Eval General Type: Other/Unknown
Eval Date: 11-30-2016
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: While on-site to conduct a routine hazardous waste and HMBP inspection, the above-listed UST violations were observed. The scope of this UST inspection only encompasses the above-listed violations and verification that the below-listed violations remain un-corrected. Additionally, the following violations remain open and un-corrected from the Official Notices of Inspection issued on 5/9/2016 and 4/29/2015: T000: UST Permit to Operate (5/9/2016, 4/29/2015) T010: UST Monitoring Plan (5/9/2016, 4/29/2015) T014: UST Response Plan (5/9/2016, 4/29/2015) T020: UST Financial Responsibility (5/9/2016, 4/29/2015) T054: Record Keeping: Monitoring Records (5/9/2016) T490: Submittal of UST Equipment Testing Reports (5/9/2016) This inspection

CHEVRON #9-0038 (Continued) **S105030577**

was conducted on 11/22/2016, the report was reviewed with facility employees on 11/22/2016, and issued to the owner, Daryoush (Dave) Saifi on 11/30/2016.

Eval Division: Santa Clara County Environmental Health
Eval Program: UST
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-10-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to review facility's paperwork as part of the annual monitoring system certification performed on 8/20/20 during the COVID 19 emergency when a CUPA inspector was not present on site. Facility's last annual monitoring system certification with an inspector present was in August 2019. DUSTO monthly reports and employee training were reviewed. Your next annual monitoring system certification is due by April 2021.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The site has been monitored since 1998. Groundwater Sampling includes 25 onsite and offsite monitoring wells and 5 extraction wells. The following is a summary from the second quarter 2011 monitoring report: TPH -G was reported in only one of the sampled wells during the current quarter (MW -16 at 88 ug/l); benzene was reported in two of the sampled wells during the current quarter (maximum concentration of 8.1 ug/l in MW-16). MTBE concentrations in groundwater, which range from low (maximum of 13 ug/l during the current quarter) to below the laboratory reporting limit, are expected to continue to decline. MTBE was reported in wells EW -3, MW 4, and MW -5, at concentrations consistent with decreasing trends. The maximum MTBE concentration (13 ug/l) was detected in zone A3 well MW-4, located immediately adjacent (southeast corner) of the site USTs. Groundwater flow in this zone, and the A1/A2 zone is most frequently toward the south (southeast & southwest), away from the Great Oaks wells which lie north of the site. TPH -D detection above the California Regional Quality Control Board, San Francisco Bay Region Environmental Screening Level (ESL) of 100 ug/l, at a concentration of 420 ug/l. All other TPH--D detections were below ESL. During the second quarter monitoring event, well MW -28 reported detectable concentrations of TPH]D (89 ug/l) and benzene (0.69 ug/l). A site visit revealed that the well box seal was compromised and allowed rainwater runoff in the parking lot to enter the well box and possibly the well itself. These detections may be due to the faulty well box seal. The well box was repaired in April 2011, and prior to sampling, the well was purged of six casing volumes in an effort to remove any runoff which may have accumulated in the well. In the previous quarter, the concentration of MTBE in well MW -28 was reported above the ESL of 5 ug/l with a concentration of 9 ug/l. In the current quarter, MTBE was not reported in MW-28. The second quarter 2011 sampling event marks the sixth post -remediation monitoring event. Antea Group has submitted a closure summary form and the Request for Case Closure, dated February 23, 2011, to the SCCDEH. The SCCDEH has not yet responded to the request.

CA BOND EXP. PLAN:

Reponsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	IBM Corporation, the responsible party, is conducting remedial activities under the direction of the RWQCB. The RWQCB will continue to have lead responsibility for monitoring IBM's progress under an existing agreement between the RWQCB, EPA and DHS.The RWQCB is conducting the work with support from the EPA through a cooperative agreement. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from the fund for this site. The DHS regional facilities permitting unit is maintaining liaison with the RWQCB and EPA.
Site Description:	IBM has been operating an electronics manufacturing plant at this site since 1956. It is located approximately seven miles southeast of the central business district of San Jose and encompasses about 550 acres. The facility includes 45 buildings. Chemicals used in the manufacturing process and wastes generated as a result of this process are handled and stored onsite. Surrounding land use is primarily agricultural and residential.
Hazardous Waste Desc:	In 1980, soil and ground water contamination was discovered at the site. Leaking underground storage tanks are suspected of having caused the contamination. The types of contaminants which have been detected. include: 1,1,1-trichloroethane (1,1,1-TCA), 1,2,2-trifluoroethane (Freon 113) and

INTERNATIONAL BUSINESS MACHINES CORPORATION (IBM) (Continued) **S100833466**

acetone. In addition to the primary contaminants, isopropyl alcohol, trichloroethylene (TCE), xylene, kerosene, isophorone, 1,1-dichloroethylene (1,1-DCE), ethyl amyl ketone and methylene chloride have been detected within the limits of the waste plume from this site. Low levels of DCE and 1,1,1-TCA have also been detected in a nearby creek known as Canoas Creek. A ground water contaminant plume approximately 3 miles in length has migrated offsite in a notected within the limits of the waste plume from this site. Low levels of DCE and 1,1,1-TCA have also been detected in a nearby creek known as Canoas Creek. A ground water contaminant plume approximately 3 miles in length has migrated offsite in a no

Threat To Public Health & Env: There are five aquifers near the site that are contaminated or threatened by the contamination. These aquifers are designated from shallowest to deepest: A, B, C, D, and E. Aquifers A, B and C have been contaminated downgradient of the site. Ground water in the area is the sole source of drinking water supply for a population in excess of 65,000. Eight private wells and 3 public wells owned by the Great Oaks Water Company have been contaminated. The San Jose Water Company owns a well which is located about 1.3 miles from the site.

Site Activity Status: Since the discovery of contamination in 1980, IBM has been undertaking remedial actions under the direction of the RWQCB. Approximately 23,000 cubic yards of contaminated soils have been removed from the site. Underground tanks have been replaced with above-ground tanks, and more than 350 ground water monitoring wells and 26 onsite and 4 offsite extraction wells have been installed. IBM has installed and is operating three systems of extraction wells to control the ground water contaminant plume. An excess of approximately 8.8 million gallons of untreated ground water is pumped and discharged into Canoas Creek daily. IBM recently submitted a draft RAP outlining the long term remedial measures which will be employed at the site.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Regional Water Board has regulated the site since the 1980s by Order No. R2-2002-0082 and amended Order R2-2007-0004 dated January 23, 2007 (Order). We have been overseeing soil and groundwater investigation and cleanup activities at this site since 1980. Department of Toxics Substances Control oversee the investigation and cleanup for the Redevelopment Property. Parts of site have been redeveloped as commercial and residential use. Background Beginning in 1955, IBM constructed the facility on land previously used for agricultural purposes. IBM operated the facility for the development and manufacture of disk drives and related computer equipment until 2002. In 2002/2003, IBM sold the majority of the property and its manufacturing processes to Hitachi Global Storage Technologies, Inc. (Hitachi), a subsidiary of Western Digital Corporation. In 2008 IBM sold a small portion of the property to Lowe s (Parcel A). After 2006 Hitachi sold a portion of the property to various commercial and residential developers, and redeveloped it for a mixed residential / commercial use (Redevelopment Area). DTSC oversaw the Redevelopment Area and records are stored on DTSC's EnviroStor database under #80001772. During its ownership of the property, IBM used certain organic chemicals known as volatile organic compounds (VOCs) in its manufacturing operations. As of April 2012, Hitachi changes its name to HGST, Inc. Despite sale of the properties, IBM continues to be responsible for groundwater and soil cleanup of the site. The SREE evaluates remedial measures implemented over the years. Site Investigation In 1980, certain organic chemicals were detected in soil adjacent to an underground storage tank farm. Subsequent investigations identified the presence of these organic chemicals in groundwater beneath and down-gradient from the Site and in soil beneath and adjacent to other chemical storage areas. As a result of these discoveries, more than 1,000 soil borings and over 350 monitoring wells were installed on Site and off Site to define the complete extent of the chemicals detected and to plan for cleanup of the soil and groundwater. The four most widely distributed chemicals detected in the groundwater are Freon 113, TCA, TCE, and 1,1-dichloroethene (1,1-DCE). In 1988, a risk assessment was performed to determine the risks posed by the identified chemicals to human health. The risk assessment concluded that the primary exposure route was, and remains, through the ingestion of groundwater containing chemicals. The groundwater currently used as a source of drinking water does not contain any chemicals above drinking water standards. Onsite, shallow groundwater exceeds current cleanup standards in some locations although this shallow groundwater is not used for drinking water. Based on the March 2017 Second Semi-Annual/Annual Pilot Curtailment Test Monitoring Report (aka groundwater monitoring report), offsite, shallow groundwater

IBM-5600 COTTLE ROAD (Continued) **S101482328**

(A-aquifer) is only affected near Cottle Road between the Public Storage and Lowe's businesses. Great Oakes Water Company supplies drinking water to the Site vicinity. Summary of Cleanup Activity Between 1981 and 1987, IBM removed 65 underground storage tanks. Tanks that were still required to support site operations were replaced with aboveground storage tanks and provided with appropriate secondary containment. Prior to 1988, IBM removed more than 23,000 cubic yards of soil containing chemicals from various onsite areas. The excavated soil was disposed offsite at permitted Class I disposal facilities. Soil cleanup criteria for the Site have been met through the use of soil excavation and soil vapor extraction and further soil cleanup is not currently required. Groundwater cleanup actions including both onsite and offsite extraction wells have operated since 1982. The onsite extraction wells controlled migration of chemicals to the offsite area as well as to cleanup onsite groundwater. Offsite extraction wells controlled further down-gradient migration of chemical-containing groundwater as well as cleanup offsite groundwater. Groundwater extracted for cleanup onsite and offsite was treated using an air stripper and the treated discharge was used for onsite landscape irrigation, was re-injected into the onsite aquifer system, or may be discharged to Canoas Creek pursuant to a permit issued by the Regional Water Board. In addition, between 2006 and 2002, IBM implemented various in-situ bro-remediation technologies at various former sources areas at the Site for treating VOC-impacted groundwater. In 2013, IBM submitted its 25-Year Status Report and Effectiveness Evaluation (SREE) for the former IBM facility at 5600 Cottle Road in south San Jose to the Regional Water Board. The Regional Water Board directed IBM to continue its groundwater cleanup program to address the remaining chemical-bearing groundwater located on Site and to continue to control the migration of chemical-bearing groundwater from the Site to offsite areas and to meet cleanup standards for this site. On January 5, 2016, remediation activities and active groundwater pumping were ceased as part of the December 4, 2015 Proposal for Pilot Curtailment Test (PCT) which was approved by the Regional Water Board on December 8, 2015. The groundwater extraction treatment system (GWETS) was shut down in January 2016. The Regional Water Board approved the March 5, 2018, Pilot Curtailment Test (PCT) Implementation and Data Evaluation Report on May 21, 2018. The GWETS will continue pilot test shut-down and monitor monitored natural attenuation (MNA). Continue groundwater monitoring per Order's self-monitoring program during second and fourth quarter of each year and submit reports August 29 and March 1 of each year. Current Status IBM will continue to submit groundwater monitoring reports by August 29 and March 1 of each year.

Site History:	Per DTSC's March 4, 2009 letter to the Water Board, DTSC is lead agency for RCRA corrective action under Hitachi Global Storage Technologies, Inc. (GST) ownership and control. DTSC's September 9, 2010 Acknowledgements of Satisfaction letter documents DTSC's satisfactory completion of corrective action completed by Hitachi GST for Parcels 0-1 through 0-5 (Consent Agreement, Docket HWCA: P2-05/06-001) and Lot 8 (second Consent Agreement, Docket HWCA: P2-07/08-012). The letter states Hitachi GST is obligated to preserve all records associated with the Consent Agreements for at least six years.

Completed Info:
Completed Area Name: Lots 6 and 7
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 12/09/2016
Comments: DTSC certified the completion of the removal action for Lots 6 and 7 at the Great Oaks Mixed Use Project Site. The removal action consisted of the excavation of arsenic- and dieldrin-contaminated soil and disposal at an off-site permitted landfill. No further action is required and a multi-family residential development is to be constructed on Lots 6 and 7.

Completed Area Name: Residential Parcels

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 04/22/2016
Comments: Based on the City of San Jose's Environmental Impact Report for the Great Oaks Mixed Used Project, DTSC concluded in a Statement of Findings that the cleanup activities outlined in the Final Removal Action Workplan will not result in significant and unavoidable effects on the environment. A Notice of Determination was filed with the State Clearinghouse on April 25, 2016..

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 03/09/2017
Comments: The Notice of Exemption explains why the project is exempt from evaluation under the California Environmental Quality Act based on a General Rule exemption. A Land Use Covenant between DTSC and iStar San Jose, LLC is added as part of the selected removal action, and will not result in changes to the physical environment.

Completed Area Name: Residential Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/14/2017
Comments: A land use covenant (LUC) between iStar San Jose, LLC and DTSC was recorded with Santa Clara County on September 14, 2017. The LUC restricts land use and activities on a 912 square feet area of the site where impacted soil with arsenic concentrations above the residential cleanup level could not be excavated as required by the Removal Action Workplan due to the presence of a previously-unknown fiber-optic cable.

Completed Document Type: Standard Voluntary Agreement
Completed Date: 11/05/2015
Comments: iStar San Jose, LLC entered into a Voluntary Cleanup Agreement with DTSC to oversee cleanup of the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/26/2018
Comments: The letter provides an estimate of DTSC's oversight costs for the 2018-2019 fiscal year.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 05/04/2017
Comments: The public notice was published in the San Jose Mercury on May 4th. It provided notification of DTSC's approval of the Explanation of Significant Differences for the site and intent on entering into a Land Use Covenant with iStar San Jose LLC .

Completed Area Name: Residential Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 01/19/2018
Comments: Not reported

Completed Area Name: Residential Parcels
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 10/09/2017
Comments: DTSC certified the completion of the removal action for Residential Parcels Operable Unit. The removal action consisted of the excavation of arsenic- and dieldrin-contaminated soil and disposal at an off-site permitted landfill. A land use covenant has been recorded for a portion of the Operable Unit where arsenic-contaminated soil could not be excavated because of the presence of a fiber-optic cable and will need to be monitored on an annual basis.

Completed Area Name: Lots 6 and 7
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/07/2016
Comments: The removal action completion report documents the removal action at Lots 6 and 7. Soil contaminated with dieldrin and arsenic at levels over residential screening levels was excavated over an area of approximately 201,400 square feet. Approximately 12,300 cubic yards of soil was excavated and disposed at an off-site disposal facility. Confirmation sampling indicates that no further action is required at Lots 6 and 7.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan w/ESD
Completed Date: 03/09/2017
Comments: The Explanation of Significant Differences modifies the selected remedy for the Site (i.e. excavation and off-site disposal of contaminated soil at a permitted landfill) by adding a Land Use Covenant as a component. The Land Use Covenant will restrict the activities and land use in the 57 feet by 16 feet area of the Site where arsenic- and dieldrin-impacted soil could not be excavated due to the presence of the underground fiber optic cables.

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **S123079495**

waste treatment and storage facility located at 5601 Great Oaks Parkway, San Jose, Santa Clara County, California (the Facility). The Facility occupies approximately 158 acres of land in a commercial/light industrial zoned area at the southern end of the Santa Clara Valley. Between 1955 and 2002, IBM Corporation was the owner and operator of the Facility. In January 2003, IBM Corporation sold the Facility to Hitachi Global Storage, Technologies, Inc. In March 2012, Western Digital Corporation acquired Viviti Technologies, Ltd. in a stock purchase, and Hitachi Global Storage, Technologies, Inc. was renamed as HGST, Inc. On December 31, 2020, HGST, Inc. merged with Western Digital Technologies, Inc. who is the facility name, owner, and operator. WDT is permitted to treat and store hazardous waste. WDT designs, develops, and manufactures computer storage devices including hard disk drives, and disk drive components (disk drive heads, disk drive media, and various disk component assemblies). Manufacturing processes include photolithography, vacuum deposition, electroplating, chemical and vacuum etching, and precision machining. Hazardous wastes generated from these processes are either treated at the Facility or transported for recycling or disposal at an appropriate facility. WDT stores hazardous waste at the facility in containers and tanks. PERMITTING REGULATORY DESCRIPTION/HISTORY The Facility s first hazardous waste facility permit was issued in 1985 and renewed in 1992 while owned and operated by IBM Corporation under EPA identification number CAD990843989. IBM Corporation sold the Facility to HGST who acquired the new EPA identification number CAR000128793. The hazardous waste facility permit was transferred to HGST. A new hazardous waste facility

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: CAD008302903
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H020 - Solvents Recovery
Tons: 4.094

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: UTD991301748
CA Waste Code: 611 - Contaminated soil from site clean-up
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 1.3835

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: CAD008302903
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 22.3015

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: UTD991301748
CA Waste Code: 223 - Unspecified oil-containing waste

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **S123079495**

Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 13.23504

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: CAD008302903
CA Waste Code: 141 - Off-specification, aged or surplus inorganics
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 1.49

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: NED981723513
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 19.687

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: CAD008302903
CA Waste Code: 512 - Other empty containers 30 gallons or more
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.64

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: UTD991301748
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 1.373

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: NVD980895338
CA Waste Code: 135 - Unspecified aqueous solution
Disposal Method: H100 -
Tons: 0.237

Year: 2021
Gepaid: CAR000128793
TSD EPA ID: CAD008302903
CA Waste Code: 133 - Aqueous solution with total organic residues 10 percent or more
Disposal Method: H020 - Solvents Recovery
Tons: 2.88574

Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

IBM CORPORATION (Continued) **1000109345**

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

IBM CORPORATION (Continued) **1000109345**

Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	P030
Waste Description:	Cyanides (Soluble Cyanide Salts), Not Otherwise Specified
Waste Code:	P113
Waste Description:	Thallic Oxide (Or) Thallium Oxide Tl2o3
Waste Code:	P120
Waste Description:	Vanadium Oxide V2o5 (Or) Vanadium Pentoxide
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U003
Waste Description:	Acetonitrile (I,T)
Waste Code:	U031
Waste Description:	1-Butanol (I) (Or) N-Butyl Alcohol (I)
Waste Code:	U035
Waste Description:	Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil
Waste Code:	U037
Waste Description:	Benzene, Chloro- (Or) Chlorobenzene
Waste Code:	U044
Waste Description:	Chloroform (Or) Methane, Trichloro-
Waste Code:	U080
Waste Description:	Methane, Dichloro- (Or) Methylene Chloride
Waste Code:	U112
Waste Description:	Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)
Waste Code:	U123
Waste Description:	Formic Acid (C,T)
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

IBM CORPORATION (Continued) **1000109345**

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U202
Waste Description: 1,2-Benzisothiazol-3(2h)-One, 1,1-Dioxide, & Salts (Or) Saccharin, & Salts

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is

IBM CORPORATION (Continued) **1000109345**

used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Waste Description:	Cresol
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D029
Waste Description:	1,1-Dichloroethylene
Waste Code:	D032
Waste Description:	Hexachlorobenzene
Waste Code:	D034
Waste Description:	Hexachloroethane
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	F007
Waste Description:	Spent Cyanide Plating Bath Solutions From Electroplating Operations.
Waste Code:	P005
Waste Description:	2-Propen-1-Ol (Or) Allyl Alcohol
Waste Code:	P015
Waste Description:	Beryllium
Waste Code:	P022
Waste Description:	Carbon Disulfide
Waste Code:	P030
Waste Description:	Cyanides (Soluble Cyanide Salts), Not Otherwise Specified
Waste Code:	P098
Waste Description:	Potassium Cyanide (Or) Potassium Cyanide K(Cn)
Waste Code:	P104
Waste Description:	Silver Cyanide (Or) Silver Cyanide Ag(Cn)
Waste Code:	P105
Waste Description:	Sodium Azide
Waste Code:	P106
Waste Description:	Sodium Cyanide (Or) Sodium Cyanide Na(Cn)
Waste Code:	P113
Waste Description:	Thallic Oxide (Or) Thallium Oxide Tl2o3
Waste Code:	P120
Waste Description:	Vanadium Oxide V2o5 (Or) Vanadium Pentoxide
Waste Code:	U001
Waste Description:	Acetaldehyde (I) (Or) Ethanal (I)
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

Waste Code:	U003
Waste Description:	Acetonitrile (I,T)
Waste Code:	U009
Waste Description:	2-Propenenitrile (Or) Acrylonitrile
Waste Code:	U019
Waste Description:	Benzene (I,T)
Waste Code:	U031
Waste Description:	1-Butanol (I) (Or) N-Butyl Alcohol (I)
Waste Code:	U035
Waste Description:	Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil
Waste Code:	U037
Waste Description:	Benzene, Chloro- (Or) Chlorobenzene
Waste Code:	U044
Waste Description:	Chloroform (Or) Methane, Trichloro-
Waste Code:	U052
Waste Description:	Cresol (Cresylic Acid) (Or) Phenol, Methyl-
Waste Code:	U055
Waste Description:	Benzene, (1-Methylethyl)- (I) (Or) Cumene (I)
Waste Code:	U056
Waste Description:	Benzene, Hexahydro- (I) (Or) Cyclohexane (I)
Waste Code:	U070
Waste Description:	Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene
Waste Code:	U071
Waste Description:	Benzene, 1,3-Dichloro- (Or) M-Dichlorobenzene
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U077
Waste Description:	Ethane, 1,2-Dichloro- (Or) Ethylene Dichloride
Waste Code:	U080
Waste Description:	Methane, Dichloro- (Or) Methylene Chloride
Waste Code:	U092
Waste Description:	Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)
Waste Code:	U112
Waste Description:	Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)
Waste Code:	U117
Waste Description:	Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)
Waste Code:	U121
Waste Description:	Methane, Trichlorofluoro- (Or) Trichloromonofluoromethane

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

Waste Code:	U123
Waste Description:	Formic Acid (C,T)
Waste Code:	U127
Waste Description:	Benzene, Hexachloro- (Or) Hexachlorobenzene
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)
Waste Code:	U144
Waste Description:	Acetic Acid, Lead(2+) Salt (Or) Lead Acetate
Waste Code:	U151
Waste Description:	Mercury
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U159
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U161
Waste Description:	4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-
Waste Code:	U188
Waste Description:	Phenol
Waste Code:	U190
Waste Description:	1,3-Isobenzofurandione (Or) Phthalic Anhydride
Waste Code:	U196
Waste Description:	Pyridine
Waste Code:	U208
Waste Description:	1,1,1,2-Tetrachloroethane (Or) Ethane, 1,1,1,2-Tetrachloro-
Waste Code:	U209
Waste Description:	1,1,2,2-Tetrachloroethane (Or) Ethane, 1,1,2,2-Tetrachloro-
Waste Code:	U210
Waste Description:	Ethene, Tetrachloro- (Or) Tetrachloroethylene
Waste Code:	U211
Waste Description:	Carbon Tetrachloride (Or) Methane, Tetrachloro-
Waste Code:	U213
Waste Description:	Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)
Waste Code:	U219
Waste Description:	Thiourea
Waste Code:	U220
Waste Description:	Benzene, Methyl- (Or) Toluene
Waste Code:	U226
Waste Description:	Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

list and statewide list should also be used.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 02/04/2014
Comments: This report documents the current environmental conditions of the subsurface beneath and within the vicinity of Building 40 on Parcel A and all of Parcel D (Buildings 013, 014 and 015).

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: REDEVELOPMENT PROPERTY
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/29/2007
Comments: Extensive soil, soil gas and groundwater investigations were conducted a portion of the site that is planned to be rezoned, sold, and redeveloped into a mixed residential, commercial, and recreational open space area. The area to be redeveloped is divided into five Parcels (Parcel O-1 through O-5), which is referred to as the Redevelopment Property. The purpose of the Final Remedy Completion Report was to characterize the current condition of the Redevelopment Property in order to ensure that the property is appropriately characterized and remediated prior to removal from the RCRA Permit. In regards to Site-wide groundwater on the Redevelopment Property, IBM, the previous owner/operator, will continue remediation under the oversight of the Regional Water Quality Control Board, San Francisco Bay Region. Remediation of chloroform in the Building 028J Area on Parcel O-4 is remediated under the Chloroform Release Area. All remaining areas on the Redevelopment Property have been determined to meet residential standards.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: CHLOROFORM RELEASE AREA
Completed Document Type: Corrective Measures Study Report
Completed Date: 11/20/2007
Comments: Not reported

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 04/18/2014
Comments: Soil Inspection/Sampling Plan that identifies procedures for soil and soil gas sampling in areas needing additional investigation in the vicinity of Building 40 on Parcel A and on all of Parcel D (Buildings 013, 014 and 015) was approved.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 08/14/2014
Comments: Soil Inspection/Sampling Plan that identifies procedures for soil and soil gas sampling in areas needing additional investigation in the vicinity of Buildings 005 and 100 located on Parcel E and Parcel F of the HGST Revitalization Project Area was approved.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

Completed Document Type: Preliminary Assessment Report
Completed Date: 08/14/2014
Comments: This report documents the current environmental conditions of the subsurface beneath and within the vicinity of Buildings 005 and 100 located on Parcel E and Parcel F of the HGST Revitalization Project Area

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/13/2015
Comments: The Soil Inspection and Sampling Report for Building 100 Located on Parcel F presents the results of sampling performed at Building 100. Considering the prior history in the area of Building 100 and the results of soil and soil gas sampling that were performed , no evidence of a release from Building 100 was found. Based on these findings, DTSC determined that no further investigation/remediation is required for Parcel F.

Completed Area Name: REVITALIZATION PROPERTY
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 01/22/2016
Comments: The Soil Inspection and Sampling Report for Parcel D and Building 040 is one of two reports that present the results of sampling performed in the Revitalization Project Area where HGST is demolishing several buildings and associated infrastructure, realigning and upgrading transportation routes and constructing new commercial/industrial buildings. The other report that was prepared addresses Building 100 on Parcel F. Considering the prior history in the area of Buildings 013, 015 (located on Parcel D) and Building 040 and the results of soil and soil gas sampling conducted as part of the Site Inspection/Sampling Plan, no evidence of any releases from Buildings 013, 015, and 040 was identified. Based on these findings, DTSC determined no further investigation/remediation is required for Parcel D and Building 040 in Parcel A.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Registry ID: 110064259270

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated,

WESTERN DIGITAL TECHNOLOGIES INC (Continued) **1008194745**

transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Registry ID: 110057100854

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/10/2017
Comments: Because soil with arsenic concentrations above the specified cleanup goals remains in the consolidation cell beneath the warehouse building, a land use covenant between Costco and DTSC was executed that prohibits residences, hospitals, schools for persons under 18 years of age, and day care centers for children, and requires prior DTSC approval of a Soil Management Plan for soil disturbing activities in a limited portion of the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/26/2016
Comments: DTSC letter to Santa Clara County, Department of Environmental Health and City of San Jose Department of Environmental Services and Department of Planning providing notification of the California Land

PROPOSED COSTCO WHOLESALE WAREHOUSE AND FUEL FACILITY (Continued) **S118466278**

Reuse and Revitalization Act Agreement between DTSC and Costco Wholesale Corporation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 01/20/2016
Comments: Letter sent to project proponent providing notification that DTSC was determined to be the appropriate oversight agency for the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/26/2016
Comments: DTSC letter with oversight cost estimate for project activities scheduled for fiscal year 2016/2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/11/2017
Comments: DTSC determined that all response actions, other than continued monitoring of compliance with the Land Use Covenant restrictions and requirements for a limited portion of the Site, have been satisfactorily completed in accordance with the Response Plan approved by DTSC on September 20, 2016. The Land Use Covenant covers a portion of the Site and prohibits residential use, hospitals, schools for persons under 18 years of age, and day care centers for children. DTSC approval of a Soil Management Plan is required prior to any soil disturbing activities in the restricted area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: California Land Reuse and Revitalization Agreement
Completed Date: 07/13/2016
Comments: Costco Wholesale Corporation and DTSC entered into a California Land Reuse and Revitalization Act Agreement

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 09/21/2016
Comments: DTSC prepared a Statement of Findings documenting its finding that the proposed response action identified in the Response Plan will not result in significant and unavoidable effects to the environment. DTSC based its finding on the City of San Jose's Environmental Impact Report for the Great Oaks Mixed Use Project. DTSC filed a Notice of Determination with the State Clearinghouse after the project was approved on July 14, 2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 10/18/2016
Comments: DTSC approved Kleinfelder's request to use pre-excavation sampling to minimize handling and stockpiling of arsenic-impacted soil during implementation of the response action.

PROPOSED COSTCO WHOLESALE WAREHOUSE AND FUEL FACILITY (Continued) **S118466278**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/18/2017
Comments: DTSC annual oversight cost estimate letter for fiscal year 2017/2018.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/26/2018
Comments: The letter provides an estimate of DTSC's oversight costs for the 2018-2019 fiscal year.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 08/03/2016
Comments: Public notice notifying the public of the comment period on the Draft Response Plan. The public notice was published in the El Observador and the San Jose Post-Record newspaper on 8/12/2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/13/2016
Comments: A revised Phase I Environmental Assessment Report that was prepared for the Site was used to meet the requirement under the California Land Reuse and Revitalization Act (CLRRA) for completing an All Appropriate Inquiries report and was used as the basis for DTSC's determination in Section 3.2 of the CLRRA Agreement that the Site is an eligible site under CLRRA.

Completed Area Name: PROJECT WIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/07/2023
Date Data Arrived at EDR: 08/08/2023
Date Made Active in Reports: 10/24/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

North Map:	50003394 SAN JOSE EAST, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

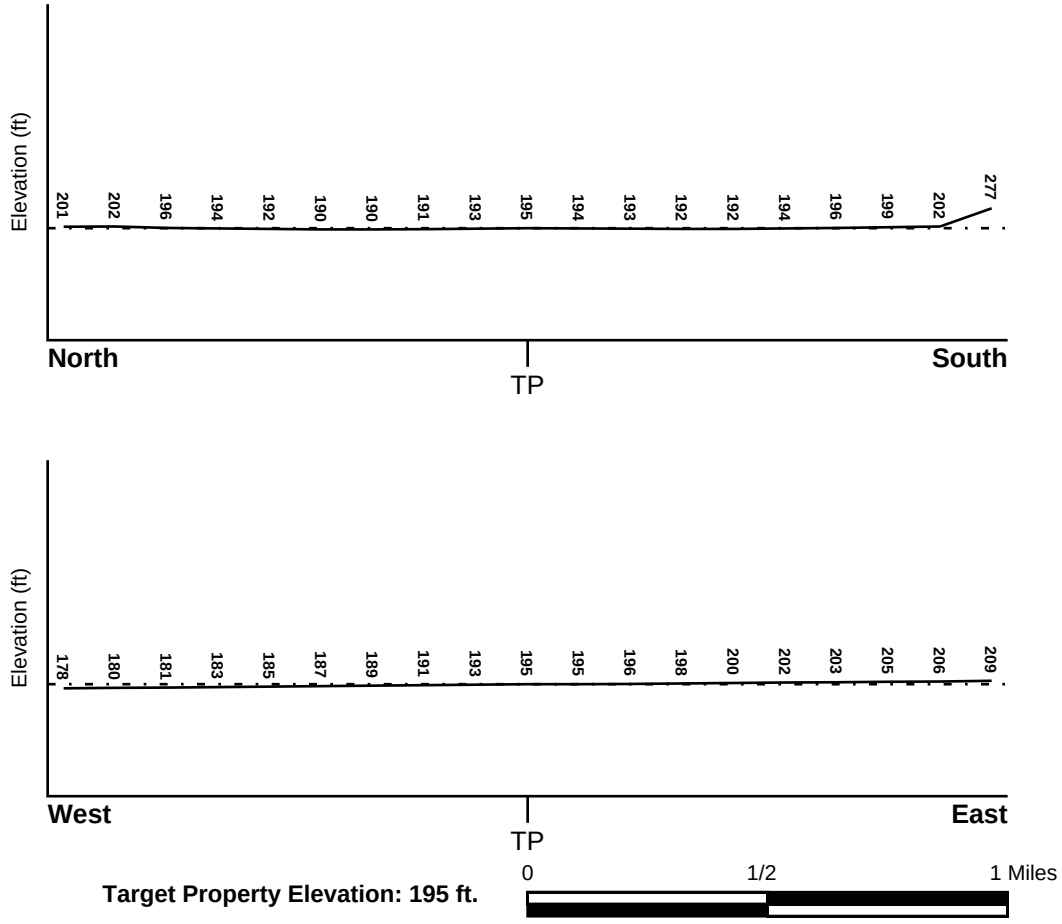
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0406H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0268H	FEMA FIRM Flood data

06085C0407H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SANTA TERESA HILLS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Mesozoic
Code:	uMze*(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Eugeosynclinal Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 71C6-4E6D-8ACA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 71C6-4E6D-8ACA

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Langan (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

TARGET PROPERTY: ADDRESS NOT IDENTIFIED IN RESEARCH SOURCE

The following Target Property addresses were researched for this report, and the addresses were not identified in the research source.

Address Researched	Address Not Identified in Research Source
6120 Liska Lane	2017, 2001, 1995, 1992, 1991, 1986, 1985, 1982, 1980, 1978, 1975, 1974, 1970, 1968, 1966, 1965, 1964, 1963, 1962, 1960, 1957, 1955, 1950, 1946, 1945, 1942, 1940, 1936, 1935, 1931, 1930, 1926, 1925, 1922

APPENDIX F
RESUMES OF ENVIRONMENTAL PROFESSIONALS

DANIEL PARSONS, QSP, EIT

SENIOR STAFF ENGINEER

ENVIRONMENTAL ENGINEERING

Mr. Parsons has over five years of experience providing environmental engineering services for numerous projects throughout Northern California. He supports environmental compliance and remediation related projects in the field and office. Daniel prepares and review technical reports, feasibility studies, work plans, design and construction documents in support of remediation design and environmental compliance. He performs a variety of field work including environmental assessments; environmental investigations; stormwater inspections; site inspections; soil and groundwater sampling; and subcontractor oversight. Daniel assists with proposal development; including preparation of work scopes and budgets.

SELECTED PROJECTS

- 477 Market Street, San Francisco, CA
- SWPPP Inspector – Various Sites, Bay Area, CA*
- Soil and Groundwater Sampling – Various Sites, Presidio of San Francisco, CA*
- Phase I and II Environmental Site Assessments – Various Sites, Bay Area CA*
- Presidio Parkway Redevelopment – Presidio of San Francisco, CA*
- Centerville Unified Site: Soil Vapor Extraction Remediation, Fremont, CA*
- Lendrum Court: Land Use Control Management – Presidio of San Francisco, CA*
- Landfills 8, 10 and E: Five-Year Reviews – Presidio of San Francisco, CA*
- Riley Ave: Groundwater Monitoring and Indoor Air Sampling – Presidio of San Francisco, CA
- Bioswale Restorations: Soil Management and Construction Oversight – Presidio of San Francisco, CA*
- Pulama Lanai Site Characterization – Lanai City, HI*

EDUCATION

M.S., Civil & Environmental Engineering,
San Diego State University

B.S., Civil & Environmental Engineering,
The Ohio State University

PROFESSIONAL REGISTRATION

Qualified SWPPP Practitioner (QSP, #27249) in CA

Certified Erosion, Sediment and Storm Water Inspector (CESSWI, #E0003014) in CA

Engineer in Training (EIT) in CA

*Denotes projects performed prior to employment at Langan

PETER CUSACK

ASSOCIATE PRINCIPAL / VICE PRESIDENT

ENVIRONMENTAL ENGINEERING

Mr. Cusack has 30 years of experience managing and implementing hazardous waste characterization and remediation projects. His experience includes pre-acquisition site assessments, site investigations, removal of underground storage tanks, Phase II investigations, soil and groundwater sampling and remediation, development of soil management plans, aquifer pumping tests, contractor oversight, and field inspection for numerous construction projects and preparation of site closure reports. His work is often done in coordination with our geotechnical practice. He has extensive experience in site investigations and regulatory agency interaction prior to and during new construction/development.

EDUCATION

Bachelor of Technology, Civil Engineering
Rochester Institute of Technology

PROFESSIONAL REGISTRATION

Registered Environmental Assessor

40-Hour Hazardous Waste Operations and Emergency Response Standard (HAZWOPER)

C4 HAZWOPER Supervisor

First Aid and CPR

Contractor State License #979216, Class A, HAZ

AFFILIATIONS

National Ground Water Association,

1992- Present

SELECTED PROJECTS

- Environmental Site Assessments, Numerous Throughout the Bay Area
- Soil and Groundwater Site Investigations, Over 175 Throughout the Bay Area

Academic

- National Center for International Schools, San Francisco, CA
- UCSF Mission Bay Campus, San Francisco, CA
- University of San Francisco, Malloy Hall, San Francisco, CA
- Campus Community Center, Building 21B, Mission Bay, San Francisco, CA
- Hastings College of Law Property, San Francisco, CA
- San Jose Evergreen Community College District, South Campus Development & Automotive Tech Building, San Jose, CA (Project Manager)
- Tenderloin Elementary School, San Francisco, CA

Affordable Housing

- 2060 Folsom Street, Chinatown Community Development Center (CCDC) & Mission Economic Development Agency (MEDA), San Francisco, CA
- Firehouse Square, MidPen Housing Corp, Belmont, CA
- Brooklyn Basin Parcels A and F, MidPen Housing Corp, Oakland, CA
- Downtown San Mateo Parcels, MidPen Housing Corp, San Mateo, CA
- 1178 Sonora Court, MidPen Housing Corp, Sunnyvale, CA
- 707 Bradford Street, MidPen Housing Corp, San Mateo, CA
- 9th and Jessie Street, Multi-Family Residential, San Francisco, CA
- Hotel Essex, 684 Ellis Street, Mercy Housing, San Francisco, CA
- Natalie Gubb Commons, Transbay Block 7 | Mercy Housing, San Francisco, CA
- Mission Bay Block 6 West | Mercy Housing, San Francisco, CA
- 1064 Mission | Mercy Housing, San Francisco, CA
- 600 7th Street | Mercy Housing, San Francisco, CA
- Casa de la Mission | Mercy Housing, San Francisco, CA

- Bill Sorro Community, 200 Sixth Street | Mercy Housing, San Francisco, CA
- 10th & Mission Family Housing | Mercy Housing, Phases I & II ESAs, Soil Management Plan, and Closure Report, San Francisco, CA
- 1180 Fourth Street | Mercy Housing, San Francisco, CA
- 1300 Roosevelt Avenue (Hacienda Project) | Mercy Housing, Richmond, CA
- 165 Eighth Street | Mercy Housing, San Francisco, CA
- 201 Turk Street, Affordable Multi-Family Residential, San Francisco, CA
- 6730 Mission | Mercy Housing, Daly City, CA
- 99 School Street | Mercy Housing, Daly City, CA
- Civic Center Residence | TNDC, 44 McAllister Street, San Francisco, CA
- Edith Witt Senior Community, Ninth & Mission | Mercy Housing, San Francisco, CA
- Episcopal Community Services (ECS) of San Francisco, 165 8th Street, San Francisco, CA
- Kelly Cullen Community, 220 Golden Gate Avenue | TNDC, San Francisco, CA
- Mid-Peninsula Housing, Phases I & II ESAs, Soil Management Plan, and Closure Report, San Mateo, CA
- Openhouse (formerly Richardson Hall), 55 Laguna | Mercy Housing, San Francisco, CA
- Parkview Terraces, Parcel A, Mixed-Use Affordable Housing, San Francisco, CA
- Richardson Hall, 55 Laguna | Mercy Housing, San Francisco, CA
- Saint Anthony Foundation, 121 Golden Gate Avenue | Mercy Housing, San Francisco, CA
- Hotel Essex, 684 Ellis Street | Mercy Housing, San Francisco, CA

Multi-Family Residential

- Midway Village Multi-Family, Daly City, CA
- 5M Development, San Francisco, CA
- Brannan Square, 200 Brannan Street, Multi-Family Residential (New Building and Renovation of a Warehouse), San Francisco, CA
- 2090 South Delaware Street Apartments, San Mateo, CA
- 2121 Third Street, Multi-Family Residential, San Francisco, CA
- 2175 Market Street, Multi-Family Residential, San Francisco, CA
- 300 Spear Street, Multi-Family Residential, San Francisco, CA
- 333 First Street, Multi-Family Residential, San Francisco, CA
- 41 Tehama, Multi-Family Residential High-Rise with 5-Level Underground Parking, San Francisco, CA
- 4606 Almaden Expressway, Multi-Family Residential, San Jose, CA
- 750 Second Street, Multi-Family Residential, San Francisco, CA
- Boynton Place, 970 Boynton Avenue, San Jose, CA
- Lumina, 201 Folsom Street, Multi-Family Residential, San Francisco, CA
- One South Market Street, Multi-Family Residential, San Jose, CA
- Parcel N4AP1, Mission Bay, Multi-Family Residential, San Francisco, CA
- Parcels N3AP2 & N3P2, Mission Bay, San Francisco, CA
- Portside North Residential High-Rise, San Francisco, CA
- Post Street Tower, Downtown Apartments, San Jose, CA

- Radiance at Mission Bay (Buildings 10 and 10A), Multi-Family Residential, Mission Bay, San Francisco, CA
- Silvery Towers, San Jose, CA
- The Metropolitan Condominiums, 333 First Street, San Francisco, CA
- Transbay Block 8, Luxury Residential Tower, San Francisco, CA
- Tasman East Developments, Parcels 57 and 61-64, Santa Clara, CA
- 375 Knowles Drive, Los Gatos, CA
- SJSC Towers, Multi-Family Residential, San Jose, CA
- 411-541 Middlefield Road, Redwood City, CA

Mixed Use

- Oceanwide Center, Office High-Rise and Residential High-Rise, San Francisco, CA
- Bascom Creekside, Mixed-Use Development, Campbell, CA
- Modera San Pedro Square, Infill Mixed-Use Development, San Jose, CA
- Modera The Alameda, Community Development (Residential/Retail), San Jose, CA
- Transbay Block 6, Mixed-Use Residential/Retail High-Rise, San Francisco, CA

Hotel & Retail

- International Hotel Site, San Francisco, CA
- 1165 East Arques Avenue, Fitness Center, Sunnyvale, CA
- Potrero Center, Large Shopping Development, San Francisco, CA
- The Oaks Shopping Center, 21255 Stevens Creek Boulevard, Cupertino, CA

Stadiums and Arenas

- San Jose Earthquakes Stadium, San Jose, CA

Transportation

- New Transbay Transit Center, San Francisco, CA
- Temporary Transbay Terminal, San Francisco, CA
- Coast Guard Island Bridge, Alameda, CA
- Islais Creek RR Bridge, San Francisco, CA
- Lambert Bridge, Healdsburg, CA
- Illinois Street Bridge, San Francisco, CA,

Office

- Intuit Campus Center, Mountain View, CA
- Intuit Marine Way, Mountain View, CA
- Genetics and Developmental Science Building, Building 19B, Phases I & II ESAs, Soil Management Plan, and Closure Report, Mission Bay, San Francisco, CA
- Salesforce Tower, San Francisco, CA
- 535 Mission Street, Office High-Rise, Phases I & II ESAs, Soil Management Plan, and Closure Report, San Francisco, CA
- 555 Mission Street, Office High-Rise, Phases I & II ESAs, Soil Management Plan, and Closure Report, San Francisco, CA
- 575 Middlefield Road, Mountain View, CA
- 5812 Hollis Street, Phases I & II ESAs, Soil Management Plan, and Closure Report, Emeryville, CA

Parks and Recreation
- Hilltop Park Renovation, San Francisco, CA
- Sharp Park, San Francisco Recreation Department, Pacifica, CA

Healthcare
- Kaiser Center, Oakland, CA
- Kaiser Mission Bay, San Francisco, CA
- VA Palo Alto, Palo Alto, CA

Data Centers, Manufacturing and Warehouses
- Monarch Mirror Manufacturing Facility, Vallejo, CA
- Buena Park Distribution Facility, Buena Park, CA
- Equinox Data Center, SV10 and SV-11, San Jose, CA
- La Habra Distribution Facility, La Habra, CA
- The Stanley Works, Groundwater Remediation, Pittsburg, CA

Parking Garages
- Hearst Garage, San Francisco, CA
- Genentech Parking Structures, South San Francisco, CA
- Mission Bay Parking Garage, San Francisco, CA
- Parking Garage, Building 21A, Mission Bay, Phases I & II ESAs, Soil Management Plan, and Closure Report, San Francisco, CA
- San Francisco Airport Parking Garage, South San Francisco, CA
- Vallejo Station Parking Garage, Soil Management Plan and Construction Oversight, Vallejo, CA
- VTA Parking Structure – Berryessa, San Jose, CA
- VTA Parking Structure – Milpitas, Milpitas, CA

Government
- City of San Pablo, Phase I and II ESAs, San Pablo, CA
- Santa Clara County Family Courthouse, 170 Park Avenue, San Jose, CA

Miscellaneous

San Jose Bus Station (Formerly Greyhound), 60 Almaden Avenue, San Jose, CA

1. Introduction

This report presents the results of the Transportation Analysis (TA) for the Kaiser San Jose Campus Master Plan and New Hospital development at 250 Hospital Parkway in San José, California. Consistent with the City of San José Transportation Analysis Policy (Council Policy 5-1) and associated *Transportation Analysis Handbook* ("Handbook"), the purpose of the TA is to identify potentially significant impacts of the proposed Project on the surrounding transportation system per the California Environmental Quality Act (CEQA) and to recommend measures to mitigate significant impacts.

A separate Local Transportation Analysis (LTA) report was also prepared for the City of San José per Council Policy 5-1 and transportation analysis guidelines from the Santa Clara Valley Transportation Authority (VTA), the congestion management agency for Santa Clara County. The LTA evaluates the effects of a development project on transportation, access, circulation, and related safety elements in the proximate area of the Project.

Project Description

The San José Kaiser Medical Center is located at the Cottle Road/Hospital Parkway intersection just south of the State Route 85 and Cottle Road interchange (see **Figure 1-1**).

Land Use Program

As part of the seismic replacement, Kaiser plans to demolish the existing approximately 250,000 square foot (s.f.) main hospital building at the center of the Medical Center and add a 685,000 s.f. new hospital building, a 35,000 s.f. energy center (central utilities plant (CUP)), and 1,040 parking spaces. Of the 1,040 spaces, 1,015 are provided in a new structure on existing surface parking lots near the south and southwest areas of the Medical Center and 25 surface parking spaces are provided adjacent to the hospital. In total, the hospital replacement Project would increase the number of beds from 247 licensed beds up to potentially 303 beds, a net increase of up to 56 beds. In addition, Kaiser has long-term plans to demolish a total of 20,200 s.f. of existing MOB uses and construct a 250,000 s.f. MOB (for a new increase of 229,800 s.f. of MOB). The long-term plans also include the construction of an additional 575 parking spaces.

The Project is divided into the Project-level and Program-level components as outlined below:

- **Project-level**: 685,000 s.f. new hospital building (303 beds), 35,000 s.f. CUP,
    - and 1,040 parking spaces. Of the 1,040 spaces, 1,015 spaces are provided in a the new five-level parking garage and 25 at grade surface parking spaces are provided the new hospital site)
    - **Program-level**: 250,000 s.f. MOB, and installing an additional 575 parking spaces

In addition, the Project is providing 26 short-term bicycle parking spots (open bike racks near building entries) and 48 long-term bicycle parking spots. The transportation effects of the hospital (Project-level components) and MOB uses (Program-level components) are evaluated in both the near-term and future scenarios. The site plan for the project-level components is presented in **Figure 1-2**. These have also been summarized in **Table 1-1**.

Table 1-1: Proposed Medical Center Land Use Program

Project Component	Existing	Proposed	Net New
Hospital, Energy Center, and Parking Garage			
Hospital	250,000 sf	685,000 sf	+435,000 sf
-Beds	247 beds	303 beds	+56 beds
-Employees	2,055	2,877	+822
Energy Center	—[1]	35,000 sf	+35,000 sf
Parking Structure	606 spaces[2]	1,040 spaces[3]	+434 spaces
-Structure Size	—	350,000 sf	+350,000 sf
Total	***250,000 sf***	***1,139,320 sf***	***+889,320 sf***
Projected MOB Improvements			
Medical Office	425,000 sf[4]	250,000 sf (4–6 stories)	229,800 sf[5]
Employees	1,700	2,700	1,000
Parking	1,982 spaces[6]	2,557 spaces[7]	575 spaces

Notes:
1. The existing energy center is part of the hospital's 250,000 sf.
2. Includes only surface parking spaces displaced by the new hospital and parking garage.
3. 1,015 spaces in the five-level parking garage and 25 at grade spaces at the new hospital site..4. 20,200 sf of medical office would be demolished.
5.(20,200 sf) demolished + 250,000 sf new construction = 229,800 net new sf
6. Includes 471 surface parking spaces displaced by the new medical office and parking garage.
7. 1,982 existing spaces retained – 471 spaces displaced + 1,046 new spaces = 2,557 spaces
Source: Kaiser Permanente, 2023.

Transportation Improvements

The Proposed Project includes several transportation improvements that will be implemented as part of the project.

- Upgrade bus shelter on Santa Teresa Boulevard along project frontage
- Upgrade Class II bike lanes to protected Class IV bike lanes along project frontage on Santa Teresa Boulevard and Cottle Road, consistent with *San José Better Bike Plan 2025* (City of San Jose, 2020)
- Provide new Class II bike lanes on Camino Verde Drive between Santa Teresa Boulevard and International Circle.
- Remove channelized right-turns at the following intersections for the specified movements:

    - Cottle Road/Hospital Parkway: westbound right-turn and northbound right turn
    - Santa Teresa Boulevard/Camino Verde Drive: southbound right-turn and westbound right-turn

- Remove mid-block enhanced crosswalk with Rectangular Rapid-Flashing Beacons (RRFBs) along International Circle between Hospital Parkway and Camino Verde; since there no longer is a need to facilitate pedestrian crossing between the removed parking lot on the west side of International Circle to the MOB uses on the east side.

These improvements will provide enhanced multimodal access.

Proposed Site Plan

Scope of Study and Report Overview

This report was prepared for California Environmental Quality Act (CEQA) clearance purposes and to meet the City of San José Transportation Analysis Policy (Council Policy 5-1), which adopts vehicle miles traveled (VMT) as the primary metric for transportation studies under CEQA. The City of San José developed a *Transportation Analysis Handbook*[1] to implement Council Policy 5-1 and provide guidance on the need, scope, and content of transportation analysis.

The City's *Handbook* mainly focuses on residential, employment, and retail uses and does not provide specific guidance on how to evaluate thresholds for hospital-related VMT analysis. However, in consultation with City staff the hospital and MOB components were evaluated as follows:

- Total regional VMT with and without the project for the hospital patients (home-based shop/other).
- Total regional VMT with and without the project for the medical office patients (home-based shop/other).
- Total regional VMT with and without the proposed project for the hospital employees (home-based work).
- Total regional VMT with and without the proposed project for the medical office employees (home-based work).

According to CEQA a project could have a significant transportation impact on the environment if it:

1. Conflicts with a plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle lanes, and pedestrian paths;
2. Conflicts or is inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(1);
3. Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment);
4. Results in inadequate emergency access.

Analysis Scenarios

Potential transportation impacts were evaluated for the following scenarios:

Scenario 1: *Year 2015 Existing Conditions* – Existing year 2015 conditions developed using the City's Travel Demand Forecasting model to determine baseline VMT and traffic volumes. The year 2015 is the base year for the City' Travel Demand Forecasting model and currently the best tool available for identifying Project VMT impacts.

Scenario 2: *Year 2015 Existing Plus Project Conditions* – Project impacts were evaluated using the City model to develop VMT projections with development of the Project.

[1] City of San José, 2023. Transportation Analysis Handbook. Available online at https://www.sanJoséca.gov/home/showdocument?id=28461. Accessed October 20, 2023.

Scenario 3: *Year 2040 Cumulative Plus Project Conditions* – The City model was used to develop boundary level VMT estimates.

City of San José Travel Demand Forecasting Model

The City of San José's travel demand forecasting model (City model) was used to develop near-term and Year 2040 VMT estimates. The City model is a refinement of the San Mateo City and County Association of Governments (C/CAG) and VTA Bi-County transportation model (VTA Model) and provides more analytical detail and enhanced local accuracy of travel in the City of San José. It was developed by Hexagon Transportations Consultants in collaboration with the City of San José and VTA. The City of San José provided the most recent copies of their Year 2015 and Year 2040 models for use in this analysis. We assume the City has fully calibrated their model and the model was used as-is.

The Year 2015 model is the most recently updated model available from the City and the best tool currently available. The Year 2040 model represents land use and transportation buildout consistent with the City's 2040 scenario. The Year 2015 model was used in the VMT analysis, and the Year 2040 model was used for the cumulative analysis. Traffic growth estimates were developed for the CEQA air and noise analyses but are not directly referenced in this report.

2015 Land Uses and Network Assumptions

The base year model was developed using year 2015 land use data from the City and validated against 2015 morning and evening peak hour traffic counts. Collector roads and residential streets were coded into the City model transportation network to provide additional analytical detail to the transportation system compared to the VTA model. For the purposes of this analysis the 2015 model was used without changes to develop baseline VMT and traffic projections.

2040 Land Uses and Network Assumptions

The future year 2040 model is the same model used for the 2018 Downtown Strategy Plan. For the Downtown Strategy Plan, the City's Department of Planning, Building, and Code Enforcement prepared 2040 land use forecasts for the City of San José that represent the City's General Plan. These forecasts are different from the ABAG projections used in the VTA Model. The San José General Plan assumes slightly fewer housing units but significantly more jobs in San José. In order to maintain consistency with the 2040 ABAG projections, the number of housing units and jobs for the transportation analysis zones (TAZs) outside Santa Clara County were adjusted (housing units were increased, and jobs were reduced) to match ABAG's regional control totals.

The City model includes all major transportation infrastructure identified in the *Envision San José 2040 Land Use/Transportation Diagram*, adopted by the City in November 2011, and the *Valley Transportation Plan 2040* (VTP 2040), adopted by VTA in October 2014.

Study Area

The City model evaluates VMT for trips that have an origin or destination within the Project area across the nine-county Bay Area. For the pedestrian, bicycle, and transit access discussions, the study area is focused within a half-mile of the Project area.

Report Organization

The following chapters are included in this report to meet City scope requirements for evaluating transportation impacts of the Project:

Chapter 1. Introduction includes the Project description, the study scope, and an overview of the report.

Chapter 2. Existing Conditions provides descriptions of the transportation system near the site including the primary roadway network, truck routes, transit service, pedestrian facilities, and bicycle facilities.

Chapter 3. Project Travel Demand describes the travel demand for the proposed Project, which was estimated using the City of San José's travel demand model.

Chapter 4. CEQA VMT Analysis describes the process used to estimate the existing and Project VMT and presents the results of the VMT analysis.

Chapter 5. Additional CEQA Transportation Analysis includes CEQA transportation impacts related to non-VMT significance criteria including conflicts with plans, ordinances, or policies, hazardous design features, and emergency vehicle access.

2. Existing Conditions

This chapter describes the Existing Conditions of the roadways, pedestrian and bicycle facilities, and transit service near the Project site. It also presents existing traffic volumes and operations for the study intersections.

Existing Street System

State Route 85 (SR 85) provides regional access to the Project site. Cottle Road, Santa Teresa Boulevard, Hospital Parkway, Camino Verde Drive, and International Circle, along with other nearby roadways, provide local site access. Each facility is described below in more detail. The existing roadway network and typologies per *Envision General Plan 2040* in the vicinity of the Project area are shown in **Figure 2-1**.

State Route 85 is an east-west freeway located north of the Project site with three travel lanes in each direction. One travel lane in each direction is designated as a high-occupancy vehicle (HOV) lane, in effect from 5:00 – 9:00 AM and 3:00 – 7:00 PM, Monday through Friday. SR 85 extends between US 101 to the east and west, and intersects with SR 17, I-280, and SR 87. Access to the Project site from SR 85 is provided via Cottle Road.

Cottle Road is a north-south roadway that is located west of the Project site with three travel lanes in each direction from its intersection with Santa Teresa Boulevard and north towards Monterey Highway. South of Santa Teresa Boulevard, Cottle Road transitions to one travel lane in each direction. Class II bike lanes are provided on both sides of the street north of Santa Teresa Boulevard. Cottle Road connects Monterey Highway to the north and connects Lovely Creek Court to the south. Two southbound left-turn pockets are provided along some blocks near the Project site. Cottle Road has City Connector Street topologies and a minor arterial functional class. The posted speed limit is 35 mph.

Santa Teresa Boulevard is an east-west roadway that is located south of the Project site with two to three travel lanes in each direction. Santa Teresa Boulevard connects SR 87 ramps to the west and Scheller Avenue to the east, where it becomes Hale Avenue. Class II bike lanes are provided on both sides of the street near the Project site. Santa Teresa Boulevard has City Connector Street typologies and a major arterial functional class. The posted speed limit is 45 mph.

Hospital Parkway is an east-west roadway with two travel lanes in each direction. Hospital Parkway runs from the hospital drop-off area to the east and Cottle Road to the west, where it becomes Palmia Drive. It is directly adjacent to the Project site and provides direct access to the Project site. Vehicles travelling eastbound on Hospital Parkway can make a U-turn at the hospital drop-off area and then exit in the westbound direction. Parking garages are provided north of Hospital Parkway. The posted speed limit is 25 mph.

Camino Verde Drive is a north-south roadway with two travel lanes in each direction. Camino Verde Drive connects International Circle to the north and Manila Drive to the south. It is directly adjacent to the Project site and provides direct access to the Project site via International Circle. Intersections along Camino Verde Drive are unsignalized, except for Santa Teresa Boulevard / Camino Verde Drive intersection. The posted speed limit is 25 mph.

International Circle is a two-way two-lane roadway that surrounds the Project site. It is directly adjacent to the Project site and connects to Liska Lane to the east, Hospital Parkway to the west, Camino Verde Drive to the south, and nearby parking garages. On-street parking is permitted on the southeast side of International Circle. The posted speed limit is 20 mph.

Beswick Drive/Raleigh Road is an east-west roadway that is located north of the Project site with two travel lanes in each direction. It runs parallel to SR 85 and connects to Great Oaks Boulevard to the east and Blossom Hill Road to the west, where it becomes Desert Sands Way. A two-way left-turn lane is provided along Raleigh Road between Autumn Meadow Drive and 400 feet east of Avenue One Drive. The posted speed limit on Beswick Drive is 35 mph, and the posted speed limit on Raleigh Road is 30 mph.

Existing Truck Routes

The City of San José does not have established truck routes; however, the City's *Municipal Code* Chapter 11.96 defines which streets have large vehicle prohibitions. Large vehicles are allowed on all streets adjacent to the Project site.

Existing Pedestrian Facilities

Pedestrian facilities are comprised of sidewalks and crosswalks. The streets adjacent to the Project site, including Cottle Road, Santa Teresa Boulevard, Hospital Parkway, Camino Verde Drive, and International Circle, have continuous sidewalks on both sides of the roadway.

All city study intersections have standard crosswalks for all directions of travel. Standard crosswalks are also provided at the CMP intersections including Cottle Road / State Route 85 NB on- / off-Ramp for the east and west legs of the intersection, and Cottle Road / State Route 85 SB off-Ramp for all legs except for the south leg. All study intersections provide curb ramps on approaches.

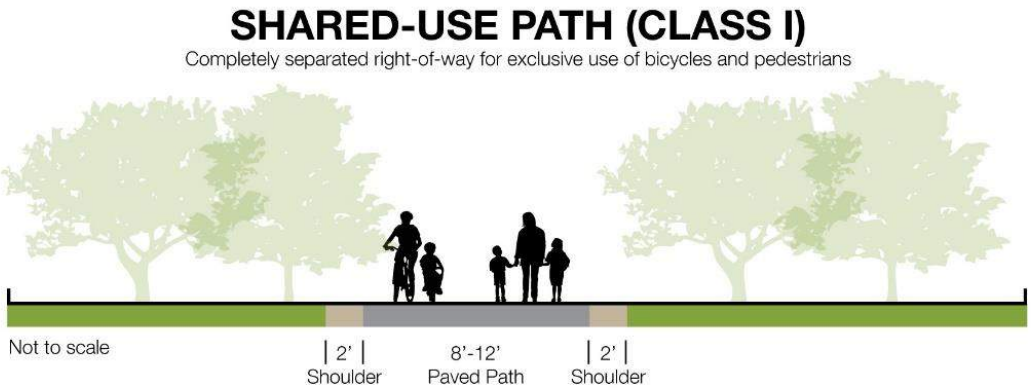
Roadway Classification

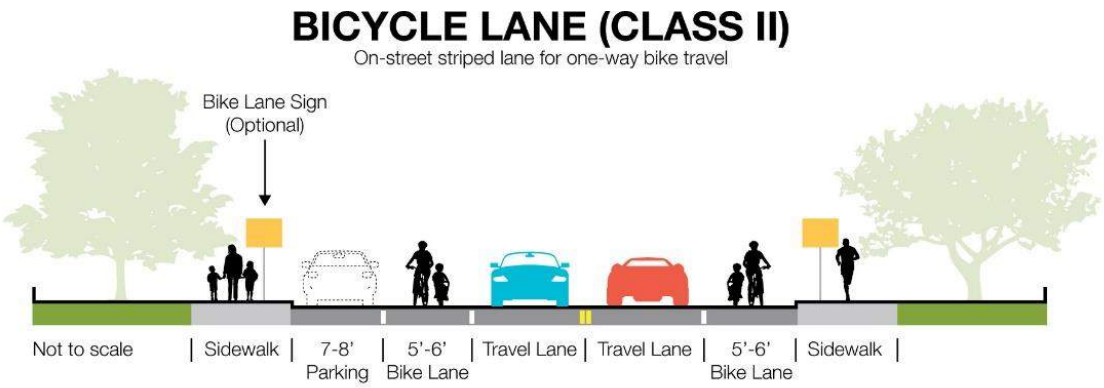
Existing Bicycle Network

The four classes of bicycle facilities in San José are described in the *Better Bike Plan 2025*. These descriptions are based on California Department of Transportation (Caltrans) classifications of bikeways from California Assembly Bill 1193 and the *Highway Design Manual* (Chapter 1000: Bikeway Planning and Design). Each bikeway class is intended to provide bicyclists with enhanced riding conditions. Bikeways offer various levels of separation from traffic based on traffic volume and speed, among other factors. The four bikeway types and appropriate contexts for each are presented below.

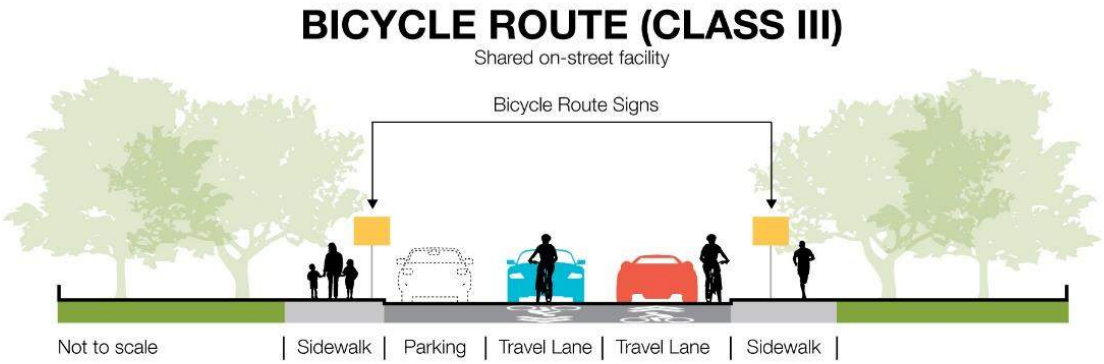
Class I Bikeways (Shared Use Paths): Shared-use paths, sometimes referred to as multi-use paths, provide completely separate right-of-way and are designated for the exclusive use of bicyclists and pedestrians with minimal roadway crossings. In general, shared-use paths are along corridors not served by streets or where sufficient right-of-way exists to allow them to be constructed away from the influence of vehicles. Class I Bikeways can also offer opportunities not provided by the road system by serving recreational areas and/or desirable commuter routes.



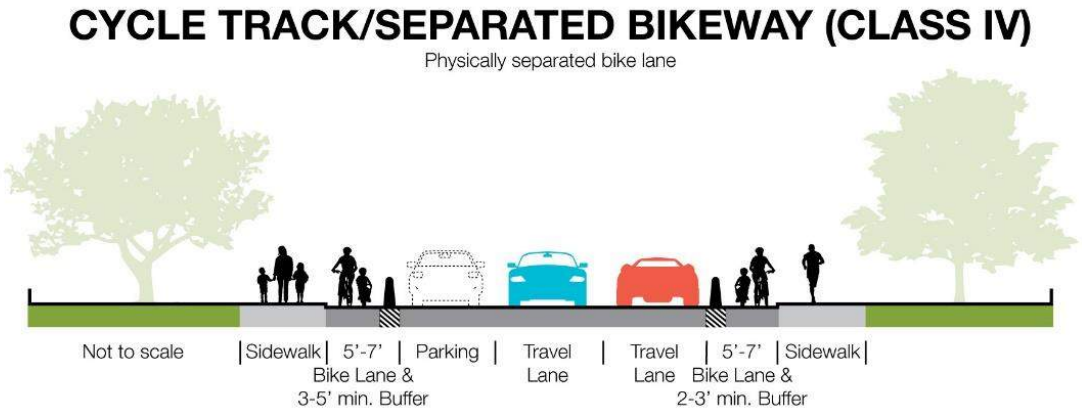
Class II Bikeways (On-Street Bike Lanes): Bike lanes provide a striped lane, pavement markings, and signage for one-way bike travel on a street or highway. Bicycle lanes are typically five feet wide, although wider lanes are desirable on roadways with high traffic volumes and/or high travel speeds. The *VTA Bicycle Technical Guidelines* (December 2012) recommends Caltrans bicycle lane dimension standards be used as a minimum and provides supplemental information and guidance on when and how to better accommodate the many types of bicyclists. Bike lanes may be enhanced with painted buffers between vehicle lanes and/or parking, and green paint at conflict zones (such as driveways or intersections).



Class III Bikeways (Bike Routes): Bike routes may be identified on a local residential or collector street when the travel lane is wide enough and the traffic volume is low enough to allow both cyclists and motor vehicles to share a lane and/or to provide continuity to a bikeway network. Shared-use arrows or "sharrows" are common striping treatments for bike routes.



Class IV Bikeways (Separated Bikeway): Separated bikeways, also referred to as cycle tracks or protected bikeways, are bikeways for the exclusive use of bicycles which are physically separated from vehicle traffic. Separated bikeways were adopted by Caltrans in 2015. Types of separation may include, but are not limited to, grade separation, flexible posts, physical barriers, or on-street parking.



Under California Law, bicyclists are allowed to use all roadways in California unless posted otherwise. Therefore, even for roadways without designated (or planned) bikeways, a majority are open for cycling.

Near the Project site, Cottle Road and Santa Teresa Boulevard provide Class II biking facilities for both directions of travel. A Class II bike lane runs down both directions of Santa Teresa Boulevard with frequent separation from traffic by a four-foot painted buffer. A Class IV protected bike lane runs down the east side of Cottle Road in the northbound direction between Hospital Parkway and Santa Teresa Boulevard. **Figure 2-2** displays these facilities. The *San José Better Bike Plan 2025* includes several bicycle facility improvements for road segments near the Project site. A Class II bike lane is proposed on Hospital Parkway and International Circle. A Class III bike boulevard where bikes are given priority is proposed on Palmia Drive to connect Hospital Parkway and Calero Avenue. Class IV protected bike lanes are proposed on Cottle Road and Santa Teresa Boulevard to replace the existing Class II bike lanes.

Existing Transit Service

Bus and light rail services in San José are operated by the VTA. **Table 2-1** summarizes the existing transit services for the Project, including the route start and end points, operating hours, and peak headways as reported on the VTA website in August 2023.

VTA currently runs bus routes 27 and 66 through the Medical Center. They travel counterclockwise through the site and enter and exit at the Santa Teresa Boulevard and Camino Verde intersection. Route 27 travels north/south on Cottle Road, while Route 66 travels west/east on Santa Teresa Boulevard. VTA also operates bus route 68 and Express 102 adjacent to the Medical Center on Santa Teresa Boulevard, while route 68 also travels north/south on Cottle Road. Bus stop locations that directly service the Medical Center are summarized below:

- Two bus stops inside the Medical Center for northbound Routes 27 and 66:
    - one unsheltered stop near the library parking lot just east of proposed parking garage, and
    - one unsheltered stop at the northern end of International Circle.
- Five bus stops adjacent to the Medical Center on Santa Teresa Boulevard:
    - one sheltered stop west of Cottle Road for westbound Routes 66 and Express 102,
    - two sheltered stops between Cottle Road and Camino Verde Drive for westbound and eastbound Routes 66, 68, and Express 102, and
    - two unsheltered stops east of Camino Verde Drive for westbound and eastbound Routes 68 and Express 102.
- Five bus stops adjacent to the Medical Center on Cottle Road for routes 27 and 68:
    - one unsheltered stop south of SR 85 for southbound Routes 27 and 68,
    - one sheltered stop south of SR 85 for northbound Routes 27 and 68,
    - two sheltered stops between SR 85 and Beswick Drive/Raleigh Road for northbound and southbound Routes 27 and 68, and
    - one unsheltered stop north of Beswick Drive/ Raleigh Road for southbound Routes 27 and 68.

The VTA Blue Line operates along State Route 85, with Cottle Station directly adjacent to the Medical Center. The bus routes, bus stops, light rail transit (LRT) lines, and LRT station are illustrated Figure 2-3.

Table 2-1: Existing Transit Service

Route[1]	From	To	Weekdays		Saturdays		Sundays	
			Operating Hours	Peak Headway[2] (minutes)	Operating Hours	Headway[2] (minutes)	Operating Hours	Headway[2] (minutes)
VTA Bus Service								
27	Winchester Station	Kaiser San José via Downtown Los Gatos	5:10 AM – 9:20 PM	30	8:00 AM – 7:45 PM	40	9:10 AM – 6:20 PM	60
66	North Milpitas	Kaiser San José	4:45 AM – 12:30 AM	15	5:15 AM – 12:30 AM	20	5:25 AM – 12:15 AM	20
68	San Jose Diridon Station	Gilroy Transit Center	4:15 AM – 1:20 AM	15	5:20 AM – 1:30 AM	20	5:20 AM – 1:30 AM	20
Express 102	South San Jose	Stanford Research Park	5:45 AM – 9:10 AM; 3:20 PM – 6:45 PM	30	N/A	N/A	N/A	N/A
VTA Light Rail								
Blue	Santa Teresa Station	Baypointe Station	4:30 AM – 1:15 AM	15	5:00 AM – 1:15 AM	30	5:00 AM – 1:15 AM	30

Notes:
1. Weekday and weekend service as of August 2023.
2. Headways are defined as the time between transit vehicles on the same route.

3. Project Travel Demand

This chapter discusses the travel demand for the proposed Project, which was estimated using the City of San José's travel demand model ("City model"). The City model produces estimates of both vehicle trips and person trips by mode for the AM and PM peak periods and distributes those trips and assigns them to various roadways (for vehicle trips) or transit lines (for transit trips).

Daily Trip Generation

Trip generation refers to the amount of travel activity associated with a change in land use at a given location. The City model uses City-specific trip generation characteristics of different land uses to estimate vehicle trips and person trips by mode including drive-alone, shared-ride, walking, bicycling, transit, and other.

The Project's land uses were allocated to the appropriate Transportation Analysis Zones (TAZs) based on their location. The City model adjusts the trip generation to account for internalization, or the trips among uses within the Project that are not expected to leave the Project area. Therefore, the trip generation is reported for the entire Project and is not broken down by specific land use. Because existing conditions in the Project area include active land uses, the Project's trip generation is assessed by taking the change in total trips between the 2015 no Project and plus Project conditions.

The proposed 35,000-square foot energy center would generate a negligible number of daily trips, since it is primarily intended to serve as accessory to the hospital; and therefore, thus not separately accounted for in the Project's travel demand and VMT estimates.

Table 3-1 shows the total number of average weekday daily vehicle trips. Based on the model structure the trip generation is reported for the entire Project and is not broken down by specific land use.

Table 3-1: Proposed Project Average Weekday Daily Vehicle Trips

Land Use	Existing No Project	Existing + Project	Net New Project Trips
Hospital and MOB	**16,400**	**35,000**	**18,600**

Notes:
Trip generation estimates are rounded to nearest 100.
Source: City of San Jose Model; Fehr & Peers, 2023.

As shown in **Table 3-1** the Project would generate approximately 18,600 total net new daily vehicle trips from the project-level and program-level components (i.e., hospital expansion and proposed MOB).

4. CEQA VMT Analysis

This chapter provides a description of the process used to estimate the existing and Project VMT and presents the results of the VMT analysis. VMT estimates are prepared using the City's base year 2015 model, which is the most current version of the model available. Model assumptions and calibration are summarized in **Chapter 1**.

VMT Evaluation

Vehicle miles traveled (VMT) can be a useful metric in understanding the overall effects of a project on the roadway system. It is the sum of each generated vehicle multiplied by the length of their trip to and from the site on an average weekday. For example, a vehicle driven one mile is one VMT. Therefore, a project with high VMT would have a greater effect on the roadway system than a project with low VMT.

SB 743 is California's law to replace Level of Service (LOS) with VMT in environmental review. This shift toward VMT aligns with San José's long-term goal of reducing drive-alone trips and increasing the use of walking, bicycling, and transit modes. The benefits of reducing drive-alone trips and increasing the use of other modes include reduced energy consumption, reduced greenhouse gas emissions, and support of healthier communities. Strategies from the *Envision San José 2040 General Plan* to address VMT include:

- TR-9.1: Enhancing and expanding walking and bicycle facilities to facilitate non-automobile trips
- TR-8.3 through TR-8.10: Supporting parking strategies such as parking supply limits, pricing, car share programs, and unbundled private off-street parking to encourage the use of non-automobile modes
- TR-7.1: Requiring large employers to develop and maintain Transportation Demand Management (TDM) programs to reduce vehicle trips
- TR-3.5 Increasing transit frequency and service along major corridors and to major destinations

The City of San José adopted Council Policy 5-1 and developed the *San José Transportation Analysis Handbook (2023)* to provide guidance on project screening criteria, thresholds of significance for environmental clearance for development projects, and methods for VMT analysis.

Screening Criteria

The City's VMT procedure includes screening criteria used to identify types, characteristics, and/or locations of projects that would not exceed CEQA thresholds of significance. If a project or component of a mixed-use project meets the screening criteria, it is presumed the project or component would result in a less-than-significant VMT impact, and a VMT analysis is therefore not required. The screening criteria categorize development projects as follows:

1. Small infill projects
2. Local-serving retail
3. Local-serving public facilities
4. Projects located in Planned Growth Areas with low VMT and High-Quality Transit
5. Deed-restricted affordable housing located in Planned Growth Areas with High-Quality Transit

A project or component of a mixed-use project that meets the associated screening criteria is exempted from performing a CEQA-level VMT analysis. The screening criteria are described in detail in the City's *Transportation Analysis Handbook*. Both the project-level and program-level components of the project do not meet the screening criteria and a detailed VMT analysis is required. Given the Project is not an office development or residential development, the VMT analysis was conducted using the City model in lieu of applying the City's VMT Evaluation Tool.

VMT Analysis Approach

It is assumed the hospital and medical office expansion would not cause an increase in trips regionally, but rather would result in a change in trip-making. The premise of the analysis is if medical uses are located at the Project area, then the Project's medical uses would shift medical demand from other similar locations. This is a typical analysis approach to evaluate the Project's effect on medical use VMT; the Project is not proposing to physically shift medical uses from other areas. Specific to the Project, it is assumed that some employees would leave their job at other hospitals and find employment at the expanded Kaiser San José Medical Center. Likewise, patients will choose to find treatment at Kaiser San José Medical Center instead of at other hospitals in the region. Thus, the estimated increase in hospital and MOB jobs was shifted from other hospitals in the region, which include the following:

- Santa Clara Valley Medical Center
- O'Connor Hospital
- Kaiser Permanente Santa Clara
- El Camino Health Los Gatos Hospital

Within the City model, hospital and MOB land uses are categorized using the service employment land use. The 822 hospital jobs and 1,000 MOB jobs (see **Table 1-1**) were added to TAZ 665[2]. Service employment jobs were removed from the TAZs that contain the four other hospitals listed above. The jobs shifted were directly proportional to the TAZ's service employment size and inversely proportional to the distance squared from the Kaiser San José Medical Center. **Table 4-1** summarizes the presumed service employment shift. The shifts in service population are also illustrated graphically on **Figure 4-1**.

[2] TAZ is roughly bound by SR 85 to the north, Miyuki Drive to the east, Santa Teresa Boulevard to the south, and Cottle Road to the west. The TAZ includes the Kaiser San Jose Campus, as well as gas station at the north-east corner of Santa Teresa Boulevard and residential uses to the east of the campus.

Table 4-1: Service Employment Shift at Other Hospitals

Hospital	TAZ[1]	Distance to TAZ 625[2]	1/ Dist^2	Weighted Average Distance	No Project Service Population[1]	Weighted Average Service Population	Factor[3]	Weighted Factor	Service Population Shift[4]	
									Hospital (822 employees)	MOB (1,000 employees)
Santa Clara Valley Medical Center	3034	11.3	0.008	0.364	1,304	0.327	0.119	0.419	-344	-419
O'Connor Hospital	775	15.8	0.004	0.182	1,154	0.289	0.053	0.187	-154	-187
Kaiser Santa Clara	95	19.0	0.003	0.136	212	0.053	0.007	0.025	-21	-25
El Camino Health Los Gatos	7	12.0	0.007	0.318	1,317	0.330	0.105	0.370	-304	-370

Notes:

Figure 4-1

Service Employment Shift

Significance Criteria

The City's *Handbook* mainly focuses on residential, employment, and retail uses and does not provide specific guidance on how to evaluate thresholds for hospital-related VMT analysis. However, in consultation with City staff the hospital and MOB components were evaluated as follows:

- Total regional VMT with and without the project for the hospital patients (home-based shop/other).
- Total regional VMT with and without the project for the medical office patients (home-based shop/other).
- Total regional VMT with and without the proposed project for the hospital employees (home-based work).
- Total regional VMT with and without the proposed project for the medical office employees (home-based work).

A significant impact is determined if the project increases either total VMT for either employees or patients/visitors.

Hospital VMT Analysis

Table 4-2 presents the total regional VMT comparison between Existing no Project conditions and Existing plus Project conditions for the hospital (project-level analysis), including the shifted demand from other locations within Santa Clara County as summarized in **Table 4-1**.

Based on the City's impact threshold of no net increase from regional employee and patient/visitor VMT, the Project would have **significant VMT impact for the hospital** for the following two thresholds since the total regional employee and patient/visitor VMT would increase with the proposed Project**:**

- Total regional VMT for hospital employees (home-based work)
- Total reginal VMT for hospital patients (home-based shop/other)

It should be noted that the increases in employment VMT is nominal and represent a less than one percent change in VMT.

Consistent with Council Policy 5-1 and the guidelines outlined in the City Handbook, the project will be required to prepare a transportation demand management plan to reduce the Project's effect on VMT.

Table 4-2: Hospital VMT Analysis Results

Metric	Existing No Project	Existing Plus Hospital	Absolute Difference	Percent Difference	Exceed VMT Threshold?
VMT Impact Evaluation Metrics					
Daily Work VMT from Employees	228,928	230,737	1,809	0.79%	yes
Daily Other VMT from Patients and Visitors	73,883	75,858	1,975	2.67%	yes
Additional VMT Metrics (Not For Impact Determination)					
Total Daily Hospital VMT	302,811	306,595	3,784	1.25%	n/a
Number of Hospital Employees[1]	15,063	15,063	0	0.00%	n/a
Daily Work VMT/Job	15.20	15.32	0.12	0.79%	n/a
Daily Other VMT/Job	4.90	5.04	0.14	2.86%	n/a
Daily VMT/Job	20.10	20.36	0.26	1.29%	n/a

Notes:
1. Since the VMT analysis is shifting jobs from other TAZs to the Project TAZ as outlined in Table 4-1, the total number of jobs in the region remains the same between the No Project and Plus Hospital scenarios.

Source: City of San José Model, December 2023.

Hospital and MOB VMT Analysis

Table 4-3 presents the total regional VMT comparison between Existing no Project conditions and Existing plus Project conditions for both the hospital (project-level analysis) and the MOB (program-level analysis), including the shifted demand from other locations within Santa Clara County as summarized in **Table 4-1**.

Based on the City's impact threshold of no net increase from regional employee and patient/visitor VMT, the Project would have **significant VMT impact for the hospital and MOB uses** for the following two thresholds, since the total regional employee and patient/visitor VMT would increase with the proposed Project**:**

- Total regional VMT for hospital and MOB employees (home-based work)
- Total reginal VMT for hospital and MOB patients (home-based shop/other)

Consistent with Council Policy 5-1 and the guidelines outlined in the City Handbook, the project will be required to prepare a transportation demand management plan to reduce the Project's effect on VMT.

Table 4-3: Hospital and MOB VMT Analysis Results

Metric	Existing No Project	Existing Plus Hospital and MOB	Absolute Difference	Percent Difference	Exceed VMT Threshold?
VMT Impact Evaluation Metrics					
Daily Work VMT from Employees	228,928	232,938	4,010	1.75%	yes
Daily Other VMT from Patients and Visitors	73,883	78,261	4,378	5.93%	yes
Additional VMT Metrics (Not For Impact Determination)					
Total Daily Hospital + MOB VMT	302,811	311,199	8,388	2.77%	n/a
Number of Hospital + MOB Employees[1]	15,063	15,063	0	0.00%	n/a
Daily Work VMT/Job	15.20	15.47	0.27	1.78%	n/a
Daily Other VMT/Job	4.90	5.20	0.30	6.12%	n/a
Daily VMT/Job	20.10	20.66	0.56	2.79%	n/a

Notes:
1. Since the VMT analysis is shifting jobs from other TAZs to the Project TAZ as outlined in Table 4-1, the total number of jobs in the region remains the same between the No Project and Plus Hospital scenarios.

Source: City of San José Model, December 2023.

Mitigation Measures

Consistent with VMT strategies TR-7.1 from the *Envision San José 2040 General Plan,* Kaiser will be required to develop and maintain a TDM programs to reduce vehicle trips. The City model does not account for the effectiveness of TDM programs and hardscape multimodal improvements. To mitigate the VMT from **Table 4-2** and **Table 4-3**, we used the *San Jose VMT Evaluation Tool* (updated in April 2023) to evaluate the effectiveness of programmatic TDM measures and hardscape multimodal improvement elements in reducing the Project's VMT. The tool was not developed for use on hospital projects or total VMT, thus we made some assumptions to apply the tool:

1. Convert Project trip rates to equivalent square feet of office. This included converting daily trips for hospital employees, hospital patients/visitors, MOB employees, and MOB patients/visitors into equivalent office square footage. As noted, the tool does not include hospital or MOB uses and focuses on standard office uses. Since the proposed Project is not an office development project, the trip generation rates for the hospital and MOB were back calculated into equivalent office square footage (i.e., how many square feet of office would generate the same amount of trips as the hospital or MOB).
2. Reduction percentage. Since the tool uses VMT per employee metric for office land use and the hospital and MOB were evaluated for total VMT, we evaluated TDM effectiveness based on percent reduction.

The VMT reduction reports along with calculation of converting to equivalent office square footage for the Project are presented in **Appendix A**.

The commute trip reduction marketing/education measure from Tier 4 – TDM Programs was applied to the Project. It was assumed that 25% of eligible employees would participate in the program. For the hospital only scenario, the VMT would be reduced by 5.53 percent for employees and for the Hospital plus MOB scenario, employee VMT would be reduced by 9.31 percent. Since, the commute trip reduction marketing/ education measure are targeted at employees, the programmatic TDM elements would not address VMT for patients/visitors.

Table 4-4 summarizes the VMT percent increases (from **Table 4-2** and **Table 4-3**) and the TDM effectiveness for the programmatic TDM program elements for the commute trip reduction marketing/education TDM measure. As shown in **Table 4-4**, the VMT reduction from the commute trip reduction marketing/education TDM measure would reduce the VMT impact to less than significant levels for all scenarios, except for the patient/visitor VMT for both the hospital only and hospital plus MOB scenarios.

Table 4-4: TDM Effectiveness – Programmatic TDM Elements

Metric	Hospital	TDM Effectiveness – Hospital	Reduce VMT Impact	Hospital + MOB	TDM Effectiveness – Hospital	Reduce VMT Impact
Daily Work VMT from Employees	0.79%	5.53%	Yes	1.75%	9.31%	Yes
Daily Other VMT from Patients and Visitors	2.67%	0.00%	**No**	5.93%	0.00%	**No**

Source: *San Jose VMT Evaluation Tool* (updated in April 2023; Fehr & Peers, 2023.

To address the patient/visitor VMT impact hardscape multimodal improvements are required. Assuming off-site pedestrian improvements, the TDM effectiveness would be 4.79 percent for the hospital only scenario and 6.49 percent for the hospital plus MOB scenario; thus the patience/visitor VMT impact would be reduced the less-than-significant levels as shown in **Table 4-5**.

Table 4-5: TDM Effectiveness – Programmatic TDM Elements Plus Hardscape Multimodal Improvements

Metric	Hospital	TDM Effectiveness – Hospital	Reduce VMT Impact	Hospital + MOB	TDM Effectiveness – Hospital	Reduce VMT Impact
Daily Work VMT from Employees	0.79%	7.39%	Yes	1.75%	11.11%	Yes
Daily Other VMT from Patients and Visitors	2.67%	4.79%	Yes	5.93%	6.49%	Yes

Source: *San Jose VMT Evaluation Tool* (updated in April 2023; Fehr & Peers, 2023.

5. Additional CEQA Transportation Analysis

CEQA transportation analysis requires an evaluation of a project's potential impacts related to VMT and other significance criteria. This chapter addresses the transportation impacts related to the other significance criteria: a project could have a significant transportation impact on the environment if it:

1. Conflicts with a plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle lanes, and pedestrian paths;
2. Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment); or
3. Results in inadequate emergency access.

CEQA analysis requirements related to VMT (i.e., conflicts or is inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(1)) are addressed in the previous chapter.

Conflicts with a Plan, Ordinance, or Policy

General Plan Consistency

According to *San José Transportation Analysis Handbook (2023)*, projects must demonstrate consistency with the *Envision San José 2040 General Plan*, referred to as the General Plan, to address cumulative impacts. The determination of consistency with the General Plan includes a project's density, design, and conformance to the goals and policies set forth in the General Plan. This section describes the land use and transportation goals in the General Plan and the Project's consistency with those goals.

The goals for hospital and medical uses outlined in the General Plan include providing good access to quality medical services. The Geneal Plan notes that access to medical services via public transportation is critical to promote equity. Goal ES-6 – Access to Medical services, includes policies to provide for health care needs of all members of the San Jose Community.

The transportation goals in the General Plan aim to complete and maintain a multimodal transportation system with the emphasis on improvements to pedestrian and bicycle facilities, to maximize efficiency of the existing street system, and to reduce the number of vehicle miles traveled. As described in the Existing Conditions chapter and shown on **Figure 2-3**, the Project is located within a half-mile radius VTA's Blue Line light rail stop, and is easily accessible via several bus routes on stops internal to the site on International Circle, as well as along the Project perimeter along Santa Teresa Boulevard and Cottle Road. The bicycle improvements for the Project include improving existing bicycle facilities around the Project perimeter and adding new Class II bike lanes on Camino Verdo Drive north of Santa Teresa Boulevard.

The Project is consistent with the General Plan transportation policies in **Table 5-1** and is considered to have a less-than-significant General Plan conflict impact.

Table 5-1: Envision San José 2040 General Plan Land Use and Transportation Policies

Goal TR-1	***Balanced Transportation System: Complete and maintain a multimodal transportation system that gives priority to the mobility needs of bicyclists, pedestrians, and public transit users while also providing for the safe and efficient movement of automobiles, buses, and trucks.***
TR-1.1	Accommodate and encourage use of non-automobile transportation modes to achieve San José's mobility goals and reduce vehicle trip generation and vehicle miles traveled (VMT).
TR-1.2	Consider impacts on overall mobility and all travel modes when evaluating transportation impacts of new developments or infrastructure projects.
TR-1.3	Increase substantially the proportion of commute travel using modes other than the single-occupant vehicle. The 2040 commute mode split targets for San José residents and workers are presented in the following table.
TR-1.4	Through the entitlement process for new development, projects shall be required to fund or construct needed transportation improvements for all transportation modes giving first consideration to improvement of bicycling, walking and transit facilities and services that encourage reduced vehicle travel demand.
TR-1.6	Require that public street improvements provide safe access for motorists and pedestrians along development frontages per current City design standards.
Goal TR-2	***Walking and Biking: Improve walking and bicycling facilities to be more convenient, comfortable, and safe, so that they become primary transportation modes in San José.***
TR-2.1	Coordinate the planning and implementation of citywide bicycle and pedestrian facilities and supporting infrastructure. Give priority to bicycle and pedestrian safety and access improvements at street crossings (including proposed grade-separated crossings of freeways and other high vehicle volume roadways) and near areas with higher pedestrian concentrations (school, transit, shopping, hospital, and mixed-use areas)
TR-2.3	Construct crosswalks and sidewalks that are universally accessible and designed for use by people of all abilities.
TR-2.8	Require new development where feasible to provide on-site facilities such as bicycle storage and showers, provide connections to existing and planned facilities, dedicate land to expand existing facilities or provide new facilities such as sidewalks and/or bicycle lanes/paths, or share in the cost of improvements.
Goal TR-3	***Maximize Use of Public Transit: Maximize use of existing and future public transportation services to increase ridership and decrease the use of private automobiles.***
TR-3.4	Maintain and improve access to transit stops and stations for mobility challenged population groups such as youth, the disabled, and seniors
Goal TR-5	***Vehicular Circulation: Maintain the City's street network to promote the safe and efficient movement of automobile and truck traffic while also providing for the safe and efficient movement of bicyclists, pedestrian, and transit vehicles.***

Table 5-1: Envision San José 2040 General Plan Land Use and Transportation Policies

TR-5.3	Development projects' effects on the transportation network will be evaluated during the entitlement process and will be required to fund or construct improvements in proportion to their impacts on the transportation system. Improvements will prioritize multimodal improvements that reduce VMT over automobile network improvements.
Goal TR-8	***Parking Strategies***
TR-8.2	Balance business viability and land resources by maintaining an adequate supply of parking to serve demand while avoiding excessive parking supply that encourages automobile use.
Goal TR-9	***Reduction of Vehicle Miles Traveled (VMT): Reduce VMT per service population by 20% (2030 goal) and by 45% (2040 goal), from the 2017 levels.***
TR-9.1	Enhance, expand and maintain facilities for walking and bicycling to provide neighborhoods with safe and direct access to transit and key destinations, a particularly to provide neighborhoods with safe and direct access to transit and key destinations, a complete alternative transportation network that facilitates non-automobile trips, and enjoyable outdoor open space.

Note:
Source: *Envision San José 2040 General Plan*, July 2023.

Better Bike Plan 2025 Consistency

The City of *San José Better Bike Plan 2025* was adopted in October 2020. The Better Bike Plan lays out a vision for a safe and connected network of on-street bikeways to empower people of all ages and abilities to travel by bicycle. This includes an assessment of the current biking environment and the network connections, projects, bikeway designs, and policies needed to improve biking in San José. Projects listed in the Better Bike Plan that are near the Project area include the implementation of a Class IV protected bike lanes on Santa Teresa Boulevard and Cottle Road, which the Project is implementing along its Project frontage. Thus, the Project is consistent with the *Better Bike Plan 2025* and does not interfere with existing or proposed bicycle access near the site.

San José Complete Streets Design Standards & Guidelines Consistency

The *San José Complete Streets Design Standards & Guidelines* were developed as a comprehensive set of street design standards and guidelines to inform how the City of San José builds and retrofits streets. The guidelines in the document presents standards for the design and implementation of streets that are comfortable and welcoming for all modes of travel in accordance with the City's Vision Zero initiative.

The complete street design standards and guidelines vary depending on roadway typology and context of the built environment. For example, Downtown areas are characterized by intensive office, retail, service, residential, and entertainment land uses. Transit usage and pedestrian activity are given primary emphasis over automobile activity in this context. The designs standards and guidelines refer to the typology designation in the 2040 General Plan. The Project will implement any roadway design changes consistent with the City's *Design Standards & Guidelines* and is consistent with that document.

Hazardous Design Features

The Project is not proposing any street network changes. All roadway access improvements, such as new hospital and garage driveways, would need to comply with the City of San José's *Complete Streets Design & Guidelines* (May 2018), which include design specifications to ensure safe and efficient travel of vehicles, bicycles, pedestrians, and transit vehicles. Within the Local Transportation Analysis (LTA) report created under a separate cover for this Project, stopping sight distance was analyzed at the proposed driveways per the Caltrans' *Highway Design Manual, 6th Edition (2019)* and no additional countermeasures are needed. For this reason, the proposed Project would not introduce any geometric design features or incompatible uses, and this impact would be less-than-significant.

Emergency Access

Efficient operations of City streets help to reduce response times for emergency responders including San José Police and Fire Department personnel, as well as private ambulance services.

The emergency access assessment was conducted to determine if the Project has the potential to impact emergency vehicle access by creating conditions that would substantially affect the ability of drivers to yield the right-of-way to emergency vehicles, or preclude the ability of emergency vehicles to access streets within the Project area. An emergency response time impact is considered significant if implementation of the Project would provide inadequate access to accommodate emergency vehicles.

Hospital Ambulance Vehicle Access

With the proposed new Hospital, the ambulance emergency access to the Medical Center would shift from its location along the northern section of International Circle to the new hospital, which would be located at the south-eastern corner of the Cottle Road/Hospital Parkway intersection. In the proposed location, an ambulance would have a shorter and more direct route to the emergency room, since they would no longer need to circulate internal to the Medical Center and can directly access it from Cottle Road via the Hospital Parkway intersection.

Congestion

The increases in vehicle, bicycle, and pedestrian demand associated with the Project would not substantially affect emergency vehicle access patterns; however, the additional vehicles would increase intersection delays, especially in the immediate vicinity of the Project area. At intersections, emergency vehicle access would not be significantly impacted for the following reasons:

a. The City of San José has implemented a citywide emergency vehicle preemption (EVP) system operated on optical sensors installed at existing signalized intersections. These are no longer being maintained by the City because of the switch to a central control system using GPS positions for City of San José Fire and Police vehicles. However, emergency ambulances are not included in the City's cloud-based EVP system since they are separately owned, and

b. California law requires drivers to yield the right-of-way to emergency vehicles and remain stopped until the emergency vehicle passes.

Multi-lane roadways, such as Santa Teresa Boulevard and Cottle Road, provide for higher speed emergency vehicle access and room for traffic to more easily move out of the path of emergency vehicles.

In addition, *Envision San José 2040 General Plan* specifies policies to ensure the City maintains adequate emergency response times, and that developments of fire service facilities and delivery keep pace with development and growth in the City. Specific General Plan policies include:

- **ES-3.1**: Provide rapid and timely level of service response times to all emergencies.
- **ES-3.3**: Locate police and fire service facilities so that essential services can most efficiently be provided and level of service goals met. Ensure that the development of police and fire facilities and delivery of services keeps pace with development and growth of the City.
- **ES-3.6**: Work with local, state, and federal public safety agencies to promote regional cooperation in the delivery of services. Maintain mutual aid agreements with surrounding jurisdictions for emergency response.
- **ES-3.13**: Maintain emergency traffic preemption controls for traffic signals.
- **ES-3.21**: Create long-range funding and deployment strategies for expanding and maintaining police and fire facilities and operations to address service delivery demands from new population growth.
- **ES-3.22**: Maintain the City's Fire Department Strategic Plan as a tool to achieve Envision General Plan Level of Service and other related goals and policies. Base fire station location planning on a four-minute travel radius.

Emergency Access Summary

For the reasons described above, the proposed project would not result in inadequate emergency access, and this impact would be less-than-significant impact.

Appendix A:
VMT Evaluation Tool Reports

Table A1: Daily Vehicle Trips

Visitor Type	Plus Hospital[1]	Plus MOB[1]	Total[2]
Employees	8,406	10,226	18,632
Patients and Visitors	3,854	4,688	8,542

Notes:
1. Assume that the site adds 1,822 employees in total. The hospital adds 822 employees and MOB add 1,000 employees. Daily vehicle trips associated with hospital and MOB for employees and patients and visitors are proportionate to the number of attracted employees.
2. Total daily vehicle trips are estimated from City model. Total vehicle trips for employees are home-based work attracted trips and total vehicle trips for patients and visitors are the difference between home-based work attracted trips and home-based attracted trips.
Source: Source: Fehr & Peers, 2023.

Table A2: Project-Level Unit Conversion to Equivalent Office Size

ITE Land Use (Code)	Size	Unit[1]	Daily	
			Rate[2]	Trips
Employees				
Hospital (610)	-	-	-	8,406
Office (710)	775.45[3]	KSF	10.84	8,406
Patients and Visitors				
Hospital (610)	-	-	-	3,854
Office (710)	355.51[3]	KSF	10.84	3,854
Office Total	**1,130.96**	**KSF**		

Notes:
1. KSF = one thousand square feet.
2. Trips per KSF for office. Average rates from *ITE Trip Generation Manual, 11th edition*.
3. Equivalent office size calculated as daily trips generated by the proposed hospital uses divided by office average daily rates.
Source: Source: Fehr & Peers, 2023; *ITE Trip Generation Manual, 11th Edition*, 2021, average trip generation rates.

Table A3: Program-Level Unit Conversion to Equivalent Office Size

ITE Land Use (Code)	Size	Unit[1]	Daily	
			Rate[2]	Trips
Employees				
Hospital (610)	-	-	-	8,406
MOB (720)	-	-	-	10,226
Office (710)	1,718.82[3]	KSF	10.84	18,632
Patients and Visitors				
Hospital (610)	-	-	-	3,854
MOB (720)	-	-	-	4,688
Office (710)	788.01[3]	KSF	10.84	8,542
Office Total	**2,506.83**	**KSF**		

Notes:
1. KSF = one thousand square feet.
2. Trips per bed for hospital, trips per KSF for MOB and office. Average rates from *ITE Trip Generation Manual, 11th edition*.
3. Equivalent office size calculated as daily trips generated by the proposed hospital and MOB uses divided by office average daily rates.
Source: Fehr & Peers, 2023; *ITE Trip Generation Manual, 11th Edition*, 2021, average trip generation rates.

CITY OF SAN JOSE VEHICLE MILES TRAVELED EVALUATION TOOL SUMMARY REPORT

PROJECT:

Name: Kaiser South San Jose (Project-Level Employees) Tool Version: 2/29/2019
Location: 250 Hospital Pkwy, San Jose, CA 95119-1103 Date: 12/22/2023
Parcel: 70605037 Parcel Type: Suburb with Single-Family Homes

Proposed Parking Spaces Vehicles: 1,040 Bicycles: 74

LAND USE:

Residential:		Percent of All Residential Units	
Single Family	0 DU	Extremely Low Income (≤ 30% MFI)	0 % Affordable
Multi Family	0 DU	Very Low Income (> 30% MFI, ≤ 50% MFI)	0 % Affordable
Subtotal	0 DU	Low Income (> 50% MFI, ≤ 80% MFI)	0 % Affordable
Office:	775.5 KSF		
Retail:	0 KSF		
Industrial:	0 KSF		

VMT REDUCTION STRATEGIES

Tier 1 - Project Characteristics

Increase Residential Density
- Existing Density (DU/Residential Acres in half-mile buffer) 7
- With Project Density (DU/Residential Acres in half-mile buffer) 7

Increase Development Diversity
- Existing Activity Mix Index 0.55
- With Project Activity Mix Index 0.64

Integrate Affordable and Below Market Rate
- Extremely Low Income BMR units . . . . . 0 %
- Very Low Income BMR units . . . . . 0 %
- Low Income BMR units . . . . . 0 %

Increase Employment Density
- Existing Density (Jobs/Commercial Acres in half-mile buffer) 20
- With Project Density (Jobs/Commercial Acres in half-mile buffer) 41

Tier 2 - Multimodal Infrastructure

Tier 3 - Parking

End of Trip Bike Facilities
- Bicycle Parking Spaces Provided by Project . . . . . 74 spaces
- Project Provides Additional End-of-Trip Facilities Beyond Parking? . . . . . Yes

Tier 4 - TDM Programs

Commute Trip Reduction Marketing/ Education
- Percent of Eligible Employees . . . . . 25 %

EMPLOYMENT ONLY

The tool estimates that the project would generate per non-industrial worker VMT and per industrial worker VMT above the City's threshold.

1. Introduction

This report presents the results of the Local Transportation Analysis (LTA) for the Kaiser San José Medical Center Master Plan and New Hospital development at 250 Hospital Parkway in San José, California. The City of San José Transportation Analysis Policy (Council Policy 5-1) requires projects to perform an LTA to demonstrate conformance with multimodal transportation strategies, goals, and policies in the General Plan, and to address adverse effects to the transportation system. The LTA evaluates the effects of a development project on transportation, access, circulation, and related safety elements in the proximate area of the Project. An LTA also establishes consistency with the General Plan policies and goals through the following three objectives:

1. Ensures the local transportation system is appropriate for serving the types, characters, and intensity of the surrounding land uses;
2. Encourages projects to reduce personal motorized vehicle trips and increase alternative transportation mode share; and
3. Addresses issues related to operations and safety for all transportation modes, with trade-offs guided by the General Plan street typology.

Consistent with the City of San José Transportation Analysis Policy (Council Policy 5-1), adverse effects were evaluated following guidelines from the City of San José's *Transportation Analysis Handbook* (2023) ("Handbook"), direction from City staff, and the Santa Clara Valley Transportation Authority (VTA), the congestion management agency for Santa Clara County. **Figure 1-1** shows the location of the Project site, the surrounding transportation network and study intersections.

A separate Transportation Analysis (TA) report was also prepared for the City of San José per Council Policy 5-1 to address the Project's potential impacts related to VMT and other CEQA significance criteria. The LTA was prepared to address specific circulation metrics as part of the City's development application purposes and is not prepared for CEQA purposes. This chapter discusses Project description, study area, analysis scenarios and methods, and report organization.

Project Description

The San José Kaiser Medical Center is located at the Cottle Road/Hospital Parkway intersection just south of the State Route 85 and Cottle Road interchange (see **Figure 1-1**). The Project is located within the designated Santa Teresa Boulevard and Cottle Road Urban Village per the Envision San Jose 2040 General Plan.

Land Use Program

As part of the seismic replacement, Kaiser plans to demolish the existing approximately 250,000 square-foot (s.f.) main hospital building at the center of the Medical Center and add a 685,000 s.f. new hospital building[1], a 35,000 s.f. energy center (central utilities plant (CUP)), and 1,040 parking spaces. Of the 1,040 spaces, 1,015 are provided in a new structure on existing surface parking lots near the south and southwest areas of the Medical Center and 25 surface parking spaces are provided adjacent to the hospital. In total, the hospital replacement Project would increase the number of beds from 247 licensed beds up to potentially 303 beds, a net increase of up to 56 beds. The existing hospital would remain in operation until the construction and occupation of the new hospital. After occupation of the new hospital the old hospital would be decommissioned.

In addition, Kaiser has long-term plans to demolish a total of 20,200 s.f. of existing MOB uses and construct a 250,000 s.f. MOB (for a new increase of 229,800 s.f. of MOB). The long-term plans also include the construction of a new 2,557-stall parking garage.

The Project is divided into the Project-level and Program-level components as outlined below:

- **Project-level**: 685,000 s.f. new hospital building (303 beds), 35,000 s.f. CUP, and 1,040 parking spaces. Of the 1,040 spaces, 1,015 spaces are provided in a the new five-level parking garage and 25 at grade surface parking spaces are provided the new hospital site)
- **Program-level**: 250,000 s.f. MOB, and installing an additional 1,046 parking spaces

In addition, the Project is providing 26 short-term bicycle parking spots (open bike racks near building entries) and 48 long-term bicycle parking spots. The transportation effects of the hospital (Project-level components) and MOB uses (Program-level components) are evaluated in both the near-term and future scenarios. The site plan for the project-level components is presented in **Figure 1-2**. These have also been summarized in **Table 1-1**.

[1] The existing 250,000 s.f. hospital will remain operational during the construction of the new hospital, before slowly decommissioning after construction gets completed.

Table 1-1: Proposed Medical Center Land Use Program

Project Component	Existing	Proposed	Net New
Hospital, Energy Center, and Parking Garage			
Hospital	250,000 sf	685,000 sf	+435,000 sf
-Beds	247 beds	303 beds	+56 beds
-Employees	2,055	2,877	+822
Energy Center	—[1]	35,000 sf	+35,000 sf
Parking Structure	606 spaces[2]	1,040 spaces[3]	+434 spaces
-Structure Size	—	350,000 sf	+350,000 sf
Total	***250,000 sf***	***1,139,320 sf***	***+889,320 sf***
Projected MOB Improvements			
Medical Office	425,000 sf[4]	250,000 sf (4–6 stories)	229,800 sf[5]
Employees	1,700	2,700	1,000
Parking	1,982 spaces[6]	2,557 spaces[7]	575 spaces

Notes:
1. The existing energy center is part of the hospital's 250,000 sf.
2. Includes only surface parking spaces displaced by the new hospital and parking garage.
3. 1,015 spaces in the five-level parking garage and 25 at grade spaces at the new hospital site
4. 20,200 sf of medical office would be demolished.
5.(20,200 sf) demolished + 250,000 sf new construction = 229,800 net new sf
6. Includes 471 surface parking spaces displaced by the new medical office and parking garage.
7. 1,982 existing spaces retained – 471 spaces displaced + 1,046 new spaces = 2,557 spaces
Source: Kaiser Permanente, 2023.

Transportation Improvements

The Proposed Project includes several transportation improvements that will be implemented as part of the project.

- Upgrade bus shelter on Santa Teresa Boulevard along project frontage
- Upgrade Class II bike lanes to protected Class IV bike lanes along project frontage on Santa Teresa Boulevard and Cottle Road, consistent with *San José Better Bike Plan 2025* (City of San Jose, 2020)
- Provide new Class II bike lanes on Camino Verde Drive between Santa Teresa Boulevard and International Circle.
- Remove channelized right-turns at the following intersections for the specified movements:
  - Cottle Road/Palmia Drive-Hospital Parkway: westbound right-turn and northbound right turn
  - Santa Teresa Boulevard/Camino Verde Drive: southbound right-turn and westbound right-turn
- Remove mid-block enhanced crosswalk with Rectangular Rapid-Flashing Beacons (RRFBs) along International Circle between Hospital Parkway and Camino Verde; since there no longer is a need to facilitate pedestrian crossing between the removed parking lot on the west side of International Circle to the MOB uses on the east side.

These improvements will provide enhanced multimodal access.

Proposed Site Plan

Study Area

Because of the Project's location in South San José, the LTA study area focuses on transportation facilities closest to the Project site. The study area is generally bound by Raleigh Road-Beswick Drive to the north, Camino Verde Drive to the east, Santa Teresa Boulevard to the south, and Cottle Road to the west.

Study Intersections

Study intersections are selected based on project location, expected directions of travel to and from the project, and the projected amount of traffic that will be added to intersections. The following intersections within the City of San José were analyzed. Intersections are signalized unless noted otherwise.

1. Cottle Road / Beswick Drive
2. Cottle Road / State Route 85 NB On- / Off-Ramp*
3. Cottle Road / State Route 85 SB Off-Ramp*
4. Cottle Road / Palmia Drive-Hospital Parkway
5. Cottle Road / Santa Teresa Boulevard*
6. Hospital Parkway / International Circle (all-way stop-controlled)
7. Camino Verde Drive / International Circle (all-way stop-controlled)
8. Santa Teresa Boulevard / Camino Verde Drive

* Congestion management program (CMP) intersections

The study intersections are also shown on **Figure 1-1**.

Analysis Scenarios

The analysis was conducted during the morning peak hours between 7:00 and 9:00 AM, and the evening peak hours between 4:00 and 6:00 PM, for the following scenarios:

Scenario 1: *Existing Conditions* – Existing traffic volumes obtained from counts.

Scenario 2: *Background Conditions* – Existing volumes plus traffic from "approved but not yet built" and "not occupied" developments in the area as summarized in the City's Approved Trip Inventory (ATI).

Scenario 3: *Background Plus Project Conditions* – Scenario 2 volumes plus traffic generated by the proposed Project-level components (i.e., hospital and associated CUP and parking garage).

Scenario 4: *Cumulative Conditions* – Scenario 2 volumes plus traffic from pending developments in the area as summarized in the City's Approved Trip Inventory (ATI).[2]

[2] Cumulative No Project volumes typically include trips from approved developments (i.e., Scenario 2) plus trips from pending developments. There are currently no pending developments in the area and Cumulative No Project trips are the same as Background No Project trips.

Scenario 5: *Cumulative Plus Project Conditions* – Scenario 4 volumes plus traffic generated by both the Project-level and Program-level components (i.e., hospital plus medical office building)

Report Organization

This report is divided into seven additional chapters as described below:

- **Chapter 2 – Analysis Methods and Deficiency Criteria** presents the analysis methods for study intersections.
- **Chapter 3 – Existing Conditions** describes the transportation system near the Project site, including the surrounding roadway network, morning and evening peak hour turning movement volumes at the study intersections, existing bicycle, pedestrian, and transit facilities, intersection queuing analysis, and field observations.
- **Chapter 4 – Background No Project Conditions** presents the intersection operations and queuing without the Project under Background Conditions.
- **Chapter 5 – Project Traffic Estimates** describes the Project trip generation, trip distribution, and assignment methods for the study intersections.
- **Chapter 6 – Background Plus Project Conditions** presents the intersection operations and queuing with the Project under Background Conditions.
- **Chapter 7 – Cumulative Conditions** presents the intersection operations and queuing with and without the Project under Cumulative Conditions.
- **Chapter 8 – Multimodal Access and On-Site Circulation** describes Project access and circulation for all travel modes.
- **Chapter 9 – Transportation Deficiencies and Improvements** presents the transportation effects of the Project based on the deficiency criteria and identifies improvements to address Project caused deficiencies in the study area.

2. Analysis Methods and Deficiency Criteria

The analysis methods used to evaluate intersection operations are described in this chapter. The determination of acceptable operating conditions is based on policies, regulations, goals, and guidelines defined by the City of San José. The operational thresholds are also presented in this chapter.

Analysis Methods and Thresholds

Signalized Intersections Level of Service and Queuing Analysis

The operations of roadway facilities are described with the term level of service (LOS), a qualitative description of vehicular traffic flow based on factors such as speed, travel time, delay, and freedom to maneuver. Six levels are defined from LOS A, which reflects free-flow conditions where there is very little interaction between vehicles, to LOS F, where the vehicle demand exceeds the capacity and high levels of vehicle delay result. LOS E represents "at-capacity" operations. When traffic volumes exceed the capacity at a signalized intersection, vehicles may wait through multiple signal cycles before traveling through the intersection; these operations are designated as LOS F. Examples of the various levels of service for a signalized intersection are illustrated on **Figure 2-1**.

The method described in Chapter 16 of the 2000 *Highway Capacity Manual* (HCM) (Transportation Research Board) was used to prepare study intersection LOS calculations. This level of service method, which is approved by San José and the VTA, analyzes a signalized intersection's operation based on average control delay per vehicle. Control delay includes the initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. The average control delay is calculated using TRAFFIX 8.0 analysis software and is correlated to a LOS designation as shown in **Table 2-1**.

Table 2-1: Signalized Intersection Level of Service Definitions

Level of Service	Description	Average Control Delay per Vehicle (seconds)
A	Operations with very low delay occurring with favorable progression and / or short cycle lengths.	≤ 10.0
B+ B B-	Operations with low delay occurring with good progression and / or short cycle lengths.	10.1 to 12.1 12.1 to 18.0 18.0 to 20.0
C+ C C-	Operations with average delays resulting from fair progression and / or longer cycle lengths. Individual cycle failures begin to appear.	20.1 to 23.0 23.1 to 32.0 32.0 to 35.0
D+ D D-	Operations with longer delays due to a combination of unfavorable progression, long cycle lengths, and high volume-to-capacity (V / C) ratios. Many vehicles stop and individual cycle failures are noticeable.	35.1 to 39.0 39.1 to 51.0 51.1 to 55.0
E+ E E-	Operations with high delay values indicating poor progression, long cycle lengths, and high V / C ratios. Individual cycle failures are frequent occurrences.	55.1 to 60.0 60.1 to 75.0 75.1 to 80.0
F	Operations with delays unacceptable to most drivers occurring due to over-saturation, poor progression, or very long cycle lengths.	> 80.0

Source: *Traffic Level of Service Analysis Guidelines*, VTA Congestion Management Program, June 2003; and *Highway Capacity Manual*, Transportation Research Board, 2000.

The queuing analysis assesses the available storage length of pockets and compares that to the projected queue length. Queuing analysis is conducted for movements where a) the movement has storage pockets, and b) the Project adds more than 10 peak hour trips to the movement. Queuing analysis for signalized intersections is performed for the following intersection movements using TRAFFIX analysis software:

- Cottle Road / Palmia Drive-Hospital Parkway
  - Southbound left movement
  - Westbound right movement

- Cottle Road / Santa Teresa Boulevard
  - Southbound left movement

- Camino Verde Drive/Santa Teresa Boulevard
  - Southbound left movement
  - Southbound right movement
  - Eastbound left movement

Since TRAFFIX does not report 95th percentile queues for stop-controlled intersections, queuing analysis for stop-controlled intersections is performed for the following intersection movements using Synchro analysis software:

- Camino Verde Drive/International Circle

  Northbound left movement

Unsignalized Intersections Level of Service and Queuing Analysis

The operations of the unsignalized intersections were evaluated using the method contained in Chapter 17 of the *2000 Highway Capacity Manual* (HCM) (Transportation Research Board). LOS ratings for stop-sign controlled intersections are based on the average control delay expressed in seconds per vehicle. For approaches composed of a single lane, the control delay is computed as the average of all movements in that lane. **Table 2-2** summarizes the relationship between delay and LOS for unsignalized intersections.

Table 2-2: Unsignalized Intersection Level of Service Definitions

Level of Service	Description	Average Delay per Vehicle (seconds)
A	Little or no delay.	≤ 10.0
B	Short traffic delays.	10.1 to 15.0
C	Average traffic delays.	15.1 to 25.0
D	Long traffic delays.	25.1 to 35.0
E	Very long traffic delays.	35.1 to 50.0
F	Extreme traffic delays with intersection capacity exceeded.	> 50.0

Source: *Traffic Level of Service Analysis Guidelines,* October 2014; VTA Congesting Management Programs, June 2003; *Highway Capacity Manual*, Transportation Research Board, 2000.

For unsignalized intersections, queuing analysis is conducted using the method described in *HCM 6th Edition* using Synchro analysis software. Using the intersection delay, 95th percentile queues are determined for each movement.

Intersection Operation: Free Flow

Degree of Delay: Negligible Delays

Intersection Operation: Less Stable Flow

Degree of Delay: Long Delays

Intersection Operation: Stable Flow

Degree of Delay: Minimal Delays

Intersection Operation: Unstable Flow

Degree of Delay: Substantial Delays Can Occur

Intersection Operation: Stable Flow

Degree of Delay: Moderate Delays

Intersection Operation: Unpredictable Flow/Wait Through Multiple Cycles

Degree of Delay: Excessive Delays Can Occur

Figure 2-1

Signalized Intersection Level of Service Examples

Deficiency Criteria

The determination of deficiencies in the transportation network is based on applicable policies, regulations, goals, and guidelines defined by the City of San José and the Santa Clara Valley Transportation Authority (VTA).

Intersection Level of Service

Signalized Intersection

The deficiency criteria used to determine effects on signalized intersections are based on City of San José level of service standards. San José's minimum threshold for acceptable signalized intersection operations is LOS D, unless governed by an Area Development Policy. For CMP intersections under VTA's jurisdiction, the minimum threshold for acceptable intersection operations is LOS E.

An adverse effect on intersection operations occurs when the analysis demonstrates that a project would cause the operations standard at a study intersection to fall below the established LOS standard (LOS D for City intersections and LOS E for CMP intersections) with the addition of project vehicle trips relative to baseline conditions. For intersections already operating unacceptably (LOS E or LOS F for City intersections and LOS F for CMP intersections) under baseline conditions, an adverse effect is defined by the following:

- An increase in average critical delay by 4.0 seconds or more and an increase in the critical V/C ratio of 0.010 or more; or
- A decrease in average critical delay and an increase in critical V/C ratio of 0.010 or more.

Unsignalized Intersection

An LOS analysis for unsignalized intersections is traditionally performed to determine the need to modify the intersection control type (e.g., all-way stop, signal). The City of San José does not have an adopted LOS standard for unsignalized intersections. Therefore, for the purposes of this analysis, a standard of LOS D or better is considered acceptable. All unsignalized intersections are within the City of San José; none of the unsignalized study intersections are CMP intersections.

If an unsignalized intersection is significantly impacted by the additional of Project-generated traffic, then a signal warrant analysis may be needed. Signal warrant studies are performed to determine the need for installation of a traffic signal at an intersection are based on those included in the *Manual on Uniform Traffic Control Devices* (MUTCD).

Queuing Analysis

Queuing analysis was performed to identify where Project traffic would increase vehicle queuing such that available storage capacity is exceeded. Queuing deficiencies are identified if the 95th percentile queue length exceeds the available storage length for movements with storage pockets. Storage length is defined as the length from the stop bar to the point where queueing would interfere with traffic flow in adjacent lanes for other movements on a per lane basis.

Pedestrian and Bicycle

The existing *Envision San José 2040 General Plan* describes related policies necessary to ensure pedestrian and bicycle facilities are safe and effective for City residents. Using both the General Plan and the City's *Handbook* as guides, significant deficiencies to these facilities would occur if a Project or an element of the Project meet the criteria below:

- Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment); or
- Conflicts with a plan, ordinance, or policy addressing the circulation system, including bicycle lanes and pedestrian paths.

Transit

Significant deficiencies to transit service would occur if the Project or any part of the Project conflicts with a plan, ordinance, or policy addressing the circulation system, including transit paths.

3. Existing Conditions

This chapter describes the Existing Conditions of the roadways, pedestrian and bicycle facilities, and transit service near the Project site. It also presents existing traffic volumes and operations for the study intersections.

Existing Street System

State Route 85 (SR 85) provides regional access to the Project site. Cottle Road, Santa Teresa Boulevard, Hospital Parkway, Camino Verde Drive, and International Circle, along with other nearby roadways, provide local site access. Each facility is described below in more detail.

State Route 85 is an east-west freeway located north of the Project site with three travel lanes in each direction. One travel lane in each direction is designated as a high-occupancy vehicle (HOV) lane, in effect from 5:00–9:00 AM and 3:00–7:00 PM, Monday through Friday. SR 85 extends between US 101 to the east and west, and intersects with SR 17, I-280, and SR 87. Access to the Project site from SR 85 is provided via Cottle Road.

Cottle Road is a north-south roadway located west of the Project site with three travel lanes in each direction from its intersection with Santa Teresa Boulevard and north toward Monterey Highway. South of Santa Teresa Boulevard, Cottle Road transitions to one travel lane in each direction. Class II bike lanes are provided on both sides of the street north of Santa Teresa Boulevard. Cottle Road connects Monterey Highway to the north and Lovely Creek Court to the south. Two southbound left-turn pockets are provided along some blocks near the Project site. The posted speed limit is 35 mph.

Santa Teresa Boulevard is an east-west roadway located south of the Project site with two to three travel lanes in each direction. Santa Teresa Boulevard connects SR 87 ramps to the west and Scheller Avenue to the east, where it becomes Hale Avenue. Class II bike lanes are provided on both sides of the street near the Project site. The posted speed limit is 45 mph.

Hospital Parkway is an east-west roadway with two travel lanes in each direction. Hospital Parkway runs from the hospital drop-off area to the east and Cottle Road to the west, where it becomes Palmia Drive. It is directly adjacent to the Project site and provides direct access to the Project site. Vehicles traveling eastbound on Hospital Parkway can make a U-turn at the hospital drop-off area and then exit in the westbound direction. Parking garages are provided north of Hospital Parkway. The posted speed limit is 25 mph.

Camino Verde Drive is a north-south roadway with two travel lanes in each direction. Camino Verde Drive connects International Circle to the north and Manila Drive to the south. It is directly adjacent to the Project site and provides direct access to the Project site via International Circle. Intersections along Camino Verde Drive are unsignalized, except for Santa Teresa Boulevard / Camino Verde Drive intersection. The posted speed limit is 25 mph.

International Circle is a two-way two-lane roadway that surrounds the Project site. It is directly adjacent to the Project site and connects to Liska Lane to the east, Hospital Parkway to the west, Camino Verde Drive to the south, and nearby parking garages. On-street parking is permitted on the southeast side of International Circle. The posted speed limit is 20 mph.

Beswick Drive/Raleigh Road is an east-west roadway that is located north of the Project site with two travel lanes in each direction. It runs parallel to SR 85 and connects to Great Oaks Boulevard to the east and Blossom Hill Road to the west, where it becomes Desert Sands Way. A two-way left-turn lane is provided along Raleigh Road between Autumn Meadow Drive and 400 feet east of Avenue One Drive. The posted speed limit on Beswick Drive is 35 mph, and the posted speed limit on Raleigh Road is 30 mph.

Existing Truck Routes

The City of San José does not have established truck routes; however, the City's *Municipal Code* Chapter 11.96 defines which streets have large vehicle prohibitions. Large vehicles are allowed on all streets adjacent to the Project site.

Existing Pedestrian Facilities

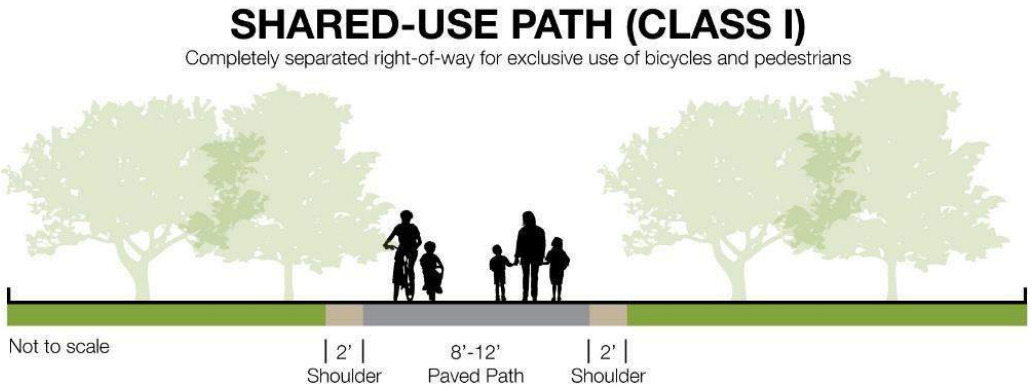
Pedestrian facilities are comprised of sidewalks and crosswalks. The streets adjacent to the Project site, including Cottle Road, Santa Teresa Boulevard, Hospital Parkway, Camino Verde Drive, and International Circle, have continuous sidewalks on both sides of the roadway.

All study intersections have standard crosswalks for all directions of travel. Standard crosswalks are also provided at the CMP intersections including Cottle Road / State Route 85 NB on- / off-ramp for the east and west legs of the intersection, and Cottle Road / State Route 85 SB off-ramp for all legs except the south leg. All study intersections provide curb ramps on approaches.

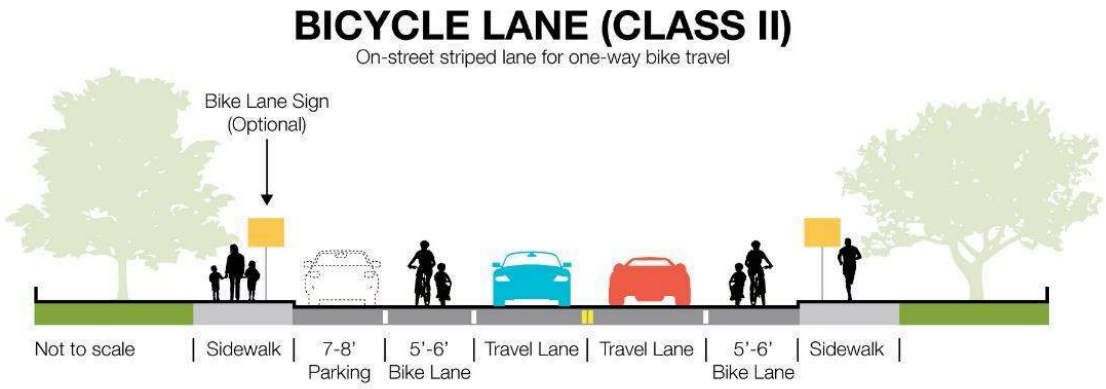
Existing Bicycle Network

The four classes of bicycle facilities in San José are described in the *Bike Plan 2025*. These descriptions are based on California Department of Transportation (Caltrans) classifications of bikeways from California Assembly Bill 1193 and the *Highway Design Manual* (Chapter 1000: Bikeway Planning and Design). Each bikeway class is intended to provide bicyclists with enhanced riding conditions. Bikeways offer various levels of separation from traffic based on traffic volume and speed, among other factors. The four bikeway types and appropriate contexts for each are presented below.

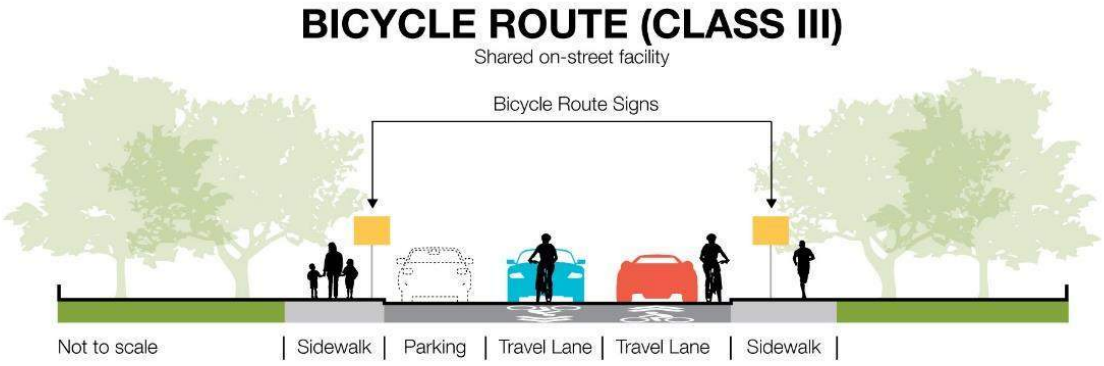
Class I Bikeways (Shared-Use Paths): Shared-use paths, sometimes referred to as multi-use paths, provide completely separate right-of-way and are designated for the exclusive use of bicyclists and pedestrians with minimal roadway crossings. In general, shared-use paths are along corridors not served by streets or where sufficient right-of-way exists to allow them to be constructed away from the influence of vehicles. Class I bikeways can also offer opportunities not provided by the road system by serving recreational areas and/or desirable commuter routes.



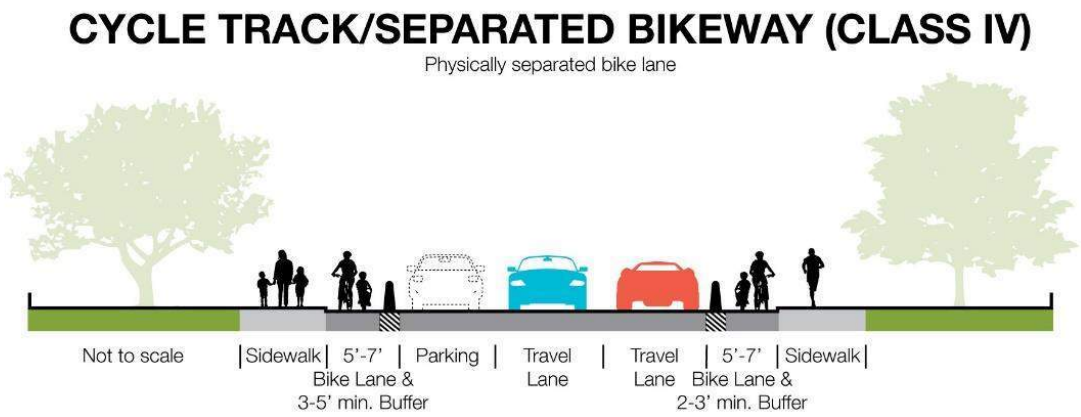
Class II Bikeways (On-Street Bike Lanes): Bike lanes provide a striped lane, pavement markings, and signage for one-way bike travel on a street or highway. Bicycle lanes are typically five feet wide, although wider lanes are desirable on roadways with high traffic volumes and/or high travel speeds. The *VTA Bicycle Technical Guidelines* (December 2012) recommends Caltrans bicycle lane dimension standards be used as a minimum and provides supplemental information and guidance on when and how to better accommodate the many types of bicyclists. Bike lanes may be enhanced with painted buffers between vehicle lanes and/or parking, and green paint at conflict zones (such as driveways or intersections).



Class III Bikeways (Bike Routes): Bike routes may be identified on a local residential or collector street when the travel lane is wide enough and the traffic volume is low enough to allow both cyclists and motor vehicles to share a lane and/or to provide continuity to a bikeway network. Shared-use arrows or "sharrows" are common striping treatments for bike routes.

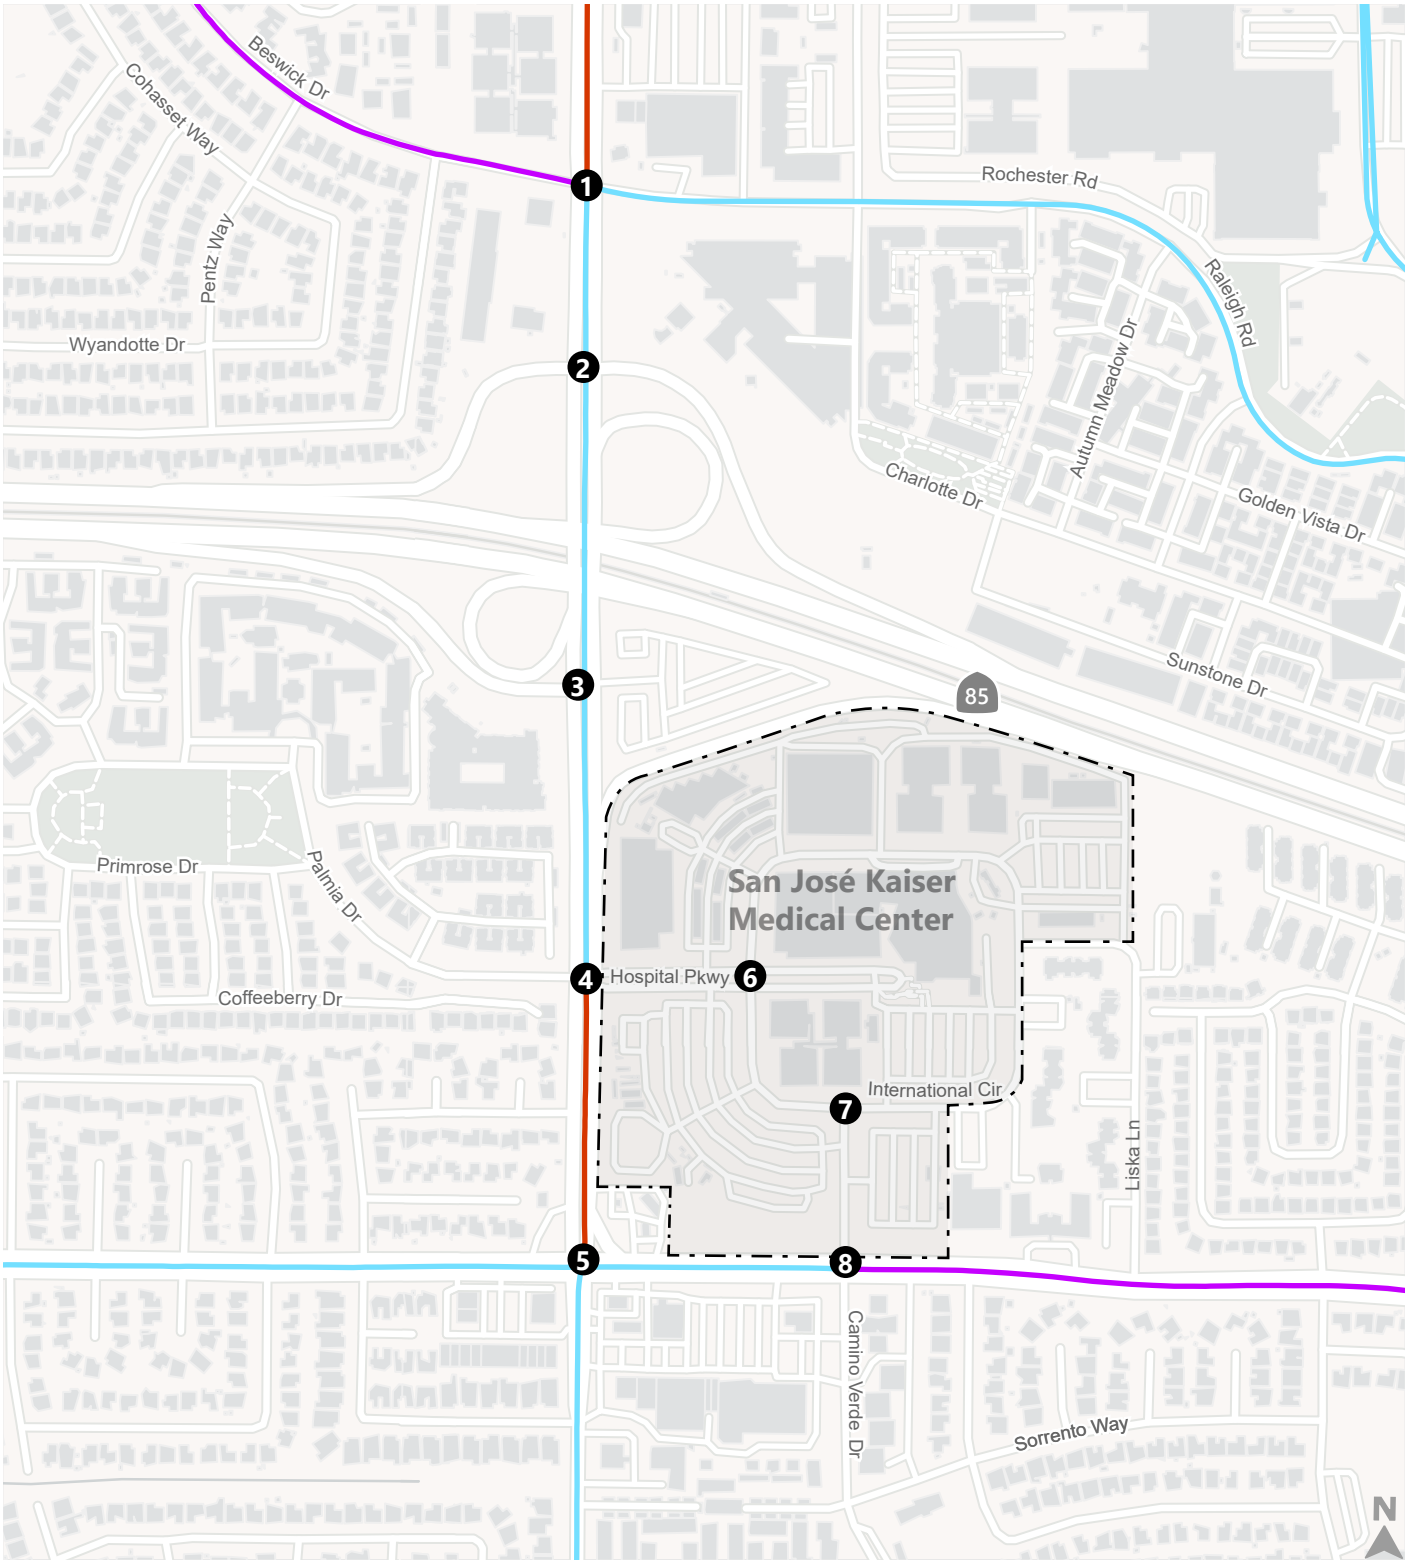


Class IV Bikeways (Separated Bikeway): Separated bikeways, also referred to as cycle tracks or protected bikeways, are bikeways for the exclusive use of bicycles which are physically separated from vehicle traffic. Separated bikeways were adopted by Caltrans in 2015. Types of separation may include, but are not limited to, grade separation, flexible posts, physical barriers, or on-street parking.



Under California Law, bicyclists are allowed to use all roadways in California unless posted otherwise. Therefore, even for roadways without designated (or planned) bikeways, a majority are open for cycling.

Near the Project site, Cottle Road and Santa Teresa Boulevard provide Class II biking facilities for both directions of travel. A Class II bike lane runs down both directions of Santa Teresa Boulevard with frequent separation from traffic by a four-foot painted buffer. A Class IV protected bike lane runs down the east side of Cottle Road in the northbound direction between Hospital Parkway and Santa Teresa Boulevard. **Figure 3-1** displays these facilities. The *San José Better Bike Plan 2025* includes several bicycle facility improvements for road segments near the Project site. A Class II bike lane is proposed on Hospital Parkway and International Circle. A Class III bike boulevard where bikes are given priority is proposed on Palmia Drive to connect Hospital Parkway and Calero Avenue. Class IV protected bike lanes are proposed on Cottle Road and Santa Teresa Boulevard to replace the existing Class II bike lanes.



Project Location

Study Intersection

Class II: Bike Lane (with buffer)

Class IV: Protected Bike Lane

Figure 3-1

Existing Bikeway Facilities

N:\Projects_SJ22_Projects\SJ22_2191_Kaiser_South_San_Jose\Graphics\ADOBE\Fig03_ExistingBikeFacilities.ai

Existing Transit Service

Bus and light rail services in San José are operated by the VTA. **Table 3-1** describes all active transit services for the Project, including the route start and end points, operating hours, and peak headways as reported on the VTA website in August 2023.

VTA currently runs bus routes 27 and 66 through the Medical Center. They travel counterclockwise through the site and enter and exit at the Santa Teresa Boulevard and Camino Verde intersection. Route 27 travels north/south on Cottle Road, while Route 66 travels west/east on Santa Teresa Boulevard. VTA also operates bus route 68 and Express 102 adjacent to the Medical Center on Santa Teresa Boulevard, while route 68 also travels north/south on Cottle Road. Bus stop locations that directly service the Medical Center are summarized below:

- Two bus stops inside the Medical Center for northbound Routes 27 and 66:
  - one unsheltered stop near the library parking lot just east of proposed parking garage, and
  - one unsheltered stop at the northern end of International Circle.

- Five bus stops adjacent to the Medical Center on Santa Teresa Boulevard:
  - one sheltered stop west of Cottle Road for westbound Routes 66 and Express 102,
  - two sheltered stops between Cottle Road and Camino Verde Drive for westbound and eastbound Routes 66, 68, and Express 102, and
  - two unsheltered stops east of Camino Verde Drive for westbound and eastbound Routes 68 and Express 102.

- Five bus stops adjacent to the Medical Center on Cottle Road for routes 27 and 68:
  - one unsheltered stop south of SR 85 for southbound Routes 27 and 68,
  - one sheltered stop south of SR 85 for northbound Routes 27 and 68,
  - two sheltered stops between SR 85 and Beswick Drive/Raleigh Road for northbound and southbound Routes 27 and 68, and
  - one unsheltered stop north of Beswick Drive/ Raleigh Road for southbound Routes 27 and 68.

The VTA Blue Line operates along State Route 85, with Cottle Station directly adjacent to the Medical Center. The bus routes, bus stops, light rail transit (LRT) lines, and LRT station are illustrated on **Figure 3-2**.

Table 3-1: Existing Transit Service

Route[1]	From	To	Weekdays		Saturdays		Sundays	
			Operating Hours	Peak Headway[2] (minutes)	Operating Hours	Headway[2] (minutes)	Operating Hours	Headway[2] (minutes)
VTA Bus Service								
27	Winchester Station	Kaiser San José via Downtown Los Gatos	5:10 AM – 9:20 PM	30	8:00 AM – 7:45 PM	40	9:10 AM – 6:20 PM	60
66	North Milpitas	Kaiser San José	4:45 AM – 12:30 AM	15	5:15 AM – 12:30 AM	20	5:25 AM – 12:15 AM	20
68	San José Diridon Station	Gilroy Transit Center	4:15 AM – 1:20 AM	15	5:20 AM – 1:30 AM	20	5:20 AM – 1:30 AM	20
Express 102	South San José	Stanford Research Park	5:45 AM – 9:10 AM; 3:20 PM – 6:45 PM	30	N/A	N/A	N/A	N/A

Existing Intersection Level of Service and Vehicle Queuing

Existing intersection lane configurations, traffic controls, and peak hour traffic counts, as shown on **Figure 3-3**, were used to calculate level of service and vehicle queuing at the study intersections during the AM and PM peak hours. The Existing Conditions intersection analysis results are shown in **Table 3-2**.

Intersection Level of Service

Existing intersection lane configurations, signal timings, and peak hour turning movement volumes were used to calculate vehicle queuing at the study intersections during the AM and PM peak hours. Traffic counts for the study intersections were collected in June 2023 before area schools entered summer break and are presented in **Appendix A**. The results of the LOS analysis for Existing Conditions are presented in **Table 3-2**. The technical calculations are shown in **Appendix C**. The results indicate that all study intersections operate at acceptable service levels (generally LOS D or better for City of San José intersections, and LOS E or better for CMP intersections) during the AM and PM peak hours.

Table 3-2: Existing Intersection Level of Service

#	Intersection	Control[1]	Jurisdiction (LOS Standard)[2]	Peak Hour[3]	Existing	
					Delay[4]	LOS[5]
1	Cottle Road / Beswick Drive	Signal	San José (D)	AM	43.0	D
				PM	39.0	D+
2	Cottle Road / State Route 85 NB On- / Off-Ramp	Signal	CMP (E)	AM	21.9	C+
				PM	10.0	A
3	Cottle Road / State Route 85 SB Off-Ramp	Signal	CMP (E)	AM	29.6	C
				PM	31.6	C
4	Cottle Road / Palmia Drive-Hospital Parkway	Signal	San José (D)	AM	43.5	D
				PM	48.2	D
5	Cottle Road / Santa Teresa Boulevard	Signal	CMP (E)	AM	33.0	C-
				PM	36.6	D+
6	Hospital Parkway / International Circle	ASWC	San José (D)	AM	18.9	C
				PM	14.9	B
7	Camino Verde Drive / International Circle	ASWC	San José (D)	AM	8.1	A
				PM	8.9	A
8	Santa Teresa Boulevard / Camino Verde Drive	Signal	San José (D)	AM	23.3	C
				PM	27.7	C

Notes:
1. Signal = signalized intersection, ASWC = all-way stop-controlled intersection.
2. Intersection jurisdiction and associated LOS threshold applied.
3. AM = morning peak hour, PM = evening peak hour.
4. Whole intersection weighted average control delay expressed in seconds per vehicle calculated using methods described in the 2000 *Highway Capacity Manual*, with adjusted saturation flow rates to reflect Santa Clara County Conditions for signalized intersections and all-way stop-controlled intersections.

5. LOS = Level of Service. LOS calculations were conducted using the TRAFFIX analysis software packages, which apply the methods described in the 2000 *Highway Capacity Manual*.
6. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Intersection Turning Movement Queuing

A queuing analysis was prepared to evaluate the signalized intersection operations under Existing Conditions. The results of the queuing analysis for signalized intersections are presented in **Table 3-3**. The results indicate that ten movements have queues that exceed the available storage length during peak hours under Existing Conditions. The intersections, movements, and affected peak hours are:

- Cottle Road / Palmia Drive-Hospital Parkway
  - Southbound left movement during AM and PM peak hour
  - Westbound right movement during AM and PM peak hour

- Cottle Road / Santa Teresa Boulevard
  - Southbound left movement during PM peak hour

- Camino Verde Drive/Santa Teresa Boulevard
  - Southbound left movement during PM peak hour
  - Southbound right movement during PM peak hour

Table 3-3: Existing Turning Movement Queueing Analysis – Signalized Intersections

Study Intersection	Name	Movement	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length[3] (feet)
					Existing
4	Cottle Road / Palmia Drive-Hospital Parkway	SBL*	290	AM	**850**
				PM	**400**
		WBR	350	AM	**525**
				PM	**1025**

				PM	**275**
		EBL	165	AM	125
				PM	100

Notes: * indicates movement with two turning pockets, and available storage length and projected queue are reported in ft per lane.
Bold text indicates vehicle queuing exceeds available storage capacity.
1. Rounded to the nearest 5 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.

4. Intersection evaluated using HCM 6 methodology.
Source: Fehr & Peers, 2023.

A queuing analysis was prepared to evaluate the all-way stop control (AWSC) intersection operations under Existing Conditions. The results of the queuing analysis for AWSC intersections are shown in **Appendix D** and presented in **Table 3-3**. The results indicate that none of the movements, except for the eastbound left movement at the Hospital Parkway/ International Circle intersection during AM peak hour, form queues that exceed the available storage length during peak hours under Existing Conditions.

Table 3-4: Existing Turning Movement Queueing Analysis – AWSC Intersections

Study Intersection	Name	Movement	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length[3] (feet)

Field Observations

Field observations were conducted on November 9, 2022, and June 6, 2023, to verify LOS calculations and observe overall transportation characteristics at the study intersections, including existing lane geometries, signal controls, bicycle facilities, pedestrian facilities, and transit facilities near the Project site. Intersection operations, including intersection delay, queue lengths, and signal timing parameters, were used to verify the LOS calculations shown in **Table 3-2.** Field observations were consistent with LOS calculation results. Below is a summary of key observations in the study area.

Off-Site Field Observations

Off-site field observations were conducted during the morning (7:00–9:00 AM) and evening (4:00–6:00 PM) peak commute periods at the Santa Teresa Boulevard/Cottle Road intersection as well as the Medical Center access intersections on Santa Teresa Boulevard and Cottle Road.

Congestion during commute hours primarily occurs along Cottle Road between Santa Teresa Boulevard and SR 85. General commuters and Kaiser employees have reverse commute patterns, where commuters travel toward SR 85 and Kaiser employees approach from SR 85 in the morning peak hour, and the reverse in the PM peak hour. Most of the congestion is centered around the Cottle Road/Hospital Parkway intersection.

On-Site Field Observations

On-site field observations were conducted between 8:00–10:00 AM in the morning and 3:30–5:30 PM in the evening at the Hospital Parkway/International Circle and International Circle/Camino Verde Drive intersections. The on-site field observations were focused on circulation constraints, general parking utilization, and other observations that may affect the proposed Project.

The two intersections are all-way stop-controlled. Hospital Parkway/International Circle is busy with vehicles traveling and pedestrians walking from the surrounding parking areas to medical buildings during commute hours. In the morning peak hours, the eastbound left-turn lane on Hospital Parkway would consistently back up to the Cottle Road intersection. In the evening peak hours, the reverse movement was most congested at the Hospital Parkway/International Circle intersection. The International Circle/Camino Verde Drive intersection generally has little congestion during either morning or afternoon.

Parking

Observations focused on utilization of the surface parking lot south of Hospital Parkway and east/west of Camino Verde Drive. The parking lot south of Hospital Parkway and west of Camino Verde where the new hospital building would be constructed was well-utilized and mostly full by around 9:30 AM. The parking demand at this lot, which primarily accesses the lot from the direction of Hospital Parkway, would likely shift to the new parking garage proposed at the International Circle/Camino Verde intersection.

The parking lot on the southeast corner of the International Circle/Camino Verde intersection, where the new garage would be constructed, was only about 50% utilized. It is anticipated that the parking demand for this lot would remain at this location with the new parking garage.

4. Background No Project Conditions

This chapter presents the findings of the transportation analysis under Background Conditions. Background Conditions are defined as conditions just prior to completion and occupancy of the Project. Traffic volumes for Background Conditions are based on existing volumes plus traffic generated by approved but not yet constructed and/or occupied developments in the area.

Background No Project Roadway Infrastructure Improvements

There are no fully funded transportation improvements within the study area that would affect the study intersections geometries; therefore, the intersection geometries are assumed to be the same as presented in Existing Conditions.

Background No Project Conditions Traffic Volumes

Traffic volumes for Background Conditions include traffic generated by development projects under construction or approved, but not yet constructed, within proximity of the Project. Information about these development projects was obtained from the planning department of the City of San José.

Traffic estimates for the development projects that would add traffic to the study intersections were obtained from the City of San José's Approved Trip Inventory (ATI) TRAFFIX model. Vehicle trips for each of the background projects were then assigned to the roadway network based on the ATI intersection assignment. **Appendix B** shows the detailed trip generation data as received from the City's ATI.

Background No Project Level of Service

Background Conditions intersection lane configurations, traffic controls, and peak hour traffic counts, as shown on **Figure 4-1**, were used to calculate level of service and vehicle queuing at the study intersections during the AM and PM peak hours. The results of the Background Conditions LOS analysis are shown in **Table 4-1.**

Table 4-1: Background No Project Conditions Intersection Level of Service

#	Intersection	Control[1]	Jurisdiction (LOS Standard)[2]	Peak Hour[3]	Background No Project Conditions	
					Delay[4]	LOS[5]

Background No Project Turning Movement Queuing Analysis

A queuing analysis was prepared for signalized intersections under Background No Project Conditions using TRAFFIX analysis software. The results of the queuing analysis are presented in **Table 4-2** along with the comparison to the Existing Conditions. The addition of background trips causes queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity as summarized below:

- Cottle Road / Palmia Drive-Hospital Parkway
  - Southbound left movement during AM and PM peak hour

- Westbound right movement during AM and PM peak hour

- Cottle Road/Santa Teresa Boulevard
  - Northbound left movement during AM and PM peak hour
- Camino Verde Drive/Santa Teresa Boulevard
  - Southbound left movement during PM peak hour
  - Southbound right movement during PM peak hour

Table 4-2: Background Conditions Turning Movement Queueing Analysis – Signalized Intersections

Study Intersection #	Name	Movement	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length[3] (feet)	
					Existing	Background No Project

				PM	100	125

Notes: * indicates movement with two turning pockets, and available storage length and projected queue are reported in ft per lane.
Bold text indicates vehicle queuing exceeds available storage capacity.

1. Rounded to the nearest 5 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.
4. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Since TRAFFIX does not report 95th percentile queues for stop-controlled intersections, a queuing analysis was prepared to evaluate all-way stop control (AWSC) intersection operations under Background No Project Conditions using Synchro analysis software. The results of the queuing analysis for AWSC intersections are shown in **Appendix D** and presented in **Table 3-3** along with the comparison to the Existing Conditions. The addition of background trips causes no queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity.

Table 4-3: Background Conditions Turning Movement Queueing Analysis – AWSC Intersections

Study Intersection #	Name	Movement	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length[3] (feet)	
					Existing	Background No Project

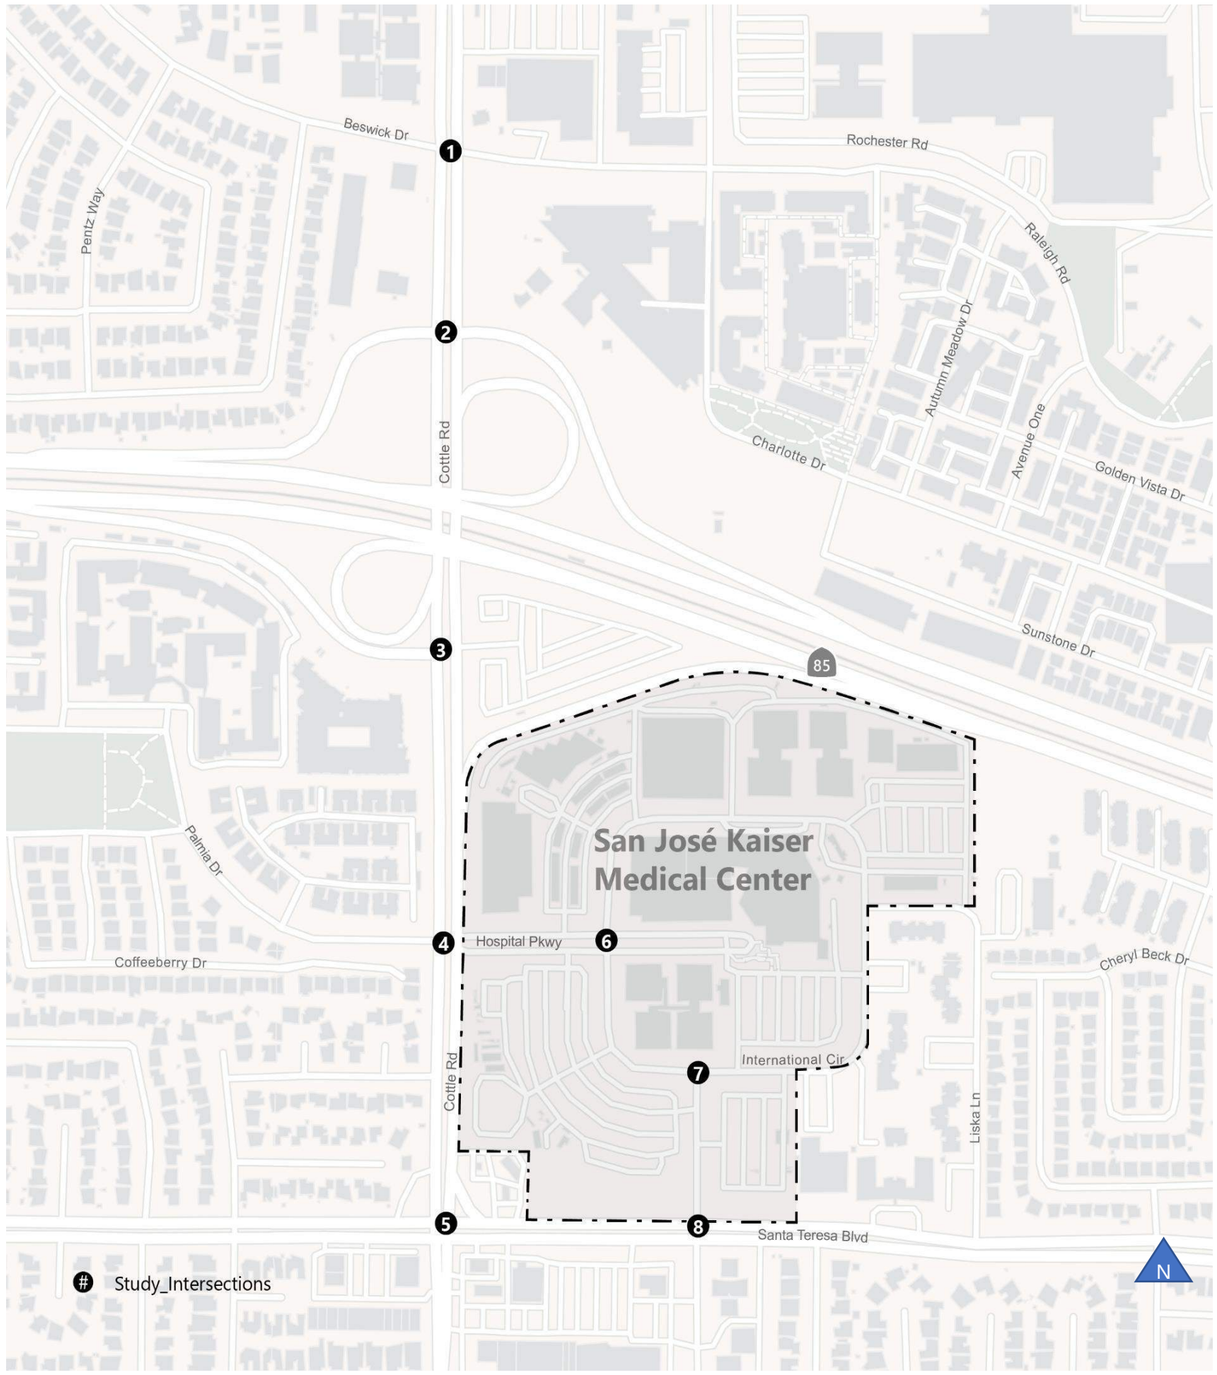

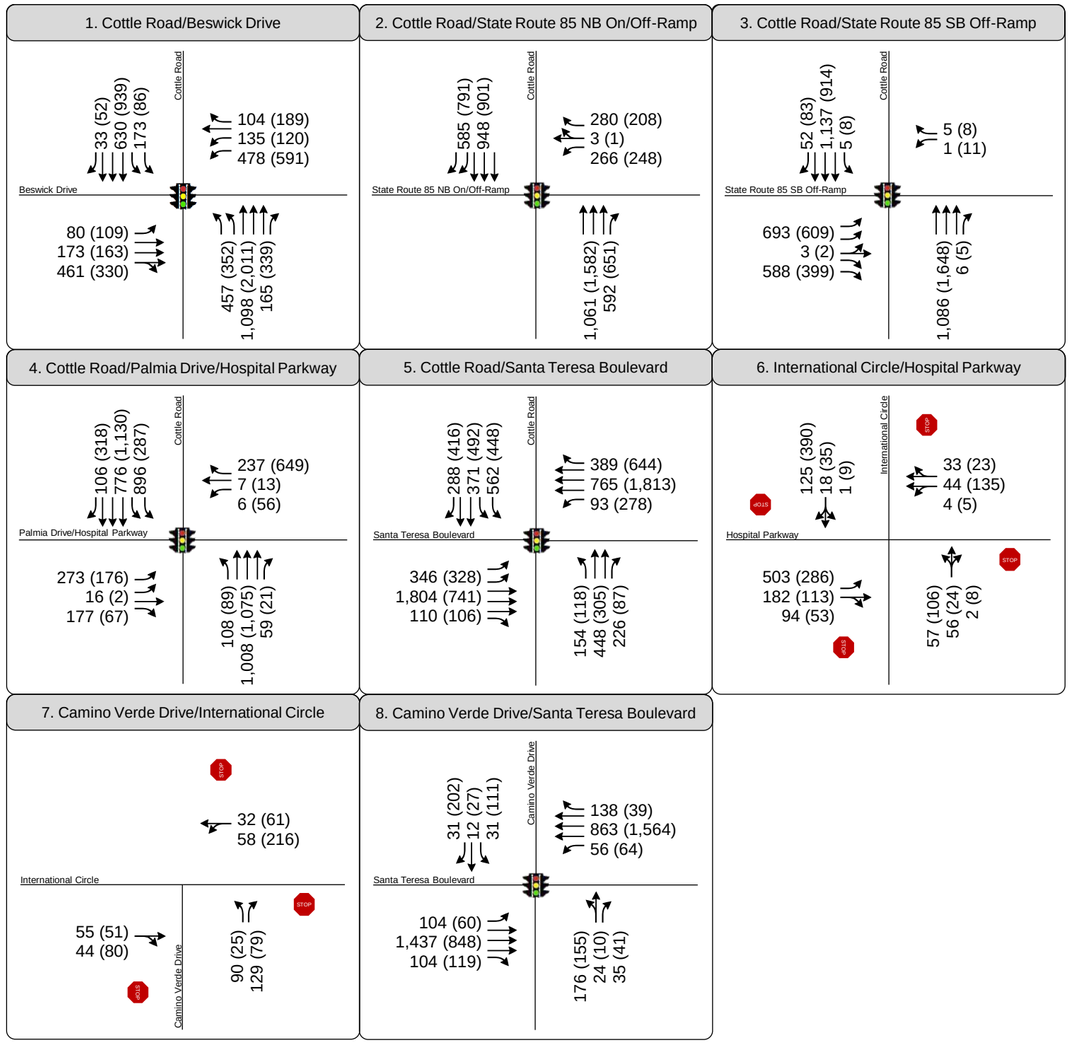

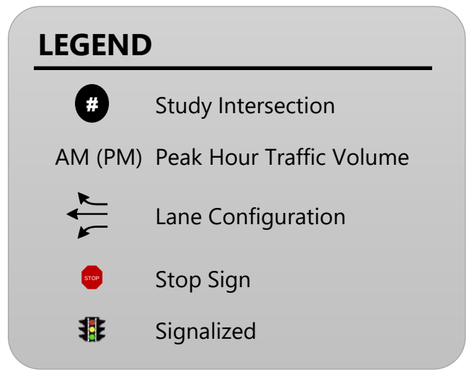

Figure 4-1

Background No Project Lane Configuration, Traffic Control, and Peak Hour Traffic Volumes

5. Project Traffic Estimates

This chapter presents estimates of traffic generated by the Project and identifies roadways and intersections affected by Project generated traffic. The amount of traffic associated with the Project was estimated using a three-step process:

1. **Trip Generation** – The amount of vehicle traffic entering/exiting the Project site is estimated.
2. **Trip Distribution** – The directions trips use to approach and depart the site are projected.
3. **Trip Assignment** – Trips are assigned to specific roadway segments and intersection turning movements.

The results of the process are described in the following sections.

Project Trip Generation

The number of vehicle trips generated by the proposed land uses was estimated using average vehicle trip rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition* for Hospitals (ITE Code 610) and Medical Office Building (ITE Code 720) within/near hospital land uses. Consistent with the *Handbook*, trips for the existing uses[4] as well as location-based reduction for office/suburban reduction uses (5% for MOB uses) were subtracted from the proposed uses to develop net new trips.

The calculation of trip generation follows these steps: First, trips generated by proposed land uses are computed using average rates provided in *ITE Trip Generation Manual, 11th Edition*; then trips are subtracted for existing land uses to develop net new trips. According to the *Handbook*, however, the City only allows credit for existing land uses based on existing driveway counts. Since it is impossible to isolate trips associated with hospital only, the existing driveway count data represents the entire Medical Center. Therefore, trip generation calculation using ITE for the proposed land use also includes the entire Medical Center so the existing driveway counts could be subtracted.

Consistent with the *Handbook*, a location-based adjustment should be applied to certain place types and land use types. The MOB uses fall under the office/suburban category, requiring new trips to be adjusted to 95% of the original value. Therefore, a 5% reduction for MOB uses is applied in the Program-level trip generation calculations.

The proposed 35,000 square-foot energy center would not generate a substantial number of additional peak hour trips, since it is primarily intended to serve as accessory to the hospital; and therefore, peak hour trip estimates for the energy center are not included.

[4] As per the City requirements, credit for existing land use can only be applied with driveway count data. Existing driveway counts instead of ITE trip rates are used for existing trip credit.

The Project-level component is estimated to generate 5,144 net daily trips, 124 net AM peak hour trips (82 inbound and 42 outbound), and 244 net new PM peak hour trips (53 inbound and 191 outbound).

The Program-level component is estimated to generate 12,099 net daily trips, 709 net AM peak hour trips (556 inbound and 153 outbound), and 864 net new PM peak hour trips (209 inbound and 657 outbound).

Table 5-1: Project-Level Trip Generation

Vehicle Trip Distribution

The directions of approach and departure of Project trips were based on locations of complementary land uses and existing travel patterns in the area. **Figure 5-1** shows the Project's trip distribution pattern for the local roadway network.

Vehicle Trip Assignment

The Project trips were assigned to the roadway system based on the directions of approach and departure shown in the trip distribution figure (**Figure 5-1**). **Figure 5-2** and **Figure 5-3** display the Project-Level and Program-Level trips assigned at each turning movement for the study intersection, respectively. **Figure 5-4** displays both Project-level and Program-level trip assignments at the two garage driveways (one on Camino Verde Drive and one on International Circle) and the two hospital driveways (inbound driveway at north and outbound driveway at south).

The Project-Level trip assignment was added to the Background Conditions volumes to represent Background Plus Project Conditions and Program-Level trip assignment was added to the Background Conditions volumes to represent Cumulative Plus Project Conditions. The Program-Level trip assignment only accounts the proposed parking garage at the southeast corner of the Camino Verde Drive/International Circle intersection and not any other potential future parking garages.

Due to the removal of the 471-space surface parking lot at the southeast corner of the Cottle Road / Palmia Drive-Hospital Parkway intersection and the construction of 1,046 parking spaces in a new garage at the northeast corner of the Camino Verde Drive/Santa Teresa Boulevard intersection, our analysis assumed that existing trips to/from the hospital would shift routes used to access the Project site. Based on access routes we assumed that about 50 percent of trips would shift from Hospital Parkway / International Circle intersection to the Camino Verde Drive / International Circle intersection.

6. Background Plus Project Conditions

This chapter presents the findings of the transportation analysis under Background Plus Project Conditions. Background Plus Project Conditions are defined as Background Conditions plus the net-added trips from Project-level hospital uses. The Program-level MOB uses are included under the Cumulative Plus Project conditions discussed in **Chapter 7**.

Background Plus Project Roadway Infrastructure Improvements

The Project does not propose any transportation improvements that would affect geometries at the study intersections; therefore, intersection geometries are assumed to be the same as presented in Background No Project conditions.

Background Plus Project Traffic Volumes

Background Plus Project traffic volumes includes Background No Project intersection volumes plus the net-added trips from the Project-level hospital uses as discussed in **Chapter 5**.

Background Plus Project Level of Service

Background Plus Project Conditions intersection lane configurations, traffic controls, and peak hour traffic counts, as shown on **Figure 6-1**, were used to calculate level of service and vehicle queuing at the study intersections during the AM and PM peak hours. The results of the Background Plus Project LOS analysis is shown in **Table 6-1**.

Based on the results presented in **Table 6-1**, all study intersections would continue to operate at an acceptable LOS and no adverse intersection operations effects are identified under Background Plus Project conditions.

Operations at the Cottle Road/Palmia Drive-Hospital Parkway intersection improve under the AM peak hour compared to Background No Project conditions because the Project causes a shift in trips associated with the existing hospital. Currently, most trips to the hospital use the parking garage located north of Hospital Parkway; these trips are expected to shift to the parking garage located east of Camino Verde Drive. The longest queue at the Cottle Road/Palmia Drive-Hospital Parkway intersection occurs in the westbound right-turn movement during PM peak hour. Shifting trips into the Project site would decrease this queue length, consequently reducing intersection delays.

Table 6-1: Background Plus Project Conditions Intersection Level of Service

#	Intersection	Control[1]	Jurisdiction (LOS Standard)[2]	Peak Hour[3]	Background No Project Conditions		Background Plus Project Conditions		Critical Change V/C[6]	Average Critical Change Delay[7]

Notes:

1. Signal = signalized intersection, ASWC = all-way stop-controlled intersection.
2. Intersection jurisdiction and associated LOS threshold applied.
3. AM = morning peak hour, PM = evening peak hour.
4. Whole intersection weighted average control delay expressed in seconds per vehicle calculated using methods described in the 2000 *Highway Capacity Manual*, with adjusted saturation flow rates to reflect Santa Clara County Conditions for signalized intersections and all-way stop-controlled intersections.
5. LOS = Level of Service. LOS calculations were conducted using the TRAFFIX analysis software packages, which apply the methods described in the 2000 *Highway Capacity Manual*.
6. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Background Plus Project Turning Movement Queuing Analysis

The queuing analysis was prepared for signalized intersection under Background Plus Project Conditions using TRAFFIX analysis software. The results of the queuing analysis are presented in **Table 6-2** along with the comparison to Background Conditions. The addition of Project trips causes queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity as summarized below:

- Cottle Road / Palmia Drive-Hospital Parkway
  - Southbound left movement during AM and PM peak hours
  - Westbound right movement during AM and PM peak hour
- Cottle Road/Santa Teresa Boulevard
  - Southbound left movement during AM peak hour
- Camino Verde Drive/Santa Teresa Boulevard
  - Southbound left movement during PM peak hour
  - Southbound right movement during PM peak hour
  - Eastbound left movement during AM peak hour

Table 6-2: Background Plus Project Conditions Turning Movement Queueing Analysis – Signalized Intersections

Study Intersection #	Name	Movement	Available Storage Length[1] (feet per lane)	Peak Hour[2]	Projected Queue Length[3] (feet per lane)	
					Background No Project	Background Plus Project
4	Cottle Road / Palmia Drive-Hospital Parkway	SBL*	290	AM	**875**	**<u>950</u>**
				PM	**425**	**<u>500</u>**
		WBR	350	AM	**550**	**<u>600</u>**
				PM	**1,050**	**<u>1,325</u>**
5	Cottle Road / Santa Teresa Boulevard	SBL*	280	AM	**500**	**<u>525</u>**

				PM	**350**	**<u>450</u>**
		EBL	165	AM	125	**<u>175</u>**
				PM	125	150

Notes: * indicates movement with two turning pockets. **Bold** text indicates vehicle queuing exceeds available storage capacity. **<u>Bold and underlined</u>** text indicates where the addition of project trips increases queues at locations where cars are already exceeding available storge capacity or to form queue lengths that exceed available storage capacity.

1. Rounded to the nearest 5 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.
4. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Since TRAFFIX does not report 95th percentile queues for stop-controlled intersections, a queuing analysis using Synchro was prepared to evaluate the all-way stop control (AWSC) intersection operations under Background Plus Project Conditions. The results of the queuing analysis for AWSC intersections are shown in **Appendix D** and presented in **Table 6-3** along with a comparison to the Background No Project Condition. The addition of background trips causes no queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity. The eastbound left-turn queue at the Hospital Parkway/International Circle intersection decreases from 300 feet to 125 feet with the project, because the addition of the new parking garage on the southern half of the campus would shift some of the existing trips from the north (i.e., some trips would now make an eastbound right-turn instead of an eastbound left-turn as shown on **Figure 5-2**).

Table 6-3: Background Plus Project Conditions Queuing Analysis – AWSC Intersections

Study Intersection #	Name	Movement	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length[3] (feet)

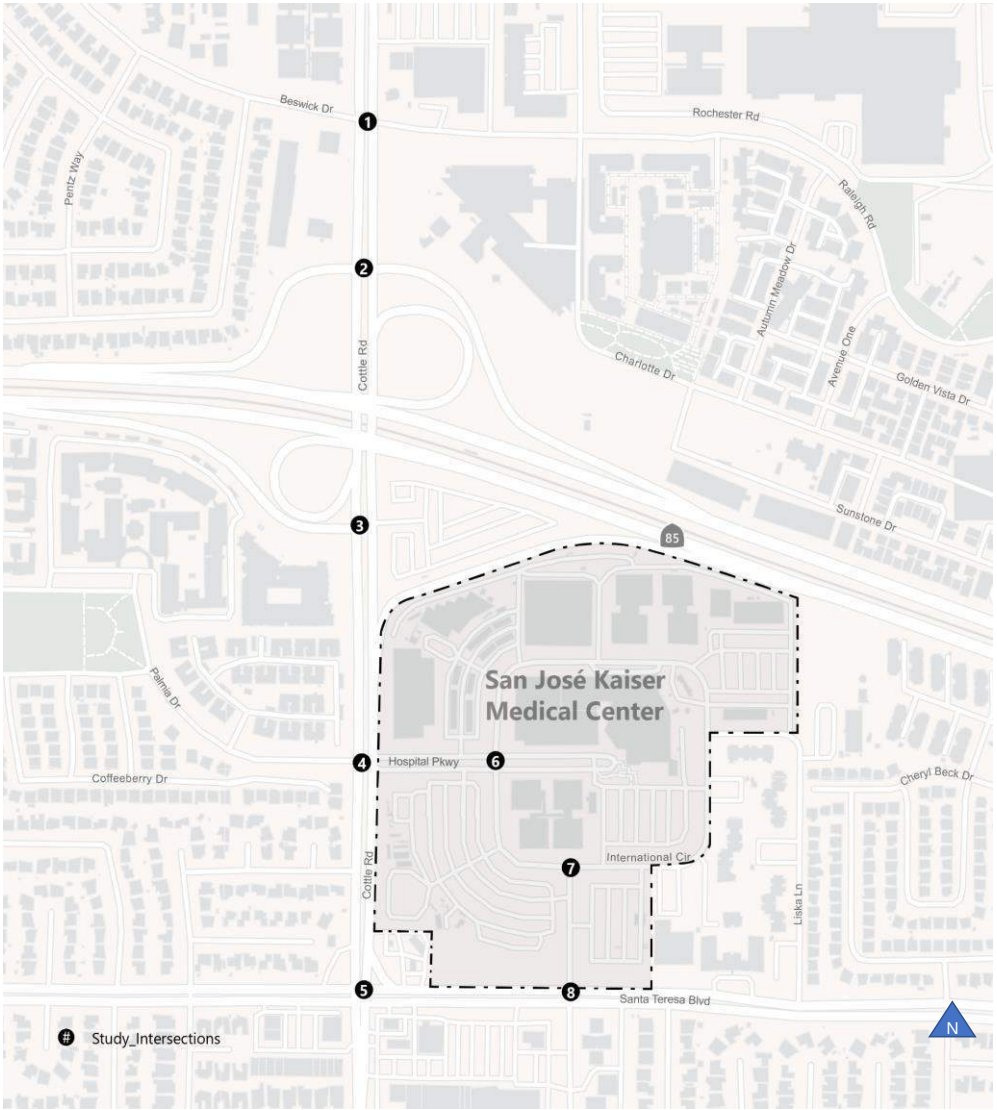

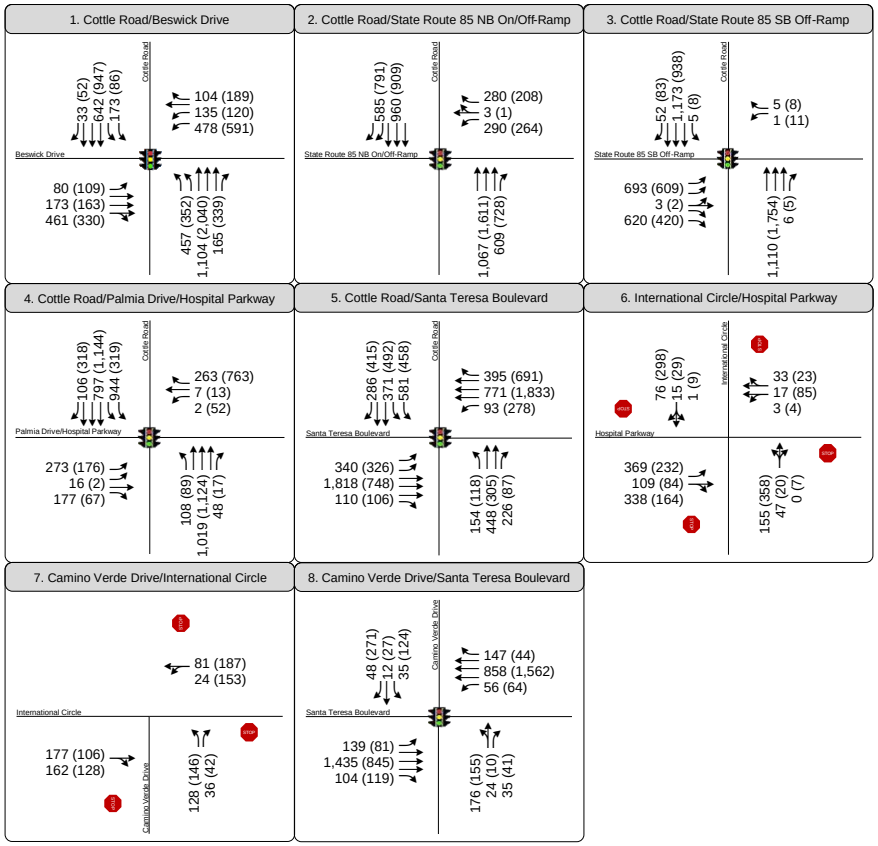

Figure 6-1
Background Plus Project Lane Configuration, Traffic Control, and Peak Hour Traffic Volume

7. Cumulative Conditions

This chapter presents the findings of the transportation analysis under Cumulative Conditions, including Cumulative No Project and Cumulative Plus Project Conditions. Traffic volumes for Cumulative Conditions are based on Background volumes plus traffic generated by pending developments in the area. However, there currently are no pending developments in the area and volumes for Cumulative No Project Conditions are the same as Background No Project Conditions. Cumulative Plus Project conditions represent Cumulative No Project Conditions plus net new trips from the Project-level hospital uses and Program-level MOB uses.

Cumulative No Project Conditions Roadway Infrastructure Improvements

There are no planned transportation improvements within the study area that would affect geometries at the study intersections; therefore, intersection geometries are assumed to be the same as presented for Background No Project Conditions, which are also the same as Existing Conditions.

Cumulative No Project Traffic Volumes

Traffic volumes for Cumulative No Project Conditions include traffic generated by pending developments within proximity of the Project. Based on information provided by the City of San José, there currently are no pending developments in the area. Thus, the Cumulative No Project volumes are the same as the Background No Project volumes as discussed in **Chapter 4**.

Cumulative Plus Project Conditions Roadway Infrastructure Improvements

As noted under Background Plus Project conditions, the Project does not propose any transportation improvements that would affect geometries at the study intersections; therefore, intersection geometries are assumed to be the same as those presented in Cumulative No Project conditions.

Cumulative Plus Project Traffic Volumes

Cumulative Plus Project traffic volumes includes Cumulative No Project intersection volumes, plus the net-added trips from the Project-level hospital uses and Program-level MOB uses as discussed in **Chapter 5**.

Cumulative No Project and Cumulative Plus Project Level of Service

Cumulative No Project and Cumulative Plus Conditions intersection lane configurations, traffic controls, and peak hour traffic counts, as shown on **Figure 7-1** and **Figure 7-2**, were used to calculate level of service and vehicle queuing at the study intersections during the AM and PM peak hours. The results of the Cumulative Conditions LOS analysis are shown in **Table 7-1**.

Table 7-1: Cumulative No Project and Cumulative Plus Project Intersection Level of Service

#	Intersection	Control[1]	Jurisdiction (LOS Standard)[2]	Peak Hour[3]	Cumulative No Project Conditions		Cumulative Plus Project Conditions		Critical Change V/C[6]	Average Critical Change Delay[7]
					Delay[4]	LOS[5]	Delay[4]	LOS[5]

Notes: **Bold** text indicates unacceptable operations according to the jurisdiction's LOS standard. **Bold and highlighted** text indicates an adverse effect.

1. Signal = signalized intersection, ASWC = all-way stop-controlled intersection.
2. Intersection jurisdiction and associated LOS threshold applied.
3. AM = morning peak hour, PM = evening peak hour.
4. Whole intersection weighted average control delay expressed in seconds per vehicle calculated using methods described in the 2000 *Highway Capacity Manual*, with adjusted saturation flow rates to reflect Santa Clara County Conditions for signalized intersections and all-way stop-controlled intersections.
5. LOS = Level of Service. LOS calculations were conducted using the TRAFFIX analysis software packages, which apply the methods described in the 2000 *Highway Capacity Manual*.
6. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Based on the results presented in **Table 7-1**, all study intersections would continue to operate at an acceptable LOS and no adverse intersection operation effects are identified under Cumulative Plus Project conditions, except for the Cottle Road / Palmia Drive-Hospital Parkway (intersection #4) and the Hospital Parkway / International Circle (intersection #6) during the PM peak hour.

Cumulative No Project and Cumulative Plus Project Turning Movement Queuing Analysis

A queuing analysis was prepared for signalized intersection under Cumulative No Project and Cumulative Plus Project conditions using TRAFFIX analysis software. The results of the queuing analysis are presented in **Table 7-2** along with a comparison to the Cumulative No Project Conditions. The addition of Project trips causes queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity as summarized below:

- Cottle Road/Palmia Drive-Hospital Parkway:
  - Southbound left movement during AM and PM peak hours
  - Westbound right movement during AM and PM peak hours
- Cottle Road/Santa Teresa Boulevard
  - Southbound left movement during AM and PM peak hours
- Camino Verde Drive/Santa Teresa Boulevard
  - Southbound left movement during PM peak hour
  - Southbound right movement during PM peak hour
  - Eastbound left movement during AM and PM peak hours

Table 7-2: Cumulative Conditions Queuing Analysis – Signalized Intersections

Study Intersection #	Name	Movement	Available Storage Length[1] (feet per lane)	Peak Hour[2]	Projected Queue Length[3] (feet per lane)	
					Cumulative No Project	Cumulative Plus Project
4	Cottle Road / Palmia Drive-Hospital Parkway	SBL*	290	AM	**875**	**1,350**
				PM	**425**	**725**
		WBR	350	AM	**550**	**800**
				PM	**1,050**	**2,400**

		EBL	165	AM	125	**325**
				PM	125	**250**

Notes: * indicates movement with two turning pockets. **Bold** text indicates vehicle queuing exceeds available storage capacity. **Bold and underlined** text indicates where the addition of project trips increases queues at locations where cars are already exceeding available storge capacity or to form queue lengths that exceed available storage capacity.

1. Rounded to the nearest 5 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.
4. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Since TRAFFIX does not report 95th percentile queues for stop-controlled intersections, a queuing analysis using Synchro was prepared to evaluate the all-way stop control (AWSC) intersection operations under Cumulative Plus Project Conditions. The results of the queuing analysis for AWSC intersections are shown in **Appendix D** and presented in **Table 7-3** along with the comparison to the Cumulative No Project Condition. The addition of Project trips causes no queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity except for the eastbound through-right movement at Hospital Parkway/ International Circle (intersection #6) during AM peak hour.

As discussed under Background Plus Project Conditions, the eastbound left-turn queue at the Hospital Parkway/International Circle intersection decreases from 300 feet to 125 feet with the project, because the addition of the new parking garage on the southern half of the campus would shift some of the existing trips from the north (i.e., some trips would now make an eastbound right-turn instead of an eastbound left-turn as shown on **Figure 5-2**).

Table 7-3: Cumulative Conditions Queuing Analysis – AWSC Intersections

Study Intersection #	Name	Movement	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length[3] (feet)	
					Cumulative No Project	Cumulative Plus Project
6	Hospital Parkway/ International Circle	EBL	180	AM	**300**	**225**
				PM	100	125
		EBT/R	395	AM	50	**<u>550</u>**
				PM	50	150
7	Camino Verde Drive/International Circle	NBL	100	AM	25	25
				PM	0	75

Notes: **Bold** text indicates vehicle queuing exceeds available storage capacity. **<u>Bold and underlined</u>** text indicates where the addition of project trips increases queues at locations where cars are already exceeding available storge capacity or to form queue lengths that exceed available storage capacity.

1. Rounded to the nearest 25 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.
4. Intersection evaluated using HCM 6 methodology.

Source: Fehr & Peers, 2023.

The queuing effect from the eastbound approach at the Hospital Parkway/International Circle intersection to the new emergency vehicle access driveway on Hospital Parkway is discussed in more detail in **Chapter 8**.

Freeway Off-Ramp Queuing Analysis

The northbound and southbound off-ramps at SR 85 were analyzed for ramp queuing performance, assessing increases in peak period ramp queue lengths with the addition of Project traffic and its effects on freeway and local street operations. Ramp queuing is not considered an environmental impact, but rather an operational consideration managed over time by Caltrans and local jurisdictions.

Table 7-4 shows freeway off-ramp queuing analysis for Background Plus Project conditions. Under Background Plus Project conditions, neither of the two off-ramps would exceed storage capacity.

Table 7-4: Background Plus Project Freeway Off-Ramp Analysis

Off-Ramp	Storage Capacity (ft)[1]	Peak Hour[2]	Background No Project		Background Plus Project	
			Ramp Volume	Queue (ft)[3]	Ramp Volume	Queue (ft)[3]
SR 85 NB Off-Ramp at Cottle Rd	1,650	AM PM	549 457	725 450	573 473	750 475
SR 85 SB Off-Ramp at Cottle Rd	1,440	AM PM	1,284 1,010	1,250 1,300	1,316 1,031	1,275 1,325

Notes:

1. Vehicle storage capacity is defined as the length of the longest mixed-flow lane available for vehicle queuing. Length is measured from gore point to gore point or where any queue spillback has the potential to block other movements.
2. AM = morning peak hour; PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.
4. Intersection evaluated using HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Table 7-5 shows freeway off-ramp queuing analysis for Cumulative Plus Project conditions. Under Cumulative Plus Project conditions, neither of the two off-ramps would exceed storage capacity.

Table 7-5: Cumulative Plus Project Freeway Off-Ramp Analysis

Off-Ramp	Storage Capacity (ft)[1]	Peak Hour[2]	Cumulative No Project		Cumulative Plus Project	
			Ramp Volume	Queue (ft)[3]	Ramp Volume	Queue (ft)[3]
SR 85 NB Off-Ramp at Cottle Rd	1,650	AM PM	549 457	725 450	716 519	850 500
SR 85 SB Off-Ramp at Cottle Rd	1,440	AM PM	1,284 1,010	1,250 1,300	1,506 1,093	1,375 1,400

Notes:

1. Vehicle storage capacity is defined as the length of the longest mixed-flow lane available for vehicle queuing. Length is measured from gore point to gore point or where any queue spillback has the potential to block other movements.
2. AM = morning peak hour; PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.

8. Multimodal Access and On-site Circulation

This chapter evaluates site access and internal circulation for vehicles, pedestrians, and bicycles and consistency with the City of San José's mobility policies, standards, and guidelines based on the site plan presented on **Figure 1-2**. The Project's vehicle and bicycle parking supplies are reviewed in comparison to City standards.

Site Access and Circulation

The Medical Center would retain its three access points with the Project:

- The southern edge of the site at the Santa Teresa Boulevard/Camino Verde Drive intersection,
- The western edge of the site at the Cottle Road/Hospital Parkway intersection, and
- The eastern edge of the site at the International Circle/Liska Lane intersection.

The two driveways along Santa Teresa Boulevard and Cottle Road are the primary access points to the site. These intersections are signalized and provide direct connections to regional facilities, such as SR 85. Liska Lane provides local access from residential neighborhood to the east of the Medical Center.

Pedestrian Circulation

No changes are being made to study intersections and entry points to the Project site, so all road geometries are assumed to be the same, with pedestrian access via sidewalks. Sidewalks around Hospital Parkway and Camino Verde Drive would also provide pedestrian access to the new facility, as well as from existing pedestrian crosswalks across Camino Verde Drive that would also lead to the new parking structure. There is bicycle parking within the Project site as well as adjacent to the Project site at Santa Teresa Branch Library.

With the garage location to the east of Camino Verde Drive and the new hospital to the west, there is going to be increased pedestrian crossings at the International Circle/Camino Verde Drive intersection as pedestrians cross between the two facilities. The main pedestrian access points to the garage will be located at north-west and south-west corners of the garage, which will naturally direct pedestrian to the marked pedestrian crossings of the Camino Verde intersections at International Circle and Santa Teresa Boulevard. The operations of the International Circle/Camino Verde intersection, including pedestrian and vehicle interactions are discussed in more detail later in this chapter under the "Controls for International Circle Intersections."

The existing mid-block enhanced crosswalk with Rectangular Rapid-Flashing Beacons (RRFBs) along International Circle between Hospital Parkway and Camino Verde will be removed, since the parking garage southwest of the Hospital Parkway / International Circle intersection will be replaced by MOB and

pedestrian access from existing parking lot on the west side of International Circle to the MOB uses on the east side is no longer needed.

The existing medians on the east leg and south leg of the International Circle/Camino Verde Drive intersections will remain.

Bicycle Circulation

Consistent with *Better Bike Plan 2025*, the project will implement Class IV separated bikeways along the Project perimeter. In addition, the Project proposes to provide Class II bike lanes along Camino Verde between Santa Teresa Boulevard and International Circle. Once bicycles are internal to the site, they can share the road with vehicles along International Circle, to reach the building entrances and designated short-term and long-term bicycle parking.

Transit Access

There are two bus stops internal to the site along International Circle, as well as several bus stops along Santa Teresa Boulevard and Cottle Road that provide bus access to the site. The Project will improve the bus stop along the Project perimeter on Santa Teresa Boulevard to provide a new bus shelter. The improved bus stop along the Santa Teresa Boulevard project frontage will need to be incorporated in the Class IV protected bike lane design along Santa Teresa. Sidewalks and/or crosswalks are provided near all bus stops and allow efficient access to the site via transit. In addition, the Project is within walking distance of the VTA Blue Line LRT station at Cottle Road. To access the station pedestrian travel north on Santa Teresa Boulevard, cross at the marked crosswalk at the southbound SR 85 on-ramp. This Blue Line has services that connect the Project site to Diridon Station, which provides connections to Caltrain, ACE, and Amtrak. Project improvements will not interfere with these transit facilities.

Vehicular Site Access

This section discusses vehicle access to the hospital and parking garage driveways.

Main Hospital Entrance

The main entrance of the new hospital would be located on the east side of the building facing International Circle, with two (2) new 13 feet wide one-way vehicle driveways along International Circle for a counterclockwise passenger pick-up/drop-off loop.

Emergency Department Entrance – Hospital Parkway

The emergency department entrance would be located on the north side of the hospital and accessed from Hospital Parkway, with additional access points to the facility on the north and west sides. The driveway located on Hospital Parkway for the emergency department entrance has a width of 32 feet. Ambulances would access the new hospital on the west side from Cottle Road through the 32-feet driveway and would have direct access to services in the emergency department. The emergency access driveway is wider than the City standard of 26 feet for two-way driveways because the driveway needs to be able to accommodate required movements from fire department vehicles.

The driveway is located about 140 feet east from the signalized Cottle Road/Hospital Parkway intersection and 260 feet west from the all-way stop-controlled International Circle/Hospital Parkway intersection. Currently, the International Circle/Hospital Parkway intersection consistently backs up to Cottle Road for the eastbound left-turn during the morning peak period (see **Table 3-4**). As discussed in the trip assignment in **Chapter 5**, our analysis assumed that existing trips to/from the hospital would shift routes used to access new parking garage. Thus, about 180 trips from the eastbound left-turn at the International Circle/Hospital Parkway intersection would shift to the eastbound right-turn movement (see **Figure 5-3**). As shown in **Table 6-3** and **Table 7-3**, with the shift in vehicle volumes the eastbound approach on Hospital Parkway at International Circle, will no longer experience excessive queues under Background conditions and will not interfere with operations at the emergency department entrance. The AM peak hour queues under Cumulative Conditions are anticipated to extend to and past the emergency vehicle access driveway. The eastbound leg on Hospital Parkway has two travel lanes and is close to 30 feet wide. To address the cumulative queue spillback from the International Circle/Hospital Parkway intersection, the eastbound leg on Hospital Parkway should be stripped to accommodate a wide outside lane to allow sufficient room for emergency vehicles to freely access the driveway.

Emergency Department Entrance – Cottle Road

The hospital also has a driveway off Cottle Road that on a daily basis would only be used by emergency vehicles. The Cottle Road driveway would also provide periodic access for large single unit trucks, which are used for imaging and other large medical equipment. The Cottle Road driveway is 32 feet, which is greater than the City standard of 26 feet for two-way driveways because the driveway needs to be able to accommodate required movements from the single unit trucks.

Hospital Service Driveway – Camino Verde Drive

A new service driveway with a width of 32 feet would be located on Camino Verde Drive on the south side of the new hospital, leading to a below grade loading dock and service yard that also services the energy center. The service driveway is wider than the City standard of 26 feet for two-way driveways because the driveway needs to be able to accommodate required movements from the service vehicles.

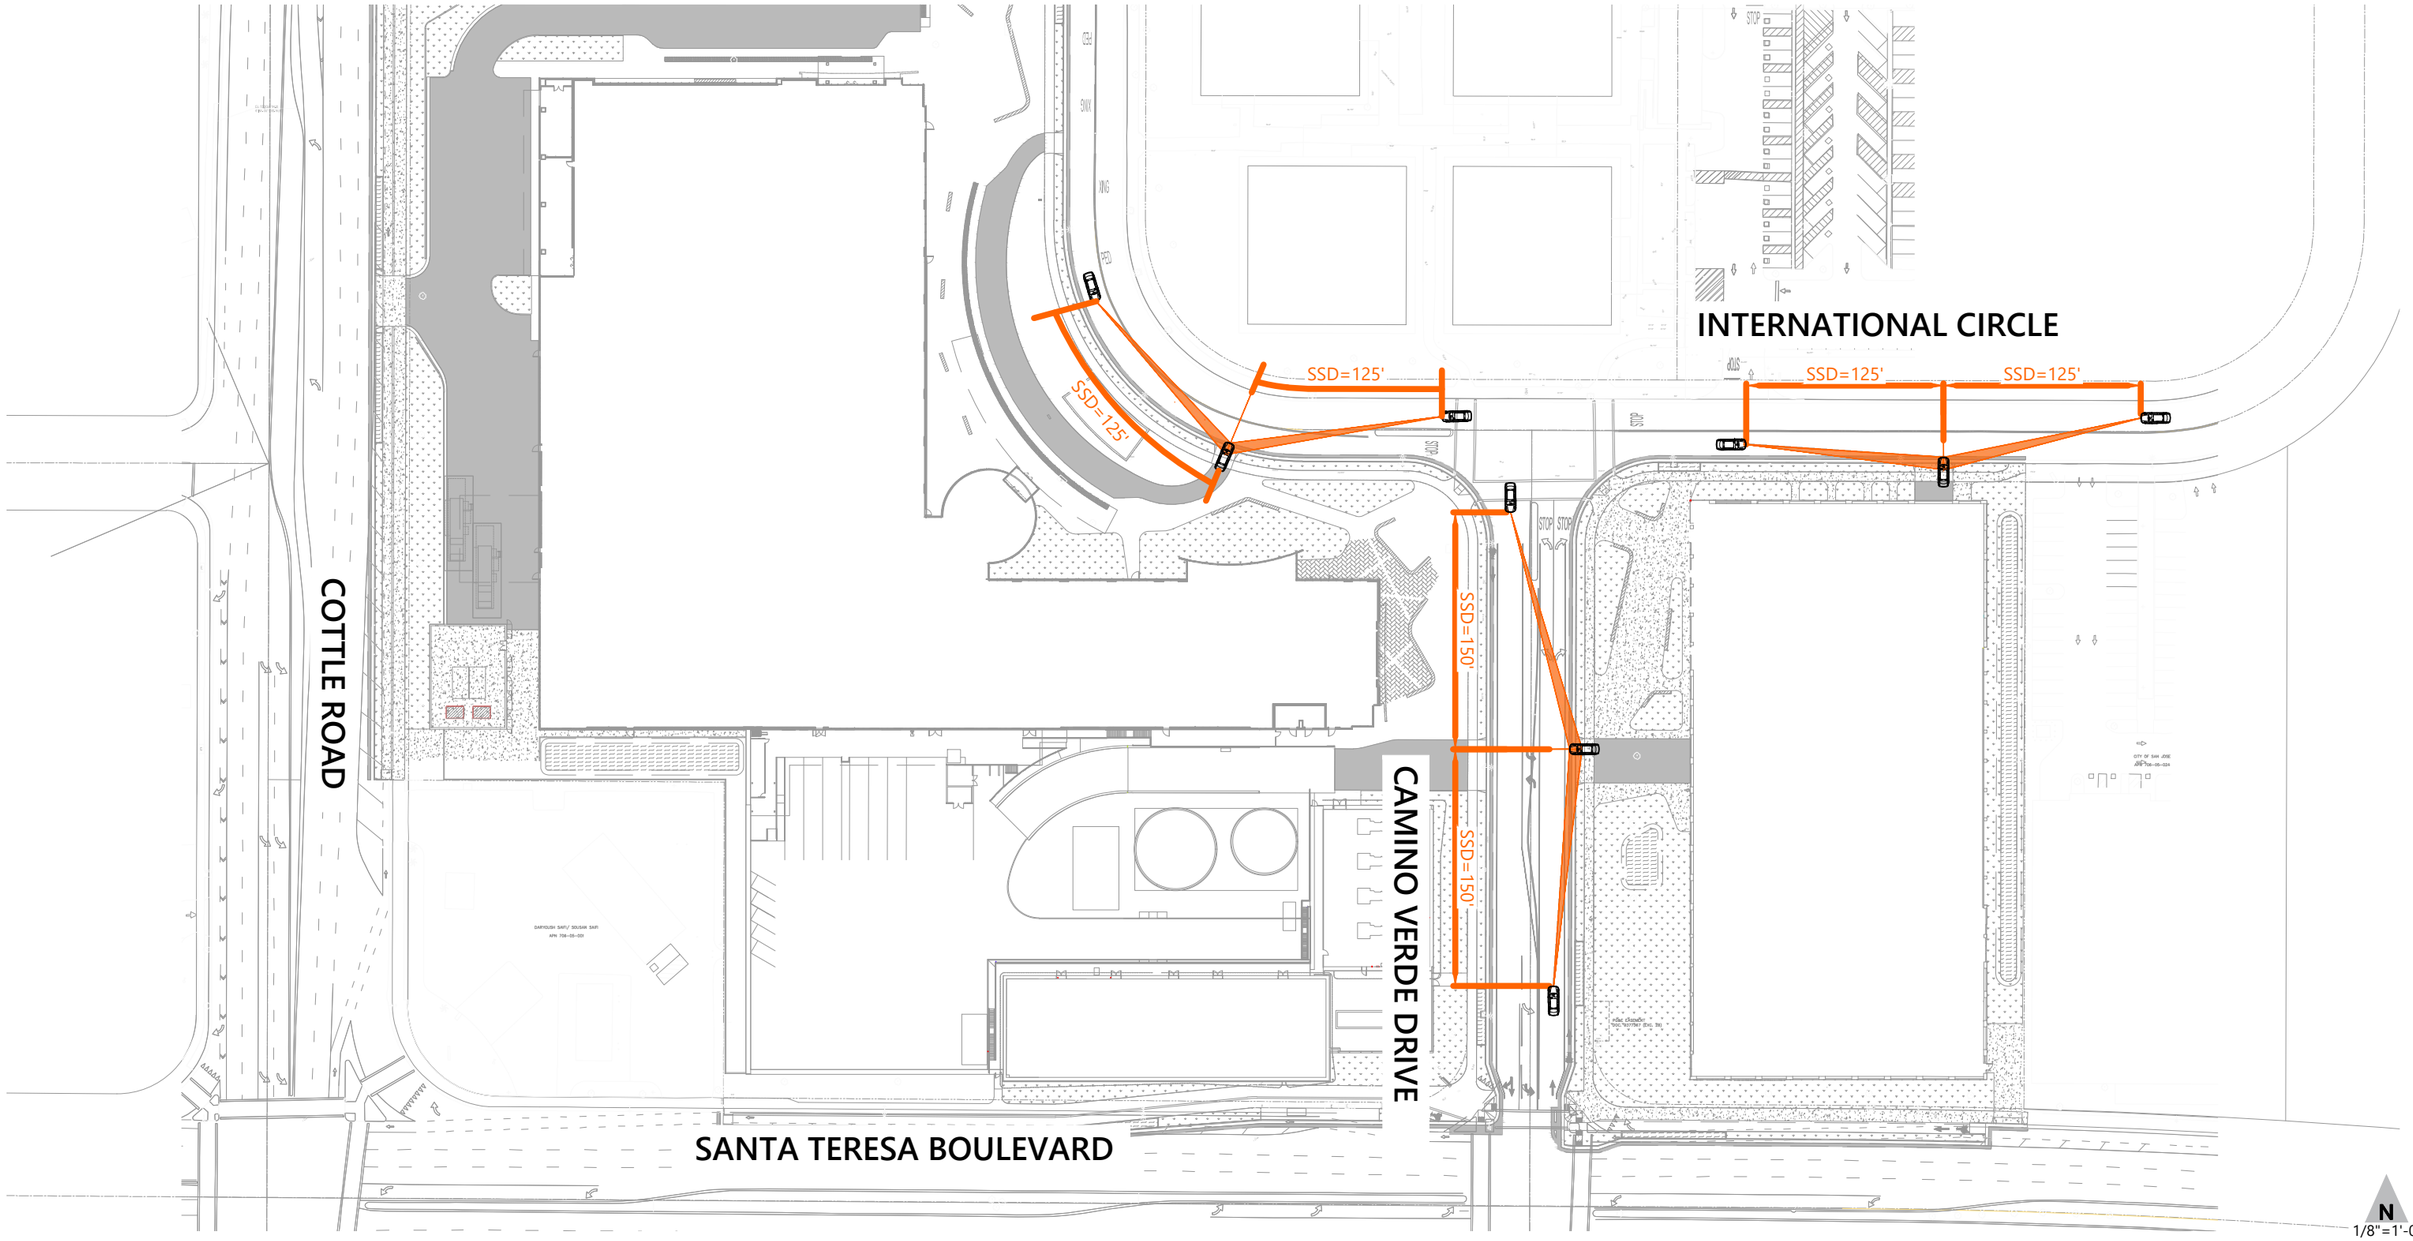
Parking Garage Access

The parking garage would have two main access points: one on International Circle and one on Camino Verde Drive. The International Circle Driveway meets the City driveway width requirement of no more than 26 feet; however, the Camino Verde Driveway is 28 feet to accommodate a second outbound lane. Both of these would be two-way access points to the ground level.

Stopping Sight Distance

To determine the visibility of vehicles exiting the garage at the two driveways (Camino Verde Drive and International Circle) and vehicles exiting the proposed new hospital vehicle driveway on International Circle, we conducted stopping sight distance analyses. The stopping sight analyses evaluate if the drivers traveling east or west on International Circle, and north or south on Camino Verde Drive, will be able to

see vehicles exiting the driveways with sufficient stopping distance to avoid a collision. Using the engineering standards from the Caltrans' *Highway Design Manual, 6th Edition (2019)*, the minimum sight stopping distances for design speed 20 mph and 25 mph roads are 125 feet and 150 feet, respectively. Eastbound and westbound drivers on International Circle are expected to travel at 20 mph, hence requiring the minimum stopping sight distance of 125 feet. Northbound and southbound drivers on Camino Verde Drive are expected to travel at 25 mph, hence requiring the minimum stopping sight distance of 150 feet. A driver exiting the driveways is anticipated to stop at the sidewalk to check for pedestrians and then creep forward into the bike lane (if there is one) before turning out of the driveways. To ensure sufficient stopping sight distance between vehicles traveling in both directions and vehicles exiting the garage at the northeast driveway on International Circle, it is recommended to maintain the existing red curbs approximately 50 feet east and 50 feet west of the driveway. As shown in **Figure 8-1**, the stopping sight distance of 125 feet is achieved for the drivers coming from east and west of the proposed vehicle drive on International Circle with no additional countermeasures needed. The stopping sight distance of 150 feet is achieved for drivers coming from north and south on Camino Verde Drive with no additional countermeasures needed.



Stopping Sight Distance (SSD) Triangle

CONCEPTUAL - NOT FOR CONSTRUCTION. ADDITIONAL
DETAILED ANALYSIS AND ENGINEERING DESIGN REQUIRED.

Driveway Analysis

This section presents the turning movement queuing analysis of the two driveways to the parking garage as well as the hospital driveway under Background Plus Project and Cumulative Plus Project conditions. Similar to the intersection queuing analysis presented in the previous chapters, the driveways are evaluated using Synchro 11 software and the results are presented in **Table 8-1**.

All driveways are side-street stop-controlled. The technical calculations are presented in **Appendix E**.

Table 8-1: Driveway Turning Movement Queuing Analysis

Driveway	Movement	Available Storage Length[1] (feet per lane)	Peak Hour[2]	Projected Queue Length[3] (feet per lane)	
				Background Plus Project	Cumulative Plus Project
Camino Verde Drive / Garage Access	WBL	50	AM	25	**75**
			PM	**75**	**375**
	SBL	175	AM	25	25
			PM	25	25
International Circle / Garage Access	NBL	25	AM	25	25
			PM	25	**75**
International Circle / Hospital Entry	NBLT	340	AM	25	25
			PM	25	25
International Circle / Hospital Exit	NBLR	330	AM	25	25
			PM	25	25

Notes: **Bold** text indicates vehicle queuing exceeds available storage capacity.

1. Rounded to the nearest 5 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet.
4. Intersection evaluated using HCM 6 methodology except for International Circle / Hospital Entry which uses HCM 2000 methodology.

Source: Fehr & Peers, 2023.

Based on the driveway queuing analysis, the following movements have queues that exceed available storage length under Background Plus Project conditions:

- Camino Verde Drive / Garage Access
    - Westbound left movement during PM peak hour

The following movements have queues that exceed available storage length under Cumulative Plus Project conditions:

- Camino Verde Drive / Garage Access
    - Westbound left movement during AM and PM peak hours

- International Circle / Garage Access
    - Northbound left movement during PM peak hour

The westbound left movement at Camino Verde Drive / Garage Access driveway would have queues that exceed available storage capacity under both Background Plus Project and Cumulative Plus Project conditions due to the high left-turn volumes out of the garage. The passenger pick-up/drop-off lane would have minimal queues that are within available storage length and would not spillback onto International Parkway.

To improve queuing at Camino Verde Drive / Garage Access driveway, the Project will provide two exit lanes (one right-turn and one left-turn) from the garage onto Camino Verde Drive. With these improvements the westbound left movement of the driveway would improve to 75 feet under Background Plus Project conditions and 300 feet under Cumulative Plus Project conditions during PM peak hour.

Figure 8-2 presents the proposed parking garage layout. The proposed parking garage would not have security gates. There would be no off-site queuing into the public right-of-way on either Camino Verde Drive or International Parkway since inbound traffic does not cause queues that exceed available storage length.

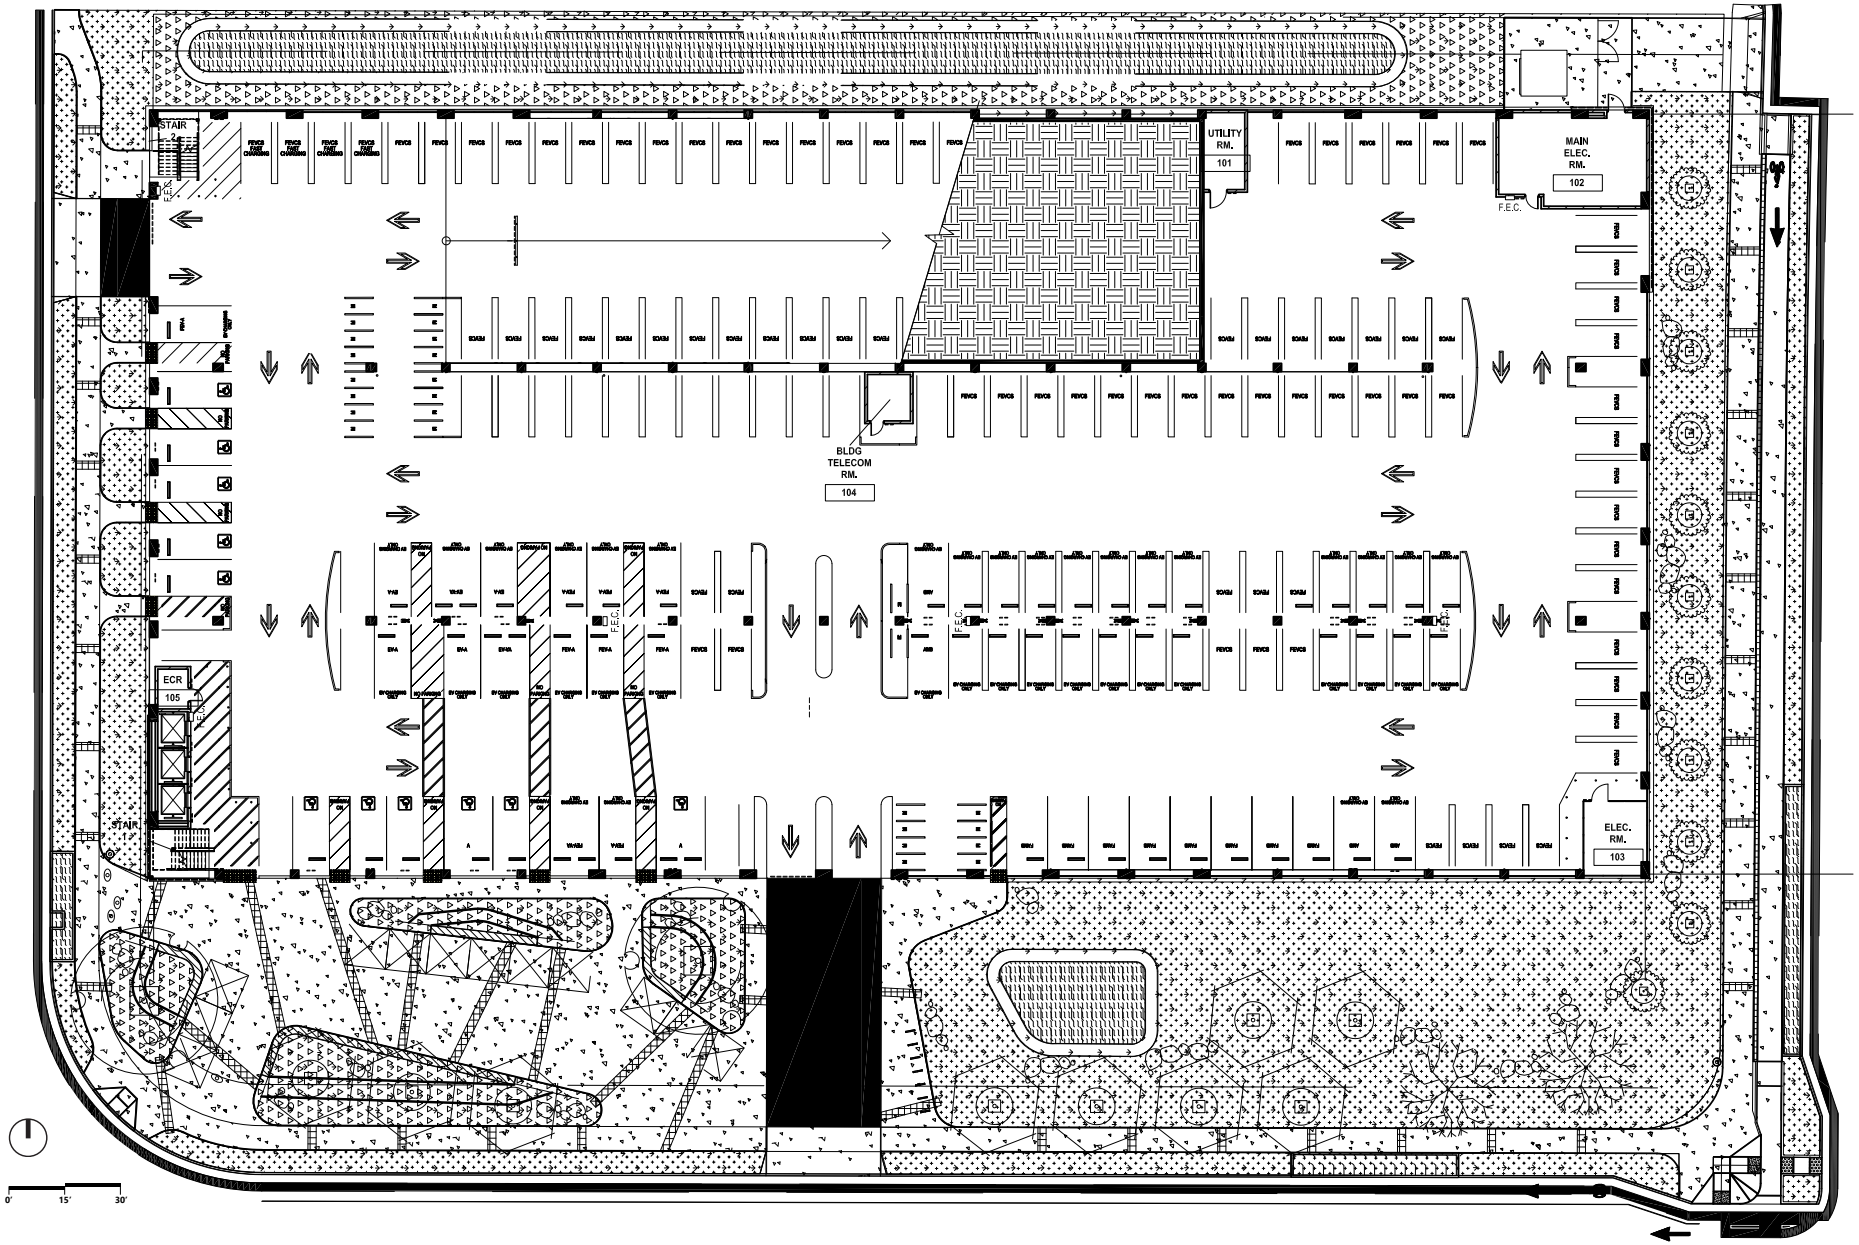

Figure 8-2

Parking Garage Layout

Controls for International Circle Intersection

This section discusses intersection control for the International Circle intersections at Hospital Parkway and Camino Verde Drive. Both intersections are currently all-way stop-controlled. While the intersections operate at acceptable LOS based on the results presented in **Table 6-1** and **Table 7-1**, they frequently experience excessive queuing due to the following factors:

- High platooning, i.e., large group of vehicles traveling together, from the signal-controlled intersections on Cottle Road (for International Circle/Hospital Parkway intersection) and Santa Teresa Boulevard (for the International Circle/ Camino Verde Drive intersection), and
- Consistent pedestrian crossings, where pedestrians have the right-of-way and result in longer than anticipated wait times and associated queuing for vehicles.

These operational issues are currently prevalent at the International Circle/Hospital Parkway intersection, though with the New Hospital Project and associated parking garage on the south side of the Medical Center, it is anticipated that these operational issues will be exacerbated at the International Circle/ Camino Verde Drive intersection.

The City has requested that the Project consider a roundabout at International Circle/Hospital Parkway and International Circle/Camino Verde Drive intersections, though based on preliminary concept drawings, shown on **Figure 8-3**, there are right-of-way constraints that limit the feasibility of a roundabout. **Table 8-2** below summarizes the intersection LOS results for the two intersections assuming the current all-way stop control, as well as potential alternative intersection controls of roundabout and signalization. The technical calculations for roundabout and signalization are presented in **Appendix F** and **Appendix G**, respectively.

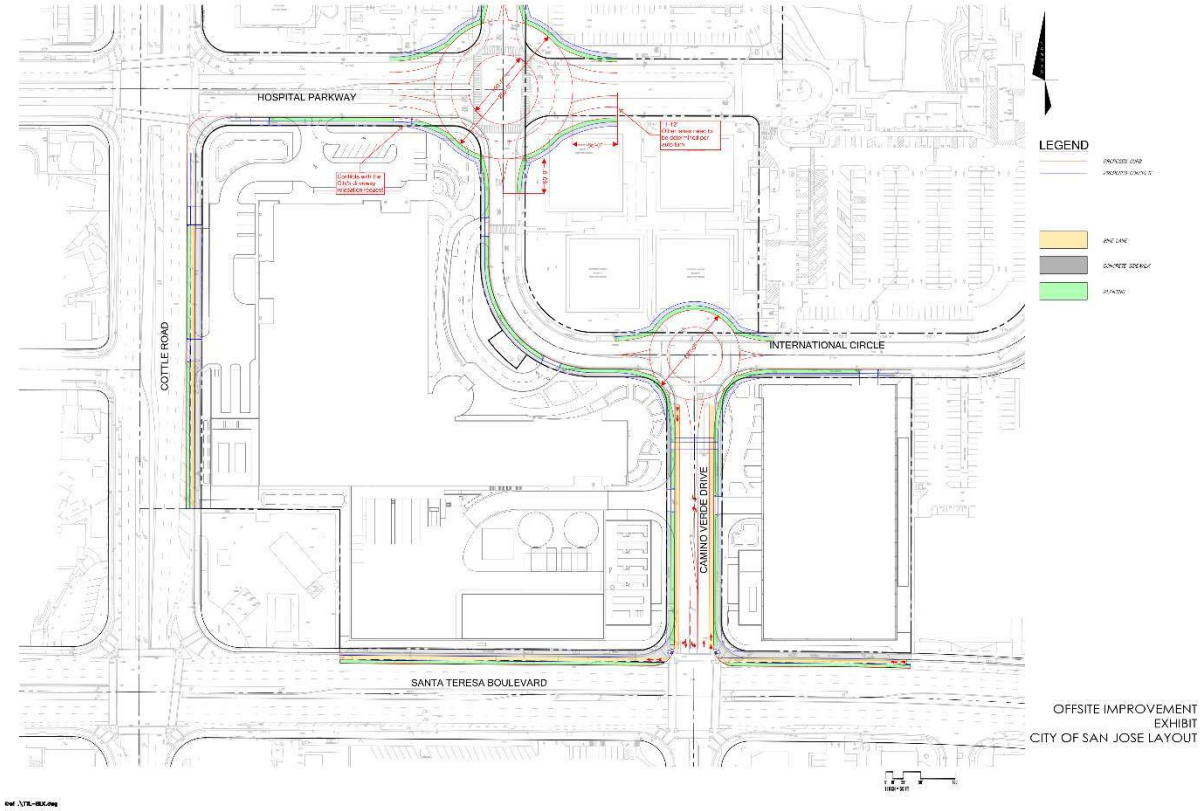

Figure 8-3: Roundabout Concept Drawings

As shown in **Table 8-2**, all control options would operate at an acceptable LOS during both peak hours, with the exception of the Hospital Parkway/International Circle intersection during the PM peak hour under Cumulative Conditions for both the all-way-stop controlled and signalized intersection controls. The two intersections with roundabout options would operate at LOS A or LOS B for both Plus Project conditions during both peak hours.

Peak hour signal warrant studies are performed for the International Circle intersections during the AM and PM peak hour based on the criteria in the Manual on Uniform Traffic Control Devices (MUTCD). The MUTCD peak hour volume warrant (Warrant 3) analysis results are shown in **Appendix H**. The results indicate that the Hospital Parkway/International Circle intersection meets the peak hour volume warrant during the AM and PM peak hours under the Cumulative Plus Project Conditions.

As noted, there are right-of-way constraints that limit the viability of the roundabout options and are not considered feasible. The intersection LOS analysis shows that the intersections would operate at better LOS/delay with the AWSC configuration versus signalization. There are current operational considerations at the Hospital Parkway/International Circle intersection related to heavy pedestrian movements on the west-leg of the intersection. However, with the removal of the surface parking at the south-west corner of the Medical Campus to construct the new hospital, there no longer will be a very large pedestrian demand at that location and an AWSC should operate effectively. However, since the Hospital

Parkway/International Circle intersection is projected to operate at LOS E or F during PM peak hour under Cumulative Conditions for both the all-way-stop controlled and signalized intersection controls; the project will re-evaluate the appropriate intersection control at this location when the MOB (program-level project) moves forward.

With the new garage at the south-eastern corner of the Medical Center, there will be added pedestrian demand at the Camino Verde Drive/International Circle intersection as pedestrians walk to/from the garage to the new hospital and existing MOB uses. However, the projected vehicle demand at this intersection is not anticipated to be as large, since access to the garage is provided upstream of the intersection.

Table 8-2: International Circle Intersection Operations

#	Intersection	Control Type[1]	Background Plus Project				Cumulative Plus Project			
			AM		PM		AM		PM	
			Delay[2]	LOS[3]	Delay[2]	LOS[3]	Delay[2]	LOS[3]	Delay[2]	LOS[3]
6	Hospital Parkway / International Circle	AWSC	14.4	B	16.6	C	32.2	C	**52.5**	**F**
		Two-lane Roundabout	5.7	A	6.7	A	7.4	A	10.4	B
		Signal	23.7	C	35.2	D+	33.2	C-	**73.8**	**E**
7	Camino Verde Drive / International Circle	AWSC	9.6	A	10.7	B	13.6	B	16.6	C
		Single-lane Roundabout	5.2	A	6.5	A	7.3	A	10.6	B
		Signal	13.5	B	14.7	B	19.4	B-	19.7	B-

Notes: **Bold** text indicates unacceptable operations according to the jurisdiction's LOS standard.

1. Signal = signalized intersection, ASWC = all-way stop-controlled intersection.
2. Whole intersection weighted average control delay expressed in seconds per vehicle calculated using methods described in the 2000 *Highway Capacity Manual*, with adjusted saturation flow rates to reflect Santa Clara County Conditions for signalized intersections and all-way stop-controlled intersections. For roundabouts, delays are reported in seconds per vehicle for the overall roundabout.
3. LOS = Level of Service. For roundabouts, LOS calculations are conducted using the Sidra 9 software, which applies HCM 6 capacity. For signalized and all-way stop-controlled intersections, LOS calculations are conducted using the TRAFFIX analysis software packages, which apply the methods described in the 2000 *Highway Capacity Manual*.

Truck Loading and Unloading Operations

The City of San José's Municipal Code §20.90.410 ("Required off-street loading spaces") defines the vehicle loading space requirements for the Kaiser San José Medical Center. With an added 720,000 s.f. between the new hospital and energy center, 36 loading spaces are required. The development is proposing four 65-ft long truck bays in addition to Sanipak and recycling compactors. All loading and unloading operations to both the new facility and the energy center will be performed at the service driveway south of the new facility.

Due to the design of the loading area and size of the Project site, the largest truck that can be accommodated in the Project's loading area is a WB-62 vehicle. Included in **Figure 8-4** and **Figure 8-5**, truck turning templates were provided using the AASHTO's WB-62 vehicle and fire truck for the driveway on Cottle Road and Camino Verde Drive. The truck turning templates indicate that the driveway widths of 32 feet are sufficient for the truck to enter and exit the Project site.

Truck Turn Template for Fire Truck

Parking Assessment

This section evaluates the vehicle and bicycle parking supply and requirements.

Vehicle Parking Supply

Table 8-3 summarizes the vehicles proposed vehicle supply. For the project-level components, the Project will net increase parking supply by 434 spaces and for the Program-level components, the Project will increase parking supply by net 575 spaces. In total the Project will result in a net increase of 1,009 spaces.

Table 8-3: Proposed Vehicle Parking Supply

Land Use	Size[1]	Parking Supply		
		Existing	New Parking Provided	Net New Proposed[3]
Hospital	303 beds	606[2]	1,040	434
Energy Center	35,000 sf	0	0	0
Medical Office Buildings	229,800 sf	1,982	2,557	575
Total		**2,588**	**3,597**	**1,009**

Notes:
1. sf=square feet.
2. Includes only surface parking spaces displaced by the new hospital and parking garage.
3. Net New Proposed = New Parking Provided – Existing to be Removed.

Source: Fehr & Peers, 2023.

City of San Jose Vehicle Parking Requirements

Per direction from City staff, the parking supply is only evaluated for the near-term hospital. Parking for the future medical office building will be evaluated with that project against the standards in place at that time. The San José City Council voted unanimously on December 6, 2022, to update its parking ordinance to no longer have minimum parking requirements for development proposals and to favor other modes of transportation. The new ordinance is in effect as of April 10, 2023. Based on the new ordinance, the parking evaluation is included as part of the transportation demand management (TDM) program. The TDM program assign points based on the proposed parking ratio, which are summarized in **Table 8-4**.

Table 8-4: Hospital Proposed Vehicle Parking Supply

Total Hospital Size[1]	New Parking Provided	Proposed Parking Ratio	TDM Points Allocated[2]
685,000 sf	1,040	1.52	18

Notes:
1. sf=square feet.
2. Appendix C of the City's *Transportation Analysis Handbook* (2023). "TDM Points Allocated" is for "Commute-End/Visit-End Uses" in the "High-Quality Transit Areas" category.

Source: Fehr & Peers, 2023.

Section 24.10.200 states that all non-residential areas should provide 10 percent of the total required number of parking spaces as electric vehicle supply equipment (EVSE) spaces, and 40% of the total number of parking spaces shall be EV-capable spaces (i.e., have infrastructure necessary to install additional EV charging stations in future). San Jose's municipal code does not count EV-ready spaces (i.e., use of 240-volt charging outlet instead of EV charging stations). It is recommended the Project applicant update their site plans to show how the Project will meet these standards.

Bicycle Parking

Similar to the vehicle parking evaluation, the parking supply is only evaluated for the hospital consistent with direction from City staff. Bicycle parking for the future medical office building will be evaluated with that project against the standards in place at that time. The City of San José's Municipal Code §20.90 ("Parking, Loading, and Transportation Demand Management") defines the bicycle parking supply for all land uses. **Table 8-5** below presents the bicycle parking supply requirements for the land uses included in the Project.

The proposed land uses presented in **Chapter 1** and parking standard supply requirements from the City's Municipal Code were used to calculate the Project's bicycle parking supply requirements, as shown in **Table 8-5**.

Table 8-5: Hospital Bicycle Parking Supply Requirements

Total Hospital Sizse[1]	Rate[1,2]	Short-Term Spaces	Long-Term Spaces	Total Required Spaces[34]
303 beds	1 space per 25 beds	11	2	13

Notes:
1. Per Municipal Code §20.90.
2. Spaces for the Hospital/in-patient facility will be at least 80% short-term spaces and at most 20% long-term spaces, since required space count is based on number of beds.

Source: City of San José Municipal Code; Fehr & Peers, 2023.

San José's municipal code distinguishes between long-term bicycle parking spaces, provided in secure locations that are restricted-access and protected from the elements, and short-term bicycle parking spaces, including surface-level bicycle racks. This project will provide 26 short-term bicycle parking spots in the form of open bike racks near building entrances, and 48 long-term bicycle parking spots in the form of secure, covered enclosures near building entrances.

Based on the bicycle parking summary provided in **Table 8-5**, the Project exceeds the City's parking requirements for both short-term and long-term parking spaces.

TDM Program Requirements

Per the City of San José Handbook, a TDM Plan is required for a development unless the project meets the screening criteria. If a component of a mixed-use project meets these screening criteria, a TDM Plan is not required for that component of the project. **Table 8-6** shows the screening criteria for the Project. The Project is not exempt and TDM Plan is required for the Project.

Table 8-6: Screening Criteria for TDM Plan

Land Use	Screening Criteria	Proposed Project	Exemption from TDM Plan Requirement
Visit-End Uses: Retail Sales/Goods/Merchandise	100,000 s.f. of gross floor area or less	435,000 s.f. of net new hospital gross floor area	Not Exempt

Source: City of San José *Transportation Analysis Handbook*, 2023.

Where a TDM Plan is required, the exact TDM requirements are defined by the City of San José's TDM Point Target system. The TDM Plan is required to meet 25 points. The Handbook includes a list of suggested TDM measures and the associated points for each measure. The TDM Program evaluation was only prepared for the Project-Level Components and includes discussion of what additional TDM measures the program-level project could consider in the future.

Based on the parking ratio presented in **Table 8-4**, the Project would attain 18 TDM points and is required to attain an additional 7 TDM points to reach the required 25 points, which could be accomplished through the following:

- 1 point: provide short-term and long-term bicycle parking and provide showers, changing rooms, and lockers at a rate twice as is required
- 2 points: provide TDM promotions such as targeted messaging and communications campaigns; and provide welcome packets with information about nearby amenities.
- 1 point: 76 to 100 percent of employees participate in telecommuting 1 day a week
- 1 point: provide pre-tax deductions for transit and vanpooling expenses
- 2 points: provide targeted behavior interventions to all project employees annually, plus one-on-one counseling and personalized commute planning for employees.

Based on the TDM program elements outlined above that the Project will implement, the Project will meet its TDM requirements. The TDM Plan will be prepared in a separate document and will be periodically updated to reflect the current programming at the Medical Center.

Evaluation of Neighborhood Intrusion

The proposed project has the potential to add traffic to residential streets in adjacent neighborhoods. This potential would be heightened if operations at study intersections deteriorate to unacceptable levels and vehicle drivers look for alternate routes to access the medical center.

Such areas are the neighborhood east of the Medical Center along Liska Lane north of Santa Teresa Boulevard, and the neighborhood west of the Medical Center along Larchmont Drive west of Cottle Road. The neighborhood east of the Medical Center runs along Liska Lane, which connects from International Circle to Santa Teresa Boulevard. With potential queues that could form to the south of the new parking garage onto Santa Teresa Boulevard, westbound drivers on Santa Teresa Boulevard could try turning right onto Liska Lane and circling back to access the new parking garage and hospital from the north. However, this route adds a lot of distance getting to the parking garage and hospital, and drivers would not be likely to go out of the way if not convenient. Cut-through traffic levels would be negligible, but travel behavior is hard to predict, and monitoring the cut-through traffic levels could still be considered.

The neighborhood west of the Medical Center runs along Larchmont Drive, next to the study intersection at Santa Teresa Boulevard and Cottle Road. It is possible that southbound drivers on Cottle Road could try turning right onto Larchmont Drive to avoid the study intersection at Santa Teresa Boulevard and Cottle Road, as the new medical facility could change the behavior on Cottle Road. Also, southbound right-turn vehicles from Larchmont Drive, to turn eastbound along Santa Teresa Boulevard, would need to circle back around using the left-turn pocket at Springer Way, causing a route with a lot of distance traveled. However, as no access points to the project site will be changing from the west, the amount of cut-through traffic would be negligible.

9. Transportation Deficiencies and Improvements

This chapter discusses potential Project effects on the transportation system. The identified deficiencies and recommended improvements for each transportation facility type are described.

Deficiencies and Improvements

Intersection Analysis

As discussed in **Chapter 6**, all study intersections are estimated to operate at an acceptable LOS based on their respective LOS threshold, and no adverse intersection operations effects are identified under Background Plus Project Conditions.

Under Cumulative Plus Project conditions, all study intersections are estimated to operate at an acceptable LOS based on their respective LOS threshold, except for the Cottle Road / Palmia Drive-Hospital Parkway (intersection #4) and Hospital Parkway / International Circle (intersection #6) during the PM peak hour.

Intersection #4: Cottle Road / Palmia Drive-Hospital Parkway

The Cottle Road / Palmia Drive-Hospital Parkway intersection would degrade intersection operations from LOS D to unacceptable LOS F during PM peak hour under Cumulative Plus Project Conditions. Intersection improvement to address the adverse effect includes provision of a second dedicated westbound right-turn lane (for a total of one left-turn lane, one through lane, and two right-turn lanes) on Hospital Parkway. With the improvement, the intersection operations would improve to LOS D with 43.2 seconds of delay. However, there are right-of-way constraints that limit the feasibility of the improvement. In addition, there is a crosswalk across the north leg of the intersection, and pedestrians have a pedestrian phase to cross Cottle Road at the same time as the westbound through and right-turn movements. It would be difficult for pedestrians to cross the dual right-turn lanes during the PM peak hour since pedestrians would need to rely on vehicles to yield to them. Additionally, the double right-turn lanes would increase the chance of multiple threat collisions, where a pedestrian enters the traffic lane in front of a stopped right-turning vehicle in the outside lane and is struck by another right-turning vehicle in the inside turn lane because the stopped vehicle blocks the line of sight between the pedestrian and the driver of the striking vehicle. Thus, the improvement would not be feasible, and the vehicle LOS adverse effect cannot be reduced. Given that there are not feasible improvements to address the LOS deficiency at Cottle Road/Hospital Parkway intersection under the Cumulative Plus Project conditions, the project applicant will work with the City to implement/provide a fair-share contribution towards multimodal improvements in the surrounding area, consistent with the goals of *Envision 2040 General Plan*. Under

Cumulative Plus Project conditions, the Project's faire share contribution is 16% (750 total project trip assignment at intersection / 4,633 total intersection volumes under Cumulative Plus Project conditions).

Intersection #6: Hospital Parkway / International Circle

The Hospital Parkway / International Circle intersection would degrade intersection operations from LOS B to unacceptable LOS F during PM peak hour under Cumulative Plus Project Conditions and would meet the signal warrant. Intersection improvement to address identifies the adverse effect includes signalization of the all-way stop-controlled intersection. Since this is a cumulative adverse effect, in the future when the MOB project moves forward, the Project would re-evaluate this intersection and identify if signalization, or other intersection control, would be warranted.

Queuing Analysis

Intersection deficiencies and improvements were evaluated under Background Plus Project and Cumulative Plus Project Conditions based on the queuing results shown in **Table 6-2**, **Table 6-3**, **Table 7-2**, and **Table 7-3**. Improvements were considered for intersection deficiencies where the addition of Project trips causes queues to further exceed available storage capacity or to form queue lengths that exceed available storage capacity under Background Plus Project and Cumulative Plus Project conditions. The recommended improvements under Background Plus Project conditions and Cumulative Plus Project condition are shown below in **Table 9-1** and **Table 9-2**, respectively.

Table 9-1: Turning Movement Queue Analysis and Improvements for Background Plus Project Conditions

#	Signalized Intersection	Pocket	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length in feet[3] No Project (Plus Project)	Improvements *(Presented for informational purposes only – not intended as recommended improvements)*
4	Cottle Road / Palmia Drive-Hospital Parkway	SBL	290	AM PM	**875 (950)** **425 (500)**	The available storage at this movement cannot be increased. Therefore, no improvement is recommended.
		WBR	350	AM PM	**550** (**600**) **1,050 (1,325)**	The available storage at this movement cannot be increased. Therefore, no improvement is recommended.
5	Cottle Road / Santa Teresa Boulevard	SBL	280	AM PM	**500 (525)** **450 (450)**	Increasing the available storage at this movement would require physically altering the median. Up to 100 feet of capacity is available by altering the median. While this would not fully address queuing at this location under Background Plus Project Conditions, it would help alleviate queue spill back.

8	Camino Verde Drive/Santa Teresa Boulevard	SBL	70	AM PM	50 (50) **175 (<u>200</u>)**	Increasing the available storage at this movement would require restriping the centerline and removing northbound left-turn capacity at the Camino Verde Drive/International Circle intersection. Therefore, extending turn-pockets at this movement is not recommended.
		SBR	100	AM PM	50 (50) **350 (<u>450</u>)**	Increasing the available storage at this movement would require restriping the centerline and removing northbound left-turn capacity at the Camino Verde Drive/International Circle intersection. While extending turn-pockets at this movement is not recommended, removing the existing pork-chop island at the northwest corner of the intersection and implementation of Class II buffered bike lanes along Camino Verde Drive will cause the southbound right-turn movement to have a de-facto right-turn striping on the approach to the intersection.
		EBL	165	AM PM	125 **(<u>175</u>)** 125 (150)	Increasing the available storage capacity at this movement by adding an additional left-turn storage lane would require removing eastbound through capacity at Santa Teresa Boulevard. This would not improve overall traffic capacity. Therefore, adding additional turn-pockets at this movement is not recommended. Up to 100 feet of capacity is available by physically altering the median. The City would support and recommends the implementation of extending the eastbound left-turn pocket at the intersection by the Project. While this would not fully address queuing at this location under Cumulative Plus Project Conditions, it would help alleviate queue spill back.

Notes: **Bold** text indicates vehicle queuing exceeds available storage capacity. **<u>Bold and underlined</u>** text indicates where the addition of project trips increases queues at locations where cars are already exceeding available storge capacity or to form queue lengths that exceed available storage capacity.

1. Rounded to the nearest 5 feet.
2. AM = morning peak hour, PM = evening peak hour.
3. Calculated from number of cars in queue (assuming each car is about 25 feet long). Rounded to nearest 25 feet. No Project refers to Background Conditions and Plus Project refers to Background Plus Project Conditions.

Source: Fehr & Peers, 2023.

Table 9-2: Turning Movement Queue Analysis and Improvements for Cumulative Plus Project Conditions

#	Signalized Intersection	Pocket	Available Storage Length[1] (feet)	Peak Hour[2]	Projected Queue Length in feet[3] No Project (Plus Project)	Improvements *(Presented for informational purposes only – not intended as recommended improvements)*
4	Cottle Road / Palmia Drive-Hospital Parkway	SBL	290	AM PM	**875 (1,350)** **425 (725)**	Increasing the available storage at this movement would require physically altering the median. Up to 200 feet of capacity is available by altering the median.
		WBR	350	AM PM	**550** (**800**) **1050 (2,400)**	The available storage at this movement cannot be increased. Therefore, no improvement is recommended
5	Cottle Road / Santa Teresa Boulevard	SBL	280	AM PM	**500 (625)** **450 (475)**	Increasing the available storage at this movement would require physically altering the median. Up to 100 feet of capacity is available by altering the median. While this would not fully address queuing at this location under Cumulative Plus Project Conditions, it would help alleviate queue spill back.
8	Camino Verde Drive/Santa Teresa Boulevard	SBL	100	AM PM	50 (50) **175 (200)**	Increasing the available storage at this movement would require restriping the centerline and removing northbound left-turn capacity at the Camino Verde Drive/International Circle intersection. Therefore, extending turn-pockets at this movement is not recommended.
		SBR	100	AM PM	50 (100) **350 (650)**	Increasing the available storage at this movement would require restriping the centerline and removing northbound left-turn capacity at the Camino Verde Drive/International Circle intersection. Therefore, extending turn-pockets at this movement is not recommended.

		EBL	165	AM PM	125 **(325)** 125 **(<u>250</u>)**	Increasing the available storage capacity at this movement by adding an additional left-turn storage lane would require removing eastbound through capacity at Santa Teresa Boulevard. This would not improve overall traffic capacity. Therefore, adding additional turn-pockets at this movement is not recommended. Up to 100 feet of capacity is available by physically altering the median. While this would not fully address queuing at this location under Cumulative Plus Project Conditions, it would help alleviate queue spill back.

Source: Fehr & Peers, 2023.

Freeway Off-Ramp Queuing Analysis

As discussed in **Chapter 7**, both the northbound and southbound off-ramps are estimated to have sufficient storage to accommodate the projected queues, and no adverse off-ramp operations effects are identified under Background Plus Project or Cumulative Plus Project conditions. No improvements are necessary.

Pedestrian Analysis

As noted in **Chapter 1**, the Project proposes to remove channelized right-turns at the following intersections for the specified movements:

- Cottle Road/Hospital Parkway: westbound right-turn and northbound right turn
- Santa Teresa Boulevard/Camino Verde Drive: southbound right-turn and westbound right-turn

The removal of the referenced channelized right-turns will require signal modification, striping, etc. and has direct benefits to pedestrian travel. The crossing distances are shortened, thus reducing the total crossing time, and vehicle right-turn speeds are reduced, allowing quicker stopping of cars.

No other changes are being made to study intersections and entry points to the Project site. Sidewalks around Hospital Parkway and Camino Verde Drive would also provide pedestrian access to the new facility, as well as from existing pedestrian crosswalks across Camino Verde Drive that would also lead to the new parking structure. The Project does not propose a new mid-block crosswalk on Camino Verde Drive between International Circle and Santa Teresa Boulevard, because pedestrian access within the garage, including stairwells and elevators between floors will provide access for pedestrians at the north-

west and south-west corners of the garage; thus, pedestrians will use the crosswalks at the Camino Verde Drive intersections at International Circle and Santa Teresa Boulevard. The Project supports the goals of Envision 2040 and does not substantially increase hazards due to a geometric design feature; thus, the Project is not considered to have an adverse impact on pedestrian facilities.

Bicycle Analysis

Consistent with *Better Bike Plan 2025*, the project will implement Class IV separated bikeways along the Project frontage along Santa Teresa Boulevard and Cottle Road. In addition, the Project proposes to provide Class II bike lanes along Camino Verde between Santa Teresa Boulevard and International Circle. The Project supports the goals of Envision 2040 and does not substantially increase hazards due to a geometric design feature thus the Project is not considered to have an adverse impact on bicycle facilities.

Transit Analysis

There are two bus stops internal to the site along International Circle, as well as several bus stops along Santa Teresa Boulevard and Cottle Road that provide bus access to the site. The Project will improve the bus stop along the Project perimeter on Santa Teresa Boulevard to provide a new bus shelter. In addition, the Project is within walking distance of the VTA Blue Line LRT station at Cottle Road.

Significant deficiencies to transit service would occur if the Project or any part of the Project conflicts with a plan, ordinance, or policy addressing the circulation system, including transit paths. The Project is consistent with the goals of Envision 2040 and does not conflict with any existing or planned transit improvement in the area; thus, the Project is not considered to have an adverse impact on transit facilities.

Transit Delay Analysis

Transit vehicles operating on the same roadways used by private vehicles to access the Project site could incur additional delay due to increased auto congestion. Through movement delays along the primary corridors are used to determine potential increases to transit vehicle delay. The difference between the No Project and Plus Project values is the added transit vehicle delay. The results are shown in **Table 9-2**.

The City of San José and VTA do not currently have established policies or significance criteria related to transit vehicle delay. Per VTA Guidelines, if increased transit vehicle delay is found, the City of San José should work with VTA to identify transit priority measures near the affected facility and include contributions to any applicable projects that improve transit speed and reliability.

Within the Project area, the traffic created by the Project will increase travel times by less than 30 seconds for all routes under all scenarios. Under the Background Plus Project scenario, travel times are improved in the northbound and southbound directions for Routes 27 and 66. Under the Cumulative Plus Project scenario, travel times are improved in the northbound direction for Route 66, and in the southbound direction for Route 66 and Express 102. Since the changes in transit travel time are nominal, no improvements are identified.

Table 9-2: Additional Transit Vehicle Delay By Route

Affected Transit Routes	Peak Hour	Projected Additional Delay (sec)				Affected Corridors
		Background Plus Project		Cumulative Plus Project		
		NB/EB	SB/WB	NB/EB	SB/WB	
Express 102	AM PM	3.8 3.8	10.3 11.1	5.3 1.1	6.1 -2.8	Santa Teresa Blvd[1]
27	AM PM	-5.5 -7.7	11.1 -5.4	1.1 8.7	20.4 23.9	Santa Teresa Blvd[1] International Cir[2] Camino Verde Dr[3] Cottle Rd[4]
68	AM PM	8.4 12.5	0.4 0.8	22.7 0.9	14.4 6.3	Santa Teresa Blvd[1] Cottle Rd[4]
66	AM PM	-3.5 -9.8	-2.1 -8.9	3.8 -1.7	-0.4 9.4	Santa Teresa Blvd[1] International Cir[2] Camino Verde Dr[3]

Notes:

1. Santa Teresa Boulevard corridor is defined as between Cottle Road and Camino Verde Drive.
2. International Circle corridor is defined as between Hospital Parkway and Camino Verde Drive.
3. Camino Verde Drive corridor is defined as between International Circle and Santa Teresa Boulevard.
4. Cottle Road corridor is defined as between Beswick Drive / Raleigh Road and Santa Teresa Boulevard.

Initial Vol:	57	56		2		1	18		125		503	182		94		4	43		33	

Major Street Volume: 859
Minor Approach Volume: 144
Minor Approach Volume Threshold: 337

SIGNAL WARRANT DISCLAIMER

This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

SIGNAL WARRANT DISCLAIMER
This peak hour signal warrant analysis should be considered solely as an
"indicator" of the likelihood of an unsignalized intersection warranting
a traffic signal in the future.  Intersections that exceed this warrant
are probably more likely to meet one or more of the other volume based
signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace
a rigorous and complete traffic signal warrant analysis by the responsible
jurisdiction.  Consideration of the other signal warrants, which is beyond
the scope of this software, may yield different results.

Intersection #7 Camino Verde Drive/International Circle

****

Future Volume Alternative: Peak Hour Warrant NOT Met

Approach:	North Bound			South Bound			East Bound			West Bound		
Movement:	L	T	R	L	T	R	L	T	R	L	T	R
Control:	Stop Sign			Stop Sign			Stop Sign			Stop Sign		
Lanes:	1	0	0	0	1	0	0	0	0	0	0	0
Initial Vol:	25	0	79	0	0	0	0	51	80	216	61	0

Major Street Volume: 408
Minor Approach Volume: 104
Minor Approach Volume Threshold: 575

SIGNAL WARRANT DISCLAIMER

This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

SIGNAL WARRANT DISCLAIMER
This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

Major Street Volume: 219
Minor Approach Volume: 99
Minor Approach Volume Threshold: 808

SIGNAL WARRANT DISCLAIMER
This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

Movement:	L	T	R	L	T	R	L	T	R	L	T	R
Control:	Stop Sign			Stop Sign			Stop Sign			Stop Sign		
Lanes:	0	0	1! 0	0	0	0	1! 0	0	1	0	0	1 0
Initial Vol:	106	24	8	9	35	390	286	113	53	5	135	23

Major Street Volume: 615
Minor Approach Volume: 434
Minor Approach Volume Threshold: 452

SIGNAL WARRANT DISCLAIMER

This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

SIGNAL WARRANT DISCLAIMER

This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

Intersection #7 Camino Verde Drive/International Circle

****

Future Volume Alternative: Peak Hour Warrant NOT Met

Approach:	North Bound			South Bound			East Bound			West Bound		
Movement:	L	T	R	L	T	R	L	T	R	L	T	R
Control:	Stop Sign			Stop Sign			Stop Sign			Stop Sign		
Lanes:	1	0	0	0	1	0	0	0	0	0	0	0
Initial Vol:	146	0	42	0	0	0	0	106	128	153	187	0

Major Street Volume: 574
Minor Approach Volume: 188
Minor Approach Volume Threshold: 467

SIGNAL WARRANT DISCLAIMER

This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

Major Street Volume: 860
Minor Approach Volume: 144
Minor Approach Volume Threshold: 337

SIGNAL WARRANT DISCLAIMER
This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

Intersection #6 International Circle/Hospital Parkway

Future Volume Alternative: Peak Hour Warrant NOT Met

Approach:	North Bound			South Bound			East Bound			West Bound		
Movement:	L	T	R	L	T	R	L	T	R	L	T	R
Control:	Stop Sign			Stop Sign			Stop Sign			Stop Sign		
Lanes:	0 0	1! 0	0	0 0	1! 0	0	1 0	0 1	0	0 1	0 1	0
Initial Vol:	106	24	8	9	35	390	286	113	53	5	135	23

Major Street Volume: 615
Minor Approach Volume: 434
Minor Approach Volume Threshold: 452

SIGNAL WARRANT DISCLAIMER
This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

SIGNAL WARRANT DISCLAIMER
This peak hour signal warrant analysis should be considered solely as an "indicator" of the likelihood of an unsignalized intersection warranting a traffic signal in the future. Intersections that exceed this warrant are probably more likely to meet one or more of the other volume based signal warrant (such as the 4-hour or 8-hour warrants).

The peak hour warrant analysis in this report is not intended to replace a rigorous and complete traffic signal warrant analysis by the responsible jurisdiction. Consideration of the other signal warrants, which is beyond the scope of this software, may yield different results.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).
Roundabout Capacity Model: US HCM 6.
Delay Model: HCM Delay Formula (Geometric Delay is not included).
Queue Model: HCM Queue Formula.
Gap-Acceptance Capacity: Traditional M1.
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).
Roundabout Capacity Model: US HCM 6.
Delay Model: HCM Delay Formula (Geometric Delay is not included).
Queue Model: HCM Queue Formula.
Gap-Acceptance Capacity: Traditional M1.
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

1. Introduction and Summary.

By letter dated June 2, 2023, the City of San José (City) advised Great Oaks Water Company (GOWC) that the City was preparing an Environmental Impact Report for the *Kaiser Permanente San Jose Medical Center* project, located in south San José. A copy of the June 2, 2023 letter from the City to GOWC is attached as Exhibit A.

GOWC is a California corporation in good standing and a water corporation regulated by the California Public Utilities Commission (CPUC) as a Class A public water utility. GOWC's service area is a specific geographic territory set aside by the CPUC to GOWC for providing water service. GOWC provides potable water and is a "public water system" as defined in California Water Code Section 10912(c).

GOWC was founded in 1959 and has provided high quality water service to its customers for more than half a century. All of the water served by GOWC is sourced from the abundant underground water supplies in the Santa Clara Valley Groundwater Basin.

The site for the City's *Kaiser Permanente San Jose Medical Center* project (Project) consists of approximately 39-gross-acre project site (APNs: 706-05-011; 706-05-025; 706-05-017; 706-05-037; 706-05-020; 706-05-032; and 706-05-035) is located at 250 Hospital Parkway in the City of San José. The project proposes demolition of the existing 250,000-square-foot (sf) hospital and construction of a new approximately 685,000-sf hospital (including basement), a new central utility plant (energy center), and a parking structure at their San José Medical Center campus ("SJMC campus" or "campus"). The existing hospital would continue to function at full capacity while the new hospital is under construction. Projected future campus improvements would include demolition of two one-story medical offices (both approximately 10,100 sf) and construction of a 250,000-sf outpatient facility and a parking garage. The Project is entirely within GOWC's service area authorized by the CPUC.

The City requested that GOWC provide an analysis of whether GOWC has adequate water supply to serve the Project. The City's request was made in the context of State Law (SB 610) and the California Environmental Quality Act (CEQA).

The information contained in this document satisfies the requirements of California Water Code Section 10910. In preparing this Water Supply Assessment, GOWC has followed and complied with the procedures in the California Department of Water Resources Guidebook for Implementation of Senate Bill 610 and Senate Bill 221 of 2001, as published on October 8, 2003.

GOWC has determined that it has sufficient water supply – based on normal, single dry, and multiple dry years – to meet the demand projected for the Project plus existing and planned future use, including agricultural and manufacturing uses.

2. California Public Utilities Service Area and Area Population.

GOWC is certified by the CPUC to provide water service within an approved service territory. A copy of the filed service area map for the entire GOWC water system (Tariff Sheet 644-W) and a copy of the filed service area map for the geographic area of the Project (Tariff Sheet 650-W) are attached as Exhibit B.[1] The Project is wholly within GOWC's CPUC-certified service area.

Generally, GOWC's service area includes a portion of the southern end of the City known as the Edenvale, Blossom Valley, SE Almaden Valley, and Coyote Valley areas. Snell Avenue roughly bounds the area on the west, the Silver Creek Ridge on the east, Palm Avenue (Coyote Valley) on the south, and Riverview Drive on the north.

The climate for GOWC's service area is the same as the climate for the City in general. According to the United States Department of Commerce, National Oceanographic and Atmospheric Administration (NOAA), the City has a Mediterranean-type climate characterized by sharply contrasting wet and dry seasons. The wet season runs from November through March, providing 82% of the yearly precipitation total. Rain during the summer months normally totals only 0.20 inches. Wet seasons are cool, but mild; dry season weather is very consistent with warm sunny days. See also Exhibit D, page 5.

In 2020, the population in GOWC's service area was calculated to be 92,995. See Exhibit D, page 5. Population growth estimates for the GOWC service area, based upon the average growth rate projection (1.3% growth per year) of the Association of Bay Area Governments (ABAG), are shown in the table below. Naturally included within these population figures are residential, commercial, and industrial growth possibilities such as those for the Project.

Projected Population of GOWC Service Area

2020	2025	2030	2035	2040	2045
106,450	112,582	119,168	126,115	133,367	141,036

GOWC concludes that the Project is wholly within its authorized CPUC service area and that GOWC is fully authorized to supply water to the Project.

[1] See also, *https://greatoakswater.com/SystemMaps.htm*.

3. Public Water System.

GOWC is a public water system[2] and water supplier with more than 20,000 service connections providing piped water to the public for human consumption. GOWC relies upon groundwater as its principal water source and will continue to do so for the Project. The groundwater basins serving from which GOWC draws its water supply have not been designated as overdraft by the State of California. The water produced by GOWC's groundwater supply wells meet all state and federal standards for potable drinking water and constitute the water supply providing water to GOWC's customers.

GOWC's system infrastructure is supported by capital programs for the regular and necessary maintenance, replacement, upgrade, expansion, and enlargement of facilities. GOWC's capital outlays are subject to approval by the CPUC on a periodic basis, with the most current proceeding being resolved without hearings, pending CPUC approval.

GOWC is a public utility regulated by the CPUC. The Project location consists of 39-gross-acre project site (APNs: 706-05-011; 706-05-025; 706-05-017; 706-05-037; 706-05-020; 706-05-032; and 706-05-035) is located at 250 Hospital Parkway in the City of San José site.

The parcels identified are all located within GOWC's present service area authorized by the CPUC. GOWC is obligated and prepared to provide water service to the proposed Project in conformity with all applicable CPUC rules and requirements.

[2] A "public water system" is defined in the California Water Code as a system that has 3,000 or more service connections and provides piped water to the public for human consumption. *See*, Water Code §10912(c).

4. Urban Water Management Plan.

On June 28, 2021, GOWC's board of directors approved and adopted its 2020 Urban Water Management Plan (2020 UWMP) in accord with California Water Code Sections 10610, et seq. A copy of GOWC's 2020 UWMP is attached as Exhibit D.[3] GOWC is scheduled to prepare a new UWMP in 2025.

GOWC's 2020 UWMP is incorporated into this Water Supply Assessment by reference. The 2020 UWMP includes water supply projections based upon projected water demands through 2045. Water demands necessarily include projected residential, commercial, and industrial growth based upon historical information and experience.

GOWC's 2020 UWMP includes water supplies necessary for the Project. The total projected water supplies available during normal, single dry, and multiple dry years during the twenty-five (25) years addressed in the 2020 UWMP will meet the projected water demand associated with the Project, in addition to all of GOWC's existing and planned future uses known at this time.

[3] See also, *https://greatoakswater.com/OtherPDFs/GOW_CA4310022_2020_Urban_Water_Management_Plan.pdf*.

5. Water Rights, Water Supply Entitlements, and Water Service Contracts.

As shown in the 2020 UWMP, GOWC has concluded and reported that it has sufficient water supplies to meet the projected water demands from population growth within its service area to the year 2045 and beyond. **GOWC's conclusion that it has sufficient water supplies includes demands generated by the Project in addition to the demands of existing and other planned and reasonably expected future uses.**

A. Water Rights. Groundwater Resources: GOWC obtains all of the water it supplies from local groundwater resources. GOWC will supply all potable water for the Project, its present, and its future customers from groundwater resources.

The Santa Clara Subbasin of the Santa Clara Valley Groundwater Basin (Department of Water Resources (DWR) Groundwater Basin Number: 2-9.02) underlies GOWC's service area and the Project. The right to pump groundwater from the Santa Clara Subbasin has not been adjudicated. The DWR has not identified the Subbasin as overdraft nor has it projected that the Subbasin will become overdraft. GOWC draws all of the potable water it serves and intends to serve to the Project from the Santa Clara Subbasin. The Santa Clara Subbasin occupies a structural trough parallel to the northwest trending Coast Ranges. The Diablo Range bounds it on the west and the Santa Cruz Mountains form the basin boundary on the east. It extends from the northern border of Santa Clara County to the groundwater divide near the town of Morgan Hill.

The Santa Clara Valley Water District (SCVWD) is charged with the legal duty of managing the Santa Clara Subbasin of the Santa Clara Valley Groundwater Basin, including all necessary artificial recharge of the groundwater in the Subbasin. SCVWD relies primarily upon natural rainfall, runoff, and imported water to fulfill its recharge responsibilities. SCVWD frequently refers to two subareas within the Santa Clara Subbasin – the Santa Clara Plain and the Coyote Valley.

GOWC has groundwater wells in both subareas and, with its integrated water system, can supply potable water throughout its entire service area with groundwater sourced in the two subareas. The Santa Clara Plain has an operational long-term storage capacity of 350,000 acre-feet of groundwater, while the operational storage capacity of the Coyote Valley is estimated to be between 23,000 and 33,000 acre-feet of groundwater.

GOWC has been drawing potable water to provide service exclusively from the Santa Clara Subbasin for more than fifty years. All of GOWC's water supplies come from its twenty three (23) groundwater wells in the Santa Clara Subbasin aquifers. These aquifers are recharged primarily by rainfall and runoff, as well as by artificial recharge by SCVWD. GOWC maintains that there is sufficient water in the Santa Clara Subbasin to fully support the Project.

Groundwater classified as percolating groundwater is not subject to the California Water Code provisions concerning the appropriation of water, and a water user can take percolating groundwater without a State-issued water right permit or license.

GOWC has the right to extract all percolated groundwater it requires from the Subbasin for service to the Project.

The table below shows the amount of groundwater produced and served by GOWC over the last five calendar years (in acre feet).

Year □	2018	2019	2020	2021	2022
Acre Feet	10,276	10,393	11,133	10,379	9,389

Groundwater Projections Through 2045: GOWC projects that it has sufficient water supply to meet the needs of its customers, including reasonably anticipated new customers within its service area. See Exhibit D, 2020 UWMP, Section 6.4, page 31.

GOWC projects sufficient water supplies to satisfy projected demand, including the additional demand associated with the Project. The combination of recharge from rainfall, runoff, and imported water in the Santa Clara Subbasin will be sufficient to meet all reasonably foreseeable demands through the year 2045.

SCVWD collects a groundwater charge on all groundwater produced for beneficial uses in specified zones within Santa Clara County. SCVWD is required by law to spend groundwater charge revenues to recharge groundwater within the specified zones.

GOWC has no impediment, legal or otherwise, to extraction of groundwater for its existing and projected customers or for the Project.

B. Water Supply Entitlements. Because GOWC has sufficient water resources for its present and projected needs, GOWC requires no entitlements to additional outside water supplies. Nevertheless, GOWC has the capability to interconnect to an existing 60-inch diameter treated potable water main owned by SCVWD and located on the western boundary of GOWC's service area. The interconnection, if made, would allow GOWC to receive treated potable water as an additional water resource. GOWC does not contemplate that establishing this interconnection will be necessary to serve the Project.

Recycled water may become available for use at the Project site within the foreseeable future. Industrial recycled water is currently being supplied to one customer within GOWC's service area and GOWC is in discussions to provide recycled water throughout its service area. Advanced recycled water – recycled water that has been treated so as to remove contaminants that currently prevent recycled water from being used for irrigation, groundwater recharge, and potable use – is also expected to become available in the foreseeable future as well. GOWC has a legal right to serve all recycled water within its service area, including to the Project. When recycled water becomes available, GOWC will take the necessary actions to protect its legal rights as to recycled water service within GOWC's service area so that GOWC may serve recycled water throughout its service area, including to the Project.

C. Water Service Contracts. GOWC imports no water and does not rely upon treated water to meet the water demands of the Project or of existing and other planned and reasonably expected future uses.

SCVWD does import non-potable water from the Central Valley Project. According to its 2020 Urban Water Management Plan, SCVWD has a contract with the Central Valley Project to supply 152,500 acre-feet per year, and a contract with the State Water Project for 100,000 acre-feet per year. SCVWD uses a portion of the water imported under these contracts to recharge the groundwater of the Santa Clara Subbasin.

GOWC relies upon its groundwater resources and has no plans to acquire additional, non-groundwater supplies for service to the Project.

GOWC projects that it has sufficient water supplies with its current water resources and water supply infrastructure for the Project and for existing and other planned and reasonably expected future uses.

6. Regulatory Approvals Required to Convey or Distribute Water.

A. California Public Utility Commission. GOWC is subject to CPUC General Order 103A and expects to provide all water service in accord with the requirements of the General Order. General Order 103 has been in existence since 1955 and General Order 103A has been in effect since 2009. GOWC is unaware of any proposed revision or amendment to General Order 103A that would adversely affect GOWC's ability to serve the Project as described.

No additional regulatory or licensing authority is required for GOWC to provide water service to the Project.

B. SB 221 Written Verifications of Water Supply. SB 221 requires water suppliers, upon request, to provide written verifications of sufficient water supply to serve particular subdivisions of 500 housing units or more. These verifications amount to commitments to serve and are relied upon by land use planners to ensure an adequate and perpetual water supply for new homes.

Because GOWC could receive SB 221 verification requests for development projects other than this Project, and because GOWC must respond to such requests in the order in which they are received and without discrimination, GOWC must reserve the right to issue SB 221 verifications on a first-to-file basis. At the present time, GOWC has not been requested nor has it delivered a written verification of water supply to any proposed subdivision pursuant to a SB 221 request.

C. Non-SB 221 Prior Water Supply Commitments. As a regulated public utility, GOWC is required not to discriminate, prejudice, disadvantage, or require different rates or deposit amounts from a person because of race, religious creed, color, national origin, ancestry, physical handicap, medical condition, occupation, sex, marital status, or change in marital status. GOWC fully supports this policy and recognizes that it must treat all customers within its authorized service area on an equal, non-discriminatory basis.

The Project is fully included within GOWC's service area as recognized by the CPUC. **GOWC has no prior service commitments that would prevent full water supply to the Project.**

D. California Energy Policy. As of this date, GOWC has received no mandates from the CPUC to reduce use of electrical energy in its present or future efforts to supply water. Production and delivery of groundwater is generally less energy intensive than the production and delivery of treated or recycled water. As GOWC uses exclusively groundwater and expects to do so for all potable water requirement of the Project, GOWC is not exposed to risk of regulatory energy efficiency programs that may affect other state or local water transmission facilities or water treatment systems. **No present or anticipated restrictions on the use of energy impair or are expected to impair GOWC's ability to provide full water supply to the Project.**

E. Water Service to Affordable Housing. California Government Code §65589.7 requires water service providers to adopt written policies and procedures regarding the provision of water service to a development that includes affordable housing. In providing water service to developments including affordable housing, regulated utilities must take into account specific requirements of both the Water Code and the Health and Safety Code.

GOWC has adopted rules and procedures in a formal tariff approved by the CPUC establishing compliance with Government Code §65589.7. GOWC's tariff is designed to be capable of support of a final affordable housing component of the Project. GOWC has the flexibility to amend and adopt revisions to its affordable housing tariff should the low-income housing portion of the Project be revised.

GOWC will support all affordable housing provided at the Project with no resulting disincentive to serve.

F. Financial Support for Low Income Households. GOWC expects the Project will or may include an as yet undetermined number of low-income households in the final residential mix. GOWC currently provides financial relief to qualified low-income residential households, whether owner-occupied or rental property. All separately metered GOWC residential customers are entitled to apply for the Customer Assistance Program (CAP). In addition, the CPUC requires utilities to share certain customer data for the purpose of including additional qualified low-income households in the CAP. GOWC regularly participates in such data sharing and automatically enrolls qualified low-income households in the CAP, subject to an opt-out procedure.

The CAP currently reduces the monthly water meter service charge by fifty percent (50%). The cost of the program is subsidized among all GOWC customers.

GOWC will support all low-income housing provided at the Project with no resulting disincentive to serve.

G. Assistance for Active Military Service. GOWC has adopted a program, approved by the CPUC, to postpone termination of water service at residences where the head of the household is serving in active military duty. The program meets the requirements of the Military and Veterans Code §827.

GOWC's program aiding active duty military families will not create a disincentive to provide water service to the Project.

H. California State Water Resources Control Board. GOWC is subject to California State Water Resources Control Board (SWRCB) and its Division of Drinking Water (DDW) regulations pertaining to water quality. GOWC knows of no proposed health related regulation of water quality that would adversely affect GOWC's ability to supply all potable water to the Project.

I. Fluoridation. GOWC serves groundwater without the addition of fluoride. GOWC may be required to fluoridate its water supply if funding is first provided by CDPH. Should fluoridation of the water supply for the Project become necessary, implementation of treatment will not adversely affect or otherwise interrupt water service to the Project.

7. Reliance on Supplies or Suppliers Never Used.

GOWC has the potential to interconnect with the existing SCVWD treated water main on the western boundary of GOWC's service area if necessary. GOWC does not contemplate that establishing and operating such a connection will be necessary to serve the Project. If such a connection were established and operated, GOWC would be able to receive treated water from SCVWD and/or supply groundwater to SCVWD.

Other public water systems, including San José Water Company and the City of San José Municipal Water System rely upon treated water supplied by the SCVWD treated water main to serve existing customers. GOWC does not need and does not contemplate obtaining treated water from either of these public water systems to supply water to the Project or to its existing and planned future customers.

The information in this section is intended to comply with Water Code Section 10910.

8. Water Supply for the Project.

Water demands for the Project are well within the water supplies available from GOWC for the Project, as shown in GOWC's 2020 UWMP. GOWC incorporates by reference its 2020 UWMP herein. For ease of reference, portions of the 2020 UWMP are reproduced below.

A. Groundwater and Other Sources. The table below summarizes past, present, and projected water supplies from each source of supply. Quantities are shown in acre-feet (AF). See also Exhibit D, 2020 Urban Water Management Plan, 6.4, page 31.

Projected Water Supplies

Water Supply Source	2025	2030	2035	2040	2045
Supplier-Produced Groundwater	11,839	12,680	12,680	12,680	12,680
Supplier-Produced Surface Water	0	0	0	0	0
Recycled Water	0	0	0	0	0
Total Water Produced/Projected	11,839	12,680	12,680	12,680	12,680

B. Additional Water Supplies. As previously stated, GOWC's available water supplies are sufficient to meet the demand projected for the Project plus existing and planned future use, including agricultural and manufacturing uses. GOWC projects no need for additional sources of supply.

C. Infrastructure for Project. No additional water supply infrastructure is needed for the Project as demand projected for the Project may be met using existing water supply infrastructure. To the extent mains, services, hydrants, and other water delivery infrastructure is required for the Project, such infrastructure will be constructed and funded in accord with CPUC policies, procedures, and tariffs, including, if necessary, main extension rebate contracts. Other costs of providing customer service, including water meters, billing, and customer service will be provided by GOWC without incurring additional debt, subject to collection from customers.

9. Demand Analysis for the Project.

As indicated, water demands for the Project are well within the water supplies available from GOWC for the Project, as shown in GOWC's 2020 UWMP. See Exhibit D, Section 4.5 pages 20-21. GOWC incorporates by reference its 2020 UWMP herein. For ease of reference, portions of the 2020 UWMP are reproduced below.

A. Existing and Planned Future Water Use. The table below summarizes existing and planned future water use from 2021 through 2025. Quantities are shown in AF. See also Exhibit D, 2020 Urban Water Management Plan, Section 4.5, pages 21.

B.

Table 4-7 Characteristic Five-Year Water Use (MG)

	2021	2022	2023	2024	2025
Single-Family Residential	1,892.7	1,893.7	1,899.4	1,905.1	1,910.8
Multi-Family Residential	698.3	701.7	719.5	737.4	755.2
Commercial	241.4	242.3	247.3	252.3	257.3
Industrial	64.1	65.3	66.5	67.7	68.9
Institutional/Governmental	255.2	256.2	254.3	252.5	248.9
Private Landscape	239.8	239.8	242.9	246.0	249.0
Agriculture	4.7	4.7	4.7	4.7	4.7
Losses	238.0	238.0	238.0	238.0	238.0
Totals	3,634.2	3,641.7	3,672.6	3,703.7	3,732.8

10. Dry Year Water Supply – Supply Reliability. For its 2020 UWMP, GOWC utilized SCVWD's average water year, single dry water year, and multiple dry water years. The water years used by GOWC are shown in the table below. See also Exhibit D, 2020 UWMP, Section 7.2., pages 33-36.

During the 25-year period covered by these water years, GOWC's service area population increased considerably from approximately 49,480 in 1977 to approximately 91,060 in 2002. See also Exhibit D, 2020 UWMP, Section 7.2., pages 33-36

As discussed in GOWC's 2020 UWMP, SCVWD may or may not adequately or properly manage the groundwater in the Santa Clara Subbasin. If not adequately or properly managed, the capacity of several of GOWC's groundwater wells may be reduced. In that event, GOWC has several options, including shifting production from wells located in different geographic/hydrologic areas of GOWC's service area and purchasing or installing groundwater wells in different locations in the Santa Clara Subbasin to replace any water loss or water production capacity. See Exhibit D, Section 7.2., pages 33-36

D. Supply and Demand Comparison. The following tables show that GOWC's water supplies are sufficient to meet demand during normal, single dry, and multiple dry years for existing and planned future use, including agricultural and industrial use, as well as for the Project. See also Exhibit D, Section 7.2., pages 33-36.

Submittal Table 7-4 Retail: Multiple Dry Years Supply and Demand Comparison						
		2025*	2030*	2035*	2040*	2045* (Opt)
First year	Supply totals	9,234	9,234	9,234	9,234	9,234
	Demand totals	3,363	3,174	2,825	2,451	2,206
	Difference	5,871	6,060	6,409	6,783	7,028
Second year	Supply totals	9,826	9,826	9,826	9,826	9,826
	Demand totals	3,363	3,174	2,825	2,451	2,206
	Difference	6,463	6,652	7,001	7,375	7,620
Third year	Supply totals	9,116	9,116	9,116	9,116	9,116
	Demand totals	3,363	3,174	2,825	2,451	2,206
	Difference	5,753	5,942	6,291	6,665	6,910

Fourth year	Supply totals	9,234	9,234	9,234	9,234	9,234
	Demand totals	3,363	3,174	2,825	2,451	2,206
	Difference	5,871	6,060	6,409	6,783	7,028
Fifth year	Supply totals	9,116	9,116	9,116	9,116	9,116
	Demand totals	3,363	3,174	2,825	2,451	2,206
	Difference	5,753	5,942	6,291	6,665	6,910
Sixth year *(optional)*	Supply totals					
	Demand totals					
	Difference	0	0	0	0	0
***Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.*						

SCVWD has various options available to it for the continuous supply of water to meet its groundwater recharge obligations even during periods of drought, including water banking and wheeling arrangements it maintains with other water resource agencies throughout the State of California.

11. Project Water Supply Vulnerability.

A. Supply and Demand Comparisons. The supply and demand comparisons in section 10, above, indicate that in normal, single year dry, and multiple dry year precipitation scenarios GOWC has sufficient water to meet its customers' water supply demands, through 2045, including water supply demands for the Project. This determination is based upon compliance by SCVWD with its legal requirements to properly manage and recharge the groundwater supplies.

B. Supply Reliability. See Exhibit D, 2020 UWMP. GOWC's 2020 UWMP is based upon an integrated approach to proper management of GOWC's water supply.

C. Transfer and Exchange Opportunities. See Exhibit D, 2020 UWMP, Section 6.3.1. and E, page 29.

D. Water Demand Management Measures. See Exhibit D, 2020 UWMP, Section 7.3, page 37.

E. Water Shortage Contingency Plan. See Exhibit C.[4] See also Exhibit D, 2020 UWMP, Section 7.3.1, beginning at page 40

[4] See also, *https://greatoakswater.com/OtherPDFs/GOW_CA4310022_2020_Urban_Water_Management_Plan.pdf*, beginning at p. 40.

12. Assessment that Supply is Sufficient.

GOWC finds and declares that its total projected water supplies available during normal, single dry, and multiple dry years during a 20-year projection will meet the projected water demand associated with the proposed Project, in addition to GOWC's water system's existing and planned future uses, including agricultural and manufacturing uses.

This Assessment of sufficient supply is provided pursuant to California Water Code Section 10914 which provides that nothing in Water Code Sections 10901 et seq. is intended to create a right or entitlement to water service or any specific level of water service or intended to either impose, expand, or limit any duty concerning the obligation of a public water system to provide certain service to its existing customers or to any future potential customers.

13. Governing Body Approval of Assessment at Regular or Special Meeting.

Pursuant to Water Code Section 10910(g)(1), a water supply assessment is incomplete if not presented to the water supplier's governing board and approved at a regular or special meeting.

The Board of Directors of GOWC, at a special meeting noticed for that purpose, adopted a resolution approving this Water Supply Assessment for the Draft Environmental Impact Report for Kaiser Permanente San Jose Medical Center Project (File No. PDC12-028).

RE: WATER SUPPLY ASSESSMENT FOR DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE "KAISER PERMANENTE SAN JOSÉ MEDICAL CENTER PROJECT" IN SAN JOSÉ (FILE NOS. PDC23-006 & PD23-002

Dear Mr. Aljouny,

As the Lead Agency, the City of San José is preparing an Environmental Impact Report (EIR) for the *Kaiser Permanente San José Medical Center Project*, located in San José. The approximately 39-gross-acre project site (APNs: 706-05-011; 706-05-025; 706-05-017; 706-05-037; 706-05-020; 706-05-032; and 706-05-035) is located at 250 Hospital Parkway in the City of San José. The project proposes demolition of the existing 250,000-square-foot (sf) hospital and construction of a new approximately 685,000-sf hospital (including basement), a new central utility plant (energy center), and a parking structure at their San José Medical Center campus ("SJMC campus" or "campus"). The existing hospital would continue to function at full capacity while the new hospital is under construction. Projected future campus improvements would include demolition of two one-story medical offices (both approximately 10,100 sf) and construction of a 250,000-sf outpatient facility and a parking garage.

In accordance with the requirements of State law (SB 610) and the California Environmental Quality Act (CEQA) Guidelines, the City of San José requests that you provide an analysis of whether the Great Oaks Water Company has adequate water supply to serve this project.

Please advise the City whether this proposed development was included under the latest Urban Water Management Plan (UWMP). If the proposed development was not accounted for in the UWMP, please provide the City with a water supply assessment (WSA) identifying if the projected water supply for the next 20 years, based on normal, single year, and multiple dry years, and including existing and planned future water users, is adequate to meet the demand projected for the proposed development. In conformance with California's Water Code Section 10910(d)(1), the WSA shall include an identification of any existing water supply entitlements, water rights, or water service contracts relevant to the identified water supply for the proposed project, and a description of the quantities of water received in prior years by the public water system. In addition, the following information shall be provided in the WSA:

a) Written contracts or other proof of entitlement to an identified water supply;
b) Copies of a capital outlay program for financing the delivery of a water supply that has been adopted by the public water system;

c) Federal, State, and local permits for construction of necessary infrastructure associated with delivering the water supply; and
d) Any necessary regulatory approvals that are required in order to be able to convey or deliver the water supply.

If the water supply for this project will also include groundwater, please also provide the following additional information in your WSA analysis:

e) A review of any information contained in the UWMP relevant to the identified water supply for the proposed project;
f) A description of any groundwater basin or basins from which the proposed project will be supplied;
g) A detailed description and analysis of the amount and location of groundwater pumped by the public water system; and
h) An analysis of the sufficiency of the groundwater from the basin or basins from which the project will be supplied to meet the projected water demand associated with the proposed project.

A detailed description of the proposed project is included in the Notice of Preparation for the EIR, attached. According to California Water Code Section 10910(g)(1), the deadline for your response is 90 days after receipt of this request; however, we would appreciate an earlier response, if possible. Please identify a contact person, and send your response to:

Attn: Cort Hitchens
City of San José
Department of Planning, Building, and Code Enforcement
200 East Santa Clara Street, 3rd Floor Tower
San José, CA 95113-1905

Thank you for your assistance in this matter. Please do not hesitate to contact Cort Hitchens environmental project manager, at 408-794-7386 or via email at Cort.Hitchens@sanjoseca.gov if you have any questions regarding this request or the proposed project.

GREAT OAKS WATER COMPANY

Chapter 1 – Urban Water Management Plan Introduction and Overview

1.1. Introduction

Great Oaks Water Company (Great Oaks) has prepared this 2020 Urban Water Management Plan (UWMP) in accordance with applicable provisions of the California Water Code (Water Code) and the 2020 UWMP Guidebook prepared by the California Department of Water Resources (DWR). This is an update to Great Oaks' 2015 UWMP and includes all information required by applicable laws and regulations. Since 2015, DWR has updated its UWMP Guidebook to include new information required by statute, including information to address changing conditions. Great Oaks has prepared this UWMP in coordination with and consistent with information provided by local government agencies and other urban water suppliers.

1.2. Overview of 2020 UWMP

This UWMP provides a reliable water management action plan Great Oaks can and will use to address changing water supply and demand conditions. In preparing this UWMP, Great Oaks focused on the following water-planning fundamentals:

- Preparation and assessment of current and future water use, including assessing the accuracy of baseline data and the examination of long-term planning documents, such as the City of San Jose's Climate Smart San Jose, which is a long-range plan to achieve urban sustainability in a changing world;
- Analysis of potable water supplies, including consideration of restrictions on water availability under certain regulatory and hydrological conditions and other limitations on water supplies;
- Analysis of water supply reliability under normal conditions, single dry-year conditions, and five consecutive dry years through 2045;
- Preparation of a realistic Drought Risk Assessment (DRA) by including water supplies and projected water use in a hypothetical five-year drought scenario; and
- Development of an effective Water Shortage Contingency Plan (WSCP) that identifies specific opportunities to reduce demand and augment supplies under numerous, often unpredictable, water shortage conditions.

Great Oaks' 2020 UWMP will be used as a long-range planning document for water supply and water system planning and as a source for data on population, demographics, water demands, and water supplies.

1.3. Urban Water Management Plans and the Water Code

Urban water suppliers, whether publicly or privately owned, that provide water for municipal purposes either directly or indirectly to more than 3,000 customers or supplying more than 3,000 acre-feet of water annually are required to prepare and submit an UWMP every five years. Chapter 2 of this UWMP addresses Urban Water Management Planning and the Water Code.

1.4. Contents of Great Oaks' 2020 UWMP

This 2020 UWMP consists of ten (10) chapters, each of which is briefly summarized below.

Chapter 1 – Urban Water Management Plan Introduction and Overview.

The background and purpose of the UWMP is presented in Chapter 1 and includes this lay description of the UWMP document. Also included in Chapter 1 are discussions of various planning efforts, wholesale and retail agency coordination, public participation, and plan adoption.

Chapter 2 – Urban Water Management Planning and the Water Code

This chapter provides basic information about requirements of Urban Water Management Plans and the pertinent statutory requirements in the California Water Code.

Chapter 3 – Description of Great Oaks Water System.

Chapter 3 includes a map and basic description of the Great Oaks water system, together with information pertaining to climate, population and demographics, and historic water usage data.

Chapter 4 – System Water Use

This chapter provides information on water use by sector in 2020 and into the future, using five-year increments, through 2045. This chapter includes information on water demand from customers, including low income customers, and distribution system water losses. Estimated water savings are discussed as well. Finally, this chapter includes information on its water system capabilities in the context of climate change.

Chapter 5 – SB X7-7 Baselines and Targets

This chapter of the 2020 UWMP provides information showing Great Oaks' compliance with its per capita water use target for the year 2020. This information is provided pursuant to the Water Conservation Act of 2009 (Senate Bill X7-7), which required a 20 percent reduction in urban per capita water use by December 31, 2020. Previously UWMPs established water use targets for 2015 and 2020 using standard methodologies.

Chapter 6 – Water System Supplies

Chapter 6 provides an analysis of Great Oaks' water supplies and an estimate of water-related energy consumption. This comprehensive overview of Great Oaks' water supplies and estimates of available water supplies over the period of time covered by this UWMP shows that such water supplies are sufficient to meet projected demands under "normal" conditions.

Chapter 7 – Water Supply Reliability Assessment

In Chapter 6, Great Oaks provides an assessment of water supplies under various scenarios including an average water year, a single dry year, and multiple dry years. This assessment concludes that Great Oaks will be able to meet demand for water under each scenario presented.

Chapter 8 – Water Shortage Contingency Planning

Great Oaks' Water Shortage Contingency Plan (WSCP) is provided in this chapter. The WSCP is intended to serve as part of this UWMP and as a separate stand-alone planning document addressing actions to be taken at various water shortage levels.

Chapter 9 – Demand Management Measures

This chapter describes past and planned demand management (conservation) measures Great Oaks has and will rely upon to encourage (and sometimes require) customers to conserve and reduce water demand/usage during specific circumstances and over the period covered by the UWMP.

Chapter 10 – Plan Adoption, Submittal, and Implementation

Information on the public hearing, adoption process for the 2020 UWMP, and the submittal process for the UWMP and WSCP are provided in chapter 10. This chapter also confirms that the Great Oaks 2020 UWMP and WSCP were timely submitted.

GREAT OAKS WATER COMPANY

Chapter 2 – Urban Water Management Planning and the Water Code

2.1. Urban Water Management Planning and the Water Code

Water Code Section 10617 provides:

> *"Urban water supplier" means a supplier, either publicly or privately owned, providing water for municipal purposes either directly or indirectly to more than 3,000 customers or supplying more than 3,000 acre-feet of water annually. An urban water supplier includes a supplier or contractor for water, regardless of the basis of right, which distributes or sells for ultimate resale to customers. This part applies only to water supplied from public water systems…*

Water Code Section 10621 provides, in part:

> *(a) Each urban water supplier shall update its plan at least once every five years on or before December 31, in years ending in five and zero, except as provided in subdivision (d).*
>
> *(d) Each urban water supplier shall update and submit its 2015 plan to the department by July 1, 2016.*

2.1.1. Discussion

Great Oaks is a retail "urban water supplier" under Water Code Section 10617, as Great Oaks provides water for municipal purposes to more than 3,000 customers and supplies more than 3,000 acre-feet of water annually.

Great Oaks is also a "public water system" as defined by California Health and Safety Code Section 116275(h), as it is a "system for the provision of water for human consumption through pipes or other constructed conveyances that has 15 or more service connections or regularly serves at least 25 individuals daily at least 60 days out of the year.

At the end of calendar year 2020, Great Oaks had an average of 21,372 active service connections providing continuous daily water service to a population estimated to be 106,450, as shown in Submittal Table 2-1 below.

Submittal Table 2-1 Retail Only: Public Water Systems			
Public Water System Number	Public Water System Name	Number of Municipal Connections 2020	Volume of Water Supplied 2020 *
Add additional rows as needed			
CA4310022	Great Oaks Water Co.	21,372	3,396
	TOTAL	21,372	3,396
**** Units of measure (AF, CCF, MG)*** *must remain consistent throughout the UWMP as reported in Table 2-3.*			
NOTES: The number of municipal connections in 2020 is the average of the connections at the end of 2019 and the end of 2020.			

Great Oaks is reporting individually on a calendar year basis, with all Units of Measure reported in MG (million gallons). See Submittal Tables 2-2 and 2-3, below.

Submittal Table 2-2: Plan Identification			
Select Only One	**Type of Plan**		**Name of RUWMP or Regional Alliance** *if applicable* (select from drop down list)
☑	**Individual UWMP**		
	☐	Water Supplier is also a member of a RUWMP	
	☐	Water Supplier is also a member of a Regional Alliance	
☐	**Regional Urban Water Management Plan (RUWMP)**		

Submittal Table 2-3: Supplier Identification	
Type of Supplier (select one or both)	
☐	Supplier is a wholesaler
☑	Supplier is a retailer
Fiscal or Calendar Year (select one)	
☑	UWMP Tables are in calendar years
☐	UWMP Tables are in fiscal years
If using fiscal years provide month and date that the fiscal year begins (mm/dd)	
Units of measure used in UWMP * (select from drop down)	
Unit	MG
**** Units of measure (AF, CCF, MG)*** *must remain consistent throughout the UWMP as reported in Table 2-3.*	

2.2. Relationship to Other Planning Efforts

Water Code Section 10620(d)(2) provides:

> *Each urban water supplier shall coordinate the preparation of its plan with other appropriate agencies in the area, including other water suppliers that share a common source, water management agencies, and relevant public agencies, to the extent practicable.*

Water Code Section 10631 (j) provides:

> *An urban water supplier that relies upon a wholesale agency for a source of water shall provide the wholesale agency with water use projections from that agency for that source of water in five-year increments to 20 years or as far as data is available. The wholesale agency shall provide information to the urban water supplier for inclusion in the urban water supplier's plan that identifies, to the extent practicable, the existing and planned sources of water as required by subdivision (b), available from the wholesale agency to the urban water supplier over the same five-year increments, and during various water-year types in accordance with subdivision (c). An urban water supplier may rely upon water supply information provided by the wholesale agency in fulfilling the plan informational requirements of subdivisions (b) and (c).*

Water Code Section 10620(d)(2) provides:

> *Each urban water supplier shall coordinate the preparation of its plan with other appropriate agencies in the area, including other water suppliers that share a common source, water management agencies, and relevant public agencies, to the extent practicable.*

Water Code Section 10642 provides:

> *Each urban water supplier shall encourage the active involvement of diverse social, cultural, and economic elements of the population within the service area prior to and during the preparation of the plan. Prior to adopting a plan, the urban water supplier shall make the plan available for public inspection and shall hold a public hearing thereon. Prior to the hearing, notice of the time and place of hearing shall be published within the jurisdiction of the publicly owned water supplier pursuant to Section 6066 of the Government Code. The urban water supplier shall provide notice of the time and place of hearing to any city or county within which the supplier provides water supplies. A privately owned water supplier shall provide an equivalent notice within its service area. After the hearing, the plan shall be adopted as prepared or as modified after the hearing.*

2.2.1. Discussion: Wholesale and Retail Coordination

The vast majority of Great Oaks' service area is within the City of San José, and the entire service area is located within the County of Santa Clara. Two other water utilities, San José Water Company (SJWC) and San José Municipal Water System (SJMWS), also provide water service within the City of San José and, to the extent SJWC and SJMWS utilize the Santa Clara Valley Groundwater Basin (Basin No. 2-09), Santa Clara Subbasin (Subbasin No. 2-09.02) as a source of supply, Great Oaks shares a source of supply with those utilities. Valley Water is the local government agency responsible for groundwater management; however, Valley Water is not a water utility or wholesale agency for Great Oaks. Valley Water does not supply water to Great Oaks. Instead, the Santa Clara Valley Water District (Valley Water) is responsible for the protection and augmentation of the water supplies for Santa Clara County.

Great Oaks, SJWC, and SJMWS are regular members of the Valley Water Retailer Committee and Water Supply, Water Conservation, Communications, Groundwater, and other Subcommittees. Great Oaks regularly attends and participates in these committee and subcommittee meetings and receives electronic email updates on committee and subcommittee activities and reports throughout each year. UWMPs have been discussed in advance of the submission date for 2020 Urban Water Management Plans, and Great Oaks considers such discussions to be

participation in the development of this UWMP. Great Oaks invited SJWC, SJMWS, SCVWD, and the County of Santa Clara to participate and comment upon Great Oaks' Urban Water Management Plan. Copies of the letters inviting such participation are included in the Appendix. See Submittal Table 2-4, below.

Submittal Table 2-4 Retail: Water Supplier Information Exchange
The retail Supplier has informed the following wholesale supplier(s) of projected water use in accordance with Water Code Section 10631.
Wholesale Water Supplier Name
Add additional rows as needed
NOTES: All water is sourced from Great Oaks Water Company-owned groundwater wells, so there is no wholesale water supplier. Great Oaks has advised Valley Water of its projected water use as part of the coordinated effort on water resource planning in Santa Clara County.

2.2.2. Discussion: Public Participation

Great Oaks has actively encouraged community participation in its urban water management planning efforts since the first plan was adopted in 1985. Public meetings were held for the 1985, 1990, 1995, 2000, 2005, 2010, 2015, and 2020 UWMPs.

For the 2020 UWMP, a public meeting was held on June 28, 2021 via Zoom due to pandemic-related restrictions on public gatherings. Public comments and opinions were solicited for review and comment on the draft plan before the plan was adopted by the company's Board of Directors.

Notice of the public meeting was published in the San Jose Mercury News on June 3, 2021 and also on June 10, 2021. Copies of the draft plan were made available on Great Oaks' website prior to the public meeting. A copy of the public meeting notice is included in the Appendix.

The following table shows Great Oaks' coordination with local agencies and the public.

Coordinating Agencies	Participated/Invited To Participate in Developing UWMP	Commented on Draft UWMP	Attended Public Meetings	Contacted For Assistance	Sent/Made Available Draft UWMP	Sent Notice of Intention to Adopt	Not Involved or No Information
SJMWS	X				X	X	

Valley Water	X			X	X	X	
General Public	X		X		X	X	

2.3. Plan Adoption

Great Oaks prepared its 2020 UWMP during the last quarter of 2020 and the first half of 2021. The 2020 UWMP was adopted by the Great Oaks Board of Directors on June 29, 2021. The 2020 UWMP is being timely submitted to DWR. The Appendix of this UWMP includes a true and accurate copy of the Unanimous Consent Resolution of the Great Oaks Board of Directors adopting this UWMP. This UWMP includes all information necessary to fulfill the requirements of the Water Code for 2020 UWMPs.

2.4. Lay Description

Water Code Section 10630.5 provides:

> *Each plan shall include a simple lay description of how much water the agency has on a reliable basis, how much it needs for the foreseeable future, what the agency's strategy is for meeting its water needs, the challenges facing the agency, and any other information necessary to provide a general understanding of the agency's plan.*

This 2020 UWMP applies to the Great Oaks service area with a 2020 population of approximately 106,450. The UWMP is a foundational planning document and includes descriptions of past and projected water demands, water supplies, and water system reliability during a series of different water supply scenarios over a 20-year planning period. The UWMP also describes Great Oaks' actions that promote water conservation and includes a Water Shortage Contingency Plan (WSCP) to address potential water supply shortages due to droughts or other impacts to water supply. Great Oaks' UWMP is updated every five years in accordance with statutory requirements. Prior Great Oaks UWMPs are available on the California Department of Water Resources website: https://wuedata.water.ca.gov.

This 2020 UWMP concludes that Great Oaks has sufficient water supplies to meet demand under all of the various water supply scenarios, including the single dry year and multiple dry years scenarios. See Chapter 7 – Water Supply Reliability Assessment for the details supporting this conclusion.

More specifically, during a single dry year scenario, this UWMP concludes that Great Oaks will have 9,471 MG of supply to meet the projected demand of 3,363 MG, should that single dry year occur in 2025 (see Table 7-3 in Chapter 7, below).

In a multiple dry year scenario, Great Oaks will have sufficient water supplies in each of the dry years (see Table 7-4 in Chapter 7 below). Moreover, the five-year Drought Risk Assessment performed for purposes of this UWMP shows that Great Oaks' water supplies are sufficient to meet expected demand in each of the five years (see Table 7-5 in Chapter 7, below).

GREAT OAKS WATER COMPANY

GREAT OAKS WATER COMPANY

Chapter 3: - Description of the Great Oaks Water System

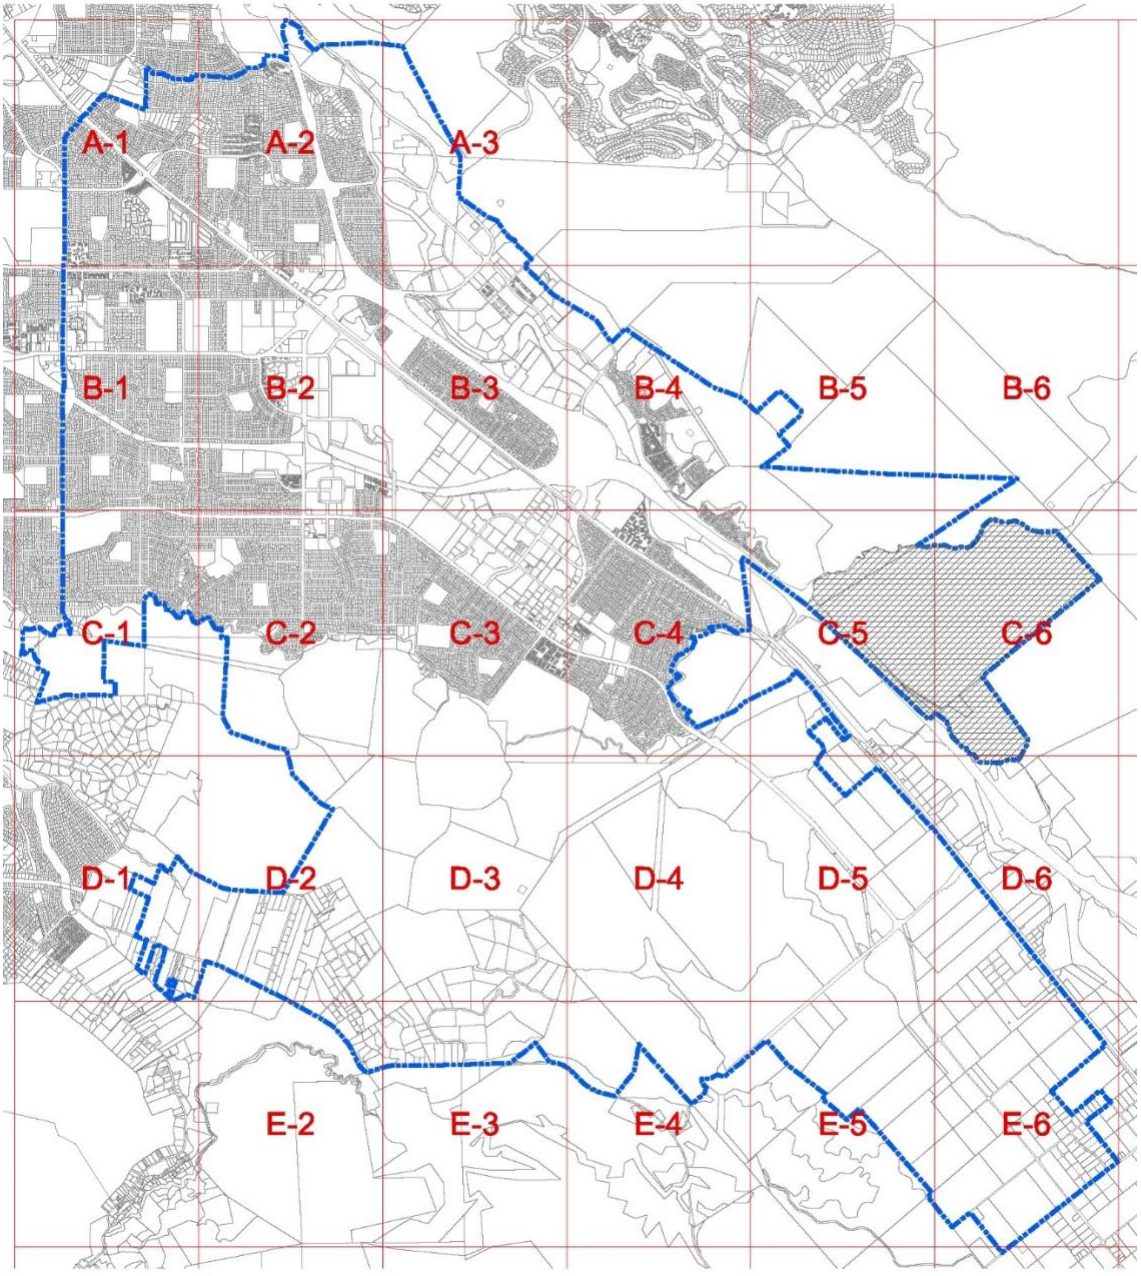
Water Code Section 10631 (a) provides:

> *Describe the service area of the supplier, including current and projected population, climate, and other social, economic, and demographic factors affecting the supplier's water management planning. The projected population estimates shall be based upon data from the state, regional, or local service agency population projections within the service area of the urban water supplier and shall be in five-year increments to 20 years or as far as data is available. The description shall include the current and projected land uses within the existing or anticipated service area affecting the supplier's water management planning. Urban water suppliers shall coordinate with local or regional land use authorities to determine the most appropriate land use information, including, where appropriate, land use information obtained from local or regional land use authorities, as developed pursuant to Article 5 (commencing with Section 65300) of Chapter 3 of Division 1 of Title 7 of the Government Code.*

3.1. Depiction of the Great Oaks Service Area.

The Great Oaks service area is as authorized by the California Public Utilities Commission (CPUC) and is depicted on the following page.

Great Oaks Water Company Service Area



3.2. General Description of the Great Oaks Service Area.

The Great Oaks service area includes a portion of the southern end of the City of San Jose known as Edenvale, Blossom Valley, SE Almaden Valley, and Coyote Valley. The western service area boundary is Snell Avenue and the eastern boundary is Silver Creek Ridge. The northern boundary is Riverview Drive and the southern boundary is in the area of Palm Avenue in Coyote Valley. Population estimates in this 2020 UWMP are based upon the assumption that the Great Oaks service area will not be infringed by any other water service provider and that Great Oaks will be the water service provider to its entire CPUC-authorized service area and the logical and approved extensions thereto.

3.3. Service Area Climate.

According to the United States Department of Commerce, National Oceanographic and Atmospheric Administration ("NOAA"):

> San José's latitude and location on the west coast of North America place the city in a Mediterranean type climate. This classification is mainly identified by sharply contrasting wet and dry seasons. The wet season runs from November through March. 82% of the yearly precipitation total falls within this period. Rainfall is sparse from May through October. Rain during the summer months of June, July and August normally totals only 0.20". Wet seasons are cool, but mild. Dry season weather is very consistent, with warm sunny days.

3.4. Service Area Population and Demographics

The 2020 population of Great Oaks' service area was estimated to be 106,450. Population estimates for the period covered by this UWMP are shown in the table below.

Submittal Table 3-1 Retail: Population - Current and Projected

Population Served	2020	2025	2030	2035	2040	2045*(opt)*
	106,450	112,582	119,168	126,115	133,367	141,036

NOTES: Population growth calculated using City of San Jose population growth factors (https://www.sanjoseca.gov/your-government/departments/planning-building-code-enforcement/planning-division/data-and-maps/demographics/population).

Great Oaks used census blocks within its authorized service area to estimate population of its service area for 2020. Then Great Oaks applied the rate of population growth for the City of San Jose, as noted in the table above for the period covered by this UWMP.

GREAT OAKS WATER COMPANY

GREAT OAKS WATER COMPANY

Chapter 4 – Water System Use

4.1. 2020 Water Demand by Customer Class

The table below 2020 actual water demand per customer class. Note that the Institutional/Governmental class includes both public authorities and schools.

Submittal Table 4-1 Retail: Demands for Potable and Non-Potable[1] Water - Actual			
Use Type	2020 Actual		
Drop down list May select each use multiple times These are the only Use Types that will be recognized by the WUEdata online submittal tool	Additional Description (as needed)	Level of Treatment When Delivered Drop down list	Volume[2]
Add additional rows as needed			
Single Family		Drinking Water	1,892
Multi-Family		Drinking Water	698
Commercial	Business	Drinking Water	242
Industrial		Drinking Water	64
Institutional/Governmental	Includes Schools	Drinking Water	255
Landscape		Drinking Water	239
Agricultural irrigation		Drinking Water	5
Losses			238
		TOTAL	3,634

[1] *Recycled water demands are NOT reported in this table. Recycled water demands are reported in Table 6-4.*

[2] *Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Table 2-3.*

Agriculture water sales are included in this analysis even though such sales are *de minimus* and are expected to remain so. Great Oaks also provides water for public and private fire protection throughout its service area. Great Oaks does not provide raw water service. All Great Oaks customers have metered service.

4.2. Projected Demands for Potable Water

The tables below show projected potable water demand for each customer class in five-year increments from 2025 to 2045.

Submittal Table 4-2 Retail: Use for Potable and Non-Potable[1] Water - Projected						
Use Type	Additional Description (as needed)	Projected Water Use[2] *Report To the Extent that Records are Available*				
Drop down list May select each use multiple times These are the only Use Types that will be recognized by the WUEdata online submittal tool		2025	2030	2035	2040	2045 (opt)
Add additional rows as needed						
Single Family		1,787	1,735	1,506	1,269	1,102
Multi-Family		604	604	584	548	530
Commercial	Business	276	216	204	188	179
Industrial		74	73	68	62	58
Institutional/Governmental	Includes Schools	275	208	173	141	117
Landscape		170	181	166	146	134
Agricultural irrigation		2	2	2	2	2
Losses		175	155	122	94	85
TOTAL		3,363	3,174	2,825	2,451	2,206

[1] *Recycled water demands are NOT reported in this table. Recycled water demands are reported in Table 6-4.* [2] *Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Table 2-3.*

NOTES: 2030 and 2040 Projections are calculated to comply with City of San Jose's Climate Smart San Jose plan. 2035 Projections are at the midway point between 2030 and 2040 Projections. 2045 Projections are based upon same rate of decline used to calculate 2040 projections. Losses are based upon the following percentages: 2025: 5.5%; 2030: 5.0%; 2035: 4.5%; 2040: 4.0%; 2045: 4.0%.

With respect to these projections, it should be noted that 2030 and 2040 Projections are calculated to comply with City of San Jose's Climate Smart San Jose Plan. 2035 Projections are at the midway point between 2030 and 2040 Projections. 2045 Projections are based upon same rate of decline used to calculate 2040 projections. Losses are based upon the following percentages: 2025: 5.5%; 2030: 5.0%; 2035: 4.5%; 2040: 4.0%; 2045: 4.0%.

Submittal Table 4-3 Retail: Total Water Use (Potable and Non-Potable)						
	2020	2025	2030	2035	2040	2045 (opt)
Potable Water, Raw, Other Non-potable *From Tables 4-1R and 4-2 R*	3,634	3,363	3,174	2,825	2,451	2,206
Recycled Water Demand[1] *From Table 6-4*	0	0	0	0	0	0
Optional Deduction of Recycled Water Put Into Long-Term Storage[2]						
TOTAL WATER USE	3,634	3,363	3,174	2,825	2,451	2,206

[1] Recycled water demand fields will be blank until Table 6-4 is complete *[2] Long term storage means water placed into groundwater or surface storage that is not removed from storage in the same year. Supplier **may** deduct recycled water placed in long-term storage from their reported demand. This value is manually entered into Table 4-3.*

4.3. Distribution System Water Losses

Water Code Section 10631(d)(3)(A) and (B) require the following:

> *(A) The distribution system water loss shall be quantified for each of the five years preceding the plan update, in accordance with rules adopted pursuant to Section 10608.34.*
>
> *(B) The distribution system water loss quantification shall be reported in accordance with a worksheet approved or developed by the department through a public process. The water loss quantification worksheet shall be based on the water system balance methodology developed by the American Water Works Association.*

The table below shows the results of water loss audits of the Great Oaks water system over the most recent five-year period, as required.

Submittal Table 4-4 Retail: Last Five Years of Water Loss Audit Reporting	
Reporting Period Start Date (mm/yyyy)	Volume of Water Loss [1,2]
01/2015	115.057
01/2016	54.688
01/2017	232.467
01/2018	183.316
01/2019	235.965

[1] Taken from the field "Water Losses" (a combination of apparent losses and real losses) from the AWWA worksheet.

*[2] **Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.*

4.4. Estimating Future Water Savings

Water Code Section 10631(d)(4) provides:

> *(A) Water use projections, where available, shall display and account for the water savings estimated to result from adopted codes, standards, ordinances, or transportation and land use plans identified by the urban water supplier, as applicable to the service area.*
>
> *(B) To the extent that an urban water supplier reports the information described in subparagraph (A), an urban water supplier shall do both of the following:*
>
> *(i) Provide citations of the various codes, standards, ordinances, or transportation and land use plans utilized in making the projections.*
>
> *(ii) Indicate the extent that the water use projections consider savings from codes, standards, ordinances, or transportation and land use plans. Water use projections that do not account for these water savings shall be noted of that fact.*

Great Oaks has incorporated future water savings and lower income residential demands in its projections.

Submittal Table 4-5 Retail Only: Inclusion in Water Use Projections	
Are Future Water Savings Included in Projections? (Refer to Appendix K of UWMP Guidebook) *Drop down list (y/n)*	Yes
If "Yes" to above, state the section or page number, in the cell to the right, where citations of the codes, ordinances, or otherwise are utilized in demand projections are found.	https://www.sanjoseca.gov/your-government/environment/climate-smart-san-jos
Are Lower Income Residential Demands Included In Projections? *Drop down list (y/n)*	Yes

As noted in Section 3.2., above, this 2020 UWMP incorporates projected water savings consistent with the City of San Jose's Climate Smart San Jose Plan (https://www.sanjoseca.gov/your-government/environment/climate-smart-san-jos). The full citation is also provided in submittal table 4-5.

Climate Smart San Jose is a community-wide commitment to address climate change, reduce air pollution, save water, and improve quality of life. Great Oaks is part of that community and is using the City's Plan as a guide for Great Oaks to achieve the water savings goals of the Plan.

The City of San Jose's Climate Smart San Jose Plan utilizes various methods to produce water savings, including building code and other planning requirements for water efficient appliances and landscapes.

Other potential, but not yet realized changes to building and zoning (land use) have not been incorporated into the UWMP. One often-discussed proposal is to allow multifamily residential construction in neighborhoods that are at this time zoned for exclusively single-family residential dwellings. Speculation would be required to use this information about a zoning change that may, but has not yet occurred, and Great Oaks has not engaged in that sort of speculation for this UWMP.

The 2020 Urban Water Management Plan Guidebook developed by DWR suggests that water supplies should use land use classifications and other very granular data when projecting future water demand. The methodologies suggested utilize data that is not easily or inexpensively available to Great Oaks and are not utilized in this UWMP.

4.4.1. Water Use by Lower Income Households

Great Oaks has included the projected water use for lower income residential customers in this UWMP as part of its projected water use for single-family residential customers. Great Oaks does not have or maintain records on the income

levels of its customers and provides water service to its customers regardless of income levels. Great Oaks has a Customer Assistance Program (CAP) authorized by the CPUC that provides eligible and participating customers a fifty percent (50%) discount off the monthly service charge. Eligibility for the CAP is based upon customer eligibility for Pacific Gas & Electric's (PG&E) low income program (CARE). If a Great Oaks customer qualifies for PG&E's CARE program, that customer is automatically eligible for Great Oaks' CAP. At the end of calendar year 2020, 2,431 out of a total of 19,990 single-family residential customers (12.2%) were enrolled in Great Oaks' CAP. Great Oaks receives data from PG&E for CAP enrollment purposes at least two times annually, although due to the pandemic, the data exchanges will be more often, as many as four times each year.

4.5. Characteristic Five Year Water Use

Water Code Section 10635(b) provides:

> *Every urban water supplier shall include, as part of its urban water management plan, a drought risk assessment for its water service to its customers as part of information considered in developing the demand management measures and water supply projects and programs to be included in the urban water management plan. The urban water supplier may conduct an interim update or updates to this drought risk assessment within the five-year cycle of its urban water management plan update. The drought risk assessment shall include each of the following:*
>
> *(1) A description of the data, methodology, and basis for one or more supply shortage conditions that are necessary to conduct a drought risk assessment for a drought period that lasts five consecutive water years, starting from the year following when the assessment is conducted.*
>
> *(2) A determination of the reliability of each source of supply under a variety of water shortage conditions. This may include a determination that a particular source of water supply is fully reliable under most, if not all, conditions.*
>
> *(3) A comparison of the total water supply sources available to the water supplier with the total projected water use for the drought period.*
>
> *(4) Considerations of the historical drought hydrology, plausible changes on projected supplies and demands under climate change conditions, anticipated regulatory changes, and other locally applicable criteria.*

This is a new requirement for UWMPs and requires the preparation of a five-year Drought Risk Assessment (see Chapter 7, below). As a first step, water suppliers are recommended to estimate expected water use for the next five years without

drought conditions (also known as *unconstrained demand*, which does not factor in any water supply restrictions).

The concept of "unconstrained demand" requires a great deal of speculation, as water supply restrictions have been in place in Great Oaks' service area for quite some time and all prior estimates of future water use have factored such water supply restrictions into such estimates.

Great Oaks will estimate unconstrained demand beginning with 2020 actual water use, as during 2020 customers used water at greater volumes than in the recent past due to pandemic-related restrictions, resulting in more people at home using water. Table 4-1, above, serves as the starting point for estimating water usage from 2021 through 2025 with unconstrained demand. Customer projections for this five year period are also utilized for the calculations. Customer projections are based upon historic rates of customer growth.

Great Oaks will use the data in Table 4-7 when preparing its Drought Risk Assessment.

Table 4-6 Projected Customers 2021 - 2025

	2021	2022	2023	2024	2025
Single-Family Residential	19,979	19,990	20,050	20,110	20,170

Agriculture	4.7	4.7	4.7	4.7	4.7
Losses	238.0	238.0	238.0	238.0	238.0
Totals	3,634.2	3,641.7	3,672.6	3,703.7	3,732.8

4.6. Climate Change Considerations

Water Code Section 10635(b) provides:

> *Every urban water supplier shall include, as part of its urban water management plan, a drought risk assessment for its water service to its customers as part of information considered in developing the demand management measures and water supply projects and programs to be included in the urban water management plan. The urban water supplier may conduct an interim update or updates to this drought risk assessment within the five-year cycle of its urban water management plan update. The drought risk assessment shall include each of the following:*
>
> …
>
> *(4) Considerations of the historical drought hydrology, plausible changes on projected supplies and demands under climate change conditions, anticipated regulatory changes, and other locally applicable criteria.*

The climate in Great Oaks' service area certainly influences water usage, with higher usage patterns in warmer months. Great Oaks encourages conservation all year (consistent with California's goal to make conservation a way of life). WaterSmart reports are provided to customers year-round with information to help Great Oaks customers conserve, especially during historic higher-use months.

Increasing temperatures seem likely to increase demand for water, while extended drought periods will force the use of more effective conservation measures. Among the conservation measures that are most likely to have a beneficial effect on water supplies during times of warmer temperatures are landscape replacement programs. Great Oaks encourages its customer to take advantage of landscape/turf replacement programs offered by local government agencies.

GREAT OAKS WATER COMPANY

Chapter 5 – SB X7-7 Baselines and Targets

Water Code Section 10608.16(a) states:

> *The state shall achieve a 20-percent reduction in urban per capita water use in California on or before December 31, 2020.*

Water Code Section 10608.24(b) states:

> *Each urban retail water supplier shall meet its urban water use target by December 31, 2020.*

This chapter demonstrates Great Oaks' compliance with its SB X7-7 urban water use target.

5.1. Updates to 2015 Urban Water Management Plan Calculations

Great Oaks has not made any changes or updates to the data used to establish its SB X7-7 2020 water use target.

5.2. Service Area Population

The California Department of Water Resources reviewed and accepted Great Oaks' population estimation method as part of its review of Great Oaks' 2015 Urban Water Management Plan. Great Oaks has continued the use of that method for purposes of compliance with the SB X7-7 2020 water use target.

5.3. Baselines and Targets Summary for SB X7-7 Compliance

Great Oaks has not recalculated its baseline and target for this UWMP. There has been no change to Great Oaks' service area. There has been no change in the method by which Great Oaks classifies customers. The table below shows the baselines and targets established in Great Oaks' 2015 UWMP.

Submittal Table 5-1 Baselines and Targets Summary From SB X7-7 Verification Form
Retail Supplier or Regional Alliance Only

Baseline Period	Start Year *	End Year *	Average Baseline GPCD*	Confirmed 2020 Target*
10-15 year	*1999*	*2008*	*122*	*98*
5 Year	*2004*	*2008*	*80*	

**All cells in this table should be populated manually from the supplier's SBX7-7 Verification Form and reported in Gallons per Capita per Day (GPCD)*

5.4. Compliance with SB X7-7 Target

The population of Great Oaks' service area in 2020 was estimated to be 106,450. A total of 3,634 MG of water was used in 2020, resulting in a per capita water use of 93 GPCD, which is less than Great Oaks SB X7-7 target, as shown in the table below.

Submittal Table 5-2: 2020 Compliance
From SB X7-7 2020 Compliance Form
Retail Supplier or Regional Alliance Only

2020 GPCD			2020 Confirmed Target GPCD*	Did Supplier Achieve Targeted Reduction for 2020? Y/N

93	*0*	*93*	*98*	*YES*

**All cells in this table should be populated manually from the supplier's SBX7-7 2020 Compliance Form and reported in Gallons per Capita per Day (GPCD)*

GREAT OAKS WATER COMPANY

Chapter 6 – Water System Supplies

Water Code Section 10631 provides:

> *(b) Identify and quantify, to the extent practicable, the existing and planned sources of water available to the supplier over the same five-year increments described in subdivision (a), providing supporting and related information, including all of the following:*
>
> …
>
> *(4) If groundwater is identified as an existing or planned source of water available to the supplier, all of the following information:*
>
> *(A) The current version of any groundwater sustainability plan or alternative adopted pursuant to Part 2.74 (commencing with Section 10720), any groundwater management plan adopted by the urban water supplier, including plans adopted pursuant to Part 2.75 (commencing with Section 10750), or any other specific authorization for groundwater management for basins underlying the urban water supplier's service area.*
>
> *(B) A description of any groundwater basin or basins from which the urban water supplier pumps groundwater. For basins that a court or the board has adjudicated the rights to pump groundwater, a copy of the order or decree adopted by the court or the board and a description of the amount of groundwater the urban water supplier has the legal right to pump under the order or decree. For a basin that has not been adjudicated, information as to whether the department has identified the basin as a high- or medium-priority basin in the most current official departmental bulletin that characterizes the condition of the groundwater basin, and a detailed description of the efforts being undertaken by the urban water supplier to coordinate with groundwater sustainability agencies or groundwater management agencies listed in subdivision (c) of Section 10723 to maintain or achieve sustainable groundwater conditions in accordance with a groundwater sustainability plan or alternative adopted pursuant to Part 2.74 (commencing with Section 10720).*
>
> *(C) A detailed description and analysis of the location, amount, and sufficiency of groundwater pumped by the urban water supplier for the past five years. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.*
>
> *(D) A detailed description and analysis of the amount and location of groundwater that is projected to be pumped by the urban water supplier. The*

description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.

6.1. Groundwater Sustainability

The Santa Clara Valley Water District (Valley Water) is responsible for groundwater management in the areas where Great Oaks produces groundwater. Valley Water is the exclusive groundwater management agency within its statutory boundaries.

Valley Water submitted its Groundwater Management Plan pursuant to the Sustainable Groundwater Management Act in December of 2016. A copy of Valley Water's 2016 Groundwater Management Plan may be found on the Valley Water website at this location: https://www.valleywater.org/your-water/where-your-water-comes/groundwater/sustainable.

6.2. Basin Description

The Santa Clara Valley Groundwater Basin, Santa Clara Subbasin (Identified as Subbasin 2-9.02) is described in Bulletin 118 as follows:

> *The Santa Clara subbasin occupies a structural trough parallel to the northwest trending Coast Ranges. TheDiablo Range bounds it on the west and the Santa Cruz Mountains form the basin boundary on the east. It extends from the northern border of Santa Clara County to the groundwater divide near the town of Morgan Hill. The dominant geohydrologic feature is a large inland valley (Fio and Leighton 1995). The valley is drained to the north by tributaries to San Francisco Bay including Coyote Creek, the Guadalupe River, and Los Gatos Creek. Annual precipitation for the Santa Clara basin ranges from less than 16 inches in the valley to more than 28 inches in the upland areas.*

The Santa Clara Valley Groundwater Basin, Santa Clara Subbasin is not an adjudicated basin. In 2019, the California Department of Water Resources determined that the Santa Clara Valley Groundwater Basin, Santa Clara Subbasin is not in a condition of critical overdraft and designated it as low priority.[1]

6.3. Historical Groundwater Pumping

The amount of groundwater produced by Great Oaks over the past five years is shown in Table 6-1, below.

[1] DWR, 2019. Sustainable Groundwater Management Act 2018 Basin Prioritization, State of California, dated January 2019.

Submittal Table 6-1 Retail: Groundwater Volume Pumped						
☐	Supplier does not pump groundwater. The supplier will not complete the table below.					
☐	All or part of the groundwater described below is desalinated.					
Groundwater Type ***Drop Down List*** *May use each category multiple times*	Location or Basin Name	2016*	2017*	2018*	2019*	2020*
Add additional rows as needed						
Alluvial Basin	Santa Clara Valley Groundwater Basin, Santa Clara Subbasin	2903.7321	3257.2989	3348.6337	3386.5006	3627.9839
	TOTAL	2,904	3,257	3,349	3,387	3,628
**** Units of measure (AF, CCF, MG)*** *must remain consistent throughout the UWMP as reported in Table 2-3.*						

6.3.1. Other Sources of Water.

Great Oaks does not purchase treated water or utilize surface water in its service area. Great Oaks also does not utilize stormwater within its system. Valley Water is responsible for flood control within its jurisdiction.

Great Oaks also does not utilize wastewater or recycled water within its system, however, Great Oaks will supply recycled water when supply and infrastructure for doing so is available. Great Oaks has and will continue to encourage recycled water use within its service area, although none is available at this time. If or when recycled water becomes available for use within the Great Oaks service area, Great Oaks will include recycled water in its future water supply planning.

Submittal Table 6-2 Retail: Wastewater Collected Within Service Area in 2020

☑	There is no wastewater collection system. The supplier will not complete the table below.
	Percentage of 2020 service area covered by wastewater collection system *(optional)*
	Percentage of 2020 service area population covered by wastewater collection system *(optional)*

Wastewater Collection			Recipient of Collected Wastewater			
Name of Wastewater Collection Agency	Wastewater Volume Metered or Estimated? *Drop Down List*	Volume of Wastewater Collected from UWMP Service Area 2020 *	Name of Wastewater Treatment Agency Receiving Collected Wastewater	Treatment Plant Name	Is WWTP Located Within UWMP Area? *Drop Down List*	Is WWTP Operation Contracted to a Third Party? *(optional)* *Drop Down List*
Total Wastewater Collected from Service Area in 2020:		0				

**** Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3 .*

Submittal Table 6-3 Retail: Wastewater Treatment and Discharge Within Service Area in 2020

☑ **No wastewater is treated or disposed of within the UWMP service area.** The supplier will not complete the table below.

Wastewater Treatment Plant Name	Discharge Location Name or Identifier	Discharge Location Description	Wastewater Discharge ID Number *(optional)* [2]	Method of Disposal *Drop down list*	Does This Plant Treat Wastewater Generated Outside the Service Area? *Drop down list*	Treatment Level *Drop down list*	2020 volumes [1] Wastewater Treated	Discharged Treated Wastewater	Recycled Within Service Area	Recycled Outside of Service Area	Instream Flow Permit Requirement
						Total	0	0	0	0	0

[1] **Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.
[2] If the **Wastewater Discharge ID Number** is not available to the UWMP preparer, access the SWRCB CIWQS regulated facility website at https://ciwqs.waterboards.ca.gov/ciwqs/readOnly/CiwqsReportServlet?inCommand=reset&reportName=RegulatedFacility

Submittal Table 6-4 Retail: Recycled Water Direct Beneficial Uses Within Service Area

☑ Recycled water is not used and is not planned for use within the service area of the supplier. The supplier will not complete the table below.

Name of Supplier Producing (Treating) the Recycled Water:	
Name of Supplier Operating the Recycled Water Distribution System:	
Supplemental Water Added in 2020 (volume) *Include units*	
Source of 2020 Supplemental Water	

Beneficial Use Type *Insert additional rows if needed.*	**Potential** Beneficial Uses of Recycled Water (Describe)	Amount of **Potential** Uses of Recycled Water (Quantity) *Include volume units* [1]	General Description of 2020 Uses	Level of Treatment *Drop down list*	2020 [1]	2025 [1]	2030 [1]	2035 [1]	2040 [1]	2045 [1] (opt)
Agricultural irrigation

Total	0	0
[1] **Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.		

Submittal Table 6-6 Retail: Methods to Expand Future Recycled Water Use			
☑	Supplier does not plan to expand recycled water use in the future. Supplier will not complete the table below but will provide narrative explanation.		
	Provide page location of narrative in UWMP		
Name of Action	Description	Planned Implementation Year	Expected Increase in Recycled Water Use *
Add additional rows as needed			
		Total	0
***Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.*			
NOTES: Should recycled water become available in Great Oaks' service area, Great Oaks will be the supplier of recycled water to customers in its service area.			

Great Oaks does not plan or anticipate any future water exchanges or transfers.

GREAT OAKS WATER COMPANY

Great Oaks does expect to add at least one groundwater well that is expected to increase available water supply by an estimated 841 MG. The new well would be installed in the 2025 – 2026 time frame.

Submittal Table 6-7 Retail: Expected Future Water Supply Projects or Programs						
☐	No expected future water supply projects or programs that provide a quantifiable increase to the agency's water supply. Supplier will not complete the table below.					
☐	Some or all of the supplier's future water supply projects or programs are not compatible with this table and are described in a narrative format.					
	Provide page location of narrative in the UWMP					
Name of Future Projects or Programs	Joint Project with other suppliers?		Description (if needed)	Planned Implementation Year	Planned for Use in Year Type *Drop Down List*	Expected Increase in Water Supply to Supplier* *This may be a range*
	Drop Down List (y/n)	*If Yes, Supplier Name*				
Add additional rows as needed						
Groundwater Well(s)	No			2025 or 2026	Average Year	841
***Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.*						

6.4. Summary of Existing and Planned Sources of Water

Projected water supplies are based upon combined total safe yields from Great Oaks' existing and projected groundwater wells and are shown in the tables below.

Submittal Table 6-8 Retail: Water Supplies — Actual				
Water Supply	Additional Detail on Water Supply	2020		
Drop down list May use each category multiple times.These are the only water supply categories that will be recognized by the WUEdata online submittal tool		Actual Volume*	Water Quality Drop Down List	Total Right or Safe Yield* (optional)

Total		11,839	0	12,680	0	12,680	0	12,680	0	12,680	0
*Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Table 2-3.											

6.5. Energy Use

Water Code Section 10631.2(a) provides:

> *In addition to the requirements of Section 10631, an urban water management plan shall include any of the following information that the urban water supplier can readily obtain:*
>
> *(1) An estimate of the amount of energy used to extract or divert water supplies.*
>
> *(2) An estimate of the amount of energy used to convey water supplies to the water treatment plants or distribution systems.*
>
> *(3) An estimate of the amount of energy used to treat water supplies.*
>
> *(4) An estimate of the amount of energy used to distribute water supplies through its distribution systems.*
>
> *(5) An estimate of the amount of energy used for treated water supplies in comparison to the amount used for nontreated water supplies.*
>
> *(6) An estimate of the amount of energy used to place water into or withdraw from storage.*
>
> *(7) Any other energy-related information the urban water supplier deems appropriate.*

Great Oaks' energy usage estimates are based upon the amount of energy used to extract water from the groundwater basin and distribute that water through its distribution system.

The following table, using the "Total Utility Approach," shows energy usage in 2020.

Urban Water Supplier: *Great Oaks Water Company*

Water Delivery Product (If delivering more than one type of product use Table O-1C)

Metered Data

Data Quality Narrative:

Each well and pump is metered for energy usage.

Narrative:

All water entering the distribution system comes from groundwater wells, each of which utilizes an electric pump to produce the water. Distributing the water through the system, including storing water in tanks for later distribution, is also accomplished using electric pumps.

GREAT OAKS WATER COMPANY

Chapter 7 – Water Service Reliability and Drought Risk Assessment

Water Code Section 10635(a) provides:

> *Every urban water supplier shall include, as part of its urban water management plan, an assessment of the reliability of its water service to its customers during normal, dry, and multiple dry water years. This water supply and demand assessment shall compare the total water supply sources available to the water supplier with the long-term total projected water use over the next 20 years, in five-year increments, for a normal water year, a single dry water year, and a drought lasting five consecutive water years. The water service reliability assessment shall be based upon the information compiled pursuant to Section 10631, including available data from state, regional, or local agency population projections within the service area of the urban water supplier.*

Assessing water service reliability is one of the fundamental purposes of Urban Water Management Plans. Water service reliability reflects the water supplier's ability to meet the water needs of its customers under varying conditions.

The Drought Risk Assessment is a new addition to UWMPs and provides the opportunity for water suppliers to test the near-term reliability by assuming the next five years will be dry years.

7.1. Constraints on Water Sources

Whether Valley Water adequately or responsibly manages the groundwater in the Santa Clara Valley Groundwater Basin will always be an issue that must be considered when assessing the reliability of water supplies. Valley Water delayed necessary work on Anderson Dam until it was forced to take action in 2020. Now and for at least the next ten years, Valley Water's largest reservoir – Anderson Reservoir – will be out of service while Anderson Dam is reconstructed. Since Valley Water has never been in this situation before, how Valley Water reacts to dry conditions without its largest reservoir will be a determinative factor in the reliability of water supplies, especially groundwater supplies in Great Oaks' service area. Valley Water offers assurance that it will manage the water supplies and conduct managed recharge operations appropriately so as not to negatively impact water supply reliability. Whether this is true will be determined over the time period Anderson Reservoir is out of service. Great Oaks' Drought Risk Assessment is based upon current information, including Valley Water's assurances that it will manage groundwater resources appropriately. Information on Valley Water's water supply reliability assessments may be found in Valley Water's 2020 Urban Water Management Plan.

7.2. Water Supply Reliability

The following table shows the basis for Great Oaks' water reliability assessment.

Submittal Table 7-1 Retail: Basis of Water Year Data (Reliability Assessment)			
Year Type	**Base Year** If not using a calendar year, type in the last year of the fiscal, water year, or range of years, for example, water year 2019-2020, use 2020	**Available Supplies if Year Type Repeats**	
		☐ Quantification of available supplies is not compatible with this table and is provided elsewhere in the UWMP. Location _____	
		☑ Quantification of available supplies is provided in this table as either volume only, percent only, or both.	
		Volume Available *	**% of Average Supply**
Average Year	2013	11839	100%
Single-Dry Year	1977	9471	80%
Consecutive Dry Years 1st Year	2012	9234	78%
Consecutive Dry Years 2nd Year	2013	9826	83%
Consecutive Dry Years 3rd Year	2014	9116	77%
Consecutive Dry Years 4th Year	2015	9234	78%
Consecutive Dry Years 5th Year	2016	9116	77%

Supplier may use multiple versions of Table 7-1 if different water sources have different base years and the supplier chooses to report the base years for each water source separately. If a Supplier uses multiple versions of Table 7-1, in the "Note" section of each table, state that multiple versions of Table 7-1 are being used and identify the particular water source that is being reported in each table.

***Units of measure (AF, CCF, MG**) must remain consistent throughout the UWMP as reported in Table 2-3.*

NOTES: Great Oaks has used Santa Clara Valley Water District planning data for the percentages of Average Supply available during the five consecutive dry years from its 2020 Urban Water Management Plan. Santa Clara Valley Water District is responsible for management of the groundwater supplies from which Great Oaks' wells draw water for the Great Oaks water system. The volume available for the average year (2013) is the total volume available from all Great Oaks wells in operation in 2020. % of Average Supply for the Single Dry Year (1977) is based upon the volume available in the Average Year, using Santa Clara Valley Water District's value of 80% of available supplies being available in such a year.

Great Oaks' water service reliability assessment combines the details of its water use analysis in Chapter 4 with its water supply analysis in Chapter 6. This is intended to provide a complete picture of both short-term and long-term water service reliability.

The following tables summarize water service/water supply reliability for normal (average), single dry year, and five consecutive dry years through 2045.

Table 7-2 compares data in Tables 6-9 and 4-3. For more information about those tables, please see Chapters 6 and 4, respectively.

Submittal Table 7-2 Retail: Normal Year Supply and Demand Comparison					
	2025	2030	2035	2040	2045 *(Opt)*

Sixth year *(optional)*	Supply totals					
	Demand totals					
	Difference	0	0	0	0	0
***Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Table 2-3.*						

7.3. Drought Risk Assessment

Water Code Section 10635(b) provides:

> *Every urban water supplier shall include, as part of its urban water management plan, a drought risk assessment for its water service to its customers as part of information considered in developing the demand management measures and water supply projects and programs to be included in the urban water management plan. The urban water supplier may conduct an interim update or updates to this drought risk assessment within the five-year cycle of its urban water management plan update. The drought risk assessment shall include each of the following:*
>
> *(1) A description of the data, methodology, and basis for one or more supply shortage conditions that are necessary to conduct a drought risk assessment for a drought period that lasts five consecutive water years, starting from the year following when the assessment is conducted.*
>
> *(2) A determination of the reliability of each source of supply under a variety of water shortage conditions. This may include a determination that a particular source of water supply is fully reliable under most, if not all, conditions.*
>
> *(3) A comparison of the total water supply sources available to the water supplier with the total projected water use for the drought period.*
>
> *(4) Considerations of the historical drought hydrology, plausible changes on projected supplies and demands under climate change conditions, anticipated regulatory changes, and other locally applicable criteria.*

Table 7-5, below, is based upon projected water usage shown in Table 4-2 and projected water demands in Table 6-8 during a five-year consecutive dry year period. Projected water supplies meet projected demands throughout the five-year dry period.

Resulting % Use Reduction from WSCP action	0%

7.3.1. Discussion

Based upon the analysis above, Great Oaks concludes that it has sufficient water supplies to meet projected water demands during a five-year consecutive dry year scenario. As noted above, much depends upon Valley Water's groundwater management activities, especially during the time period the Anderson Reservoir is out of commission.

In the event Valley Water's actions with respect to groundwater management and recharge during the time period Anderson Reservoir is not in service prove inadequate, Great Oaks will implement its Water Shortage Contingency Plan stage-by-stage, if necessary, to retain water service/water supply reliability. Such measures would be supported by activation of Great Oaks' Schedule No. 14.1 Mandatory Water Conservation tariff, which includes specific unauthorized water uses and mechanisms to adopt and enforce allocations (rationing).

7.4 Annual Water Supply and Demand Assessment Procedure

7.4.1. Decision Making Process.

Great Oaks will maintain communications with Valley Water, including its groundwater management personnel, through involvement in the Valley Water Retailer Groundwater Subcommittee. Through these communications, Great Oaks will remain informed of groundwater conditions and any issues and/or events that may impact future groundwater conditions.

Great Oaks also checks the aquifer levels at its well sites on a regular basis and maintains this data to inform decision-making on annual and long-term water supply assessments.

Decisions on actions to be taken by Great Oaks for Annual Water Supply and Demand Assessments will be made by upper management based upon data collected as to water supply and customer demand, as guided by any actions taken by Valley Water to reduce demand, including, but not limited to the declaration of water shortage emergencies. Board action is not necessary to make or implement decisions as to annual water supply and demand assessments.

7.4.2. Methodology for Annual Assessment.

Demand is to be compared against water production capacity for each well and for all wells in combination. Factored into the demand side of the equation will be any and all mandatory water conservation requirements (e.g., implementation of Stage 3 of the Water Shortage Contingency Plan, calling for reductions in water use of 20 to 30%. Great Oaks will request authority from the California Public Utilities Commission to implement various stages of its Tariff Schedule No. 14.1 Water

Conservation and Rationing Plan to establish appropriate conservation allocations and excess usage surcharges to encourage conservation and discourage overuse of water.

7.4.3. Annual Assessment Information FY2022-23.

GREAT OAKS WATER COMPANY

Chapter 8 – Water Shortage Contingency Planning

Water Code Section 10632 requires that each Urban Water Management Plan include a Water Shortage Contingency Plan (WSCP). The WSCP must include a written decision-making process to be used by the water supplier to determine water supply reliability.

8.1. WSCP Stages of Action

As Great Oaks relies upon the groundwater supplies managed by Valley Water, Great Oaks utilizes Valley Water's WSCP as its own for decision-making. Valley Water's WSCP is detailed in the table below.

Submittal Table 8-1
Water Shortage Contingency Plan Levels

Shortage Level	Percent Shortage Range	Shortage Response Actions (*Narrative description*)
1	0% - 10%	Stage 1 is normal water supply available when groundwater storage is substantially full and no water shortage actions are necessary.
2	10% - 20%	Stage 2 is the alert stage that is meant to warn the public that current water use is tapping groundwater reserves. This stage is triggered when groundwaster storage is projected to drop below 300,000 AF and the Board may request the public and retailers reduce water use by up to 10%.
3	20% - 30%	Stage 3 is the severe stage. Shortage conditions are worsening, requiring close coordination with retailers and cities to enact ordinances and water use restrictions. This stage is triggered when groundwater storage falls below 250,000 AF. The Board may pass a resolution that requests the public and
4	30% - 40%	Critical conditions - This is typically the most severe stage in a multi-year drought. This stage is triggered when Valley Water projects that groundwater storage will fall below 200,000 AF. The Board of Valley Water may increase the demand reduction request up to 40 percent.
5	40% - 50%	Stage 5 is for emergency situations. It is meant to address an immediate crisis such as a major infrastructure failure when water supply may only be available to meet health and safety needs. Stage 5 can also be triggered in a deep drought when groundwater levels are projected to fall below 150,000 AF. Water
6	Over 50%	Extreme Emergency Situations - This stage is meant to address an extreme crisis such as a major infrastructure failure when the water supply may be only available to meet health and safety needs. Stage 6 can also be triggered in an extreme drought when groundwater levels are projected to be materially less

8.2. Shortage Response Actions

Water Shortage Contingency Plans are required to include water shortage response actions listed in Water Code Section 10632(a)(4), which provides:

> *Shortage response actions that align with the defined shortage levels and include, at a minimum, all of the following:*
>
> *(A) Locally appropriate supply augmentation actions.*
>
> *(B) Locally appropriate demand reduction actions to adequately respond to shortages.*
>
> *(C) Locally appropriate operational changes.*
>
> *(D) Additional, mandatory prohibitions against specific water use practices that are in addition to state-mandated prohibitions and appropriate to the local conditions.*
>
> *(E) For each action, an estimate of the extent to which the gap between supplies and demand will be reduced by implementation of the action.*

The following table provides the water shortage response actions, including restrictions and prohibitions on end use.

Submittal Table 8-2: Demand Reduction Actions

Shortage Level	Demand Reduction Actions ***Drop down list*** *These are the only categories that will be accepted by the WUEdata online submittal tool. Select those that apply.*	How much is this going to reduce the shortage gap? *Include units used (volume type or percentage)*	Additional Explanation or Reference *(optional)*	Penalty, Charge, or Other Enforcement? ***For Retail Suppliers Only*** *Drop Down List*
Add additional rows as needed				
1	Expand Public Information Campaign	0 - 10%	Normal Operations and Water Supply	No
2	Other	10 - 20%	Pursuant to Tariff Schedule No. 14.1, Great Oaks may institute mandatory water conservation measures, including conservation allocations and excess usage surcharges. In addition, Tariff Schedule 14.1: Prohibits all use of potable water that results in flooding or runoff in gutters or streets; Prohibits use of potable water for washing buildings, sructures, driveways, patios, parking lots, tennis courts, or other hard-surfaced areas, except in cases where health and safety are at risk; Prohibits individual private washing of cars with a hose except with the use of a positive action shut-off nozzle; Prohibits individual private washing of cars with a hose except	Yes
3	Other	20 - 30%	All actions of Tariff Rule 14.1 are available to address water shortage level. Mandatory water conservation allocations increased to reduce water usage by 20 - 30%.	Yes
4	Other	30 - 40%	All actions of Tariff Rule 14.1 are available to address water shortage level. Mandatory water conservation allocations increased to reduce water usage by 30 - 40%.	Yes
5	Other	40 - 50%	All actions of Tariff Rule 14.1 are available to address water shortage level. Mandatory water conservation allocations increased to reduce water usage by 40 - 50%.	Yes
6	Other	Over 50%	All actions of Tariff Rule 14.1 are available to address water shortage level. Mandatory water conservation allocations increased to reduce water usage by more than 50%.	Yes

NOTES: Tariff Schedule No. 14.1 is provided in the 2020 Urban Water Management Plan, at pp. 45 - 50. The current version of Schedule No. 14.1 may be viewed here: https://greatoakswater.com/TariffPDFs/GOWC_ScheduleNo141.pdf.

8.3. Communications Protocols and Procedures

Water Code Section 10632(a)(5) requires that a WSCP include:

> *Communication protocols and procedures to inform customers, the public, interested parties, and local, regional, and state governments, regarding, at a minimum, all of the following:*
>
> *(A) Any current or predicted shortages as determined by the annual water supply and demand assessment described pursuant to Section 10632.1.*
>
> *(B) Any shortage response actions triggered or anticipated to be triggered by the annual water supply and demand assessment described pursuant to Section 10632.1.*
>
> *(C) Any other relevant communications.*

Great Oaks communicates with its customers on a regular basis on water conservation issues. In the event Great Oaks is to implement certain mandatory water conservation measures under its Rule No. 14.1 and Schedule No. 14.1 (including the declaration of water shortage emergency), Water Standard Practice (adopted by the California Public Utilities Commission in its Resolution W-4976) requires a public hearing. Water Standard Practice U-40-W may be accessed through this link:

https://www.cpuc.ca.gov/uploadedFiles/CPUC_Public_Website/Content/Utilities_and_Industries/Water/Standard_Practice_U40W_2014_wo.pdf.

Standard Practice U-40-W authorizes, under certain prescribed circumstances, the ability to address revenue reductions and expense increases resulting from water shortage emergency conditions.

CPUC Resolution W-5000 also requires Great Oaks to coordinate its actions in the event demand management and other measures are insufficient, including with respect to declarations of local emergencies.

8.4. Seismic Risk Assessment and Mitigation Plan

Great Oaks addresses the issue of seismic risk assessment and mitigation through its Emergency Response Plan (ERP) and its Infrastructure and Facilities Master Plan, both of which have been submitted and accepted by the California Public Utilities Commission.

Great Oaks' ERP includes seismic/earthquake risks and response actions, including a specific earthquake event scenario. Great Oaks' ERP also utilizes the Standardized Emergency Management System (SEMS), as required by Government Code § 8607(a) for managing response to multi-agency and multi-jurisdiction

emergencies, such as major seismic events. Great Oaks will utilize its ERP in response to seismic events.

Great Oaks also utilizes its Infrastructure and Facilities Master Plan to evaluate its water system infrastructure and specific facilities that may be vulnerable to seismic events. Pipelines and water storage facilities are monitored and maintained closely and Great Oaks requests and receives authority from the California Public Utilities Commission to improve and/or replace any such facilities should they represent a greater risk of failure due to natural events, including earthquakes.

Great Oaks has sufficient groundwater extraction capabilities (wells) so that should a seismic event cause one or more wells to be out of service for a period of time, Great Oaks retains the ability to meet customer demand. The wells are spread throughout Great Oaks' service area, making it less likely that a single seismic event will disable access to all sources of supply.

Great Oaks is also an active participant in Valley Water's discussions and communications about how that agency maintains and replaces infrastructure due to seismic risk concerns. At present, the County's largest reservoir is out of service while its dam is replaced with one less vulnerable to seismic events. Through its active participation in Valley Water's Retailer Groundwater Subcommittee, Great Oaks is in direct communication regarding groundwater issues directly affected by Valley Water's Anderson Dam project. Great Oaks also participates in Valley Water's emergency response communications and retailer coordination efforts, both of which would be active in response to a seismic event.

GREAT OAKS WATER COMPANY

Chapter 9 – Demand Management Measures

This chapter describes past and planned demand management (conservation) measures Great Oaks has and will rely upon to encourage (and sometimes require) customers to conserve and reduce water demand/usage during specific circumstances and over the period covered by the UWMP.

9.1. Existing Demand Management Measures

Water Code Section 10631(e) states:

> *Provide a description of the supplier's water demand management measures. This description shall include all of the following:*
>
> *(1) (A) For an urban retail water supplier, as defined in Section 10608.12, a narrative description that addresses the nature and extent of each water demand management measure implemented over the past five years. The narrative shall describe the water demand management measures that the supplier plans to implement to achieve its water use targets pursuant to Section 10608.20.*
>
> *(B) The narrative pursuant to this paragraph shall include descriptions of the following water demand management measures:*
>
> *(i) Water waste prevention ordinances.*
>
> *(ii) Metering.*
>
> *(iii) Conservation pricing.*
>
> *(iv) Public education and outreach.*
>
> *(v) Programs to assess and manage distribution system real loss.*
>
> *(vi) Water conservation program coordination and staffing support.*
>
> *(vii) Other demand management measures that have a significant impact on water use as measured in gallons per capita per day, including innovative measures, if implemented.*

9.1.1. Demand Management Measures Implemented Over Past Five Years.

In 2015, Great Oaks updated and activated its Schedule No. 14.1 tariff in response to the declared drought emergency. The current version of Tariff Schedule No. 14.1 is provided below. This provides a comprehensive approach to mandatory water conservation/demand management measures.

Additional demand management measures implemented by Great Oaks are summarized following Tariff Schedule No. 14.1.

SLIP/SUB SHEET

GREAT OAKS WATER COMPANY (Original) Cal. P.U.C. Sheet No. 768-W
San Jose, California Canceling _____ Cal. P.U.C. Sheet No. _____

Schedule No. 14.1 (N)
MANDATORY WATER CONSERVATION
SUPPLEMENT

A. APPLICABILITY

1. This schedule applies to all metered water service. For purposes of this tariff, the term "customer" is defined as a service connection. It is only effective in times of mandatory rationing, as required by Rule No. 14.1, and only for the period noted in the Special Conditions section below.

2. This schedule shall remain dormant until a specific stage is activated by Commission authorization of a Tier 2 advice letter.

3. When a particular stage of this schedule is activated, the period over which it shall be effective will be added to the tariff language.

B. TERRITORY

1. This Schedule is applicable within the entire territory served by the utility.

C. STAGES OF MANDATORY CONSERVATION MEASURES

1. Stage 1: When mandatory conservation measures are ordered or otherwise declared by an authorized government agency or official, the conservation measures pertaining to non-essential or unauthorized water use listed in Rule No. 14.1 become mandatory. The Utility shall also provide notice to its customers by newspaper publication or bill insert, and such notice shall provide the effective date of such mandatory conservation measures.

   When such conservation measures pertaining to non-essential or unauthorized water uses listed in Rule No. 14.1 become mandatory pursuant to this Stage, such non-essential or unauthorized water uses are deemed to be a waste of water and shall be subject to the provisions of Rule No. 11 for waste of water.

2. Stage 2: Water supply is reduced 10.01% - 20.00%, water conservation of 10.01% - 20.00% has been ordered by an authorized government agency or official, or water restrictions at Stage 1 have not been effective in reducing water usage to the prescribed level.

3. Stage 3: Water supply is reduced 20.01% or more, water conservation of 20.01% or more has been ordered by an authorized government agency or official, or water restrictions at Stage 2 have not been effective in reducing water usage to the prescribed level. (N)

Schedule No. 14.1
MANDATORY WATER CONSERVATION
(continued)

D. MANDATORY WATER USE RESTRICTIONS AT EACH STAGE

1. In addition to the water use restrictions listed in the Utility's Rule No. 14.1 – Section A (Conservation – Non-Essential or Unauthorized Water Use), which become mandatory restrictions when any Stage of Schedule No. 14.1 is activated, the following mandatory excess water use restrictions apply to water usage at each stage of mandatory conservation measures. These reduced usage levels shall be determined based upon either historical average customer usage for a defined time period, average customer class usage for a defined time period, or another method that accounts for historical customer conservation efforts:

a. Stage 1: Customer usage reduced by 90.00% to 99.9% of specific level.
b. Stage 2: Customer usage reduced to 80.00% to 89.99% of specified level.
c. Stage 3: Customer usage reduced to 79.99% or less of specified level.

E. UNAUTHORIZED USE SURCHARGES

1. When a Stage of this Schedule No. 14.1 has been activated with Commission authorization, the water use restrictions of Section A of Rule No. 14.1, as well as those listed in Section D of this Schedule No. 14.1 become mandatory. If a customer violates such water use restrictions, as set forth in Section A of Rule No. 14.1 and in the Section H. Special Conditions of this Schedule No. 14.1, the customer will be subject to the following Unauthorized Use Surcharges:

a. First Offense: Written warning mailed to customer.
b. Second Offense (same restriction): $25.00 Unauthorized Use Surcharge.
c. Each Additional Offense (same restriction): $25.00 more than previous Unauthorized Use Surcharge.

2. Offenses for separate water use restrictions will go through the same progressive levels as provided in subsection 1, above.

F. DROUGHT ALLOCATIONS AND EXCESS USAGE SURCHARGES

1. For all potable water customers, the Drought Allocation is based upon individual customer usage in 2013, the base year applicable to this Schedule No. 14.1, less the percentage of conservation required, as determined by appropriate state and/or local authorities. For this Schedule No. 14.1, the percentage of conservation required is twenty percent (20%), making the Drought Allocation equal to eighty percent (80%) of individual customer usage in 2013. Original Cal. P.U.C. Sheet No. 770-W

Schedule No. 14.1
MANDATORY WATER CONSERVATION
(continued)

2. In recognition that some single-family residential customers conserve water at all times, not just in times of drought, a minimum Drought Allocation has been established of 7 ccf per month (5,236 gallons per month) for this Schedule No. 14.1. In practice, if the Drought Allocation for a single-family residential customer based upon actual 2013 usage calculates to less than 7 ccf per month, that customer's Drought Allocation will be set at 7 ccf per month pursuant to this minimum Drought Allocation procedure.

3. In recognition that some single-family residential customers do not have an established 2013 history of usage, the following table shows the Drought Allocations that will be applied to those single-family residential customers without an established 2013 history of usage.

Drought Allocations for Single-Family
Residential Customers Without 2013 Usage History
(all values in ccf)

January	7	July	12
February	7	August	13
March	7	September	12
April	7	October	10
May	9	November	9
June	11	December	8

5. If a customer exceeds an applicable Drought Allocation, the customer shall be subject to the following Excess Usage Surcharge:

For usage over the applicable Drought Allocation (i.e., the amount of excess usage), the customer shall be charged two-times the Schedule No. 1 quantity rate for all water delivered, per 100 Cu.Ft. (C) | (C)

6. Excess Usage Surcharges shall be in addition to all other charges for water service. Customers participating in the Utility's Low Income Customer Assistance Programs shall be entitled to a 50% reduction in Excess Usage Surcharges upon written request.

7. If a customer exceeds an applicable Drought Allocation in three consecutive billing periods, in addition to the Excess Usage Surcharges for such violations, the Utility may install a flow-restricting device on the customer's service line, subject to the following conditions:

a. The flow-restricting device shall be capable of providing a minimum of 3 ccf per person per month to the service residence, based upon the actual or estimated number of persons living in the service residence. A flow-restricting device shall not be installed if doing so would violate fire flow requirements.

SUPPLEMENT

Schedule No. 14.1
MANDATORY WATER CONSERVATION
(continued)

(N)

b. The flow-restricting device may only be removed by the Utility and only after a minimum three-day period.

c. Any tampering with the flow-restricting device may result in the discontinuation of the customer's water service and the customer being charged for any damage to the Utility's equipment or facilities and any required service visits.

d. After removal of the flow-restricting device, if the Utility verifies that the customer is using potable water for non-essential or unauthorized uses as listed in Rule No. 14.1, the Utility may install another flow-restricting device without prior notice to the customer. This flow-restricting device shall remain in place until water supply conditions warrant its removal. If, despite the installation of the flow-restricting device, the Utility verifies that the customer is using potable water for non-essential or unauthorized uses as listed in Rule No. 14.1, then the Utility may discontinue the customer's water service as provided in Rule No. 11.

G. FLOW-RESTRICTING DEVICE CHARGES

The charge for removal of a flow-restricting device installed for a waste of water shall be:

Meter Size	Removal Charge
5/8" to 1-inch	$ 45.00
1 ½-inch to 2-inch	$ 90.00
3-inch and larger	Actual cost

H. SPECIAL CONDITIONS

1. This Schedule No. 14.1 shall remain in effect until the Utility files a Tier 1 advice letter to deactivate a particular Stage or the Schedule in its entirety.

2. Unauthorized Use and Excess Use Surcharges must be separately itemized on each bill.

3. Surcharges under this Schedule are subject to the reimbursement fee set forth on Schedule No. UF.

4. All amounts collected by the Utility through drought surcharges shall not be accounted for as income, but shall be recorded to the Utility's authorized Conservation Lost Revenue and Expense Memorandum Account to offset either revenues lost due to conservation or conservation expenses incurred by the Utility. All expenses incurred by the Utility to activate (N)

(N)

Rule No. 14.1 and Schedule No. 14.1 that have not been considered in a General Rate Case or other proceeding, shall be recorded in an appropriate memorandum account for disposition as authorized by the Commission. Lost revenues associated with reduced sales as a result of activation of either Tariff Rule No. 14.1 or Schedule No. 14.1 for the Utility shall be tracked and recorded in a memorandum account as authorized by the Commission.

5. No customer shall use Utility-supplied water for non-essential or unauthorized uses, including but not limited to:

a. Use of potable water for more than minimal landscaping, as defined in the landscaping regulations of the jurisdiction or as described in Article 10.8 of the California Government Code in connection with new construction;

b. Excessive use of water: When a utility has notified the customer in writing to repair a broken or defective plumbing, sprinkler, watering, or irrigation system and the customer has failed to effect such repairs within five business days, the utility may install a flow restriction device;

c. Use of potable water that results in flooding or runoff in gutters or streets;

d. Individual private washing of cars with a hose except with the use of a positive action shut-off nozzle. Use of potable water for washing commercial aircraft, cars, buses, boats, trailers, or other commercial vehicles at any time, except at commercial or fleet vehicle or boat washing facilities operated at a fixed location where equipment using water is properly maintained to avoid wasteful use;

e. Use of potable water for washing buildings, structures, driveways, patios, parking lots, tennis courts, or other hard-surfaced areas, except in the cases where health and safety are at risk;

f. Use of potable water to irrigate turf, lawns, gardens, or ornamental landscaping in violation of local ordinances or government-imposed outdoor watering restrictions;

g. Use of potable water for street cleaning with trucks, except for initial wash-down for constr purposes (if street sweeping is not feasible), or to protect the health and safety of the public;

h. Use of potable water for construction purposes, such as consolidation of backfill, dust control, or other uses unless no other source of water or other method can be used;

i. Use of potable water for street cleaning, unless for reasons of health and safety;

Schedule No. 14.1

SUPPLEMENT MANDATORY WATER CONSERVATION
(continued)

(N)

j. Operation of commercial car washes without recycling at least 50% of the potable water used per cycle;

k. Use of potable water for watering outside plants, lawn, landscape, and turf areas in violation of applicable state or local ordinances when this Schedule is in effect;

l. Use of potable water for decorative fountains or the filling or topping off of decorative lakes or ponds in violation of applicable state or local ordinances. Exceptions are made for those decorative fountains, lakes, or ponds that utilize recycled water;

m. Use of potable water for the filling or refilling of swimming pools in violation of applicable state or local ordinances;

n. Service of water by any restaurant except upon the request of a patron; and

o. Use of potable water to flush hydrants, except where required for public health or safety.

I. APPEAL PROCEDURE

1. Any customer who seeks a variance from any of the provisions of this Schedule No. 14.1 shall notify the Utility in writing, explaining in detail all reasons for the requested variance and submitting any evidence the customer wants the Utility to consider related to the requested variance. The Utility shall respond to any such request in writing.

2. If the customer disagrees with the Utility's decision on the requested variance, the customer may file a complaint with the California Public Utilities Commission.

3. Except as set forth in this section, no person shall have any right or claim in law or in equity against the Utility or any of its employees or the California Public Utilities Commission for any action taken or threatened under the provisions of this Schedule No. 14.1. (N)

9.1.2. Additional Demand Management Measures

Great Oaks does not have the authority to adopt or implement water waste prevention ordinances, but Great Oaks did work with the City of San Jose during the last five years to ensure that Great Oaks' demand management measures were consistent with the City's ordinances pertaining to water waste prevention.

Great Oaks' Tariff Schedule No. 1 General Metered Service Tiered Rates has been in effect in various forms since 2010. The current version of this tariff schedule is provided below. Tiered rates are considered a method of demand management that sends price signals to water users to reduce consumption before usage reaches a higher-priced tier. This tariff schedule is updated/revised on a fairly regular basis.

GREAT OAKS WATER COMPANY — Revised — Cal. P.U.C. Sheet No. 878-W
San Jose, California — Canceling — Revised — Cal. P.U.C. Sheet No. 857-W

Schedule No. 1
GENERAL METERED SERVICE
Tiered Rates
Designed and Ordered by the California Public Utilities Commission

APPLICABILITY
Applicable to all single-family residential services only.

TERRITORY
The area is Southeast San Jose, East of Snell Road and South of Hellyer Park.

RATES

Quantity Rates (Tiered Rates): For all water delivered, per 100 Cu. Ft.	Per Meter/Per Month	
For total bi-monthly usage from 0 to 6 Ccf.	$ 1.3024	(C)(R)
For total bi-monthly usage from 7 to 24 Ccf.	2.6048	(C)(R)
For total bi-monthly usage over 24 Ccf.	3.9723	(C)(I)
Service Charge (Conservation Rates):		
For 5/8x3/4-inch meter	$ 14.91	(I)
For 3/4x3/4-inch meter	22.36	(I)
For 1-inch meter	37.26	(I)
For 1 ½-inch meter	74.53	(I)
For 2-inch meter	119.25	(I)
For 3-inch meter	223.59	(I)
For 4-inch meter	372.65	(I)
For 6-inch meter	745.29	(I)
For 8-inch meter	1,192.47	(I)
For 10-inch meter	1,714.17	(I)
For 12-inch meter	2,459.46	(I)

The Service Charge is a readiness-to-serve charge which is applicable to all metered service and to which is added the charge for water used computed at the Quantity Rates.

Resolution No. _____

9.1.3. Public Education and Outreach.

In 2015, Great Oaks began a partnership with WaterSmart Software (WaterSmart) to provide Water Reports to 10,000 of Great Oaks' single-family residential customers on a pilot-program basis. The WaterSmart program helps Great Oaks engage customers to save water and money. The program goals are to reduce water demand, increase customer satisfaction, awareness, and engagement, simplify program planning, tracking, and analysis, and increase participation in conservation programs. Great Oaks utilizes the WaterSmart program to communicate with customers and provide useful information to help customers conserve/reduce demand.

9.1.4. Programs to Assess and Manage Distribution System Real Loss.

Great Oaks has replaced nearly all of its meters over the past eight (8) years, providing reasonable assurances that its meters are accurately recording water delivered. This significantly reduces meter error as a source of "system loss."

Great Oaks also utilizes leak detection equipment to locate known and unknown leaks. The technology for leak detection equipment has improved, but still fails to locate even known leaks. As the technology improves, Great Oaks will acquire and utilize leak detection equipment to reduce "system loss."

9.1.5. Water Conservation Program Coordination and Staffing Support.

All of Great Oaks' legal, regulatory, and conservation programs designed to reduce water usage, including customer outreach and engagement and coordination with local government agencies, State agencies, and the California Public Utilities Commission, are directed through the office of Great Oaks' Vice President and General Counsel, Legal and Regulatory Affairs, Timothy S. Guster. Mr. Guster has no staff and no budget for conservation programs.

9.1.6. Additional Information on Demand Management Measures.

Great Oaks participates in numerous local government water retailer committees and subcommittees pertaining to conservation communications, demand management measures, landscaping, finance, and retailer relations. Great Oaks encourages its customers to utilize existing programs offered by local government agencies with jurisdictions that encompass Great Oaks' service area, including the following:

- Interior and Exterior Water Audits for Single Family and Multi-Family Customers: Great Oaks advises residential customers regarding Valley Water's free water auditing services. Valley Water communicates with Great Oaks' customers directly through print, television, movie screen and radio

advertising. Valley Water provides customers participating in Valley Water's water auditing services, and Great Oaks, receive a report upon completion.

- Plumbing Retrofit: Great Oaks distributes sink faucet aerators and, when available, low-flow showerheads, provided by Valley Water.
- Distribution System Water Audits, Leak Detection and Repair: Great Oaks constantly monitors its distribution system for leaks.
- Metering with Commodity Rates: All of Great Oaks' accounts are metered.
- Large Landscape Water Audits and Incentives: Valley Water provides irrigation surveys for large landscape customers.
- Landscape Water Conservation Requirements: Most of Great Oaks' service area is within the City of San Jose, which has landscape water conservation requirements for new construction.
- Public Information: Valley Water distributes public information to Great Oaks' customers through its media and outreach programs. Great Oaks' water bills provide year-to-year consumption comparisons alerting customers to any changes in usage patterns.
- School Education: On occasion, Great Oaks provides information to schools within its service area for use in discussing and promoting water conservation and water quality.
- Commercial and Industrial Water Conservation: Valley Water makes water use audits available to commercial and industrial accounts in Great Oaks' service area upon request.
- New Commercial and Industrial Water Use Review: The City of San Jose Building Department and Great Oaks coordinate activities for new commercial and industrial water uses. Great Oaks provides the City of San Jose (or the County of Santa Clara) with a "will serve letter," representing that Great Oaks has reviewed the new construction plans and agrees with the proposed water use of the new commercial or industrial customer.
- Conservation Pricing, Water Service and Sewer Service: Great Oaks has tiered water pricing for single-family residential customers.
- Landscape Water Conservation for New and Existing Single-Family Homes: The City of San Jose maintains a demonstration garden and works with landscape maintenance companies to promote efficient landscaping practices within Great Oaks' service area.
- Water Waste Prohibition: Great Oaks prohibits water waste under CPUC rules and regulations. Great Oaks is authorized to discontinue service to any customer wasting water.
- Water Conservation Coordinator: Great Oaks has not been authorized funding for a water conservation coordinator.

- Financial Incentives: Tiered water rates authorized by the CPUC may provide financial incentives or disincentives to single-family residential customers of Great Oaks, although the extent of such incentives or disincentives is unknown.
- Ultra-low Flush Toilet Replacement: Great Oaks' customers may participate in the Valley Water program for ultra-low flush toilet replacement.

GREAT OAKS WATER COMPANY

Chapter 10 – Plan Adoption, Submittal, and Implementation

This chapter contains information on the public hearing, adoption process for the 2020 UWMP, as well as the submittal process for the UWMP and WSCP. This chapter also confirms that the Great Oaks 2020 UWMP and WSCP were timely submitted.

10.1. Compliance with Water Code Section 10621(b).

Water Code Section 10621(b) provides:

> *Every urban water supplier required to prepare a plan pursuant to this part shall, at least 60 days before the public hearing on the plan required by Section 10642, notify any city or county within which the supplier provides water supplies that the urban water supplier will be reviewing the plan and considering amendments or changes to the plan. The urban water supplier may consult with, and obtain comments from, any city or county that receives notice pursuant to this subdivision.*

Great Oaks' public hearing on its 2020 UWMP was held on June 28, 2021. On March 26, 2021 – more than 60 days before the public hearing on the plan – Great Oaks sent notices to the City of San Jose and Santa Clara County (a city and the county within which Great Oaks provides water supplies) that Great Oaks was reviewing and making revisions to its 2015 UWMP. Copies of the notices are provided in the Appendix to this 2020 UWMP.

Submittal Table 10-1 Retail: Notification to Cities and Counties

City Name	60 Day Notice	Notice of Public Hearing
Add additional rows as needed		
City of San Jose	Yes	Yes
County Name *Drop Down List*	60 Day Notice	Notice of Public Hearing
Add additional rows as needed		
Santa Clara County	Yes	Yes

10.2. Notice of Public Hearing

Water Code Section 10642 provides:

> *Each urban water supplier shall encourage the active involvement of diverse social, cultural, and economic elements of the population within the service area prior to and during the preparation of both the plan and the water shortage contingency plan. Prior to adopting either, the urban water supplier shall make both the plan and the water shortage contingency plan available for public inspection and shall hold a public hearing or hearings thereon. Prior to any of these hearings, notice of the time and place of the hearing shall be published within the jurisdiction of the publicly owned water supplier pursuant to Section 6066 of the Government Code. The urban water supplier shall provide notice of the time and place of a hearing to any city or county within which the supplier provides water supplies. Notices by a local public agency pursuant to this section shall be provided pursuant to Chapter 17.5 (commencing with Section 7290) of Division 7 of Title 1 of the Government Code. A privately owned water supplier shall provide an equivalent notice within its service area. After the hearing or hearings, the plan or water shortage contingency plan shall be adopted as prepared or as modified after the hearing or hearings.*

Great Oaks published notice of its public hearing in the San Jose Mercury News on June 3, 2021 and June 10, 2021. A copy of the notice and proof of publication is provided in the Appendix.

10.3. Public Hearing

The public hearing on Great Oaks' 2020 UWMP was conducted on June 28, 2021. Tim Guster, Great Oaks' Vice President and General Counsel conducted the hearing via Zoom Video Conference. Written comments received by Great Oaks before and during the public hearing are included in the Appendix.

10.4. Adoption of 2020 UWMP

Following the public hearing on Great Oaks' 2020 UWMP, the Great Oaks Board of Directors adopted the 2020 UWMP via Unanimous Consent Resolution, a copy of which is included in the Appendix.

10.5. Submission of Great Oaks Water Company's 2020 Urban Water Management Plan to the California Department of Water Resources

Water Code Section 10621(f) provides:

> *Each urban water supplier shall update and submit its 2020 plan to the department by July 1, 2021.*

Water Code Section 10635(c) provides:

> *The urban water supplier shall provide that portion of its urban water management plan prepared pursuant to this article to any city or county within which it provides water supplies no later than 60 days after the submission of its urban water management plan.*

Water Code Section 10644(a) provides:

> *(1) An urban water supplier shall submit to the department, the California State Library, and any city or county within which the supplier provides water supplies a copy of its plan no later than 30 days after adoption. Copies of amendments or changes to the plans shall be submitted to the department, the California State Library, and any city or county within which the supplier provides water supplies within 30 days after adoption.*
>
> *(2) The plan, or amendments to the plan, submitted to the department pursuant to paragraph (1) shall be submitted electronically and shall include any standardized forms, tables, or displays specified by the department.*

Great Oaks submitted its 2020 UWMP to California Department of Water Resources by July 1, 2021 electronically through the Water Use Efficiency (WUE) Portal. Great Oaks also submitted its 2020 UWMP to the City of San Jose and Santa Clara County within the time frame specified in Water Code Sections 10635(c) and 10644(a)(1). Finally, in compliance with Water Code Section 10644(b), Great Oaks timely submitted its 2020 UWMP to the California State Library.

10.6. Public Availability

Water Code Section 10645 provides:

> *(a) Not later than 30 days after filing a copy of its plan with the department, the urban water supplier and the department shall make the plan available for public review during normal business hours.*

> *(b) Not later than 30 days after filing a copy of its water shortage contingency plan with the department, the urban water supplier and the department shall make the plan available for public review during normal business hours.*

An electronic version of Great Oaks Water Company's 2020 Urban Water Management Plan was made available for review by the public on its website: www.greatoakswater.com.

10.7. Notification to California Public Utilities Commission

Water Code Section 10621(c) provides:

> *An urban water supplier regulated by the Public Utilities Commission shall include its most recent plan and water shortage contingency plan as part of the supplier's general rate case filings.*

Great Oaks is including its 2020 UWMP and WSCP in its 2021 General Rate Case filings in compliance with Water Code Section 10621(c).

10.8 Amending an Adopted UWMP or WSCP

In the event Great Oaks' 2020 UWMP or WSCP is amended, Great Oaks will comply with the previously cited procedures for notification, public hearing, adoption, and submittal.

APPENDIX A – Urban Water Management Plan Act Checklist

Retail	Wholesale	2020 Guidebook Location	Water Code Section	Summary as Applies to UWMP	Subject	2020 UWMP Location (Optional Column for Agency Review Use)
x	x	Chapter 1	10615	A plan shall describe and evaluate sources of supply, reasonable and practical efficient uses, reclamation and demand management activities.	Introduction and Overview	Chapter 1
x	x	Chapter 1	10630.5	Each plan shall include a simple description of the supplier's plan including water availability, future requirements, a strategy for meeting needs, and other pertinent information. Additionally, a supplier may also choose to include a simple description at the beginning of each chapter.	Summary	Section 2.4
x	x	Section 2.2	10620(b)	Every person that becomes an urban water supplier shall adopt an urban water management plan within one year after it has become an urban water supplier.	Plan Preparation	Section 2.1: Table 2-1
x	x	Section 2.6	10620(d)(2)	Coordinate the preparation of its plan with other appropriate agencies in the area, including other water suppliers that share a common source, water management agencies, and relevant public agencies, to the extent practicable.	Plan Preparation	Section 2.2
x	x	Section 2.6.2	10642	Provide supporting documentation that the water supplier has encouraged active involvement of diverse social, cultural, and economic elements of the population within the service area prior to and during the preparation of the plan and contingency plan.	Plan Preparation	Section 2.2
x		Section 2.6, Section 6.1	10631(h)	Retail suppliers will include documentation that they have provided their wholesale supplier(s) - if any - with water use projections from that source.	System Supplies	Section 2.2.1; Table 2-4
	x	Section 2.6	10631(h)	Wholesale suppliers will include documentation that they have provided their urban water suppliers with identification and quantification of the existing and planned sources of water available from the wholesale to the urban supplier during various water year types.	System Supplies	N/A
x	x	Section 3.1	10631(a)	Describe the water supplier service area.	System Description	Sections 3.1, 3.2
x	x	Section 3.3	10631(a)	Describe the climate of the service area of the supplier.	System Description	Section 3.3

APPENDIX A – Urban Water Management Plan Act Checklist

x	x	Section 3.4	10631(a)	Provide population projections for 2025, 2030, 2035, 2040 and optionally 2045.	System Description	Section 3.4; Table 3-1
x	x	Section 3.4.2	10631(a)	Describe other social, economic, and demographic factors affecting the supplier's water management planning.	System Description	Sections 4.2, 4.4
x	x	Sections 3.4 and 5.4	10631(a)	Indicate the current population of the service area.	System Description and Baselines and Targets	Section 3.4; Table 3-1
x	x	Section 3.5	10631(a)	Describe the land uses within the service area.	System Description	Sections 4.1, 4.2
x	x	Section 4.2	10631(d)(1)	Quantify past, current, and projected water use, identifying the uses among water use sectors.	System Water Use	Sections 4.1, 4.2; Tables 4-1, 4-2
x	x	Section 4.2.4	10631(d)(3)(C)	Retail suppliers shall provide data to show the distribution loss standards were met.	System Water Use	Section 4.3; Table 4-4
x	x	Section 4.2.6	10631(d)(4)(A)	In projected water use, include estimates of water savings from adopted codes, plans and other policies or laws.	System Water Use	Section 4.4; Table 4-5
x	x	Section 4.2.6	10631(d)(4)(B)	Provide citations of codes, standards, ordinances, or plans used to make water use projections.	System Water Use	Section 4.4
x	optional	Section 4.3.2.4	10631(d)(3)(A)	Report the distribution system water loss for each of the 5 years preceding the plan update.	System Water Use	Section 4.3; Table 4-4
x	optional	Section 4.4	10631.1(a)	Include projected water use needed for lower income housing projected in the service area of the supplier.	System Water Use	Section 4.4.1
x	x	Section 4.5	10635(b)	Demands under climate change considerations must be included as part of the drought risk assessment.	System Water Use	Section 4.6
x		Chapter 5	10608.20(e)	Retail suppliers shall provide baseline daily per capita water use, urban water use target, interim urban water use target, and compliance daily per capita water use, along with the bases for determining those estimates, including references to supporting data.	Baselines and Targets	Chapter 5
x		Chapter 5	10608.24(a)	Retail suppliers shall meet their water use target by December 31, 2020.	Baselines and Targets	Section 5.4; Table 5-2
	x	Section 5.1	10608.36	Wholesale suppliers shall include an assessment of present and proposed future measures, programs, and policies to help their retail water suppliers achieve targeted water use reductions.	Baselines and Targets	N/A

APPENDIX A – Urban Water Management Plan Act Checklist

x		Section 5.2	10608.24(d)(2)	If the retail supplier adjusts its compliance GPCD using weather normalization, economic adjustment, or extraordinary events, it shall provide the basis for, and data supporting the adjustment.	Baselines and Targets	Section 5.1
x		Section 5.5	10608.22	Retail suppliers' per capita daily water use reduction shall be no less than 5 percent of base daily per capita water use of the 5 year baseline. This does not apply if the suppliers base GPCD is at or below 100.	Baselines and Targets	Section 5.4
x		Section 5.5 and Appendix E	10608.4	Retail suppliers shall report on their compliance in meeting their water use targets. The data shall be reported using a standardized form in the SBX7-7 2020 Compliance Form.	Baselines and Targets	Section 5.4; Table 5-2
x	x	Sections 6.1 and 6.2	10631(b)(1)	Provide a discussion of anticipated supply availability under a normal, single dry year, and a drought lasting five years, as well as more frequent and severe periods of drought.	System Supplies	Chapters 6 and 7
x	x	Sections 6.1	10631(b)(1)	Provide a discussion of anticipated supply availability under a normal, single dry year, and a drought lasting five years, as well as more frequent and severe periods of drought, *including changes in supply due to climate change.*	System Supplies	Section 7.2
x	x	Section 6.1	10631(b)(2)	When multiple sources of water supply are identified, describe the management of each supply in relationship to other identified supplies.	System Supplies	N/A
x	x	Section 6.1.1	10631(b)(3)	Describe measures taken to acquire and develop planned sources of water.	System Supplies	Section 6.4
x	x	Section 6.2.8	10631(b)	Identify and quantify the existing and planned sources of water available for 2020, 2025, 2030, 2035, 2040 and optionally 2045.	System Supplies	Section 6.4; Tables 6-8, 6-9
x	x	Section 6.2	10631(b)	Indicate whether groundwater is an existing or planned source of water available to the supplier.	System Supplies	Section 6.4; Tables 6-8, 6-9
x	x	Section 6.2.2	10631(b)(4)(A)	Indicate whether a groundwater sustainability plan or groundwater management plan has been adopted by the water supplier or if there is any other specific authorization for groundwater management. Include a copy of the plan or authorization.	System Supplies	Section 6.1
x	x	Section 6.2.2	10631(b)(4)(B)	Describe the groundwater basin.	System Supplies	Section 6.2

APPENDIX A – Urban Water Management Plan Act Checklist

x	x	Section 6.2.2	10631(b)(4)(B)	Indicate if the basin has been adjudicated and include a copy of the court order or decree and a description of the amount of water the supplier has the legal right to pump.	System Supplies	Section 6.2
x	x	Section 6.2.2.1	10631(b)(4)(B)	For unadjudicated basins, indicate whether or not the department has identified the basin as a high or medium priority. Describe efforts by the supplier to coordinate with sustainability or groundwater agencies to achieve sustainable groundwater conditions.	System Supplies	Section 6.2
x	x	Section 6.2.2.4	10631(b)(4)(C)	Provide a detailed description and analysis of the location, amount, and sufficiency of groundwater pumped by the urban water supplier for the past five years	System Supplies	Section 6.3; Table 6-1
x	x	Section 6.2.2	10631(b)(4)(D)	Provide a detailed description and analysis of the amount and location of groundwater that is projected to be pumped.	System Supplies	Section 6.4; Chapter 7
x	x	Section 6.2.7	10631(c)	Describe the opportunities for exchanges or transfers of water on a short-term or long-term basis.	System Supplies	Section 6.3.1
x	x	Section 6.2.5	10633(b)	Describe the quantity of treated wastewater that meets recycled water standards, is being discharged, and is otherwise available for use in a recycled water project.	System Supplies (Recycled Water)	Section 6.3.1
x	x	Section 6.2.5	10633(c)	Describe the recycled water currently being used in the supplier's service area.	System Supplies (Recycled Water)	Section 6.3.1
x	x	Section 6.2.5	10633(d)	Describe and quantify the potential uses of recycled water and provide a determination of the technical and economic feasibility of those uses.	System Supplies (Recycled Water)	Section 6.3.1
x	x	Section 6.2.5	10633(e)	Describe the projected use of recycled water within the supplier's service area at the end of 5, 10, 15, and 20 years, and a description of the actual use of recycled water in comparison to uses previously projected.	System Supplies (Recycled Water)	Section 6.3.1
x	x	Section 6.2.5	10633(f)	Describe the actions which may be taken to encourage the use of recycled water and the projected results of these actions in terms of acre-feet of recycled water used per year.	System Supplies (Recycled Water)	Section 6.3.1
x	x	Section 6.2.5	10633(g)	Provide a plan for optimizing the use of recycled water in the supplier's service area.	System Supplies (Recycled Water)	Section 6.3.1
x	x	Section 6.2.6	10631(g)	Describe desalinated water project opportunities for long-term supply.	System Supplies	Section 6.3.1

APPENDIX A – Urban Water Management Plan Act Checklist

x	x	Section 6.2.5	10633(a)	Describe the wastewater collection and treatment systems in the supplier's service area with quantified amount of collection and treatment and the disposal methods.	System Supplies (Recycled Water)	Section 6.3.1; Tables 6-2, 6-3
x	x	Section 6.2.8, Section 6.3.7	10631(f)	Describe the expected future water supply projects and programs that may be undertaken by the water supplier to address water supply reliability in average, single-dry, and for a period of drought lasting 5 consecutive water years.	System Supplies	Section 6.3.1; Table 6-7
x	x	Section 6.4 and Appendix O	10631.2(a)	The UWMP must include energy information, as stated in the code, that a supplier can readily obtain.	System Suppliers, Energy Intensity	Section 6.5; Table 6-10
x	x	Section 7.2	10634	Provide information on the quality of existing sources of water available to the supplier and the manner in which water quality affects water management strategies and supply reliability	Water Supply Reliability Assessment	Section 7.1
x	x	Section 7.2.4	10620(f)	Describe water management tools and options to maximize resources and minimize the need to import water from other regions.	Water Supply Reliability Assessment	Section 7.1
x	x	Section 7.3	10635(a)	Service Reliability Assessment: Assess the water supply reliability during normal, dry, and a drought lasting five consecutive water years by comparing the total water supply sources available to the water supplier with the total projected water use over the next 20 years.	Water Supply Reliability Assessment	Section 7.3; Table 7-5
x	x	Section 7.3	10635(b)	Provide a drought risk assessment as part of information considered in developing the demand management measures and water supply projects.	Water Supply Reliability Assessment	Section 7.3; Table 7-5
x	x	Section 7.3	10635(b)(1)	Include a description of the data, methodology, and basis for one or more supply shortage conditions that are necessary to conduct a drought risk assessment for a drought period that lasts 5 consecutive years.	Water Supply Reliability Assessment	Section 7.3.1
x	x	Section 7.3	10635(b)(2)	Include a determination of the reliability of each source of supply under a variety of water shortage conditions.	Water Supply Reliability Assessment	Section 7.3.1
x	x	Section 7.3	10635(b)(3)	Include a comparison of the total water supply sources available to the water supplier with the total projected water use for the drought period.	Water Supply Reliability Assessment	Table 7-5

APPENDIX A – Urban Water Management Plan Act Checklist

x	x	Section 7.3	10635(b)(4)	Include considerations of the historical drought hydrology, plausible changes on projected supplies and demands under climate change conditions, anticipated regulatory changes, and other locally applicable criteria.	Water Supply Reliability Assessment	Section 7.3; Table 7-5

Water Code Section 10632 Notice of Public Hearing

and Proof of Publication

Notice of Public Hearing for Great Oaks Water Company's 2020 Urban Water Management Plan and Water Shortage Contingency Plan

In compliance with California Water Code Section 10642, Great Oaks Water Company (Great Oaks) is conducting a public hearing to receive input on its 2020 Urban Water Management Plan (UWMP) and Water Shortage Contingency Plan (WSCP). Great Oaks last updated its UWMP in 2015.

The UWMP is developed as a reliable water management action plan to be used as water supply conditions and demands change. The UWMP provides a detailed look at current and future water use and water supplies under normal and dry conditions. The WSCP identifies specific opportunities to reduce demand and augment supplies under numerous water shortage conditions.

The public hearing for Great Oaks' UWMP and WSCP will be held virtually via Zoom on June 28, 2021 at 11:00 a.m. Interested members of the public are invited to participate in the review process by providing any comments prior to, or at, the public hearing. To connect to the hearing, please use this link: https://zoom.us/j/97934385782?pwd=Vkkza0liK09jZlhXZGRKMUxLd21LZz09. The meeting ID is 979 3438 5782 and the Password is vbVhg1.

For more information about the public hearing or the 2020 UWMP and WSCP, please visit www.greatoakswater.com or contact Tim Guster at (408) 227-9540 or tguster@greatoakswater.com. The UWMP and WSCP will be posted on the Great Oaks home page for review approximately two weeks before the public hearing. Any additional information about the public hearing will also be posted on Great Oaks' website.

Great Oaks Water Company

Unanimous Consent Resolution Adopting

2020 Urban Water Management Plan

UNANIMOUS WRITTEN CONSENT OF DIRECTORS
TO CORPORATE ACTION

We, John Roeder, Adele Wilson, and Jared Ajlouny, are all members of, and together constitute, the Board of Directors of Great Oaks Water Company ("corporation"), and by this writing approve the following resolution and consent to its adoption:

Resolved, Great Oaks Water Company's 2020 Urban Water Management Plan (2020 UWMP) is approved and adopted. Timothy S. Guster, Vice President and General Counsel, is authorized to submit the 2020 UWMP according to statutory and regulatory requirements.

This consent is executed pursuant to subdivision (b) of Section 307 of the California Corporations Code and is to be filed with the minutes of Board proceedings of the corporation.
