUSEUM

EXISTING METAL FENCE AND RAILING AT NORTHSTAR MINING MUSEUM

GABION WALLS & METAL FENCE

GABION WALLS AT THE NORTHSTAR MINING MUSEUM AND COMPLETED SEGMENT OF THE WOLF CREEK TRAIL ARE ATTRACTIVE, FUNCTIONAL AND PROVIDE A LANGUAGE THAT CAN BE REPEATED IN OTHER TRAIL DESIGN ELEMENTS.

THE POWDER COATED, RUST COLORED METAL FENCE AND BRIDGE RAILING HARMONIZE WITH THE RUSTED ARTIFACTS OF THE NORTHSTAR MINING MUSEUM AND SURROUNDING LANDSCAPE. CREATE A COHESIVE TRAIL IDENTITY BY REPEATING EXISTING FENCE AND BRIDGE MATERIALS THROUGHOUT FUTURE TRAIL SEGMENTS.

EXISTING PRECEDENTS
PROPOSED FEATURES

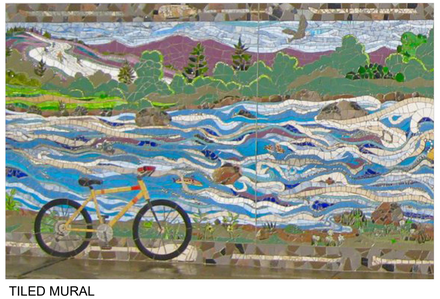
GABION WALLS ALONG HIGHWAYS

LOW, SINUOUS GABION WALLS WITH INTEGRATED SEATING SUGGEST A MEANDERING CREEK.

RUSTIC STONE WALL

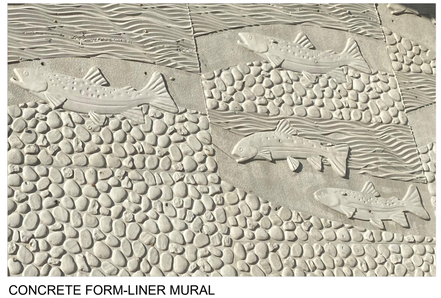
USE GABIONS FOR LOW RETAINING WALLS TO STRENGTHEN THE TRAIL IDENTITY.

MATERIALS:



- GABION WALLS
- DRY STACKED OR MORTARED STONE WALLS

STONE WALL 1



SCALE: NTS

PAINTED MURAL

TILED MURAL

CONCRETE FORM-LINER MURAL

CONTINUE TO MOVE FORWARD WITH A COMMUNITY DRIVEN MURAL UNDER HIGHWAY 20.

FOR LARGER CONCRETE WALLS, INCORPORATE ADDITIONAL MURALS OR USE CUSTOM FORM-LINERS TO EMBED ART ALONG THE CAST-IN-PLACE WALLS.

MATERIALS:

- PAINTED MURALS
- TILED MURALS
- CONCRETE FORM-LINERS

MURAL 2

EXISTING GRASS VALLEY VETERANS MEMORIAL WITH SALVAGED METAL

MINING ARTIFACTS AT THE NORTHSTAR MINING MUSEUM

EXISTING WOLF CREEK TRAIL NORTHSTAR MINING MUSEUM SIGN

EXISTING WOLF CREEK INTERPRETIVE PANELS

EXISTING WOLF CREEK TRAIL WAYFINDING BOLLARD

GATEWAYS, WAYFINDING & INTERPRETATION

THE USE OF SALVAGED METAL WITH ITS RUST PATINA AT THE VETERANS MEMORIAL AND THE METAL MINING ARTIFACTS AT THE NORTHSTAR MINING MUSEUM INFORM THE PROPOSED STRATEGIES FOR GATEWAYS, WAYFINDING AND INTERPRETATIVE SIGNAGE OF THE WOLF CREEK TRAIL SEGMENTS.

USE METAL FENCES AS OPPORTUNITIES TO INSTALL INTERPRETIVE PANELS AND SIMPLE WOODEN WAYFINDING BOLLARDS FOR EFFECTIVE WAYS TO HELP USERS NAVIGATE TRAILS.

EXISTING PRECEDENTS
PROPOSED FEATURES

GATEWAY WITH ROUGH HEWN TIMBER, CUT-OUT WEATHERED STEEL AND SALVAGED METAL ARTIFACTS

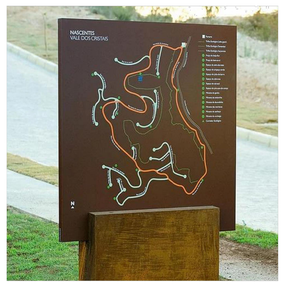
BOULDER MONUMENT SIGNAGE

GABION WITH LASER CUT METAL SIGNAGE

GABION WAYFINDING OBELISK

DEPLOY CONSISTENT MATERIALS AND STRATEGIES AT TRAIL ENTRANCES TO BOLSTER THE IDENTITY OF THE WOLF CREEK TRAIL

USE MINING ERA MATERIALS SUCH AS ROUGH-HEWN WOOD, WEATHERED STEEL, AND GABION BASKETS AS THE GRAPHIC LANGUAGE FOR ENTRY MONUMENTS.



MATERIALS:

- ROUGH-HEWN TIMBER
- CUT-OUT WEATHERED STEEL
- ENGRAVED BOULDERS
- GABIONS

GATEWAY 1
SCALE: NTS

WEATHERED STEEL INTERPRETATIVE SIGNAGE WITH ETCHINGS AND IMAGES

'YOU ARE HERE' TRAIL MAP

CUT-OUT METAL WITH ETCHING

PROVIDE DURABLE SIGNAGE ALONG THE TRAIL USING CONSISTENT MATERIALS.

INCORPORATE THE SIGNAGE INTO SITE FEATURES, SUCH AS GUARDRAILS, PAVING, AND ENTRY MONUMENTATION AT GATEWAYS AND ALONG THE TRAIL.

MATERIALS:

- WOOD
- CUT-OUT WEATHERED STEEL
- ENGRAVED METAL

WAYFINDING AND INTERPRETATION 2

C:\USERS\H2OTH\RESTORATION DESIGN GROUP\PROJECTS - DOCUMENTS\WOLF CREEK TRAIL\04 AUTOCAD\WORKING DRAWINGS\SHEETS\SEGMENT 2\SEG-2-WLF-PLAN-PROFILE-(1).DWG PLOTTED ON: 3/15/2023

PLAN
1" = 20'

PROFILE
1" = 20' HORIZ
1" = 10' VERT

SHEET GENERAL NOTES:

1. ACCESS CONTROL FENCE TO GET RELOCATED BETWEEN PROPOSED TRAIL AND EDGE OF PAVEMENT OF HIGHWAY 49 SHOULDER. FINAL LOCATION TBD.
2. DESIGN ENCROACHES ON EXISTING SHOULDER, BUT MAINTAINS A MIN SHOULDER WIDTH OF 8-FT. SEE CROSS SECTIONS.
3. PROFILE IS SHOWN FOR EXISTING GROUND AND FINISHED GRADE ALONG STATION LINE.

CONSTRUCTION NOTES:

1. CONSTRUCT 10-FT WIDE HMA PATH WITH 1% CROSS SLOPE. (1/1.2)
2. CONSTRUCT FILL RETAINING WALL WITH BIKE RAILING.
3. CONSTRUCT CUT RETAINING WALL OR ROCKERY. (1/1.5)
4. REMOVE EXISTING ACCESS CONTROL FENCE AND RELOCATE TO BETWEEN TRAIL AND HWY 49 SHLDR EP.
5. CONSTRUCT NEW MIDWEST GUARDRAIL SYSTEM (OR APPROVED EQUAL).
6. CONSTRUCT NEW CONC VEHICLE BARRIER WITH NEW ACCESS CONTROL FENCE.
7. REMOVE EXISTING GUARDRAIL.
8. PRESERVE AND PROTECT EXISTING RETAINING WALL.
9. EXISTING FREEWAY SIGN MAY REQUIRE RELOCATING AND/OR NARROWING OF PATH WIDTH.
10. PATH ALIGNMENT AND/OR WIDTH MAY REQUIRE ADJUSTMENT TO AVOID EXISTING STREET LIGHT POLE.
11. REMOVE AND RECONSTRUCT CONC SIDEWALK WITH PED CURB RAMP.
12. REMOVE EXISTING PAVEMENT STRIPING AND RESTRIPE AS SHOWN, TYP. (2/1.2)
13. PRESERVE AND PROTECT EXISTING CONC SIDEWALK.
14. INTEGRATE COLOR PAVING (1/1.4)
15. PROVIDE TRAIL IDENTITY ELEMENT (2/1.4)
16. INSTALL MURAL (2/1.5)
17. PROVIDE GATEWAY ELEMENT (1/1.6)
18. INSTALL INTERPRETIVE ELEMENT (2/1.6)
19. INSTALL WAYFINDING ELEMENT (2/1.6)
20. CREATE A POCKET PARK CONNECTED TO WOLF CREEK TRAIL. DESIGN TO BE DETERMINED.

SHEET	4.7
	OF 82

PLAN
1" = 20'

PROFILE
1" = 20' HORIZ
1" = 10' VERT

SHEET GENERAL NOTES:

1. PROFILE IS SHOWN FOR EXISTING GROUND AND FINISHED GRADE ALONG STATION LINE.

CONSTRUCTION NOTES:

1	CONSTRUCT 8-FT WIDE HMA PATH WITH 1-FT HMA SHOULDERS.	1/1.3
2	CONSTRUCT NEW CURB, GUTTER, AND SIDEWALK LANDING LEVEL WITH EXISTING AC TO PROVIDE ADA ACCESS AND ADD DETECTABLE WARNING STRIP.	
3	CONSTRUCT CONC CUT RETAINING WALL.	
4	PRESERVE AND PROTECT EXISTING CONC RETAINING WALL.	
5	CONSTRUCT SHORT FILL RETAINING WALL OR ROCKERY.	1/1.5
6	TRANSITION FROM HMA BIKE PATH TO 10-FT WIDE SIDEWALK.	
7	CONSTRUCT NEW CONC CURB, GUTTER, AND 10-FT WIDE SIDEWALK.	2/1.3
8	CONSTRUCT ADA ACCESSIBLE CURB RAMP WITH DETECTABLE WARNING STRIP.	
9	INSTALL LADDER TYPE CROSSWALK STRIPING.	
10	INTEGRATE COLOR PAVING	1/1.4
11	PROVIDE TRAIL IDENTITY ELEMENT	2/1.4
12	INSTALL MURAL	2/1.5
13	PROVIDE GATEWAY ELEMENT	1/1.6
14	INSTALL INTERPRETIVE ELEMENT	2/1.6
15	INSTALL WAYFINDING ELEMENT	2/1.6
