EXECUTIVE SUMMARY

RMD Environmental Solutions, Inc. (RMD) performed this Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1128 through 1146 and 1155 North Las Palmas Avenue in Los Angeles, California, (Subject Property) on behalf of BARDAS Investment Group. The Subject Property is identified as Los Angeles County Assessor's Parcel Numbers (APNs) 5532-021-003 through -005, 5532-021-014 through -017, and 5532-022-003 through -006 and encompasses approximately 2.05 acres. Historical addresses associated with the Subject Property include 1138 through 1150 North McCadden Place and 1128 through 1148 and 1139 through 1155 North Las Palmas Avenue. The Subject Property is currently developed with four two-story buildings, one single-story building, and a parking lot. The buildings are currently occupied by– Company 3, a post-production company (1136 – 1146 and 1155 North Las Palmas Avenue) and offices for Wetu Enterprises (1128 North Las Palmas Avenue).

This assessment has revealed the following recognized environmental conditions (RECs) with respect to the Subject Property:

- There was historical use of the Subject Property as machine shops at 1138 and 1144 North Las Palmas Avenue in the 1950s through at least 1970. Hazardous materials and hazardous waste generated in the operations of machine shops include chlorinated solvents.
- There was historical use of the Subject Property as an automotive repair facilities 1145 North Las Palmas Avenue in the 1940s. Few records are available to indicate the use or generation of hazardous materials or waste at this facility.
- There was historical use of the Subject Property for photography/film-related activities at 1128, 1138, and 1144 North Las Palmas Avenue. Documented hazardous waste generation included halogenated solvents, which can include chlorinated solvents and photographic film.
- There was historical use of the area adjacent to the east as a machine shop/sheet metal shop in the 1950s through at least 1970.
- There was historical generation of hazardous waste adjacent to the north and east of the Subject Property. The database listings did not indicate the waste being generated but as imaging and "print" shops, the chemical use is likely to be similar to include halogenated solvents.

De Minimis Conditions

No de minimis conditions were identified during this assessment.

Controlled Recognized Environmental Condition

This assessment has revealed no evidence of a controlled recognized environmental condition.

Historic Recognized Environmental Conditions

This assessment has revealed no evidence of historical recognized environmental conditions in connection with the Subject Property.

Vapor Migration

Based on the historical use of the property and surrounding areas to the north and east, there is a potential for vapor migration at the Subject Property if releases of chlorinated solvents and halogenated solvents have occurred to the subsurface.

Data Gaps

The following data gap has been identified during the preparation of this Phase I ESA:

- The City of Los Angeles Fire Department (LAFD), in particular the Hazardous Material Department, did not respond to the request for records associated with the Subject Property. Although there are other sources of information regarding hazardous waste generation at the Subject Property, this can be considered a significant data gap if the LAFD records show the use of other hazardous materials on-site or any cleanup efforts that have been conducted.

1.0 INTRODUCTION

1.1 Purpose

RMD Environmental Solutions, Inc. (RMD) has prepared this Phase I Environmental Site Assessment (ESA) at the request of BARDAS Investment Group (BARDAS). The purpose of this Phase I ESA is to perform all appropriate inquiries into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice for a possible transaction involving the Subject Property and to permit BARDAS to qualify for one of the landowner liability protections as identified by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

1.2 Scope of Services

This project was performed in accordance with the proposal dated February 5, 2021. The scope of services was to perform a Phase I ESA in a manner generally consistent with the American Society for Testing and Materials (ASTM) Standard Designation: E-1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and the United States Environmental Protection Agency's (USEPA's) Standards and Practices for All Appropriate Inquiries (AAI), 40 CFR, Part 312.

The scope of services comprising this Phase I ESA was conducted to provide a reasonable level of investigation to identify recognized environmental conditions (RECs). As defined by ASTM standards, the term REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate government agencies. Any historical RECs (HREC) or controlled RECs (CREC) as defined by ASTM E1527-13 that were identified during the assessment are discussed in this report, as applicable.

1.3 Significant Assumptions

RMD has performed the historical and environmental record searches in accordance with current ASTM and industry practice. The data, findings, and conclusions presented in this Phase I ESA are based upon a detailed search, review, and analysis of the documents and interviews as well

as observations made during the site reconnaissance. Conclusions reached regarding the conditions of the Subject Property do not represent a warranty that all areas within the Subject Property are of a similar quality as may be inferred from observable Subject Property conditions and available Subject Property history. As stated in the ASTM standard, no Phase I ESA can wholly eliminate uncertainty regarding the potential for environmental liability in connection with the Subject Property. RMD's evaluation and analysis are intended to reduce, not eliminate, the potential for conditions that result in liability for the end user of this Phase I ESA.

1.4 Limitations and Exceptions

This report was prepared as a result of a contractual agreement that defined the approach and scope of services to be employed during the course of the investigation. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this Phase I ESA is intended to aid in the evaluation of RECs. The services provided by RMD should not be construed as a warranty or guarantee that no RECs exist at the Subject Property or that all RECs have been uncovered. No conclusions are stated or implied concerning the suitability of the Subject Property for its eventual use. This document is not intended for purposes other than those expressly set forth herein or for use by parties other than for whom it has been prepared.

As limited by the ASTM Standard for Phase I ESAs and RMD's scope of work, this project was non-intrusive in nature and did not include any sampling or testing of soils, groundwater, surface water, or other materials. Additionally, unless specifically described in this report, RMD's scope of work explicitly excluded issues that are outside the scope of ASTM E1527-13 and may constitute a business environmental risk as defined by ASTM.

ASTM Standard Practice E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- Uncertainty Not Eliminated - No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, and this practice recognizes reasonable limits of time and cost.
- Not Exhaustive - All Appropriate Inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it, outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions.

- Level of Inquiry Is Variable - Not every property will warrant the same level of assessment. Consistent with good commercial or customary practice, the appropriate level of environmental site assessment will be guided by the type of property, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

In general, the Environmental Protection Agency (EPA) does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion). ASTM E1527-13 defines "migrate" and "migration" as referring to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600 – Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transaction; however, nothing in ASTM E1527-13 requires application of the Guide E2600 standard to achieve compliance with all appropriate inquiries.

A Phase I ESA meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid. A Phase I ESA meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of the intended transaction may be used provided that the following components of the ESA were conducted or updated within 180 days of the date of purchase or the date of the intended transaction:

- interviews with owners, operators, and occupants;
- searches for recorded environmental cleanup liens;
- reviews of federal, tribal, state, and local government records;
- visual inspections of the property and of adjoining properties, and;
- the declaration by the environmental professional responsible for the assessment or update.

1.5 User Reliance

This report documents the Phase I ESA of the Subject Property performed by RMD in general accordance with ASTM 1527-13 and the USEPA Standards and Practices for All Appropriate Inquiries, 40 CFR 312. The findings, opinions and conclusions of this Phase I ESA are for the confidential and exclusive use of BARDAS, its affiliates, employees, agents, successors, and

assigns. Reliance on this report for any use by parties other than specifically stated is prohibited without the express written consent of RMD and BARDAS, and such use is at the sole risk of the user.

2.0 PSITE AND VICINITY DESCRIPTION

The Subject Property is identified as Los Angeles County Assessor's Parcel Numbers (APNs) 5532-021-003 through -005, 5532-021-014 through -017, and 5532-022-003 through -006. The Subject Property encompasses approximately 2.05 acres. The Subject Property is located at 1128 through 1146 and 1155 North Las Palmas Avenue in Los Angeles, California, in an industrial and residential mixed area. Historical addresses associated with the Subject Property include 1128 through 1150 North McCadden Place and 1128 through 1148 and 1139 through 1155 North Las Palmas Avenue. Industrial developments are located to the north and east. Residential and community properties are located to the south. Offices are located to the west. The Subject Property is shown on a Site Location Map that is provided as Figure 1 and a Site Plan which is provided as Figure 2.

Photographs that were taken of the Site and immediate area during RMD's reconnaissance (detailed in Section 7.0) are provided in Appendix A.

2.1 Current Ownership

The Subject Property is currently owned by Wetu Enterprises. Ownership information is provided in the EDR Environmental Lien Search Report, discussed further in Section 5.1 (Appendix G).

2.2 Current Site Use and Improvements

The Subject Property is developed with four two-story buildings, one single-story building, and a parking lot. The buildings are currently occupied as follows:

- 1136 – 1146 and 1155 North Las Palmas Avenue – Company 3, a post-production company and
- 1128 North Las Palmas Avenue – vacant on the first floor and offices for Wetu Enterprises on the second story.

2.3 Current Use of Adjoining and Surrounding Properties

- NORTH: Ferguson Plumbing Supplies, an additional building used by Company 3, and Part Plus, an automotive repair facility;
- EAST: Light Iron, a post-production company;
- SOUTH: Buildings associated with the Los Angeles LGBT Center, an apartment building and an apartment building; and,

- WEST: North McCadden Place and office buildings beyond.

2.4 Physical Setting

Based on Subject Property observations and United States Geological Survey (USGS) topographic map of the area, the Subject Property is relatively level and is situated at an elevation of approximately 300 feet above mean sea level (amsl). The Subject Property is relatively flat with a slight regional slope to the south.

The Subject Property is located within the Coastal Plain of Los Angeles Groundwater Basin, within the Peninsular Ranges Geomorphic province. The regional geology is composed of alluvial fan deposits of Holocene and late Pleistocene age characterized unconsolidated gravel, sand, and silt deposited chiefly from flooding streams and debris flows (Yerkes and Campbell, 2005). The Hollywood Fault is inferred to be located approximately 0.75 miles to the northeast.

Information compiled from the Department of Toxic Substances Control (DTSC) website, https://www.envirostor.dtsc.ca.gov/ (Envirostor), indicates first groundwater is approximately 28.55 to 32.24 feet below the top of casing based on data collected in December 2015, from the Ava Hollywood Site (Global ID 60000422) located adjacent to the south and farther east of the Subject Property. Data collected from that site indicates that groundwater flows to the southwest (California Environmental, 2016).

The Silver Lake is located approximately 3 miles to the east of the Subject Property. The Subject Property is approximately 5.4 miles west of the Los Angeles River. RMD's review of Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Map (FIRM) indicates that the Subject Property is not located within a 100-year or 500-year flood zone. According to the United States Fish and Wildlife Service (FWS) National Wetlands Inventory, no wetlands are located on the Subject Property (Appendix B).

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

RMD reviewed reasonably ascertainable records documenting the history of the use and/or ownership of the Subject Property and adjoining properties. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, and Sanborn fire insurance maps is provided at the end of this section. Sources of information reviewed as part of this assessment are as follows.

3.1 Aerial Photographs

Digital aerial photographs dated 1928, 1938, 1948, 1952, 1954, 1964, 1970, 1977, 1981, 1989, 2002, 2005, 2009, 2012, and 2016 provided by EDR were reviewed by RMD. Copies of aerial photographs are included in Appendix C.

3.2 Topographic Maps

EDR provided historic topographic maps with coverage of the Subject Property dated 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1926, 1948, 1953, 1966, 1972, 1981, 1991, and 2012. Copies of the topographic maps are included in Appendix D.

3.3 Fire Insurance Maps

EDR provided historic fire insurance maps with coverage of the Subject Property dated 1919, 1950, 1955, 1960, 1961, 1962, 1966, 1969, and 1970. A copy of the Sanborn Map report is included in Appendix E.

3.4 City Directories

EDR provided historic city directories for the years 1924 through 2014. Historical city directories, listed by street address, are frequently useful in documenting the historical occupancy of properties in urban or otherwise incorporated areas that have a significant history of developed commercial use. A copy of the City Directories Results is included in Appendix F.

3.5 Chronological Summary

A summary of the Subject Property history from the above sources is included below.

Table 3-1: Historical Document Review			
Period	**Source**	**Subject Property Description**	**Adjacent Site Descriptions**
1890s	1894 and 1896 Topographic Maps	The Subject Property does not appear to have structures.	A public right-of-way is located east of the Subject Property. The surrounding areas is developed with structures.
1900s	1900 and 1902 Topographic Map	There is little change in the Subject Property from the 1890s topographic map.	There is little change in the adjacent sites from the 1890s topographic map.
1910s	1919 Sanborn Map	The Subject Property is developed with residential structures.	The surrounding areas is developed with residential structures.
1920s	1920, 1921, 1924, and 1926 Topographic Maps 1928 Aerial Photograph 1924 and 1929 City Directories	The Subject Property is developed with residential structures. City Directory listings associated with the Subject Property are residential listings.	The surrounding areas is developed with residential structures. City Directory listings associated with the surrounding properties are residential listings.
1930s	1933 and 1937 City Directories 1938 Aerial Photograph	There is little change in the Subject Property from the 1928 aerial photograph. City Directory listings associated with the Subject Property are residential listings.	There is little change in the surrounding areas from the 1928 aerial photograph. City Directory listings associated with the surrounding properties are residential listings.

Table 3-1: Historical Document Review			
Period	**Source**	**Subject Property Description**	**Adjacent Site Descriptions**
1940s	1942 City Directory 1948 Aerial Photograph	The Subject Property appears to be developed with residential buildings between N. Las Palmas and N. McCadden. A total of five commercial/industrial buildings appear to be located east of N. Las Palmas. City Directory listings associated with the Subject Property include residences and Hollywood Carpet Cleaning Company.	Residential and commercial/industrial buildings appear to be located north of the Subject Property. Commercial/industrial buildings appear to be located to the east. Residential buildings appear to be located to the south. Residential buildings appear to be located to the west of the Subject Property. City Directory listings associated with the surrounding properties are residential listings.
1950s	1950 and 1955 Sanborn maps 1951 and 1958 City Directories 1952 and 1954 Aerial Photographs 1953 Topographic Map	By 1950, a furniture cleaner and a carpet cleaner are located at 1128 N. Las Palmas. A vacant building and a workshop are located at 1134 N. Las Palmas. Machine shops are located at 1138 and 1144 N. Las Palmas. An "Assembling" shop was located at 1146 N. Las Palmas. Storefronts and a clothing manufacturer are located at 1145 and 1149 N. Las Palmas. The remaining buildings on the Subject Property are residential. By 1955, an electronics assembler is located at 1136 N. Las Palmas (formerly 1134 N. Las Palmas). The residences at 1155 N. Las Palmas have been demolished and replaced with a parking lot. City Directory listings associated with the Subject Property include residences, Technical Products Company (aircraft machine shop), Bishop Machine Works, Calmac Products, Dewer Company, Phillips & Hiss Company, Inc., and Hollywood Carpet Cleaning Company.	In the 1950s, a newspaper material service, a cosmetics lab, a clothing manufacturer, and residences are located to the north of the Subject Property. Residences are located to the west. A foundry, residences, and office buildings are located to the south. A machine shop is located to the east of the Subject Property. City Directory listings associated with the surrounding properties include residences, Edward Warnes Plumbing (1217 N. Las Palmas), Sun Color Plate Company (1159 N. McCadden), Hollywood Aluminum & Brass Foundry (1134 N. McCadden), and AE Petersen Pattern Shop (1119 N. Las Palmas).

Table 3-1: Historical Document Review			
Period	**Source**	**Subject Property Description**	**Adjacent Site Descriptions**
1960s	1960, 1961, 1962, 1966, and 1969 Sanborn maps 1962 and 1967 City Directories 1964 Aerial Photograph 1966 Topographic Map	By 1960, a machine shop is located at 1155 N. Las Palmas. Storefronts and residential buildings are located on the remaining portion of the Subject Property between N. Las Palmas and N. McCadden. There is no change in Subject Property east of N. Las Palmas from the 1955 Sanborn map. Between 1966 and 1969 all of the residential buildings on the Subject Property have been demolished and replaced with a parking lot. City Directory listings associated with the Subject Property include residences, Technical Products Company (aircraft machine shop), Dewer Company, Academy Films, Bishop Machine Works, Calmac Products,	During the 1960s, there is little change in the area north of the Subject Property. A sheet metal shop and woodworking shop are located to the east. Offices, a television camera factory, and woodworking shop are located to the west. The residences and offices south of the Subject Property were demolished between 1960 and 1964. City Directory listings associated with the surrounding properties include residences, Edward Warnes Plumbing (1217 N. Las Palmas), Marvin Hankins Photography (1236 N. McCadden), Hollywood Dog Tags, Inc. (1160 N. Las Palmas), Victors Drapery Workroom and Trail Trends (1159 N. McCadden), Hollywood Aluminum & Brass Foundry (1134 N. McCadden), and The Sherman Company (1140 N. Las Palmas).
1970s	1970 Sanborn map 1970 Aerial Photograph 1971 and 1976 City Directories 1972 Topographic Map	By 1970 the Subject Property is developed in its current configuration with six commercial/industrial buildings, including machine shops at 1138 and 1144 N. Las Palmas. City Directory listings associated with the Subject Property include Betmar Corp., Dewer Company, Technical Products Company, Wide Range Electronics, Concord Communication Systems, Proprietary Systems, and Medical Instruments Company.	There is little change in the surrounding areas from the 1969 Sanborn map. City Directory listings associated with the surrounding properties include residences, Acey Decy Electric Construction Company (1137 N. McCadden), State of California Employment Tax and Human Resources Development Department (1124 N. McCadden), and Edward Warnes Plumbing (1217 N. Las Palmas).

Table 3-1: Historical Document Review			
Period	**Source**	**Subject Property Description**	**Adjacent Site Descriptions**
1980s	1980, 1981, and 1986 City Directories 1981 Topographic Map 1981 and 1989 Aerial Photographs	There is little change in the Subject Property from the 1970 aerial photograph. City Directory listings associated with the Subject Property include Las Palmas Productions, Motionservo Company, Design Arts Studios Stage Rentals, and Trump Films, LTD.	There is little change in the surrounding areas from the 1970 aerial photograph. City Directory listings associated with the surrounding properties include residences, Gomillion Sound, Inc. (1137 N. McCadden), Renegade Films (1119 N. McCadden), First Quality Kitchens and Armstrong & Schnorr Landscape Architects (1220 N. McCadden).
1990s	1990, 1994, and 1999 City Directories	City Directory listings associated with the Subject Property include Bob Crewe Art Studio, CIS Hollywood, EFilm, Electronic Film Works, Las Palmas Productions, Inc., Technical Products, Inc., West Coast Photo, Motionservo, Inc., Lamonica Photo, and Composite Image Systems.	City Directory listings associated with the surrounding properties include residences, The McCadden Theater (1157 N. McCadden, Green Mike Recording Studio and 38 Fresh Recording Studio, Renegade Films, Penninsula Pictures, The Old Dick Company, BH Brats Productions, Electric Pictures Corp., Unistar International (1119 N. Las Palmas), KT Color Laboratories, Fortress 2 Studios, and Color Center Photo Labs (1160 N. Las Palmas), Matrix Alliance, Inc. , In Between Films, Wildcat Productions, Inc. and Gilman Sound (1137 N. McCadden), F&S Construction Company (1210 N. Las Palmas).

Table 3-1: Historical Document Review			
Period	**Source**	**Subject Property Description**	**Adjacent Site Descriptions**
2000s	2000, 2004, 2006, and 2009 City Directories 2002, 2005, and 2009 Aerial Photographs	There is little change in the Subject Property from the 1989 aerial photograph. City Directory listings associated with the Subject Property include Bob Crewe Art Studio, CIS Hollywood, EFilm, Electronic Film Works, Las Palmas Productions, Inc., Technical Products, Inc., West Coast Photo, Motionservo, Inc., Lamonica Photo, and Composite Image Systems.	There is little change in the surrounding areas from the 1989 aerial photograph. City Directory listings associated with the surrounding properties include residences, The McCadden Place Theater (1157 N. McCadden, Green Mike Recording Studio and 38 Fresh Recording Studio (1119 N. Las Palmas), Black Buddha Music, Inc. (1211 N. McCadden), Complete Comfort Heating & Air (1210 N. Cherokee), Poison Ivy Productions (1200 N. June), KTBC Photo & Digital, Inc., Fortress 2 Studios, and Color Center Photo Labs (1160 N. Las Palmas).
2010s	2012 and 2016 Aerial Photographs 2014 City Directory	There is little change in the Subject Property from the 2000s aerial photographs. City Directory listings associated with the Subject Property include CIS Composite Image Systems, EFilm, Technical Products, Inc., and West Coast Photo.	Between 2012 and 2016, the area to the south of the Subject Property has been regraded for development. There is other little change in the surrounding areas from the 2000s aerial photographs. City Directory listings associated with the surrounding properties include residences and The McCadden Place Theater (1157 N. McCadden).

Based on the review of historical records, by the late-1910s the Subject Property was developed for residentially. By the late-1940s, commercial/industrial buildings were located on the eastern portion of the Subject Property, east of North Las Palmas Avenue. The western portion of the Subject Property, between North McCadden Place and North Las Palmas Avenue was still residential. By the 1950s, the commercial/industrial buildings east of North Las Palmas Avenue were occupied by a furniture cleaner, a carpet cleaner, a workshop, two machine shops, an assembling shop, and an electronics assembling shop. By 1955, the residences at 1155 North

Las Palmas Avenue were demolished and replaced with a parking lot. Between 1966 and 1969 all of the residential buildings were demolished and replaced with a parking lot. By 1970 the subject property was in its current configuration with six commercial/industrial buildings and a parking lot. By 1980 the city directories indicated that the machine shops were no longer located on the Subject Property. Since the 1980s, tenants of the property appeared to be associated with photography and film. Based on typical chemical use, the historical use of the Subject Property as machine shops (1138 and 1144 North Las Palmas Avenue) and the more recent use of the Subject Property in film and photography are considered RECs for the Subject Property.

Based on the review of historical records, the surrounding areas were developed residentially since at least 1910. By the late 1940s the areas north and east of the subject property had commercial/industrial development. By the 1950s the commercial/industrial development in the surrounding areas included a machine shop located east of the Subject Property. In the 1960s the area to the east was operated by a sheet metal shop. The residential area and the foundry to the south were demolished. By the 1990s the majority of the commercial/industrial developments in surrounding areas were operated by companies associated with photography and film studios. Based on typical chemical use, the historical use of the area to the east as a machine shop in the 1950s and 1960s is considered a REC for the Subject Property.

4.0 REGULATORY DATABASE RECORDS REVIEW

4.1 Standard Environmental Record Sources

Consistent with ASTM E1527-13, customary and usual practices, RMD obtained and reviewed environmental databases and records to characterize the obvious and apparent uses of the Subject Property. RMD retained Environmental Data Resources, Inc. (EDR) to provide a database and records search report (Appendix B). RMD has reviewed the listings provided by the database report and evaluated whether these listings should be considered RECs, and discusses listings pertaining to the Subject Property, adjoining properties, or that are considered to be RECs in the sections below.

Environmental record sources required by the ASTM standard, and included in RMD's review, are listed below in Table 4-1. Other supplemental (non-ASTM) databases were included in the review as well.

Table 4-1: Summary of Environmental Database Information

Environmental Record	Search Distance (Miles)	No. of Sites Listed	Subject Property Listed?
Federal National Priorities Sites List (NPL)	1.0	0	No
Federal Delisted NPL Sites	1.0	0	No
Federal SEMS Sites (Former CERCLIS)	0.5	2	No
Federal SEMS Archive Sites (Former CERCLIS NFRAP)	0.5	0	No
Federal RCRA CORRACTS Facilities	1.0	0	No
Federal RCRA Non-CORRACTS TSD Facilities List	0.5	0	No
Federal RCRA Generators List	0.25	32	Yes
Federal Institutional Control / Engineering Control Registries (IC/EC)	0.5	0	No

Table 4-1: Summary of Environmental Database Information			
Environmental Record	Search Distance (Miles)	No. of Sites Listed	Subject Property Listed?
Federal Emergency Response Notification System (ERNS) List	Site	0	No
State / Tribal-Equivalent CERCLIS Sites	1.0	22	No
State / Tribal-Equivalent Landfill and Solid Waste Disposal Sites	0.5	1	No
State / Tribal-Equivalent Leaking Storage Tank and Spills, Leaks, Investigation and Cleanup Sites (LUST/SLIC)	0.5	47	No
State / Tribal Registered Storage Tank List	0.25	32	No
State / Tribal Voluntary Cleanup Sites (VCP)	0.5	6	No
State / Tribal Brownfields Sites	0.5	1	No

4.2 Additional Environmental Record Sources

The ASTM E1527-13 standard provides for review and analysis of additional environmental record sources during the performance of a Phase I ESA at the discretion of the environmental professional. Relevant factors in determining whether additional environmental records sources should be reviewed include, but are not limited to:

- The completeness of data provided by standard environmental record sources;
- whether additional environmental records sources are reasonably ascertainable;
- whether additional environmental record sources are useful, accurate, and complete in light of the records review objectives, and;
- Whether additional environmental record sources are customarily obtained pursuant to the type of commercial real estate transaction involved.

Table 4-2: Additional Environmental Record Sources			
Environmental Record	Search Distance (Miles)	No. of Sites Listed	Subject Property Listed?
U. S. Brownfields	0.50	3	No
Local Lists of Landfill / Solid Waste Disposal Sites	0.50	0	No
Local Lists of Hazardous Waste / Contaminated Sites	1.00	10	No
Local Lists of Registered Storage Tanks	0.25	53	No
Local Land Records	Site	2	No
Records of Emergency Release Reports	Site	0	No

4.3 Findings

4.3.1 Subject Property

The Subject Property has been identified in a number of databases including:

- 1128 North Las Palmas Avenue – The Subject Property, as Doyle Truman, is listed in the EDR HIST CLEANERS database. The Subject Property was listed as a rug cleaning and repair business in 1945.
- 1128 North Las Palmas Avenue – The Subject Property, as West Coast Photo Inc., is listed in the RCRA-SQG, FINDS, ECHO, HWTS, and HAZNET databases. Hazardous waste generated by West Coast Photo, Inc. included photochemicals and photo processing waste, metal sludge, and other inorganic solid waste between 1995 and 1998.
- 1138 North Las Palmas Avenue – The Subject Property, as Motionservo, Inc., is listed in the HWTS and HAZNET databases. Motionservio, Inc., generated laboratory waste chemicals and detergent/soap in 1997.
- 1140 Las Palmas Avenue – The Subject Property, as Sunset Las Palmas Studios, is listed in the HWTS and HAZNET databases. Sunset Las Palmas Studios generated 2.3 tons of asbestos containing waste in 2018.

- 1144 North Las Palmas Avenue – The Subject Property, as Las Palmas Productions, Inc., is listed in the HWTS and HAZNET databases. Hazardous waste generated by Las Palmas Productions, Inc., a motion picture and video production business, included halogenated solvents, liquids with halogenated organic compounds >1,000 mg/L, and other organic solids between 1992 and 2003.
- 1144 North Las Palmas Avenue – The Subject Property, as EFilm, is listed in the HWTS and HAZNET databases. Hazardous waste generated by EFilm, a photographic film, paper, plate, and chemical manufacturing business, included halogenated solvents and other organic solids between 2002 and 2005.
- 1145 North Las Palmas Avenue – The Subject Property, as Dawson B J, is listed in the EDR Hist Auto database in 1942.
- 1136 North Las Palmas Avenue – The Subject Property, as Reid Miles, Inc., is listed in the EMI database. The operations were overseen by the South Coast Air Quality Management District (SCAQMD) in 1987 and 1990. No additional information was provided in the listing.

The use of hazardous materials and the generation of hazardous waste by the historical tenants, including the historical automotive and photography/film tenants at 1128, 1138, 1144, and 1145 North Las Palmas Avenue, is a REC for the Subject Property.

4.3.2 Surrounding Areas

There are several listings in the EDR report for off-site facilities within applicable ASTM search radii. Several of these listings (i.e., small quantity hazardous waste generators, registered and historical underground storage tanks [USTs], solid waste disposal sites, permitted hazardous waste facilities), by themselves, are not necessarily indicative of a contamination concern. The following adjacent and vicinity sites with regulatory oversight were evaluated for potential impacts to the Subject Property.

- Print Shop, 1161 North Las Palmas Avenue – This listing is located adjacent, north of the of the Subject Property (upgradient). This site is listed in the HAZMAT database as "inactive." The listing does not indicate what chemicals were used and stored on-site.
- Westside Bindery, 1156 North Las Palmas Avenue – This listing is located adjacent, north of the of the Subject Property (upgradient). This site is listed in the HAZMAT database as "inactive." The listing does not indicate what chemicals were used and stored on-site.

- KT Image, Inc., 1160 North Las Palmas Avenue – This listing is located adjacent, north of the of the Subject Property (upgradient). This site is listed in the HAZMAT database as "inactive." The listing does not indicate what chemicals were used and stored on-site.
- Federal Express, 6666 West Lexington Avenue – This listing is located adjacent, east (cross-gradient) of the Subject Property. The site is listed in the HAZMAT, SWEEPS UST, and CA FID UST databases. The site has active underground storage tanks (USTs). No violations, spills, or leaks were noted. The listings do not indicate what chemicals were used and stored on-site.
- Ulsh Irene, 1157 North McCadden Place – This listing is located approximately 70 feet northwest (crossgradient) of the Subject Property. The site is listed in the EDR HIST CLEANERS database. The site was listed as a clothes cleaning, pressing, and repair business in 1929.
- Boyles-Snyder Company, Inc., 6610 West Lexington Avenue – This site is located approximately 610 feet east (cross-gradient) of the Subject Property. The site is listed in the HAZMAT, RCRA-SQG, FINDS, ECHO, ENVIROSTOR, and LA CO SITE MITIGATION databases. Hazardous waste generated at the site is associated with electroplating, plating, polishing, anodizing, and coloring. The State Water Resources Control Board has issued an order to plating facilities (Order WQ 2019-0045-DWQ) requiring an investigation of the use and/or storage of per- and polyfluoroalkyl substances (PFAS) at the site.
- Bridge Projects, LLC, 6820 Santa Monica Boulevard – This site is located approximately 735 feet southwest (downgradient) of the Subject Property. The site is listed in the CPS-SLIC database and identified as Global ID T10000015390. The site has been occupied by various commercial and light industrial tenants including a photo lab, machine shop, and light manufacturing. Since 2016, several investigations have identified PCE, TCE, benzene and chloroform beneath the site. Site assessment is being completed under the oversight of the RWQCB.

Based on the review of the surrounding sites, the historical use of hazardous materials and generation of hazardous wastes at the adjacent sites to the north and east is a potential concern for the with respect to potential impacts to the Subject Property.

A number of other facilities appear on databases indicating potential contamination concerns (e.g., Leaking Underground Storage Tank [LUST]; Spills, Leaks, Investigation, and Cleanup [SLIC]). Due to the regulatory status (closed case), distance, or downgradient locations, RMD did

not identify any additional nearby facilities that would be a REC with respect to the Subject Property.

4.3.3 Orphan Sites

Unmappable sites cannot be plotted due to inaccurate or incomplete addresses.

Two unmappable listings were identified in the EDR Report. Unmappable sites cannot be plotted due to inaccurate or incomplete addresses.

- Hollywood Dry Cleaners, 8505 Santa Monica Boulevard – This site is located approximately two miles west of the Subject Property and listed in the DRYCLEANERS database. Based on the location, RMD does not consider this listing to be a REC with respect to the Subject Property.
- Peter's Cleaners, 8305 Santa Monica Boulevard – This site is located approximately two miles west of the Subject Property and listed in the DRYCLEANERS database. Based on the location, RMD does not consider this listing to be a REC with respect to the Subject Property.

5.0 REGULATORY AGENCY RECORDS REVIEW

Records were reviewed associated with the Subject Property to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, was obtained.

5.1 Environmental Liens Search

RMD reviewed the environmental lien report provided by EDR. No environmental liens or AULs are associated with the Subject Property. The Environmental Lien and AUL Search is included in Appendix G.

5.2 Property Tax Map Search

EDR performed a property tax map search for the Subject Property. A copy of the property tax map is presented in Appendix H.

5.3 Building Permit Search

EDR performed a building permit search for the Subject Property and adjoining areas and found records from 1996 through the present. Building permits associated with the Subject Property include routine plumbing, electrical and HVAC upgrades, non-structural interior remodeling, fire sprinkler system installation, and ADA access improvements.

On March 8, 2021, RMD completed a search of the City of Los Angeles online Building Permit database for records related to the Subject Property (Appendix J).

1128 North Las Palmas Avenue – A new building permit was issued in 1923 for storage and another in 1924 for use as a carpet cleaning company. A certificate of occupancy was issued for a manufacturing shop was issued in 1954.

1134 North Las Palmas Avenue – A building permit was issued in 1950 to demolish a residence on the Subject Property.

1136 North Las Palmas Avenue – A building permit was issued in 1946 to relocate a machine shop to the Subject Property to replace the residence that was located on-site. In 1950, a new warehouse was permitted. In 1965, additions were made to the building that was used for offices.

1138 North Las Palmas Avenue – A building permit was issued in 1947 for a new building to be used as a machine shop and office. An addition was made to the machine shop in 1952.

1139 North Las Palmas Avenue – A building permit was issued in 1945 for a garage apartment.

1144 North Las Palmas Avenue – A new building permit was issued in 1926 for a private garage.

1145 North Las Palmas Avenue – A new building permit was issued in 1924 for a private garage. In 1966, a parking lot was constructed at 1145 North Las Palmas Avenue and 1138-1144 North McCadden Place.

1149 North Las Palmas Avenue – A new building permit was issued in 1924 for a paint shop. In 1937, a residence was replaced with an office building on the Subject Property. In 1966, the residence on the Subject Property was demolished.

1155 North Las Palmas Avenue – A new building permit and certificate of occupancy were issued in 1955 for a light manufacturing/machine shop. In 1965, additional were made to the building and the use was listed as office and manufacturing.

1138/1140 North McCadden Place – Building permits were issued in 1925 for a "bungalow court" and a garage. In 1953, the residence and garage were relocated off-site.

1150 North McCadden Place – A building demolition permit was issued in 1963 to remove the residence that was on the Subject Property.

5.4 Oil and Gas Wells or Pipelines

An online search was conducted utilizing websites for California Department of Conservation, Geologic Energy Management Division (CalGEM) and National Pipeline Mapping System (NPMS). No oil or gas wells or pipelines were located within 500 feet of the subject property (Appendix J).

5.5 Local Environmental Health Department and/or State Environmental Agency Records

5.5.1 City of Los Angeles Fire Department

Requests for information from the Hazardous Materials Department and the UST Department of the City of Los Angeles Fire Department (LAFD) were submitted on February 16, 2021 (Appendix J). As of the date of this report, a response has not been received by the LAFD.

5.5.2 Los Angeles County Department of Environmental Health

The Los Angeles County Department of Environmental Health (SCDEH) does not have records associated with the Subject Property (Appendix J).

5.5.3 Envirostor

DTSC does not have records associated with current addressed associated with the Subject Property (Appendix J).

RMD also completed a search of the DTSC web-based data management system (Envirostor) on March 12, 2021. There are no listings associated with the Subject Property.

5.5.4 GeoTracker

The Regional Water Quality Control Board (RWQCB) does not have records associated with current addressed associated with the Subject Property (Appendix J).

RMD completed a search of the RWQCB web-based data management system (GeoTracker) on March 12, 2021. There are no listings associated with the Subject Property

5.5.5 Air Quality Management District

The SCAQMD provided records associated with the Subject Property. A review of the information provided indicates that historical permits to operate a film cleaning machine were granted to Las Palmas Productions, Inc. and EFilm, LLC at 1144 North Las Palmas Avenue (Appendix J). The permits are no longer active.

6.0 USER PROVIDED INFORMATION

6.1 User Questionnaire

ASTM E1527-13 defines "User" as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property. RMD understands that BARDAS is the User as defined by ASTM E1527-13. ASTM E1527-13 specifies that certain tasks associated with identifying potential recognized environmental conditions at the Subject Property should be performed by the User and provided to the Environmental Professional (i.e., User Responsibilities). Information provided by Mr. Collin Monsour from BARDAS is summarized in Table 6-1 below. A copy of the completed User Questionnaire is included in Appendix K.

Table 6-1: User Provided Information

Data Type	Information Provided
Environmental Liens, Activity and Use Limitations (AUL), Title Records	Information regarding Liens and AULs is provided in Section 5.1.
Specialized User Knowledge	Mr. Monsour indicated that he had no specialized knowledge related to the Subject Property.
Commonly Known or Reasonably Ascertainable Information	Mr. Monsour indicated that he had no specialized knowledge related to the Subject Property.
Valuation Reduction for Environmental Issues	The User is responsible to perform the additional inquiries regarding purchase price to the fair market value of the Subject Property.
Reason for Performing Phase I ESA	This Phase I ESA was performed at the request of BARDAS in anticipation of an acquisition involving the Subject Property, and for the User to qualify for defenses to CERCLA liability.
Other User Provided Information	The User provided a historical report for the site adjacent to the Subject Property to the south.

6.2 Historical Reports

6.2.1 Adjacent Site – Draft Removal Action Workplan, August 2016 and Removal Action Completion Report, June 2017

A Draft Removal Action Workplan (RAW) prepared by California Environmental (CE) for the site located adjacent to the south and farther east of the Subject Property was submitted to DTSC for review. Impacts to the soil, soil gas and groundwater of tetrachloroethene (PCE) and trichloroethene (TCE) were detected in the areas south and east of the Subject Property (Appendix K). CE indicated that the source of some of the PCE and TCE impacts to the site could have originated off-site to the north. The Subject Property is located north and northwest of the site. Groundwater data collected suggested the presence of PCE above regulatory screening levels beneath the Subject Property.

Between November 2016 and June 2017, the site was excavated to remove soil impacted by volatile organic compounds (VOCs) that include PCE and TCE and total petroleum hydrocarbons (TPH) as shown in the excerpts of the Removal Action Completion Report (RACR) in Appendix K. A 500-gallon UST was uncovered during excavation and removed during the implementation of the RAW. Groundwater sampling conducted after the excavation, indicated stable or decreasing concentrations of VOCs with the highest concentrations in the upgradient well. DTSC certified the remediation of the site on June 28, 2018.

7.0 SITE RECONNAISSANCE

The Subject Property was inspected on March 17, 2021 by RMD representative, Ms. Paola Gomez-Birenbaum, a qualified environmental professional. Weather conditions at the time of the inspection were sunny with temperatures of approximately 63 degrees Fahrenheit. Site reconnaissance consisted of a walk-through of the Subject Property. Photographs are provided as Appendix A. The following findings are reported as observed during the site inspection.

7.1 On-Site Interviews

On March 17, 2021, during the site reconnaissance, the following individuals were interviewed.

- 1136 – 1146 and 1155 North Las Palmas Avenue – Mr. Scott Carpenter, Facility Director, Company 3
- 1128 North Las Palmas Avenue – Ms. Kay Mills, Property Manager, Wetu Enterprises

Information provided during the interview is included in the following sections as appropriate.

7.2 Storage Tanks

No ASTs or evidence of USTs were observed in the remaining areas of the Subject Property during the site reconnaissance.

7.3 Hazardous Substances and Petroleum Products

A disconnected air tank that was part of the former fire suppression system is still bolted to the wall at 1144/1146 North Las Palmas Avenue (Photograph 2).

Film reels (containing nitrate) is only stored and used in 1155 North Las Palmas Avenue. The film reels are stored in a fire cabinet in an area of the building designated for film reel (Photographs 9 and 10). Two 60-pound drums of 3M Novec 8200, a biodegradable cleaner for nitrate reel, is stored in this area of the building (Photograph 11). The film reels are transported inside one of four small drums currently stored in the nitrate area (Photograph 12). A film cleaning machine has been set up in 1155 North Las Palmas Avenue but has not been used yet due to a reduction of business in the last year. No waste is currently generated with the work associated with the film reel.

A potential photograph/film development room was located at the first floor of 1128 North Las Palmas Avenue (Photograph 25). Ms. Mills indicated that since 1992 the various tenants have operated at photography labs. The first floor has been vacant for approximately 2 years.

Chemicals associated with film development and the waste generated during development are considered hazardous materials and hazardous waste, respectively.

Mr. Carpenter indicated that at the end of the last remodel was completed some unused paint was transported off-site as waste.

7.4 Solid Waste

Two large dumpsters for landfill waste and recycling were observed on the southwestern corner of the parking lot (Photograph 20).

7.5 Hydraulic Equipment

Hydraulic equipment was not observed at the Subject Property.

7.6 Polychlorinated Biphenyls (PCBs)

RMD observed a pole-mounted transformer on the northern portion of the parking lot (Photograph 17). A pole-mounted transformer was located adjacent to Subject Property to the east of the parking lot (Photograph 33). No staining was observed on the ground immediately beneath the transformers.

No other equipment with potential PCBs was observed.

7.7 Drains

Drains were not observed on the Subject Property during the site reconnaissance.

7.8 Wastewater and Septic Systems

No evidence of septic systems was observed on the Subject Property during the site reconnaissance.

The sanitary wastewater generated in the restrooms of the Subject Property is part of the sewer system operated by the Los Angeles Department of Water and Power.

7.9 Wells

Wells were not observed on the Subject Property during the site reconnaissance.

7.10 Pits and Ponds

Pits and ponds were not observed on the Subject Property during the site reconnaissance.

7.11 Other Observations

A hood the removes heated air generated by the cooling system is located at 1144/1146 North Las Palmas Avenue (Photograph 3). A chiller for the air cooling system is located at 1155 North Las Palmas Avenue (Photograph 15).

8.0 CONCLUSIONS AND OPINIONS

The scope of services was to perform a Phase I ESA in a manner generally consistent with the ASTM Standard Designation: E-1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and the U.S. Environmental Protection Agency's Standards and Practices for All Appropriate Inquiries (AAI), 40 CFR, Part 312.

RMD performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the Subject Property located 1128 through 1146 and 1155 North Las Palmas Avenue in Los Angeles, California. Historical addresses associated with the Subject Property include 1138 through 1150 North McCadden Place and 1128 through 1148 and 1139 through 1155 North Las Palmas Avenue. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed the following RECs with respect to the Subject Property:

- There was historical use of the Subject Property as machine shops at 1138 and 1144 North Las Palmas Avenue in the 1950s through at least 1970. Hazardous materials and hazardous waste generated in the operations of machine shops include chlorinated solvents.
- There was historical use of the Subject Property as an automotive repair facility at 1145 North Las Palmas Avenue in the 1940s. Few records are available to indicate the use or generation of hazardous materials or waste at this facility.
- There was historical use of the Subject Property for photography/film-related activities at 1128, 1138, and 1144 North Las Palmas Avenue. Documented hazardous waste generation included halogenated solvents, which can include chlorinated solvents and photographic film.
- There was historical use of the area adjacent to the east as a machine shop/sheet metal shop in the 1950s through at least 1970.
- There was historical generation of hazardous waste adjacent to the north and east of the Subject Property. The database listings did not indicate the waste being generated but as imaging and "print" shops, the chemical use is likely to be similar to include halogenated solvents.

De Minimis Conditions

De minimis condition - A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions or controlled recognized environmental conditions. No de minimis conditions were identified during this assessment.

Controlled Recognized Environmental Condition

Controlled Recognized Environmental Condition - a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). This assessment has revealed no evidence of a controlled recognized environmental condition.

Historic Recognized Environmental Conditions

Historic recognized environmental conditions are defined as environmental conditions that in the past would have been considered a recognized environmental condition, but the environmental condition has been remediated under conditions acceptable to the responsible regulatory agency. This assessment has revealed no evidence of historical recognized environmental conditions in connection with the Subject Property.

Vapor Migration

In general, EPA does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion). ASTM E1527-13 defines "migrate" and "migration" as referring to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600 – Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transaction; however, nothing in ASTM E1527-13 should be construed to require application of the Guide E2600 standard to achieve compliance with all appropriate inquiries.

Based on the historical use of the property and surrounding areas to the north and east, there is a potential for vapor migration at the Subject Property if releases of chlorinated solvents and halogenated solvents have occurred to the subsurface.

Data Gaps

The ASTM Standard requires that the report identify the following: 1) obvious uses of the subject property since 1940 or first development, whichever is earlier; and 2) significant "data gaps" which affect the ability of the Environmental Professional to identify recognized environmental conditions. A data gap by itself is not inherently significant. The report is also to include information on the sources consulted to address the data gaps.

The following data gap has been identified during the preparation of this Phase I ESA:

- The LAFD, in particular the Hazardous Material Department, did not respond to the request for records associated with the Subject Property. Although there are other sources of information regarding hazardous waste generation at the Subject Property, this can be considered a significant data gap if the LAFD records show the use of other hazardous materials on-site or any cleanup efforts that have been conducted.

10.0 ENVIRONMENTAL PROFESSIONALS

10.1 Signatures of Responsible Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Paola Gomez-Birenbaum, P.G.
Senior Geologist

Kirsten Duey
Principal Engineer

10.2 Qualifications of Responsible Environmental Professionals

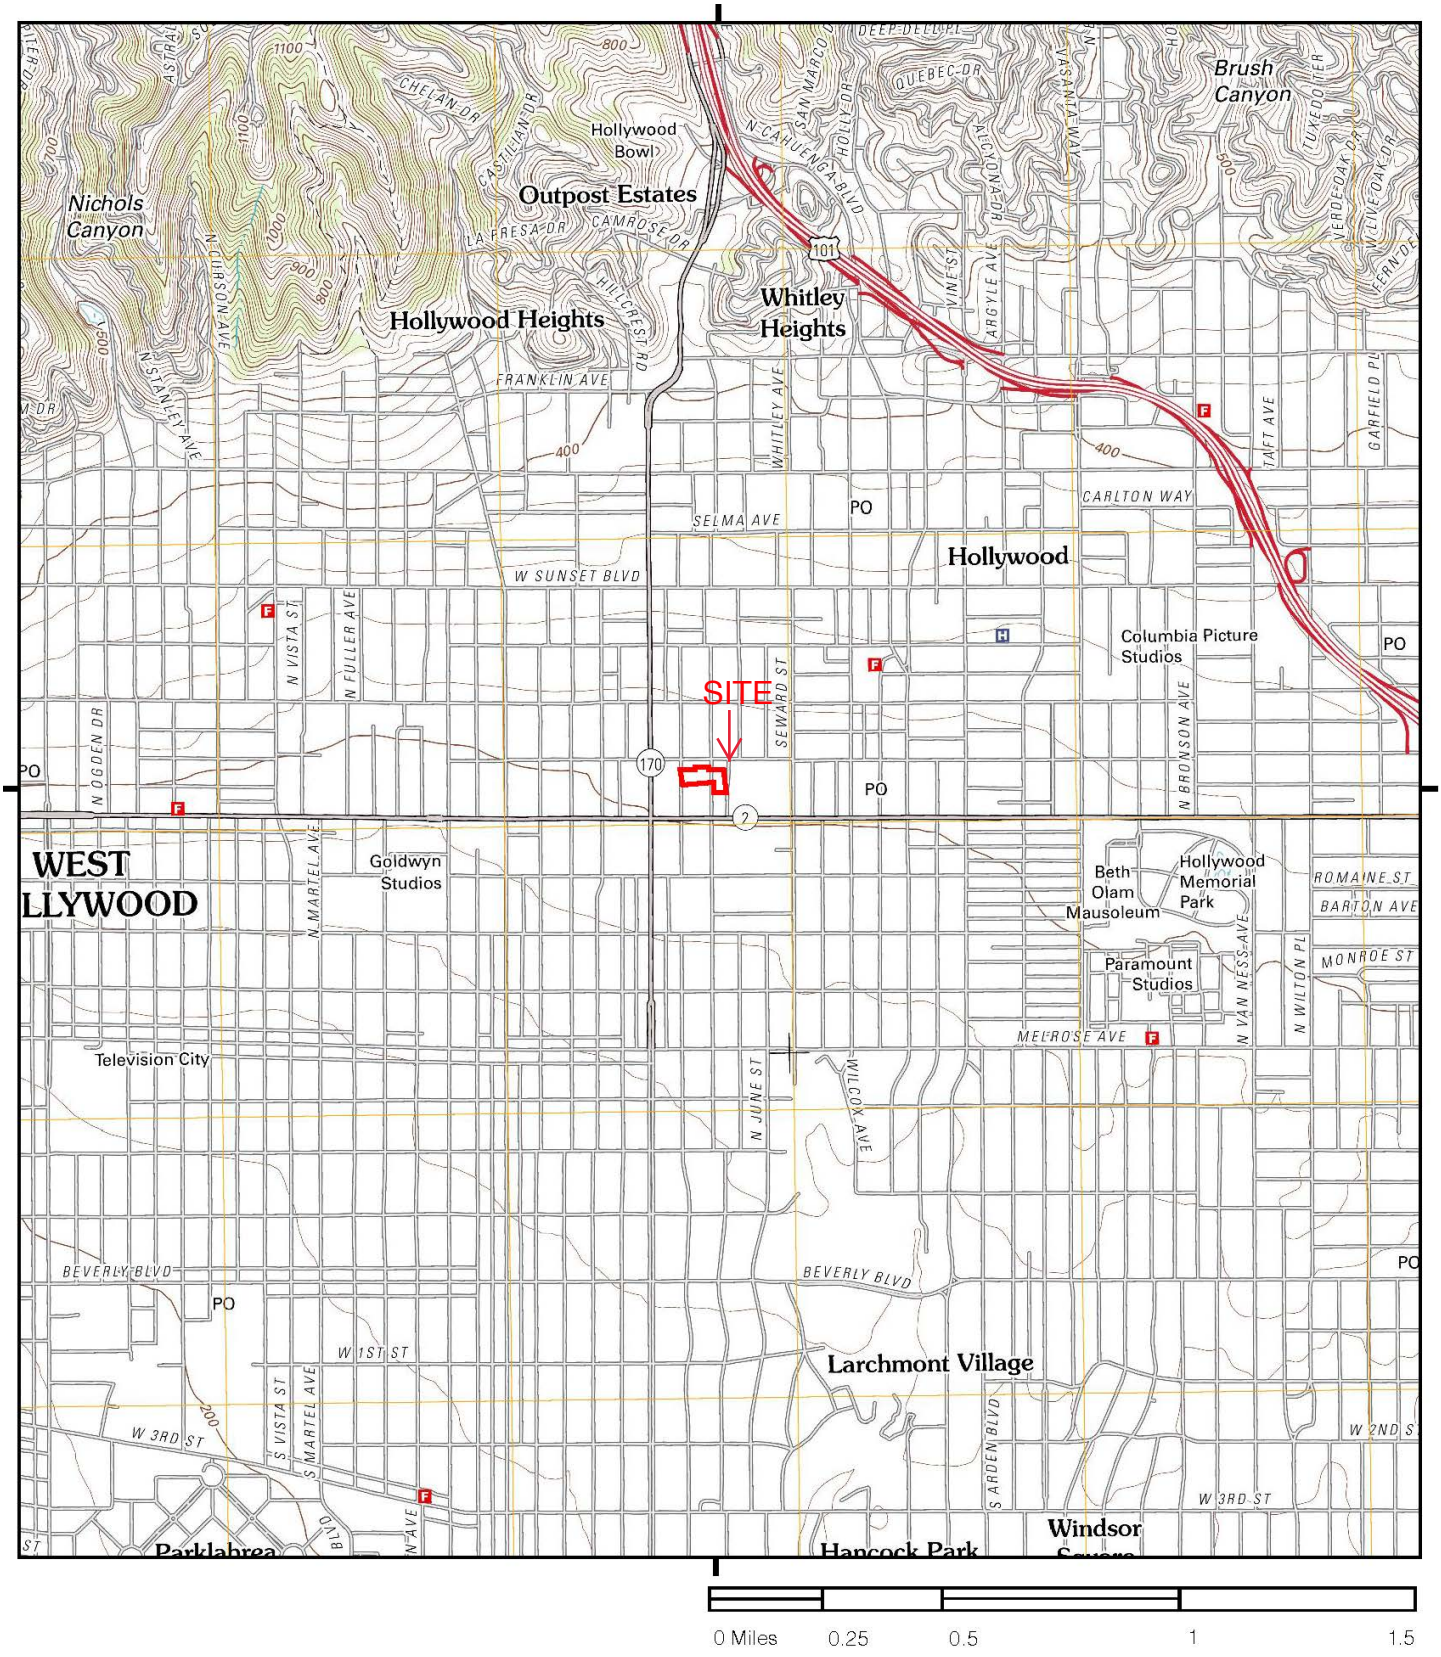

Ms. Gomez-Birenbaum has a Master of Science Degree in Earth Sciences. She is a State of California licensed Professional Geologist (Number 9095), has been performing environmental site assessment services for over 15 years and is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

Ms. Duey has a Bachelor of Science Degree in Chemical Engineering. She has been performing environmental site assessment services for over 20 years and is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

11.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM E 1527-13

An evaluation out of the ASTM E 1527-13 scope was not included in this assessment.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/28/2020 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

LAUSD- BANCROFT MIDD	929 N LAS PALMAS AVE	S 1/8 - 1/4 (0.235 mi.)	AC251	648

EPA ID:: CAD982037681

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 30 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 22 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 14 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 32 CA UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 10/26/2020 has revealed that there are 6 CA VCP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Hazardous waste / Contaminated Sites

CA CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CA CERS HAZ WASTE list, as provided by EDR, and dated 10/19/2020 has revealed that there are 9 CA CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 17 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 47 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUSRAP: DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

A review of the FUSRAP list, as provided by EDR, and dated 08/08/2017 has revealed that there is 1 FUSRAP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/04/2020 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

CA DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the CA DRYCLEANERS list, as provided by EDR, has revealed that there are 10 CA DRYCLEANERS sites within approximately 0.25 miles of the target property.

CA EMI: Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies

A review of the CA EMI list, as provided by EDR, and dated 12/31/2018 has revealed that there is 1 CA EMI site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
REID MILES INC	1136 N LAS PALMAS AV	0 - 1/8 (0.000 mi.)	B3	9
Facility Id: 37286				

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 5 CA HAZNET sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 16 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 9 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Gepaid: CAL000107799
TSD EPA ID: CAL000074670
CA Waste Code: 171 - Metal sludge (Alkaline solution (pH >= 12.5) with metals)
Disposal Method: R01 - Recycler
Tons: 0.0291

Year: 1995
Gepaid: CAL000107799
TSD EPA ID: CAD981402522
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: R01 - Recycler
Tons: 0.0135

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-18-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine compliance inspection was unable to be conducted by the due date due to LAFD response and operational restrictions to the COVID-19 crisis. LAFD CUPA Inspector Swartz unable to attend tank test due to COVID-19. Inspector Swartz returned to site to conduct inspection. Consent to enter, inspect and take photographs was given by Alberto Correa, Manager. Monitoring system certification was conducted on 4/1/20. Monitoring certification was performed by Jose Rodriguez of CME. Tester provided the following certifications: JOSE RODRIGUEZ WITH CAL MAINTENANCE. ICC: 9013849 EXP: 2/4/2021 VR: #A29851 EXP: 1/07/2022 VMI: #2571 exp: 8/14/2020 The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring [Truncated]

Environmental Interest/Information System:

FUJI FILM PROFESSIONAL LAB (Continued) **1000244851**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-31-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (Jerry Puckett, Manager). Observed the facility and inspected hazardous materials storage. Annual employee safety training records were maintained. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 11/26/2019. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. 87Backup, 91 & Waste Oil spill buckets are not 5 gallon capacity. CORRECTIVE ACTION: Install or repair 87Backup, 91 & Waste Oil spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verfiy compliance. Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	10-15-2018
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes,

LOGICAL LINK (Continued) **S101586390**

engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 11/22/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Fill tube shut off for all three tanks exceed 95% : 87 tank set at 98%, 91 Tank set at 97% & Diesel Tank set at 99%. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above(all tanks at no more than 95%. Submit verification.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 54144
Site Name: ORI'S TIRE & SERVICE CENTER/GOOD YE
Violation Date: 05-20-2020
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/20/2020. OBSERVATION: One 250 gallon container of used oil and two 55-gallon containers of used oil filters, located towards the storage area closest to the office, were observed without a hazardous waste label. CORRECTIVE ACTION: Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled. Labels were provided at the time of inspection.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 54144
Site Name: ORI'S TIRE & SERVICE CENTER/GOOD YE
Violation Date: 05-20-2020
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: OBSERVATION: Oil spill was observed on the ground located in the hazardous waste storage area. Cardboard material was observed on the ground as an absorbent. CORRECTIVE ACTION: Submit photos/documentation to the CUPA demonstrating the spill has been properly removed and managed and that the cardboard was discarded as hazardous waste.
Violation Division: Los Angeles County Fire Department

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-15-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: good to go portal 9-11-13
Eval Division: Los Angeles City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-28-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Chris Hernandez. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were maintained. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.
Eval Division: Los Angeles City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-17-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection Report Consent to enter, inspect and take photographs was given by: Steve Ricotta Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. Update facility information through CERS to include a a site map, contingency plan, and hazardous materials inventory. 2. Confirmed with Steve Ricotta Cellulose Nitrate has been removed from the property. Add propane for fork lifts to your existing inventory NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes:	LAFD CUPA Inspector Bystrom, on site this date to conduct routine inspection of your underground storage tank(s). Consent to enter, inspect and take photographs was given on this date by Jeffery Harris, Street Services Supervisor. Monitoring system certification was not conducted at this time. Monitoring certification was performed by Richard Blankenbiller, Clean Fuels. Tester provided the following certifications: ICC: 5012767. EXP: 12/15/2019 VR: #A20929 EXP: 10/1/2021 VMI: #3041 EXP: 3/27/2020 The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the UST system was compared to the conditions of the operating permit. Property Owner: DEPT [Truncated]

Eval Notes:	Inspector Bystrom reviewed violations observed during the 12/2/19 inspection and observed the following: 1) CERS Violation - Reviewed 1/7/2020 CERS UST submittal. Tank Info has been corrected, however, submittal not accepted because site map is incorrect. OBSERVATION: UST information is not current in CERS. Monitoring Site plan shows incorrect vent location(south of office building), no 208 Sensors shown in UDCs, & incorrect piping to UDCS. CORRECTIVE ACTION: Update Monitoring site map to show correct location of vent piping(west of

CITY OF LA - PW - STREET SERVICES (Continued) **S123504500**

tanks next to building), 208 sensors in all UDCs, correct piping to UDCs(Northwest UDC has Diesel & Northeast UDC is the only gas dispenser). Immediately update the required information in CERS and submit for review by the CUPA. Any change of information must be updated in CERS within 30 days of the change. 2) No monitoring system certification, spill bucket or overfill test results submitted to LAFD CUPA within 30 days. 3) No copy of [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-26-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by JOSE RAMOS - Owner. Contact Information: hollywoodwelding@yahoo.com Observed the

HOLLYWOOD WELDING WORKS (Continued) **S123543535**

facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-07-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection Report Consent to enter, inspect and take photographs was given by: flor castrejon Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. Update your facility information annually through CERS. 2. Update your hazardous materials inventory per the new Cal EPA requirements. Instructions have been provided with this report to assist you. 3. Provide a contingency plan with your submittal. A contingency plan is missing from your previous submittal NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-27-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR DAVID TU on site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by GENERAL MANAGER DAVE SLOANE. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the on site hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the chang

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-27-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection Report Consent to enter, inspect and take photographs was given by: Martin Rodriguez Documents uploaded to CERS were reviewed and field verified. The following is a list items that need to be corrected: 1. Update your facility information through CERS fort the current year (2018). 2. CERS submittals are due annually between January 1st and March 1st NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires business that store, uses or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement: **** Annual submission of a hazardous materials business plan to CERS by March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. For new CERS users, please follow the [Truncated]

Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Acetone, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The site, located at the northwest corner of Seward Street and Barton Avenue in Hollywood, was formerly used for film processing activities from 1926 until 2002. The site was occupied by approximately eleven structures (Buildings 1 through 11), parking lots, and an interior courtyard. Film processing and associated activities were conducted in three main buildings; Buildings 1, 2 and 3. The majority of the chemicals that had been used in film processing were stored in the basement of Buildings 2 and 3. Historically, the chemicals used for film processing included isopropyl alcohol, acetone, 1,1,1-Trichloroethane (1,1,1-TCA), Perchloroethlylene (PCE), ammonium thiosulfate, and proprietary development solutions. The remaining buildings were used as offices and for other purposes, such as general storage, a maintenance shop, an electrical shop, and for archiving films. Buildings 1 through 11 were demolished between April and August of 2005. The site is presently vacant and awaiting commercial redevelopment.

Property Description:	The property is part of a commercial shopping center with several small retail businesses. An adjoing parcel completes the shopping center with larger retailers such as Rite Aid and Radio Shack. The property appears to be vacant in 1919. From 1955 through 1962, the property appears to be part of a meat packing and frozen foods facility. A commercial building is depicted on the property from 1972, and contains a dry cleaning uses that involve the handling of hazardous materials.

Past Use: Multistory: Not reported
Property Description: The property is part of a single-story commercial building, with a front fence and gate. Adjacent uses include a single-story restaurant building, a plant/tree garden shop and an automobile repair business. Records identified previous industrial/commercial/residential uses. In 1951, the property was occupied by Atkin's Lab and Photochemicals and in 1992 it was occupied by Hal Mann Laboratories. Past uses of the property (photochemical processes) have involved the use of hazardous materials at the property.

Latitude: 34.086356
Longitude: -118.333152
Case Type: Cleanup Program Site
Case Worker: BA
Local Agency: Not reported
RB Case Number: 1135
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Tetrachloroethylene (PCE), Toluene, Trichloroethylene (TCE), Xylene, Cyanide, Nitrate, Arsenic, Chromium, Diesel
Site History: The site is owned by Laser-Pacific Media Corporation, a subsidiary of Eastman Kodak Company, and is located on the western side of the 800 block of North Seward Street in Los Angeles, California. The approximately 39,000 sq. ft. site includes three parcels. The northernmost parcel is developed with two buildings located at 823 - 835 North Seward Street. The southern two parcels are used as a parking area but one of the parcels is not owned by Laser-Pacific. The two buildings house a sound editing facility and a motion picture film developing and finishing facility, respectively. The properties and two buildings were developed as a one-story building by

LASER - PACIFIC MEDIA COMPANY (Continued) **S106487372**

Technicolor in 1927 for use as a film laboratory. Use of photofinishing and other chemicals, including halogenated solvents, has been documented for the site. The use of tetrachloroethene (PCE) in a wet-gate printer located at 835 North Seward Street has been documented. According to site investigation reports submitted to the Regional Board, subsurface site investigations have been conducted since 2002. However, a Phase I environmental site assessment (ESA) was reportedly conducted in 1992. The site investigations involved soil gas survey, soil and groundwater sampling and groundwater monitoring well installation and indicated that the soil and groundwater beneath the site are contaminated with PCE, trichloroethene (TCE) and other volatile organic compounds (VOCs), heavy metals, aromatic hydrocarbons such as xylenes, diesel range petroleum hydrocarbons and inorganic anions such as nitrate, cyanide and sulfate. The concentrations of most of the contaminants in the soil matrix are below the Regional Board's soil screening levels. Groundwater monitoring has also been conducted at the site since 2005 and has shown that the concentrations of contaminants are decreasing. The site has been closed with a deed restriction to limit future land use on the property to commercial/industrial.

File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Gasoline
Site History:	The Mole Richardson Company is a light manufacturing facility, which occupied several buildings consisting of North La Brea Avenue and North Sycamore Avenue addresses. Due to the historical operations conducted at the site, the soil and groundwater are impacted with

MOLE RICHARDSON COMPANY (Continued) **S105938726**

volatile organic compounds (VOCs). Since 2003, a groundwater pump-and-treat system has been operating most of the time at the site. The site is currently vacant and planned for redevelopment with an underground parking structure. In April 2016, the Regional Board approved a remedial action plan to address the soil, soil vapor and groundwater cleanup at the site. The remedial action plan proposed a multi-task approach starting with the remedial excavation of soil in the source area, before addressing the soil vapor and residual groundwater plume. In October 2016, the Regional Board transferred the oversight of the impacted soil to the United States Environmental Protection Agency (USEPA) Region 9 Emergency Response Section (EMS). The remedial excavation of the soil is currently ongoing under the regulatory oversight of the EMS. The Regional Board continues to provide regulatory oversight for the groundwater plume. The Regional Board approved installation of five multi-depth soil vapor probes at the site in a letter dated February 25, 2016. On April 29, 2016, the Regional Board approved the soil remedial design implementation plan, which included soil excavation as well as a soil vapor extraction pilot test in the alley and a subsequent full-scale employment of the soil vapor extraction system. These soil remediation related tasks will be under the regulatory oversight of EMS. In March 2017, regional Board approved the injection of a substrate, EOS PRO, combined with microbial consortium of Dehalococcoides BAC-9 between the depths of 15 and 25 feet at 18 injection points located in the alley to promote groundwater remediation.

Site History:	There is a State Water Board closure Order for this case issued 2/2/2015. The State Water Board needs confirmation that the corrective action wells and wastes have been removed from the site in order to close the case. Once confirmation has been received State Water Board can issue a Uniform Closure Letter and close the case. Attempts to reach the RP have failed. gwl 4/14/2016.

FORMER PACIFIC TITLE AND ART STUDIO (PTAS) (Continued) **S118504513**

Soil Vapor
Potential Contaminants of Concern: * Chlorinated Hydrocarbons, Tetrachloroethylene (PCE)
Site History: The Site was occupied by a motion picture post-production facility where titles, visual effects and special effects were applied onto motion picture film. The former Pacific Title and Art Studio (PTAS) was a post-production motion picture facility that operated from approximately 1946 to 2009. Operations in the main building included internal film developing and associated film cleaning and optical printing to support post-production processes. The main building housed office space, film developing, printing and film cleaning process units, studios and film viewing theaters. The garage-like structure in the southwest portion of the subject property was used for storage of equipment, paints, janitorial chemicals and other materials. In 2009, the Amidi Group acquired ownership of the property from PTAS for re- development of the main building into an executive office complex. The redevelopment was completed in June 2013.

Comments: Pursuant to the MOU, DTSC has reviewed an environmental site assessment and other documents for the Linn House (Westside Hospice) property. The property, currently two vacant lots that have been combined into one legal parcel, is intended for the location of a new hospice to be owned and operated by the Aids Healthcare Foundation. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property; there is no contamination on the property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020

Next Scheduled EDR Contact: 04/12/2021
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

UTM Y (Meters):	3772926.2
Elevation:	306 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

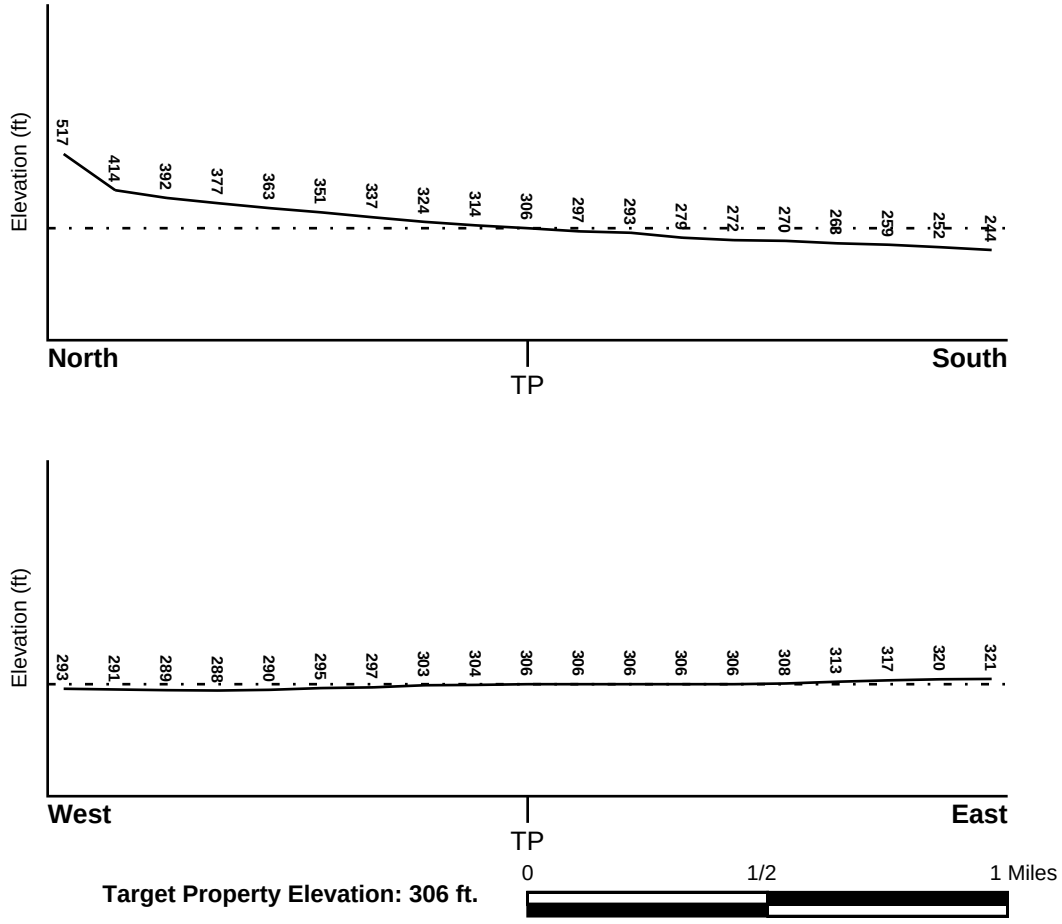

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
39	1/4 - 1/2 Mile SSE	SW
1G	1/4 - 1/2 Mile SSE	SW

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by RMD Environmental Solutions, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

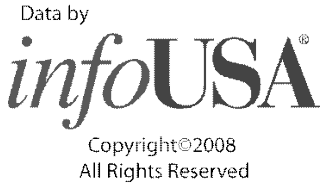

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

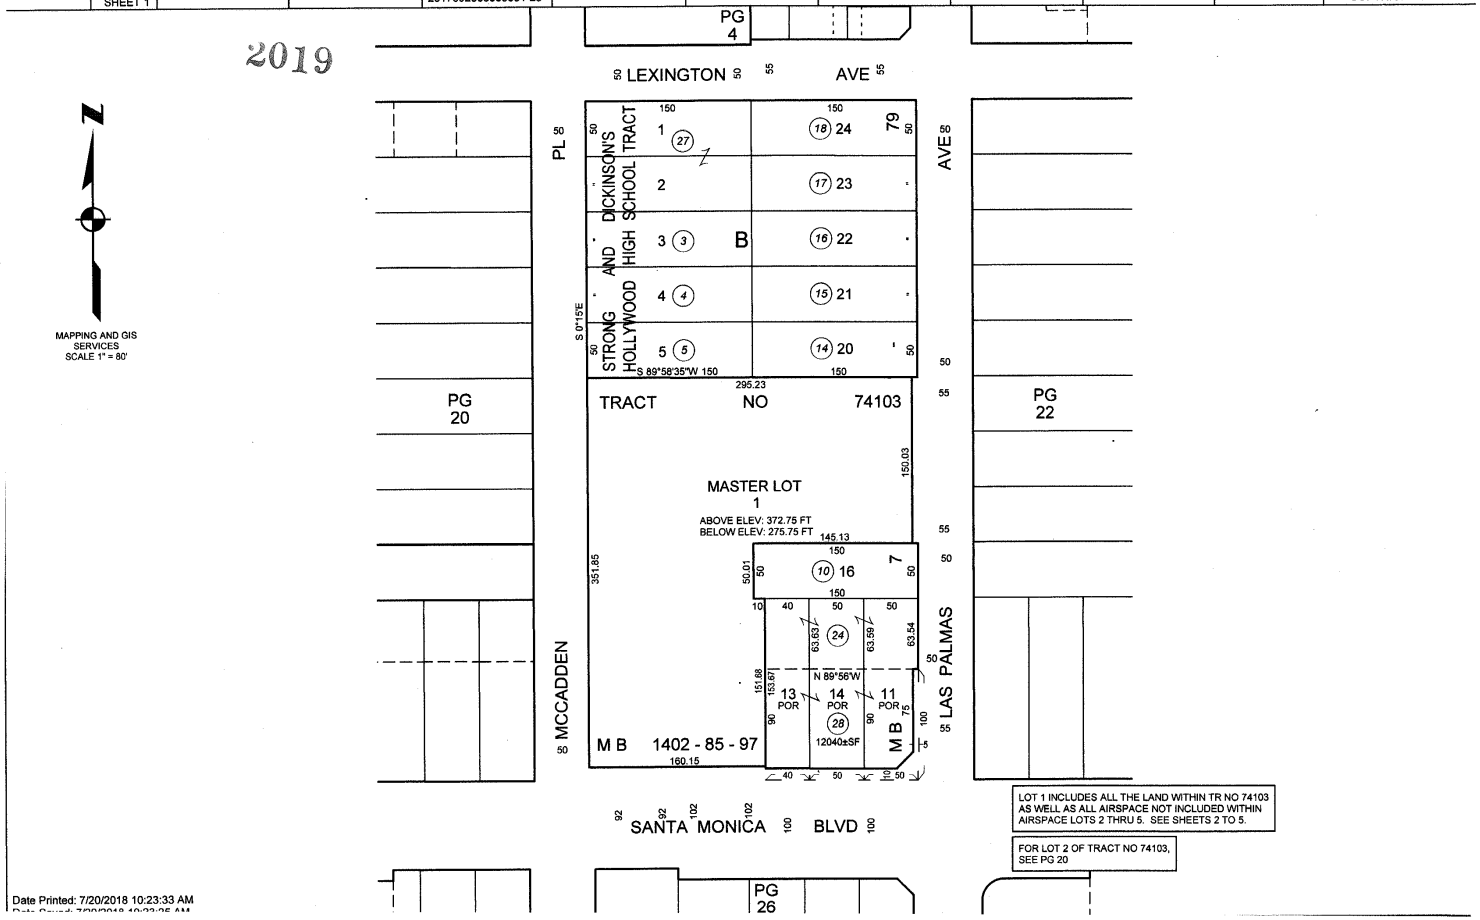

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILDFAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of RMD Environmental Solutions, Inc. on Feb 16, 2021.

TARGET PROPERTY

N. Las Palmas Ave. & N. McCadden Pl.
LOS ANGELES, CA 90038

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Contractor Name:	DOLIN ELECTRIC

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Application for the Erection of Frame Buildings

CLASS "D" HOLLOW TILE

To the Board of Public Works of the City of Los Angeles:

Application is hereby made to the Board of Public Works of the City of Los Angeles, through the office of the Chief Inspector of Buildings, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CITY OF LOS ANGELES
DEPARTMENT OF BUILDING AND SAFETY
BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

APPENDIX K

USER QUESTIONNAIRE/ CLIENT PROVIDED

ASTM E1527-13 USER QUESTIONNAIRE

Site Name:	N Las Palmas/N McCadden
Site Address:	1128-1144 and 1145-1155 North Las Palmas Avenue
	1138-1142 North McCadden Place, Los Angeles, CA
Respondent Name:	Collin Monsour
Respondent Title/Company:	BARDAS Investment Group
Date:	03/17/2021

For Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments", 40 CFR Part 312), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete, and the environmental professional may identify a "data gap" which could impact the Phase I ESA report findings.

Question:	Yes	No	Don't Know
1. Environmental Liens Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law? Check the box below as appropriate. ■ The scope of work for this Phase I Environmental Site Assessment (ESA) includes a search of recorded environmental liens as an added-scope item (in accordance with ASTM E1527-13 Section 6.2).	☐	☐	☑

RMD ENVIRONMENTAL SOLUTIONS

Question:	Yes	No	Don't Know
2. Activity and Land Use Limitations (AULs) Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law? Check the box below as appropriate. ■ The scope of work for this Phase I ESA includes a search of recorded AULs as an added-scope item (in accordance with ASTM E1527-13 Section 6.2).	☐	☐	☑

Question:	Yes	No
3. Specialized Knowledge or Experience Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐	☑
4. Purchase Price vs. Fair Market Value Does the purchase price being paid for this property reflect any adjustments from the fair market value of the property? (If you conclude that the value is lower than the fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?)	☐	☑
5. Commonly Known or Reasonably Ascertainable Information Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	☐	☑

Question:	Yes	No
5a. Do you know the past uses of the property?	☐	☑
5b. Do you know of specific chemicals that are present or were once present at the property?	☐	☑
5c. Do you know of spills or other chemical releases that have taken place at the property?	☐	☑
5d. Do you know of any environmental cleanups that have taken place at the property?	☐	☑
6. Obviousness of the Presence or Likely Presence of Contamination Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	☐	☑

Please provide explanation for all "yes" answers or attach supporting documents.

Appendix F-2
Phase II ESA

August 9, 2021

Mr. Collin Monsour
Bardas Investment Group
cmonsour@bardasig.com

Subject: **Phase II Environmental Site Investigation Report**
North Las Palmas Avenue and North McCadden Place
Los Angeles, California

Dear Mr. Monsour:

RMD Environmental Solutions, Inc., (RMD) has prepared a *Phase II Environmental Site Investigation Report* (Phase II Report) describing recent investigation activities for the multiple properties located on North Las Palmas Avenue and North McCadden Place in Los Angeles, California (the Site; Figure 1). The RMD *Revised Proposal for Phase II Environmental Site Investigation*[1] and *Proposal for Indoor Air Sampling*[2] described a scope of work to assess whether contamination is present which may trigger an obligation to perform further investigation and/or mitigation measures or which otherwise could result in environmental liability should Bardas Investment Group (Bardas) purchase the Site for redevelopment. The Site background, investigation objectives, scope of work, and results are provided in the Report sections below.

SITE BACKGROUND

The Site is located at 1128 through 1146 and 1155 North Las Palmas Avenue in Los Angeles, California, in an industrial and residential mixed area. Historical addresses associated with the Site include 1128 through 1150 North McCadden Place and 1128 through 1148 and 1139 through 1155 North Las Palmas Avenue (Figure 2). The Site is currently developed with four two-story buildings, one single-story building, and a parking lot, separated by North Las Palmas Avenue.

[1] RMD. 2021b. Revised Proposal for Phase II Environmental Site Investigation, North Las Palmas and North McCadden Place, Los Angeles, California. May 1.
[2] RMD. 2021c. Proposal for Indoor Air Sampling. North Las Palmas and North McCadden Place, Los Angeles, California. June 30.

Based on the Phase I Environmental Site Assessment (ESA)[3] completed for the Site, recognized environmental conditions (RECs) were identified which included the following, as shown in Figure 2.

- There was historical use of the Site as machine shops at 1138, 1144, and 1155 North Las Palmas Avenue in the 1950s through at least 1970. Hazardous materials and hazardous waste typically generated in the operations of machine shops include chlorinated solvents.
- There was historical use of the Site as an automotive repair facility at 1145 North Las Palmas Avenue in the 1940s. Few records are available to indicate the use or generation of hazardous materials or waste at this facility.
- There was historical use of the Site for photography/film-related activities at 1128, 1138, and 1144 North Las Palmas Avenue. Documented hazardous waste generation included halogenated solvents, which can include chlorinated solvents and photographic film.
- There was historical use of the area immediately adjacent to the east as a machine shop/sheet metal shop in the 1950s through at least 1970.
- There was historical generation of hazardous waste adjacent to the north and east of the Site. The database listings did not indicate the waste being generated but as imaging and "print" shops, the chemical use is likely to be similar to photography/film-related activities, which can include halogenated solvents.

Information compiled from the Department of Toxic Substances Control (DTSC) website, Envirostor[4], indicated that first groundwater in the vicinity of the Site is approximately 28.55 to 32.24 feet below the top of casing based on data collected in December 2015, from the Ava Hollywood Site (Global ID 60000422) located adjacent to the south and farther east of the Site. Data collected from that property indicates that groundwater flows to the southwest[5].

[5] California Environmental (CE). 2016. Report of Well Installation and 4th Qtr 2015 Groundwater Monitoring, Proposed Redevelopment Project APNs 5532-022-008, -010, -019, -024, -025, 6649-6687 Santa Monica Boulevard, 6624-6650 Lexington Avenue, 1120-1122 Las Palmas Avenue, Los Angeles, CA 90038. January.

SCOPE OF WORK

During the Phase II investigation in June and July 2021, the scope of work consisted of a combination of on-Site soil, subslab vapor, soil vapor, indoor air, and ambient air sampling. Although groundwater sampling was proposed, groundwater samples were not collected due to refusal in the borings before groundwater was encountered. The completed scope of work is summarized as follows.

- Two borings (B1 and B3) were advanced using a limited-access direct-push technology (DPT) rig (LAR) to 17 feet below ground surface (bgs) and 18 feet bgs, respectively, to investigate potential impacts from the historical site uses. Soil vapor sample probes were installed at 5 feet bgs and at 16.5 feet bgs in B1 and at 17.5 feet bgs in B3. Refusal was encountered at the terminal depths of both borings.
- One boring (B2) was advanced using a hand auger to 2 feet bgs, where a second concrete slab was encountered, to investigate potential impacts from the historical site uses. A soil vapor sample probe was installed at 1.5 feet bgs.
- Two borings (B4 and B5) were advanced using a truck mounted DPT rig to 30 feet bgs to aide in subsurface characterization in the event of Site redevelopment of the parking lot. Soil vapor probes were installed at 29.5 feet bgs due to the refusal encountered prior to reaching groundwater. Refusal was encountered at the terminal depths of both borings.
- One boring (B6) was advanced using a truck mounted DPT rig to 15 feet bgs to aide in soil characterization in the event of Site redevelopment of the parking lot.
- A total of 12 subslab vapor sampling points were installed (SS-1 through SS-12) throughout the existing buildings with two subslab vapor points installed in each building.
- Each of the subslab and soil vapor probes were sampled more than 48 hours after installation.
- Based on subslab and soil vapor analytical results, where concentrations of tetrachloroethene were reported above regulatory screening levels, indoor air sampling was performed.
    - A building survey was conducted in each of the six buildings on Site.
    - A total of 12 indoor air samples (IA-1 through IA-12) with two air samples collected from each building parcel.
    - A total of three ambient air samples (AA-1 through AA-3) were collected.

Drilling activities were conducted by Millennium Environmental, Inc., (MEI), a C-57 licensed contractor under the oversight of RMD personnel. All work was performed under direction of an RMD, California-licensed geologist.

Locations are provided on Figure 2 and further details are provided as follows.

PRE-FIELD ACTIVITIES

Prior to initiating field work, RMD performed the following pre-field activities:

- Marked the proposed sampling locations for Underground Service Alert (USA);
- Prepared a Site-specific Health and Safety Plan;
- Obtained well permits from the Los Angeles County Department of Public Health for the borings where groundwater sampling was attempted (Attachment A); and
- Conducted an underground utility survey to clear the proposed drilling locations of underground utilities and other possible subsurface obstructions.

SOIL LOGGING

On June 5 and June 7, 2021, during the advancement of borings B1 through B6, soil was visually characterized and described using the Unified Soil Classification System (USCS). Soil samples were field screened for total volatile organic compounds (VOCs) using a handheld photoionization detector (PID). The upper 30 feet of the subsurface was primarily characterized by layers of lean clay with minor amounts of fine-grained sand alternating with layers of silt with minor amounts of fine-grained sand. Groundwater was not encountered to the maximum depth of 30 feet bgs. No odors or elevated PID readings were recorded during drilling activities. The soil types and PID readings provided on the boring logs (Attachment B).

SOIL SAMPLING

Soil samples were collected during boring activities. In borings B1 and B3, soil samples were collected at 1 foot bgs, in 5-foot intervals starting at 5 feet bgs, and at the terminal depth. In borings B4, B5, and B6, soil samples were collected at 1 foot bgs, in 2-foot interval starting at 2 feet bgs, in 5-foot intervals starting at 15 feet bgs, and at the terminal depth. Soil samples were collected in laboratory-supplied sample containers, labeled, placed in a chilled cooler, and transported under standard chain-of-custody (COC) protocol to Pace Analytical (Pace), a State-certified laboratory, for analysis.

In borings B1 and B3, soil samples from 1 foot bgs and 5 feet bgs were analyzed for California Administrative Manual (CAM)-17 metals using United States Environmental Protection Agency

(USEPA) Method 6020. In borings B4 through B6, a composite of the discrete samples collected from 1 foot bgs through 10 feet bgs were analyzed for CAM-17 metals using USPEA Method 6020. Three discrete samples from each boring were also analyzed for VOCs and total petroleum hydrocarbons (TPH) as gasoline (TPHg) using USEPA Method 8260B and TPH as diesel (TPHd) and TPH as motor oil (TPHmo) using USEPA Method 8015.

The discrete samples that made up the composite samples and the remaining soil samples were placed on hold at the laboratory pending analysis of the initially selected samples.

After reviewing the initial results of the composite samples, the three composite samples (B4, B5, and B6) and three discrete samples (B1-1, B1-5, and B3-5) were analyzed for California's Soluble Threshold Limit Concentration (STLC) extraction test for chromium.

Following sample collection in boring B6, the boring was backfilled with hydrated bentonite and capped with asphalt to match the surrounding grade. Soil vapor probes were installed in borings B1 through B5 as discussed below.

SUBSLAB AND SOIL VAPOR PROBE INSTALLATION

On June 5 and 7, 2021, soil vapor probes were installed at 5 feet bgs and the terminal depths of borings B1 (16.5 feet bgs) and B3 (17.5 feet bgs). A soil vapor probe was installed at 1.5 feet bgs in boring B2. Soil vapor probes were installed at 29.5 feet bgs in borings B4 and B5. Soil vapor probes were installed in accordance with the methods and procedures outlined in the *Advisory – Active Soil Gas Investigations* (Advisory)[6]. The soil vapor probes were constructed using 1/4-inch diameter Teflon™ tubing, fitted with a vapor probe implant installed at the target depth with a three-way valve at the surface. The annulus surrounding the implant was filled with #2/12 Monterey sand to 6 inches above and below the implant, followed by a 1-foot layer of dry granulated bentonite, and hydrated bentonite chips to the bottom of the shallow soil vapor probe for the deep probe or near ground surface for the shallow probe/single completion probe. As these vapor probes were temporary, no vault box was used. Instead, the upper 6 inches of the boreholes were filled with sand to cover and protect the tubing and three-way valve during the equilibration time. Due to the shallow depth of the soil vapor probe in B2, the bentonite seal above the sand pack was adjusted to accommodate the shallower boring. Soil vapor probe construction details are provided in Table 1 and on the boring logs presented in Attachment B.

[6] Department of Toxic Substances Control, Los Angeles Regional Water Quality Control Board, and San Francisco Regional Water Quality Control Board (CalEPA). 2015. *Advisory – Active Soil Gas Investigations.* July.

On June 5 and 7, 2021, 12 subslab vapor sampling points (SS-1 through SS-12) were installed throughout the Site at the locations shown in Figure 2. At each subslab vapor sampling location, a hand-held rotary-hammer was used to drill a 1½-inch diameter pilot hole in the concrete slab, then a 5/8-inch diameter hole was drilled through the entire thickness of the concrete slab using a drill guide, exposing the underlying fill material. A silicone sleeve, which forms a seal against the concrete slab, was placed around each stainless-steel Vapor Pin® before tapping the pin into place using a dead blow hammer. A flush-mounted cap was installed to cover each Vapor Pin®.

SUBSLAB AND SOIL VAPOR PROBE SAMPLING

On June 8 and 9, 2021, the subslab and soil vapor probes were sampled. Each probe was sampled in accordance with the Advisory. At each probe a shut-in test was conducted and a total of three system volumes were removed prior to sampling. After the sampling assembly was purged and immediately before the sample was collected, a leak check compound (LCC), 1,1-difluoroethane (1,1-DFA), was used to saturate a paper towel that was placed in a sealable plastic bag near all locations where ambient air could enter the sampling system or where cross contamination could occur. Soil vapor samples were collected from each location in 1-liter Summa® canisters, labeled, handled under standard COC protocols, and transported to Pace for analysis. The samples were analyzed for TPHg and VOCs using USEPA Method TO-15, and fixed gases and oxygen using modified American Society for Testing and Materials (ASTM) Method D-1946. The documentation for subslab and soil vapor probe sampling are presented in Attachment C.

INDOOR AND AMBIENT AIR SAMPLING

An indoor and ambient air sampling event was completed on July 12, 2021. RMD personnel completed building surveys for each on-Site building concurrently with indoor air sampling. The surveys were conducted in accordance with the DTSC Advisory and the *Vapor Intrusion Guidance* (DTSC Guidance)[7]. One building is vacant (1128 North Las Palmas Avenue) The remaining buildings are occupied by a post-production film and video company. A copy of the building surveys are included in Attachment C.

RMD collected a total of 12 indoor air samples (IA-1 through IA-12) and three ambient air samples (AA-1 through AA-3) in accordance with the DTSC Advisory and Guidance. Two samples were collected from each of the individual building parcels. Approximate sample locations are

[7] DTSC, 2011. *Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air (Vapor Intrusion Guidance).* October.

presented on Figure 2 and photographs documenting locations of the sample cannisters are provided in Attachment C. The indoor air samples were collected from the breathing zone at approximately 3 to 5 feet above the floor. Average wind was measured at 1.8 miles per hour from the southwest to the northeast on July 12, 2021 at weather station KCALOSAN893[8] as recorded in Attachment C. The ambient air sample locations were selected based on the prevailing wind direction and were collected approximately 6 feet above ground surface.

Indoor and ambient air samples were collected over an approximate 8-hour period. The samples were collected in lab-certified 6-liter Summa® canisters with lab-calibrated flow controllers (with particulate filters) and vacuum gauges. Upon completion of the approximate 8-hour sampling interval, sample canisters were prepared for submittal to Pace under standard COC protocols. The air samples were analyzed for VOCs using USEPA Method TO-15 in selective ion mode (SIM). During the Summa® canister checks, the pressure gauge for sample IA-10 was reading 0 inches of mercury. The connections were checked, and the sample was closed. A full 8-hour sample was not collected from sample IA-10.

The building windows were closed during the sampling period and the heating, ventilation, and air conditioning (HVAC) system was set in typical cooling operation during the sampling period in 1136 through 1155 North Las Palmas Avenue. The building at 1128 North Las Palmas Avenue is vacant and was not occupied during the sampling. No HVAC system was in operation at 1128 North Las Palmas Avenue during the sampling period.

Field data sheets are provided in Attachment C.

INVESTIGATION RESULTS

A summary of investigation results is provided as follows.

SOIL

Soil analytical VOCs results were compared to the DTSC Screening Levels (DTSC SLs)[9] and USEPA Regional Screening Levels Regional Screening Levels (USEPA RSLs)[10]. The more conservative value is designated as the screening level (SL). TPH concentrations were compared to Los Angeles Regional Water Quality Control Board (LARWQCB) Maximum Soil Screening Level (SSLs) for soil samples collected between 20 and 150 feet above groundwater[11]. TPHg,

[8] https://www.wunderground.com/dashboard/pws/KCALOSAN893/graph/2021-07-12/2021-07-12/daily
[9] DTSC. 2020. Human Health Risk Assessment (HHRA) Note Number 3, DTSC-modified Screening Levels (DTSC SLs). Human and Ecological Risk Office (HERO). June.
[10] USEPA. 2021. Regional Screening Levels (TR=1E-06, HQ=1). May.
[11] LARWQCB. Interim Site Assessment & Cleanup Guidebook. May 1996.

TPHd, TPHmo, and VOC concentrations are presented in Table 2. None of the samples analyzed reported TPH or VOC detections above applicable SSLs, Commercial/Industrial SLs, and/or Residential SLs.

Metal concentrations are presented in Table 3. Metals with reported concentrations above the Commercial/Industrial SLs, Residential SLs, and/or Background Concentrations in California Soils (Background Levels)[12] are summarized as follows:

- Arsenic was detected above the Commercial/Industrial SL of 0.36 milligrams per kilogram (mg/kg) and the Residential SL of 0.11 mg/kg in each of the samples analyzed. However, DTSC has acknowledged that the strict use of RSLs is impractical due to naturally occurring background concentrations and has set acceptable levels of arsenic in soil at 12 mg/kg for school sites in California[13]. Due to this determination, arsenic concentrations up to 12 mg/kg in soil are interpreted to be background and acceptable for residential use. No reported concentrations of arsenic exceeded 12 mg/kg.
- No additional metals were detected above the Commercial/Industrial SLs or Residential SLs in the analyzed soil samples.

Based on the initial laboratory results, three samples were additionally analyzed using the waste extraction test (WET) for waste characterization. The STLC extraction test for chromium was conducted on the composite samples collected for B4, B5, and B6 and the discrete samples B1-1, B1-5, and B3-5, as identified in Table 3. All STLC extraction results for chromium in the composite samples were below the respective non-hazardous waste classification limits.

Laboratory analytical reports are included in Attachment D.

SOIL VAPOR

Table 4 summarizes the soil vapor analytical results. TPHg and VOC constituents were compared to Commercial/Industrial SLs and Residential SLs for Soil Vapor Intrusion to Indoor Air.

All reported soil vapor concentrations were below the SLs with the following exceptions:

[12] Bradford, G.R., Chang, A.C., Page, A.L., Bakhtar, D., Frampton, J.A., and Wright, H. 1996. Background Concentrations of Trace and Major Elements in California Soils, Kearney Foundation of Soil Sciences Special Report, Division of Agriculture and Natural Resources, University of California.
[13] DTSC. 2018. Determination of a Southern California Regional Background Arsenic Concentration in Soil.

- PCE was reported above the Commercial/Industrial SL of 67 micrograms per meter cubed (µg/m^3) in 15 of 19 samples analyzed at concentrations up to 3,240 µg/m^3 (SS-6). Figures 3 and 4 summarize the analytical results for PCE for the soil vapor data.
- Benzene was detected above the Commercial/Industrial SL of 14 µg/m^3 in three of 19 samples analyzed at concentrations up to 30.4 µg/m^3 (B1-16.5) and are shown on Figures 3 and 4.
- 1,3-Butadiene was detected above the Commercial/Industrial SL of 2.4 µg/m^3 in one sample (B4-29.5) at a concentration of 9.18 µg/m^3.
- At least one concentration of vinyl chloride and chloroform exceeded their respective Residential SLs but were not detected above the Commercial/Industrial SLs.
- All other reported soil vapor concentrations were below the Commercial/Industrial SLs, Residential SLs, and/or there is no established SLs and are not considered primary chemicals of concern.

Fixed gases including oxygen were analyzed at each soil vapor probe location (Table 5). Oxygen concentrations ranged from 21.4% at probe SS-6 to 23.4% at probe B1-1.5. RMD notes that the oxygen content reported by the laboratory is slightly higher than an ambient concentration of 21%. The laboratory method for oxygen analysis allows a 15% deviation from the true value. Based on the reported value, the oxygen content in shallow soil vapor concentration is near an average ambient concentration of 19.8%. An oxygen concentration above 4% is an indication of a bioattenuation zone present in the subsurface[14].

Laboratory analytical reports are included in Attachment D.

INDOOR AND AMBIENT AIR

Table 6 summarizes the indoor and ambient air analytical results. VOC constituents were compared to the Commercial/Industrial and Residential SLs.

All reported soil vapor concentrations were below the SLs with the following exceptions:

- Benzene was reported above the Commercial/Industrial SL of 0.42 µg/m^3 in all of the samples, including the three ambient air samples at concentrations up to 0.891 µg/m^3

[14] State Water Resources Control Board. 2012. Low-Threat Underground Storage Tank Case Closure Policy. November 6.

(AA-3). The highest concentration was detected in the ambient air samples indicating an exterior source for the benzene.

- PCE was reported above the Residential SL of 0.46 µg/m3 in two samples, IA-9 (0.479 µg/m^3) and IA-10 (0.531 µg/m^3), collected in 1128 North Las Palmas Avenue, and IA-11 (1.71 µg/m^3), collected in 1155 North Las Palmas Avenue. No PCE concentrations exceeded the Commercial/Industrial SL of 2.0 ug/m^3.
- Carbon tetrachloride was reported above the Residential SL of 0.47 µg/m^3 in all of the samples, including the three ambient air samples at concentrations up to 0.718 µg/m^3 (IA-4). The similar concentrations detected in the ambient air indicate an exterior source for the carbon tetrachloride. No carbon tetrachloride concentrations exceeded the Commercial/Industrial SL of 2.0 ug/m^3.
- 1,2-Dichloroethane (DCA) was reported above the Residential SL of 0.11 µg/m^3 in two samples, IA-1 (0.195 µg/m^3) and IA-2 (0.126 µg/m^3), collected in 1146 North Las Palmas Avenue, and one sample, IA-3 (0.166 µg/m^3), collected in 1144 North Las Palmas Avenue. No 1,2-DCA concentrations exceeded the Commercial/Industrial SL of 0.47 µg/m^3. Additionally, 1,2-DCA was not detected in the soil vapor beneath the Site buildings, indicating a source other than the subsurface.
- 1,2-Dichloropropane (DCP) was reported above the Residential RSL of 0.76 µg/m^3 in one sample, IA-11 (1.59 µg/m^3), collected in 1155 North Las Palmas Avenue. The 1,2-DCP concentration did not exceeded the Commercial/Industrial SL of 3.3 µg/m^3. Additionally, 1,2-DCP was not detected in the soil vapor beneath the Site buildings, indicating a source other than the subsurface.
- No VOCs were reported at concentrations above the Commercial/Industrial or Residential SLs.

The laboratory analytical report is included in Attachment D.

QUALITY ASSURANCE/QUALITY CONTROL SAMPLING

1,1-DFA was used as a LCC for collection of the soil vapor samples for analysis of TPHg and VOCs by USEPA Method TO-15. As shown in Table 4, 1,1-DFA was detected at concentrations between 3.16 µg/m^3 and 53.8 µg/m^3 in probes B2-1.5 and SS-3, respectively. The Advisory allows the concentration of the LCC at 10 times the reporting limit of the target analyte, which is 1.36 µg/m^3 for PCE corresponding to an allowable 1,1-DFA concentration of 13.6 µg/m^3. The concentration of 1,1-DFA in probes SS-2, SS-3, SS-11, B3-17.5, and B4-29.5 exceeded

13.6 µg/m^3 of 1,1-DFA and indicate potential dilution from atmospheric air during sampling. Concentrations of 1,1-DFA in probes SS-2 (14.5 µg/m^3), SS-11 (15.6 µg/m^3), and B3-17.5 (14.2 µg/m^3) only slightly exceeded the allowable 1,1-DFA concentration. RMD notes that the concentrations of PCE in probes SS-3 (1,1-DFA of 53.8 µg/m^3) and B4-29.5 (1,1-DFA of 36.7 µg/m^3) may be higher than reported, as indicated by the detection of 1,1-DFA over two times above the allowable concentration. However, these results do not change RMD's overall conclusions, discussed below.

The results from these probes are qualified in Table 4, to indicate that the results may be biased low for these sample locations.

Laboratory analytical reports are included in Attachment D.

INVESTIGATION DERIVED WASTE MANAGEMENT

Investigation derived waste (IDW) consisted of soil cuttings. IDW was stored on-Site in a properly labeled 55-gallon drum. Following waste characterization profiling, IDW will be disposed of in accordance with applicable laws and regulations.

DISCUSSION OF KEY RESULTS AND CONCLUSIONS

SOIL RESULTS

Low concentrations of TPH, VOCs, and metals were reported in the shallow soil. The concentrations reported were below regulatory action levels. With regards to soil disposal and planning for Site grading, additional STLC analysis was conducted for chromium. STLC soil analytical results demonstrate the chromium and lead detected in the composite samples do not fall under hazardous waste classification.

SUBSLAB AND SOIL VAPOR RESULTS

PCE was the predominant chemical reported beneath the Site, with the highest concentrations reported beneath the properties east of Las Palmas. As documented in the Phase I ESA, concentrations of PCE in groundwater have been reported in the vicinity of the Site. A site vicinity map showing nearby sources of PCE and documented PCE concentrations in soil vapor and groundwater is provided as Figure 5 and further discussed as follows.

Excerpts from off-Site reports that are referenced in the discussion below are provided in Attachment E.

AVA Hollywood Site

The AVA Hollywood Site is located south and east of the property at the location shown on Figure 5. A Draft Removal Action Workplan (RAW) [15] prepared by CE discussed the PCE impacts to the soil and groundwater of the property. A limited excavation occurred to address VOC impacts to soil and the site was certified with no further action by DTSC as of July 25, 2018. Details of the excavation are documented in the Removal Action Completion Report (RACR)[16]. The RACR references a NE-SW trending PCE plume in groundwater that originates offsite to the north of the AVA site and the Subject Property. Historic soil vapor data and groundwater sample locations and data are included on Figure 5. RMD notes that soil vapor collected from SV2 and SV3 were collected prior to and in the vicinity of the former excavation and may not be representative of current conditions.

Former Machine Shop Located East of the Subject Property

Sanborn maps from 1950 and 1970 presented in a Preliminary ESA for the AVA Hollywood Site show a machine shop that is immediately adjacent to the east of the Subject Property which is an additional potential source for the PCE impacts to the Site. The location of the machine shop is included on Figure 2 and Figure 5. RMD is not aware of any subsurface investigations which have been completed in the area where the former machine shop was located.

Kodak Site

The Kodak site is located downgradient from the Subject Property at the location shown on Figure 5. An investigation conducted at the Kodak site reported PCE impacts to soil vapor and groundwater[17]. Data is summarized on Figure 5. The site was certified by DTSC with requiring no further action.

As shown in Figures 3 and 4, the highest concentrations of PCE in subslab and soil vapor were detected along the eastern and southern boundaries of the Site. In the two borings with multi-

[15] CE. 2016. Draft Removal Action Workplan (RAW), Proposed Mixed-Use Redevelopment Project, AVA Hollywood, APNs 5532-022-008, -010, -019, -024, -025, 6649-6687 Santa Monica Boulevard, 6624-6650 Lexington Avenue, 1120-1122 Las Palmas Avenue, Los Angeles, CA 90038. August (Revised October).

[16] CE. 2017. Removal Action Completion Report, Mixed-Use Redevelopment Project, AVA Hollywood, APNs 5532-022-008, -010, -019, -024, -025, 6649-6687 Santa Monica Boulevard, 6624-6650 Lexington Avenue, 1120-1122 Las Palmas Avenue, Los Angeles, CA 90038. June.

[17] Cardano, Inc. 2015. Sub-Slab Soil Vapor Survey Report, Kodak Hollywood Campus, 6700 Santa Monica Boulevard and 1017 North Las Palmas Avenue, Hollywood, California. August 28.

nested probes (B1 and B3), PCE was detected at higher concentrations in the deeper soil vapor probes than the shallower probes. The lateral and vertical distribution of PCE suggests an off-site source to the east and south. There is potentially a small, localized release of PCE in the vicinity of 1155 North Las Palmas Avenue (SS-12; Figure 5). It is unknown based on the current data set whether the relatively low detections of PCE at SS-12 are related to the regional plume, or a small localized on-Site release.

Figure 5 presents a summary of the regional impacts to the soil vapor and groundwater at the Site and the two vicinity properties (the AVA Hollywood Site and the Kodak Site). Soil vapor data was presented in different units in the off-Site reports, therefore the data was converted to $\mu g/m^3$ prior to comparison with the Site data. As shown on Figure 5, the highest concentrations of PCE in soil vapor were detected in the northern and eastern portions of the vicinity, generally consistent with the PCE groundwater plume. There is some variability in the PCE distribution in the soil vapor which may be attributed, in part, to the variations in soil type between the properties. As shown in the cross sections provided as Figure 6, the soil beneath the Site is characterized by fine-grained material including silt and clay. As shown in the borings logs for the groundwater monitoring wells installed at the AVA Hollywood Site (Attachment E), the soil east of the Site is characterized by coarser material (silty sand). PCE in soil vapor and groundwater would preferentially travel through coarser (sandier) soil.

It is RMD's opinion that based on the distribution of PCE reported in subslab and soil vapor, combined with the upgradient and cross gradient PCE concentrations reported in groundwater, subsurface conditions beneath the Site have been impacted by offsite source(s).

INDOOR AIR AND AMBIENT AIR RESULTS

Table 6 compares indoor air and ambient air results to Commercial/Industrial SLs and Residential SLs. Carbon tetrachloride was reported at concentrations exceeding the Commercial/Industrial SLs, including the ambient air samples. The highest concentration of carbon tetrachloride was detected in AA-3, indicating an exterior source for the concentrations detected within the buildings. Based on the VOC results and the current use of the Site as commercial/industrial space, mitigation measures are not anticipated on-Site with respect to indoor air.

SUMMARY AND RECOMMENDATIONS

In summary, based on the sampling conducted:

- Vapor mitigation measures are not required under the current conditions. In the event that the existing buildings are redeveloped or renovated, indoor sampling may be necessary to confirm indoor air concentrations remain below regulatory trigger levels.
- Although concentrations of benzene in indoor air were greater than the commercial/industrial SL, ambient sampling data indicates an exterior (background) benzene source. Mitigation measures for background, ambient VOCs are not required.
- The PCE detected in the subslab and soil vapor likely originates from an off-site source to the north and east of the Site.
- There was no evidence of significant on-Site chemical releases. As indicated previously, it is unclear based on the current dataset whether the low detection of PCE at SS-12 is related to the regional plume, or a small, localized on-Site release. However, reported concentrations of PCE at this location were low and are not a vapor intrusion concern based on indoor air sampling.
- In the event that a subterranean parking structure is developed in the parking area west of North Las Palmas Avenue, no additional excavation or off-haul of soil beyond what is required for redevelopment activities is expected. Soil exported during excavation of a subterranean garage is generally expected to meet acceptable criteria for non-hazardous waste characterization.

CLOSING

If you have any questions or comments, please do not hesitate to contact Ms. Kirsten Duey at (925) 683-8177 or kduey@rmdes.net.

Notes:
Detections are indicated in **bold.**
Only analytes with at least one detection are reported in the table. A full list of the analytes is provided in the laboratory report.
Samples analyzed using USEPA Method 8260B.
SSL = Maximum Soil Screening Level for samples collected between 20 and 150 feet above groundwater (LARWQCB, 1996).
DTSC SLs/USEPA RSLs = Department of Toxic Substances Control Screening Levels and U.S. Environmental Protection Agency Regional Screening Levels Regional Screening Levels.
B = The same analyte is found in the associated blank.
<0.010 = Not detected above the noted laboratory reporting limit.
-- = Not analyzed.
bgs = Below ground surface.
mg/Kg = Milligrams per kilogram.
TPHg = Total Petroleum Hydrocarbons Gasoline range (C5-C12)
TPHd = Total Petroleum Hydrocarbons Diesel range (C12-C22)
TPHmo = Total Petroleum Hydrocarbons Motor Oil range (C22-C40)
VOCs = Volatile Organic Compounds
PCE = Tetrachloroethene
TCE = Trichloroethene
DCE = Dichloroethene
TMB = Trimethylbenzene

Notes:
Detections are indicated in **bold**.
Samples analyzed using USEPA Method 6010.
DTSC SLs/USEPA RSLs = Department of Toxic Substances Control Screening Levels and U.S. Environmental Protection Agency Regional Screening Levels Regional Screening Levels.
COMP = Composite of soil samples collected at 1, 2, 3, 4, and 5 feet bgs.
Values shown in red font exceed the threshold which triggers STLC analysis for waste characterization.
[Note 1] Bradford, G.R., Chang, A.C., Page, A.L., Bakhtar, D., Frampton, J.A., and Wright, H., 1996, Background Concentrations of Trace and Major Elements in California Soils, Kearney Foundation of Soil Sciences Special Report, Division of Agriculture and Natural Resources, University of California.
[Note 2] The Department of Toxic Substances Control (DTSC) has acknowledged that the strict use of RSLs is impractical and has set acceptable levels of arsenic in soil in the range of 8 to 12 mg/kg for school sites in California.
[Note 3] RSL values shown for Chromium(III), Insoluble Salts
bgs = Below ground surface.
NV = No established value.
<0.50 = Not detected above the noted laboratory reporting limit.
mg/Kg = Milligrams per kilogram.
µg/L = Micrograms per liter.
J = The identification of the analyte is acceptable; the reported value is an estimate.
STLC = Soluble Threshold Limit Concentration.

Notes:
Detections are indicated in **bold**.
Detections exeeding only the Residential screening levels are indicated in ***italics***. Detections exceeding the Commercial/Industrial screening level are indicated in **red**.
Shaded cells exceed the allowable leak check compound concentration of 13.6 $\mu g/m^3$ (10-times the reporting limit of target analyte PCE [CalEPA, 2015]).
Volatile organic compounds (VOCs) measured by EPA Method TO-15.
bgs = below ground surface.
$\mu g/m^3$ = micrograms per cubic meter.
[1] The soil vapor screening level is calculated by dividing the air screening level by the USEPA default attenuation factor of 0.03 (USEPA, 2015). In order of priority, the screening level represents the DTSC-modified screening level (DTSC, 2020) followed by USEPA Regional Screening Level (RSL; USEPA, 2020).
[2] The analytical results indicated may be biased low due to potential ambient air leakage during sampling.
<1.00 = Not detected above indicated laboratory reporting limit.
PCE = Tetrachloroethene
TCE = Trichloroethene
DCE = Dichloroethene
TPHg = Total petroluem hydrocarbons as gasoline

Notes:
Detections are indicated in **bold**.
Detections in *italics* exceed the DTSC/USEPA Residential Screening Levels.
Shaded cells exceed the DTSC / USEPA Industrial Indoor Air Screening Level.
Volatile organic compounds (VOCs) measured by EPA Method TO-15-SIM.
-- = No available DTSC SL or USEPA RSL
µg/m^3 = micrograms per cubic meter.
<1.00 = Not detected above indicated laboratory reporting limit.
PCE = Tetrachloroethene.
TCE = Trichloroethene.
DTSC SL = Department of Toxic Substances Control Screening Level
USEPA RSL = United States Environmental Protection Agency Regional Screening Level
[1] In order of priority, the screening level represents the DTSC-modified screening level (DTSC, 2020) followed by USEPA Regional Screening Level (RSL; USEPA, 2020).
* During the Summa® checks, the pressure gauge was observed to be at 0 inches of mercury. A full 8-hour sample was not collected.

Work Plan Approval

WORK SITE ADDRESS	CITY	ZIP	EMAIL ADDRESS
Las Palmas Phase II 1145 N. McCadden Place / APN 5532-021-015	Los Angeles	90038	pgomez@rmdes.net

NOTICE:

- WORK PLAN APPROVALS ARE VALID FOR 180 DAYS. 30 DAY EXTENSIONS OF WORK PLAN APPROVALS ARE CONSIDERED ON AN INDIVIDUAL (CASE-BY-CASE) BASIS AND MAY BE SUBJECT TO ADDITIONAL PLAN REVIEW FEES (HOURLY RATE AS APPLICABLE).
- WORK PLAN MODIFICATIONS MAY BE REQUIRED IF WELL AND GEOLOGIC CONDITIONS ENCOUNTERED AT THE SITE INSPECTION ARE FOUND TO DIFFER FROM THE SCOPE OF WORK PRESENTED TO THE DEPARTMENT OF PUBLIC HEALTH—DRINKING WATER PROGRAM.
- WORK PLAN APPROVALS ARE LIMITED TO COMPLIANCE WITH THE CALIFORNIA WELL STANDARDS AND THE LOS ANGELES COUNTY CODE AND DOES NOT GRANT ANY RIGHTS TO CONSTRUCT, RENOVATE, OR DECOMMISSION ANY WELL. THE APPLICANT IS RESPONSIBLE FOR SECURING ALL OTHER NECESSARY PERMITS SUCH AS WATER RIGHTS, PROPERTY RIGHTS, COASTAL COMMISSION APPROVALS, USE COVENANTS, ENCROACHMENT PERMISSIONS, UTILITY LINE SETBACKS, CITY/COUNTY PUBLIC WORKS RIGHTS OF WAY, ETC.
- THIS PERMIT IS NOT COMPLETE UNTIL ALL OF THE FOLLOWING REQUIREMENTS ARE SIGNED BY THE DEPUTY HEALTH OFFICER. WORK SHALL NOT BE INITIATED WITHOUT A WORK PLAN APPROVAL STAMPED BY THE DEPARTMENT OF PUBLIC HEALTH—DRINKING WATER PROGRAM.

TO BE COMPLETED BY DEPARTMENT OF PUBLIC HEALTH—DRINKING WATER PROGRAM:

X	**WORK PLAN APPROVED** FOR: 1 soil borings up to ~35 feet bgs.	**PERMIT NUMBER:**	SR0254690	**DATE:**	May 14, 2021

ADDITIONAL APPROVAL CONDITIONS:

1) Work plan approval is issued for scope of work submitted to the Drinking Water Program. Any modifications to the scope of work will require additional work plan review.
2) Soil borings shall be sealed to terminal depth pursuant to Section 9 and Appendix B of *California Well Standards - Bulletins 74-90 & Bulletins 74-81* respectively upon completion.
    - For Portland cement, it shall be mixed at a ratio of one 94-pound sack of Portland cement 5 to 6 gallons of 'clean' water.
    - ***Up to 6%*** of bentonite may be added to the cement mixture at a ratio of two (2) pounds of bentonite one (1) gallon of 'clean' water, or in accordance with the manufacturer's specification.
    - The use of hydrated bentonite is not permitted.
3) Sealing materials shall be applied under pressure - from *terminal depth, advancing upward in one continuous operation, via a tremie pipe or equivalent* - to prevent freefall, jamming or "bridging", voids, dilution of sealing materials, and/or prevent separation of aggregate from sealants.
4) Drill cuttings and wastewater shall be disposed of in accordance with all applicable federal, State, and local requirements.
5) Sealing materials shall meet *National Sanitation Foundation (NSF 61)* standard.
6) Provide temporary cover to the borehole opening whenever work is interrupted.
7) Soil boring or exploration holes must comply with all applicable requirements published in the *California Well Standards (Bulletins 74-81 and 74-90 combined)* and the *Los Angeles County Code, Title 11.*

Soil Vapor Field Measurement Log

Date:	6/9/21	Sampler:	Paola Gomez-Birenbaum
Client:	Bardas Investment Group	Project #:	01-BAR-003 Task 2B
Container Type:	1L Summa	Container ID:	008949
Sample ID:	B4-29.5	Manifold ID:	008653
Duplicate Sample ID			
Weather:	clear	Temperature:	70F
Precipitation: Has it rained >0.5 inch during a 24-hour period in the last 5 day	No [X]	Yes [ ]	Rainfall _____ in.
If no, proceed with collection of sample. If yes, contact PM.			
Sampling Device:	1L Summa	Leak Check Compound: 1,1-DFA	
Leak Test:	5min @ -14" Hg	Purge Flow Rate:	200 mL/min
Purge Volume:	2437 mL	Purge Duration:	~~200mL/min~~ 12.2 min
Purge Start Time:	1042	Purge End Time:	1056
Sample Start Time:	1100	Sample End Time:	1105
Start Vacuum:	-26	End Vacuum:	-5

Field Measurements

Time	Flow (mL/min)	Vacuum (in Hg)	Helium Percentage	Comments

Building Survey Form

Person Conducting Survey	Input
Name:	Paola Gomez-Birenbaum
Company:	RMD Environmental Solutions
Phone Number:	310-678-9367
Email:	pgomez@rmdes.net

Building Contact Information	Input
Name:	Kay Mills
Contact Title:	Office Manager.
Phone Number:	818 249-4219
Email:	
Building Occupant Interviewed?	unoccupied during survey

Building Information	Input
Date of Building Survey (dd/mm/yy):	7/12/2021
*Building Name:	Vacant 1st Floor
*Building Address (Street, City):	1128 North Las Palmas Ave, Los Angeles
Coordinates for Center of Building (Latitude, Longitude; decimal degrees to 0.00000):	
*Building Location Onsite/Offsite with respect to Site/Facility:	Onsite
*Year Built (yyyy; approximate if unsure):	1925
*Building Occupants:	Vacant 1st floor. offices 2nd

Building Survey Form 1128 North Las Palmas Avenue

Building Dimensions	Input
*Building Footprint Area (within enclosed space; square feet [Ft2]):	7,358
Building Dimensions (at grade; feet by feet):	
*Ceiling Height of Ground Floor (Feet):	10'
*Number of Floors (excluding the basement):	2

Building Design	Input
*Building Design Type:	Single Unit Commercial
Has the design been modified?	
*Foundation Type:	Slab-on-Grade
*Building Vapor Intrusion Mitigation System:	None
*Heating, Ventilation, & Air Conditioning (HVAC) System:	unknown
Type of Energy Used in Building?	Electricity
Energy Primarily Used For?	Vacant
Number of Units for Multi-Unit Buildings:	N/A
Number of Rooms (average per unit for multi-unit buildings):	15
Number of Exterior Doors:	2 (west) + 2 east.
Number of Elevators:	Ø
Number of Active Exhaust Fans (e.g., kitchen/bathroom):	Ø
Chimney or Other Vertical Draft Source?	open vent through roof - east side

Building Slab	Input
Slab Thickness (inches; approximate if unsure):	4
Large Slab Penetrations (> 1 Foot Diameter):	
Soil Type 0 to 3 Feet Below Building:	
Evidence of moisture intrusion from Below Slab?	no

Building Survey Form 1128 North Las Palmas Avenue

Building Windows	Input
Number of Windows:	5
Weather Sealed Windows and Exterior Doors?	unknown
Average Area of Window Open to Outside Air (Feet2):	
Ventilation During Sampling:	Closed

Building Crawl Space	Input
Crawl Space Height (Feet):	N/A
Number Crawl Space Vents:	N/A
Average Area per Crawl Space Vent (Feet2):	N/A
Evidence of moisture intrusion into Crawl Space from Soil?	N/A

Building Basement	Input
Basement Height (Feet):	N/A
Basement Footprint Area (Feet2):	N/A
Basement Wall Area Below Ground Surface (Feet2):	N/A
Exposed Basement above grade?	N/A
Vents or Windows above-grade in exposed basement?	N/A
Unfinished Basement?	N/A
Evidence of moisture intrusion into Basement from Soil?	N/A

Building Survey Form 1128 North Las Palmas Avenue

Factors Potentially Influencing Indoor Air Quality	Input
Is there an attached garage?	No
Is there smoking in the building?	No
Is there new carpet or furniture?	No
Have clothes or drapes been recently dry cleaned?	no
Has painting or staining been done within the last six months?	no
Has the building been recently remodeled?	no
Has the building ever had a fire?	no
Is there a hobby or craft area in the building?	No
Are cleaning solvents stored in the building (e.g., spot cleaner, gun cleaner?	no
Is there a fuel oil tank on the property?	No
Is there a septic tank on the property?	No
Has the building been fumigated or sprayed for pests recently?	no
Historically the building was primarily used for?	recent tenant in photography
Do current building occupants use solvents at another location (e.g., work, hobby)?	vacant
Other	

Meteorological Conditions	Input
Weather:	clear
Outdoor Temperature - High (°F):	84.2
Outdoor Temperature - Low (°F):	62.8
Indoor Temperature (°F):	
Barometric Pressure Reading (mmHg):	29in
Wind Direction:	to NE
Average Wind Speed (mph):	1.8
HVAC Setting for Current Season:	Off

(End of Form)

Building Occupant Interviewed?	Scott Carpenter

Building Information	Input
Date of Building Survey (dd/mm/yy):	7/12/2021
*Building Name:	Company 3
*Building Address (Street, City):	1136 North Las Palmas Ave, Los Angeles
Coordinates for Center of Building (Latitude, Longitude; decimal degrees to 0.00000):	
*Building Location Onsite/Offsite with respect to Site/Facility:	Onsite
*Year Built (yyyy; approximate if unsure):	1951
*Building Occupants:	Commercial.

Building Survey Form 1136 North Las Palmas Avenue

Building Dimensions	Input
*Building Footprint Area (within enclosed space; square feet [Ft2]):	7,364
Building Dimensions (at grade; feet by feet):	
*Ceiling Height of Ground Floor (Feet):	20'
*Number of Floors (excluding the basement):	1 + partial 2nd.

Building Design	Input
*Building Design Type:	Single Unit Commercial
Has the design been modified?	No
*Foundation Type:	Slab-on-Grade
*Building Vapor Intrusion Mitigation System:	None
*Heating, Ventilation, & Air Conditioning (HVAC) System:	Cooling Only
Type of Energy Used in Building?	Electricity
Energy Primarily Used For?	Commercial Processes.
Number of Units for Multi-Unit Buildings:	N/A
Number of Rooms (average per unit for multi-unit buildings):	5+2
Number of Exterior Doors:	2
Number of Elevators:	Ø
Number of Active Exhaust Fans (e.g., kitchen/bathroom):	2 restrooms.
Chimney or Other Vertical Draft Source?	None

Building Slab	Input
Slab Thickness (inches; approximate if unsure):	4
Large Slab Penetrations (> 1 Foot Diameter):	
Soil Type 0 to 3 Feet Below Building:	
Evidence of moisture intrusion from Below Slab?	No

Building Survey Form 1136 North Las Palmas Avenue

Building Windows	Input
Number of Windows:	windows along roof line on N side most of length of building - sealed.
Weather Sealed Windows and Exterior Doors?	
Average Area of Window Open to Outside Air (Feet2):	
Ventilation During Sampling:	closed.

Building Crawl Space	Input
Crawl Space Height (Feet):	N/A
Number Crawl Space Vents:	N/A
Average Area per Crawl Space Vent (Feet2):	N/A
Evidence of moisture intrusion into Crawl Space from Soil?	N/A

Building Basement	Input
Basement Height (Feet):	N/A
Basement Footprint Area (Feet2):	N/A
Basement Wall Area Below Ground Surface (Feet2):	N/A
Exposed Basement above grade?	N/A
Vents or Windows above-grade in exposed basement?	N/A
Unfinished Basement?	N/A
Evidence of moisture intrusion into Basement from Soil?	N/A

Building Survey Form 1136 North Las Palmas Avenue

Factors Potentially Influencing Indoor Air Quality	Input
Is there an attached garage?	No
Is there smoking in the building?	No
Is there new carpet or furniture?	No
Have clothes or drapes been recently dry cleaned?	No
Has painting or staining been done within the last six months?	No
Has the building been recently remodeled?	No
Has the building ever had a fire?	No
Is there a hobby or craft area in the building?	No
Are cleaning solvents stored in the building (e.g., spot cleaner, gun cleaner?	No
Is there a fuel oil tank on the property?	No
Is there a septic tank on the property?	No
Has the building been fumigated or sprayed for pests recently?	No
Historically the building was primarily used for?	Digital Film Post Production.
Do current building occupants use solvents at another location (e.g., work, hobby)?	No
Other	

Meteorological Conditions	Input
Weather:	clear
Outdoor Temperature - High (°F):	84.2
Outdoor Temperature - Low (°F):	62.8
Indoor Temperature (°F):	
Barometric Pressure Reading (mmHg):	29in

ANALYTICAL REPORT

June 16, 2021

RMD Environmental - Walnut Creek, CA

Sample Delivery Group:	L1364075
Samples Received:	06/09/2021
Project Number:	01-BAR-003 TASK 2B
Description:	Las Palmas

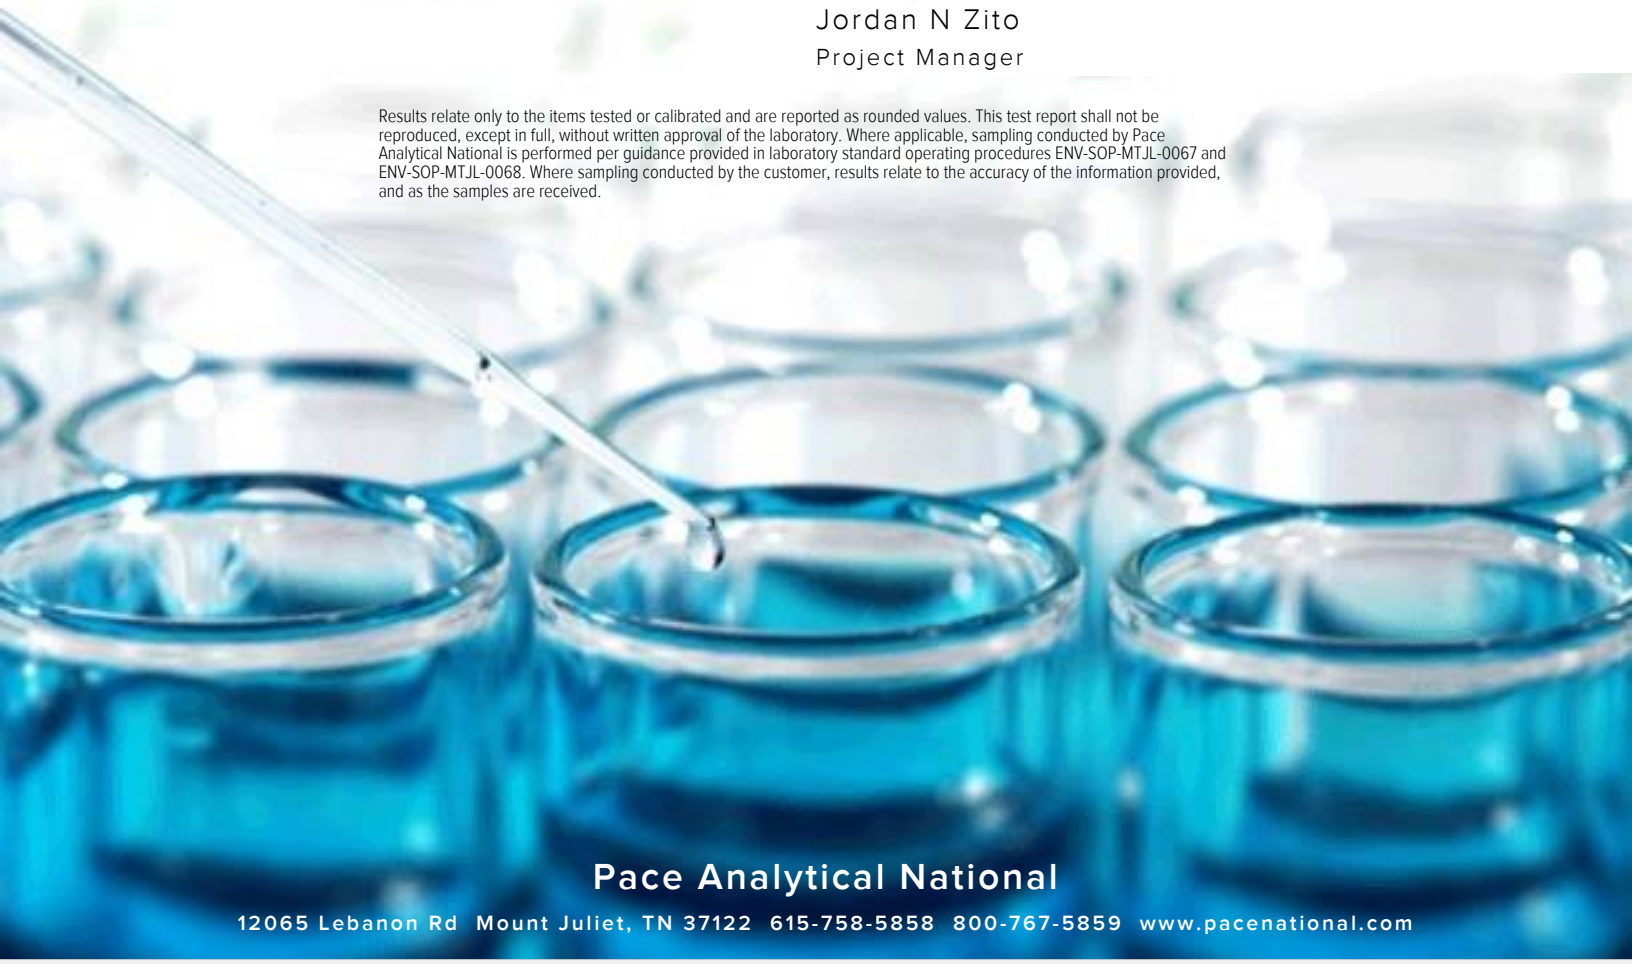

Report To:

Doug Whichard
1371 Oakland Blvd.
Suite 200
Walnut Creek, CA 94596

Entire Report Reviewed By:

Jordan N Zito
Project Manager

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Jordan N Zito
Project Manager

Volatile Organic Compounds (MS) by Method TO-15

The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL).

Batch	Lab Sample ID	Analytes
WG1686163	L1364075-01	Ethanol
WG1686163	L1364075-02	Ethanol
WG1686163	L1364075-03	Ethanol

The same analyte is found in the associated blank.

Batch	Analyte	Lab Sample ID
WG1686163	1,1-Difluoroethane	L1364075-01, 04, 05, 06, 07, 08
WG1686163	Ethanol	L1364075-06

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
E	The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL).
J	The identification of the analyte is acceptable; the reported value is an estimate.

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Jordan N Zito
Project Manager

Metals (ICP) by Method 6010B

The sample matrix interfered with the ability to make any accurate determination; spike value is low.

Batch	Lab Sample ID	Analytes
WG1687351	(MS) R3667505-5, (MSD) R3667505-6	Antimony

Volatile Organic Compounds (GC) by Method 8015

The associated batch QC was outside the established quality control range for precision.

Batch	Lab Sample ID	Analytes
WG1688423	(MSD) R3667552-5	TPHG C5 - C12

Volatile Organic Compounds (GC/MS) by Method 8260B

The same analyte is found in the associated blank.

Batch	Analyte	Lab Sample ID
WG1688342	2-Butanone (MEK)	L1364570-17

The associated batch QC was above the established quality control range for accuracy.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

(dry)	Results are reported based on the dry weight of the sample. [this will only be present on a dry report basis for soils].
MDL	Method Detection Limit.
MDL (dry)	Method Detection Limit.
RDL	Reported Detection Limit.
RDL (dry)	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.
J3	The associated batch QC was outside the established quality control range for precision.
J4	The associated batch QC was outside the established quality control range for accuracy.
J6	The sample matrix interfered with the ability to make any accurate determination; spike value is low.

Comments

Hailey Melson *8 June 2021 4:37 PM*

Some samples on pgs. 2,3 and 4 say composite. Are we compositing the samples and running for just the M6010CAM17 or how is the composite for this set supposed to work?

Jordan Zito *8 June 2021 6:03 PM*

Composite the samples and run for M6010CAM17 only. Composite enough sample for TCLP and STLC metals on hold as well.

Hailey Melson *9 June 2021 6:40 PM*

Are the DROCAER GROCA and V8260 sample supposed to be run for the discrete samples that we composite? They have X's on the analysis for 3 of the 6 samples comped.

Jordan Zito *9 June 2021 6:42 PM*

Discrete samples that are marked for composite are to be run for CAM17 metals only

Jordan Zito *10 June 2021 11:31 AM*

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

CASE NARRATIVE

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Jordan N Zito

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
J	The identification of the analyte is acceptable; the reported value is an estimate.

ANALYTICAL REPORT

July 12, 2021

RMD Environmental - Walnut Creek, CA

Sample Delivery Group:	L1373977
Samples Received:	06/08/2021
Project Number:	01-BAR-003 Task 2A
Description:	Las Palmas

Report To:

Paola Gomez-Birenbaum
1371 Oakland Blvd.
Suite 200
Walnut Creek, CA 94596

Entire Report Reviewed By:

Jordan N Zito
Project Manager

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Jordan N Zito
Project Manager

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.

ANALYTICAL REPORT

July 20, 2021

RMD Environmental - Walnut Creek, CA

Sample Delivery Group:	L1378119
Samples Received:	07/14/2021
Project Number:	01-BAR-003 TASK 2D
Description:	Las Palmas

Report To:

Paola Gomez-Birenbaum
1371 Oakland Blvd.
Suite 200
Walnut Creek, CA 94596

Entire Report Reviewed By:

Jordan N Zito
Project Manager

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Jordan N Zito
Project Manager

Volatile Organic Compounds (MS) by Method TO-15-SIM

The same analyte is found in the associated blank.

GLOSSARY OF TERMS

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.

SUBJECT **Sub-Slab Soil Vapor Survey Report**
Kodak Hollywood Campus
6700 Santa Monica Boulevard and 1017 North Las Palmas Avenue
Hollywood, California
Cardno NPLPC15006

Mr. Matt Howell:

On behalf of LPC West, LLC Cardno Inc. (Cardno) has prepared this *Sub-Slab Soil Vapor Survey Report* for the above-referenced site (Plate 1). The purpose of the work was to obtain additional site data necessary to evaluate the potential for exposure to VOCs from vapor intrusion. The work was performed in accordance with Cardno's *Phase II Assessment and UST Closure Proposal*, dated April 23, 2015.

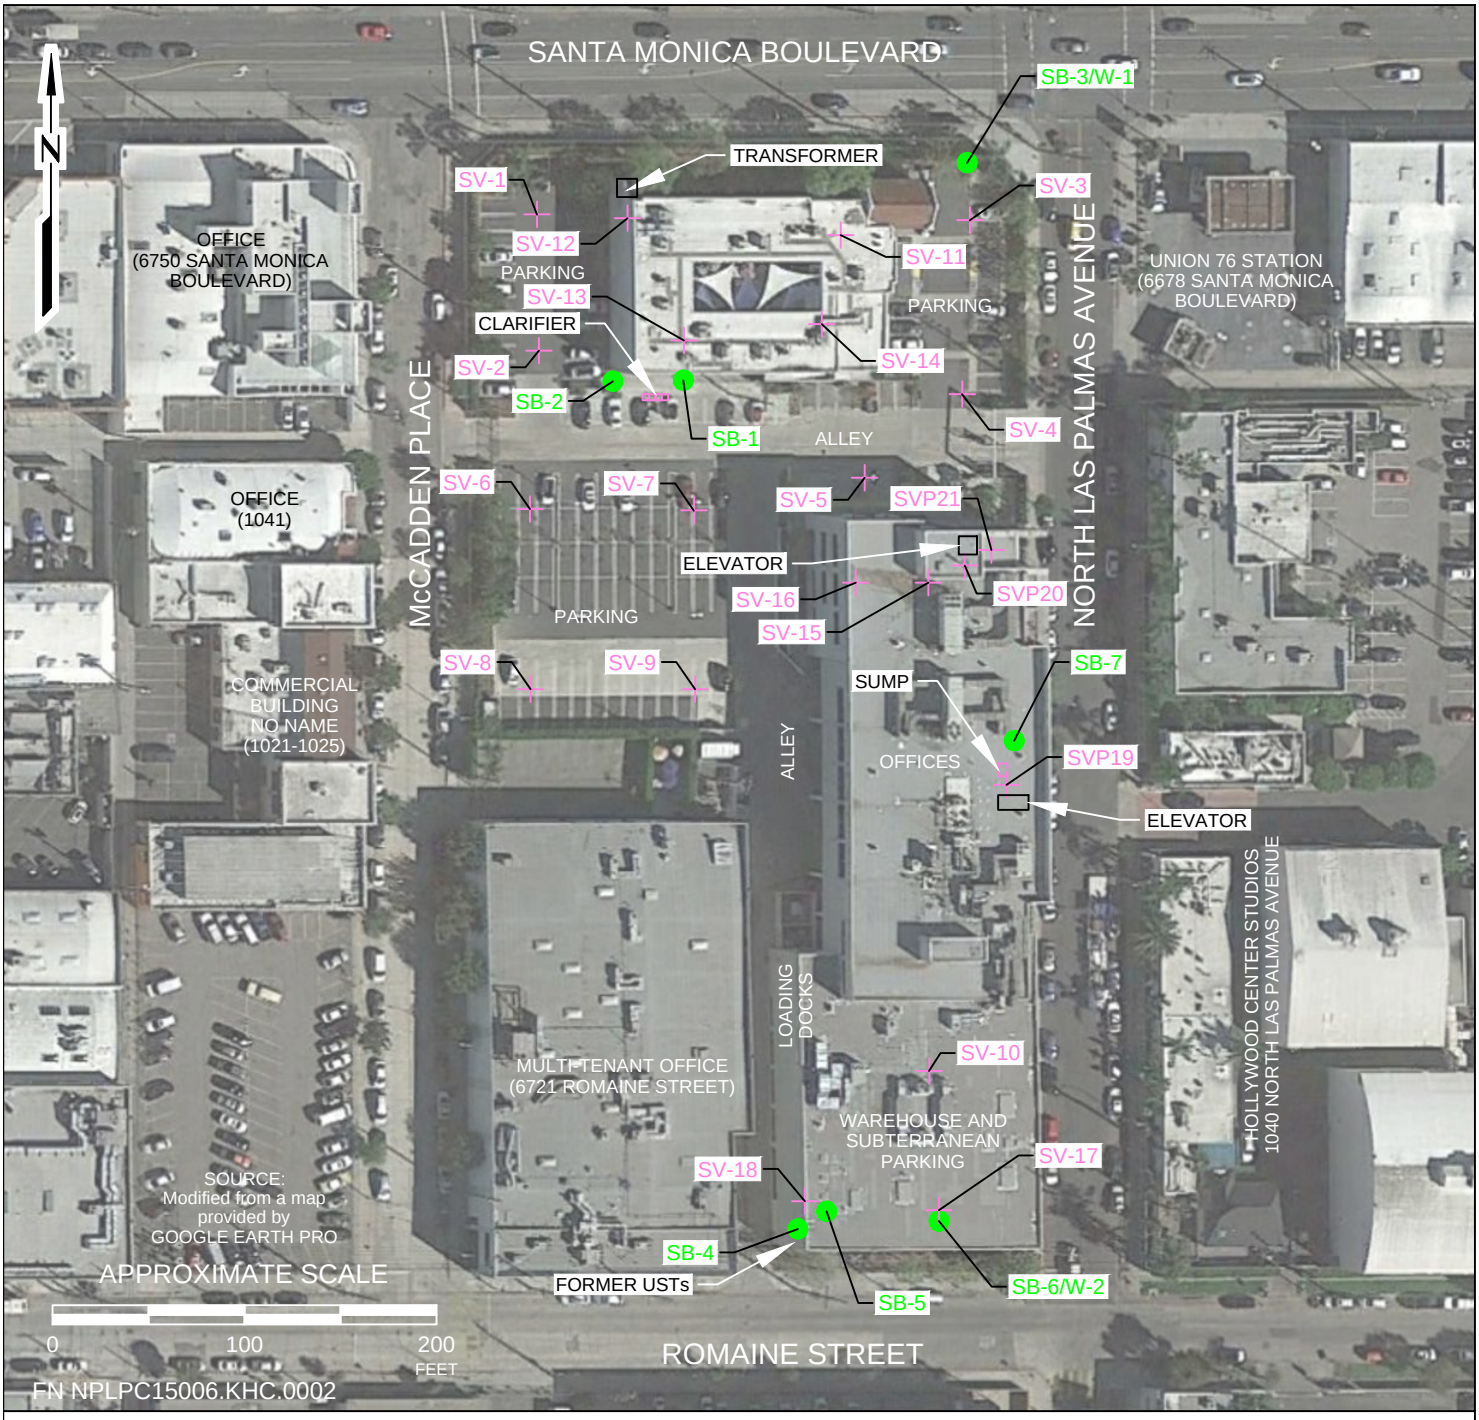

The work consisted of the installation and sampling of three soil vapor sampling (SVS) probes (SVP19 through SVP21) adjacent to the two elevators located in the subsurface parking garage (Plate 2).

BACKGROUND

The site consists of a 2.62 acre area bounded by Santa Monica Boulevard to the north, Romaine Street to the south, North Las Palmas Avenue to the east, and McCadden Place to the west.

The site is developed with two buildings and a subsurface parking garage. The buildings at 6700 Santa Monica Boulevard and 1017 North Las Palmas Avenue are 18,850 square feet (sf), and 83,949 sf, respectively. Several *Recognized Environmental Conditions* (RECs) were identified in a *Phase I Environmental Site Assessment* prepared by Cardno ATC, dated April 8, 2013 (Cardno ATC, 2013). A subsequent Phase II Assessment was conducted, based on the findings of the Phase I, and was presented in Cardno ATC's *Phase II Environmental Site Assessment and Limited Risk Assessment* report, dated May 10, 2013. The analytical results from this assessment are provided in Appendix A.

Based on the findings of the Phase I and Phase II activities, residual concentrations of VOCs (specifically, PCE) in groundwater indicated a potential risk of vapor intrusion at the site. Additionally, historic USTs were identified near the southwestern portion of the property, which reportedly had been removed in 1985 without obtaining regulatory closure. Soil borings were advanced in the vicinity of the former USTs, and Cardno is currently pursuing closure of the historic USTs with the LA County Fire Department.

EXPLANATION

SB-7	Soil boring
SVP21	Soil vapor sampling probe
