SHARON'S AUTO REPAIR (Continued) **S121790169**

Site Name: SHARON'S AUTO REPAIR
Violation Date: 05-14-2015
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 07/21/2015. Facility last certified their HMBP in 2011. Submit a complete HMBP on CERS. Ensure all three HMBP sections (Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans) are submitted annually to re-certify the HMBP.
Violation Division: Santa Clara County Environmental Health

SHARON'S AUTO REPAIR (Continued) **S121790169**

Eval Type: Routine done by local agency
Eval Notes: Conducted a Hazardous Waste Generator Inspection with Ray Maiden from this Department. State EPA ID CAL913313558 is currently inactive. This facility is an automotive repair shop and was observed during the inspection or have the potential to generate the following wastes: -Used oil -Used antifreeze -Used drained oil filter (metal) -Used oil filters (paper/plastic) -Parts washer solvent Inspected interior and exterior of facility and trash cans. Inspection included review of all available hazardous waste disposal receipts from last 3 years. The facility owner demonstrated that she is thoroughly familiar with proper hazardous waste management. Emergency information posting was available, emergency equipment was available for use and fire extinguishers are annually inspected. The facility uses a commercial laundry service for their rags and uniforms. They participate in a battery core exchange program with Interstate. Based on the observed waste [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-09-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted a Hazardous Materials Business Plan (HMBP) Routine Inspection with Ray Maiden from this Department. The last HMBP was submitted on 9/4/2018 via Front Counter. CERS ID 10354888. There are no additional employees besides the Owner, Sharon Smith. The following reportable hazardous materials were observed during the inspection: 1.) 55 gallons of used oil Note: Based on the frequency of oil changes, the inspector recommends reducing the used oil and the used antifreeze containers to below 55 gallons each in order to no longer be applicable to the HMBP permit program. If this reduction is accomplished, contact the inspector to schedule a follow up inspection at ashley.ryder@cep.sccgov.org.

CERS:
Name: AIRPORT EXPRESS RENT-A-CAR
Address: 711 COLEMAN AV
City,State,Zip: SAN JOSE, CA 95110
Site ID: 3724
CERS ID: 10355365
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 3724
Site Name: AIRPORT EXPRESS RENT-A-CAR
Violation Date: 03-20-2014
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/24/2014. OBSERVED TWO 55-GALLON DRUMS AND ONE 20-GALLON ROLLER OF USED OIL STORED INSIDE THE SHOP THAT DID NOT HAVE THE REQUIRED HAZARDOUS WASTE LABELS. THE HAZARDOUS WASTE LABEL ON THE WASTE COOLANT DRUM IS MISSING THE NAME AND ADDRESS OF GENERATOR, COMPOSITION, PHYSICAL STATE, AND HAZARDOUS PROPERTIES OF THE WASTE. COMPLETE THE HAZARDOUS WASTE LABELS AS REQUIRED AND ATTACH TO THE CONTAINERS.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 3724
Site Name: AIRPORT EXPRESS RENT-A-CAR
Violation Date: 05-29-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 06/26/2018. Per Jesus Vega, the last pick up for used oil and shop towels (disposed of as hazardous waste) was 10/21/16.

Violation Program: HMRRP
Violation Source: CERS,

Site ID: 40884
Site Name: K & C TRANSMISSION
Violation Date: 04-28-2016
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: Returned to compliance on 06/01/2016. Observed 1x55 gallon open container holding used fuel filters. Ensure all containers are tightly closed.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-28-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection conducted with Joanne Tracey. Facility has the following reportable quantities of hazardous materials: 2x55 gallons of used oil Approximately 200 cf of oxygen gas The facility has the following non-reportable quantities of hazardous materials: - misc. latex paints

DRAFT

K & C TRANSMISSION (Continued) **S112984161**

- misc floor cleaners -1x55 gallon used oil and fuel filter container
- 4x55 gallon containers of various new oils and lubricants

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-28-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility works on transmissions only and has 2 parts washers on-site, 1 that is topped off by Mr. Quiterio (solvent-based) and another that is serviced (water-based). All oil skimmed off washers are managed as hazardous waste. Facility has annually serviced fire extinguishers and rags are commercially laundered. Facility has absorbent for spills but does not currently have a container for used absorbent. Mop water does not container degreaser and does not have an oily sheen. Facility is run by 2 partners and has no employees. Mr. Quiterio attended county hazardous waste training and inspects all waste containers weekly. Mr. Quiterio fixed the following violations at the time of inspection: Container Marking- Several containers of hazardous waste were missing their hazardous constituents, 1x5 gallon bucket and 1 fluid exchanger had no hazardous waste labels. All labels were completed at the time of inspection. Container Open- Several containers under transmission [Truncated]

DRAFT

MASTER METAL PRODUCTS COMPANY (Continued) **S113135637**

Site ID: 133356
Site Name: Master Metal Products Company
Violation Date: 09-19-2019
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 10/18/2019. Facility disclosed 50 pounds (1 cylinder of 150 cubic feet) of propylene, but I observed 2 cylinders totaling 500 cubic feet (1 x 150 cubic feet and 1 x 350 cubic feet) of propylene during the inspection. Update and electronically submit a complete Hazardous Material Inventory on CERS for review.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 133356
Site Name: Master Metal Products Company
Violation Date: 09-19-2019
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 10/18/2019. Facility is conducting hazard material training of employees in regular safety meetings, but has not documented the training sessions. A Hazardous Material Business Plan employee training template was provided to the facility. Conduct training for all relevant employees and provide a copy of the training roster log to the inspector for review. Ensure training is conducted annually and keep roster log for at least the last 3 years.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Violation Program:	HW
Violation Source:	CERS,
Site ID:	133356
Site Name:	Master Metal Products Company
Violation Date:	09-19-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 10/18/2019. Facility generates a metal slurry waste from two plasma cutting machines and stores the dried out metal waste in large white plastic totes until they are ready to be disposed. As per the owner, Eric Friederichs, the previous owner had this slurry tested to see if it was a hazardous waste, but does not know the outcome or the location of the hazardous waste determination paperwork.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/18/2019. Observed a 15 gallon plastic drum containing waste oil with an accumulation start date of 8/10/2017, 590 days beyond the authorized storage time limit of 180 days.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description:	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes:	UST Tank Owner and Operator name submitted via the California Environmental Reporting Systems (CERS) is inconsistent with our records. UST Tank Owner/Operator in most recent submission (07/08/20) is listed as Greg Gallup, but our records indicate that tanks are owned under the entity (corporation) Royal Coach Tours. In addition, an entity search from the California Secretary of State website indicates that the Royal Coach Tours Corporation (C0836028) is ACTIVE. Please verify the UST Owner/Operator information and make updates as needed in CERS.

Violation Date:	02-25-2020
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 05/07/2020. The spill container for the diesel tank does not hold 5 gallons of water. Technician used a calibrated 5 gallon container with water filled to the 5 gallon mark, and the entire contents of bucket were not able to be emptied into the spill container as it became full before reaching 5 gallons.

sump provided an audible & visual alarm plus positive shut-down when tested. The Bravo float & chain sensor in the dispenser under-dispenser-containment functioned properly when tested with water. The mechanical line leak detector properly detected a leak when tested at a leak rate of 3 gph and 10 psi. The spill bucket was lake-tested and failed due to a loose swivel adapter. The adapter was tightened, re-tested, and then passed its one-hour hydrostatic test. The turbine properly [Truncated]

Duncan of R&D Compliance. Mr. Duncan has current ICC UST Service Technician (exp 02/18/2023) and Caldwell (exp 06/2023) certifications. STP and UDC sumps were hydrostatically tested with water using Caldwell Level Change Indicator for 30 minutes and passed. Diesel Product piping was pressurized in accordance to manufacturer's guidelines for Bravo Flex Boots at 3 p.s.i. for 60 minutes and passed. Pressure was released at end of testing to verify gauge function. UST annular space is hydrostatically monitored and exempt from 36 month secondary containment testing. Submit results for today's testing to this department within 30 days.

Violation Date: 02-25-2020
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 05/07/2020. The spill container for the diesel tank does not hold 5 gallons of water. Technician used a calibrated 5 gallon container with water filled to the 5 gallon mark, and the entire contents of bucket were not able to be emptied into the spill container as it became full before reaching 5 gallons.

Violation Date: 04-04-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Used coolant was stored onsite longer than the allowed accumulation time of 180 days. The container label and pickup receipts show the following dates: Accumulation start date: 4/10/17, Pick up date: 8/7/18. Next accumulation start date: 8/7/18. The used coolant is overdue for pickup at this time. Within 30 days arrange to have an approved hauler pickup the used coolant.

Violation Date: 02-24-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 02/23/2017. THE 5-GALLON SPILL BUCKET FAILED TESTING WHEN IT WAS TESTED USING THE ACCELERATED INCON TESTER. MAKE REPAIRS TO THE SPILL BUCKET AND HAVE THE SPILL BUCKET RETEST. NOTIFY OUR OFFICE HOW THIS ISSUE WAS RESOLVED.

Eval Type: Routine done by local agency
Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Eddie Martinez (ICC 115259954-UT, VR #A 27329, VMI# 1748) of Petrotek. Site consists of one 20,000 gallon diesel tank and one dispenser. The annular space and piping sump are monitored by a Veeder-Root 300c panel. The panel showed all functions normal at arrival. The annular space is liquid-filled and monitored by a VR -303 sensor. The sensor provided audible and visible alarms when the sensor was removed simulating low liquid. The piping sump is monitored by a VR-208 sensor and it provided audible and visible alarms and positive shutdown when tested in water. Power out and sensor out (Fall Safe) provided positive shutdown. The Bravo float and chain assembly monitoring the UDC functioned as required when tested with water. The FE Petro MLLD (STP MLLD-D) was tested at the dispenser for a simulated leak of 3 gph at 10 PSI and detected tl1e leak and provided slow at [Truncated]

Eval Notes: The annual monitoring certification was performed by Eddie Martinez. All of his required certifications were reviewed and are current: ICC UST Service Technician 5259954 expiration date = 3/17/16; VMI LDT-890 tester #1748, expiration date = 9/5/16; Veeder Root Level 4 A27329 expiration date = 8/11/16. The following tests were observed: The annular brine sensor provided an audible & visual alarm when dipped in water. The pressurized piping Veeder Root 208 sensor in the turbine sump provided an audible & visual alarm plus positive shut-down when tested. The Bravo float & chain sensor in the dispenser under-dispenser-containment functioned properly when tested with water. The mechanical line leak detector properly detected a leak when tested at a leak rate of 3 gph and 10 psi. The spill bucket was lake-tested and failed due to a loose swivel adapter. The adapter was tightened, re-tested, and then passed its one-hour hydrostatic test. The turbine properly [Truncated]

Eval Notes: On site to witness secondary containment testing performed by Benjamin Duncan of R&D Compliance. Mr. Duncan has current ICC UST Service Technician (exp 02/18/2023) and Caldwell (exp 06/2023) certifications. STP and UDC sumps were hydrostatically tested with water using Caldwell Level Change Indicator for 30 minutes and passed. Diesel Product piping was pressurized in accordance to manufacturer's guidelines for Bravo Flex Boots at 3 p.s.i. for 60 minutes and passed. Pressure was released at end of testing to verify gauge function. UST annular space is hydrostatically monitored and exempt from 36 month secondary containment testing. Submit results for today's testing to this department within 30 days.

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided

DRAFT

7-ELEVEN INC. STORE# 37953 (Continued) **S121792203**

the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 02/08/2019. Facility failed to have UST overfill prevention equipment inspected by 10/13/18 in accordance with the overfill prevention equipment manufacturer s guidelines or standards. Within 30 days, have the overfill prevention equipment inspected by an approved UST service technician and submit the report to HMCD. Ensure the next inspection is completed by October 2021 to reestablish the 36 month testing frequency.

Eval Notes: On site to witness the secondary containment testing performed by Mr. Jarrod Cooke (certifications current) of Tanknology. The annular spaces were tested at 10 inHg of vacuum for one hour with no loss. The product piping secondary was tested at 3 psi (per Bravo's requirement for shallow-pan under dispenser containment) for one hour with no loss. The turbine sumps were hydrostatically tested for 30 minutes using the Tanknolgy VPLT accelerated tester. All sumps showed a passing result. The under dispenser containment (UDCs) were not tested today. Contact our office to notify us when the UDCs will be tested. Secondary containment testing was done in October in 2011 and 2014. When complete, submit a copy of the Secondary Containment Testing report to our office within 30 days and keep a copy available for review for at least 3 years. Reports may be sent via email to USTinspector@deh.sccgov.org.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E07D02f
Potential Media Affect:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	The Site is located on the northern corner at the intersection of Coleman Avenue and West Taylor Street in San Jose, California. The Site is currently occupied by AJ Auto Detailing, an operating auto detailing shop. Land use near the Site consists primarily of commercial and industrial properties. Chevron site 306583 (former Unocal-branded service station #4427) is located at the eastern corner of the intersection of Coleman Avenue and West Taylor Street (southeast of the Site) and is also an open leaking underground storage tank (LUST) case (SCVWDID: 07S1E07D01f). Commencing First Quarter 2010, the Site and Chevron site 306583 were combined under a joint groundwater monitoring and sampling program. First Quarter 2012 groundwater monitoring and sampling event was conducted by Blaine Tech on February 28, 2012. A summary of First Quarter 2012 groundwater analytical results follows: * TPH-GRO was detected in one Site well this quarter, at a concentration of 31,000 micrograms per liter ("g/L; well MW-3), which is within historical limits for this well. * Benzene was detected in one Site well this quarter, at a

DRAFT

AJ AUTO DETAILING (Continued) **S110060590**

concentration of 580 "g/L (well MW-3), which is within historical limits for this well. * Toluene was detected in one Site well this quarter, at a concentration of 220 "g/L (well MW-3), which is within historical limits for this well. * Ethylbenzene was detected in one Site well this quarter, at a concentration of 2,100 "g/L (well MW-3), which is within historical limits for this well. * Total Xylenes were detected in one Site well this quarter, at a concentration of 3,500 "g/L (well MW-3), which is within historical limits for this well. * MtBE was not detected above the LRLs (0.5 "g/L and 3 "g/L) in any Site well sampled this quarter. Based on TPH-GRO and BTEX compound concentrations above ESLs, Stantec recommends the continuation of the current semi-annual groundwater monitoring and sampling program.

Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	The Site is a former Unocal-branded service station, which was located at the eastern corner of the intersection of West Taylor Street and Coleman Avenue in San Jose, California. The service station operated from approximately 1956 to 1981. Previous Site features included a station building, two fuel dispenser islands, one 5,000-gallon and two 4,000-gallon underground storage tanks (USTs), and one 550-gallon waste oil UST. In June 1980, the three gasoline USTs were removed and replaced by two 10,000-gallon fiberglass USTs. Historical reports indicate the station building and fuel dispenser islands were removed in March 1982, and the USTs and associated fuel lines were removed in 1985 (Gettler-Ryan, Inc. [G-R], 2000); however, Stantec could not locate documentation of the UST removal on file with the County of Santa Clara for confirmation. The Site has since remained vacant and is currently a fenced-in, unpaved lot. Land use near the Site consists primarily of commercial and industrial properties. Former Chevron-branded service station 9-9727 is located at the northern corner of West Taylor Street and Coleman Avenue (northwest of the Site) and is known to have had leaking USTs. Starting First Quarter 2010, former Chevron-branded service station 9-9727 is under a joint groundwater monitoring and sampling program with the Site. The Site elevation is approximately 75 feet above mean sea level. The Site is located in Santa Clara Valley, approximately 10 miles southeast of the San Francisco Bay and 1,200 feet west of Guadalupe River in Santa Clara County. The Santa Cruz Mountains are 10 miles southwest of the Site and the Diablo Range is approximately 7 miles northeast of the Site. In January 1986, EMCON Associates of Santa Clara, California (EMCON) advanced four soil borings (U-A through U-D) near the former UST excavation. The maximum hydrocarbon concentrations were observed in soil sampled above the first-encountered groundwater, approximately 29 feet below ground surface (bgs). In April 1986, EMCON installed six groundwater monitoring wells (U-1 through U-6). Separate-phase hydrocarbons (SPH) were observed in wells U-2, U-4, and U-5. EMCON conducted a well survey which identified six wells within \\%-mile radius of the Site. At the time of their report, four wells were inactive water supply wells, one was an active municipal well, and one was an active domestic water supply well (ENSR, 2006). In March 1988, Pacific Environmental Group of Santa Clara, California (PEG) installed three groundwater monitoring wells (U-7, U-8, and U-9) (ENSR, 2006).From 1989 to 1992, GeoStrategies, Inc. of Rancho Cordova, California (GSI) installed seven groundwater monitoring wells (U-10 through U-16) and two groundwater recovery wells (UR-1 and UR-2) (ENSR, 2006). In September 1991, GSI performed a step-drawdown pump test and a constant-rate extraction test on groundwater recovery well UR-1 to obtain aquifer characteristics. Monitoring wells U-1, U-2, U-5, and U-6 were used as observation wells. No drawdown was observed in the

Draft

UNOCAL (Continued) **S110060944**

four observation wells (ENSR, 2006). In March 1993, GSI collected eleven soil samples from beneath the fuel piping located on the western portion of the Site. Samples were collected from between 2.5 to 3 feet bgs. No petroleum hydrocarbons were detected in any soil sample. A groundwater extraction and treatment (GWET) system operated periodically from August 1995 to September 1998 utilizing wells U-4 (screened from 28.5 to 48.5 feet bgs), U-5 (screened from 28.5 to 48.5 feet bgs), and UR-1 (screened from 20 to 45 feet bgs) as groundwater extraction points. During its operation, the GWET system extracted approximately 668,690 gallons of groundwater and removed approximately 337 pounds of total petroleum hydrocarbons as gasoline range organics (TPH-GRO), 30 pounds of total petroleum hydrocarbons as diesel range organics (TPH-DRO), and 41 pounds of benzene (G-R, 2000). In October 1996, GSI installed monitoring well U-17. In August 2000, G-R submitted a corrective action plan (CAP) recommending natural attenuation as the most viable option for Site remediation. In February and March 2006, a remedial design investigation was conducted, which included the advancement of 17 membrane interface probe (MIP) borings and nine confirmation soil borings to further characterize the horizontal and vertical extent of the residual petroleum hydrocarbons beneath the Site, and to determine soil types associated with residual contamination to aid in evaluating alternative remedial strategies. The investigation indicated that residual hydrocarbons remain in the northeastern portion of the Site, and the vertical extent of residual petroleum hydrocarbons beneath the Site had been adequately characterized (ENSR, 2006). In December 2006 and January 2007, ENSR installed nine shallow screen interval groundwater monitoring wells (U-3A to U-6A, U-11A, U-12A, U-15A, U-16A, and UR-1A) in response to rising groundwater elevations, and installed one deep screen interval groundwater monitoring well (U-17B). ENSR also destroyed wells U-1, U-8, U-9, U-10, U-13, and U-14 (ENSR, 2007). A soil vapor intrusion assessment was conducted in 2007 and 2008 to evaluate potential vapor intrusion risks to human health in the business to the northeast of the Site. Three temporary sub-slab soil vapor sampling probes were installed on December 18, 2007. Soil vapor samples were collected from these probes on February 7, 2008, and July 1, 2008. In addition, indoor and outdoor air samples were collected during both soil vapor sampling events. Results of the investigation indicated that the vapor concentrations do not pose an increased risk to human health (ENSR, 2008). Groundwater monitoring has been performed at the Site since October 1988. A total of 23 active wells are currently monitored on a semi-annual or annual basis. Groundwater monitoring data indicates that groundwater elevations have risen by as much as 25 feet since monitoring began at the Site. Currently (as of First Quarter 2010), groundwater is encountered at approximately 8 to 11 feet bgs. Historically, the direction of groundwater flow has been towards the north-northeast (Stantec, 2010b). Historical monitoring reports prepared by previous consultants presented two distinct groundwater-bearing zones; a shallow groundwater-bearing zone from approximately 3 to 25 feet bgs, and a deep groundwater-bearing zone from approximately 28 to 48 feet bgs. Observations made by Stantec during this additional Site assessment clarify Site lithology and are described in Section 3.1.1.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1W12D02f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 1987 In October, underground storage tanks (USTs) were removed and replaced. Removed two 8,000-gallon and two 5,000-gallon USTs, and replaced them with three 12,000-gallon USTs. Eight soil samples were collected from the excavation. Total petroleum hydrocarbons as gasoline (TPH-g) and benzene were detected in all eight soil samples. An unauthorized release report (URR) was prepared and filed by the City of San Jose fire Department on December 17, 1987, however no additional action was required by the oversight agency at that time. 1998 In October, UST, dispenser and product piping were upgraded. Seven soil samples were collected from the soil beneath the dispenser and piping. Xylenes detected in one soil sample at 0.011 milligrams per kilogram (mg/kg). MTBE was not detected in soil samples. An unauthorized release form was prepared by San Jose fire Department; however no additional action was required by the oversight agency at that time. 2002 In July, four groundwater monitoring wells (MW-1 through MW-4) were installed onsite. Maximum concentration of 46,000 micro grams per liter (ug/L) of MTBE was detected in on-site monitoring well MW-3. An unauthorized release form dated September 13, 2002 was prepared by Shell and a fuel leak investigation case as opened. Periodic groundwater monitoring started in July 2002. 2003 In July, semi-monthly groundwater extraction (GWE) started from wells MW-3, MW-4, and MW-3A by using a vacuum truck. Approximately 29,000 gallons of groundwater were extracted. A total of 1.33 pounds of TPH G and 3.15 pounds of MTBE were removed between July 29, 2003 and August 31, 2005. Groundwater extraction (GWE) activities were discontinued in September 2005 based on MTBE concentrations reaching asymptotic levels. In September, seven off-site direct push borings (SB-1 through SB-7; 24 soil samples, and 7 water samples were collected and analyzed. In December, groundwater pumping tests were performed on monitoring wells MW-3 and MW-4 to evaluate full scale GWE. 2004 In February, two monitoring wells MW-5 and MW-6 were installed in off-site locations. MTBE was detected in MW-6 at a concentration of 40 ug/L. MTBE was not detected in MW-5. In May, an oil water separator was removed from the site. Two soil samples (Pit 1 and Pit 2) were collected from the excavation. TPH as diesel was detected at a concentration of 3.2 mg/kg. In August, monitoring well MW-3A was installed. This was due to the concern that MW-3 and MW-4 provided hydraulic connection between two water-bearing zones. MW-3A was installed near MW-3 and was a screened across the shallower water bearing zone from 9 to 19 feet below ground surface (bgs). 2005 In February, upon confirmation that monitoring wells MW-3 and MW-4 were hydraulically connected, between their 2 water bearing zones, both wells were destroyed. Monitoring well MW-3A was installed to replace MW-3. MW-3B was screened across the deeper water-bearing zone from 21 to 24 feet bgs. August Bi-monthly groundwater extraction events were discontinued. 2006 In April, the waste oil tank was removed. Two excavation sidewall soil samples, one piping trench sample and one groundwater sample were collected. Maximum concentrations of 30 mg/kg TPH d, and 54 mg/kg oil and grease were detected in soil sample WO-3-5. In groundwater, 770 ug/L TPH D, 28 ug/L MTBE and1,30 ug/L were detected. 2010 In February, a hoist was removed from the site. One bottom soil sample was collected. TPHd was detected at 53 mg/kg and TPH-hydraulic oil was detected at 70 mg/kg. In March, the latest

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Type:	Routine done by local agency
Eval Notes:	Conducted a Hazardous Waste Generator Routine Inspection. This facility is a 1-bay auto repair shop and was observed generating or has the potential to generate the following hazardous waste streams: -Used oil -Used oil filters The following violations were corrected at the time of inspection: G412 Container Markings: Used Oil/fuel Filters: Observed 1 x 5 gallon metal bucket of used oil filters with no hazardous waste label. A label was added and completed during the inspection. G413 Container Requirements: Used Oil Filters: Observed 1 x 5 gallon metal bucket of used oil filters without a lid. The filters were placed in a plastic 5 gallon bucket with a lid during the inspection. Notes: CESQG: This facility generates less than 100 kilograms of hazardous waste per month, therefore this facility is a conditionally exempt small quantity hazardous waste generator and is authorized to self--transport hazardous waste (used oil) to authorized hazardous waste [Truncated]
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW
Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-12-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Conducted a Hazardous Materials Business Plan (HMBP) Routine Inspection. The last HMBP was submitted on 9/9/2019 via CERS. CERS ID 10349143. The following reportable hazardous materials were observed during the inspection: 1.) 55 gallons of 5W30 2.) 110 gallons of used oil (empty) County of Santa Clara s Department of Environmental Health Ashley Ryder | Hazardous Materials Specialist Hazardous Material Compliance Division Office 408-918-1977 | ashley.ryder@cep.sccgov.org https://www.sccgov.org/sites/cepa/Pages/cepa.aspx

Eval Program:	HMRRP
Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-14-2015
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	This inspection began on 8/13/2015 and concluded today. Reviewed pickup receipts for used oil and used filters and for shop towel service with Aramark. Based on pickup receipts facility generates approximately 110 gallons of used oil every two months. Shop towels that are saturated with hazardous materials (used oil, transmission fluid, etc.) may not be returned to Aramark for laundering and must be managed as hazardous waste. Additionally, spills of hazardous materials that are mopped up cannot be disposed of in the sanitary sewer and must be managed as hazardous waste. Recommend using a kitty litter type absorbent that can be reused several times before disposing of as hazardous waste for cleaning up spills. The kitty litter type absorbent must be stored in a closed container with a hazardous waste label once you determine it is no longer usable as it will be a hazardous waste. Maintain receipts for at least three years for all hazardous waste pickups including [Truncated]

Environmental Interest/Information System:
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 02/10/2016
Comments: Letter from GeoRestoration details the proposed schedule for shutdown of the dual phase extraction system and soil gas and groundwater sampling and reporting.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/02/2016
Comments: DTSC sent a letter to 1175 Campbell Avenue, LLC, the responsible party, that approved the updated project schedule outlined in a February 10, 2016 letter from GeoRestoration, Inc. DTSC agreed that the dual-phase extraction system should run until the Bay Area Air Quality District permit expired at the end of May 2016. After system shutdown, soil sampling would be performed after a one-month period to provide data to assess the progress of remedation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 08/21/2020
Comments: Off-Site investigation workplan proposes installing soil vapor wells along the site boundary, grab groundwater samples near a previous historical sample that contained chlorinated volatile organic compounds, and decommissioning previously-approved groundwater monitoring wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 11/01/2012
Comments: Annual DTSC oversight cost estimate sent to responsible party.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/2015
Comments: DTSC issued an Amendment to Imminent and Substantial Endangerment Order and Remedial Action Order, Docket No. I&SE 05/06-012, which was issued in 2006. The Amendment added 1175 Campbell Avenue, LLC, the new Site owner, and the Estate of Jonnie Lindsell as responsible parties.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/14/2015
Comments: Email from GeoRestoration outlining proposed groundwater sampling location changes due to dry shallow wells caused by a lower than expected water table.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 11/07/2014
Comments: Georestoration, Inc. submitted a letter informing DTSC of the current property owners intent to fill sumps located in the southwestern portion of the site with clean, small pieces of concrete mixed with base rock and then placing inches of concrete to grade above the fill. The identified purpose of filling the sumps was to eliminate a physical hazard. DTSC provided approval to proceed in its response letter.

DRAFT

AJ COMMERCIAL LAUNDRY/ALL CHEM SUPPLY (Continued) **S107735811**

groundwater monitoring activities completed in May 2015. Select monitoring wells in areas with remaining elevated volatile organic compounds were sampled to evaluate current groundwater conditions and to provide a baseline to track progress for the remediation that was restarted in May 2015. Wells with a total depth of 20 feet or less were dry or had small amounts of groundwater and were not sampled.

Completed Area Name: PROJECT WIDE

Completed Document Type: Correspondence

DRAFT

AJ COMMERCIAL LAUNDRY/ALL CHEM SUPPLY (Continued) **S107735811**

Completed Date: 02/10/2016
Comments: Letter from GeoRestoration details the proposed schedule for shutdown of the dual phase extraction system and soil gas and groundwater sampling and reporting.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/02/2016
Comments: DTSC sent a letter to 1175 Campbell Avenue, LLC, the responsible party, that approved the updated project schedule outlined in a February 10, 2016 letter from GeoRestoration, Inc. DTSC agreed that the dual-phase extraction system should run until the Bay Area Air Quality District permit expired at the end of May 2016. After system shutdown, soil sampling would be performed after a one-month period to provide data to assess the progress of remedation.

Completed Date: 09/27/2013
Comments: Report summarizes the results of offsite groundwater sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 08/21/2020
Comments: Off-Site investigation workplan proposes installing soil vapor wells along the site boundary, grab groundwater samples near a previous historical sample that contained chlorinated volatile organic compounds, and decommissioning previously-approved groundwater monitoring wells.

DRAFT

AJ COMMERCIAL LAUNDRY/ALL CHEM SUPPLY (Continued) **S107735811**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 11/01/2012
Comments: Annual DTSC oversight cost estimate sent to responsible party.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 01/07/2015
Comments: DTSC issued an Amendment to Imminent and Substantial Endangerment Order and Remedial Action Order, Docket No. I&SE 05/06-012, which was issued in 2006. The Amendment added 1175 Campbell Avenue, LLC, the new Site owner, and the Estate of Jonnie Lindsell as responsible parties.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/14/2015
Comments: Email from GeoRestoration outlining proposed groundwater sampling location changes due to dry shallow wells caused by a lower than expected water table.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 11/07/2014
Comments: Georestoration, Inc. submitted a letter informing DTSC of the current property owners intent to fill sumps located in the southwestern portion of the site with clean, small pieces of concrete mixed with base rock and then placing inches of concrete to grade above the fill. The identified purpose of filling the sumps was to eliminate a physical hazard. DTSC provided approval to proceed in its response letter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/20/2005
Comments: In-house site screening report approved which determined that further action is needed.

Completed Area Name: PROJECT WIDE

DRAFT

VARIETY METAL FINISHING INC (Continued) **S113007406**

Potential Contaminants of Concern: Cyanide
Site History: The site was the location of a plating shop that recently closed. Shallow soil samples beneath the plating shop location reported cyanide and other metals above screening levels. Additionally, grab groundwater and soil vapor samples throughout the property reported detections of VOCs. The RP plans to remediate the soil hot spots through excavation.

Violation Description:	Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas:

DRAFT

PRECISION SPECIALTIES (Continued) **S107448086**

hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: EMPLOYEES ARE NOT AWARE OF PROPER HAZARDOUS WASTE MANAGEMENT PROCEDURES INCLUDING LABELING REQUIREMENTS, CONTAINER REQUIREMENTS, ACCUMULATION TIME RESTRICTIONS, TRAINING REQUIREMENTS AND EMERGENCY RESPONSE. ENSURE THAT TRAINING IS PROVIDED WITHIN 6 MONTHS FOR NEW EMPLOYEES AND ANNUALLY THEREAFTER FOR EMPLOYEES WITH HAZARDOUS WASTE MANAGEMENT DUTIES. SANTA CLARA COUNTY HAZARDOUS WASTE MANAGEMENT TRAINING INFORMATION FLYER WAS PROVIDED TODAY.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-02-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: EPA ID: CAL000200894 is active. Observed the following containers inside the locked storage area in the back corner of the parking lot: Waste coolant, 2 x 55 gallons New coolant (marked as empty), 3 x 55 gallons Note: The key to the lock of the outside storage area could not be located. Per Jacquelyn, the two waste coolant drums are currently empty. The last pickup date for waste coolant was 7/26/18. Hazardous waste manifests were reviewed. Observed emergency response equipment including fire extinguishers and spill absorbent. Emergency information is posted.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-11-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ROUTINE HAZARDOUS WASTE GENERATOR INSPECTION. THIS INSPECTION BEGAN ON 12/6/2013 AND CONCLUDED TODAY. EPA ID # CAL000200894 OBSERVED THREE 55-GALLON DRUMS OF WASTE COOLANT IN OUTSIDE STORAGE AREA AND TWO 10-GALLON BUCKETS OF WASTE COOLANT IN SHOP. BASED ON HAZARDOUS WASTE PICKUP RECEIPTS, FACILITY GENERATES APPROXIMATELY 110 GALLONS OF HAZARDOUS WASTE PER YEAR.

Site ID:	21118
Site Name:	COMMON GROUND LANDSCAPE MGMT
Violation Date:	09-03-2021
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Drums of oil/water waste and used oil were observed to have accumulation start dates of 10/8/2015 and 1/16/2017, respectively. Ms. Aguayo confirmed these dates to be accurate. Hazardous waste must be disposed of within 180 days from the accumulation start date.

Eval Date:	09-03-2021
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site with Ashley Ryder (Hazardous Materials Specialist) to conduct a Hazardous Waste Generator Inspection. Completed walk-through with Marlene Aguayo, Manager. The facility provides landscaping services and generates the following hazardous waste streams: used oil, used oil filters, and waste oil/water mixture. However, based on conversation with Ms. Aguayo there is no mechanic on site to perform vehicle maintenance at this time. They may hire a new mechanic or decide to have maintenance performed by a third party but currently they are not generating any new hazardous wastes. If facility ceases generating any hazardous wastes they many contact our department to

DRAFT

Eval Notes: Inspection commenced on 9/1/2021 and concluded with the issuance of the report today. On site with Ashley Ryder (Hazardous Materials Specialist) to conduct Hazardous Materials Business Plan (HMBP) inspection. Completed walkthrough and paperwork review with Marlene Aguayo, Manager. Business operation consists of landscaping services. Confirmed that William Jauch is the property owner. Most recent HMBP submittal was on 7/6/2017 (CERS ID 10355404). Based on observed chemical inventory, the facility is appropriately permitted. The following reportable chemicals were observed: 1) 550lbs of Site-Pro Herbicide 2) 1800lbs of Turf-Gro Fertilizer 3) 55 gallons of waste oil/water mixture 4) 55 gallons of used oil

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DRAFT

FMC CORPORATION (Continued) **1024903844**

Machinery and Chemical Corporation (FMCC) purchased the site property from the City of San Jose on 29 October 1946. FMCC manufactured food processing equipment, agricultural machinery, recreational vehicles, and military vehicles. Under their contract with the DoD, FMCC produced military tracked vehicles at Plants 1 through 6. Therefore, only Plants 1 through 6 are included in this FUDS. FMCC began manufacturing military vehicles on 19 March 1952. Plants 2, 4, 5, and 6 were owned by the U. S. Government. Plants 1 and 3 were constructed by FMCC. The governmentowned buildings were designated as: the Consolidated Western Steel Building (Plant 2), the Soule Rigid Steel Frame Buildings (Plants 4 and 5), and the Spare Parts Building (Plant 6). The Consolidated Western Steel Building was dismantled and removed from the Consolidated Western Steel Company in Berkeley, California, and re-erected and renovated at FMCC in 1953. The Soule Rigid Steel Frame Buildings were removed from Berkeley, California, and re-erected at FMCC in 1953. The Spare Parts Building was built by the United States for FMCC in 1952. FMCC constructed Buildings 1 and 3 in 1953. Ownership of Plants 2, 4, 5, and 6 was transferred by purchase from the United States to FMCC on 31 March 1960. The City of San Jose purchased the property from FMCC in 2005. The City planned to use the property as an extension to the adjacent San Jose International Airport, and called the property Airport West. However, the planned expansion never took place. The property is currently in development as the site of the New Earthquakes Stadium for San Jose s Major League Soccer team, the San Jose Earthquakes.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/29/2005
Comments: The RAW requires a deed restriction preventing digging in the area where PCBs are at depth and treatment of contaminated groundwater with HRC and Bio-Innoculum. No comments were received during the public comment period.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 08/11/2006
Comments: Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/11/2006
Comments: The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling

DRAFT

CUSTOM FOOD MACHINERY (Continued) **S106896814**

results indicate HRC is reducing concentrations on chemicals of concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.

Completed Document Type: Removal Action Workplan
Completed Date: 07/29/2005
Comments: The RAW requires a deed restriction preventing digging in the area where PCBs are at depth and treatment of contaminated groundwater with HRC and Bio-Innoculum. No comments were received during the public comment period.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 08/11/2006
Comments: Completion report approved. During implementation of the final remedy, additional PCB contaminated soil was encountered at another area on the site. Excavation of this PCB impacted soil occurred to the top of the groundwater table (approximately 9 feet below ground surface). Confirmation sampling verified that the PCB cleanup goal in this area was achieved in the upper 10 feet, but PCBs remain below 10 feet. A deed restriction will be required. The groundwater cleanup goal established in the RAW has not been met. Ongoing groundwater monitoring will be required until cleanup goals have been achieved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/11/2006
Comments: The final groundwater sampling was conducted on May 11, 2006 to verify Hydrogen Release (HRC's) effectiveness. Previous sampling results indicate HRC is reducing concentrations on chemicals of

DRAFT

CUSTOM FOOD MACHINERY (Continued) **S106896814**

concern including, perchloroethylene and tricholorethylene. However, the trichlorobenzenes concentrations have stayed the same. The breakdown of these contaminants can also take longer.

periods of time due to power failures. Each time this occurred, a technician was sent to the site to restart the system as soon as possible. These power failures corresponded with severe weather events. Additionally, on March 17th, the system was off for 18 hours due to an overloaded variable frequency drive (VFD). The VFD was repaired and the system was restarted on March 18th. The total flow volume discharged to the storm drain from the system during this quarter, based on daily average flow volumes, was 2,077,904 gallons. No exceedances to the NPDES permit were observed.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Central Plant Area
Completed Document Type: Operation and Maintenance Report
Completed Date: 12/16/2019
Comments: DTSC conditionally approved the 2018 Central Plant Area Groundwater Monitoring Report. The Report did not adequately address our comment regarding groundwater containment (General Comment 2 and Specific Comment 1). While the Report does not require further revision, DTSC recommend that the 2019 Annual Groundwater Monitoring Report discuss how the containment of the existing groundwater extraction and treatment system will be evaluated beyond the hand-drawn groundwater elevation contours. This may include hydraulic modeling or aquifer testing. A plan for evaluating the continued effectiveness of the remedy was recommended.

Completed Area Name: Sites With No Operable Unit

Completed Document Type: Monitoring Report
Completed Date: 09/29/2017
Comments: The downgradient investigation was implemented to determine the extent of the volatile organic compound (VOC) plume to the north of the Central Plant Area. The groundwater samples collected from hydropunch locations at the San Jose International Airport confirmed that VOCs have migrated beyond the sentinel wells and into the Airport. Additional investigation at the Airport is not planned due to access limitation due to the Airport runways. FMC plans to continue monitoring the sentinel wells as part of their groundwater monitoring program.

File Location: Not reported
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Solvents
Site History: No Water Board oversight of cleanup at this site. This case is included in Geotracker because the site is covered by the Water Boards NPDES general permits for discharges from pump and treat systems to surface waters (one each for fuels- and VOC-impacted sites). This can happen for two reasons: (i) the site is overseen by another agency (e.g., USEPA or DTSC) and needs coverage under one of the NPDES general permits or (ii) construction dewatering in an area of groundwater contamination necessitates NPDES general permit coverage. Including this case in Geotracker helps staff to receive and review required NPDES reports.

Quarterly Update: This property is the former site of the FMC Corporation. FMC operated a facility for the design, production, and testing of military tracked vehicles under US DOD contracts from 1951 to 1997. FMC was a hazardous waste storage and treatment facility under an interim status and certified closed in November 1996. Closure of the site involved dividing the site into areas. The Test Track Area and the Central Plant Area have been closed to industrial standards. Groundwater is impacted with organic contaminants and continues to be pumped and treated by FMC with oversight from DTSC. Both the Test Track Area and the Central Plant Area are now owned by the City of San Jose. The Plant 7 Area on the eastern portion of the site is now owned by Arcadia. On the western end is the last remnant of the FMC Corporation, an industrial facility run by the BAE Corporation which took over operations from FMC.

Waste Description: 1,1-DICHLOROETHYLENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DRAFT

FMC CORPORATION (Continued) **1000840778**

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Waste Description: 1,2-DICHLOROETHANE

Waste Code: D029
Waste Description: 1,1-DICHLOROETHYLENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

DRAFT

FMC CORPORATION (Continued) **1000840778**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D008
Waste Description: LEAD

Waste Code: D011
Waste Description: SILVER

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that

DRAFT

HADCO SANTA CLARA INC (Continued) **1000336467**

these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info:	In 1983 the Santa Clara County Jail had three transformers (located on the roof, in the basement and near a prisoner holding area) that leaked small quantities ("a teaspoonful to less than a coffee cupful") of polychlorinated biphenyl (PCB) contaminated oil. The contamination of the three spots ranged from 12 micrograms per sample to 6,600 micrograms per sample before cleanup.

DRAFT

GEORGE L. RICHEY US ARMY RESERVE CENTER (Continued) **S104735531**

Background Info:	Facility size is approx 7.0 acres. Sites include a grease rack a nd inactive vehicle wash rack. A draft PA was completed in Febru ary 1999 and a final SI work plan was prepared in August 2000. T he grease rack was constructed in the early 1950s and is no longe r used. The Army considers the vehicle wash rack and oil water s eperator to be a compliance (RCRA) issue for funding purposes. T he wash rack pad and oil water seperator were removed on August 1 5, 2000. Shallow soil sampling was conducted around the grease r ack in 1997. A UST (fuel tank) was closed by County in the early 1990s. Contaminants of concern are primarily grease oil, fuels and solvents. Ground water is relatively shallow, approx 60 ft b elow ground surface. Impacts to groundwater from grease rack are unknown, but will be determined by the August 2000 SI field work.

DRAFT

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Completed Document Type: Correspondence
Completed Date: 04/28/2015
Comments: The City of San Jose notified DTSC in an email of its plans to repair asphalt at the site, which is currently the location of the San Jose Arena (SAP Center). An attachment was included with the email shown the locations where the asphalt repairs would be done.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/21/2006
Comments: Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Background Info:	The current address on the building is 525 West Santa Clara Street. The site is bounded by Autumn Street to the east; West Santa Clara Street to the south; Julian Street, Montgomery Street, and St. John Street to the north; and the Southern Pacific Railroad tracks to the west. In May 1987, a site screening identified contaminants in the soil as polycyclic aromatic hydrocarbons (PAH's) from a former Pacific Gas & Electric (PG&E) site with concentrations ranging from non-detect to above 3,000 ppm in localized areas. EPA completed screening site inspection in 1989. The City of San Jose Redevelopment Agency (SJRA) acquired 22 parcels in a former industrial area in downtown San Jose that had a former Pacific Gas & Electric (PG&E) coal gasification plant, various automobile repair and service businesses, underground storage tanks, oil/water clarifers, and drums.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/22/2022

DRAFT

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

DRAFT

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

DRAFT

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

DRAFT

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

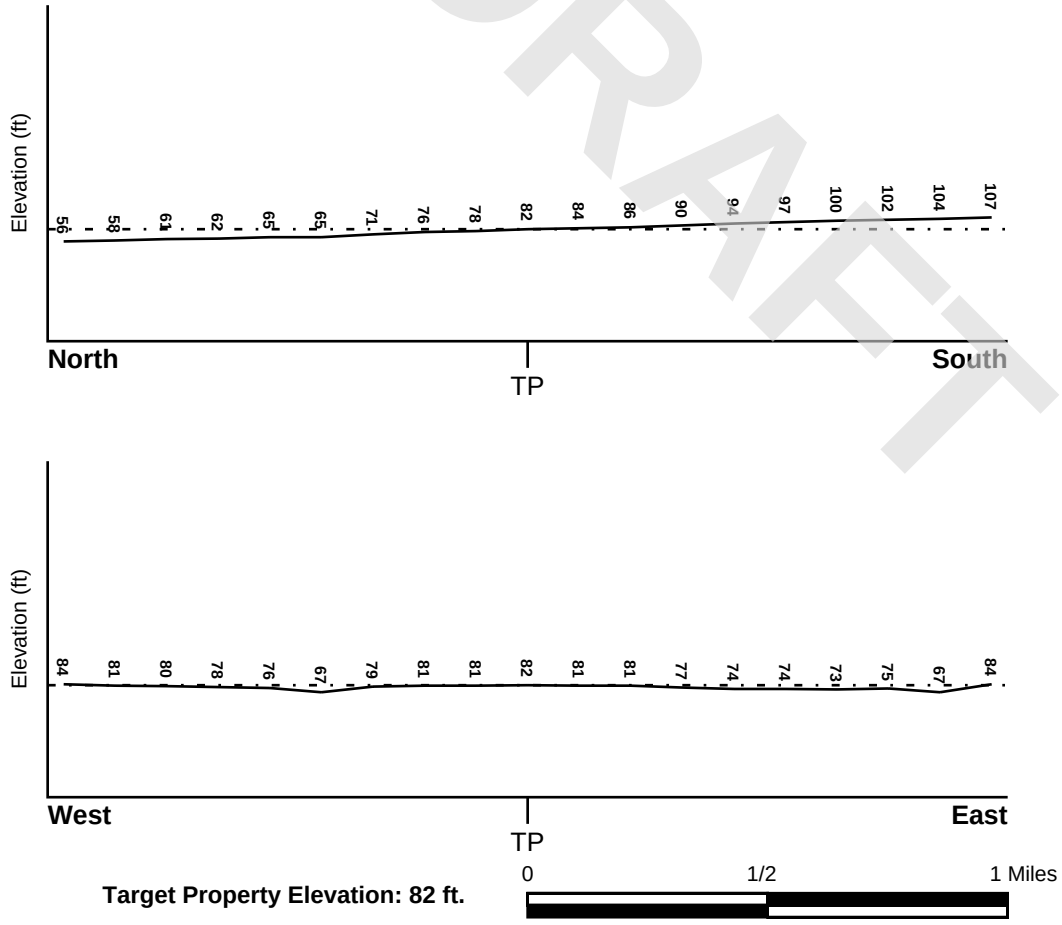
Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION



Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 82 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile ESE
Site Name:	Fmc Corp San Jose Ordnance Plt
Site EPA ID Number:	CAD009146952
Surficial Aquifer Flow Dir.:	NE. THIS FLOW APPLIES TO THE "A" AQUIFER THAT IS PRESENT AT 15 FEET TO 30 FEET DEEP.
Measured Depth to Water:	15 feet.
Hydraulic Connection:	A silty and clay aquitard separates the "A" and "B" aquifers. A separate aquitard underlies the "B" aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

DRAFT

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Submittal Status

Submitted on 9/30/2021 by *Joe Moulton* of BELLARMINE COLLEGE PREPARATORY (SAN JOSE, CA)
Submittal was ***Accepted***; Processed on 12/16/2021 by *Ashley Ryder* for Santa Clara County Environmental Health
Comments by regulator: Accepted as administratively complete. A technical review may be conducted subsequently as part of your next facility inspection.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # A1.	CERS ID # A2.	DATE OF PLAN PREPARATION/REVISION (MM/DD/YYYY) A3.

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* A4.

BUSINESS SITE ADDRESS A5.

BUSINESS SITE CITY A6.	CA	ZIP CODE A7.

TYPE OF BUSINESS (e.g., Painting Contractor) A8.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A9.

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING (Check all that apply): A10.

☐ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR BY (Check all that apply): B1.

☐ 1. CALLING PUBLIC EMERGENCY RESPONDERS (e.g., 9-1-1)
☐ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:
1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:
1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

EMERGENCY RESPONSE PHONE NUMBERS:		
	AMBULANCE, FIRE, POLICE AND CHP	9-1-1
	CALIFORNIA STATE WARNING CENTER (CSWC)/CAL OES.	(800) 852-7550
	NATIONAL RESPONSE CENTER (NRC)	(800) 424-8802
	POISON CONTROL CENTER	(800) 222-1222
	LOCAL UNIFIED PROGRAM AGENCY (UPA)	C1.
	OTHER (Specify): C2.	C3.
NEAREST MEDICAL FACILITY / HOSPITAL NAME: C4.		C5.

AGENCY NOTIFICATION PHONE NUMBERS:		
	CALIFORNIA DEPT. OF TOXIC SUBSTANCES CONTROL (DTSC)	(916) 255-3545
	REGIONAL WATER QUALITY CONTROL BOARD (RWQCB).	C6.
	U.S. ENVIRONMENTAL PROTECTION AGENCY (US EPA)	(800) 300-2193
	CALIFORNIA DEPT. OF FISH AND WILDLIFE (CDFW)	(916) 358-2900
	U.S. COAST GUARD (USCG)	(202) 267-2180
	CAL OSHA	(916) 263-2800
	CAL FIRE OFFICE OF THE STATE FIRE MARSHAL (OSFM)	(916) 323-7390
	OTHER (Specify): C7.	C8.
	OTHER (Specify): C9.	C10.

DRAFT

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR BY (Check all that apply): C11.

☐ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☐ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY (Check all that apply): C12.

☐ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☐ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY COORDINATOR CONTACT INFORMATION: C13.

PRIMARY EMERGENCY COORDINATOR NAME: PHONE NO.: PHONE NO.:

ALTERNATE EMERGENCY COORDINATOR NAME: PHONE NO.: PHONE NO.:

☐ Check if additional Emergency Coordinator contact and address information is available onsite or by calling PHONE NO.:

Note: If more than one alternate emergency coordinator is designated, attach a list in order of responsibility.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

Check the applicable boxes to indicate your facility's procedures for containing spills and preventing and mitigating releases, fires and/or explosions.

D1.

☐ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
☐ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls, built-in berms);
☐ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, spill pigs, spill pillows);
☐ 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS;
☐ 5. LINED TRENCH DRAINS AND/OR SUMPS;
☐ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
☐ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS;
☐ 8. STOP PROCESSES AND/OR OPERATIONS;
☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
☐ 10. SHUT OFF WATER, GAS, ELECTRICAL UTILITIES;
☐ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE AND/OR MEDICAL AID;
☐ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AND/OR IMPACTED AREAS;
☐ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION;
☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE EMERGENCY RESPONSE TEAM;
☐ 15. REMOVE CONTAINERS AND/OR ISOLATE AREAS;
☐ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
☐ 17. USE ABSORBENT MATERIAL FOR SPILL CONTAINMENT;
☐ 18. VACUUM SUCTION USING APPROPRIATE VACUUM (e.g., Intrinsically safe) FOR SPILL CONTROL AND/OR CLEANUP;
☐ 19. DECONTAMINATE PERSONNEL AND EQUIPMENT WITHIN DESIGNATED AREA AND DISPOSE OF WASTEWATER AS HAZARDOUS WASTE;
☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF HAZARDOUS WASTE GENERATED DURING EMERGENCY ACTIONS;
☐ 21. OTHER (Specify): D2.

DRAFT

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (Check all that apply): E1.

E2.

☐ 1. BELLS;
☐ 2. HORNS/SIRENS;
☐ 3. VERBAL (i.e., Shouting);
☐ 4. OTHER (Specify):

THE FOLLOWING LOCATION(S) WILL BE USED FOR AN EMERGENCY ASSEMBLY AREA(S) (e.g., Parking lot, street corner): E3.

Note: The Emergency Coordinator must account for all onsite employees and visitors after evacuation.

EVACUATION ROUTE S AND ALTERNATE EVACUATION ROUTES ARE DESCRIBED AS FOLLOWS: E4.

☐ 1. WRITTEN PROCEDURES DESCRIBING ROUTES, EXITS, AND ASSEMBLY AREAS;
☐ 2. EVACUATION MAP(S) DEPICTING ROUTES, EXITS, AND ASSEMBLY AREAS;
☐ 3. OTHER (Specify): E5.

Note: Evacuation procedures and/or maps should be posted in visible facility locations and must be included in the Contingency Plan.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following): F1.

☐ 1. HAVE BEEN DETERMINED NOT NECESSARY;
☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Note: Advance arrangements with local fire and police departments, hospitals, state and local emergency response teams, and/or emergency services contractors should be made for your facility, if necessary. Large Quantity Generators must describe arrangements in the Contingency Plan.

G. EMERGENCY EQUIPMENT

Check the applicable boxes to list emergency response equipment available at the facility, identify the location(s) where the equipment is kept, and indicate the equipment's capability, if applicable.

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION G2.	CAPABILITY G3.
EXAMPLE	☒ *CHEMICAL PROTECTIVE GLOVES*	*SPILL RESPONSE KIT*	*SINGLE USE, OIL RESISTANT ONLY*
Safety and First Aid	1. ☐ CHEMICAL PROTECTIVE SUITS, APRONS, AND/OR VESTS		
	2. ☐ CHEMICAL PROTECTIVE GLOVES		
	3. ☐ CHEMICAL PROTECTIVE BOOTS		
	4. ☐ SAFETY GLASSES, GOGGLES, AND FACE SHIELDS		
	5. ☐ HARD HATS		
	6. ☐ AIR-PURIFYING RESPIRATORS		
	7. ☐ SELF-CONTAINED BREATHING APPARATUS (SCBA)		
	8. ☐ FIRST AID KITS		
	9. ☐ PLUMBED EYEWASH FOUNTAIN AND/OR SHOWER		
	10. ☐ PORTABLE EYEWASH KITS AND/OR STATION		
	11. ☐ OTHER		
Fire Fighting	12. ☐ PORTABLE FIRE EXTINGUISHERS		
	13. ☐ FIXED FIRE SUPPRESSION SYSTEMS AND/OR SPRINKLERS		
	14. ☐ FIRE ALARM BOXES		
	15. ☐ OTHER		
Spill Control and Clean-Up	16. ☐ ALL-IN-ONE SPILL KIT		
	17. ☐ ABSORBENT MATERIAL		
	18. ☐ CONTAINER FOR USED ABSORBENT		
	19. ☐ BERM AND/OR DIKING EQUIPMENT		
	20. ☐ BROOM		
	21. ☐ SHOVEL		
	22. ☐ VACUUM		
	23. ☐ EXHAUST HOOD		
	24. ☐ SUMP AND/OR HOLDING TANK		
	25. ☐ CHEMICAL NEUTRALIZERS		
	26. ☐ GAS CYLINDER LEAK REPAIR KIT		
	27. ☐ SPILL OVERPACK DRUMS		
	28. ☐ OTHER		
Communi-cations and Alarm Systems	29. ☐ TELEPHONES (e.g., Cellular)		
	30. ☐ INTERCOM AND/OR PA SYSTEM		
	31. ☐ PORTABLE RADIOS		
	32. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT		
Other	33. ☐ OTHER		
	34. ☐ OTHER		

DRAFT

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases due to seismic motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply): H1.

- ☐ 1. HAZARDOUS MATERIALS AND/OR WASTE STORAGE AREAS
- ☐ 2. PROCESS LINES AND PIPING
- ☐ 3. LABORATORY
- ☐ 4. WASTE TREATMENT AREA

LOCATIONS (e.g., Shop, outdoor shed, lab): H2.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS AND/OR EQUIPMENT (Check all that apply): H3.

- ☐ 1. SHELVES, CABINETS AND/OR RACKS
- ☐ 2. TANKS AND SHUT-OFF VALVES
- ☐ 3. PORTABLE GAS CYLINDERS
- ☐ 4. EMERGENCY SHUT-OFF AND/OR UTILITY VALVES
- ☐ 5. SPRINKLER SYSTEMS
- ☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane tank)

LOCATIONS: H4.

I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify):

Check the applicable boxes below to indicate how the employee training program is administered.

☐ 1. FORMAL CLASSROOM ☐ 2. VIDEOS ☐ 3. SAFETY MEETINGS ☐ 4. STUDY GUIDES / MANUALS I1.

☐ 5. OTHER (Specify): _____ I2.

☐ 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES

☐ 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT I3.

☐ 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE I4.

EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

Large Quantity Generator Training: Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

Small Quantity Generator Training: Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

Hazardous Materials Business Plan Training: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

J. LIST OF ATTACHMENTS

Check one of the following: J1.

☐ 1. NO ATTACHMENTS ARE REQUIRED; or

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time. Consent to Inspect Given By. Thomas Gorndt

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2206	(2) 55 gallon drums of oil were not properly marked or labeled. SEE P. 2 for proper labeling + marking regs.	
2210	Begin program of weekly drum inspection, Chking for proper labeling marking + closed containers.	
229	Manifests 23776454 + 24921103 blue copies were not sent to DTSC, mail ASAP.	
2243	All employees must be thoroughly familiar with proper waste handling techniques relevant to their positions. & recommend haz. materials/waste training ASAP for personnel involved w/ haz. waste handling.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. *(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)*

THE OI IAL NOTICE OF INSPECTION . LAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection Your response must be mailed to the Santa Clara County Hazardous Materials,Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

Hazardous Waste Violations

- **Per H&SC, Section 25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC, Section 25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

NOTICE OF VIOLATION AT: Bellarmine College Preparatory
850 Elm St., San Jose EPA #CAD981576457

Dear Mr. Ahern:

On July 23, 1992 the Health Department - Office of Toxics Enforcement conducted an inspection at the above mentioned facility. As a result of that inspection, violations of the hazardous waste statutes (Health & Safety Code) and/or regulations (Title 22 California Code of Regulations) were found.

Upon receipt of this letter, Bellarmine College Preparatory must correct all deficiencies noted on the official inspection form by the dates stipulated. Juan Navarro, acting as a representative for this facility, signed the original form acknowledging receipt of a copy.

This office may conduct a reinspection of this facility to verify compliance. The issuance of this Notice of Violations does not preclude this department or any other agency having legal jurisdiction from taking administrative, civil, or criminal action as a result of the violations noted on the official inspection form.

If you have any questions regarding this notice, please contact Randy Mulrine at (408) 299-6930.

Sincerely,

Randy Mulrine

WASTE INVENTORY FORM

Please complete the following information:

Identify all waste streams generated by your facility. For each waste stream, identify the California Waste Code, annual quantities produced and current method of disposal for all waste manifested off site (ie., recycle (01), incineration (07), etc.) See the attached table for reference in selecting proper numerical codes for waste streams and disposal methods.

Waste Stream	CA Waste Code	Annual Quantity Generated	Current Disposal Method
(example) Paint waste	461	300 gal	01
Waste Oil	221	100 gal.	01

Summary of Violations & Notice to Comply

Program: PR0375040 - HAZARDOUS WASTE GENERATOR - 2201
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G001	M	**EPA ID NUMBER** Facility failed to obtain or maintain a valid EPA ID number. [Note: Federal EPA IDs are site-specific. California IDs are both site-specific and owner-specific.] ***Hazardous waste is generated and accumulated at the facilities maintenance building which is divided from the main campus by a public right-of-way. This location needs to have it's own EPA ID number.*** If your facility generates more than 100 kg of a RCRA (i.e., federally regulated) hazardous waste or accumulates 5,000 kilograms or more of federally-regulated Universal Waste, obtain a federal EPA ID by submitting EPA FORM 8700-12 to the U.S. Environmental Protection Agency. Otherwise, obtain or reactivate a California ID by submitting DTSC FORM 1358 to DTSC. Forms are available at www.dtsc.ca.gov. [CCR 66262.12, 66273.32(a)(1), 66273.32(b)]	
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Observed 55 gallon drum of waste water with clay residue in the Ceramics Studio. Per Juan Navarro, the waste water is poured down the drain after the clay is removed. Perform hazardous waste determination and submit results to HMCD within 30 days.*** ***Observed the following containers of hazardous materials that per Juan Navarro are no longer needed that are being stored on campus:*** ***- Field marking paints stored under Hedding Street overpass*** ***- 55 gallon drum of Formula 151 for boiler that is no longer in use next to the janitorial storage room*** ***- Various 5 gallon containers of chemicals on the ground outside the chemical cabinets in the facilities maintenance shop area*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]	

DRAFT

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0256790
Facility Name: BELLARMINE COLLEGE PREPARATORY
Site Address: 960 W HEDDING ST
SAN JOSE, CA 95126

Inspection Date: 4/16/2013

VC	Class	Violation	Corrective Actions Taken
G013	II	**ILLEGAL TRANSFER/TREATMENT/STORAGE/DISPOSAL** Facility failed to obtain a permit or authorization from DTSC for the treatment of an on-site generated hazardous waste, or the transfer, treatment, storage or disposal of an off-site generated hazardous waste. ***- Observed a broken glass disposal box in the Chemistry lab containing lab glassware with unknown chemicals.*** ***- Waste latex paints and aerosol cans are taken from the Art classroom to an offsite art studio for disposal per an art teacher.*** ***- Paint hardener is added to waste latex paints before disposing them in the regular trash in Machine shop for the Theatre.*** Immediately cease the illegal transfer, treatment, storage, or disposal of hazardous waste. [HSC 25189.5, CCR 66270.1]	
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***The following hazardous waste containers were missing the required markings:*** ***- Pint container with naphthalene waste and three other glass containers unknown waste in the chemical hood located in the Chemistry lab*** ***- Two pint containers marked as toxic waste and one pint container marked as metals waste in the chemical hood located in the Chemistry lab storage area*** ***- Box marked as "Hg Waste Hazardous" in a red chemical cabinet located in the Chemistry lab storage area*** ***- 55 gallon drum of used oil outside next to the Janitorial storage room*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G023	M	**CONTAINER OPEN** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***The following hazardous waste containers did not have required lids:*** ***- Pint container with naphthalene waste and three other pint containers with unknown waste in the chemical hood located in the Chemistry lab*** ***- Two pint containers marked as toxic waste and one pint containers marked as metals waste in the chemical hood located in the Chemistry lab storage area*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G402	M	**CONTAINER MARKING: CONTAMINATED CONTAINERS** Facility did not mark an empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. ***Observed the following empty containers that did not have the proper markings:*** ***- 55 gallon drum of Johnson wax*** Mark each empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. [CCR 66261.7(f)]

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0256790
Facility Name: BELLARMINE COLLEGE PREPARATORY
Site Address: 960 W HEDDING ST
SAN JOSE, CA 95126

Inspection Date: 4/16/2013

VC	Class	Violation	Corrective Actions Taken
G440	II	**ILLEGAL DISPOSAL OF UNIVERSAL WASTE** Facility disposed of Universal Waste to an unauthorized facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***- Used fluorescent light tubes are taken to the Orchard Supply Hardware take-back program. This program is for returns from household only (not businesses or schools).*** ***- Aerosol cans used in the Art classrooms are disposed of in the regular trash.*** Immediately cease illegal disposal activities. Make arrangements to transfer the waste to another Universal Waste handler or an appropriate recycling or disposal facility. For assistance in locating an appropriate destination facility, call (408) 299-7300. [CCR 66273.31(a)]	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Laboratory Waste Training*** ***The teachers managing the laboratory hazardous waste accumulation area located in the Chemistry prep room are not familiar with proper waste management requirements.*** ***The laboratory accumulation area must be managed under the control of one or more designated personnel who have received training commensurate with their responsibilities and authority for managing laboratory hazardous wastes, and unsupervised access to the laboratory accumulation area must be limited to personnel who have received training commensurate with their responsibilities and authority for managing laboratory hazardous wastes. [HSC 25200.3.1(a)-(b)]***	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Accumulation Time Limits*** ***Observed a half-full 55 gallon drum of used oil outside the Janitorial storage room that has been stored for longer than allowed. Motor oil changes are no longer performed on site and the last hazardous waste pick up receipt for used oil is from 2008.*** ***Facility accumulated hazardous waste on-site for longer than the time allowed for a Conditionally Exempt Small Quantity Generator (CESQG) generator of hazardous waste.*** ***Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 90 days from date 100 kg limit is reached. [CCR 66262.34(d)]***	

Comments: ***Please provide additional information:***

Provide MSDS for floor wax.
How are used paint rags in the Theatre Machine shop disposed of?
Where are sink traps under the sinks in the Chemistry lab disposed of when full?
Where are filters from the paint exhaust in the Art classroom area disposed of when replaced?
Where are alkaline batteries disposed of?

SANTA CLARA COUNTY CUPA
HAZARDOUS MATERIALS BUSINESS PLAN FOR FACILITIES IN SAN JOSE AND LOS ALTOS

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # *(Agency Use Only)*	4 3 0 0 0	1. EPA ID # (Hazardous Waste Only) 2.
BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)*	Bellarmine College Prep.	3
BUSINESS SITE ADDRESS	960 W. Hedding St.	103
BUSINESS SITE CITY	San Jose 104.	CA ZIP CODE 95126 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility...		If Yes, please complete these pages of the UPCF...
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release Prevention Program (CalARP)?	☐ YES ☒ NO 4a.	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5.	UST OPERATING PERMIT APPLICATION – FACILITY INFORMATION UST OPERATING PERMIT APPLICATION – TANK INFORMATION
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers?	☒ YES ☐ NO 8	No form required to CUPAs.
E. HAZARDOUS WASTE Generate hazardous waste?	☐ YES ☒ NO 9.	EPA ID NUMBER – provide at top of this page.
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	☐ YES ☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste onsite?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT NOTIFICATION – FACILITY PAGE ONSITE HAZARDOUS WASTE TREATMENT NOTIFICATION – UNIT PAGE (one page per unit)
Perform treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☐ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste?	☐ YES ☒ NO 14a.	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Serve as a Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS (You may also be required to provide additional information by your CUPA or local agency.) 15.

If this facility is subject to Cal ARP Program reporting requirements, you must also submit to Santa Clara County CUPA a completed California Accidental Release Prevention Program Registration Form (available at www.EHinfo.org/hazmat).

DRAFT

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☒ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☐ Other *(specify)* PA System

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance	Phone No.: **911**
California Emergency Management Agency	Phone No.: **(800) 852-7550**

b. Post-Incident Contacts:*

Santa Clara County CUPA	Phone No.: **(408) 918-3400**
Local Hazardous Materials Program	Phone No.: **(408) 918-3400**
California Department of Toxic Substances Control (DTSC)	Phone No.: **(510) 540-3739**
Cal/OSHA Division of Occupational Safety and Health	Phone No.: **(510) 794-2521**
Air Quality Management District	Phone No.: **(415) 771-6000**
Regional Water Quality Control Board	Phone No.: ( )

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center*	Phone No.: **(800) 876-4766**
Nearest Hospital: Name: O'Connor	Phone No.: (408) 947 - 2929
Address: 2405 Forrest Ave	City: San Jose

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the California Emergency Management Agency at (800) 852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(c)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

DRAFT

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☒ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☒ Chemical Protective Aprons/Coats		
	☐ Chemical Protective Boots		
	☒ Chemical Protective Gloves		
	☐ Chemical Protective Suits *(describe)*		
	☒ Face Shields		
	☒ First Aid Kits/Stations *(describe)*

* *Use the map and grid numbers from the Storage Map prepared for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed*

DRAFT

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☐	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☐	Location(s) and proper use of fire and spill control equipment
☐	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☐	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team.

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

Locally Reportable Hazardous Materials/Wastes **Facility Name:** _____

Local ordinance or fire code requires that an inventory of hazardous materials stored or handled in quantities below State HMBP reporting thresholds be included as a supplement to the HMBP inventory. Do not list HMBP-reportable materials/wastes on this page. For non-waste materials, report totals by hazard class and physical state (solids, liquids, gases).

Hazard Class	Non-Waste Hazardous Materials	Max. Qty. (at any one time)	Container Size (largest container)	Locations
		☐ gal. ☐ lbs. ☐ cu. ft.	☐ gal. ☐ lbs ☐ cu. ft

TOM,

A HARD COPY IS BEING MAILED TO YOUR ATTENTION TODAY.

THANKS FOR YOUR HELP.

DRAFT

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e. red bag) wastes on this form.

bcc
Subject Bellarmine College Prep School

Mike:

Happy New Year!

This is to inform you of my findings during the 12-27-06 inspection of the above referenced site.

I met with Thomas Gorndt as well as facility staff and responded to your complaint.

The disposal sink in question had already been sealed off, and improper disposal of waste was not occurring.

Thomas was not aware of how long this practice of paint/water/solvent disposal had taken place.

They have agreed to re-submit their permit application for paint waste, and they will be repermitted to include paint waste. They have agreed to take Title 22 Haz. Waste training and begin a program of waste collection and proper disposal. I have hooked them up with our Small Generator Program, if they desire.

They had violations related to their waste oil.

They were instructed to do a waste determination on paint waste that is in question. They were instructed not to evaporate paint waste, and to contact BAAQMD with questions.

Please contact me if you have further questions.

Thomas Gorndt:

I have faxed you this morning, a new application for your permit.

Your hazardous paint and solvent or water waste volume needs to be added so you are permitted correctly. This should have been listed before, if it was hazardous waste.

Please call me if you have any questions. I would like this application returned within 10 days.

2044 REV 8/06

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

RE: Inspection Notice Dated 9/6/05

Dear Sir,

Bellarmine College Prep has rectified the following items:

1. The 55 gallon container is properly labeled in compliance with the Code.
2. The current hazardous waste generator permit has been posted as recommended.
3. A 55 gallon container has been obtained to handle used absorbent.

Sincerely,

Thomas L. Gorndt
Controller

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2206	One [55] gallon container of used motor oil was not properly marked. See label & marking requirements on p. 2.	
	Check on hazardous waste generator permit. Past as recommended	
	-recommend obtain 55 gal drum for recycling used absorbant.	

ENTERED SEP 2005

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

Signature of Owner/Operator: _____ Title: _____ Date: ___/___/___

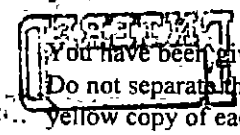
FACILITY SENDS YELLOW COPY TO AGENCY; KEEPS PINK COPY.

RDW

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.



What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

Hazardous Waste Violations

- **Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

* *Solids must be reported in pounds. Liquids may be reported in either pounds or gallons.*

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara. I hereby certify that the submitted information is true, accurate, and complete. I understand that a new application will be required if this facility changes ownership, moves, or begins generating hazardous wastes which are not listed on this application.

Signature of Owner/Operator: [signature] Title: Asst Controller Date: 4/22/04

DRAFT

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e. red bag) wastes on this form.

Summary of Violations & Notice to Comply

Program: CO0141986 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: COMPLAINT INSPECTION-COMPLETED

Comments / Observations

A referral was received to investigate improper hazardous waste disposal at the above named facility. The referral said that paint brushes are being cleaned with gas and the liquid is being poured down the drain in the Janitorial shop and Gardener's shop.

On this date, I met with Ron Miller, Chief Financial Officer, who said that cleaning paint brushes with gas and pouring the liquid down the drain is not an accepted procedure at this facility. Ron Miller and Juan Navarro, Director of Maintenance, accompanied me on an inspection of both the Custodial area and Landscaping area. I observed paint containers and gasoline cans inside separate storage cabinets in the secured Landscaping area and various cleaning products stored on shelves in the Custodial shop. I checked the bathroom sinks in the Landscaping shop and Custodial shop and did not observe any discoloration or staining. I did not see any evidence of illegal hazardous waste disposal.

Mr. Miller was notified that this was an anonymous complaint. Mr. Miller said that they are aware that pouring hazardous materials, including paints and gasoline, down the drain is not allowed and that as far as he knew is not being done at this facility.

A routine Hazardous Waste Generator and Hazardous Materials Business Plan inspection will be scheduled in the near future.

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC §§25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

VC	Class	Violation	Corrective Actions Taken
G043	M	**MANIFEST RETENTION [3010010]** Facility failed to retain the original and/or treatment/storage/disposal facility (TSDF) -signed copy of a Uniform Hazardous Waste Manifest. ***Facility was unable to provide disposal records for 2018 or 2017.*** Obtain a copy of each missing manifest. Keep the original manifest copy until you receive the TSDF-signed copy of that manifest. Keep the TSDF-signed copy for 3 years from the date of waste shipment. [CCR 66262.40(a)]	
G240	M	**MANIFEST EXCEPTION REPORTING: SQG [3010030]** Facility failed to submit an exception report to DTSC when they did not receive the TSDF-signed copy of a manifest within 60 days of a waste shipment. ***Facility was not able to provide the returned copy for the following manifests:*** ***013459369FLE*** ***013460414FLE*** Submit an exception report to: DTSC Report Repository, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806. Include a legible copy of the manifest and indicate that you have not received confirmation of waste delivery. [HSC 25123.3(h)(2); CCR 66262.42(a), (c), (d)]	

Comments: Conducted a Hazardous Waste Generator Routine Inspection with Mickey Pierce from Hazardous Waste Compliance Division. Waste ID CAD981576457 is currently active.

This facility is a college preparatory school campus with the following Departments generating waste:
Maker's Lab creates various interdisciplinary skills for students to integrate wood working, 3D printers, soldering and other techniques to accomplish a complex project. One of the laser cutters generates a waste water that is gravity feed through a large filter sock and then the water is disposed of down the drain.
-Solder dross
-Fine metal debris

Science Labs, including chemistry, advanced chemistry, biology, marine biology, etc., have a shared galley area where hazardous wastes are collected and stored until pick up. Hoods in the classroom has filters that are changed out once every year and disposed of as hazardous waste. They use Flinn Lab Packs and lesson plans for their chemistry-based curriculum and do not have any formaldehyde-based dissections, using fresh specimens instead. Glassware with chemical residues are disposed of with the hazardous waste.
-Liquid acids
-Liquid bases
-Solid inorganics
-Solvents

Robotics Shop has a large CNC machine with a drill press and some woodworking machinery. As per Quirino, the machines are disposed of by a third party:
-Used oil
-Metal turnings or shavings
-5 gallon bucket of compressor bleed water/oil (outside near propane storage area)

Maintenance Shop is the general area where the general hazardous waste, grounds keeping equipment, paint and other items are stored:
-Abandoned waste
-Universal waste

Ceramics department rinses the glazes into a common 55 gallon drum where the glaze is allowed to settle, then it is sifted, condition and re-used to create future glazes. A paint booth is located in the back and the hoppers are also rinsed in the 55

DRAFT

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0256790 **Inspection Date:** 11/14/2019
Facility Name: BELLARMINE COLLEGE PREPARATORY
Site Address: 960 W HEDDING ST, SAN JOSE, CA 95126

Summary of Violations & Notice to Comply

gallon glaze rinse drum. Clay is collected in the various sink-areas where they are allowed to dry and then thrown out in the trash:
-Used glazes (no waste generated yet since they recycle in house)

Inspected interior and exterior of facility, trash cans and dumpsters. Inspection included review of all available hazardous waste disposal receipts.

Employees demonstrated that they have a thorough knowledge proper hazardous waste management as it relates to their Department.

Emergency equipment was available and fire extinguishers are annually serviced.

This facility is currently permitted for "waste oil only", however based on the observed waste streams, this permit will be changed to a general small quantity waste generation permit.

The following violations were corrected at the time of inspection:
G020 Markings:
The following hazardous waste container was inadequately marked or labeled:
-1 x 5 gallon bucket of solid inorganic metals was missing accumulation start date and hazard properties. Those items were added to the label during the inspection

Note for Facility:
Advised the Ceramics instructor to refrain from using the used glaze (from the 55 gallon drum of glaze rinse) on pottery for the express purpose of then disposing of in the trash, however the re-used glaze may be used for its original intended purpose. Additionally, the Maker's Lab gives the Ceramics Department the collected garnet/metal debris from the cutting machine to use in their clay, but as per Ceramics, he has not yet found a use for it in the ceramics class. Advise disposing of this garnet/metal debris as hazardous waste since adding this waste to the clay may make the clay a hazardous waste.

Unresolved Issues:
As per the Maker's Lab instructor, the waste water coming out of the ProtoMax cutting machine disposes of water down the drain after running through a proprietary filter sock. This waste water may have California-regulated heavy metals which may not be captured by the filtration system prior to entering the sewer. Provide the inspector with metal alloy spec sheets.

The robotics lab generates large amounts of metal turnings and shavings from various alloys, in order to determine how to properly manage this waste provide the inspector a metals spec sheet.

Program: PR0396936 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B106	M	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility operator failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***Robotics Lab:*** ***-55 gallon container of used oil was not disclosed on the recent HMBP submittal*** ***-Disclosed quantity of propane was 10.65 gallons. 35 gallons were observed stored outside of the rear door*** ***Pool House:*** ***-Hypocholorite Briquettes of 800 pounds were listed 3 times. Removed extra entries*** Within 30 days, electronically submit a HMBP, including an accurate Hazardous Materials Inventory, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 6.95 25505(a)(1), 25506, 25508(a)(1)]	

Comments: Conducted an Hazardous Materials Business Plan (HMBP) Routine Inspection with Mickey Pierce from Hazardous Materials Compliance Division.

The HMBP was readily available to relevant employees electronically/via hard copy. The last HMBP was submitted on 9/30/2019 via CERS. CERS ID 103566694.

The following reportable hazardous materials were observed during the inspection

Pool House:
-Muriatic Acid at 90 gallons

Grounds Shop:
-Propane at 28 gallons

Campus Generator:
-Diesel fuel at 100 gallons (to be confirmed by facility)

Robotics Shop:
-Used oil at 55 gallons
-Propane at 35 gallons

Maintenance Shop:
-Latex paints at 110 gallons
-Propane at 82 gallons

Notes:

Annual Emergency Response Training was performed, and documentation is kept for 3 years.

The business owner is the property owner.

☐ Samples Taken

Summary of Violations & Notice to Comply

Program: PR0375040 - HAZARDOUS WASTE GENERATOR - 2201
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G001	M	**EPA ID NUMBER** Facility failed to obtain or maintain a valid EPA ID number. [Note: Federal EPA IDs are site-specific. California IDs are both site-specific and owner-specific.] ***Hazardous waste is generated and accumulated at the facilities maintenance building which is divided from the main campus by a public right-of-way. This location needs to have it's own EPA ID number.*** If your facility generates more than 100 kg of a RCRA (i.e., federally regulated) hazardous waste or accumulates 5,000 kilograms or more of federally-regulated Universal Waste, obtain a federal EPA ID by submitting EPA FORM 8700-12 to the U.S. Environmental Protection Agency. Otherwise, obtain or reactivate a California ID by submitting DTSC FORM 1358 to DTSC. Forms are available at www.dtsc.ca.gov. [CCR 66262.12, 66273.32(a)(1), 66273.32(b)]	
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Observed 55 gallon drum of waste water with clay residue in the Ceramics Studio. Per Juan Navarro, the waste water is poured down the drain after the clay is removed. Perform hazardous waste determination and submit results to HMCD within 30 days.*** ***Observed the following containers of hazardous materials that per Juan Navarro are no longer needed that are being stored on campus:*** ***- Field marking paints stored under Hedding Street overpass*** ***- 55 gallon drum of Formula 151 for boiler that is no longer in use next to the janitorial storage room*** ***- Various 5 gallon containers of chemicals on the ground outside the chemical cabinets in the facilities maintenance shop area*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/ls/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]

G013	II	**ILLEGAL TRANSFER/TREATMENT/STORAGE/DISPOSAL** Facility failed to obtain a permit or authorization from DTSC for the treatment of an on-site generated hazardous waste, or the transfer, treatment, storage or disposal of an off-site generated hazardous waste. ***- Observed a broken glass disposal box in the Chemistry lab containing lab glassware with unknown chemicals.*** ***- Waste latex paints and aerosol cans are taken from the Art classroom to an offsite art studio for disposal per an art teacher.*** ***- Paint hardener is added to waste latex paints before disposing them in the regular trash in Machine shop for the Theatre.*** Immediately cease the illegal transfer, treatment, storage, or disposal of hazardous waste. [HSC 25189.5, CCR 66270.1]	
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***The following hazardous waste containers were missing the required markings:*** ***- Pint container with naphthalene waste and three other glass containers unknown waste in the chemical hood located in the Chemistry lab*** ***- Two pint containers marked as toxic waste and one pint container marked as metals waste in the chemical hood located in the Chemistry lab storage area*** ***- Box marked as "Hg Waste Hazardous" in a red chemical cabinet located in the Chemistry lab storage area*** ***- 55 gallon drum of used oil outside next to the Janitorial storage room*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G023	M	**CONTAINER OPEN** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***The following hazardous waste containers did not have required lids:*** ***- Pint container with naphthalene waste and three other pint containers with unknown waste in the chemical hood located in the Chemistry lab*** ***- Two pint containers marked as toxic waste and one pint containers marked as metals waste in the chemical hood located in the Chemistry lab storage area*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G402	M	**CONTAINER MARKING: CONTAMINATED CONTAINERS** Facility did not mark an empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. ***Observed the following empty containers that did not have the proper markings:*** ***- 55 gallon drum of Johnson wax*** Mark each empty hazardous material/waste container larger than 5 gallons in capacity with the date it was emptied. [CCR 66261.7(f)]	

DRAFT

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0256790
Facility Name: BELLARMINE COLLEGE PREPARATORY
Site Address: 960 W HEDDING ST
SAN JOSE, CA 95126

Inspection Date: 4/16/2013

VC	Class	Violation	Corrective Actions Taken
G440	II	**ILLEGAL DISPOSAL OF UNIVERSAL WASTE** Facility disposed of Universal Waste to an unauthorized facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***- Used fluorescent light tubes are taken to the Orchard Supply Hardware take-back program. This program is for returns from household only (not businesses or schools).*** ***- Aerosol cans used in the Art classrooms are disposed of in the regular trash.*** Immediately cease illegal disposal activities. Make arrangements to transfer the waste to another Universal Waste handler or an appropriate recycling or disposal facility. For assistance in locating an appropriate destination facility, call (408) 299-7300. [CCR 66273.31(a)]	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Laboratory Waste Training*** ***The teachers managing the laboratory hazardous waste accumulation area located in the Chemistry prep room are not familiar with proper waste management requirements.*** ***The laboratory accumulation area must be managed under the control of one or more designated personnel who have received training commensurate with their responsibilities and authority for managing laboratory hazardous wastes, and unsupervised access to the laboratory accumulation area must be limited to personnel who have received training commensurate with their responsibilities and authority for managing laboratory hazardous wastes. [HSC 25200.3.1(a)-(b)]***	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Accumulation Time Limits*** ***Observed a half-full 55 gallon drum of used oil outside the Janitorial storage room that has been stored for longer than allowed. Motor oil changes are no longer performed on site and the last hazardous waste pick up receipt for used oil is from 2008.*** ***Facility accumulated hazardous waste on-site for longer than the time allowed for a Conditionally Exempt Small Quantity Generator (CESQG) generator of hazardous waste.*** ***Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 90 days from date 100 kg limit is reached. [CCR 66262.34(d)]***	

Comments: ***Please provide additional information:***

Provide MSDS for floor wax.
How are used paint rags in the Theatre Machine shop disposed of?
Where are sink traps under the sinks in the Chemistry lab disposed of when full?
Where are filters from the paint exhaust in the Art classroom area disposed of when replaced?
Where are alkaline batteries disposed of?

RECORD. SEE www.EHinfo.org/hazmat FOR MORE DETAILS REGARDING ELECTRONIC REPORTING REQUIREMENTS.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/16/2013, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Inspection Date: 11/14/2019

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G043	M	**MANIFEST RETENTION [3010010]** Facility failed to retain the original and/or treatment/storage/disposal facility (TSDF) -signed copy of a Uniform Hazardous Waste Manifest. ***Facility was unable to provide disposal records for 2018 or 2017.*** Obtain a copy of each missing manifest. Keep the original manifest copy until you receive the TSDF-signed copy of that manifest. Keep the TSDF-signed copy for 3 years from the date of waste shipment. [CCR 66262.40(a)]	
G240	M	**MANIFEST EXCEPTION REPORTING: SQG [3010030]** Facility failed to submit an exception report to DTSC when they did not receive the TSDF-signed copy of a manifest within 60 days of a waste shipment. ***Facility was not able to provide the returned copy for the following manifests:*** ***013459369FLE*** ***013460414FLE*** Submit an exception report to: DTSC Report Repository, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806. Include a legible copy of the manifest and indicate that you have not received confirmation of waste delivery. [HSC 25123.3(h)(2); CCR 66262.42(a), (c), (d)]	

Comments: Conducted a Hazardous Waste Generator Routine Inspection with Mickey Pierce from Hazardous Waste Compliance Division. Waste ID CAD981576457 is currently active.

This facility is a college preparatory school campus with the following Departments generating waste:
Maker's Lab creates various interdisciplinary skills for students to integrate wood working, 3D printers, soldering and other techniques to accomplish a complex project. One of the laser cutters generates a waste water that is gravity feed through a large filter sock and then the water is disposed of down the drain.
-Solder dross
-Fine metal debris

Science Labs, including chemistry, advanced chemistry, biology, marine biology, etc., have a shared galley area where hazardous wastes are collected and stored until pick up. Hoods in the classroom has filters that are changed out once every year and disposed of as hazardous waste. They use Flinn Lab Packs and lesson plans for their chemistry-based curriculum and do not have any formaldehyde-based dissections, using fresh specimens instead. Glassware with chemical residues are disposed of with the hazardous waste.
-Liquid acids
-Liquid bases
-Solid inorganics
-Solvents

Robotics Shop has a large CNC machine with a drill press and some woodworking machinery. As per Quirino, the machines are disposed of by a third party:
-Used oil
-Metal turnings or shavings
-5 gallon bucket of compressor bleed water/oil (outside near propane storage area)

Maintenance Shop is the general area where the general hazardous waste, grounds keeping equipment, paint and other items are stored:
-Abandoned waste
-Universal waste

Ceramics department rinses the glazes into a common 55 gallon drum where the glaze is allowed to settle, then it is sifted, condition and re-used to create future glazes. A paint booth is located in the back and the hoppers are also rinsed in the 55

DRAFT

Summary of Violations & Notice to Comply

gallon glaze rinse drum. Clay is collected in the various sink-areas where they are allowed to dry and then thrown out in the trash:
-Used glazes (no waste generated yet since they recycle in house)

Inspected interior and exterior of facility, trash cans and dumpsters. Inspection included review of all available hazardous waste disposal receipts.

Employees demonstrated that they have a thorough knowledge proper hazardous waste management as it relates to their Department.

Emergency equipment was available and fire extinguishers are annually serviced.

This facility is currently permitted for "waste oil only", however based on the observed waste streams, this permit will be changed to a general small quantity waste generation permit.

The following violations were corrected at the time of inspection:
G020 Markings:
The following hazardous waste container was inadequately marked or labeled:
-1 x 5 gallon bucket of solid inorganic metals was missing accumulation start date and hazard properties. Those items were added to the label during the inspection

****Note for Facility:***
Advised the Ceramics instructor to refrain from using the used glaze (from the 55 gallon drum of glaze rinse) on pottery for the express purpose of then disposing of in the trash, however the re-used glaze may be used for its original intended purpose. Additionally, the Maker's Lab gives the Ceramics Department the collected garnet/metal debris from the cutting machine to use in their clay, but as per Ceramics, he has not yet found a use for it in the ceramics class. Advise disposing of this garnet/metal debris as hazardous waste since adding this waste to the clay may make the clay a hazardous waste.

*****Unresolved Issues:***
As per the Maker's Lab instructor, the waste water coming out of the ProtoMax cutting machine disposes of water down the drain after running through a proprietary filter sock. This waste water may have California-regulated heavy metals which may not be captured by the filtration system prior to entering the sewer. Provide the inspector with metal alloy spec sheets.

The robotics lab generates large amounts of metal turnings and shavings from various alloys, in order to determine how to properly manage this waste provide the inspector a metals spec sheet.

Program: PR0396936 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B106	M	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility operator failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***Robotics Lab:*** ***-55 gallon container of used oil was not disclosed on the recent HMBP submittal*** ***-Disclosed quantity of propane was 10.65 gallons. 35 gallons were observed stored outside of the rear door*** ***Pool House:*** ***-Hypocholorite Briquettes of 800 pounds were listed 3 times. Removed extra entries*** Within 30 days, electronically submit a HMBP, including an accurate Hazardous Materials Inventory, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 6.95 25505(a)(1), 25506, 25508(a)(1)]	

Comments: Conducted an Hazardous Materials Business Plan (HMBP) Routine Inspection with Mickey Pierce from Hazardous Materials Compliance Division.

The HMBP was readily available to relevant employees electronically/via hard copy. The last HMBP was submitted on 9/30/2019 via CERS. CERS ID 103566694.

The following reportable hazardous materials were observed during the inspection

Pool House:
-Muriatic Acid at 90 gallons

Grounds Shop:
-Propane at 28 gallons

Campus Generator:
-Diesel fuel at 100 gallons (to be confirmed by facility)

Robotics Shop:
-Used oil at 55 gallons
-Propane at 35 gallons

Maintenance Shop:
-Latex paints at 110 gallons
-Propane at 82 gallons

Notes:

Annual Emergency Response Training was performed, and documentation is kept for 3 years.

The business owner is the property owner.

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

DRAFT

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
CERS	California Environmental Reporting System (cers.calepa.ca.gov)
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $50,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC §§25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i), 25289(b)].

Summary of Violations & Notice to Comply

Program: PR0375040 - HAZARDOUS WASTE GENERATOR - 2201
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G001	M	**EPA ID NUMBER** Facility failed to obtain or maintain a valid EPA ID number. [Note: Federal EPA IDs are site-specific. California IDs are both site-specific and owner-specific.] ***Hazardous waste is generated and accumulated at the facilities maintenance building which is divided from the main campus by a public right-of-way. This location needs to have it's own EPA ID number.*** If your facility generates more than 100 kg of a RCRA (i.e., federally regulated) hazardous waste or accumulates 5,000 kilograms or more of federally-regulated Universal Waste, obtain a federal EPA ID by submitting EPA FORM 8700-12 to the U.S. Environmental Protection Agency. Otherwise, obtain or reactivate a California ID by submitting DTSC FORM 1358 to DTSC. Forms are available at www.dtsc.ca.gov. [CCR 66262.12, 66273.32(a)(1), 66273.32(b)]	SEE ATTACHED RESPONSE DATED MAY 10, 2013
G010	II	**HAZARDOUS WASTE DETERMINATION** Facility failed to determine whether a waste is a hazardous waste and/or keep copies of test results, waste analyses or other hazardous waste determination records. ***Observed 55 gallon drum of waste water with clay residue in the Ceramics Studio. Per Juan Navarro, the waste water is poured down the drain after the clay is removed. Perform hazardous waste determination and submit results to HMCD within 30 days.*** ***Observed the following containers of hazardous materials that per Juan Navarro are no longer needed that are being stored on campus:*** ***- Field marking paints stored under Hedding Street overpass*** ***- 55 gallon drum of Formula 151 for boiler that is no longer in use next to the janitorial storage room*** ***- Various 5 gallon containers of chemicals on the ground outside the chemical cabinets in the facilities maintenance shop area*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.dhs.ca.gov/ps/is/elap/. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11, 66262.40(c)]

G999	M ✓	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Laboratory Waste Training*** ***The teachers managing the laboratory hazardous waste accumulation area located in the Chemistry prep room are not familiar with proper waste management requirements.*** ***The laboratory accumulation area must be managed under the control of one or more designated personnel who have received training commensurate with their responsibilities and authority for managing laboratory hazardous wastes, and unsupervised access to the laboratory accumulation area must be limited to personnel who have received training commensurate with their responsibilities and authority for managing laboratory hazardous wastes. [HSC 25200.3.1(a)-(b)]***	
G999	M ✓	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Accumulation Time Limits*** ***Observed a half-full 55 gallon drum of used oil outside the Janitorial storage room that has been stored for longer than allowed. Motor oil changes are no longer performed on site and the last hazardous waste pick up receipt for used oil is from 2008.*** ***Facility accumulated hazardous waste on-site for longer than the time allowed for a Conditionally Exempt Small Quantity Generator (CESQG) generator of hazardous waste.*** ***Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 90 days from date 100 kg limit is reached. [CCR 66262.34(d)]***	

Comments: ***Please provide additional information:***

SEE ATTACHED

Provide MSDS for floor wax.
How are used paint rags in the Theatre Machine shop disposed of?
Where are sink traps under the sinks in the Chemistry lab disposed of when full?
Where are filters from the paint exhaust in the Art classroom area disposed of when replaced?
Where are alkaline batteries disposed of?

Program: PR0396936 - HAZMAT BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken

Comments:
EFFECTIVE JANUARY 1, 2013, STATE LAW REQUIRES THAT HAZARDOUS MATERIALS BUSINESS PLAN (HMBP) SUBMITTALS BE SUBMITTED ELECTRONICALLY VIA THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WEBSITE AT http://cers.calepa.ca.gov. PLEASE SEARCH CERS AND REQUEST ACCESS TO YOUR FACILITY RECORD BEFORE CREATING A NEW FACILITY

DRAFT

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0256790
Facility Name: BELLARMINE COLLEGE PREPARATORY
Site Address: 960 W HEDDING ST
SAN JOSE, CA 95126

Inspection Date: 4/16/2013

RECORD. SEE www.EHinfo.org/hazmat FOR MORE DETAILS REGARDING ELECTRONIC REPORTING REQUIREMENTS.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/16/2013, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Received By: THOMAS GORNSO 4/18/13

Inspected By: JOANNE TRACEY - EE0010321
CA UST Inspector #8143744, Exp. 01/27/2014

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Official Notice of Inspection for Bellarmine College Preparatory

VC	Class	Violation
G001	M	EPA ID Number --- an EPA number application has been submitted for Bellarmine owned property at 779 Stockton St., San Jose.
G010	II	Hazardous Waste Determination 55 Gallon drum of waste water with clay residue. An MSDS for the clay indicates that there are no heavy metals in the material. All of the materials identified in the inspection are scheduled for removal by an authorized disposal company in early June, 2013.
G013	II	Illegal Transfer/Treatment/Storage/Disposal Appropriate disposal containers have been ordered from a science supply company will be placed in the Science Dept. Training was held on May 1, 2013 with the faculty members of both the Art and Science departments and the members were directed to place broken glass, waste paint, and aerosol cans in the containers. The theater tech shop will no longer use paint hardener.
G020	M	Marking of Hazardous Waste Members of the Science Department were directed to place waste chemicals in properly marked containers. Waste chemicals and used motor oil will be disposed of by an authorized disposal company in early June, 2013.
G023	M	Container Open Appropriate covered disposal containers have been ordered from a science supply company and will be placed in the department when received.

DRAFT

VC	Class	Violation
G402	M	Container Marking: Contaminated Containers
		55 Gallon drum of Johnson Wax has been properly marked.
G440	II	Illegal Disposal of Universal Waste
		Used fluorescent light tubes will be disposed of at an authorized location in early June, 2013. Employees have been educated that all aerosol paint cans will be disposed by the school and should not be taken home.
G999	M	Other Hazardous Waste Violation
		Laboratory Waste Training was conducted with all members of the Science Department on May 1, 2013.
G999	M	Other Hazardous Waste Violation
		Used motor oil and other hazardous materials that have exceeded their storage limits will be removed by an authorized storage company in early June, 2013. A routine has been established that at the conclusion of each school year it is the responsibility of the Art and Science employees to identify all waste materials, place them in the proper containers and mark them for disposal. All hazardous waste materials will be disposed of by an authorized disposal company and removed in early June of each year.

Response to Comments:

Provide MSDS for floor wax --- we are in the process of securing the MSDS and will forward upon receipt

How are used paint rags disposed --- in the future paint rags will be turned over to an authorized disposal agent.

Where are sink traps in Chem Lab disposed --- in the future materials in the traps will be turned over to an authorized disposal agent at the end of each school year.

Where are the filters in the Art Room disposed --- in the future the filters will be turned over to an authorized disposal agent.

Where are alkaline batteries disposed --- all batteries are disposed of through the County of Santa Clara Fluorescent Light and Battery Voluntary Recycling Program.

Waste Code By Year Matrix Report

The Department of Toxic Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However because of the large number of manifests handled inaccuracies in the submitted data and limitations of the manifest system and the technical limitations of the database DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Records Requested

Hello, I am looking to obtain electronic copies of all records from the following departments: (1) Environmental Services - records pertaining to hazardous materials, aboveground storage tanks, and underground storage tanks (2) Fire Department - fire inspections and code violations (3) Building Department- all building permits (current and historical) on file for the property located at: Bellarmine College Prep--> 850 Elm Street; 740, 760, 780 Emory Street; 911, 931, 959

DRAFT

University Avenue; 944, 946, 964, 974 W Hedding Street, 896 Myrtle Street, San Jose (APNs: 26111005, 26112074, 26112087, 26112002, 26112003, 26112004, 26110073, 26110105, 26110095, 26110096)

Requests must be focused and reasonably describe the record(s) being sought. Try to be as clear as possible when requesting records and put date limits on your request. Offer any search clues you can and if you are informed that the records you are requesting do not exist, discuss alternatives with the City staff to whom you are making the request.

Mr. John Ahearn, Jr.
Controller
Bellarmine College Preparatory School
850 Elm Street
San Jose, CA 95116

Dear Mr. Ahearn:

Subject: Underground Storage Tank Case Closure—Pac West, 795 West Hedding, San Jose, CA; Case No. 07S1W12B02f

This letter confirms the completion of site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Enclosed is the Case Closure Summary for the referenced site for your records.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e).

Please contact Ms. Christine Tulloch at the Santa Clara Valley Water District's Camden Office, (408) 927-0710, extension 2636, if you have any questions in this matter.

Sincerely,

ORIGINAL SIGNED BY

James S. Crowley, P.E.

1	10,000	Diesel	Removed	3/20/91
2	10,000	Gasoline	Removed	3/20/91
Piping			Removed	3/20/91

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown		
Site characterization complete? Yes	Date Approved By Oversight Agency: 9/14/92	
Monitoring wells installed? No	Number: —	Proper screened interval? Yes No
Highest GW Depth Below Ground Surface: NA	Lowest Depth: —	Flow Direction: —
Most Sensitive Current Use: Potential drinking water		

Summary of Production Wells in Vicinity: Not assessed due to localized contamination in soil.	
Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Basin
Is surface water affected? No	Nearest SW Name: —
Off-Site Beneficial Use Impacts (Addresses/Locations): None reported	
Reports on file? Yes	Where are reports filed? Santa Clara Valley Water District

DRAFT

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL			
Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	Two 10,000-gallon	H & H Ship Service	3/21/91
Piping	Unknown	Assumed with tank	—
Free Product	None	—	—
Soil	1,100 cubic yards	Treated on site to nondetectable	4/9/92
Groundwater	None	—	—
Barrels	None	—	—

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS—BEFORE AND AFTER CLEANUP

Contaminant	Soil (ppm)		Water (ppb)		Contaminant	Soil (ppm)		Water (ppb)	
	Before	After	Before	After		Before	After	Before	After
TPH (Gas)	ND	ND	NA	NA	Xylene	82	ND	NA	NA
TPH (Diesel)	1,600	2.9	NA	NA	Ethylbenzene	19	ND	NA	NA
Benzene	0.02	ND	NA	NA	Oil & Grease	NA	NA	NA	NA
Toluene	19	ND	NA	NA	Heavy Metals	NA	NA	NA	NA
Other (8240/8270)	NA	NA	NA	NA	Other	NA	NA	NA	NA

Description of Interim Remediation Activities: 1,100 cubic yards of soil was overexcavated. A verification soil sampling indicates that the overexcavation removed most contaminated soil and the extent of contamination was sufficiently defined.

DRAFT

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: No	Number Decommissioned: 0	Number Retained: 0
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

V. ADDITIONAL COMMENTS, DATA, ETC.

Conclusion: The overexcavation activities were effective. The extent of soil contamination was adequately defined. Groundwater is not expected to have been affected by the release.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Christine A. Tulloch	Title: Water Quality Specialist
Signature:	Date: 6/17/96
Approved by: James S. Crowley, P.E.	Title: Associate Civil Engineer
Signature:	Date: 6/17/96

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

Walnut Creek, California 94596

Subject: Fuel Leak Case Closure at Sartori's Auto Center, 795 Stockton Avenue, San Jose, Case No. 14-408, SCVWDID No. 07S1W12A04f

Dear Mr. Price:

We are in receipt of your letter dated September 13, 2013 (Letter). In the Letter you clarify the sample locations and concentration of benzene remaining on the property after the excavation was completed. Based on this clarification, we concur with the concentration as presented in the table titled Maximum Documented Contamination Concentrations After Cleanup on page two of the Letter (Attached). **The maximum concentration of benzene remaining on the property is actually 0.15 parts per million (ppm) – not 1.2 ppm as described in our Case Closure Summary dated June 6, 2012 and letter dated October 26, 2012.**

Please note that when the case was evaluated and determined to be eligible for closure we prepared our 2012 closure documentation based on the information and data presented at that time. Your clarification of the previously presented data showing lower levels of maximum concentration of benzene remaining on the property, although insufficient to officially reopen the case, does confirm our prior case closure decision.

This letter will be uploaded to both GeoTracker and the County website, along with the original closure documents.

We appreciate the clarification you provided and hope that this letter will be sufficient to clarify the concentration of benzene remaining at the site.

Please feel free to contact me at (408) 918-1976 if you have any questions.

Sincerely,

Michael Balliet
Hazardous Materials Program Manager

San Jose, CA 95112-2716

Re: *795 Stockton Ave., San Jose/Sartori's Auto*

Dear Messrs:

This letter follows up on numerous written and verbal communications between my client, Mr. Tron Do who owns 795 Stockton, Bellarmine College Preparatory the prospective buyer of 795 Stockton, and your offices, regarding the 'closure' documents issued by your office concerning the above-referenced property. While I understand that there have been several topics discussed, this letter focuses on one.

This letter is written to clearly and unambiguously state the highest level of contaminants known to exist at the property after the excavation work was completed, and before the *in-situ* remedial work was conducted. Specifically, the level of highest level of benzene identified in the soil of the property post-excavation and pre- *in-situ* remediation was 0.15 ppm, not 1.2 ppm as stated in the "Closure Report", and it was found at 19' below ground surface, near the edge of the property bordering the adjacent parking lot to the west/southwest (Figure 1, sample OX-6). All of the soil from within the excavation was removed and disposed offsite as depicted on the attached Figure 1. The sample identified in the Closure Report as containing the highest level of benzene remaining in soil, OX-2, was excavated, hauled off-site, and disposed.

In the existing 'closure' documents, the following are identified as the highest levels remaining at the site:

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS AFTER CLEANUP

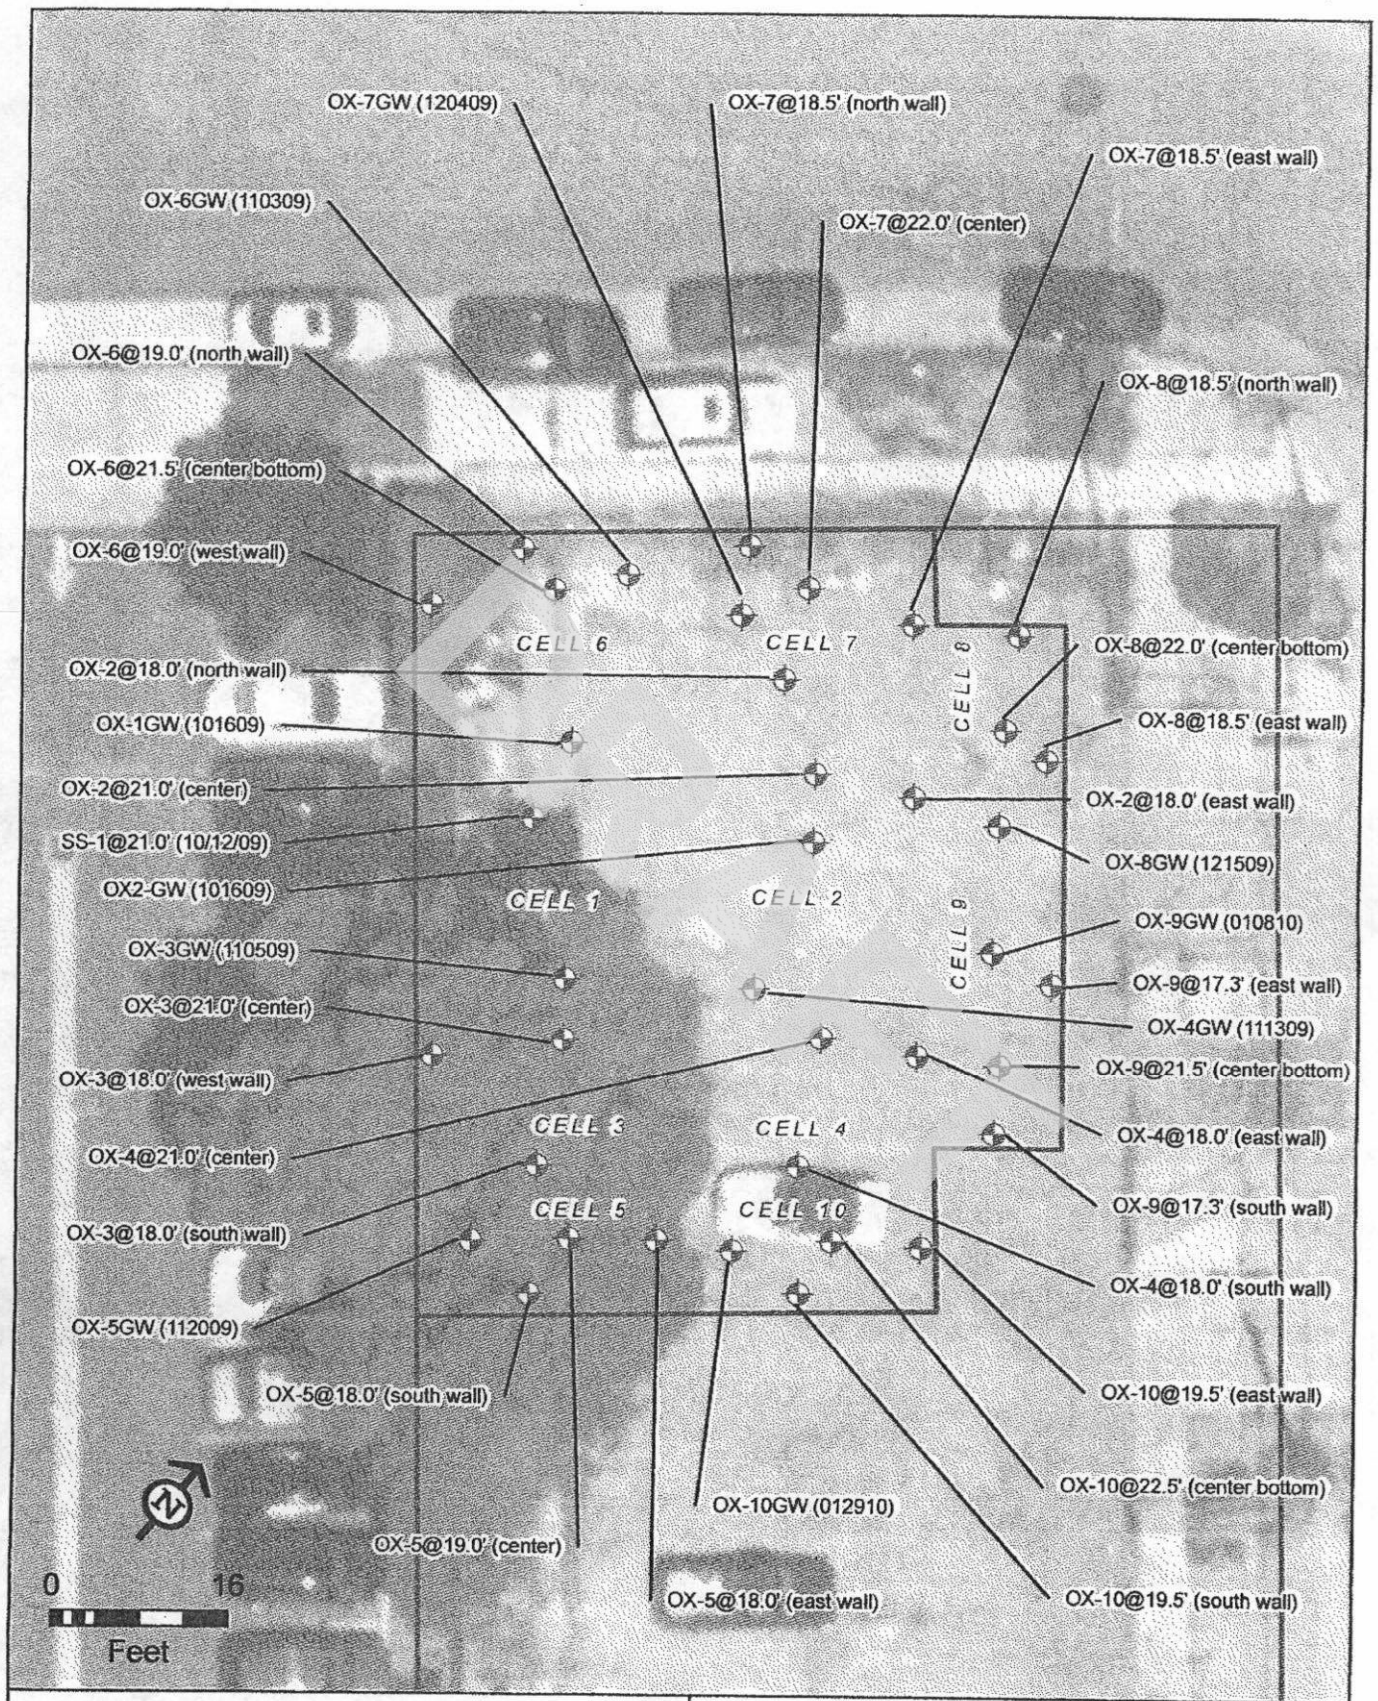
Contaminant	Soil (ppm)	Water (ppb)	Contaminant	Soil (ppm)	Water (ppb)
TPH (Gas)	1,500[9]	ND'	Xylene	100[9]	ND[3]
TPH (Diesel)	NA	NA	Ethylbenzene	74[9]	ND[3]
Benzene	1.2[10]	ND[3]	Oil &Grease	NA	NA
Toluene	0.09411	ND[3]	Heavy Metals	NA	NA
Other (8240/8270)	NA	NA	MTBE (If not analyzed, explain below	NA	ND[3]

Physical Address: 2314 Walsh Avenue, Santa Clara, CA 95051
Mailing Address: 1600 Riviera Avenue, Suite 310, Walnut Creek, California 94596
408 496 0801 / 925 426 1112

Yet, as indicated in ERS' *Remedial Investigation/Well Installation Report*, dated January 2012, and ERS' subsequent letter to your offices, dated March 26, 2013, the following are the correct post-excavation, pre- *in-situ* remediation levels remaining:

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS AFTER CLEANUP

Contaminant	Soil (ppm)	Water (ppb)	Contaminant	Soil (ppm)	Water (ppb)
TPH (Gas)	1,500 @ 19'	ND	Xylene	100 @ 19'	ND
TPH (Diesel)	NA	NA	Ethylbenzene	74 @ 19'	ND
Benzene	0.15 @ 19'	ND	Oil &Grease	NA	NA
Toluene	0.094 @19'	ND	Heavy Metals	NA	NA
Other (8240/8270)	NA	NA	MTBE (If not analyzed, explain below	NA	ND



DRAFT

The table above correctly states, and underscores data. Further, soil gas samples taken subsequent to the excavation and *in-situ* remediation identified no remaining impacts above residential levels on the property. See the attached Figure No. 1/6M, Figure No. 2/9 and Table I/IV.

I look forward to speaking with you regarding how best to coordinate getting this information into a corrected Closure Report, and uploaded onto Geotracker and the County's website. Should you have any questions regarding this letter please do not hesitate to me. As you can see ERS has been reorganized and our new name is Applied Water Resources (AWR). All of the staff and personnel that worked as ERS remain the same. Only the name has been changed.

Sincerely,
APPLIED WATER RESOURCES CORPORATION

Dear Ms Nguyen and Mr. Do:

This letter confirms the completion of a site investigation and corrective action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please note that Assembly Bill 358 was adopted on October 1, 2011, and sets a reimbursement deadline. All claims for reimbursement of corrective action costs must be received by the State Cleanup Fund within 365 days of the date of this letter as specified in paragraph (1) of subdivision (l) of Section 25299.57 of the Health and Safety Code. Claims received after this date will not be reimbursed.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Jim Blamey

Subject: Fuel Leak Case Closure at Sartori's Auto Center, 795 Stockton Avenue, San Jose, Case No. 14-408, SCVWDID No. 07S1W12A04f

Dear Ms Nguyen and Mr. Do:

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

The most recent data collected at the site and presented in the case closure summary, Section 3, indicates the following conditions were reported at the site at the time of closure:

- The following soil contamination was noted: 1,500 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 1.2 ppm benzene, 0.094 ppm toluene, 100 ppm xylene, and 74 ppm ethylbenzene.

- All groundwater samples did not detect the analyzed constituents.

Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time. It should be noted that any additional or previously unidentified issues at this site may require further investigation or cleanup.

Board of Supervisors: Mike Wasserman, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

If you have any questions regarding the enclosed case closure form, please call Gerald O'Regan of the Local Oversight Program at (408) 918-1974.

Sincerely,

Michael Balliet
Hazardous Materials Program Manager

NA: Not Analyzed
ND: Not Detected

DRAFT

1. Groundwater sample collected from GW-8 on 6/4/1997
2. Compounds analyzed were DIPE, ETBE, TAME, and TBA. All results were ND with a 0.5 ppb detection limit.
3. Groundwater samples collected from six groundwater monitoring wells on 8/8/2011. Sample results were ND for all analytes.
4. Soil sample collected at 10 feet from B3-2 on 1/21/1996.
5. Soil sample collected at 2 feet from B6-1 on 1/28/1996.
6. Lead detected at 8.7 ppm in soil sample collected at 10 feet from B1-2 on 1/21/1996.
7. Seven soil samples were analyzed for MTBE. All samples did not detect MTBE.
8. Soil samples were analyzed for DIPE, ETBE, TAME, TBA, EDB, and DCA. No samples detected the chemicals of concern.
9. Soil sample collected at 19 feet from OX-6 along the north wall.
10. Soil sample collected at 18 feet from OX-2 along the north wall.
11. Soil sample collected at 19 feet from OX-6 along the west wall.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Environmental Health Department staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a significant risk to human health.		
Site Management Requirements: The site is currently used as a parking lot for Bellarmine High School. Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.		
Should corrective action be reviewed if land use changes? Yes. See Site Management Requirements.		
Number of Wells Commissioned: 9	Number of Wells Decommissioned: 3	Number of Wells Retained: 6*
List Enforcement Actions Taken: NA		
List Enforcement Actions Rescinded: NA		

* All wells to be destroyed prior to issuance of closure letter and documents.

V. ADDITIONAL COMMENTS, DATA, ETC.

Site History: A gasoline service station was located on the site from 1931 to 1981.

1996

On January 21st and 28th seven exploratory borings were excavated at the site. The borings were drilled to depth of 10 to 30 feet below ground surface (bgs). Petroleum odor and heavy discoloration of soil due to contamination was observed in borings B-1, B-2, B-3, and B-4 located near the USTs and dispenser

DRAFT

island. The laboratory samples collected from borings B-1, B-2, B-3, and B-4 revealed contamination in the soil and groundwater due to petroleum hydrocarbons. Oil and grease was also detected in the vicinity of the sump, hydraulic jack, and in the area adjacent to the eastern property line.

1997

In June 8 borings were drilled to groundwater (B8 – B15) to further define the extent of on-site contamination. Groundwater was encountered at 20 feet. Elevated levels of gasoline compounds in groundwater including up to 1,910,000 parts per billion (ppb) TPHg, 21,600 ppb benzene, 18,000 ppb toluene, 11,500 ppb ethylbenzene, and 65,200 ppb xylenes were reported.

In November, six soil borings were drilled on and off-site (WT-1 through WT-6) to further define the contaminant plume. The analytical results for soil and groundwater samples collected from the four off-site borings (WT-1, WT-2, WT-5, and WT-6) were ND for all constituents. Petroleum hydrocarbons and MTBE were detected in soil and groundwater samples collected from the two on-site borings (WT-3 and WT-4.

2004

On May 28th three wells were installed at the site (MW-1, MW-2, and MW-3). Quarterly groundwater monitoring of the three wells took place from June 2004 to December 2008.

2009

In April three 1,000 gallon abandoned in-place USTs were removed from the site. In addition, a former waste oil sump and underground hydraulic lift were removed.

In March a soil investigation was initiated to determine the vertical extent of soil contamination. Three soil borings (B-20, B-21, and B-22) were excavated. Based on soil analytical results, it was determined that the remedial excavation would extend to a depth of 21 feet bgs.

In October the remedial actions described in the CAP were initiated. The site was subdivided into 10 remediation cells. The remedial actions are described below.

- Removal of approximately 686 tons of impacted soil from the site. Soil was transported to Evergreen Oil Facility in Newark.
- Removal of approximately 85,000 gallons of groundwater between November 2009 and February 2010.
- After soil and groundwater was removed, groundwater samples were collected from each of the cells. TPH concentrations in groundwater collected from cells 1 and 6 located in the northwest corner of the site had 1,700 and 3,500 ppb, respectively. Prior to backfilling the cells an oxygen-releasing compound (ORC) was mixed and placed with the recharged groundwater entering each cell. Approximately 20 to 40 pounds of ORC was placed in each of the 10 cells.

Three additional USTs were discovered during the remedial excavation in the northeast corner of the site. Two of the USTs had an approximate volume of 350 gallons and a third was approximately 20 gallons. All of the USTs formerly contained gasoline. After permits were obtained, the USTs were removed from the site on March 16, 2010.

2010

In October four groundwater monitoring wells (MW-4, 5, 6, and 7) were constructed. Three of the wells were constructed in the footprint of the remedial excavation and the fourth well (MW-7) was constructed down gradient from the site. The wells were monitored quarterly from October 2010 to August 2011 to evaluate the effect of the remedial work on groundwater quality. Only MW-4 has had chemical detections. The highest detections were 65 ppb TPHg, 1.9 ppb benzene, and 3.2 ppb MTBE.

In April to determine the condition of post remediation off-site soil, 8 borings were excavated to a depth of approximately 20 feet bgs. All borings were located outside the footprint of the remedial excavation. Soil samples were collected between 12 and 18 feet bgs. All sample results were below the detection limit.

DRAFT

ORC was injected in the downgradient street right-of-way. The purpose of the injections was to create a remedial barrier down gradient from the on-site source material.

Two groundwater monitoring wells (MW-8 and MW-9) were constructed off-site in a downgradient direction. Groundwater was sampled twice for petroleum compounds and MTBE in April and August.

2011
In November a soil vapor investigation was performed. Soil gas samples were collected from 4 on-site locations. At each location samples were collected at 5 and 11 feet bgs. Up to 1,600 micro grams per cubic meter (ug/m^3) of gasoline range organics and 51 ug/m^3 benzene were detected. The sample results did not exceed the residential Environmental Screening Level.

Considerations and/or Variances:

The site is currently used as a parking lot for Bellarmine High School.

A groundwater production well is located approximately 350 feet to the northwest and in the downgradient direction from the site. Groundwater monitoring well MW-7 is located approximately 80 feet downgradient from the site and between the site and the water production well. Water samples were collected four times from MW-7 between October 2010 and August 2011. Samples were analyzed for petroleum constituents and oxygenates. Chemicals of concern were not detected in any of the samples.

Site Management Requirements have been established for this site.

VI. CLOSURE CRITERIA

The Leak has been Stopped and Ongoing Sources, Including Free Product, Removed or Remediated:
The USTs, associated equipment, and TPH-impacted soil surrounding them were excavated and removed. The site is currently a paved parking lot for Bellarmine High School.

The Site has Been Adequately Characterized: The site is adequately characterized through several phases of soil, groundwater and soil vapor investigations. Groundwater monitoring was conducted from June 2004 to August 2011

The Dissolved Hydrocarbon Plume is Not Migrating: Groundwater monitoring indicates that the groundwater hydrocarbon plume is not migrating.

Exposure Pathways, Receptors, and Potential Risks, Threats, and Other Environmental Concerns are Identified and Assessed:
Nearby receptors were identified, and exposure pathways such as direct contact, inhalation and ingestion of contaminants in soil and groundwater were investigated and assessed through soil, groundwater and soil vapor sampling and testing.

Pollutant Sources are Remediated to the Extent Feasible:
Approximately 686 tons of soil and 85,000 gallons of impacted groundwater were removed from the site. Prior to backfilling the 10 remedial excavation cells an oxygen-releasing compound (ORC) was mixed and placed with the recharged groundwater entering each cell. Approximately 20 to 40 pounds of ORC was placed in each of the 10 cells. ORC was injected in the downgradient street right-of-way. The purpose of the injections was to create a remedial barrier down gradient from the on-site source material.

Unacceptable Risks to Human Health Considering Current and Future Land Uses are Mitigated:
Due to the implemented remedial actions and declining concentration trends, the residual contamination in soil and groundwater at the site does not pose an unacceptable risk to human health.

DRAFT

The highest residual TPH-gas, benzene, toluene, ethylbenzene and xylene in soil are confined in soil to depths of 18 to 19 feet bgs; therefore they do not pose a direct contact, inhalation and ingestion risk to human receptors. A soil vapor investigation was performed. The sample results did not exceed the residential Environmental Screening Level.

Unacceptable Threats to Groundwater and Surface Water Resources, Considering Existing and Potential Beneficial Uses, are Mitigated:
Due to the implemented remedial actions and declining concentration trends, the residual contamination in soil and groundwater at the site does not pose an unacceptable risk to groundwater and surface water resources. It is likely that the concentration of contaminants will continue to decrease by natural processes over time.

Conclusion:
The Department of Environmental Health believes that the residual soil and groundwater contamination at the site does not pose a continuing, significant threat to groundwater resources, human health, or the environment. Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines. The Department of Environmental Health recommends that this site be closed.

		18	ND<100	ND<10	ND<10	ND<10	ND<10	ND<5
SB-7	4/18/11	15	ND<100	ND<10	ND<10	ND<10	ND<10	ND<5
		18	ND<100	ND<10	ND<10	ND<10	ND<10	ND<5
SB-8	4/18/11	15	ND<100	ND<10	ND<10	ND<10	ND<10	ND<5
		18	ND<100	ND<10	ND<10	ND<10	ND<10	ND<5

Notes:
GRO : Gasoline Range Organics
bgs : below ground surface
µg/kg : micrograms per kilogram

Report prepared for: Fred Diaz
O'Brien & Gere

Date Received: 3/26/2009
Date Reported: 4/2/2009

Client Sample ID: B20@24.0
Sample Location: 785 Stockton Ave.
Sample Matrix: SOIL
Date/Time Sampled 3/25/2009 2:35:00 PM

Lab Sample ID: 0903172-001
Date Prepared: 3/28/2009

Parameters	Analysis Method	Date Analyzed	RL	Dilution Factor	MRL	Result	Units	Analytical Batch
TPH (Gasoline)	SW8260B(TPH)	3/28/2009	100	1	100	ND	µg/Kg	G19078
Surr: 4-Bromofllurobenzene	SW8260B(TPH)	3/28/2009	0	1	56.9-133	50.0	%REC	G19078

Note: S- Surrogate recovery out of limit due to matrix effect (see comment for sample -003A)

Client Sample ID: B21@28.0'
Sample Location: 785 Stockton Ave.
Sample Matrix: SOIL
Date/Time Sampled 3/25/2009 12:50:00 PM

Lab Sample ID: 0903172-002
Date Prepared: 3/28/2009

Parameters	Analysis Method	Date Analyzed	RL	Dilution Factor	MRL	Result	Units	Analytical Batch
TPH (Gasoline)	SW8260B(TPH)	3/28/2009	100	1	100	ND	µg/Kg	G19078
Surr: 4-Bromofllurobenzene	SW8260B(TPH)	3/28/2009	0	1	56.9-133	48.0	%REC	G19078

Note: S- Surrogate recovery out of limit due to matrix effect (see comment for sample -003A).

Client Sample ID: B22@22.0'
Sample Location: 785 Stockton Ave.
Sample Matrix: SOIL
Date/Time Sampled 3/25/2009 11:15:00 AM

Lab Sample ID: 0903172-003
Date Prepared: 3/28/2009

Parameters	Analysis Method	Date Analyzed	RL	Dilution Factor	MRL	Result	Units	Analytical Batch
TPH (Gasoline)	SW8260B(TPH)	3/28/2009	100	1	100	ND	µg/Kg	G19078
Surr: 4-Bromofllurobenzene	SW8260B(TPH)	3/28/2009	0	1	56.9-133	52.0	%REC	G19078

Note: S- Surrogate recovery out of limit. Matrix effect confirmed by another runs(MSG/MSDG).

DRAFT

These analyses were performed according to State of California Environmental Laboratory Accreditation program, Certificate # 1991

Subject: Fuel Leak Site Case Closure: Bay Area Petroleum, 905 Stockton Avenue, San Jose, CA; Case No. 06-051, SCVWDID No. 07S1W12A01f

DRAFT

Dear Mr. Rowe:

This letter confirms the completion of a site investigation and corrective action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please note that Assembly Bill 358 was adopted on October 1, 2011, and sets a reimbursement deadline. All claims for reimbursement of corrective action costs must be received by the State Cleanup Fund within 365 days of the date of this letter as specified in paragraph (1) of subdivision (l) of Section 25299.57 of the Health and Safety Code. Claims received after this date will not be reimbursed.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Jim Blamey

Subject: Fuel Leak Site Case Closure: Bay Area Petroleum, 905 Stockton Avenue, San Jose, CA; Case No. 06-051, SCVWDID No. 07S1W12A01f

Dear Mr. Rowe:

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

The data collected at the site and presented in the case closure summary, Section 3, indicates the following conditions were reported at the site at the time of closure:

- Soil - 30,000 parts per million (ppm) Total Petroleum Hydrocarbons as diesel (TPHd), 2,100 ppm Total Petroleum Hydrocarbons as gasoline (TPHg), 9.1 ppm Benzene, 290 ppm toluene, 4.6 ppm Fluorene, 4.0 ppm Phenanthrene, 0.6 Anthracene, 0.022 ppm Trichloroethene (TCE), 350 ppm Xylene, 52 ppm Ethylbenzene, 23,000 ppm Oil and Grease, 9,100 ppm Stoddard Solvent, 15 ppm Methyl Tert Butyl Ether (MTBE), and 5.8 ppm Naphthalene.

- Groundwater – 700 parts per billion (ppb) TPHd and 107 ppb MTBE.

Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or

DRAFT

the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time. It should be noted that any additional or previously unidentified contamination at this site may require further investigation or cleanup.

If you have any questions regarding the enclosed case closure form, please call Mr. Aaron Costa of the Local Oversight Program at (408) 918-1954. Thank you.

Sincerely,

Jennifer Kaahaaina
Hazardous Materials Program Manager
Site Mitigation Program

DRAFT

[1] This case closure summary report is a summary of site conditions based on data collected at the site and included in the case file. It should be used in conjunction with the complete case file which can be reviewed online at http://geotracker.waterboards.ca.gov/

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown		
Site characterization complete? Yes		
Monitoring wells installed? Yes	Number: 7	Proper screened interval? Yes
Highest GW Depth Below Ground Surface: 14.3'	Lowest Depth: 24.15'	Flow Direction: north-northwest
Most Sensitive Current Use: Potential Drinking Water		

Summary of Production Wells in Vicinity: There is one active water supply well located approximately ¼-mile southeast of the site in an upgradient direction. Due to the location and distance to this well, it is unlikely that the release at this site has impacted the well.	
Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Basin
Is surface water affected? No	Nearest SW Name: None within ½ mile of the site.
Off-site Beneficial Use Impacts (Addresses/Locations): None.	
Reports on file? Yes	Where are reports filed? SWRCB online database http://geotracker.waterboards.ca.gov/

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL

Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	1 – 2,000-gal. steel	Disposed; Destination Not Reported	9/90
	2 – 10,000-gal. steel	Disposed; Destination Not Reported	9/91
	1 ea. – 1,000-gal. and 3,000-gal. steel		11/91
	1 ea. – 4,000-gal., 250-gal., and 650-gal. steel	Disposed; Destination Not Reported	9/92
	2 – 10,000-gal. steel and 2 – 6,000-gal. steel	Disposed; ECI, Richmond, CA	9/98
Piping	Not Reported	Not Reported	11/91
	Not Reported	Disposed; H&H Service, San Francisco, CA	9/92
	745 feet	Disposed; H&H Ship Service, San Francisco, CA	5/94
Free Product	--	--	--
Soil	4,150 cubic yards	Disposed; Vasco Road Landfill, Livermore, CA	5/94 – 8/94
	1,887 cubic yards 600 cubic yards	Disposed; Forward Landfill, Manteca, CA	9/98 – 10/98
Groundwater	2,000 gallons	Disposed; H&H Ship Service, San Francisco, CA	6/94
Barrels	--	--	--

Description of Interim Remediation Activities: Soil excavation

DRAFT

CONTAMINANT CONCENTRATIONS IN SOIL[1] Please see Attachment 3 for additional information on contaminant locations and concentrations					
	Soil (ppm)			Soil (ppm)	
Contaminant	Max[2]	After	Contaminant	Max[2]	After
TPH (Gas)	2,100[3,4]	--[14]	Xylene	350[8]	--[14]
TPH (Diesel)	45,000[4]	30,000[8]	Ethylbenzene	52[3]	--[14]
Benzene	9.1[3]	--[14]	Oil & Grease	23,000[9]	--[14]
Toluene	290[3]	--[14]	TPHk (Kerosene)	3,300[10]	ND[15]
Fluorene Phenanthrene Anthracene	4.6[5] 4.0[5] 0.6[5]	--[14]	Stoddard Solvent	9,100[11]	--[14]
PCE	ND[6]	--[14]	MTBE	15[12]	--[14]
TCE	0.022[7]	--[14]	Naphthalene	5.8[13]	--[14]

Notes:

1. This table presents maximum historical contaminant concentrations in soil and documented contaminant concentrations if confirmation sampling was conducted.
2. The maximum concentration listed is the highest concentration reported for a specific constituent in soil samples collected at the site.
3. Soil sample #4 collected on 11/13/91 following removal of the soil-water separator. Depth of sample collection unknown.
4. Soil sample collected at 15 feet below the ground surface (ft bgs) in boring B9 near the pump area on 6/23/93. Excavation of soil was completed in this area and confirmation soil samples were not reported to have TPHg present above the laboratory reporting limits and maximum TPHd concentrations of 960 ppm.
5. Soil sample #1 BAP-8A collected in the soil storage area on 2/28/92. Depth of sample collection unknown.
6. All soil samples analyzed for these constituents were not reported to have concentrations present above the laboratory reporting limits.
7. Soil sample Tank #1 collected following removal of a petroleum naptha solvent tank on 9/7/90. Depth of sample collection unknown.
8. Soil sample #1 collected on 11/13/91 following removal of the soil-water separator. Depth of sample collection unknown.
9. Soil sample S5-1 collected at 6 ft bgs in boring B5 advanced near the oil-water separator on 12/12/86.
10. Soil sample collected at 10 ft bgs in boring B9 near the pump area on 6/23/93.
11. Soil sample collected at 15 ft bgs in boring B3 advanced near the Stoddard solvent tanks on 9/18/90.
12. Soil sample SW-5-14 collected at 14 ft bgs along the sidewall of the tank excavation at the cardlock facility on 9/28/98.
13. Soil sample BAP-OT-1 collected at 15 ft bgs following removal of a recycled oil tank on 9/18/91.
14. "--" indicates that confirmation soil sampling was not conducted. Maximum concentrations listed are for soil samples collected between 1986-1998 and it is likely that concentrations remaining have decreased by natural processes and remediation.
15. All confirmation soil samples collected from the excavation completed in May 1994 including the area of boring B9 were not reported to have concentrations of TPHk present above the laboratory reporting limits.

DRAFT

CONTAMINANT CONCENTRATIONS IN GROUNDWATER[1] Please see Attachment 4 for additional information on contaminant locations and concentrations					
	Water (ppb)			Water (ppb)	
Contaminant	Max[2]	Most Recent	Contaminant	Max[2]	Most Recent
TPH (Gas)	20,000[3]	ND[12,13]	Xylene	3,000[8]	ND[12,13]
TPH (Diesel)	34,000[4]	700[14]	Ethylbenzene	28[6]	ND[12,13]
Benzene	150[5]	ND[12,13]	Oil & Grease	ND[9]	ND[9]
Toluene	17[6]	ND[12,13]	TPHss (Stoddard Solvent)	130[10]	ND[15]
TPHk (Kerosene)	1,900[7]	ND[15]	MTBE TBA	34,000[8] 180[11]	107[16] ND[13]

Notes:

1. This table presents maximum historical contaminant concentrations and most recent contaminant concentrations in groundwater.
2. The maximum concentration listed is the highest concentration reported for a specific constituent in groundwater samples collected at the site.
3. Groundwater sample collected from monitoring well MW2 on 10/19/94.
4. Grab groundwater sample collected from boring GB9 on 10/20/04. This boring is located near the Cardlock facility on 9/30/98.
5. Grab groundwater sample collected from boring GB2 on 10/21/04.
6. Groundwater sample collected from well MW1 on 1/20/94.
7. Groundwater sample collected from monitoring well MW1 on 11/3/93.
8. Grab groundwater sample collected from the tank excavation following tank removal at the Cardlock facility on 9/30/98.
9. All groundwater samples that were collected and analyzed for these constituents were not reported to have concentrations present above the laboratory reporting limits.
10. Groundwater sample collected from monitoring well MW4 on 5/5/95.
11. Grab groundwater sample collected from boring GB8 on 10/20/04.
12. All groundwater samples collected during the final round of groundwater monitoring from wells located on the bulk storage area conducted on 12/12/11 were not reported to have concentrations of these constituents present above the laboratory reporting limits.
13. All groundwater samples collected from wells located at the Cardlock facility were not reported to have concentrations of these constituents present above the laboratory reporting limits.
14. Groundwater sample collected from well MW3 on 12/12/11; the last groundwater monitoring event for this well.
15. TPHss and TPHk were last included in the groundwater monitoring program on 5/3/96 for wells MW2 and MW4; on 5/595 for well MW3; and on 4/26/94 for well MW1, which was subsequently destroyed. These constituents were not reported to be present above the laboratory reporting limits in these wells, the last time they were sampled for.
16. Groundwater sample collected from well MW6 on 6/11/15; the last groundwater monitoring event.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes
Does corrective action protect public health for current land use? Environmental Health Department staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a significant risk to human health.
Site Management Requirements: The site is occupied by a bulk fueling facility with a cardlock fueling station. Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the

DRAFT

installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.
Should corrective action be reviewed if land use changes? Yes; See Site Management Requirements.

Number of Wells Commissioned: 7	Number of Wells Decommissioned: 1	Number of Wells Retained*: 6
List Enforcement Actions Taken: None.		
List Enforcement Actions Rescinded: None.		

* All wells are to be properly destroyed prior to issuance of the closure letter and associated documents.

V. ADDITIONAL COMMENTS, DATA, ETC.

Site History:

1986 – In November and December, 7 soil borings were advanced onsite. A site plan illustrating the locations of these borings was not found in the file. Soil samples were collected and reported to contain maximum concentrations of 190 parts per million (ppm) Total Hydrocarbon Response, 710 ppm Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 2,300 ppm Total Extractable Hydrocarbons, 1,800 ppm TPH as Diesel (TPHd), 23,000 ppm TPH as Waste Oil, and 4.9 ppm TPH as Stoddard Solvent (TPHss).

1990 – In September, a Stoddard Solvent underground storage tank (UST) was removed and 2 motor oil and 1 waste oil USTs were closed in place. These tanks are located within the building with the loading dock. Laboratory reports indicate maximum concentrations in soil sample Tank #1 of 0.015 ppm Benzene, 0.056 ppm Toluene, 0.044 ppm Xylenes, 0.120 ppm 1,1,1-Trichloroethane (PCE), and 0.022 ppm Trichloroethene (TCE). TPHd and Total Oil and Grease (TOG) were not reported to be present above the laboratory reporting limits. The location of these samples was not found in the file.

3 soil borings (B1 through B3) were advanced onsite to 30-35 feet below the ground surface (ft bgs). 19 soil samples were collected and analyzed for TPHss and reported to have concentrations present up to 9,100 ppm at 15 feet in boring B3. Boring B3 was located north of the Stoddard Solvent USTs.

1991 – In September, a Stoddard Solvent and Waste Stoddard Solvent USTs were removed. 4 soil samples were collected from beneath the USTs and reported to contain maximum concentrations of 1,400 ppm TPHg,18.3 ppm TPHd, 3,700 ppm TOG, 1.8 ppm Benzene, 1.5 ppm Toluene, 13 ppm Ethylbenzene, 38 ppm Xylenes, 5.8 ppm Naphthalene, 1.7 ppm Fluorene, and 2.8 ppm Phenanthrene.

In November, 2 USTs were removed along with the associated piping. These soil samples were reported to have maximum concentrations of 30,000 ppm TPHd, 2,100 ppm TPHg, 9.1 ppm Benzene, 290 ppm Toluene, 52 ppm Ethylbenzene, and 350 ppm Xylenes.

1992 – In January, a soil sample was reported to have been collected in the Oil Barrel Storage Area #17 and was reported to contain 350 ppm TPHg, 1,800 ppm TPHd, 0.87 ppm Toluene, 1 ppm Ethylbenzene, 5.7 ppm Xylenes, 6.8 ppm Naphthalene, 4.6 ppm Fluorene, 4 ppm Phenanthrene, and 0.6 ppm Anthracene.

Over-excavation was conducted in the area of the 2 former Stoddard Solvent USTs removed in 1991. 5 soil samples were reported to have been collected from 23-25 ft bgs; however the location of the sampling was not found to be reported in the file. Low to non-detectable concentrations of TPHg, TPHss and Benzene, Toluene, Ethylbenzene and Xylenes (BTEX) were reported.

DRAFT

Over-excavation was done in the area of the oil-water separator. 5 soil samples were collected at this time from 22 ft bgs; however the location of the sampling was not found to be reported in the file. Maximum concentrations were reported of 11 ppm TPHg, 95 ppm TPHd, 1.4 ppm Benzene, 0.045 ppm Toluene, 0.16 ppm Ethylbenzene, and 0.53 ppm Xylenes.

In February, 5 soil samples were reported to have been collected from a trench excavation associated with the oil-water separator. The location of this excavation was not found to be reported in the file. Maximum concentrations were reported of 190 ppm TPHg, 220 ppm TPHd, 420 ppm TOG, 0.23 ppm Benzene, 0.48 ppm Toluene, 0.4 ppm Ethylbenzene, and 1.7 ppm Xylenes.

In June, a San Jose Fire Department (SJFD) inspection noted that aboveground tanks were leaking; and extensive oil contamination was present beneath the oil pumping shed.

In September, 3 USTs were removed along with associated piping. Soil samples were collected beneath the piping and the smaller USTs at depths of 3-5 ft bgs and below the larger UST at 14 ft bgs. Maximum concentrations were reported of 2,500 ppm TPHss, 1,900 ppm TPHg, 6,300 ppm TPHd, 2.2 ppm Benzene, 2.8 ppm Toluene, 3.2 ppm Ethylbenzene, and 10 ppm Xylenes.

1993 – In June, 10 soil borings (B1 through B10) were advanced to depths of 20-25 ft bgs on the western portion of the site. 51 soil samples were collected and reported to contain maximum concentrations of 2,100 ppm TPHg, 45,000 ppm TPHd, 3,000 ppm TPHss, 6,200 ppm TPH as Kerosene (TPHk), 8,800 ppm TOG, 2.5 ppm Benzene, 3.4 ppm Toluene, 3.5 ppm Ethylbenzene, and 9.2 ppm Xylenes.

In July, 4 monitoring wells were installed to 29.5 ft bgs onsite. 20 soil samples were collected and reported to contain maximum concentrations of 620 ppm TPHg, 16,000 ppm TPHd, 680 ppm TPHss, 2,100 ppm TPHk, 0.18 ppm Benzene, 0.24 ppm Toluene, 0.29 ppm Ethylbenzene, and 0.77 ppm Xylenes in the samples collected from 15 ft bgs in MW1 and MW2.

Oil-stained soil adjacent to the 6 ASTs on the eastern portion of the property was excavated in the area of boring B11. It is not reported how much soil was removed from this unpaved area. Borings B11 and B12 were advanced in this area to depths of 14-20 ft bgs. 10 soil samples were collected and reported to contain maximum concentrations of 120 ppm TPHg, 2,200 ppm TPHd, 420 ppm TPHss, 300 ppm TPHk, 5,100 ppm TOG, and low to non-detectable concentrations of BTEX.

1994 – In January and February, 25 hydropunch borings were advanced onsite to 25 ft bgs. Grab groundwater samples were collected from each boring and reported to contain maximum concentrations of 370,000 ppb TPHg, 990,000 ppb TPHd, 67,000 ppb Benzene, 66,000 ppb Toluene, 70,000 ppb Ethylbenzene, 210,000 ppb Xylenes in the sample collected from boring #14 located east of MW1. TPHk, TPHss and TPHmo were not reported to be present in any of the samples above the laboratory reporting limits.

Free product (FP) was reported to be present in boring #8, which was sampled and analyzed. Refer to Attachment 3 for results. Boring #8 was located to the west of well MW1.

In March, a geophysical survey was conducted, which found several buried metal pipes, but no indication of an UST. These pipes were in the area of hydropunch borings #6, #8, #9, #14 and well MW1.

In May, approximately 745 feet of buried piping was removed. During the piping removal, obvious soil contamination was noted throughout the excavation. The total depth of the excavation was 19-20 ft bgs coinciding with groundwater. Approximately 6,037 cubic yards of soil was removed.

In June, well MW1 was destroyed in order to allow for soil excavation in the area. During excavation, approximately 2,000 gallons of groundwater was pumped out of the first phase excavation and disposed of offsite. Following completion of the excavation work, the western wall of the excavation was

DRAFT

encapsulated with fiber-reinforced concrete (shotcrete). This was intended to prevent migration of contamination back into this area.

Many soil samples were collected from various depths during the excavation work. The analytical data is presented in Attachment 3.

1998 – In September, 4 fuel USTs were removed on the eastern side of the property as part of a system upgrade at the Cardlock Facility. 9 soil samples were collected from the initial tank pit from 12 ft bgs and reported to contain maximum concentrations of 280 ppm TPHg, 16,000 ppm TPHd, 0.36 ppm Benzene, 1.6 ppm Toluene, 1.6 ppm Ethylbenzene, 1.8 ppm Xylenes, and 10 ppm Methyl tert Butyl Ether (MtBE).

Additional soil was removed from the tank pit, which was deepened to approximately 16 ft bgs. 3 sidewall samples were collected from 3 ft bgs and were not reported to have concentrations of the constituents of concern (COCs) present above the laboratory reporting limits. 5 additional sidewall samples were collected between 13-14 ft bgs and reported to contain maximum concentrations of 230 ppm TPHg, 3,000 ppm TPHd, and low concentrations of BTEX and MtBE. 4 samples were collected from the bottom of the excavation and reported to contain maximum concentrations of 570 ppm TPHg, 400 ppm TPHd, and low concentrations of BTEX and MtBE. Further excavation was prohibited due to the proximity of adjacent buildings and roads.

Groundwater was present in the excavation and a grab sample was collected and reported to contain 5,300 ppb TPHg, 4,100 ppb TPHd, 50 ppb Benzene, 3,000 ppb Xylenes, and 34,000 ppb MtBE.

4 soil samples were collected beneath the dispensers from 4 ft bgs and reported to contain up to 50 ppm TPHg, 1,900 ppm TPHd, and low to non-detectable concentrations of BTEX and MtBE. Due to elevated concentrations under Dispenser Island 2, additional soil was removed. 3 additional soil samples were collected from 6-8 ft bgs and reported to contain maximum concentrations of 160 ppm TPHg, 3,700 ppm TPHd, and low concentrations of BTEX and MtBE.

Approximately 600 cubic yards of soil were removed from the site.

2001 – In March, 4 soil samples were collected beneath the dispensers and lines at the Cardlock Facility. The samples were only reported to have 2 low detections of MtBE and Tert Butyl Alcohol (TBA); all other COCs were not reported to be present above the laboratory reporting limits.

2004 – In October, 10 Geoprobe borings (GB1 through GB10) were advanced to depths of 20-30 ft bgs. Boring GB1 met refusal at 10 ft bgs. 31 soil samples were collected and reported to contain maximum concentrations of 180 ppm TPHd, 64 ppm TOG, 0.026 ppm Benzene, and 0.091 ppm MtBE. All other COCs were not reported to be present above the laboratory reporting limits.

9 grab groundwater samples were collected and reported to contain maximum concentrations of 4,100 ppb TPHg, 34,000 ppb TPHd, 150 ppb Benzene, 14 ppb Toluene, 2.1 ppb Ethylbenzene, 8 ppb Xylenes, 830 ppb MtBE, 180 ppb TBA, and 0.9 ppb Tert Amyl Methyl Ether (TAME).

2011 – In December, the final round of groundwater monitoring was conducted and reported maximum concentrations of 380 ppb TPHd and 6.5 ppb MtBE; all other constituents were not reported to be present above the laboratory reporting limits.

No work was conducted at the site between 2012 and 2013.

2014 – In August, 3 additional groundwater monitoring wells (MW5 through MW7) were installed to 25 ft bgs in the area of the Cardlock facility. 16 soil samples were collected and were reported to have maximum concentrations of 250 ppm TPHd, 0.043 ppm MtBE, and 0.0098 ppm TBA. The only detection of MtBE and TBA were in a soil sample collected from well MW6.

DRAFT

Quarterly sampling of the wells at the Cardlock facility commenced.

2015 – In June, the final groundwater monitoring event was conducted and reported maximum concentrations of 290 ppb TPHd and 107 ppb MtBE. BTEX was not reported to be present in the samples above the laboratory reporting limits.

Considerations and/or Variances:
The site is located in an industrial area and is occupied by a bulk fueling facility and cardlock fueling facility.

VI. CLOSURE CRITERIA

The Leak has been Stopped and Ongoing Sources, Including Free Product, Removed or Remediated:
The USTs, associated piping and TPH-impacted soil surrounding them were excavated and removed.

The site is occupied by a bulk fueling facility and cardlock fueling facility.

The Site has Been Adequately Characterized: The site is adequately characterized through several phases of soil and groundwater investigations. Groundwater monitoring was conducted from 1993 to 2011 in the bulk fueling facility and from 2014 to 2015 in the cardlock fueling facility.

The Dissolved Hydrocarbon Plume is Not Migrating: The groundwater data demonstrates that the plume is not migrating and that it is stable and/or shrinking.

Exposure Pathways, Receptors, and Potential Risks, Threats, and Other Environmental Concerns are Identified and Assessed:
Nearby receptors were identified, and exposure pathways such as direct contact, inhalation and ingestion of contaminants in soil and groundwater were investigated and assessed through soil and groundwater sampling and testing.

Pollutant Sources are Remediated to the Extent Feasible:
Approximately 6,600 cubic yards of soil and 2,000 gallons of groundwater were removed from the site.

Unacceptable Risks to Human Health Considering Current and Future Land Uses are Mitigated:
Due to the implemented remedial actions and declining concentration trends, the residual contamination in soil and groundwater at the site do not pose unacceptable risks to human health. TPHd and MtBE concentrations in groundwater are above the Regional Water Quality Control Board's groundwater screening levels for drinking water. Based on the results of the groundwater sampling, TPHd and MtBE concentrations in groundwater at the site are not a risk to indoor air.

The site is paved with either asphalt or concrete, therefore the residual soil contamination at the site does not pose a direct contact, inhalation and ingestion risk to human receptors.

Unacceptable Threats to Groundwater and Surface Water Resources, Considering Existing and Potential Beneficial Uses, are Mitigated:
Due to the implemented remedial actions and declining concentration trends, the residual contamination in soil and groundwater at the site do not pose an unacceptable risk to groundwater and surface water resources. It is likely that the concentration of contaminants will continue to decrease by natural processes over time.

Conclusion:
The Department of Environmental Health believes that the residual soil and groundwater contamination at the site does not pose a continuing, significant threat to groundwater resources, human health, or the environment. Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines. The Department of

SCOPE OF WORK:

1. REMOVE THE EXISTING DISPENSERS
2. JACK HAMMER AND UNCOVER THE EXISTING PIPING
3. MOVE THE 89 AND 92 OCTANE PRODUCT PIPING TO THE 87 OCTANE DISPENSER
4. INSTALL NEW DIESEL DISPENSERS.
5. INSTALL NEW BLENDERS AT THE 87 OCTANE DISPENSER LOCATIONS.
6. REMOVE THE PRODUCT FROM THE GASOLINE TANKS
7. CHANGE THE 87 OCTANE TANK TO 92 OCTANE FUEL
8. MANIFOLD THE 89 & 92 OCTANE TANKS TOGETHER AND CHANGE TO 87 OCTANE FUEL
9. START UP THE EQUIPMENT AND PURGE THE PRODUCT PIPING

ATTENTION: Mr. R.M. Norman

SUBJECT: Progress Report - SOIL CONTAMINATION INVESTIGATION

Gentlemen:

The following is a complete rundown on soil sampling and laboratory analysis of samples relating to the soils investigation at your San Jose facility.

The following is a complete outline of the laboratory results:

BORING SITE LOCATION B-1 (north end of barrel storage area, refer to site plan). Sample taken 11-12-86 at a depth of 15'.

ANALYZED FOR GASOLINE

B-1	710 ppm

BORING SITE LOCATION B-1 (drum storage area), sampled 12-2-86.

ANALYZED FOR TOTAL EXTRACTABLES

B1-1	2200 ppm
B1-2	2300 ppm

ANALYZED FOR DIESEL

B1-1	930 ppm
B1-2	1800 ppm

ANALYZED FOR ISOPHROPYL ALCOHOL

1-1	ND
1-2	ND

DRAFT

ANALYZED FOR ACITONE

B1-1	1 ppm
B1-2	ND

ANALYZED FOR METHANOL ALCOHOL

B1-1	ND
B1-2	ND

ANALYZED FOR METHEL ETHEL KETONE

B1-1	ND
B1-2	ND

BORING SITE LOCATION B-1 (drum storage area), sampled 12-16-86 at a depth of 26'.

ANALYZED FOR TOTAL HYDROCARBON RESPONSE

S1-3	16 ppm
S1-4	11 ppm
S1-5	Non-Detected at (2) ppm

ANALYZED FOR WASTE OIL

S1-3	ND
S1-4	140 ppm
S1-5	ND

BORING SITE LOCATION B-2 (close to drum storage area), sampled 11-12-86 at a total boring depth of 11½'.

ANALYZED FOR WASTE OIL

S2-1	600 ppm at 3'
S2-2	220 ppm at 6'

ANALYZED FOR TOTAL EXTRACTABLES
(both volotile and non-volotile materials)

B2-1	41 ppm at 3'
B2-2	46 ppm at 6'

BORING SITE LOCATION B-3, (in the area of lube farm), sampled 11-12-86.

ANALYZED FOR WASTE OIL

B3-1	Non-Detected at (35) ppm - Depth 6'
B3-2	Non-Detected at (35) ppm - Depth 11½'

DRAFT

ANALYZED FOR DIESEL FUEL

B3-1 1.8 ppm

BORING SITE LOCATION B-4, (near solvent tanks), sampled 12-16-86 at a total boring depth of 21½'.

ANALYZED FOR STODDARD SOLVENT

B4-1	2.6 ppm
B4-2	Non-Detected at (2) ppm - Depth 6'
B4-3	Non-Detected at (2) ppm - Depth 10'
B4-4	4.9 ppm - Depth 16'

BORING SITE LOCATION B-5 (safeway chemical near oil/water separator), at a depth of 16½'. 12/12/86

ANALYZED FOR WASTE OIL

S5-1	23000 ppm
S5-2	3100 ppm
S5-3	76 ppm

BORING SITE LOCATION B-6/7 (area of abandoned loading rack), sampled 12-16-86.

ANALYZED FOR TOTAL HYDROCARBON RESPONSE

B6-1	2.3 ppm
B6-2	Non-Detected at (2) ppm
B6-3	190 ppm
B7-1	Non-Detected at (2) ppm
B7-2	Non-Detected at (2) ppm
B7-3	Non-Dectected at (2) ppm

This is a complete report on the sampling to this date.

I have concern with three areas; B-1, B-2, and B-5.

The greatest concern is the area of the oil/water seperator tank. The first boring 5 at six feet indicates a contamination level of 23,000 ppm Waste Oil, the second boring at ten to eleven feet indicates a contamination level of 3,100 ppm Waste Oil, at 15 feet it drops off to 76 ppm. The other area of concern is Boring 1 in dirty barrel storage area. The levels of contamination are all above the action level as set forth by the State Water Quality Control Board.

DRAFT

Notes:

* -- Name desciption: "GB-1-4", Geoprobe boring at location GB-1 (Refer to Figure 2) and a depth of 4 feet.

** -- The sample chromatogram does not match the standard diesel chromatogram

† -- Elevated reporting levels are due to high concentration of non-target analytes requiring sample dilution.

TABLE 1

SUMMARY OF SOIL ANALYTICAL RESULTS

Golden Gate Petroleum (GGP) Facility #6 (Cardlock), 905 Stockton Avenue, San Jose, California

Sample ID	Depth (feet bgs)	Date Collected	TPHg (mg/kg)	TPHd (mg/kg)	TPHmo (mg/kg)	TPHk (mg/kg)	TPHss (mg/kg)	Benzene (mg/kg)	Toluene (mg/kg)	Ethyl-benzene (mg/kg)	Total Xylenes (mg/kg)	MTBE (mg/kg)	TAME (mg/kg)	ETBE (mg/kg)	DIPE (mg/kg)	TBA (mg/kg)	1,2-DCA (mg/kg)	EDB (mg/kg)	NAPH (mg/kg)

Legend:

TPHg = Total petroleum hydrocarbons as gasoline
TPHd = Total petroleum hydrocarbons as diesel
TPHmo = Total petroleum hydrocarbons as motor oil
TPHk = Total petroleum hydrocarbons as kerosene
TPHss = Total petroleum hydrocarbons as Stoddard Solvent
MTBE = Methyl tert-butyl ether
mg/kg = milligrams per kilogram
-- = not analyzed
TAME = Tert-amyl methyl ether
ETBE = Ethyl tert-butyl ether
DIPE = Di-isopropyl ether
TBA = Tert-butyl alcohol
1,2-DCA = 1,2-Dichloroethane
1,2-DCB = 1,2,-Dichlorobenzene
NAPH = naphthalene

2014 Analytical Laboratory and Methods

Kiff Analytical (ELAP No. 08263CA) of Davis, California performed all analyses (in-house)
TPHg, BTEX, MTBE, TAME, TBA and naphthalene analyzed according to EPA Method
TPHd analyzed according to EPA Modified Method 8015

Historic Data Sources:

1998 Data : from Table 2 of Bonkowski & Associates, Inc., "Underground Storage Tank Report, Bay Area Petroleum, 905 Stockton Avenue, San Jose, California," 8/29/97
2001 Data : from lab report with Clearwater Group, facsimile transmission to SJFD "Dispenser Line Soil Sampling Results, 905 Stockton Avenue, San Jose, California," 8/21/01
2004 Data : from Table 1 of Bonkowski & Associates, Inc., "Soil and Groundwater Investigation Report, 905 Stockton Avenue, San Jose, California," 12/14/04

Data Flags and Qualifiers

** = Sample analyzed using EPA Method 8260
*= Elevated reporting levels due to high concentration of non-target analytes requiring sample dilution
[1] = hydrocarbons higher boiling point than typical diesel fuel
[2] = discrete peaks in diesel range, atypical for diesel fuel
[3] = result may be biased slightly high. A fraction of MTBE (up to 5%) coverts to TBA during analysis of soil samples. Kiff consideres this conversion effect to be mathmatically significant in samples that contain MTBE/TBA ratios over 3:1

TABLE 2

SUMMARY OF GROUNDWATER ELEVATION DATA AND ANALYTICAL RESULTS

Golden Gate Petroleum (GGP) Facility #6 (Cardlock), 905 Stockton Avenue, San Jose, California

Sample/ Locational I.D.	Date	TOC Elevation (feet msl)	DTW (feet)	Groundwater Elevation (feet msl)	ΔGW Elevation (since last measurement) (feet)	Concentration (µg/l)												
						TPHg	TPHd	TPHmo	TPHk	TPHss	Benzene	Toluene	Ethyl-benzene	Total Xylenes	MTBE	TAME	ETBE	DIPE	TBA

Legend:

TOC = top of casing
DTW = depth to water
msl = mean sea level
ΔGW = change in groundwater
TPHg = Total petroleum hydrocarbons as gasoline
TPHd = Total petroleum hydrocarbons as diesel
TPHmo = Total petroleum hydrocarbons as motor oil
TPHk = Total petroleum hydrocarbons as kerosene
TPHss = Total petroleum hydrocarbons as Stoddard Solvent
MTBE = Methyl tert-butyl ether
TAME = Tert-amyl methyl ether
TBA = Tert-butyl alcohol
ETBE = Ethyl tert-butyl ether
DIPE = Di-isopropyl ether
µg/L = micrograms per liter
--- = not analyzed

2014/2015 Analytical Laboratory and Methods

Kiff/Pace Analytical (ELAP No. 08263CA) of Davis, California performed all analyses (in-house)
TPHg, BTEX, MTBE, TAME and TBA analyzed according to EPA Method 8260B
TPHd analyzed according to EPA Modified Method 8015 (TPHd = C_{10} - C_{28})

Sample Collection Methods

Samples from wells MW-5, -6, -7 collected following low-flow purge (see Attachment A, Field Methods); unless otherwise noted on this table. See orginal reports 1998 and 2004 (Bonkowski) for sample collection methods for 1998 and 2004 samples.

Historical Data Sources:

1998 Data: from Table 2 of Bonkowski & Associates, Inc., "Underground Storage Tank Report, Bay Area Petroleum, 905 Stockton Avenue, San Jose, California," 8/29/97

2004 Data: from Table 1 of Bonkowski & Associates, Inc., "Soil and Groundwater Investigation Report, 905 Stockton Avenue, San Jose, California," 12/14/04.

Notes:

[1] = laboratory reported does not match standard gasoline chromatograph
[2] = well contained insuffient water column to low-flow purge; sample is no-purge grab sample

Survey Information:

Location and TOC of wells MW-5, MW-6, and MW-7 professionally surveyed by Morrow Surveying on 8/28/2014 and lcoation/TOC of wells MW-2, MW-3 and MW-4 on 11/18/2014, relative to California State Plane Zone 3; coordinates from GPS using CSDS virtual survey network. Coordinate Datum NAD83; Reference GEOID is GEOID03; Vertical Datum is NAVD88.

Subject: Fuel Leak Site Case Closure for Bellarmine College Preparatory, 960 W. Hedding Street, San Jose, CA; Case No. 14-709, SCVWDID No. 07S1W12B03f

Dear Mr. Navarro:

This letter validates the Remedial Action Completion Certification for subject site noted above and acknowledges previously submitted letter from our Department dated April 25, 2006. The letter also stated that no further action related to the petroleum release(s) at the site is required and it is confirmed also by this letter.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please contact Nicole Pullman with the Local Oversight Program at (408) 918-1984 if you have any questions regarding this matter.

Sincerely,

Ben Gale, Director

Subject: Fuel Leak Site Case Closure Bellarmine College Preparatory, 960 W. Hedding Street, San Jose, CA; Case No. 14-709, SCVWDID No. 07S1W12B03f

Dear Mr. Navarro

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

Please note the following conditions still remain at the site: 24 parts per million (ppm) of Total Petroleum Hydrocarbons as Gasoline (TPHg) and 12 to 31 ppm of Total Lead remain in the soil. The levels of TPHg and any associated site risk are expected to reduce with time.

If you have any questions regarding the enclosed case closure form, please call Ms. Lani Lee of the Local Oversight Program at (408) 918-1977. Thank you.

Sincerely,

Nicole Pullman

Subject: Fuel Leak Site Case Closure Bellarmine College Preparatory, 960 W. Hedding Street, San Jose, CA; Case No. 14-709, SCVWDID No. 07S1W12B03f

Dear Mr. Navarro

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Nicole Pullman

CASE CLOSURE SUMMARY
Leaking Underground Fuel Storage Tank Program

Date: February 13, 2006

I. AGENCY INFORMATION

Agency Name: County of Santa Clara, Department of Environmental Health	Address: 1555 Berger Drive, #300
City/State/Zip: San Jose, CA 95112	Phone: (408) 918-3400
Responsible Staff Person: Lani Lee	Title: Hazardous Materials Specialist

II. CASE INFORMATION

Site Facility Name: Bellarmine College Preparatory		
Site Facility Address: 960 W. Hedding Street, San Jose, CA 95126		
RB LUSTIS Case No: --	Local Case No: 07S1W12B03f	LOP Case No.: 14-709
URF Filing Date: NA	SWEEPS No.: --	APN: 261-11-005
Responsible Parties	Address	Phone Number
Bellarmine College Preparatory School c/o Mr. Juan Navarro	960 W. Hedding Street San Jose, CA 95126	

Tank I.D. No.	Size in Gallons	Contents	Closed In Place/Removed?	Date
1	1,000	Gasoline	Removed	8/11/03
Piping			Unknown	

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown		
Site characterization complete? Yes	Date Approved by Oversight Agency: 2/13/06	
Monitoring wells installed? Yes	Number: 3	Proper screened interval? Yes
Highest GW Depth Below Ground Surface: 12.02 ft	Lowest Depth: 17.75 ft	Flow Direction: north-northeast
Most Sensitive Current Use: Potential Drinking Water		

Summary of Production Wells in Vicinity: There are two water supply wells located onsite. B001 is abandonded and B002 is active.

Well No.	Distance to UST	Gradient direction from UST
07S01W12B001	304 ft south	upgradient (abandonded)
07S01W12B002	712 ft east-southeast	crossgradient (active)

The screen interval for the active well begins at 176 ft bgs. These wells are not considered to be likely receptors due to their up and crossgradient locations and the non-detectable concentrations of contaminants.

Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Basin

DRAFT

Is surface water affected? No	Nearest SW Name: Guadalupe River, more than ½ mile northeast of the site
Off-site Beneficial Use Impacts (Addresses/Locations): None	
Reports on file? Yes	Where are reports filed? County of Santa Clara, Dept. of Environmental Health

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL

Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	1,000 gal.	Removed; Disposal Destination Unknown	8/11/03
Piping			
Free Product			
Soil			
Groundwater			
Barrels			

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS BEFORE AND AFTER CLEANUP

Optional: (Please see Attachment 3, 4 for additional information on contaminant locations and concentrations)

	Soil (ppm)		Water (ppb)			Soil (ppm)		Water(ppb)	
Contaminant	Before[1]	After	Before[2]	After[5]	Contaminant	Before[1]	After	Before[2]	After[5]

TPH (Diesel)	NA	NA	NA	NA	Ethylbenzene	<0.025	<0.025	2,100	<0.5
Benzene	<0.025	<0.025	<100	<0.5	Oil & Grease	NA	NA	NA	NA
Toluene	<0.025	<0.025	4,600	<0.5	Heavy Metals	31[4]	31	NA	NA
Other (8240/8270)					MTBE (If not analyzed, explain below	<0.25	<0.25	4.2[3]	<1

Description of Interim Remediation Activities: None.

NA – Not analyzed

1. Soil sample T2-11 collected from 11 feet below ground surface from the tank excavation 8/11/03.
2. Grab groundwater sample collected from boring B-2 on 8/8/03.
3. Grab groundwater sample collected from boring B-1 on 8/8/03.
4. Total Lead
5. Groundwater results for all wells on 12/6/05.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Environmental Health Department staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Number of Wells Commissioned: 3	Number of Wells Decommissioned: 0	Number of Wells Retained: 3*
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

* Wells to be destroyed prior to issuance of final closure letter.

DRAFT

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances:

2003 – In January, the California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) requested that an investigation be performed to verify if Methyl tert-Butyl Ether (MtBE) was present in soil and groundwater beneath the site.

In August, 2 soil borings (B1 and B2) were drilled to approximately 20 feet below the ground surface (ft bgs) in order to collect grab groundwater samples. Grab groundwater samples were reported to have maximum concentrations of 25,000 parts per billion (ppb) Total Petroleum Hydrocarbons as Gasoline (TPHg), <100 ppb Benzene, 4,600 ppb Toluene, 2,100 ppb Ethylbenzene, 8,400 ppb Xylene, and 4.2 ppb MtBE.

The UST was removed in August. 2 soil samples were collected from the bottom of the excavation at 11 ft bgs. TPHg and Total Lead were the only constituents detected above the laboratory detection limit at concentrations of 24 parts per million (ppm) and 31 ppm, respectively.

2004 – In November, 3 monitoring wells (MW-1 through MW-3) were installed. No soil samples were submitted for laboratory analysis. Monitoring of these wells began in December 2004 and continued through December 2005. Sample results for TPHg, Benzene, Toluene, Ethylbenzene, Xylenes, and MtBE were all below the laboratory reporting limit.

Conclusion:

Based upon soil sampling results, only low concentrations of TPHg (24 ppm) and Total Lead (12 to 31 ppm) were detected in samples collected from the UST excavation at 11 feet bgs.

Five quarters of groundwater monitoring have not reported detectable concentrations of TPHg, Benzene, Toluene, Ethylbenzene, Xylenes, and MtBE.

The County of Santa Clara Department of Environmental Health staff has concluded that there is no significant threat to groundwater, human health, and the environment from residual petroleum hydrocarbons at this site. Regional Water Quality Control Board objectives have not been compromised.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Lani Lee	Title: Hazardous Materials Specialist
Signature:	Date: February 13, 2006
Approved by: Nicole Pullman	Title: Program Manager
Signature: Nicole Pullman	Date: February 13, 2006

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

STATE OF CALIFORNIA PETE WILSON, *Governor*

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION
2101 WEBSTER STREET, SUITE 500
OAKLAND, CA 94612
) 286-1255

January 24, 1994
File No. 2188.14(JRW)
SMS#0893, RB#43-1756

Mr. John Ahern, Controller
Bellermine College Preparatory School
850 Elm Street
San Jose, CA 95126-1899

Re: No Further Action, The Body Works, 740 Emory Street, San Jose, CA

Dear Mr. Ahern:

We have reviewed the case file for the above site and make the following findings:

1) According to the soil sampling report dated April 1991, 8.4 parts per billion (ppb) methylene chloride (MC) was detected in a soil sample following removal of a 300-gallon solvent underground storage tank.

2) Closer review of the April 1991, report reveals that the 8.4 ppb MC soil sample also had a 11 ppb MC sample "blank" prepared and analyzed by the laboratory for quality assurance. The concentrations in the "blank" suggest that even though the site sample indicated low levels of MC, this particular result could have been an error due to the limitation of laboratory analytical equipment and possibly indicated a false positive result.

3) No spills, leaks, or other surface pollution of MC have been identified or are suspected at the site.

Therefore, based on available information, no further investigation or remedial action is required at this time in regard to the soil pollution found at the site. Further work could be required if conditions change or a water quality threat is discovered at the site.

If you have any questions regarding this or other matters at this site, please contact John R. West of my staff at (510) 286-1247.

Sincerely,

Steven R. Ritchie
Executive Officer

Stephen I. Morse, Chief
South Bay Toxics Division

cc: Ms. Tom Iwamura, SCVWD
Mr. Jim Blamey, SCCHD
Mr. Dan Firth, San Jose Fire Department

Violation / Remedial Action	Due

No Violations Observed at This Time

Maintenance Requirements

Bioretention	• Inspect at least quarterly • Minimize foot traffic within bioretention area • Remove trash, sediment, and obstructions from inlets and outlets • Repair and prevent any erosion problems • Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas • Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted. • Remove/Replace any dead plants • Weed bioretention area • Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall) • Ensure full coverage of 3 of composted, non-floatable, undyed arbor mulch and spot mulch as needed • Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed. • Maintain healthy vegetation throughout the system • For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.
Swale	• Inspect at least quarterly • Minimize foot traffic within swale • Remove trash, sediment, and obstructions from inlets and outlets • Repair and prevent any erosion problems • Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas • Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted. • Remove/Replace any dead plants • Weed swale area • Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall) • Ensure full coverage of 3" of composted, non-floatable, undyed arbor mulch and spot mulch as needed • Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed. • Maintain healthy vegetation throughout the system • For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.
Media Filter System (MFS)	• Inspect twice annually, before and after the rainy season (October through April) • Cleanout, replace filter media, and maintain per manufacturer requirements, but not less than once every 3 years, removing any sediment, debris, and floatables. • Cleanout needs to be performed by a vacuum truck. • Maintenance and cleanout should be conducted by qualified personnel. • See manufacturer's recommended maintenance schedule for additional information. • Retain service records and inspection reports for at least 5 years

Inspector: Elias Kauders	Inspection ID: 602816

Stormwater Treatment Measures O & M Inspection Report

Site Name: C3-04527 Bellarmine College Preparatory (55617)
Address: 960 W Hedding St
San Jose, CA 95126

Inspection Contact: Quirino Arias, General
408-313-8917 (cell)

STM Owner: Bellarmine College Preparatory

STM Responsible Operator: Bellarmine College Preparatory

Violation / Remedial Action	Due
5/24/21 Bioretention	
• Add and maintain 2-3 inches of appropriate mulch.	6/14/21
- Add composted arbor mulch or other non-floating mulch, where missing, to the bioretention cells around the Wrestling Center.	
• Remove invasive and nuisance vegetation.	6/14/21
- Weed the bioretention cells around the Wrestling Center. Do NOT use pesticides or other chemicals.	
• Revegetate areas where vegetation is sparse or bare.	6/14/21
- Add approved plants to revegetate bare areas in the bioretention cells around the Wrestling Center.	
5/24/21 Media Filter System	
• Inspect stormwater treatment measure at least twice annually and service per manufactures specifications. The minimum frequency of service shall not exceed a period of three years.	6/14/21
- Increase regular inspections and maintenance of the media filter device(s) to twice per year, before and after the rainy season.	
5/24/21 Swale	
• Repair areas of erosion and/or scour.	6/14/21
- Add cobble to all swale inlets around the Student Parking Lot.	
• Revegetate areas where vegetation is sparse or bare.	6/14/21
- Add approved plants to revegetate bare areas in the Student Parking Lot and Wade Hall swales.

- Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed.
- Maintain healthy vegetation throughout the system
- For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.

Media Filter System (MFS)

- Inspect twice annually, before and after the rainy season (October through April)
- Cleanout, replace filter media, and maintain per manufacturer requirements, but not less than once every 3 years, removing any sediment, debris, and floatables.
- Cleanout needs to be performed by a vacuum truck.
- Maintenance and cleanout should be conducted by qualified personnel.
- See manufacturer's recommended maintenance schedule for additional information.
- Retain service records and inspection reports for at least 5 years

Swale

- Inspect at least quarterly
- Minimize foot traffic within swale
- Remove trash, sediment, and obstructions from inlets and outlets
- Repair and prevent any erosion problems
- Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas
- Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted.
- Remove/Replace any dead plants
- Weed swale area
- Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall)
- Ensure full coverage of 3" of composted, non-floatable, undyed arbor mulch and spot mulch as needed
- Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed.
- Maintain healthy vegetation throughout the system
- For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.

Recommendations

- Use non-floating mulch in swales and bioretention cells. Ensure plants are properly irrigated and not over pruned.
- Inspect media filter device(s) at least twice per year. Ensure all recommended maintenance is carried out and keep maintenance records for 5 years,
- Contact Inspector Elias Kauders at (408) 307-7124 or elias.kauders@sanjoseca.gov with any questions.

BMPs Distributed:

1 BMP for C.3 - Plant List

Notes:

Initial inspection with Quirino, briefly with CFO Ron Miller. Devices structurally intact; some need minor or moderate weeding, replanting, cobble, mulch. Emailed SWIMS records for MFD - not in need of service but do need to increase maintenance/inspection frequency from annually to 2x/yr. EI to investigate inventory change from 1 device to 3. RAs given 3 weeks due to upcoming graduation discussion with RP. Report sent with Adobe Sign.

CORRECTION NOTICE

Inspection Date: 5/24/21	Inspection Type: Initial
Inspector: Elias Kauders	Inspection ID: 602816

Stormwater Treatment Measures O & M Inspection Report

Site Name: C3-04527 Bellarmine College Preparatory (55617)
Address: 960 W Hedding St
San Jose, CA 95126

Inspection Contact: Quirino Arias, General
408-313-8917 (cell)

STM Owner: Bellarmine College Preparatory

STM Responsible Operator: Bellarmine College Preparatory

Violation / Remedial Action	Due
5/24/21 Bioretention	
• Add and maintain 2-3 inches of appropriate mulch.	6/14/21
- Add composted arbor mulch or other non-floating mulch, where missing, to the bioretention cells around the Wrestling Center.	
• Remove invasive and nuisance vegetation.	6/14/21
- Weed the bioretention cells around the Wrestling Center. Do NOT use pesticides or other chemicals.	
• Revegetate areas where vegetation is sparse or bare.	6/14/21
- Add approved plants to revegetate bare areas in the bioretention cells around the Wrestling Center.	
5/24/21 Media Filter System	
• Inspect stormwater treatment measure at least twice annually and service per manufactures specifications. The minimum frequency of service shall not exceed a period of three years.	6/14/21
- Increase regular inspections and maintenance of the media filter device(s) to twice per year, before and after the rainy season.	
5/24/21 Swale	
• Repair areas of erosion and/or scour.	6/14/21
- Add cobble to all swale inlets around the Student Parking Lot.	
• Revegetate areas where vegetation is sparse or bare.	6/14/21
- Add approved plants to revegetate bare areas in the Student Parking Lot and Wade Hall swales.

BMPs Distributed:

Notes:

FU with Quirino & Ron. RP Ron shared an email thread with SWIMS confirming the increase to twice annual media filter inspections & maintenance. Progress has been made on all swales and bioretention cells; just need additional plants, some remaining cobbles, and to fix the irrigation system of Swale 2, which RP discovered is broken. Extension issued to 30-day deadline. Report sent with Adobe Sign.

Maintenance Requirements

Maintenance Requirements

Bioretention

- Inspect at least quarterly
- Minimize foot traffic within bioretention area
- Remove trash, sediment, and obstructions from inlets and outlets
- Repair and prevent any erosion problems
- Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas
- Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted.
- Remove/Replace any dead plants
- Weed bioretention area
- Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall)
- Ensure full coverage of 3 of composted, non-floatable, undyed arbor mulch and spot mulch as needed
- Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed.
- Maintain healthy vegetation throughout the system
- For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.

Media Filter System (MFS)

- Inspect twice annually, before and after the rainy season (October through April)
- Cleanout, replace filter media, and maintain per manufacturer requirements, but not less than once every 3 years, removing any sediment, debris, and floatables.
- Cleanout needs to be performed by a vacuum truck.
- Maintenance and cleanout should be conducted by qualified personnel.
- See manufacturer's recommended maintenance schedule for additional information.
- Retain service records and inspection reports for at least 5 years

Swale

- Inspect at least quarterly
- Minimize foot traffic within swale
- Remove trash, sediment, and obstructions from inlets and outlets
- Repair and prevent any erosion problems
- Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas
- Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted.

Maintenance Requirements

Maintenance Requirements

Bioretention

- Inspect at least quarterly
- Minimize foot traffic within bioretention area
- Remove trash, sediment, and obstructions from inlets and outlets
- Repair and prevent any erosion problems
- Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas
- Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted.
- Remove/Replace any dead plants
- Weed bioretention area
- Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall)
- Ensure full coverage of 3 of composted, non-floatable, undyed arbor mulch and spot mulch as needed
- Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed.
- Maintain healthy vegetation throughout the system
- For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.

Media Filter System (MFS)

- Inspect twice annually, before and after the rainy season (October through April)
- Cleanout, replace filter media, and maintain per manufacturer requirements, but not less than once every 3 years, removing any sediment, debris, and floatables.
- Cleanout needs to be performed by a vacuum truck.
- Maintenance and cleanout should be conducted by qualified personnel.
- See manufacturer's recommended maintenance schedule for additional information.
- Retain service records and inspection reports for at least 5 years

Swale

- Inspect at least quarterly
- Minimize foot traffic within swale
- Remove trash, sediment, and obstructions from inlets and outlets
- Repair and prevent any erosion problems
- Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas
- Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted.
- Remove/Replace any dead plants
- Weed swale area
- Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall)
- Ensure full coverage of 3" of composted, non-floatable, undyed arbor mulch and spot mulch as needed
- Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed.
- Maintain healthy vegetation throughout the system
- For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.

BMPs Distributed:

Notes:

Fu with Quirino. Irrigation system by student parking lot is repaired and observed fully functioning. RPs added cobbles to the curb cuts and gravel around the overflows. Also added a thick line of cobble down the whole length of the swale with the formerly broken irrigation, and planted some approved plants on the outside of the cobble line. EI and RP discussed that the bottom of the swale, now cobbled, needs to be planted rather than cobbled. RP agreed to do so. Still waiting on more plants from the nursery; paid to rush delivery; should have them available and planted in the next 1-2 weeks. Will also remove remaining brick from the cobbled curb cuts by the student parking lot and replant bare areas in the other swales by the wrestling center. 2-week extension issued due to progress and 3rd party delays. Report sent with Adobe Sign 7/14

Notes:

FU conducted with Quirino. Swale inlets are completed and significant planting has been done. RAs mostly completed but basins by wrestling center have a few remaining gaps and Swale 4 at the student parking lot needs planting. RP will fill in gaps with spare plants in the next day or two and order more plants for the remaining swale. Extension issued due to progress. Report sent with Adobe Sign.

Maintenance Requirements

Bioretention	• Inspect at least quarterly • Minimize foot traffic within bioretention area • Remove trash, sediment, and obstructions from inlets and outlets • Repair and prevent any erosion problems • Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas • Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted. • Remove/Replace any dead plants • Weed bioretention area • Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall) • Ensure full coverage of 3 of composted, non-floatable, undyed arbor mulch and spot mulch as needed • Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed. • Maintain healthy vegetation throughout the system • For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.
Swale	• Inspect at least quarterly • Minimize foot traffic within swale • Remove trash, sediment, and obstructions from inlets and outlets • Repair and prevent any erosion problems • Do not use pesticides/herbicides/ synthetic fertilizer within treatment areas • Inspect for and prevent standing water to prevent mosquito habitat. If water ponds for more than 2-3 days the soil should be tilled or replaced and replanted. • Remove/Replace any dead plants • Weed swale area • Prune sparingly as appropriate during plant dormancy (typically during late summer/early fall) • Ensure full coverage of 3" of composted, non-floatable, undyed arbor mulch and spot mulch as needed • Inspect clean-outs, bubble ups, curb cuts, under drains, and overflows. Remove debris and repair as needed. • Maintain healthy vegetation throughout the system • For systems with pumps, inspect pumps annually, maintain per manufacturer guidelines, and retain records for a minimum of 5 years.
Media Filter System (MFS)	• Inspect twice annually, before and after the rainy season (October through April) • Cleanout, replace filter media, and maintain per manufacturer requirements, but not less than once every 3 years, removing any sediment, debris, and floatables. • Cleanout needs to be performed by a vacuum truck. • Maintenance and cleanout should be conducted by qualified personnel. • See manufacturer's recommended maintenance schedule for additional information. • Retain service records and inspection reports for at least 5 years

DRAFT

March 14, 2011

Tom Gorndt
Bellarmine College Preparatory
960 West Hedding Street
San José, CA 95126

Subject: **Stormwater Treatment Controls Operation & Maintenance Inspection at Bellarmine Humanities Building located at 960 West Hedding Street, San José**

Dear Mr. Gorndt:

This letter is to inform you that maintenance of stormwater treatment controls located at 960 West Hedding is required. The stormwater treatment controls you are responsible for maintaining were installed as specified in the Development Permit for the property (Planning Permit No. PD07-105; Public Works Permit No. 3-04527). You should be aware of the location(s) of the stormwater treatment control(s) on the property and their maintenance requirements. Maintenance concerns were identified during an inspection by City of San Jose staff on March 11, 2011. Please refer to the attached Inspection Report and address the Areas of Concern(s) by the Response Due date(s).

The City of San José implements a comprehensive stormwater management program as required by the San Francisco Bay Municipal Regional Stormwater National Pollutant Discharge Elimination System Permit, issued by the San Francisco Bay Regional Water Quality Control Board (http://www.waterboards.ca.gov/sanfranciscobay). An element of the City's stormwater program is to carry out inspections to ensure installed stormwater treatment controls are properly maintained. Water that enters the City's storm drain system flows untreated into the nearest creek or river and ultimately to the San Francisco Bay. The stormwater treatment control(s) on your property are designed to prevent pollutants from entering the City's storm sewer system, and it is required that they be maintained properly.

Title 20.95.120 of the San Jose Municipal Code requires all stormwater runoff treatment measures be permanently maintained and in good repair. Please take appropriate measures to address the maintenance concerns identified on the Inspection Report by the Response Due date(s). We are here to support your efforts to meet these requirements. If you have any questions about the Inspection Report or the stormwater treatment control(s) on your site please call me at (408) 793-5332.

Sincerely,

Jaime Avalos
Environmental Inspector I

Memorandum

TO: Erin Morris
Planning and Building

FROM: **Nadia Naum-Stoian**
Fire Prevention Engineer
San Jose Fire Department

SUBJECT: **INITIAL RESPONSE TO DEVELOPMENT APPLICATION**

DATE: 09/09/04

Approved

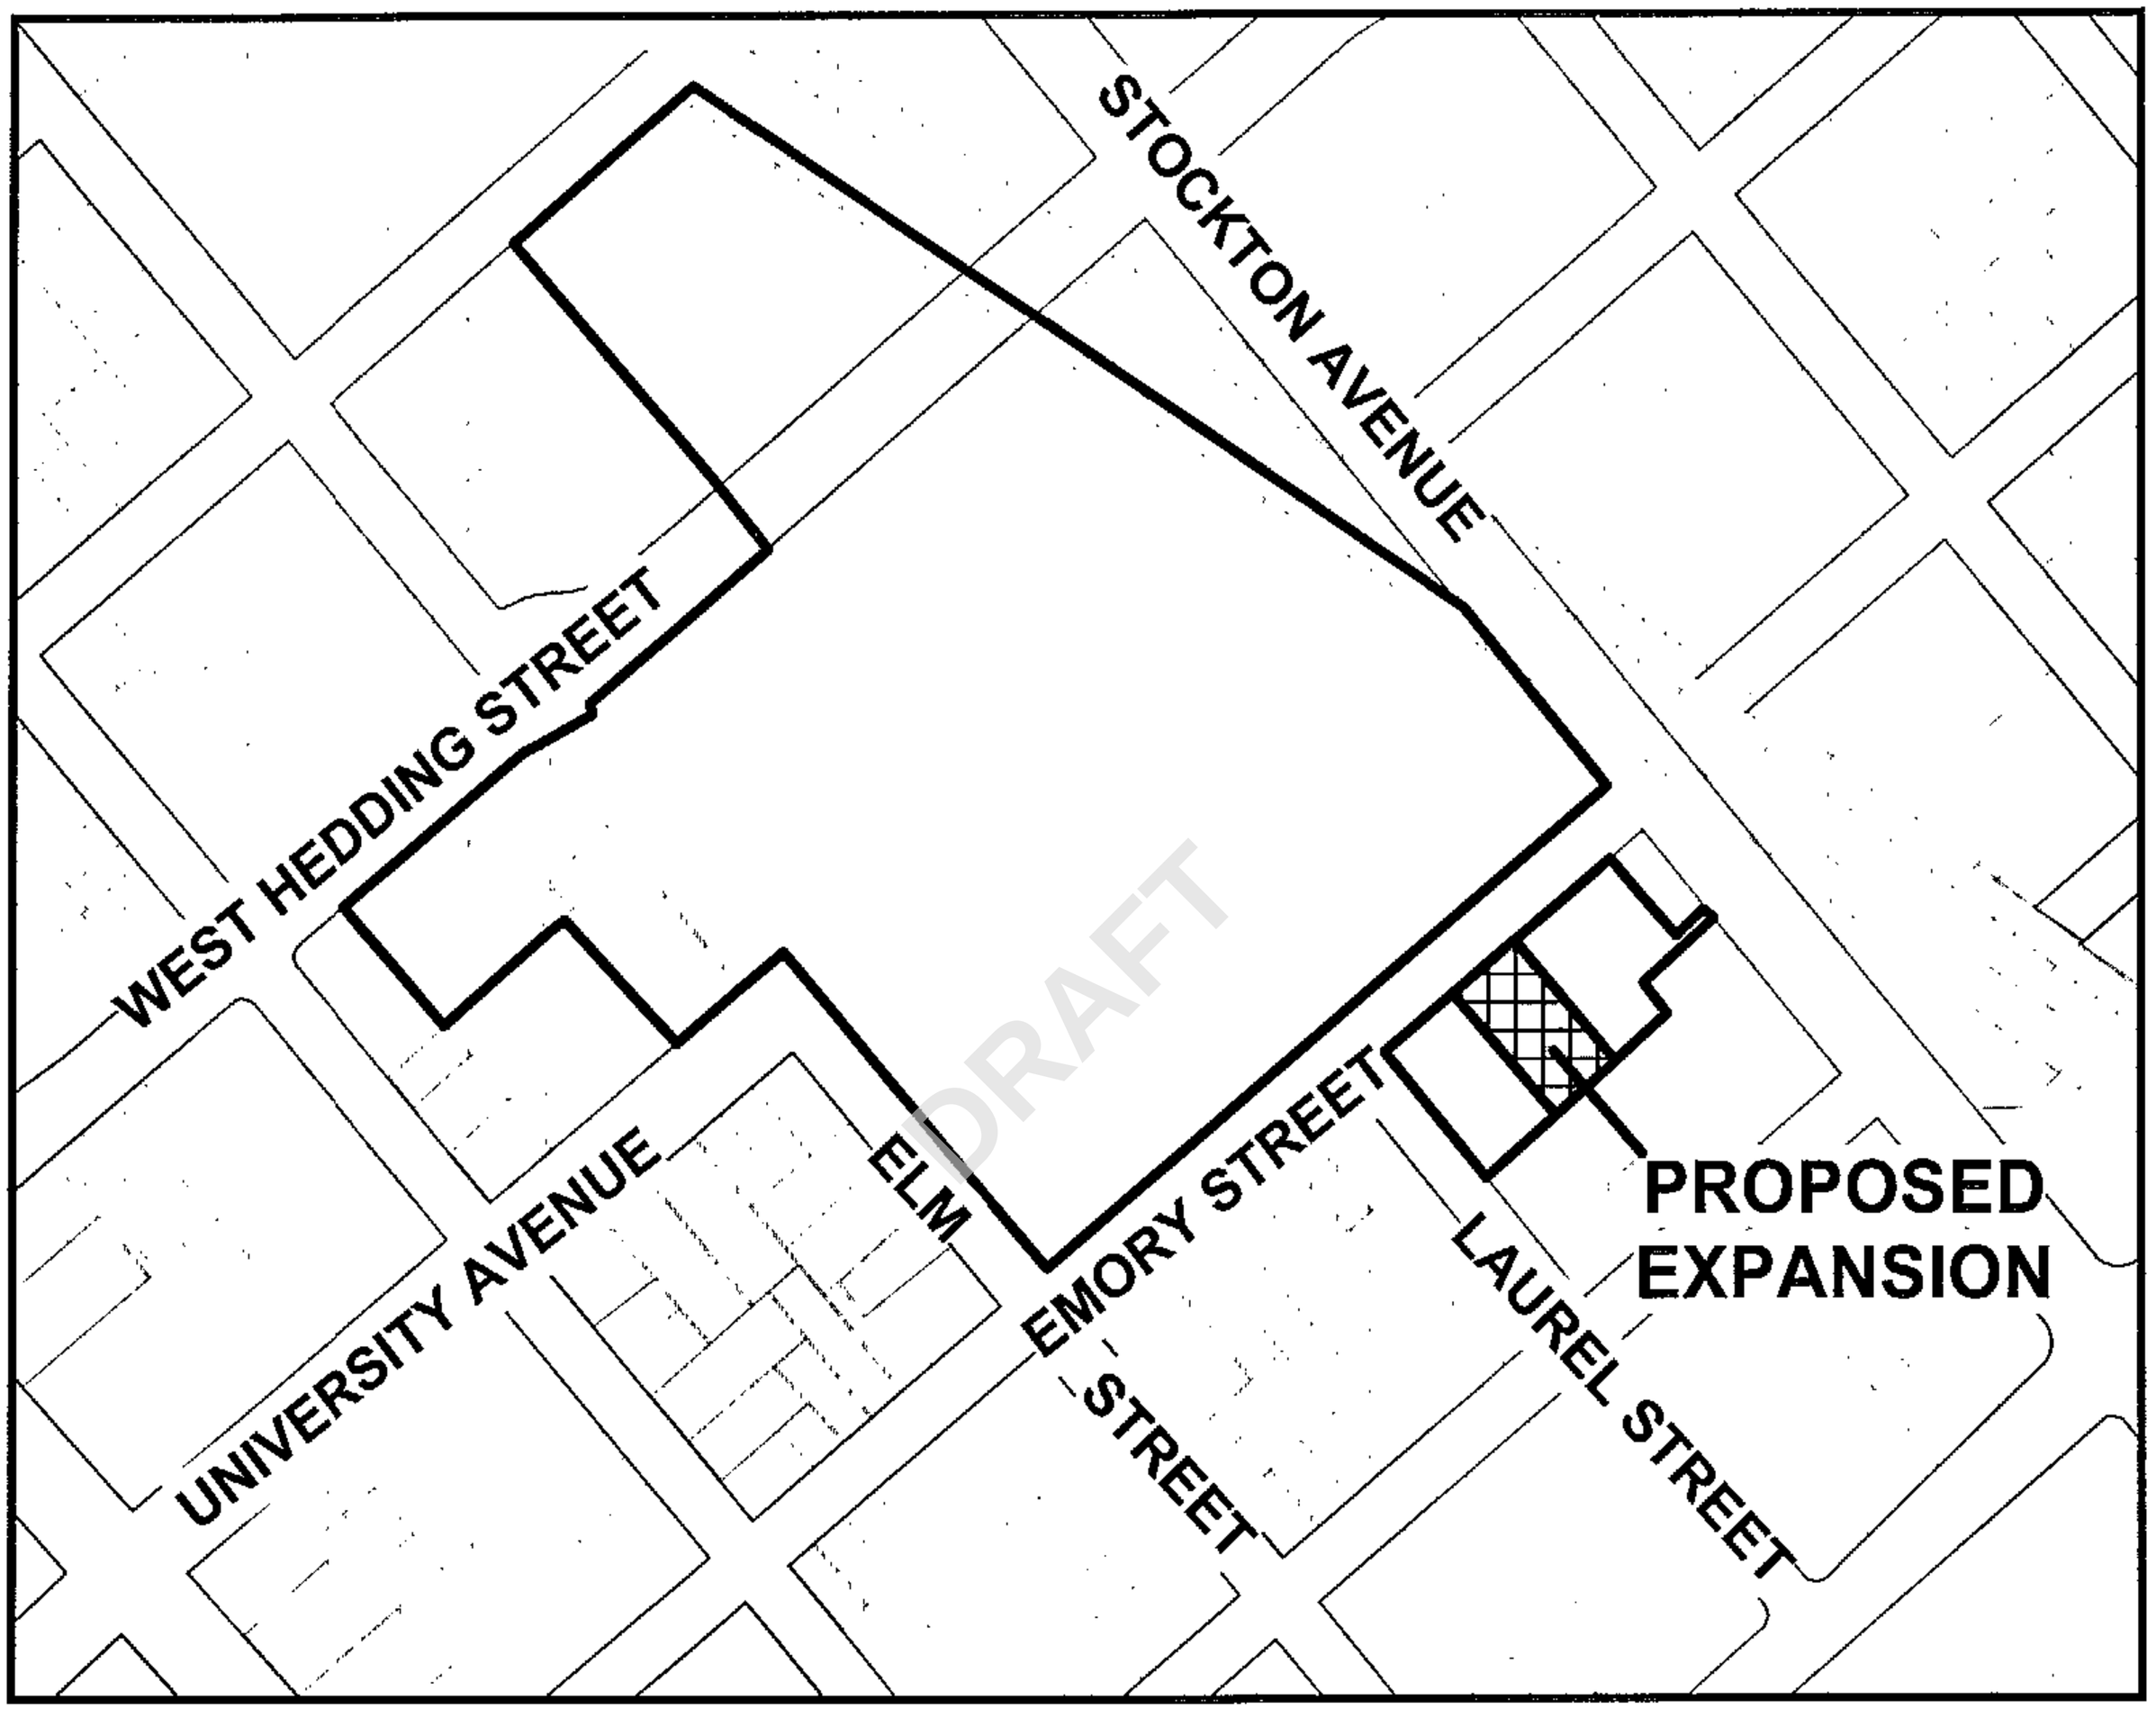
Date n/a

PLANNING NO.: CP04-083
DESCRIPTION: Conditional Use Permit to allow conversion of existing one-story office building to private school use on a 0.404 acre site
LOCATION: south side of Emory Street 300 feet west of Stockton
ADDRESS: south side of Emory Street 300 feet west of Stockton (760 EMORY ST)
FOLDER #: 04 124242 AO

DRAFT

The San Jose Fire Department has reviewed the related plans as submitted and has the following comments and requirements.

- Comply with comments from the Building/Fire Departments at the plan review stage.



- A permit must be obtained from the Building and Fire Departments. Submit three (3) sets of construction plans to the Building Department, one (1) of those sets of plans will be routed to the San Jose Fire Department for review and comments.

- We reserve the right to make comments at a future date.

If you have any questions regarding these items, please contact me at (408) 277-8754.

Facility Information

Facility Status: Active
Equipment / Fixtures Reviewed: Yes
Review Results: Changes made
Grease Producing: Yes
EPS Serviceware: Yes

SIC Code	Description	NOI?
8211	Elementary and secondary schools	No

NOI Filed: (blank) N/A SIC Needs Review: N

Pretreatment

Pretreatment is Not Adequate

Additional wastestreams require pretreatment
Pot sink and pre-rinse no GCD

Observations

Wipe pots, pans, and work areas prior to washing: Yes

Dispose of food waste directly into the trash: Yes

Collect waste oil and store for recycling: Yes

Notes for Office Use Only:

Facility has 2 30 Lb. GTs, one of which is not in use. The one that is in use receives discharge from a 2c sink and an adjacent 1c. The fixtures that would, presumably, receive the bulk of the greasy waste have no grease control. The pre-rinse for the dishwasher has a garbage disposal. There is a 1c sink in dishwasher room that was observed, at the time of inspection, to have greasy pans in it. RP stated that these pans are not washed in this sink, chefs had only placed them there until they could be washed.

Because this facility pre-dates ordinance, no additional grease control will be required at this time.

GCD Inspection Results:

Inspected during FOG inspection.

GCD Name Grease trap # 1 - Main Kitchen (Grease Trap)
Opened? Yes
GCD Condition Adequate
Documentation Inadequate
Explanation of Documentation inconsistent records, some invoice only

Inspector Notes:

Date	Note
03/15/2018	Inspector: Rachel Hussey — IND Follow-up — Inspection ID: 561249

⇨ Conducted the follow up inspection with Mr. Arias.

All six catch basins in the parking lot south of the baseball field were fitted with new filters. The hose previously observed next to the compactor in the parking lot was removed, and RP stated groundsman were instructed to clean carts in the gravel materials storage area near the botany garden.

New compactor bin was functioning properly. Two secondary containment trays were installed, one under the bin, the other under the joiner. Absorbent pads were purchased to contain spills around the compactor and tallow bins. RP stated a cleaning log was requested from the kitchen manager, Mr. Soulia, which would document every time the secondary containment is serviced and where the waste was disposed.

All previous AOC's corrected.

03/09/2018	Inspector: Rachel Hussey — IND Follow-up — Inspection ID: 561195

⇨ Conducted the follow up inspection with Mr. Arias. The compactor bin was replaced with a new one and no fluids were observed flowing into the drain. RP is thinking about installing a filter and placing the bin in some form of secondary containment; he and the chief haven't settled on a permanent solution.

03/08/2018	Inspector: Rachel Hussey — IND Initial — Inspection ID: 497311

DRAFT

Date	Note		
03/08/2018	Inspector: Rachel Hussey	IND Initial	Inspection ID: 497311

⇨ Conducted an inspection of the high school with the director of maintenance, Quirino Arias.

The trash compactor outside the kitchen door/loading dock was observed actively leaking into an adjacent storm drain. RP and the kitchen manager, Jeremy Soulia, took immediate steps to contain the spill in a bus tub, then used a mop and absorbent to clean the area. Mr. Arias stated a new receptacle was stored on site and would replace the leaking receptacle as soon as the bin is emptied on 3/9.

Two tallow bins stored on the loading dock ramp were adequately managed; Mr. Soulia was advised to keep the bins and ground beneath clean using dry methods.

Facility storm drains were either clean or contained leaf litter. Three of the six catch basins in the parking lot south of the baseball field were fitted with REM drop inlet filters. The filters were impacted with leaf litter, no violation was issued for drain maintenance as RP had a groundsman immediately pull the grates and clean out the filters.

A second trash compactor, stored in the south side parking lot, was observed in good condition. Both compactors are serviced twice a week. RP admitted groundsmen rinse golf carts with a hose located next to the compactor. No direct evidence of washing was observed at the time of inspection; RP was advised to discontinue the practice and remove the hose.

The campus was free of loose litter and parking lots were in adequate condition.

All chemicals used in the Chemistry labs are kept in the science building, and are collected by an approved hauler for disposal once a year.

Slurry from the pottery shop is filtered and either dried out and disposed or reused. Instructor recycles much of the material back into the classroom supply. All glaze residues from the cooling bath are collected and fired in the kiln before being disposed as solid waste.

Each building has 2-3 custodial closets for dumping mop and waxing water.

No AOC's observed in the facility fruit and vegetable garden. Instructor does not use pesticides, composing bin fluids are filtered through sand and run into an adjacent planting bed. Facility wide pest management, forklift and golf cart maintenance are contracted out.

Pretreatment

Pretreatment is Adequate

Observations

Wipe pots, pans, and work areas prior to washing:	Yes
Dispose of food waste directly into the trash:	Yes
Collect waste oil and store for recycling:	Yes

Notes for Office Use Only:

Grease trap maintenance documentation were up to date. Last service was on 3/26/2013.

NOTE: Grease trap # 2 (next to dishwasher) is inactive.

GCD Inspection Results:

Responsible Party: Bellarmine College Preparatory
Inspected during FOG inspection.

GCD Name	Grease trap # 1 - Main Kitchen (Grease Trap)
Opened?	Yes
GCD Condition	Adequate
Documentation	Adequate
Explanation of Documentation	Last service was on 3/26/2013
Required Frequency -	
Darling International Frequency -	Monthly

Trap #2 is inactive changed in DB

What about Grease Trap #2?

Sanitary Sewer Overflow:

FSE in close proximity to a grease related blockage or SSO? N/A

IND Inspection Report

WO ID	: 309,378	Inspection Date	7/15/10
Task ID	: 536,275	Inspection Type:	Initial
Due Date	: 07/23/2010	Inspector:	Jon Reger
		Work Order Complete Date	8/4/2010 12:00:00AM

NOTES: The business has a full service kitchen located in the Licardo building. The correct address for the business is 960 West Hedding Street.

DYE TEST #1: The 2-Compartment Sink, and the 1-Compartment Sink adjacent to it are plumbed to the Grease Trap (#1) in the main kitchen area.

GREASE TRAP #1, Main Kitchen: It is clean, neat, and orderly. Less than 1/4-inch of grease is present. The submerged inlet, and outlet baffles are intact, via probing. Some minor corrosion is present.

DYE TEST #2, Dishwasher Area: No dye was observed from the dishwasher, nor the garbage grinder, nor the 1-Compartment Pot Sink. Grease Trap #2, by the dishwasher, showed no color change after 10-15 minutes of flow from the above devices.

GREASE TRAP #2: It is clean, neat, and orderly. Only a trace amount of Oil and Grease is present. It is a 30-# Grease Trap also.

COMPACTOR: It is clean, with a few pieces of loose trash present. It is not leaking.

STORM DRAINS: Loading Dock, Parking Lot, and the Basement"s dewatering sump are clean, neat, and orderly.

TALLOW DRUM: It is immaculate. However, minor old stains are present on the adjacent wall.

REQUIREMENTS:

1) Provide 3 years of monthly Grease Trap records. In particular, obtain records for 5/10, 2/10, 11/09, 10/09, 3/09, and 2/09. A letter from your vendor is acceptable.
2) Secure the loose Floor Drain Grates by the pasta cooker, and the dishwasher.

RECOMMENDATIONS:

Continue good housekeeping

Keep records of vapor hood and roof exhaust vent cleanings on site for three years

Provide employee training in storm water pollution prevention

NOTE: This Inspection Report supercedes the one that was issued at 1445 Hours. A Storm Water Violation was observed at 1500 Hours.

ENFORCEMENT: An Official Warning was issued.

DRAFT

NOTES

Notes Taken

Outdoor garbage/recycling storage and/or disposal areas
Outdoor rooftop equipment
Outdoor parking and/or access road
Outdoor hazardous waste storage and/or disposal areas
Outdoor wash areas

HAZARDOUS WASTE STORAGE: Two 55-gallon drums, one for waste oil, and the other for waste oil filters, are present. Both are stored in a "watering trough" secondary containment vessel. The area is located underneath the West Hedding Street overpass. No discharges were observed in this area. No water had accumulated in the secondary containment vessel either.

WASH AREA: The business was washing vehicles on a cement pad immediately adjacent to the maintenance shop, and the West Hedding Street Overpass. Washwater was observed discharging into a Storm Drain about 25-feet away.

ENFORCEMENT, GREASE TRAP RECORDS: The business was not issued an Official Warning Notice for the Grease Trap Records since they had the majority of records on site, and the Grease Traps contained very little grease, and appeared to be operating normally.

SECOND FIELD INSPECTION REPORT ISSUED: The discharge to the Storm Sewer system was observed at 1500 hours when I was in the process of leaving the facility. A second Field Inspection Report with an Official Wawrning Notice was issued at that time. The second report simply appended the observed violation to the first Field Inspection Report..

GREASE TRAP # 2, ADDENDUM: Due to the poor quality of the light source, no dye was observed discharging into Grease Trap # 2. However, it is believed that the 1-Compartment Pot Sink/Pre-Wash Sink discharges into this Grease Trap.

This warning is to notify you of violations of the San Jose Municipal Code(S.J.M.C.) as noted below. You are hereby notified to take appropriate remedial actions to avoid additional legal actions from being taken against you.

San Jose Municipal Code Violations

S.J.M.C. 15.14.515 - Discharge into Storm Drain Prohibited

S.J.M.C. 15.14.530 - SC-Protection from accidental discharge

☐ Referred for Administrative Citation with fines up to $2500 per violation.

DRAFT

REMEDIAL ACTIONS REQUIRED:	DUE DATE
- Effect method to protect storm drain all cleaning and wash water/process water	7/25/10
- Cease discharge to storm drain and/or receiving water all cleaning and wash water/process water	7/15/10

Notes/Comments:
Washwater was observed discharging into the Storm Drain by the maintenance shop, at 1500 hours.

REQUIREMENTS:
1) Immediately cease discharging washwater to the Storm Drain. Completed on 7/15/2010.
2) Develop a procedure to prevent washwater from discharging to the Storm Drain, -OR- cease washing vehicles.

Do not allow any substance, other than rain, to enter the storm drain or to leave residues on outdoor surfaces which may be washed away by rains into the storm drain system

Urban Runoff Facility Inspection Report

SIC:	5812	Contact:	Thomas Gorndt, Chief Financial Officer	Contact Phone:	(408)537-9217
Work Order:	309378	Site Name:	Bellarmine College Preparatory	Site Id:	50872
WO Task ID:	536275	Address:	960 W Hedding St	Inspection Type:	Initial

Do not allow any substance, other than rain, to enter the storm drain or tot leave residues on outdoor surfaces which may be washed away by rains into the storm drain system

Recommendations

- GREASE TRAP #2: It is clean, neat, and orderly. Only a trace amount of Oil and Grease is present. It is a 30-# Grease Trap also.

- COMPACTOR: It is clean, with a few pieces of loose trash present. It is not leaking.
- STORM DRAINS: Loading Dock, Parking Lot, and the Basement's dewatering sump are clean, neat, and orderly.
- TALLOW DRUM: It is immaculate. However, minor old stains are present on the adjacent wall.
- REQUIREMENTS:
- 1) Provide 3 years of monthly Grease Trap records. In particular, obtain records for 5/10, 2/10, 11/09, 10/09, 3/09, and 2/09. A letter from your vendor is acceptable.
- 2) Secure the loose Floor Drain Grates by the pasta cooker, and the dishwasher.
- RECOMMENDATIONS:
- Continue good housekeeping
- Keep records of vapor hood and roof exhaust vent cleanings on site for three years
- Provide employee training in storm water pollution prevention
- NOTE: This Inspection Report supercedes the one that was issued at 1445 Hours. A Storm Water Violation was observed at 1500 Hours.

- ENFORCEMENT: An Official Warning was issued.

COMPLIANCE INFORMATION

Violations Identified	Enforcements for Identified Violations	Complete Date

MATERIALS DISTRIBUTED

BMP Distributed to the IU	Quantity
Storm Drain Stencil (Eng)	1
Storm Drain Stencil (Span)	1

RECOMMENDATIONS

NOTES: The business has addressed and resolved all Areas of Concern:

1) According to Mr. Quirino Arias, Housekeeping Supervisor, car washing ceased on July 15, 2010, the day of the violation.
2) All Floor Drain Grates are now secure.
3) The business provided 3 years of nearly monthly Grease Trap maintenance records. The traps were pumped out 12 times in 2008, 11 times in 2009, and five times this year.

GREASE TRAP PUMPING, and RECORDS: The business has agreed to monthly pumping from now on. Records for May 2010, and July 2010 were not available.

REQUIREMENTS: None.

RECOMMENDATIONS:

1) Maintain the new Storm Water Treatment Unit per manufacturers specifications.

Apply Storm Drain Stencil

Continue good housekeeping

Have spill kit available for outdoor cleanup

Keep records of vapor hood and roof exhaust vent cleanings on site for three years

Keep tarp on hand to cover any exposed oily parts during rain events

Provide employee training in storm water pollution prevention

NOTES

DRAFT

IND Inspection Report

WO ID	: 309,378	Inspection Date	8/4/10
Task ID	: 538,981	Inspection Type:	FOG & IND Follow-up
Due Date	: 08/04/2010	Inspector:	Jon Reger

Notes Taken

Outdoor garbage/recycling storage and/or disposal areas
Outdoor material storage areas
Outdoor hazardous waste storage and/or disposal areas
Outdoor parking and/or access road
WASTE MATERIALS: Such items are stored under the overpass.
Outdoor rooftop equipment
STORMWATER TREATMENT UNIT: The business has a below grade 3,000 gallon, 5 sealed manhole solids separator, and filtration unit. Treated Water from this unit discharges into an approximate 1,500 gallon below grade cistern; a sump pump pumps the water into the Storm Sewer Main. Note, all Storm Water from the site goes through this unit per the contractor. It is located near the Maintenance Shop, and the Overpass.
10 DAYS EXCEEDED: The kitchen was closed for the week of July 26, 2010-July 30, 2010. Therefore, the balance of the requirements were not completed.
INSPECTION PRIORITY: The inspection was prioritized based on the business' proximity relative to a Sanitary Sewer Overflow:
1) Object ID 96, Line Segment # 29746, at 695 Coleman Avenue, occurred on 9/3/2009.
Analysis of the Sanitary Sewer System shows that the business is not connected to, nor flows toward this main. Therefore, the business did not contribute to this Sanitary Sewer Overflow.

Notes:

Met with Devcon site superintendent Rich Post. Site is currently being graded. There is also excavation and some form being installed. They will be grading to create access roads on site.
They have shut down the street behind the building to allow for equipment access.
DI's gave been protected with filter fabric, gravel bags need to be added.
Site has rumble plates in place for the entrance/exit, need improvement (rock/filter fabrics) to be adequate for activity. Sweeper is also on site.
Perimeter has adequate vegetation.

Site will improve DI protection and entrance/exit.

Site Size:
Weather Condition: Clear

COMPLIANCE INFORMATION

Violations Identified	Enforcements for Identified Violations	Completed
CON - storm water catch basin	Clean out/Pump Out/Unclog	09/01/2009
CON - storm water catch basin	Provide best management practice protection (i.e. rocks entrances, install erosion/ sediment control measures, create washout area)	09/01/2009
CON - Perimeter of Site	Add additional erosion/sediment control measures	09/01/2009

RECOMMENDATIONS

Apply current best management practices for construction activities
Do NOT use soap (even if biodegradable)
Increase sweeping frequency
Use gravel bags instead of sand bags

NOTES

Notes Taken

Visited site, observed catch basinneeds cleaning. More sweeping needed, and more wattles around project. Assistant superintendent was talked to about ensuring compliance year round at site.

SITE INFORMATION

Site Size:
Weather Condition: Clear

RECOMMENDATIONS

No areas of concern at this time
Check all storm water control measures before and after rain events
Continue to maintain all storm water control measures.
Inspect and maintain storm drains or storm water treatment devices (e.g. storm drain filters) regularly prior to rain events

NOTES

Notes Taken

Storm inlet in the main driveway has filter inside. It's difficult to place bags around the drain since the area has limited space and trucks drive in and out a lot. Just need to make sure that filter is cleaned / maintained frequently.

Keep tarp on hand to cover any exposed materials especially dirt piles, stockpiles, cement bags and oily parts during rain events
Keep dumpsters/stockpiles/dirt piles and other material storage away from storm drains.

NOTES

Notes Taken

Project completion (shell): 10/2009; Inside will be done 03/2010.
The only drains that are active are the two drains located in the parking lot. One of which only had filter fabrics inside. Per Mark Ingram, it is a busy area and trucks drive over the wattles and bags. Advised him to make sure that area is always maintained / swept if bags or wattles are not going to placed around the drain.

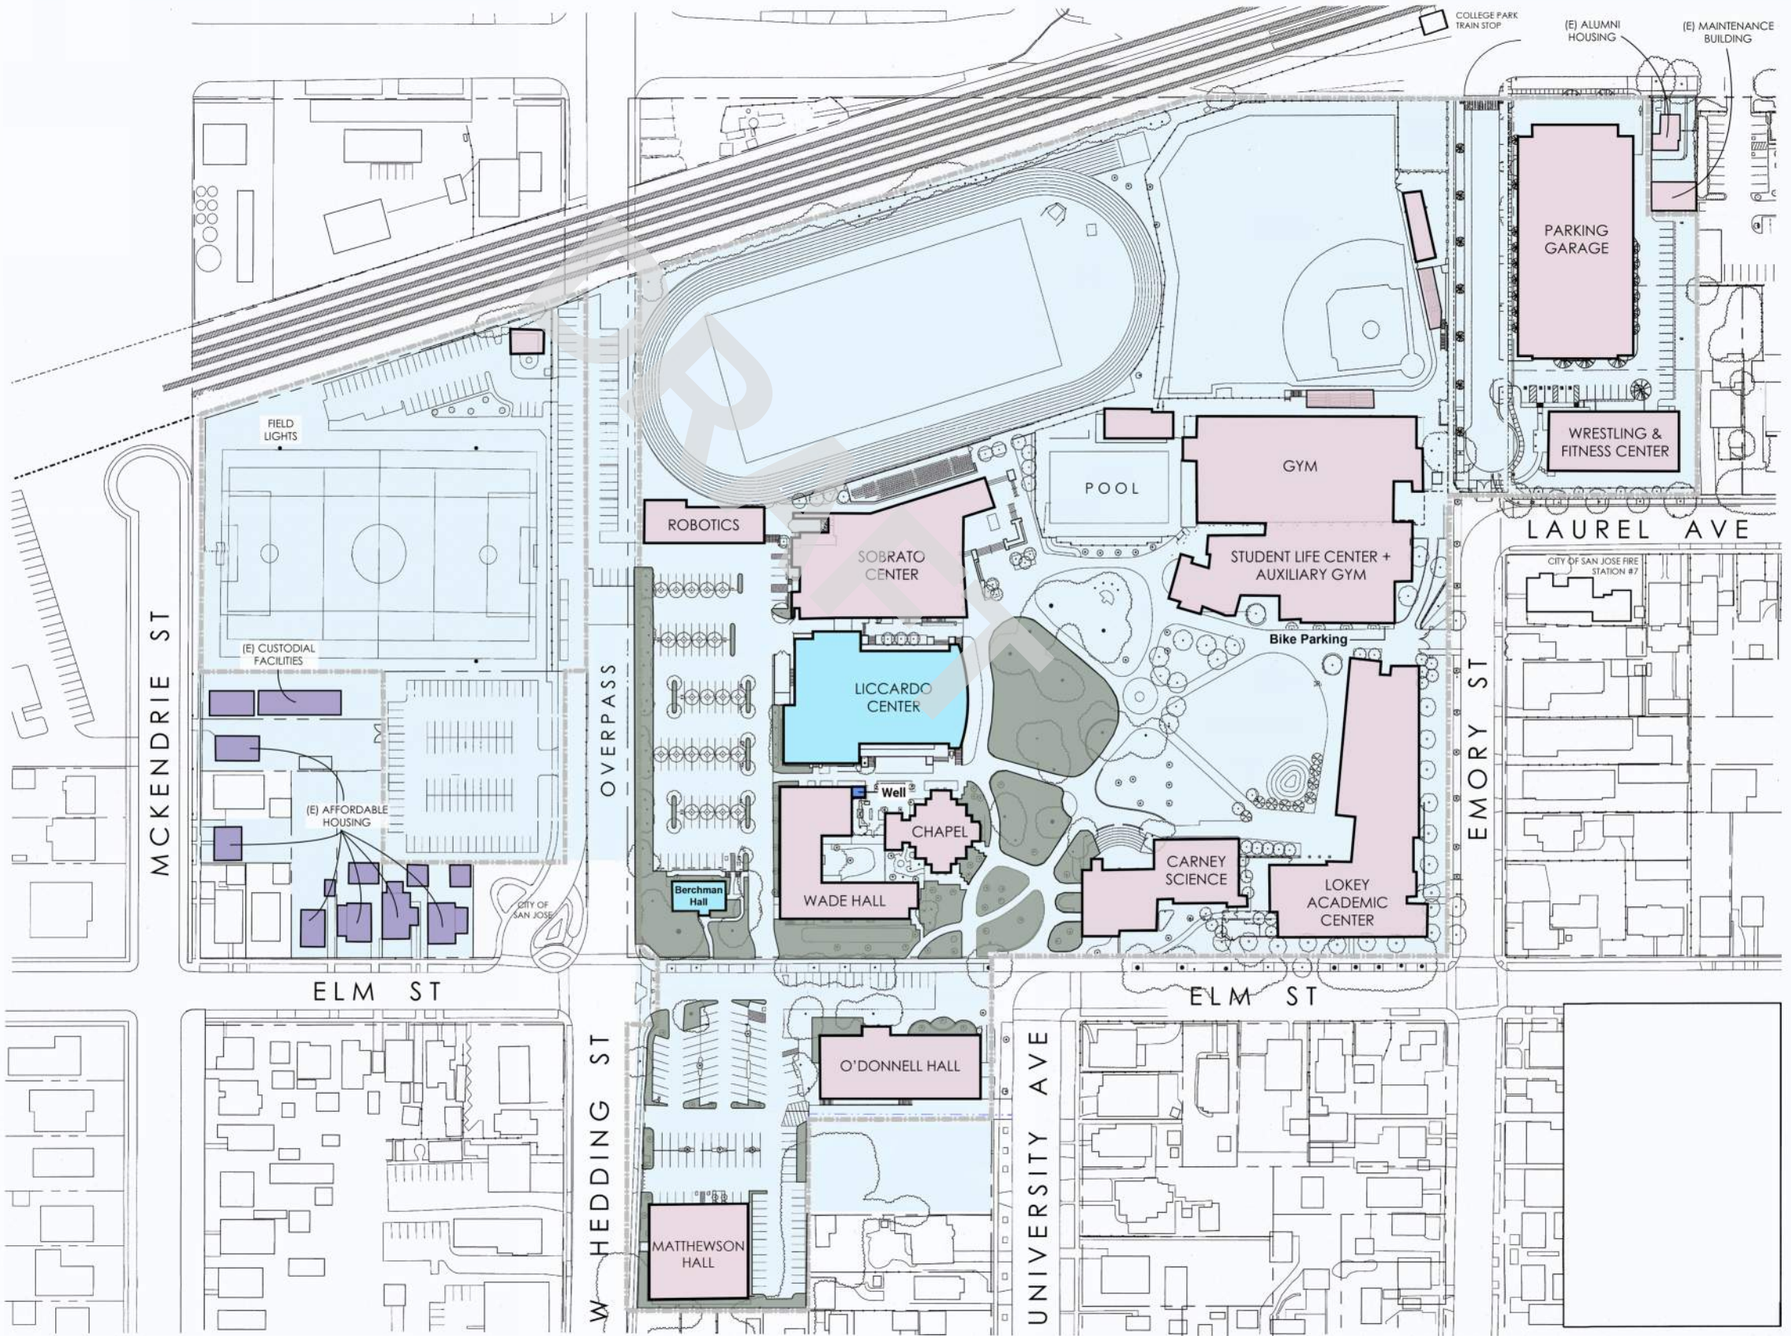
EXISTING CONDITIONS

MASTER PLAN
LEVEL 1

PHASING



1. Build Affordable Faculty Housing & Jesuit Community Housing*
2. Relocate Berchman's Hall
3. Demolish Wade Hall
4. Build New Entry and Drive
5. Build New Academic Building*
6. Renovate Liccardo Center
7. Demolish O'Donnell Building
8. Build New Classroom & Administration Building*

9a. Renovate Mathewson Hall

9b. Demolish Mathewson Hall

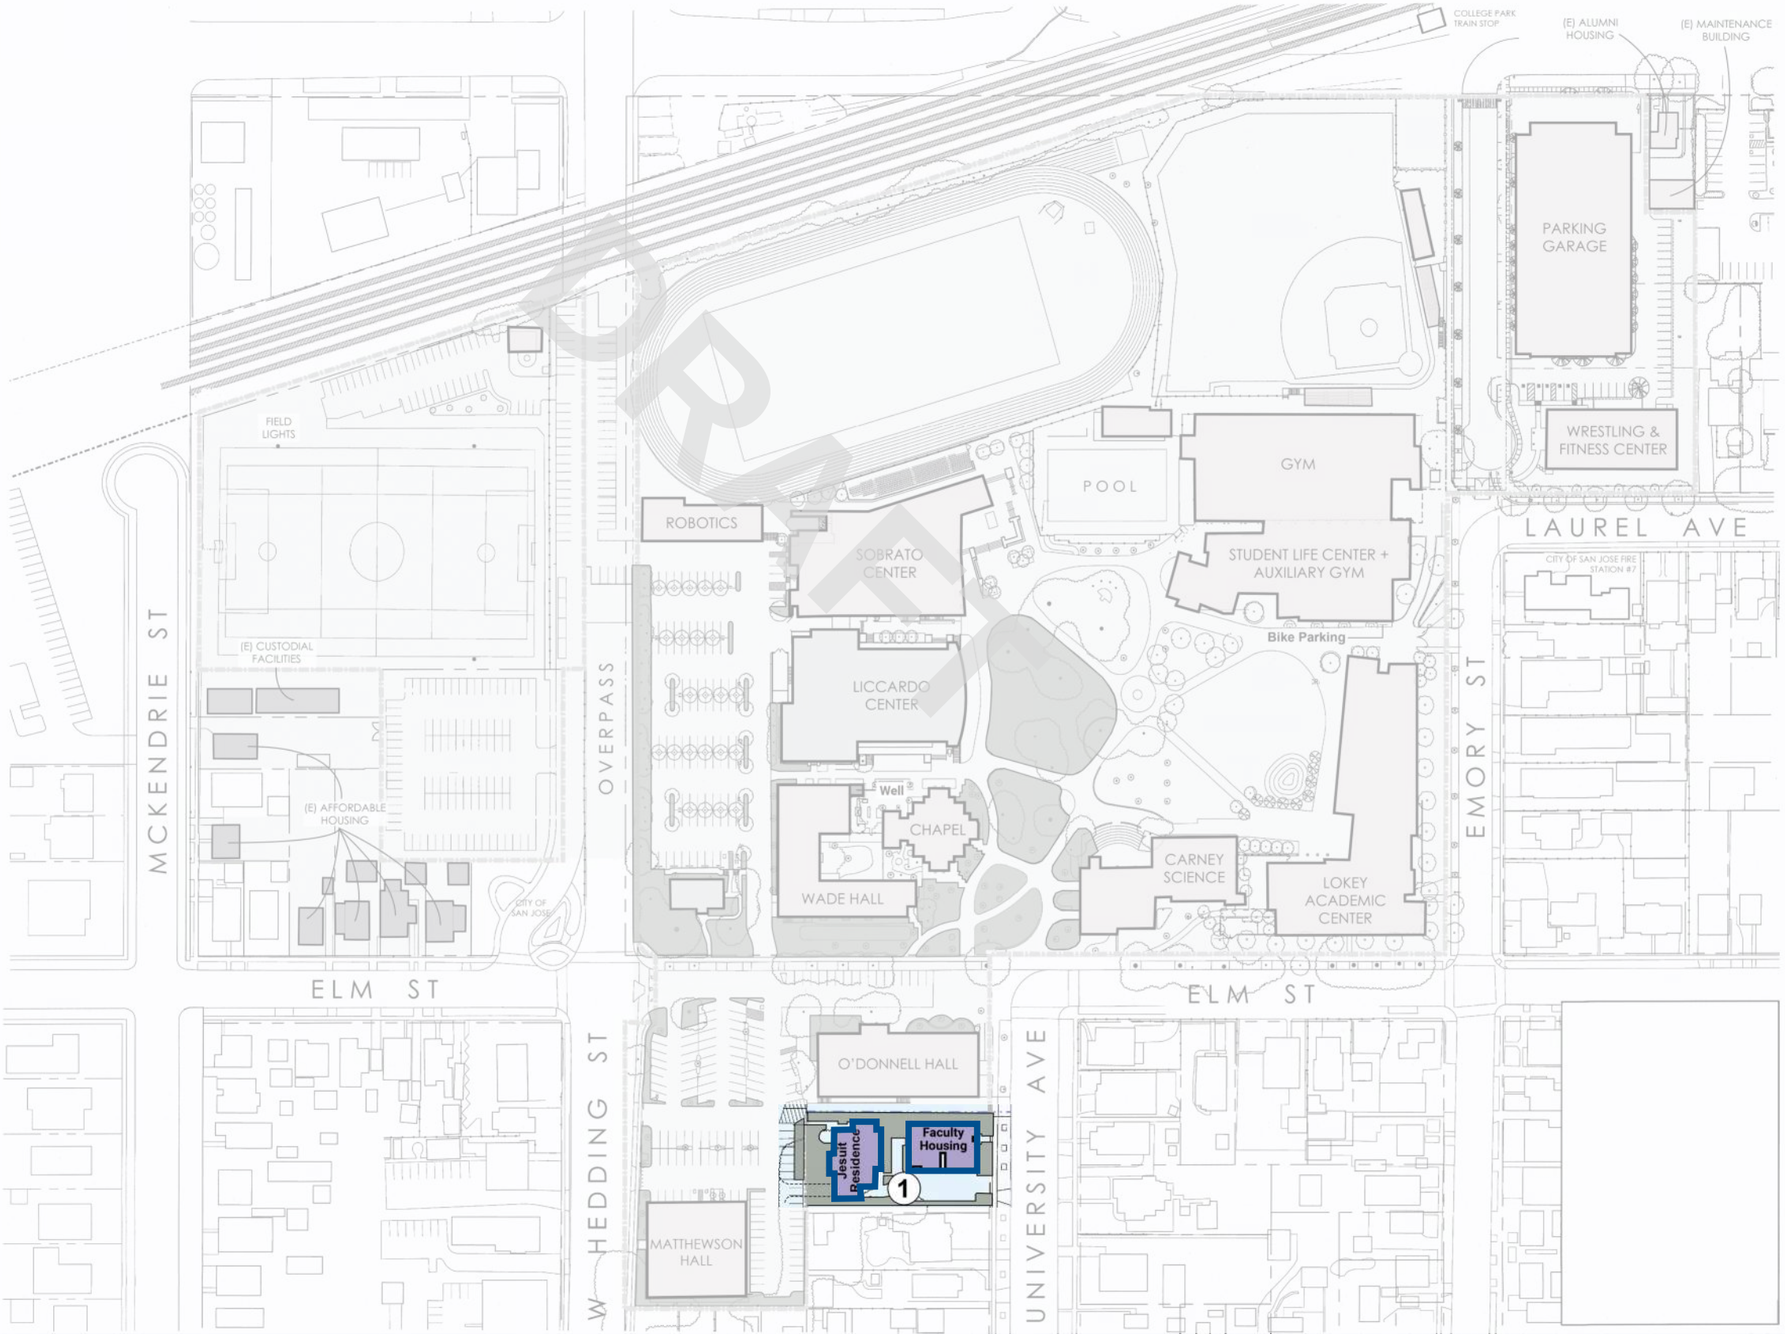
Max. Student Capacity: 1,750
Est. in 2007 PD Zoning Approval

* All new construction to be LEED Silver Certified

Master Plan - Phase 1

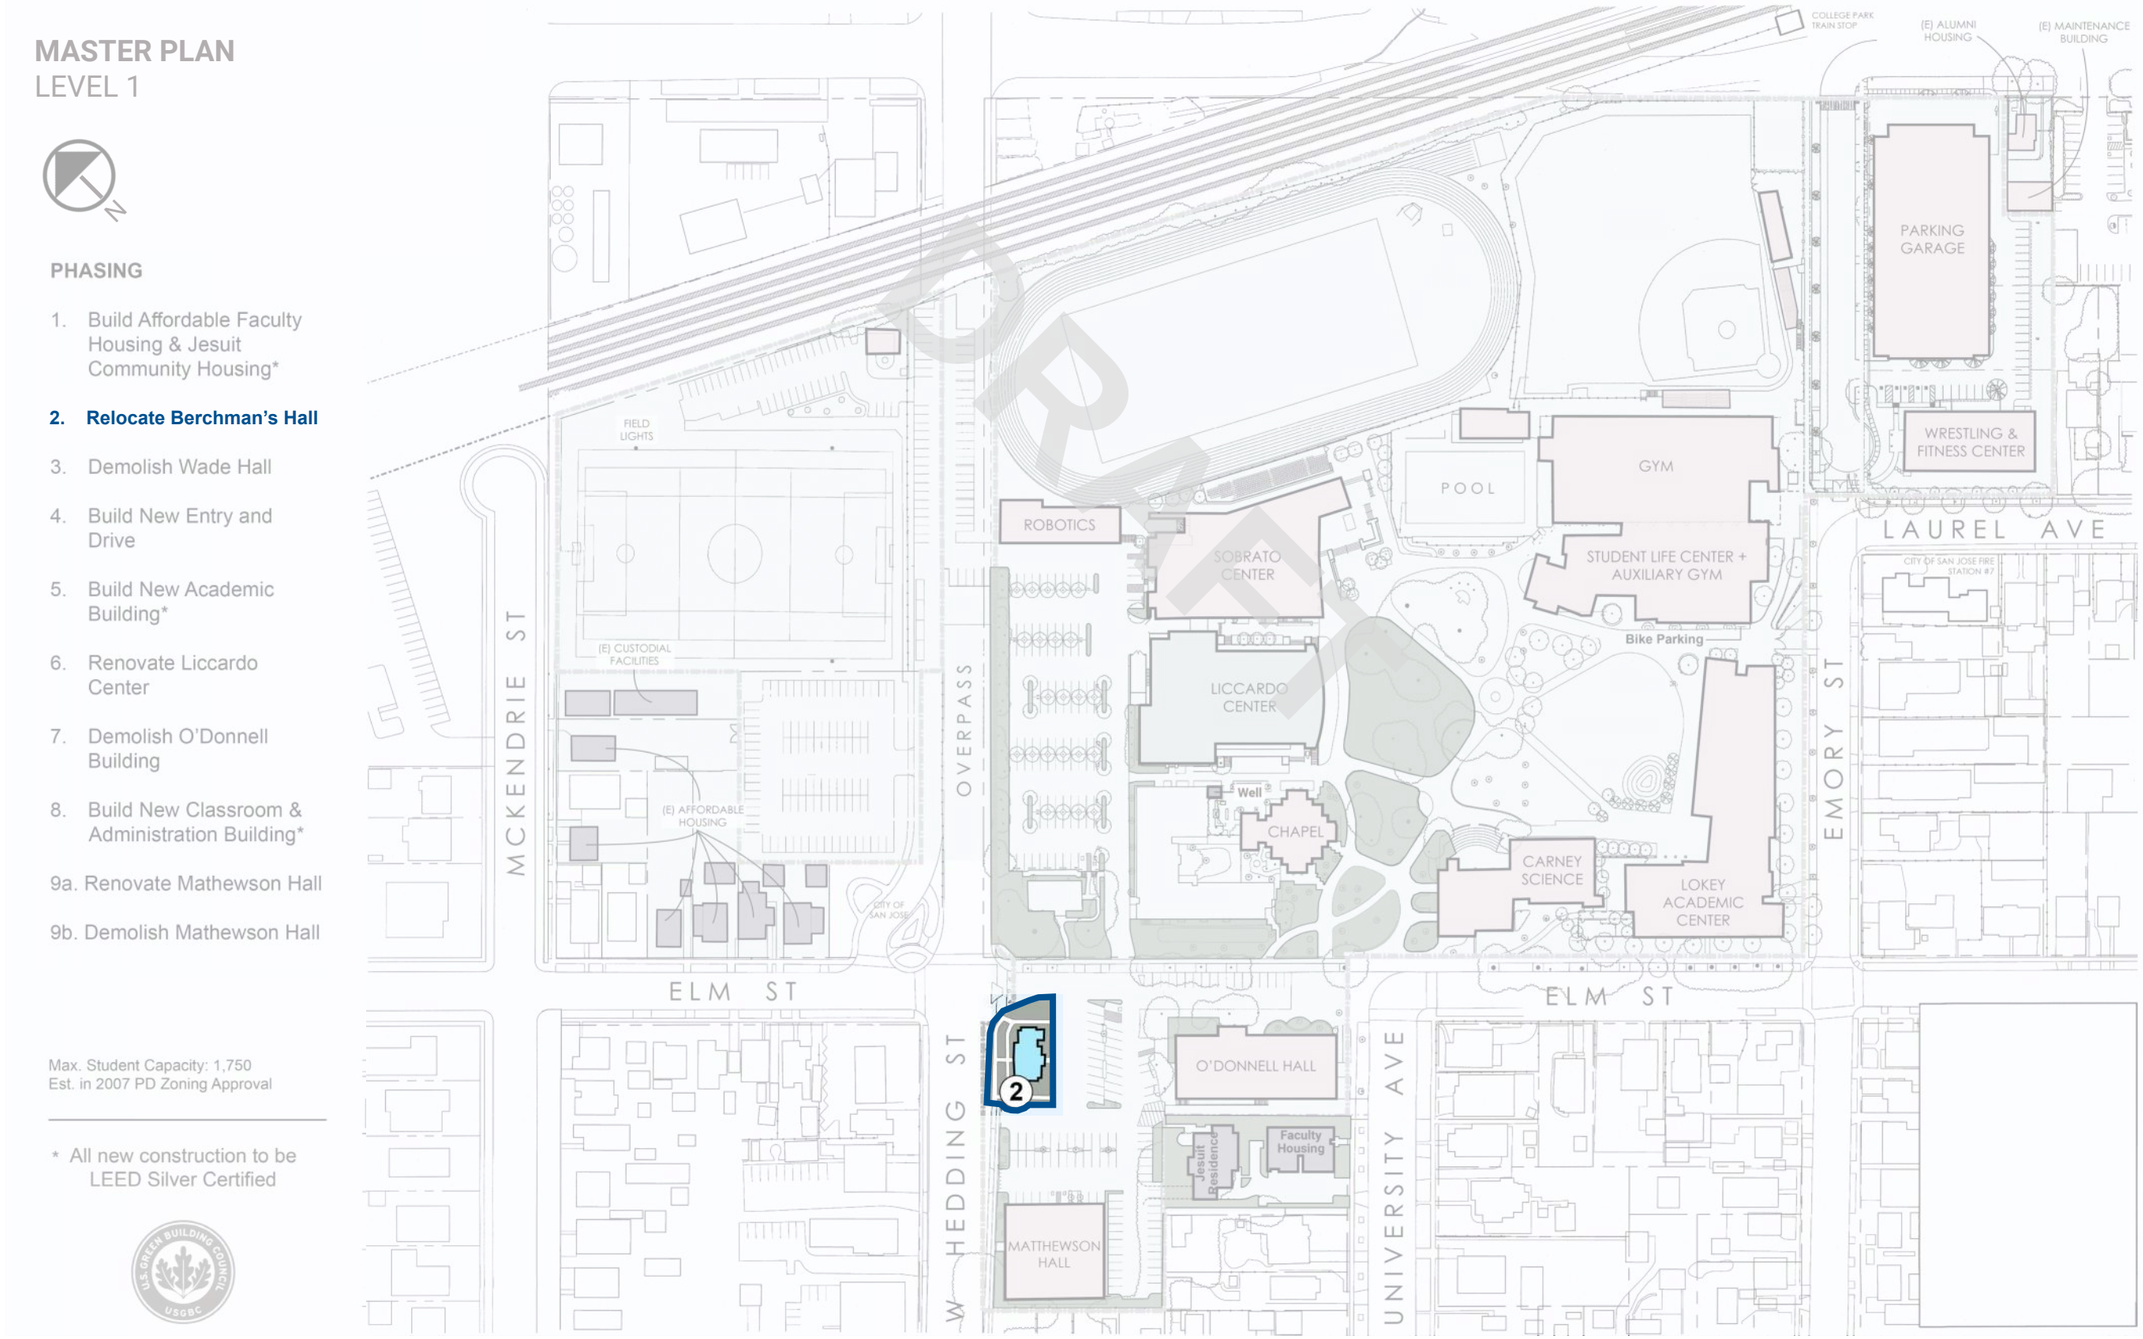
MASTER PLAN
LEVEL 1

PHASING



1. **Building Affordable Faculty Housing & Jesuit Community Housing***
2. Relocate Berchman's Hall
3. Demolish Wade Hall
4. Build New Entry and Drive
5. Build New Academic Building*
6. Renovate Liccardo Center
7. Demolish O'Donnell Building
8. Build New Classroom & Administration Building*

9a. Renovate Mathewson Hall



9b. Demolish Mathewson Hall

Max. Student Capacity: 1,750
Est. in 2007 PD Zoning Approval

* All new construction to be LEED Silver Certified

Master Plan - Phase 2

Master Plan - Phase 3

MASTER PLAN

APPENDIX G

QUALIFICATIONS

DRAFT

Lea Palumbo – Project Manager, Due Diligence

BS – Environmental Policy Analysis and Planning (emphasis in Climate Change Policy), University of California, Davis

Ms. Palumbo has been in the environmental service industry since 2018. She provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, and Historical Records Reviews.

Project experience for Ms. Palumbo includes:

- Phase I Environmental Site Assessments (PHI ESA)
- Limited Environmental Site Assessments
- Environmental Transaction Screens (ETS)
- Records Research with Risk Assessments
- Regulatory Database Reviews
- Historical Records Reviews

In addition, prior to joining the environmental consulting industry, Ms. Palumbo spent four years studying a diverse range of environmental disciplines including: environmental policy analysis, environmental law, geology, Geographic Information Systems (GIS), sustainable development, and environmental planning.

DRAFT

Megan Salcido – Senior Project Manager, Due Diligence

BA- Environmental Studies, Brown University, Providence, RI

EPA Accredited Asbestos Building Inspector

Mrs. Salcido has worked the environmental service industry since 2014. She provides senior project management and project review to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, and Historical Records Reviews.

Project experience for Mrs. Salcido includes:

- Phase I Environmental Site Assessments
- Limited Environmental Site Assessments
- Environmental Transaction Screens
- Historical Records Review
- Records Research with Risk Assessments
- Regulatory Database Reviews
- ACM, Radon, LBP, and drinking water sampling

In addition, prior to joining the environmental consulting industry, Mrs. Salcido spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

APPENDIX H

LIST OF COMMONLY USED ABBREVIATIONS

DRAFT

UNITS

µg/L	Micrograms per Liter	**pCi/L**	PicoCuries per Liter
mg/kg	Milligrams per Kilogram	**ppb**	Parts per Billion
mg/L	Milligrams per Liter	**ppm**	Parts per Million

ABBREVIATIONS AND ACRONYMS

ACM	Asbestos-Containing Material	**NESHAP**	National Emission Standards for Hazardous Air Pollutants
ADJ	Adjacent site	**NFA**	No Further Action
AEI	AEI Consultants	**NFRAP**	No Further Remedial Action Planned
AHERA	Asbestos Hazard Emergency Response Act	**NLR**	No Longer Reporting
APN	Assessor's Parcel Number	**NOV**	Notice of Violation
AST	Aboveground Storage Tank	**NPL**	National Priorities List
AUL	Activity and Use Limitation	**O&M**	Operations and Maintenance
bgs	Below Ground Surface	**OEC**	Other Environmental Considerations
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes	**OSHA**	Occupational Safety and Health Administration
CERCLA	Comprehensive Environmental Response Compensation and Liability Act	**PCB**	Polychlorinated Biphenyl
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System	**PCE, PERC**	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
CESQGs	Conditionally Exempt Small Quantity Generators	**RCRA**	Resource Conservation and Recovery Act
COC	Contaminant of Concern	**REC**	Recognized Environmental Condition
CREC	Controlled Recognized Environmental Condition	**RP**	Responsible Party
EC	Engineering Controls	**SDS**	Safety Data Sheet
EDR	Environmental Data Resources, Inc.	**SEMS**	Superfund Enterprise Management System
EPA	Environmental Protection Agency	**SF**	Square Footage/Square Feet
ERIS	Environmental Risk Information Services	**SP**	Subject Property
ERNS	Emergency Response Notification System	**SQG**	Small Quantity Generator
ESA	Environmental Site Assessment	**SWLF**	Solid Waste Landfill
GPR	Ground-Penetrating Radar	**SVOC**	Semi-Volatile Organic Compound
HREC	Historical Recognized Environmental Condition	**TCE**	Trichloroethylene, Trichloroethene
HVAC	Heating, Ventilation and Air Conditioning	**TPH**	Total Petroleum Hydrocarbons
HWS	Hazardous Waste Site	**TPHd**	Total Petroleum Hydrocarbons (diesel range)
IC	Institutional Controls	**TPHg**	Total Petroleum Hydrocarbons (gasoline range)
LBP	Lead-Based Paint	**TPHo**	Total Petroleum Hydrocarbons (oil range)
LCP	Lead-Containing Paint	**TRPH**	Total Recoverable Petroleum Hydrocarbons
LLP	Landowner Liability Protection	**TSDF**	Treatment, Storage, and Disposal Facility
LQG	Large Quantity Generator	**USDA**	United States Department of Agriculture
LUST	Leaking Underground Storage Tank	**USGS**	United States Geological Survey
MCL	Maximum Contaminant Level	**UST**	Underground Storage Tank
MTBE	Methyl Tertiary Butyl Ether	**VCP**	Voluntary Cleanup Program
ND	None Detected	**VOC**	Volatile Organic Compound
