5216 Harwood Rd, San Jose, CA 95124

PHASE I ENVIRONMENTAL SITE ASSESSMENT

June 16, 2022

380 N 1st Street, San Jose, California 95112

APN # 249-44-088
Project: P2-06-01-22

Prepared for:
Mostafa Aghamin

Phase-1 Environmental Services is pleased to submit our report describing the findings of the Phase I Environmental Site Assessment (ESA) at the above reference Property. This assessment was prepared in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process – ASTM Designation: E 1527-21.

The purpose of the Phase I ESA was to identify, to the extent feasible, recognized environmental concerns in connection with the property. This assessment included a site reconnaissance as well as research and interviews with representatives of the occupants and property management.

This report may be distributed and relied upon by Mostafa Aghiman, His successors, and assigns. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the express written consent from Phase-1 Environmental Services.

"I, Stuart G. Solomon, declare that to the best or my professional knowledge and belief: I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR Part 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed All Appropriate Inquiries (AAI) in conformance with the standards and practices set forth in 40 CFR Part 312."

If you have any questions or require further clarification of the report findings, please contact the undersigned at your convenience. Thank you for the opportunity to be of service.

Yours very truly,

Phase-1 Environmental Services/ Silicon Valley Environmental Group

Stuart G. Solomon
Senior Assessor
ASTM Qualified Ph-I, II & III
Environmental Professional

REPORT REC/ PEC FINDINGS & SUMMARY

Identified RECs (See definitions below)	Yes	No
Recognized Environmental Condition (REC)		**X**
Controlled Recognized Environmental Condition (CREC)		**X**
Historical Recognized Environmental Condition (HREC)		**X**

Recognized Environmental Condition (REC) - Defined by the ASTM Standard Practice E 1527-21 as; "(1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment. *A de minimis condition is not a recognized environmental condition*."

- *Phase-1 Environmental Services **did not** identify Recognized Environmental Conditions during this assessment.*

Controlled Recognized Environmental Condition (CREC) - Defined by the ASTM Standard Practice E 1527-21 as; "N—recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous *substances* or *petroleum products* allowed to remain in place subject to implementation of required controls (for example, *activity and use limitations* or *other property use limitations*)."

- *Phase-1 Environmental Services **did not** identify any Controlled Recognized Environmental Conditions during this assessment.*

Historical Recognized Environmental Condition (HREC) - Defined by the ASTM Standard Practice E 1527-21 as; "N—a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition."

- *Phase-1 Environmental Services **did not** identify any Historic Recognized Environmental Conditions during this assessment.*

Non-ASTM-Scope PEC's & Other Environmental Considerations (See definitions below)	Yes	No
Potential Environmental Concerns (PEC's)		**X**
Other Environmental Considerations – Mold, Water Intrusion/ Damage		**X**
Other Environmental Considerations – Radon Gas		**X**
Other Environmental Considerations – Lead Based Paint (LBP)	**X**	
Other Environmental Considerations – Asbestos Building Materials (ACMs)	**X**	

Potential Environmental Concerns (PEC's) – PECs are environmental situations at or concerning a property which, if not attended to, or if circumstances on site were to change or be altered in certain ways; might

produce or cause environmental liability and/or possible corrective action(s) to mitigate. For example; potential Vapor Intrusion concerns are far less for a commercial building, where people work 8-hrs a day than they are if the building use were to change to residential occupancy - where tenants could be breathing the inside air up to 24-hrs daily. Under circumstances like these, we would generally not recommend any action unless or until the use conditions are planned to be changed.

- ***Phase-1 Environmental Services did identify one Potential Environmental Concern:*** If the Subject Property is planned for redevelopment – especially if residential, because its immediate northern neighbor is a RR Track, testing the soils in the area for pesticides and arsenic will likely be required by the permitting agencies.

Other Environmental Considerations – Findings that warrant discussion, but do not qualify as RECs, include; de minimis conditions and/or environmental considerations such as; the presence of Asbestos Containing Materials (ACMs), Lead Based Paint (LBP), Radon gas, and Mold, which can affect the liabilities and financial obligations of the Client, the health and safety of site occupants, and the value and marketability of the Property.

Other Environmental Consideration Findings (Non-ASTM Scope)

- **Asbestos Containing Materials –** *The Subject Property building was constructed in 1964, therefore, ACMs are likely present. If demolition is planned, testing for ACMs will be require before debris disposal.*

- **Lead Based Paint -** *The Subject Property initial building was constructed in 1964, therefore, LBP is likely present. If demolition is planned, testing for LBP will be required before debris disposal.*

- **Radon Gas –** *The Property is in a Radon Zone 2. No action is generally required when in this Zone.*

Report Summary

Phase-1 Environmental Services has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-21 at **380 N. 1st Street, in the City of San Jose, Santa Clara County, CA** (Subject Property).

- *Phase-1 Environmental Services **did not** identify any Recognized Environmental Conditions (RECs) or Potential Environmental Concerns (PECs) during this assessment.*

- ***Phase-1 Environmental Services did identify one Potential Environmental Concern:*** If the Subject Property is planned for redevelopment – especially if residential, because its immediate northern neighbor is a RR Track, testing the soils in the area for pesticides and arsenic will likely be required by the permitting agencies.

Because the Subject Property building was constructed in 1964, professional testing for ACMs and LBP will be required by the permitting agencies prior to demolition and disposal of the demo materials.

No additional investigation is recommended - under the Property's current zoning and land use. Please see Section 15) for additional details.

1) INTRODUCTION

Mostafa Aghamin (the Client) engaged Phase-1 Environmental Services (Phase-1 ES) to conduct a Phase I Environmental Site Assessment (ESA) of the property consisting of one parcel located at **380 N. 1st Street, in the City of San Jose, Santa Clara County, California;** subsequently referred to in this report as the "Property". This assessment was prepared in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation: E 1527-21).

1.1) Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible, Recognized Environmental Conditions (REC's) relating to the property. This assessment included a site reconnaissance as well as research of past studies performed on the Property, interviews with representatives of the occupants and property management, and research of various available environmental databases and agencies.

1.2) Scope of Services

The Scope of Services for the performance of this Phase I ESA included the following tasks:

- On-site visual reconnaissance of the Property to evaluate on-site activities in respect to hazardous materials use, storage, and disposal activities.
- On-site visual survey of the current uses of the immediately adjacent sites, and surrounding area.
- Review of selected historic documentation for the Property to determine what activities have occurred at the subject site since the Property's first developed use.
- Review of reasonably ascertainable regulatory agency files concerning hazardous material use, storage and disposal at the Property and at adjacent and surrounding sites.
- Acquisition and detailed professional review of a current environmental sites radius report.
- Preparation of this report in general accordance with the document entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (The American Society for Testing and Materials [ASTM], Designation E 1527-21).
- Interviews with available Property contacts, regulatory officials and personnel associated with the subject and adjoining properties.

1.3) Deviations

No deviations from the recommended scope of ASTM Standard E 1527-21 were required as part of this Phase I Environmental Assessment.

1.4) Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the Property may have occurred which could not be identified. The conclusions and recommendations regarding

environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

1.5) Limitations and Exceptions

This Phase I Environmental Site Assessment does not guarantee the condition of the Property. Phase-1 Environmental Services (Phase-1 ES) is not responsible for conditions or consequences arising from facts and information that is withheld or concealed, or not fully disclosed at the time this evaluation is performed. Conclusions and recommendations made in the report for the Property aerial imagery in nature and are based wholly upon the data obtained and available information reviewed during the assessment. Phase-1 ES is not responsible for errors or omissions in agency or provided files or databases or non-disclosure by Property owners or representatives. To achieve the study objectives for this project we are required to base Phase-1 ES conclusions and recommendations on the best information available during the period the investigation was conducted. Phase-1 ES professional services are performed using the degree or care and skill ordinarily exercised by environmental consultants practicing in this or similar fields. The findings are mainly based upon examination or historic records and reports, maps, aerial photographs, and governmental agencies lists. It should be noted that governmental agencies often do not list all sites with environmental contamination; the lists and data used could be inaccurate and/or incomplete. Recommendations are based on the historic land use of the subject property, as well as features noted during the site inspection.

The absence or potential gross contamination sources, historic or present, does not necessarily imply that the subject property is free of any contamination. This Phase I Site Assessment did not include the recovery, sampling, or reporting of the nature or extent of Asbestos Containing Materials, the presence of Lead-based Paint or any Mold Issues.

Phase-1 ES does not warrant or guarantee that no significant events, releases, or conditions could have arisen during the periods or situations with data gaps (if they exist). The Phase I Site Assessment does not include information or advice relating to any environmental issues, laws or environmentally related business decisions that have not been stated in the above outline. No warranties, therefore, are expressed or implied. Phase-1 ES has no liability towards consequential damages. In some cases, an environmental compliance audit may be necessary for a property. The information and opinions rendered in the report will exclusively for use by the Client. Phase-1 ES will not distribute or publish the report without the Client's consent except as required by law or court order. Phase-1 ES has no responsibilities or liability whatsoever to persons or entities other than the Client if they so choose to use this report.

1.6) Limitations of Liability

Phase-1 ES' total liability to the client for any-and-all injuries, claims, losses, expenses or damages whatsoever directly or indirectly arising out of or in any way related to this report from any cause or causes, including but not limited to Phase-1 ES' negligence, errors, omissions, strict liability, or breach of contract shall not exceed the total amount of the contract for this project. Phase-1 ES shall not be liable for latent or hidden conditions, conditions not actually observed by Phase-1 ES, the potential consequences of observable conditions, conditions of which client had knowledge of at the time of the services, or any unauthorized assignment or reuse of the report. Notwithstanding the prior sentence, in no event shall Phase-1 ES be liable to client for any

exemplary, punitive, direct, or indirect, incidental special or consequential (including lost profits) damages arising from or in any way connected with its performance or failure to perform under the agreement, even if the affected party has knowledge of the possibility of such damages.

1.7) Special Terms and Conditions

The Client for this project requested no special terms, conditions, or extraneous services. Therefore, Phase-1 ES implemented no special terms, conditions, or extraneous services for this project. Business Environmental Risk concerns have not been addressed for this project. Controlled substances information has not been included, as it is outside the scope of E 1527-21 unless specifically requested by the Client.

2) SUMMARY OF PROPERTY DESCRIPTION & BUILDING INFORMATION

PROPERTY INFORMATION	
Name	Commercial Office Space
Street Addresses	380 N. 1st Street
City, State, Zip	San Jose, California 95112
County	Santa Clara
Zoning	Transit Residential
Approx. Acreage	0.41 AC
Assessor's APN# (s)	249-44-088
Current Owner Usage/Occupants	Owner: Tom Tognoli (Stated on Contract form). Occupants: Kleinfelder, Inc. (Engineering, Design and Environmental professional Services); Asian Square, Inc. (Sub Dividers and Developers); David Cheung DBA PEG Tech (Business Support Services). Questionnaire also indicates that Grand Century Shopping Mall (Offices) have also been there 5-years.
BUILDING INFORMATION	
# Buildings & appx. Sf.	1 bldg. - 12,000 Sf
Exterior Construction	Concrete, concrete block.
Year 1st Constructed	1964
Stories/Floors	2 Stories
Basement(s)	Yes, with a water sump and elevator equipment.
Foundation Type	Concrete

3) SITE AND VICINITY GEOLOGIC DESCRIPTION

3.1) Topographical Map Overview

The Property is located at an elevation of approximately 81 feet above mean sea level (U.S. Geological Survey "San Jose West, CA" Map MRC 37121C8 - 7.5 Minute Topographic map). The immediate vicinity of the Property is relatively flat. Regionally, the general topographic down-slope in the area is northerly. Please refer to the Topographical Map in **Attachment D**.

3.2) General Site Settings

The Subject Property is in the central region of San Jose, California, about 0.5-mile northwest from downtown San Jose, a little more than 26-miles northwest from downtown Morgan Hill, about 8-miles south from the southern tip of the San Francisco Bay, and about 28-miles east from the California coastline just north of San Gregorio. The general region consists of commercial and residential properties.

3.3) Hydrogeologic Review

Santa Clara Valley Groundwater Basin, Santa Clara Subbasin

- Groundwater Basin Number: 2-9.02
- County: Santa Clara
- Surface Area: 153,600 acres (240 square miles)

Basin Boundaries and Hydrology

The Santa Clara subbasin occupies a structural trough parallel to the northwest trending Coast Ranges. The Diablo Range bounds it on the west and the Santa Cruz Mountains form the basin boundary on the east. It extends from the northern border of Santa Clara County to the groundwater divide near the town of Morgan Hill. The dominant geohydrologic feature is a large inland valley (Fio and Leighton 1995). The valley is drained to the north by tributaries to San Francisco Bay including Coyote Creek, the Guadalupe River, and Los Gatos Creek. Annual precipitation for the Santa Clara basin ranges from less than 16 inches in the valley to more than 28 inches in the upland areas.

Hydrogeologic Information

Water Bearing Formations

The water bearing formations of the Santa Clara subbasin include Pliocene to Holocene age continental deposits of unconsolidated to semi-consolidated gravel, sand, silt and clay. Two members form this group, the Santa Clara Formation of Plio-Pleistocene age and the younger alluvium of Pleistocene to Holocene age (DWR 1975). Lithologic similarities make distinction between these two units difficult based on available well data. The combined thickness of these two units probably exceeds 1500 feet (DWR 1967).

Groundwater Level Trends

Historically, since the early 1900's through the mid-1960's water level declines from groundwater pumpage have induced subsidence in the Santa Clara subbasin and caused degradation of the aquifer adjacent to the bay from saltwater intrusion. Prior to importation of surface water via the Hetch Hetchy Aqueduct and South Bay Aqueduct and the introduction of an artificial recharge program water levels declined more than 200 feet in the Santa Clara Valley (Poland and Ireland 1988). Groundwater levels have generally increased since 1965 as a result of increase in recharge and decreases in pumpage (Fio and Leighton 1995). Current hydrographs of index wells within the subbasin maintained by Santa Clara Valley Water District support this trend (www.scvwd.dst.ca/gwuse/gwmimap.htm, 2001).

3.4) FEMA Flood Zone Determination

According to FEMA, the Property is in a Flood Zone D. Flood Zone D are areas where no official analyses of flood hazards has been conducted. Mandatory flood insurance does not apply

There were no wetlands observed on the Property.

4) STRUCTURES, IMPROVEMENTS, USAGE CHARACTERISTICS

A Property Vicinity Map and Property Site Plan are attached to this report as **Figures 1 and 2 -** respectively.

The table below discusses Property improvements and on-site characteristics. Property Photographs are contained in **Attachment A**.

Features	Descriptions
Structures	The Subject Property is improved with a 12,000-sf, two-story, concrete founded, commercial multi-unit office building.
Roads and Railways	None on the Property. Railroad tracks exist north adjacent to the Subject Property.
Mechanical Systems	No specific mechanical systems that would use hazardous materials observed on the Property.
PCB Transformers	None observed or believed to be on the Property.
Solid Waste & Sewage	Garbage and recycling were observed within the eastern parking area. No hazmat storage, spills or staining was observed in or around the containers. Sewage was not confirmed but assumed to be City municipal.
Heating & Cooling	Roof mounted HVAC. No evidence of current or former heating oil tanks observed on the Property.
Potable Water Source	Municipal city supply.
Hazardous Materials	No hazardous material storage, usage and or disposal observed on the Subject Property.

Storage, Use & Disposal	
Wells/ Borings	No evidence of water supply, irrigation, oil, monitoring, or dry wells were observed on the Property.
Interior & Exterior Drains & Sumps	One exterior storm drain was observed within the eastern parking area. No evidence of chemical staining or spills were observed in or around this drain. No interior drains were observed. A water collection sump was observed within the basement with a pump plumed to the northern exterior portion of the Subject Building. No evidence of chemical staining or odd odors were observed in or around this sump.
Storage Tanks & UST's	No evidence of past USTs or ASTs observed on the Property.
Stained Soil or Pavement	No stained soil or chemically stressed vegetation was observed in any of the planter or bare soil areas.

Current Uses of Adjoining Properties

- The Property is bound to its north by a vacant lot area and beyond are RR Tracks, and beyond them a residential apartment complex.
- To the south is Bassett St., N First St., and across them residential apartments and Santa Clara County Law Library.
- To the east of the Subject Property is Bassett St and N 2nd St., and beyond them residential apartments and homes.
- To the west is N First St., and across it are residential apartments.

No environmental concerns noted at the adjacent or nearby properties.

5) INTERVIEWS, QUESTIONNAIRES & USER PROVIDED INFORMATON

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, The User must conduct the inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.31 and 312.31 as documented in the ASTM User Questionnaire. Failure to provide this information could result in a determination that All Appropriate Inquiries is not complete.

5.1) ASTM User Questionnaire

The USER Questionnaire was not returned to Phase-1 ES by the issue date of this report.

5.2) Property Owner Pre-Survey Environmental Questionnaire and Interview

The Property Owner Pre-Survey Environmental Questionnaire was filled out by the Owner, Mr. Tom Tognoli, on 06/15/2022. Tom mentioned that there was an elevator in the building and that its occupants were PGE Tech (a Technology Company – 2-years), Kleinfelder (Engineers – 2-years), and the Grand Century Shopping Mall (Offices) – 5-years. There were no environmental concerns noted in the questionnaire. A Copy of the questionnaire can be viewed in **Attachment B**.

5.3) Land Title Records/ Environmental Liens – Property Activity Use Limitations

ASTM E 1527-21, Section 6.2: Review Land Title Records and Judicial Records for Environmental Liens and Activity and Use Limitations -

"To meet the requirements of 40 C.F.R. 312.20 and 312.25, a search for the existence of environmental liens and AULs that are filed or recorded against the subject property must be conducted. To meet this requirement, Users may rely on either of the following two methods:"

- Obtaining a Preliminary Title Report or Title Commitments
- Obtaining a Condition of Title, Title Abstracts, and or AUL/Environmental Lien Report

"Title search information reports shall review *land title records* for documents recorded between 1980 and the present."

Environmental Professional Report Requirements - ASTM E 1527-21, Section 6.2.3.2 -

"Environmental professionals shall describe in their report whether they received the results of the environmental lien and AUL search required by 6.2. The environmental professional does not need to review, assess, or otherwise evaluate the land title records or the user's conclusions as to whether AULs or environmental liens were identified. The environmental professional only needs to identify whether they received land title records from the user and whether the user identified AULs or environmental liens."

No Preliminary Title Report, land title records, or AUL Environmental Lien Report was provided to Phase-1 ES to include in this Phase I ESA.

Disclaimer: According to the current E 1527-21 Phase I Standard, the lack of an official AUL search back to 1980, could be construed as a data gap in this Phase I ESA if environmental AULs are not verified in accordance with the new 2021 Standard. For Lien verification, Phase-1 ES researched all of the official regulatory agency databases. Please see below.

For AUL verification, Phase-1 ES researched the following Government Regulatory databases:

Land Use Restriction Sites – California Department of Toxic Substance Control:

https://dtsc.maps.arcgis.com/apps/webappviewer/index.html?id=b39988973ddf45ecb1b2c97d7ee93454
(Click the above link and when opened, enter the Subject Property address at the upper left- hand corner and press Enter.) **No Lien records found for the Subject Property.**

Sites with Deed Restrictions – California State Water Resources Control Board:

https://www.waterboards.ca.gov/water_issues/programs/deed_restrict/index.html
(Click the above link and when opened, press the Search button on the upper right on screen and enter the Subject Property name or address – then press Enter.) **No Lien records for the Subject Property found.**

California State Water Resources Control Board GeoTracker Database:

https://geotracker.waterboards.ca.gov/
(Click the above link and when opened, enter the Subject Property address in the Search dialog box in the center of the screen. When opened, look for a red or green marker at the address. If none, there has never been a Case at the address. If there is, click the marker and you will be directed to the Case and its info.) **No Lien records for the Subject Property were found.**

Phase-1 ES did not identify land title or Activity Use Limitation restrictions related to the Subject Property within the databases or online resources that were reviewed.

No other land title records were reviewed by Phase-1 ES as a part of this assessment.

6) SITE RECONNAISSANCE/ ENVIRONMENTAL INSPECTION

On June 8th, 2022, a Phase-1 ES inspector conducted a visual reconnaissance of the Property. Property photographs are displayed in **Attachment A**.

6.1) Methodology and Limiting Conditions

The Phase-1 ES Professional inspected all accessible areas of the Property during the reconnaissance.

6.2) Subject Properties & Adjacent Reconnaissance Findings

Subject Property

(If any are indicated Yes, please see description(s) following the Table).

Yes	No	Observation
	X	**Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use**
	X	**Aboveground/Underground Hazardous Substances or Petroleum Product Storage Tanks (ASTs/USTs)**
	X	**Hazardous Substances and Petroleum Product Containers Not in Connection with Property Use**
	X	**Unidentified Substance Containers**
	X	**Electrical or Mechanical Equipment Likely to Contain Fluids**
	X	**Interior Stains or Corrosion**
	X	**Strong, Pungent, or Noxious Odors**
	X	**Pools of Liquid**
	X	**Pits, Ponds, and Lagoons**
	X	**Stained Soil or Pavement**
	X	**Stressed Vegetation**
	X	**Solid Waste Disposal or Evidence of Fill Materials**
	X	**Waste-Water Discharges**
	X	**Wells**
	X	**Septic Systems**

	X	**Biomedical Wastes**
X		**Other - Sumps**

HAZMAT Observed:

- None.

A water collection sump was observed within the basement with a pump plumed to the northern exterior portion of the Subject Building. No evidence of chemical staining or chemical odors were observed in or around this sump.

No evidence of illegal current or past use, storage, or disposal of hazardous materials in any of the exterior or interior areas inspected.

Additional photographs can be viewed in **Attachment A**.

Adjacent Properties Remote Observations

The following table reflects obvious environmental conditions that the Inspector could physically sense or observe on adjoining properties without entering onto the properties themselves for closer inspections. The inspections are, therefore, cursory, and not comprehensive. Observations and suspect findings are discussed but should not be construed as factual because they were not appropriately studied and verified.

(If any are indicated Yes, please see description(s) following the Table).

Yes	No	Observation
	X	**Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use**
	X	**Aboveground/Underground Hazardous Substances or Petroleum Product Storage Tanks (ASTs/USTs)**
	X	**Hazardous Substances and Petroleum Product Containers Not in Connection with Property Use**
	X	**Unidentified Substance Containers**
	X	**Electrical or Mechanical Equipment Likely to Contain Fluids**
	X	**Strong, Pungent, or Noxious Odors**
	X	**Pools of Liquid**
	X	**Pits, Ponds, and Lagoons**
	X	**Stained Soil or Pavement**
	X	**Stressed Vegetation**
	X	**Solid Waste Disposal or Evidence of Fill Materials**
	X	**Waste-Water Discharges**
	X	**Wells**
	X	**Septic Systems**
	X	**Wetlands (Indicators Noted)**
	X	**Other**

No evidence of adjacent operations that would pose a significant environmental liability were observed.

7) HISTORICAL INFORMATION

Standards developed by ASTM E 1527-21 require that the history of a site be established from the present back to the time the Property was first used for residential, agricultural, commercial, industrial, or governmental purposes, or back to 1940, whichever is earlier. Sources of such information arc typically: interviews, aerial photographs, Fire Insurance Maps, historic city directories, topographical maps, and local fire, building and health department file reviews and records. Other historical sources include internet sites, community organizations, local libraries and historical societies, and current owner/occupants of neighboring property.

7.1) Historic Fire Insurance Maps

Historic Fire Insurance Maps (FIMs) were available for 1884, 1891, 1915, 1950 and 1969.

1884 – The map shows the Subject Property undeveloped. Railroad tracks are to the south, undeveloped to the north, N 1st Street to the west and N 2nd Street to the east.

1891 – The map shows a residential structure at the western portion of the Subject Property. More residential homes are to the north, N 1st Street to the west, N 2nd Street to the east and E Hensley Street to the south.

1915 – The Subject Property is undeveloped. A residential home is to the south and railroad tracks to the north. San Jose Ice Company is just beyond the railroad tracks.

1950 – The 1950 map shows the Subject Property developed with a building labeled Security Warehouse & Cold Storage Company. To the south of the Subject Property are more cold storage rooms and offices. No change to the north, east and west from the 1915 map.

1969 – The 1969 map shows the Subject Property developed with the current structure that exists. E Bassett Road is constructed to the south. No change to the north, east and west from the 1950 map.

No environmental concerns noted in the Fire Insurance Maps reviewed. Please see **Figures 3), 4), 5), 6) & 7)** for copies the FIMs reviewed

7.2) Aerial Photograph Review

Phase-1 ES reviewed low-altitude, black-and-white and color aerial photographs taken in 1931 through 2020 to identify areas of possible environmental concerns related to previous land use at the Site or adjacent properties. Photographs were provided by Historical Aerials, library sources, and the later photos by Google Earth Maps. The observations from the aerial photographs of the Site and immediate vicinity are described below.

1931 through 1956 Aerial Photographs

Between 1931 and 1956, the Subject Property is developed with a large commercial building According to the 1950 Fire Insurance Map, this building was occupied by Security Warehouse & Cold Storage Company. Railroad tracks are adjacent to the north and the commercial building that is on the Subject Property extends to the south. Roads are to the east and west of the Property.

There were no significant environmental concerns noted in these aerial photographs.

1960 & 1963 Aerial Photographs

The 1960 and 1963 maps show the Subject Property undeveloped. Adjacent to the south is also undeveloped and railroad tracks are to the north. Streets border the Subject Property to the east and west.

There were no significant environmental concerns noted in these aerial photographs.

1968 through 2020 Aerial Photographs

The 1968 map shows the Subject Property developed with the current structure that exists. The Subject Property office building remains the same through 2020. The property across Bassett to the south is undeveloped through 1981. The 1993 aerial shows the property across the street developed with the current library that exists.

There were no significant environmental concerns noted in the aerial photographs.

Aerial Summary - There were no specific environmental concerns noted in the aerial photographs.

7.3) Historical Topographic Map Review

Phase-1 ES reviewed 8 Topographical maps relating to the Property between 1889 and 1980 to identify areas of possible environmental concerns, bodies of water and evidence of structures.

1889 Through 1980 Topo Maps

The 1889 through 1899 Topographical Maps show the Property undeveloped with railroad tracks to the north and south. The 1953 map shows the entire area developed with no indication of building structures except notations of churches and schools in the immediate area. This remains the same through 1980

There were no significant environmental concerns noted in these Topographical Maps.

The aerial and topographical map presentation is contained in **Attachment D**. Note: Some copywritten Topographical maps were reviewed and included in our study. Those that were copywritten are not contained in the Attachment. Our review was performed and presented in accordance with current ASTM Phase I Report standards. The copywritten topographical maps that are not contained in the Attachment can be view at: https://www.historicaerials.com/viewer by typing in the Property address and running the search review free of charge.

7.4) Local Historic City Directory Review

City Directories have been published for major cities and towns across the United States since the 18th century. Originally, these Directories, published in the 20th century, also included a street index. For each street address, the Directory lists the name of the businesses or residences that were listed operating from this address during given years. City Directories can be a very good source of historical information as to site tenancy and use over the years. Directories for rural areas were not often published.

Phase-1 ES obtained historic City directories from Historic Information Gatherers (HIG). The complete HIG report is contained in **Attachment E**. Following are excerpts from the HIG report for the Property address:

Subject Property – 380 N First St, San Jose, CA

2018	ASIAN SQUARE
2018	DYNASTY CHINESE SEAFFOD
2018	TANG Lap
2018	VIETNAM INTERNATIONAL VIDEO

1975	PROULX WM E
1975	VLASTELICA RONALD
1975	WOOD KENNETH S
1975	WOOD NYE&CO

No earlier listings were in the city directories.

Subject Property Summary: No environmentally high-risk tenants noted.

Nearby/adjacent Tenants of Potential Concern: The historic city directories noted a fuel station across North 1st Street to the south of the Subject Property between 1952 and 1985. This fuel station resulted in a Leaky Underground Storage Tank case that was closed in 1996. This listing poses no significant environmental concern to the Subject Property.

8) REGULATORY AGENCY RECORDS

8.1) Environmental Health Hazardous Materials (CUPA)

Regulatory Agency Data	
Name of Agency:	Santa Clara County Environmental Health Dept.
Point of Contact:	Melissa Belloso - Sr. Office Specialist
Agency Address:	1555 Berger Drive, Suite 300, San Jose, CA 95112
Agency Phone Number:	408-918-3400
Date of Contact:	06/01/2022
Method of Communication:	Email

Summary: Santa Clara Environmental Health Department responded that they have no CUPA records for the Subject Property addresses. A copy of the agency response is contained in **Attachment C**.

8.2) Building, Planning Department Office Records

Regulatory Agency Data	
Name of Agency:	City of San Jose Planning & Building
Point of Contact:	https://sjpermits.org/permits/general/combinedquery.asp
Agency Address:	200 E Santa Clara Street, San Jose, CA 95113
Agency Phone Number:	408-535-3555
Date of Contact:	06/01/2022
Method of Communication:	Online

Summary: City permits dated back to 1964 when the Subject Property building was first developed. Various permits related to roofing, interior alterations, electrical and plumbing are on file with the City of San Jose.

No environmental concerns were noted in the permits reviewed. Please refer to **Attachment C** for copies of the available permits list on file with the City Building Department.

8.3) Regional Water Quality Control Board

Regulatory Agency Data	
Name of Agency:	Bay Area RWQCB
Agency Address:	1515 Clay Street # 1400, Oakland, CA 94612
Agency Phone Number:	(510) 622-2300
Date of Contact:	06/15/2022
Method of Communication:	GeoTracker - https://geotracker.waterboards.ca.gov/

Summary: The Subject Property is not and has never been listed in the GeoTracker database. Please refer to the following GeoTracker Internet link for this reference: https://geotracker.waterboards.ca.gov/map/?CMD=runreport&myaddress=380+N+1st+St%2C+San+Jose%2C+CA

8.4) Department of Toxic Substances Control (DTSC) Manifest Records

Regulatory Agency Data	
Name of Agency:	Department of Toxic Substances Control
Point of Contact:	Hazardous Waste Transportation System Reports Search
Internet Address:	https://hwts.dtsc.ca.gov/report_search.cfm?id=5
Date of Contact:	06/02/2022
Method of Communication:	Online report generation

Summary: The Subject Property is listed in the DTSC database under Palmer College of Chiropractic between the years of 1993 and 2002. Various disposal records related to photochemicals between the years of 1994 and 1999 are on file. These listings are associated with X-Ray machines and do not pose a significant environmental concern to the Subject Property. Please refer to **Attachment C** for a copy of the DTSC Facility report.

9) RELATIVE ENVIRONMENTAL REPORTS and STUDIES

No relative environmental reports or studies were provided nor found in the agency files that were reviewed.

10) REGULATORY AGENCY DATABASES REVIEW

ENVIRONMENTAL DATABASES SEARCHED FOR THE PROPERTY AND SURROUNDING SITES WITHIN A ONE-MILE RADIUS

ESTIMATED GROUNDWATER FLOW DRIECTION – Based on nearby case reviews the groundwater gradient is estimated to be **northeasterly to northwesterly** in the general vicinity of the Subject Property.

The following was extrapolated from an environmental research database radius report generated by MapHazardsPro on June 2nd, 2022 for the Subject Property and surrounding sites. The complete MHP report is contained in **Attachment F** of this ESA. What are highlighted below are databases that could have caused potential environmental impacts or liability to the Property.

10.1) Environmental Database Summary - Subject Property

The Subject Property is listed on the DTSC HAZNET database under Palmer College of Chiropractic – West, who took out an EPA ID No. in 2-1993 which went Inactive in 6-2001. Palmer manifested disposal of Photochemical (X-Ray) wastes each year from 1994 through 1999 – each were disposed of through a Recycler with no incidents of record in the files.

10.2) Database - Surrounding Sites Highlights and Summary

Note: Each of the listed cases and their current conditions were reviewed by an ASTM-Qualified Environmental Professional. Those which the Environmental Professional determined – based oh their current conditions, were of no significant environmental concern or liability - may not be listed or discussed in the "Sites of Potential Concern" sections on the following pages.

A) CSL Cleanup Sites & Cases – Searched to 1-Mile Radius:
There are 115 listings within a mile of the Property on the GeoTracker (RWQCB) and Envirostor (DTSC) CSL chemical clean-up Sites list representing an estimated 58 actual sites/Cases. 5 of these are on the Superfund (Government Aided) list, one is on the Corract (Corrective Action Sites) list.

CSL Cleanup Sites of Potential Concern:
None. 25 of these CSL cleanup sites are Closed, No further action Cases of no concern regarding environmental impacts or liability to the Subject Property. Of the remaining 33 still-Open Cases; 9 are Soils Only affected sites; 5 are in their Verification Monitoring phase for Case Closure; 12 are significantly down-gradient or cross gradient from the Subject Property; one has contaminants that are confined to its immediate source vicinity; one is under long-term management and monitoring, and the remaining 5 are Historical, low-priority cases that are no longer being actively pursued by the regulatory agencies for any clean-up measures. These sites are of no significant concern or liability to the Subject Property.

B) LUST Cases – Searched to ½ -Mile Radius:
There are 79 LUST (Leaking Underground Storage Tank) listings within ½ mile of the Subject Property representing an estimated 39 actual sites/Cases. These are generally sites where old fuel and fuel oil tanks leaked, causing soil and subsurface water contamination. In general, about 95% of these sites in California are now Closed, No Further Action (NFA) cases.

LUST Sites of Potential Concern:
None. All but 5 of these cases are Closed, No Further Action sites of no environmental concern or impact liability to the Subject Property. All 5 of the still-Open cases are significantly cross and/or down-gradient from the Subject Property and of no significant concern or environmental liability.

C) TSD Facilities – Searched to a 1-Mile Radius':

There are 32 TSD (Treatment, Storage and Disposal Sites) listings within 1-mile of the Property.

TSD Facilities of Potential Concern:

None. We found violations for three of these facilities – all but one of which were minor, corrected, and the facilities Returned to Compliance (RTC). The one significant facility violations is over 5,000-ft down-gradient from the Subject Property. These sites, in our opinion, do not pose any significant risk or liability to the Subject Property.

D) HAZMAT, HAZNET & GENERATOR Sites – Searched to Various Radius':

Including both historical (Inactive) and Active sites, there are; 13 HAZMAT Site listings within 1/4-mile, 59 additional HAZNET Site listings within 1/8-mile, and 9 GENERATOR Site listings within 1/8-mile of the Property that have either; handled and/or disposed of hazardous wastes or materials in the past, continue to do so today - or currently store, generate and/or dispose of hazardous wastes in their operations. Many of these are Inactive.

HAZMAT, HAZNET & GENERATOR Sites of Potential Concern:

None of significant concern. We did find violations for a number of these facilities; however, most were not major, and the significant violations were each corrected, and the facilities Returned to Regulatory Compliance (RTC). There were two facilities where there had been repeated violations which were of concern. These were further studied, and it was determined that both were significantly down-gradient from the Property and not, therefore, in our opinion, of significant environmental concern or liability.

E) ERNS Incidents – Searched to a 1/8-Mile Radius:

There was one ERNS (Emergency Response Notification System) incident that occurred near the Subject Property in 1995. An employee at a nearby Family Health Foundation was mixing Bleach and water in the central sterilization room of the facility. Employees and patients started complaining about dizziness, burning eyes and irritation. An evacuation and cleanup took place.

ERNS Incidents of Potential Concern:

None. The bleach dissipated and there were no lasting environmental impacts or injuries. This Case/incident was of no environmental concern or liability to the Subject Property.

MHP Report Unlocatable Sites:

(See following page)

Address	Site Name(s)	Site Type(s)	Site ID(s)
S OF 1ST ST, SAN JOSE, CA	STAUFFER CHEM CO RAISCH QUARRY	SUPERFUND	NANFSEMS-0901765

One South Market Street, SAN JOSE, CA	One South Market	HAZMAT	CACUPAHM-10673488

Based on the results of the environmental database review, it is our professional opinion that there are no sites in the surrounding areas of the Property that pose significant environmental liability or risk to the Property. The complete MapHazardsPro database report is contained in **Attachment E**.

11) DOCUMENT DATA GAPS

ASTM Standard E 1527-21 requires the ESA report to note any data failure from historical research sources, and if any; to give reasons why such sources were excluded; and discuss if data failure significantly affects the ability of the Environmental Professional to identify RECs for this ESI.

There were no significant document data gaps encountered during this Phase I ESA.

12) RECOGNIZED ENVIRONMENTAL CONDITIONS

The goal of the processes established by the practice for conducting environmental site assessments is to identify recognized environmental conditions (REC's). Recognized environmental conditions indicate the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the Property or into the ground, ground water, or surface water of the Property. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would

not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

- **Recognized Environmental Condition (REC) -** *Phase-1 Environmental Services **did not** identify any Recognized Environmental Conditions during this assessment study.*

- **Controlled Recognized Environmental Condition (CREC)** - *Phase-1 Environmental Services **did not** identify any Controlled Recognized Environmental Conditions during this assessment study.*

- **Historical Recognized Environmental Condition (HREC)** - *Phase-1 Environmental Services **did not** identify any Historical Recognized Environmental Conditions during this assessment study.*

13) OTHER ENVIRONMENTAL CONSIDERATIONS (Non-ASTM-Scope)

Mold - Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber/ carpet padding).

Phase-1 Environmental Services observed accessible, interior areas for the subject Property building for significant evidence of mold growth. Note - this ESA should not be used as an official mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during the Subject Property visual inspection.

Radon Zones - Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

Zone 1	Exceeds 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based on this Zone classification, radon is not considered to be a significant environmental concern.

Lead-Based Paint (LBP) - Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most buildings constructed before 1978. If a property is planned to be remodeled or demolished, professional testing for LBP is required before disposal of materials can take place.

The Subject Property initial building was constructed in 1964, therefore, LBP may be a concern. If demolition is planned, testing for LBP will be required prior to disposal of demo materials.

Asbestos-Containing Building Materials (ACMs) – Asbestos building materials were used in thermal insulation and other building products because of its high insulative properties and innate thermal stability. It was banned in California beginning in the 1970s for Popcorn Ceiling spraying, banned by 1977 for most other building applications, and by 1981 for all remaining. In its friable (airborne) state, asbestos can cause lung cancer if breathed. If a property is planned to be remodeled or demolished, professional testing for ACMs is required before disposal of materials can take place if it was constructed prior to 1981.

The Subject Property initial building was constructed in 1964, therefore, ACMs may be a concern. If demolition is planned, testing for ACMs will be required prior to disposal of demo materials.

14) POTENTIAL ENVIRONMENTAL CONCERNS (PECs)

- ***Phase-1 Environmental Services did identify one Potential Environmental Concern:*** If the Subject Property is planned for redevelopment – especially if residential, because its immediate northern neighbor is a RR Track, testing the soils in the area for pesticides and arsenic will likely be required by the permitting agencies.

15) CONCLUSIONS AND RECOMMENDATIONS

This Property site inspection discovered no RECs or evidence of illegal or improper use, storage, or disposal of hazardous materials or wastes on any of the areas that were inspected on the Property.

One PEC was discovered: If the Subject Property is planned for redevelopment – especially if residential, because its immediate northern neighbor is a RR Track, testing the soils in the area for pesticides and arsenic will likely be required by the permitting agencies.

After reviewing the pertinent vicinity environmental regulatory agency databases and available historic information; it is our professional opinion that there are no sites in the vicinity of the Subject Property that are of significant environmental concern or liability to the Subject Property.

Of the 33 CSL Chemical Cleanup Cases that are still-Open; 9 are Soils Only affected sites; 5 are in their Verification Monitoring phases for Case Closure; 12 are significantly down-gradient or cross gradient from the Subject Property; one has contaminants that are confined to its immediate source vicinity; one is under long-term management and monitoring, and the remaining 5 are Historical, low-priority cases that are no longer being actively pursued by the regulatory agencies for any clean-up measures. These sites are of no significant concern or liability to the Subject Property.

All but 5 of the LUST sites are Closed, No Further Action Cases of no environmental concern or impact liability to the Subject Property. All 5 of the still-Open cases are significantly cross and/or down-gradient from the Subject Property and of no significant concern or environmental liability.

No major violations were discovered in available agency files for any nearby hazardous materials handlers, waste disposers or generators, and the ones that were discovered were adequately corrected, and the facilities brought back into regulatory compliance (RTC).

Because the Subject Property building was constructed in 1964, professional testing for Asbestos (ACMs) and Lead-Based Paint (LBP) will be required by the permitting agencies before any demolished building materials can be disposed of.

Aside from the above, under the Subject Property's current zoning and land usage, no further investigation is, in our professional opinion, is warranted nor is any recommended at this time.

Please refer to the other report Sections for additional comments and data regarding these conclusions and recommendations.

16) STATEMENT OF PROFESSIONAL QUALIFICATIONS

Stuart G. Solomon, Co-Founder, CEO
Environmental Professional

B.A. Sociology, California REA, California Superior Court - Declared Expert Environmental Witness

Environmental Experience, Management, and History:

- **Environmental Regulatory compliance consultant – 40 years.**

- **Founder, President/CEO, Environmental Technology and Gen-Tech Environmental; 1980-1992.**
  - Regulatory compliance A-Engineering contractor. Geotechnical engineering.
  - Removal of 3,000+ underground fuel and chemical storage tanks between 1980 and 1992.
  - Soil and groundwater geotechnical investigations at 2,000+ sites.

- Soil and groundwater contamination remedial clean-up performed at 1,500+ sites.
- Partial Client List: Bechtel Corporation, Reliance Steel, Santa Clara University, DiSalvo Trucking, Dan Caputo Construction, Golden Gate Petroleum, Selby Petroleum, Lloyd Wise Auto Dealerships, Western States Oil (Pacific Pride), Quikrete, State of California, Valero.

- **Founder, President, PIERS Environmental Services, San Jose, CA – 1992-1999.**
  - Phase I Site Assessment Specialists. 3,000+ Phase I ESA's performed.
  - Partial Client List: Borel Bank, Union Bank, Bank of Santa Clara, Cupertino Bank, Washington Mutual, Fremont Bank, Bank of the West, Silicon Valley Bank.
  - PIERS was sold to its employees in 1999 and is still a leading Environmental Risk Assessment company in the San Francisco Bay area.

- **Co-founder, President, E-Risk Information Services, Inc. - 1997.** Developed a GIS platform database for environmental and natural hazard real estate disclosures (NHD) - first automated system of its type in America.
  - E-Risk was acquired by Vista Information Solutions, Inc. in late 1999 and the E-Risk NHD system was subsequently acquired from Vista by Fidelity National Title Co. Fidelity renamed it: "Disclosure Source".

- **2000-2007 – Co-Founder Environmental Restoration Services South** – President, Environmental Consultant – A-Engineering Contractor - Service Station regulatory compliance, new construction, fueling and monitoring system upgrades.

- **2007-2014 – Research and Development** of environmental emissions reduction and alternative fuel systems for diesel engines. Environmental regulatory agency consulting.

- **2013-Present – Co-Founder Phase-1 Environmental Services and Silicon Valley Environmental Group, Inc.** – Phase I and II Environmental real estate transactions. Environmental Consulting, project planning and management.

Historic City Directories by HIG

Research Summary for City Directory Abstract

Site Location

380 N First St
San Jose, CA

Conducted For
Phase-1 Environmental Services
5216 Harwood Road
San Jose, CA

HIG Project #
2064518
Client Project #
NFIRSTST
Date Created
06/06/2022

Historical Information Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2018 Haines San Jose

2011 Haines San Jose

2006 Haines San Jose

2000-01 Haines San Jose

1995-96 Haines San Jose

1990-91 Haines San Jose

1985 Haines San Jose

1980 Haines San Jose

1975 Haines San Jose

1970 Haines San Jose

Abstract Section 1- This section includes the city directory data sorted by address.

Research Summary for City Directory Abstract

Site Location

380 N First St
San Jose, CA

Conducted For
Phase-1 Environmental Services
5216 Harwood Road
San Jose, CA

HIG Project #
2064518
Client Project #
NFIRSTST
Date Created
06/06/2022

Historical Information Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2018 Haines San Jose

2011 Haines San Jose

2006 Haines San Jose

2000-01 Haines San Jose

1990-91 Haines San Jose

1985 Haines San Jose

1980 Haines San Jose

1975 Haines San Jose

1970 Haines San Jose

Abstract Section 1- This section includes the city directory data sorted by address.

Violations

Violation Date	9/25/2018 12:00:00 AM	**Citation**	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description	Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.	**Violation Notes**	Facility is conducting safety tailgate meetings and site-specific emergency response training, but failed to document the training sessions or the employees that attended. Ensure that training is conducted annually and made available for review during an inspection. Provide documentation that all employees have been trained on emergency response in the event of a release and related site-specific safety protocols to the inspector.

Violations

Violation Date	3/9/2020 12:00:00 AM	**Citation**	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description	Failure to include in the SPCC Plan:1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.	**Violation Notes**	Returned to compliance on 01/21/2021. During the initial inspection preparation process, it was discovered that the primary emergency contact person (Pella McCormick) is no longer in this capacity. Update all contact information to reflect the current Facility Response Coordinator. Note: There are multiple locations throughout the SPCC that Pella McCormick is mentioned as the primary contact. Facility must ensure that all emergency contact numbers in the SPCC plan are accurate.

Violation Date	3/9/2020 12:00:00 AM	**Citation**	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description	Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector.2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.	**Violation Notes**	Returned to compliance on 01/21/2021. As per the SPCC Section , monthly and annual inspections are conducted in accordance with STI SP001 Tank Inspection Standards using custom checklist for monthly inspections and the STI SP001 standard annual inspection checklist, both located in Appendix C. However, the facility engineer stated that he was unfamiliar with these checklists. He demonstrated that he conducts an annual and quarterly tank inspection using an on-site generated checklist. He also conducts an abbreviated monthly PMS checklist related to running the generator. This \"generator inspection log sheet\" is missing SP001-standard items to check such as security measures and secondary containment inspections. Additionally, the on-site generated annual tank inspection PMS does not meet industry standards in that it is missing multiple items, including but not limited to, solenoid valve testing, interstitial leak detection equipment and emergency vent cover testing. Ensure that the monthly and annual [Truncated]

Completed Actions

There were a total of 494 records in the Completed Actions table. We are only displaying 50 of those in this report in order to keep the size of this report manageable. If you would like the full site record, please contact the responsible regulatory agency noted above.

Area Name	PROJECT WIDE	**Document Type**	Land Use Restriction - Site Inspection/Visit
Completed Date	6/6/2011 12:00:00 AM		
Area Name	PROJECT WIDE	**Document Type**	Land Use Restriction Monitoring Report
Completed Date	6/12/2019 12:00:00 AM		

MapHazardsPro Radius Search Report

Surrounding Sites Details

Area Name PROJECT WIDE
Completed Date 7/21/2006 12:00:00 AM
Document Type Soils Management Plan
Comments Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project (\"Ball Park\") that might involve a parking structure to be added to the parking lot at the HP pavilion.

Area Name PROJECT WIDE
Completed Date 6/27/2003 12:00:00 AM
Document Type Other Report
Comments Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Area Name PROJECT WIDE
Completed Date 8/22/2013 12:00:00 AM
Document Type 5 Year Review Reports

Area Name PROJECT WIDE
Completed Date 8/19/2014 12:00:00 AM
Document Type Land Use Restriction Monitoring Report

Area Name PROJECT WIDE
Completed Date 12/22/2015 12:00:00 AM
Document Type Technical Report

Area Name PROJECT WIDE
Completed Date 6/13/2016 12:00:00 AM
Document Type Land Use Restriction Monitoring Report

Area Name PROJECT WIDE
Completed Date 6/15/2017 12:00:00 AM
Document Type Land Use Restriction Monitoring Report
Comments Joseph Lovewell performed an annual site inspection on behalf of the City of San Jose on June 5, 2017 and submitted a report to DTSC documenting that there have been changes in land use since the last inspection and the property is in compliance with the restrictions and requirements of the Land Use Covenant.

Area Name PROJECT WIDE
Completed Date 6/15/2017 12:00:00 AM
Document Type Other Report

Area Name PROJECT WIDE
Completed Date 5/2/2008 12:00:00 AM
Document Type 5 Year Review Reports
Comments The remedy (cap) continues to be protective of public health, safety and the aenvironment. the next 5 year review is due March 2013.

Area Name PROJECT WIDE
Completed Date 6/20/1991 12:00:00 AM
Document Type Preliminary Endangerment Assessment Report
Comments Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas

manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Area Name PROJECT WIDE
Completed Date 6/28/1991 12:00:00 AM
Document Type Removal Action Completion Report
Comments Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Area Name PROJECT WIDE
Completed Date 5/1/2006 12:00:00 AM
Document Type Land Use Restriction - Site Inspection/Visit

Area Name PROJECT WIDE
Completed Date 5/23/2003 12:00:00 AM
Document Type Land Use Restriction
Comments A Deed Restriction limiting future use of property including the material encapsulation areas which requires no disturbance of the encapsulated areas and the slurry wall. If the areas are disturbed, DTSC is to be notified, a health and safety plan prepared, the material from the encapsulation area will be handled properly, and repairs to the area will be done as quickly as possible.

Area Name PROJECT WIDE
Completed Date 4/27/2007 12:00:00 AM
Document Type Land Use Restriction - Site Inspection/Visit
Comments No problems noted during inspection.

Area Name PROJECT WIDE
Completed Date 5/30/2012 12:00:00 AM
Document Type Land Use Restriction - Site Inspection/Visit
Comments DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Area Name	PROJECT WIDE	**Document Type**	Work Notice
Completed Date	12/9/2013 12:00:00 AM	**Comments**	The work notice was distributed to inform the community about soil and soil vapor sampling activities to be conducted at and in the immediate vicinity of the Site.

Area Name PROJECT WIDE
Completed Date 7/19/2016 12:00:00 AM
Document Type Technical Report

Area Name PROJECT WIDE
Completed Date 4/22/2015 12:00:00 AM
Document Type Technical Workplan
Comments The Upgradient Groundwater Investigation Workplan outlines a scope of work primarily for the purpose of determining the presence or absence of volatile organic compounds upgradient of the Site. The scope of work consists of three mobilizations along three subsurface boring transects (upgradient, along Asbury Street and Coleman Avenue). The August 29, 2014 Workplan was modified by a March 17, 2015 Response to Comments document submitted by ARCADIS to address DTSC's comments on the Workplan.

Area Name PROJECT WIDE
Completed Date 6/19/2015 12:00:00 AM
Document Type Fieldwork
Comments The field investigation activities included in the Upgradient Groundwater Investigation Workplan were started on June 19, 2015.

Area Name PROJECT WIDE
Completed Date 6/12/2015 12:00:00 AM
Document Type Work Notice
Comments A work notice was distributed to inform the community about drilling and groundwater sampling to be conducted at 22 locations along Asbury Street and Coleman Avenue, and which was to scheduled to begin on June 19, 2015.

Area Name PROJECT WIDE
Completed Date 7/7/2016 12:00:00 AM
Document Type Technical Workplan
Comments The Additional Soil Vapor Investigation Work Plan outlines additional investigation activities to delineate the occurrence and concentrations of volatile organic compounds in shallow soil vapor near occupied properties across Chestnut Street, immediately east of the site. The additional investigation activities include the installation of four additional nested soil vapor probes, with two to three probes in each boring. An additional round of soil vapor sampling is to be performed in 32 existing soil vapor probes (16 locations at 2 depths) and in the new soil vapor probes that are to be installed.

Area Name PROJECT WIDE
Completed Date 3/14/2017 12:00:00 AM
Document Type Fieldwork
Comments Soil gas sampling that was included in scope of the Additional Soil Vapor Investigation Work Plan approved by DTSC on July 7, 2016 was completed.

Area Name PROJECT WIDE
Completed Date 1/17/2017 12:00:00 AM
Document Type Work Notice
Comments Work notice providing for the soil gas and groundwater sampling that is to take place for 4-5 weeks starting at the end of January 2017.

Violation Date	6/8/2015 12:00:00 AM	**Citation**	22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)
Violation Description	Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating:1) The waste analysis plan for the treatment operation;2) The written inspection schedule;3) All training documents;4) The contingency plan;5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency;6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan;8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act.	**Violation Notes**	Facility was determined to be subject to regulation as a Permit By Rule (PBR) treatment facility in 2012. In 2014 the facility was noted to have modified its operations so to be eligible for onsite recycling exemptions, which removed the PBR operating requirements The facility asked for and was granted (by DEH) \"deferred closure\" of the wastewater treatment system to allow for continued use of the system in the ongoing recycling activities. Because the system was once determined to be be subject to PBR, facility must generate and maintain a closure plan to be followed at the time of its closure.

Violation Date	11/8/2016 12:00:00 AM	**Citation**	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.	**Violation Notes**	The wastewater treatment sludge waste is currently manifested as waste code: 181 and identified as UN3262 Corrosive, Solid, Basic, Inorganic, n.o.s. (Sodium Hydroxide). Provide documentation as to why waste code F019 is not applied to the sludge waste as the waste appears to be \"wastewater treatment sludges from the chemical conversion coating of aluminum.\"

MapHazardsPro Radius Search Report

About This Report

The databases searched to compile the enclosed report are gathered from numerous federal, state and local governing environmental entities. All of the databases required to be searched by ASTM Standard E 1527 - Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process "Standard Environmental Records Sources" have been included in this report, and searched to the required distances from the subject property. Additionally, Cypress Technology Solutions, Inc (CTS) has acquired other valuable databases and integrated them into the Cypress STARReport System in order to provide more valuable information to our clients regarding hazardous materials storage and release sites within a one-mile radius from the subject property.

ECS has created a sophisticated data update system, keeping our report databases as current as possible (surpassing ASTM E1527 requirements). ECS consistently requests and updates data from each of the government agencies used to create this report. Depending on the type of database, records are updated at the agencies at varying intervals (daily, monthly, quarterly, semi-annually, or annually). An overall data update (including all available updates) is loaded into our specialized software on a quarterly basis.

CTS has created a sophisticated data update system, keeping our report databases as current as possible (surpassing ASTM E1527 requirements). CTS consistently requests and updates data from each of the government agencies used to create this report. Depending on the type of database, records are updated at the agencies at varying intervals (daily, monthly, quarterly, semi-annually, or annually). An overall data update (including all available updates) is loaded into our specialized software on a quarterly basis. It should be clearly understood that this database/map report lists only reported and accurately entered sites. Numerous sites have yet to be discovered and therefore are not yet listed by any governmental agency. The most effective way to determine if a site may be listed by a government agency in the future is by performing a Transaction Screen or Phase I Environmental Site Assessment, which include a professional site inspection and review of historical records. This radius report satisfies only one subsection requirement found within the ASTM Phase I Environmental Site Assessment reporting requirements. This report should not be considered a Phase I Environmental Site Assessment. If no sites are found for a database searched, the database and its description are excluded from the report details so as to report recorded sites only. Sites that include erroneous or incomplete address information may not show up on the report. Every attempt is made to include a listing of these unlocated sites in the report where there is a possibility of their impacting the subject property, but no guaranty can be made.

ECS has used a technology called Geocoding to locate the sites on the map. While this technology is the standard of care in the industry and is generally reliable for well formatted, complete and correct addresses, due to the limitations of this technology no guarantee of the accuracy of site placement can be made.

CTS has used a technology called Geocoding to locate the sites on the map. While this technology is the standard of care in the industry and is generally reliable for well formatted, complete and correct addresses, due to the limitations of this technology no guaranty of the accuracy of site placement can be made.

DISCLAIMER

This report contains data obtained from multiple governmental agencies. CTS cannot insure the accuracy of the enclosed information. CTS are in no way responsible for errors and/or omissions occurring in data, data conversion, or for the client's use of the information (report). CTS and its affiliates cannot be held liable for accuracy, storage, loss or expense suffered by customers resulting directly or indirectly from any data provided by CTS. No warranty expressed or implied is made in any way in connection with this report.

CTS has researched and obtained certain local, State and Federal environmental databases (Data) to assist its client's in meeting the requirements of ASTM Standards. CTS has obtained Data that is readily available and of adequate quality to be included in this report. As of the date of this report, there are certain Data that are either not yet available or are not of adequate quality and therefore are not included in this Report.

NPL: National Priority List Sites

Sites which are found on the NPL database or the Proposed NPL database. NPL sites are a special category among National Superfund (CERCLA) Sites listed in the Environmental Protection Agency's (EPA) CERCLIS database. NPL sites are of serious, high concern and priority based on a national comparison to sites needing investigations and contamination cleanup activities (remediation). These sites, some of the worst in the nation, normally contain high levels of various contaminants that have spread over relatively long distances and usually require long term, highly expensive remediation technologies. Proposed NPL sites are of serious concern and are in the process of being evaluated for categorization as National Priority List sites.Delisted NPL sites have been removed (delisted) from the NPL if no further response or action is appropriate at the site, per EPA guidelines.

- **US EPA's Superfund Enterprise Management System Database**

CORRACTS: Corrective Action Sites

CORRACTS (Corrective Action Sites) is a subset of data found within the Federal RCRA database (RCRIS) or other state database. RCRA Corrective Action is the process by which areas at a hazardous waste facility are evaluated and, if necessary, are cleaned up. Transportation, Storage and Disposal facilities are often also listed as CORRACTS facilities.

- **US EPA's Resource Conservation and Recovery Act Database**

TSD: Treatment, Storage and Disposal Sites

TSDs are subsets of data found within the Federal RCRA database (RCRIS) or other state database. TSD sites treat, store and/or dispose of hazardous materials and are federally permitted. TSD facilities are often also listed as CORRACTS facilities.

DEFENSE: FUDS and DOD Sites

These sites are Formerly Used Defense Sites (FUDS) and Department of Defense (DOD sites). The U.S. Army Corps of Engineers and/or the U.S. Department of Defense is actively working or will be taking the necessary steps to address any cleanup activities needed on these properties.

BROWN: Brownfields Cleanup and Reuse Database

The U.S. Environmental Protection Agency (EPA) defines a Brownfield site as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant." Common examples of Brownfield sites are abandoned gas stations and dry cleaners, railroad properties, factories, and closed military bases. Brownfield sites are located throughout the country, and the U.S. EPA as well as state governments have compiled a listing of these sites. Voluntary Cleanup Program Sites are sometimes also included in this category.

- **EPA's Assessment, Cleanup And Redevelopment Exchange System (ACRES) database**

CSL: Contaminated Sites List

State or Local Contaminated Sites databases. These databases include local and state-designated hazardous waste sites, spill sites, superfund sites, voluntary cleanup program sites and land disposal sites. In general, these sites are currently undergoing remediation for on site contamination, remedation has been completed and/or remediation is proposed. In states where a specific Contaminated Sites database is not maintained, the CERCLIS database will contain applicable information on contaminated sites.

DEED: List of Deed Restrictions

The implementation of recorded land use restrictions within property deeds is one of the methods agencies use to protect the public from unsafe exposures to hazardous substances and wastes. Sites with deed restrictions are often contaminated, however levels of contaminants and methods used to control migration of contaminants are controlled and approved by the agency. These are also called Environmental Covenants or Use Restrictions

- **California Department of Toxic Substances Control's Deed Restrictions list**
- **California DTSC's HWMP Land Use Restrictions List**

SEMS: Superfund Database

Sites which are found on the Superfund Enterprise Management System (SEMS) database. The SEMS database contains information on hazardous waste sites, site inspections, preliminary assessments, and remediation of hazardous waste sites under CERCLA (Superfund). The database contains general information on sites including location and status. This database includes those SEMS sites not included on the NPL or Proposed NPL databases. This includes archived sites determined to be "No Further Remedial Action Planned (NFRAP) sites are contained within this database. Archived sites may be properties where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require Federal Superfund action. The SEMS database is a newer version of the CERCLIS database and the current SEMS version does not export as much information as the CERCLIS database once did.

CONTROLS: Institutional and Engineering Controls

U.S. EPA's and State Engineering Control Sites List and/or Institutional Control Sites List. The Engineering Control Sites list are facilities that have engineered controls in place, such as capping, containment, slurry walls, extraction wells and/or treatment methods that are intended to manage environmental and health risks by reducing contamination levels at a site, or limiting exposure pathways. The Institutional Control Sites list are administrative or legal devices, such as deed restrictions, to ensure that engineering controls stay in place and/or to ensure that land use restrictions stay in place.

- U.S. Environmental Protection Agency's Engineering Controls list

LUST: Leaking Underground Storage Tanks

Leaking Underground Storage Tank records contain an inventory of reported leaking underground fuel storage tank incidents. Thousands of underground storage tanks have leaked within the United States, and both open and closed cases are reported on this list. These leaks can affect subsurface soils and groundwater. Both state and local agencies oversee and track these sites.

GENERATOR: Small and Large Hazardous Materials Generators

GENERATORS is a subset of data found within the Federal RCRA database (RCRIS) or other state GENERATORS list. RCRA GENERATORS are federally permitted generators of varying amounts of hazardous materials. A listing on the GENERATOR database does not directly indicate a release has occurred, only that the site generates hazardous materials.
