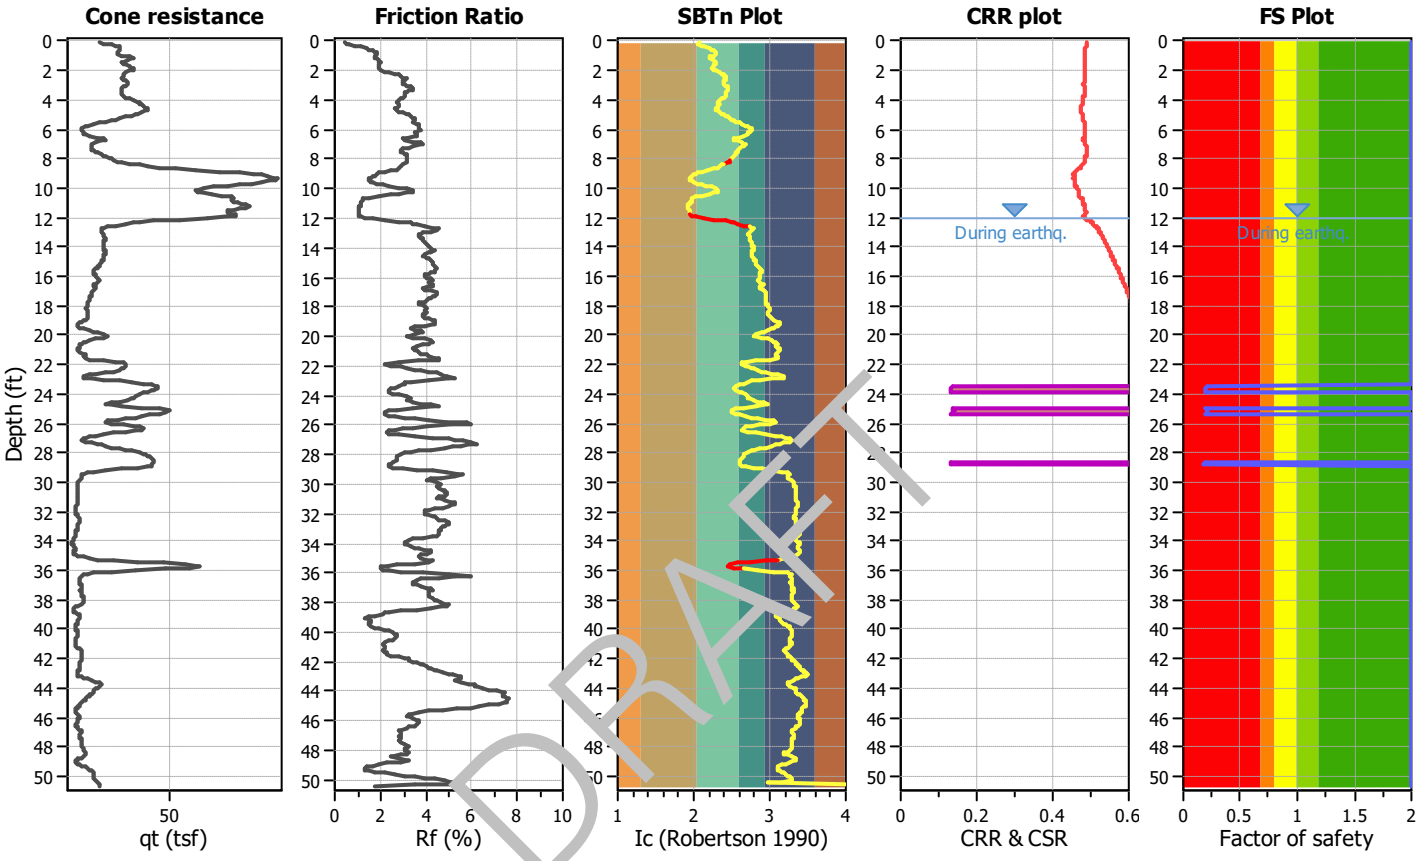
LIQUEFACTION ANALYSIS REPORT

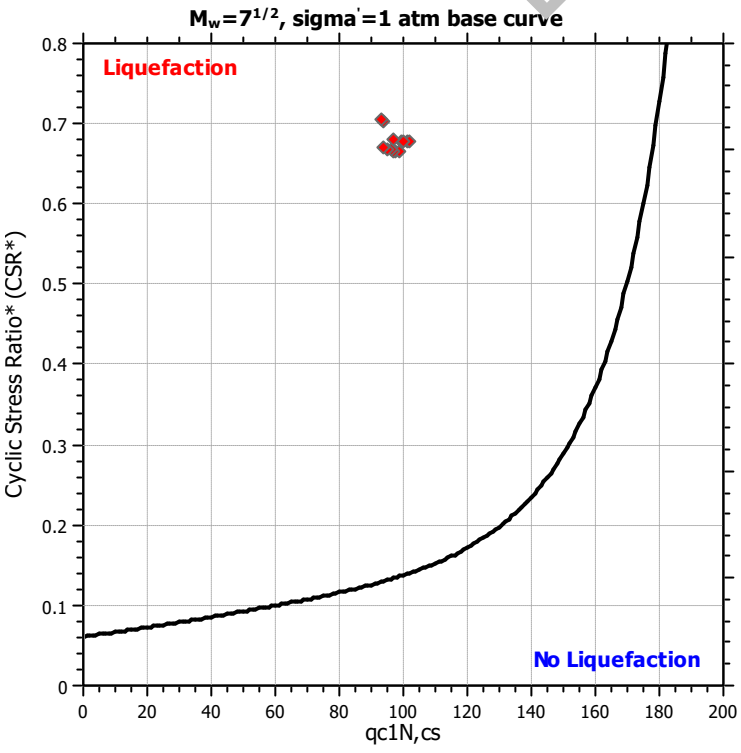
Project title : **Location :**

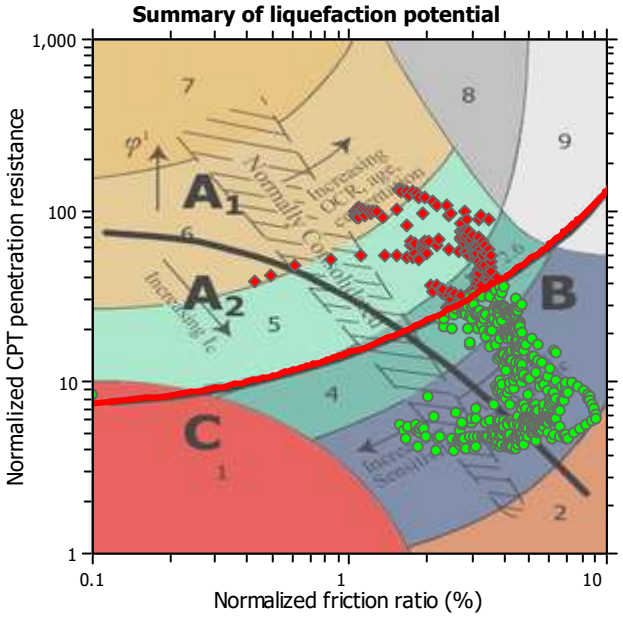
CPT file : CPT-25

Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		

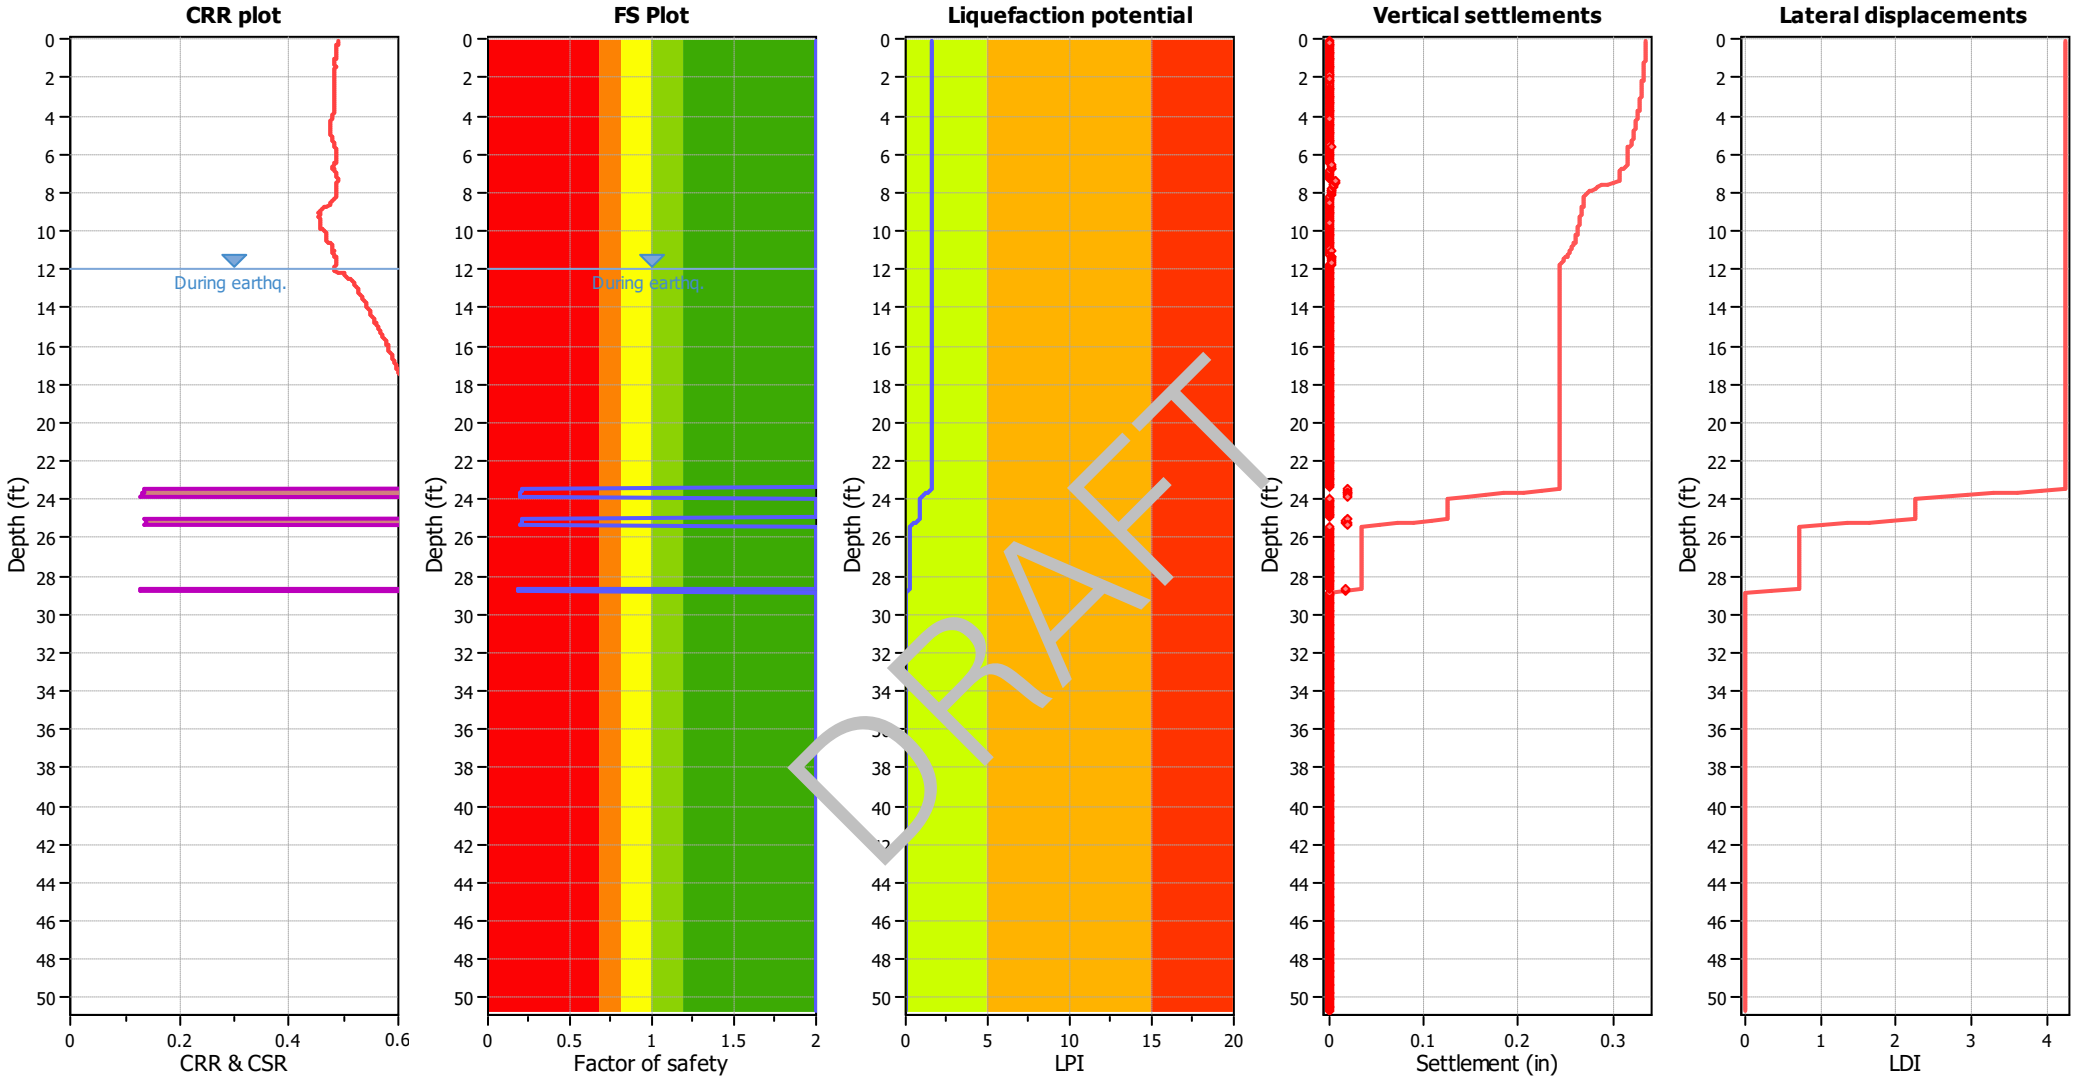






Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

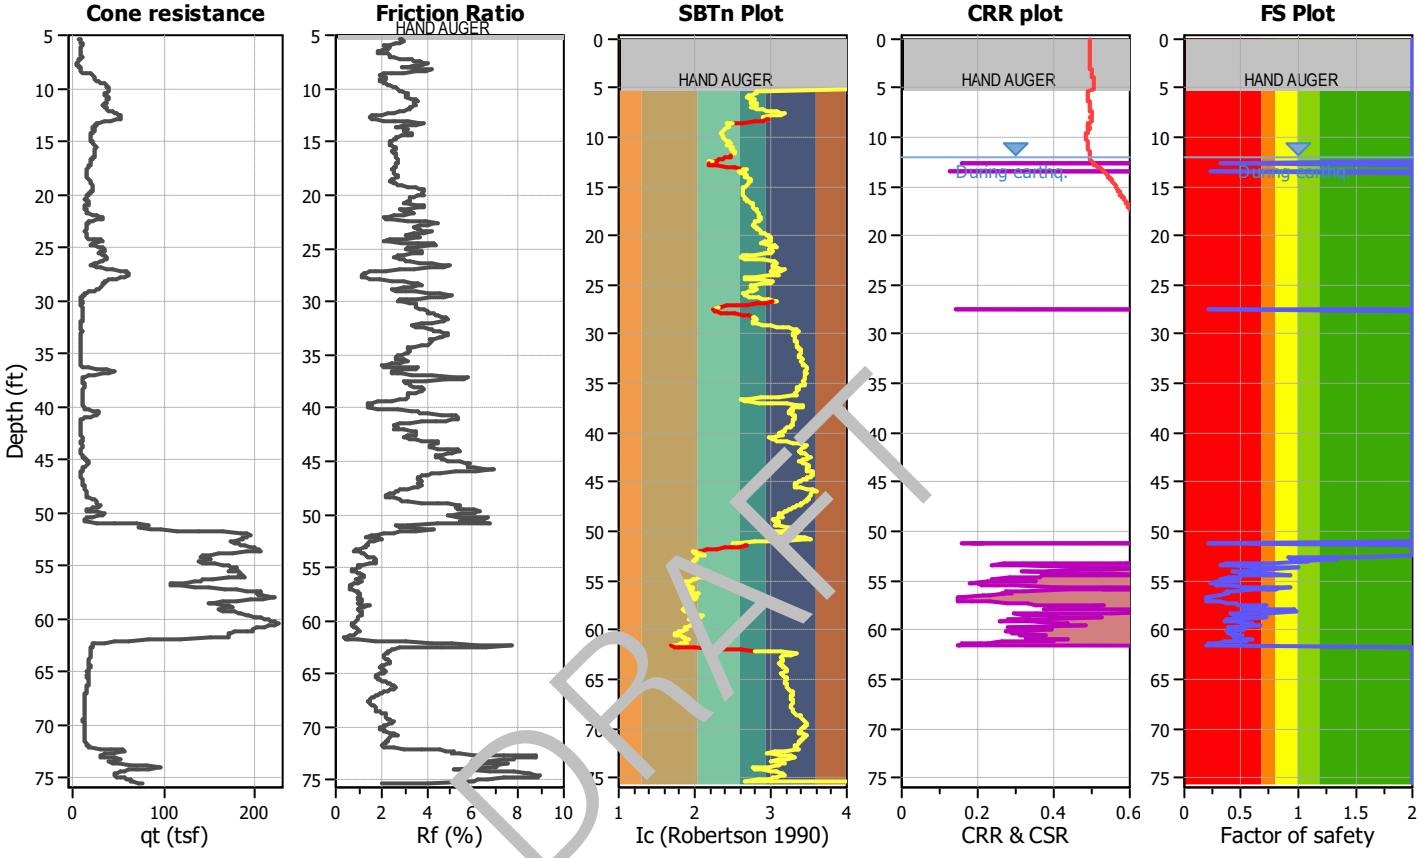
LIQUEFACTION ANALYSIS REPORT

Project title : **Location :**

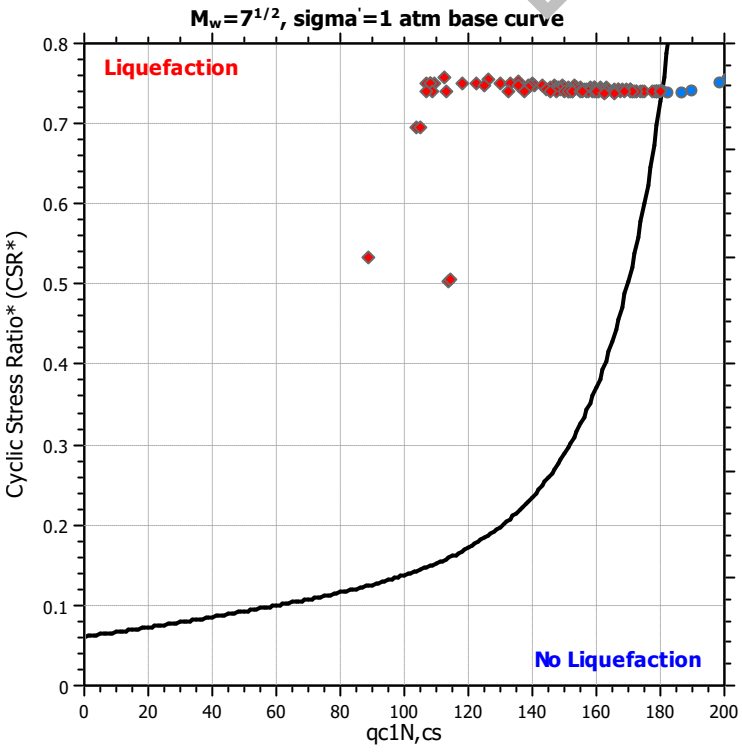
CPT file : CPT-26

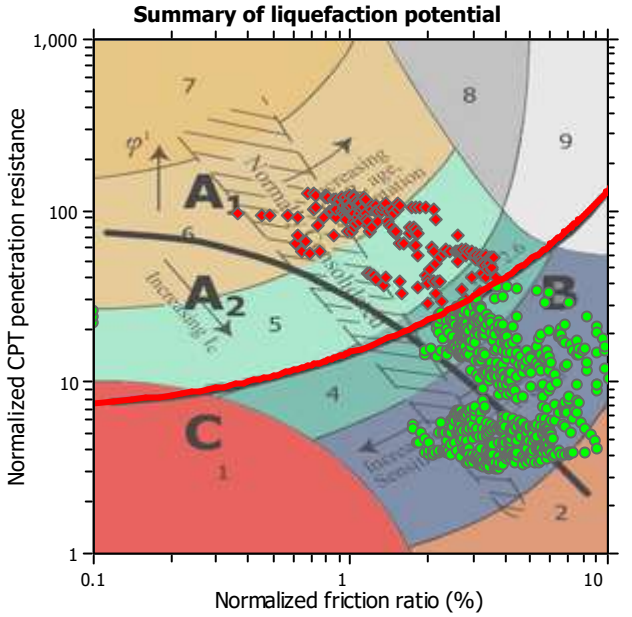
Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		



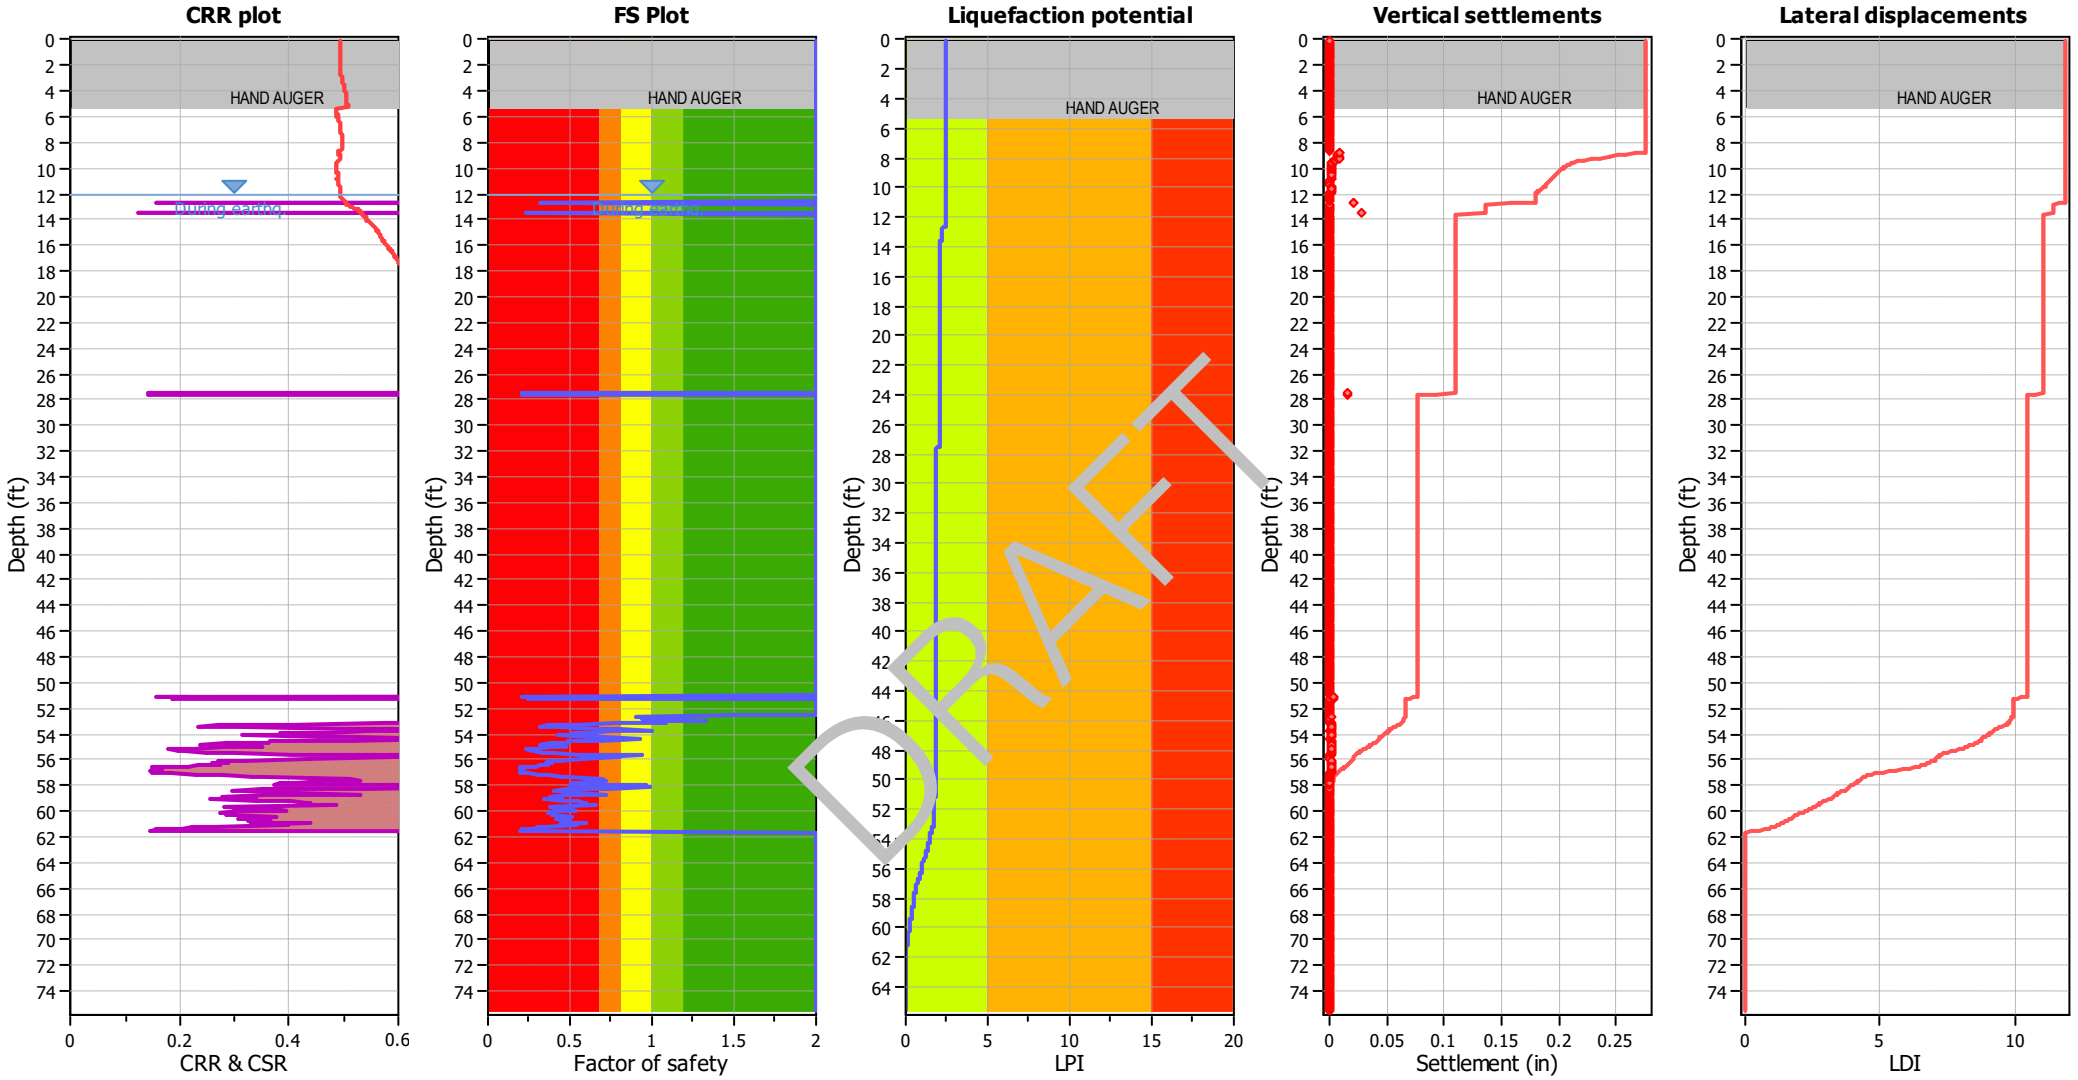
DRAFT





Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

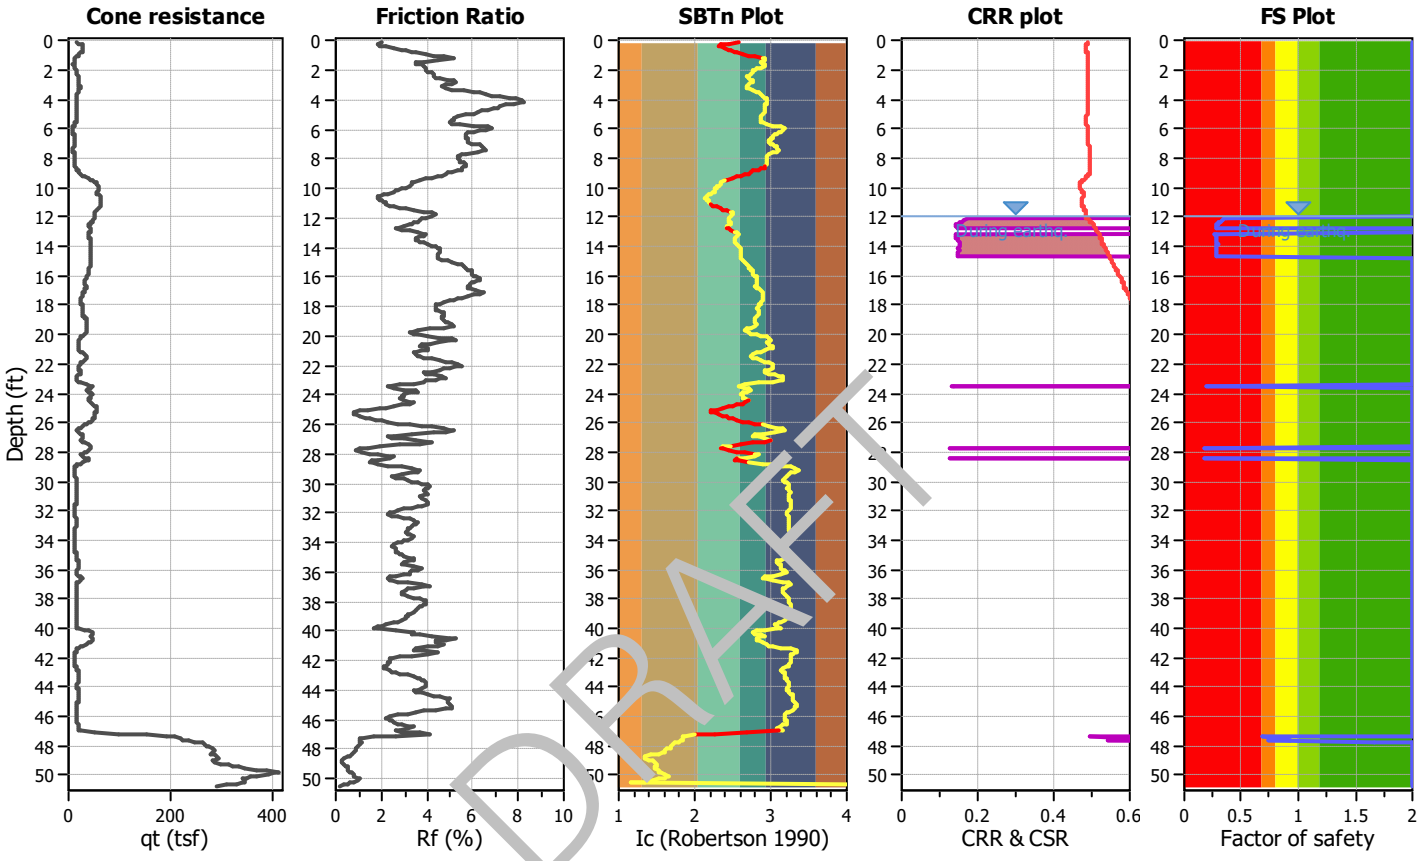
LIQUEFACTION ANALYSIS REPORT

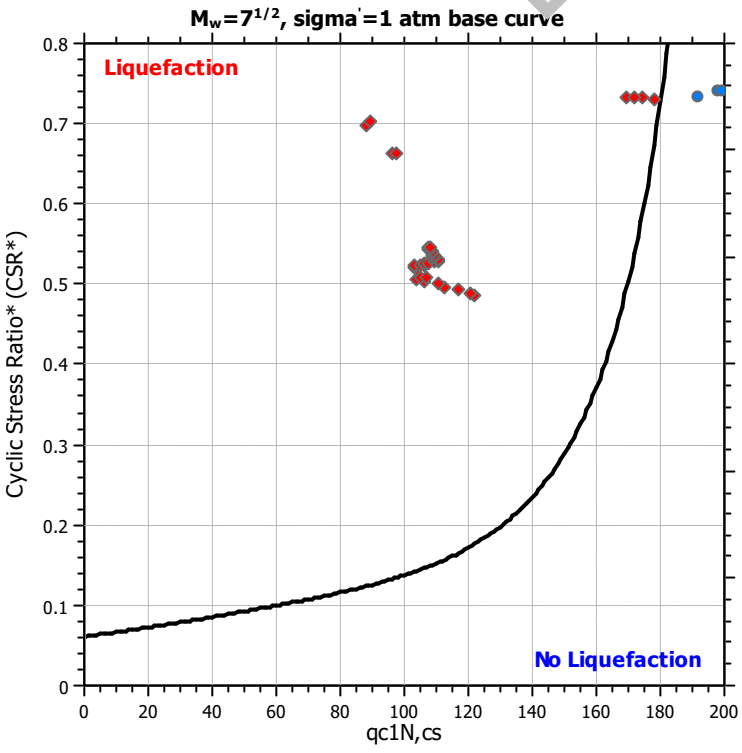
Project title : **Location :**

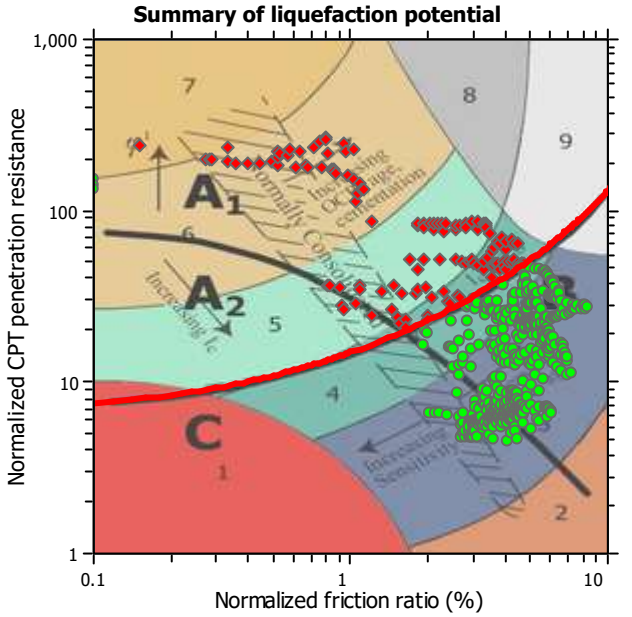
CPT file : CPT-27

Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		

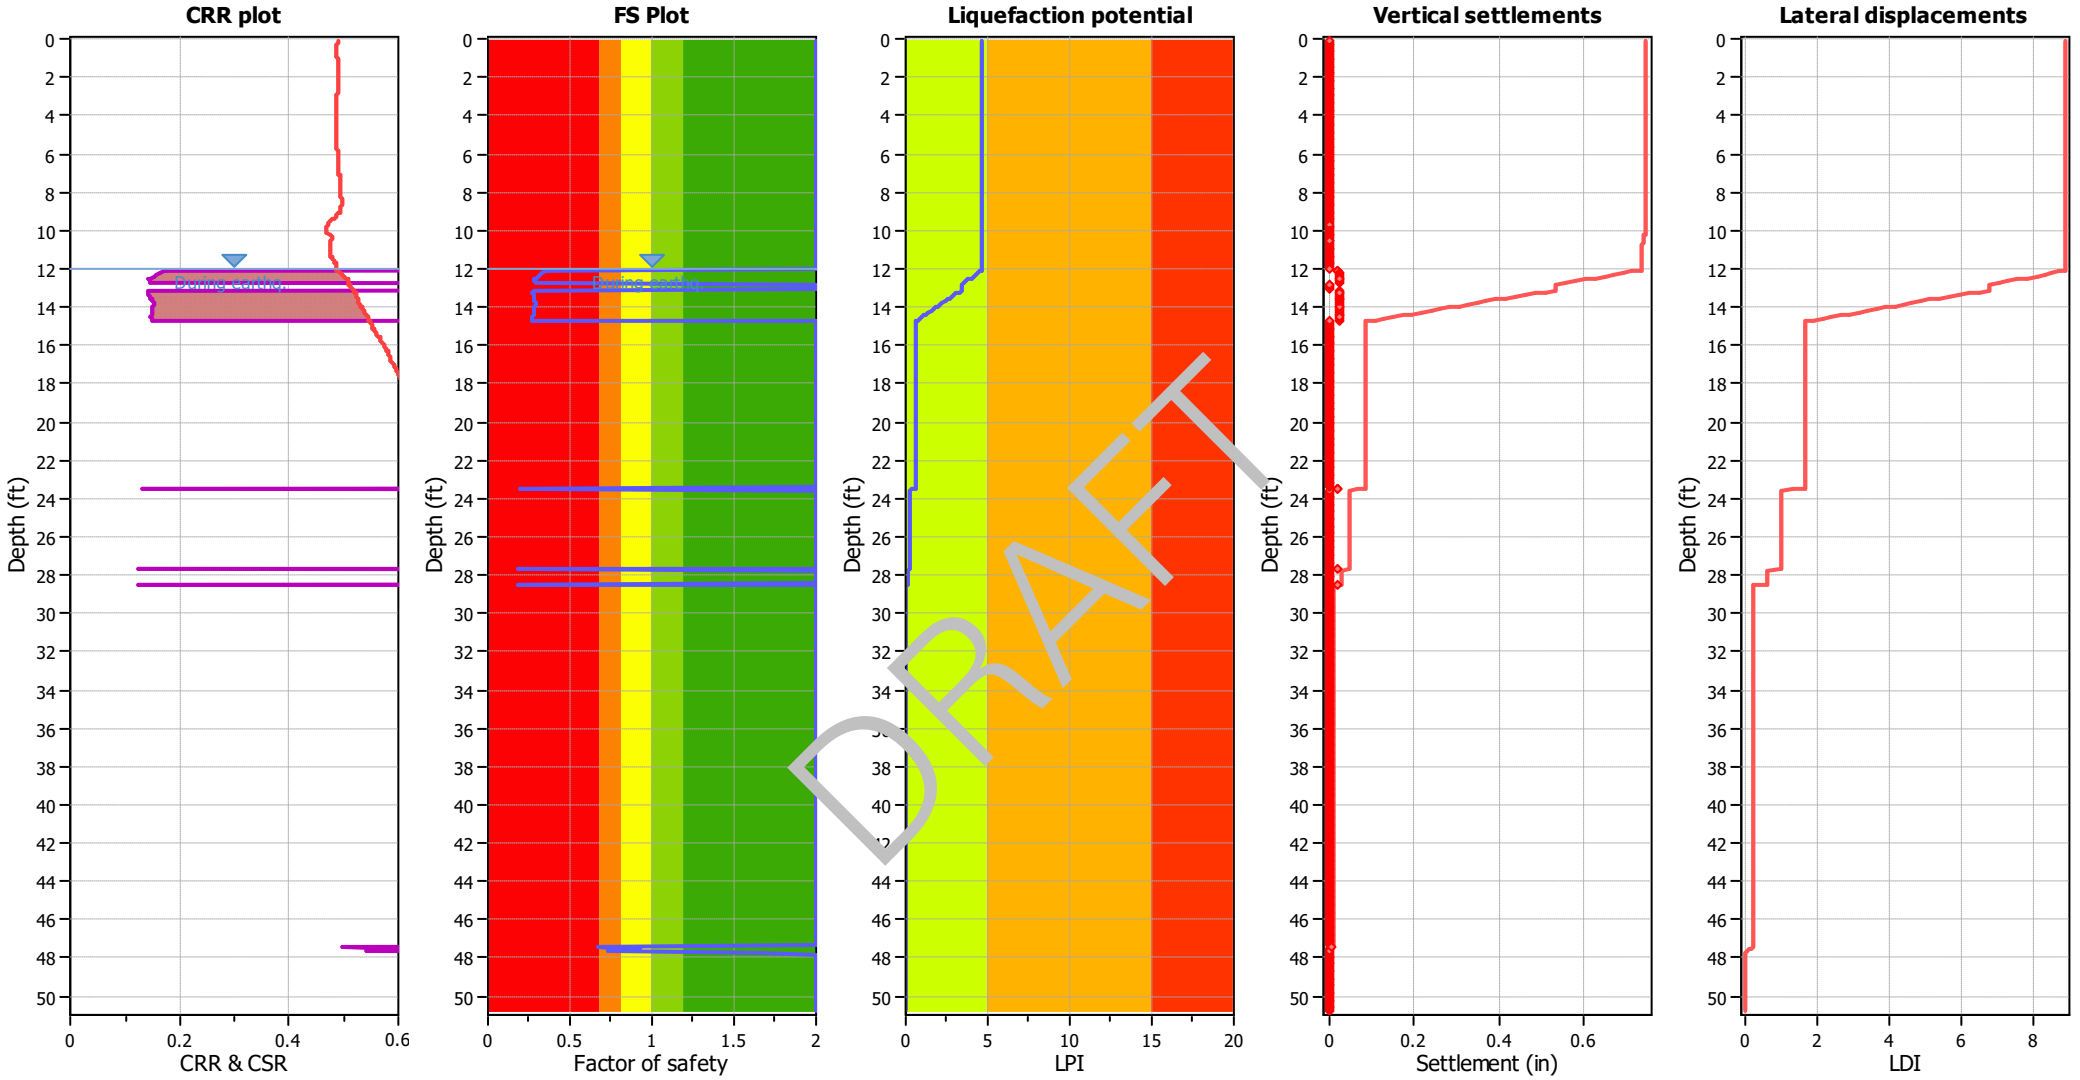






Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

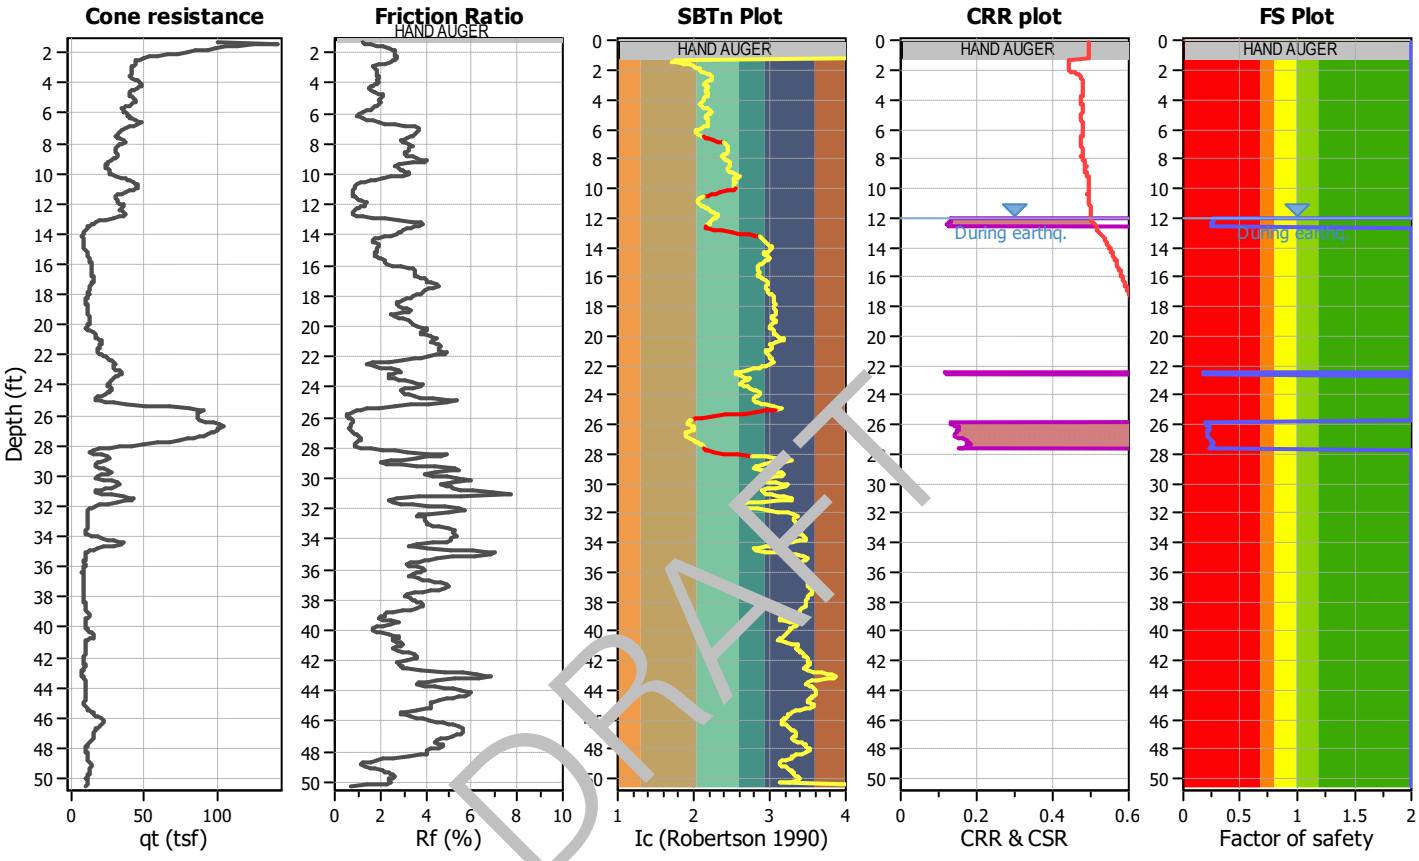
LIQUEFACTION ANALYSIS REPORT

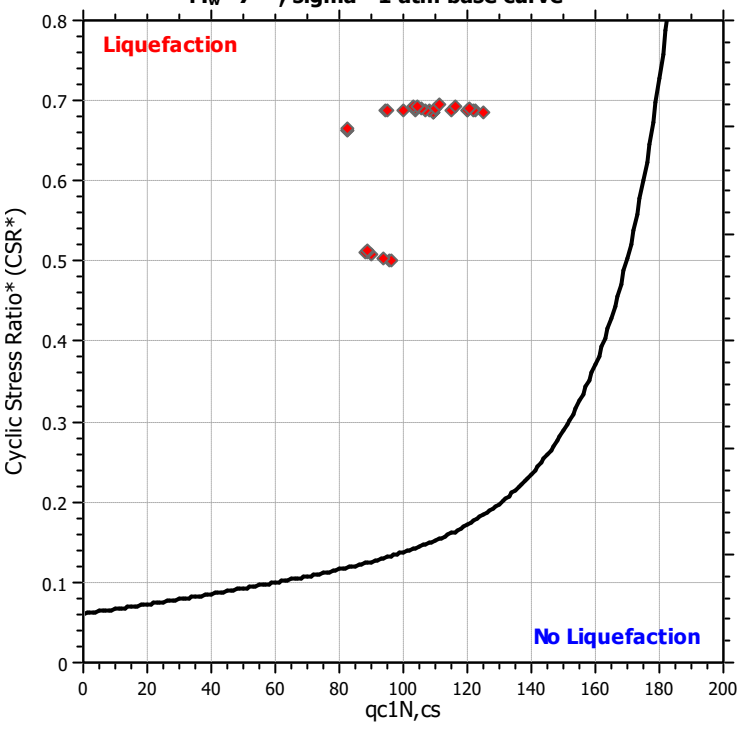
Project title : **Location :**

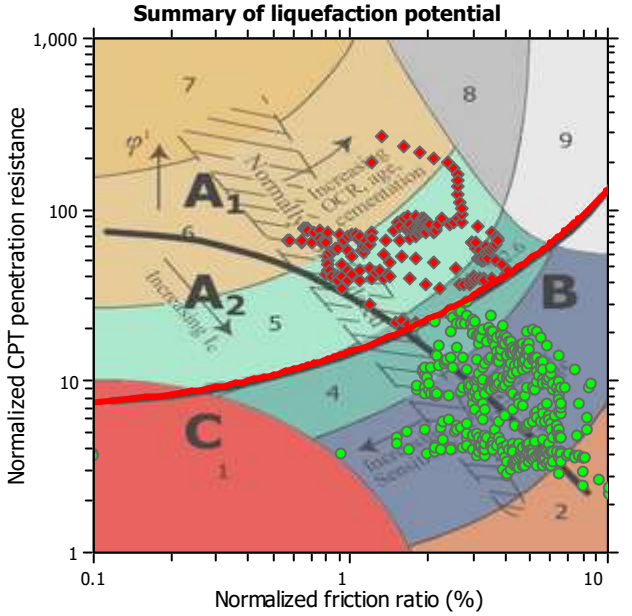
CPT file : CPT-28

Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		

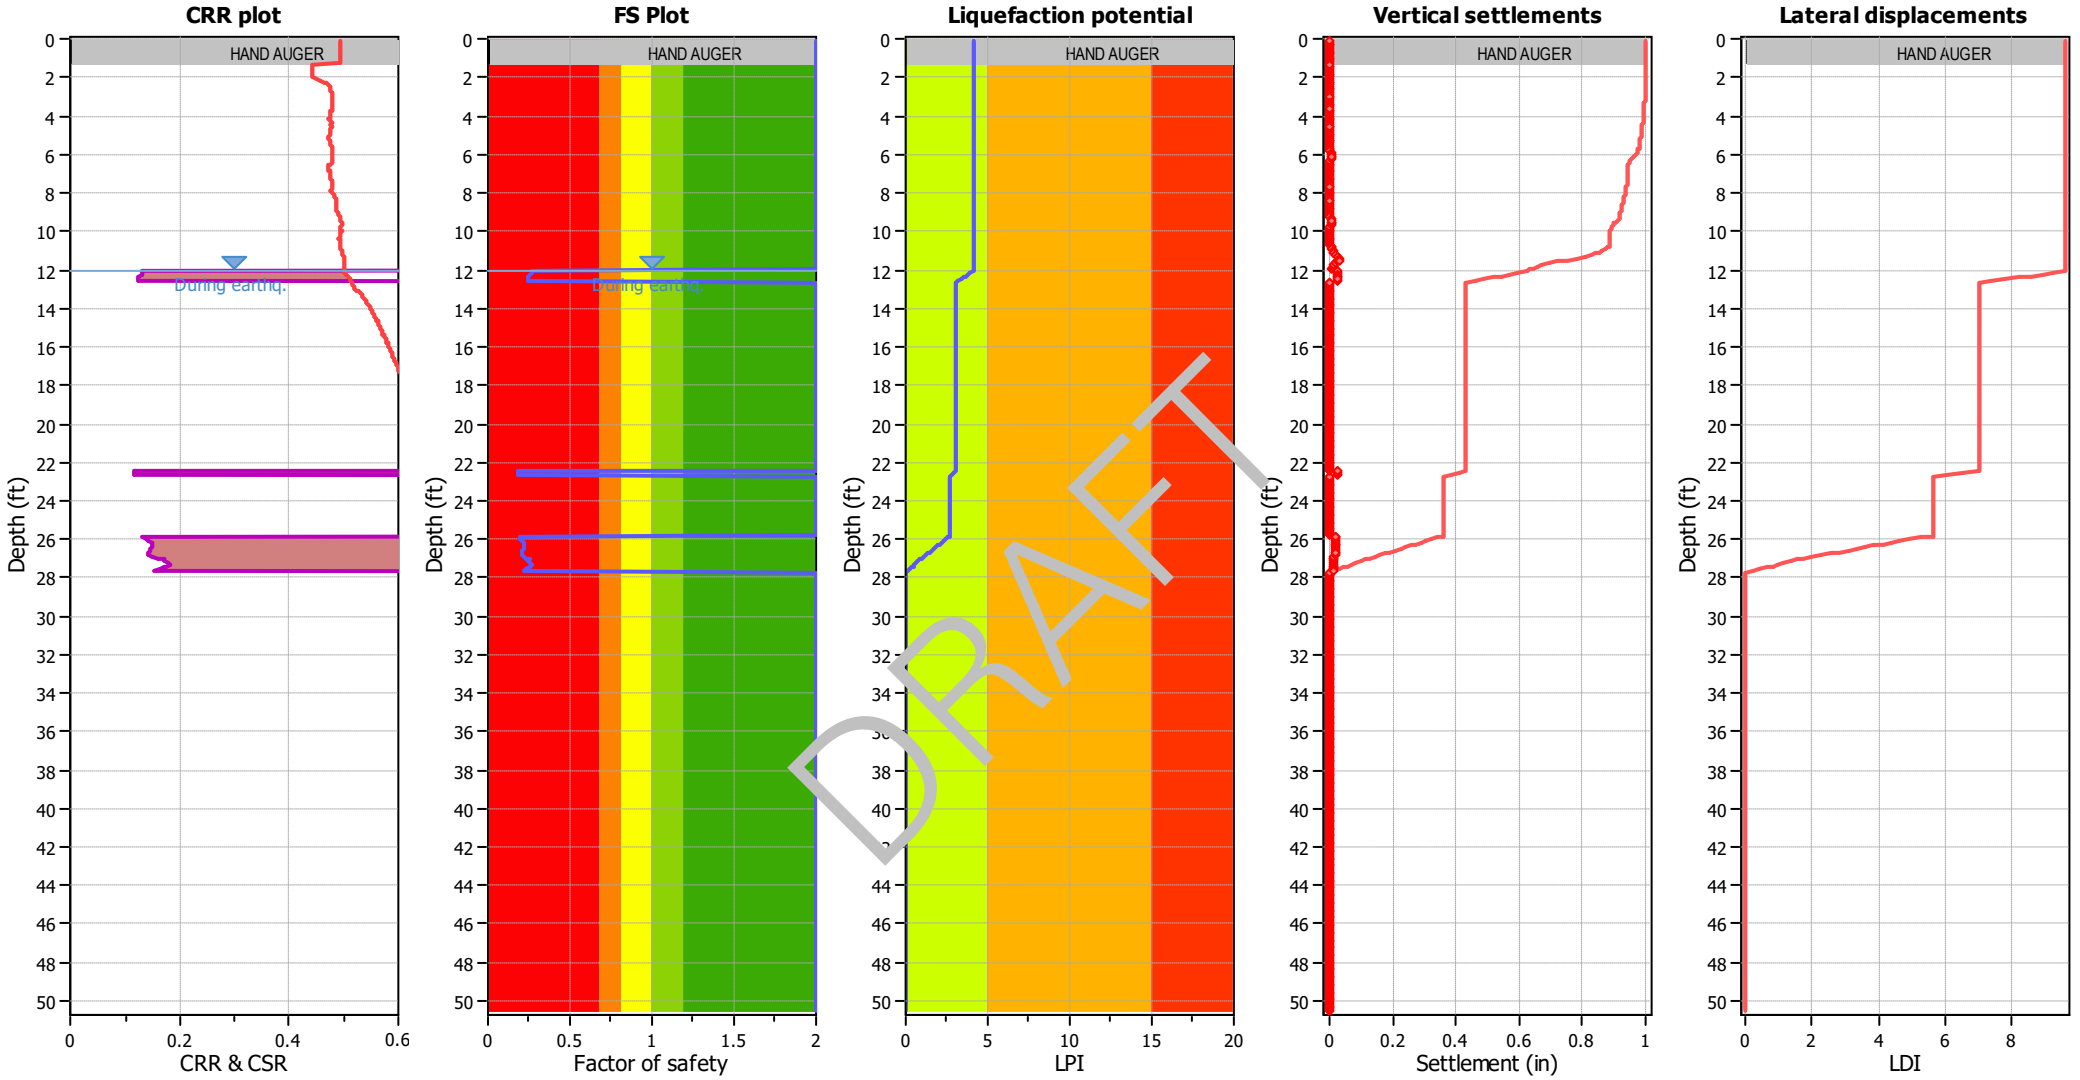






Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

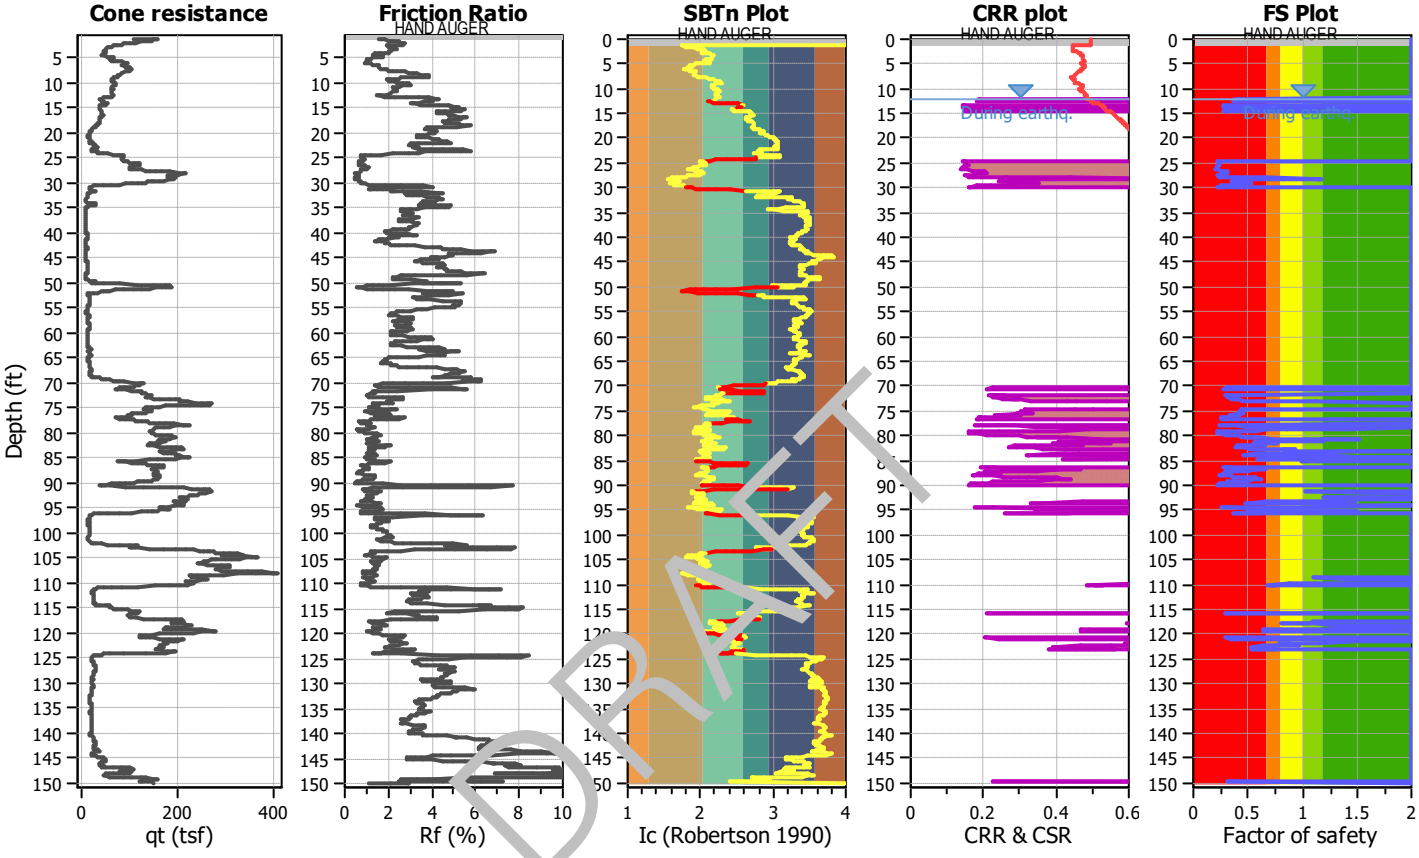
LIQUEFACTION ANALYSIS REPORT

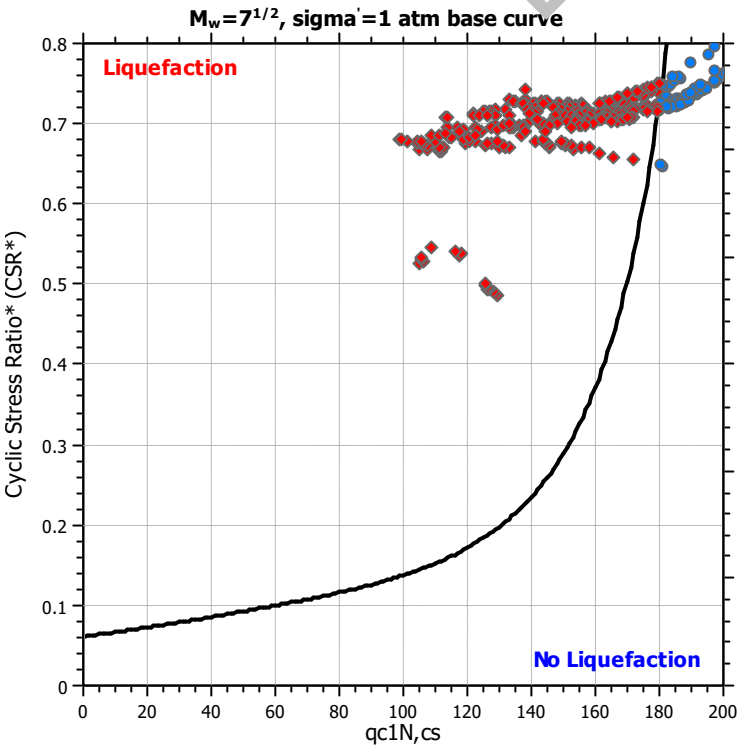
Project title : **Location :**

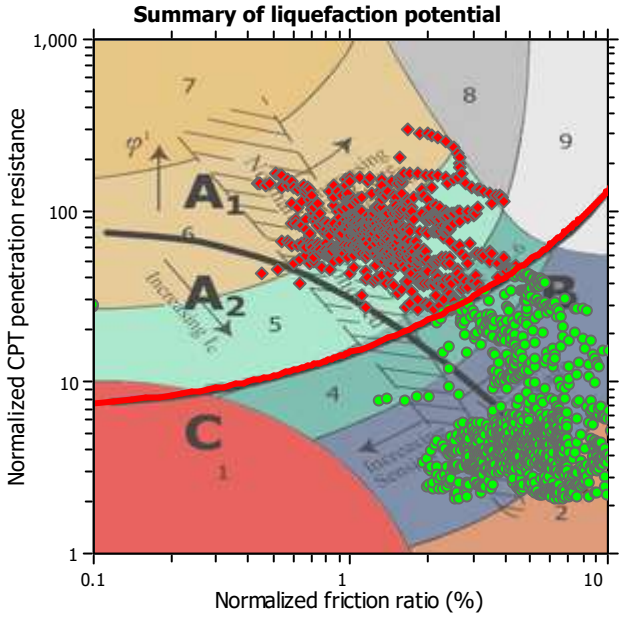
CPT file : CPT-29

Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		

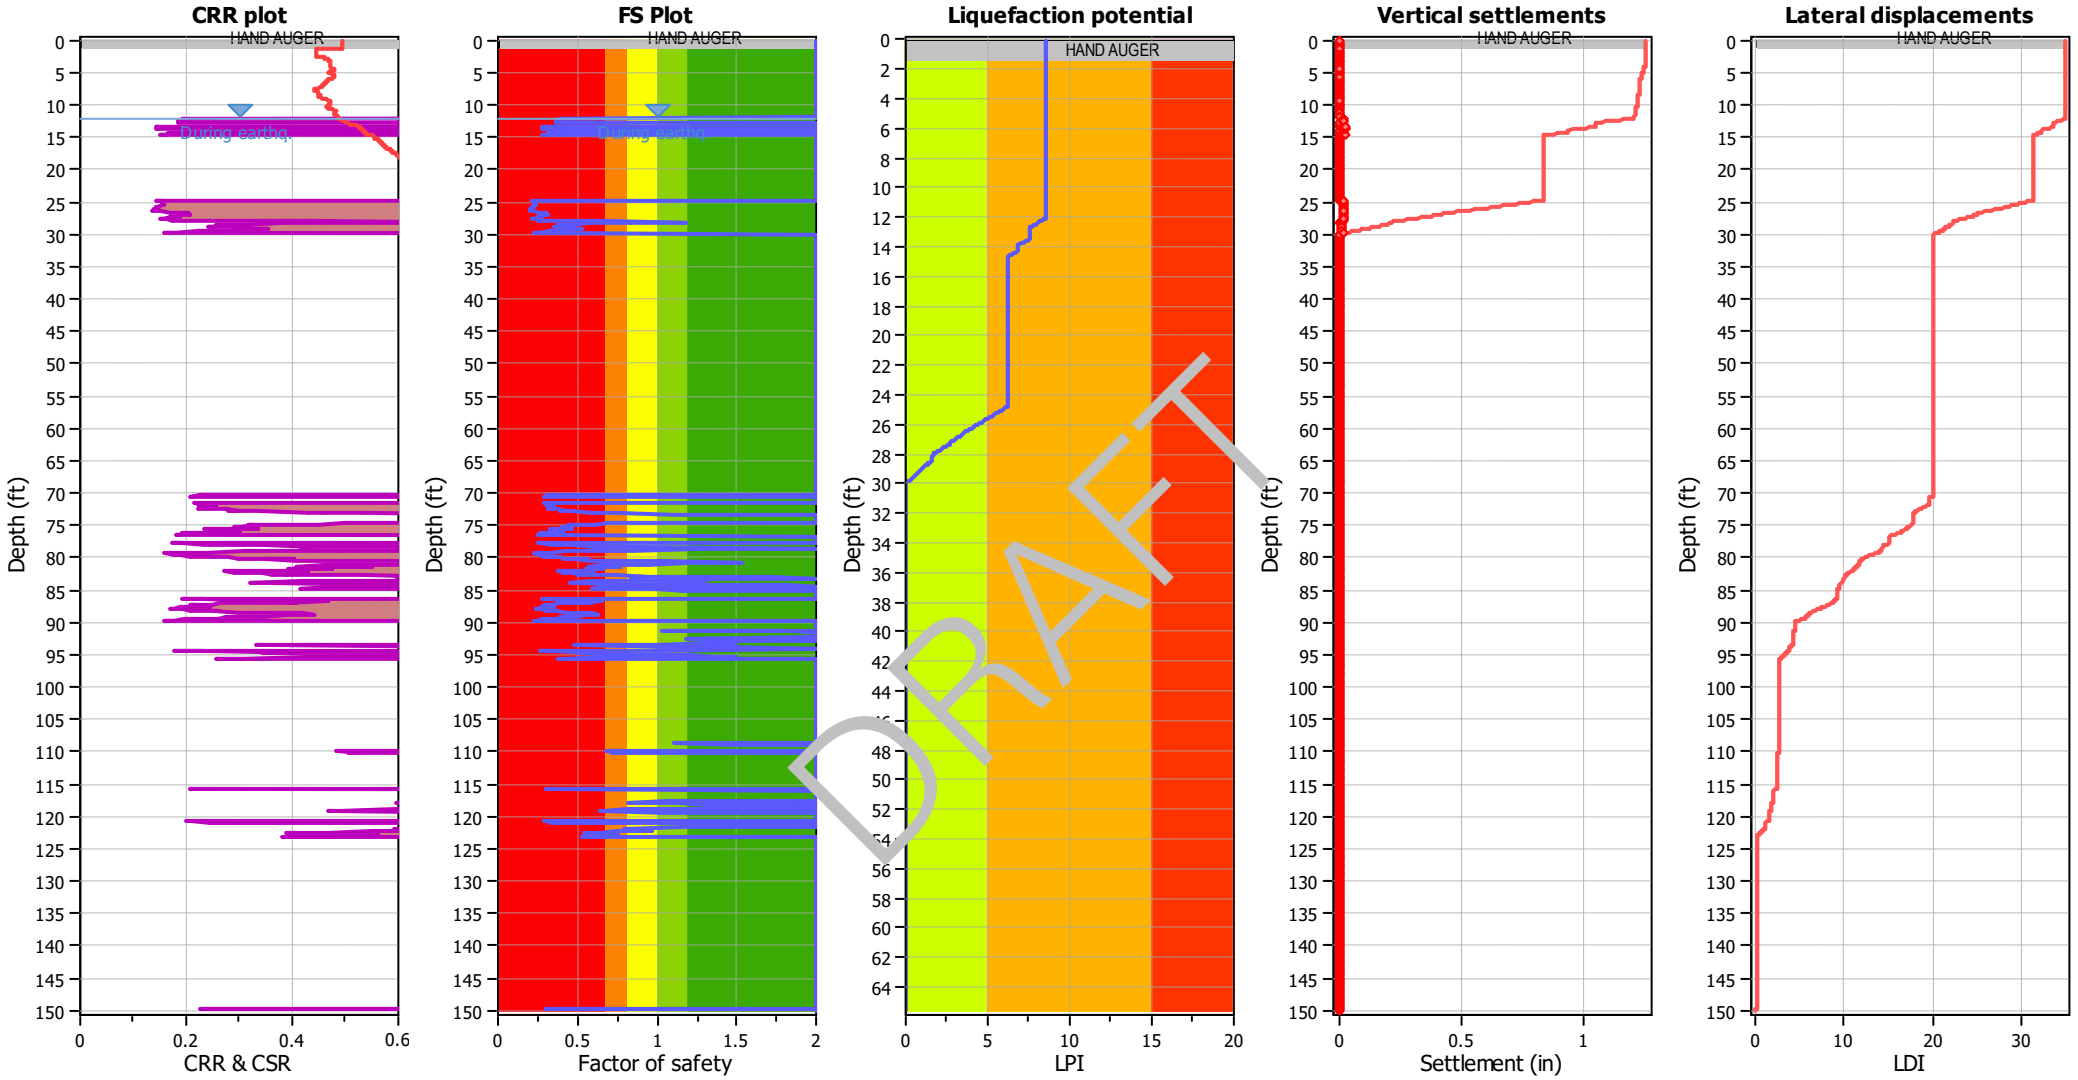






Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

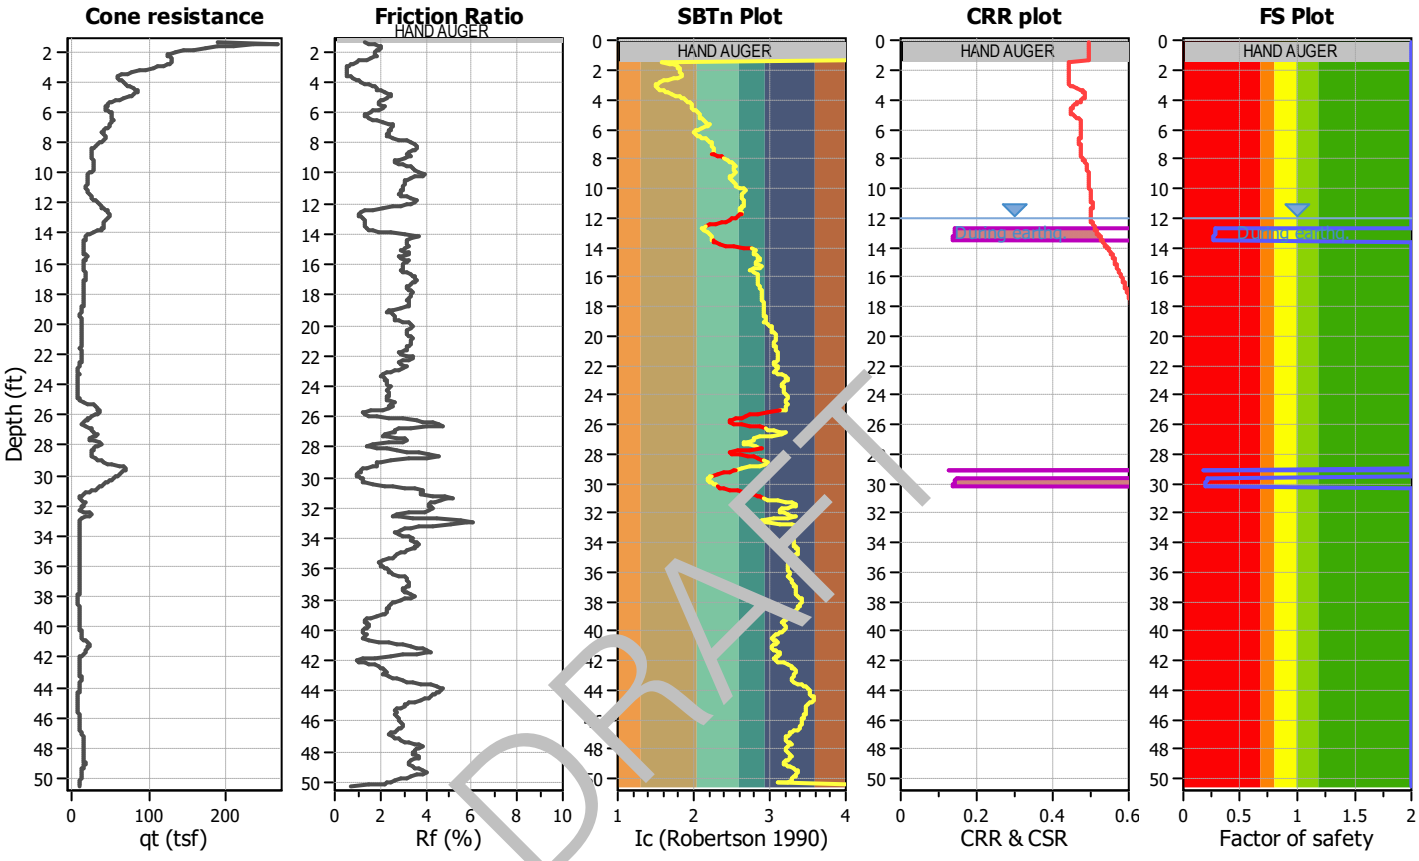
LIQUEFACTION ANALYSIS REPORT

Project title : **Location :**

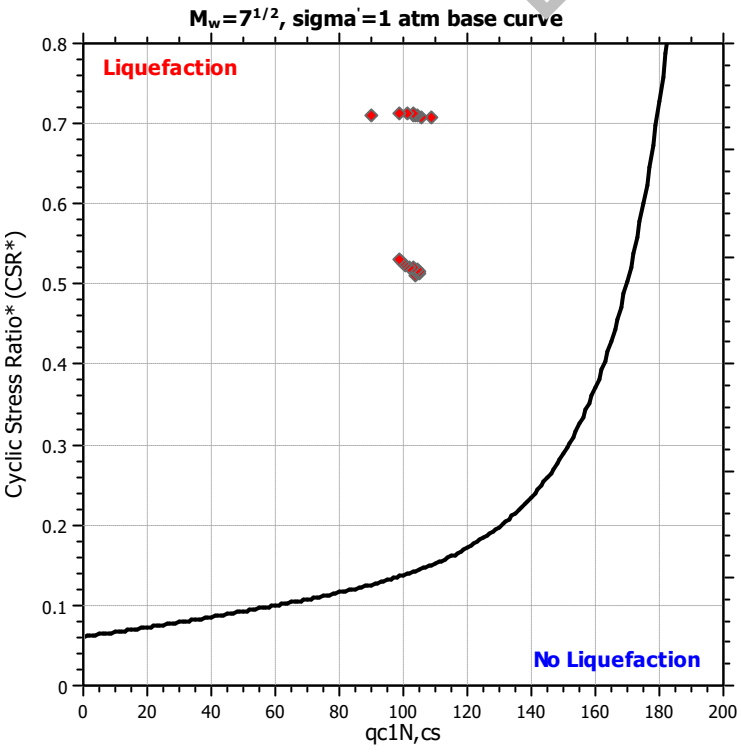
CPT file : CPT-30

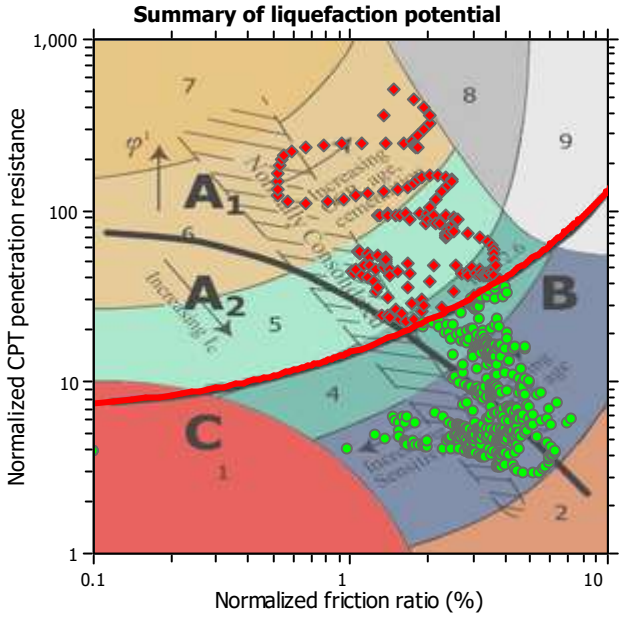
Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		



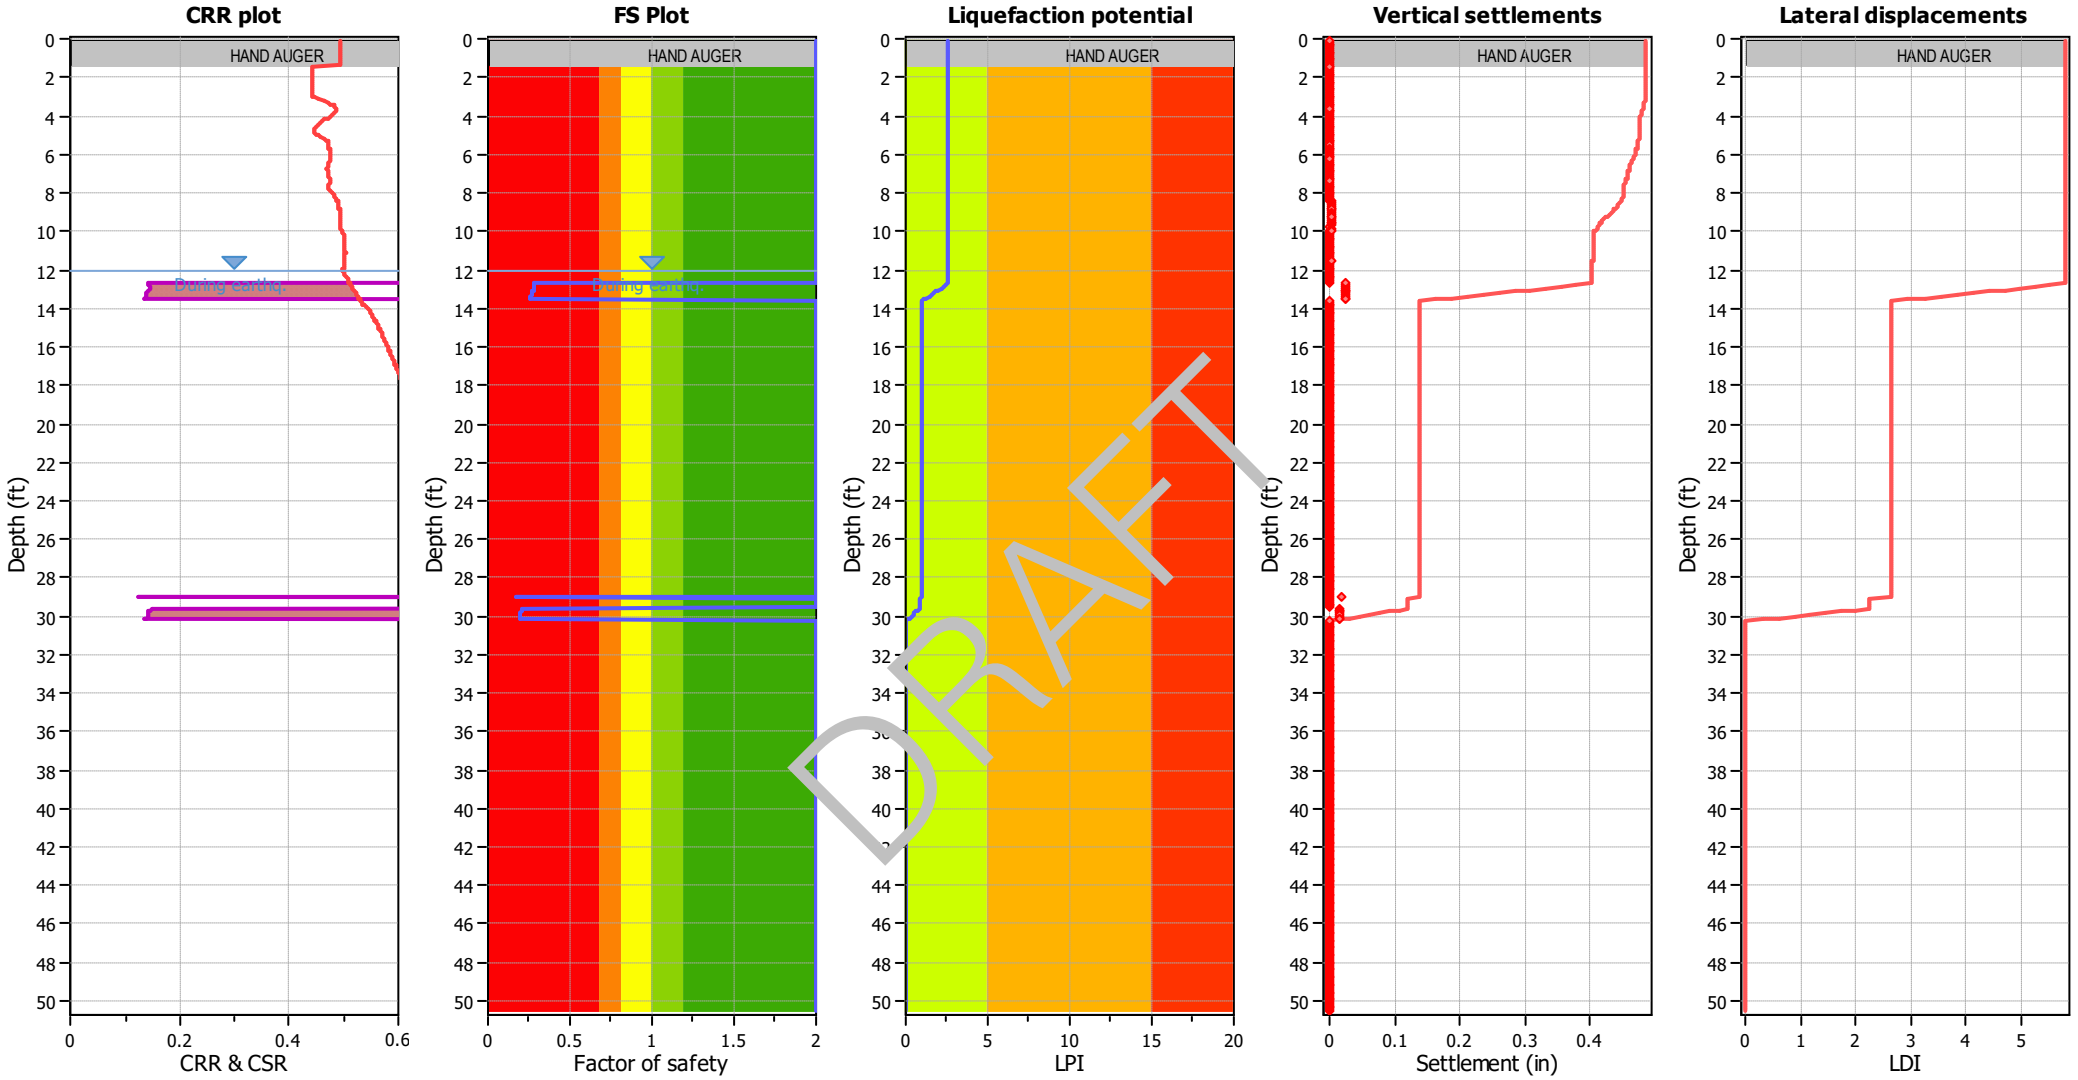
DRAFT





Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

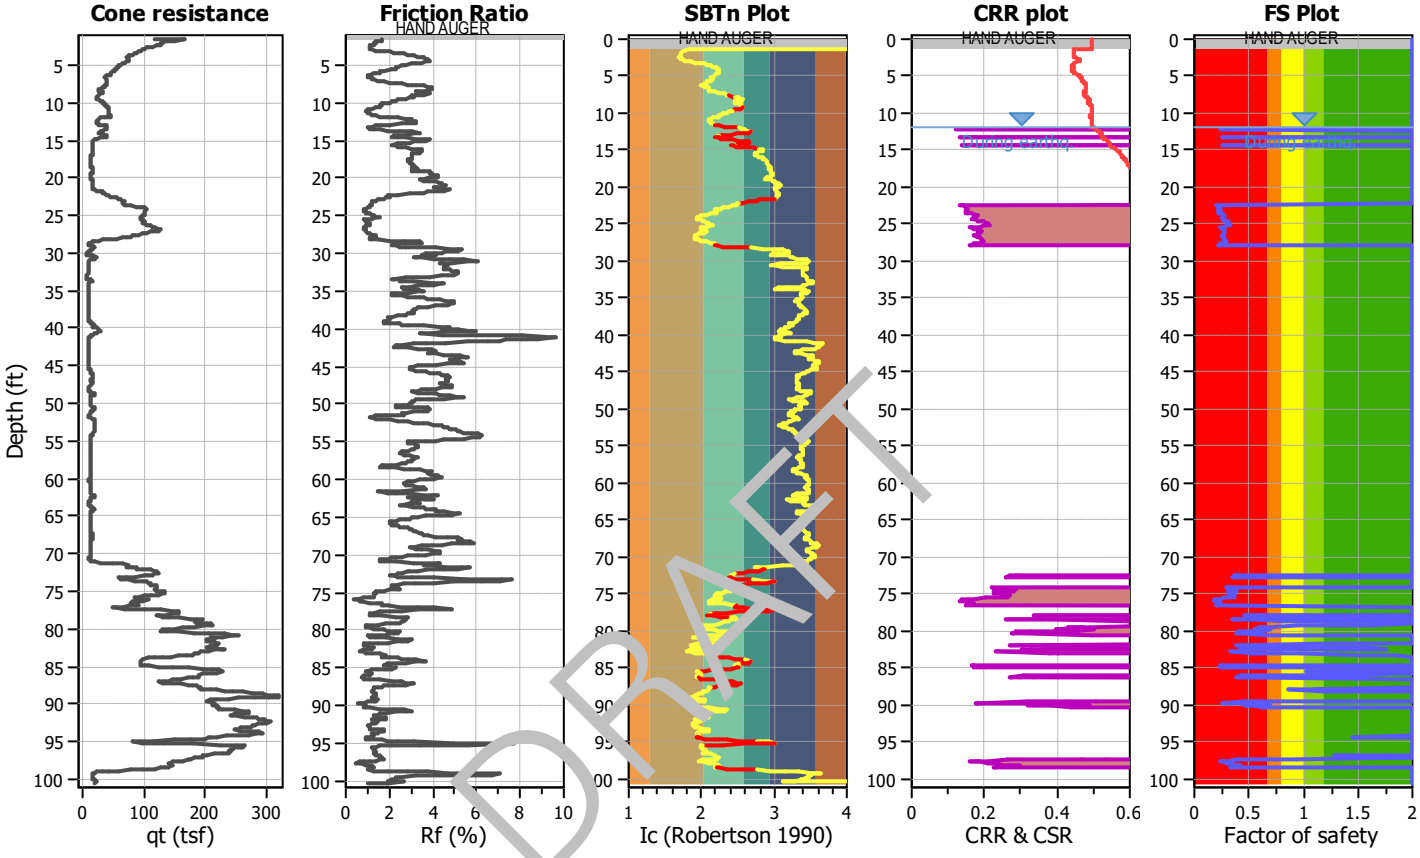
LIQUEFACTION ANALYSIS REPORT

Project title : **Location :**

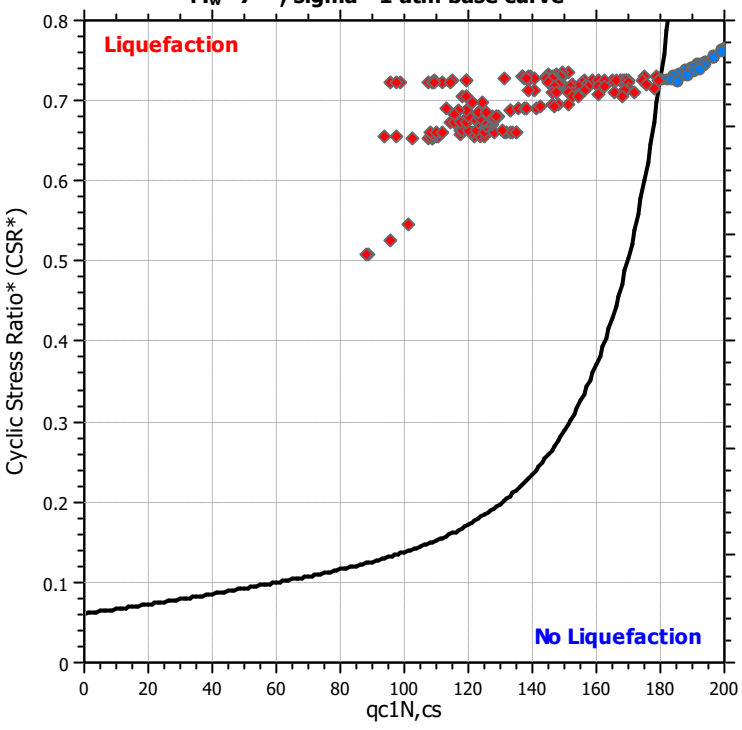
CPT file : CPT-31

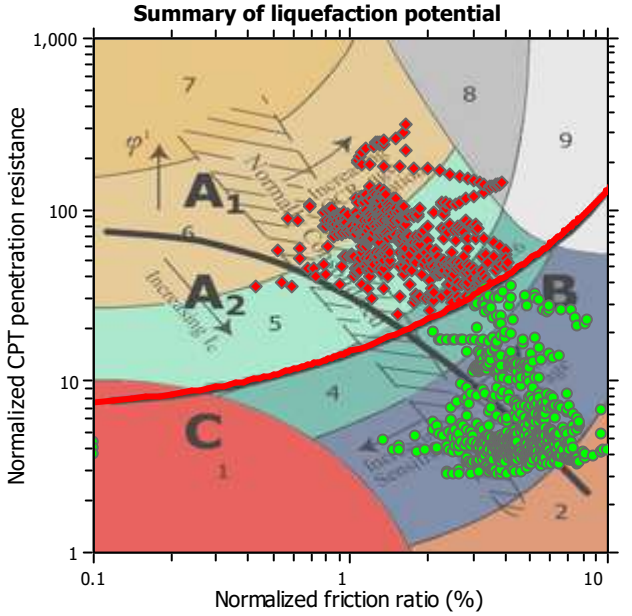
Input parameters and analysis data

Analysis method:	B&I (2014)	G.W.T. (in-situ):	25.00 ft	Use fill:	No	Clay like behavior applied:	Sands only
Fines correction method:	B&I (2014)	G.W.T. (earthq.):	12.00 ft	Fill height:	N/A	Limit depth applied:	No
Points to test:	Based on Ic value	Average results interval:	3	Fill weight:	N/A	Limit depth:	N/A
Earthquake magnitude M_w:	7.20	Ic cut-off value:	2.60	Trans. detect. applied:	Yes	MSF method:	Method
Peak ground acceleration:	0.65	Unit weight calculation:	Based on SBT	K_σ applied:	Yes		



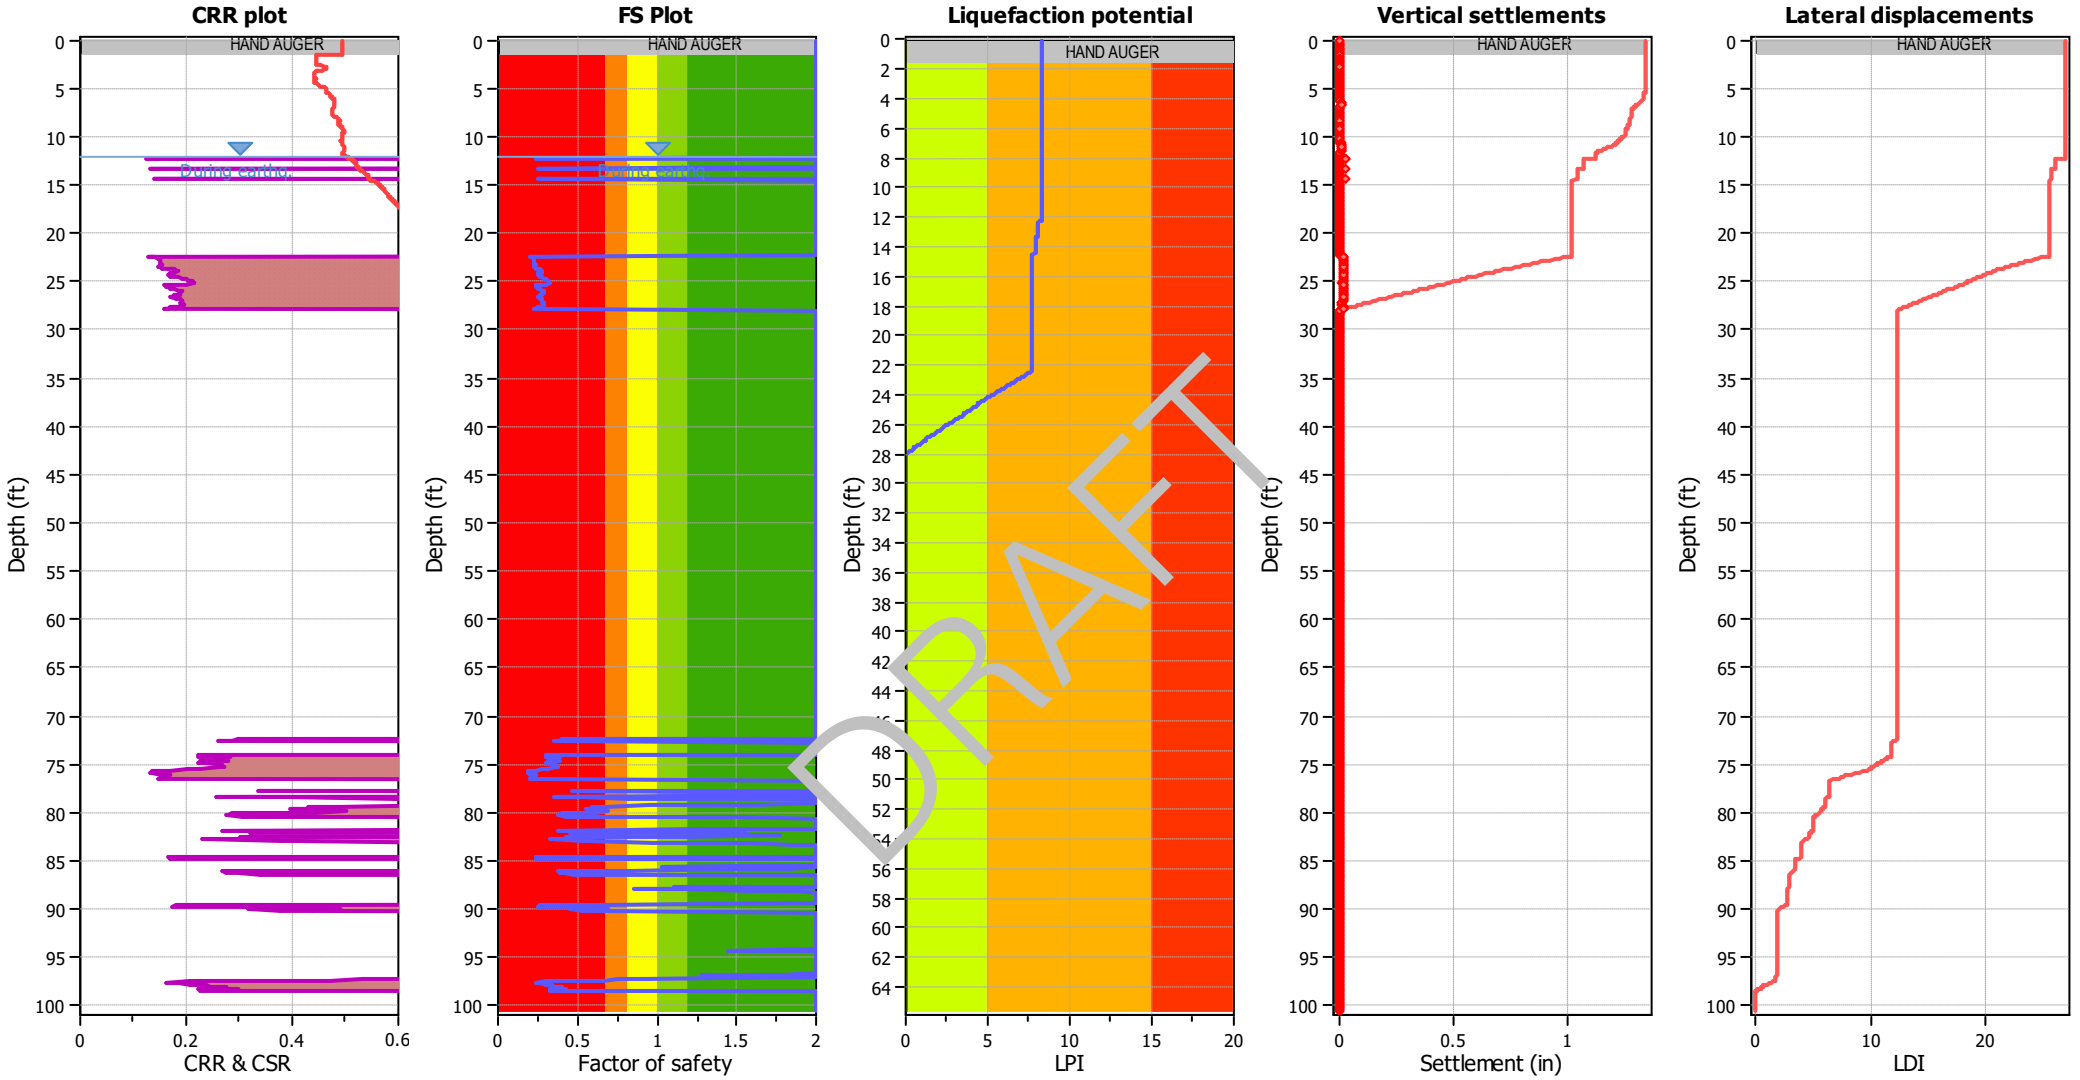
DRAFT





Zone A_1: Cyclic liquefaction likely depending on size and duration of cyclic loading
Zone A_2: Cyclic liquefaction and strength loss likely depending on loading and ground geometry
Zone B: Liquefaction and post-earthquake strength loss unlikely, check cyclic softening
Zone C: Cyclic liquefaction and strength loss possible depending on soil plasticity, brittleness/sensitivity, strain to peak undrained strength and ground geometry

Liquefaction analysis overall plots



Input parameters and analysis data

Analysis method:	B&I (2014)	Depth to GWT (erthq.):	12.00 ft	Fill weight:	N/A
Fines correction method:	B&I (2014)	Average results interval:	3	Transition detect. applied:	Yes
Points to test:	Based on Ic value	Ic cut-off value:	2.60	K_σ applied:	Yes
Earthquake magnitude M_w:	7.20	Unit weight calculation:	Based on SBT	Clay like behavior applied:	Sands only
Peak ground acceleration:	0.65	Use fill:	No	Limit depth applied:	No
Depth to water table (insitu):	25.00 ft	Fill height:	N/A	Limit depth:	N/A

F.S. color scheme

- Almost certain it will liquefy
- Very likely to liquefy
- Liquefaction and no liq. are equally likely
- Unlike to liquefy
- Almost certain it will not liquefy

LPI color scheme

- Very high risk
- High risk
- Low risk

APPENDIX G

SITE-SPECIFIC RESPONSE SPECTRA

DRAFT

APPENDIX G

SITE-SPECIFIC RESPONSE SPECTRA

This appendix presents the details of our estimation of the level of ground shaking at the site during future earthquakes. The development site coordinates are 37.2394° (latitude) and -121.8006° (longitude). To develop site-specific response spectra in accordance with 2022 California Building Code (CBC) criteria, and by reference ASCE 7-16, we performed probabilistic seismic hazard analysis (PSHA) and deterministic analysis to develop smooth, site-specific horizontal spectra for two levels of shaking, namely:

- Risk-Targeted Maximum Considered Earthquake (MCER), which corresponds to the lesser of the risk-targeted two percent probability of exceedance in 50 years (2,475-year return period) or 84th percentile of the controlling deterministic event both considering the maximum direction as described in ASCE 7-16, with appropriate lower limit checks.

- Design Earthquake (DE), which corresponds to 2/3 of the MCE_R.

G1.0 PROBABILISTIC SEISMIC HAZARD ANALYSIS

Because the location, recurrence interval, and magnitude of future earthquakes are uncertain, we performed a PSHA, which systematically accounts for these uncertainties. The results of a PSHA define a uniform hazard for a site in terms of a probability that a particular level of shaking will be exceeded during the given life of the structure.

To perform a PSHA, information regarding the seismicity, location, and geometry of each source, along with empirical relationships that describe the rate of attenuation of strong ground motion with increasing distance from the source, are needed. The assumptions necessary to perform the PSHA are that:

- the geology and seismic tectonic history of the region are sufficiently known, such that the rate of occurrence of earthquakes can be modeled by historic or geologic data

- the level of ground motion at a particular site can be expressed by an attenuation relationship that is primarily dependent upon earthquake magnitude and distance from the source of the earthquake

- the earthquake occurrence can be modeled as a Poisson process with a constant mean occurrence rate.

As part of the development of the site-specific spectra, we performed a PSHA to develop a site-specific response spectrum for 2 percent probability of exceedance in 50 years. The ground surface spectrum was developed using the OpenSHA Hazard Spectrum Application 1.5.2. The approach used in PSHA is based on the probabilistic seismic hazard model developed by Cornell (1968) and McGuire (1976). Our analysis modeled the faults in the Bay Area as linear sources, and earthquake activities were assigned to the faults based on historical and geologic

DRAFT

data. The levels of shaking were estimated using ground motion models (GMMs) that are primarily dependent upon the magnitude of the earthquake and the distance from the site to the fault, as well as the average shear wave velocity of the upper 30 meters, V_{S30}.

G1.1 Probabilistic Model

In probabilistic models, the occurrence of earthquake epicenters on a given fault is assumed to be uniformly distributed along the fault. This model considers ground motions arising from the portion of the fault rupture closest to the site rather than from the epicenter. Fault rupture lengths were modeled using fault rupture length-magnitude relationships given by Wells and Coppersmith (1994).

The probability of exceedance, $P_e(Z)$, at a given ground-motion, Z, at the site within a specified time period, T, is given as:

$$P_e(Z) = 1 - e^{-V(z)T}$$

where V(z) is the mean annual rate of exceedance of ground motion level Z. V(z) can be calculated using the total-probability theorem.

$$V(z) = \sum_i v_i \iint P[Z > z \mid m,r] f_{M_i}(m) f_{R_i|M_i}(r;m)\,dr\,dm$$

where:

v_i = the annual rate of earthquakes with magnitudes greater than a threshold M_{oi} in source i

P [Z > z | m,r] = probability that an earthquake of magnitude m at distance r produces ground motion amplitude Z higher than z

f_{Mi} (m) and $f_{Ri|Mi}$ (r;m) = probability density functions for magnitude and distance

Z represents peak ground acceleration, or spectral acceleration values for a given frequency of vibration. The peak accelerations are assumed to be log-normally distributed about the mean with a standard error that is dependent upon the magnitude and attenuation relationship used.

G1.2 Source Modeling and Characterization

The segmentation of faults, maximum magnitudes, and recurrence rates were modeled using the data presented in the Uniform California Earthquake Rupture Forecast Version 3 (UCERF3) as detailed in the United States Geological Survey Open File Report 2013-1165. These and other faults of the region are shown on Figure 9. Table G-1 presents the distance and direction from the site to the fault, mean moment magnitude, mean slip rate, and fault length for individual fault segments in UCERF3 source model. The mean moment magnitude presented in Table G-1 was computed assuming full rupture of the segment using Hanks and Bakun (2008) relationship.

Note:
1. The table above is a summary and does not include all the fault segmentation, alternate traces and low activity faults included in the UCERF3 model.

G1.3 Ground Motion Models

Based on the subsurface conditions, the site is classified as a stiff soil profile, Site Class D. Using the subsurface information including shear wave velocity measurements performed at the site, we estimate the shear wave velocity of the upper 100 feet (30 meters), V_{S30}, is approximately 840 feet per second (255 meters per second). Furthermore, NGAW-2 database indicates that depths Z_1 and $Z_{2.5}$ at close by recording stations are about 300 meters and 0.85 kilometers, respectively. These values were used in the development of site-specific spectra.

The Pacific Earthquake Engineering Research Center (PEER) embarked on the NGA-West 2 project to update the previously developed NGA GMMs. The updated models were published in 2014. We used the GMMs developed by Abrahamson et al. (2014), Boore et al. (2014), Campbell and Bozorgnia (2014) and Chiou and Youngs (2014). These GMMs include the average shear wave velocity in the upper 100 feet. Furthermore, these models were developed using the same earthquake database, therefore, the average of the models (using equal weights for each attenuation relationship) is appropriate and was used to develop the recommended spectra.

DRAFT

The NGA-West 2 database includes the most up-to-date recorded and processed data. The NGA-West 2 models were developed for the "average" (Rot_{D50}) horizontal component of spectral acceleration.

G1.4 Maximum Direction

ASCE 7-16 specifies the development of MCE_R site-specific response spectra in the maximum direction. Shahi and Baker (2014) provide scaling factors that modify the geometric mean spectra to provide spectral values for the maximum response (maximum direction). Therefore, we used the scaling factors presented on Table 1 of Shahi and Baker (2014) for ratios of $Sa_{RotD100}/Sa_{GMRotD50}$ to modify the mean PSHA results.

G1.5 Near-Source Effects

The site is in the near-field region (i.e., distances less than about 15 kilometers from a fault) and therefore may experience near-field directivity effects during an earthquake on a nearby fault. It has been recognized that ground motions recorded in the near-field regions show rupture directivity and near-source effects such as velocity and displacements pulses (sometimes referred to as "fling"). In general, such effects tend to increase the long period portion of the acceleration response spectrum when compared to the average spectrum. These effects have been demonstrated by Golesorkhi and Gouchon (2002), Somerville et al. (1995 and 1997), and Singh (1985). Somerville et al. (1997) and Abrahamson (2000) quantified near-source directivity effects and provided scaling factors for modifying the average spectra to capture these effects. Bayless et al. (2020) and Watson-Lamprey (2018) provide a more recent and updated methodology to incorporate these effects in the development of response spectra with consideration of near-source effects. Directivity effects were quantified by randomizing the hypocenter using a uniform distribution for each rupture location and magnitude using the Bayless et al. (2020) and Watson-Lamprey (2018) approaches. The average directivity spectrum was developed using the average quantification of both approaches.

G2.0 PSHA RESULTS

Figure G-1 presents the mean results of the PSHA for the 2 percent probability of exceedance in 50 years hazard level (2,475-year return period) using the four GMMs discussed above as well as the mean of these models and the mean in the maximum direction including average directivity.

As previously discussed, we used the average of the Bayless et al. (2020) and Watson-Lamprey (2018) relationships to account for the average directivity at the site. Figure G-2 presents average directivity quantifications using the two relationships as well as the average of both relationships.

Figure G-3 presents the deaggregation plots of the PSHA results for the 2 percent probability of exceedance in 50 years hazard level. We examined the deaggregation plots for shorter periods because we anticipate the periods of interest for the six-story hospital structure to be less than four seconds. Based on the deaggregation results for a 2 percent probability of exceedance in

DRAFT

50 years, the mean Moment Magnitude and mean distance are approximately 7.2 and 13 kilometers from the site, respectively. From the examination of these results, it can be seen that the Hayward-Rodgers Creek fault dominates the hazard at the project site at shorter periods. We conclude a Moment Magnitude 7.2 occurring on the Hayward-Rodgers Creek fault should be used to perform the deterministic analysis. Because a Moment Magnitude 7.2 occurring on the Hayward-Rodgers Creek fault would likely rupture the entire length of the fault, we selected the closest distance from the site to the fault, which is about 7 kilometers, for the deterministic analysis.

G3.0 DETERMINISTIC ANALYSIS

We performed a deterministic analysis to develop the MCE_R spectrum at the site. In a deterministic analysis, a given magnitude earthquake occurring at a certain distance from the source is considered as input into an appropriate GMM. The same GMMs, weighting factors, maximum direction factors and near-source effects as discussed in Sections G1.3, G1.4, and G1.5 were used in our deterministic analysis.

Figure G-4 presents the 84th percentile deterministic results for a Moment Magnitude (M_W) 7.2 event occurring on the Hayward-Rodgers Creek fault about 7 km from the site using the same four GMMs as well as the average of these models and the average in the maximum direction including average directivity.

To confirm the Hayward-Rodgers Creek fault dominates the hazard up to a period of four seconds, we developed deterministic spectra for the earthquake scenario of a Moment Magnitude of 8.1 on the San Andreas fault at a distance of 17 kilometers from the site. Figure G-5 presents the 84th percentile deterministic results for the San Andreas scenario. The average of the four GMMs for the geometric mean and the average in the maximum direction are also presented on this figure.

Figure G-6 presents the average of the 84th percentile deterministic results in the maximum direction for both scenarios as well as the recommended envelope of both scenarios. We conclude that the Hayward-Rodgers Creek scenario governs at all periods up to four seconds and should be used as the deterministic basis for the development of the MCE_R.

G4.0 RECOMMENDED SPECTRA

The MCE_R as defined in ASCE 7-16 is the lesser of the maximum direction PSHA spectrum having a two percent probability of exceedance in 50 years (2,475-year return period) or the maximum direction 84th percentile deterministic spectrum of the governing earthquake scenario and the DE spectrum is defined as 2/3 times the MCE_R spectrum. Furthermore, the MCE_R spectrum is defined as a risk-targeted response spectrum, which corresponds to a targeted collapse probability of one percent in 50 years. The USGS Risk-Targeted Ground Motion calculator was used to determine the risk coefficients for each period of interest for the probabilistic spectrum. We used these risk coefficients to develop the risk-targeted PSHA spectrum.

DRAFT

Furthermore, we followed the procedures outlined in Chapter 21 of ASCE 7-16 and Supplement No. 1 to develop the site-specific spectra for MCE_R and DE. Chapter 21 of ASCE 7-16 requires the following checks:

- the largest spectral response acceleration of the resulting 84th percentile deterministic ground motion response spectra shall not be less than $1.5 \times F_a$ where F_a is equal to 1.0.

- the DE spectrum shall not fall below 80 percent of Sa determined in accordance with Section 11.4.6, where F_a is determined using Table 11.4-1 and F_v is taken as 2.5 for $S_1 \geq 0.2$ (Section 21.3 of Chapter 21 ASCE 7-16).

- The site-specific MCE_R spectral response acceleration at any period shall not be taken as less than 150 percent of the site-specific design response spectrum determined in accordance with Section 21.3.

Table G-2 presents digitized values of the site-specific spectra for the mean results of the PSHA 2,475-year return period hazard level and the average results of the 84th percentile deterministic, including average directivity. The maximum direction factors and risk coefficients along with the digitized values of the site-specific spectra for the risk-targeted PSHA 2,475-year return period in the maximum direction and the 84th percentile deterministic in the maximum direction, including average directivity, are presented in Table G-2. Table G-3 presents digitized values of the site-specific spectra for the risk-targeted PSHA 2,475-year return period in the maximum direction and the 84th percentile deterministic in the maximum direction, including average directivity. The largest spectral response acceleration of the 84th percentile deterministic response spectrum in the maximum direction is 1.935g and is greater than $1.5 \times F_a$ (where F_a = 1.0 for Site Class D); therefore, no further scaling of the 84th percentile deterministic spectra was needed.

Figure G-7 and Table G-3 present a comparison of the site-specific spectra for the risk-targeted 2,475-year return period PSHA and the 84th percentile deterministic spectra, both in the maximum direction including average directivity. In this case, the 84th percentile deterministic spectrum is less than the risk-targeted PSHA spectrum for a 2 percent probability of exceedance in 50 years (2,475-year return period) for periods less than or equal to 4 seconds, therefore, the basis for the development of the MCE_R spectrum should be the deterministic spectrum for periods up to 4 seconds. The DE spectrum is defined as 2/3 times the MCE_R; however, the DE spectrum should not be less than 80 percent of the DE code spectrum as determined using F_a equal to 1.0 and F_v equal to 2.5 (per Section 21.3 of ASCE 7-16). As shown on Figure G-7 and Table G-3, the DE spectrum is greater than or equal to 80 percent of the of the DE code spectrum for periods up to approximately 4 seconds.

4.00	0.566	0.413	0.413	0.276	0.212	0.276	0.413

The recommended MCE_R and DE spectra are presented in Table G-4 and on Figure G-8.

DRAFT

TABLE G-4
Recommended MCE_R and DE Spectra
Sa (g) for 5 percent damping

Period (seconds)	MCE_R	DE
0.01	0.744	0.496
0.10	1.129	0.753
0.20	1.579	1.053
0.30	1.852	1.235
0.40	1.935	1.290
0.50	1.925	1.284
0.75	1.677	1.118
1.00	1.452	0.968
1.50	1.083	0.722
2.00	0.848	0.565
3.00	0.583	0.389
4.00	0.413	0.276

Because site-specific procedure was used to determine the recommended response spectra, the corresponding values of S_{MS}, S_{M1}, S_{DS} and S_{D1} per Section 21.4 of ASCE 7-16 should be used as shown in Table G-5.

TABLE G-5
Design Spectral Acceleration Value

Parameter	Spectral Acceleration Value (g's)
S_{MS}[2]	1.741
S_{M1}[3]	1.750
S_{DS}[2]	1.161
S_{D1}[3]	1.167

[2] S_{DS} is based on the site-specific response spectra and is based on 90 percent of the maximum spectral acceleration within the period range of 0.2 to 5 seconds; it is governed by 90 percent of the spectral acceleration at a period of 0.4 seconds. S_{MS} is 1.5 times the S_{DS}.

[3] S_{D1} is based on the site-specific response spectra and is the maximum of the product of period, T, and spectral acceleration, Sa, for periods from 1.0 to 5.0 seconds; it is governed by the product of the period and spectral acceleration at a period of 3.0 seconds. S_{M1} is 1.5 times the S_{D1}.

Greenhouse Gas Reduction Strategy Compliance Checklist

ESA

DEPARTMENT OF PLANNING, BUILDING AND CODE ENFORCEMENT

Purpose of the Compliance Checklist

In 2020, the City adopted a Greenhouse Gas Reduction Strategy (GHGRS) that outlines the actions the City will undertake to achieve its proportional share of State greenhouse gas (GHG) emission reductions for the interim target year 2030. The purpose of the Greenhouse Gas Reduction Strategy Compliance Checklist (Checklist) is to:

- Implement GHG reduction strategies from the 2030 GHGRS to new development projects.
- Provide a streamlined review process for proposed new development projects that are subject to discretionary review and trigger environmental review pursuant to the California Environmental Quality Act (CEQA).

The 2030 GHGRS presents the City's comprehensive path to reduce GHG emissions to achieve the 2030 reduction target, based on SB 32, BAAQMD, and OPR. Additionally, the 2030 GHGRS leverages other important City plans and policies; including the General Plan, Climate Smart San José, and the City Municipal Code in identifying reductions strategies that achieve the City's target. CEQA Guidelines Section 15183.5 allows for public agencies to analyze and mitigate GHG emissions as part of a larger plan for the reduction of greenhouse gases. Accordingly, the City of San José's 2030 GHGRS represents San José's qualified climate action plan in compliance with CEQA.

As described in the 2030 GHGRS, these GHG reductions will occur through a combination of City initiatives in various plans and policies and will provide reductions from both existing and new developments. This Compliance Checklist specifically applies to proposed discretionary projects that require environmental review pursuant to CEQA. Therefore, the Checklist is a critical implementation tool in the City's overall strategy to reduce GHG emissions. Implementation of applicable reduction actions in new development projects will help the City achieve incremental reductions toward its target. Per the 2030 GHGRS, the City will monitor strategy implementation and make updates, as necessary, to maintain an appropriate trajectory to the 2030 GHG target.

Pursuant to CEQA Guidelines Sections 15064(h)(3), 15130(d), and 15183(b), a project's incremental contribution to a cumulative GHG emissions effect may be determined not to be cumulatively considerable if it complies with the requirements of the GHGRS.

Instructions for Compliance Checklist

Applicants shall complete the following sections to demonstrate conformance with the City of San José 2030 Greenhouse Gas Reduction Strategy for the proposed project. All projects must complete Section A. General Plan Policy Conformance and Section B. Greenhouse Gas Reduction Strategies. Projects that propose alternative GHG mitigation measures must also complete Section C. Alternative Project Measures and Additional GHG Reductions.

A. General Plan Policy Compliance

Projects need to demonstrate consistency with the Envision San José 2040 General Plan's relevant policies for Land Use & Design, Transportation, Green Building, and Water Conservation, enumerated in Table A. All applicants shall complete the following steps.

1. Complete Table A, Item #1 to demonstrate the project's consistency with the General Plan Land Use and Circulation Diagram.

2. Complete Table A, Items #2 through #4 to demonstrate the project's consistency with General Plan policies[1] related to green building; pedestrian, bicycle & transit site design; and water conservation and urban forestry, as applicable. For each policy listed, mark the relevant yes/no check boxes to indicate project consistency, and provide a qualitative description of how the policy is implemented in the proposed project or why the policy is not applicable to the proposed project. Qualitative descriptions can be included in Table A or provided as separate attachments. This explanation will provide the basis for analysis in the CEQA document.

B. Greenhouse Gas Reduction Strategies

Table B identifies the GHGRS strategies and recommended consistency options. Projects need to demonstrate consistency with the GHGRS reduction strategies listed in Table B or document why the strategies are not applicable or are infeasible. The corresponding GHGRS strategies are indicated in the table to provide additional context, with the full text of the strategies preceding Table B.

Residential projects must complete Table B, Part 1 and 2; Non-residential projects must complete Table B, Part 2 only. All applicants shall complete the following steps for Table B.

1. Review the project consistency options described in the column titled 'GHGRS Strategy and Consistency Options'.

2. Use the check boxes in the column titled "Project Conformance" to indicate if the strategy is 'Proposed', 'Not Applicable', 'Not Feasible', or if there is an 'Alternative Measure Proposed'.

[1] The lists in items # 2-4 do not represent all General Plan policies but allow projects to demonstrate consistency and achievement of policies that are related to quantified reduction estimates in the 2030 GHGRS.

3. Provide a qualitative analysis of the proposed project's compliance with the GHGRS strategies in the column titled "Description of Project Measure". This will be the basis for CEQA analysis to demonstrate compliance with the 2030 GHGRS and by extension, with SB 32. The qualitative analysis should provide:

    a. A description of which consistency options are included as part of the proposed project, or

    b. A description of why the strategy is not applicable to the proposed project, or

    c. A description of why the consistency options are infeasible. If applicants select 'Not Feasible' or 'Alternative Measure Proposed', they must complete Table C to document what alternative project measures will be implemented to achieve a similar level of greenhouse gas reduction and how those reduction estimates were calculated.

C. Alternative Project Measures and Additional GHG Reductions

Projects that propose alternative GHG mitigation measures to those identified in Table B or propose to include additional GHG mitigation measures beyond those described in Tables A and B, shall provide a summary explanation of the proposed measures and demonstrate efficiency or greenhouse gas reductions achievable though the proposed measures. Documentation for these alternative or additional project measures shall be documented in Table C. Any applicants who select 'Not Feasible' or 'Alternative Measure Proposed' in Table B must complete the following steps for Table C.

1. In the column titled "Description of Proposed Measure" provide a qualitative description of what measure will be implemented, why it is proposed, and how it will reduce GHG emissions.

2. In the column titled "Description of GHG Reduction Estimate" demonstrate how the alternative project measure would achieve the same or greater level of greenhouse gas reductions as the GHGRS strategy it replaces. Documentation or calculation files can be attached separately.

3. In the column titled "Proposed Measure Implementation" identify how the measure will be implemented: incorporated as part of the project design or as an additional measure that is not part of the project (e.g., purchase of carbon offsets).

Compliance Checklist

Evaluation of Project Conformance with the 2030 Greenhouse Gas Reduction Strategy

Table A: General Plan Consistency

Development Type: ☐ Commercial ☐ Residential ☐ Office X Other: Hospital

1) Consistency with the Land Use/Transportation Diagram (Land Use and Density)	Yes	No
Is the proposed Project consistent with the Land Use/Transportation Diagram?	☒	☐
If not, and the proposed project includes a General Plan Amendment, does the proposed amendment decrease GHG emissions (in absolute terms or per capita, per employee, per service population) below the level assumed in the GHGRS based on the existing planned land use? (The project could have a higher density, mix of uses, or other features that would reduce GHG emissions compared to the planned land use).[2]	☐	☐
If not, would the proposed project and the General Plan Amendment increase GHG emissions (in absolute terms or per capita, per employee, per service population)? Project is not consistent with GHGRS and further modeling will be required to determine if additional mitigation measures are necessary.	☐	☐

Response documentation: The site is designated PQP Public/Quasi-Public and NCC Neighborhood/Community Commercial on the Land Use/Transportation Diagram of the Envision San José 2040 General Plan. The south and west portions of the site is within the Santa Teresa Boulevard/Cottle Road Urban Village area (unplanned).

Public/Quasi-Public - This category is used to designate public land uses as well as hospitals.

Neighborhood/Community Commercial - This designation supports a very broad range of commercial activity. G hospitals and private community gathering facilities are allowed in this designation.

The proposed project is also consistent with the following General Plan goals and policies:

- ES-6: Provide for the health care needs of all members of the San José community.
- ES-6.1: Facilitate the development of new and promote the preservation and enhancement of existing health care facilities that meet all the needs of the entire San José community.

The project proposes to expand an existing hospital to accommodate population growth in the City of San Jose. Additionally, the Neighborhood/Community Commercial land use designation supports hospital uses.

[2] For example, a General Plan Amendment to change use from single-family residential to multi-family residential or a General Plan Amendment to change the use from regional-serving commercial to mixed-use urban in a transit-served area might reduce travel demand, and therefore GHG emissions from mobile sources.

2) Implementation of Green Building Measures	Yes	No
***MS-2.2**: Encourage maximized use of on-site generation of renewable energy for all new and existing buildings.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. The proposed project would include on-site renewable electric generation via solar electric photovoltaic (PV) panels on the top level of the parking garage.		
***MS-2.3**: Encourage consideration of solar orientation, including building placement, landscaping, design and construction techniques for new construction to minimize energy consumption.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include landscaping and trees that would provide shading. The proposed project would include building design measures to meet LEED Gold performance standards.		
***MS-2.7**: Encourage the installation of solar panels or other clean energy power generation sources over parking areas.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include on-site renewable electric generation via solar electric photovoltaic (PV) panels on the top level of the parking garage.		
***MS-2.11**: Require new development to incorporate green building practices, including those required by the Green Building Ordinance. Specifically, target reduced energy use through construction techniques (e.g., design of building envelopes and systems to maximize energy performance), through architectural design (e.g., design to maximize cross ventilation and interior daylight) and through site design techniques (e.g., orienting buildings on sites to maximize the effectiveness of passive solar design).*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include building design measures to meet LEED Gold performance standards. Measures include use of high-performance glazing and sun shading at windows to reduce solar heat gain, high performance building roof and envelope to maximize energy performance as well as using thermal energy storage tanks to supplement heating and cooling loads to further reduce energy usage.		

***MS-16.2**: Promote neighborhood-based distributed clean/renewable energy generation to improve local energy security and to reduce the amount of energy wasted in transmitting electricity over long distances.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include on-site renewable electric generation via a solar PV system on the top level of the garage that would improve local energy security and reduce the amount of energy wasted in transmitting electricity over long distances.		

3) Pedestrian, Bicycle & Transit Site Design Measures	**Yes**	**No**
***CD-2.1**: Promote the Circulation Goals and Policies in the Envision San José 2040 General Plan. Create streets that promote pedestrian and bicycle transportation by following applicable goals and policies in the Circulation section of the Envision San José 2040 General Plan.*		
a) Design the street network for its safe shared use by pedestrians, bicyclists, and vehicles. Include elements that increase driver awareness.	☒	☐
b) Create a comfortable and safe pedestrian environment by implementing wider sidewalks, shade structures, attractive street furniture, street trees, reduced traffic speeds, pedestrian-oriented lighting, mid-block pedestrian crossings, pedestrian-activated crossing lights, bulb-outs and curb extensions at intersections, and on-street parking that buffers pedestrians from vehicles.	☒	☐
c) Consider support for reduced parking requirements, alternative parking arrangements, and Transportation Demand Management strategies to reduce area dedicated to parking and increase area dedicated to employment, housing, parks, public art, or other amenities. Encourage de-coupled parking to ensure that the value and cost of parking are considered in real estate and business transactions.	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would not materially affect the design of the existing street network except for adding two new driveways on Cottle Road for ambulance and emergency department access, one new driveway on Hospital Parkway for emergency department access, a vehicle drive on International Circle for passenger pickup/drop off, and a service driveway on Camino Verde Drive. The driveways for the parking garage on Camino Verde Drive and International Circle would remain in the same location as existing conditions. The proposed project would include approximately 148 on-site replacement trees. The proposed project would replace 606 parking spaces displaced by the new hospital and parking garage with 1,015 spaces in a parking garage.		

***CD-2.5**: Integrate Green Building Goals and Policies of the Envision San José 2040 General Plan into site design to create healthful environments. Consider factors such as shaded parking areas, pedestrian connections, minimization of impervious surfaces, incorporation of stormwater treatment measures, appropriate building orientations, etc.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include trees adjacent to parking areas. The proposed project would also result in a net decrease in pervious surfaces on the project site through proposed bioretention		

	Yes	No
or flow-through planter areas that would receive and treat site stormwater runoff, along with proposed permeable paving areas.		
***CD-2.11**: Within the Downtown and Urban Village Overlay areas, consistent with the minimum density requirements of the pertaining Land Use/Transportation Diagram designation, avoid the construction of surface parking lots except as an interim use, so that long-term development of the site will result in a cohesive urban form. In these areas, whenever possible, use structured parking, rather than surface parking, to fulfill parking requirements. Encourage the incorporation of alternative uses, such as parks, above parking structures.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The southern portion of the project site is within an Urban Village Overlay area. The proposed project would replace an existing surface parking with a up to five-level parking structure with 1,015 spaces to fulfill parking requirements. Incorporation of alternative uses above the parking structure include solar electric photovoltaic (PV) panels on the top level of the parking garage.		
***CD-3.2**: Prioritize pedestrian and bicycle connections to transit, community facilities (including schools), commercial areas, and other areas serving daily needs. Ensure that the design of new facilities can accommodate significant anticipated future increases in bicycle and pedestrian activity.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] Bicycle facilities would be provided on the project site, including long-term bicycle parking spaces for employees and short-term bicycle parking spaces for visitors. The new hospital would include showers and other amenities, which would encourage the use of bicycles for commuting purposes. The project site is within a half-mile of a high-quality transit stop.		
***CD-3.4**: Encourage pedestrian cross-access connections between adjacent properties and require pedestrian and bicycle connections to streets and other public spaces, with particular attention and priority given to providing convenient access to transit facilities. Provide pedestrian and vehicular connections with cross-access easements within and between new and existing developments to encourage walking and minimize interruptions by parking areas and curb cuts.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] Add described in CD-2.1, the proposed project would not materially affect the design of the existing street network except for adding two new driveways on Cottle Road for ambulance and emergency department access, one new driveway on Hospital Parkway for emergency department access, a vehicle drive on International Circle for passenger pickup/drop off, and a service driveway on Camino Verde Drive. The driveways for the six-level parking garage on Camino Verde Drive and International Circle would remain in the same location as existing conditions. The proposed project would include approximately 148 on-site replacement trees. The proposed project would replace 606 parking spaces displaced by the new hospital and parking garage with 1,015 spaces in an up to five-level parking garage. The existing pedestrian and bicycle connections to adjacent areas would not change.		

***LU-3.5**: Balance the need for parking to support a thriving Downtown with the need to minimize the impacts of parking upon a vibrant pedestrian and transit oriented urban environment. Provide for the needs of bicyclists and pedestrians, including adequate bicycle parking areas and design measures to promote bicyclist and pedestrian safety.*	☐	☐
Not applicable	☐	☒
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The project site is not located in Downtown San Jose.		

	Yes	**No**
***TR-2.8:** Require new development to provide on-site facilities such as bicycle storage and showers, provide connections to existing and planned facilities, dedicate land to expand existing facilities or provide new facilities such as sidewalks and/or bicycle lanes/paths, or share in the cost of improvements.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] Bicycle facilities would be provided on the project site, including long-term bicycle parking spaces for employees and short-term bicycle parking spaces for visitors. The new hospital would include showers and other amenities, which would encourage the use of bicycles for commuting purposes.		

***TR-7.1:** Require large employers to develop TDM programs to reduce the vehicle trips and vehicle miles generated by their employees through the use of shuttles, provision for car-sharing, bicycle sharing, carpool, parking strategies, transit incentives and other measures.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] This project will require a TDM program and requires at least 25 points under the City's published TDM Guidelines. The project's TDM checklist is in the process of being prepared.		
***TR-8.5:** Promote participation in car share programs to minimize the need for parking spaces in new and existing development.*	☐	☐
Not applicable	☒	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] Not applicable. Car share facilities are typically sited at home-end or visit-end use locations.		

4) Water Conservation and Urban Forestry Measures	Yes	No
***MS-3.1**: Require water-efficient landscaping, which conforms to the State's Model Water Efficient Landscape Ordinance, for all new commercial, institutional, industrial and developer-installed residential development unless for recreation needs or other area functions.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] Landscape design plans would use drip and water efficient irrigation, drought tolerant plant materials, and a 'smart' weather-based controller. The proposed irrigation would meet local and State water efficiency standards.		

	Yes	No
***MS-3.2**: Promote the use of green building technology or techniques that can help reduce the depletion of the City's potable water supply, as building codes permit. For example, promote the use of captured rainwater, graywater, or recycled water as the preferred source for non-potable water needs such as irrigation and building cooling, consistent with Building Codes or other regulations.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include building design measures to meet LEED Gold certification standards. In addition, the proposed project would be required to comply with the 2022 Title 24 Building Energy Efficiency Standards to reduce water consumption. Furthermore, the project would incorporate water efficient landscaping to reduce water use.		
***MS-19.4**: Require the use of recycled water wherever feasible and cost-effective to serve existing and new development.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would comply with the CalGreen Code, which requires that recycled water be used for landscaping, where feasible. The proposed project would construct a separate lateral for irrigation water.		
***MS-21.3**: Ensure that San José's Community Forest is comprised of species that have low water requirements and are well adapted to its Mediterranean climate. Select and plant diverse species to prevent monocultures that are vulnerable to pest invasions. Furthermore, consider the appropriate placement of tree species and their lifespan to ensure the perpetuation of the Community Forest.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would include drought tolerant plant materials. Selected plants will conform to the low to very low water requirements as delineated by WUCOLS, developed by UC Davis. Though the plants will require irrigation, watering limits are anticipated. Plants selected are low to very low water plants that survive well under these conditions while maintaining a vegetated landscape.		

***MS-26.1**: As a condition of new development, require the planting and maintenance of both street trees and trees on private property to achieve a level of tree coverage in compliance with and that implements City laws, policies or guidelines.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would comply with the City's Standard Conditions of Approval which require that any tree removed would be replaced in accordance with the Tree Replacement Ratios or fees. The proposed project would include approximately 141 on-site replacement trees.		

	Yes	**No**
***ER-8.7**: Encourage stormwater reuse for beneficial uses in existing infrastructure and future development through the installation of rain barrels, cisterns, or other water storage and reuse facilities.*	☒	☐
Not applicable	☐	☐
Describe how the project is consistent or why the measure is not applicable. [Either here or as an attachment] The proposed project would comply with the CalGreen Code, which requires that recycled water be used for landscaping, where feasible. Approximately six bioretention areas are proposed to receive and treat the site stormwater runoff, along with silva cells and flow through planters.		

GHGRS Strategies

GHGRS #1: The City will implement the San José Clean Energy program to provide residents and businesses access to cleaner energy at competitive rates.

GHGRS #2: The City will implement its building reach code ordinance (adopted September 2019) and its prohibition of natural gas infrastructure ordinance (adopted October 2019) to guide the city's new construction toward zero net carbon (ZNC) buildings.

GHGRS #3: The City will expand development of rooftop solar energy through the provision of technical assistance and supportive financial incentives to make progress toward the Climate Smart San José goal of becoming a one-gigawatt solar city.

GHGRS #4: The City will support a transition to building decarbonization through increased efficiency improvements in the existing building stock and reduced use of natural gas appliances and equipment.

GHGRS #5: As an expansion to Climate Smart San José, the City will update its Zero Waste Strategic Plan and reassess zero waste strategies. Throughout the development of the update, the City will continue to divert 90 percent of waste away from landfills through source reduction, recycling, food recovery and composting, and other strategies.

GHGRS #6: The City will continue to be a partner in the Caltrain Modernization Project to enhance local transit opportunities while simultaneously improving the city's air quality.

GHGRS #7: The City will expand its water conservation efforts to achieve and sustain long-term per capita reductions that ensure a reliable water supply with a changing climate, through regional partnerships, sustainable landscape designs, green infrastructure, and water-efficient technology and systems.

Table B: 2030 Greenhouse Gas Reduction Strategy Compliance

GHGRS Strategy and Consistency Options	Description of Project Measure	Project Conformance
PART 1: RESIDENTIAL PROJECTS ONLY		
Zero Net Carbon Residential Construction 1. Achieve/exceed the City's Reach Code, and 2. Exclude natural gas infrastructure in new construction, or 3. Install on-site renewable energy systems or participate in a community solar program to offset 100% of the project's estimated energy demand, or 4. Participate in San José Clean Energy at the Total Green level (i.e., 100% carbon-free electricity) for electricity accounts associated with the project until which time SJCE achieves 100% carbon-free electricity for all accounts. **Supports Strategies**: GHGRS #1, GHGRS #2, GHGRS #3	*Describe which, if any, project consistency options from the leftmost column you are implementing.* *OR,* *Describe why this strategy is not applicable to your project.* *OR,* *Describe why such measures are infeasible.* The proposed project is not a residential project. Therefore, these strategies are not applicable.	☐ Proposed ☒ Not Applicable ☐ Not Feasible* ☐ Alternative Measure Proposed ** The 2030 GHGRS assumed this strategy would be feasible for 50% of residential units constructed between 2020 and 2030.*
PART 2: RESIDENTIAL AND NON-RESIDENTIAL PROJECTS		
Renewable Energy Development 1. Install solar panels, solar hot water, or other clean energy power generation sources on development sites, or 2. Participate in community solar programs to support development of renewable energy in the community, or	*Describe which, if any, project consistency options from the leftmost column you are implementing.* *OR,* *Describe why this strategy is not applicable to your project.* *OR,* *Describe why such measures are infeasible.*	☐ See Part 1 (Residential projects only) ☒ Proposed ☐ Not Applicable ☐ Not Feasible ☐ Alternative Measure Proposed

GHGRS Strategy and Consistency Options	Description of Project Measure	Project Conformance
3. Participate in San José Clean Energy at the Total Green level (i.e., 100% carbon-free electricity) for electricity accounts associated with the project. **Supports Strategies**: GHGRS #1, GHGRS #3	The proposed project would include on-site renewable electric generation via a rooftop solar PV system on the parking structure. The project will also enroll in the San José Clean Energy (SJCE) GreenSource program (approximately 95 percent carbon free power) or TotalGreen (approximately 100 percent carbon free power) as assumed in the approved environmental clearance for the project in accordance with the California Environmental Quality Act (CEQA) (prior to issuance of any Certificate of Occupancy for the hospital).	
Building Retrofits – Natural Gas[3] This strategy only applies to projects that include a retrofit of an existing building. If the proposed project does not include a retrofit, select "Not Applicable" in the Project Conformance column. 1. Replace an existing natural gas appliance with an electric alternative (e.g., space heater, water heater, clothes dryer), or 2. Replace an existing natural gas appliance with a high-efficiency model **Supports Strategies:** GHGRS #4	*Describe which, if any, project consistency options from the leftmost column you are implementing.* *OR,* *Describe why this strategy is not applicable to your project.* *OR,* *Describe why such measures are infeasible.* The proposed project does not include a retrofit, and thus this strategy is not applicable. The proposed project would not include natural gas.	☐ Proposed ☒ Not Applicable ☐ Not Feasible ☐ Alternative Measure Proposed
Zero Waste Goal 1. Provide space for organic waste (e.g., food scraps, yard waste) collection containers, and/or 2. Exceed the City's construction & demolition waste diversion requirement. **Supports Strategies:** GHGRS #5	*Describe which, if any, project consistency options from the leftmost column you are implementing.* *OR,* *Describe why this strategy is not applicable to your project.* *OR,* *Describe why such measures are infeasible.* The proposed project would provide space for organic waste from the hospital and medical office uses and meet or exceed the City's construction and demolition (C&D) waste diversion requirement by diverting at least 75% of C&D material.	☒ Proposed ☐ Not Applicable ☐ Not Feasible ☐ Alternative Measure Proposed

[3] GHGRS Strategy #4 applies to existing building retrofits and not to new construction; Strategy #2 applies to new construction to reduce natural gas related GHG emissions

GHGRS Strategy and Consistency Options	Description of Project Measure	Project Conformance
Caltrain Modernization 1. For projects located within ½ mile of a Caltrain station, establish a program through which to provide project tenants and/or residents with free or reduced Caltrain passes or 2. Develop a program that provides project tenants and/or residents with options to reduce their vehicle miles traveled (e.g., a TDM program), which could include transit passes, bike lockers and showers, or other strategies to reduce project related VMT. **Supports Strategies:** GHGRS #6	*Describe which, if any, project consistency options from the leftmost column you are implementing.* *OR,* *Describe why this strategy is not applicable to your project.* *OR,* *Describe why such measures are infeasible.* The proposed project is located over 0.5-mile from a Caltrain station. Bicycle facilities would be provided on the project site, including long- and short-term bicycle parking spaces. The new hospital would also include showers and other amenities, which would encourage the use of bicycles for commuting purposes.	☐ Proposed ☒ Not Applicable ☐ Not Feasible ☐ Alternative Measure Proposed
Water Conservation 1. Install high-efficiency appliances/fixtures to reduce water use, and/or include water-sensitive landscape design, and/or 2. Provide access to reclaimed water for outdoor water use on the project site. **Supports Strategies:** GHGRS #7	*Describe which, if any, project consistency options from the leftmost column you are implementing.* *OR,* *Describe why this strategy is not applicable to your project.* *OR,* *Describe why such measures are infeasible.* The proposed project would include building design measures to meet LEED Gold certification. The project would reduce building water use and would meet LEED efficiency requirements. Furthermore, the project would incorporate water efficient landscaping and use of recycled water for landscaping, where feasible.	☒ Proposed ☐ Not Applicable ☐ Not Feasible ☐ Alternative Measure Proposed

Table C: Applicant Proposed Greenhouse Gas Reduction Measures

Description of Proposed Measure	Description of GHG Reduction Estimate	Proposed Measure Implementation
[Describe the proposed project measure and why it is proposed] **All-Electric Infrastructure** **Supports Strategies/Sectors:** GHGRS #1, 2, 3	*[Demonstrate the effectiveness of the proposed measure to reduce the project's GHG emissions.* *Include a description of how your measure will reduce emissions and provide supporting quantification documentation/assumptions.]* *Though not a requirement, the project design will exclude use of natural gas infrastructure supporting the City of San Jose's Climate Smart initiative. The project eliminates natural gas boilers for steam generation, space heating, and domestic hot water by utilizing a combination of heat recovery, air source heat pumps and electric humidifiers and steam boilers to meet process load.*	☒ Part of Design ☐ Additional Measure
[Describe the proposed project measure and why it is proposed] **Thermal Energy Storage** **Supports Strategies/Sectors:** GHGRS #1, 2, 3	*[Demonstrate the effectiveness of the proposed measure to reduce the project's GHG emissions.* *Include a description of how your measure will reduce emissions and provide supporting quantification documentation/assumptions.]* *Thermal storage and ground source heating and cooling will be used to allow for extending operation of heat recovery chillers and capturing waste heat from chilled water generation to serve heating needs. Diurnal storage allows for mitigation of carbon peaks.*	☒ Part of Design ☐ Additional Measure
[Describe the proposed project measure and why it is proposed] **Air Cooled Chillers** **Supports Strategies/Sectors:** GHGRS #7	*[Demonstrate the effectiveness of the proposed measure to reduce the project's GHG emissions.* *Include a description of how your measure will reduce emissions and provide supporting quantification documentation/assumptions.]* *Air cooled chillers eliminate cooling towers for production of chilled water, thereby eliminating cooling tower water use, which can be significant throughout the year. As non-potable water is not yet available at the project site, air-cooled chillers eliminate the use of potable water for heat rejection.*	☒ Part of Design ☐ Additional Measure
[Describe the proposed project measure and why it is proposed] **Battery Energy Storage**	*[Demonstrate the effectiveness of the proposed measure to reduce the project's GHG emissions.* *Include a description of how your measure will reduce emissions and provide supporting quantification documentation/assumptions.]*	☒ Part of Design ☐ Additional Measure

Supports Strategies/Sectors: GHGRS #1, 2, 3	*Battery energy storage in combination with proposed on-site photovoltaics allow for capture and use of generated solar power at later evening times when power on the grid is higher in carbon as statewide solar resource production declines.*	

Appendix G1

Phase I Environmental Site Assessment (San José Medical Center Campus)

ESA

2 February 2024

Lee Ann Knight
Project Manager, National Facilities Services
Kaiser Foundation Health Plan, Inc.
284 Hospital Parkway, Building K
San Jose, California 94119

Subject: Updated Phase I Environmental Site Assessment
San Jose Campus Master Planning
Kaiser Permanente Medical Center
San Jose, California
Langan Project No. 750677301

Dear Lee Ann Knight:

Langan CA, Inc. (Langan) has prepared this Updated Phase I Environmental Site Assessment (ESA) for the proposed development at Kaiser Permanente Medical Center in San Jose, California (Figure 1). Langan previously prepared a Phase I ESA for the subject property and presented the results in the report dated 23 March 2023. We understand Kaiser Foundation Health Plan, Inc. (Client) requires this Updated Phase I ESA for the environmental due diligence activities related to the subject property.

The purpose of this Updated Phase I ESA is to identify substantial changes in environmental conditions at the subject property since the Phase I ESA prepared by Langan dated 23 March 2023. Substantial changes are defined as conditions that indicate the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products on the subject property or into the ground, groundwater, or surface water of the subject property.

This Phase I ESA Update was conducted utilizing a standard of good commercial and customary practice that is consistent with American Society for Testing and Materials (ASTM) E1527-21. In general, the scope of this assessment consisted of obtaining information from the User; reviewing reasonably ascertainable information and environmental data relating to the subject property; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the subject property; and conducting a Site reconnaissance. The specific scope of this assessment included the following:

- Interview the key site manager and perform a reconnaissance of the subject property and neighboring properties to identify any changes in the environmental conditions since March 2023; and

- Submit Freedom of Information Act (FOIA) requests to the City of San Jose, Santa Clara County Fire Department, and Santa Clara County Department of Environmental Health (SCCDEH). Online EnviroStor and GeoTracker databases, operated by the California Department of Toxic Substances Control (DTSC) and the State of California Water Resources Control Board (SWRCB), respectively, were also searched regarding environmental permits, environmental violations, incidents and/or status of enforcement actions at the subject property and adjacent properties that could identify certain changes in environmental condition at the subject property since March 2023.

SUBJECT PROPERTY DESCRIPTION

The subject property is located in a mixed-use commercial and residential area of San Jose, California. The subject property is approximately 825,755 square feet (18.9 acres) and is comprised of the Santa Clara County Assessor's Parcel Number's (APNs): 706-05-037, 706-05-011, and 706-05-025. The subject property is bound by Hospital Parkway and International Circle to the north, International Circle and Cottle Road to the west, Santa Teresa Boulevard to the south and a commercial building, apartments, and International Circle to the east. The subject property is owned by Kaiser Foundation Health Plan, Inc.

CURRENT USE OF SUBJECT PROPERTY

The subject property is currently occupied by an existing eight-story hospital building, asphalt paved surface parking lots, concrete walkways, and landscaping (Figure 2). General hospital operations occupy the eight floors of the building.

SPECIALIZED KNOWLEDGE

Both the Client and Langan have knowledge of previous environmental investigations that were conducted at the subject property. Langan has reviewed the following pertinent environmental report previously prepared for the subject property in preparation of this Updated Phase I ESA:

- City of San Jose, *Draft Environmental Impact Report, Kaiser Santa Teresa Medical Center, Planned Development Zoning Application*, dated June 1994.

- Langan Engineering and Environmental Services, Inc., *Phase I Environmental Site Assessment, San Jose Campus Master Planning, Kaiser Permanente Medical Center, San Jose, California*, dated 23 March 2023.

- Langan Engineering and Environmental Services, Inc., *Soil Management Plan, Kaiser Permanente San Jose Replacement Hospital, Hospital, Energy Center, and Service Yard, San Jose, California*, dated 3 May 2023.

City of San Jose – Draft Environmental Impact Report – June 1994

The Draft Environmental Impact Report (EIR) prepared by the City of San Jose details the impacts and mitigation measures to be implemented prior to the planned development at the subject

property. Mitigation measures were to be implemented to mitigate impacts of construction activities on traffic and circulation, noise levels, air quality, flood and drainage, hazardous materials and public safety, geology, biological resources, visual, and services and utilities. All impacts determined by the EIR were marked nonsignificant or nonsignificant impacts with mitigation except for one that was determined to be significant unmitigable impact. The significant unmitigable impact would result increased traffic at the Cottle Road and Concord Drive intersection.

Langan Engineering and Environmental Services, Inc. – Phase I ESA – March 2023

Langan conducted a Phase I ESA for the subject property in March 2023. The Phase I ESA included the subject property boundary with the exception of the hospital building. Based on the databases searched by EDR, requests made for public documentation related to past or present environmental conditions at the subject property and surrounding area, and site reconnaissance, Langan did not identify any recognized environmental conditions (RECs) in connection with the subject property.

Langan Engineering and Environmental Services, Inc. – Soil Management Plan – May 2023

Langan prepared a Soil Management Plan (SMP) in May 2023 which included the results of a subsurface investigation conducted at the subject property in January 2023. Three environmental soil borings were advanced at the subject property to assess the presence of hazardous materials and petroleum hydrocarbons in the soil that would be disturbed during the proposed construction activities. Analytical results were compared to the San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs), and State and Federal hazardous waste criteria for landfill disposal considerations.

No volatile organic compounds (VOCs), polychlorinated biphenyls (PCBs), or asbestos were detected above laboratory reporting limits in any of the analyzed samples. None of the TPH as gasoline (TPHg), TPH as diesel (TPHd), TPH as motor oil (TPHmo), organochlorine pesticides (OCP), or semi-volatile organic compounds (SVOC) detections exceeded residential and commercial/industrial ESLs.

A total of 14 samples had concentrations of arsenic ranging from 11 milligrams per kilogram (mg/kg) to 15 mg/kg and were subsequently analyzed for soluble threshold limit concentration (STLC) arsenic. All detections of STLC arsenic were below the State of California hazardous waste criteria (5 milligrams per liter [mg/L]).

Chromium was detected at or above the method reporting limit in all samples analyzed at concentrations ranging from 34 mg/kg to 180 mg/kg. Chromium was detected at a concentration of 600 mg/kg in the sample collected from B-3-2 at a depth of approximately 2.0 feet below ground surface (bgs). This concentration exceeded the background chromium concentration of 10 mg/kg to 142 mg/kg. None of the other detections exceeded residential and commercial/industrial ESLs or background concentrations. Four samples were subsequently analyzed for STLC chromium. All STLC detections were below the State of California hazardous

waste criteria (5 mg/L). Sample B-3-2 was subsequently analyzed for TCLP chromium which was not detected above the method reporting limit of 0.10 mg/L.

Cobalt was detected at or above the method reporting limit in all samples analyzed at concentrations ranging from 9.4 mg/kg to 34 mg/kg. The concentration for the sample collected from B-3-2 at a depth of 2.0 feet bgs exceeded the residential ESL of 23 mg/kg and the background concentration range of 6.5 to 25.5 mg/kg. None of the other detections exceeded residential and commercial/industrial ESLs or background concentrations.

Nickel was detected at or above the method reporting limit in all samples analyzed at concentrations ranging from 67 mg/kg to 660 mg/kg. Samples collected from borings B-3-2 and B-11-1.5 exceeded the background concentration range of 16 mg/kg to 144 mg/kg. None of the other detections exceeded residential and commercial/industrial ESLs or background concentrations. Sample B-11-1.5 was subsequently analyzed for STLC nickel. STLC nickel detections were below the State of California hazardous waste criteria of 20 mg/L. Remaining metal detections were below residential and commercial/industrial ESLs and/or background concentrations.

Langan concluded that soil excavated near boring B-3 at depths of 0.5 feet to 4.0 feet will need to be disposed of as Class II non-hazardous material (as shown on Figure 4). The remaining soils at the subject property may be handled as unrestricted waste based on receiving facilities acceptance criteria. Based on the analytical results, the SMP discusses soil management objectives for the subject property to minimize exposure of elevated heavy metal constituents in soil to construction workers, nearby residents and/or pedestrians, and future users of the subject property.

SUBJECT PROPERTY HISTORY

Sanborn Maps Review

Langan requested Sanborn Maps from EDR for the subject property and adjoining properties. No Sanborn Maps covering the target property were produced. Appendix A contains copies of the Sanborn Maps.

Aerial Photograph Review

Langan reviewed aerial photographs to evaluate past uses and relevant characteristics of the subject property and surrounding properties. We reviewed the following aerial photographs from EDR: 1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1998, 2006, 2009, 2012, 2016 and 2020. Appendix A contains copies of the aerial photographs from EDR.

The 1939 through 1956 aerial photographs show the subject property is occupied by agricultural land with a small structure present in the southeastern corner. Few buildings are present west, south, and east of the subject property and are likely associated with agricultural use. Additional structures are developed north of the subject property in the 1963 aerial photograph, while the subject property and other surrounding areas remain relatively unchanged.

The 1968 aerial photograph show the subject property has remained relatively unchanged while there is increased development of residential areas and roadways west and southeast of the subject property. By 1974, it appears the current eight-story hospital building has been developed on the northeastern portion of the subject property along with associated asphalt paved parking. Prominently residential with some commercial development has continued to the north, south, and west of the subject property while the east surrounding area remains as agricultural land. In the 1982 aerial photograph, the southwestern portion of the subject property appears to be vacant land that has been developed with an asphalt paved parking lot by 1998. The surrounding area appears to be fully developed with primarily residential properties to the east and west and a mix of residential and commercial properties to the north and south.

The 2006 aerial photograph shows small structures or portable buildings are present on the southwestern portion of the subject property. The subject property remains in a similar configuration through the 2020 aerial photograph.

Historical Topography Maps Review

Langan reviewed the following Historical Topography Maps from EDR: 1916, 1919, 1940, 1943, 1947, 1953, 1968, 1980, 2012, 2015, 2018, and 2021. Appendix A contains copies of the Historical Topography Maps. The average elevation at the subject property remains relatively unchanged from 1916 to 2021, and the approximate elevation is 192 feet above mean sea level (msl).

City Directory Review

Langan reviewed the following city directory abstracts obtained from EDR. City Directories were reviewed for the years 1957 through 2020. EDR's city directory abstract searches for the subject property and surrounding property addresses and lists the name of corresponding occupants at five-year intervals. Appendix A contains the City Directory Abstract.

250 Hospital Parkway		
Directory Year	**Directory Listing**	**Source**
1992 – 2020	Kaiser Permanente Medical Center	Haines Company, Inc./Cole Information/EDR Digital Archive
1975 - 1991	Santa Theresa Community Hospital	Pacific Telephone

GEOLOGIC AND HYDROGEOLOGIC SETTING

Topography

The 2021 United States Geological Survey (USGS) 7.5-minute quadrangle topographic map for East San Jose and Geocheck section of the Environmental Data Resources, LLC (EDR) Regulatory Database Report depicts the subject property at an elevation of approximately 192 feet above msl. Regional topography slopes downward toward the west. Photographs showing the current subject property use are provided in Appendix C.

Geology and Hydrogeology

According to the United States Department of Agriculture's (USDA) National Cooperative Soil Survey (NCSS) Soil Survey Geographic (SSURGO) data for San Francisco, soils at the subject property are comprised of primarily clay and silt. According to USGS information, the subject property is located in an area of San Jose which consists of Holocene-age alluvial fan deposits.

Based on a geotechnical investigation conducted by Langan in July 2023, the subject property is generally underlain clay and silt interbedded with sand and gravel layers. The soil encountered in the upper 70 to 75 feet below ground surface (bgs) generally consists of medium stiff to hard clay and silt with varying amounts of sand, silt, and gravel. The upper clay layer is underlain by approximately 25 feet of dense sand and gravel extending to depths of approximately 95 to 100 feet bgs. Below the sand and gravel are stiff silt and clay interbedded with layers of dense to very dense sand and gravel to the maximum depth explored of 150 feet bgs.

Surface water bodies are not present within the boundary of the subject property. The nearest surface water body is Coyote Creek located approximately 1.2 miles northeast of the subject property. Groundwater has been encountered at nearby properties at depths ranging from 12 to 30 feet bgs. Information regarding subject property-specific groundwater flow direction is unavailable. Groundwater flow can be influenced by a number of factors such as surface water bodies, wetlands, hydrogeologic and anthropogenic variables. However, based on previous groundwater monitoring performed by others in the surrounding area, groundwater is expected to generally flow to the southwest.

A review of the Geocheck section of the EDR Regulatory Database Report (Appendix C) and the State Water Resource Control Board's (SWRCB) Groundwater Ambient Monitoring and Assessment Program (GAMA) database identified no groundwater monitoring wells are present within the subject property boundary. However, one state municipal well (CA4310022-011) is located within the southwest parking lot of the subject property, as shown on Figure 3.

Additionally, the database review indicated multiple monitoring wells are present within a ¼ mile radius of the subject property. A majority of the monitoring wells are associated with the Chevron Service Station closed leaking underground storage tank (LUST) cleanup property located at 6096 Cottle Road approximately 92 feet southwest of the subject property. According to the GeoTracker case file, the monitoring wells were decommissioned in 2007 before the case was granted final closure. Langan does not consider the presence of monitoring wells within the surrounding area to be an environmental concern for the subject property.

ENVIRONMENTAL DATABASE REVIEW

A review of environmental regulatory agency lists and records was performed for the subject property and vicinity to identify potential sources of or activities involving hazardous substances or petroleum products that might affect the soil and groundwater quality at the subject property. These databases identify properties where underground storage tank (UST) leaks, chemical spills, or contamination of soil and/or groundwater have been reported and confirmed. The regulatory lists also include properties where aboveground storage tanks (ASTs) or USTs are present,

hazardous materials are generated and/or stored, and whether or not there has been an unauthorized release.

A search of environmental regulatory agency databases for the subject property and vicinity was prepared for Langan by EDR and is included in Appendix B of this report. The list of the government agency databases reviewed by EDR is summarized in their report.

The subject property address, 250 Hospital Parkway, was listed on the following databases searched by EDR: UST, California Integrate Water Quality System (CIWQS), Resource Conservation and Recovery Act – Large Quantity Generator (RCRA-LQG), Historical UST, Enforcement and Compliance History Online (ECHO), Emissions Inventory Data (EMI), Statewide Environmental Evaluation and Planning System (SWEEPS) UST, San Jose Hazardous Materials (HAZMAT), California Environmental Reporting System (CERS), CERS Hazardous Waste, CERS Tanks, UST Finder, Certified Unified Program Agencies (CUPA) Listings, Hazardous Waste Information System (HAZNET), Hazardous Waste Tracking System (HWTS), and Facility Index System (FINDS). The listings are related to hazardous waste generation, USTs, and routine inspections.

A 10,000-gallon diesel UST was installed at the subject property in 1972 and is located on the eastern side of the hospital building. Further details regarding the UST at the subject property is discussed in the Site and Vicinity Reconnaissance section.

According to the database listings, the subject property was enrolled in the California State Water Resources Control Board (State Water Board) Construction Stormwater Program in 2008 through 2010 for the redevelopment of the asphalt paved parking lot located south of the subject property hospital building. The State Water Board regulates stormwater discharge from active construction sites due to the potential for pollutants to mobilize into surface water bodies.

Various amounts of hazardous waste including but not limited to aged or surplus organics, laboratory waste chemicals, pharmaceutical waste, inorganic solid waste, and solvent mixtures were transferred from the subject property between 1985 and 2020 due to general hospital operations. Asbestos containing waste was also removed from the subject property in 1986 through 1987 during renovation efforts.

The subject property is registered as a large quantity hazardous waste generator under a SCCDEH Hazardous Waste Permit. The SCCDEH conducts routine compliance evaluation inspections at the subject property. Langan reviewed the inspection history, and all violations have since been returned to compliance. None of the violations were indicative of a release; therefore, these database listings do not pose a concern to the subject property and are not considered a REC.

Adjoining Properties

Langan reviewed the environmental database report to evaluate if adjoining properties identified in the database report are suspected to represent an environmental concern for the subject property. Langan did not consider review of regulatory agency files necessary to evaluate potential RECs for the subject property adjoining properties and surrounding area.

Chevron Station #90038 – 6096 Cottle Road (southwestern adjoining, inferred downgradient)

The 6096 Cottle Road property, located approximately 92 feet to the southwest of the subject property, was identified on the UST Finder, RCRA NonGen/NLR, FINDS, Leaking Underground Storage Tank (LUST), Cortese, Historical Cortese, CERS, CUPA Listings, HWTS, HAZNET, UST, Historical LUST, CERS Hazardous Waste, SWEEPS UST, CERS Tanks, EMI, HAZMAT, and EDR Historical Auto databases. Based on a review of the GeoTracker case file, this property has operated as a gasoline service station since 1974. A leak was reported in 1995 when three gasoline USTs were removed from the property and replaced with new USTs. Remediation efforts included excavating approximately 1,200 cubic yards of soil and disposal at an off-site regulated landfill.

In November 1997, methyl tert butyl ether (MTBE) was detected in a water supply well located approximately 407 feet northwest of this location. The well was removed from operation in December 1997. Additional groundwater sampling conducted at the property identified elevated concentrations of MTBE and total petroleum hydrocarbons as gasoline (TPHg). Remediation included a soil vapor extraction and treatment (SVET) system and a groundwater extraction and treatment (GET) system. The SVET was shut down in 2003 after collecting 51 pounds of TPHg and two pounds of MTBE. The GET system was shut down in 2005 after removing and treating 4,202,148 gallons of groundwater and removing 0.97 pounds of TPHg and 6.82 pounds of MTBE.

The LUST case was marked closed as of 25 September 2007. The SCCDEH stated in the case closure letter that residual contamination remains below the property and could pose an unacceptable risk under site development activities. The SCCDEH stated that notification of any land use changes should be submitted to the department. Due to the remedial activity performed, the closed regulatory status, and the hardscape cover acting as a cap to the below residual contamination, the release at 6096 Cottle Road is not considered an environmental concern for the subject property and therefore is not considered a REC.

Kaiser Permanente San Jose – 280 Hospital Parkway (western and northern adjoining, inferred up and downgradient)

The 280 Hospital Parkway property, located approximately 151 feet from the subject property, was identified on the CUPA Listings, CERS, HAZMAT, and CERS Hazardous Waste databases. According to the database listings, this property is registered as a hazardous waste generator under a SCCDEH Hazardous Materials Permit. The SCCDEH conducts routine compliance evaluation inspections at the property. Langan reviewed the inspection history and no violations have been recorded for this parcel and the address is not listed on databases indicative of a release; therefore, this property is unlikely to pose a threat to the subject property and is not considered a REC.

Kaiser Permanente San Jose Medical Center Office Building – 275 Hospital Parkway (western adjoining, inferred crossgradient)

The 275 Hospital Parkway property, located approximately 131 feet west of the subject property, was identified on the CUPA Listings, HWTS, HAZNET, CERS, HAZMAT, RCRA NONGEN/NLR, and CERS Hazardous Waste databases. According to the database listings, various amounts of

hazardous waste including but not limited to photochemical/photoprocessing waste, metal sludge, and asbestos containing waste were transferred from the property between 1994 and 2020 due to general hospital operations and renovation efforts.

The property is registered as a hazardous waste generator under a SCCDEH Hazardous Waste Permit. The SCCDEH conducts routine compliance evaluation inspections at the property. Langan reviewed the inspection history and no violations have been recorded for this parcel and the address is not listed on databases indicative of a release; therefore, this property is unlikely to pose a threat to the subject property and is not considered a REC.

Kaiser Permanente San Jose Medical Center Engineer – 255 International Circle (eastern adjoining, inferred upgradient)

The 255 International Circle property, located approximately 150 feet east of the subject property, was identified on the FINDS, HAZMAT, CUPA Listings, CERS Hazardous Waste, CERS databases. This property is registered as a hazardous waste generator under a SCCDEH Hazardous Waste Permit. The SCCDEH conducts routine compliance evaluation inspections at the subject property. Langan reviewed the inspection history, and all violations have since been returned to compliance. None of the violations were indicative of a release; therefore, these database listings do not pose a concern to the subject property and are not considered a REC.

Kaiser Permanente San Jose Medical Center 1 – 260 International Circle (northern adjoining, inferred crossgradient)

The 260 International Circle property, located approximately 92 feet north of the subject property, was identified on the HAZMAT, SWEEPS UST, CUPA Listings, CERS Hazardous Waste, and CERS databases. According to the database listings, a diesel UST of unknown size is active at this property. Additionally, this property is registered as a hazardous waste generator under a SCCDEH Hazardous Waste Permit. The SCCDEH conducts routine compliance evaluation inspections at the subject property. Langan reviewed the inspection history, and all violations have since been returned to compliance. None of the violations were indicative of a release; therefore, these database listings do not pose a concern to the subject property and are not considered a REC.

Kaiser Permanente San Jose Medical Building 3 – 270 International Circle (northern adjoining, inferred crossgradient)

The 270 International Circle property, located approximately 92 feet to the north of the subject property, was identified on the HAZMAT, CUPA Listings, CERS Hazardous Waste, and CERS databases. The property is registered as a hazardous waste generator under a SCCDEH Hazardous Waste Permit. The SCCDEH conducts routine compliance evaluation inspections at the property. Langan reviewed the inspection history and no violations have been recorded for this parcel and the address is not listed on databases indicative of a release; therefore, this property is unlikely to pose a threat to the subject property and is not considered a REC.

Kaiser Permanente San Jose Medical Building 1 – 276 International Circle (northern adjoining, inferred crossgradient)

The 276 International Circle property, located approximately 112 feet to the north of the subject property, was identified on the HAZMAT, CUPA Listings, CERS Hazardous Waste, and CERS databases. According to the database listings, this property is registered as a hazardous waste generator under a SCCDEH Hazardous Waste Permit. The SCCDEH conducts routine compliance evaluation inspections at the property. Langan reviewed the inspection history and no violations have been recorded for this parcel and the address is not listed on databases indicative of a release; therefore, this property is unlikely to pose a threat to the subject property and is not considered a REC.

Santa Theresa Branch Library – 290 International Circle (eastern adjoining, inferred crossgradient)

The 290 International Circle property, located approximately 20 feet to the east of the subject property, was identified on the CIWQS database. According to the database listings, the property was enrolled in the State Water Board Construction Stormwater Program in 2008 through 2010 for the redevelopment of the asphalt paved parking lot located east of the property. The State Water Board regulates stormwater discharge from active construction sites due to the potential for pollutants to mobilize into surface water bodies. No violations have been recorded for this parcel and the address is not listed on databases indicative of a release; therefore, this property is unlikely to pose a threat to the subject property and is not considered a REC.

Best Fields Animal Dentist – 6110 Camino Verde Drive (southern adjoining, inferred crossgradient)

The 6110 Camino Verde Drive property, located approximately 205 feet to the south of the subject property, was identified on the RCRA NonGen/NLR database. The facility is listed as a verified non-generator of hazardous waste. No violations or spills were recorded and therefore, this property is unlikely to represent an environmental concern for the subject property and is not considered a REC.

Former Phinos Phillips 66 Service – 6101 Camino Verde Drive (southern adjoining, inferred crossgradient)

The 6101 Camino Verde Drive property, located approximately 164 feet to the south of the subject property, was identified on the EDR Historical Auto database. An auto repair shop operated at this property from approximately 1971 through 1979. No violations have been recorded for this parcel and the address is not listed on databases indicative of a release; therefore, this property is unlikely to pose a threat to the subject property and is not considered a REC.

Neighboring Properties

Langan focused on off-subject property facilities with known contamination in soil and groundwater that were most likely to represent potential environmental concerns at the subject property. These areas include nearby properties or locations that were in the near vicinity and/or

hydraulically up-gradient of the subject property. The estimated direction of groundwater flow is to the southwest within the immediate subject property vicinity.

Based on our review of the current EDR report dated January 2024, the general conditions for the subject property and nearby properties remain as described in the March 2023 EDR report. Based on our review of the off-subject property database, all of the nearby listings had no violations, were closed by the regulatory agency, were hydrologically cross-gradient or downgradient, or were determined to be a significant distance (greater than a ¼ mile) from the subject property.

REVIEW OF PUBLIC RECORDS

Public record requests were submitted to the City of San Jose, Santa Clara County Fire Department, and SCCDEH. Online EnviroStor and GeoTracker databases, operated by the DTSC and the SWRCB, respectively, were searched as well as United States Geological Survey (USGS) mapping and US EPA databases. No relevant files were located beyond what the Client had provided to Langan at the time of this report's completion.

SITE AND VICINITY RECONNAISSANCE

Langan completed the site reconnaissance on 19 January 2024. Lee Ann Knight (Hospital COE), Riccardo Simpson (Hospital Safety), accompanied Dulce Rodriguez and Peter J. Cusack of Langan during the site reconnaissance. The site reconnaissance focused on the spatial extent of the subject property and associated structures and progressed to the adjoining and surrounding properties. The adjoining properties were observed from the subject property or from public rights-of-way. The weather at the time of the site reconnaissance was approximately 58°F and overcast.

Langan interviewed Lee Ann Knight (the "key site manager") during the site reconnaissance on 19 January 2024.

Current Subject Property Use

The subject property building currently operates as a hospital building and asphalt paved parking lot. The subject property building is occupied by the San Jose Kaiser Permanente Medical Center which operates as a general hospital.

The following table summarizes subject property utility providers.

Utility	Providers
Electricity (used for cooling)	Pacific Gas & Electric (PG&E)
Natural gas (used for heating)	PG&E
Water	Valley Water
Sewer	City of San Jose

Hazardous Substances and Petroleum Products

Langan observed the following hazardous material stored at the subject property for routine hospital operations: helium, ethylene oxide, radiologic health materials, and typical boiler room chemicals. Langan did not observe evidence of leaks, spills, pools of liquid or releases such as staining or sheens at the subject property.

Underground Storage Tanks (USTs)

The EDR database report identified the following active UST: one 10,000-gallon UST containing diesel fuel. Langan observed the 10,000-gallon UST for diesel storage at the subject property. The key site manager stated that the UST is used to supply fuel to the three generators located on the subject property. Langan did not identify releases associated with the UST.

Aboveground Storage Tanks (ASTs)

Langan observed one AST water supply tank at the subject property. Langan did not identify releases associated with the AST.

Drums, Totes, and Intermediate Bulk Containers

Langan did not observe any drums, totes, or intermediate bulk containers during the site reconnaissance.

Other Chemical Storage, Containers, or Equipment

Langan observed shelves and storage cabinets containing retail-size containers of general cleaning products, alcohol, pharmaceuticals, medical supplies, and medical gases. Langan observed Conex storage boxes in the southeast area of the asphalt paved parking lot.

Air Emissions

Langan did not observe any air emission sources at the subject property. Langan does not consider the air emissions an environmental concern for the subject property.

Hazardous Waste

Langan observed hazardous waste storage and disposal areas throughout the hospital building. Observed hazardous waste included battery waste, pharmaceutical waste, and laboratory waste.

Non-Hazardous Waste

Langan did not observe any non-hazardous waste containers at the subject property.

Fill Areas or Solid Waste

Langan did not observe fill areas or solid waste at the subject property during the site reconnaissance with the exception of refuse associated with general hospital operations stored in proper containers.

Wastewater

Sanitary and wastewater are discharged to the municipal sanitary sewer system. Langan did not observe or identify evidence of septic systems or cesspools at the subject property.

Storm Water

Storm water at the subject property sheet flows to the adjoining roadways into the municipal combined sanitary sewer system.

CONCLUSIONS

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historical information, and contact with federal/state/local official agencies, no RECs were identified in connection with the subject property.

Langan recommends implementing the SMP which will mitigate potential risks associated with the handling of the soil which will be encountered during the construction activities. Once soil handling procedures are completed, a Completion Report will be prepared. This report will include will present a chronology of the construction events, a summary of analytical data, a copy of all manifests from the site, and a description of all soil management activities at the site. The report will also document that soil handling procedures were implemented in accordance with the SMP.

LIMITATIONS

Activities undertaken as part of this assessment were conducted on behalf of Kaiser Foundation Health Plan, Inc. (Client) to provide preliminary information and data as input to possible decisions about the subject property. The conclusions presented in this report are professional opinions based on the specific activities conducted. Information obtained from government agencies and the current property owner is dependent upon the quality of the information obtained.

Langan makes no guarantees or warranties with respect to the accuracy or completeness of this information. Opinions and recommendations presented herein apply to subject property conditions existing at the time of our assessment and cannot necessarily be taken to apply to changes or conditions of which we are not aware and have not had the opportunity to evaluate.

The assessment did not include testing for the presence of lead paint, asbestos, PCBs in transformers or other electrical equipment, or naturally occurring environmental hazards (e.g., radon). The assessment did not address non-chemical hazards, such as the potential for seismic hazards at the site, nor did the scope of this work include any soil, air, or groundwater testing.

Thank you for the opportunity to provide this Updated Phase I ESA. If you have any questions or need any information clarified, please call Mr. Peter J. Cusack at (408) 283-3615.

Sincerely yours,
Langan CA, Inc.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Local Lists of Registered Storage Tanks

CA FID UST ---- Facility Inventory Database

Local Land Records

LIENS ---- Environmental Liens Listing
LIENS 2 ---- CERCLA Lien Information

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
CHMIRS ---- California Hazardous Material Incident Report System
LDS ---- Land Disposal Sites Listing
MCS ---- Military Cleanup Sites Listing
SPILLS 90 ---- SPILLS 90 data from FirstSearch

Other Ascertainable Records

FUDS ---- Formerly Used Defense Sites
DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR ---- Financial Assurance Information
EPA WATCH LIST ---- EPA WATCH LIST
2020 COR ACTION ---- 2020 Corrective Action Program List
TSCA ---- Toxic Substances Control Act
TRIS ---- Toxic Chemical Release Inventory System
SSTS ---- Section 7 Tracking Systems
RMP ---- Risk Management Plans
RAATS ---- RCRA Administrative Action Tracking System
PRP ---- Potentially Responsible Parties
PADS ---- PCB Activity Database System
ICIS ---- Integrated Compliance Information System
FTTS ---- FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS ---- Material Licensing Tracking System
COAL ASH DOE ---- Steam-Electric Plant Operation Data
COAL ASH EPA ---- Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER ---- PCB Transformer Registration Database
RADINFO ---- Radiation Information Database
HIST FTTS ---- FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS ---- Incident and Accident Data
CONSENT ---- Superfund (CERCLA) Consent Decrees
INDIAN RESERV ---- Indian Reservations
FUSRAP ---- Formerly Utilized Sites Remedial Action Program
UMTRA ---- Uranium Mill Tailings Sites
LEAD SMELTERS ---- Lead Smelter Sites
US AIRS ---- Aerometric Information Retrieval System Facility Subsystem
US MINES ---- Mines Master Index File
MINES MRDS ---- Mineral Resources Data System
ABANDONED MINES ---- Abandoned Mines

DOCKET HWC ---- Hazardous Waste Compliance Docket Listing
UXO ---- Unexploded Ordnance Sites
FUELS PROGRAM ---- EPA Fuels Program Registered Listing
PFAS NPL ---- Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES ---- Federal Sites PFAS Information
PFAS TRIS ---- List of PFAS Added to the TRI
PFAS TSCA ---- PFAS Manufacture and Imports Information
PFAS RCRA MANIFEST ---- PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR ---- PFAS Contamination Site Location Listing
PFAS WQP ---- Ambient Environmental Sampling for PFAS
PFAS NPDES ---- Clean Water Act Discharge Monitoring Information
PFAS ECHO ---- Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAINING ---- Facilities in Industries that May Be Handling PFAS Listing
PFAS PART 139 AIRPORT ---- All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC ---- Aqueous Foam Related Incidents Listing
BIOSOLIDS ---- ICIS-NPDES Biosolids Facility Data
PFAS ---- PFAS Contamination Site Location Listing
AQUEOUS FOAM ---- Former Fire Training Facility Assessments Listing
CHROME PLATING ---- Chrome Plating Facilities Listing
ENF ---- Enforcement Action Listing
Financial Assurance ---- Financial Assurance Information Listing
ICE ---- Inspection, Compliance and Enforcement
HWT ---- Registered Hazardous Waste Transporter Database
MINES ---- Mines Site Location Listing
MWMP ---- Medical Waste Management Program Listing
NPDES ---- NPDES Permits Listing
PEST LIC ---- Pesticide Regulation Licenses Listing
PROC ---- Certified Processors Database
Notify 65 ---- Proposition 65 Records
UIC ---- UIC Listing
UIC GEO ---- UIC GEO (GEOTRACKER)
WASTEWATER PITS ---- Oil Wastewater Pits Listing
WDS ---- Waste Discharge System
WIP ---- Well Investigation Program Case List
MILITARY PRIV SITES ---- MILITARY PRIV SITES (GEOTRACKER)
PROJECT ---- PROJECT (GEOTRACKER)
WDR ---- Waste Discharge Requirements Listing
NON-CASE INFO ---- NON-CASE INFO (GEOTRACKER)
OTHER OIL GAS ---- OTHER OIL & GAS (GEOTRACKER)
PROD WATER PONDS ---- PROD WATER PONDS (GEOTRACKER)
SAMPLING POINT ---- SAMPLING POINT (GEOTRACKER)
WELL STIM PROJ ---- Well Stimulation Project (GEOTRACKER)

RGA LF ---- Recovered Government Archive Solid Waste Facilities List

EXECUTIVE SUMMARY

RGA LUST---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 5 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 10/16/2023 has revealed that there

are 13 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that

there are 39 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/03/2023 has revealed that there are 4 FINDS sites within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/16/2023 has revealed that there are 3 CERS sites within approximately 0.001 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D013
Waste Description:	Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)
Waste Code:	D024
Waste Description:	M-Cresol
Waste Code:	D033
Waste Description:	Hexachlorobutadiene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And

KAISER PERMANENTE MEDICAL CENTER SANTA TERESA (Continued) **1000395439**

F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U011
Waste Description: 1h-1,2,4-Triazol-3-Amine (Or) Amitrole

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

KAISER PERMANENTE MEDICAL CENTER SANTA TERESA (Continued) **1000395439**

Waste Code: U048
Waste Description: O-Chlorophenol (Or) Phenol, 2-Chloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U237
Waste Description: 2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U248
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Date: 12-08-2015
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description: Failure to properly label the following categories of universal waste as: 1) Each batteries or the container in which the batteries are contained as "Universal Waste-Battery(ies)". 2) Each mercury-containing equipment or the container in which the mercury-containing equipment is contained as "Universal Waste -Mercury-Containing Equipment". 3) Each Florescent lamp or the container or package in which the lamps are contained as "Universal Waste-Lamp(s)". 4) Each electronic devices or the container or pallet in or on which the electronic devices are contained as "Universal Waste-Electronic Device(s)". 5) Each CRTs or the container or pallet in or on which the CRTs are contained as "Universal Waste-CRT(s)". 6) A container of CRT glass shall be labeled or marked clearly with the following phrase: "Universal Waste-CRT glass". 7) In lieu of labeling individual electronic devices, CRTs, and/or containers of CRT glass pursuant to subsections d) through f) of this section, a universal waste handler may combine, package, and accumulate those universal wastes in appropriate containers or within a designated area demarcated by boundaries that are clearly labeled with the applicable portion(s) of the following phrase: "Universal Waste-Electronic Device(s)/Universal Waste - CRT(s)/Universal Waste-CRT Glass".
Violation Notes: Returned to compliance on 01/07/2016. Observed chronic labeling issues throughout hospital campus. See some examples below: Universal Waste Storage Area: 1x55 gal blue drum of mixed universal waste solely identified as electronic waste. approximately 1 dozen containers of used fluorescent lamps - no marking or accumulation start date CRTs and electronic waste stored throughout the covered shed - no marking or accumulation start date 5th Floor Main Hospital: approximately a total of 50 lbs(between 3 containers) of alkaline batteries -no marking or accumulation start date

Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 01/07/2016. The following containers of hazardous waste exceeded the one year accumulation time limit: RCRA pharmaceuticals container dated 10-14-14 in the family health pharmacy. RCRA pharmaceuticals containers (2) dated 3-10-14 at 280 Hospital Pkwy pharmacy. RCRA pharmaceuticals container dated 9-2-14 in the main hospital outpatient pharmacy
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 127196
Site Name: Kaiser Permanente San Jose Medical Center Hospital
Violation Date: 12-18-2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 11/10/2021. Tank charts were obtained from Kaiser and used for the calculations. UST system uses mechanical overfill valve as means for overfill prevention. 100% tank capacity = 9,684 gallons 95% tank capacity = 9,199 gallons or 80 1/2" Actual: mechanical overfill prevention valve is set to shut off at 83 3/4" which exceeds the 95% maximum allowable limit.

KAISER PERMANENTE SAN JOSE MEDICAL CENTER HOSPITAL (Continued) **S121741960**

Violation Date:	12-08-2015
Citation:	22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.35
Violation Description:	Failure of the universal waste handler to properly process accumulated universal waste within a maximum accumulation time of one year and /or demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: 1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; 2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; 3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; 4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; 5) Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or 6) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it became a waste or was received.
Violation Notes:	Returned to compliance on 01/07/2016. Observed throughout the hospital small amounts of used batteries stored beyond 1 year including 1xbucket of mixed batteries dated 12-1-2011 located in Two North Pharmacy. Do not accumulate for more than 1 year.

Violation Date:	12-22-2016
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes:	Returned to compliance on 01/23/2017. North STP sump has clamshells (used to facilitate secondary containment testing of piping) with an open valve stem in vertical 12 o'clock position that prevents the detection of a leak at the earliest opportunity. THIS IS A REPEAT VIOLATION FROM PREVIOUS INSPECTION ON 1-7-2016. CORRECTIONS WERE MADE TO SOUTH STP SUMP BUT NOT THE NORTH STP SUMP.

Site ID:	127194
Site Name:	Kaiser Permanente San Jose Medical Center Call Center
Violation Date:	01-07-2016
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes:	Returned to compliance on 02/11/2016. Spill bucket was hydrostatically tested and observed a drop of liquid level. Technician suspects failure is at the drain valve and will clean it and re-test. The retest will not be witnessed by an inspector. If failure is caused by anything other than drain valve, a permit is required from our office to perform a repair.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Citation:	23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)
Violation Description:	"Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at

CHEVRON #9-0038 (Continued) **S105030577**

installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."

Violation Notes: Triennial testing of secondary containment was last conducted May 2016. It was due by the end of May 2019.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 401453
Site Name: SANTA TERESA CHEVRON
Violation Date: 04-30-2021
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: The Overfill Prevention Equipment Inspection for this site has not occurred. It was due by 10/13/2018. NOTE: THIS VIOLATION HAS BEEN ESCALATED FROM CLASS II TO CLASS I, AS IT HAS NOW BEEN CITED FOR THE 3RD CONSECUTIVE YEAR.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 401453
Site Name: SANTA TERESA CHEVRON
Violation Date: 08-21-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months

CHEVRON #9-0038 (Continued) **S105030577**

thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: 87, 91 and diesel spill buckets did not meet the 5 gallon minimum capacity requirement.

Maintain records of secondary containment testing for 36 months."

Violation Notes: The last every-36-month UST Secondary Containment (SB-989) Testing was conducted on 5/9/2016. Facility is now overdue for SB-989 testing, as the next testing due date was by October 2018. NOTE: THIS HAS BEEN ESCALATED FROM CLASS II TO CLASS I DUE TO THE NATURE OF THE VIOLATION. THIS WAS ALSO PREVIOUSLY CITED ON THE 8/21/2019 and 4/30/2021 OFFICIAL NOTICE OF INSPECTIONS.

Violation Date: 11-22-2016
Citation: HSC 6.5 25250.7(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25250.7(a)
Violation Description: Failure to prevent intentional contamination of used oil with other hazardous waste other than minimal amounts of vehicle fuel.
Violation Notes: Scott confirmed that used brake fluid is generated when it is necessary to bleed a customer’s brakes. It is also of note that a 1 gallon, non-empty container of brake fluid was observed in the facility’s trash can. Upon inquiry, Scott stated that used brake fluid is mixed with used oil for management and disposal as "used oil." Used oil being managed and disposed of as "used oil" cannot be mixed with anything other than minimal amounts of vehicle fuel. Otherwise, the co-mingled waste (i.e. used oil and used brake fluid mixture) must be managed as a fully-regulated hazardous waste. Please note that "minimal amounts of vehicle fuel" refers to small amounts of engine blow-by from normal use and does not include the intentional mixing of vehicle fuel with used oil.

Violation Source:	CERS,
Site ID:	401453
Site Name:	SANTA TERESA CHEVRON
Violation Date:	04-30-2021
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	The 87, 91, and Diesel UST Fill Spill Buckets do not meet the minimum 5-gallon liquid capacity. The UST Service Technician added rings around the buckets to bring them from 4.8 gallons capacity to 5 gallons capacity, but the buckets were observed to not be liquid-tight. A permit from our Department may be required for the replacement of the 3 spill buckets. NOTE: THIS VIOLATION HAS BEEN ESCALATED FROM CLASS II TO CLASS I, AS IT HAS NOW BEEN CITED FOR THE 3RD CONSECUTIVE YEAR.

Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. The facility is a gas station and automotive repair center that specializes in routine automotive maintenance and repair activities, such oil and coolant changes and occasional brake maintenance activities. No autobody work is conducted. Hazardous wastes routinely generated include used oil, used antifreeze, used parts washing solution, metal-encased used oil filters, used oil-saturated debris (paper used oil filters), used absorbent, and used brake fluid. Used antifreeze is accumulated in an approximately 100 gallon aboveground tank located in the larger, outside, fenced-in area. Paper-used oil filters are separated from metal-encased used oil filters. Each waste stream is accumulated in a 55 gallon drum next to the used antifreeze tank. Per facility staff, the paper-used oil filters are managed as hazardous waste and the metal-encased used oil filters are managed in accordance with "drained used oil and gasoline [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Address:	275 HOSPITAL PKWY
City,State,Zip:	SAN JOSE, CA 95119
Site ID:	570794
CERS ID:	10623601
CERS Description:	Chemical Storage Facilities

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-21-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a hazardous materials business plan (HMBP) inspection. Observed 12 x Marathon 155FT batteries which contain quantities of electrolyte that are below HMBP-reporting thresholds. As a result of this inspection, the facility's HMBP permit will be inactivated. NOTES: -CERS ID: 10623601 -A HMBP was submitted on 11/2/16 and was reviewed.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The site has been monitored since 1998. Groundwater Sampling includes 25 onsite and offsite monitoring wells and 5 extraction wells. The following is a summary from the second quarter 2011 monitoring report: TPH -G was reported in only one of the sampled wells during the current quarter (MW -16 at 88 ug/l); benzene was reported in two of the sampled wells during the current quarter (maximum concentration of 8.1 ug/l in MW-16). MTBE concentrations in groundwater, which range from low (maximum of 13 ug/l during the current quarter) to below the laboratory reporting limit, are expected to continue to decline. MTBE was reported in wells EW -3, MW 4, and MW -5, at concentrations consistent with decreasing trends. The maximum MTBE concentration (13 ug/l) was detected in zone A3 well MW-4, located immediately adjacent (southeast corner) of the site USTs. Groundwater flow in this zone, and the A1/A2 zone is most frequently toward the south (southeast & southwest), away from the Great Oaks wells which lie north of the site. TPH -D detection above the California Regional Quality Control Board, San Francisco Bay Region Environmental Screening Level (ESL) of 100 ug/l, at a concentration of 420 ug/l. All other TPH--D detections were below ESL. During the second quarter monitoring event, well MW -28 reported detectable concentrations of TPH]D (89 ug/l) and benzene (0.69 ug/l). A site visit revealed that the well box seal was compromised and allowed rainwater runoff in the parking lot to enter the well box and possibly the well itself. These detections may be due to the faulty well box seal. The well box was repaired in April 2011, and prior to sampling, the well was purged of six casing volumes in an effort to remove any runoff which may have accumulated in the well. In the previous quarter, the concentration of MTBE in well MW -28 was reported above the ESL of 5 ug/l with a concentration of 9 ug/l. In the current quarter, MTBE was not reported in MW-28. The second

UNOCAL #5995 (Continued) **S100947548**

quarter 2011 sampling event marks the sixth post -remediation monitoring event. Antea Group has submitted a closure summary form and the Request for Case Closure, dated February 23, 2011, to the SCCDEH. The SCCDEH has not yet responded to the request.

Site ID: 701549
Site Name: 7-ELEVEN INC. #38459
Violation Date: 11-24-2015
Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715
Violation Description: The owner/operator has failed to comply with one or more of the following: to maintain a copy of the designated operator monthly inspections for the last 12 months and/or maintain a list of trained employees on-site or off-site at a readily available location, if approved by the CUPA.
Violation Notes: Returned to compliance on 08/18/2023. THE JANUARY 2015 REPORT FAILED TO HAVE AN ALARM HISTORY PRINT OUT.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 701549
Site Name: 7-ELEVEN INC. #38459
Violation Date: 03-05-2019
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description: Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes: Returned to compliance on 08/18/2023. Observed used oil inside the used oil spill bucket (about 2-3 gallons). The auto repair shop has been closed for about a year now. Based on records review that last hazardous waste disposal of used oil took place on 04/18/18. No used oil was being generated by the facility or being actively poured into the spill bucket at the time of this inspection. Immediately removed the used oil from the spill bucket. This spill bucket must be kept free from any debris. This is a repeat violation from Official Notice of Inspection Reports issued on 11/22/2016, 12/10/2013, and 02/14/2018.

Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes:	Returned to compliance on 08/18/2023. When the annular sensors for all three tanks were tested by the technician, it only provided a visual alarm at the veeder root panel. The audible alarm was not functioning. According to technician it had to do with pizo buzzer inside the panel and a possible loose connection. Interstitial monitoring (annular sensors) must provide both an audible/visual alarms. Within 30 days make necessary repairs to the veeder root panel. Notify our office in writing how this issue was resolved.

Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 08/18/2023. 1) All float and chain assemblies failed to trip the shear valve when water was added. It is of note that there are two float and chain assemblies (87 and 91) in UDC 3/4, 5/6, and 7/8 and three float and chain assemblies (87, 91, Diesel) in UDC 1/2. All float and chain assemblies were manipulated, but continued to fail testing. All float and chain assemblies also failed initial testing during the 2012, 2014, and 2015 Annual Monitoring System Certifications. The float and chain assemblies in UDC 1/2 and 3/4 also failed testing during the 2013 Annual Monitoring System Certification. The repeat and unresolvable nature of this violation confirms that continuous monitoring is not being consistently provided for UDC 1/2, 3/4, 5/6, and 7/8 and additional follow-up and repairs are needed. 2) The TLS-350 Monitoring Console failed to consistently provide an audible alarm when the VR 794390-205 sensors in the STP sumps were functionally tested. It was confirmed that the [Truncated]

Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 08/18/2023. A audible alarm failed to activate when the underground storage tanks' interstitial leak sensors were functionally tested. It is of note that a visual alarm was provided when all interstitial leak sensors were functionally tested. Further investigation confirmed that the Piezo buzzer is loose on the circuit board. The bad connection between the buzzer and the circuit board results in an audible alarm that is not consistently activated. Have the monitoring system repaired so that an audible alarm is activated whenever a leak is detected by an interstitial leak sensor. PLEASE NOTE THAT A PERMIT FROM HMCD IS REQUIRED FOR ANY COLD START OF UST MONITORING EQUIPMENT. ENSURE THAT A RETROFIT PERMIT IS OBTAINED FROM HMCD IF A COLD START OCCURS OR IS NECESSARY TO COMPLETE THE REPAIR.

Violation Date: 12-10-2013
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 01/07/2014. The diesel spill bucket did not hold water during the test. Investigate the leak and have the spill bucket repaired. A drain valve repair/replacement does not require a permit. Replacing the spill bucket will require a permit from HMCD. Disregard the corrective text below, you may continue to fill the diesel tank.

Citation:	HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description:	Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes:	Returned to compliance on 08/18/2023. 1) Diesel residue and liquid diesel was observed in UDC 1/2. Further investigation identified the diesel filter as the source of the leak. 2) Gasoline was confirmed to be leaking from the 91-grade filter in UDC 5/6. All filters are marked as being installed on 9/9/2014. At the minimum, replace the filters that are confirmed to be leaking fuel. Continue to ensure that the filters are maintained in a manner that prevents fuel from being released (i.e. replace when needed).

Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 08/18/2023. The float and chain mechanism failed to trip the shear valve when water was added to the UDC at the following dispensers; - UDC 3/4- 87 grade failed - UDC 5/6- 87 grade failed Additionally, for UDC 1/2 the shear valve was already tripped at the time of inspection because there was diesel inside the UDC. At this dispenser both of the diesel pumps are not working. There is an "Out of Order" bag over each diesel nozzle. At the time of this inspection, I could not observe any visible leaks from the pumps into the dispenser. Immediately, investigate where the leak it's coming from and make the necessary repairs. Additionally, ensure that all float and chain mechanism are adjusted and retested to verify functionality.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Robert Henniger (ICC #8001441-UT, exp. 8/15/2015; VR #A25027 Level 4 + Red Jacket MLD exp. 11/14/2015; VMI #1766 install and #1767 test, exp. 4/24/2014) of Balch Petroleum. Site consists of 4 tanks (diesel, regular and premium gasoline and waste oil) and 4 dispenser pairs. Tank sumps and annulars monitored by a Veeder-Root TLS-350 panel. Panel showed a low temperature warning for tank 3, but no active alarms at arrival. The power light was out. UDCs monitored by Bravo float and chain assemblies. The annular (VR -420) and sump (VR -205) sensors were tested in water and provided audible and visible alarms. The sump sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe)

SANTA TERESA UNOCAL (Continued) **S103986771**

triggered positive shutdown of all turbines. The VMI LD 2000 leak detectors installed on the regular and supreme turbine and the Red Jacket FX2DV leak detector [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-22-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ON SITE FOR 2014 UST MONITORING SYSTEM CERTIFICATION, LATE BY TWO MONTHS. SAIMAK DORJI, SITE MANAGER, SANTA TERESA UNOCAL, ON SITE TO PROVIDE SITE ACCESS AND RECORDS REVIEW. NOTE: THE ANNUAL UST MONITORING SYSTEM TESTING WAS BEING DONE IN NOVEMBER (2011 AND 2012). SINCE THAT TIME THE MONITORING SYSTEM CERTIFICATION TESTING MONTH HAS SLIPPED TO DECEMBER, 2013, AND NOW 2015. THERE IS NO UST MONITORING SYSTEM CERTIFICATION PERFORMED IN 2014. SEE VIOLATION. THIS STATION, SANTA TERESA UNOCAL, SHALL RETURN TO THE MONTH OF NOVEMBER, EVERY YEAR, FOR THE ANNUAL UST MONITORING SYSTEM TESTING. NOTE: THE SENSOR IN THE MID GRADE STP SUMP WAS FOUND TO BE LOCATED ON THE LESS EFFECTIVE SIDE OF THE SUMP, AT A LOW ANGLE (45 DEGREE ANGLE). THIS IS NOT LOCATED IN THE PROPER POSITION TO DETECT A FUEL LEAK AT THE EARLIEST OPPORTUNITY. SEE VIOLATION, THIS WAS CORRECTED WHILE ON SITE. NOTE: I RECIEVED THE 11/1/2011 UST MONITORING SYSTEM CERTIFICATION, CONDUCTED BY BALCH PETROLEUM. [Truncated]

Eval General Type: Other/Unknown
Eval Date: 03-05-2019
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: The following components were tested and passed during this inspection; - 3 STP sump sensors provided an audible/visual alarm only - Fail Safe and Sensor out were verified. - 2 MLLD’s provided a slow flow condition at the pump when a leak of 3.0 g.p.h @10 p.s.i was detected. - 2 UDC’s float and chain mechanism when tested was able to trip the shear value. - Mechanical Flapper values was verified in all three fuel tanks as means of overfill prevention. The following documents were reviewed during this inspection; - 12 months of DO records - Current list of employees trained as of 02/08/2019 by DO; Aaron Celaya - The msost recent CERS submittal was conducted on 01/03/19 and this was reviewed during this inspection Notes: 1) Within 30 days provide copies of today’s testing report to our office

Eval Date: 03-31-2015
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: This Inspection is to confirm the condition on site and notify SANTA TERESA UNOCAL that a component of the Underground Storage Tank (UST) system is not in compliance with the UST Operating Permit Conditions.

SANTA TERESA UNOCAL (Continued) **S103986771**

I spoke by phone to Frank Naderzad, Manager, SANTA TERESA UNOCAL (CERSID: 10354561) at 6211 Santa Teresa Blvd, San Jose, regarding the 91 Octane STP sump lid and the support structure of that lid, which is failing. (3/31/2015). The 91 Octane Pump Sump Lid has a support structure that has been compromised. The steel plate at grade is no longer supported by the original steel collar structure. One side of the steel plate is supported by a 2 x 4 segment of wood that is resting on the top of the fiberglass sump collar. The structural integrity of this sump lid assembly is no longer being maintained as designed and approved. This is a violation of the UST System Operating Permit conditions. Submit a proposal for addressing this issue to this office within 30 [Truncated]

Eval Notes: On-site to witness the Secondary Containment testing, conducted by Service Technician Elmer Mortera from Balch Petroleum. All required

SANTA TERESA UNOCAL (Continued) **S103986771**

UST certifications were verified to be current. Piping sumps and UDCs (87, 91 & Diesel Fuel) were hydrostatically tested with water above the highest point of pressurized piping penetration, using a Caldwell accelerated tester for 30-minutes with no loss of liquid. Tank Annulars (87, 91, Diesel & Used Oil) were all tested at 7in of Hg of vacuum for 60 minutes with no loss of vacuum. Pressurized piping runs (STP to UDCs); all were pressurized with nitrogen to 3.5-psig for 60-minutes with no loss of pressure. Contact Ray Maiden at 408-918-1980 or by email at ray.maiden@deh.sccgov.org regarding this report. **ACTION ITEM** --Submit a copy of today's test report to the address above by August 28, 2015.

CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-20-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection with Aparna Menrai, DDS. The facility is a dental office that specializes in general and cosmetic dentistry, as well as limited orthodontic procedures. The following waste streams were observed during inspection: Sterilization and Disinfection: Prozyme ultrasonic tablets are dissolved in an ultrasonic bath for instrument cleaning. The facility's current practice is to use one tablet per ultrasonic bath and dispose of the solution daily. A review of the tablet's SDS indicates that it does not meet hazardous waste toxicity criteria when used in accordance with the manufacturer's instructions. A pH strip test indicated that the ultrasonic bath on-site during inspection has a neutral pH. Caviwipes are used for disinfecting patient rooms. Birex spray and towels is used to disinfect the laboratory, but not to the point of saturation. A steam autoclave is used to sterilization all instruments and equipment. No solution is [Truncated]

Violations:
Site ID: 61976
Site Name: RITE AID #5983
Violation Date: 12-21-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: With exception of the facility s pharmaceutical hazardous waste container, the hazardous waste container labels do not accurately identify the physical state of the wastes stored in the container as all labels are marked as both solid and liquid. The following containers were observed to not be labeled with the physical state of the hazardous waste they stored at the time of inspection: - 1 x "oxidizer wastes" - 1 x "corrosive bases" - 4 x "toxics/poisons" - 1 x "flammable wastes"
Violation Division: Santa Clara County Environmental Health

Violation Date:	12-21-2016
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	The facility has emergency response information posted next to a telephone in the office and an evacuation map near the entrance/exit, but neither posting contains the location of emergency response equipment.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	61976
Site Name:	RITE AID #5983
Violation Date:	12-21-2016
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to keep records of any test results, waste analyses, or other determinations made in accordance with section 66262.11 for at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.
Violation Notes:	Pharmaceuticals meeting RCRA hazardous waste criteria if they were to become a waste, including but not limited to the following, were observed in the prescription pharmacy: - Neomycin and Polymyxin B Sulfates and Hydrocortisone Otic Suspension USP (0.01% Thimerosal) D009 waste code - Humulog, Lantus, and Novolog insulins containing m-cresols in concentrations at or above 200mg/L D024 waste code - Mylan Manufactured, Epipen and Epipen Jr. injectors (per SDS, Epinephrine CAS # 51-43-4 as the sole active ingredient P042 waste code Additionally, while all vaccines on-site at the time of inspection were observed to be preservative-free (Thimerosal), the pharmacy staff confirmed that the types of vaccines change and some types dispensed on-site may contain preservatives. The facility s Hazardous Waste Management Plan re-iterates that some types of vaccines dispensed on-site contain preservations such as Thimerosal. The pharmacy staff stated that they have never [Truncated]

Violation Date:	12-21-2016
Citation:	HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes:	The facility sells smoking cessation products with nicotine as the

RITE AID #5983 (Continued) **S105990276**

sole-active ingredient (P075 wastes) both over the counter and at the pharmacy. The pharmacy s hazardous waste management plan states The RF gun will message the D&O return [reverse distribution] of most damaged and outdated smoking cessation products containing nicotine to the reclamation center for recycling instead of handling them as hazardous waste. Any open packages should be securely taped up and processed as DAMAGED , so that any remaining products can be recycled. Damaged and outdated gum, lozenges, and patches containing nicotine will go to the returns center for recycling rather than treating them as hazardous waste. Exception: Maine and Vermont must treat all nicotine products as hazardous waste. Please note that the scan gun will continue to direct stores to put damaged and outdated smoking cessation products in the D&O box for recycling until the system can be reprogrammed, which [Truncated]

Violation Program: HW
Violation Source: CERS,

Site ID: 61976
Site Name: RITE AID #5983
Violation Date: 12-21-2016
Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: 1) A waste stream identified only as "non-RCRA hazardous waste, liquid" and with waste code 311 is observed on the facility's manifests (e.g. Manifest #008630329FLE, Ship Date 11/30/2015). Pursuant to 22CCR 66262.23(a)(5 (A), non-RCRA hazardous wastes which do not have a U.S. DOT description should be identified as Non-RCRA Hazardous Waste, Solid or non-RCRA Hazardous Waste, Liquid as well as with a generic name of the waste obtained from Appendix X of Ch. 11, Div. 4.5, Title 22, California Code of Regulations and, if not listed in Appendix X, the commonly recognized industrial name of the waste shall be used. 2) Propane is being identified on the facility s manifests (e.g. #010057661FLE, Ship Date: 11/17/2016) by its DOT hazardous material description, but the word waste is not preceding the proper shipping name. Pursuant to 49CFR 172.101(c)(9) If the word waste is not included in the hazardous material description in Column 2 of the Table, the proper shipping [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-21-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection with HMCD Hazardous Materials Specialist, Robin Ward. The facility is a retail store and prescription pharmacy that sells a variety of consumer products, over-the-counter medications and health care products, make-ups, cleaning products, and operates a prescription pharmacy. Retail Area: The facility's practice is to immediately notify the "pricing person" employee or management when any damaged, broken, spilled, or otherwise unsaleable products and opened returns are identified. The scanner prompts the employee with a sequence of

RITE AID #5983 (Continued) **S105990276**

questions regarding the item s condition and then instructs the employee to process the item accordingly. With exception of the items discussed in the above-listed violations, damaged and leaking products are determined to be wastes. If the waste item meets hazardous waste criteria, the scanner instructs the employee to a specific color of tote container for hazardous waste Each color [Truncated]

CA Waste Code: 541 - Photochemicals/photoprocessing waste
Disposal Method: T01 - Treatment, Tank
Tons: 0.0125

Year: 1997
Gepaid: CAL000098519
TSD EPA ID: CAL000082530
CA Waste Code: 541 - Photochemicals/photoprocessing waste
Disposal Method: T01 - Treatment, Tank
Tons: 0.0583

Year: 1997

JAMES OTT DDS (Continued) **S113059342**

Gepaid:	CAL000098519
TSD EPA ID:	CAL000082530
CA Waste Code:	-
Disposal Method:	T01 - Treatment, Tank
Tons:	0

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Registry ID: 110070580263

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	IBM Corporation, the responsible party, is conducting remedial activities under the direction of the RWQCB. The RWQCB will continue to have lead responsibility for monitoring IBM's progress under an existing agreement between the RWQCB, EPA and DHS.The RWQCB is conducting the work with support from the EPA through a cooperative agreement. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from the fund for this site. The DHS regional facilities permitting unit is maintaining liaison with the RWQCB and EPA.
Site Description:	IBM has been operating an electronics manufacturing plant at this site since 1956. It is located approximately seven miles southeast of the central business district of San Jose and encompasses about 550 acres. The facility includes 45 buildings. Chemicals used in the manufacturing process and wastes generated as

INTERNATIONAL BUSINESS MACHINES CORPORATION (IBM) (Continued) **S100833466**

a result of this process are handled and stored onsite. Surrounding land use is primarily agricultural and residential.

Hazardous Waste Desc: In 1980, soil and ground water contamination was discovered at the site. Leaking underground storage tanks are suspected of having caused the contamination. The types of contaminants which have been detected. include: 1,1,1-trichloroethane (1,1,1-TCA), 1,2,2-trifluoroethane (Freon 113) and acetone. In addition to the primary contaminants, isopropyl alcohol, trichloroethylene (TCE), xylene, kerosene, isophorone, 1,1-dichloroethylene (1,1-DCE), ethyl amyl ketone and methylene chloride have been detected within the limits of the waste plume from this site. Low levels of DCE and 1,1,1-TCA have also been detected in a nearby creek known as Canoas Creek. A ground water contaminant plume approximately 3 miles in length has migrated offsite in a notected within the limits of the waste plume from this site. Low levels of DCE and 1,1,1-TCA have also been detected in a nearby creek known as Canoas Creek. A ground water contaminant plume approximately 3 miles in length has migrated offsite in a no

Threat To Public Health & Env: There are five aquifers near the site that are contaminated or threatened by the contamination. These aquifers are designated from shallowest to deepest: A, B, C, D, and E. Aquifers A, B and C have been contaminated downgradient of the site. Ground water in the area is the sole source of drinking water supply for a population in excess of 65,000. Eight private wells and 3 public wells owned by the Great Oaks Water Company have been contaminated. The San Jose Water Company owns a well which is located about 1.3 miles from the site.

Site Activity Status: Since the discovery of contamination in 1980, IBM has been undertaking remedial actions under the direction of the RWQCB. Approximately 23,000 cubic yards of contaminated soils have been removed from the site. Underground tanks have been replaced with above-ground tanks, and more than 350 ground water monitoring wells and 26 onsite and 4 offsite extraction wells have been installed. IBM has installed and is operating three systems of extraction wells to control the ground water contaminant plume. An excess of approximately 8.8 million gallons of untreated ground water is pumped and discharged into Canoas Creek daily. IBM recently submitted a draft RAP outlining the long term remedial measures which will be employed at the site.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Regional Water Board has regulated the site since the 1980s by Order No. R2-2002-0082 and amended Order R2-2007-0004 dated January 23, 2007 (Order). We have been overseeing soil and groundwater investigation and cleanup activities at this site since 1980. Department of Toxics Substances Control oversee the investigation and cleanup for the Redevelopment Property. Parts of site have been redeveloped as commercial and residential use. Background Beginning in 1955, IBM constructed the facility on land previously used for agricultural purposes. IBM operated the facility for the development and manufacture of disk drives and related computer equipment until 2002. In 2002/2003, IBM sold the majority of the property and its manufacturing processes to Hitachi Global Storage Technologies, Inc. (Hitachi), a subsidiary of Western Digital Corporation. In 2008 IBM sold a small portion of the property to Lowe s (Parcel A). After 2006 Hitachi sold a portion of the property to various commercial and residential developers, and redeveloped it for a mixed residential / commercial use (Redevelopment Area). DTSC oversaw the Redevelopment Area and records are stored on DTSC's EnviroStor database under #80001772. During its ownership of the property, IBM used certain organic chemicals known as volatile organic compounds (VOCs) in its manufacturing operations. As of April 2012, Hitachi changes its name to HGST, Inc. Despite sale of the properties, IBM continues to be responsible for groundwater and soil cleanup of the site. The SREE evaluates remedial measures implemented over the years. Site Investigation In 1980, certain organic chemicals were detected in soil adjacent to an underground storage tank farm. Subsequent investigations identified the presence of these organic chemicals in groundwater beneath and down-gradient from the Site and in soil beneath and adjacent to other chemical storage areas. As a result of these discoveries, more than 1,000 soil borings and over 350 monitoring wells were installed on Site and off Site to define the complete extent of the chemicals detected and to plan for cleanup of the soil and groundwater. The four most widely distributed chemicals detected in the groundwater are Freon 113, TCA, TCE, and 1,1-dichloroethene (1,1-DCE). In 1988, a risk assessment was performed to determine the risks posed by the identified chemicals to human health. The risk assessment concluded that the primary exposure route was, and remains, through the ingestion of groundwater containing chemicals. The groundwater currently used as a source of drinking water does not contain any chemicals above drinking water

IBM-5600 COTTLE ROAD (Continued) **S101482328**

standards. Onsite, shallow groundwater exceeds current cleanup standards in some locations although this shallow groundwater is not used for drinking water. Based on the March 2017 Second Semi-Annual/Annual Pilot Curtailment Test Monitoring Report (aka groundwater monitoring report), offsite, shallow groundwater (A-aquifer) is only affected near Cottle Road between the Public Storage and Lowe's businesses. Great Oakes Water Company supplies drinking water to the Site vicinity. Summary of Cleanup Activity Between 1981 and 1987, IBM removed 65 underground storage tanks. Tanks that were still required to support site operations were replaced with aboveground storage tanks and provided with appropriate secondary containment. Prior to 1988, IBM removed more than 23,000 cubic yards of soil containing chemicals from various onsite areas. The excavated soil was disposed offsite at permitted Class I disposal facilities. Soil cleanup criteria for the Site have been met through the use of soil excavation and soil vapor extraction and further soil cleanup is not currently required. Groundwater cleanup actions including both onsite and offsite extraction wells have operated since 1982. The onsite extraction wells controlled migration of chemicals to the offsite area as well as to cleanup onsite groundwater. Offsite extraction wells controlled further down-gradient migration of chemical-containing groundwater as well as cleanup offsite groundwater. Groundwater extracted for cleanup onsite and offsite was treated using an air stripper and the treated discharge was used for onsite landscape irrigation, was re-injected into the onsite aquifer system, or may be discharged to Canoas Creek pursuant to a permit issued by the Regional Water Board. In addition, between 2006 and 2002, IBM implemented various in-situ bro-remediation technologies at various former sources areas at the Site for treating VOC-impacted groundwater. In 2013, IBM submitted its 25-Year Status Report and Effectiveness Evaluation (SREE) for the former IBM facility at 5600 Cottle Road in south San Jose to the Regional Water Board. The Regional Water Board directed IBM to continue its groundwater cleanup program to address the remaining chemical-bearing groundwater located on Site and to continue to control the migration of chemical-bearing groundwater from the Site to offsite areas and to meet cleanup standards for this site. On January 5, 2016, remediation activities and active groundwater pumping were ceased as part of the December 4, 2015 Proposal for Pilot Curtailment Test (PCT) which was approved by the Regional Water Board on December 8, 2015. The groundwater extraction treatment system (GWETS) was shut down in January 2016. The Regional Water Board approved the March 5, 2018, Pilot Curtailment Test (PCT) Implementation and Data Evaluation Report on May 21, 2018. The GWETS will continue pilot test shut-down and monitor monitored natural attenuation (MNA). Continue groundwater monitoring per Order's self-monitoring program during second and fourth quarter of each year and submit reports August 29 and March 1 of each year. Current Status IBM will continue to submit groundwater monitoring reports by August 29 and March 1 of each year.
