Phase I Environmental Site Assessment Report

July 16, 2021

Ted Hart **HINES** 444 South Flower Street, Suite 2100 Los Angeles, California 90071

Re: CITADEL Project No. 5140.1099.0
Phase I Environmental Site Assessment Report
6000 Hollywood Boulevard
Los Angeles, California 90028

Dear Mr. Hart:

Enclosed please find Citadel EHS's Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for Hines, in accordance with Citadel's Proposal 5140.1099.P, dated July 8, 2021, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,

CITADEL EHS

Mark Drollinger, M.Eng., CSP, CHMM Principal, Engineering and Environmental Sciences

Citadel EHS (Citadel) was contracted by Hines (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 6000 Hollywood Boulevard, in the City of Los Angeles, Los Angeles County, California; hereinafter referred to as the "Site."

Current Site Conditions

The Site consists of one car sales showroom and parts storage structure of approximately 11,110 square feet (SF), five service bays totaling approximately 15,912 SF, one car wash canopy of approximately 2,600 SF, two canopies for service check-in booths, and asphalt-paved surface parking areas. The on-Site structures will be referred to as follows:

- > Building A: car sales showroom and parts storage structure located in the center of the Site
- > Service Bay A: service bay located west of Building A and consists of Bays 1 through 14
- Service Bay B: service bay located west of Service Bay A and along the west boundary of the Site; consists of Bays 15 through 20
- Service Bay C: service bay located south of Service Bay A and along the south boundary of the west portion of the Site; consists of Bays 21 trough 28
- > Service Bay D: service bay located east of Service Bay C and in the center portion of the Site; consists of Bays 29 through 38
- > Service Bay E: service bay located east of Service Bay D and in the center portion of the Site; consists of Bays 39 through 46
- Car Wash Canopy: canopy located east of Service Bay D and in the east portion of the Site

Access to the Site parking areas is along the north boundary of the Site on Hollywood Boulevard. At the time of the Site reconnaissance, the Site was occupied by Toyota of Hollywood as a new and used car dealership with a service center.

Stationary equipment at the Site includes seven aboveground storage tanks (ASTs); padmounted and pole-mounted transformers; 31 two-post automotive lifts; two scissor automotive lifts; seven single-post inground automotive lifts; two clarifiers; and four air compressors. The ASTs include one 1,500-gallon waste oil AST; two 1,000-gallon motor oil ASTs; two 500-gallon motor oil ASTs; and two 250-gallon motor oil ASTs. In general, the Site appeared to be moderately maintained with the exception of Service Bay D, where heavily stained concrete floors were observed by the ASTs storing motor oil. The stained concrete floors, the inground automotive lifts, and the clarifiers represent an environmental concern based on the long term occupancy of the Site as auto repair shops.

Site History

The Site will be discussed as West, Center, East, and South Parcels. Addresses associated with the West Parcel include 6026 through 6048 Hollywood Boulevard; addresses associated with the Center Parcel include 6000 through 6024 Hollywood Boulevard; addresses associated with the East Parcel include 5950 through 5962 Hollywood Boulevard; and addresses associated with the South Parcel include 6035 and 6037 Carlton Way.

West Parcel

A review of historical sources showed that the West Parcel was undeveloped as early as 1894 until at least 1907 with the development of three residences in the West Parcel. New offices, stores, and additional residences were built between 1914 and 1920. By 1919, the West Parcel was depicted with six residences, three stores, a paint shop, and a lumber storage. An auto repair shop was built between 1919 and 1922. Residences and a store in the east portion of the

5140.1099.0 Phase I ESA

West Parcel were relocated off-Site prior to the development of a new auto sales room and public garage in 1929. A new office structure was constructed in the west portion of the West Parcel in 1947. By 1950, the east portion of the West Parcel was depicted with two large structures occupied as auto sales, auto repair, and auto services; and the west portion of the West Parcel was depicted with four residences, a doctor's office, a store structure, a three-unit structure occupied as stores, and an office and storage associated with a used auto sales lot. Permits to enlarge existing clarifiers in the auto repair shop were issued in 1952 and 1954. The residences were demolished between 1960 and 1965; and the offices, stores, and auto sales room and garage were demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970.

Center Parcel

A review of historical sources showed that the Center Parcel was undeveloped as early as 1894 until at least 1907 with the development of three residences. An oil supply station was built in 1919 and a car wash structure was added in 1921. A real estate office was built in the east portion of the Center Parcel in 1922. A new oil station was bult in 1924 and relocated off-Site in 1926. A residence, a store, and an office were demolished in 1929. A new grease canopy was built in 1945. Two residences were demolished in 1947 prior to the construction of a new auto repair garage. The garage was expanded with the construction of an additional auto repair structure in 1948. A car wash rack and associated canopy were located off-Site in 1948. By 1950, the Center Parcel was depicted as a used car sales lot with an auto service shop in the southwest corner of the Center Parcel; two dwellings and two offices in the center portion of the Center Parcel; and a store in the east portion of the Center Parcel. Two residences and a garage were demolished in 1958. Service Bay D was built as a car polish and parts installation structure in 1960. A spray booth was listed at the auto service shop. The remaining residence was demolished in 1965. A new sales office was built in 1966. A store structure was demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970. A new canopy was built in the center of the Site 1982. The mezzanine for the auto parts storage was enlarged in 1985. Building A was expanded to include a waiting room and a small office in 1990.

East Parcel

A review of historical sources showed that the East Parcel was undeveloped as early as 1894 until at least 1907 with the development of a hotel in the west portion of the East Parcel. A store was built in the east portion of the East Parcel in 1921 and was converted to auto sales and service in 1925. An additional structure was added to the garage (auto service) in 1927 and a new grease rack structure was constructed in the northeast corner of the East Parcel in 1936. By 1950, the west portion of the East Parcel was depicted with Mountain View Inn; and the east portion of the East Parcel was depicted with a large structure occupied as auto sales and auto repair and a small structure as a grease shop. The current Car Wash Canopy was built as an auto service and repair structure in the southwest corner of the East Parcel in 1950. The hotel was demolished in 1952. An additional garage was built in the southwest portion of the East Parcel in 1952. The grease shop was demolished in 1954. A portion of the auto sales and auto repair structure in the east portion of the East Parcel was damaged in a fire in 1969 and was demolished by 1970. The structure built in 1952 was demolished in 1973. The structure in the southeast corner of the East Parcel was demolished in 1975.

South Parcel

A review of historical sources showed that the South Parcel was undeveloped as early as 1894 until at least 1907 with the development of a residence. A new garage was built in 1922. The residence was demolished in 1965 and replaced with the current parking lot.

Environmental Databases

The Site was identified on the Facility Index System/Facility Registry System (FINDS), the Enforcement and Compliance History Information (ECHO), and the Hazardous Waste Tracking System (HWTS) databases. FINDS contains facility information and "pointers" to other sources that contain more detail; ECHO provides integrated compliance and enforcement information; and HWTS is the Department of Toxic Substances Control's (DTSC) data repository for hazardous waste identification and manifest information. The Site was identified on these databases due to being a hazardous waste generator, chemical storage facility, aboveground petroleum storage facility, as a Risk Management Plan (RMP) Reporter, and on the Used Oil Program. The Site was identified as a RCRA Small Quantity Generator (SQG) in 1997. No violations were reported on these databases.

The Site was identified on the historical UST databases with five underground storage tanks (USTs). With the exception of one 500-gallon motor oil UST, the remaining USTs were associated with waste oil; two of which were listed as clarifiers. No further information was provided regarding the historical USTs.

Violations identified on the California Environmental Reporting System (CERS) was issued in October 2013; however, no further information was readily available for review. The Site was identified on the HAZNET database for generating the following hazardous waste:

- Halogenated solvents between 1989 and 1991
- > Hydrocarbon solvents between 1989 and 1996
- ➤ Unspecified aqueous solution in 1989 and 1990, between 2000 and 2002, and between 2006 and 2008
- > Oil/water separator sludge in 1989, 1997, 2003, and between 2009 and 2014
- > Tank bottom waste in 1990
- Unspecified solvent mixture in 1991, 1996, 1997, 2012, and 2016
- > Liquids with halogenated organic compounds in 1996
- > Aqueous solution between 1999 and 2001 and in 2010 and 2012
- Unspecified oil-containing waste in 2002
- > Other organic solids in 2002, 2006, 2007, and between 2016 and 2019
- > Waste oil and mixed oil between 2006 and 2008
- > Other inorganic solid waste in 2013 and 2014
- Unspecified organic liquid mixture in 2013 and 2016
- Oxygenated solvents in 2016

The appearance of the Site on the HAZNET database reflects proper disposal of hazardous waste. However, the long term occupancy of the Site as an auto repair shop, the historic use of USTs, and the use of solvents may represent an environmental concern.

The historic Site address 6010 Hollywood Boulevard was identified on the historical UST database with one 500-gallon motor oil UST and two 500-gallon waste oil USTs. The historic Site addresses 5950, 6010, 6022-28, and 6032 Hollywood Boulevard were identified with four listings on the current UST database with historical statuses. No further information was provided. The historic use of USTs at the Site represents an environmental concern.

Vapor Encroachment Condition

Citadel reviewed information provided by Environmental Data Resources (EDR) regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a leaking underground

storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Fire Station #82, located at 1800 North Bronson Avenue, is listed as a LUST site. According to EDR, the property is approximately 646 feet east-northeast of the Site and the diesel leak impacting soil only was discovered in November 1989 during tank testing. The case was completed and closed by the Los Angeles Fire Department (LAFD) on April 6, 2009.

Four properties were identified as within 0.125-mile and upgradient of the Site on the Historical Gas Station database. The Site was identified with two listings on the Historical Gas Station database, which represents an environmental concern. The remaining properties are not likely to have adversely affected the Site. However, the adjoining property west of the Site was identified on the UST database with a historical status. No further information was provided. According to historical sources, this property was developed as a used car sales lot with an auto repair shop by 1957. The structures were demolished by 1994 and the property has been occupied as a surface parking lot. Based on the proximity to the Site, the historic use of USTs at the adjoining property represents a vapor encroachment condition (VEC) concern.

Nine properties were identified as within 0.125-mile and upgradient of the Site on the Historical Dry Cleaners database. The following properties were identified as VEC concerns:

- Wilmar Cleaners, 6037 Hollywood Boulevard, approximately 92 feet northwest and upgradient of the Site. According to EDR, this property was occupied as a clothes cleaners, pressers, and repairers in 1929. According to the 1919 Sanborn Map, the address was associated with a two-unit commercial structure occupied as stores. By 1950, the address appeared to be associated with a machine shop further north of the Site (at the rear of the property). In addition, the property was also depicted with a photofinishing laboratory in 1919 and a film developing room in 1950. No further information was found for the cleaner occupancy. A VEC cannot be ruled out based on the potential use of solvents at the former cleaners and the historic photofinishing and film developing occupancies.
- ➤ Louis E. Benson, 6015 Hollywood Boulevard, approximately 93 feet north and upgradient of the Site. According to the reviewed city directories, this property was occupied as a clothes cleaner in 1937 and 1942; and by Marcal Hand Laundry and Cleaners in 1951. The tenant space may have been occupied by the adjoining tenant as a print shop by 1961. The structure was demolished in 1994 and replaced with a surface parking lot. A VEC cannot be ruled out based on the potential use of solvents at the former cleaners and the historic print shop occupancy.
- ➤ Movie Town Cleaners, 6051 Hollywood Boulevard, approximately 182 feet northwest and upgradient of the Site. According to EDR, this property was occupied as a Chinese laundry from 1937 to 1942 and garment pressing and cleaners' agents from 1986 to 2014. The property was also identified on the current Drycleaners database with dry cleaning equipment using tetrachloroethylene (PCE). The property is a retail shopping center and one of the units is currently occupied by Shine Cleaners, approximately 125 feet north of the Site. Citadel reviewed the South Coast Air Quality Management District's (SCAQMD) Facility Information Detail for information regarding dry cleaning equipment used at the property. Permits to operate dry cleaning equipment using PCE was issued in 1984 and 1991; a 2006 permit application was rejected. Based on the historic use of PCE and the proximity to the Site, a VEC cannot be ruled out.

5140.1099.0 Phase I ESA

Regulatory Agencies

Fire Department

The City of Los Angeles Fire Department (LAFD) has recently issued lists of active and inactive ASTs, USTs, and hazardous materials inventories (HMI) as of April 19, 2021. The Site was identified on the active HMI with the Facility ID No. FA0031646. The historical Site addresses 5950, 6010, 6022-28, and 6032 Hollywood Boulevard were identified on the list of UST historical files.

Citadel contacted the Los Angeles Fire Department for information regarding the Site in order to identify historical tenants and property use. The agency has not yet responded at the time of this report.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An historical recognized environmental condition, or HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

5140.1099.0 Phase I_ESA vi

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was identified. Citadel identified the following environmental concerns:

- The Site was developed with a gasoline station in 1919 and an auto repair shop as early as 1922. By 1950, the gasoline station did not appear to be located at the Site; however, at least three auto sales with auto repair shops were located at the Site. Additional auto repair shops were constructed in 1950s and 1960s. According to EDR, the Site was identified on the historical UST databases with five USTs; one of which was a 500-gallon motor oil UST. In addition, the historic Site addresses were identified on the UST database with historical statuses. No further information was readily available for review. It is unclear if the former USTs have been removed. The lack of information regarding the former USTs and the historic occupancy of the Site as a gasoline station and auto repair shops represent a REC.
- ➤ During the Site reconnaissance, Citadel observed heavily stained concrete floors by the ASTs storing motor oil, inground automotive lifts, and clarifiers at the Site. Based on the long term occupancy of the Site as auto repair shops and the use of halogenated and hydrocarbon solvents at the Site, the observed conditions/equipment may represent a REC.
- ➤ Citadel's review of nearby properties identified USTs, potential use of solvents, historic photofinishing and film developing occupancies, historic print shop, and known use of PCE. VEC cannot be ruled out from these four properties based on the proximity to the Site and represents a REC.

NON-ASTM SCOPE CONSIDERATIONS

The current Site building was constructed prior to bans using asbestos-containing building materials (ACBMs), lead-based paint (LBP), and polychlorinated biphenyls (PCBs) in electrical equipment came into effect in 1989, 1978, and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs, LBP, or PCBs at the Site.

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 13 tests were performed within the 90028 zip code for the presence of radon. Of these, no tests were found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

A potable well was not observed on-Site and the Site does not lie within a known or potential flood zone or wetlands.

1.0 INTRODUCTION

Citadel EHS (Citadel) was contracted by Hines (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 6000 Hollywood Boulevard, in the City of Los Angeles, Los Angeles County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is Hines.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by Hines. Citadel recognizes that this report is to be used exclusively by Hines and its successors, lenders, and assigns. It is a report upon which Hines and its successors, lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of Hines, their lenders and assigns (Client) solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-13 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- A Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- Δ Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.
- A Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- A Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.
- Δ Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.
- Δ Prepared a Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The irregular-shaped Site is located approximately 575 feet southwest of the State Route 101, locally referred to as the Hollywood Freeway. The Site is bounded by Hollywood Boulevard to the north; surface parking lot to the east; multi-family residences and Carlton Way to the south; and a restaurant, dance studio, and recording studio to the west. The general Site vicinity is occupied by residential properties and commercial properties along Hollywood Boulevard.

According to the U.S. Geological Survey (USGS) Hollywood Quadrangle (7.5 Minute Series), dated 2012, the Site is at an elevation of approximately 389 feet above mean sea level (AMSL) and appears to slope to the south. The Site is located at approximate coordinates of 34° 6' 4.45" North Latitude and 118° 19' 14.41" West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the County of Los Angeles' Assessor's Parcel Maps, the Site is comprised of three parcels legally identified as Assessor's Parcel Numbers (APNs) 5545-005-005 and -022; and 5545-006-029. The Site encompasses approximately 3.7 acres of land. The addresses associated with the APNs include the following:

- APN 5545-005-005: 5950 Hollywood Boulevard
- > APN 5545-005-022: 5962 Hollywood Boulevard
- > APN 5545-006-029: 6000 Hollywood Boulevard

The Site consists of one car sales showroom and parts storage structure of approximately 11,110 square feet (SF), five service bays totaling approximately 15,912 SF, one car wash canopy of approximately 2,600 SF, two canopies for service check-in booths, and asphalt-paved surface parking areas. The on-Site structures will be referred to as follows:

- > Building A: car sales showroom and parts storage structure located in the center of the Site
- > Service Bay A: service bay located west of Building A and consists of Bays 1 through 14

- Service Bay B: service bay located west of Service Bay A and along the west boundary of the Site; consists of Bays 15 through 20
- Service Bay C: service bay located south of Service Bay A and along the south boundary of the west portion of the Site; consists of Bays 21 trough 28
- Service Bay D: service bay located east of Service Bay C and in the center portion of the Site; consists of Bays 29 through 38
- > Service Bay E: service bay located east of Service Bay D and in the center portion of the Site; consists of Bays 39 through 46
- Car Wash Canopy: canopy located east of Service Bay D and in the east portion of the Site

Access to the Site parking areas is along the north boundary of the Site on Hollywood Boulevard. At the time of the Site reconnaissance, the Site was occupied by Toyota of Hollywood as a new and used car dealership with a service center.

Stationary equipment at the Site includes seven aboveground storage tanks (ASTs); padmounted and pole-mounted transformers; 31 two-post automotive lifts; two scissor automotive lifts; seven single-post inground automotive lifts; two clarifiers; and four air compressors. The ASTs include one 1,500-gallon waste oil AST; two 1,000-gallon motor oil ASTs; two 500-gallon motor oil ASTs; and two 250-gallon motor oil ASTs. In general, the Site appeared to be moderately maintained with the exception of Service Bay D, where heavily stained concrete floors were observed by the ASTs storing motor oil. The stained concrete floors, the inground automotive lifts, and the clarifiers represent an environmental concern based on the long term occupancy of the Site as auto repair shops.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

The immediately surrounding properties of the Site consist of the following:

Direction from Site	Address – Tenant/Use
North	5941 Hollywood Boulevard – The Salvation Army 5951 Hollywood Boulevard – Florentine Gardens, a nightclub 5959 Hollywood Boulevard – Surface parking lot 6009 Hollywood Boulevard – Surface parking lot 6021 Hollywood Boulevard – Academy LA, a nightclub 6033 Hollywood Boulevard – Museum of Death 6039 Hollywood Boulevard – Commercial structure 6043 Hollywood Boulevard – Saban Community Clinic 6051 Hollywood Boulevard – Retail shopping plaza consisting of the following tenants: Subway, Maxim Chinese Food, Shine Cleaners, Al Wazir Chicken, Sushi Ike, Domino's Pizza, Thai Massage, Tech-S.O.S. (computer repair service), Xclusive Cuts (barber shop), Al Fann Theatrical Ensemble (drama school), High Life Hair Salon, Hollywood Smokes (tobacco shop), 7 Eleven, Saima Insurance
East	5928 Hollywood Boulevard – Surface parking lot
South	5947, 5949, 6001, 6013, 6029, 6038, and 6041 Carlton Way – Multi-family residences 6047 Carlton Way – Shir-Hashirim Montessori School, a private preschool
West	6050 Hollywood Boulevard – Burger Factory, a restaurant 6060 Hollywood Boulevard – EXPG Studio LA, a dance studio 1640 North Gower Street – Bernie Grundman Mastering, a recording studio

2.4 UTILITIES

Electrical service is supplied to the Site by the Los Angeles Department of Water and Power (LADWP). General rubbish (non-hazardous) is removed from the Site on a regular basis by a contracted waste hauler.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Based upon the National American Datum (NAD) of 1983, the Site is at an elevation of approximately 389 feet AMSL.

The Site is identified on the geologic map of the Hollywood and Burbank (south half) quadrangles, Los Angeles, California (Dibblee and Ehrenspeck, 1991) as being Pleistocene aged older surficial sediments (Qae). The sediments are described as unconsolidated to weakly consolidated; and slightly elevated and dissected alluvial fan sediments. The United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey identifies the Site soils as Urban land-Palmview-Tujunga, gravelly complex. The Urban land soils are described as alluvial fans with very high runoff; the Palmview soils are described as well-drained sandy loam with very low runoff; and the Tujunga soils are described as somewhat excessively drained gravelly loamy sand with low runoff.

USGS Topographic Map	Hollywood Quadrangle
Groundwater Basin	Coastal Plain of Los Angeles Groundwater Basin
Nearest Surface Water to Site	Hollywood Reservoir, approximately 1.2 miles north-northwest of the Site
Gradient Direction (Source)	Southwest (GeoTracker/TRC Solutions, Inc., 2021)
Estimated Depth to Groundwater (Source)	51.84 to 59.89 feet below ground surface (bgs), approximately 0.2 mile southeast of the Site (GeoTracker/TRC Solutions, Inc., 2021)
Nearest Wetland to Site (Source)	Freshwater pond, approximately 0.8 mile south-southeast of the Site (National Wetlands Inventory)
Nearest 100 or 500-year Flood Zone	500-year flood zone, approximately 595 feet southwest of the Site (Federal Emergency Management Agency)

4.0 SITE RECONNAISSANCE

Citadel representative Ms. Shirley Lee conducted the Phase I ESA reconnaissance on July 14, 2021. Ms. Lee was accompanied by Mr. Danny Canteo, the General Manager of Toyota of Hollywood, and Mr. Jaime Galdamez, the Parts Manager of Toyota of Hollywood. The Site reconnaissance consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 SITE RECONNAISSANCE FINDINGS

Yes	No	Observation
Х		Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)
Х		Identified Hazardous Materials
Х		Polychlorinated Biphenyls (PCBs) – Electric or Mechanical Equipment Likely to Contain Fluids

Yes	No	Observation
Х		Radioactive Man-Made Materials
	Х	Pits, Ponds, and Lagoons
	Х	Septic Tanks and Cesspools
Х		Wells, Cisterns, Sumps, and Drains
Х		Wastewater or Grease Interceptors
	Х	Interior Stains or Corrosion
	Х	Strong, Pungent, or Noxious Odors
	Х	Pools of Liquid
Х		Stained Soil or Pavement
	Х	Stressed Vegetation
	Х	Other

The above-identified observed items are further discussed below.

ABOVEGROUND AND UNDERGROUND STORAGE TANKS

UST/AST	Capacity	Contents	Material of Construction	Secondary Containment	Registered	Location	Purpose
AST	1,500 Gallon	Waste oil	Steel	Yes	No	Service Bay D	Store used oil
AST	1,000 Gallon	Motor oil	Steel	Yes	No	Service Bay D	Store new oil for auto repair
AST	1,000 Gallon	Motor oil	Steel	Yes	No	Service Bay B	Store new oil for auto repair
AST	500 Gallon	Motor oil	Steel	Yes	No	Service Bay D	Store new oil for auto repair
AST	500 Gallon	Motor oil	Steel	Yes	No	Service Bay B	Store new oil for auto repair
AST	250 Gallon	Motor oil	Steel	Yes	No	Service Bay D	Store new oil for auto repair
AST	250 Gallon	Motor oil	Steel	Yes	No	Service Bay C	Store new oil for auto repair

No spills, staining or leaks were observed by the ASTs in Service Bays B and C; however, the concrete floor by the ASTs in Service Bay D appeared heavily stained with motor oil. Based on the long term occupancy of the Site as auto repair shops, the heavily stained floors may represent an environmental concern.

IDENTIFIED HAZARDOUS MATERIALS

Hazardous Material (size/quantity)	Location	Secondary Containment	Staining/Leaks	SDS
Carwash soap, degreasers, and tire dressing (five 55- gallon containers)	Car Wash Canopy	Yes	None identified	No
Waste antifreeze (12 55-gallon containers)	Throughout Service Bays	Yes	None identified	No
Used oil (approximately 30 25-gallon caddies)	Throughout Service Bays	No	None identified	No
Used oil and gasoline filters (eight 55-gallon containers)	Service Bay D	No	None identified	No

Hazardous Material (size/quantity)	Location	Secondary Containment	Staining/Leaks	SDS
SCAQMD Brake Cleaner (two 55-gallon containers)	Service Bay D	Yes	None identified	No
Waste gasoline and diesel (two 55-gallon containers)	Service Bay D	No	None identified	No
Parts washer on top of two 55- gallon containers	Service Bays B and E	No	None identified	No

Routine janitorial and maintenance supplies were observed in containers sized for commercial use and properly stored with no signs of staining or leaking. The hazardous materials observed are not expected to represent a significant environmental concern.

POLYCHLORINATED BIPHENYLS

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture and sale of PCB-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 16 feet (40 Code of Federal Regulations 761.30: "Fire Rule").

Component Type	Pad/Pole Mounted	Location	Owner	PCB Labels	Staining/Leaking
Transformer	Pad-mounted	Exterior, north of Service Bay B	LADWP	No	None identified
Transformers	Pole-mounted	Exterior, along the south boundary of the center portion of the Site	LADWP	No	None identified

The observed equipment appeared to be in working order with no signs of staining or leaking. The equipment observed are not expected to represent a significant environmental concern.

In addition, approximately 31 two-post automotive lifts; two scissor automotive lifts; and seven single-post inground automotive lifts. The lifts typically consist of reservoirs containing hydraulic oils. According to Mr. Galdamez, the automotive lifts are serviced on an annual basis. Based on the long term occupancy of the Site as auto repair shops, the inground lifts may represent an environmental concern.

RADIOACTIVE MAN-MADE MATERIALS

Many public and private office buildings in the United States have self-luminescent tritium exit signs that contain radioactive materials. While these do not constitute a recognized environmental condition, the exit signs must be properly identified to ensure proper handling and disposal practices.

WELLS, CISTERNS, SUMPS, AND DRAINS

Several storm drains were observed in the parking areas of the Site. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for water runoff, the presence of the drains is not expected to represent a significant environmental concern.

WASTEWATER OR GREASE INTERCEPTORS

Two clarifiers were observed at the Site. The clarifiers were located at the Car Wash Canopy and Service Bay D. According to Mr. Galdamez, the clarifiers are cleaned out on an annual basis. Based on the long term occupancy of the Site as auto repair shops, the clarifiers may represent an environmental concern.

STAINED SOIL OR PAVEMENT

Minor staining of concrete floors was observed throughout the Service Bays; however, the minor staining represents a de minimis environmental condition. The heavily stained concrete floor by the ASTs in Service Bay D represents an environmental concern.

4.2 NON-ASTM SERVICES

ASBESTOS CONTAINING MATERIALS

The EPA issued a final rule under Section 6 of Toxic Substances Control Act (TSCA) banning most asbestos-containing building materials (ACBMs) in 1989. The ban on ACBMs was vacated in 1991 allowing some building materials to continue to contain asbestos. The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities.

Building materials, coatings, and/or finishes containing asbestos may be present in any structure regardless of the date of construction. In accordance with NESHAPS and local air pollution control district regulations, all suspect materials, finishes, and coatings that will be impacted by renovation or demolition regardless of the date of construction are required to be surveyed for the presence of asbestos by State-licensed asbestos consultants.

A survey for asbestos-containing materials was not requested or conducted as part of this Phase I ESA.

LEAD-BASED/LEAD-CONTAINING PAINTS

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has greater than or equal to one milligram per square centimeter (mg/cm²) (5,000 microgram per gram (µg/g) or 5,000 parts per million (ppm)) of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². In 2009, the US Consumer Product Safety Commission (16 Code of Federal Regulations CFR 1303) banned paint containing more than 0.009% (90 ppm) lead for residential use. Buildings built before 1978 are much more likely to have LBP; however, all commercial structures regardless of the date of construction likely contain lead-based or lead-containing glazings, varnishes, stains, coatings, paints, and primers. Such materials that will be impacted by renovation, repair, or demolition should be tested beforehand and the results disclosed to trades or staff that will be doing such work. All associated waste streams should be accurately characterized for proper disposal requirements.

A survey for lead containing materials was not requested or conducted as part of this Phase I ESA.

POLYCHLORINATED BIPHENYLS

Polychlorinated biphenyls (PCBs) were an ingredient added to a variety of building materials during manufacture, most notably, but not limited to, caulking, putty, and glazing, particularly around windows, door frames, and building joints. Building materials containing PCBs were used in many buildings in the 1950s through the 1970s, and potentially before the 1950s. There are significant regulations regarding the removal of these materials during demolition and/or renovation, both from an environmental protection standpoint as well as an occupational health and safety standpoint. In addition, under the Toxic Substances Control Act (TSCA), building materials that contain PCBs at or above 50 ppm are considered an "unauthorized use" of PCBs, and removal can be compelled under TSCA. The presence of PCBs may have the potential to impact a property's future land use. Based on the construction date for the Site building, building materials containing PCBs may have been used in the construction of the Site building.

A survey for PCBs is beyond the required scope of ASTM E1527-13 and was not specifically requested or conducted as part of this Phase I ESA.

DRINKING WATER

The Site is supplied with municipal drinking water by the LADWP. An assessment of lead in drinking water was not requested or conducted as part of this Phase I ESA.

RADON

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 13 tests were performed within the 90028 zip code for the presence of radon. Of these, no tests were found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

METHANE

In March 2004, Ordinance Number 175790 was adopted into the Los Angeles Municipal Code (Section 91.106.4.1 and Division 71, Chapter IX) to establish citywide methane mitigation requirements, and included updated construction standards to control methane intrusion into buildings. This ordinance established defined geographic areas as Methane Zones and Methane Buffer Zones, which relate to specific assessment and mitigation requirements per area, and set forth a standard of assessment and mitigation in the planning stages of all new construction in these areas.

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Data Resources Inc. (EDR). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1928	 The Site appears developed with the following: Approximately eight residences throughout the Site A large commercial structure in the west portion of the Site Two commercial structures (one of which was a hotel) in the east portion of the Site 	North: Hollywood Boulevard appears developed, with commercial structures developed beyond East: Several residences appear developed South: Carlton Way and residences appear developed West: Small structures, likely residences, appear developed
1938	The Site appears relatively unchanged with the exception of the following: A small commercial structure appears developed in the northwest portion of the Site Several residences in the center portion of the Site appears replaced with a commercial structure and surface parking areas	North: Additional commercial structures appear developed East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged

Dates(s)	Site Description	Surrounding Area Descriptions
1948	The Site appears relatively unchanged with the exception of the development of an L-shaped building in the center portion of the Site	North: Additional commercial structures appear developed East: An additional commercial structure appears developed South: Relatively unchanged West: Several of the previously identified residences appear to have been demolished
1952	The Site appears relatively unchanged with the exception of the following: The previously identified hotel appears to have been demolished The current Car Wash Canopy appears developed	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Several of the previously identified residences appear to have been demolished
1954	The Site appears relatively unchanged with the exception of the following: A small commercial structure appears developed in the center portion of the Site A small commercial structure appears developed in the east portion of the Site	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
1964	The Site appears relatively unchanged with the exception of the following: The small structures in the center of the Site appears to have been demolished and replaced with surface parking areas Service Bay D appears developed	North: Relatively unchanged East: The previously identified structures appears to have been demolished and replaced with a surface parking lot South: Relatively unchanged with the exception that several residences appear to have been replaced with larger multi-family residences West: One of the current commercial structures appear developed
1977, 1979, 1981	The majority of the Site structures appear to have been demolished and replaced with the current Building A; Service Bays A, B, C, and E; the residence in the south portion of the Site appears to have been demolished	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Several structures appear to have been demolished and replaced with surface parking lots
1989, 1994	Relatively unchanged	North: One of the commercial structures appear to have been demolished East: Relatively unchanged South: Relatively unchanged West: Additional current commercial structures appear developed
2002, 2005, 2009, 2012, 2016	Relatively unchanged with the exception that a structure in the east portion of the Site appears to have been demolished	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged

Copies of the Aerial Photographs provided by EDR can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. In addition, Citadel reviewed building permits with the City of Los Angeles Building Department. The Site will be discussed as West, Center, East, and South Parcels:

Portion of Site	Associated Addresses	Description
West Parcel	6026, 6028, 6032, 6034, 6038, 6040, 6042, 6044, 6046, and 6048 Hollywood Boulevard	Permits reviewed indicated that a new office structure was built in the west portion of the West Parcel in 1914. Approximately five residences were built in the west or center portions of the Site between 1915 and 1919. A new store structure and an office structure were constructed in the center and west portions of the West Parcel, respectively, in 1920. A portion of the store was occupied as an art studio in 1921. The east portion of the West Parcel was developed with an auto repair shop prior to 1922. Residences and a store in the east portion of the West Parcel were relocated off-Site prior to the development of a new auto sales room and public garage in 1929. A new office structure was constructed in the west portion of the West Parcel in 1947. A car wash rack and associated canopy were located off-Site in 1948. A new garage and storage structure was built in 1950. One of the residences was demolished in 1951. Permits to enlarge existing clarifiers in the auto repair shop were issued in 1952 and 1954. The residences were demolished between 1960 and 1965; and the offices, stores, and auto sales room and garage were demolished in 1970.
Center Parcel	6000, 6004, 6010, 6012, 6016, 6022, and 6024 Hollywood Boulevard	Permits reviewed indicated that a residence was located in the Center Parcel prior to the construction of an oil supply station in 1919. A car wash structure was added in 1921. A real estate office was built in the east portion of the Center Parcel in 1922. A new oil station was bult in 1924 and relocated off-Site in 1926. A residence, a store, and an office were demolished in 1929. A new office and lunch stand was built in 1930. A new grease canopy was built in 1945. Two residences were demolished in 1947 prior to the construction of a new auto repair garage. The garage was expanded with the construction of an additional auto repair structure in 1948. An office used for the used car sales lot was relocated off-Site in 1950; an office was then relocated on-Site. Two residences and a garage were demolished in 1958. A new structure for car polish and parts installation (likely Service Bay D) was built in 1960. The remaining residence was demolished in 1965. A new sales office was built in 1966. A store structure was demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970. A new canopy was built in the center of the Site 1982. The mezzanine for the auto parts storage was enlarged in 1985. Building A was expanded to include a waiting room and a small office in 1990.

Portion of Site	Associated Addresses	Description
East Parcel	5950, 5960, and 5962 Hollywood Boulevard	Permits reviewed indicated that a public market (store) was constructed in the east portion of the East Parcel in 1921 and converted to auto sales and service in 1925. An additional structure was added to the garage (auto service) in 1927 and a new grease rack structure was constructed in the northeast corner of the East Parcel in 1936. The current Car Wash Canopy was built as an auto service and repair structure in the southwest corner of the East Parcel in 1950. The hotel that was built prior to 1907 in the northwest portion of the East Parcel was demolished in 1952. An additional garage was built in the southwest portion of the East Parcel in 1952. A structure occupied as a store display was demolished in 1954. The structure built in 1952 was demolished in 1973. The structure in the southeast corner of the East Parcel was demolished in 1995.
South Parcel	6035 and 6037 Carlton Way	Permits reviewed indicated that a single-family residence was located in the South Parcel prior to the construction of a new garage in 1922. The residence was demolished in 1965 and replaced with the current parking lot.

A copy of the EDR Building Permit Report is included as Appendix D.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site.

Dates(s)	Site Description	Surrounding Area Descriptions
1907	The Site is depicted with the following: Mountain View Inn adjoined by an alley named Brokaw Place in the east portion of the Site (620 East Prospect Avenue) Seven dwellings and three sheds (510, 540, 546, 556 East Prospect Avenue and 527 Carlton Way)	North: East Prospect Avenue; with dwellings beyond East: Dwellings South: Dwellings and Carlton Way West: Dwellings and two structures occupied for photography and photography storage
1913	Relatively unchanged with the exception of the change of addresses associated with the Site: 5956, 6004, 6012, 6024, and 6048 Hollywood Boulevard and 6037 Carlton Way	North: East Prospect Avenue is now shown as Hollywood Boulevard; additional dwellings and an apartment are shown East: Relatively unchanged South: Additional dwellings are shown West: The previously identified photography occupancy is now shown as a dwelling

Dates(s)	Site Description	Surrounding Area Descriptions
1919	Additional structures depicted at the Site include: Two stores, a paint shop, and two dwellings in the west portion of the Site (6040, 6042, and 6044 Hollywood Boulevard) One store and one dwelling in the center portion of the Site (6026 Hollywood Boulevard) Additional addresses associated with the Site include 6000 Hollywood Boulevard and 6035 Carlton Way	North: Several previously identified dwellings are no longer shown; two stores and a structure occupied for photography and photo finishing is shown East: One of the previously identified dwellings is now occupied as flats; additional dwellings are shown South: Additional dwellings and flats are shown West: A store is depicted in the southeast corner of Hollywood Boulevard and Gower Street
1950	Several of the previously identified dwellings and paint shop are no longer shown; additional structures depicted at the Site include: > Used auto sales, office, storage, store, dwelling, doctor's office, and auto repair and service shops in the west portion of the Site (6028, 6032, 6038, and 6048 Hollywood Boulevard) > Auto service, used car sales lot, offices, and a store in the center portion of the Site (6000, 6016 and 6024 Hollywood Boulevard) > Auto sales, repair, and grease shop in the east portion of the Site (5948 and 5950 Hollywood Boulevard)	North: Remaining dwellings are no longer shown and the previously identified photography occupancy is now shown as a film developing and projecting room; additional structures depicted include stores, restaurants, machine shop, used car sales lot, movie theatre, clinic, day nursery, and a dance hall East: A multi-unit commercial structure occupied as stores, restaurant, and a paint shop is shown South: Additional dwellings and flats are shown West: The previously identified dwellings are no longer shown; two stores, a structure occupied for color film duplicating, an office, and a restaurant are depicted
1955	Relatively unchanged with the exception that the previously identified Mountain View Inn in the east portion of the Site is replaced with additional auto repair and grease shops; additional addresses associated with the Site include 6052 Hollywood Boulevard	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: The previously identified color film duplicating occupancy is shown as vacant; one of the previously identified stores is no longer shown; an additional store is replaced with a store structure occupied as a print shop
1957	Relatively unchanged with the exception of the following: The previously identified doctor's office in the west portion of the Site is now occupied as apartment One of the stores in the west portion of the Site is occupied as upholstery	North: A vacant structure is now occupied as a sound stage; a previously identified store is now occupied as a paint shop; and the previously identified dance hall is now occupied as a labor union headquarters East: The previously identified structures are no longer shown; the property is depicted as an used auto sales lot with an office and auto repair shop with a spray paint booth South: Relatively unchanged West: The vacant structure is now occupied as a church room

Dates(s)	Site Description	Surrounding Area Descriptions
1960	Relatively unchanged with the exception of the following: Previously identified storage and apartment structures in the west potion of the Site are no longer shown The remaining dwellings in the center portion of the Site are no longer shown; an office associated with the auto service shop is shown A spray booth is listed at the auto service shop in the center of the Site	North: The previously identified paint shop is now shown as a store; a previously identified store is shown as a print shop; and an additional office structure is depicted East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
1961	Relatively unchanged with the exception of the addition of an auto repair shop in the center portion of the Site and that the previously identified upholstery is now shown as a store	North: Relatively unchanged with the exception that one of the previously identified stores is occupied as a print shop East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
1962	Relatively unchanged	North: Relatively unchanged East: Relatively unchanged South: Several of the dwellings are no longer shown West: The previously identified church room is no longer shown
1966	Relatively unchanged with the exception of the following: The previously identified dwellings and used auto sales occupancy are no longer shown in the west portion of the Site The previously identified dwelling in the south portion of the Site is no longer shown; the south portion of the Site is shown as a parking lot	North: Relatively unchanged with the exception that the previously identified labor union headquarters is now occupied as offices East: Relatively unchanged South: Two apartments are shown West: The previously identified structures are no longer shown; the current office structure is shown
1968	Relatively unchanged	North: The previously identified film developing structure, machine shop, and sound stage are replaced with the current structure occupied as a store and a recording studio East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged
1969	One of the auto repair shops in the center portion of the Site is no longer shown; the auto sales in the east portion of the Site is shown as damaged by fire	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged

Dates(s)	Site Description	Surrounding Area Descriptions
1970	The previously identified structure that was damaged by fire is no longer shown; the auto repair shop in the east portion of the Site is shown as vacant	North: Relatively unchanged East: Relatively unchanged South: Relatively unchanged West: Relatively unchanged

A copy of the EDR Sanborn Map Report is included as Appendix E.

5.4 CITY PARCEL PROFILE REPORT

Citadel reviewed the on-line parcel profile report from the City of Los Angeles interactive database, NavigateLA. Alias addresses identified for the Site include:

- > 5950, 5960, 5962, 6000, 6004, 6010, 6016, 6020, 6024, 6030, 6038, 6044, and 6048 West Hollywood Boulevard
- 6037 West Carlton Way

5.5 HISTORICAL CITY DIRECTORIES

City directories were researched by EDR in order to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched city directory listings from 1920 through 2014 (non-inclusive) and provided their search results to Citadel for review. The following table summarizes information provided by the city directory search.

Dates(s)	Occupant Listed		
6000 HOLLYWOOD BOULEVARD – CURRENT SITE ADDRESS			
1937	Warren Gordon Used Cars, Used Car Department		
1942	Used Car Department		
1951	Hollywood Lincoln Mercury Used Car Department		
1965	Hollywood Ford Motors Inc.		
1981	Hollywood Lincoln Mercury Inc., Hollywood Liquor Store		
1981, 1990, 1991, 1994, 1995, 1999, 2000, 2004, 2006	Hollywood Lincoln Mercury, Hollywood Toyota Lincoln Mercury, Lincoln-Mercury Sales and Service, Toyota Sales and Service Authorized Dealers		
2009, 2014	Toyota of Hollywood		
5950 HOLLYWOOD	BOULEVARD – HISTORIC SITE ADDRESS		
1924	Residences or store

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

No prior reports or relevant documentation was provided to Citadel. No reports are included in Appendix G.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. Below are brief descriptions of observations made from the topographic maps of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1894, 1896, 1898, 1900, 1902	Undeveloped land	North: Hollywood Boulevard and railway tracks East: A small structure, likely a residence, appears developed South: Undeveloped land West: A small structure, likely a residence, appears developed; Gower Street appears developed further west
1920, 1921	The Site appears densely developed along the north boundary of the Site	North: Properties north of the Site appear densely developed with small structures; railway tracks are no longer shown East: Additional small structures appear developed South: Properties south of the Site appear densely developed along Carlton Way West: Properties west of the Site appear densely developed along Hollywood Boulevard and Carlton Way

JULY 16, 2021

Dates(s)	Site Description	Surrounding Area Descriptions
1926	The Site appears developed with small structures along the north and south boundaries of the Site	North: Several small structures appear developed East: A commercial structure appears developed South: Single and multi-family residences appear developed West: Several small structures appear developed
1948, 1953, 1966, 1972, 1981, 1991	Shading indicative of urban development	North: Shading indicative of urban development East: Shading indicative of urban development South: Shading indicative of urban development development West: Shading indicative of urban development
2012	Structures not depicted on this map	Structures not depicted on this map

Copies of the historical topographic maps provided by EDR are included as Appendix H.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Geological Energy Management Division (CalGEM) Online Mapping System (COMS) shows that there is an oil well approximately 0.4 mile southwest of the Site. The oil well is identified by API 0403720765. According to COMS, the well operator for the well is listed as Chevron USA Inc. and the status for the well is inactive and plugged. The well was drilled to a depth of 4,724 feet in May 1969 and was abandoned in March 1970.

5.9 INTERVIEWS

Citadel interviewed Mr. Danny Canteo, the General Manager of Toyota of Hollywood, and Mr. Jaime Galdamez, the Parts Manager of Toyota of Hollywood, during the Site reconnaissance. Mr. Canteo and Mr. Galdamez was not aware of any historic or current environmental concerns or hazards at the Site. Citadel also submitted a User Questionnaire to Hines. The completed User Questionnaire was not provided to Citadel at the time of this report. A copy of Citadel's User Questionnaire can be found in Appendix I.

5.10 ENVIRONMENTAL LIEN

Citadel contracted with EDR to perform an Environmental Lien Search for the Site. The Environmental Lien Search report reviewed did not identify any current environmental liens or other activity and use limitations (AUL) for the Site. The following deeds were included in the report:

- The deed, dated September 12, 2018, granted the title for APNs 5545-005-005 and -022 from Hollywood Motor Properties, LLC to 6000 Hollywood Boulevard Associates, LLC.
- The deed, dated June 1, 2018, granted the title for APN 5545-006-029 from Hollywood Motor Properties, LLC to 6000 Hollywood Boulevard Associates, LLC.

A copy of the environmental lien and AUL search can be found in Appendix J.

5.11 SUMMARY OF SITE HISTORY

The Site will be discussed as West, Center, East, and South Parcels. Addresses associated with the West Parcel include 6026 through 6048 Hollywood Boulevard; addresses associated with the Center Parcel include 6000 through 6024 Hollywood Boulevard; addresses associated with the East Parcel include 5950 through 5962 Hollywood Boulevard; and addresses associated with the South Parcel include 6035 and 6037 Carlton Way.

West Parcel

A review of historical sources showed that the West Parcel was undeveloped as early as 1894 until at least 1907 with the development of three residences in the West Parcel. New offices, stores, and additional residences were built between 1914 and 1920. By 1919, the West Parcel was depicted with six residences, three stores, a paint shop, and a lumber storage. An auto repair shop was built between 1919 and 1922. Residences and a store in the east portion of the West Parcel were relocated off-Site prior to the development of a new auto sales room and public garage in 1929. A new office structure was constructed in the west portion of the West Parcel in 1947. By 1950, the east portion of the West Parcel was depicted with two large structures occupied as auto sales, auto repair, and auto services; and the west portion of the West Parcel was depicted with four residences, a doctor's office, a store structure, a three-unit structure occupied as stores, and an office and storage associated with a used auto sales lot. Permits to enlarge existing clarifiers in the auto repair shop were issued in 1952 and 1954. The residences were demolished between 1960 and 1965; and the offices, stores, and auto sales room and garage were demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970.

Center Parcel

A review of historical sources showed that the Center Parcel was undeveloped as early as 1894 until at least 1907 with the development of three residences. An oil supply station was built in 1919 and a car wash structure was added in 1921. A real estate office was built in the east portion of the Center Parcel in 1922. A new oil station was bult in 1924 and relocated off-Site in 1926. A residence, a store, and an office were demolished in 1929. A new grease canopy was built in 1945. Two residences were demolished in 1947 prior to the construction of a new auto repair garage. The garage was expanded with the construction of an additional auto repair structure in 1948. A car wash rack and associated canopy were located off-Site in 1948. By 1950, the Center Parcel was depicted as a used car sales lot with an auto service shop in the southwest corner of the Center Parcel; two dwellings and two offices in the center portion of the Center Parcel; and a store in the east portion of the Center Parcel. Two residences and a garage were demolished in 1958. Service Bay D was built as a car polish and parts installation structure in 1960. A spray booth was listed at the auto service shop. The remaining residence was demolished in 1965. A new sales office was built in 1966. A store structure was demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970. A new canopy was built in the center of the Site 1982. The mezzanine for the auto parts storage was enlarged in 1985. Building A was expanded to include a waiting room and a small office in 1990.

East Parcel

A review of historical sources showed that the East Parcel was undeveloped as early as 1894 until at least 1907 with the development of a hotel in the west portion of the East Parcel. A store was built in the east portion of the East Parcel in 1921 and was converted to auto sales and

service in 1925. An additional structure was added to the garage (auto service) in 1927 and a new grease rack structure was constructed in the northeast corner of the East Parcel in 1936. By 1950, the west portion of the East Parcel was depicted with Mountain View Inn; and the east portion of the East Parcel was depicted with a large structure occupied as auto sales and auto repair and a small structure as a grease shop. The current Car Wash Canopy was built as an auto service and repair structure in the southwest corner of the East Parcel in 1950. The hotel was demolished in 1952. An additional garage was built in the southwest portion of the East Parcel in 1952. The grease shop was demolished in 1954. A portion of the auto sales and auto repair structure in the east portion of the East Parcel was damaged in a fire in 1969 and was demolished by 1970. The structure built in 1952 was demolished in 1973. The structure in the southeast corner of the East Parcel was demolished in 1995.

South Parcel

A review of historical sources showed that the South Parcel was undeveloped as early as 1894 until at least 1907 with the development of a residence. A new garage was built in 1922. The residence was demolished in 1965 and replaced with the current parking lot.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford, Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into five columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; the fourth column lists the number of listings identified on the database within the specified distance of the Site; and the fifth column indicates if the sites identified are potential environmental concerns to the Site.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
National Priorities List	1 mile	No	0	
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	0	
Delisted National Priorities List	1 mile	No	0	
CERCLIS Sites	½ mile	No	0	

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0	
RCRA Non-Corrective Action TSD Facilities	½ mile	No	0	
State/Tribal Voluntary Cleanup Sites	½ mile	No	0	
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	18	No
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	21	No
Historic CORTESE List	½ mile	No	7	No
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0	
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0	
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0	
RCRA Large Quantity Generators	¹⁄₄ mile	No	3	No
RCRA Small Quantity Generators	¹⁄₄ mile	Yes	13	See discussion below
RCRA Non Generators	⅓ mile	No	18	No
State/Tribal Registered Storage Tank Sites	¹⁄₄ mile	Yes	38	See discussion below
HIST UST	⅓ mile	Yes	14	See discussion below
CA FID UST	¹⁄₄ mile	Yes	15	See discussion below
SWEEPS UST	⅓ mile	Yes	18	See discussion below
Facility Index System (FINDS)	Site	Yes	2	See discussion below
HAZNET	Site	Yes	4	See discussion below
Orphan	N/A	No	2	No

A brief discussion of select facilities and their database listings are included following the table. The full report provided by EDR and reviewed by Citadel can be found in Appendix K.

Site Name	The Rite Touch, Wessman Toyota Pontiac Inc., Hollywood Toyota/Lincoln-Mercury, Toyota Lincoln Mercury of Hollywood, Coral Blue Inc., Hollywood Toyota Lincoln Mercury, Toyota Lincoln Mercury of Hollywood, Hollywood Motor Cars LLC
Database(s)	HAZNET, HWTS, HIST UST, CA FID UST, AST, SWEEPS UST, FINDS, CERS HAZ WASTE, CERS TANKS, HAZMAT, CERS, RCRA-SQG, ECHO
Address	6000 Hollywood Boulevard
Distance/Direction	Target Property
Comments	The Site was identified on the Facility Index System/Facility Registry System (FINDS), the Enforcement and Compliance History Information (ECHO), and the Hazardous Waste Tracking System (HWTS) databases. FINDS contains facility information and "pointers" to other sources that contain more detail; ECHO provides integrated compliance and enforcement information; and HWTS is the Department of Toxic Substances Control's (DTSC) data repository for hazardous waste identification and

manifest information. The Site was identified on these databases due to being a hazardous waste generator, chemical storage facility, aboveground petroleum storage facility, as a Risk Management Plan (RMP) Reporter, and on the Used Oil Program. The Site was identified as a RCRA Small Quantity Generator (SQG) in 1997. No violations were reported on these databases.

The Site was identified on the historical UST databases with five USTs. With the exception of one 500-gallon motor oil UST, the remaining USTs were associated with waste oil; two of which were listed as clarifiers. No further information was provided regarding the historical USTs.

Violations identified on the California Environmental Reporting System (CERS) was issued in October 2013; however, no further information was readily available for review. The Site was identified on the HAZNET database for generating the following hazardous waste:

- Halogenated solvents between 1989 and 1991
- Hydrocarbon solvents between 1989 and 1996
- Unspecified aqueous solution in 1989 and 1990, between 2000 and 2002, and between 2006 and 2008
- Oil/water separator sludge in 1989, 1997, 2003, and between 2009 and 2014
- Tank bottom waste in 1990
- Unspecified solvent mixture in 1991, 1996, 1997, 2012, and 2016
- > Liquids with halogenated organic compounds in 1996
- Aqueous solution between 1999 and 2001 and in 2010 and 2012
- Unspecified oil-containing waste in 2002
- > Other organic solids in 2002, 2006, 2007, and between 2016 and 2019
- Waste oil and mixed oil between 2006 and 2008
- Other inorganic solid waste in 2013 and 2014
- Unspecified organic liquid mixture in 2013 and 2016
- Oxygenated solvents in 2016

The appearance of the Site on the HAZNET database reflects proper disposal of hazardous waste. However, the long term occupancy of the Site as an auto repair shop, the historic use of USTs, and the use of solvents may represent an environmental concern.

Site Name	Hollywood LM
Database(s)	HIST UST
Address	6010 Hollywood Boulevard
Distance/Direction	Target Property
Comments	The Site was identified on the historical UST database with one 500-gallon motor oil UST and two 500-gallon waste oil USTs. No further information was provided. The historic use of USTs at the Site represents an environmental concern.

Site Name	Not listed
Database(s)	UST
Address	5950, 6010, 6022-28, and 6032 Hollywood Boulevard
Distance/Direction	Target Property
Comments	The Site was identified with four listings on the current UST database with historical statuses. No further information was provided. The historic use of USTs at the Site

	represents an environmental concern.
Site Name	Not listed
Database(s)	UST
Address	5928 Hollywood Boulevard
Distance/Direction	Adjoining Property east of the Site
Comments	The adjoining property west of the Site was identified on the current UST database with a historical status. No further information was provided. According to historical sources, this property was developed as a used car sales lot with an auto repair shop by 1957. The structures were demolished by 1994 and the property has been occupied as a surface parking lot. Based on the proximity to the Site, the historic use of USTs at the adjoining property represents a vapor encroachment condition (VEC) concern.

represents an environmental concern

Maps showing the location of these facilities and additional information are provided in the Government Records Report in Appendix K.

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Fire Station #82, located at 1800 North Bronson Avenue, is listed as a LUST site. According to EDR, the property is approximately 646 feet east-northeast of the Site and the diesel leak impacting soil only was discovered in November 1989 during tank testing. The case was completed and closed by the Los Angeles Fire Department (LAFD) on April 6, 2009.

EDR also provided the following listings on the Historical Gas Station and Dry Cleaners databases as within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

Historical Gas Stations		
Site Name	JA Moninger	
Address	6016 Hollywood Boulevard	
Distance/Direction	Target Property	
Comments	According to EDR, this property was occupied as an automobile repair shop in 1924 and gasoline and oil service station in 1929 and 1933. The historical occupancy of the Site as a gasoline and oil service station represents an environmental concern.	
Site Name	CL Brown	
Address	6028 Hollywood Boulevard	
Distance/Direction	Target Property	
Comments	According to EDR, this property was occupied as an automobile repair and service station in 1929. The historical occupancy of the Site as a gasoline and oil service station represents an environmental concern.	
Site Name	Bushesy JS System, Hagy Hiller	
Address	6101, 6103, and 6111 Hollywood Boulevard	
Distance/Direction	239 feet west-northwest and cross-gradient of the Site	
Comments	According to EDR, this property was occupied as an automobile repair shop from 1929 to 1942 and 1978; and a gasoline and oil service station in 1937 and 1942.	

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA JULY 16, 2021

Historical Gas Stations			
	According to the 1950 Sanborn Map, this property was occupied as an oil and gasoline station with auto repair and service shops. The gasoline station canopy was demolished by 1989 and the property has been occupied as a surface parking lot for an adjoining Pep Boys (auto parts store). Based on the cross-gradient location and distance from the Site, this listing is not likely to have adversely affected the Site.		

Historical Dry Cleaners			
Site Name	Wilmar Cleaners Dyers		
Address	6065 Hollywood Boulevard		
Distance/Direction	85 feet west-northwest and cross-gradient of the Site		
Comments	According to EDR, this property was occupied as a clothes cleaners, pressers, and dyers in 1924. The address was associated with a multi-tenant commercial structure, which was demolished prior to the development of a gasoline station in 1971. The gasoline station was demolished and the USTs were removed in 1981. The property is currently occupied by a retail shopping center built in 1983. Based on the redevelopment of the property in 1971 and 1981, this listing is not likely to have adversely affected the Site.		
Site Name	Wilmar Cleaners		
Address	6037 Hollywood Boulevard		
Distance/Direction	92 feet northwest and upgradient of the Site		
Comments	According to EDR, this property was occupied as a clothes cleaners, pressers, and repairers in 1929. According to the 1919 Sanborn Map, the address was associated with a two-unit commercial structure occupied as stores. By 1950, the address appeared to be associated with a machine shop further north of the Site (at the rear of the property). In addition, the property was also depicted with a photofinishing laboratory in 1919 and a film developing room in 1950. No further information was found for the cleaner occupancy. A VEC cannot be ruled out based on the potential use of solvents at the former cleaners and the historic photofinishing and film developing occupancies.		
Site Name	Louis E. Benson		
Address	6015 Hollywood Boulevard		
Distance/Direction	93 feet north and upgradient of the Site		
Comments	According to EDR, this property was occupied as a clothes pressers and cleaners in 1937. According to the reviewed city directories, this property was occupied as a clothes cleaner in 1937 and 1942; and by Marcal Hand Laundry and Cleaners in 1951. The tenant space may have been occupied by the adjoining tenant as a print shop by 1961. The structure was demolished in 1994 and replaced with a surface parking lot. A VEC cannot be ruled out based on the potential use of solvents at the former cleaners and the historic print shop occupancy.		
Site Name	Harry Glasser		
Address	6009 Hollywood Boulevard		
Distance/Direction	109 feet north and upgradient of the Site		
Comments	According to EDR, this property was occupied as a clothes cleaners, pressers, and repairers in 1929. According to reviewed building permits, this property was developed with an office structure in 1922. The occupancy identified in the 1937 permit indicated the use of the structure as an office. City directory listings		

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA JULY 16, 2021

JULY 16, 2021				
Historical Dry Cleaners				
	reviewed indicated that the property was occupied as offices for sales and real estate from 1933 to 1951. The structure was demolished by 1970. Based on the use of the property as offices and that dry cleaning solvents not likely used at this property, this listing is not likely to have adversely affected the Site.			
Site Name	Movie Town Cleaners, Tommy Kay			
Address	6051 Hollywood Boulevard, Suite 103			
Distance/Direction	182 feet northwest and upgradient of the Site			
Comments	According to EDR, this property was occupied as a Chinese laundry from 1937 to 1942 and garment pressing and cleaners' agents from 1986 to 2014. The property was also identified on the current Drycleaners database with dry cleaning equipment using tetrachloroethylene (PCE). The property is a retail shopping center and one of the units is currently occupied by Shine Cleaners, approximately 125 feet north of the Site. Citadel reviewed the South Coast Air Quality Management District's (SCAQMD) Facility Information Detail for information regarding dry cleaning equipment used at the property. Permits to operate dry cleaning equipment using PCE was issued in 1984 and 1991; a 2006 permit application was rejected. Based on the historic use of PCE and the proximity to the Site, a VEC cannot be ruled out.			
Site Name	Gordon Baker			
Address	5912 Hollywood Boulevard			
Distance/Direction	229 feet east and upgradient of the Site			
Comments	According to EDR, this property was occupied as a clothes cleaners, pressers, and repairers in 1929. No further information regarding the cleaners was found. This property appeared to be developed with the current multi-family residence by 1952. Based on the distance from the Site and that dry cleaning solvents were not likely used at this property, this listing is not likely to have adversely affected the Site.			
Site Name	Iris Cleaners and Dyers			
Address	5902 Hollywood Boulevard			
Distance/Direction	272 feet east and upgradient of the Site			
Comments	According to EDR, this property was occupied as a clothes pressers and cleaners in 1933. No further information regarding the cleaners was found. The property was recently developed in 2003. Based on the redevelopment of the property and the distance from the Site, this listing is not likely to have adversely affected the Site.			
Site Name	Emil Guggenheim			
Address	5913 Hollywood Boulevard			
Distance/Direction	276 feet east-northeast and upgradient of the Site			
Comments	According to EDR, this property was occupied as a clothes cleaners, pressers, and dyers in 1924. No further information regarding the cleaners was found. The structure was demolished by 1989 and the property has been occupied as a surface parking lot. Based on the distance from the Site, this listing is not likely to have adversely affected the Site.			

Additional properties on the Historical Gas Stations and Dry Cleaners databases are located greater than 533 feet east and 579 feet east from the Site, respectively. Additional information on these properties can be reviewed in the vapor encroachment screen provided by EDR, which is included as Appendix L.

6.3 REGULATORY AGENCIES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the Site.

BUILDING DEPARTMENT

Citadel contacted the City of Los Angeles Building Department for information regarding the Site in order to identify historical tenants and property use. Please see Section 5.2 for further discussion.

FIRE DEPARTMENT

The City of Los Angeles Fire Department (LAFD) has recently issued lists of active and inactive ASTs, USTs, and hazardous materials inventories (HMI) as of April 19, 2021. The Site was identified on the active HMI with the Facility ID No. FA0031646. The historical Site addresses 5950, 6010, 6022-28, and 6032 Hollywood Boulevard were identified on the list of UST historical files.

Citadel contacted the Los Angeles Fire Department for information regarding the Site in order to identify historical tenants and property use. The agency has not yet responded at the time of this report.

CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

The California EPA (CaIEPA) Regulated Site Portal combines data of environmentally regulated sites and facilities in California into a single, searchable database. The portal provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. Citadel reviewed the Site Portal Profile for the Site. The Site was identified in the database for the following regulatory programs:

- Aboveground Petroleum Storage
- Chemical Storage Facilities
- Hazardous Waste Generator

Chemicals reported at the Site in February 2021 included waste motor oil; waste gasoline/diesel; waste ethylene glycol; solids containing paraffinic petroleum distillates; paraffinic petroleum distillates; oxygen; ethylene glycol; brake and parts cleaner; and acetylene. A violation was identified in 2013; however, no violations have been identified since 2016.

AIR QUALITY MANAGEMENT DISTRICT

Citadel reviewed information available on-line through the South Coast Air Quality Management District's Facility Information Detail (FIND) database. The Site was identified on the database for the following:

- > Toyota Scion of Hollywood (Facility ID No. 167733)
 - No equipment listed

No facilities associated with the historical Site addresses were identified on the database.

REGIONAL WATER QUALITY CONTROL BOARD

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. According to GeoTracker, Mobil Station/Circle K Store, located at 5857 West Sunset Boulevard, approximately 0.2 mile southeast of the Site, is listed as the nearest LUST Cleanup Site. According to information provided by GeoTracker, the case for a gasoline leak opened in November 1998. Remedial actions have included a soil vapor extraction (SVE) operating between 2006 and 2013; pump and treat groundwater between 2007 and 2013; excavation of the waste oil UST in 2008; free product removal between 2014 and 2020; and excavation of dispensers in 2017. The case status is currently open and in remediation as of March 27, 2008. Based on the Semi-Annual Status Report for the Second Half of 2020, the contaminated groundwater plumes appear to be delineated and are unlikely to represent a significant environmental concern to the Site.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities. A request has been sent to the LAFD. At the time of this report, the LAFD has not yet responded.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation and the Phase I ESA was performed in compliance with the all appropriate inquiry, published in 40 CFR 312.

8.0 FINDINGS

Citadel was contracted by Hines (Client) to perform a Phase I ESA of the property located at 6000 Hollywood Boulevard, in the City of Los Angeles, Los Angeles County, California; hereinafter referred to as the "Site."

<u>Current Site Conditions</u>

The Site consists of one car sales showroom and parts storage structure of approximately 11,110 SF, five service bays totaling approximately 15,912 SF, one car wash canopy of approximately 2,600 SF, two canopies for service check-in booths, and asphalt-paved surface parking areas. The on-Site structures will be referred to as follows:

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA IIIIY 16 2021

- > Building A: car sales showroom and parts storage structure located in the center of the Site
- Service Bay A: service bay located west of Building A and consists of Bays 1 through 14
- Service Bay B: service bay located west of Service Bay A and along the west boundary of the Site; consists of Bays 15 through 20
- Service Bay C: service bay located south of Service Bay A and along the south boundary of the west portion of the Site; consists of Bays 21 trough 28
- Service Bay D: service bay located east of Service Bay C and in the center portion of the Site; consists of Bays 29 through 38
- Service Bay E: service bay located east of Service Bay D and in the center portion of the Site; consists of Bays 39 through 46
- Car Wash Canopy: canopy located east of Service Bay D and in the east portion of the Site

Access to the Site parking areas is along the north boundary of the Site on Hollywood Boulevard. At the time of the Site reconnaissance, the Site was occupied by Toyota of Hollywood as a new and used car dealership with a service center.

Stationary equipment at the Site includes seven ASTs; pad-mounted and pole-mounted transformers; 31 two-post automotive lifts; two scissor automotive lifts; seven single-post inground automotive lifts; two clarifiers; and four air compressors. The ASTs include one 1,500-gallon waste oil AST; two 1,000-gallon motor oil ASTs; two 500-gallon motor oil ASTs; and two 250-gallon motor oil ASTs. In general, the Site appeared to be moderately maintained with the exception of Service Bay D, where heavily stained concrete floors were observed by the ASTs storing motor oil. The stained concrete floors, the inground automotive lifts, and the clarifiers represent an environmental concern based on the long term occupancy of the Site as auto repair shops.

Site History

The Site will be discussed as West, Center, East, and South Parcels. Addresses associated with the West Parcel include 6026 through 6048 Hollywood Boulevard; addresses associated with the Center Parcel include 6000 through 6024 Hollywood Boulevard; addresses associated with the East Parcel include 5950 through 5962 Hollywood Boulevard; and addresses associated with the South Parcel include 6035 and 6037 Carlton Way.

West Parcel

A review of historical sources showed that the West Parcel was undeveloped as early as 1894 until at least 1907 with the development of three residences in the West Parcel. New offices, stores, and additional residences were built between 1914 and 1920. By 1919, the West Parcel was depicted with six residences, three stores, a paint shop, and a lumber storage. An auto repair shop was built between 1919 and 1922. Residences and a store in the east portion of the West Parcel were relocated off-Site prior to the development of a new auto sales room and public garage in 1929. A new office structure was constructed in the west portion of the West Parcel in 1947. By 1950, the east portion of the West Parcel was depicted with two large structures occupied as auto sales, auto repair, and auto services; and the west portion of the West Parcel was depicted with four residences, a doctor's office, a store structure, a three-unit structure occupied as stores, and an office and storage associated with a used auto sales lot. Permits to enlarge existing clarifiers in the auto repair shop were issued in 1952 and 1954. The residences were demolished between 1960 and 1965; and the offices, stores, and auto sales room and garage were demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970.

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA IIII Y 16 2021

Center Parcel

A review of historical sources showed that the Center Parcel was undeveloped as early as 1894 until at least 1907 with the development of three residences. An oil supply station was built in 1919 and a car wash structure was added in 1921. A real estate office was built in the east portion of the Center Parcel in 1922. A new oil station was bult in 1924 and relocated off-Site in 1926. A residence, a store, and an office were demolished in 1929. A new grease canopy was built in 1945. Two residences were demolished in 1947 prior to the construction of a new auto repair garage. The garage was expanded with the construction of an additional auto repair structure in 1948. A car wash rack and associated canopy were located off-Site in 1948. By 1950, the Center Parcel was depicted as a used car sales lot with an auto service shop in the southwest corner of the Center Parcel; two dwellings and two offices in the center portion of the Center Parcel; and a store in the east portion of the Center Parcel. Two residences and a garage were demolished in 1958. Service Bay D was built as a car polish and parts installation structure in 1960. A spray booth was listed at the auto service shop. The remaining residence was demolished in 1965. A new sales office was built in 1966. A store structure was demolished in 1970. The Site was graded prior to the development of the current Building A as a car sales and services structure in 1970. A new canopy was built in the center of the Site 1982. The mezzanine for the auto parts storage was enlarged in 1985. Building A was expanded to include a waiting room and a small office in 1990.

East Parcel

A review of historical sources showed that the East Parcel was undeveloped as early as 1894 until at least 1907 with the development of a hotel in the west portion of the East Parcel. A store was built in the east portion of the East Parcel in 1921 and was converted to auto sales and service in 1925. An additional structure was added to the garage (auto service) in 1927 and a new grease rack structure was constructed in the northeast corner of the East Parcel in 1936. By 1950, the west portion of the East Parcel was depicted with Mountain View Inn; and the east portion of the East Parcel was depicted with a large structure occupied as auto sales and auto repair and a small structure as a grease shop. The current Car Wash Canopy was built as an auto service and repair structure in the southwest corner of the East Parcel in 1950. The hotel was demolished in 1952. An additional garage was built in the southwest portion of the East Parcel in 1952. The grease shop was demolished in 1954. A portion of the auto sales and auto repair structure in the east portion of the East Parcel was damaged in a fire in 1969 and was demolished by 1970. The structure built in 1952 was demolished in 1973. The structure in the southeast corner of the East Parcel was demolished in 1973. The structure in the

South Parcel

A review of historical sources showed that the South Parcel was undeveloped as early as 1894 until at least 1907 with the development of a residence. A new garage was built in 1922. The residence was demolished in 1965 and replaced with the current parking lot.

Environmental Databases

The Site was identified on the FINDS, the ECHO, and the HWTS databases. FINDS contains facility information and "pointers" to other sources that contain more detail; ECHO provides integrated compliance and enforcement information; and HWTS is the DTSC's data repository for hazardous waste identification and manifest information. The Site was identified on these databases due to being a hazardous waste generator, chemical storage facility, aboveground petroleum storage

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA JULY 16. 2021

facility, as a Risk Management Plan (RMP) Reporter, and on the Used Oil Program. The Site was identified as a RCRA SQG in 1997. No violations were reported on these databases.

The Site was identified on the historical UST databases with five USTs. With the exception of one 500-gallon motor oil UST, the remaining USTs were associated with waste oil; two of which were listed as clarifiers. No further information was provided regarding the historical USTs.

Violations identified on the CERS was issued in October 2013; however, no further information was readily available for review. The Site was identified on the HAZNET database for generating the following hazardous waste:

- ➤ Halogenated solvents between 1989 and 1991
- Hydrocarbon solvents between 1989 and 1996
- ➤ Unspecified aqueous solution in 1989 and 1990, between 2000 and 2002, and between 2006 and 2008
- Oil/water separator sludge in 1989, 1997, 2003, and between 2009 and 2014
- > Tank bottom waste in 1990
- Unspecified solvent mixture in 1991, 1996, 1997, 2012, and 2016
- > Liquids with halogenated organic compounds in 1996
- > Aqueous solution between 1999 and 2001 and in 2010 and 2012
- Unspecified oil-containing waste in 2002
- > Other organic solids in 2002, 2006, 2007, and between 2016 and 2019
- > Waste oil and mixed oil between 2006 and 2008
- > Other inorganic solid waste in 2013 and 2014
- Unspecified organic liquid mixture in 2013 and 2016
- Oxygenated solvents in 2016

The appearance of the Site on the HAZNET database reflects proper disposal of hazardous waste. However, the long term occupancy of the Site as an auto repair shop, the historic use of USTs, and the use of solvents may represent an environmental concern.

The historic Site address 6010 Hollywood Boulevard was identified on the historical UST database with one 500-gallon motor oil UST and two 500-gallon waste oil USTs. The historic Site addresses 5950, 6010, 6022-28, and 6032 Hollywood Boulevard were identified with four listings on the current UST database with historical statuses. No further information was provided. The historic use of USTs at the Site represents an environmental concern.

Vapor Encroachment Condition

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. Fire Station #82, located at 1800 North Bronson Avenue, is listed as a LUST site. According to EDR, the property is approximately 646 feet east-northeast of the Site and the diesel leak impacting soil only was discovered in November 1989 during tank testing. The case was completed and closed by the LAFD on April 6, 2009.

Four properties were identified as within 0.125-mile and upgradient of the Site on the Historical Gas Station database. The Site was identified with two listings on the Historical Gas Station database, which represents an environmental concern. The remaining properties are not likely to have adversely affected the Site. However, the adjoining property west of the Site was identified on the UST database with a historical status. No further information was provided.

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA IIIIY 16 2021

According to historical sources, this property was developed as a used car sales lot with an auto repair shop by 1957. The structures were demolished by 1994 and the property has been occupied as a surface parking lot. Based on the proximity to the Site, the historic use of USTs at the adjoining property represents a VEC concern.

Nine properties were identified as within 0.125-mile and upgradient of the Site on the Historical Dry Cleaners database. The following properties were identified as VEC concerns:

- Wilmar Cleaners, 6037 Hollywood Boulevard, approximately 92 feet northwest and upgradient of the Site. According to EDR, this property was occupied as a clothes cleaners, pressers, and repairers in 1929. According to the 1919 Sanborn Map, the address was associated with a two-unit commercial structure occupied as stores. By 1950, the address appeared to be associated with a machine shop further north of the Site (at the rear of the property). In addition, the property was also depicted with a photofinishing laboratory in 1919 and a film developing room in 1950. No further information was found for the cleaner occupancy. A VEC cannot be ruled out based on the potential use of solvents at the former cleaners and the historic photofinishing and film developing occupancies.
- ➤ Louis E. Benson, 6015 Hollywood Boulevard, approximately 93 feet north and upgradient of the Site. According to the reviewed city directories, this property was occupied as a clothes cleaner in 1937 and 1942; and by Marcal Hand Laundry and Cleaners in 1951. The tenant space may have been occupied by the adjoining tenant as a print shop by 1961. The structure was demolished in 1994 and replaced with a surface parking lot. A VEC cannot be ruled out based on the potential use of solvents at the former cleaners and the historic print shop occupancy.
- ➤ Movie Town Cleaners, 6051 Hollywood Boulevard, approximately 182 feet northwest and upgradient of the Site. According to EDR, this property was occupied as a Chinese laundry from 1937 to 1942 and garment pressing and cleaners' agents from 1986 to 2014. The property was also identified on the current Drycleaners database with dry cleaning equipment using tetrachloroethylene (PCE). The property is a retail shopping center and one of the units is currently occupied by Shine Cleaners, approximately 125 feet north of the Site. Citadel reviewed the South Coast Air Quality Management District's (SCAQMD) Facility Information Detail for information regarding dry cleaning equipment used at the property. Permits to operate dry cleaning equipment using PCE was issued in 1984 and 1991; a 2006 permit application was rejected. Based on the historic use of PCE and the proximity to the Site, a VEC cannot be ruled out.

Regulatory Agencies

Fire Department

The City of Los Angeles Fire Department has recently issued lists of active and inactive ASTs, USTs, and HMI as of April 19, 2021. The Site was identified on the active HMI with the Facility ID No. FA0031646. The historical Site addresses 5950, 6010, 6022-28, and 6032 Hollywood Boulevard were identified on the list of UST historical files.

Citadel contacted the Los Angeles Fire Department for information regarding the Site in order to identify historical tenants and property use. The agency has not yet responded at the time of this report.

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA JULY 16, 2021

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-10, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was identified. Citadel identified the following environmental concerns:

The Site was developed with a gasoline station in 1919 and an auto repair shop as early as 1922. By 1950, the gasoline station did not appear to be located at the Site; however, at least three auto sales with auto repair shops were located at the Site. Additional auto repair shops were constructed in 1950s and 1960s. According to EDR, the Site was identified on the historical UST databases with five USTs; one of which was a 500-gallon motor oil UST. In addition, the historic Site addresses were identified on the UST database with historical statuses. No further information was readily available for review. It is unclear if the former USTs have been removed. The lack of information regarding the former USTs

and the historic occupancy of the Site as a gasoline station and auto repair shops represent a REC.

- During the Site reconnaissance, Citadel observed heavily stained concrete floors by the ASTs storing motor oil, inground automotive lifts, and clarifiers at the Site. Based on the long term occupancy of the Site as auto repair shops and the use of halogenated and hydrocarbon solvents at the Site, the observed conditions/equipment may represent a REC.
- ➤ Citadel's review of nearby properties identified USTs, potential use of solvents, historic photofinishing and film developing occupancies, historic print shop, and known use of PCE. VEC cannot be ruled out from these four properties based on the proximity to the Site and represents a REC.

No evidence for designating the Site as a CREC or HREC from reviews of historical documents and present Site conditions was found. Citadel recommends conducting a Phase II Subsurface Investigation to determine if historic occupancy as a gasoline station and auto repair shops along with the current occupancy as a repair shop and historic occupancies of adjacent properties have impacted the subsurface at the Site.

Citadel recommends that the tenant follow best management practices, in conformance with all appropriate current regulations, in regards to potential use of regulated hazardous materials and/or waste generated during everyday operations.

The current Site building was constructed prior to bans using ACBMs, LBP, and PCBs in electrical equipment came into effect in 1989, 1978, and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs, LBP, or PCBs at the Site.

Prior to renovation or demolition of building components, particularly roofing materials, Citadel recommends that the Client perform a survey for ACBMs, LBP, and PCBs. Such surveys should be performed to identify if ACBMs, LBP, or PCBs are present and to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

11.0 DISCLAIMER

The services performed by Citadel Environmental Services, Inc. ("Citadel"), d.b.a. Citadel EHS, in connection with this Report were performed in accordance with generally and currently accepted engineering practices and principles; provided, however, Citadel completed such

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA JULY 16. 2021

services as directed by the Client and the recommendations described in this Report are therefore limited in purpose and scope. The procedures and methodologies used by Citadel in its performance of services, and the recommendations contained herein, are not intended to meet the requirements under any specific laws or regulatory guidelines unless expressly set forth in the Proposal.

The recommendations and conclusions set forth in this Report are based on information and data available to Citadel during the course of its performance of the services. Citadel relied on the information and data provided by or on behalf of Client, including, if applicable, historical and present operations, conditions and test data, and Citadel assumed all such information and data was correct and complete. Citadel shall not be liable for any damages or losses resulting from inaccuracies of, or omissions from, information or data provided by or on behalf of the Client, any interested third-parties, or any federal, state, county, or local governmental authority, or otherwise available in the public domain.

The information contained in this Report and conclusions resulting therefrom are based solely on information available to Citadel at the time of its performance of services, and from observations and perceived conditions and materials existing on the date of Citadel's limited survey of the site, if applicable. Citadel disclaims any inaccuracy in the Report as a result of any part or parcel of property to which Citadel was not provided access, or which was concealed, including, but not limited to, wall cavities/chases, ceiling plenums, below floor finishes, crawlspaces, below grade, beneath existing structures, or behind electrical panels.

The findings and recommendations presented in this Report are based upon observations of present conditions and may not necessarily indicate future conditions. No conclusions should be construed or inferred other than those expressly stated in this Report. EXCEPT FOR ANY WARRANTIES EXPRESSLY SET FORTH IN THE PROPOSAL OR OTHER WRITTEN AGREEMENT BETWEEN CITADEL AND CLIENT, CITADEL MAKES NO WARRANTIES HEREUNDER WITH RESPECT TO ANY INFORMATION CONTAINED IN THIS REPORT, EXPRESS OR IMPLIED, AND CITADEL HEREBY DISCLAIMS ALL OTHER WARRANTIES.

All testing and remediation methods have reliability limitations and no method nor number of sampling locations can guarantee that a hazard will be discovered if contamination or other evidence of the hazard is not encountered within the performance of the services as authorized. Reliability of testing or remediation varies according to the sampling frequency and other service variables that were selected by Client. Citadel shall not be at fault or liable for any such limitations.

The information and opinions rendered in this report are exclusively for use and reliance by the Client. The information contained herein may not be used, disclosed, or copied without written permission of the Client and may not be relied upon without the written permission of Citadel.

PHASE I ESA REPORT HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA JULY 16, 2021

13.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I ESA of the property located at 6000 Hollywood Boulevard, in the City of Los Angeles, Los Angeles County, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-2013 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

Report Prepared by:

Shirley Lee Senior Staff Environmental Specialist

Report Reviewed by:

Mark Drollinger, M. Eng., CSP, CHMM Principal, Engineering and Environmental Sciences

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (November 1, 2013). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

Mark Drollinger, MEng, CSP, CHMM, EiT

Director of Environmental Geology & Engineering

EXPERIENCE

With over **35** years of experience in environmental engineering, compliance, permitting and management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations; and with local agencies, fire departments and public works. Mr. Drollinger has provided environmental engineering, assessment and compliance, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

ROLE

As Director of Environmental Geology & Engineering, Mr. Drollinger's primary responsibility includes developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; litigation support; and coordinating tasks with multi-discipline project teams.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments.

EDUCATION

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama, and a M.Eng. in Advanced Safety Engineering and Management, University of Alabama, Birmingham.

Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Society of Safety Engineers, Board of Certified Safety Professionals, Institute of Hazardous Materials Management, Institute of Industrial Engineers and International Facilities Management Association.

Shirley Lee

Environmental Specialist, Environmental Geology and Engineering

EXPERIENCE

Ms. Lee has **12** years of experience as an Environmental Specialist. Her responsibilities includes performing Phase I and Phase II Environmental Site Assessments, NPDES monitoring and permitting, groundwater monitoring, indoor air quality inspections, hazardous materials inventory, and preparation of health and safety plans and hazardous materials business and contingency plans.

ROLE

As an Environmental Specialist, Ms. Lee provides on-site organization, direction, control, and coordination necessary for the successful implementation, execution, and completion of environmental geology and environmental compliance-related projects awarded to Citadel. She also assists the Director of Environmental Geology and Engineering in the completion of all assigned projects so that the client is satisfied with the finished work product and the working relationship. Her assignments include a combination of field-based activities in a number of varying environments and office-based activities.

EDUCATION

Ms. Lee holds a Bachelor of Arts in Environmental Analysis and Design from the University of California, Irvine; with a minor in Urban and Regional Planning. Ms. Lee also holds a 40-hour HAZWOPER General Site Worker Certification. She has recently received her Environmental Management Certification from the University of California, Irvine.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Citadel Environmental Services on Jul 09, 2021.

TARGET PROPERTY

6000 Hollywood Boulevard Los Angeles, CA 90028

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: YES

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- GC: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- Journeymen: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- HVAC (Mechanical, Heating & Air companies): HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release): Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- CBO: Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- Zoning Department: The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- C.O.: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Citadel Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

As ummary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

TITLE & JUDICIAL RECORDS

Per ASTM E 1527-13 Section 6.2, the User is required to provide and/or report to the environmental professional any title and/or judicial records so identified for the subject property.

Please provide any information on title and/or judicial records:

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Per ASTM E 1527-13 the User is required to provide and/or report to the environmental professional any environmental liens or AULs so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of information to identify environmental liens or AULs.

Please provide any information on environmental liens or activity and use limitations (AULs):

SPECIALIZED OR ACTUAL KNOWLEDGE OF USER

Per the ASTM standard, it is the User's responsibility to communicate to the environmental professional any information that is material to recognized environmental conditions in connection with the subject property based on such specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community.

Please provide any information of the following items:

ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
USTs		
ASTs		
PCB Electrical Equipment		
Hydraulic Equipment		
Chemicals, Hazardous Materials, and Raw Materials Storage and Usage		
Waste Generation, Storage and Disposal		
Wells, Sumps, Pits, and Floor Drains		
Stormwater Runoff and Surface Water		
Lagoons, Septic Systems, Wastewater Treatment, and Separators		
Stressed Vegetation, Staining and Odors		
Surficial Disturbances		
On-Property Dry Cleaners		

NON-ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
Asbestos Containing Materials		
Radon		
Lead-Based Paint		
Lead in Drinking Water		
Potable Well		
Potential Wetlands		
Air Emissions		
Mold/Water Intrusion		

Please refer to "Helpful Documents" section below to provide any relevant reports associated with the above items.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

(For Property Owner) Per the ASTM standard, in a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a significantly lower price which does not reasonably reflect fair market value if the property was not contaminated, and make a written record of such explanation. The ASTM standard does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property.

PROCEEDINGS INVOLVING THE PROPERTY

Per the ASTM standard, prior to the site visit, the User (if different from the property owner), Key site manager (if any is identified), and property owner shall be asked whether they know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

 Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, or from the property? Y / N If yes, please explain:

 Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Y / N
 If yes, please explain:

HELPFUL DOCUMENTS

Per the ASTM Standard, Prior to the property visit, the Property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked if they know whether any of the documents below exist and if so, whether copies can and will be provided within reasonable time and cost constraints:

	User		Key Site Manager		Property Owner

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business. Please contact EDR at 1-800-352-0050

with any questions or comments.

GRANT DEED

Documentary transfer tax is \$\sum_{None}\$. No consideration. This transfer is exempt from documentary transfer tax as the transfer is between legal entities that results solely in a change in the method of holding title to the realty and in which the proportional ownership interests in the realty, directly or indirectly, remain the same immediately after the transfer. (See, California Revenue and Taxation Code, Section 11925(d)).

FOR VALUABLE CONSIDERATION, receipt and sufficiency of which are hereby acknowledged, HOLLYWOOD MOTOR PROPERTIES, LLC, a California limited liability company ("Grantor"), hereby grants to 6000 HOLLYWOOD BOULEVARD ASSOCIATES, LLC, a Delaware limited liability company ("Grantee"), all of Grantor's right, title, and interest in and to that certain real property (the "Land") located in the City of Los Angeles, County of Los Angeles, State of California, more particularly described in Exhibit A attached hereto, together with all right, title, and interest of Grantor in and to all buildings, structures and improvements now located or hereafter constructed on the Land (the "Improvements" and together with the Land, collectively, the "Property"), subject in all cases to all matters of record.

'IN WITNESS WHEREOF, Grantor has executed this Grant Deed as of September 12, 2018.

BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

6000 HOLLYWOOD BOULEVARD LOS ANGELES, CA 90028

COORDINATES

Latitude (North): 34.1012360 - 34° 6′ 4.44″ Longitude (West): 118.3206690 - 118° 19′ 14.40″

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 21 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 16 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 2 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

Global Id: SL0603766574

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 37 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 17 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 18 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 4 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 21 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 08/08/2018. OBSERVATION: Finely divided

metal generated from rotor shavings are being recycled as scrap metal Finely divided metal less than 100 microns in size does not meet the definition of scrap metal. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the finely divided metal has been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit manifests/receipts documenting proper disposal and a statement demonstrating how you will manage it in the future.

10-31-2017

Violation Description: Failure to meet the following container management requirements: (a) A

container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to

leak.

Violation Notes: Returned to compliance on 08/08/2018. OBSERVATION: One 55 gallon

container of brake fluid located in the hazardous waste storage area

was observed open without a cap. CORRECTIVE ACTION: Submit photos to

the CUPA demonstrating that the container listed above has been

properly closed.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and

portable tanks with the following requirements: "Hazardous Waste",

name and address of the generator, physical and chemical

characteristics of the Hazardous Waste, and starting accumulation

date.

Violation Notes: Returned to compliance on 08/08/2018. OBSERVATION: Two 55 gallon

containers of brake fluid located in the hazardous waste storage room were observed without a hazardous waste label. Ensure the label has the name of the business, address, EPA ID Number, name of the hazardous substance, physical state of the hazardous waste (such as liquid or solid), hazardous property (such as Toxic, Flammable, Corrosive, Reactive, or other), and when the hazardous waste started to be accumulated. CORRECTIVE ACTION: Submit a photo to the CUPA

demonstrating that the container listed above has been properly

labeled.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22,

Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure of generator to obtain assessment or reassessment every five

(5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA

hazardous wastes generated onsite.

Violation Notes: Returned to compliance on 09/08/2020. OBSERVATION: A hazardous waste

tank reassessment has not been conducted for the 1,000 gallon used oil tank system and the 500 gallon used antifreeze tank system within 5 years of the previous tank system assessment or within the remaining service life of the tank system as stated in the engineer's report,

whichever is less. CORRECTIVE ACTION: Obtain a written hazardous waste tank system reassessment for the 1,000 gallon used oil and 500 gallon used antifreeze tank system in accordance with 22 CCR 15 66265.192 and

submit a copy to the CUPA.

Eval Type: Routine done by local agency

Eval Notes: Consent to enter, inspect and take photographs was given by: Sal Diaz

The Business Activities, Owner/Operator Identification, Hazardous

Materials Inventory, Site Map, Emergency Response/Contingency Plan and

Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into California Environmental Reporting System (CERS) is required between

January 1 and March 1 of every year. Per L.A.M.C. 57.121.3.5, failure

Citation: 23 CCR 16 2715(c)(4) - California Code of Regulations, Title 23,

Chapter 16, Section(s) 2715(c)(4)

Violation Description: Failure to maintain a list of employees trained by the designated

operator on-site or off-site at a readily available location, if

approved by the UPA. For training that occurs on or after October 1, 2018, failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if

approved by the UPA.

Violation Notes: Returned to compliance on 03/26/2021. OBSERVATION: Owner/Operator did

not maintain a current monitoring plan. Training must be done annually. The current employee training records are dated 1/19/2020. CORRECTIVE ACTION: Update employee training records and maintain

employee training annually. CORRECTED ON SITE.

Hazardous Waste Summary:

Waste Code: D001

Waste Description: IGNITABLE WASTE

Waste Code: D002

Waste Description: CORROSIVE WASTE

Waste Code: F00

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

 ${\tt ACETATE,\,ETHYL\,BENZENE,\,ETHYL\,ETHER,\,METHYL\,ISOBUTYL\,KETONE,\,N-BUTYL}$

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL

Code, Chapter 6.7, Section(s) 25290.1(c)(3),25290.2(c)(3)

Violation Description: Failure to keep water out of the secondary containment of UST systems

installed on or after July 1, 2003.

Violation Notes: Returned to compliance on 12/11/2018. OBSERVATION: Liquid was observed

in the diesel & 91 turbine & Diesel Fill sumps(~1 qt.each), 87 Fill sump(~1 gallon) & UDC 3/4(~3/4). If water could enter into the secondary containment by precipitation or infiltration, it must be removed and disposed of properly. Corrected during inspection. CORRECTIVE ACTION: Ensure that all sumps are maintained free of

liquid.

 12-11-2018

Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter

16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before

October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of

liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30

days.

Violation Notes: Returned to compliance on 09/05/2019. OBSERVATION: Facility did not

comply with one or more of the following DO monthly inspection requirements: Performed by an ICC certified DO; Inspect monthly alarm history report, check that alarms are documented and responded to appropriately. DO inspections conducted after 9/30/2018 must be every 30 days and in accordance with sections 2716(a)-(e). DO inspections completed on 10/22/18 & 11/23/18 (>30 days) and no owner signature for issues found during inspection. CORRECTIVE ACTION: Ensure that DO is

complying with all the requirements noted above. Submit copy of

compliant DO inspection record.

Eval Notes: Inspector Shane Bystrom LAFD, onsite this date to conduct routine

inspection of underground storage tank. Consent to enter, inspect and take photographs was given on this date by Frehiwot Zeleke, manager. Monitoring system certification was conducted at this time, but not completed. Monitoring certification was performed by Tony Kiani, Ramtox. Tester provided the following certifications: ICC: 5262139

EXP: 6/17/2019 VR: #A26163 EXP: 2/25/2019 VMI: #1966 EXP: 4/15/2019 The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the UST system was compared to the conditions of the operating permit. Monitoring Console - VR TLS-350 Tank 1 - 87

HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter Citation:

6.95, Section(s) 25508(a)(1)

Failure to complete and electronically submit hazardous material Violation Description:

inventory information for all reportable hazardous materials on site

at or above reportable quantities.

Violation Notes: Returned to compliance on 11/04/2019. Review, update and resubmit the

Hazardous Materials Inventory into CERS to include all hazardous material stored in a capacity greater than 55 gallons of liquid, 200 cubic feet of compressed gas or 500 pounds in weight of a solid. Please correct the following: Effective December 28, 2017, CalEPA has replaced the previously existing five federal hazard categories in CERS with twenty-four new federal hazard categories. The following

federal hazard categories are now obsolete G fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you still have the previous federal categories selected and/or have NOT selected any of the NEW federal hazard categories for your chemical inventory. Please review your hazardous material inventory and complete the following steps: 1) Deselect all of the five obsolete federal hazard categories for all chemical

inventory listed under your facility. 2) Update your hazardous

Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with

the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous

Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/18/2015. OBSERVATION: All hazardous waste

containers shall be marked with the following information: 1) the words G Hazardous WasteG; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Observed a 55-gallon drum of waste coolant and a 55-gallon drum of drained oil filters unlabeled and with deteriorated label, respectively. New labels were affixed during the inspection and violation corrected on site. CORRECTIVE ACTION:

Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter

16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before

October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of

liquid/debris in spill containers. Inspect for the presence of

liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30

days.

Violation Notes: Returned to compliance on 11/22/2019. OBSERVATION: Facility did not

comply with one or more of the following DO monthly inspection requirements: Performed by an ICC certified DO; Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy; Inspect for the presence of

liquid/debris in spill containers; Inspect for the presence of

liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly; Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit; Check that all testing and maintenance has been completed and documented; Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(c). DO inspections conducted after 9/30/2018 must be every 30 days and in accordance with sections 2716(a)-(e). Failed to conduct DO inspection every 30 days on 5 occasions: 11/1/18 & 12/3/18(32 days), 3/1/19 & 4/1/19(31 days),

5/1/19 & 6/3/19(33 days), [Truncated] Los Angeles City Fire Department

Violation Date: 11-16-2020

Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter

16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before

October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of

liquid/debris in spill containers. Inspect for the presence of

liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30

days.

Violation Notes: OBSERVATION: The "Designated Operator Visual Inspection Reports(s)

were completed greater than 30 days from the previous visual inspection for month(s) 9/1/20, 8/1/20, 6/1/20, 4/1/20, 1/28/20.

CORRECTIVE ACTION: All future "Designated Visual Inspection Reports"

shall be completed at least every 30 days.

Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill

prevention equipment is installed, repaired, or replaced on and after October 1,-2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October-1,-2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 04/04/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill

prevention equipment. Was due by 10/13/18, but going to be tested today(2/19/19). Not witnessed by LAFD, results to be reviewed upon submittal. CORRECTIVE ACTION: Apply for permit for new drop tubes and

repair/retest. Submit verification.

Completed Info:

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Endangerment Assessment Report

Completed Date: 10/01/2001 Comments: Not reported

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Completion Report

Completed Date: 12/12/2001

Comments: Approximately 136 cubic yards of soil were removed. Based on

confirmation sampling, the estimated mean for surface soil based on 95% UCL was 0.860 mg/kg and for subsurface 1.91 mg/kg. Based on this,

residual arsenic levels are below the cleanup goal.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Workplan

Completed Date: 12/07/2001

Comments: RAW/CEQA - DTSC approved the Removal Action Workplan for the removal

of arsenic contaminated soil. CEQA completed.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Environmental Oversight Agreement

Completed Date: 02/10/2000

Comments: LAUSD MASTER OVERSIGHT AGREEMENT (DOCKET NO. HSA-A 99/00-051)

EXECUTED ON 2/10/00. As part of the Master Oversight Agreement between DTSC and the Los Angeles Unified School District (LAUSD), DTSC will provide oversight for a Preliminary Endangerment Assessment (PEA) for the proposed Central Los Angeles High School No. 1 site

(aka Metromedia)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 07/02/2002

Comments: DTSC has determined that all appropriate response actions have been

completed, that all acceptable engineering practices were implemented and that no further removal/remedial action is necessary, specific only to the removal around the underground storage tank. Additional sampling will be conducted post- demolition near on-site hydraulic elevators and residential structures. For Arsenic only. FA for

hydraulic elevators and lead

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Potential Media Affected: Aguifer used for drinking water supply, Other Groundwater (uses other

> than drinking water), Soil, Soil Vapor, Under Investigation Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene

Potential Contaminants of Concern: Site History: Paragon cleaners is located on the northeast corner of the

intersection of Vine Street and Fountain Avenue. Ground water has been impacted by the contaminant PCE due to operations at the dry cleaners. The dry cleaner has been in operation since 1961, and in 2006, switched to "green" chemicals. The site owner has been issued a Cleanup and Abatement Order (CAO) from the state for assessment and

cleanup.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Next Scheduled EDR Contact: 10/11/2021
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map: 5630741 HOLLYWOOD, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

West

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 389 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

1/2

TP

East

1 Miles

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

HOLLYWOOD YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratified Sequence

System: Tertiary Series: Miocene

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
	Bou	ndary		Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558 Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Click here to access additional FINDS: detail in the EDR Site Report. database contains http://www.edrnet.com/srf2/FinalSiteReport.aspx?ID=6grV6XDtg7uArLMIVxWu3FFmXj6IDvtZtMyVAhaz75ORujzEAXhUC9aaLmbEMvsEIGXw3 ANKxsFpWX77upOj576GF8Y0FK8UmKQU69VQjvI66rJhIIIH8e9LvoaWthp5ZAPS4kW5MDQVy6uUVenY4Rqih8MhazHXzFq.6nilgDHlr4TPVhxa 3VKoXWTODVVct9u798HF7wieuw9kAmCV3EeXL9taMbLHl8dCAEnhxjsMWkWnuW1v43zwF8hVF90TmeYT5u8rjJQp68tillgS5motv3vDtXBxZz Zt4HU5Mr7EyHvOV5j467.Dgx79rS7VV3TP4Na5Xus0DynLtB.m3LRG7ud3usuYAHlp9019LsggM0mLlgh.8LWHxiYxWDsKuUVrAD39FrXQFanD mVb83YSVjqlv63fqIYwT9vUZvso6tSiSZsaB5NtrMELNyk3OVCmj9QaVhD0KatSDzliJzbER5L4mOKPTRwFy5quSjy0MzfbqEH4Jv0cUXRTqhpP YUph86xJIgFBOrmpOVgLW4HSsX4v0DxnUtJzl36Lv7e0XuvRtAsUC40MRL407MXW6li4E3md0xlCPW5hFuT1k3yZEFdRmFcQymfdX44aCjbwO 6lBulMqX4v1Nv0MitTdMZkAX4S73MuahyCxbVDB04or3hUzlaafUzwuUAhtA5UF0O9x1RwMI5TXqja1WzVpFEbFF9bl9XxmOhcMKUiEF3 additional records for this site. Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the patients appeared and corrective activities required the RCRAInfo

notification, permit, compliance, and corrective action activities required under RCRA.

The Click here to access additional FINDS: detail in the EDR Site Report. database contains http://www.edrnet.com/srf2/FinalSiteReport.aspx?ID=6Ru46Ji4R8qDu04l4Elf3xsvJjoei3u04ZVFAxd.8PGvq9sbDKJGCNDi0oXG4GLvlate3ok6Ef KelZRffi9g5nXcxfZ.sXLTvJUA6d.4jPu1oYQ4epOn8CRz3POuulFBOPTD4qSCZfz3VVqLFyqX4eyqxbObdXDQ.KQO6txxRDVRuUst4O8o3U9vJ8 JiiWE.4tKs9ymX8Egvq4mmDdUV3yiS0bB.4ujBlb.0A9gKEM5XI.UwfWbR4DahxY6gsWvWvcBy51SQjmy9oXUNeNJd5dr13KPVumtXOtdo4NKRZ chCV6hGFuNc6vhrRDRmuH934YZt4pMOJvleiCES4E0c3Hl58XWzqjIjDTqy9fJM0sw44nmclFbF8oRLEBielFlCfPeuARLmxDpNsucPvvT53XXyjg 5lolyYe0V19NFR3MWsuopZOa5e5nYYZ7J1VpxoFPvv900jxXBwder7.8Ev20BdPvrlG1CMvQl45XYQ9zLmsxSYbbujv5RqKmV0JUwBG7Fu6C3K RMx5ucAd4rab4PXxJnn5iAEh4VCY33UT8DYeqJAODvNS4gPF0E3J4u.xlmPa3HXbEWkNloXjfBeR3STXx6AysThmvyKf3Elljp6LoH6QexfV7YW O3CNgup8LOaBmAfCBZej7VVzvF8wV5AKZxAZOd0ve.cf8CGa7PBp9G4tTv9ri54v69Lw8sMNZbVPI7YMDKNkaJvWZGROK3 additional records for this site. Violation Date:

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment

inspection for 36 months.

Returned to compliance on 08/16/2019. OBSERVATION: Owner/Operator failed to meet one or more of Violation Notes:

the requirements applicable to overfill prevention equipment. Failure to test overfill prevention by 10/13/18. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above

by testing. Submit verification.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Phase II Environmental Site Assessment Summary Letter

August 12, 2021 August 1, 2023 Revised

Paul Hogge Senior Development Associate **HINES** 444 South Flower Street, Suite 2100 Los Angeles, California 90071

Re: CITADEL Project No. 5140.1100.0
Phase II Environmental Site Assessment Summary Letter
6000 Hollywood Boulevard
Los Angeles, California 90028

Dear Mr. Hogge:

Citadel is pleased to provide this Phase II Environmental Site Assessment (Phase II) Summary Letter for the above referenced property (Site). The Phase II was completed for HINES (Client) for the Site in general accordance with Citadel's Proposal 5140.1100.P, dated July 21, 2021, and mutually agreed upon scope of work.

Citadel understands that the proposed development will include Site-wide excavation to approximately 40 feet below ground surface (bgs).

Field Activities

On July 30, 2021, Citadel advanced 10 borings across the site using a direct push drill rig. Eight borings were advanced to a depth of approximately 20 feet bgs and two borings were advanced to approximately 40 feet bgs. Soil samples were collected in acetate sleeves at approximate five-foot intervals beginning at five feet bgs. Soil vapor probes were installed at depths of five and 15 feet bgs in each of the shallow soil borings, and at five, 15, 25 and 40 feet bgs in the deeper borings. Soil vapor samples were collected from each vapor probe on August 2, 2021.

Laboratory Analysis and Results

Soil samples from the five-foot depth of each boring were analyzed for volatile organic compounds (VOCs) by EPA Method 8260B and total petroleum hydrocarbons (TPH) full range by EPA Method 8015.

- VOCs were not detected in any soil sample.
- > TPH as gasoline was not detected in any soil sample.
- ➤ Low concentrations of TPH as diesel (TPHd) and TPH as oil (TPHo) ranging from 10 to 1,468 milligrams per kilogram (mg/kg) were detected in six of 10 borings.

Four of the soil samples were also analyzed for polychlorinated biphenyls (PCBs) by EPA Method 8081A and Title 22 heavy metals by EPA Methods 6400/7471.

PHASE II REPORT LETTER HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA AUGUST 11, 2023 AUGUST 1, 2023 REVISED

- > PCBs were not detected in any soil sample.
- > Heavy metals were detected in all soil samples with concentrations below regulatory limits.

Twenty-four soil vapor samples were analyzed for VOCs by EPA Method 8260B.

- Fetrachloroethene (PCE) was detected in 11 soil vapor samples from seven borings, at concentrations between 56 and 564 micrograms per cubic meter (μg/m³). All soil vapor results exceeded the residential threshold of 14 μg/m³ with 10 soil vapor samples exceeding the commercial screening level of 67 μg/m³.
- Trichloroethene (TCE) was detected in two soil vapor samples from one boring, between 1,270 and 101 μg/m³, at B5-5 and B5-15 feet bgs, respectively. These results exceeded the residential threshold of 15 μg/m³ and commercial screening level of 100 μg/m³.
- > Toluene was detected in five samples from three borings, at concentrations between 51 and 57 μg/m³, below the residential and commercial screening levels.

Findings and Conclusions

The proposed development of the Site will include the excavation of up to 40 feet of soil from the Site. Citadel collected soil and soil vapor samples from 10 borings to a maximum depth of 40 feet bgs. Citadel presents the following findings.

- > TPHd and TPHo were reported in six of 10 borings, with a maximum TPHo concentration of 1,440 mg/kg. This concentration is below the regulatory screening level.
- PCE was not present in soil vapor in borings 3, 7 and 8.
- ➤ PCE concentrations in borings 1, 2, 4, 5 and 6 decreased with depth. PCE increased with depth slightly in boring 10.
- PCE was reported in soil vapor at 40 feet bgs in boring 9,but was not reported in samples from five feet to 25 feet bgs.
- > TCE was reported in boring 5 only and decreased with depth.
- Toluene was reported in three borings and generally decreased with depth.

Based on the above, Citadel concludes that:

- > TPH, VOCs, PCBs and heavy metals do not appear to be a concern for on-Site soils, however de minimis concentrations of TPHd and TPHo are present in shallow soil and may be encountered during excavation.
- ➤ PCE in soil vapor is generally decreasing with depth with a slight increase in depth at boring 10. The concentrations are above the screening levels but are not significant. PCE was reported at 40 feet bgs in boring 9 at a concentration of 127 ug/m3. The depth and location suggests an off-Site source to the north of the Site.
- TCE was reported in one boring and decreased from a concentration of 1,270 ug/m3 at five feet bgs to 101 ug/m3 at 15 feet bgs. The presence of TCE is not considered significant.
- > The PCE in soil vapor at boring 10 is undefined.
- The source of PCE at boring 9 is unknown and may represent a larger area that is undefined.
- Due to the proposed development, the reported contaminants in soil and soil vapor will likely be removed during excavation to 40 feet bgs.

PHASE II REPORT LETTER HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA AUGUST 11, 2021 AUGUST 1, 2023 REVISED

Residual VOCs may be present below this depth but may not be significant based on these results.

Due to the presence of shallow VOCs in soil vapor, Citadel recommends that a Soil Management Plan be completed and implemented by the General Contractor and grading contractors. Citadel recommends no further investigation.

LIMITATIONS

This assessment was performed in accordance with generally and currently accepted engineering practices and principles. Although the data in this report is indicative of subsurface conditions in areas investigated, no further conclusions regarding the absence or presence of subsurface contamination at the site should be construed or inferred other than those expressly stated in this report. The conclusions made are based on information obtained from field observations, and from relevant Federal, State, regional, and local agencies.

DISCLAIMER

The services performed by Citadel Environmental Services, Inc. ("Citadel"), d.b.a. Citadel EHS, in connection with this Report were performed in accordance with generally and currently accepted engineering practices and principles; provided, however, Citadel completed such services as directed by the Client and the recommendations described in this Report are therefore limited in purpose and scope. The procedures and methodologies used by Citadel in its performance of services, and the recommendations contained herein, are not intended to meet the requirements under any specific laws or regulatory guidelines unless expressly set forth in the Proposal.

The recommendations and conclusions set forth in this Report are based on information and data available to Citadel during the course of its performance of the services. Citadel relied on the information and data provided by or on behalf of Client, including, if applicable, historical and present operations, conditions and test data, and Citadel assumed all such information and data was correct and complete. Citadel shall not be liable for any damages or losses resulting from inaccuracies of, or omissions from, information or data provided by or on behalf of the Client, any interested third-parties, or any federal, state, county, or local governmental authority, or otherwise available in the public domain.

The information contained in this Report and conclusions resulting therefrom are based solely on information available to Citadel at the time of its performance of services, and from observations and perceived conditions and materials existing on the date of Citadel's limited survey of the site, if applicable. Citadel disclaims any inaccuracy in the Report as a result of any part or parcel of property to which Citadel was not provided access, or which was concealed, including, but not limited to, wall cavities/chases, ceiling plenums, below floor finishes, crawlspaces, below grade, beneath existing structures, or behind electrical panels.

The findings and recommendations presented in this Report are based upon observations of present conditions and may not necessarily indicate future conditions. No conclusions should be construed or inferred other than those expressly stated in this Report. EXCEPT FOR ANY WARRANTIES EXPRESSLY SET FORTH IN THE PROPOSAL OR OTHER WRITTEN AGREEMENT BETWEEN CITADEL AND CLIENT, CITADEL MAKES NO WARRANTIES HEREUNDER WITH RESPECT TO ANY INFORMATION

PHASE II REPORT LETTER HINES 6000 HOLLYWOOD BOULEVARD LOS ANGELES, CALIFORNIA AUGUST 11, 2021 AUGUST 1, 2023 REVISED

CONTAINED IN THIS REPORT, EXPRESS OR IMPLIED, AND CITADEL HEREBY DISCLAIMS ALL OTHER WARRANTIES.

All testing and remediation methods have reliability limitations and no method nor number of sampling locations can guarantee that a hazard will be discovered if contamination or other evidence of the hazard is not encountered within the performance of the services as authorized. Reliability of testing or remediation varies according to the sampling frequency and other service variables that were selected by Client. Citadel shall not be at fault or liable for any such limitations.

The information and opinions rendered in this report are exclusively for use and reliance by the Client. The information contained herein may not be used, disclosed, or copied without written permission of the Client and may not be relied upon without the written permission of Citadel.
