VES	Vapor Encroachment Screening
VSQG	Very Small Quantity Generators

1. EXECUTIVE SUMMARY

Kimley-Horn and Associates, Inc. (Kimley-Horn) was retained by Good Samaritan Hospital (the "Client" or "User") to conduct a Phase I Environmental Site Assessment (ESA) for approximately 19-acres at 2425 and 2333 Samaritan Drive, San Jose, Santa Clara County, California (referred to herein as the "subject property"). This Phase I ESA was performed in accordance with (1) the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI), 40 CFR Part 312 and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process/Designation E 152721* (ASTM Standard Practice E 1527-21). The ESA was conducted under the supervision or responsible charge of Cassie Bretschger, Environmental Professional.

The Phase I ESA summary is provided below. Specific details were not included or fully developed in this section, and the Phase I ESA must be reviewed in its entirety for a comprehensive understanding of the results. This report represents our services as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the subject property's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after property renovation or development). Further, these services are not to be construed as legal interpretation or advice.

Viability of this report is subject to ASTM E1527-21 Sections 4.6 and 4.8. This Phase I ESA is presumed viable for up to 180 days from the first date the component listed in Section 4.6 of the ASTM Standard Practice E1527-21 were conducted, which is May 30, 2023.

Table 1.1 Summary Phase I ESA Component Dates

Component	Date
Interviews	June 12, 2023
Review of Government Records	May 30, 2023
Visual Inspection	June 12, 2023
Declaration by Environmental Professional	August 31, 2023

Site Background:

The subject property is located at the address of 2425 and 2333 Samaritan Drive in San Jose, California and is currently operating as a 404-bed acute care hospital. The property was maintained as agricultural from 1935 to 1956. Between 1956 and 1963, development activity began onsite with the construction of Good Samaritan hospital on the western portion of the site (APN 421-36-009). Expansion of the hospital occurred between 1963 and 1968. The eastern portion of the site (APN 421-36-011) was maintained as agricultural land until 1974 when it was developed as surface parking lots and athletic fields. The eastern portion of the site was redeveloped into parking and a day care facility between 1982 and 1993. The subject property is currently developed as a hospital campus comprising of four multi-story towers. Ancillary childcare services, parking, and physical plant facilities are also onsite.

Table 1.2: Property Use Summary	
Item	**Comments**
Number of Parcels and Acreage	Two parcels: 421-36-009 and 421-36-011 Approximately 19 acres in total
Number of Building(s) and Square Footage	The hospital campus consists of four buildings, associated pavement, and native soil surfaces present onsite.
Current Property Use	Hospital campus consisting of four multi-story towers, as well as ancillary childcare services, parking, and physical plant facilities.

Kimley-Horn has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property located at 5192 Bayou Way in Sacramento, Sacramento County, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

Recognized Environmental Conditions

A recognized environmental condition (REC) is defined in the ASTM Standard as the presence or likely presence of a hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. Kimley-Horn did not identify any RECs in association with the Subject Property.

Historical Recognized Environmental Conditions

A historical REC (HREC), as defined in the ASTM Standard, is a past release of any hazardous substance and/or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria. This assessment has revealed no evidence of historical recognized environmental conditions connected with the subject property except the following:

> HREC 1: The subject property is listed as a LUST case with a Site Case Closure dated January 21, 2000, from the Regional Water Quality Control Board (RWQCB) in association with a piping leak from former USTs operations on site. Three USTs formerly operated within the Site, consisting of two 10,000-gallon and one 5,000-gallon diesel tanks, which were removed on June 8, 1999. Soil samples were taken at 3.8-feet below ground surface (bgs) adjacent to the piping and reported low levels of Total Petroleum Hydrocarbon- Diesel range (TPH-D) at 38.0 ppm (mg/kg) in the vicinity of the UST piping. The detection reported is below current RWQCB-San Francisco Region Environmental Screening Levels (ESLs) for TPH-D in commercial/industrial soil, which is 1,200 mg/kg. All USTs were intact upon removal and properly disposed of offsite. The RWQCB issued a “no further action” determination concerning the former USTs on January 21, 2000. The former LUST case with regulatory closure is considered a HREC. Based on the results of confirmation soil sampling, which identified only low concentrations of TPH-D, and the closed regulatory status of the UST case, the former USTs are not an environmental concern to the subject property and Kimley-Horn recommends no further investigation.

Controlled Recognized Environmental Conditions

A controlled REC (CREC), as defined in the ASTM Standard, is a REC resulting from a past release of hazardous substances and/or petroleum products in which the regulatory agency has allowed contamination to remain in place at the property which is subject to the implementation of required controls and/or restrictive use. Kimley-Horn has not identified any evidence of CRECs in association with the Subject Property.

De minimis Condition

De minimis conditions are defined as conditions that generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

DMC 1: A 55-gallon drum of a Class 3 hazard (hazard constituents included acetic acid, acetone, chloroform, ethyl alcohol, hydrochloric acid, and isopropanol) was observed. The 55-gallon drum was not housed within secondary containment at the time of the inspection. All materials within the hazardous materials storage area should have secondary containment.

DMC 2: Three 5-gallon and 15-gallon containers of refrigerant were observed stored outside behind a pad-mounted transformer on top of a gravel base. One drum contained fluid. No staining was visible in the vicinity of the drums. The unlabeled containers are considered a *de minimis* condition and should be properly disposed of from the property.

Business Environmental Risks

A Business Environmental Risk (BER), as defined in the ASTM Standard, is a risk which can have a material environmental or environmentally-driven impact on the business associated with the use of a commercial site, and which does not require further investigation to the same degree as a REC. Kimley-Horn did not identify areas of potential concern associated with business environmental risks in connection with the Subject Property during the completion of this Phase I ESA with the exception of the following.

BER 1: Previous agricultural use of the subject property identified during the review of historical aerial photography is a BER. The legal and routine application of herbicides, pesticides, and fertilizers while the subject property was used for agricultural purposes may have resulted in localized impacts to shallow site soils. Given the length of time since agricultural operations have occurred, and the absence of any documentation suggesting pesticides and herbicides were stored or mixed on the subject property, the presence of pesticides and herbicides are not a REC. However, since the property is developed with asphalt or building structures covering the surface of the subject property, there is not a direct exposure pathway imposing risk for human health. Per the ASTM standard, the standard application of herbicides, pesticides, and fertilizers does not constitute a release or materially threat of release, therefore, this is a BER.

BER 2: Currently, two USTs containing diesel fuel are located within the subject property and actively used as back-up fuel for generators. Both tanks were installed after 2000, and 20,000-gallon in size. See Section 4.2 for additional review of the USTs. Based on Figure 3 Proposed Project Build Out Conceptual Site Plan dated September 2023, current redevelopment includes construction of an additional building within the footprint of the current USTs. The USTs should be removed after approval from Santa Clara County Hazardous Materials Compliance Divisions (HMCD) and completion of an UST System Closure Permit Application. Closure will consist of

tank removal, and ancillary piping along with soil sampling to ensure no residual leaks from operating the tank system. Tank and sump removal and sampling activities must be witnessed by a representative from HMCD.

2. INTRODUCTION

The following is a concise summary of the subject property as well as the purpose, methodology, user reliance, significant assumptions, and limitations of this Phase I ESA.

2.1 SUBJECT PROPERTY OVERVIEW

The subject property location is depicted on **Figure 1** and **Figure 2**. The Proposed Project Build Out Conceptual Site Plan are depicted on **Figure 3**. Figures are included in **Appendix A**. Photographs of the subject property are included in **Appendix B**.

Table 2.1 Subject Property Overview

Site Name	Good Samaritan Hospital
Site Location/Address	2425 Samaritan Drive, San Jose, CA 95124
Owner	19 acres
Land Area	The subject property consists of an approximately 13-acre parcel (APN 421-36-009) and an approximately 6- acre parcel (APN 421-36-011) totaling 19 acres.
Legal Description	Historically agricultural and hospital use. Currently occupied by Good Samaritan Hospital (Planned Development zone).
Existing Use/Condition	Good Samaritan Hospital

2.2 PURPOSE AND SCOPE OF SERVICES

This Phase I ESA was performed in accordance with (1) the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries {(AAI), 40 CFR Part 312} and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process/Designation E 1527-21* (ASTM Standard Practice E 1527-21).

The purpose of this Phase I ESA was to evaluate the current and historical conditions of the Subject Property in an effort to identify *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and *historical recognized environmental conditions* (HRECs) in connection with the Subject Property. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, CRECs and HRECs in connection with the Subject Property.

Additionally, this Phase I ESA was designed to assist the client in developing information to identify RECs in connection with the Subject Property as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual, noninvasive reconnaissance of the Subject Property and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-21 contains a new definition of "migrate/migration," which refers to “the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.” By including this explicit reference to migration in ASTM E1527-21, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the Subject Property.

2.3 USER RELIANCE

This Phase I ESA report represents the product of Kimley-Horn’s expertise and judgment in the environmental consulting industry. This report is certified to, can be relied upon by, and has been prepared for the exclusive use of the following entities: Kimley-Horn and Associates, Inc. (Kimley-Horn); and Good Samaritan Hospital, and their respective successors, assigns, affiliates, and subsidiaries. Kimley-Horn acknowledges that these parties may rely on the contents and conclusions presented in this report. Unless stated otherwise in writing, Kimley-Horn makes no other warranty, representation, or extension of reliance upon the findings of this report to any other entity or third party.

Reliance on the Phase I ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal with Kimley-Horn and Associates, Inc. Standard Provisions and the Phase I ESA report. The limitation of liability defined in the Standard Provisions is the aggregate limit of Kimley-Horn’s liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Sections 4.6 and 4.8. If the Phase I ESA will be used by a different user (third party) than the user for whom the Phase I ESA was originally prepared, the third party must also satisfy the user’s responsibilities in Section 6 of ASTM E1527-21.

2.4 SIGNIFICANT ASSUMPTIONS

Pursuant to ASTM Standard Practice E 1527-21, Kimley-Horn assumes that the information provided by all sources and parties, including the User as Good Samaritan Hospital, is accurate and complete, except where obvious inconsistencies or inaccuracies were identified.

2.5 LIMITATIONS, DEVIATIONS, AND SPECIAL TERMS AND CONDITIONS

There were no deviations from the ASTM Standard during the preparation of this report. Any physical limitations identified during the completion of this report are referenced in Section 4.0.

This Phase I ESA is viable for up to 180 days from the first date the component listed in Section 4.6 of the ASTM Standard Practice E1527-21 were conducted, which is November 26, 2023.

Based upon the agreed-on scope of services, this Phase I ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several

sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources is not warranted hereunder. This ESA was further limited by the following:

- Title records were not provided during this investigation.

Based on other available resources, these data gaps are not likely to affect the conclusions of this report and are not significant.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

3. USER PROVIDED INFORMATION

The ASTM Standard defines a User as "the party seeking to use Practice E 1527-21 to complete an environmental site assessment of the Subject Property. A User may include, without limitation, a potential purchaser of Subject Property, a potential tenant of Subject Property, an owner of the Subject Property, a lender, or a property manager." The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard Practice E 1527-21.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments"), the User must provide certain information (if available) identified in the User Questionnaire to the Environmental Professional (EP). Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. The County of Sacramento owns the Subject Property. The County has elected to complete a Phase I ESA in association with the proposed development of the property. Failure to provide a completed User Questionnaire constitutes a data failure, which is a type of data gap. However, the data gap is not considered significant because there is no pending real estate transaction, and other information and/or personal experience did not raise reasonable concerns involving the data gap.

3.1 USER QUESTIONNAIRE

The following table summarizes the responses to the User Questionnaire completed by completed by Justin Wilchynski the Construction Project Manager with Good Samaritan. A copy of the User Questionnaire is attached in **Appendix C**.

Table 3.1 Summary of User Questionnaire Responses

Client Questionnaire Item	Client's Response	
	Yes	No
Do you know the past uses of the Subject Property?	X This land was previously used for agricultural purposes.	
Do you know of specific chemicals that are present or once were present at the Subject Property?	X List of hazardous materials within the site provided.	
Do you know of any past or present underground storage tanks or above ground storage tanks?	X Current and past tanks	

Do you know of spills or other chemical releases that have taken place at the Subject Property?		X
Are you aware of any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?		X
Do you have any specialized knowledge or experience related to the subject property or nearby properties? Has a Phase I ESA ever been performed on the site? If so, was the site found to be contaminated with hazardous materials and/or petroleum substances? Was further assessment recommended?		X
Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?		X
Other Information per X3.1		
Reason why the Phase I ESA is being performed:	Property redevelopment for CEQA	
Type of property and transaction being performed:	N/A	
Any other knowledge or experience with the Subject Property that may be pertinent to the environmental professional (any available prior environmental site assessment reports, documents, correspondence, etc., concerning the Subject Property and its environmental condition):	No	

3.2 RECORDED LAND TITLE RECORDS

A 50-year chain of title search was not conducted for the Subject Property by Kimley-Horn. Furthermore, the User did not provide Kimley-Horn with a 50-year chain of title. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report. As such, this is considered a limiting condition; however, based on the other data reviewed for the Subject Property, it is not considered a significant data gap.

3.3 ENVIRONMENTAL LIENS, ACTIVITY AND USE LIMITATIONS, AND GOVERNMENT INSTITUTIONAL AND ENGINEERING CONTROLS

An Environmental Lien and AUL Search Report for the two parcels within the Subject Property was produced by EDR and was reviewed as part of this Phase I ESA (**Appendix D**). No liens or use limitations were identified. The deed for the parcels is vested to Good Samaritan Hospital, L.P.

4. SITE RECONNAISSANCE

Information contained in this section is based on a visual reconnaissance conducted while walking through the Subject Property and the accessible interior areas of structures, if any, located on the Subject Property. The Subject Property and adjoining properties are depicted on the Site Plan, which is included in **Figure 2** of **Appendix A**. Photo documentation of the Subject Property at the time of the visual reconnaissance is provided in **Appendix B**.

Table 4 Summary of General Site Information

Site Reconnaissance				
Field Personnel	Cassie Bretschger, Damian Arnaiz			
Date	June 15, 2023			
Weather Conditions	Sunny			
Subject Property Contact/Title	Justin Wilchynski			
Building Description				
Building/ Improvement Id	Building Use	Year Built	Number of Stories	Approx Sq FT
Building 1	Main Hospital	Mid 1990s	4	Unknown
Building 2	Helipad	Late- 1990s	2	Unknown
Building 3	Temporary offices (3x)	Late-2010s	1	Unknown
Building 4	CT/PET scan	Mid-2000s	1	Unknown

4.1 SITE OBSERVATIONS

The following table summarizes the Subject Property observations. Affirmative responses are discussed in more detail following the table.

Table 4.1 Summary of Site Observations

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	Yes- observed. Two emergency generators are maintained on the east side of the hospital. Generators are new but

		exact installation date in unknown.
	Elevators	Yes- observed. Multiple elevators located throughout hospital facility. Maintained by Otis Worldwide Corporation monthly. No spills/ongoing maintenance issues reported.
	Air compressors	Yes- observed. Air compressors are located within the basement.
	Hydraulic lifts	Yes- observed. Hydraulic lifts were observed within the basement.
	Dry cleaning	No
	Photo processing	No
	Ventilation hoods and/or incinerators	Yes- observed. Ventilation hoods were observed in the refurbished kitchen.
	Waste treatment systems and/or water treatment systems	No
	Heating and/or cooling systems	Yes- observed. The property is currently connected to a HVAC system.
	Paint booths	No
	Sub-grade mechanic pits	No
	Wash-down areas or carwashes	No
	Pesticide/herbicide production or storage	No
	Printing operations	No
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	No

	Salvage operations	No
	Oil, gas or mineral production	No
	Other processes or equipment	No
Aboveground Chemical or Waste Storage	Aboveground storage tanks	Yes- observed. Portable office building's black water is served by above ground storage tank. Additionally, two- liquid oxygen ASTs are observed within the property.
	Drums, barrels and/or containers ≥ 5 gal	Yes- observed. Hazardous and non-hazardous drums, barrels and containers observed throughout the site. Hazardous waste was observed in the designated hazardous waste storage area. Staining observed in hazardous waste storage area. Hazardous waste was observed outside of hazardous waste storage area as well.
	MSDS or SDS	Yes- identified. SDS reported by Owner's representative but not observed.
Underground Chemical or Waste Storage, Drainage or Collection Systems	USTs or ancillary UST equipment	Yes- identified. Manholes of USTs observed during site reconnaissance. Two 20,000- gallon USTs are located within the subject property.
	Sumps, cisterns, French drains, catch basins and/or dry wells	Yes- observed. Three sewer sumps and one stormwater sump were observed.
	Grease traps	Yes- observed. Grease trap located in new and existing kitchens.

	Septic tanks and/or leach fields	Yes- observed. Above ground septic tank services black water from portable office building.
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	No
	Pipeline markers	No
	Interior floor drains	Yes- observed. Multiple interior floor drains located throughout the facility. No staining observed near interior floor drains.
Electrical Transformers/ PCBs	Transformers and/or capacitors	Yes, observed. Multiple pad mounted transformers were located within the property.
	Other equipment	No
Releases or Potential Releases	Stressed vegetation	No
	Stained soil	No
	Stained pavement or similar surface	Yes observed. Stained pavement observed in several locations. Refer to photo log, for photos of stained pavement. The staining was not indicative a s major spill or release.
	Leachate and/or waste seeps	Yes- observed. Waste seep Observed at drain near loading dock/disposal.
	Trash, debris and/or other waste materials	Yes- observed. Trash, debris, and waste materials observed onsite in the vicinity of the loading dock
	Dumping or disposal areas	Yes- observed. Controlled disposal areas located throughout the site. Centralized collection facility is located in the vicinity of the loading dock.

	Construction/demolition debris and/or dumped fill dirt	Yes- observed. CONEXs Housing construction materials located in north parking lot. Construction Debris located near CONEXs.
	Surface water discoloration, odor, sheen, and/or free-floating product	No
	Strong, pungent or noxious odors	No
	Exterior pipe discharges and/or other effluent discharges	No
Other Notable Site Features	Surface water bodies	No
	Quarries or pits	No
	Wastewater lagoons	No
	Wells	Yes- identified. Three active wells are identified onsite through the Santa Clara Valley Water District. Well, 08S01W11E001 is identified as an active, 24-inch water production well with a depth of 472 feet under Permit. Number 91W1944). The remaining two wells are in association, with the E and W Elevator, likely associated with the elevator sumps under Permit numbers 03W00418, 03W00419. Additionally, two unregistered wells are identified as destroyed (Permit numbers 98D00770 and 98D00768).

4.2 CURRENT OPERATIONS

The subject property is currently operating as an acute care hospital. There are also ancillary childcare services, parking, and physical plant facilities onsite.

At the time of site reconnaissance, the subject property was developed with multiple medical office buildings and operating as an acute care hospital with ancillary childcare services, parking, heliport, and supporting medical offices.

A basement was present beneath one of the main hospital buildings, which was occupied by facility maintenance personnel for storage of building maintenance supplies and equipment, hazardous materials storage area, and multiple sanitary sewer and storm drain sumps observed within the concrete floor slab of the basement. The three sumps appeared to discharge to the sanitary sewer system with the intent to limit flooding of the basement. Common maintenance supplies such as lubricants, adhesives and cleaning products were observed along with the bio-hazardous storage room. Additionally, a mechanical room with a natural gas fueled boiler was observed. The boilers had been replaced within the last decade and appeared in good condition.

During site reconnaissance above ground septic systems, welding gas, hazards materials storage areas, sump associated with sanitary operations, USTs and ASTs were observed.

Both hazardous, bio-hazardous and common building maintenance supplies are used and stored on-Site for facility maintenance purposes. Diesel fuel for a means of back-up fueling material along with hydraulic oil also is present within elevator equipment. A list of hazardous materials outside of the above-described is included in **Appendix F**. Wastes were stored in appropriately labeled containers with the exception of the following:

- One 55-gallon drum of a Class 3 hazard (hazard constituents included acetic acid, acetone, chloroform, ethyl alcohol, hydrochloric acid, and isopropanol) was observed. The 55-gallon drum was not housed within secondary containment at the time of the inspection. All materials within the hazardous materials storage area should have secondary containment.

- Three 5-gallon and 15-gallon containers of refrigerant were observed stored outside behind a pad-mounted transformer on top of a gravel base. One drum contained fluid. No staining was visible in the vicinity of the drums. The unlabeled containers are considered a *de minimis* condition and should be properly disposed of from the property.

During site inspection no evidence of hazardous materials spills was observed on the Subject Property and general housekeeping and record keeping appeared orderly; the potential for these hazardous materials to have significantly impacted the Site appears low.

Two underground storage tanks are located within the subject property and actively used as back-up fuel for generators. Both tanks were installed after 2000, and are 20,000-gallon in size, constructed of double walled steel material with jacketed secondary containment, registered with the State of California with record of regular tank integrity testing, and no leaks reported. The presence of the petroleum products stored properly stored in doubled walled UST with secondary containment at the property is not the result of a release. Furthermore, a new tank in good condition, with no evidence of leaks, spills, etc. does not constitute a material threat of a release. Evidence of UST condition reviewed included Operating Permit, Monitoring Plans of the tanks, associated piping, and secondary containment, and Response Plans are located in **Appendix F**.

The location of the USTs are within the area planned for redevelopment Building C as depicted in **Figure 3** – Phase I Conceptual Site Plan. Prior to redevelopment and grading, the USTs should be removed under the oversight of the Santa Clara County Hazardous Materials Compliance Divisions (HMCD) and after completion of an UST System Closure Permit Application. Closure will consist of tank removal, and ancillary piping along with soil sampling to ensure no residual leaks from operating the tank system. Tank and sump removal and sampling activities must be witnessed by a representative from HMCD.

Additionally, two aboveground storage tanks (ASTs) are located within the Subject Property and actively used to store liquid oxygen. As liquid oxygen is not considered a hazardous material by the ASTM

standard, the contents of the onsite ASTs are not considered a REC at this time. Provisions should be taken around the liquid oxygen ASTs due to the quantity of the material stored onsite and Material Safety Data sheets (MSDS) followed.

4.3 ADJOINING PROPERTIES

The following section provides information about the adjoining properties obtained during the Subject Property reconnaissance and through review of reasonably ascertainable information. Visual observations of adjoining properties (from Subject Property boundaries) are summarized below.

Table 4.3 Summary of Adjoining Properties

Direction	Description	REC/BER
North	Highway 85	No outstanding violation identified. Not a REC/ BER.
East	Samaritan Place followed by Cambrian Center (a retirement home)	No outstanding violation identified. Not a REC/ BER.
South	Samaritan Drive, followed by medical offices (San Jose Sports Medicine & Orthopedics, VIP Fibroid Center, Group Orthopedics)	No violations without return to compliance were identified. Not a REC/BER.
West	Parking lot, Medical offices (Spectrum Eye Physicians, Samaritan Apothecary Pharmacy, private medical practices)	No outstanding violation identified. Not a REC/ BER.

5. RECORDS REVIEW

5.1 PHYSICAL SETTING

The following is a summary of the physical setting of the Subject Property.

Table 5.1 Summary of Physical Setting of the Subject Property

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 285 feet above sea level	United States Geological Survey Division (U.S.G.S.) 7.5-Minute Topographic Map San Jose West, Quadrangle, California, 2021.
Topographic Gradient/ Surface Water Runoff	Generally, to the north-northeast	
Closest Surface Water	Los Gatos Creek, approximately 1,500 meters to the west.	
Soil Characteristics		
Soil Type; Description	.140- Urban land- Flaskan complex, 0 to 2 percent slopes, characterized by alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. The soil's depth to restrictive feature and depth to water table is more than 80 inches. There is no frequency of ponding and a hydric soil rating of "no" for hydric soil rating and hydrologic soil group C.	U.S. Department of Agriculture: Natural Resources Conservation Service (NRCS) Web Soil Survey (**Appendix F**) http://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx,
Geology/Hydrogeology		
Geologic Formation	The Subject Property is located within the Older Surficial Sediments (Qoa/Qt) – late Pleistocene	Dibblee, T.W., and Minch, J.A, 2007, *Geologic map of the Cupertino and San Jose West quadrangles, Santa Clara and Santa Cruz Counties, California*
Hydrogeology	Groundwater in the area is estimated to be approximately 150 feet below ground surface.	R.T. Hanson, Zhen Li, and C.C. Faunt, 2004, *Documentation of the Santa Clara Valley Regional Groundwater/Surface-Water Flow Model, Santa Clara Valley, California*
Oil and Gas Wells		

Current Oil and Gas Wells on Subject Property	No records for active wells associated with the Subject Property were found.	State of California Department of Conservation Division of Geologic Energy Management (CalGEM) online mapping application (maps.conservation.ca.gov), accessed June 15, 2023.
Historical Oil and Gas Wells on Subject Property	No records for active wells associated with the Subject Property were found.	

5.2 HISTORICAL RECORDS REVIEW

Kimley-Horn reviewed reasonably ascertainable records to identify obvious uses of the Subject Property from the present, back to the property's obvious first developed use, or back to 1935, whichever is earlier. Reasonably ascertainable records reviewed as part of this Phase I ESA documented the use of the property back to at least 1935.

Readily available historical selected historical aerial photographs, USGS topographic maps, city directories, and historical fire insurance maps produced by the Sanborn Map Company were requested from Environmental Data Resources (EDR) to evaluate past uses and relevant characteristics of the Subject Property and surrounding properties.

Previous agricultural use of the Subject Property identified during the review of historical aerial photography is considered a BER. The legal and routine application of herbicides, pesticides, and fertilizers while the Subject Property was used for agricultural purposes may have resulted in localized impacts to the site soils. Given the length of time since agricultural operations have occurred, and the absence of any documentation suggesting pesticides and herbicides were stored or mixed on the Subject Property, the presence of pesticides and herbicides are not a REC.

Reviewed historical topographic maps, city directories, and aerial photographs are summarized below. The sources and years reviewed are identified below.

Table 4: Aerial Photograph Summary

Year and Source	Summary of Information
1939 EDR	The site and surrounding properties appear to be used for agriculture, specifically orchards. There are no structures visible at the Site. There is a single-family home to the south of the Site.
1948 EDR	No significant changes to the Site were observed.
1950 EDR	No significant changes to the Site were observed.
1956 EDR	No significant changes to the Site were observed.
1963 EDR	Signs of grading operations and temporary structures are observed on the west side of the site. The east side of the site is still an agricultural use. Single family subdivisions have been constructed to the south and west of the site.

1968 EDR	A multiple story structure was constructed that appears to be Good Samaritan hospital. There is surface parking throughout. The eastern portion of the site is still an agricultural use. Properties to the west are developed into a commercial use.
1974 EDR	Further structural additions have been made to the hospital. The eastern portion of the site has been developed to an institutional use (athletic fields). Properties to the west are further developed.
1982 EDR	No significant changes to the Site were observed. Development offsite continues to expand. Grading for Highway 85 begins.
1993 EDR	The institutional use onsite has been converted to a commercial (office) use. The properties to the west are further developed. The properties to the east are developed as a residential use.
1998 EDR	No significant changes to the Site were observed. Surrounding properties continue to increase in density.

Kimley-Horn attempted to review reasonably ascertainable Sanborn Fire Insurance Maps for the Subject Property. EDR searched for available Sanborn Fire Insurance and stated that no coverage was available for the Subject Property. The no coverage letter is included in **Appendix D**.

Table 5.2-2 Historical City Directories Summary

Direction	Description
Subject Property	The address appears beginning in 1975. Listings associated with the Subject Property address include Good Samaritan Hospital (multiple departments), Athletic Rehabilitation Associates, Parenting & Breastfeeding Services, Bright Horizon Family Center, Columbia Rehabilitative Services. In 2020, individual doctor's names begin appearing with building permits.
North	There were no addresses east of the Subject Property listed in the historical city directories.
East	There were no addresses east of the Subject Property listed in the historical city directories.
South	Listed addresses to the south of the Subject Property include individuals, Arthroscopy and Sports Medicine, Samaritan Medical Lab, Radiological Associates Medical Group, Samaritan Ear, Nose and Throat Associates, California Skin Institute, Teen Therapy Center.
West	There were no addresses east of the Subject Property listed in the historical city directories.

5.3 REGULATORY RECORDS REVIEW

An environmental database search for the Subject Property and the surrounding area was performed by EDR, a contract information services company, using ASTM E1527-21 standard radii. The purpose of the records review was to identify RECs in connection with the Subject Property. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated, and the scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases. A copy of the EDR Database Report is attached in its entirety in **Appendix E**.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the Subject Property. The groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the Subject Property cannot be directly ascertained.

5.3.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate subject property boundaries (**Table 5.3-1**). Database definition, descriptions, and the database search report are included in **Appendix E**.

Table 5.3-1 Summary of Federal and State Database Results

Regulatory Agency Database	Search Distance (Miles)	Number of Sites
Federal Databases		
National Priority List (NPL)	1	4
Proposed NPL	1	0
NPL Liens	1	0
Delisted NPL	1	0
Federal Facility	0.5	0
Superfund Enterprise Management System (SEMS)	0.5	0
SEMS-ARCHIVE	0.5	0
Corrective Action Report (CORRACTS)	1	0
RCRA - Treatment, Storage and Disposal (RCRA-TSDF)	0.5	0
RCRA - Large Quantity Generators (RCRA-LQG)	0.25	1
RCRA - Small Quantity Generators (RCRA-SQG)	0.25	4
RCRA - Very Small Quantity Generators (RCRA-VSQG)	0.25	0

Land Use Control Information System (LUCIS)	0.5	0
Engineering Controls Sites List (US ENG CONTROLS)	0.5	0
Institutional Controls Sites List (US INST CONTROLS)	0.5	0
Emergency Response Notification System (ERNS)	Subject Property	0
State Databases		
Solid Waste Facilities/Landfill Sites (SWF/LF)	0.5	0
Leaking Underground Storage Tank Sites (LUST)	0.5	3
Leaking Petroleum Storage Tanks (LTANKS)	0.5	0
FEMA Underground Storage Tank Listing (UST)	0.25	0
UST	0.25	3
Registered Petroleum Storage Tanks (AST)	0.25	0
Engineering Controls Sites Listing (ENG CONTROLS)	0.5	0
Voluntary Remediation Program (INST CONTROL)	0.5	0
Voluntary Cleanup Program (VCP)	0.5	0
Brownfields Site Specific Assessments (Brownfields)	0.5	0

In addition to the above ASTM-required listings, Kimley-Horn reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in **Appendix E**.

Kimley-Horn's review of the referenced databases also considered the potential or likelihood of contamination from adjoining and nearby facilities. To evaluate which of the adjoining and nearby facilities identified in the regulatory database report present an environmental risk to the Subject Property, Kimley-Horn considered the following criteria:

- The type of database on which the adjoining/nearby property is identified.
- The topographic position of the property relative to the Subject Property.
- The direction and distance of the identified facility from the Subject Property.
- Local soil conditions in the Subject Property area.
- The known and/or inferred groundwater flow direction in the Subject Property area.
- The status of the respective regulatory agency-required investigations and/or cleanup associated with the identified facility.

- Surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) located between the identified facility and the Subject Property.

Only those facilities that are judged to present a potential environmental risk to the Subject Property and/or warrant additional clarification are further evaluated.

Table 5.3-2 Summary of Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Subject Property
Stanford Health Care	0.12 miles (WNW)	RCRA-LQG CERS HAZ WASTE CUPA SANTA CLARA HAZMAT	The identified listings are typical for medical uses, as they are related to typical materials used at an acute medical care facility. No violations were found associated with Stanford Health Care.
Santa Clara Valley MRI	0.12 miles (WNW)	RCRA-SQC	The identified listings are typical for medical uses, as they are related to typical materials used at an MRI facility. No violations were found associated with Santa Clara Valley MRI.
Northern California Heart Center	0.12 miles (WNW)	RCRA-SQC	The identified listings are typical for medical uses, as they are related to typical materials used at a medical care facility. No violations were found associated with the Northern California Heart Center.
Los Gatos Foot and Ankle Center	0.22 miles (NW)	RCRA-SQC	The identified listings are typical for medical uses, as they are related to typical materials used at a medical care facility. No violations were found associated with the Los Gatos Foot and Ankle Center.
Specialty Services- Los Gatos	0.22 miles (NW)	RCRA-SQC	The identified listings are typical for medical uses, as they are

			related to typical materials used at a medical care facility. No violations were found associated with the Specialty Services- Los Gatos.
Los Gatos Nissan	0.466 miles (WSW)	LUST	The identified listings are typical for auto service uses. No violations were found associated with Los Gatos Nissan. The case associated with the site was closed on January 17, 1992 with a No Further Action letter from the RWQCB documenting satisfactory site cleanup. The closed case is not considered a concern for the subject property.
Exxon	0.454 miles (N)	LUST	The identified listings are typical for gas stations uses. No violations were found associated with Exxon. The case associated with the site was closed on September 27, 2000 with a No Further Action letter from the RWQCB documenting satisfactory site cleanup. The closed case is not considered a concern for the subject property.

5.4 OTHER ENVIRONMENTAL RECORDS

Kimley-Horn reviewed information from the following agencies:

- EPA's Enforcement & Compliance History Online (ECHO)
- EPA's NEPAssist Database
- California State Water Resource Control Board (SWRCB) Geotracker

- California Department of Toxic Substance Control (DTSC) Envirostor
- USGS National Water Information System Database (NWIS)

Kimley-Horn reviewed the U.S. EPA's Environmental Compliance History Online (ECHO) and NEPAssist database for records of regulated facilities on and surrounding the subject property. The subject property was not identified in the ECHO as a regulated facility. No violations were issued associated with this listing. There were no regulated facilities noted with significant violations in the vicinity of the subject property.

Kimley-Horn reviewed the USGS NWIS database for records of well construction permit (WCP) on the subject property. Review of the available documentation did not identify public supply wells on the subject property. Review of the Santa Clark Valley Water District's database did show three active wells operating onsite. One well was identified for water production; the other two support the hospital's east and west elevators. Two additional wells were identified as destroyed.

5.5 VAPOR EVALUATION

The ASTM E 1527-21 document standardizes the terms release and migration consistent with those used in CERCLA and AAI. As such, potentially harmful vapors must be evaluated during the completion of a Phase I ESA.

Kimley-Horn performed a Tier 1 Vapor Encroachment Screening (VES) in accordance with E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (2015) with the purpose of identifying if a Vapor Encroachment Condition (VEC) exists in association with the subject property. A VEC is defined as the presence or likely presence of contaminants of concern (COC) vapors in the subsurface of the subject property caused by a release of hazardous substances and/or petroleum compounds into soil and groundwater. Current and historical uses were evaluated within the Area of Concern (AOC) during the completion of the Tier 1 VES. As indicated in ASTM 2600-15, the radial distance of the AOC for non-petroleum hydrocarbon COCs (i.e., chlorinated VOCs) is 1/3-mile (1,760 ft.) and 1/10 mile (528 ft.) for petroleum hydrocarbons.

According to the reasonably ascertainable information reviewed during this screening process, Kimley-Horn has determined that a VEC does not exist within the specific radial distance. No vapor sampling was conducted in association with this VES and the subject property.

Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions

5.6 BUILDING DEPARTMENT/PROPERTY APPRAISER INFORMATION

Kimley-Horn did not obtain building records from the City of San Jose; however, Building Permit data was researched by EDR. EDR reported that accessed building permits from the City of San Jose. The report included building permit records from 1998 to 2023 ranging from electrical and mechanical upgrades to structural additions to the hospital campus.

Kimley-Horn reviewed reasonably ascertainable assessment information provided by the Santa Clara County Assessor's office. The Assessor's office valued the total real property across both parcels at $123,972,773 ($53,025,677 for land and $70,947,096 for improvements).

5.7 PRIOR REPORTS

Kimley-Horn was not provided any previous environmental reports for review; however, multiple reports were identified from agency review. The Subject Property is listed as a LUST case with a Site Case Closure dated January 21, 2000, from the Regional Water Quality Control Board (RWQCB). The following details records from the Case Closure Summary:

- Three USTs formerly operated within the Site including two 10,000-gallon and one 5,000-gallon diesel tanks, which were removed from the Site on June 8, 1999. The ancillary piping associated with the tanks was removed, and during excavation, the onsite inspector indicated a potential leak from the piping. Soil samples were taken at 3.8-feet below ground surface (bgs) and reported low concentrations of Total Petroleum Hydrocarbon- Diesel range (TPH-D) at 38.0 ppm (mg/kg) in with the vicinity of the UST piping. All USTs were intact upon removal.

- The Santa Clara Valley Water District did not indicate there was substantial evidence of a significant release and no corrective action was required for the former USTs or leaking pipe and indicated there was a low severity of contamination detected beneath the USTs. The site closure documentation was in concurrence with RWQCB, and San Jose Fire Department (CUPA).

6. INTERVIEWS

The objective of completing interviews with knowledgeable Subject Property contacts is to obtain information about the uses and physical characteristics of the property. The following individuals were interviewed regarding the current and historical use of the Subject Property.

Interviews

The subject property is owned by Good Samaritan Hospital of Santa Clara Valley. Kimley-Horn has discussed the property with Mr. Justin Wilchynski, Chief of Construction of Good Samaritan Hospital.

During the inspection, interviews were conducted with both Mr. Wilchynski and Mr. Robby Sayoya. Mr. Sayoya is the Plant Operations Engineer of Good Samaritan Hospital and provided knowledge of the Subject Property for over 10 years and considered the Key Site Manager. Key items discussed during the interview included:

- Location, storage and recycling processing for both hazardous and biohazardous materials associated with hospital operations.
- History of UST removal and installation along with reports from the RWQCB described in Section 5.7

6.1 STATE AND/OR LOCAL AGENCY INQUIRES

Table 6.1 Summary of State and/or Local Agency Inquires

Agency Contacted/	Contact Method/Date	Response
San Jose Building Department	Emailed 06/2023	Kimley-Horn submitted a Request to the San Jose Buildingdepartment. At the time of reporting a response was not received to the request for information. If Kimley-Horn does receive a response, and it changes the findings of the report, the client will be notified.
County of Santa Clara, Department of Planning and Development	Emailed 05/30/2023	Santa ClaraCounty providedseveral documents in response to the inquiry on 5/4/2023, responding to a request for records information. TheCounty provide official Notice of Inspection, California Environmental Reporting System (CERS) reports, and Business Documents from 2005 to 2023, which are included in **Appendix F**.
Department of Toxic Substance Control	Emailed 05/30/2023	The Department of Toxic Substance Control provided a report on May 2, 2023, responding to a request for records information on other DTSC unit's and State agencies to contact. If Kimley-Horn does receive a response, and it changes the findings of the report, the client will be notified. The online database system, Envirostor, was reviewed and information pertaining to the Site. No cleanup sites were identified within 1000 feet of the property.

California Regional Water Quality Control Board (RWQCB) – San Francisco Bay Region	Emailed 5/30/2023 and Online records search	Kimley- Horn submitted a Request to the RWQCB and did not respond to the request for information. If Kimley-Horn does receive a response, and it changes the findings of the report, the client will be notified. The RWQCB's online database system, Geotracker, was reviewed and information pertaining to the Site is documented within Section 5.3.1. of this report. .
County of Santa Clara Fire Department (CUPA)	Online records request 9/4/2023	Kimley-Horn submitted a Public Records Act Request to the County of Santa Clara Fire Department. The County CUPA returned records for the current USTs, Notice of Inspections, which are filed within Appendix F
Department of Toxic Substances Control (DTSC)	Emailed 05/30/2023	The Department of Toxic Substance Control provided a report on May 2, 2023, responding to a request for records information on other DTSC unit's and State agencies to contact with no records. The online database system, Envirostor, was reviewed and information pertaining to the Site. No cleanup sites were identified within 1000 feet of the property
Santa Clara County Department of Environmental Health	Emailed 05/2023	Kimley Horn submitted a Request to Santa Clara Department of Environmental Health. At the time of reporting a response was not received.
Well Finder (Well Star)	Online search	Kimley-Horn reviewed the online WellStar website, and no oil or gas wells were observed within the Subject Property.

7. FINDINGS AND OPINIONS

The logic and reasoning used by the environmental professional in evaluating information collected during the course of the assessment related to findings shall be discussed. The opinions shall specifically include the environmental professional's rationale for concluding that a finding is or is not a recognized environmental condition, controlled recognized environmental condition, historical recognized environmental condition, or de minimis condition insofar as the findings pertain to each of these conditions.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-21 for the 9.0-acre property located at 2333 and 2425 Samaritan Drive, San Jose, California (subject property). Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

7.1 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECS)

A recognized environmental condition (REC) is defined in the ASTM Standard as the presence or likely presence of a hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. This assessment has not revealed evidence of recognized environmental conditions connected with the Subject Property.

7.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

A CREC is a recognized environmental condition that is being appropriately characterized and remediated in accord with, and under the supervision of, authorized governmental agency charged with oversight of such recognized environmental condition. This assessment has not revealed evidence of controlled recognized environmental conditions connected with the Subject Property.

7.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

A historical REC (HREC), as defined in the ASTM Standard, is a past release of any hazardous substance and/or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria. This assessment has not revealed evidence of historical recognized environmental conditions connected with the Subject Property except the following:

> HREC 1: The subject property is listed as a LUST case with a Site Case Closure dated January 21, 2000, from the Regional Water Quality Control Board (RWQCB) in association with a piping leak from former USTs operations on site. Three USTs formerly operated within the Site, consisting of two 10,000-gallon and one 5,000-gallon diesel tanks, which were removed on June 8, 1999. Soil samples were taken at 3.8-feet below ground surface (bgs) adjacent to the piping and reported low levels of Total Petroleum Hydrocarbon- Diesel range (TPH-D) at 38.0 ppm (mg/kg) in the vicinity of the UST piping. The detection reported is below current RWQCB-San Francisco Region Environmental Screening Levels (ESLs) for TPH-D in commercial/industrial soil, which is 1,200 mg/kg. All USTs were intact upon removal and properly disposed of offsite. The RWQCB issued a "no further action" determination concerning the former USTs on January 21, 2000. The former LUST case with regulatory closure is considered a HREC. Based on the results of confirmation soil sampling, which identified only low concentrations of TPH-D, and the

closed regulatory status of the UST case, the former USTs are not an environmental concern to the subject property and Kimley-Horn recommends no further investigation.

7.4 *De minimis* Condition

De minimis conditions are defined as conditions that generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not RECs nor CRECs.

DMC 1: A 55-gallon drum of a Class 3 hazard (hazard constituents included acetic acid, acetone, chloroform, ethyl alcohol, hydrochloric acid, and isopropanol) was observed. The 55-gallon drum was not housed within secondary containment at the time of the inspection. All materials within the hazardous materials storage area should have secondary containment.

DMC 2: Three 5-gallon and 15-gallon containers of refrigerant were observed stored outside behind a pad-mounted transformer on top of a gravel base. One drum contained fluid. No staining was visible in the vicinity of the drums. The unlabeled containers are considered a *de minimis* condition and should be properly disposed of from the property.

7.5 BUSINESS ENVIRONMENTAL RISK

A Business Environmental Risk (BER), as defined in the ASTM Standard, is a risk which can have a material environmental or environmentally-driven impact on the business associated with the use of a commercial site, and which does not require further investigation to the same degree as a REC. Kimley-Horn did not identify areas of potential concern associated with business environmental risks in connection with the Subject Property during the completion of this Phase I ESA with the exception of the following:

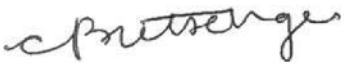

BER 1: Previous agricultural use of the subject property identified during the review of historical aerial photography is a BER. The legal and routine application of herbicides, pesticides, and fertilizers while the subject property was used for agricultural purposes may have resulted in localized impacts to shallow site soils. Given the length of time since agricultural operations have occurred, and the absence of any documentation suggesting pesticides and herbicides were stored or mixed on the subject property, the presence of pesticides and herbicides are not a REC. However, since the property is developed with asphalt or building structures covering the surface of the subject property, there is not a direct exposure pathway imposing risk for human health. Per the ASTM standard, the standard application of herbicides, pesticides, and fertilizers does not constitute a release or materially threat of release, therefore, this is a BER.

BER 2: Currently, two USTs containing diesel fuel are located within the subject property and actively used as back-up fuel for generators. Both tanks were installed after 2000, and 20,000-gallon in size. See Section 4.2 for additional review of the USTs. Based on Figure 3 Proposed Project Build Out Conceptual Site Plan dated September 2023, current redevelopment includes construction of additional building within the footprint of the current USTs. The USTs should be removed after approval from Santa Clara County Hazardous Materials Compliance Divisions (HMCD) and completion of an UST System Closure Permit Application. Closure will consist of tank removal, and ancillary piping along with soil sampling to ensure no residual leaks from operating the tank system. Tank and sump removal and sampling activities must be witnessed by a representative from HMCD.

8. DECLARATION

8.1 STATEMENT OF COMPLIANCE

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312. Environmental Professional resume(s) are included in **Appendix G**.

Appendix C
User Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT
PROPERTY USER QUESTIONNAIRE

Pursuant to the American Society for Testing and Materials E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-21), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-21 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.*

Site Name:	HCA Healthcare - Good Samaritan Hospital
Owner/Owner Representative Name:	Justin Wilchynski, Construction Project Manager
Owner/Owner Representative Phone Number:	408.559.2163
Signature of Owner/Owner Representative:	
Date:	9/29/23

Phase I ESA Questions – Please answer to the best of your knowledge. If the answer is not known, please indicate by stating "Unknown".

1) Is the site or adjacent properties used for industrial purposes? NO

2) Has the site or adjacent properties ever been used for industrial purposes?
previously used for Agriculture

3) Has the site or adjacent properties been used for any of the following? NO

- Gas station
- Motor repair facility
- Commercial printing facility
- Drycleaner
- Photo developing lab (X-ray ?)
- Junkyard

- Landfill
- Waste treatment, storage, disposal, processing, or recycling facility
- Manufacturing facility

4) Has the site been used for storage, use, or disposal of any of the following?
   - Automobile fluids NO
   - Industrial batteries yes
   - Pesticides NO
   - Herbicides NO
   - Gasoline NO
   - Diesel fuel yes
   - Paints yes
   - Solvents ~~yes~~ NO
   - Hazardous chemicals yes

5) Has the site been used for storage of industrial drums? NO

6) Has fill dirt ever been brought to the site? NO

7) Are there or have there ever been any pits, ponds, or lagoons on the site? NO

8) Are there or have there been any septic system, seepage pits, cesspools, oil/water separators, interceptors, trash pits, silage pits, landing strips, or other areas of concern on the site? NO

9) Are you aware of any floor drains at the site, especially in manufacturing or chemical use/storage areas? yes for hospital use

10) Are you aware of any past or present underground storage tanks or above ground storage tanks? If so, what were the size, contents, and removal status (if applicable).
2x - Diesel storage -> removed -> size unknown
2x - Diesel storage tanks -> in use -> 20,000 gallons each

11) Are you aware of any past or present stained soils on the site?

NO

12) Are you aware of any past or present vent or fill piping on the site?

NO

13) Is there or have there ever been foul odors emitting from the flooring, walls, ceilings, or floor drains?

NO

14) Is the property served by a well or the public water system. If so, has the water ever been found to contain contaminates in excess of government guidelines?

No current connection. No wells onsite.

15) Are there any environmental liens or other environmental violations associated with the site?

NO

16) Has a Phase I Environmental Site Assessment ever been performed on the site? If, so, was the site found to be contaminated with hazardous and/or petroleum substances? Was further assessment recommended?

Unknown

17) Are you aware of any past, threatened, or pending lawsuits or government proceedings concerning releases or threatened releases of hazardous substances at the site?

NO

18) Does the property discard wastewater on or adjacent to the property other than storm water to the city sewer?

NO

19) Are you aware of past dumping on the site?

NO

20) Are there transformers, capacitors, or other hydraulic equipment on the site that may contain PCBs?

Unknown

21) Are you aware of any retention basins or drywells on the site?

NO

22) Has the site even been used for pesticide or herbicide mixing?

NO

23) Has an asbestos or lead based paint survey been performed on the site?

Yes

Submittal was ***Accepted***; Processed on 1/4/2023 by *Michelle Santos* for Santa Clara County Environmental Health

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**Yes**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**

Aboveground Petroleum Storage

Does your facility own or operate aboveground petroleum storage tanks or containers AND: * have a total aboveground petroleum storage capacity of 1,320 gallons or more, OR * have one or more petroleum tanks in an underground area?	**No**

Regulated Substances

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

For State Use Only

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in California Code of Regulations (CCR), Title 23, Division 3, Chapter 18, Section 2807,

☐ 500,000 dollars per occurrence or ☒ 1 million dollars per occurrence

AND

☐ 1 million dollars annual aggregate or ☒ 2 million dollars annual aggregate

B. _____ *hereby certifies that it is in compliance with the requirements of Section 2807,*
(Name of Tank Owner or Operator)
California Code of Regulations, Title 23, Division 3, Chapter 18, Article 3, Section 2807.
The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp
Insurance	AON Risk Services South, Inc., 501 Corporate Center Dr. Suite 300 Franklin, TN 37067	PPIG27065 174887	$2,000,000	09/01/2018-09/01/2019	Yes	Yes

Note:

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance and shall maintain compliance with all conditions for participation in the Fund. See instructions.

GOOD SAMARITAN HOSPITAL, 2425 Samaritan Drive, San Jose, California,	UST	20000	9/1/2020

CHUBB

95124			
REGIONAL MEDICAL CENTER OF SAN JOSE, 225 N. Jackson Ave, San Jose, California, 95116	UST	20000	9/1/2020
LOS ROBLES HOSPITAL AND MEDICAL CENTER, 215 West Janss Rd, Thousand Oaks, California, 91360	UST	7000	9/1/2020
LOS ROBLES HOSPITAL AND MEDICAL CENTER, 215 West Janss Rd, Thousand Oaks, California, 91360	UST	20000	9/1/2020
WEST HILLS HOSPITAL & MEDICAL CENTER, 7300 Medical Center Drive, West Hills, California, 91307	UST	10000	9/1/2020

for taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases in accordance with and subject to the limits of liability, exclusions, conditions, and other terms of the policy arising from operating the underground storage tank(s) identified above.

The limits of liability are:

a. $1,000,000 Each Occurrence

b. $4,000,000 Annual Aggregate

exclusive of legal defense costs, which are subject to a separate limit under the policy. This coverage is provided under UST G7182553A 001. The effective date of said policy is **09/01/2020**.

2. The Insurer further certifies the following with respect to the insurance described in Paragraph 1:

a. Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy to which this certificate applies.

b. The Insurer is liable for the payment of amounts within any deductible applicable to the policy to the provider of corrective action or a damaged third-party, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision does not apply with respect to that amount of any deductible for which coverage is demonstrated under another mechanism or combination of mechanisms as specified in *40 CFR 280.95-280.102* and *280.104-280.107*.

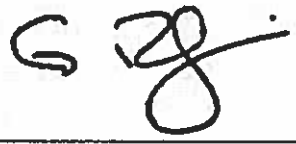

c. Whenever requested by a Director of an implementing agency, the Insurer agrees to furnish to the Director a signed duplicate original of the policy and all endorsements.

d. Cancellation or any other termination of the insurance by the Insurer, except for non-payment of premium or misrepresentation by the insured, will be effective only upon written notice and only after the expiration of 60 days after a copy of such written notice is received by the insured. Cancellation for non-payment of premium or misrepresentation by the insured will be effective only upon written notice and only after expiration of a minimum of 10 days after a copy of such written notice is received by the insured.

e. The insurance covers claims otherwise covered by the policy that are reported to the Insurer within six months of the effective date of cancellation or non-renewal of the policy except where the new or renewed policy has the same retroactive date or a retroactive date earlier than that of the prior policy, and which arise out of any covered occurrence that commenced after the policy retroactive date, if applicable, and prior to such policy renewal or termination date. Claims reported during such extended reporting period are subject to the terms, conditions, limits, including limits of liability, and exclusions of the policy.

I hereby certify that the wording of this instrument is identical to the wording in *40 CFR 280.97(b)(2)* and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more states.

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A

I am required to demonstrate Financial Responsibility in the Required amounts as specified in Section 2807, Chapter 18, Div. 3, Title 23, CCR:

_____ **500,000 dollars per occurrence**		_____ **1 million dollars annual aggregate**
or	**AND**	**or**
X **1 million dollars per occurrence**		X **2 million dollars annual aggregate**

B

HCA Healthcare, Inc **hereby certifies that it is in compliance with the requirements of Section 2807,**
(Name of Tank Owner or Operator)

Article 3, Chapter 18, Division 3, Title 23, California Code of Regulations.

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C

Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp
Insurance and risk retention group coverage	Aon Risk Services South, Inc. Franklin TN Offie 501 Corporate Centre Drive Suite 300 Franklin TN 37067	USTG7182553 A001	1,000,000 per incident 4,000,000 aggregate	90-01-21 to 09-01-22	YES	YES

Note:
This is a sample certification of a petroleum UST owner or operator using the State Cleanup Fund as the financial responsibility mechanism, in conjunction with the state alternative mechanism "Letter from Chief Financial Officer." For additional information and requirements refer to Title 23, Chapter 18, of the California Code of Regulations and Chapter 7.75 of the California Health and Safety Code.

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance with all conditions for participation in the Fund.

Signature of Witness or Notary	Date	Name of Witness or Notary	Date
		Frank Cardini - Manager of Facilities	

INSTRUCTIONS

CERTIFICATION OF FINANCIAL RESPONSIBILITY

Please type or print information clearly. All UST sites owned or operated may be listed on one form, therefore, a separate certification is not required for each site.

DOCUMENT INFORMATION

A.	**Coverage Required**	Check the appropriate boxes.
B.	**Name of Tank Owner or Operator**	Full name of either the tank owner or the operator.
C.	**Mechanism Type**	Indicate which approved mechanism(s) are being used to show financial responsibility either as contained in the federal regulations, 40 CFR Part 280 Subpart H, Sections 280.93 through 280.107, or Section 2808.1 Chapter 18, Div. 3, Title 23, CCR (see Financial Responsibility Guide for more information).
	Name of Issuer	List all names and address of companies and/or individuals issuing coverage.
	Mechanism Number	List identifying number for each mechanism used. Example: insurance policy number, Letter of Credit number, etc., etc. If using the State Cleanup Fund, leave blank.
	Coverage Amount	Indicate amount of coverage for each listed mechanism. If more than one mechanism is indicated, total must equal 100% of financial responsibility for each site.
	Coverage Period	Indicate the effective date(s) of all mechanisms. State Cleanup Fund coverage is continuous as long as you maintain compliance and remain eligible to participate in the Fund.
	Corrective Action	Indicate yes or no. Does the specified financial assurance mechanism provide coverage for corrective action? It is a required coverage. If using the State Cleanup Fund, indicate "yes."
	Third Party Compensation	Indicate yes or no. Does the specified financial assurance mechanism provide coverage for corrective action? It is a required coverage. If using the State Cleanup Fund, indicate "yes."
D.	**Facility Information**	Provide all facility and or site names and addresses.
E.	**Signature Block**	Provide signature and date signed by tank owner or operator; printed or typed name and title of tank owner or operator; signature of witness or notary and date signed; and printed or typed name of witness or notary. (If notary signs please attach documentation.)

Where to Mail certification:
Please send original to your local agency(ies) [agency(ies) that issues the UST permits]. Keep a copy of the certification at each listed site.

Questions:
If you have questions about financial responsibility requirements or about the Certification of Financial Responsibility form, please contact the State Water Resources Control Board, Underground Storage Tank Cleanup Fund at (916) 341-5648.

Note: **Penalties for Failure to Comply with Financial Responsibility Requirements:**
Failure to comply may result in: 1) jeopardizing claimant eligibility for the State Cleanup Fund, and 2) liability for civil penalties of up to $10,000 per day, per underground storage tank, for each day of violation as stated in Article 7, Section 25299.76(a) of the California Health and Safety Code.

for taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases in accordance with and subject to the limits of liability, exclusions, conditions, and other terms of the policy arising from operating the underground storage tank(s) identified above.

The limits of liability are:

a. $1,000,000 Each Occurrence

b. $4,000,000 Annual Aggregate

exclusive of legal defense costs, which are subject to a separate limit under the policy. This coverage is provided under UST G7182553A 003. The effective date of said policy is 09/01/2022.

2. The Insurer further certifies the following with respect to the insurance described in Paragraph 1:

a. Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy to which this certificate applies.

b. The Insurer is liable for the payment of amounts within any deductible applicable to the policy to the provider of corrective action or a damaged third-party, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision does not apply with respect to that amount of any deductible for which coverage is demonstrated under another mechanism or combination of mechanisms as specified in *40 CFR 280.95-280.102* and *280.104-280.107*.

c. Whenever requested by a Director of an implementing agency, the Insurer agrees to furnish to the Director a signed duplicate original of the policy and all endorsements.

d. Cancellation or any other termination of the insurance by the Insurer, except for non-payment of premium or misrepresentation by the insured, will be effective only upon written notice and only after the expiration of 60 days after a copy of such written notice is received by the insured. Cancellation for non-payment of premium or misrepresentation by the insured will be effective only upon written notice and only after expiration of a minimum of 10 days after a copy of such written notice is received by the insured.

e. The insurance covers claims otherwise covered by the policy that are reported to the Insurer within six months of the effective date of cancellation or non-renewal of the policy except where the new or renewed policy has the same retroactive date or a retroactive date earlier than that of the prior policy, and which arise out of any covered occurrence that commenced after the policy retroactive date, if applicable, and prior to such policy renewal or termination date. Claims reported during such extended reporting period are subject to the terms, conditions, limits, including limits of liability, and exclusions of the policy.

CHUBB®

I hereby certify that the wording of this instrument is identical to the wording in *40 CFR 280.97(b)(2)* and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more states.

RESPONSE PLAN – PAGE 1

(One form per facility)

TYPE OF ACTION ☐ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION R01.

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* | | | — | | | | — | | | | | | | 1.

BUSINESS NAME (Same as FACILITY NAME) 3.

Good Samaritan Hospital

BUSINESS SITE ADDRESS 103.	BUSINESS SITE CITY 104.
2425 Samaritan Dr.	**San Jose**

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: *(Complete only if applicable)*

NAME	TITLE
R40. **Tom SanPaolo**	R50. **Director of Engineering**
NAME R41.	TITLE R51.
NAME R42.	TITLE R52.
NAME R43.	TITLE R53.

V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

☒ 1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION ☒ 2. INSPECTION BY QUALIFIED PERSONS ☒ 3. RECALIBRATION OF EQUIPMENT R60.

☐ 99. OTHER (Specify): **This plan is for both USTs #1 and #2** R61.

UNDERGROUND STORAGE TANK

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the California Emergency Management Agency at (800) 852-7550.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

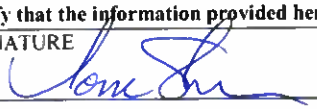

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

UST Response Plan – Instructions

Complete one UST Response Plan for each UST facility. This form must be submitted with your initial UST Operating Permit Application and within 30 days of changes in the information it contains. It supplements the Emergency Response Plans and Procedures in the facility's Hazardous Materials Business Plan (HMBP). (Note: Numbering of these instructions follows the data element numbers on the form.)

R01. TYPE OF ACTION – Check the appropriate box to indicate why this plan is being submitted.
1. FACILITY ID NUMBER – This space is for agency use only.
3. BUSINESS NAME – Enter the complete Facility Name.
103. BUSINESS SITE ADDRESS – Enter the street address where the facility is located, including building number, if applicable. Post office box numbers are not acceptable. This information must provide a means to locate the facility geographically.
104. BUSINESS SITE CITY – Enter the city or unincorporated area in which the facility is located.
R10. EQUIPMENT – If you have spill control or clean-up equipment kept off-site, list that equipment in sections R10 through R15. If no equipment is kept off-site, leave this section blank.
R20. LOCATION – If you have spill control or clean-up equipment kept off-site, list the equipment location(s) sections R20 through R25. If no equipment is kept off-site, leave this section blank.
R30. AVAILABILITY – If you have spill control or clean-up equipment kept off-site, list the equipment availability in sections R30 through R35. If no equipment is kept off-site, leave this section blank.
R40. NAME – At least one person responsible for authorizing any work necessary under this UST Response Plan must be identified. Use sections R40 through R43 to list the name(s) of the responsible person(s).
R50. TITLE – At least one person responsible for authorizing any work necessary under this UST Response Plan must be identified. Use sections R50 through R53 to list the job title(s) of the responsible person(s).
R60. MONITORING INDICATORS – Briefly describe the steps that will be taken to verify the presence or absence of a release if the monitoring system indicates the possibility of a release.
R61. SPECIFY – If Box R60-99 is checked, provide additional details regarding the additional steps that will be taken.

OWNER/OPERATOR SIGNATURE – The owner/operator shall sign in the space provided. This signature certifies that the signer believes that all information submitted is true, accurate, and complete.

R70. DATE – Enter the date the plan was signed.
R71. OWNER/OPERATOR NAME – Print or type the name of the person signing the plan.
R72. OWNER/OPERATOR TITLE – Enter the title of the person signing the plan.

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water;
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

DESIGNATED UNDERGROUND STORAGE TANK OPERATOR NOTIFICATION FORM

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 23 California Code of Regulations §2715(a)

A PDF copy of this completed form must be electronically submitted via either the California Environmental Reporting System (CERS) website or an equivalent local agency electronic reporting portal within 30 days of a change in ownership of the underground storage tank(s) or the addition of a new person performing Designated UST Operator monthly inspections and/or facility employee training at any facility covered by this notification.

A. UST OWNER IDENTIFICATION

UST OWNER NAME	UST OWNER PHONE NUMBER
Hospital Corporation of America	(615) 344-9551 ext.
UST OWNER CONTACT NAME (If other than sole proprietor)	UST OWNER CONTACT TITLE (If other than sole proprietor)
Mr. Tom SanPaolo	Dir. Of Engineering
REASON FOR SUBMITTING THIS FORM (Check One) ☒ Change of Designated UST Operator ☐ Change of UST Owner	NOTIFICATION DATE (Date this form was prepared or last updated) January 25, 2018

By electronically submitting a PDF copy of this form, the UST Owner certifies that, for the facility/facilities identified on this form and any additional pages in the PDF file upload, the individual(s) listed on this form and any additional pages will serve as Designated UST Operator(s). The individual(s) will conduct and document monthly facility inspections and facility employee training in accordance with California Code of Regulations, Title 23, Section 2715(c) - (f).

B. FACILITY IDENTIFICATION

FACILITY NAME	CERS ID or Facility ID
Good Samaritan Hospital (USTs #1 and #2)	
SITE ADDRESS	
2425 Samaritan Dr.	

CITY		ZIP CODE
San Jose	CA	95124

☐ Check here if this notification covers multiple facilities and attach a list including Facility Names, Site Addresses, and CERS IDs.

C. DESIGNATED UNDERGROUND STORAGE TANK OPERATOR(S)

Designated UST Operators must have current "California UST System Operator" certification from the International Code Council (ICC). Each facility must have at least one Designated UST Operator. Listing alternate Designated UST Operators is optional.

PRIMARY DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
K.W. McCuaig	5234516	(925) 253-0591 ext.
ALTERNATE 1 DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
Catherine Riccomini	8018933	(800) 339-9930 ext.
ALTERNATE 2 DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
Richard Reed	8214306	(800) 339-9930 ext.
ALTERNATE 3 DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
Jason Woods	8492093	(800) 339-9930 ext.
ALTERNATE 4 DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
Eric Santos	8135508	(800) 339-9930 ext.
ALTERNATE 5 DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
		ext.
ALTERNATE 6 DESIGNATED UST OPERATOR NAME	ICC CERTIFICATION NUMBER	PHONE NUMBER
		ext.

Attach additional page(s) containing the above information if more alternates may be used.

UNDERGROUND STORAGE TANK
DESIGNATED UNDERGROUND STORAGE TANK OPERATOR IDENTIFICATION FORM (Page 1 of 1)

Every underground storage tank (UST) facility must have at least one designated UST operator. A copy of this completed form must be electronically submitted via either the California Environmental Reporting System (CERS) or an equivalent local Unified Program Agency electronic reporting portal within 30 days of: 1) an installation of a UST; 2) a change in owner or operator of the UST; or 3) an addition or change of an individual performing designated UST operator inspections or facility employee training at this facility. [California Code of Regulations, Title 23, Division 3, Chapter 16, Section 2715(a).]

Type of Action ☐ New UST Installation ☐ Change of Owner or Operator ☒ New or Change of Designated UST Operator

I. FACILITY INFORMATION

Business Name *(Same as Facility Name or DBA-Doing Business As)*	CERS ID
Good Samaritan Hospital	10092346

Business Site Address	City	ZIP Code
2425 Samaritan Dr	San Jose	95124

The individual(s) listed below will conduct and document the facility inspections and facility employee training for the facility listed above in accordance with California Code of Regulations, Title 23, Division 3, Chapter 16, Sections 2715(c) and 2716.

II. DESIGNATED UNDERGROUND STORAGE TANK OPERATOR(S) INFORMATION

Comments by submitter: Annual Inventory
Submittal was ***Accepted***; Processed on 10/6/2022 by *Myra Reichardt* for Santa Clara County Environmental Health
Comments by regulator: Accepted as administratively complete. A technical review may be conducted subsequently as part of your next facility inspection. Based on this CERS submittal, this facility will be permitted for having 1-3 reportable chemicals.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**No**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**

Aboveground Petroleum Storage

Does your facility own or operate aboveground petroleum storage tanks or containers AND: * have a total aboveground petroleum storage capacity of 1,320 gallons or more, OR * have one or more petroleum tanks in an underground area?	**No**

Regulated Substances

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # A1.	CERS ID # A2.	DATE OF PLAN PREPARATION/REVISION (MM/DD/YYYY) A3.

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* A4.
Verizon Wireless - Hwy 17 & 85

BUSINESS SITE ADDRESS A5.
425 Samaritan Drive

BUSINESS SITE CITY A6.		ZIP CODE A7.
San Jose	CA	95124

TYPE OF BUSINESS (e.g., Painting Contractor) A8.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A9.
Wireless Telecommunications	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING (Check all that apply): A10.

☒ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR BY (Check all that apply): B1.

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (e.g., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:
1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:
1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

	OTHER (Specify): C9.	C10.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR BY (Check all that apply): C11.

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY (Check all that apply): C12.

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY COORDINATOR CONTACT INFORMATION: Network Operations Control Center C13.

PRIMARY EMERGENCY COORDINATOR NAME: NOCC PHONE NO.: (800) 264-6620 PHONE NO.: (800) 264-6620

ALTERNATE EMERGENCY COORDINATOR NAME: NOCC PHONE NO.: (800) 264-6620 PHONE NO.: (800) 264-6620

☐ Check if additional Emergency Coordinator contact and address information is available onsite or by calling PHONE NO.:

Note: If more than one alternate emergency coordinator is designated, attach a list in order of responsibility.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

Check the applicable boxes to indicate your facility's procedures for containing spills and preventing and mitigating releases, fires and/or explosions.

D1.

☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
☒ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls, built-in berms);
☒ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, spill pigs, spill pillows);
☐ 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS;
☐ 5. LINED TRENCH DRAINS AND/OR SUMPS;
☐ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
☐ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS;
☐ 8. STOP PROCESSES AND/OR OPERATIONS;
☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
☐ 10. SHUT OFF WATER, GAS, ELECTRICAL UTILITIES;
☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE AND/OR MEDICAL AID;
☐ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AND/OR IMPACTED AREAS;
☐ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION;
☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE EMERGENCY RESPONSE TEAM;
☐ 15. REMOVE CONTAINERS AND/OR ISOLATE AREAS;
☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
☒ 17. USE ABSORBENT MATERIAL FOR SPILL CONTAINMENT;
☐ 18. VACUUM SUCTION USING APPROPRIATE VACUUM (e.g., Intrinsically safe) FOR SPILL CONTROL AND/OR CLEANUP;
☐ 19. DECONTAMINATE PERSONNEL AND EQUIPMENT WITHIN DESIGNATED AREA AND DISPOSE OF WASTEWATER AS HAZARDOUS WASTE;
☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF HAZARDOUS WASTE GENERATED DURING EMERGENCY ACTIONS;
☐ 21. OTHER (Specify): D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (Check all that apply): E1.

☐ 1. BELLS; E2.
☐ 2. HORNS/SIRENS;
☒ 3. VERBAL (i.e., Shouting);
☐ 4. OTHER (Specify):

THE FOLLOWING LOCATION(S) WILL BE USED FOR AN EMERGENCY ASSEMBLY AREA(S) (e.g., Parking lot, street corner): E3.

Tech Vehicle location

Note: The Emergency Coordinator must account for all onsite employees and visitors after evacuation.

EVACUATION ROUTE S AND ALTERNATE EVACUATION ROUTES ARE DESCRIBED AS FOLLOWS: E4.

☐ 1. WRITTEN PROCEDURES DESCRIBING ROUTES, EXITS, AND ASSEMBLY AREAS;
☐ 2. EVACUATION MAP(S) DEPICTING ROUTES, EXITS, AND ASSEMBLY AREAS;
☒ 3. OTHER (Specify): Following exisiting buildings evac information or tech vehicle for outdoor locations E5.

Note: Evacuation procedures and/or maps should be posted in visible facility locations and must be included in the Contingency Plan.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following): F1.

☒ 1. HAVE BEEN DETERMINED NOT NECESSARY;
☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Note: Advance arrangements with local fire and police departments, hospitals, state and local emergency response teams, and/or emergency services contractors should be made for your facility, if necessary. Large Quantity Generators must describe arrangements in the Contingency Plan.

G. EMERGENCY EQUIPMENT

Check the applicable boxes to list emergency response equipment available at the facility, identify the location(s) where the equipment is kept, and indicate the equipment's capability, if applicable.

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION G2.	CAPABILITY G3.
EXAMPLE	☒ *CHEMICAL PROTECTIVE GLOVES*	*SPILL RESPONSE KIT*	*SINGLE USE, OIL RESISTANT ONLY*
Safety and First Aid	1. ☐ CHEMICAL PROTECTIVE SUITS, APRONS, AND/OR VESTS		
	2. ☒ CHEMICAL PROTECTIVE GLOVES	On site Spill Kit or Tech Vehicle	
	3. ☐ CHEMICAL PROTECTIVE BOOTS		
	4. ☒ SAFETY GLASSES, GOGGLES, AND FACE SHIELDS	On site Spill Kit or Tech Vehicle	
	5. ☐ HARD HATS		
	6. ☐ AIR-PURIFYING RESPIRATORS		
	7. ☐ SELF-CONTAINED BREATHING APPARATUS (SCBA)		
	8. ☒ FIRST AID KITS	On site Spill Kit or Tech Vehicle	
	9. ☐ PLUMBED EYEWASH FOUNTAIN AND/OR SHOWER		
	10. ☒ PORTABLE EYEWASH KITS AND/OR STATION	On site Spill Kit or Tech Vehicle	
	11. ☐ OTHER		
Fire Fighting	12. ☒ PORTABLE FIRE EXTINGUISHERS	On site or Tech Vehicle	
	13. ☐ FIXED FIRE SUPPRESSION SYSTEMS AND/ OR SPRINKLERS		
	14. ☐ FIRE ALARM BOXES		
	15. ☐ OTHER		
Spill Control and Clean-Up	16. ☒ ALL-IN-ONE SPILL KIT	On site Spill Kit or Tech Vehicle	
	17. ☐ ABSORBENT MATERIAL		
	18. ☐ CONTAINER FOR USED ABSORBENT		
	19. ☐ BERM AND/OR DIKING EQUIPMENT		
	20. ☐ BROOM		
	21. ☐ SHOVEL		
	22. ☐ VACUUM		
	23. ☐ EXHAUST HOOD		
	24. ☐ SUMP AND/OR HOLDING TANK		
	25. ☐ CHEMICAL NEUTRALIZERS		
	26. ☐ GAS CYLINDER LEAK REPAIR KIT		
	27. ☐ SPILL OVERPACK DRUMS		
	28. ☐ OTHER		
Communi-cations and Alarm Systems	29. ☒ TELEPHONES (e.g., Cellular)	On site or Tech Vehicle	
	30. ☐ INTERCOM AND/OR PA SYSTEM		
	31. ☐ PORTABLE RADIOS		
	32. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT		
Other	33. ☐ OTHER		
	34. ☐ OTHER		

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases due to seismic motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply): H1.

- ☒ 1. HAZARDOUS MATERIALS AND/OR WASTE STORAGE AREAS
- ☐ 2. PROCESS LINES AND PIPING
- ☐ 3. LABORATORY
- ☐ 4. WASTE TREATMENT AREA

LOCATIONS (e.g., Shop, outdoor shed, lab): H2.

Inside Shelter/or Equipment Room/or Outdoor Equipment cabinets

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS AND/OR EQUIPMENT (Check all that apply): H3.

- ☒ 1. SHELVES, CABINETS AND/OR RACKS
- ☒ 2. TANKS AND SHUT-OFF VALVES
- ☐ 3. PORTABLE GAS CYLINDERS
- ☐ 4. EMERGENCY SHUT-OFF AND/OR UTILITY VALVES
- ☐ 5. SPRINKLER SYSTEMS
- ☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane tank)

LOCATIONS: H4.

Inside Shelter/or Equipment Room/or Outdoor Equipment cabinets
Fuel tank if site is equipped with a stationary generator

I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify):

Check the applicable boxes below to indicate how the employee training program is administered.

☒ 1. FORMAL CLASSROOM ☒ 2. VIDEOS ☐ 3. SAFETY MEETINGS ☐ 4. STUDY GUIDES / MANUALS I1.

☐ 5. OTHER (Specify): _____ I2.

☐ 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES

☒ 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT I3.

☐ 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE I4.

EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

Large Quantity Generator Training: Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

Small Quantity Generator Training: Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

Hazardous Materials Business Plan Training: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

J. LIST OF ATTACHMENTS

Check one of the following: J1.

☒ 1. NO ATTACHMENTS ARE REQUIRED; or

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

CALIFORNIA HAZARDOUS MATERIAL TRAINING REQUIREMENTS

AT&T Environment, Health & Safety

PURPOSE

This document outlines information found in the Environment, Health & Safety Organization (EH&S) Training Matrices regarding hazardous materials management training required for California-based personnel. This document also highlights the target audience for each, and requirements related to the frequency of training. Finally, it provides examples of how to care for situations where an employee did not complete required courses during that time window due to illness, leave, transfer, or hire.

Note: Course name or number may be periodically updated for administrative purposes. Unless otherwise noted below, training frequency is annual.

TARGET AUDIENCE

This document is for employees who are responsible for scheduling training and/or tracking training completions for California-based personnel. The courses listed below do not apply to Warner Media personnel.

DETAILS

	Course Title	PLE Course #	Duration (Min.)	Target Audience
Required Courses	Environmental Overview *Frequency = Initial and every three years	61289390	15	Employees who have the potential to impact AT&T's environmental compliance program. This includes, but is not limited to those who are responsible for the storage or management of hazardous materials, accumulation, disposal or transportation of hazardous wastes, installation, operation or maintenance of fuel burning equipment or petroleum storage tanks, management or repair of refrigerant-containing equipment, or the management of an asset, facility or process that produces a regulated discharge.
	Petroleum Storage Tank Routine Maintenance Training *Frequency = Initial and every three years	61973376	60	Employees responsible for the operation, maintenance, fueling or management of petroleum storage tanks.
	CA Hazardous Waste Disposal - Non Retail	62396091	45	CA-based personnel who work directly in, or provide administrative support for, field operations, central offices, fleet garages, warehouses, or real estate operations and who are Levels 0-6.

Required Courses (cont.)

Course Title	PLE Course #	Duration (Min.)	Target Audience
CA Hazardous Waste Disposal – Retail & Admin	62396092	20	CA-based retail store and administrative office personnel who do not support field operations, central offices, fleet garages, warehouses, or real estate operations organizations and DO NOT have any occasion to visit a field operating center, material distribution/utilization center, central office, fleet garage, or other facility where tool-using personnel report, and who are Levels 0-6.
AT&T Emergency Preparedness Training	62394908	20	CA-based personnel, except Levels 6+.
Hazardous Materials & Waste Management_CAL	60123182	120	CA employees, who handle, use, or manage hazardous materials or regulated wastes such as lead-acid batteries, petroleum products, etc. and who are required to clean spills of hazardous materials
Management of Used Non-Spillable Batteries (U-Verse)	61028727	30	CA managers who manage used batteries from U-Verse equipment.
Spill Response Remote Locations - CA	61265813	30	CA employees, who (1) are NOT required to complete Course 60123182 and (2) use hazmat at remote sites, operate service vehicles; or transport or operate portable equipment.
RWM Refresher Training	61334073/ 61334307	60	CA Regulated Waste Managers. Course 61334073 is field delivered and requires a manual completion; 61334307 is the final assessment in PLE
IEFS Warehouse Regulated Waste Training	61731932	90	CA Warehouse personnel who manage regulated wastes at legacy DTV Owned & Operated facilities.

Completion Requirements for California Employees

- Employees are not permitted to perform environmentally sensitive tasks unless they have been trained or work under the direct supervision of a trained and knowledgeable employee.
- Training must be completed annually, unless otherwise specified in the previous section.
- Incumbent California-based employees are required to complete applicable training **annually, during a specified timeframe** (this includes Xandr employees).
- Employees who transfer or are on loan to California, are newly hired, or return from an extended disability or leave of absence must complete applicable training:
  - **within 30 days** from the date of hire, transfer, loan, return from disability or leave of absence; and
  - **before** they are permitted to handle any regulated waste items.

Examples of Training Schedule for California Employees	The following examples illustrate how to apply the Completion Requirements for California Employees outlined above: • **A new California employee is hired on September 1**. This new employee will need to take all required courses before handling any waste items and no later than October 1. This employee will then need to take the required courses again within the specified timeframe the following calendar year, in accordance with the established training schedule for incumbent employees. • **An incumbent employee is out on disability** during the training deployment period and returns to work on June 1. This employee must complete all applicable training by July 1 and must not handle any regulated waste items until such training has been completed. The employee will then need to take the required courses again within the specified timeframe the following calendar year. **An incumbent employee transfers from a retail store to a new job in field operations** anytime during the year and the change in job responsibilities and/or work location has triggered a change to the employee's training requirements. This employee must now complete CA Hazardous Waste Disposal–Non Retail (62396091) and any other newly applicable course(s) outlined above within 30 days of the transfer. Likewise, this employee must not handle any regulated waste items until all such training has been completed. The employee will need to take the required courses again within the specified timeframe the following calendar year.
Related Documents	• EH&S Training Matrices: These documents outline training requirements for broad job categories. If you have questions regarding your training requirements, contact EH&S or your Business Unit EH&S Coordinator.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**No**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**

Aboveground Petroleum Storage

Does your facility own or operate aboveground petroleum storage tanks or containers AND: * have a total aboveground petroleum storage capacity of 1,320 gallons or more, OR * have one or more petroleum tanks in an underground area?	**No**

Regulated Substances

Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING (Check all that apply): A10.

☑ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR BY (Check all that apply): B1.

☑ 1. CALLING PUBLIC EMERGENCY RESPONDERS (e.g., 9-1-1)
☑ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☑ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:
1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:
1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

	REGIONAL WATER QUALITY CONTROL BOARD (RWQCB).	(510) 622-2300 C6.
	U.S. ENVIRONMENTAL PROTECTION AGENCY (US EPA)	(800) 300-2193
	CALIFORNIA DEPT. OF FISH AND WILDLIFE (CDFW)	(916) 358-2900
	U.S. COAST GUARD (USCG)	(202) 267-2180
	CAL OSHA	(916) 263-2800
	CAL FIRE OFFICE OF THE STATE FIRE MARSHAL (OSFM)	(916) 323-7390
	OTHER (Specify): C7.	C8.
	OTHER (Specify): C9.	C10.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR BY (Check all that apply): C11.

☑ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☑ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY (Check all that apply): C12.

☑ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☑ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY COORDINATOR CONTACT INFORMATION: Network Operations Center C13.

PRIMARY EMERGENCY COORDINATOR NAME: Manager On-Call PHONE NO.: (800) 638-2822 PHONE NO.: (800) 566-9347

ALTERNATE EMERGENCY COORDINATOR NAME: AT&T EH&S Hotline; optio PHONE NO.: (800) 566-9347 PHONE NO.: (800) 638-2822

☐ Check if additional Emergency Coordinator contact and address information is available onsite or by calling PHONE NO.:

Note: If more than one alternate emergency coordinator is designated, attach a list in order of responsibility.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

Check the applicable boxes to indicate your facility's procedures for containing spills and preventing and mitigating releases, fires and/or explosions.

D1.

☑ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
☑ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls, built-in berms);
☑ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, spill pigs, spill pillows);
☑ 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS;
☐ 5. LINED TRENCH DRAINS AND/OR SUMPS;
☑ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
☑ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS;
☑ 8. STOP PROCESSES AND/OR OPERATIONS;
☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
☑ 10. SHUT OFF WATER, GAS, ELECTRICAL UTILITIES;
☑ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE AND/OR MEDICAL AID;
☑ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AND/OR IMPACTED AREAS;
☑ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION;
☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE EMERGENCY RESPONSE TEAM;
☐ 15. REMOVE CONTAINERS AND/OR ISOLATE AREAS;
☑ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
☑ 17. USE ABSORBENT MATERIAL FOR SPILL CONTAINMENT;
☐ 18. VACUUM SUCTION USING APPROPRIATE VACUUM (e.g., Intrinsically safe) FOR SPILL CONTROL AND/OR CLEANUP;
☐ 19. DECONTAMINATE PERSONNEL AND EQUIPMENT WITHIN DESIGNATED AREA AND DISPOSE OF WASTEWATER AS HAZARDOUS WASTE;
☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF HAZARDOUS WASTE GENERATED DURING EMERGENCY ACTIONS;
☐ 21. OTHER (Specify): D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (Check all that apply): E1.

☐ 1. BELLS; E2.
☐ 2. HORNS/SIRENS;
☑ 3. VERBAL (i.e., Shouting);
☐ 4. OTHER (Specify):

THE FOLLOWING LOCATION(S) WILL BE USED FOR AN EMERGENCY ASSEMBLY AREA(S) (e.g., Parking lot, street corner): E3.

Towards main street away from cell site

Note: The Emergency Coordinator must account for all onsite employees and visitors after evacuation.

EVACUATION ROUTE S AND ALTERNATE EVACUATION ROUTES ARE DESCRIBED AS FOLLOWS: E4.

☐ 1. WRITTEN PROCEDURES DESCRIBING ROUTES, EXITS, AND ASSEMBLY AREAS;
☐ 2. EVACUATION MAP(S) DEPICTING ROUTES, EXITS, AND ASSEMBLY AREAS;
☑ 3. OTHER (Specify): See staging/assembly area on site map. E5.

Note: Evacuation procedures and/or maps should be posted in visible facility locations and must be included in the Contingency Plan.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following): F1.

☑ 1. HAVE BEEN DETERMINED NOT NECESSARY;
☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Note: Advance arrangements with local fire and police departments, hospitals, state and local emergency response teams, and/or emergency services contractors should be made for your facility, if necessary. Large Quantity Generators must describe arrangements in the Contingency Plan.

G. EMERGENCY EQUIPMENT

Check the applicable boxes to list emergency response equipment available at the facility, identify the location(s) where the equipment is kept, and indicate the equipment's capability, if applicable.

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION G2.	CAPABILITY G3.
EXAMPLE	☒ *CHEMICAL PROTECTIVE GLOVES*	*SPILL RESPONSE KIT*	*SINGLE USE, OIL RESISTANT ONLY*
Safety and First Aid	1. ☐ CHEMICAL PROTECTIVE SUITS, APRONS, AND/OR VESTS		
	2. ■ CHEMICAL PROTECTIVE GLOVES	On site Spill Kit or Tech Vehicle	
	3. ☐ CHEMICAL PROTECTIVE BOOTS		
	4. ■ SAFETY GLASSES, GOGGLES, AND FACE SHIELDS	On site Spill Kit or Tech Vehicle	
	5. ☐ HARD HATS		
	6. ☐ AIR-PURIFYING RESPIRATORS		
	7. ☐ SELF-CONTAINED BREATHING APPARATUS (SCBA)		
	8. ■ FIRST AID KITS	Tech Truck	Standard first aid kit
	9. ☐ PLUMBED EYEWASH FOUNTAIN AND/OR SHOWER		
	10. ■ PORTABLE EYEWASH KITS AND/OR STATION	On site Spill Kit or Tech Vehicle	
	11. ☐ OTHER		
Fire Fighting	12. ■ PORTABLE FIRE EXTINGUISHERS	On site or Tech Vehicle	
	13. ■ FIXED FIRE SUPPRESSION SYSTEMS AND/ OR SPRINKLERS	Inside cell site	Halon suppression system
	14. ☐ FIRE ALARM BOXES		
	15. ☐ OTHER		
Spill Control and Clean-Up	16. ■ ALL-IN-ONE SPILL KIT	On site Spill Kit or Tech Vehicle	
	17. ☐ ABSORBENT MATERIAL		
	18. ☐ CONTAINER FOR USED ABSORBENT		
	19. ☐ BERM AND/OR DIKING EQUIPMENT		
	20. ☐ BROOM		
	21. ☐ SHOVEL		
	22. ☐ VACUUM		
	23. ☐ EXHAUST HOOD		
	24. ☐ SUMP AND/OR HOLDING TANK		
	25. ☐ CHEMICAL NEUTRALIZERS		
	26. ☐ GAS CYLINDER LEAK REPAIR KIT		
	27. ☐ SPILL OVERPACK DRUMS		
	28. ☐ OTHER		
Communi-cations and Alarm Systems	29. ■ TELEPHONES (e.g., Cellular)	Employee	Cell phones
	30. ☐ INTERCOM AND/OR PA SYSTEM		
	31. ☐ PORTABLE RADIOS		
	32. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT		
Other	33. ☐ OTHER		
	34. ☐ OTHER		

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases due to seismic motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply): H1.

- [x] 1. HAZARDOUS MATERIALS AND/OR WASTE STORAGE AREAS
- [ ] 2. PROCESS LINES AND PIPING
- [ ] 3. LABORATORY
- [ ] 4. WASTE TREATMENT AREA

LOCATIONS (e.g., Shop, outdoor shed, lab): H2.

Battery racks inside cell site & halon cylinder

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS AND/OR EQUIPMENT (Check all that apply): H3.

- [x] 1. SHELVES, CABINETS AND/OR RACKS
- [x] 2. TANKS AND SHUT-OFF VALVES
- [ ] 3. PORTABLE GAS CYLINDERS
- [x] 4. EMERGENCY SHUT-OFF AND/OR UTILITY VALVES
- [ ] 5. SPRINKLER SYSTEMS
- [x] 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane tank)

LOCATIONS: H4.

Battery racks inside cell site.

On Control Panel

Halon cylinder inside cell site

I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify):

Check the applicable boxes below to indicate how the employee training program is administered.

- [x] 1. FORMAL CLASSROOM
- [x] 2. VIDEOS
- [x] 3. SAFETY MEETINGS
- [ ] 4. STUDY GUIDES / MANUALS — I1.
- [x] 5. OTHER (Specify): All hazardous material employees are trained on proper procedures for responding to a s — I2.
- [ ] 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES
- [x] 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT — I3.
- [ ] 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE — I4.

EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

Large Quantity Generator Training: Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

Small Quantity Generator Training: Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

Hazardous Materials Business Plan Training: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

J. LIST OF ATTACHMENTS

Check one of the following: J1.

- [x] 1. NO ATTACHMENTS ARE REQUIRED; or
- [ ] 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

Training Plan:

Training for Verizon Wireless (Verizon) personnel is conducted at the time of employment and on an annual basis thereafter. Personnel are made aware of the hazardous materials at the facility and their Safety Data Sheets

Training topics include, but are not limited to:

- Familiarity with the characteristics and hazards of each hazardous material stored on-site.
- Measures employees can take to protect themselves from chemical hazards.
- Procedures for coordination with local emergency response organizations.
- Personal protective equipment requirements for applicable containment activities.
- Release prevention and defensive response measures for potential releases
- Who and how to call for immediate assistance in the event of an accident involving hazardous materials.

In accordance with California Health and Safety Code §25510 and Title 19, §2631 of the California Code of Regulations, in the event of a spill, release, or threatened release of a hazardous material, unless Verizon has a reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety, property, or the environment, Verizon will provide an immediate, verbal report to the Unified Program Agency and California Office of Emergency Services as soon as:

1. Verizon has knowledge of the release or threatened release;
2. Notification can be provided without impeding immediate control of the release or threatened release; and
3. Notification can be provided without impeding immediate emergency medical measures.

In order to ensure Verizon satisfies its reporting obligation, Verizon personnel shall immediately report any spill, release, or threatened release (regardless of size) to the Verizon Environmental Compliance Hotline as soon as they become aware of it. In the event Verizon personnel do not learn of a spill, release, or threatened release firsthand, but rather from another party, Verizon personnel shall not wait for confirmation of the details of a release to contact the Hotline.

Verizon Environmental Compliance personnel familiar with release reporting will then determine if the spill, release, or threatened release is reportable. If it is determined to be reportable, Verizon Environmental Compliance personnel shall immediately report the release or spill to the appropriate agencies.

Verizon personnel will not mitigate any release of hazardous materials requiring emergency response, as defined by Title 8, §5192 of the California Code of Regulations. They are instructed to: 1) report any release of hazardous materials to the Verizon Environmental Health & Safety Hotline and Network Operations Center immediately; 2) exit and secure the facility, if necessary; and 3) wait for responding emergency personnel.

For reportable releases, personnel shall contact the cleanup contractor Clean Harbors Environmental Services at (800) 483-3718 to manage the release.

Please note that Verizon historically used three separate digital training courses to satisfy the annual training requirements set forth by Health and Safety Code §25505. The content of these courses was consolidated into a single course, which, beginning in 2020, will appear on training records as “Spill Prevention and Response”.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/23/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 3 HIST LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/05/2023 has revealed that there are 8 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 68 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 34 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-23-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a Hazardous Materials Business Plan inspection. Facility has 40 x Northstar NSB170FT batteries. Onsite inspection contact today was Joseph Lorenzo of Verizon Wireless.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Conducted an Hazardous Materials Business Plan (HMBP) Routine Inspection. The HMBP was readily available to relevant employees electronically. The last HMBP was submitted on 1/30/2019 via CERS. CERS ID 10143671. The following reportable hazardous materials were observed during the inspection: 1.) Lead acid batteries at 83.2 gallons -40 x NSB170FT Notes: Annual Emergency Response Training was performed, and documentation is kept for 3 years. The business owner has provided the property owners an Owner Notification Letter. Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: GOOD SAMARITAN HOSPITAL
Address: 2425 SAMARITAN DR
City,State,Zip: SAN JOSE, CA 95124
Site ID: 120174
CERS ID: 10092346
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 120174
Site Name: GOOD SAMARITAN HOSPITAL
Violation Date: 10-28-2020
Citation: 23 CCR 16 2644.1(a)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2644.1(a)(2)
Violation Description: Failure to demonstrate to the UPA that the equipment and methods used to monitor the UST system are certified by an independent third-party as complying with the standards set forth in 23 CCR 2643(f).
Violation Notes: Returned to compliance on 01/21/2021. The third-party approval for the Ameron International Continuous Interstitial Monitoring Method used to monitor the underground Ameron Dualoy LCX coaxial Vent Line requires that a dual-point sensor be installed in the sensor reservoir (i.e., sensor capable of detecting both low-liquid and high-liquid conditions). The FFS model TS-HIS sensor currently installed in the sensor reservoir is a single-point sensor capable of detecting low-liquid only. Obtain a UST Minor Retrofit Permit from HMCD to have a qualified UST Service Technician replace the current sensor with an approved dual-point hydrostatic sensor. [Note: Refer to Local Guidance Letter (LG) LG-113 available at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/index.html for details.]

Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously

GOOD SAMARITAN HOSPITAL (Continued) **S113004848**

monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.

Violation Notes: Returned to compliance on 10/27/2021. THE TANK FILL SMP HYDRO SENSOR FAILED TO FUNCTION AS REQUIRED AND REMAINED IN ALARM. THE TECHNICIAN, REPLACED THE SENSOR LIKE-FOR-LIKE AND RE-TESTED THE SENSOR AND PASSED. ***NO FURTHER ACTION IS REQUIRED.

Violation Date: 12-03-2015
Citation: HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)
Violation Description: Failure to maintain the interstitial space under constant vacuum, pressure, or hydrostatic such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment. (Product Tight)
Violation Notes: Returned to compliance on 01/26/2016. OBSERVED APPROXIMATELY 8 OUNCES OF BRINE SOLUTION ON THE BOTTOM OF THE GENERATOR TRANSITION SUMP THAT APPEARS TO BE LEAKING FROM ONE OF THE PIPING PENETRATIONS ON THE SUMP WALL. WITHIN 30 DAYS TROUBLESHOOT THE CAUSE OF THE LEAK AND REPORT FINDINGS TO OUR OFFICE. NOTE THAT A PERMIT FROM OUR OFFICE WILL BE REQUIRED TO PERFORM REPAIR WORK. THE FILTRATION SUMP LEAK SENSOR FAILED TO ALARM WHEN DIPPED IN WATER. THE UST SERVICE TECHNICIAN CLEANED THE SENSOR BOTTOM SO IT WOULDN'T STICK. WHEN RETESTED THE SENSOR PASSED. NO FURTHER ACTION IS REQUIRED.

Violation Description:	Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes:	Returned to compliance on 11/30/2019. The currently posted Certificate of Financial Responsibily references an insurance policy that expired 9/1/19. Additionally, as noted in 8/1/19 correspondence from HMCD, the existing policy lists a different business entity (HCA Healthcare Inc) while the tank is owned by Hospital Corporation of America. The policy needs to ensure that it districtly lists or references any subsidiaries or partnerships of HCA Healthcare Inc which are insured.

Eval Notes: Annual underground storage tank (UST) compliance inspection began on 10/22/2020, included a follow-up site visit yesterday to obtain equipment testing reports, and concluded today. All UST system leak detection equipment for UST #2 was tested on 10/22/2020 by UST Service Technician Enrique Aguirre of Tank-Tek and functioned properly. Mr. Aguirre has current ICC California UST Service Technician certification (exp. 1/15/2022), Franklin Fueling Systems (FFS) FMS Installation and Programming (Incon Level 1 & 2) certifications (exp.

GOOD SAMARITAN HOSPITAL (Continued) **S113004848**

10/9/2022), and FFS Electronic Line Leak Detection Installation certification (exp. 4/23/2022). The UST system is equipped with continuous vacuum/pressure/hydrostatic (VPH) monitoring. The Incon model TS-HIS hydrostatic tank annular sensor was tested by raising it out of the tank interstitial fluid, then inverting it to obtain both low-liquid and high-liquid audible & visual alarms on the FFS TS-550evo monitoring console. Incon model TS-ULS [Truncated]

Eval Notes: THIS INSPECTION BEGAN ON 12/2/2015 AND CONCLUDED TODAY. ONSITE TO WITNESS UST MONITORING EQUIPMENT TESTING ON 12/2/2015 BY UST SERVICE TECHNICIAN STEVE WILLEMS OF TANKNOLOGY INC. MR. WILLEMS HAS CURRENT ICC UST SERVICE TECHNICIAN CERTIFICATION (EXP. 06/02/2016) AND INCON LEVEL 1, 2 AND 5 (EXP.03/03/2016). THIS MONITORING EQUIPMENT TESTING WAS FOR TANK 2 THAT IS MONITORED BY THE INCON 550 EVO SYSTEM. NOTE: UPON ARRIVAL THE INCON 550 EVO MONITORING PANEL SHOWED THE TANK VACUUM SENSOR WAS IN ALARM. MIKE GATHRIGHT OF CAL-PHASE CONSTRUCTION WAS ONSITE AND EXPLAINED THAT HE HAD RESPONDED TO A MAINTENANCE CALL ON 11/25/2015 FOR THE TANK ANNULAR SPACE VACUUM SENSOR ALARM. HE RETURNED ON 12/1/2015 WHEN THE TANK ANNULAR SPACE VACUUM SENSOR WENT INTO ALARM AGAIN TO TROUBLESHOOT THE CAUSE. HE DETERMINED THAT THE SENSOR WAS BAD AND ORDERED A REPLACEMENT SENSOR. ACTIONS NEEDED: *ONCE THE REPLACEMENT SENSOR IS INSTALLED CONTACT OUR OFFICE TO SCHEDULE AN INSPECTION TO VERIFY [Truncated]

Eval Notes: FOLLOW UP INSPECTION TO OBSERVE THE FUNCTIONALITY TEST OF THE REPLACEMENT VACUUM SENSOR IN THE TANK ANNULAR SPACE (FOR UST 2 THAT IS MONITORED BY THE INCON 550 EVO SYSTEM). CAL-PHASE CONSTRUCTION REPLACED THE ORIGINAL SENSOR THAT HAD FAILED FUNCTIONAL TESTING DURING THE ANNUAL MONITORING EQUIPMENT TESTING ON 12/2/2015. MIKE GATHRIGHT OF CAL-PHASE CONSTRUCTION WAS ONSITE TODAY TO PERFORM THE TESTING. OBSERVED THE FOLLOWING TEST: -VACUUM WAS MANUALLY RELEASED FROM THE TANK ANNULAR SPACE; THE VACUUM LOSS WAS DETECTED BY THE NEW SENSOR TRIGGERING AN AUDIBLE AND VISIBLE ALARM AT THE INCON 550 EVO PANEL. TEST RESULTS = PASS. SUBMIT A COPY OF THE COMPLETED MONITORING SYSTEM CERTIFICATION FORM TO HMCD WITHIN 30 DAYS.

Eval Notes: This inspection began on 5/11/17 and concluded today. Onsite on 5/22/17 to witness UST monitoring equipment testing by UST service technician Jesus Saldivar of Tanknology Inc. Mr. Saldivar has current ICC UST service technician certification (Exp. 7/17/17) and Veeder-Root Level 2/3 certification (Exp. 5/22/17). The following UST monitoring equipment was tested and functioned properly: one tank annular space sensor, two piping sump sensors, one dock sump sensor and one transition sump sensor. A flapper valve was observed in the drop tube. The spill bucket were hydrostatically tested for one hour and passed. Submit a copy of the completed monitoring system certification form and spill bucket test report within 30 days.

Waste Description: LINDANE (1,2,3,4,5,6-HEXA-CHLOROCYCLOHEXANE, GAMMA ISOMER)

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Address: 2505 SAMARITAN DR 210
City,State,Zip: SAN JOSE, CA 95124
Site ID: 64629
CERS ID: 10350442
CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-29-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: A routine hazardous waste generator inspection was conducted on 3/18/2016 following a change of ownership from Dr. Golod to Dr. Eric M Kagel, MD. The inspection report was issued on 3/29/2016. Dr. Kagel is an orthopedic surgeon. No cold sterile solutions or other sterilization chemicals that generate a residual waste are used on site. Chemical x-rays are performed on site, generating a silver-bearing hazardous waste. X-ray equipment has not been used yet (since the ownership change). Dr. Kagel stated that California Radiographics Inc. would likely continue service of the x-ray equipment on site, including future waste disposal. Dr. Kagel anticipates that x-ray equipment will be used less than the previous business, resulting in a waste generation of less than 5 gallons per month. A hazardous waste generator permit is required for this facility. EFFECTIVE JANUARY 1, 2013, STATE LAW REQUIRES THAT BUSINESSES SUBJECT TO STATE HAZARDOUS MATERIALS PROGRAMS SUBMIT [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-22-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Routine hazardous waste inspection performed today. EPA ID# CAL000224226 is active. This business generates 5 gallons of spent photographic solutions per month. California Radiographics Inc. (CRI) picks up spent solutions monthly. A small amount of Med Chem Pink containing 0.133% of ammonium chloride as the active ingredient is used to sterilize equipment. Report Facility Information to CERS. Note: This may be accomplished through HMCD's local portal (Front Counter). Information will be sent to you.

Violation Date: 05-26-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

WILLARD HANCOCK DDS (Continued) **S104577840**

Violation Notes: Returned to compliance on 05/31/2017. Per facility Dri Clave VK1 is used in ultrasonic machine with water. Spent solutions are discarded down the drain. SDS review of this product show a %5 Isopropyl Alcohol and a flash point of 126 degrees fahrenheit. Make a hazardous waste determination for spent solutions and if determined to be hazardous, manage accordingly.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

STANFORD HEALTH CARE (Continued) **S110735846**

Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 08/09/2017. Employees are not adequately trained on management of hazardous waste. This is evident by number and type of violations in addition to interviews with personnel tasked with making hazardous waste determinations.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	274886
Site Name:	Stanford Health Care Cancer Center South Bay
Violation Date:	07-06-2017
Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 08/09/2017. Facility primary emergency and environmental contact listed in the most recent CERS submission from 11-18-16, Kyle Riesenberg, is no longer with Stanford Health Care. Update this contact information and resubmit.

	date.
Violation Notes:	Returned to compliance on 08/09/2017. Facility last submitted all HMBP elements on 8-3-2015. Since then, facility and inventory sections were completed on 11-18-2016 but plans section containing emergency response and training information was not submitted.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	274886
Site Name:	Stanford Health Care Cancer Center South Bay
Violation Date:	07-06-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 08/09/2017. While facility correctly determined that some chemotherapy agents are hazardous wastes, the determination was not fully and accurately performed to determine if they are RCRA hazardous wastes and what applicable waste codes apply. Per a review of all uniform hazardous waste manifests used to ship waste off-site since operations began, facility has never identified pharmaceutical waste to be a RCRA hazardous waste. Facility periodically generates and collects non empty/non trace chemo waste including P-listed arsenic trioxide however manifests used to ship this waste use a "Non-RCRA hazardous waste, Liquids (Cytotoxic Drugs)" with a state waste code 551. RCRA HAZARDOUS WASTE IS ROUTINELY GENERATED IN THE FORM OF CONTAMINATED P-LISTED CONTAINERS, AND NON-EMPTY U-LISTED CONTAINERS. PHARMACY COMPOUNDS CYTOTOXICS THAT INCLUDE U AND P LISTED ITEMS INCLUDING BUT NOT LIMITED TO: DAUNOMYCIN, CYCLOPHOSPHAMIDE, AND ARSENIC TRIOXIDE.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-06-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted a complete hazardous materials business plan submission on 8-3-2015. On 11-18-2016 facility information and inventory was resubmitted.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-06-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility is a cancer care center and operations consist of but are not limited to: imaging, OR, Infusion, pre-op/post op, clinical laboratory, pathology laboratory, compounding, pharmacy, and sterile processing. The following minor violations were corrected at time of inspection: 1x5 gal chemo/RCRA waste container in compounding area - marked with a statement of hazard of "corrosive". Marked additionally with toxic. 1x5 gal chemo/RCRA waste container in the outdoor waste storage area - marked with a statement of hazard of "corrosive". Marked additionally with toxic. NOTE 1: Pharmacy compounds chemotherapy agents including multiple U listed pharmaceuticals and P listed Arsenic Trioxide. Clinical pharmacist II, Ann Le, indicated that arsenic trioxide contaminated containers are placed in the trace chemo container. Later during the inspection, Mrs. Le spoke with other compounding pharmacists and indicated that they are placing arsenic trioxide contaminated containers [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

ASHLAND CHEMICAL CO (Continued) **1000181795**

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2023

Next Scheduled EDR Contact: 07/10/2023
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/25/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

South Map:	12008734 LOS GATOS, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

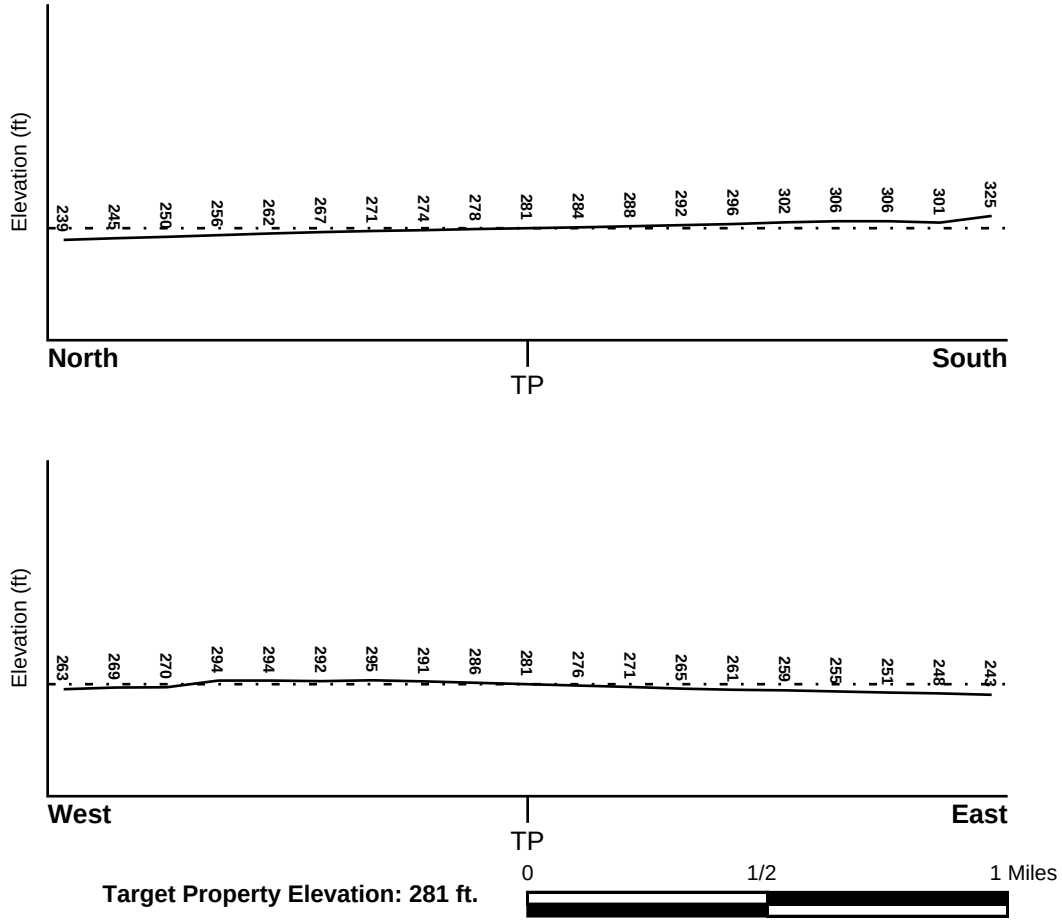

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 281 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0239H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Kimley Horn & Associates, Inc. on May 02, 2023.

TARGET PROPERTY

2425 Samaritan Dr
San Jose, CA 95124

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

Certified Sanborn® Map Report

05/02/23

Site Name:

2425 Samaritan Dr
2425 Samaritan Dr
San Jose, CA 95124
EDR Inquiry # 7325120.3

Client Name:

Kimley Horn & Associates, Inc.
401 B Street
San Diego, CA 92101
Contact: Damian Arnaiz

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Kimley Horn & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # DDE5-488A-B93B

PO # 094844003

Project Good Sam

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: DDE5-488A-B93B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Kimley Horn & Associates, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Appendix G
Credentials

Cassandra C. Bretschger, M.S., ENV SP

EDUCATION

M.S., Environmental Science and Geographic Information Systems, University of Arizona, Tucson

B.S., Environmental Science, University of Arizona, Tucson

AREAS OF EXPERTISE

Ms. Bretschger has experience in the following general areas:

- Entitlement strategy and processing
- Specific Plans
- Master Plan Development and Land Planning
- Due Diligence
- Regulatory Compliance and Permitting
- Data Validation and Database Management
- Soil / Groundwater Site Investigations and Remediation
- Phase I and II Environmental Site Assessments and Due Diligence
- Geospatial Analysis and Cartography
- Risk Assessment

REPRESENTATIVE EXPERIENCE

Ms. Bretschger is an Environmental Planner and Soil Scientist within Kimley Horn's Orange office. Her responsibilities consist of project management and field support in a wide range of consulting disciplines, project remediation/oversight, entitlement implementation, technical reporting and regulatory compliance at city, county and state levels.

Select Project Experience

Various Clients, CA (2015 – current)

Performed Phase I and II ESA's on multi-acre tracts of undeveloped, residential, commercial, and active industrial land for various clients. Phase I Tasks included: gathering historical data; analyzing database reports and historical documents such as topographic maps, aerial photographs and fire insurance maps; conducting site visits, land-owner, land-occupant interviews; and report writing. Phase II tasks include: budget preparation, field subcontractor coordination, geophysical surveys, drilling, soil vapor installation and risk analysis.

Class I Railroad Various Cities, CA (2016 - ongoing)

Working with both the remediation and real estate departments to carry out client services within the southwest. Remediation Department: Oversight of multiple ongoing remediation programs relating to former railroad fueling/maintenance or acquisition/lease properties. Responsibilities include maintaining groundwater monitoring activities, technical data analysis, analytical data quality analysis, and project reporting Real Estate Department: Complete lease site inspections across the United States documenting environmental compliance and completing Phase I and II ESAs for property acquisitions. As of 2022, working on baseline entitlements for a 4,300 acre site including Specific Plan, Development Agreement and technical reports for CEQA.

Northrup Grumman- Former Major Aerospace Test Facility – Orange County, CA (2015-2016)

GIS Analyst and on-site scientist for soil sampling activities at three former aerospace facilities in southern California. Responsibilities include oversight of drilling activities for all soil vapor probes, lead GIS Analyst for site investigations, semi-annual groundwater monitoring, feasibility testing, remediation implementation, and risk assessment work. Example project included: results for vapor intrusion study input into EVS for 3-D visualization of contamination extent, and identification of targeted remediation areas, which lead to a groundwater remediation strategy report.

Yara International, Southwest - CA, AZ, NM (2011-2014)

Served as project manager (2013-2014) and senior field technician (2011-2013) for three to five sites annually completing validation research implementing Yara products. Responsibilities included oversight of field work, laboratory coordination, bi-weekly field investigations, GIS mapping, report preparation, and internal budgeting/cost tracking.

SPECIALIZED TRAINING

- OSHA 40-Hour Hazardous Waste Health and Safety Training, 29 CFR 1910.120, 2015
- OSHA 8-Hour Refresher Safety Training, 29 CFR 1910.120 and CCR Title 8, Section 5192
- First Aid and CPR Certified
- ENV SP Certified
