Client Reference Name: Bellarmine College Preparatory Master Plan Update

Dear Shannon George:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 559-7600 or TGolino@aeiconsultants.com.

Sincerely,

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 960 West Hedding Street, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	960 West Hedding Street, San Jose, Santa Clara County, California 95126
Property ID (APN or Block/Lot)	26111005, 26112074, 26112087, 26112002, 26112003, 26110104, 26110073, 26110105, 2611095 and 2611096
Location	Northwest and southeast side of West Hedding Street
Property Type	Educational
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	20/Client provided
Number of Buildings	16
Building Construction Date(s)/Source	1950's-1960's/Client provided
Building Square Footage (SF)/Source	355,000/Owner representative
Number of Floors/Stories	One and two
Basement or Subgrade Area(s)	Yes; the following buildings have full basement areas: O'Donnel Hall, Liccardo Center, Sobrato Center, Carney Science Hall, and Student Life Center
Number of Units	One
Additional Improvements	Soccer field, track, baseball field, courtyards, pool, asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	Bellarmine College Preparatory
Current On-site Operations/Use	Private secondary school and associated administrative activities
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	CUPA LISTINGS (x4), HAZMAT (x3), CERS (x6), HWTS (x10), RCRA NonGen/NLR, FINDS (x6), ECHO, LUST (x6), HIST LUST (x3), CORTESE (x4), HIST CORTESE (x3), RGA LUST (x9), SWEEPS UST (x4), HAZNET (x7), EMI (x2), CIWQS (x5), CERS HAZ WASTE, NPDES, EDR HIST AUTO (x4), SPILLS 90, RCRA-LQG, MANIFEST, UST

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1851	Unknown use/Data failure; refer to Section 1.6.1	N/A

DRAFT

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1851-1928	Former buildings utilized as the University of the Pacific/ College of the Pacific/Bellarmine College, former dwellings	Interviews, Sanborn maps
1931-1956	Former commercial and residential buildings; gas station and auto repair shop (706-790 Emory Street, 779-799 Stockton Avenue); Chase Co Candy Factory (circa 1944) (795 West Hedding Street)	Agency records, Sanborn maps, areial photographs, city directories
1950's-1960's	Current buildings constructed for commercial use	Agency records, interviews
1963-1994	Former commercial and residential buildings; gas station and auto repair shop (706-790 Emory Street, 779-799 Stockton Avenue); former industrial building occupied by trucking businesses (795 West Hedding Street)	Agency records, Sanborn maps, aerial photographs, city directories
1997-Present	Current buildings utilized as Bellarmine College Preparatory School (960 West Hedding Street)	Agency records, aerial photographs, city directories, interviews, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	Railroad tracks, followed by:	
	Multi-tenant industrial building (961-967 Stockton Avenue)	RCRA NonGen/NLR, CERS HAZ WASTE, CUPA LISTINGS (x3), HAZMAT, CERS, EDR HIST AUTO (961-967 Stockton Avenue)
	Golden Gate Petroleum (905 Stockton Avenue)	UST, RCRA NonGen/NLR (x4), LUST, HIST LUST, CORTESE, ENF, HIST CORTESE (x2), NPDES (x2), WDS, CERS (x4), AST (x2), CPS-SLIC, CERS HAZ WASTE (x2), CERS TANKS, CUPA LISTINGS, HAZMAT, CIWQS, NON-CASE INFO, SWEEPS UST (905-909 Stockton Avenue)
	R Brothers Painting (707 West Hedding Street)	RCRA-SQG, FINDS, ECHO, CERS HAZ WASTE, CUPA LISTINGS (x2), HAZMAT, CERS, RCRA NonGen/NLR (707 West Hedding Street)
	Central Concrete Supply (889 Stockton Avenue)	CUPA LISTINGS, NPDES, WDS, CIWQS, CERS (889 Stockton Avenue)
	Foundation Building Materials (675 Emory Street)	HWTS, CUPA LISTINGS (x2), HAZNET, CERS HAZ WASTE, HAZMAT, CERS, RCRA NonGen/NLR (675 Emory Street)
	Central Concrete Supply (790 Stockton Avenue)	SWEEPS UST, CUPA LISTINGS, EMI, HAZMAT, WDS, CERS (790 Stockton Avenue)

DRAFT

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- According to historical sources and information obtained from the GeoTracker website, the portion of the subject property located at 795 Stockton Avenue formerly operated as a gasoline service station between 1931 to 1981 and an auto repair shop through the early 2000's. The site was listed as a closed LUST cleanup site in which a release of gasoline was found to have affected site soils and groundwater. A waste oil tank was removed from beneath the sidewalk on Emory Street in 2003. In 2009, three formerly closed-in-place 1,000-gallon gasoline USTs were removed from the site, as well as a former waste oil sump and one belowground hydraulic lift from the former auto repair portion of the site. Remedial excavation included the removal of a total of 686 tons of impacted soils, and revealed three additional USTs (two approximately 350-gallon and one 20-gallon) which had not previously discovered, and were removed from the site in 2010. A total of seven groundwater monitoring wells were installed in conjunction with the release investigation, and periodic groundwater monitoring was conducted on site between June 2004 and August 2011, as well as the removal of approximately 85,000 gallons of impacted groundwater from the site. Prior to backfilling the remedial excavation areas, an oxygen-releasing compound (ORC) was mixed with recharged groundwater to create a remedial barrier down gradient from the source of contamination. Confirmation soil and groundwater samples following remedial activities indicated soil containing up to 1,500 ppm TPHg, 1.2 ppm benzene, 0.094 ppm toluene, and non-detect for xylene, and ethylbenzene.; groundwater samples indicated non-detect for all constituents including TPHg, BTEX, and MTBE, and soil vapor samples did not indicate concentrations of constituents exceeding residential ESLs. The SCCDEH granted the case closure on June 8, 2012; a letter from the SCCDEH dated October 26, 2012 indicated that the SCCDEH, Planning and Building departments should be notified prior to change in site use, grading activities, or excavation conducted in this portion of the site. A letter from the SCCDEH dated September 25, 2013 indicated that the remaining maximum concentration of benzene in site soils is actually 0.15 ppm and not the previously noted 1.2 ppm; the letter concluded that the newly presented data confirms the prior case closure decision. Based on this information, the former gas station and closed LUST cleanup investigation at 795 Stockton Avenue represents a CREC.

  It should be noted that this portion of the subject property, which currently exists as a paved parking area, is planned to be developed with a parking structure in the near future. As such, the appropriate County Department of Environmental Health, Planning, and Building departments should be notified prior to excavation or grading activities related to the planned parking structure. It may also be prudent to develop/implement a Site Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances and/or petroleum products or other yet unidentified features or conditions that may exist.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- According to information obtained from the GeoTracker website, the portion of the subject property located at 795 West Hedding Street was listed as a closed LUST cleanup site in which a release of diesel impacted site soils. The subject property was formerly equipped with two 10,000-gallon diesel USTs that were removed from the site in 1991 along with associated piping. A total of 1,100 cubic yards of contaminated soil was removed from the former tank area, and soil samples following overexcavation indicated non-detect for TPHg and BTEX and 2.9 ppm TPHd. The case was granted closure by the RWQCB on April 18, 1996. Based on the regulatory closure of the release listing and residual contamination below residential ESLs, the closed LUST cleanup investigation at 795 West Hedding Street represents an HREC.
- According to information obtained from the GeoTracker website, the portion of the subject property located at 960 West Hedding Street was listed as a closed LUST cleanup site in which a release of gasoline was found to have impacted site soils and groundwater. The subject property was formerly equipped with one 1,000-gallon gasoline UST that was removed in 2003 along with associated piping. Soil samples indicated TPHg at 24 ppm and lead at 31 ppm (both below their respective residential ESLs). Three groundwater monitoring wells were installed on site and following quarterly monitoring events between December 2004 and December 2005, groundwater analytical results did not indicate detectable concentrations of TPHg, BTEX, or MTBE. The site was granted closure by the SCCDEH on February 13th, 2006. Based on the regulatory closure of the release listing and residual contamination below residential ESLs, the closed LUST cleanup investigation at 960 West Hedding Street represents an HREC.
- According to historical sources and information obtained from the GeoTracker website, the portion of the subject property located at 740 Emory Street formerly operated as an auto repair shop at least between 1950 and 1966. The site was listed as a closed LUST cleanup site in which a release of solvents affecting site soils was discovered following the removal of a 300-gallon solvent UST in 1991. Soil samples indicated 8.4 ppb methylene chloride (MC) in the former tank vicinity; however, a sample blank that was prepared also indicated 11 ppb MC, suggesting that MC concentrations were likely present but the result could have been an error and possible indicative of a false positive result. A No Further Action Letter prepared by the RWQCB noted that because no other spills, leaks or surface pollution of MC are documented or suspected at the site, no further action was required with respect to the former 300-gallon solvent UST. Based on the regulatory closure of the release listing with no site management requirements, the closed LUST cleanup investigation at 740 Emory Street represents an HREC.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally

does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- The subject property is equipped with six hydraulic elevators. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the buildings (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevators is located in a locked closet on the ground floor of each building with an elevator. The elevators are reportedly maintained by Otis. A small amount of staining to the concrete was observed at the base of the elevator motor in Liccardo Center, possibly due to a hydraulic fluid leak in the product line. Minor cracks in the concrete flooring were observed in this area, but no hydraulic fluid stains were observed in the vicinity of these small cracks. This indicates that staining is likely surficial and does not appear to affect the subsurface of the subject property. Based on the small quantity and surficial nature of staining observed, this equipment is not expected to represent a significant environmental concern.
- According to the key site manager and owner representative, demolition of the subject property buildings including Wade Hall, O'Donnel Hall, and Matthewson Hall is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that renovation and/or demolition activities of the subject property buildings are planned including Liccardo Center, Wade Hall, O'Donnel Hall, and Matthewson Hall. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/ renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 960 West Hedding Street, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Notify the Santa Clara County Department of Environmental Health, San Jose Planning, and San Jose Building departments prior to excavation or grading activities related to the planned parking structure on the southeast portion of the subject property (795 Stockton Avenue)
- It may be prudent to develop/implement a Site Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances and/or petroleum products or other yet unidentified features or conditions that may exist.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 960 West Hedding Street, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

DRAFT

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- AEI observed interior spaces of buildings planned for demolition and/or renovation: O'Donnel Hall, Matthewson Hall, Wade Hall, and Liccardo Center. AEI was not granted interior access to any other on-site buildings. AEI observed common and exterior areas of the property, including building exteriors, sports fields, pool, paved parking areas, courtyards, and the pool equipment rooms. Based on the nature of property occupancy, this method of assessment is presumed to be appropriate due to the size of the subject property.
- Due to the large volume of vehicles within the parking areas of the subject property, direct visual observation of the ground in many areas was not possible. Features may be present that were not observed during AEI's site inspection.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

DRAFT

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was information obtained from online research and interviews indicating that the subject property was established as a school (formerly the University of the Pacific) in 1851. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for similar or residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, interviews

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by David J. Powers & Associates on June 2, 2022. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	960 West Hedding Street, San Jose, Santa Clara County, California 95126
Property ID (APN or Block/Lot)	26111005, 26112074, 26112087, 26112002, 26112003, 26110104, 26110073, 26110105, 2611095 and 2611096
Location	Northwest and southeast side of West Hedding Street
Property Type	Educational
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	20/Client provided
Number of Buildings	16
Building Construction Date(s)/Source	1950's-1960's/Client provided
Building Square Footage (SF)/Source	355,000/Owner representative
Number of Floors/Stories	One and two
Basement or Subgrade Area(s)	Yes; the following buildings have full basement areas: O'Donnel Hall, Liccardo Center, Sobrato Center, Carney Science Hall, and Student Life Center
Number of Units	One
Additional Improvements	Soccer field, track, baseball field, courtyards, pool, asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	Bellarmine College Preparatory
Current On-site Operations/Use	Private secondary school and associated administrative activities
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	CUPA LISTINGS (x4), HAZMAT (x3), CERS (x6), HWTS (x10), RCRA NonGen/NLR, FINDS (x6), ECHO, LUST (x6), HIST LUST (x3), CORTESE (x4), HIST CORTESE (x3), RGA LUST (x9), SWEEPS UST (x4), HAZNET (x7), EMI (x2), CIWQS (x5), CERS HAZ WASTE, NPDES, EDR HIST AUTO (x4), SPILLS 90, RCRA-LQG, MANIFEST, UST

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas/PG&E
Cooling System	Electricity and solar/PG&E
Potable Water	San Jose Water Co
Sewage Disposal/Treatment	City of San Jose

Utility source/system information listed in the table above was obtained during site reconnaissance and online, unless otherwise noted above.

DRAFT

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial and residential area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	Railroad tracks, followed by: Multi-tenant industrial building (961-967 Stockton Avenue) Golden Gate Petroleum (905 Stockton Avenue) R Brothers Painting (707 West Hedding Street) Central Concrete Supply (889 Stockton Avenue) Foundation Building Materials (675 Emory Street) Central Concrete Supply (790 Stockton Avenue)	RCRA NonGen/NLR, CERS HAZ WASTE, CUPA LISTINGS (x3), HAZMAT, CERS, EDR HIST AUTO (961-967 Stockton Avenue) UST, RCRA NonGen/NLR (x4), LUST, HIST LUST, CORTESE, ENF, HIST CORTESE (x2), NPDES (x2), WDS, CERS (x4), AST (x2), CPS-SLIC, CERS HAZ WASTE (x2), CERS TANKS, CUPA LISTINGS, HAZMAT, CIWQS, NON-CASE INFO, SWEEPS UST (905-909 Stockton Avenue) RCRA-SQG, FINDS, ECHO, CERS HAZ WASTE, CUPA LISTINGS (x2), HAZMAT, CERS, RCRA NonGen/NLR (707 West Hedding Street) CUPA LISTINGS, NPDES, WDS, CIWQS, CERS (889 Stockton Avenue) HWTS, CUPA LISTINGS (x2), HAZNET, CERS HAZ WASTE, HAZMAT, CERS, RCRA NonGen/NLR (675 Emory Street) SWEEPS UST, CUPA LISTINGS, EMI, HAZMAT, WDS, CERS (790 Stockton Avenue)

DRAFT

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	Residences (931-971 University Avenue) Residences (872-898 Myrtle Street)	
Northwest	West Hedding Street, followed by: Commercial office buildings (925-991 West Hedding Street) Residences (846 McKendrie Street, 916-922 Elm Street) Residence (853 McKendrie Street) Aramark Uniform Services (855 McKendrie Street)	NOTIFY 65, HIST UST, HAZMAT, SWEEPS UST (855 McKendrie Street)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qac: Surficial sediments, silty clay and organic clay, fossiliferous; represents intra-fan areas, age Holocene/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban Land: this designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey
Groundwater Flow Direction/Source	North-northeast/Groundwater data for the subject property, obtained from GeoTracker
Estimated Depth to Groundwater/ Source	Between 12 and 17.75 feet bgs/Groundwater data for the subject property, obtained from GeoTracker
Surface waters on the subject property or adjoining sites	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1851	Unknown use/Data failure; refer to Section 1.6.1	N/A
1851-1928	Former buildings utilized as the University of the Pacific/ College of the Pacific/Bellarmine College, former dwellings	Interviews, Sanborn maps
1931-1956	Former commercial and residential buildings; gas station and auto repair shop (706-790 Emory Street, 779-799 Stockton Avenue); Chase Co Candy Factory (circa 1944) (795 West Hedding Street)	Agency records, Sanborn maps, areial photographs, city directories
1950's-1960's	Current buildings constructed for commercial use	Agency records, interviews
1963-1994	Former commercial and residential buildings; gas station and auto repair shop (706-790 Emory Street, 779-799 Stockton Avenue); former industrial building occupied by trucking businesses (795 West Hedding Street)	Agency records, Sanborn maps, aerial photographs, city directories
1997-Present	Current buildings utilized as Bellarmine College Preparatory School (960 West Hedding Street)	Agency records, aerial photographs, city directories, interviews, site observation

The following historical addresses were associated with the subject property: 795 and 944-974 West Hedding Street, 828 McKendrie Street, 850-870 Elm Street, 740-780 Emory Street, 909-911 University Avenue, 779-795 Stockton Avenue.

Based on a review of historical sources, the subject property was formerly developed with a gas station at least between 1931 and 1993. In addition, auto-related uses were identified in conjunction with the subject property including auto repair, towing, and trucking businesses. Refer to Section 4.6 for a detailed discussion of environmental cleanup investigations and remedial activities conducted at the subject property.

Based on a review of a Sanborn map from 1915, the subject property was formerly equipped with heating oil USTs. Refer to Section 4.6 for discussion of environmental cleanup investigations and remedial activities conducted at the subject property.

If available, copies of historical sources are provided in Appendix D.

DRAFT

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	Developed with various former commercial, school-related, and residential buildings; gas station is present on the southeast portion of the subject property	NORTHEAST: Railroad tracks, followed by commercial and industrial buildings; storage tanks visible on the northernmost adjoining site SOUTHEAST: A road, followed by residences and commercial buildings SOUTHWEST: A road, followed by residences and a gas station NORTHWEST: A road, followed by residences
1948, 1950, 1956	Various former commercial and residential buildings including a warehouse building on the northwest portion; gas station on southeast portion; race track and baseball field	No significant changes
1963, 1968, 1974, 1982, 1993	No significant changes except additional commercial school-related structures present on the southern portion	No significant changes
1998, 2006	No significant changes except the industrial warehouse building is no longer present on the northwest portion and the gas station is no longer present	No significant changes
2009	No significant changes except the existing sports field and parking lot are present on the northwest portion	No significant changes
2012	No significant changes except school-related structures on the south portion of the subject property are no longer present	No significant changes
2016	The existing school-related structures in their current configuration	No significant changes

Based on a review of aerial photographs, the subject property was developed with a gas station at least between 1939 and 1993. Refer to Section 3.0 for further discussion.

Refer to Section 5.0 for discussion of the southwest adjoining gas station and northeast adjoining petroleum storage/distribution yard.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

DRAFT

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1891	Central portion of the subject property developed with various buildings and an elevated water tank comprising the University of the Pacific; developed with various dwellings and ancillary structures on the southeast and western portions; vacant land on the northern portion	NORTHEAST: Railroad tracks, followed by commercial buildings, dwellings, and ancillary structures SOUTHEAST: Emory Street, followed by dwellings and ancillary structures SOUTHWEST: Dwellings and ancillary structures NORTHWEST: Not depicted by map
1915	No significant changes except additional school buildings are present on the central portion; underground fuel oil tanks noted on east-central portion at Central Heating Plant	NORTHEAST: Railroad tracks, followed by dwellings and commercial buildings including the Shell Co Oil Storage Yard with various aboveground storage tanks depicted SOUTHEAST: No significant changes SOUTHWEST: No significant changes NORTHWEST: McKendrie Street, followed by dwellings and ancillary structures and Hedding Street followed by residences and ancillary structures
1950	Central portion of the subject property developed with various buildings comprising the Bellarmine High School including classrooms, boiler house, plunge (pool) (800-898 and 871-899 Elm Street); dwellings, a painting contractors warehouse, and auto repair shop and gas station on the southeast portion (706-790 Emory Street, 779-799 Stockton Avenue); dwellings and ancillary structures on the northwest and western portions (900-976 Hedding Street, 828-844 McKendrie Street); Chase Candy Co factory and repair shop on the northeast portion (775 West Hedding Street)	NORTHEAST: No significant changes except a gas station is now present beyond the railroad tracks and the existing concrete plant is present (Pacific Coast Aggregates, Inc.) SOUTHEAST: Dwellings, commercial buildings, the existing fire department, and the existing commercial building occupied by a sheet metal shop and neon sign manufacturing facility SOUTHWEST: No significant changes except a gas station is present at the intersection of Emory Street and Elm Street NORTHWEST: No significant changes
1956	No significant changes except additional school structures are present on the central portion	No significant changes
1966	No significant changes except additional school structures are present on the central portion; the commercial building on the northern portion is now a motor freight storage building (775-795 West Hedding Street)	No significant changes

Based on a review of Sanborn maps, the subject property was formerly equipped with heating oil tanks at least in 1915. In addition, a gas station was formerly present on the southeast portion of the subject property at least between 1950 and 1966. Refer to Section 4.6 for further discussion.

Refer to Section 7.0 for discussion of the northwest adjoining railroad tracks.

DRAFT

Refer to Section 5.0 for discussion of the northeast adjoining petroleum storage yard, northeast adjoining gas station, and southwest adjoining gas station.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1930. The following table summarizes the potential tenants of concern based on AEI's review of the historical city directories.

West Hedding Street

Year(s)	Address - Occupant Listed
1966	795 West Hedding Street - Walkups Merchant Express
1970	795 West Hedding Street - Walkups Merchant Express, Alltrans freight lines
1975	795 West Hedding Street - Standard Truck Lines Inc Trucking
1985	795 West Hedding Street - Professional truck and trailer repair, Bills Trucking
1986	795 West Hedding Street - Bills Trucking, J & R Transportation Services
1991	795 West Hedding Street - Pac West Transports, Body Fuel Systems
1994	795 West Hedding Street - Pac West Transports, Root Trucking Inc
1995	795 West Hedding Street - Root Trucking Inc

Emory Street

Year(s)	Address - Occupant Listed
1970	740 Emory Street - Jer Rays Paint & Body Shop auto pntr
1975, 1980	740 Emory Street - Jer Rays Paint & Body Shop
1985	740 Emory Street - Rays Towing
1991, 1994	740 Emory Street - Body Works Auto Body Shop

Based on a review of city directories, the subject property was utilized for auto and truck repair operations at least between 1966 and 1994. Refer to Section 3.0 for further discussion.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	June 3, 2022	Website	Melissa Belloso	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
1991-2001	Bellarmine College Preparatory (850 Elm Street)	Inspection	Minor administrative violations, hazardous materials container labeling
2005-2013 (non-inclusive)	Bellarmine College Prep (960 West Hedding Street)	Inspection	Violations related to hazardous materials container labeling, hazardous waste storage inspection, and employee training; notes 55-gallon drum of waste oil stored on site
2006	Bellarmine College Preparatory (850 Elm Street)	HMCD Application Coding	Delete file
2007	Bellarmine College Prep (850 West Hedding Street)	Hazardous Waste Generator Permit	Add paint/solvents (15 gal), lab chemicals (5 gal), and motor oily filters (15) to hazardous waste inventory
2016	Bellarmine College Preparatory (960 West Hedding Street)	Inspection	Inspection following complaint claiming paint brushes were being washed with gasoline and cleaned down a sink; no evidence of improper hazardous waste disposal was noted by inspector
2010-2021 (non-includive)	Bellarmine College Preparatory (960 West Hedding Street)	Hazardous Materials Business Plan	Hazardous materials inventory includes various laboratory chemicals and waste, paints, cleaning/janitorial products, swimming pool chemicals, fertilizer, pesticide/herbicide, hydraulic oil, mineral solvents, and diesel fuel (all noted as being 10 gallons or less, aside from diesel)

DRAFT

Based on a review of information on file for the subject property at the SCCDEH, the subject property is permitted as a handler of hazardous materials and generator of hazardous waste in conjunction with use as a college preparatory school. Hazardous materials stored on site include various laboratory chemicals and waste, paints, cleaning/janitorial products, swimming pool chemicals, fertilizer, pesticide/herbicide, hydraulic oil, mineral solvents, and diesel fuel (emergency generator). Hazardous wastes generated include laboratory chemical waste, solder dross and metal debris from laboratory projects, used oil (generated from a CNC machine in the robotics shop), and universal wastes typical of school janitorial and maintenance activities. No significant violations or evidence of a release of these materials was noted. Based on the lack of significant violations and nature of wastes generated, these operations are not expected to represent a significant environmental concern.

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Fire Department (SJFD)	June 3, 2022	Website	N/A	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
2010	Bellarmine College (795 Stockton Avenue)	Inspection	Two tanks found in excavation, no sampling required, site is already under county LUST oversight

In addition to the above listed information, various fire inspections and permits related to fire protection systems were on file for school-related use on file for the subject property with the SJFD.

Refer to Section 3.0 and 4.6 for further discussion of historical auto repair and gas station operations at the subject property.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Building Department (SJBD)	June 3, 2022	Website	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1944	Chase Candy (795 Hedding)	Candy manufacturing co
1948	O'Brian's of California (795 Hedding)	Offices
1949	Chase Candy (795 Hedding Street)	Pump house for candy manufacturer
1951	Chase Candy (795 Hedding Street)	Permit to construct building to be used as candy manufacturer

DRAFT

Year(s)	Owner/Applicant	Description of Permit and Building Use
2010	Bellarmine College Preparatory (960 West Hedding Street)	Notes oil/water separator in maintenance area; indicates that auto washing no longer occurs
2010, 2014	Bellarmine College Preparatory (960 West Hedding Street)	Construction stormwater discharge permit
2020	Bellarmine College Preparatory (960 West Hedding Street)	Site is equipped with kitchen grease trap

In addition to the above noted information, various tenant improvement, sign, electrical, mechanical, and plumbing permits were on file for the subject property. Evidence indicating current or prior use or storage of hazardous substances was not found in these records.

According to information on file with the SJBD, the subject property was listed as being equipped with an oil/water separator in the "maintenance area"; no oil/water separator was observed during site reconnaissance and the key site manager was not aware of this feature. It was noted in a 2010 inspection that the oil/water separator was associated with car washing operations, which ceased in 2010. No heavy machinery or industrial vehicles were likely associated with this use. No evidence of the use of solvents was noted in regulatory agency records. Although concentrations of detergents and oil residues may accumulate in the subsurface in the event the separator is compromised, a significant release of hazardous substances or petroleum products at the subject property is unlikely. Based on this information, the former car washing operations and associated oil/water separator are not expected to represent a significant environmental concern.

Refer to Section 7.0 for discussion of features observed during site reconnaissance.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Planning Department (SJPD)	June 3, 2022	Telephone	Planning Staff	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	June 3, 2022	Website	N/A	Information obtained is discussed below

Records Summary

APN	26111005, 26112074, 26112087, 26112002, 26112003, 26110104, 26110073, 26110105, 2611095 and 2611096
Acreage	20 acres

DRAFT

Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Bellarmine College Prep

SWRCB GeoTracker Database Summary

795 West Hedding Street - Pac West Transportation

According to information obtained from the GeoTracker website, the portion of the subject property located at 795 West Hedding Street was listed as a closed LUST cleanup site in which a release of diesel impacted site soils. The subject property was formerly equipped with two 10,000-gallon diesel USTs that were removed from the site in 1991 along with associated piping. A total of 1,100 cubic yards of contaminated soil was removed from the former tank area, and soil samples following overexcavation indicated non-detect for TPHg and BTEX and 2.9 ppm TPHd. The case was granted closure by the RWQCB on April 18, 1996. Based on the regulatory closure of the release listing and residual contamination below residential ESLs, the closed LUST cleanup investigation at 795 West Hedding Street represents an HREC.

960 West Hedding Street - Bellarmine College Preparatory

According to information obtained from the GeoTracker website, the portion of the subject property located at 960 West Hedding Street was listed as a closed LUST cleanup site in which a release of gasoline was found to have impacted site soils and groundwater. The subject property was formerly equipped with one 1,000-gallon gasoline UST that was removed in 2003

DRAFT

along with associated piping. Soil samples indicated TPHg at 24 ppm and lead at 31 ppm (both below their respective residential ESLs). Three groundwater monitoring wells were installed on site and following quarterly monitoring events between December 2004 and December 2005, groundwater analytical results did not indicate detectable concentrations of TPHg, BTEX, or MTBE. The site was granted closure by the SCCDEH on February 13th, 2006. Based on the regulatory closure of the release listing and residual contamination below residential ESLs, the closed LUST cleanup investigation at 960 West Hedding Street represents an HREC.

740 Emory Street - The Body Works

According to historical sources and information obtained from the GeoTracker website, the portion of the subject property located at 740 Emory Street formerly operated as an auto repair shop at least between 1950 and 1966. The site was listed as a closed LUST cleanup site in which a release of solvents affecting site soils was discovered following the removal of a 300-gallon solvent UST in 1991. Soil samples indicated 8.4 ppb methylene chloride (MC) in the former tank vicinity; however, a sample blank that was prepared also indicated 11 ppb MC, suggesting that MC concentrations were likely present but the result could have been an error and possible indicative of a false positive result. A No Further Action Letter prepared by the RWQCB noted that because no other spills, leaks or surface pollution of MC are documented or suspected at the site, no further action was required with respect to the former 300-gallon solvent UST. Based on the regulatory closure of the release listing with no site management requirements, the closed LUST cleanup investigation at 740 Emory Street represents an HREC.

795 Stockton Avenue - Sartori's Auto Center

According to historical sources and information obtained from the GeoTracker website, the portion of the subject property located at 795 Stockton Avenue formerly operated as a gasoline service station between 1931 to 1981 and an auto repair shop through the early 2000's. The site was listed as a closed LUST cleanup site in which a release of gasoline was found to have affected site soils and groundwater. A waste oil tank was removed from beneath the sidewalk on Emory Street in 2003. In 2009, three formerly closed-in-place 1,000-gallon gasoline USTs were removed from the site, as well as a former waste oil sump and one belowground hydraulic lift from the former auto repair portion of the site. Remedial excavation included the removal of a total of 686 tons of impacted soils, and revealed three additional USTs (two approximately 350-gallon and one 20-gallon) which had not previously discovered, and were removed from the site in 2010. A total of seven groundwater monitoring wells were installed in conjunction with the release investigation, and periodic groundwater monitoring was conducted on site between June 2004 and August 2011, as well as the removal of approximately 85,000 gallons of impacted groundwater from the site. Prior to backfilling the remedial excavation areas, an oxygen-releasing compound (ORC) was mixed with recharged groundwater to create a remedial barrier down gradient from the source of contamination. Confirmation soil and groundwater samples following remedial activities indicated soil containing up to 1,500 ppm TPHg, 1.2 ppm benzene, 0.094 ppm toluene, and non-detect for xylene, and ethylbenzene.; groundwater samples indicated non-detect for all constituents including TPHg, BTEX, and MTBE, and soil vapor samples did not indicate concentrations of constituents exceeding residential ESLs. The SCCDEH granted the case closure on June 8, 2012; a letter from the SCCDEH dated October 26, 2012 indicated that the SCCDEH, Planning and Building departments should be notified prior to change in site use, grading activities, or excavation conducted in this portion of the site. A letter from the SCCDEH

DRAFT

dated September 25, 2013 indicated that the remaining maximum concentration of benzene in site soils is actually 0.15 ppm and not the previously noted 1.2 ppm; the letter concluded that the newly presented data confirms the prior case closure decision. Based on this information, the former gas station and closed LUST cleanup investigation at 795 Stockton Avenue represents a CREC.

It should be noted that this portion of the subject property, which currently exists as a paved parking area, is planned to be developed with a parking structure in the near future. As such, the Santa Clara County Department of Environmental Health, San Jose Planning, and San Jose Building departments should be notified prior to excavation or grading activities related to the planned parking structure. It may also be prudent to develop/implement a Site Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances and/or petroleum products or other yet unidentified features or conditions that may exist.

California DTSC HWTS Database Summary

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
Bills Trucking Inc (795 West Hedding Street)	1984-2010	Not listed	Not listed

Bellarmine College Prep (960 West Hedding Street)	2022	Non-halogenated solvents	0.0025

Refer to the GeoTracker discussions above for additional information regarding former auto repair operations and the removal of USTs from the subject property.

Based on a review of information obtained from the DTSC HWTS, the subject property was listed as generating a variety of wastes related to janitorial, laboratory, and other school-related operations. No evidence of the generation of halogenated solvents was noted. Based on the nature of property use associated with the generation of hazardous waste, and lack of significant violations on file with the SCCDEH, these listings are not expected to represent a significant environmental concern.

BAAQMD Summary

Date	Occupant	Document Type	Document Notes/Violations
1994	The Body Works (740 Emory Street)	PRR Plant Status	Facility is permitted for paint booth (1988)
2021	Bellarmine College Preparatory (960 West Hedding Street)	PRR Plant Status	Facility is permitted for emergency standby generator (2010), boiler registration (2015), and natural gas cogeneration system (2017)

Based on a review of information on file with the BAAQMD, the subject property formerly operated an auto repair shop at 740 Emory Street. Refer to Section 3.0 and the GeoTracker discussion above for additional information.

In addition, the subject property was listed as being equipped with an emergency generator. Refer to Section 7.0 for further discussion.

VW Well Information Map Summary

Based on a review of the SCVWD Well Information Map, the subject property is equipped with one active water production well, one abandoned water production well, and several active and decommissioned groundwater monitoring wells. Refer to the appendices for a depiction of wells identified on the Well Information Map, and refer to Section 7.0 for further discussion.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	June 3, 2022	CalGEM Map	No

DRAFT

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	June 3, 2022	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Address	960 West Hedding Street/975 West Hedding Street/850 Elm Street/740 Emory Street/780 Emory Street/779 Stockton Avenue/795 Stockton Avenue/828 McKendrie Street
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	CUPA LISTINGS (x4), HAZMAT (x3), CERS (x6), HWTS (x10), RCRA NonGen/ NLR, FINDS (x6), ECHO, LUST (x6), HIST LUST (x3), CORTESE (x4), HIST CORTESE (x3), RGA LUST (x9), SWEEPS UST (x4), HAZNET (x7), EMI (x2), CIWQS (x5), CERS HAZ WASTE, NPDES, EDR HIST AUTO (x4), SPILLS 90, RCRA-LQG, MANIFEST, UST
Comments	According to the regulatory database, the subject property was listed in conjunction with several closed LUST cleanup investigations related to former USTs, auto repair, and gas station operations; refer to Section 4.6 for further discussion. The subject property was listed as generating a variety of hazardous wastes between 1984 and 2022; various CERS inspections on file between 2016 and 2020 indicated violations related to administrative record keeping, improper hazardous waste characterization from the Robotics Lab, hazardous waste container labeling and handling, Refer to Sections 4.1 and 4.6 for a detailed list of waste generated and further discussion. The EMI listing indicates that the subject property is permitted for emissions related to an emergency generator on site (see Section 7.0). The CIWQS listings indicate that the subject property held storm water construction permits related to various school construction projects. The subject property is identified as a FINDS and ECHO site in association with the above listings. Information on the

DRAFT

	EPA website ECHO indicates that the facility is currently in compliance with no outstanding violations. Based on the nature of the non-release listings and lack of significant violations, they are not expected to represent a significant environmental concern.

Facility Name	Sonoma Graphic Products Inc/East Penn Manufacturing Co Inc/Regal Stations Inc
Address	961-967 Stockton Avenue
Distance & Direction	Adjoining to the northeast beyond railroad tracks
Hydrologic Position	Down-gradient
Databases Listed	RCRA NonGen/NLR, CERS HAZ WASTE, CUPA LISTINGS (x3), HAZMAT, CERS, EDR HIST AUTO
Comments	According to the regulatory database, this site was listed as a RCRA NonGen for the generation of unspecified hazardous wastes and holding a Hazardous Materials Business Plan. CERS inspections on file for 2015 indicated minor administrative violations. The EDR HIST AUTO listing suggests a possible gasoline service station at the site in 1969 and 1970; Sanborn maps and aerial photographs indicated a gas station at this site at least since 1950. No additional information regarding UST systems or evidence of a release was noted. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Golden Gate Petroleum - San Jose Plant/Bay Area Petroleum/Diesel Direct West/ San Jose Plant/Military Family Housing
Address	905-909 Stockton Avenue
Distance & Direction	Adjoining to the northeast beyond railroad tracks
Hydrologic Position	Down-gradient
Databases Listed	UST, RCRA NonGen/NLR (x4), LUST, HIST LUST, CORTESE, ENF, HIST CORTESE (x2), NPDES (x2), WDS, CERS (x4), AST (x2), CPS-SLIC, CERS HAZ WASTE (x2), CERS TANKS, CUPA LISTINGS, HAZMAT, CIWQS, NON-CASE INFO, SWEEPS UST
Comments	According to the regulatory database and historical sources, this site has operated as a petroleum storage and distribution yard at least since 1915. The site was listed as being equipped with the existing 20,000-gallon gasoline UST and 12,000-gallon gasoline UST, and was formerly equipped with a total of 15 additional USTs containing stoddard solvent, motor oil, waste oil, waste solvent, kerosene, hydrocarbon solvent, gasoline, and diesel. These past generations of USTs were removed between 1990 and 1998, with the exception of one one 2,000-gallon gasoline UST, 2,000-gallon motor oil UST and one 55-gallon waste oil UST that were closed in place at the site in 1990. In addition, several aboveground storage tanks containing petroleum products are present on the site. AEI reviewed files with the GeoTracker database for additional information on the SLIC and LUST listings. The groundwater flow direction on site is to the north-northeast, and away from the subject property. Groundwater data indicates that the plume is not migrating and is stable. A contaminant plume map for benzene in shallow groundwater shows the plume dissipating

DRAFT

	approximately 200 feet from the subject property. The site was granted closure by the SCCDEH on February 4, 2016. Based on the regulatory closure of the release listings and review of available groundwater data, this site is not expected to represent a significant environmental concern.

Facility Name	College Park Paint Co Inc/R Brothers Painting Co/HJK Racing & Machine
Address	707 West Hedding Street
Distance & Direction	Adjoining to the northeast beyond railroad tracks
Hydrologic Position	Down-gradient
Databases Listed	RCRA-SQG, FINDS, ECHO, CERS HAZ WASTE, CUPA LISTINGS (x2), HAZMAT, CERS, RCRA NonGen/NLR
Comments	According to the regulatory database, this site was listed as a RCRA NonGen and small-quantity generator of hazardous waste with the NAICS description "Painting and Wall Covering Contractors". CERS inspections on file between 2016 and 2021 indicated minor violations related to administrative record keeping and employee training. This site is identified as a FINDS and ECHO site in association with the above listings. Information on the EPA website ECHO indicates that the facility is currently in compliance with no outstanding violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Central Concrete Supply
Address	889 Stockton Avenue
Distance & Direction	Adjoining to the northeast beyond railroad tracks
Hydrologic Position	Down-gradient
Databases Listed	CUPA LISTINGS, NPDES, WDS, CIWQS, CERS
Comments	According to the regulatory database, this site was listed as holding an active industrial stormwater discharge permit. On notice of violation was cited in 2015 for failure to re-certify the industrial stormwater discharge permit. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Railway Distributing Inc/Foundation Building Materials/Foundation Building Materials LLC DBA Railway Dist
Address	675 Emory Street
Distance & Direction	Adjoining to the northeast beyond railroad tracks
Hydrologic Position	Down-gradient
Databases Listed	HWTS, CUPA LISTINGS (x2), HAZNET, CERS HAZ WASTE, HAZMAT, CERS, RCRA NonGen/NLR
Comments	According to the regulatory database, this site was listed as a generator of hazardous wastes including off-specification, aged, or surplus organics; other organic solids; hydrocarbon solvents; and unspecified oil-containing waste. CERS

DRAFT

	inspections on file between 2015 and 2016 indicated minor administrative violations, hazardous waste storage container labeling, and employee training. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Central Concrete Supply Co
Address	790 Stockton Avenue
Distance & Direction	Adjoining to the northeast
Hydrologic Position	Down-gradient
Databases Listed	SWEEPS UST, CUPA LISTINGS, EMI, HAZMAT, WDS, CERS
Comments	According to the regulatory database, this site was listed as being equipped with one 4,000-gallon gasoline UST that was installed in 1988. The site was listed as holding emission permits with the BAAQMD and as holding waste discharge requirements. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Alpha Cab/Disttech
Address	755 Stockton Avenue
Distance & Direction	Adjoining to the southeast
Hydrologic Position	Cross-gradient
Databases Listed	CUPA LISTINGS, RCRA NonGen/NLR, RCRA-SQG, FINDS, ECHO
Comments	According to the regulatory database, this site was listed as a RCRA NonGen and small-quantity generator of hazardous waste. This site is identified as an ECHO site in association with the above listings. Information on the EPA website ECHO indicates that the facility is currently in compliance with no outstanding violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Hansen R E
Address	836 Emory Avenue
Distance & Direction	Adjoining to the southeast beyond Emory Street
Hydrologic Position	Up-gradient
Databases Listed	EDR HIST AUTO
Comments	According to the regulatory database, this site was listed as being occupied by a potential auto repair shop at least in 1935, 1940, 1945, and 1950. No additional information was provided with the listing. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Progressive Cleaners/James Reid

DRAFT

Address	890-896 Emory Street
Distance & Direction	Adjoining to the southeast beyond Emory Street
Hydrologic Position	Up-gradient
Databases Listed	EDR HIST CLEANER, RCRA NonGen/NLR
Comments	According to the regulatory database, this site was listed as being occupied by a potential dry cleaning tenant at least in 1960. The site was listed as a non-generator of hazardous waste. Based on the short duration of occupancy of the identified potential cleaner, lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Former Gas Station/Bayy Zamira 2006-Revocable Living Trust/Sticks Unlimited/ Bohnet E R
Address	901 Emory Street
Distance & Direction	Adjoining to the southwest beyond Elm Street
Hydrologic Position	Up-gradient
Databases Listed	RCRA NonGen/NLR, LUST, HIST LUST, CORTESE, EMI, CERS, RCRA-SQG, FINDS, ECHO, EDR HIST AUTO
Comments	According to the regulatory database and information obtained from historical sources, this site formerly operated as a gas station at least between 1950 and 1991. The site was formerly equipped with two 1,000-gallon fuel USTs, one 500-gallon fuel UST, and one 250-gallon waste oil UST that were removed from the site in 1991. Between 2006 and 2014, dual phase extraction (DPE) was conducted which extracted over 120,000 gallons of impacted groundwater and removed 1,422 pounds of petroleum hydrocarbons from groundwater beneath the site. Soil vapor sampling was conducted in in December 2014, which indicated TPHg up to 4.1 µg/L and PCE at 150 µg/m^3 in VP5 (approximately 100 feet southwest of the subject property); it should be noted that the source of PCE in soil vapor is not related to the USTs removed from the site and as such, no further action was noted as required by the LOP with respect to PCE in soil vapor. Although residual concentrations of TPHg and BTEX remain in site groundwater, the monitoring wells closest to the subject property (MW10 and MW11) indicated non-detect for both constituents as of the most recent groundwater monitoring event in 2015. The site was granted closure with respect to the USTs on August 31, 2015. The GeoTracker website indicates that the site is Open - Eligible for Closure as of May 17, 2021; no additional information regarding investigation of PCE in soil vapor at the site was available online. Based on a review of available sampling data and the regulatory closure of the release listing, this site is not expected to represent a significant environmental concern.

Facility Name	Aratex Services/Amarark Uniform Services
Address	855 McKendrie Street
Distance & Direction	Adjoining to the northwest beyond West Hedding Street
Hydrologic Position	Down-gradient

DRAFT

Databases Listed	NOTIFY 65, HIST UST, HAZMAT, SWEEPS UST
Comments	According to the regulatory database, this site was listed as being formerly equipped with at least one 5,000-gallon gasoline UST and one 12,000-gallon gasoline UST that were installed at the site in 1980. No additional information was provided with these listings. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Ron Miller, CFO, Bellarmine College Preparatory	June 12, 2022	Email	2014	Interviewed; see Interview Summary table below
Key Site Manager	Mario Pedroza, Facilities Coordinator	June 16, 2022	In Person	2002	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	No
Do you have any knowledge of previous environmental investigations conducted on site?	Yes - previous Phase I (copies not available)	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	Yes; "Demolition and replacement of aged educational facilities; No change in use proposed."	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings	No	No

DRAFT

Question	Owner (Representative) Response/Comment	Key Site Manager Response/ Comment
relevant to hazardous substances or petroleum products in, on, or from the property?		
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No
Additional information provided:	Ron Miller indicated that floor drains, elevators, and electrical transformers are present at the subject property. In addition, Ron Miller noted that pesticides/ herbicides are utilized for general pest control and hazardous chemicals are utilized on site (pool chemicals). Refer to Section 7.0 for further discussion of on-site observations.	N/A

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

DRAFT

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

DRAFT

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	June 16, 2022
AEI Site Assessor(s)	Lea Palumbo
Property Escort(s)/ Relationship(s) to Property	Mario Pedroza, Facilities Coordinator/Key Site Manager
Units/Areas Observed	Buildings: O'Donnel Hall, Matthewson Hall, Wade Hall, and Liccardo Center Exterior areas: Building exteriors, sports fields, pool, paved parking areas, courtyards, and pool equipment rooms
Area(s) not accessed and reason(s)	Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	Refer to Section 1.5 for discussion of limiting condition(s).

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)

Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells	✔	
Septic Systems		
Biomedical Wastes		
Other	✔	✔

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTS/USTS)

DRAFT

AST(s)

The subject property is equipped with an emergency generator. Approximately 165 gallons of diesel fuel are contained within the generator equipment. No evidence of leaks or spills was observed at the base of the generator. Based on the good condition of the equipment, the presence of the emergency generator and associated diesel fuel is not expected to represent a significant environmental concern.

7.1.2 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	Three	PG&E	Unknown	No	No
Pole-Mounted	Ten	PG&E	Unknown	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Elevators

The subject property is equipped with six hydraulic elevators. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the buildings (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevators is located in a locked closet on the ground floor of each building with an elevator. The elevators are reportedly maintained by Otis. A small amount of staining to the concrete was observed at the base of the elevator motor in Liccardo Center, possibly due to a hydraulic fluid leak in the product line. Minor cracks in the concrete flooring were observed in this area, but no hydraulic fluid stains were observed in the vicinity of

DRAFT

these small cracks. This indicates that staining is likely surficial and does not appear to affect the subsurface of the subject property. Based on the small quantity and surficial nature of staining observed, this equipment is not expected to represent a significant environmental concern.

The subject property is equipped with a traction freight elevator that runs from the basement to the second floor of the Liccardo Center. Geared traction elevators are driven by alternating current (AC) or direct current (DC) electric motors. During AEI's site reconnaissance, the electrical and mechanical equipment for this traction elevator was observed within the basement of the Liccardo Center. Based on the absence of hydraulic fluid used in association with the mechanical equipment of the elevator, the presence of this elevator is not expected to represent a significant environmental concern.

7.1.3 Drains, Sumps, and Clarifiers

Storm Drains

Several storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

Sump

A sump was observed in the basement of O'Donnel Hall. The sump is used to capture and pump rain water to the public sewer system. No hazardous substances were observed around the sump. Although not observed, the following buildings are also equipped with basement sumps: Sobrato Center, Student Life Center, and Carney Hall. Based on this information and the nature of use of the subject property, the presence of the sumps is not expected to represent a significant environmental concern.

7.1.4 Wells

Monitoring Wells

Although not observed during site reconnaissance, several groundwater monitoring wells are known to exist on the subject property. These monitoring wells were installed by various consultants in conjunction with the LUST cleanup investigations at the subject property. Refer to Section 4.6 for further discussion.

Water Supply Wells

According to site plans and the Santa Clara Valley Water District Well Information Map, a water supply well was located on the eastern exterior of Wade Hall. The date of installation and depth of the well were not ascertainable. The well is noted as "abandoned." However, it is not clear if the well has been properly decommissioned. Since the well represents a potential conduit to the subsurface of the property, it should be verified that the well has been properly decommissioned.

DRAFT

In addition, the subject property obtains potable water from a private water well located on the southeast portion of the subject property in the vicinity of the track and baseball field. The date of installation and depth of the well were not provided to AEI. In addition, no water quality testing results were provided to AEI for review. Based on the nature of use of the well, the presence of the well is not expected to represent a significant environmental concern.

7.1.5 OTHER

Maintenance/Janitorial Supplies

Several gallons of maintenance products, such as paints, cleaners, etc. were observed in the custodial storage areas throughout the subject property. The containers were properly labeled and stored. No signs of spills or leaks were observed in conjunction with the containers. No significant staining or evidence of release of any of the materials was observed during the site reconnaissance. Based on the relatively small quantities observed and the lack of evidence of the mismanagement of these materials, the use of these materials on site is not expected to represent a significant environmental concern.

Pool Chemicals

Various 5-gallon containers of pool chemicals and pool cleaning equipment were observed in locked closets adjacent to the pool area. All containers were properly labeled and stored. Standing water was observed in one of the pool chemical storage closets; according to the Key Site Manager, the pool equipment was recently repaired and the standing water is a result of a former leak that has been addressed. Based on this information and the relatively good housekeeping observed, the presence of pool chemicals is not expected to represent a significant environmental concern.

Cooking Grease Trap

The on-site kitchen drainage system in the Liccardo Center is equipped with a grease trap. According to the key site manager, the trap is periodically cleaned and emptied by a licensed contractor for off-site disposal. Based on the non-hazardous nature of material entering the grease trap, and the periodic cleanout, it is not expected to represent a significant environmental concern.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

The adjoining site to the northeast was observed to be occupied by a petroleum storage yard. Based on the nature of use, hazardous substances and/or petroleum products are likely utilized/ stored on the site. This site was identified in the regulatory database and is further discussed in Section 5.1.

DRAFT

7.2.2 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

The adjoining site to the northeast was observed to be occupied by a petroleum storage yard. ASTs of various sizes were observed on this property. Based on the nature of use, other hazardous substances and/or petroleum are likely stored on the site. This site was identified in the regulatory database and is further discussed in Section 5.1.

7.2.3 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformer(s)

Several pole-mounted and pad-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.4 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.5 Other

Railroad tracks are located adjoining to the northeast of the subject property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. The railroad tracks located on the adjoining site to the direction of the subject property are surrounded by gravel. Based on the presence of gravel, the use of oils, arsenic, and herbicides associated with weed or pest control is expected to be minimal, and therefore does not represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

DRAFT

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the key site manager and owner representative, demolition of the subject property buildings including Wade Hall, O'Donnel Hall, and Matthewson Hall is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

DRAFT

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that renovation and/or demolition activities of the subject property buildings are planned including Liccardo Center, Wade Hall, O'Donnel Hall, and Matthewson Hall. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 52 tests were conducted for radon levels in the subject property zip code (95126) in 2016. One of the tests exceeded the action level of 4.0 pCi/L set forth by the US EPA. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L. Consequently, radon does not appear to be a widespread concern; however, radon sampling would be required to determine site-specific radon levels.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

DRAFT

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of Liccardo Center, Wade Hall, O'Donnel Hall, and Matthewson Hall to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

AEI did not observe interior areas of the remaining subject property buildings. Refer to Section 1.5 for discussion of limitations.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

CA RGA LF Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for

DRAFT

listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 2

DRAFT

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 16 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there

DRAFT

are 23 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 56 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 9 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 7 CA UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 21 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 55 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Cleanup Status: COMPLETED - CASE CLOSED

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 89 CA CUPA Listings sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
GARDEN CITY GAS WORK	W. ST JOHN AND MONTG	SE 1/2 - 1 (0.923 mi.)	373	1598

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

BELLARMINE COLLEGE PREPARATORY (Continued) **S108743090**

Site Name:	BELLARMINE COLLEGE PREPARATORY
Violation Date:	11-14-2019
Citation:	HSC 6.5 25189.5(a),25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a),25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.
Violation Notes:	As per the Maker's Lab instructor, the solder dross is swept up and disposed of in the trash. The solder used was confirmed to be lead-based. Advised the instructor to use a small brush and a sealable container to collect the dross.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	11646
Site Name:	BELLARMINE COLLEGE PREPARATORY
Violation Date:	02-11-2020
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	During initial inspection on 11/14/2019 the following "Unresolved Issue" was noted: "As per the Maker's Lab instructor, the waste water coming out of the ProtoMax cutting machine disposes of water down the drain after running through a proprietary filter sock. This waste water may have California-regulated heavy metals which may not be captured by the filtration system prior to entering the sewer. Provide the inspector with metal alloy spec sheets. The robotics lab generates large amounts of metal turnings and shavings from various alloys, in order to determine how to properly manage this waste provide the inspector a metals spec sheet." Follow up emails dated 01/02/2020 and 01/28/2020 again requested the milling sheets with no response from the facility. This information is a critical aspect of proper hazardous waste metal management. *Manage all robotic lab metal turnings and shavings as hazardous waste (or recyclable waste), including all sweepings during [Truncated]

Eval Notes: A referral was received to investigate improper hazardous waste disposal at the above named facility. The referral said that paint brushes are being cleaned with gas and the liquid is being poured down the drain in the Janitorial shop and Gardener's shop. On this date, I met with Ron Miller, Chief Financial Officer, who said that cleaning paint brushes with gas and pouring the liquid down the drain is not an accepted procedure at this facility. Ron Miller and Juan Navarro, Director of Maintenance, accompanied me on an inspection of both the Custodial area and Landscaping area. I observed paint containers and gasoline cans inside separate storage cabinets in the secured Landscaping area and various cleaning products stored on shelves in the Custodial shop. I checked the bathroom sinks in the Landscaping shop and Custodial shop and did not observe any discoloration or

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	During initial inspection on 11/14/2019 the following "Unresolved Issue" was noted: "As per the Maker's Lab instructor, the waste water coming out of the ProtoMax cutting machine disposes of water down the drain after running through a proprietary filter sock. This waste water may have California-regulated heavy metals which may not be captured by the filtration system prior to entering the sewer. Provide the inspector with metal alloy spec sheets. The robotics lab generates large amounts of metal turnings and shavings from various alloys, in order to determine how to properly manage this waste provide the inspector a metals spec sheet." Follow up emails dated 01/02/2020 and 01/28/2020 again requested the milling sheets with no response from the facility. This information is a critical aspect of proper hazardous waste metal management. *Manage all robotic lab metal turnings and shavings as hazardous waste (or recyclable waste), including all sweepings during [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1W12A04f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The site was formerly a gasoline service station between 1931 and 1981 (Advanced Technology, Inc. 1996) Three abandoned-in-place 1,000-gallon (+/-) underground gasoline tanks were removed from the property in April 2009. A waste oil tank was removed in 2003 from the area between the sidewalk and Emory Street. Two gasoline dispensers were formerly situated approximately 25 feet northeast of the abandoned underground tanks. In addition, there was a former waste oil "sump" and an underground vehicle hydraulic lift which were also removed from the site in April 2009. Three underground fuel tank not identified in any other prior investigations were discovered during

DRAFT

SARTORI'S AUTO CENTER (Continued) **S103672421**

site remediation and subsequently removed from the site in October 2009. The results of previous investigations performed at the site were utilized to assist in preparing the original Corrective Action Plan (CAP). At the present time the soil and groundwater extraction and the placement of oxygen releasing compounds. Should specific information regarding historical investigation and or soil groundwater data be required, the reader is referred to the January 17, 2008 CAP for such information.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Status:	Open - Eligible for Closure
Status Date:	05/17/2021
Case Worker:	TLF
RB Case Number:	14-574
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1W12G02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	April 1991 - 3 fuel underground storage tanks (USTs) and 1 waste oil UST were removed from the site. Holes were noted by the Fire Department in a fuel UST and the waste oil UST. The maximum Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg) concentration reported in soil was 17,000 parts per million (ppm). September 2000 - 1 geoprobe boring (GP1) was advanced to 30 feet and a grab groundwater sample was collected and reported to contain 77,000 parts per billion (ppb) TPHg and 9,300 ppb Benzene. June 2003 - 3 additional geoprobe borings (GP2 through GP4) were advanced onsite. TPHg and Benzene were detected in grab groundwater samples at concentrations up to 830 ppb and 3.3 ppb, respectively. In August 2003 4 additional geoprobe borings (GP5 through GP8) were advanced offsite for the collection of grab groundwater samples. TPHg and Benzene were not reported to be present above the laboratory reporting limits. Low concentrations of Tert Butyl Alcohol (TBA) and di-isopropyl ether (DiPE) were detected in GP6. In September 2003, 3 monitoring wells (MW1 through MW3) were installed onsite to 30 feet below the ground surface (ft bgs). Also at this time, a soil vapor extraction pilot test was conducted. In October 2005 - 3 extraction wells (EW1 through EW3) and one air sparge well (SW1) were installed onsite. The highest concentrations of petroleum hydrocarbons were detected in soil samples collected between 15-24.5 ft bgs. TPHg, TPHd, and benzene were detected in groundwater samples collected from the extraction wells at concentrations up to 49,000 ppb, 14,000 ppb and 5,900 ppb, respectively. Between February 2006 and June 2007, multiple extended interim remedial extraction events were conducted utilizing a mobile multi-phase extraction system (MPE). The system only operated during daylight hours. It is estimated that 91,777

DRAFT

BARRY ZAMIRA 2006-REVOCABLE LIVING TRUST (Continued) **S105512931**

gallons of groundwater were extracted and 952 pounds of hydrocarbons were removed during these events. Between November and December 2007, 2 extraction wells (EW4 and EW5), 2 sparge wells (SW2 and SW3), and 4 groundwater wells (MW4 through MW7) were installed onsite. In August 2008, 4 additional groundwater wells (MW8 through MW11) were installed offsite. The addition of these wells defined the groundwater plume. In October, an air sparge feasibility test was conducted. Based on the results of the test, air sparge was deemed to be an effective remedial method. July 2009 - A Corrective Action Plan (CAP) was submitted that recommended the use of dual phase extraction (DPE) along with air sparging to remediate the site. DPE operated onsite from June 2013 - August 2014. It is estimated that the system extracted 121,530 gallons of groundwater and 1,422 pounds of petroleum hydrocarbons. In December 2014, 8 soil vapor probes (VP1 through VP6) were installed onsite to depths between 3.5 and 10 ft bgs. VP1 through VP3 had multiple depth probes. VP4 was not completed due to the presence of buried masonry that could not be penetrated. Additionally, refusal was met in VP1 and VP2B requiring completion at shallower depths than 5 and 10 ft bgs. Benzene, Toluene, Ethylbenzene and Xylenes (BTEX) were not reported to be present in the soil vapor samples above the laboratory reporting limits. TPHg was reported at a maximum concentration of 4.1 micrograms per liter (a%g/L). Oxygen was reported in the samples at concentrations between 15 and 21%. Tetrachloroethene (PCE) was reported in one sample VP5 from 5 ft bgs at a concentration of 150 a%g/m3; the 7 other soil vapor samples were not reported to have PCE present above the laboratory reporting limits. The detected PCE concentration is below the Environmental Screening Levels and California Human Health Screening Levels for both residential and commercial site usage. Vapor probe VP5 was located near well MW4 in the northwestern corner of the property away from the USTs. The source of the PCE in soil vapor is unclear and undefined and should be further assessed. Since the detection was not near a waste oil UST (potential source), we cannot require additional investigation. This case closure will be copied to the Regional Water Quality Control Board. The soil samples collected were not reported to have concentrations of TPHg, BTEX or MtBE above the laboratory reporting limits. One soil sample was reported to have a concentration of 0.019 ppm Naphthalene above the laboratory reporting limit. In February 2015, the final groundwater monitoring event was conducted and reported maximum concentrations of 1,100 ppb TPHg, 62 ppb Benzene, 1.3 ppb Toluene, 12 ppb Ethylbenzene, 5.9 ppb Xylenes, 1.9 ppb MtBE, and 38 ppb Tert Butyl Alcohol (TBA). With the exception of MtBE, the maximum concentrations were reported in the samples collected from wells MW1and MW2. 5 of the 7 extraction wells were dry at this time.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order

DRAFT

CENTRAL CONCRETE SUPPLY (Continued) **S106102012**

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best

DRAFT

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1W12A01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	1986 In November and December, 7 soil borings were advanced onsite. A site plan illustrating the locations of these borings was not found in the file. Soil samples were collected and reported to contain maximum concentrations of 190 parts per million (ppm) Total Hydrocarbon Response, 710 ppm Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 2,300 ppm Total Extractable Hydrocarbons, 1,800 ppm TPH as Diesel (TPHd), 23,000 ppm TPH as Waste Oil, and 4.9 ppm TPH as Stoddard Solvent (TPHss). 1990 In September, a Stoddard Solvent underground storage tank (UST) was removed and 2 motor oil and 1 waste oil USTs were closed in place. These tanks are located within the building with the loading dock. Laboratory reports indicate maximum concentrations in soil sample Tank #1 of 0.015 ppm Benzene, 0.056 ppm Toluene, 0.044 ppm Xylenes, 0.120 ppm 1,1,1-Trichloroethane (PCE), and 0.022 ppm Trichloroethene (TCE). TPHd and Total Oil and Grease (TOG) were not reported to be present above the laboratory reporting limits. The location of these samples was not found in the file. 3 soil borings (B1 through B3) were advanced onsite to 30-35 feet below the ground surface (ft bgs). 19 soil samples were collected and analyzed for TPHss and reported to have concentrations present up to 9,100 ppm at 15 feet in boring B3. Boring B3 was located north of the Stoddard Solvent USTs. 1991 In September, a Stoddard Solvent and Waste Stoddard Solvent USTs were removed. 4 soil samples were collected from beneath the USTs and reported to contain

DRAFT

BAY AREA PETROLEUM (Continued) **S103675784**

maximum concentrations of 1,400 ppm TPHg,18.3 ppm TPHd, 3,700 ppm TOG, 1.8 ppm Benzene, 1.5 ppm Toluene, 13 ppm Ethylbenzene, 38 ppm Xylenes, 5.8 ppm Naphthalene, 1.7 ppm Fluorene, and 2.8 ppm Phenanthrene. In November, 2 USTs were removed along with the associated piping. These soil samples were reported to have maximum concentrations of 30,000 ppm TPHd, 2,100 ppm TPHg, 9.1 ppm Benzene, 290 ppm Toluene, 52 ppm Ethylbenzene, and 350 ppm Xylenes. 1992 In January, a soil sample was reported to have been collected in the Oil Barrel Storage Area #17 and was reported to contain 350 ppm TPHg, 1,800 ppm TPHd, 0.87 ppm Toluene, 1 ppm Ethylbenzene, 5.7 ppm Xylenes, 6.8 ppm Naphthalene, 4.6 ppm Fluorene, 4 ppm Phenanthrene, and 0.6 ppm Anthracene. Over-excavation was conducted in the area of the 2 former Stoddard Solvent USTs removed in 1991. 5 soil samples were reported to have been collected from 23-25 ft bgs; however the location of the sampling was not found to be reported in the file. Low to non-detectable concentrations of TPHg, TPHss and Benzene, Toluene, Ethylbenzene and Xylenes (BTEX) were reported. Over-excavation was done in the area of the oil-water separator. 5 soil samples were collected at this time from 22 ft bgs; however the location of the sampling was not found to be reported in the file. Maximum concentrations were reported of 11 ppm TPHg, 95 ppm TPHd, 1.4 ppm Benzene, 0.045 ppm Toluene, 0.16 ppm Ethylbenzene, and 0.53 ppm Xylenes. In February, 5 soil samples were reported to have been collected from a trench excavation associated with the oil-water separator. The location of this excavation was not found to be reported in the file. Maximum concentrations were reported of 190 ppm TPHg, 220 ppm TPHd, 420 ppm TOG, 0.23 ppm Benzene, 0.48 ppm Toluene, 0.4 ppm Ethylbenzene, and 1.7 ppm Xylenes. In June, a San Jose Fire Department (SJFD) inspection noted that aboveground tanks were leaking; and extensive oil contamination was present beneath the oil pumping shed. In September, 3 USTs were removed along with associated piping. Soil samples were collected beneath the piping and the smaller USTs at depths of 3-5 ft bgs and below the larger UST at 14 ft bgs. Maximum concentrations were reported of 2,500 ppm TPHss, 1,900 ppm TPHg, 6,300 ppm TPHd, 2.2 ppm Benzene, 2.8 ppm Toluene, 3.2 ppm Ethylbenzene, and 10 ppm Xylenes. 1993 In June, 10 soil borings (B1 through B10) were advanced to depths of 20-25 ft bgs on the western portion of the site. 51 soil samples were collected and reported to contain maximum concentrations of 2,100 ppm TPHg, 45,000 ppm TPHd, 3,000 ppm TPHss, 6,200 ppm TPH as Kerosene (TPHk), 8,800 ppm TOG, 2.5 ppm Benzene, 3.4 ppm Toluene, 3.5 ppm Ethylbenzene, and 9.2 ppm Xylenes. In July, 4 monitoring wells were installed to 29.5 ft bgs onsite. 20 soil samples were collected and reported to contain maximum concentrations of 620 ppm TPHg, 16,000 ppm TPHd, 680 ppm TPHss, 2,100 ppm TPHk, 0.18 ppm Benzene, 0.24 ppm Toluene, 0.29 ppm Ethylbenzene, and 0.77 ppm Xylenes in the samples collected from 15 ft bgs in MW1 and MW2. Oil-stained soil adjacent to the 6 ASTs on the eastern portion of the property was excavated in the area of boring B11. It is not reported how much soil was removed from this unpaved area. Borings B11 and B12 were advanced in this area to depths of 14-20 ft bgs. 10 soil samples were collected and reported to contain maximum concentrations of 120 ppm TPHg, 2,200 ppm TPHd, 420 ppm TPHss, 300 ppm TPHk, 5,100 ppm TOG, and low to non-detectable concentrations of BTEX. 1994 In January and February, 25 hydropunch borings were advanced onsite to 25 ft bgs. Grab groundwater samples were collected from each boring and reported to contain maximum concentrations of 370,000 ppb TPHg, 990,000 ppb TPHd, 67,000 ppb

DRAFT

BAY AREA PETROLEUM (Continued) **S103675784**

Benzene, 66,000 ppb Toluene, 70,000 ppb Ethylbenzene, 210,000 ppb Xylenes in the sample collected from boring #14 located east of MW1. TPHk, TPHss and TPHmo were not reported to be present in any of the samples above the laboratory reporting limits. FP was reported to be present in boring #8, which was sampled and analyzed. Refer to Attachment 3 for results. Boring #8 was located to the west of well MW1. In March, a geophysical survey was conducted, which found several buried metal pipes, but no indication of an UST. These pipes were in the area of hydropunch borings #6, #8, #9, #14 and well MW1. In May, approximately 745 feet of buried piping was removed. During the piping removal, obvious soil contamination was noted throughout the excavation. The total depth of the excavation was 19-20 ft bgs coinciding with groundwater. Approximately 6,037 cubic yards of soil was removed. In June, well MW1 was destroyed in order to allow for soil excavation in the area. During excavation, approximately 2,000 gallons of groundwater was pumped out of the first phase excavation and disposed of offsite. Following completion of the excavation work, the western wall of the excavation was encapsulated with fiber-reinforced concrete (shotcrete). This was intended to prevent migration of contamination back into this area. Many soil samples were collected from various depths during the excavation work. The analytical data is presented in Attachment 3. 1998 In September, 4 fuel USTs were removed on the eastern side of the property as part of a system upgrade at the Cardlock Facility. 9 soil samples were collected from the initial tank pit from 12 ft bgs and reported to contain maximum concentrations of 280 ppm TPHg, 16,000 ppm TPHd, 0.36 ppm Benzene, 1.6 ppm Toluene, 1.6 ppm Ethylbenzene, 1.8 ppm Xylenes, and 10 ppm Methyl tert Butyl Ether (MtBE). Additional soil was removed from the tank pit, which was deepened to approximately 16 ft bgs. 3 sidewall samples were collected from 3 ft bgs and were not reported to have concentrations of the COCs present above the laboratory reporting limits. 5 additional sidewall samples were collected between 13-14 ft bgs and reported to contain maximum concentrations of 230 ppm TPHg, 3,000 ppm TPHd, and low concentrations of BTEX and MtBE. 4 samples were collected from the bottom of the excavation and reported to contain maximum concentrations of 570 ppm TPHg, 400 ppm TPHd, and low concentrations of BTEX and MtBE. Further excavation was prohibited due to the proximity of adjacent buildings and roads. Groundwater was present in the excavation and a grab sample was collected and reported to contain 5,300 ppb TPHg, 4,100 ppb TPHd, 50 ppb Benzene, 3,000 ppb Xylenes, and 34,000 ppb MtBE. 4 soil samples were collected beneath the dispensers from 4 ft bgs and reported to contain up to 50 ppm TPHg, 1,900 ppm TPHd, and low to non-detectable concentrations of BTEX and MtBE. Due to elevated concentrations under Dispenser Island 2, additional soil was removed. 3 additional soil samples were collected from 6-8 ft bgs and reported to contain maximum concentrations of 160 ppm TPHg, 3,700 ppm TPHd, and low concentrations of BTEX and MtBE. Approximately 600 cubic yards of soil were removed from the site. 2001 In March, 4 soil samples were collected beneath the dispensers and lines at the Cardlock Facility. The samples were only reported to have 2 low detections of MtBE and Tert Butyl Alcohol (TBA); all other COCs were not reported to be present above the laboratory reporting limits. 2004 In October, 10 Geoprobe borings (GB1 through GB10) were advanced to depths of 20-30 ft bgs. Boring GB1 met refusal at 10 ft bgs. 31 soil samples were collected and reported to contain maximum concentrations of 180 ppm

DRAFT

BAY AREA PETROLEUM (Continued) **S103675784**

TPHd, 64 ppm TOG, 0.026 ppm Benzene, and 0.091 ppm MtBE. All other COCs were not reported to be present above the laboratory reporting limits. 9 grab groundwater samples were collected and reported to contain maximum concentrations of 4,100 ppb TPHg, 34,000 ppb TPHd, 150 ppb Benzene, 14 ppb Toluene, 2.1 ppb Ethylbenzene, 8 ppb Xylenes, 830 ppb MtBE, 180 ppb TBA, and 0.9 ppb Tert Amyl Methyl Ether (TAME). 2011 In December, the final round of groundwater monitoring was conducted and reported maximum concentrations of 380 ppb TPHd and 6.5 ppb MtBE; all other constituents were not reported to be present above the laboratory reporting limits. No work was conducted at the site between 2012 and 2013. 2014 In August, 3 additional groundwater monitoring wells (MW5 through MW7) were installed to 25 ft bgs in the area of the Cardlock facility. 16 soil samples were collected and were reported to have maximum concentrations of 250 ppm TPHd, 0.043 ppm MtBE, and 0.0098 ppm TBA. The only detection of MtBE and TBA were in a soil sample collected from well MW6.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 554884
Site Name: Diesel Direct West - San Jose Plant
Violation Date: 04-08-2020
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 05/08/2020. Facility failed to make a waste determination on water with an oily sheen prior to its being discharged to the ground/stormwater system. Visual assessment of aqueous media potentially contaminated with gasoline or other materials containing benzene does not demonstrate that the waste does not exceed the STLC or TTLC for the constituent.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 07-28-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Met with Mr. John Weihrouch and Mr. Brad Hurley at the site. I explained to them that I wanted to conduct an inspection to include walkthrough of the site and possibly review of documents. We began the walkthrough in the "green" warehouse where I observed two 55 gallon drums holding waste absorbent pads contaminated with diesel. Both containers were properly labeled and had start dates of 2/9/2020. We then walked through the tank farm. I noted that many tanks were marked "not in use". Mr. Weihrouch noted that these tanks were tanks that Diesel Direct was not currently using, and that they had been marked as such as directed by the San Jose Fire Department. I observed that tank 17 had the lower manway cover removed, and the interior of the tank could be viewed. Mr. Weihrouch noted that Diesel Direct was only using 6 tanks right now, 5 for diesel and biodiesel products and one for Diesel Exhaust Fluid (DEF). After walking the tank farm, we entered the "brown" In this [Truncated]

Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On April 7, 2020 a complaint was received via phone message left at the HMCD office. Based n the information provided by the Complainant, I both called and texted the phone number provided in an effort to better understand the situation. On April 8, 2020, not having heard back from the complainant, I visited the site. Upon my arrival at the site, I observed a small hose emitting a liquid. At the gate to the yard, a sump of approximately 12 inches square was surrounded by cones, and in it was a submersible pump which was attached to the hose. I identified myself to Mr. Ordunez and explained that I was here because we'd received a complaint about the discharge of water with a sheen from the site. I then asked Mr. Ordunez if he would please turn off the pump, which he did. Upon stopping the pump, the water level in the sump began to rise. Additionally, water began coming out of a drain in the parking lot which is about 8-10 feet from the sump. At this time I informed [Truncated]

Eval Notes:	Onsite for follow up visit to the Sept 29, 2020 site visit with San Jose Fire Department. At this inspection were: Zuha Lambert- San Jose Fire Department; Pat O'Keefe- Golden Gate Petroleum; Tim Johnson, John Weihrouch, Brad Hurley and Ray Dacus - Diesel Direct. Inspection was scheduled as a follow up to September 29 inspection with SJ Fire, ostensibly to clear any SJ Fire issued violations and to assess the status of the site with respect to tank contents, monitoring and "ownership". Upon arrival it was noted that the poly tank (Tank 31) that previously held Diesel Exhaust Fluid (DEF) had been removed from the tank farm. Mr. Weihrouch noted that the tank had been removed from service due to response to the tank leaking, and that the contents of the tank had been transferred to totes which were currently being stored in the "green" warehouse. The tank was later noted being stored in an area behind the tank farm. Mr. Weihrouch also noted that the site had updated its [Truncated]

Violations:
Site ID: 401355
Site Name: Golden Gate Petroleum - San Jose Plant
Violation Date: 04-03-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/17/2018. Facility has been notified on 12/15/2016 and 2/20/2017 that its inventory statement is incomplete/incorrect. Per Mr. HUrley, have been having coordination and communication problems with third party vendor. Some obvious problems noted: USTs 2,3,4 contents are not accounted for. Warehouse "G" is noted as storing ASTs as large as 84000 gallons, when actually it held approximately 24,000 gal of lube in 275 gallon totes.
Violation Division: Santa Clara County Environmental Health

Site Name: Golden Gate Petroleum - San Jose Plant
Violation Date: 05-08-2014
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste

DRAFT

GOLDEN GATE PETROLEUM - SAN JOSE PLANT (Continued) **S121775565**

training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 06/03/2014. THE GENERAL CONDITIONS OBSERVED THROUGHOUT THIS FACILITY, INTERIOR AND EXTERIOR AREAS, SHOWS THAT THERE IS A GENERAL LACK OF HAZARDOUS WASTE MANAGEMENT TRAINING. TRAINING FOR THE INDIVIDUALS RESPONSIBLE FOR, AND WORKING WITH, HAZARDOUS WASTES SHALL HAVE APPROPRIATE HAZARDOUS WASTE TRAINING. RECORDS SHALL BE KEPT OF THIS TRAINING AND AVAILABLE FOR REVIEW BY THIS OFFICE WHEN REQUESTED.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 401355
Site Name: Golden Gate Petroleum - San Jose Plant
Violation Date: 05-08-2014
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/03/2014. IN THE LOADING DOCK/RAISED PLATFORM AREA, A PLASTIC "DISH TUB" WAS OBSERVED WITH 2 - 3 GALLONS OF OILY LIQUID OR FUEL WITH PAPER RAGS SOAKING IN THE LIQUID. THIS WAS SUSPECTED TO BE FROM A TRUCK DRIVER THAT REMOVED IT FROM A VEHICLE OR TRANSFER LINES ON A VEHICLE. THIS WAS WITHOUT A LABEL AND NOT IDENTIFIED IN ANY OBVIOUS WAY. THIS WAS DETERMINED TO BE HAZARDOUS WASTE BY GARY ROWE AND BRAD HURLEY, AND WAS TO BE MANAGED AS SUCH.

Violation Description: Failure to operate the UST system to prevent spills and/or overfills.
Violation Notes: Returned to compliance on 06/15/2016. Tank 1 is storing B20 Biodiesel without approval. Storage of Biodiesel blends greater than 5% Biodiesel (i.e., B5 Biodiesel) is prohibited since the tank does not have third-party approval for such storage, and the tank manufacturer (Trusco) has not provided Affirmative Statement of Compatibility information for such storage. Cease underground storage of B20 within 30 days. If you want to store B20 underground, you will need to install a new UST system.

Violation Date:	04-03-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	275 gallon tote with 15/40 label on it, half full, not stored or manged in manner consistent with any other product or commodity onsite behind the tank farm. White 5 gallon bucket marked "cleaner" in brown building, unknown if materials or waste per Mr. Garcia. Facility has identified mixtures of diesel and lube or diesel and gasoline (mis-dispensed at customer site) are considered "transmix" by the facility. Per Mr. Garcia, these mixtures are shipped to a facility in Nevada for "splitting". Please explain why this material is exempt from regulation as it does not appear to meet the conditions of HSC 25250.3 that would exempt the material/waste from regulation. It does appear to meet the definition of a "contaminated petroleum product" as defined in 25250.1(a)(7). It does not appear to meet the 40 CFR 80.84 definition of transmix either.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Inspection of overfill prevention equipment was required by 10/13/2018 and did not occur until 7/8/19. Schedule the next overfill prevention equipment inspection to occur in or before October of 2021 to reestablish required test frequency. Recommend that it be done at time of 2021 monitoring system certification and spill containment testing.

	Disposal/Unauthorized Treatment - General
Violation Notes:	Returned to compliance on 04/20/2017. Noted the following wastes onsite which were not generated by the site: At the drum loading area, one 55 gallon black steel drum which still contained a couple of gallons of oil. Mr. Garcia noted that "empty" drums were often picked up from customers and were transferred to Container Management for processing/reconditioning. This drum was accepted from a customer and brought back to the yard but is not empty per California regulations. Observed a two chambered green steel tank behind the tank farm. One chamber of the tank was opened and had liquid in it which had a strong solvent odor. The other chamber of the tank was opened and it was observed as holding used oil with 5-6 used oil filters sitting in it. Behind brown building, observed a 5 gallon yellow bucket which contained approximately 2 gallons of liquid that smelled of gasoline. Facility does not use, manage or distribute gasoline except from the underground storage tanks at the other end of the plant. Mr. [Truncated]

Citation: 22 CCR 12 66262.34(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(a)
Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes: Returned to compliance on 06/14/2016. Review of 2015 and 2016 hazardous waste shipping records shows that generation of used oil shows that this facility frequently generates more than 1,000 kilograms of hazardous waste per month, thus making it a Large Quantity Generator (LQG). In Warehouse, observed 1 x 55 gallon drum of "Waste Blast Sand" labeled as hazardous waste with an accumulation start date of 10/20/2015. Observed numerous containers holding Petroleum "Materials for Recycle" that have been accumulated longer than the 90 days allowed by this facility's LQG generator status and by the Consent Order (e.g. 55 gallon blue drums near the office labeled as holding Red Diesel and dated 2/12/2015, 12/28/2015, and the Clear Diesel drum dated 2014.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Inspection began on 5/25/2016 with facility walk-through and limited review of records, and concluded today. The most recent underground storage tank (UST) information for this facility was electronically submitted via the California Environmental Reporting System (CERS) website for CERS ID 10453327 on 3/16/2016 @ 1:03PM. Notes: 1. Also present during inspection on 5/25/2016 was inspector Andrew Dyer. 2. Per Al Garcia and Brad Hurley, the operator of this facility and its USTs is Golden Gate Petroleum Company. The property is still owned by Bay Area Diablo Petroleum Company (all shares of Bay Area Diablo Petroleum Company are owned by Golden Gate Petroleum Company). It is not clear at this time which entity owns the USTs. 3. The facility's current Designated UST Operator is Kathy Kotulak (ICC cert. #5240722, exp. 7/28/2016).

Violation Date: 09-20-2018
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes: Returned to compliance on 09/25/2018. The inspection tag attached to the emergency eye wash/safety shower shows the last inspection was completed on 4/16/15. A layer of dust was observed on the eye wash station indicating it has not been serviced in a while.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 150589
Site Name: SAN JOSE FORKLIFT REPAIR

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Observed the following hazardous materials at or above HMBP state-reportable thresholds onsite: Motor oil 10-W40, 55 gallons Motor oil 10-w30, 3 x 55 gallons Round up, 2 x 30 gallons Used oil, 3 x 55 gallons (currently empty) Employees receive training on safety procedures in the event of a release or threatened release of a hazardous material. Training is provided throughout the year in weekly and monthly training sessions. Recommend keeping a separate training log for HMBP training. Facility has notified the property owner in writing that they are subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-08-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: This inspection began on 1/3/19 and concluded today. EPA ID: CAL000408977 is active. Observed the following hazardous wastes onsite: Used oil, 3 x 55 gallons (currently empty) Used filters, 1 x 30 gallons Observed emergency response equipment including fire extinguishers and spill absorbent. Hazardous waste storage area is inspected at least weekly. Facility currently does not use a shop towel commercial laundering service. Used paper towels and used absorbent are disposed to the regular trash. Heavily soiled towels and

DRAFT

GACHINA LANDSCAPE MANAGEMENT (Continued) **S105086717**

absorbent must be disposed of as hazardous waste.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-13-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Provided the following documents: - Flyer for Santa Clara County free hazardous waste management class. - Small Automotive Repair Facility Requirements guidance. - Emergency Procedures poster.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-13-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Observed the following hazardous materials: Roundup, 55 gal Prosecutor, 55 gal new oil, 55 gal used oil, 4 x 55 gal waste antifreeze, 55 gal used filters, 2 x 55 gal gear oil, 2 x 5 gal hydraulic oil, 2 x 5 gal CO2/Argon, 2 x 87 cuft gasoline, 5 + 2 gal 50 pound bags of fertilizers: Dimension, Ammonium sulfate, Triple Pro, 3900; various amounts Provided flyer for Santa Clara County free HMBP class. Based on inspection PE code should be BP03; permit will be updated.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-01-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Site visit to conduct Hazardous Materials Business Plan (HMBP) inspection. Completed walkthrough and paperwork review with the Branch Administrator, Nancy Marez. Business operation consists of landscape management with vehicle/equipment maintenance performed on site. Property owner notification was verified during last inspection. Most recent HMBP submittal was on 8/21/2018 via CERS (CERS ID 10354690). Based on observed chemical inventory, the facility is eligible for a permit change from BP02 (4-6 chemicals) to BP01 (1-3 chemicals). The following reportable chemicals were observed: 1) 6500lbs of fertilizer 2) 55 gallons of used coolant 3) 165 gallons of used oil The following chemicals were observed below reporting thresholds: used oil filters, 55 gallons of 10w-40 oil, 55 gallons of 5w-30 oil, 110 gallons of EcoMight herbicide (irritant), and 30 gallons of glyphosate (herbicide)

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site Name:	WATTIS CONSTRUCTION CO
Violation Date:	03-25-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	. The 91 Octane Tank did not pass.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 04/16/2018. Observed the following: 1 x 55 gal drum used coolant marked with a label indicating accumulation start date of 1/20/2016. 1 x 55 gal drum waste solids with no accumulation start date on the label. Last pick-up receipt was dated 5/27/16.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DRAFT

PROGRESSIVE COLLISION REPAIR (Continued) **S123102898**

12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 10/01/2018. Facility disposes of solid paint contaminated materials (masking paper, paint cup filters, and paper towels) in the trash. Also, facility has the potential to generate contaminated rags and absorbent but does not have a procedure on how these wastes will be managed. Additionally, facility has no disposal documentation for waste paint booth filters. It is unclear how this waste stream is being managed. Provide information on determinations made for each waste.
Violation Division: Santa Clara County Environmental Health

Citation: HSC 6.5 25189.5(a),25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a),25201(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.
Violation Notes: Returned to compliance on 10/01/2018. Observed 3 paint cups in the dumpster and trash cans in the shop that contained free-flowing amounts of waste paints. Facility has a standard practice of drying paint cups in the sun and disposing of the solid paint pucks in the trash. Also observed several fully dried and partially dried paint pucks in the dumpster and in the trash cans in shop.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-14-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Robin Ward of HMCD to perform a Hazardous Waste Generator) inspection. Progressive Collision Repair does auto body work and painting. A walk-through of the facility was conducted with Manager, Mark Simoni. The following hazardous waste streams were observed: - Used Oil: 2 x 30 gal drums + approx. 10 x 1 gal jugs + 1 x 15 gal roller - Waste Water-based Paint: 2 x 30 gal drums - Waste Paint Thinner:3 x 5 gal containers + 1 x 30 gal drum - Solid Paint Waste Materials (filters, cups) - Used Coolant: 1 x 30 gal drum Notes: EPA ID: CAL000364480 is inactive. Facility has one paint booth and five paint guns and a paint gun cleaner. Per Mr. Simoni, paint booth filters are changed out weekly by the paint booth company. Mr. Simoni stated that they no longer use a commercial laundering service for rags. A stepcan was observed to collect them in, but it was empty.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID: 64211
Site Name: SALVATION ARMY
Violation Date: 08-30-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: None of the containers holding hazardous waste in the hazardous waste accumulation area had the required markings. See Comments section for hazardous waste containers observed. Within 30 days, ensure all hazardous waste containers are properly marked.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Violation Source: CERS,

Site ID: 64211
Site Name: SALVATION ARMY
Violation Date: 09-02-2014
Citation: 23 CCR 16 2638 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638
Violation Description: Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test
Violation Notes: Returned to compliance on 10/08/2014.

Facility did not have the UST monitoring system tested within 12 months. Ensure the testing is done in August every year. I recommend you contact your testing company to schedule the testing for early in August to avoid scheduling issues that may arise at the end of the month.

SALVATION ARMY (Continued) **1000429539**

Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	None of the containers holding hazardous waste in the hazardous waste accumulation area were able to be closed. See comments section for hazardous waste containers observed. Within 30 days, ensure all hazardous waste containers have lids and are able to be closed completely when wastes are not actively being added or removed.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	64211
Site Name:	SALVATION ARMY
Violation Date:	08-30-2021
Citation:	HSC 6.5 25163(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25163(a)
Violation Description:	Failure to use a DTSC registered hazardous waste transporter to transport hazardous waste.
Violation Notes:	Based on the hazardous wastes observed today, facility is a small quantity hazardous waste generator (SQG), generating at least 100 kg of hazardous waste per month. According to Driver David Scott, he transports the hazardous wastes to Santa Clara County's HHW Drop-Off site on Las Plumas Av. in San Jose approximately every 1-2 months. As a SQG, facility is not eligible to self-transport hazardous wastes to a household hazardous waste (HHW) site. Hazardous wastes must be picked up by a registered hazardous waste hauler at least every 180 days.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	64211
Site Name:	SALVATION ARMY
Violation Date:	08-30-2021
Citation:	23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description:	Failure to have an approved UST Monitoring Plan.
Violation Notes:	Returned to compliance on 09/10/2021. The UST Monitoring Plan most recently submitted to CERS on 8/28/2017 contains the following deficiencies: 1) "UDC Panel #" needs to be updated to "TLS-350" 2) "Suction Piping Meets Exemption Criteria" needs to be updated to "YES" 3) The first and second contacts under "Personnel Responsibilities" need to be updated. Jonathan Frederick and Captain John Desplancke are no longer the first and second persons having responsibility. NOTE: THIS VIOLATION HAS BEEN ESCALATED FROM MINOR TO CLASS II, AS IT HAS NOW BEEN CITED FOR THE 5TH CONSECUTIVE YEAR.

Site Name: SALVATION ARMY
Violation Date: 08-20-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 09/10/2021. THE FOLLOWING MONTHLY DESIGNATED INSPECTIONS WERE NOT AVAILABLE FOR REVIEW: -AUGUST 2018 -SEPTEMBER 2018 -OCTOBER 2018 -NOVEMBER 2018 OWNER/OPERATOR FAILED TO RESPOND TO ISSUES IN SECTION V FOR THE FOLLOWING MONTHS: -DECEMBER 12, 2019 -JANUARY 9, 2019

Citation: 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Description: Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.
Violation Notes: Facility is a small quantity hazardous waste generator (SQG), generating at least 100 kg of hazardous waste per month, however Driver David Scott stated that he transports the hazardous wastes to Santa Clara County's HHW Drop-Off site on Las Plumas Av. in San Jose approximately every 1-2 months, and no disposal documentation is utilized. As a SQG, facility is not eligible to self-transport hazardous wastes to a household hazardous waste (HHW) site. Hazardous wastes must be picked up by a registered hazardous waste hauler at least every 180 days, using uniform hazardous waste manifests.

Violation Description: Failure of the universal waste handler to initially train and provide annually, thereafter, all personnel who manage or who supervise those who manage universal wastes and to maintain a written record by date indicating the names of personnel who received the information. The universal waste handler shall maintain these records for at least three years from the date the person last managed any universal waste at the facility. This training shall include: 1) The types and hazards associated with the universal waste that personnel may manage at the facility; 2) The proper disposition of universal wastes managed at the facility; 3) The proper procedures for responding to releases of universal wastes including the position titles and the means of contacting those personnel at the facility who are designated to respond to reports of releases and/or to respond to questions received from other personnel at the facility; and 4) The applicable requirements of universal waste regarding labeling, collecting, handling, consolidating, and shipping universal wastes at the facility, including, but not limited to, the prohibition on the disposal of universal wastes, and for personnel involved in shipping universal wastes who are hazmat employees .
Violation Notes: Returned to compliance on 09/03/2014.

Universal Waste handlers are trained more than one time per year, but records are not being kept of the training. Begin documenting the trainings done and retain the records as noted below.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: None of the containers holding hazardous waste in the hazardous waste accumulation area had the required markings. See Comments section for hazardous waste containers observed. Within 30 days, ensure all hazardous waste containers are properly marked.

Site Name: SALVATION ARMY
Violation Date: 09-02-2014
Citation: 23 CCR 16 2638 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638
Violation Description: Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test
Violation Notes: Returned to compliance on 10/08/2014.

Facility did not have the UST monitoring system tested within 12 months. Ensure the testing is done in August every year. I recommend you contact your testing company to schedule the testing for early in August to avoid scheduling issues that may arise at the end of the month.

Violation Date: 08-30-2021
Citation: HSC 6.5 25163(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25163(a)
Violation Description: Failure to use a DTSC registered hazardous waste transporter to transport hazardous waste.
Violation Notes: Based on the hazardous wastes observed today, facility is a small quantity hazardous waste generator (SQG), generating at least 100 kg of hazardous waste per month. According to Driver David Scott, he transports the hazardous wastes to Santa Clara County's HHW Drop-Off site on Las Plumas Av. in San Jose approximately every 1-2 months. As a SQG, facility is not eligible to self-transport hazardous wastes to a household hazardous waste (HHW) site. Hazardous wastes must be picked up by a registered hazardous waste hauler at least every 180 days.

Violation Description: For designated operator (DO) monthly inspections conducted before

DRAFT

SALVATION ARMY (Continued) **1000429539**

October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 09/10/2021. THE FOLLOWING MONTHLY DESIGNATED INSPECTIONS WERE NOT AVAILABLE FOR REVIEW: -AUGUST 2018 -SEPTEMBER 2018 -OCTOBER 2018 -NOVEMBER 2018 OWNER/OPERATOR FAILED TO RESPOND TO ISSUES IN SECTION V FOR THE FOLLOWING MONTHS: -DECEMBER 12, 2019 -JANUARY 9, 2019

WILLIAMS MANUFACTURING (FORMER) (Continued) **S127518669**

RB Case Number: 43S1112
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: The Williams Manufacturing Facility encompasses 560 - 595 Emory Street and 790 Chestnut Street parcels. The site is a former metal stamping facility family owned and operated since 1942. The facility ceased operations in 2003. The site comprises several buildings on either side of Emory Street and is rented to different commercial/industrial users. Soil, soil vapor, and GW sampling results show elevated concentrations of TPG and VOCs (PCE & TCE) are present in all media. 790 Chestnut Street property- a former UST at this location; that case (43-3139) was closed in December 2008. Partial closure by RWQCB for the 760 Emory Street parcel - NFA letter 6/30/2014 (APN 259-09-020). One groundwater monitoring well MW-1 and 16 soil vapor extraction wells were decommissioned in October 2014. The NW corner of Chestnut and Emory St. remains open for solvent release; additional site characterization and recommendations for corrective action are required. Phase II Environmental Site Assessment for the property located at 561- 595 Emory Street (1-ac) was conducted in 2015; elevated concentrations of TCE up to 1,200 ug/L in the GW sample (B-1).

Click here to access the California GeoTracker records for this facility:

DU-ALL ANODIZING DBA GMP PLATING INC. (Continued) **S123737511**

Eval Type: Routine done by local agency
Eval Notes: On-site for a routine excluded recyclable material inspection. The facility operates a wastewater treatment system (see Permit by Rule Inspection Report) and a portion of the treated wastewater is reclaimed and re-used as "clean" rinse water pursuant to HSC 25143.2(d)(6). NOTES: - Tanks that reclaim the recyclable rinsewater are inspected daily and the inspections are logged. - A flow meter is installed on the ancillary piping that returns the reclaimed rinsewater to the rinsewater baths. The flow meter volumes are logged in the daily inspection log. RECOMMEND ACQUIRING ADDITIONAL INFORMATION AS TO WHAT "TTL1" AND "TTL2" REFER TO ON THE FLOW METER, SO A MORE DETAILED RECORD OF RECYCLABLE MATERIAL COMPLIANCE CAN BE MAINTAINED [HSC 25143.2(f)].
Eval Division: Santa Clara County Environmental Health
Eval Program: HWRecycler
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-08-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: CERS ID 10355425. No submittals as of 6/8/15. Noted materials in baths in processing area as well as the following materials, all of which need to be reported on inventory: 1000 lb waste sludge 55 gal phosphoric acid containing triple clean 55 gal chem alum deox (nitric/HF) 55 Bonderite (Alumaseal) 55 ferrous sulfate 55 polymer (diluted) 60 Sodium hydroxide 60 sulfuric acid

Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 06-08-2015
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility noted as being subject to PBR in 2012. In 2014 determined to be recycling, and no longer regulated under PBR. Facility requested "delayed closure" of the PBR unit to allow for continued use. AS A FACILITY WHICH HAD A WASTE TREATMENT UNIT THAT WAS REGULATED UNDER PBR, YOU MUST ENSURE THAT AT THE TIME OF CLOSURE THAT ALL PBR CONDITIONS ARE MET FOR THE CLOSURE OF THE UNIT. THIS INCLUDES FOLLOWING THE CLOSURE PLAN, APPLYING FOR A PERMIT WITH DEH FOR CLOSURE OF A PBR UNIT AND SIGN-OFF OF THE CLOSURE OF THE UNIT BY A CERTIFIED INDEPENDENT PE.
Eval Division: Santa Clara County Environmental Health

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. The facility is an aluminum parts anodizer that conducts Type II, passivation, chemical film processes. The facility generates between 11-12,000 gallons of hazardous waste per month from corrosive rinsewaters and wet floor aqueous wastes. All hazardous waste is "immediately" treated in an on-site hazardous waste treatment system and is excluded from RCRA waste counting per 40 CFR 261.5(c)(2), but is counted when determining California ("non-RCRA") generator status. Therefore, the facility is a non-RCRA large quantity generator. The following hazardous wastes are accumulating at the time of inspection: - 2 x 55 gallon drums of wastewater treatment sludge (Accumulation Dates: 8/13/2016, 10/8/2016) - 1 x approximately 8 gallon container accumulating filter press sludge (Empty Daily) - 1 x 600 gallon wastewater treatment tank (elementary neutralization) NOTES: - Sludge waste generated from on-site treatment [Truncated]

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine inspection of an on-site hazardous waste treatment system deemed to have a Permit by Rule (PBR). Wastewaters generated from the rinsewater wastes, container rinsing residuals, and "wet floor" aqueous wastes are automatically directed to treatment system for on-site treatment. The "in-use" rinsewater baths were pH strip tested during the inspection: acidic rinsewater bath's pH = 1-2, caustic rinsewater bath's pH = 11-12, soap rinsewater bath's pH = 6-7. Two Fixed Treatment Units (FTUs) operate under Permit by Rule: All wastestreams* are combined and directed to Unit 1, "Mixer Tank," for elementary neutralization batch treatment (FTU "Unit 1"). The pH of the influent wastewater is monitored by a continuous pH meter and logged on a chart recorder. Depending on the pH of the influent wastewater, the wastewater is automatically neutralized with 30% sodium hydroxide or 50% sulfuric acid. *55 gallon drums are triple rinsed for the purpose of [Truncated]

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 89672
Site Name: ACURA-HONDA CONNECTION
Violation Date: 04-24-2015
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 05/21/2015. Facility does not have records of hazardous waste training.

inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 06/29/2021. 1.) As per CERS submittal dated 8/27/2020, the facility incorrectly checked the five federal hazard categories marked as obsolete and failed to check any of the new federal hazard categories that are applicable for all inventory items. Additionally, the facility was advised the following through their CERS account regarding this submission: "Conditionally accepted as administratively complete, however, please note that any future submittal must be revised to include the new federal hazard categories adopted by Cal EPA. Any submittal that do not include these will be rejected." The new hazard categories were adopted by CalEPA on December 28, 2017 and are required to be used effective 1/1/2018. 2.) Facility failed to include all acetylene on-site in recent CERS inventory submittal. Observed 2 x acetylene tanks in tire storage container, totaling 460 cubic feet. CERS Inventory only included 214 cubic feet of acetylene. *Note: As per facility, these tanks are empty but [Truncated]

Violation Date:	03-20-2019
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	Returned to compliance on 04/03/2019. EPA ID number CAL000351272 is "Inactive" on the hazardous waste tracking system.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	145455
Site Name:	Q - WEST AUTO SERVICE
Violation Date:	03-20-2019
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at

DRAFT

Q - WEST AUTO SERVICE (Continued) **S103473031**

a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 06/04/2019. The following waste containers had faded hazardous waste labeling on the outside of the containers: 2 x 20-gallon used oil carousels.

CHESTNUT STREET (Continued) **S108195956**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 04/22/2015
Comments: The Upgradient Groundwater Investigation Workplan outlines a scope of work primarily for the purpose of determining the presence or absence of volatile organic compounds upgradient of the Site. The scope of work consists of three mobilizations along three subsurface boring transects (upgradient, along Asbury Street and Coleman Avenue). The August 29, 2014 Workplan was modified by a March 17, 2015 Response to Comments document submitted by ARCADIS to address DTSC's comments on the Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 06/19/2015
Comments: The field investigation activities included in the Upgradient Groundwater Investigation Workplan were started on June 19, 2015.

Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 06/12/2015
Comments: A work notice was distributed to inform the community about drilling and groundwater sampling to be conducted at 22 locations along Asbury Street and Coleman Avenue, and which was to scheduled to begin on June 19, 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/07/2016
Comments: The Additional Soil Vapor Investigation Work Plan outlines additional investigation activities to delineate the occurrence and concentrations of volatile organic compounds in shallow soil vapor near occupied properties across Chestnut Street, immediately east of the site. The additional investigation activities include the installation of four additional nested soil vapor probes, with two to three probes in each boring. An additional round of soil vapor sampling is to be performed in 32 existing soil vapor probes (16 locations at 2 depths) and in the new soil vapor probes that are to be installed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/14/2017

Comments: The field investigation activities included in the Upgradient

DRAFT

CHESTNUT STREET (Continued) **S108195956**

Groundwater Investigation Workplan were started on June 19, 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 06/12/2015
Comments: A work notice was distributed to inform the community about drilling and groundwater sampling to be conducted at 22 locations along Asbury Street and Coleman Avenue, and which was to scheduled to begin on June 19, 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/07/2016
Comments: The Additional Soil Vapor Investigation Work Plan outlines additional investigation activities to delineate the occurrence and concentrations of volatile organic compounds in shallow soil vapor near occupied properties across Chestnut Street, immediately east of the site. The additional investigation activities include the installation of four additional nested soil vapor probes, with two to three probes in each boring. An additional round of soil vapor sampling is to be performed in 32 existing soil vapor probes (16 locations at 2 depths) and in the new soil vapor probes that are to be installed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/14/2017
Comments: Soil gas sampling that was included in scope of the Additional Soil Vapor Investigation Work Plan approved by DTSC on July 7, 2016 was completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 01/17/2017
Comments: Work notice providing for the soil gas and groundwater sampling that is to take place for 4-5 weeks starting at the end of January 2017.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 02/02/2016
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/15/2014
Comments: DTSC letter with oversight cost estimate for fiscal year 2014/2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/18/2013

DRAFT

CHESTNUT STREET (Continued) **S108195956**

Comments: Cost estimate letter sent to RP.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 12/22/2017
Comments: Cone penetrometer testing was performed at the site. The work was associated with the Downgradient Groundwater Investigation Work Plan. The vertical aquifer profiling included in the Work Plan is to take place in 2018.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

DRAFT

CHESTNUT STREET (Continued) **S108195956**

Completed Document Type: Fieldwork
Completed Date: 08/25/2020
Comments: Fieldwork along Coleman Avenue has been completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 05/25/2021
Comments: Arcadis and Union Pacific submitted a Public Participation Plan to outline their public outreach activities. As this project is not yet at the remedy decision document stage and ready for public comment, DTSC has not reviewed this plan and will likely revise this document when we approach the public comment period.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-04-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Facility had less than HMBP threshold quantities of any hazardous materials onsite during this inspection. Observed the following hazardous materials onsite: Used oil, 30 gallons Waste antifreeze, 30 gallons Waste solids (absorbent, sanding dust, used paint mix cups), 30 gallon drum Argon, 2 x 173 cuft The Hazardous Materials Business Plan (HMBP) submitted via the CERS website was reviewed. Reviewed HMBP training records on safety procedures in the event of a release or threatened release of a hazardous material. Contact our office if you do not intend to have HMBP threshold quantities of any hazardous materials and would like to be removed from the HMBP program for this facility.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-04-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	This inspection began on 5/2/18 and concluded today. Observed the following hazardous wastes onsite: Used oil, 30 gallons Waste antifreeze, 30 gallons Waste solids (absorbent, sanding dust, used paint mix cups), 30 gallon drum EPA ID # CAL000349823 is active. Observed emergency response equipment including fire extinguishers and spill absorbent. Emergency information is posted. Hazardous waste manifests were reviewed. Hazardous waste storage area is inspected at least weekly. Training is provided on proper hazardous waste handling for employees responsible for hazardous waste management.
Eval Division:	Santa Clara County Environmental Health

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Worker:	TLF
RB Case Number:	14-217
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E07E04f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	During the decommissioning of the Site buildings in March 2004, two 1,000 gallon, single-walled, steel USTs and product piping were discovered in the front portion of the Site near the former automotive shop building. No evidence of dispensers or dispenser islands was observed in the vicinity. USTs and piping removal activities took place in 2004.In a previous investigation it is noted that in 1991 a 1,000 gallon waste oil UST was removed. In February and April 1998, two investigations were conducted. A total of nine borings were advanced at the Site in the vicinity of the former waste oil UST to a maximum of 15 and 16 ft bgs for the collection of soil and grab groundwater samples. The investigation reports concluded that soil and groundwater contamination was present throughout the investigation area, and that an unknown source may be present to the south of the former waste oil UST. In June and July 1999, a geophysical survey was conducted to assess the site for the potential presence of unidentified USTs and associated piping and other underground conduits. Due to the presence of clay , the GPR signal could only penetrate to a depth of 3 ft bgs. In September 1999, a soil gas survey was conducted at the site and on a portion of the adjoining property the southeast . A total of 20 borings were advanced to depths ranging from appear. 4 to 8 ft bgs. The report concluded that an unknown or off-site source may exist to the south or southwest of the former waste oil UST. In October 1999 and May 2000, two soil and groundwater investigations were performed. A total of 17 borings were advanced at maximum depths ranging from 20 to 25 ft bgs for the collection of soil and grab groundwater samples. Seven of the borings were completed as monitoring wells MM-1 through MM-7. The investigation reports concluded that soil and groundwater contamination in the southwestern portion of the site appeared to have originated from an unknown source, and soil and groundwater contamination in the northeastern portion of the site appeared to have originated from various sources including the former waste oil UST, the former ASTs and possibly an unknown upgradient off-site source. The groundwater monitoring program at the site was implemented in October 1999 on a quarterly basis using wells, MM-1, MM-2 and MM-3. The monitoring program was expended in June 2000 to include additional wells MM-4, MM-5, MM-6 and MM-7. In January 2003, the frequency of the groundwater monitoring program was reduced to semi-annual. As part of closure of two single-walled UST in 2004, four confirmation soil samples were collected and concluded that petroleum impacted soil was present within the excavation. Soil and groundwater sampling was conducted in June 2005, and included advancing 16 borings and advancing one boring using direct-push drilling methods for the installation of a temporary well to evaluate the presence of petroleum hydrocarbons in the groundwater in the vicinity of monitoring well MM-2, which was inadvertently buried in May 2004 during construction activities at the site. Findings are as follow: at a depth of 8 to 8.5 ft bgs, concentrations of petroleum hydrocarbons, particularly benzene and TPPHg in soil were confined to

DRAFT

E-Z AUTO AND TRANSMISSION (Continued) **S102429031**

an area measuring 30 ft wide and 60 ft long and between the depths of 11 to 13 ft bgs (smear zone), concentrations of petroleum hydrocarbons, particularly TPPHg in soil were dispersed horizontally and, to a lesser degree, vertically as the petroleum hydrocarbon interacted with the fluctuating water table. Over-excavation activities conducted in 2005 focused on a 30 by 60 foot area to a depth of 13 ft. Approximately 400 cubic yards of petroleum impacted soil were removed. Elevated concentrations of petroleum hydrocarbon constituents, notably benzene at a concentration of 630 ppb and TPPHg at a concentration of 10,000 ppb, were detected in the grab groundwater sample from temporary well TW-1. The case is being reviewed and request for closure is being evaluated.

Violation Date:	05-02-2019
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	This facility does not have an EPA ID number. As per Mr. Lopez, he has not disposed of any hazardous waste. I observed Mr. Lopez generating a small amount of paint waste solvent to clean the paint gun into a 5 gallon container. He stated that he has yet to need to dispose of this waste solvent. Instructions on how to active this number was provided to the facility during the inspection. Do not transport any hazardous waste until the EPA ID number has been activated. Log on to https://hwts.dtsc.ca.gov to verify.

Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	05-02-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Conducted a Hazardous Waste Generator Inspection with Allen Huerta from Hazardous Materials Compliance Division. This facility is a small auto body and was observed generating the following hazardous wastes: -Paint booth filters -Paint solvent waste -Used oil Inspected interior and exterior of facility and trash cans. The facility owner indicated that employees receive training and demonstrate that they are thoroughly familiar with proper hazardous waste management. Emergency equipment was available for use and fire extinguishers are annually serviced. The facility uses shop towels for any clean ups and disposes

DRAFT

ALBERTO'S AUTO BODY (Continued) **S121474183**

of them in the trash. I observed shop towels to be lightly used and then disposed of in the trash. They participate in a battery core exchange program. Based on the observed waste generation amount, the facility is a conditionally exempt small quantity hazardous waste generator. The following violations were corrected at the time of [Truncated]

Site Name: MIDWAY AUTO REPAIR
Violation Date: 02-05-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 05/02/2019. Site has been notified of need to submit a HMBP on 7/7/2015 via notice of inspection and on 9/9/16 via letter. NO HMBP has been established or submitted to date. The facility needs to disclose the storage of 250 gallons of used motor oil and 55 gallons of used antifreeze. Once complete, a copy should be provided to the landlord/property owner and annual training on emergency response needs to be logged/documented.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 375260
Site Name: MIDWAY AUTO REPAIR
Violation Date: 02-05-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Per Mr. Jalali, 55 gallon drum of used antifreeze has been accumulating for more than one year.
