Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	The Site is located at 11427 Woodside Avenue in Santee, California. The Site is currently occupied by a commercial fuel and oil facility. Between 1987 and 1998, 13 underground storage tanks (USTs) were reportedly removed from the Site. Analysis of soil samples collected during the UST removals indicated that a release of petroleum hydrocarbons had occurred from the UST system. The County of San Diego directed that corrective measures be taken regarding the release and opened Unauthorized Release Case H19469-001 in 1988. A summary of the previous environmental assessments conducted at the Site follows: In 1988, four USTs were removed from the Site. A Site assessment was performed immediately following the tank removal activities, during which 11 soil borings were drilled and sampled, and four of the borings were completed as groundwater monitoring wells (MW-1 through MW-4). Single-walled product piping was removed from the Site in October 1997. In April 1998, nine USTs, reportedly removed from the Site, indicated a release of petroleum hydrocarbons. A 33-day high-vacuum, dual-phase extraction (HVDPE) pilot test was conducted between January 22 and February 24, 2008. Approximately 3,256 pounds of petroleum hydrocarbons were removed and treated during the pilot test. Approximately 128,620 gallons of hydrocarbon-affected water was extracted and treated. In 2008, well MW-5 was destroyed by permit. Five nested soil vapor probes (SV1 through SV5), near the Site building, were sampled in March and April 2011. It was concluded that there is a low likelihood that a significant health risk exists in connection with the concentrations of petroleum hydrocarbons in soil vapor beneath the on-Site building. During the second quarter 2012 groundwater monitoring event, free product with the appearance of red-dyed diesel fuel was measured in well MW-10. Similar free product has subsequently been monitored in wells MW-2, MW-3, MW-13, and MW-17. A separate DEH Voluntary Assistance Program (VAP) Case H19469-005 was opened on September 12, 2012 to address the release of red-dyed diesel from the on-Site aboveground storage tank (AST) system. A CAP was submitted for the case on March 30, 2015, in which monitored natural attenuation was recommended as the most cost-effective and technically feasible strategy for the Site. On April 24, 2015, the DEH issued a letter in response to the CAP, requiring the collection of groundwater samples from source area wells MW-1, MW-3, MW-5, MW-6, and MW-14, upgradient well MW-7, and downgradient well MW-18, for analysis for total petroleum hydrocarbons (TPH), benzene, toluene, ethylbenzene, and xylenes (BTEX); methyl tertiary butyl ether (MTBE), ethyl tert-butyl ether (ETBE), tertiary amyl methyl ether (TAME), di-isopropyl ether

DION & SONS, INC (Continued) **S104749008**

(DIPE), and tertiary butyl alcohol (TBA), (collectively, fuel oxygenates), and natural attenuation parameters. Based on discussions with the environmental consultant, on April 29, 2015, DEH required two rounds of quarterly sampling for source area wells MW-1, MW-3 (by dropping a bailer through the free product), and MW-6, upgradient well MW-7, and downgradient well MW-18 for analysis for TPH, BTEX, fuel oxygenates, and natural attenuation parameters. During the public comment period for the case, DEH received comments on July 8, 2016 from the City of San Diego regarding closure. The City cited the proximity of the Site to nearby receptors, such as the San Diego River and the Riverview Well Field. DEH responded that, based upon the distance from the receptors to the Site, it is unlikely that the receptors would be impacted by the gasoline release. The case for closure was evaluated under the States Low-Threat Underground Storage Tank Case Closure Policy (the Policy). Current and historical soil and groundwater data indicate that the secondary source has been adequately removed and a stable to decreasing plume remains. Site conditions meet the general and media-specific criteria established in the Policy. Low-threat closure of the case was recommended. It was concluded that the case qualifies for a low-risk closure designation and it was recommended that DEH grant low-risk closure for Unauthorized Release Case H19469-001. DEH concurred that the case qualifies for a low-risk closure designation. Permit DEH2016-LMWP-002565 was issued for the destruction of groundwater monitoring wells MW-6, MW-8, MW-9, MW-11, MW-12, MW-15, MW-16, MW-18, and MW-19. The remaining wells are being retained for Voluntary Assistance Program Case H19469-005.

Last Update:	2022-04-27T00:00:00.000
Inspection Date:	2022-03-10T00:00:00.000
Violation Code:	2060020 (TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2

Property History:	The Army acquired the use of the Santee Camp through unknown means sometime in 1941. There are no records of the camp's existence after 1943. The Army used an existing structure, built in approximately 1915, as a headquarters building. The quartermaster units stationed at the camp lived in tents, which were located on the north side and on the east side of the headquarters building. There may also have been tents located to the south of the headquarters building. First-hand witnesses of the camp suggested that the site was used as a fuel depot for Army trucks. The former headquarters building still exists, and is now used as a restaurant. Except for a small field to the south of the headquarters structure, the entire site has been developed into a commercial area. Other than the restaurant building, no other military improvements remain on the property.

Alternate Address:	10438 MISSION GORGE ROAD
Alternate City,St,Zip:	SANTEE, CA 92071
Background Info:	Richard Storrs has leased the entire property from Lloyd Parson and Lloyd and Rose E. Parsons Trust since 1970. David Tucker subleased a portion of this property from Mr. Storrs from 1985 to 1986, and again from 1987 to 1993, and used the building as a radiator repair shop. After the sublease expired in 1993, Mr. Storrs and Mr. Tucker entered into a 20-year sublease agreement for the radiator shop. In 1993, Mr. Storrs evicted Mr. Tucker for nonpayment of rent.
	Not reported
	Three businesses currently operate on the Site. These include: 1) Conceptions Retail Store (a toy and baby supply store), 2) Import Auto Tech, and 3) Chi Li Auto Center (Parker Properties, 2002). Conceptions Retail Store used to be a Sewing and Vacuum shop. The parking lot for Conceptions Retail Store is in the southeast portion of the Site. Previously, there was a J.T. Diesel in the northern portion of the site, and Brake Depot was there prior to that. J.T. Diesel was east of Chi Li Auto Center, northeast of Conceptions Retail Store, south of the former sump, and southwest of the section of bare soil in the northeast corner of the Site. This portion of the site is now

DAVE'S AUTO SERVICE (Continued) **S102860941**

vacant. The cars that were being serviced by J.T. Diesel were parked on the Site, in the eastern portion of the site, east of J.T. Diesel. The employees of Chi Li Auto Center park on an adjacent property immediately east of the site.

Description: Richard Storrs has leased the entire property from Lloyd Parson and Lloyd and Rose E. Parsons Trust since 1970. David Tucker subleased a portion of this property from Mr. Storrs from 1985 to 1986, and again from 1987 to 1993, and used the building as a radiator repair shop. After the sublease expired in 1993, Mr. Storrs and Mr. Tucker entered into a 20-year sublease agreement for the radiator shop. In 1993, Mr. Storrs evicted Mr. Tucker for nonpayment of rent. A Remedial Investigation was performed at the site, and later a Removal Action Workplan, for the removal of soil contaminated with lead for both the Parsons property and an adjacent property which had also been contaminated. Teh Removal Action was completed, andt he site has been certified.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Elevation:	356 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12008233 EL CAJON, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

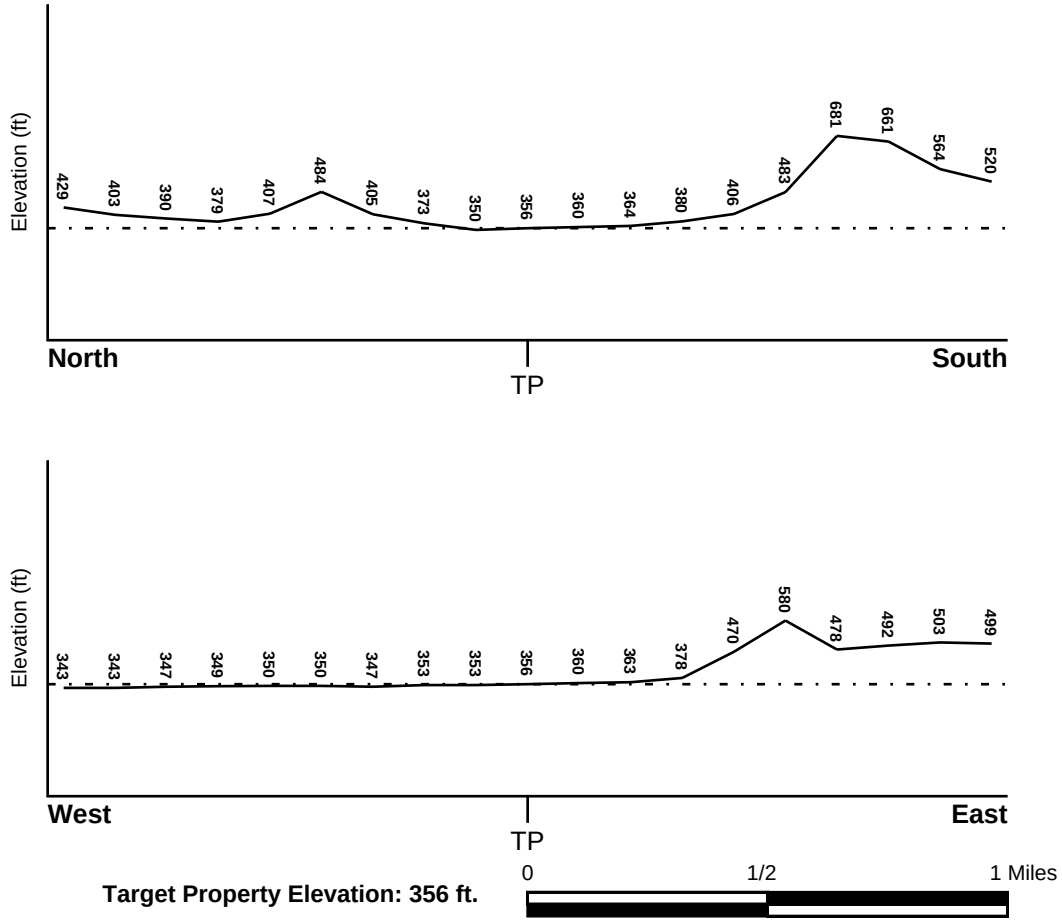
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1652G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06073C1654G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL CAJON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: VISALIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
2	11 inches	40 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
3	40 inches	59 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6
2	16 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6
3	59 inches	74 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: TUJUNGA

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6
2	14 inches	33 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6
3	33 inches	59 inches	stratified gravelly sand to gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6

Soil Map ID: 6

Soil Component Name: PLACENTIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.9
2	12 inches	33 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.9

Soil Map ID: 7

Soil Component Name: GREENFIELD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

10990 WOODSIDE AVE N
10990 WOODSIDE AVE N
SANTEE, CA 92071

TARGET PROPERTY COORDINATES

Latitude (North):	32.848148 - 32ˆ 50’ 53.33’’
Longitude (West):	116.959312 - 116ˆ 57’ 33.52’’
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	503807.5
UTM Y (Meters):	3634263.0
Elevation:	356 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12008233 EL CAJON, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

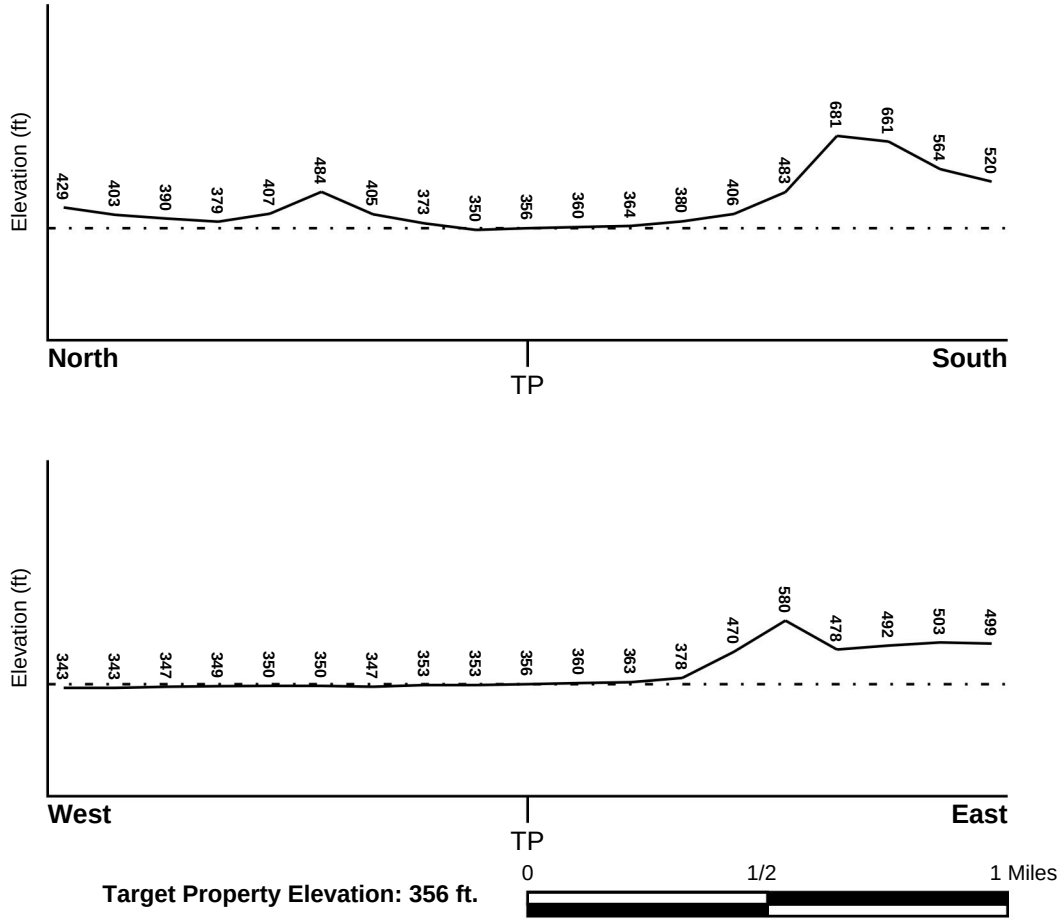
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1652G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06073C1654G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL CAJON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: VISALIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
2	11 inches	40 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1
3	40 inches	59 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 6.1

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6
2	16 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6
3	59 inches	74 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.6

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: TUJUNGA

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6
2	14 inches	33 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6
3	33 inches	59 inches	stratified gravelly sand to gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Well-graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.6

Soil Map ID: 6

Soil Component Name: PLACENTIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.9
2	12 inches	33 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.42 Min: 0.01	Max: 8.4 Min: 7.9

Soil Map ID: 7

Soil Component Name: GREENFIELD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX C

HMC
HAZARD MANAGEMENT CONSULTING

ESA USER QUESTIONNAIRE

Phase I Environmental Site Assessment
ASTM Standard 1527-05

Site:

In order to qualify for one of the *Landowner Liability Protections (LLPs)*35 offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), 36 the *user*[1] must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.
(Note: double-click boxes to check or uncheck)

(1) Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

☑ No ☐ Yes (if yes, please describe)

(2) Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☑ No ☐ Yes (if yes, please describe)

(3) As the user of this ESA do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☑ No ☐ Yes (if yes, please describe)

[1] A User as defined in ASTM 1527-05 is the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of the property, a potential tenant of property, an owner of property, a lender, or a property manager. The User ha specific obligations for completing a successful application of this process as outlined in Section 6 of this standard.

(4) Does the purchase price being paid for this Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site?

☐ No ☑ Yes (if yes, please describe)

Yes is checked in response to the first question. Yes, we believe that the purchase price reasonably reflects the fair market value.

(5) Are you aware of commonly known or *reasonably ascertainable* information about the Site that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a.) Do you know the past uses of the Site?

☑ No ☐ Yes (if yes, please describe)

(b.) Do you know of specific chemicals that are present or once were present at the Site?

☑ No ☐ Yes (if yes, please describe)

(c.) Do you know of spills or other chemical releases that have taken place at the Site?

☑ No ☐ Yes (if yes, please describe)

(d.) Do you know of any environmental cleanups that have taken place at the Site?

☑ No ☐ Yes (if yes, please describe)

(6) As the *user* of this *ESA*, based on your knowledge and experience related to the Site are there any *obvious* indicators that point to the presence or likely presence of contamination at the Site?

☑ No ☐ Yes (if yes, please describe)

Additional Information

This information is intended to assist the *environmental professional* conducting the ESA, but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) Why is the Phase I being conducted?

Due diligence for property acquisition.

(b) What is the type of property and type of property transaction, for example, sale, purchase, exchange, etc. ?

Purchase.

(c) What is the complete and correct address for the Site (a map or other documentation showing Site location and boundaries is helpful),

10990 N Woodside Ave, Santee, CA 92071
APN 381-070-52-00
See APN map on last page

(d) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

Per contract dated 9/20/22

(e) Please identify all parties who will rely on the Phase I *report.*

North Palisade Partners, LLC; North Palisade Opco, LLC; and affiliated entities. Future ownership entity, lenders, equity investors, regulatory authorities, other parties with interest in the Site

(f) Please identify the Site contact and how the contact can be reached,

Unknown, see owner's questionnaire.

(g) Please indicate any other knowledge or experience with the Site that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the Site and its environmental condition) and any environmental permits such as air quality management district, stormwater, wastewater, underground storage tanks or aboveground tanks.

None

(g) Can you provide a recent Chain of Title report for the Site?

Title report in progress, will provide upon receipt.

This questionnaire was completed by:

Name: William Jacobs

Signature:

Date: 9/26/22

Title: Agent

Please describe the length of and nature of your experience/knowledge of the Site.

Working on zoning analysis for about four weeks. No other knowledge.

VAN NUYS, CA 91406

PERMIT: LMON-105332 -- APPROVED: December 4, 2007 -- EXPIRED: April 2, 2008
10900 WOODSIDE AVENUE, SANTEE, CA 92071

The Department of Environmental Health (DEH), Monitoring Well Program has no record of receiving a report for work completed under this permit as required by San Diego County Code, Section 67.447.

A complete and accurate well/boring report must be submitted within sixty days of completing the work covered by the permit. This requirement was stated as a condition on the permit. Submit the Sixty-Day report to the Well Permit Desk at the address shown above by **July 18, 2008**.

A checklist is enclosed to assist you in providing the data that must be included in a complete report. Please be advised that incomplete reports will be returned.

Please contact the Well Permit Desk at (619) 338-2339 if you wish to discuss this letter.

Thank you for your cooperation.

MONITORING WELL PROGRAM
GEOTECHNICAL BORING CONSTRUCTION PERMIT

SITE NAME: SANTEE DRIVE-IN

SITE ADDRESS: 10900 WOODSIDE AVE., SANTEE 92071

PERMIT FOR: 5 GEOTECHNICAL BORINGS

PERMIT APPROVAL DATE: 12/04/2007

PERMIT EXPIRES ON: 03/24/2008

RESPONSIBLE PARTY: FORTE FAMILY LTD

PERMIT CONDITIONS:

1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90, Part III, Section 19.D. **Drill cuttings are not an acceptable fill material.**

2. All borings must be properly destroyed within 24 hours of drilling.

3. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.

4. This work is not connected to any known unauthorized release of hazardous substances. Any contamination found in the course of drilling and sampling must be reported to DEH. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, E- 4. (**http://www.sdcounty.ca.gov/deh/lwq/sam/manual_guidelines.html**). In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.

5. Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.

6. **This office must be given 48-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at 619) 338-2339.**

H. **QUESTIONNAIRE: Please answer all applicable questions completely.** ***For well destructions, complete only #1 below and submit any required supportive documentation.***

1. If wells are to be destroyed, provide a description of method of destruction N/A NO WELLS ARE TO BE DESTROYED

2. What is the purpose of the well/boring investigation?

   ☐ a. Part of an ongoing site assessment case in which DEH or another government regulator is the lead agency.

   ☐ b. Part of a Phase I investigation for property ownership transfer or: _____

   ☒ c. Geotechnical investigation for proposed construction, land stabilization or:

   ☐ d. Other: _____

3. What procedures will be used to prevent the well/boring from providing an avenue to contamination during construction?
   BACKFILL WITH BENTONITE GROUT AND/OR CHIPS AND PROVIDE 3-FOOT THICK CONCRETE SEAL AT THE SURFACE PER SAM MANUAL REQUIREMENTS

4. What field procedures will be utilized to determine if contamination exists?
   PHYSICAL OBSERVATIONS (DISCOLORATION OF SOIL AND ODOR)

5. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving?
   NONE PROPOSED, HOWEVER, IF PHYSICAL SIGNS OF CONTAMINATION ARE DETECTED, THE PROJECT SCOPE OF WORK WILL BE RE-EVALUATED WITH THE CLIENT

6. What constituents will be monitored and tested (Include EPA Laboratory Test Methods to be used)?
   NONE PROPOSED. SEE #5

7. How will samples be transported and preserved? N/A

8. What sampling methods will be used? MODIFIED CALIFORNIA SAMPLER AND STANDARD PENETROMETER

9. Are you proposing a variation from the methods and/or procedures presented in the requirements for the construction or destruction of Vadose and Groundwater Monitoring Wells (Current SAM Manual Requirements)? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (http://www/sdcounty.ca.gov/deh/lwq/sam/monitoring_well.html). :Yes ☐ No ☒
   NO MONITORING WELLS ARE PROPOSED

10. Are you proposing a variation in drilling and destruction of soil borings from the methods and/or procedures specified in the current SAM manual? If yes, specify these variations and *include a destruction diagram.*
    Yes ☐ No ☒

11. What procedures will be used to ensure that the drilling equipment will introduce no contamination?
    INSPECT DRILLING EQUIPMENT & FOR FLUID LEAKS, INSPECT AUGER FOR CONTAMINANTS. DRILLING WILL NOT COMMENCE IF CONTAMINANTS EXIST

12. What methods will be used to clean sampling equipment? NO DECONTAMINATION IS PLANNED (SEE #10) UNLESS PHYSICAL SIGNS OF CONTAMINATION ARE DETECTED

13. What cleaning method will be used to clean casing and screen prior to installation? WELL INSTALLATION IS NOT PROPOSED

14. A property owner consent agreement is required for all applications, except for onsite, open LOP/SAM site assessment cases, Caltrans properties and military properties. If a consent agreement is required, how has the property owner been notified of the proposed work?

A. ☒ The attached Property Owner Consent form. VIA FAX

B. ☐ The attached consent agreement between the responsible party and the property owner with a cover letter signed by the registered professional who signed the permit application.

PROPERTY OWNER CONSENT

Proposed locations for subsurface work:

Property Address: 10900 WOODSIDE AVE. SANTEE, CA 92071

Assessor's Parcel Number (APN): 381-070-52

I, SUSAN FORTE BOYD, owner of the property/properties listed above, give my permission to GeoSoils Inc. GeoSoils, Inc. (consulting company, contractor) to conduct the following work at the locations listed above.

☐ (Install) ____ monitoring wells ☐ (Destroy) ____ monitoring wells ☒ (Drill) 5 soil borings

I understand that Andrew T. Guatelli (registered professional) of GeoSoils, Inc. (consulting company) and an authorized signer for Test America Drilling Corp. (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction. I have arranged with the Responsible Party, the person who causes to have monitoring well/borings installed or existing wells destroyed on this property, to ensure proper closure of the monitoring wells/borings.

Attention: Ms. Marisue Crystal

Subject: Geotechnical Boring Log Submission, Permit No. LMON105332, 10990 North Woodside Avenue, APN 310-070-52-00, City of Santee, San Diego County, California

Dear Ms. Crystal:

In accordance with criteria presented in the San Diego County, Site Assessment and Mitigation Program (SAM) Manual, GeoSoils, Inc. (GSI), is submitting our geotechnical boring logs (attached) for subsurface exploration completed at the subject site on December 12 and 18, 2008, under the purview of DEH Permit No. LMON105332. One (1) hollow-stem auger boring and four (4) cone penetration tests (CPTs) were performed. The hollow-stem auger diameter was 8 inches. The CPT diameter was 1.75 inches. No petroleum odors nor soil staining were encountered in our borings. Accordingly, no chemical laboratory analyses were performed. Groundwater was encountered in all borings at an approximate depth of 24 feet below the surface. The approximate locations of the borings are shown on the Boring Location Map (see the attached Figure 1).

Boring B-1 was backfilled with approximately 3 cubic yards of bentonite grout. Cone Penetration Test CPT-1 was backfilled with approximately 0.14 cubic yards of bentonite chips. Cone Penetration Test CPT-2 was backfilled with approximately 0.12 cubic yards of bentonite chips. Cone Penetration Test CPT-3 was backfilled with approximately 0.13 cubic yards of bentonite chips, and Cone Penetration Test CPT-4 was backfilled with approximately 0.14 cubic yards of bentonite chips. The boring and CPT destruction was completed in general accordance with Department of Water Resources Bulletin 74-90.

If you should have any questions, please do not hesitate to contact our office.

Respectfully submitted,

FIGURE 1

UNIFIED SOIL CLASSIFICATION SYSTEM

Major Divisions			Group Symbols	Typical Names
Coarse-Grained Soils More than 50% retained on No. 200 sieve	Gravels 50% or more of coarse fraction retained on No. 4 sieve	Clean Gravels	GW	Well-graded gravels and gravel-sand mixtures, little or no fines
			GP	Poorly graded gravels and gravel-sand mixtures, little or no fines
		Gravel with	GM	Silty gravels gravel-sand-silt mixtures
			GC	Clayey gravels, gravel-sand-clay mixtures
	Sands more than 50% of coarse fraction passes No. 4 sieve	Clean Sands	SW	Well-graded sands and gravelly sands, little or no fines
			SP	Poorly graded sands and gravelly sands, little or no fines
		Sands with Fines	SM	Silty sands, sand-silt mixtures
			SC	Clayey sands, sand-clay mixtures
Fine-Grained Soils 50% or more passes No. 200 sieve	Silts and Clays Liquid limit 50% or less		ML	Inorganic silts, very fine sands, rock flour, silty or clayey fine sands
			CL	Inorganic clays of low to medium plasticity, gravelly clays, sandy clays, silty clays, lean clays
			OL	Organic silts and organic silty clays of low plasticity
	Silts and Clays Liquid limit greater than 50%		MH	Inorganic silts, micaceous or diatomaceous fine sands or silts, elastic silts
			CH	Inorganic clays of high plasticity, fat clays
			OH	Organic clays of medium to high plasticity
Highly Organic Soils			PT	Peat, mucic, and other highly organic soils

CONSISTENCY OR RELATIVE DENSITY

CRITERIA

Standard Penetration Test

Penetration Resistance N (blows/ft)	Relative Density
0 - 4	Very loose
4 - 10	Loose
10 - 30	Medium
30 - 50	Dense
> 50	Very dense

Standard Penetration Test

Penetration Resistance N (blows/ft)	Consistency	Unconfined Compressive Strength (tons/ft²)
<2	Very Soft	<0.25
2 - 4	Soft	0.25 - .050
4 - 8	Medium	0.50 - 1.00
8 - 15	Stiff	1.00 - 2.00
15 - 30	Very Stiff	2.00 - 4.00
>30	Hard	>4.00

3" 3/4" #4 #10 #40 #200 U.S. Standard Sieve

Unified Soil Classification	Cobbles	Gravel		Sand			Silt or Clay
		coarse	fine	coarse	medium	fine	

MOISTURE CONDITIONS

Dry	Absence of moisture: dusty, dry to the touch
Slightly Moist	Below optimum moisture content for compaction
Moist	Near optimum moisture content
Very Moist	Above optimum moisture content
Wet	Visible free water; below water table

MATERIAL QUANTITY

trace	0 - 5 %
few	5 - 10 %
little	10 - 25 %
some	25 - 45 %

OTHER SYMBOLS

C Core Sample
S SPT Sample
B Bulk Sample
▼ Groundwater
Qp Pocket Penetrometer

BASIC LOG FORMAT:
Group name, Group symbol, (grain size), color, moisture, consistency or relative density. Additional comments: odor, presence of roots, mica, gypsum, coarse grained particles, etc.

EXAMPLE:
Sand (SP), fine to medium grained, brown, moist, loose, trace silt, little fine gravel, few cobbles up to 4" in size, some hair roots and rootlets.

PERMIT #LMON106162
A.P.N. #381-070-52
EST #NONE

COUNTY OF SAN DIEGO
DEPARTMENT OF ENVIRONMENTAL HEALTH
LAND AND WATER QUALITY DIVISION
MONITORING WELL PROGRAM

GEOTECHNICAL BORING CONSTRUCTION PERMIT

SITE NAME: SANTEE DRIVE INN

SITE ADDRESS: 10990 NORTH WOODSIDE AVE., SANTEE CA 92071

PERMIT FOR: **ONE GEOTECHNICAL SOIL BORING**

PERMIT APPROVAL DATE: DECEMBER 18, 2008

PERMIT EXPIRES ON: APRIL 17, 2009

RESPONSIBLE PARTY: FORTE FAMILY LIMITED PARTNERSHIP

PERMIT CONDITIONS:

1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90, Part III, Section 19.D. **Drill cuttings are not an acceptable fill material.**

2. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.

3. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, E- 4. **(http://www.sdcounty.ca.gov/deh/lwq/sam/manual_guidelines.html).** In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.

4. **This work is not connected to any known unauthorized release of hazardous substances. Any contamination found in the course of drilling and sampling must be reported to DEH.** Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.

5. This office must be given 48-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at 619) 338-2339.

APPROVED BY Amelia Cesena AMELIA CESEÑA Date: 12.18.2008

	TOTAL COST OF PERMIT	$ 193.00

H. **QUESTIONNAIRE: Please answer all applicable questions completely.** ***For well destructions, complete only #1 below and submit any required supportive documentation.***

1. If wells are to be destroyed, provide a description of method of destruction N/A No Wells Are To Be Destroyed

2. What is the purpose of the well/boring investigation?

   ☐ a. Part of an ongoing site assessment case in which a government regulator is the lead agency. If yes, indicate which government regulator is the lead agency and the case number.

   _____ DEH _____ RWQCB _____ DTSC

   ☐ b. Part of a Phase I investigation for property ownership transfer or: _____

   ☒ c. Geotechnical investigation for proposed construction, land stabilization or:

   ☐ d. Other: _____

3. What procedures will be used to prevent the well/boring from providing an avenue to contamination during construction?
   Backfill with Bentonite Grout and/or chips and Provide 3-Foot thick Concrete Seal at the Surface per SAM Manual Requirements

4. What field procedures will be utilized to determine if contamination exists?
   Physical Observations (Discoloration of Soil and Odor

5. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving?
   None Proposed, However, if Physical Signs of Contamination are detected, the Project Scope of Work will be re-evaluated with the Client.

6. What constituents will be monitored and tested (Include EPA Laboratory Test Methods to be used)?
   None Proposed. See #5

7. How will samples be transported and preserved? N/A

8. What sampling methods will be used? Modified California Sampler and Standard Penetrometer

9. Are you proposing a variation from the methods and/or procedures presented in the requirements for the construction or destruction of Vadose and Groundwater Monitoring Wells (Current SAM Manual Requirements)? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (www.sdcdeh.org). Yes ☐ No ☒
   No Monitoring Wells are Proposed

10. Are you proposing a variation in drilling and destruction of soil borings from the methods and/or procedures specified in the current SAM manual? If yes, specify these variations and *include a destruction diagram.*
    Yes ☐ No ☒

11. What procedures will be used to ensure that the drilling equipment will introduce no contamination?
    Inspect Drilling Equipment for Fluid Leaks, Inspect Auger for Contaminants. Drilling will not commence if contamination is detected.

12. What methods will be used to clean sampling equipment? ~~Steam~~ No Decontamination is Planned (See #10) Unless Physical Signs of Contamination are detected.

13. What cleaning method will be used to clean casing and screen prior to installation? WELL INSTALLATION IS NOT PROPOSED.

14. A Property Owner Consent (POC) agreement is required for all applications, except for onsite, open LOP/SAM site assessment cases, Caltrans properties and military properties.

JACK MILLER
ASSISTANT DIRECTOR

PROPERTY OWNER CONSENT

Proposed locations for subsurface work:

Property Address: 10990 North Woodside Avenue, Santee, CA

Assessor's Parcel Number (APN): 381-070-52

I, _____, owner of the property/properties listed above, give my permission to GeoSoils, Inc / Scott's Drilling Co. (consulting company, contractor) to conduct the following work at the locations stated above.

☐ Install _____ monitoring wells ☐ Destroy _____ monitoring wells ☒ Drill 1 soil borings

I understand that Robert Crispian (registered professional) of GeoSoils, Inc. (consulting company) and an authorized signer for Scott's Drilling Co. (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction. I have arranged with the Responsible Party, the person who causes to have monitoring wells/borings installed or existing wells destroyed on this property, to ensure proper closure of the monitoring well(s)/borings.

Attention: Ms. Marisue Crystal

Subject: Geotechnical Boring Log Submission, Permit No. LMON106162, 10990 North Woodside Avenue, APN 310-070-52-00, City of Santee, San Diego County, California

Dear Ms. Crystal:

In accordance with criteria presented in the San Diego County, Site Assessment and Mitigation Program (SAM) Manual, GeoSoils, Inc. (GSI), is submitting our geotechnical boring log (attached) for subsurface exploration completed at the subject site on December 30, 2008 under the purview of DEH Permit No. LMON106162. One (1) hollow-stem auger boring was performed. The hollow-stem auger diameter was 8 inches. No petroleum odors nor soil staining were encountered in the boring. Accordingly, no chemical laboratory analyses were performed. Groundwater was encountered in the boring at an approximate depth of 23 feet below the surface. The approximate location of the boring is shown on the Boring Location Map (see the attached Figure 1).

Boring B-1 was backfilled with approximately 17.6 cubic feet of bentonite grout. The boring was completed in general accordance with Department of Water Resources Bulletin 74-90.

If you should have any questions, please do not hesitate to contact our office.

Respectfully submitted,

GeoSoils, Inc.

COUNTY OF SAN DIEGO
DEPARTMENT OF ENVIRONMENTAL HEALTH
LAND AND WATER QUALITY DIVISION
MONITORING WELL PROGRAM
GEOTECHNICAL BORING CONSTRUCTION PERMIT

SITE NAME: SANTEE DRIVE-IN

SITE ADDRESS: 10990 N WOODSIDE AV SANTEE CA 92071

PERMIT FOR: **SIX GEOTECHNICAL BORINGS**

PERMIT APPROVAL DATE: AUGUST 27, 2009

PERMIT EXPIRES ON: DECEMBER 25, 2009

RESPONSIBLE PARTY: FORTE FAMILY LIMITED PARTNERSHIP

PERMIT CONDITIONS:

1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90, Part III, Section 19.D.

2. All borings must be properly destroyed within 24 hours of drilling.

3. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.

4. This work is not connected to any known unauthorized release of hazardous substances. Any contamination found in the course of drilling and sampling must be reported to DEH. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, E- 4. (**http://www.sdcounty.ca.gov/deh/lwq/sam/manual_guidelines.html**). In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.

5. Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.

6. **This office must be given 48-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at 619) 338-2339.**

	TOTAL COST OF PERMIT	$ 443.00

H. QUESTIONNAIRE: Please answer all applicable questions completely. *For well destructions, complete only #1 below and submit any required supportive documentation.*

1. If wells are to be destroyed, provide a description of method of destruction N/A No wells are to be destroyed

2. What is the purpose of the well/boring investigation?

   ☐ a. Part of an ongoing site assessment case in which a government regulator is the lead agency. If yes, indicate which government regulator is the lead agency and the case number.

   _____ DEH _____ RWQCB _____ DTSC

   ☐ b. Part of a Phase I investigation for property ownership transfer or: _____

   ☒ c. Geotechnical investigation for proposed construction, land stabilization or:

   ☐ d. Other: _____

3. What procedures will be used to prevent the well/boring from providing an avenue to contamination during construction?
   Per SAM Manual Requirements
   Backfill with Bentonite chips ~~and Grout to Surface~~

4. What field procedures will be utilized to determine if contamination exists?
   Physical Observations (discoloration of soil and odor)

5. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving?
   None Proposed. However, if physical signs of contamination are detected, the project scope of work will be re-evaluated with the client.

6. What constituents will be monitored and tested (Include EPA Laboratory Test Methods to be used)?
   None Proposed. See #5

7. How will samples be transported and preserved? N/A

8. What sampling methods will be used? No sampling Proposed

9. Are you proposing a variation from the methods and/or procedures presented in the requirements for the construction or destruction of Vadose and Groundwater Monitoring Wells (Current SAM Manual Requirements)? If yes, specify these variations and include a well construction diagram and all required supporting documentation. Refer to the SAM Manual Appendix B for monitoring well guidelines (www.sdcdeh.org). Yes ☐ No ☒
   No Monitoring wells are proposed

10. Are you proposing a variation in drilling and destruction of soil borings from the methods and/or procedures specified in the current SAM manual? If yes, specify these variations and *include a destruction diagram.* Yes ☐ No ☒

11. What procedures will be used to ensure that the drilling equipment will introduce no contamination?
    Inspect CPT equipment prior to advancing. Work will not commence if contamination is detected

12. What methods will be used to clean sampling equipment? No decontamination is planned (see #10) Unless physical signs of contamination are detected.

13. What cleaning method will be used to clean casing and screen prior to installation? Well Installation is not proposed

14. A Property Owner Consent (POC) agreement is required for all applications, except for onsite, open LOP/SAM site assessment cases, Caltrans properties and military properties.

PROPERTY OWNER CONSENT

Proposed locations for subsurface work:

Property Address: 10990 North Woodside Ave. Santee, CA

Assessor's Parcel Number (APN): 381-090-52

I, SUSAN BOYD, owner of the property/properties listed above, give my permission to GeoSoils, Inc. / Middle Earth Geo Testing, Inc. (consulting company, contractor) to conduct the following work at the locations stated above.

☐ Install _____ monitoring wells ☐ Destroy _____ monitoring wells ☒ Drill 6 CPTs ~~soil borings~~

I understand that Robert Gorman (registered professional) of GeoSoils Inc. (consulting company) and an authorized signer for Middle Earth Geotesting, Inc. (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction. I have arranged with the Responsible Party, the person who causes to have monitoring wells/borings installed or existing wells destroyed on this property, to ensure proper closure of the monitoring wells/borings.

Subject: Geotechnical Cone Penetration Test Log Submission, Permit No. LMON106644, 10990 North Woodside Avenue, APN 310-070-52-00, City of Santee, San Diego County, California

Reference: "Geotechnical Boring Log Submission, Permit No. LMON106162, 10990 North Woodside Avenue, APN 310-070-52-00, City of Santee, San Diego County, California," W.O. 5823-A-SC, dated April 30, 2009, by GeoSoils, Inc.

Dear Ms. Crystal:

In accordance with criteria presented in the San Diego County, Site Assessment and Mitigation Program (SAM) Manual, GeoSoils, Inc. (GSI), is submitting our geotechnical cone penetration test logs (attached) for subsurface exploration completed at the subject site on August 31, 2009 under the purview of DEH Permit No. LMON106644. Six (6) cone penetration tests were performed. The diameter of the cone penetrometer conical tip and sleeve is 1.40 and 1.41 inches, respectively. No petroleum odors nor soil staining were encountered when the penetrometer was retrieved. Accordingly, no chemical laboratory analyses were performed. The depth to groundwater was not evaluated during our study but based on previous exploration at the site (see Reference), groundwater is anticipated at an approximate depth of 23 feet below the surface. The approximate location of the cone penetration tests (CPTs) are shown on the Cone Penetration Test Location Map (see the attached Figure 1).

CPT-01-09 was backfilled with approximately 0.18 cubic feet of bentonite chips. CPT-02-09 was backfilled with approximately 0.17 cubic feet of bentonite chips. CPT-03-09 was backfilled with approximately 0.20 cubic feet of bentonite chips. CPT-04-09 was backfilled with approximately 0.23 cubic feet of bentonite chips. CPT-05-09 was backfilled with approximately 0.23 cubic feet of bentonite chips. CPT-06-09 was backfilled with approximately 0.18 cubic feet of bentonite chips. The cone penetration tests were completed in general accordance with Department of Water Resources Bulletin 74-90.

If you should have any questions, please do not hesitate to contact our office.

PROPERTY: **10990 NORTH WOODSIDE AVENUE, SANTEE, CA**

PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein, ***Chicago Title Company*** *hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Chicago Title Insurance Company, a Florida corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

EXCEPTIONS
(Continued)

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

17. The Land described herein is included within a project area of the Redevelopment Agency shown below, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the Redevelopment Plan) as disclosed by a document.

Redevelopment Agency:	The City of Santee Community Development Commission
Recording Date:	September 18, 2007
Recording No:	as Instrument No. 2007-0611268, Official Records

18. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.

19. Any invalidity or defect in the title of the vestees in the event that the trust referred to herein is invalid or fails to grant sufficient powers to the trustee(s) or in the event there is a lack of compliance with the terms and provisions of the trust instrument.

    If title is to be insured in the trustee(s) of a trust, (or if their act is to be insured), this Company will require a Trust Certification pursuant to California Probate Code Section 18100.5.

    The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

20. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.

21. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

22. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

    The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

    The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

PLEASE REFER TO THE "INFORMATIONAL NOTES" AND "REQUIREMENTS" SECTIONS WHICH FOLLOW FOR INFORMATION NECESSARY TO COMPLETE THIS TRANSACTION.

END OF EXCEPTIONS

REQUIREMENTS SECTION

1. Unrecorded matters which may be disclosed by an Owner's Affidavit or Declaration. A form of the Owner's Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

   The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

2. In order to complete this report, the Company requires a Statement of Information to be completed by the following party(s),

   Party(s): All Parties

   The Company reserves the right to add additional items or make further requirements after review of the requested Statement of Information.

   NOTE: The Statement of Information is necessary to complete the search and examination of title under this order. Any title search includes matters that are indexed by name only, and having a completed Statement of Information assists the Company in the elimination of certain matters which appear to involve the parties but in fact affect another party with the same or similar name. Be assured that the Statement of Information is essential and will be kept strictly confidential to this file.

3. The Company will require either (a) a complete copy of the trust agreement and any amendments thereto certified by the trustee(s) to be a true and complete copy with respect to the hereinafter named trust, or (b) a Certification, pursuant to California Probate Code Section 18100.5, executed by all of the current trustee(s) of the hereinafter named trust, a form of which is attached.

   Name of Trust: John E. Forte Declaration of Trust dated April 29, 1981

4. Before issuing its policy of title insurance, the Company will require the following for the below-named limited partnership:

   Name: The Forte Family Limited Partnership, a California limited partnership

   Certificate of Limited Partnership filed with the Secretary of State, in compliance with the provisions of the California Revised Limited Partnership Act, Section 15611 et. seq., Corporations Code.
   Certified Copy of the Certificate of Limited Partnership certified by the Secretary of State filed with the County Recorder.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation

END OF REQUIREMENTS

INFORMATIONAL NOTES SECTION

1. None of the items shown in this report will cause the Company to decline to attach ALTA Endorsement Form 9 to an Extended Coverage Loan Policy, when issued.

2. The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land, a Commercial property, known as 10990 North Woodside Avenue, located within the City of Santee, California, to an Extended Coverage Loan Policy.

3. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.

4. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

5. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.

6. The following Exclusion(s) are added to preliminary reports, commitments and will be included as an endorsement in the following policies:

   A. 2006 ALTA Owner's Policy (06-17-06).

      6. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

   B. 2006 ALTA Loan Policy (06-17-06).

      8. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

      9. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.

   C. ALTA Homeowner's Policy of Title Insurance (12-02-13) and CLTA Homeowner's Policy of Title Insurance (12-02-13).

      10. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

   D. ALTA Expanded Coverage Residential Loan Policy - Assessments Priority (04-02-15).

      12. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

      13. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.

INFORMATIONAL NOTES
(Continued)

E. CLTA Standard Coverage Policy 1990 (11-09-18).

7. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the public records but that would be disclosed by an examination of any records maintained by or on behalf of a tribe or on behalf of its members.

8. Any claim of invalidity, unenforceability, or lack of priority of the lien of the insured mortgage based on the application of a tribe's law resulting from the failure of the insured mortgage to specify state law as the governing law with respect to the lien of the insured mortgage.

7. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

END OF INFORMATIONAL NOTES

WIRESAFE™ | Inquire before you wire!

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened**. DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE

Effective August 1, 2021

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (*e.g.*, name, address, phone number, email address);
- demographic information (*e.g.*, date of birth, gender, marital status);
- identity information (*e.g.* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.* loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;

Copyright © 2021. Fidelity National Financial, Inc. All Rights Reserved

- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We may share your Personal Information with affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information
We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information
If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (https://fnf.com/pages/californiaprivacy.aspx) or call (888) 413-1748.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.
For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children
The FNF Websites are not intended or designed to attract persons under the age of eighteen (18).We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users
FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans
Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions, would like to correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, visit FNF's Opt Out Page or contact us by phone at (888) 714-2710 or by mail to:

ATTACHMENT ONE (Revised 05-06-16)

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

c. that result in no loss to You; or
d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.

5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

{Except as provided in Schedule B - Part II,{ t{or T}his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

© California Land Title Association. All rights reserved.
The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses are prohibited. Reprinted under license or express permission from the California Land Title Association.

{PART I

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.}

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:}

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown in the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records. }
7. {Variable exceptions such as taxes, easements, CC&R's, etc. shown here.}

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY – ASSESSMENTS PRIORITY (04-02-15)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

OWNER'S DECLARATION

Escrow No.: 00183801-021-JI5-1TW
Property Address: 10990 North Woodside Avenue
Santee, CA

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)

   a. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at 10990 North Woodside Avenue, Santee, CA, further described as follows: See Preliminary Report/Commitment No. 00183801-TW for full legal description (the "Land").

   b. Declarant is the _____ of _____ ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at 10990 North Woodside Avenue, Santee, CA, further described as follows: See Preliminary Report/Commitment No. 00183801-TW for full legal description (the "Land").

2. (Fill in the applicable paragraph and strike the other)

   a. During the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.

   b. During the period of six months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of $_____, but no work whatever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____. Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Chicago Title Company against any and all claims arising therefrom.

3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.

4. Except as shown in the above-referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, regular assessments, special assessments, periodic assessments or any assessment from any source, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records. There are no violations of the covenants, conditions and restrictions as shown in the above-referenced Preliminary Report/Commitment.

5. The Land is currently in use as _____; _____ occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

   _____

6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.

7. There are no outstanding options to purchase or rights of first refusal affecting the Land.

8. Between the most recent Effective Date of the above-referenced Preliminary Report/Commitment and the date of recording of the Insured Instrument(s), Owner has not taken or allowed, and will not take or allow, any action or inaction to encumber or otherwise affect title to the Land.

This declaration is made with the intention that Chicago Title Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on _____ at _____.

SECTION 1.0 – PROJECT DESCRIPTION

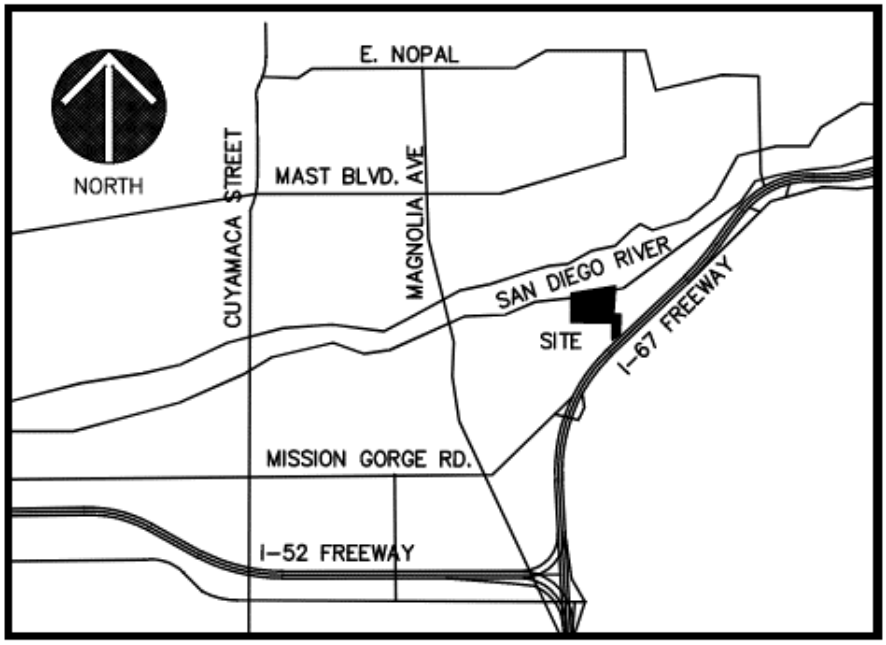
Purpose of Study

The purpose of this study is to support the design and construction of a 300,145 square foot warehouse along with site improvements at 1099 N Woodside Avenue. The study will confirm post developed runoff does not exceed pre-developed peak flows and insure there will be no negative impacts to surrounding and downstream properties. The study will also discuss 100-year water surface elevations calculated for the neighboring San Diego River based on the "City of Santee Citywide Drainage Study" by BSI Consultants, Inc. written in 1990.

Project Description

The project proposes to build a 300,145 square foot warehouse within the property featuring two loading docks to the north and south. The overall footprint of the property is 16.8 acres. The site will also feature associated parking stalls walkways, 2 trash enclosures, landscaping and on-site utilities including storm drain, water and sewer. Access to the site will follow the existing drive-in movie theater currently on the property and be from Woodside Avenue.

SECTION 2.0 – VICINITY MAP



VICINITY MAP
NTS

SECTION 3.0 – DESCRIPTION OF WATERSHED

Existing Site Conditions

The existing site consists of a drive-in movie theater featuring a paved parking lot, two large viewing screens and a building in the center of the site that includes restrooms and a snack bar. The property is accessed from Woodside Avenue on the south and neighbors the San Diego River to the north. Drainage on the site is moderately flat sloping towards the northwest of the site into the San Diego River with no on-site storm drain. All water currently surface flows into the San Diego River

Approximately 3.5 acres of onsite run-on currently flows onto the site. An existing 24 inch culvert located under CA-67 Freeway outlets at the entrance of site off of Woodside Avenue. This culvert collects approximately 2.8 acres from the freeway as well as the southern portion of Woodside Drive. An additional 0.7 acres covering the northern portion of Woodside Ave collects in the curb and gutter from south of Wheatlands Ave and outlets at the existing entrance of the site.

See the Existing Hydrology Map in Attachment 2.

Proposed Site Conditions

The proposed site will feature a 300,145 square foot warehouse along with associated parking stalls, walkways, 2 trash enclosures, landscaping and on-site utilities including storm drain, water and sewer. The site will generally match the existing drainage conditions. All onsite flows will be routed to an underground infiltration chamber that is sized based on County of San Diego LID requirements. High flows will bypass the infiltration system via a diversion manhole and will overflow into a proposed storm drain headwall structure. A rip-rap pad at the headwall outlet will provide energy dissipation and will prevent slope scour and erosion.

Offsite flows from the existing culvert and Woodside Avenue to the south will be accepted by a proposed 24” bypass storm drain and will outlet to the San Diego River via a headwall structure with rip-rap, matching existing drainage patterns. It should be noted that the bypass storm drain will not be connected to the underground infiltration chambers.

See the Proposed Hydrology Map in Attachment 2.

City of Santee Citywide Drainage Study San Diego River 100-Year Flood Level

The City of Santee Citywide Drainage Study written by BSI consultants was used as the basis for reviewing 100-Year flood levels within the San Diego River relative to our site. HEC 2 runs were performed in July of 1992 using a City of Santee flow rate yielding water surface elevations within the 100 year floodway. The HEC 2 run yielded a 100 year city water surface elevation of 351.73.

Hydrologic Unit Contribution

The project is located in the Lower San Diego Hydrologic Unit (907.1)

SECTION 4.0 METHODOLOGY

Drainage System Overview

The proposed drainage system for this project is designed to comply with the 2003 San Diego Hydrology Manual.

The system consists of a various sizes of HDPE pipe conveying stormwater to an underground infiltration chamber located to the north of the site. The infiltration chamber has been sized to infiltrate the design capture volume based on San Diego County LID requirements. The infiltration system is designed to fully retain the required design capture volume by filling the infiltration chambers. Stormwater in excess of the required design capture volume will bypass the infiltration system via a diversion manhole and will outlet to a headwall structure with rip-rap.

The infiltration chamber has a system volume of 26,891 cubic feet and consists of a total area of 6,233 sf. The infiltration chambers will pond to an elevation of 348.50 before stormwater outlets to the headwall structure via the diversion manhole.

An additional 24-inch HDPE pipe will accept flows from the existing 24-inch culvert located under CA-67 Freeway outlets at the entrance of site off of Woodside Avenue. The proposed storm drain has been designed to route stormwater to the north underneath the proposed site and outlet via a headwall structure with rip-rap. The full flow capacity of this pipe sloped at 0.5% is 20.79 cfs. See the Proposed Hydrology Map and Upstream Run-On Exhibit in Attachment 2.

The following sections detail the calculations performed and resulting compliance with the aforementioned design manuals.

Hydrology Software

Advanced Engineering Software (AES) was utilized to model the 10 year, 50 year and 100 year hydrology for the site using the Rational Method set forth in the San Diego Hydrology Manual.

SECTION 5.0 CALCULATIONS

Runoff Coefficient

The proposed site was found to be within Hydrologic Soil Group ‘A’ based on the County of San Diego Hydrology Manual Soil Hydrologic Group Map as well as UC Davis NRCS Soil Web where it was labeled as being 85% Visalia soil type.

The “C” value for both the existing and proposed condition was selected to be 0.80 which represents an 85% impervious site with Soil Type ‘A’. This land use would be considered General Commercial which matches the proposed development type. The existing site features approximately 85% impervious surface consisting of a paved parking lot.

Rational Method

Both existing and proposed conditions were ran using the Rational Method in AES to calculate the peak flows and time of concentrations seen with the 10 year, 50 year and 100 year storms. The results are below.

Peak 10-Year Runoff

	Node No.	Time of Concentration (min.)	Runoff (cfs)
Existing	**101**	**4.35**	**63.78**
Proposed (Onsite)	19	6.91	42.76
Proposed (Run-On)	11.5	8.24	13.24
Proposed (Total)	**-**	**-**	**56.00**
		Difference	- 7.78 cfs

Peak 50-Year Runoff

	Node No.	Time of Concentration (min.)	Runoff (cfs)
Existing	**101**	**4.35**	**85.04**
Proposed (Onsite)	19	7.95	56.89
Proposed (Run-On)	11.5	6.79	17.65
Proposed (Total)	**-**	**-**	**74.54**
		Difference	- 10.50 cfs

Peak 100-Year Runoff

	Node No.	Time of Concentration (min.)	Runoff (cfs)
Existing	**101**	**4.35**	**92.12**
Proposed (Onsite)	19	7.87	61.52
Proposed (Run-On)	11.5	6.99	19.13
Proposed (Total)	**-**	**-**	**80.65**
		Difference	- 11.47 cfs

See Attachment 3 for calculations.

For site run-on, a maximum flow of 19.13 cfs will be seen in the 100-Year storm and be accepted by the on-site 24-inch storm drain that bypasses the infiltration system. With a full flow capacity of 20.79 cfs, the 24-inch storm drain is an acceptable size to handle the flows seen in the existing culvert. The calculation of full flow capacity using Manning's equation can be found in Attachment 3 following the rational method calculations.

100-Year Flood Analysis

The limits of the floodway elevation of 351.73 have been depicted in the Proposed Hydrology Map found in Attachment 2. The finished floor of the proposed building is sloped and varies from 356.5 to 359.1 finished floor elevation.

SECTION 6.0 CONCLUSIONS

The study and resulting data indicate that the project will not increase 10-year, 50-year and 100-year peak runoff and therefore have no negative impact on the existing downstream storm drain facilities or properties. The finished floor of the proposed building will be over 4' higher than the 100-year flood levels that will be seen within the San Diego River. All City of Santee minimum requirements for the site have been met.

SECTION 8.0 DECLARATION OF RESPONSIBLE CHARGE

I hereby declare that I am the engineer of work for this project. That I have exercised responsible charge over the design of the project as defined in section 6703 of the business and professions codes, and that the design is consistent with current design.

I understand that the check of the project drawings and specifications by the City of Santee is confined to a review only and does not relieve me, as engineer of work, of my responsibilities for project design.

*The values associated with 0% impervious may be used for direct calculation of the runoff coefficient as described in Section 3.1.2 (representing the pervious runoff coefficient, Cp, for the soil type), or for areas that will remain undisturbed in perpetuity. Justification must be given that the area will remain natural forever (e.g., the area is located in Cleveland National Forest).
DU/A = dwelling units per acre

SWQMP PREPARER'S
CERTIFICATION PAGE

Project Name: Palisade Santee Business Park
Permit Application Number: DR2023-02

PREPARER'S CERTIFICATION

I hereby declare that I am the Engineer in Responsible Charge of design of storm water best management practices (BMPs) for this project, and that I have exercised responsible charge over the design of the BMPs as defined in Section 6703 of the Business and Professions Code, and that the design is consistent with the PDP requirements of the City of Santee BMP Design Manual, which is a design manual for compliance with local City of Santee and regional MS4 Permit (California Regional Water Quality Control Board San Diego Region Order No. R9-2015-0100) requirements for storm water management.

I have read and understand that the [City Engineer] has adopted minimum requirements for managing urban runoff, including storm water, from land development activities, as described in the BMP Design Manual. I certify that this PDP SWQMP has been completed to the best of my ability and accurately reflects the project being proposed and the applicable BMPs proposed to minimize the potentially negative impacts of this project's land development activities on water quality. I understand and acknowledge that the plan check review of this PDP SWQMP by the [City Engineer] is confined to a review and does not relieve me, as the Engineer in Responsible Charge of design of storm water BMPs for this project, of my responsibilities for project design.

PROJECT OWNER'S CERTIFICATION

This PDP SWQMP has been prepared for North Palisade Opco, LLC by DRC Engineering, Inc. The PDP SWQMP is intended to comply with the PDP requirements of the San Diego County BMP Design Manual, which is a design manual for compliance with local City of Santee and regional MS4 Permit (California Regional Water Quality Control Board San Diego Region Order No. R9-2015-0100) requirements for storm water management.

The undersigned, while it owns the subject property, is responsible for the implementation of the provisions of this plan. Once the undersigned transfers its interests in the property, its successor-in-interest shall bear the aforementioned responsibility to implement the best management practices (BMPs) described within this plan, including ensuring on-going operation and maintenance of structural BMPs. A signed copy of this document shall be available on the subject property into perpetuity.

VICINITY MAP
NTS

Applicability of Permanent, Post-Construction Storm Water BMP Requirements **(Storm Water Intake Form for all Development Permit Applications)**	**Form I-1** Model BMP Design Manual [August 31, 2015]

Project Identification

Project Name: Palisade Santee Business Park	
Permit Application Number: DR2023-02	Date: 3/29/2023
Project Address: 10990 N Woodside Avenue, Santee, CA 92071	

Determination of Requirements

The purpose of this form is to identify permanent, post-construction requirements that apply to the project. This form serves as a short summary of applicable requirements, in some cases referencing separate forms that will serve as the backup for the determination of requirements.

Answer each step below, starting with Step 1 and progressing through each step until reaching "Stop". **Upon reaching a Stop, do not complete further Steps beyond the Stop.**

Refer to BMP Design Manual sections and/or separate forms referenced in each step below.

Step	Answer	Progression
Step 1: Is the project a "development project"? See Section 1.3 of the BMP Design Manual for guidance.	☒ Yes	Go to Step 2.
	☐ No	Stop. Permanent BMP requirements do not apply. No SWQMP will be required. Provide discussion below.
Discussion / justification if the project is not a "development project" (e.g., the project includes *only* interior remodels within an existing building):		
Step 2: Is the project a Standard Project, Priority Development Project (PDP), or exception to PDP definitions? To answer this item, see Section 1.4 of the BMP Design Manual *in its entirety* for guidance, AND complete Form I-2, Project Type Determination.	☐ Standard Project	Stop. Only Standard Project requirements apply, including Standard Project SWQMP.
	☒ PDP	Standard and PDP requirements apply, including PDP SWQMP. Go to Step 3.
	☐ Exception to PDP definitions	Stop. Standard Project requirements apply, and any additional requirements specific to the type of project. Provide discussion and list any additional requirements below. Prepare Standard Project SWQMP.

Form I-1 Page 2, Form Template Date: August 31, 2015		
[Step 2 Continued from Page 1] Discussion / justification, and additional requirements for exceptions to PDP definitions, if applicable:		
Step 3 (PDPs only). Is the project subject to earlier PDP requirements due to a prior lawful approval? See Section 1.10 of the BMP Design Manual for guidance.	☐ Yes	Consult the [City Engineer] to determine requirements. Provide discussion and identify requirements below. Go to Step 4.
	☒ No	BMP Design Manual PDP requirements apply. Go to Step 4.
Discussion / justification of prior lawful approval, and identify requirements (*not required if prior lawful approval does not apply*):		
Step 4 (PDPs only). Do hydromodification control requirements apply? See Section 1.6 of the BMP Design Manual for guidance.	☐ Yes	PDP structural BMPs required for pollutant control (Chapter 5) and hydromodification control (Chapter 6). Go to Step 5.
	☒ No	Stop. PDP structural BMPs required for pollutant control (Chapter 5) only. Provide brief discussion of exemption to hydromodification control below.
Discussion / justification if hydromodification control requirements do not apply: The existing project site drains directly into the San Diego River within the San Deigo River Watershed Management Area. The San Diego River is listed as an exempt river reach per the "Receiving Waters and Conveyance Systems Exempt from Hydromodification Management Requirements" Map included in Attachment 2.		
Step 5 (PDPs subject to hydromodification control requirements only). Does protection of critical coarse sediment yield areas apply based on review of WMAA Potential Critical Coarse Sediment Yield Area Map? See Section 6.2 of the BMP Design Manual for guidance.	☐ Yes	Management measures required for protection of critical coarse sediment yield areas (Chapter 6.2). Stop.
	☐ No	Management measures not required for protection of critical coarse sediment yield areas. Provide brief discussion below. Stop.

Priority Determination Form	Form I-2 Model BMP Design Manual [August 31, 2015]

Project Information

Project Name: Palisade Santee Business Park	
Permit Application Number: DR2023-02	Date: 3/29/2023
Project Address: 10990 N Woodside Avenue, Santee, CA 92071	

Project Type Determination: Standard Project or Priority Development Project (PDP)

The project is (select one): ☐ New Development ☒ Redevelopment

The total proposed newly created or replaced impervious area is: _548,087_ ft^2 (12.58) acres

Is the project in any of the following categories, (a) through (f)?

Yes	No		
☐	☒	(a)	New development projects that create 10,000 square feet or more of impervious surfaces (collectively over the entire project site). This includes commercial, industrial, residential, mixed-use, and public development projects on public or private land.
☒	☐	(b)	Redevelopment projects that create and/or replace 5,000 square feet or more of impervious surface (collectively over the entire project site on an existing site of 10,000 square feet or more of impervious surfaces). This includes commercial, industrial, residential, mixed-use, and public development projects on public or private land.
☐	☒	(c)	New and redevelopment projects that create and/or replace 5,000 square feet or more of impervious surface (collectively over the entire project site), and support one or more of the following uses: (i) Restaurants. This category is defined as a facility that sells prepared foods and drinks for consumption, including stationary lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption (Standard Industrial Classification (SIC) code 5812). (ii) Hillside development projects. This category includes development on any natural slope that is twenty-five percent or greater. (iii) Parking lots. This category is defined as a land area or facility for the temporary parking or storage of motor vehicles used personally, for business, or for commerce. (iv) Streets, roads, highways, freeways, and driveways. This category is defined as any paved impervious surface used for the transportation of automobiles, trucks, motorcycles, and other vehicles.

Form I-2 Page 2, Form Template Date: August 31, 2015			
Yes ☐	No ☒	(d)	New or redevelopment projects that create and/or replace 2,500 square feet or more of impervious surface (collectively over the entire project site), and discharging directly to an Environmentally Sensitive Area (ESA). "Discharging directly to" includes flow that is conveyed overland a distance of 200 feet or less from the project to the ESA, or conveyed in a pipe or open channel any distance as an isolated flow from the project to the ESA (i.e. not commingled with flows from adjacent lands). *Note: ESAs are areas that include but are not limited to all Clean Water Act Section 303(d) impaired water bodies; areas designated as Areas of Special Biological Significance by the State Water Board and San Diego Water Board; State Water Quality Protected Areas; water bodies designated with the RARE beneficial use by the State Water Board and San Diego Water Board; and any other equivalent environmentally sensitive areas which have been identified by the Copermittees. See BMP Design Manual Section 1.4.2 for additional guidance.*
Yes ☐	No ☒	(e)	New development projects, or redevelopment projects that create and/or replace 5,000 square feet or more of impervious surface, that support one or more of the following uses: (i) Automotive repair shops. This category is defined as a facility that is categorized in any one of the following SIC codes: 5013, 5014, 5541, 7532-7534, or 7536-7539. (ii) Retail gasoline outlets (RGOs). This category includes RGOs that meet the following criteria: (a) 5,000 square feet or more or (b) a projected Average Daily Traffic (ADT) of 100 or more vehicles per day.
Yes ☒	No ☐	(f)	New or redevelopment projects that result in the disturbance of one or more acres of land and are expected to generate pollutants post construction. *Note: See BMP Design Manual Section 1.4.2 for additional guidance.*

Does the project meet the definition of one or more of the Priority Development Project categories (a) through (f) listed above?

☐ No – the project is not a Priority Development Project (Standard Project).

☒ Yes – the project is a Priority Development Project (PDP).

The following is for redevelopment PDPs only:

The area of existing (pre-project) impervious area at the project site is: 499,523 ft^2 (A)
The total proposed newly created or replaced impervious area is 548,087 ft^2 (B)
Percent impervious surface created or replaced (B/A)*100: 109.7 %
The percent impervious surface created or replaced is (select one based on the above calculation):

☐ less than or equal to fifty percent (50%) – only new impervious areas are considered PDP

OR

☒ greater than fifty percent (50%) – the entire project site is a PDP

Site Design Checklist For PDPs	Form I-3B (PDPs) Model BMP Design Manual [August 31, 2015]
Project Summary Information	
Project Name	Palisade Santee Business Park
Project Address	10990 N Woodside Avenue, Santee, CA 92071
Assessor's Parcel Number(s) (APN(s))	381-070-52-00
Permit Application Number	DR2023-02
Project Hydrologic Unit	Select One: ☐ Santa Margarita 902 ☐ San Luis Rey 903 ☐ Carlsbad 904 ☐ San Dieguito 905 ☐ Penasquitos 906 ☒ San Diego 907 ☐ Pueblo San Diego 908 ☐ Sweetwater 909 ☐ Otay 910 ☐ Tijuana 911
Project Watershed (Complete Hydrologic Unit, Area, and Subarea Name with Numeric Identifier)	Lower San Diego Hydrological Area (907.1), Santee subwatershed (907.12)
Parcel Area (total area of Assessor's Parcel(s) associated with the project)	13.49 Acres (587,673 Square Feet)
Area to be Disturbed by the Project (Project Area)	13.48 Acres (587,042 Square Feet)
Project Proposed Impervious Area (subset of Project Area)	12.58 Acres (548,087 Square Feet)
Project Proposed Pervious Area (subset of Project Area)	0.89 Acres (38,955 Square Feet)
Note: Proposed Impervious Area + Proposed Pervious Area = Area to be Disturbed by the Project. This may be less than the Parcel Area.	

Description of Existing Site Condition

Current Status of the Site (select all that apply):

- [x] Existing development
- [ ] Previously graded but not built out
- [ ] Demolition completed without new construction
- [ ] Agricultural or other non-impervious use
- [ ] Vacant, undeveloped/natural

Description / Additional Information:
Current site is an existing drive-in movie theater predominantly made up of a parking lot and drive aisles.

Existing Land Cover Includes (select all that apply):

- [ ] Vegetative Cover
- [x] Non-Vegetated Pervious Areas
- [x] Impervious Areas

Description / Additional Information:
Site is predominantly made up of a parking lot and drive aisles. All pervious areas are dirt.

Underlying Soil belongs to Hydrologic Soil Group (select all that apply):

- [x] NRCS Type A
- [ ] NRCS Type B
- [ ] NRCS Type C
- [ ] NRCS Type D

Approximate Depth to Groundwater (GW):

- [ ] GW Depth < 5 feet
- [ ] 5 feet < GW Depth < 10 feet
- [ ] 10 feet < GW Depth < 20 feet
- [x] GW Depth > 20 feet

Existing Natural Hydrologic Features (select all that apply):

☐ Watercourses

☐ Seeps

☐ Springs

☐ Wetlands

☒ None

Description / Additional Information:

Description of Existing Site Drainage Patterns

How is storm water runoff conveyed from the site? At a minimum, this description should answer:

(1) whether existing drainage conveyance is natural or urban;

(2) Is runoff from offsite conveyed through the site? if yes, quantify all offsite drainage areas, design flows, and locations where offsite flows enter the project site, and summarize how such flows are conveyed through the site;

(3)Provide details regarding existing project site drainage conveyance network, including any existing storm drains, concrete channels, swales, detention facilities, storm water treatment facilities, natural or constructed channels; and

(4) Identify all discharge locations from the existing project site along with a summary of conveyance system size and capacity for each of the discharge locations. Provide summary of the pre-project drainage areas and design flows to each of the existing runoff discharge locations.

Describe existing site drainage patterns:

The site is currently made up of a drive-in movie theater and is predominately made up of parking lots and drive aisles. Stormwater flow currently sheet flows over the parking lot to a low spot in the northwest corner of the site and spills into the San Diego River over natural terrain. There is currently no drainage system within the site. Approximately 3.5 acres of onsite run-on currently flows onto the site. An existing 24-inch culvert located under CA-67 Freeway outlets at the entrance of the site off of Woodside Avenue. This culvert collects approximately 2.8 acres from the freeway as well as the southern portion of Woodside Drive. An additional 0.7 acres covering the northern portion of Woodside Drive collects in the curb and gutter from south of Wheatlands Drive and outlets at the existing entrance of the site. In total, approximately 16.8 acres of tributary area flows to the existing low spot.

Description of Proposed Site Development

Project Description / Proposed Land Use and/or Activities:

The project is made up of the construction of a 300,145 square foot warehouse and associated improvements. The building will be used for general warehousing and storage (SIC Code 4225) and feature truck docks on each side of the building. Truck traffic will enter the site off of Woodside Avenue and be able to access drive aisles around the perimeter of the building.

List/describe proposed impervious features of the project (e.g., buildings, roadways, parking lots, courtyards, athletic courts, other impervious features):

The 300,145 square foot warehouse will feature associated drive aisles, parking stalls, walkways and 2 trash enclosures. All impervious surfaces have been designed to have a minimum slope to address ADA and Building Code requirements.

List/describe proposed pervious features of the project (e.g., landscape areas):

All landscaped areas within the site will feature drought tolerant landscaping.

Does the project include grading and changes to site topography?

☒ Yes

☐ No

Description / Additional Information:

Project includes grading but overall drainage patterns of the site will remain the same with the on-site storm drain flowing towards the north corner of the site towards the San Diego River.

Description of Proposed Site Drainage Patterns

Does the project include changes to site drainage (e.g., installation of new storm water conveyance systems)?

☒ Yes
☐ No

If yes, provide details regarding the proposed project site drainage conveyance network, including storm drains, concrete channels, swales, detention facilities, storm water treatment facilities, natural or constructed channels, and the method for conveying offsite flows through or around the proposed project site. Identify all discharge locations from the proposed project site along with a summary of the conveyance system size and capacity for each of the discharge locations. Provide a summary of pre- and post-project drainage areas and design flows to each of the runoff discharge locations. Reference the drainage study for detailed calculations.

Describe proposed site drainage patterns:

The proposed site will feature an on-site storm drain system that will accept flows from drain inlets at low spots throughout the site. Stormwater will continue to flow to the north of the site, around the building to an underground infiltration system located with the northern truck yard. The infiltration chamber will be sized based on SWQMP requirements with larger flows building up within the system and discharging to a headwall structure draining into the San Diego River. The headwall structure will outlet to a rip-rap pad to dissipate energy and provide scour protection.

Approximately 0.24 acres to the north of the site consisting of pervious slope will be considered self-mitigating as this area currently drains into the San Diego River and can not feasibly be accepted by the on-site storm drain system. The area is highlighted on the DMA Exhibit in Attachment 1 and is designated as DMA A-1.

While in depth sizing has yet to be calculated, see the Preliminary Hydrology Report for general sizing information for the on-site storm drain as well as pre vs. post development comparisons of the site.

Identify whether any of the following features, activities, and/or pollutant source areas will be present (select all that apply):

- [x] On-site storm drain inlets
- [ ] Interior floor drains and elevator shaft sump pumps
- [ ] Interior parking garages
- [x] Need for future indoor & structural pest control
- [x] Landscape/Outdoor Pesticide Use
- [ ] Pools, spas, ponds, decorative fountains, and other water features
- [ ] Food service
- [x] Refuse areas
- [ ] Industrial processes
- [ ] Outdoor storage of equipment or materials
- [ ] Vehicle and Equipment Cleaning
- [ ] Vehicle/Equipment Repair and Maintenance
- [ ] Fuel Dispensing Areas
- [x] Loading Docks
- [x] Fire Sprinkler Test Water
- [ ] Miscellaneous Drain or Wash Water
- [x] Plazas, sidewalks, and parking lots

Description / Additional Information:
Project will only feature general warehousing activities

Form I-3B Page 7 of 10, Form Template Date: August 31, 2015

Identification and Narrative of Receiving Water and Pollutants of Concern

Describe flow path of storm water from the project site discharge location(s), through urban storm conveyance systems as applicable, to receiving creeks, rivers, and lagoons as applicable, and ultimate discharge to the Pacific Ocean (or bay, lagoon, lake or reservoir, as applicable):

Project discharges directly to the San Diego River in the Lower San Diego Hydrological Area (907.1) which downstream outlets into the Famosa Slough and the Pacific Ocean.

List any 303(d) impaired water bodies within the path of storm water from the project site to the Pacific Ocean (or bay, lagoon, lake or reservoir, as applicable), identify the pollutant(s)/stressor(s) causing impairment, and identify any TMDLs and/or Highest Priority Pollutants from the WQIP for the impaired water bodies:

303(d) Impaired Water Body	Pollutant(s)/Stressor(s)	TMDLs / WQIP Highest Priority Pollutant
San Diego River (lower)	Indicator Bacteria, Low Dissolved Oxygen, Nitrogen, Phosphorus, Total Dissolved Solids, Toxicity, Cadmium, Benthic Community Events	Bacteria
Famosa Slough	Eutrophic	Eutrophication (Under Development)
Pacific Ocean Shoreline	Enterococcus, Total Coliform	Bacteria

Identification of Project Site Pollutants*

***Identification of project site pollutants is only required if flow-thru treatment BMPs are implemented onsite in lieu of retention or biofiltration BMPs (note the project must also participate in an alternative compliance program unless prior lawful approval to meet earlier PDP requirements is demonstrated)**

Identify pollutants expected from the project site based on all proposed use(s) of the site (see BMP Design Manual Appendix B.6):

Pollutant	Not Applicable to the Project Site	Expected from the Project Site	Also a Receiving Water Pollutant of Concern
Sediment			
Nutrients			
Heavy Metals			
Organic Compounds			
Trash & Debris			
Oxygen Demanding Substances			
Oil & Grease			
Bacteria & Viruses			
Pesticides			

Hydromodification Management Requirements

Do hydromodification management requirements apply (see Section 1.6 of the BMP Design Manual)?

☐ Yes, hydromodification management flow control structural BMPs required.

☐ No, the project will discharge runoff directly to existing underground storm drains discharging directly to water storage reservoirs, lakes, enclosed embayments, or the Pacific Ocean.

☐ No, the project will discharge runoff directly to conveyance channels whose bed and bank are concrete-lined all the way from the point of discharge to water storage reservoirs, lakes, enclosed embayments, or the Pacific Ocean.

☒ No, the project will discharge runoff directly to an area identified as appropriate for an exemption by the WMAA for the watershed in which the project resides.

Description / Additional Information (to be provided if a 'No' answer has been selected above):

Project discharges water directly into the San Diego River which is defined as an exempt river reach based on Watershed Management Area Analysis.

Critical Coarse Sediment Yield Areas*

***This Section only required if hydromodification management requirements apply**

Based on the maps provided within the WMAA, do potential critical coarse sediment yield areas exist within the project drainage boundaries?

☐ Yes
☐ No, No critical coarse sediment yield areas to be protected based on WMAA maps

If yes, have any of the optional analyses presented in Section 6.2 of the BMP Design Manual been performed?

☐ 6.2.1 Verification of Geomorphic Landscape Units (GLUs) Onsite
☐ 6.2.2 Downstream Systems Sensitivity to Coarse Sediment
☐ 6.2.3 Optional Additional Analysis of Potential Critical Coarse Sediment Yield Areas Onsite
☐ No optional analyses performed, the project will avoid critical coarse sediment yield areas identified based on WMAA maps

If optional analyses were performed, what is the final result?

☐ No critical coarse sediment yield areas to be protected based on verification of GLUs onsite
☐ Critical coarse sediment yield areas exist but additional analysis has determined that protection is not required. Documentation attached in Attachment 2.b of the SWQMP.
☐ Critical coarse sediment yield areas exist and require protection. The project will implement management measures described in Sections 6.2.4 and 6.2.5 as applicable, and the areas are identified on the SWQMP Exhibit.

Discussion / Additional Information:

Form I-3B Page 9 of 10, Form Template Date: August 31, 2015
Flow Control for Post-Project Runoff*   ***This Section only required if hydromodification management requirements apply**
List and describe point(s) of compliance (POCs) for flow control for hydromodification management (see Section 6.3.1). For each POC, provide a POC identification name or number correlating to the project's HMP Exhibit and a receiving channel identification name or number correlating to the project's HMP Exhibit.
Has a geomorphic assessment been performed for the receiving channel(s)?   ☐ No, the low flow threshold is 0.1Q2 (default low flow threshold)   ☐ Yes, the result is the low flow threshold is 0.1Q2   ☐ Yes, the result is the low flow threshold is 0.3Q2   ☐ Yes, the result is the low flow threshold is 0.5Q2   If a geomorphic assessment has been performed, provide title, date, and preparer: Discussion / Additional Information: (optional)

Form I-3B Page 10 of 10, Form Template Date: August 31, 2015
Other Site Requirements and Constraints
When applicable, list other site requirements or constraints that will influence storm water management design, such as zoning requirements including setbacks and open space, or local codes governing minimum street width, sidewalk construction, allowable pavement types, and drainage requirements. Not Applicable
Optional Additional Information or Continuation of Previous Sections As Needed
This space provided for additional information or continuation of information from previous sections as needed.

Source Control BMP Checklist for All Development Projects (Standard Projects and Priority Development Projects)	Form I-4 Model BMP Design Manual [August 31, 2015]

Project Identification

Project Name: Palisade Santee Business Park	
Permit Application Number: DR2023-02	Date: 3/29/2023

Source Control BMPs

All development projects must implement source control BMPs SC-1 through SC-6 where applicable and feasible. See Chapter 4 and Appendix E of the Model BMP Design Manual for information to implement source control BMPs shown in this checklist.

Answer each category below pursuant to the following.

- "Yes" means the project will implement the source control BMP as described in Chapter 4 and/or Appendix E of the Model BMP Design Manual. Discussion / justification is not required.
- "No" means the BMP is applicable to the project but it is not feasible to implement. Discussion / justification must be provided.
- "N/A" means the BMP is not applicable at the project site because the project does not include the feature that is addressed by the BMP (e.g., the project has no outdoor materials storage areas). Discussion / justification may be provided.

Source Control Requirement	Applied?		
SC-1 Prevention of Illicit Discharges into the MS4	☒ Yes	☐ No	☐ N/A
Discussion / justification if SC-1 not implemented:			
SC-2 Storm Drain Stenciling or Signage	☒ Yes	☐ No	☐ N/A
Discussion / justification if SC-2 not implemented:			
SC-3 Protect Outdoor Materials Storage Areas from Rainfall, Run-On, Runoff, and Wind Dispersal	☐ Yes	☐ No	☒ N/A
Discussion / justification if SC-3 not implemented: The project has no outdoor material storage areas.			
SC-4 Protect Materials Stored in Outdoor Work Areas from Rainfall, Run-On, Runoff, and Wind Dispersal	☐ Yes	☐ No	☒ N/A
Discussion / justification if SC-4 not implemented: The project has no outdoor work areas.			

Form I-4 Page 2 of 2, Form Template Date: August 31, 2015			
Source Control Requirement	**Applied?**		
SC-5 Protect Trash Storage Areas from Rainfall, Run-On, Runoff, and Wind Dispersal	☒ Yes	☐ No	☐ N/A
Discussion / justification if SC-5 not implemented:			
SC-6 Additional BMPs Based on Potential Sources of Runoff Pollutants (must answer for each source listed below)			
☐ On-site storm drain inlets	☒ Yes	☐ No	☐ N/A
☐ Interior floor drains and elevator shaft sump pumps	☐ Yes	☐ No	☒ N/A
☐ Interior parking garages	☐ Yes	☐ No	☒ N/A
☐ Need for future indoor & structural pest control	☒ Yes	☐ No	☐ N/A
☐ Landscape/Outdoor Pesticide Use	☒ Yes	☐ No	☐ N/A
☐ Pools, spas, ponds, decorative fountains, and other water features	☐ Yes	☐ No	☒ N/A
☐ Food service	☐ Yes	☐ No	☒ N/A
☐ Refuse areas	☒ Yes	☐ No	☐ N/A
☐ Industrial processes	☐ Yes	☐ No	☒ N/A
☐ Outdoor storage of equipment or materials	☐ Yes	☐ No	☒ N/A
☐ Vehicle and Equipment Cleaning	☐ Yes	☐ No	☒ N/A
☐ Vehicle/Equipment Repair and Maintenance	☐ Yes	☐ No	☒ N/A
☐ Fuel Dispensing Areas	☐ Yes	☐ No	☒ N/A
☐ Loading Docks	☒ Yes	☐ No	☐ N/A
☐ Fire Sprinkler Test Water	☒ Yes	☐ No	☐ N/A
☐ Miscellaneous Drain or Wash Water	☐ Yes	☐ No	☒ N/A
☐ Plazas, sidewalks, and parking lots	☒ Yes	☐ No	☐ N/A
Discussion / justification if SC-6 not implemented. Clearly identify which sources of runoff pollutants are discussed. Justification must be provided for <u>all</u> "No" answers shown above. Outdoor storage, vehicle cleaning, vehicle repair/maintenance and fuel dispensing is not allowed on site. There are no interior floor drains, interior parking garages, food service or industrial processes within the building. No decorative water features are associated with the project.			

Site Design BMP Checklist for All Development Projects (Standard Projects and Priority Development Projects)	Form I-5 Model BMP Design Manual [August 31, 2015]

Project Identification

Project Name: Palisade Santee Business Park

Permit Application Number: DR2023-02

Site Design BMPs

All development projects must implement site design BMPs SD-1 through SD-8 where applicable and feasible. See Chapter 4 and Appendix E of the Model BMP Design Manual for information to implement site design BMPs shown in this checklist.

Answer each category below pursuant to the following.

- "Yes" means the project will implement the site design BMP as described in Chapter 4 and/or Appendix E of the Model BMP Design Manual. Discussion / justification is not required.
- "No" means the BMP is applicable to the project but it is not feasible to implement. Discussion / justification must be provided.
- "N/A" means the BMP is not applicable at the project site because the project does not include the feature that is addressed by the BMP (e.g., the project site has no existing natural areas to conserve). Discussion / justification may be provided.

Site Design Requirement	Applied?		
SD-1 Maintain Natural Drainage Pathways and Hydrologic Features	☒ Yes	☐ No	☐ N/A
Discussion / justification if SD-1 not implemented:			
SD-2 Conserve Natural Areas, Soils, and Vegetation	☒ Yes	☐ No	☐ N/A
Discussion / justification if SD-2 not implemented:			
SD-3 Minimize Impervious Area	☒ Yes	☐ No	☐ N/A
Discussion / justification if SD-3 not implemented:			
SD-4 Minimize Soil Compaction	☒ Yes	☐ No	☐ N/A
Discussion / justification if SD-4 not implemented:			
SD-5 Impervious Area Dispersion	☐ Yes	☐ No	☒ N/A
Discussion / justification if SD-5 not implemented: Site layout and limited pervious area makes SD-5 infeasible to implement effectively.			

Form I-5 Page 2 of 2, Form Template Date: August 31, 2015			
Site Design Requirement	**Applied?**		
SD-6 Runoff Collection	☐ Yes	☐ No	☒ N/A
Discussion / justification if SD-6 not implemented: Site is implementing infiltration practices that retains stormwater on-site, therefore, there is no need to implement runoff collection.			
SD-7 Landscaping with Native or Drought Tolerant Species	☒ Yes	☐ No	☐ N/A
Discussion / justification if SD-7 not implemented:			
SD-8 Harvesting and Using Precipitation	☐ Yes	☐ No	☒ N/A
Discussion / justification if SD-8 not implemented: Site is implementing infiltration practices that retains stormwater on-site, therefore, there is no need to implement rainwater harvesting.			

Summary of PDP Structural BMPs	Form I-6 (PDPs) Model BMP Design Manual [August 31, 2015]
Project Identification	
Project Name: Palisade Santee Business Park	
Permit Application: Number DR2023-02	
PDP Structural BMPs	
All PDPs must implement structural BMPs for storm water pollutant control (see Chapter 5 of the BMP Design Manual). Selection of PDP structural BMPs for storm water pollutant control must be based on the selection process described in Chapter 5. PDPs subject to hydromodification management requirements must also implement structural BMPs for flow control for hydromodification management (see Chapter 6 of the BMP Design Manual). Both storm water pollutant control and flow control for hydromodification management can be achieved within the same structural BMP(s). PDP structural BMPs must be verified by the local jurisdiction at the completion of construction. This may include requiring the project owner or project owner's representative and engineer of record to certify construction of the structural BMPs (see Section 1.12 of the BMP Design Manual). PDP structural BMPs must be maintained into perpetuity, and the local jurisdiction must confirm the maintenance (see Section 7 of the BMP Design Manual). Use this form to provide narrative description of the general strategy for structural BMP implementation at the project site in the box below. Then complete the PDP structural BMP summary information sheet (page 3 of this form) for each structural BMP within the project (copy the BMP summary information page as many times as needed to provide summary information for each individual structural BMP).	

Describe the general strategy for structural BMP implementation at the site. This information must describe how the steps for selecting and designing storm water pollutant control BMPs presented in Section 5.1 of the BMP Design Manual were followed, and the results (type of BMPs selected). For projects requiring hydromodification flow control BMPs, indicate whether pollutant control and flow control BMPs are integrated or separate.

Based on the location, the site has an 85th percentile 24-hr storm depth of 0.50 inches (BMP Design Manual Figure B.1-1). Per DMA Exhibit in Attachment 1A, DMA A-1 is classified as self-mitigating and does not drain to the proposed structural BMP. DMA A drains to the proposed structural BMP and consists of the remainder of the project site. DMA A is approximately 5% engineered pervious surfaces not serving as a dispersion area (C=0.10), and 95% impervious surface (C=0.90). Final Adjusted Runoff Factor is 0.86. Based on the above information, a Final Design Capture Volume Tributary to BMP was calculated to be 21,684 cu ft.

Capture and Use was not considered for this project as the project does not include habitable structures over 9 stories tall. Table B.2-1 was used to analyze if infiltration would be permissible on the site. All mandatory considerations were not applicable (see below)…

Table B.2-1: Infiltration Restrictions

Restriction Element		Is Element Applicable? (Yes/No)
Mandatory Considerations	BMP is within 100' of Contaminated Soils	NO
	BMP is within 100' of Industrial Activities Lacking Source Control	NO
	BMP is within 100' of Well/Groundwater Basin	NO
	BMP is within 50' of Septic Tanks/Leach Fields	NO
	BMP is within 10' of Structures/Tanks/Walls	NO
	BMP is within 10' of Sewer Utilities	NO
	BMP is within 10' of Groundwater Table	NO
	BMP is within Hydric Soils	NO
	BMP is within Highly Liquefiable Soils and has Connectivity to Structures	NO
	BMP is within 1.5 Times the Height of Adjacent Steep Slopes (≥25%)	NO
	County Staff has Assigned "Restricted" Infiltration Category	NO
Optional Considerations	BMP is within Predominantly Type D Soil	
	BMP is within 10' of Property Line	
	BMP is within Fill Depths of ≥5' (Existing or Proposed)	
	BMP is within 10' of Underground Utilities	
	BMP is within 250' of Ephemeral Stream	
	Other (Provide detailed geotechnical support)	
Result	**Unrestricted**. None of the restriction elements above are applicable.	X
	Restricted. One or more of the restriction elements above are applicable.	

(Continue on page 2 as necessary.)

Form I-6 Page 2 of 4, Form Template Date: August 31, 2015
(Page reserved for continuation of description of general strategy for structural BMP implementation at the site)
(Continued from page 1) Infiltration testing yielded rates of 21.4 in/hr and 18.8 in/hr to the north and south of the site done by the geotechnical engineer. A factor of safety of 3.00 was applied to 18.8 in/hr equating to a design infiltration rate of 6.27 in/hr used for the project site. See factor of safety calculations in Attachment 3. Based on retention requirements, a required retention volume was calculated to be 21,467 cu ft. Automated worksheet B.3 was used to demonstrate BMP performance. As this is an underground chamber system, ponding depth was represented by the height of water stored within the chamber, and gravel thickness was represented as the 12” and 9” gravel layer both above and below the infiltration chambers. There was 0 deficit of effectively treated stormwater.

Form I-6 Page 3 of 4 (Copy as many as needed) , Form Template Date: August 31, 2015	
Structural BMP Summary Information **(Copy this page as needed to provide information for each individual proposed structural BMP)**	
Structural BMP ID No. INF-A	
Construction Plan Sheet No. Conceptual Utility Plan	
Type of structural BMP: ☐ Retention by harvest and use (HU-1) ☒ Retention by infiltration basin (INF-1) ☐ Retention by bioretention (INF-2) ☐ Retention by permeable pavement (INF-3) ☐ Partial retention by biofiltration with partial retention (PR-1) ☐ Biofiltration (BF-1) ☐ Biofiltration with Nutrient Sensitive Media Design (BF-2) ☐ Proprietary Biofiltration (BF-3) meeting all requirements of Appendix F ☐ Flow-thru treatment control with prior lawful approval to meet earlier PDP requirements (provide BMP type/description in discussion section below) ☐ Flow-thru treatment control included as pre-treatment/forebay for an onsite retention or biofiltration BMP (provide BMP type/description and indicate which onsite retention or biofiltration BMP it serves in discussion section below) ☐ Flow-thru treatment control with alternative compliance (provide BMP type/description in discussion section below) ☐ Detention pond or vault for hydromodification management ☐ Other (describe in discussion section below)	
Purpose: ☒ Pollutant control only ☐ Hydromodification control only ☐ Combined pollutant control and hydromodification control ☐ Pre-treatment/forebay for another structural BMP ☐ Other (describe in discussion section below)	
Who will certify construction of this BMP? Provide name and contact information for the party responsible to sign BMP verification forms if required by the [City Engineer] (See Section 1.12 of the BMP Design Manual)	Matthew Hellesen R.C.E. 87299 Exp. 9/30/25 Senior Project Manager DRC Engineering, Inc. 160 South Old Springs Road, Suite 210 Anaheim Hills, CA 92808 Phone: (714) 685-6860 x364 Email: mhellesen@drc.eng.com

Who will be the final owner of this BMP?	Brian Wong SVP, Development North Palisade Partners, LLC 1330 Factory Place, Suite 105 Los Angeles, CA 90013 Phone: (310) 242-1612 Email: brian.wong@northpalisade.com
Who will maintain this BMP into perpetuity?	Brian Wong SVP, Development North Palisade Partners, LLC 1330 Factory Place, Suite 105 Los Angeles, CA 90013 Phone: (310) 242-1612 Email: brian.wong@northpalisade.com
What is the funding mechanism for maintenance?	Private funding from owner.

ATTACHMENT 1
BACKUP FOR PDP POLLUTANT CONTROL BMPS

This is the cover sheet for Attachment 1.

Indicate which Items are Included behind this cover sheet:

Attachment Sequence	Contents	Checklist
Attachment 1a	DMA Exhibit (Required) See DMA Exhibit Checklist on the back of this Attachment cover sheet.	☒ Included
Attachment 1b	Tabular Summary of DMAs Showing DMA ID matching DMA Exhibit, DMA Area, and DMA Type (Required)* *Provide table in this Attachment OR on DMA Exhibit in Attachment 1a	☒ Included on DMA Exhibit in Attachment 1a ☐ Included as Attachment 1b, separate from DMA Exhibit
Attachment 1c	Form I-7, Harvest and Use Feasibility Screening Checklist (Required unless the entire project will use infiltration BMPs) Refer to Appendix B.3-1 of the BMP Design Manual to complete Form I-7.	☐ Included ☒ Not included because the entire project will use infiltration BMPs
Attachment 1d	Form I-8, Categorization of Infiltration Feasibility Condition (Required unless the project will use harvest and use BMPs) Refer to Appendices C and D of the BMP Design Manual to complete Form I-8.	☒ Included ☐ Not included because the entire project will use harvest and use BMPs
Attachment 1e	Pollutant Control BMP Design Worksheets / Calculations (Required) Refer to Appendices B and E of the BMP Design Manual for structural pollutant control BMP design guidelines	☒ Included

ATTACHMENT 1A

Use this checklist to ensure the required information has been included on the DMA Exhibit:

The DMA Exhibit must identify:

☒ Underlying hydrologic soil group

☒ Approximate depth to groundwater

☒ Existing natural hydrologic features (watercourses, seeps, springs, wetlands)

☐ Critical coarse sediment yield areas to be protected **(N/A)**

☒ Existing topography and impervious areas

☒ Existing and proposed site drainage network and connections to drainage offsite

☒ Proposed demolition

☒ Proposed grading

☒ Proposed impervious features

☒ Proposed design features and surface treatments used to minimize imperviousness

☒ Drainage management area (DMA) boundaries, DMA ID numbers, and DMA areas (square footage or acreage), and DMA type (i.e., drains to BMP, self-retaining, or self-mitigating)

☒ Potential pollutant source areas and corresponding required source controls (see Chapter 4, Appendix E.1, and Form I-3B)

☒ Structural BMPs (identify location, type of BMP, and size/detail)

ATTACHMENT 1D

Categorization of Infiltration Feasibility Condition	Form I-8

Part 1 - Full Infiltration Feasibility Screening Criteria

Would infiltration of the full design volume be feasible from a physical perspective without any undesirable consequences that cannot be reasonably mitigated?

Criteria	Screening Question	Yes	No
1	**Is the estimated reliable infiltration rate below proposed facility locations greater than 0.5 inches per hour?** The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.2 and Appendix D.	X	

Provide basis:

Infiltration tests were performed in accordance with the County of San Diego BMP Design Manual Appendix D - Geotechnical Engineer Analysis dated September 15, 2020 with field infiltration rates calculated using the Porchet Method (aka Inverse Borehole Method). The infiltration holes were carefully filled with clean water and refilled after two initial readings.

Two borings were done on the north and south of the site at 5' and 10' respectively. Infiltration rates were recorded at 21.4 in/hr and 18.8 in/hr with no factor of safety applied. A factor of safety of 3.00 was calculated to be applied to the lowest reading of 18.8 in/hr, yielding a design infiltration rate of 6.27.

Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.

2	**Can infiltration greater than 0.5 inches per hour be allowed without increasing risk of geotechnical hazards (slope stability, groundwater mounding, utilities, or other factors) that cannot be mitigated to an acceptable level?** The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.2.	X	

Provide basis:

It is recommended that foundations shall be setback a minimum distance of 10 feet from the drainage disposal system and the bottom of footing shall be a minimum of 10 feet from the expected zone of saturation. The boundary of the zone of saturation may be assumed to project downwared from the top of the permeable portion of the disposal system at an inclination of 1 to 1 or flatter, as determined by the geotechnical engineer. The analysis for liquefaction indicates the potential for liquefaction at this site is low based upon a historic groundwater depth and peak ground acceleration of 0.417.

Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.

Form I-8 Page 2 of 4			
Criteria	Screening Question	**Yes**	**No**
3	**Can infiltration greater than 0.5 inches per hour be allowed without increasing risk of groundwater contamination (shallow water table, storm water pollutants or other factors) that cannot be mitigated to an acceptable level?** The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.3.	X	
Provide basis: Groundwater was encountered at a depth of 23 and 24 feet below the ground surface. A nearby groundwater monitoring well located approximately 1.5 miles to the northeast from the subject site noted a groundwater depth ranging between 18 and 22 feet below the ground surface which is deeper than the minimum requirement of 10' below the base of an infiltration system per City of Santee BMP Design Manual. Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
4	**Can infiltration greater than 0.5 inches per hour be allowed without causing potential water balance issues such as change of seasonality of ephemeral streams or increased discharge of contaminated groundwater to surface waters?** The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.3.	X	
Provide basis: Groundwater was encountered at a depth of 23 and 24 feet below the ground surface. A nearby groundwater monitoring well located approximately 1.5 miles to the northeast from the subject site noted a groundwater depth ranging between 18 and 22 feet below the ground surface which is deeper than the minimum requirement of 10' below the base of an infiltration system per City of Santee BMP Design Manual. No ephemeral streams located on-site. Amount of infiltration is negligible to impact flow within the San Diego River. Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability.			
Part 1 Result *	If all answers to rows 1 - 4 are "**Yes**" a full infiltration design is potentially feasible. The feasibility screening category is **Full Infiltration** If any answer from row 1-4 is "**No**", infiltration may be possible to some extent but would not generally be feasible or desirable to achieve a "full infiltration" design. Proceed to Part 2	Full Infiltration	

*To be completed using gathered site information and best professional judgment considering the definition of MEP in the MS4 Permit. Additional testing and/or studies may be required by Agency/Jurisdictions to substantiate findings

Form I-8 Page 3 of 4

Part 2 – Partial Infiltration vs. No Infiltration Feasibility Screening Criteria

Would infiltration of water in any appreciable amount be physically feasible without any negative consequences that cannot be reasonably mitigated?

Criteria	Screening Question	Yes	No
5	**Do soil and geologic conditions allow for infiltration in any appreciable rate or volume?** The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.2 and Appendix D.		

Provide basis:

Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability and why it was not feasible to mitigate low infiltration rates.

6	**Can Infiltration in any appreciable quantity be allowed without increasing risk of geotechnical hazards (slope stability, groundwater mounding, utilities, or other factors) that cannot be mitigated to an acceptable level**? The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.2.		

Provide basis:

Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability and why it was not feasible to mitigate low infiltration rates.

Form I-8 Page 4 of 4			
Criteria	Screening Question	**Yes**	**No**
7	**Can Infiltration in any appreciable quantity be allowed without posing significant risk for groundwater related concerns (shallow water table, storm water pollutants or other factors)?** The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.3.		
Provide basis: Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability and why it was not feasible to mitigate low infiltration rates.			
8	**Can infiltration be allowed without violating downstream water rights**? The response to this Screening Question shall be based on a comprehensive evaluation of the factors presented in Appendix C.3.		
Provide basis: Summarize findings of studies; provide reference to studies, calculations, maps, data sources, etc. Provide narrative discussion of study/data source applicability and why it was not feasible to mitigate low infiltration rates.			
Part 2 Result*	If all answers from row 1-4 are yes then partial infiltration design is potentially feasible. The feasibility screening category is **Partial Infiltration.** If any answer from row 5-8 is no, then infiltration of any volume is considered to be **infeasible** within the drainage area. The feasibility screening category is **No Infiltration.**		

*To be completed using gathered site information and best professional judgment considering the definition of MEP in the MS4 Permit. Additional testing and/or studies may be required by Agency/Jurisdictions to substantiate findings

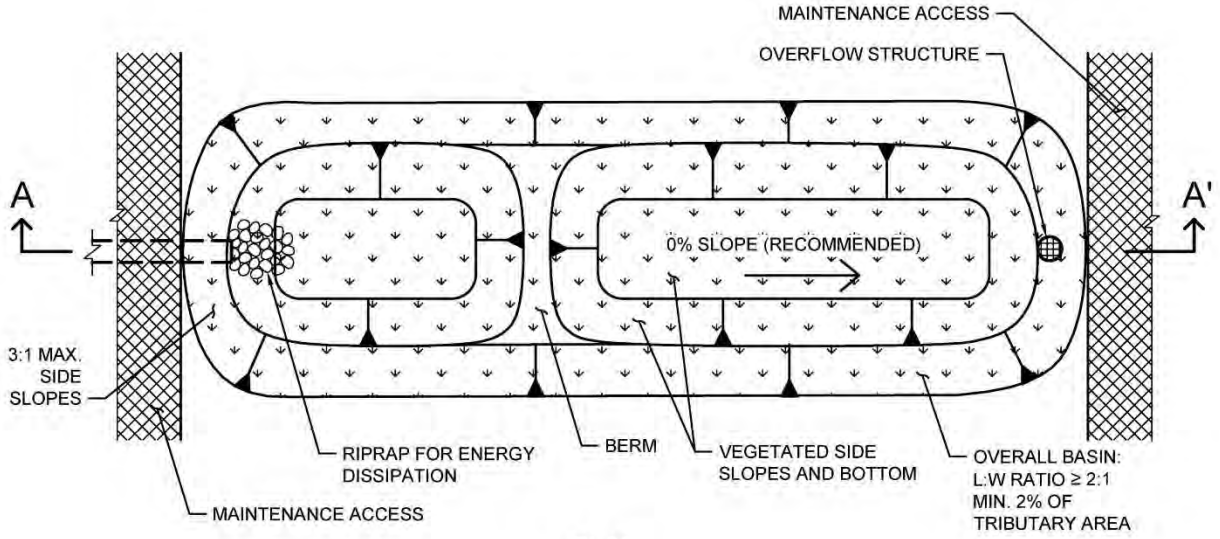
Description

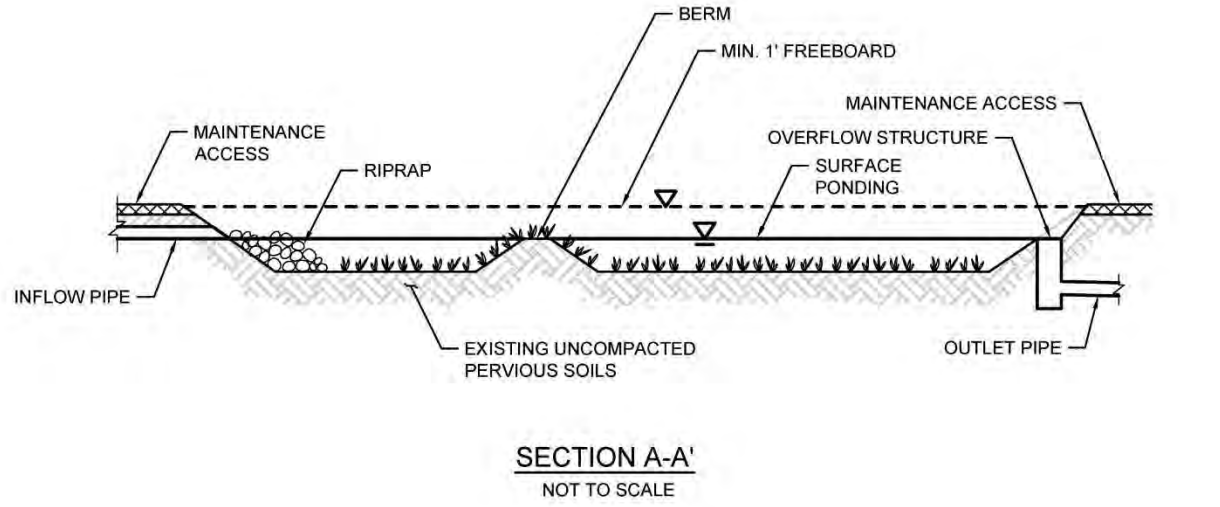
An infiltration basin typically consists of an earthen basin with a flat bottom constructed in naturally pervious soils. An infiltration basin retains storm water and allows it to evaporate and/or percolate into the underlying soils. The bottom of an infiltration basin is typically vegetated with native grasses or turf grass; however other types of vegetation can be used if they can survive periodic inundation and long inter-event dry periods. Treatment is achieved primarily through infiltration, filtration, sedimentation, biochemical processes and plant uptake. Infiltration basins can be constructed as linear **trenches** or as **underground infiltration galleries**.

Typical infiltration basin components include:

- Inflow distribution mechanisms (e.g., perimeter flow spreader or filter strips)
- Energy dissipation mechanism for concentrated inflows (e.g., splash blocks or riprap)
- Forebay to provide pretreatment surface ponding for captured flows
- Vegetation selected based on basin use, climate, and ponding depth
-

- Uncompacted native soils at the bottom of the facility
- Overflow structure





Typical plan and section view of an Infiltration BMP

Design Adaptations for Project Goals

Full infiltration BMP for storm water pollutant control. Infiltration basins can be used as a pollutant control BMP, designed to infiltrate runoff from direct rainfall as well as runoff from adjacent areas that are tributary to the BMP. Infiltration basins must be designed with an infiltration storage volume (a function of the surface ponding volume) equal to the full DCV and able to meet drawdown time limitations.

Integrated storm water flow control and pollutant control configuration. Infiltration basins can also be designed for flow rate and duration control by providing additional infiltration storage through increasing the surface ponding volume.

Design Criteria and Considerations

Infiltration basins must meet the following design criteria. Deviations from the below criteria may be approved at the discretion of the City Engineer if it is determined to be appropriate:

	Siting and Design	***Intent/Rationale***
☐	Placement observes geotechnical recommendations regarding potential hazards (e.g., slope stability, landslides, liquefaction zones) and setbacks (e.g., slopes, foundations, utilities).	Must not negatively impact existing site geotechnical concerns.
☐	Selection and design of basin is based on infiltration feasibility criteria and appropriate design infiltration rate (See Appendix C and D).	Must operate as a full infiltration design and must be supported by drainage area and in-situ infiltration rate feasibility findings.
☐	Finish grade of the facility is ≤ 2% (0% recommended).	Flatter surfaces reduce erosion and channelization with the facility.
☐	Settling forebay has a volume ≥ 25% of facility volume below the forebay overflow.	A forebay to trap sediment can decrease frequency of required maintenance.
☐	Infiltration of surface ponding is limited to a 36-hour drawdown time.	Prolonged surface ponding reduce volume available to capture subsequent storms. The applicant has an option to use a different drawdown time up to 96 hours if the volume of the facility is adjusted using the percent capture method in Appendix B.4.2.
☐	Minimum freeboard provided is ≥1 foot.	Freeboard minimizes risk of uncontrolled surface discharge.

Siting and Design		*Intent/Rationale*
☐	Side slopes are = 3H:1V or shallower.	Gentler side slopes are safer, less prone to erosion, able to establish vegetation more quickly and easier to maintain.
Inflow and Overflow Structures		
☐	Inflow and outflow structures are accessible by required equipment (e.g., vactor truck) for inspection and maintenance.	Maintenance will prevent clogging and ensure proper operation of the flow control structures.
☐	Inflow velocities are limited to 3 ft/s or less or use energy dissipation methods (e.g., riprap, level spreader) for concentrated inflows.	High inflow velocities can cause erosion, scour and/or channeling.
☐	Overflow is safely conveyed to a downstream storm drain system or discharge point. Size overflow structure to pass 100-year peak flow for on-line basins and water quality peak flow for off-line basins.	Planning for overflow lessens the risk of property damage due to flooding.

Conceptual Design and Sizing Approach for Storm Water Pollutant Control

To design infiltration basins for storm water pollutant control only (no flow control required), the following steps should be taken:

1. Verify that siting and design criteria have been met, including placement and basin area requirements, forebay volume, and maximum slopes for basin sides and bottom.
2. Calculate the DCV per Appendix B based on expected site design runoff for tributary areas.
3. Use the sizing worksheet (Appendix B.4) to determine if full infiltration of the DCV is achievable based on the infiltration storage volume calculated from the surface ponding area and depth for a maximum 36-hour drawdown time. The drawdown time can be estimated by dividing the average depth of the basin by the design infiltration rate. Appendix D provides guidance on evaluating a site's infiltration rate.

Conceptual Design and Sizing Approach for Storm Water Pollutant Treatment and Flow Control

Control of flow rates and/or durations will typically require significant surface ponding volume, and therefore the following steps should be taken prior to determination of storm water pollutant control design. Pre-development and allowable post-project flow rates and durations should be determined as discussed in Chapter 6 of the manual.

1. Verify that siting and design criteria have been met, including placement and basin area requirements, forebay volume, and maximum slopes for basin sides and bottom.
2. Iteratively determine the surface ponding required to provide infiltration storage to reduce flow rates and durations to allowable limits while adhering to the maximum 36-hour drawdown time. Flow rates and durations can be controlled using flow splitters that route the appropriate inflow amounts to the infiltration basin and bypass excess flows to the downstream storm drain system or discharge point.
3. If an infiltration basin cannot fully provide the flow rate and duration control required by this manual, an upstream or downstream structure with appropriate storage volume such as an underground vault can be used to provide additional control.
4. After the infiltration basin has been designed to meet flow control requirements, calculations must be completed to verify if storm water pollutant control requirements to treat the DCV have been met.

Automated Worksheet B.1: Calculation of Design Capture Volume (V2.0)

Figure B.1-1: 85th Percentile 24-hour Isopluvial Map

Factor of Safety and Design Infiltration Rate Worksheet			Worksheet D.5-1: Form I-9		
Factor Category		Factor Description	Assigned Weight (w)	Factor Value (v)	Product (p) p = w x v
A	Suitability Assessment	Soil assessment methods	0.25	3	0.75
		Predominant soil texture	0.25	1	0.25
		Site soil variability	0.25	1	0.25
		Depth to groundwater / impervious layer	0.25	1	0.25
		Suitability Assessment Safety Factor, $S_A = \Sigma p$			1.50
B	Design	Level of pretreatment/ expected sediment loads	0.5	2	1.00
		Redundancy/resiliency	0.25	2	0.50
		Compaction during construction	0.25	2	0.50
		Design Safety Factor, $S_B = \Sigma p$			2.00
Combined Safety Factor, $S_{total} = S_A \times S_B$ [Minimum of 2 and Maximum of 9]					3.00
Observed Infiltration Rate, inch/hr., $K_{observed}$ (corrected for test-specific bias) Note: This worksheet is only applicable when the observed infiltration rate is greater than or equal to 1 inch/hr.					18.8
Design Infiltration Rate, in/hr., $K_{design} = K_{observed} / S_{total}$ Note: If the estimated design infiltration rate is less than or equal to 0.5 inch/hr. then the applicant may choose to implement partial infiltration BMPs.					6.27

Supporting Data

Briefly describe infiltration test and provide reference to test forms:

Infiltration Tests were performed in accordance with the County of San Diego BMP Design Manual Appendix D - Geotechnical Engineer Analysis dated September 15, 2020 with field infiltration rates calculated using the Porchet Method (aka Inverse Borehole Method). A truck mounted Simco 2800 Drill Rig equipped with a hollow stem auger was used to excavate the exploratory borings to depths of 5' and 10' below existing ground suface. The borings consisted of six-inch diameter test holes. A three-inch diameter perforated PVC casing with solid end cap was installed in the borings and then surrounded with gravel materials to prevent caving. Percolation data can be found in Attachment 1.E.

Note: Worksheet D.5-1: Form I-9 is only applicable to design BMPs in "full infiltration condition". This form is not applicable for categorization of infiltration feasibility (Worksheet C.4-1: Form I-8) and/or for designing BMPs in "partial infiltration condition" or "no infiltration condition".

NOT APPLICABLE

ATTACHMENT 2
BACKUP FOR PDP HYDROMODIFICATION CONTROL MEASURES

This is the cover sheet for Attachment 2.

☐ Mark this box if this attachment is empty because the project is exempt from PDP hydromodification management requirements.

Indicate which Items are Included behind this cover sheet:

Attachment Sequence	Contents	Checklist
Attachment 2a	Hydromodification Management Exhibit (Required)	☐ Included See Hydromodification Management Exhibit Checklist on the back of this Attachment cover sheet.
Attachment 2b	Management of Critical Coarse Sediment Yield Areas (WMAA Exhibit is required, additional analyses are optional) See Section 6.2 of the BMP Design Manual.	☐ Exhibit showing project drainage boundaries marked on WMAA Critical Coarse Sediment Yield Area Map (Required) Optional analyses for Critical Coarse Sediment Yield Area Determination ☐ 6.2.1 Verification of Geomorphic Landscape Units Onsite ☐ 6.2.2 Downstream Systems Sensitivity to Coarse Sediment ☐ 6.2.3 Optional Additional Analysis of Potential Critical Coarse Sediment Yield Areas Onsite
Attachment 2c	Geomorphic Assessment of Receiving Channels (Optional) See Section 6.3.4 of the BMP Design Manual.	☐ Not performed ☐ Included ☐ Submitted as separate stand-alone document
Attachment 2d	Flow Control Facility Design, including Structural BMP Drawdown Calculations and Overflow Design Summary (Required) See Chapter 6 and Appendix G of the BMP Design Manual	☐ Included ☐ Submitted as separate stand-alone document
Attachment 2e	Vector Control Plan (Required when structural BMPs will not drain in 96 hours)	☐ Included ☐ Not required because BMPs will drain in less than 96 hours

Use this checklist to ensure the required information has been included on the Hydromodification Management Exhibit:

The Hydromodification Management Exhibit must identify:

- ☐ Underlying hydrologic soil group
- ☐ Approximate depth to groundwater
- ☐ Existing natural hydrologic features (watercourses, seeps, springs, wetlands)
- ☐ Critical coarse sediment yield areas to be protected
- ☐ Existing topography
- ☐ Existing and proposed site drainage network and connections to drainage offsite
- ☐ Proposed grading
- ☐ Proposed impervious features
- ☐ Proposed design features and surface treatments used to minimize imperviousness
- ☐ Point(s) of Compliance (POC) for Hydromodification Management
- ☐ Existing and proposed drainage boundary and drainage area to each POC (when necessary, create separate exhibits for pre-development and post-project conditions)
- ☐ Structural BMPs for hydromodification management (identify location, type of BMP, and size/detail)

ATTACHMENT 3
Structural BMP Maintenance Information

This is the cover sheet for Attachment 3.

Indicate which Items are Included behind this cover sheet:

Attachment Sequence	Contents	Checklist
Attachment 3a	Structural BMP Maintenance Thresholds and Actions (Required)	☐ Included See Structural BMP Maintenance Information Checklist on the back of this Attachment cover sheet.
Attachment 3b	Draft Maintenance Agreement (when applicable)	☐ Included ☐ Not Applicable

Use this checklist to ensure the required information has been included in the Structural BMP Maintenance Information Attachment:

☐ **Preliminary Design / Planning / CEQA level submittal:**

Attachment 3a must identify:

- ☐ Typical maintenance indicators and actions for proposed structural BMP(s) based on Section 7.7 of the BMP Design Manual

Attachment 3b is not required for preliminary design / planning / CEQA level submittal.

☐ **Final Design level submittal:**

Attachment 3a must identify:

- ☐ Specific maintenance indicators and actions for proposed structural BMP(s). This shall be based on Section 7.7 of the BMP Design Manual and enhanced to reflect actual proposed components of the structural BMP(s)
- ☐ How to access the structural BMP(s) to inspect and perform maintenance
- ☐ Features that are provided to facilitate inspection (e.g., observation ports, cleanouts, silt posts, or other features that allow the inspector to view necessary components of the structural BMP and compare to maintenance thresholds)
- ☐ Manufacturer and part number for proprietary parts of structural BMP(s) when applicable
- ☐ Maintenance thresholds specific to the structural BMP(s), with a location-specific frame of reference (e.g., level of accumulated materials that triggers removal of the materials, to be identified based on viewing marks on silt posts or measured with a survey rod with respect to a fixed benchmark within the BMP)
- ☐ Recommended equipment to perform maintenance
- ☐ When applicable, necessary special training or certification requirements for inspection and maintenance personnel such as confined space entry or hazardous waste management

Attachment 3b: For private entity operation and maintenance, Attachment 3b shall include a draft maintenance agreement in the local jurisdiction's standard format (PDP applicant to contact the [City Engineer] to obtain the current maintenance agreement forms).

Isolator® Row
O&M Manual

ADS StormTech™

The Isolator® Row

Introduction

An important component of any Stormwater Pollution Prevention Plan is inspection and maintenance. The StormTech Isolator Row is a technique to inexpensively enhance Total Suspended Solids (TSS) and Total Phosphorus (TP) removal with easy access for inspection and maintenance.

The Isolator Row

The Isolator Row is a row of StormTech chambers, either SC-160, SC-310, SC-310-3, SC-740, DC-780, MC-3500 or MC-7200 models, that is surrounded with filter fabric and connected to a closely located manhole for easy access. The fabric-wrapped chambers provide for sediment settling and filtration as stormwater rises in the Isolator Row and passes through the filter fabric. The open bottom chambers and perforated sidewalls (SC-310, SC- 310-3 and SC-740 models) allow stormwater to flow both vertically and horizontally out of the chambers. Sediments are captured in the Isolator Row protecting the adjacent stone and chambers storage areas from sediment accumulation.

ADS geotextile fabric is placed between the stone and the Isolator Row chambers. The woven geotextile provides a media for stormwater filtration, a durable surface for maintenance, prevents scour of the underlying stone and remains intact during high pressure jetting. A non-woven fabric is placed over the chambers to provide a filter media for flows passing through the chamber's sidewall. The non-woven fabric is not required over the SC-160, DC-780, MC-3500 or MC-7200 models as these chambers do not have perforated side walls.

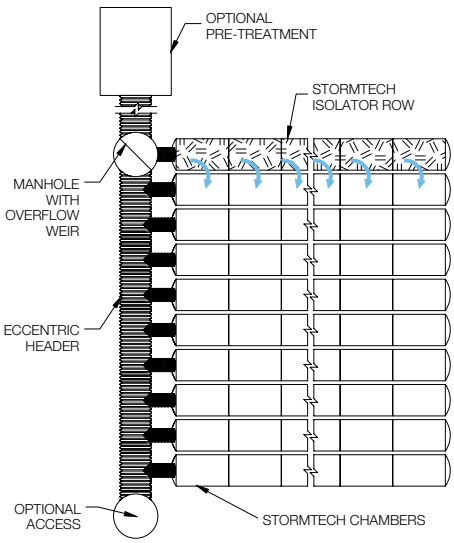
The Isolator Row is designed to capture the "first flush" runoff and offers the versatility to be sized on a volume basis or a flow-rate basis. An upstream manhole provides access to the Isolator Row and includes a high/low concept such that stormwater flow rates or volumes that exceed the capacity of the Isolator Row bypass through a manifold to the other chambers. This is achieved with an elevated bypass manifold or a high-flow weir. This creates a differential between the Isolator Row row of chambers and the manifold to the rest of the system, thus allowing for settlement time in the Isolator Row. After Stormwater flows through the Isolator Row and into the rest of the chamber system it is either exfiltrated into the soils below or passed at a controlled rate through an outlet manifold and outlet control structure.

The Isolator Row may be part of a treatment train system. The treatment train design and pretreatment device selection by the design engineer is often driven by regulatory requirements. Whether pretreatment is used or not, StormTech recommend using the Isolator Row to minimize maintenance requirements and maintenance costs.

Note: *See the StormTech Design Manual for detailed information on designing inlets for a StormTech system, including the Isolator Row.*

Looking down the Isolator Row from the manhole opening, woven geotextile Fabric is shown between the chamber and stone base.

StormTech Isolator Row with Overflow Spillway (*not to scale*)



Isolator Row Inspection/Maintenance

Inspection

The frequency of inspection and maintenance varies by location. A routine inspection schedule needs to be established for each individual location based upon site specific variables. The type of land use (i.e. industrial, commercial, residential), anticipated pollutant load, percent imperviousness, climate, etc. all play a critical role in determining the **actual frequency of inspection and maintenance practices.**

At a minimum, StormTech recommends annual inspections. Initially, the Isolator Row should be inspected every 6 months for the first year of operation. For subsequent years, the inspection should be adjusted based upon previous observation of sediment deposition.

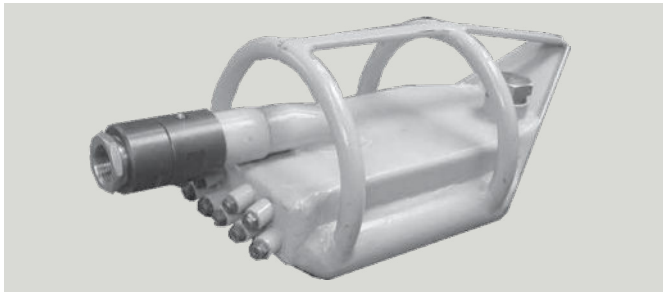
The Isolator Row incorporates a combination of standard manhole(s) and strategically located inspection ports (as needed). The inspection ports allow for easy access to the system from the surface, eliminating the need to perform a confined space entry for inspection purposes.

If upon visual inspection it is found that sediment has accumulated, a stadia rod should be inserted to determine the depth of sediment. When the average depth of sediment exceeds 3 inches throughout the length of the Isolator Row, clean-out should be performed.

Maintenance

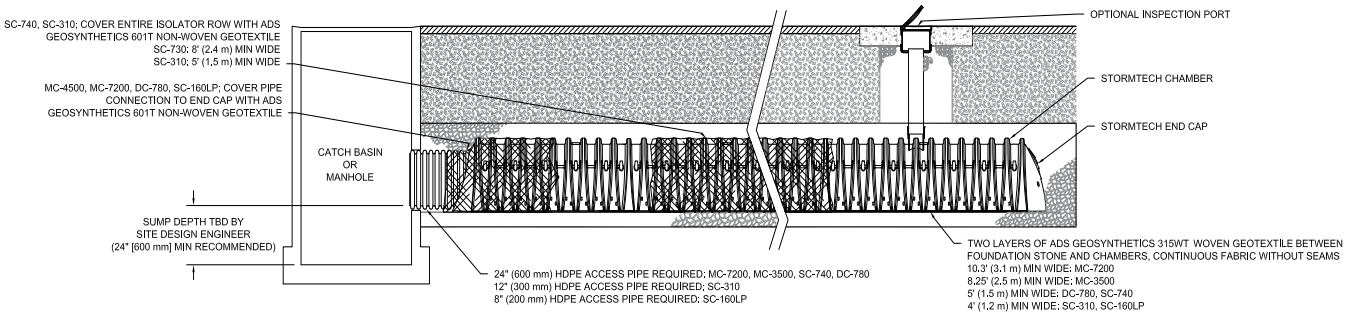
The Isolator Row was designed to reduce the cost of periodic maintenance. By “isolating” sediments to just one row, costs are dramatically reduced by eliminating the need to clean out each row of the entire storage bed. If inspection indicates the potential need for maintenance, access is provided via a manhole(s) located on the end(s) of the row for cleanout. If entry into the manhole is required, please follow local and OSHA rules for a confined space entries.

Maintenance is accomplished with the JetVac process. The JetVac process utilizes a high pressure water nozzle to propel itself down the Isolator Row while scouring and suspending sediments. As the nozzle is retrieved, the captured pollutants are flushed back into the manhole for vacuuming. Most sewer and pipe maintenance companies have vacuum/JetVac combination vehicles. Selection of an appropriate JetVac nozzle will improve maintenance efficiency. Fixed nozzles designed for culverts or large diameter pipe cleaning are preferable. Rear facing jets with an effective spread of at least 45” are best. JetVac reels can vary in length. For ease of maintenance, ADS recommends Isolator Row lengths up to 200" (61 m). **The JetVac process shall only be performed on StormTech Isolator Rows that have AASHTO class 1 woven geotextile (as specified by StormTech) over their angular base stone.**



StormTech Isolator Row (not to scale)

Note: *Non-woven fabric is only required over the inlet pipe connection into the end cap for SC-160LP, DC-780, MC-3500 and MC-7200 chamber models and is not required over the entire Isolator Row.*



Isolator Row Step By Step Maintenance Procedures

Step 1

Inspect Isolator Row for sediment.

A) Inspection ports (if present)
   i. Remove lid from floor box frame
   ii. Remove cap from inspection riser
   iii. Using a flashlight and stadia rod,measure depth of sediment and record results on maintenance log.
   iv. If sediment is at or above 3 inch depth, proceed to Step 2. If not, proceed to Step 3.

B) All Isolator Row
   i. Remove cover from manhole at upstream end of Isolator Row
   ii. Using a flashlight, inspect down Isolator Row through outlet pipe
      1. Mirrors on poles or cameras may be used to avoid a confined space entry
      2. Follow OSHA regulations for confined space entry if entering manhole
   iii. If sediment is at or above the lower row of sidewall holes (approximately 3 inches), proceed to Step 2. If not, proceed to Step 3.

Step 2

Clean out Isolator Row using the JetVac process.

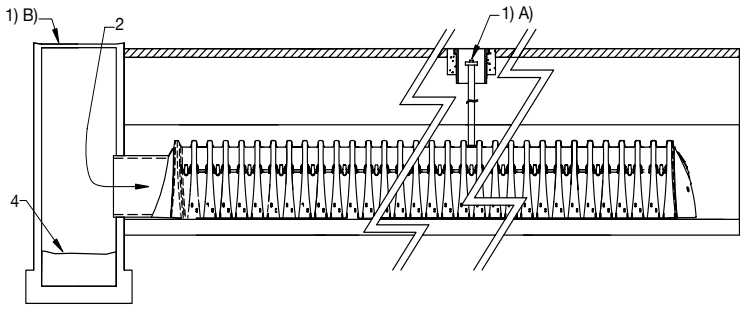
A) A fixed floor cleaning nozzle with rear facing nozzle spread of 45 inches or more is preferable
B) Apply multiple passes of JetVac until backflush water is clean
C) Vacuum manhole sump as required

Step 3

Replace all caps, lids and covers, record observations and actions.

Step 4

Inspect & clean catch basins and manholes upstream of the StormTech system.



Sample Maintenance Log

Date	Stadia Rod Readings		Sediment Depth (1)–(2)	Observations/Actions	Inspector
	Fixed point to chamber bottom (1)	Fixed point to top of sediment (2)

CATCH BASIN INSERT FILTER

Inspection and Maintenance Guide

DRAINAGE PROTECTION SYSTEMS
DPS
A division of
Oldcastle Infrastructure

Water

SCOPE:

Federal, State and Local Clean Water Act regulations and those of insurance carriers require that stormwater filtration systems be maintained and serviced on a recurring basis. The intent of the regulations is to ensure that the systems, on a continuing basis, efficiently remove pollutants from stormwater runoff thereby preventing pollution of the nation's water resources. These specifications apply to the FloGard+Plus® Catch Basin Insert Filter.

RECOMMENDED FREQUENCY OF SERVICE:

Drainage Protection Systems (DPS) recommends that installed FloGard+Plus Catch Basin Insert Filters be serviced on a recurring basis. Ultimately, the frequency depends on the amount of runoff, pollutant loading and interference from debris (leaves, vegetation, cans, paper, etc.); however, it is recommended that each installation be serviced a minimum of three times per year, with a change of filter medium once per year. DPS technicians are available to do an on-site evaluation, upon request.

RECOMMENDED TIMING OF SERVICE:

DPS guidelines for the timing of service are as follows:

1. For areas with a definite rainy season: Prior to, during and following the rainy season.
2. For areas subject to year-round rainfall: On a recurring basis (at least three times per year).
3. For areas with winter snow and summer rain: Prior to and just after the snow season and during the summer rain season.
4. For installed devices not subject to the elements (wash racks, parking garages, etc.): On a recurring basis (no less than three times per year).

SERVICE PROCEDURES:

1. The catch basin grate shall be removed and set to one side. The catch basin shall be visually inspected for defects and possible illegal dumping. If illegal dumping has occurred, the proper authorities and property owner representative shall be notified as soon as practicable.
2. Using an industrial vacuum, the collected materials shall be removed from the liner. (Note: DPS uses a truck-mounted vacuum for servicing FloGard+Plus catch basin inserts).
3. When all of the collected materials have been removed, the filter medium pouches shall be removed by unsnapping the tether from the D-ring and set to one side. The filter liner, gaskets, stainless steel frame and mounting brackets, etc., shall be inspected for continued serviceability. Minor damage or defects found shall be corrected on-the-spot and a notation made on the Maintenance Record. More extensive deficiencies that affect the efficiency of the filter (torn liner, etc.), if approved by the customer representative, will be corrected and an invoice submitted to the representative along with the Maintenance Record.
4. The filter medium pouches shall be inspected for defects and continued serviceability and replaced as necessary, and the pouch tethers re-attached to the liner's D-ring.
5. The grate shall be replaced.

REPLACEMENT AND DISPOSAL OF EXPOSED FILTER MEDIUM AND COLLECTED DEBRIS

The frequency of filter medium exchange will be in accordance with the existing DPS-Customer Maintenance Contract. DPS recommends that the medium be changed at least once per year. During the appropriate service, or if so determined by the service technician during a non-scheduled service, the filter medium will be replaced with new material. Once the exposed pouches and debris have been removed, DPS has possession and must dispose of it in accordance with local, state and federal agency requirements.

DPS also has the capability of servicing all manner of storm drain filters, catch basin inserts and catch basins without inserts, underground oil/water separators, stormwater interceptors and other such devices. All DPS personnel are highly qualified technicians and are confined-space trained and certified. Call us at (888) 950-8826 for further information and assistance.

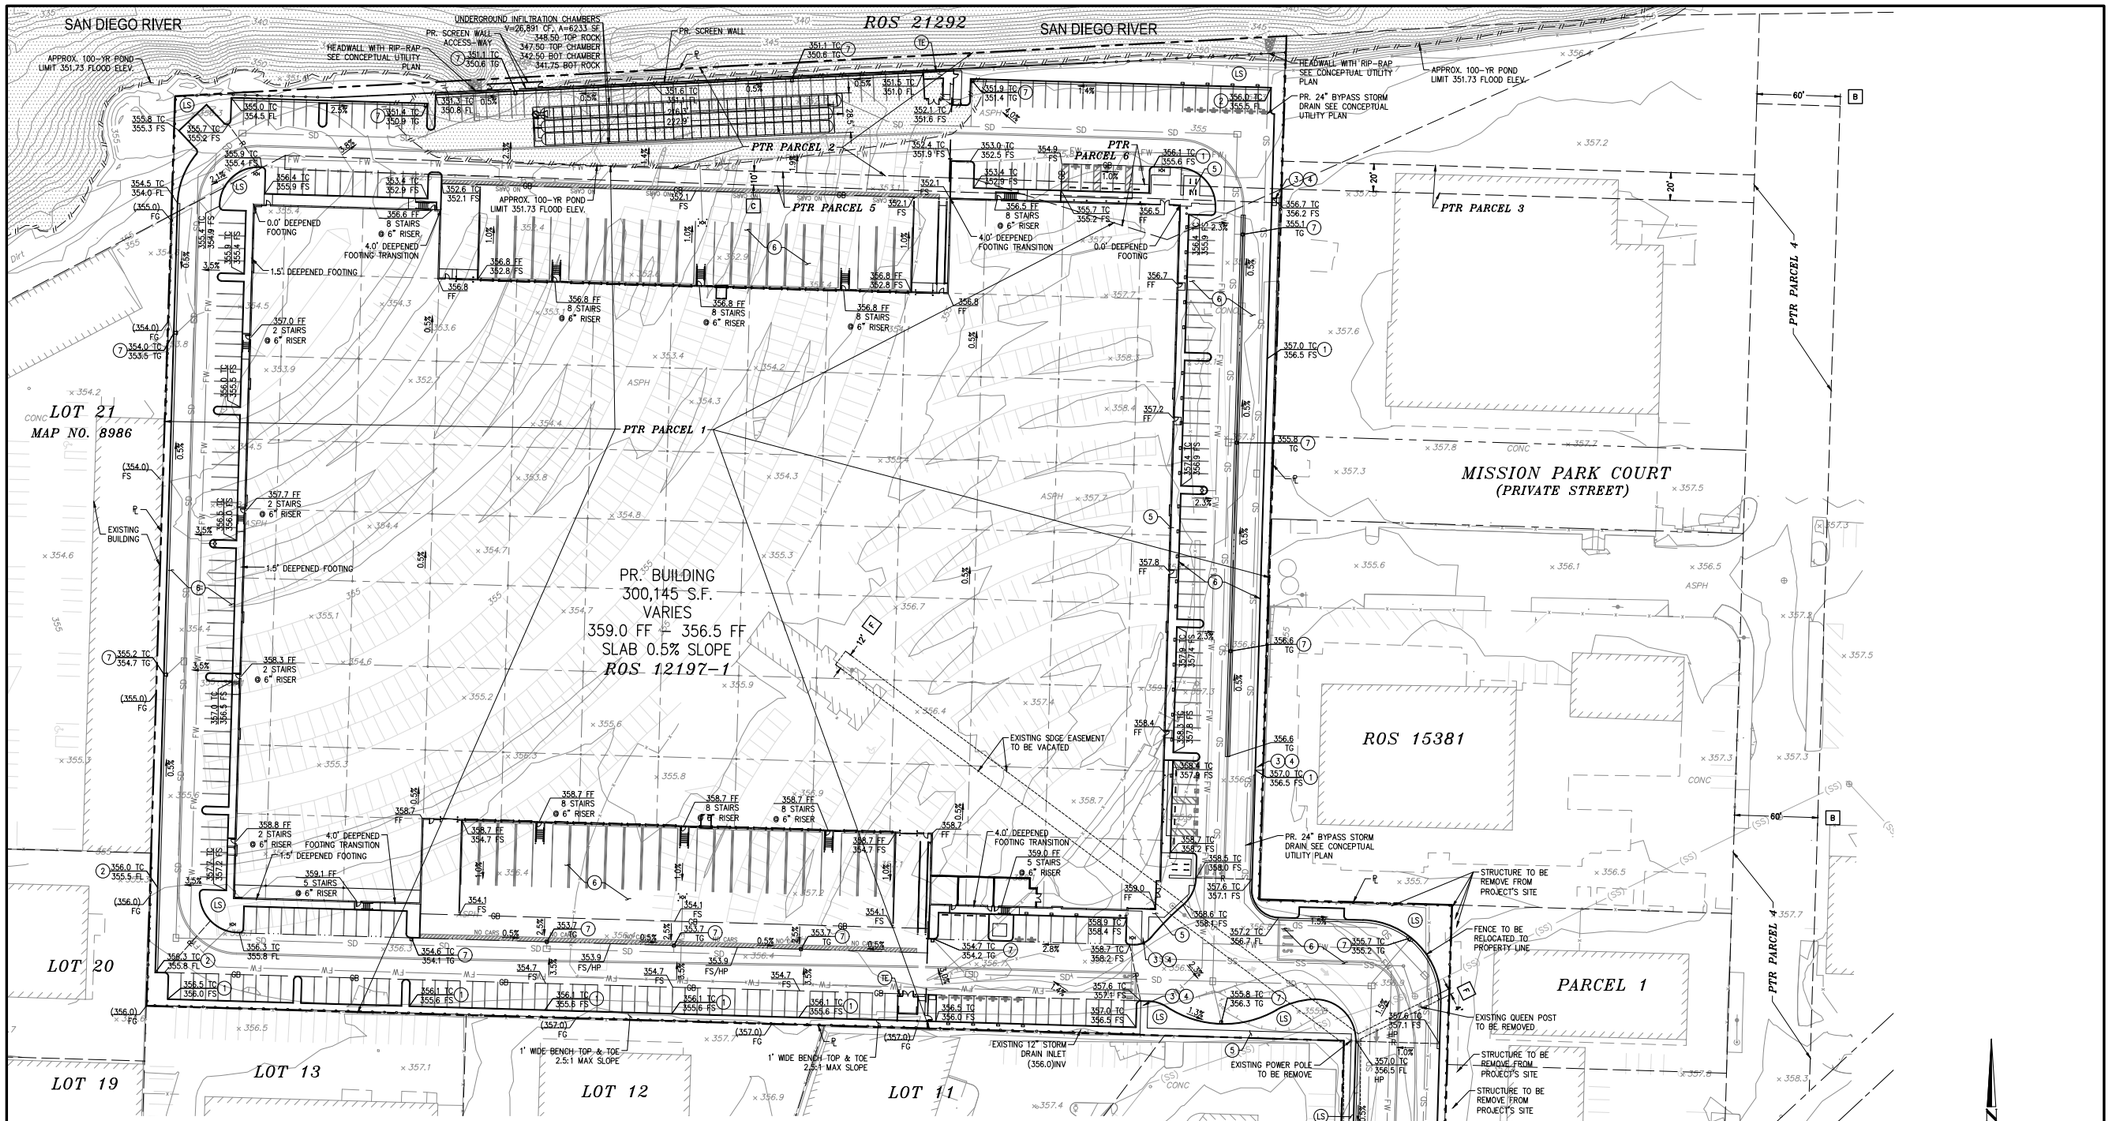
ATTACHMENT 4
Copy of Plan Sheets Showing Permanent Storm Water BMPs

This is the cover sheet for Attachment 4.

Use this checklist to ensure the required information has been included on the plans:

The plans must identify:

- ☐ Structural BMP(s) with ID numbers matching Form I-6 Summary of PDP Structural BMPs
- ☐ The grading and drainage design shown on the plans must be consistent with the delineation of DMAs shown on the DMA exhibit
- ☐ Details and specifications for construction of structural BMP(s)
- ☐ Signage indicating the location and boundary of structural BMP(s) as required by the [City Engineer]
- ☐ How to access the structural BMP(s) to inspect and perform maintenance
- ☐ Features that are provided to facilitate inspection (e.g., observation ports, cleanouts, silt posts, or other features that allow the inspector to view necessary components of the structural BMP and compare to maintenance thresholds)
- ☐ Manufacturer and part number for proprietary parts of structural BMP(s) when applicable
- ☐ Maintenance thresholds specific to the structural BMP(s), with a location-specific frame of reference (e.g., level of accumulated materials that triggers removal of the materials, to be identified based on viewing marks on silt posts or measured with a survey rod with respect to a fixed benchmark within the BMP)
- ☐ Recommended equipment to perform maintenance
- ☐ When applicable, necessary special training or certification requirements for inspection and maintenance personnel such as confined space entry or hazardous waste management
- ☐ Include landscaping plan sheets showing vegetation requirements for vegetated structural BMP(s)
- ☐ All BMPs must be fully dimensioned on the plans
- ☐ When proprietary BMPs are used, site-specific cross section with outflow, inflow, and model number shall be provided. Photocopies of general brochures are not acceptable.



GRADING CONSTRUCTION NOTES

(LS) LANDSCAPE PER SEPARATE LANDSCAPE PLANS.

(TE) TRASH ENCLOSURE PER ARCHITECTURAL PLANS.

(1) CONSTRUCT 6" CURB.

(2) CONSTRUCT 6" CURB AND GUTTER.

(3) INSTALL DETECTABLE WARNINGS.

(4) CONSTRUCT CURB RAMP.

(5) CONSTRUCT 4" PCC SIDEWALK.

TITLE INFORMATION

THE TITLE INFORMATION SHOWN HEREON IS PER PRELIMINARY REPORT FOR TITLE INSURANCE NO. 00183801-021-J5-1TW DATED SEPTEMBER 21, 2022 AS PREPARED BY CHICAGO TITLE INSURANCE COMPANY, LOS ANGELES, CALIFORNIA [TITLE OFFICER: TED TAN/JENNIFER WRIGHT, TELEPHONE: (213) 488-4331]. NO RESPONSIBILITY OF CONTENT, COMPLETENESS OR ACCURACY OF SAID PRELIMINARY REPORT IS ASSUMED BY THIS MAP OR THE SURVEYOR.

RECORD OWNER

THE FORTE FAMILY LIMITED PARTNERSHIP, A CALIFORNIA LIMITED PARTNERSHIP, AS TO PARCELS 1, 2, 3, 4 AND 5; JOHN E. FORTE, TRUSTEE UNDER DECLARATION OF TRUST DATED APRIL 29, 1981, AS TO PARCEL 6 SUBJECT TO EXCEPTION NOS. 17, 18 AND 19.

TITLE EXCEPTIONS AND EASEMENTS

A–B TAXES.

1 WATER RIGHTS, CLAIMS OR TITLE TO WATER, WHETHER OR NOT SHOWN BY THE PUBLIC RECORDS.

2 EASEMENTS FOR INGRESS AND EGRESS, PIPELINES, DRAINAGE AND/OR PUBLIC UTILITIES AND INCIDENTAL PURPOSES THERETO OVER, UNDER, ALONG AND ACROSS THE EASEMENT PARCEL(S) HEREIN DESCRIBED AS GRANTED AND/OR RESERVED IN VARIOUS DEEDS OF RECORD.

(DOCUMENT AFFECTS – THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION – SEE THE SURVEY PLAT FOR EASEMENTS AFFECTING THE SUBJECT PROPERTY)

3 THE RIGHTS RESERVED IN THE DEED FROM H. D. WILLIAMSON AND WIFE, TO T. L. BARNES, RECORDED DECEMBER 29, 1910, IN BOOK 506, PAGE 353, DEEDS, WHICH ARE AS FOLLOWS:

"RESERVING TO THE GRANTORS, THE RIGHT AT ANY TIME TO PROTECT, IF THE GRANTEES, THEIR HEIRS AND SUCCESSORS DO NOT SUFFICIENTLY DO SO, FROM THE ENCROACHMENT OF THE SAN DIEGO RIVER, TO THE RIGHT OF WAY OF SAID SAN DIEGO CUYAMA RAILWAY AND TO TAKE FROM ANY PART OF SAID LAND, ALL EARTH, STONES, BRUSH AND MATERIAL NECESSARY TO PROPERTY PROTECT THE MEND THEREOF, FROM THE ENCROACHMENT OF SAID RIVER."

NOTE: BY MESNE CONVEYANCES OF RECORD, THE INTEREST OF H. D. WILLIAMSON IN THE AFORESAID RIGHTS, HAS SINCE PASSED TO AND NOW VESTS IN THE COUNTY OF SAN DIEGO, A PUBLIC CORPORATION.

(DOCUMENT AFFECTS – THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION)

4 EASEMENT(S) GRANTED TO WALTER H. DUPEE FOR DITCH AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT RECORDED MAY 6, 1913 IN BOOK 609, PAGE 278, DEEDS

NOTE: BY MESNE CONVEYANCES OF RECORD, THE INTEREST OF WALTER H. DUPEE IN THE AFORESAID DITCH, HAS SINCE PASSED TO AND NOW VESTS IN THE COUNTY OF SAN DIEGO.

(DOCUMENT AFFECTS – PLOTTED HEREON AS [D])

5 EASEMENT(S) GRANTED TO SAN DIEGO CONSOLIDATED GAS & ELECTRIC COMPANY, A CORPORATION FOR PUBLIC UTILITIES, INGRESS AND EGRESS AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT RECORDED JANUARY 14, 1918 IN BOOK 748, PAGE 161, DEEDS.

(DOCUMENT AFFECTS – THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION)

6 MATTERS CONTAINED IN THAT CERTAIN DOCUMENT ENTITLED "AGREEMENT" RECORDED MAY 27, 1922 IN BOOK 890, PAGE 253, DEEDS.

(DOCUMENT AFFECTS – THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION)

7 THE RIGHT OF THE OWNERS OF THE PROPERTY HEREIN DESCRIBED, TO DIVERT CERTAIN AMOUNTS OF WATER FROM THE SAN DIEGO RIVER FOR BENEFICIAL USE UPON THEIR LANDS, SUBJECT HOWEVER, TO THE PRIOR RIGHTS OF THE CITY OF SAN DIEGO, A MUNICIPAL CORPORATION AND LA MESA, LEMON GROVE AND SPRING VALLEY IRRIGATION DISTRICT, TO THE USE OF THE WATERS OF SAID SAN DIEGO RIVER, AS DECREED IN THAT CERTAIN JUDGMENT, RENDERED AUGUST 16, 1938, IN AN ACTION OF THE SUPERIOR COURT OF SAN DIEGO COUNTY, CALIFORNIA, ENTITLED, "PHILLIP P. MARTIN, ET AL, PLAINTIFFS VS. THE CITY OF SAN DIEGO, A MUNICIPAL CORPORATION, ET AL, DEFENDANTS, CASE NO. 85300."

(DOCUMENT AFFECTS – NOTHING TO PLOT)

8 EASEMENT(S) FOR ROADWAY AND RIGHTS INCIDENTAL THERETO AS SET FORTH IN A DOCUMENT RECORDED MARCH 5, 1951 IN BOOK 3999, PAGE 111, OFFICIAL RECORDS.

(DOCUMENT AFFECTS – THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION)

TITLE EXCEPTIONS AND EASEMENTS (CONTINUED)

9 EASEMENT(S) GRANTED TO SAN DIEGO GAS & ELECTRIC COMPANY, A CORPORATION FOR THE LINE OF PIPE AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT RECORDED APRIL 27, 1964 AS INSTRUMENT NO. 75573, OFFICIAL RECORDS.

(DOCUMENT AFFECTS – PLOTTED HEREON AS [B])

10 EASEMENT(S) GRANTED TO KONRAD S. LEAK AND LAURA A. LEAK, JAMES H. STRATTON, RICHARD A. MILLER, SCOTT G. MILLER AND JOHN FORTE FOR ROAD AND UTILITY AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT RECORDED MARCH 19, 1965 AS INSTRUMENT NO. 49554, OFFICIAL RECORDS.

(DOCUMENT AFFECTS – PLOTTED HEREON AS [C])

11 EASEMENT(S) GRANTED TO SAN DIEGO GAS & ELECTRIC COMPANY, A CORPORATION FOR THE LINE OF POLES WITH WIRES AND RIGHTS INCIDENTAL THERETO, AS GRANTED IN A DOCUMENT RECORDED AUGUST 31, 1962 AS INSTRUMENT NO. 151610, OFFICIAL RECORDS.

(DOCUMENT AFFECTS – PLOTTED HEREON AS [F])

12 AN INSTRUMENT IN FAVOR OF COUNTY OF SAN DIEGO ENTITLED "DECLARATION OF COVENANTS FOR STREET IMPROVEMENTS" RECORDED AUGUST 23, 1976 AS INSTRUMENT NO. 76-273554, OFFICIAL RECORDS.

THIS COVENANT AND AGREEMENT PROVIDES THAT IT SHALL BE BINDING UPON ANY FUTURE OWNERS, ENCUMBRANCERS, THEIR SUCCESSORS OR ASSIGNS, AND SHALL CONTINUE IN EFFECT UNTIL THE ADVISORY AGENCY APPROVES TERMINATION.

(DOCUMENT AFFECTS – NOTHING TO PLOT)

13 DISCREPANCIES, CONFLICTS IN BOUNDARY LINES, SHORTAGE IN AREA, ENCROACHMENTS, OR ANY OTHER MATTERS SHOWN ON RECORD OF SURVEY MAP NO. 11770 RECORDED AUGUST 25, 1988.

(DOCUMENT AFFECTS – NOTHING TO PLOT)

14 DISCREPANCIES, CONFLICTS IN BOUNDARY LINES, SHORTAGE IN AREA, ENCROACHMENTS, OR ANY OTHER MATTERS SHOWN ON RECORD OF SURVEY MAP NO. 12197 RECORDED JUNE 1, 1989.

(DOCUMENT AFFECTS – NOTHING TO PLOT)

15 MATTERS CONTAINED IN THAT CERTAIN DOCUMENT ENTITLED "BOUNDARY AGREEMENT AND GRANT OF REVOCABLE LICENSE TO ENCROACH" RECORDED FEBRUARY 14, 1992 AS INSTRUMENT NO. 1992-0084989, OFFICIAL RECORDS.

(DOCUMENT AFFECTS – PLOTTED HEREON AS [E])

16 AN UNRECORDED LEASE WITH CERTAIN TERMS, COVENANTS, CONDITIONS AND PROVISIONS SET FORTH THEREIN AS DISCLOSED BY THE DOCUMENT ENTITLED "BOUNDARY AGREEMENT AND GRANT OF REVOCABLE LICENSE TO ENCROACH" RECORDED FEBRUARY 14, 1992 AS INSTRUMENT NO. 1992-0084989, OFFICIAL RECORDS.

(DOCUMENT AFFECTS – PLOTTED HEREON AS [E])

17 THE EFFECT OF A QUITCLAIM DEED RECORDED MAY 16, 1997 AS INSTRUMENT NO. 1997-0229061, OFFICIAL RECORDS.

NOTE: A PORTION OF PARCEL 1 ON SAID DEED IS STILL HELD UNDER THE TRUST REFERRED TO IN QUITCLAIM DEED RECORDED JULY 21, 1981, AS INSTRUMENT NO. 81-229662, OFFICIAL RECORDS.

(NOT A SURVEY MATTER)

18 THE EFFECT OF A QUITCLAIM DEED RECORDED MAY 16, 1997 AS INSTRUMENT NO. 1997-0229062, OFFICIAL RECORDS.

NOTE: A PORTION OF PARCEL 1 ON SAID DEED IS STILL HELD UNDER THE TRUST REFERRED TO IN QUITCLAIM DEED RECORDED JULY 21, 1981, AS INSTRUMENT NO. 81-229662, OFFICIAL RECORDS.

(NOT A SURVEY MATTER)

19 THE EFFECT OF A QUITCLAIM DEED RECORDED MAY 28, 1997 AS INSTRUMENT NO. 1997-0245849, OFFICIAL RECORDS.

NOTE: A PORTION OF PARCEL 1 ON SAID DEED IS STILL HELD UNDER THE TRUST REFERRED TO IN QUITCLAIM DEED RECORDED JULY 21, 1981, AS INSTRUMENT NO. 81-229662, OFFICIAL RECORDS.

(NOT A SURVEY MATTER)

20 THE LAND DESCRIBED HEREIN IS INCLUDED WITHIN A PROJECT AREA OF THE THE CITY OF SANTEE COMMUNITY DEVELOPMENT COMMISSION, AND THAT PROCEEDINGS FOR THE REDEVELOPMENT OF SAID PROJECT HAVE BEEN INSTITUTED UNDER THE REDEVELOPMENT LAW (SUCH REDEVELOPMENT TO PROCEED ONLY AFTER THE ADOPTION OF THE REDEVELOPMENT PLAN) AS DISCLOSED BY A DOCUMENT RECORDED SEPTEMBER 18, 2007 AS INSTRUMENT NO. 2007-0611268, OFFICIAL RECORDS.

PROJECT NO.	

ADS Advanced Drainage Systems, Inc.

ADS SiteAssist® FOR STORMTECH INSTALLATION INSTRUCTIONS VISIT OUR APP

PALISADE SANTEE BUSINESS CENTER

SANTEE, CA, USA

MC-7200 STORMTECH CHAMBER SPECIFICATIONS

1. CHAMBERS SHALL BE STORMTECH MC-7200.
2. CHAMBERS SHALL BE ARCH-SHAPED AND SHALL BE MANUFACTURED FROM VIRGIN, IMPACT-MODIFIED POLYPROPYLENE COPOLYMERS.
3. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 60x101
4. CHAMBER ROWS SHALL PROVIDE CONTINUOUS, UNOBSTRUCTED INTERNAL SPACE WITH NO INTERNAL SUPPORTS THAT WOULD IMPEDE FLOW OR LIMIT ACCESS FOR INSPECTION.
5. THE STRUCTURAL DESIGN OF THE CHAMBERS, THE STRUCTURAL BACKFILL, AND THE INSTALLATION REQUIREMENTS SHALL ENSURE THAT THE LOAD FACTORS SPECIFIED IN THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS, SECTION 12.12, ARE MET FOR: 1) LONG-DURATION DEAD LOADS AND 2) HS20-TRUCK LIVE LOADS, BASED ON THE AASHTO DESIGN TRUCK WITH CONSIDERATION FOR IMPACT AND MULTIPLE VEHICLE PRESENCES.
6. CHAMBERS SHALL BE DESIGNED, TESTED AND ALLOWABLE LOAD CONFIGURATIONS DETERMINED IN ACCORDANCE WITH ASTM F2787, "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS". MAXIMUM ALLOWABLE LOADS SHALL BE 23 TONS (46,000 POUNDS) OF STATIC/DYNAMIC (+ MIN) AASHTO DESIGN TRUCK LIVE LOAD ON MINIMUM DEPTH (2 MAXIMUM PERMANENT (1.5-YR) COVER LOAD AND 3) ALLOWABLE COVER WITH PAVKED (1-WEEK) AASHTO DESIGN TRUCK.
7. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%, THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418, AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.
8. ONLY CHAMBERS THAT ARE APPROVED BY THE SITE DESIGN ENGINEER WILL BE ALLOWED. UPON REQUEST BY THE SITE DESIGN ENGINEER OR OWNER, THE CHAMBER MANUFACTURER SHALL SUBMIT A STRUCTURAL EVALUATION FOR APPROVAL BEFORE DELIVERY OF CHAMBERS TO THE PROJECT SITE. THE:
   - THE STRUCTURAL EVALUATION SHALL BE SEALED BY A REGISTERED PROFESSIONAL ENGINEER,
   - THE STRUCTURAL EVALUATION SHALL DEMONSTRATE THAT THE SAFETY FACTORS ARE GREATER THAN OR EQUAL TO 1.95 FOR DEAD LOAD AND 1.75 FOR LIVE LOAD. THE MINIMUM REQUIRED BY ASTM F2787 AND BY SECTIONS 3 AND 12.12 OF THE AASHTO LRFD BRIDGE DESIGN SPECIFICATIONS FOR THERMOPLASTIC PIPE.
   - THE TEST DERIVED CREEP MODULUS AS SPECIFIED IN ASTM F2418 SHALL BE USED FOR PERMANENT DEAD LOAD/DESIGN (EXCEPT THAT IT SHALL BE THE 75 YEAR MODULUS USED FOR DESIGN.
9. CHAMBERS AND END CAPS SHALL BE PRODUCED AT AN ISO 9001 CERTIFIED MANUFACTURING FACILITY.

IMPORTANT - NOTES FOR THE BIDDING AND INSTALLATION OF MC-7200 CHAMBER SYSTEM

1. STORMTECH MC-7200 CHAMBERS SHALL NOT BE INSTALLED UNTIL THE MANUFACTURER'S REPRESENTATIVE HAS COMPLETED A PRE-CONSTRUCTION MEETING WITH THE INSTALLERS.
2. STORMTECH MC-7200 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-7200 CONSTRUCTION GUIDE".
3. CHAMBERS ARE NOT TO BE BACKFILLED WITH A DOZER OR EXCAVATOR SITUATED OVER THE CHAMBERS. CHAMBERS RECOMMENDED BACKFILL METHOD IS:
   - STONE/BACKFILL LOCATED OFF THE CHAMBER BED.
   - BACKFILL AS ROWS ARE BUILT USING AN EXCAVATOR ON THE FOUNDATION STONE OR SUBGRADE.
   - BACKFILL FROM OUTSIDE THE EXCAVATION USING A LONG BOOM HOE OR EXCAVATOR.
4. THE FOUNDATION STONE SHALL BE LEVELED AND COMPACTED PRIOR TO PLACING CHAMBERS.
5. JOINTS BETWEEN CHAMBERS SHALL BE PROPERLY SEATED PRIOR TO PLACING STONE.
6. MAINTAIN MINIMUM - 9" (230 mm) SPACING BETWEEN THE CHAMBER ROWS.
7. INLET AND OUTLET MANIFOLDS MUST BE INSERTED A MINIMUM OF 12" (300 mm) INTO CHAMBER END CAPS.
8. EMBEDMENT STONE SURROUNDING CHAMBERS MUST BE A CLEAN, CRUSHED, ANGULAR STONE MEETING THE AASHTO M43 DESIGNATION OF #3 OR #4.
9. STONE SHALL BE BROUGHT UP EVENLY AROUND CHAMBERS SO AS NOT TO DISTORT THE CHAMBER SHAPE. STONE DEPTHS SHOULD NEVER DIFFER BY MORE THAN 12" (300 mm) BETWEEN ADJACENT CHAMBER ROWS.
10. STONE MUST BE PLACED ON THE TOP CENTER OF THE CHAMBER TO ANCHOR THE CHAMBERS IN PLACE AND PRESERVE ROW SPACING.
11. THE CONTRACTOR MUST REPORT ANY DISCREPANCIES WITH CHAMBER FOUNDATION MATERIAL BEARING CAPACITIES TO THE SITE DESIGN ENGINEER.
12. ADS RECOMMENDS THE USE OF "FLEXSTORM CATCH IT" INSERTS DURING CONSTRUCTION FOR ALL INLETS TO PROTECT THE SUBSURFACE STORMWATER MANAGEMENT SYSTEM FROM CONSTRUCTION SITE RUNOFF.

NOTES FOR CONSTRUCTION EQUIPMENT

1. STORMTECH MC-7200 CHAMBERS SHALL BE INSTALLED IN ACCORDANCE WITH THE "STORMTECH MC-7200 CONSTRUCTION GUIDE".
2. THE USE OF EQUIPMENT OVER MC-7200 CHAMBERS IS LIMITED:
   - NO EQUIPMENT IS ALLOWED ON BARE CHAMBERS.
   - NO RUBBER TIRED LOADER, DUMP TRUCK, OR EXCAVATORS ARE ALLOWED UNTIL PROPER FILL DEPTHS ARE REACHED IN ACCORDANCE WITH THE "STORMTECH MC-7200 CONSTRUCTION GUIDE".
   - WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT CAN BE FOUND IN THE "STORMTECH MC-7200 CONSTRUCTION GUIDE".
3. FULL 36" (900 mm) OF STABILIZED COVER MATERIALS OVER THE CHAMBERS IS REQUIRED FOR DUMP TRUCK TRAVEL OR DUMPING.

USE OF A DOZER TO PUSH EMBEDMENT STONE BETWEEN THE ROWS OF CHAMBERS MAY CAUSE DAMAGE TO CHAMBERS AND IS NOT AN ACCEPTABLE BACKFILL METHOD. ANY CHAMBERS DAMAGED BY USING THE "DUMP AND PUSH" METHOD ARE NOT COVERED UNDER THE STORMTECH STANDARD WARRANTY.

CONTACT STORMTECH AT 1-888-892-2694 WITH ANY QUESTIONS ON INSTALLATION REQUIREMENTS OR WEIGHT LIMITS FOR CONSTRUCTION EQUIPMENT.

NOTES

1. MANIFOLD SIZE TO BE DETERMINED BY SITE DESIGN ENGINEER. SEE TECH NOTE 85.32 FOR MANIFOLD SIZING GUIDANCE.
2. THE PALISADE SANTEE BUSINESS CENTER CONSISTS OF TWO CHAMBER SYSTEM TO SPECIFIC SITE AND DESIGN CONSTRAINTS, IT MAY BE NECESSARY TO CUT AND COUPLE ADDITIONAL PIPE TO STANDARD MANIFOLD COMPONENTS IN THE FIELD.
   - THE SITE DESIGN ENGINEER MUST REVIEW ELEVATIONS AND IF NECESSARY ADJUST GRADING TO ENSURE THE CHAMBER COVER REQUIREMENTS ARE MET.
   - THIS CHAMBER SYSTEM WAS DESIGNED WITHOUT SITE-SPECIFIC INFORMATION ON SOIL CONDITIONS OR BEARING CAPACITY. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR DETERMINING THE SUITABILITY OF THE SOIL AND PROVIDING THE BEARING CAPACITY OF THE IN-SITU SOILS. THE BASE STONE DEPTH MAY BE INCREASED OR DECREASED ONCE THIS INFORMATION IS KNOWN.
   - **NOT FOR CONSTRUCTION:** THIS LAYOUT IS FOR DIMENSIONAL PURPOSES ONLY TO PROVE CONCEPT & THE REQUIRED STONAGE VOLUME CAN BE ACHIEVED ON SITE.

ACCEPTABLE FILL MATERIALS: STORMTECH MC-7200 CHAMBER SYSTEMS

	MATERIAL LOCATION	DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION / DENSITY REQUIREMENT
D	**FINAL FILL:** FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE EMBEDMENT STONE (B) LAYER TO 24" (600 mm) BELOW FINISH GRADE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	**INITIAL FILL:** FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE (B' LAYER) TO 24" (600 mm) BELOW FINISH GRADE. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE.	AASHTO M145* A-1, A-2-4, A-3 OR AASHTO M43* 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 24" (600 mm) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 12" (300 mm) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS.
		MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER		
B	**EMBEDMENT STONE:** FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE (A' LAYER) TO THE 'C' LAYER ABOVE	CLEAN, CRUSHED, ANGULAR STONE	AASHTO M43* 3, 4	NO COMPACTION REQUIRED.
A	**FOUNDATION STONE:** FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE	AASHTO M43* 3, 4	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE.[1,2]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 6" (150 mm) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.
4. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.

NOTES:

1. CHAMBERS SHALL MEET THE REQUIREMENTS OF ASTM F2418, "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS" CHAMBER CLASSIFICATION 60x101
2. MC-7200 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
4. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
5. REQUIREMENTS FOR HANDLING AND INSTALLATION:
   - TO MAINTAIN THE WIDTH OF CHAMBERS DURING SHIPPING AND HANDLING, CHAMBERS SHALL HAVE INTEGRAL, INTERLOCKING STACKING LUGS.
   - TO ENSURE A SECURE JOINT DURING INSTALLATION AND BACKFILL, THE HEIGHT OF THE CHAMBER JOINT SHALL NOT BE LESS THAN 3".
   - TO ENSURE THE INTEGRITY OF THE ARCH SHAPE DURING INSTALLATION, a) THE ARCH STIFFNESS CONSTANT SHALL BE GREATER THAN OR EQUAL TO 450 LBS/FT/%, THE ASC IS DEFINED IN SECTION 6.2.8 OF ASTM F2418, AND b) TO RESIST CHAMBER DEFORMATION DURING INSTALLATION AT ELEVATED TEMPERATURES (ABOVE 73° F / 23° C), CHAMBERS SHALL BE PRODUCED FROM REFLECTIVE GOLD OR YELLOW COLORS.

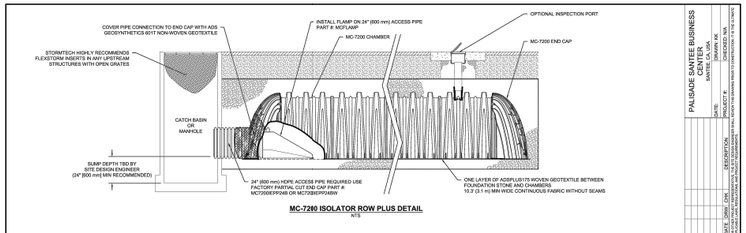
SHEET 3 OF 5



MC-7200 ISOLATOR ROW PLUS DETAIL
N.T.S

INSPECTION & MAINTENANCE

STEP 1) INSPECT ISOLATOR ROW PLUS FOR SEDIMENT
- A. INSPECTION PORTS (IF PRESENT)
  - A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN
  - A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED
  - A.3. USING A DIPSTICK OR OTHER MEASURING ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
  - A.4. LOWER A CAMERA INTO ISOLATOR ROW PLUS FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)
  - A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
- B. ALL ISOLATOR PLUS ROWS
  - B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW PLUS
  - B.2. USING A CAMERA, VISUALLY INSPECT THE ENTIRE ISOLATOR ROW PLUS FROM THE UPSTREAM END OF THE ISOLATOR ROW PLUS PIPE
    - i) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY
    - ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE
  - B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 mm) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

STEP 2) CLEAN OUT ISOLATOR ROW PLUS USING THE JETVAC PROCESS
- A. A VIDEO OF JETVAC CLEANING NOZZLE WITH REAR FACING SPREAD OF 45° (1.1 m) OR MORE IS PREFERRED
- B. APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
- C. VACUUM STRUCTURE SUMP AS REQUIRED

STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

NOTES

1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.
2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.

Job No. 22-534

July 12, 2023

To: **Claire Singh, P.E.**
City of Santee
10601 Magnolia Ave.
Santee, CA 92071

Dear Ms. Singh,

I am writing to you and the City of Santee regarding our project located at 10990 N. Woodside Dr. We have adjusted our horizontal & vertical control to match ROS 11252 as requested in your comment letter on our initial project submittal and have shown the limits of the 100-year floodplain and 100-year water surface elevation based on the City of Santee flood study.

Our site has been designed to match the existing contours along the San Deigo River as to not impact the existing floodplain and our building will be held more than 1' above the floodplain per City of Santee requirements.

In conclusion, it is our professional opinion that our proposed development at 10990 N. Woodside Dr will not impact the FEMA floodplain and does not require coordination with FEMA and/or preparation of FEMA no-rise certification. If you or any City Santee staff have any questions regarding our findings, please feel free to reach out to me directly.

Respectfully,

Matthew Hellesen, PE

DRC Engineering, Inc.

1 Introduction

1.1 Report Purpose and Scope

The purpose of this technical report is to assess the potential noise impacts associated with construction and operation of the Palisade Santee Commerce Center project (project). This analysis uses the significance thresholds in Appendix G of the California Environmental Quality Act (CEQA) Guidelines (14 CCR 15000 et seq.).

1.2 Regional and Local Setting

The site is located on an approximately 13.49-acre site in the City of Santee, California (Figure 1). The project site is bounded by light industrial land uses to the east, south, and west (adjacent to North Woodside Avenue and Wheatlands Avenue), and the San Diego River to the north. The terminus of Mission Park Court, , a private street, lies to the east of the project site, but does not connect to the site. The project site is approximately 500 feet from the Highway 67 corridor. The General Plan designation for the property is Light Industrial (LI).

1.3 Project Description

The project proposes the demolition of all existing on-site structures located at 10990 Woodside Avenue (APN: 381-070-52) that was originally developed in 1962 as the Santee Drive-In Theatre. The project would redevelop the site for construction of an approximately 300,145 square foot (gross area, inclusive of mezzanines and approximately 10,000 sf of office space) one-story industrial/warehousing building. The proposed building would accommodate warehousing and distribution, manufacturing, assembly, and/or research and development operations, and related office uses. The project would include approximately 290,145 square feet of warehouse space and approximately 10,000 square feet of office space. In addition to the industrial building, the project would include up to 42 dock-high doors, four grade-level doors, two truck courts, and up to 301 passenger-vehicle parking spaces, 30- and 40-foot-wide fire access lanes along the building perimeter, landscaping, and fencing along portions of the developed perimeter with automated gates at certain driveway locations. The project would also include associated utility, stormwater treatment, and roadway improvements. The There is no known tenant at the time of the writing of this document.

Additionally, an eight foot tall, approximately 568 foot long overlapping wall (three segments total), would be featured on the northern perimeter of the property, the length of which was determined by blocking the line-of-sight between the truck loading areas and the residences to the north of the project site. The wall contains a six foot access gap, which is overlapped by greater than 4x by the middle segment, providing the appropriate distance for effective mitigation. The wall construction schedule is to be determined.

1.4 Fundamentals of Noise and Vibration

The following is a brief discussion of fundamental noise concepts and terminology.

1.4.1 Sound, Noise, and Acoustics

Sound is a process that consists of three components: the sound source, sound path, and sound receiver. All three components must be present for sound to exist. Without a source to produce sound, there is no sound. Similarly, without a medium to transmit sound pressure waves, there is no sound. Finally, sound must be received; a hearing organ, sensor, or object must be present to perceive, register, or be affected by sound or noise. In most situations, there are many different sound sources, paths, and receptors rather than just one of each. Acoustics is the field of science that deals with the production, propagation, reception, effects, and control of sound. Noise is defined as sound that is loud, unpleasant, unexpected, or undesired.

1.4.2 Sound Pressure Levels and Decibels

The amplitude of a sound wave determines its loudness. Loudness of sound increases with increasing amplitude. Sound pressure amplitude is measured in units of micronewtons per square meter, also called micropascals. One micropascal is approximately one-hundred billionth (0.00000000001) of normal atmospheric pressure. The pressure of a very loud sound may be 200 million micropascals, or 10 million times the pressure of the weakest audible sound. Because expressing sound levels in terms of micropascals would be very cumbersome and the sensitivity of human hearing to changes in micropascals is rather coarse (e.g., a doubling of micropascals is just audible to most people), sound pressure level in logarithmic units is used instead to describe the ratio of actual sound pressure to a reference pressure squared. These units are called Bels. To provide a finer resolution, a Bel is subdivided into 10 decibels (dB).

1.4.3 A-Weighted Sound Level

Sound pressure level alone is not a reliable indicator of loudness. The frequency, or pitch, of a sound also has a substantial effect on how humans will respond. Although the intensity (energy per unit area) of the sound is a purely physical quantity, the loudness, or human response, is determined by the characteristics of the human ear.

Human hearing is limited not only in the range of audible frequencies, but also in the way it perceives the sound in that range. In general, the healthy human ear is most sensitive to sounds between 1,000 and 5,000 hertz, and it perceives a sound within that range as more intense than a sound of higher or lower frequency with the same magnitude. To approximate the frequency response of the human ear, a series of sound level adjustments is usually applied to the sound measured by a sound level meter. The adjustments (referred to as a weighting network) are frequency-dependent.

The A-scale weighting network approximates the frequency response of the average young ear when listening to ordinary sounds. When people make judgments about the relative loudness or annoyance of a sound, their judgments correlate well with the A-scale sound levels of those sounds. Other weighting networks have been devised to address high noise levels or other special situations (e.g., B-scale, C-scale, D-scale), but these scales are rarely used in conjunction with most environmental noise evaluations. Noise levels are typically reported in terms of A-weighted sound levels. All sound levels discussed in this report are A-weighted decibels (dBA). Examples of typical noise levels for common indoor and outdoor activities are depicted in Table 1.

Table 1. Typical Sound Levels in the Environment and Industry

Common Outdoor Activities	Noise Level (dB)	Common Indoor Activities
—	110	Rock band
Jet fly over at 300 meters (1,000 feet)	100	—
Gas lawn mower at 1 meter (3 feet)	90	—
Diesel truck at 15 meters (50 feet), at 80 kilometers per hour (50 miles per hour)	80	Food blender at 1 meter (3 feet); garbage disposal at 1 meter (3 feet)
Noisy urban area, daytime; gas lawn mower at 30 meters (100 feet)	70	Vacuum cleaner at 3 meters (10 feet)
Commercial area; heavy traffic at 90 meters (300 feet)	60	Normal speech at 1 meter (3 feet)
Quiet urban, daytime	50	Large business office; dishwasher next room
Quiet urban, nighttime	40	Theater; large conference room (background)
Quiet suburban, nighttime	30	Library
Quiet rural, nighttime	20	Bedroom at night; concert hall (background)
—	10	Broadcast/Recording studio
Lowest threshold of human hearing	0	Lowest threshold of human hearing

Source: Caltrans 2020.

1.4.4 Human Response to Changes in Noise Levels

Under controlled conditions in an acoustics laboratory, the trained, healthy human ear is able to discern changes in sound pressure levels of 1 dBA when exposed to steady, single-frequency signals in the mid-frequency range. Outside such controlled conditions, the trained ear can detect changes of 2 dBA in normal environmental noise. It is widely accepted that the average healthy ear, however, can barely perceive noise level changes of 3 dBA. A change of 5 dBA is readily perceptible, and a change of 10 dBA is *perceived* as twice (if a gain) or half (if a loss) as loud. A doubling of sound energy results in a 3 dBA increase in sound, which means that a doubling of sound energy (e.g., doubling the volume of traffic on a road) would result in a barely perceptible change in sound level.

1.4.5 Noise Descriptors

Additional units of measure have been developed to evaluate the long-term characteristics of sound. The energy-equivalent sound level (L_{eq}) is also referred to as the time-average sound level. It is the equivalent steady-state or constant sound level that in a stated period of time would contain the same acoustical energy as the time-varying sound level during the same time period. For instance, the 1-hour A-weighted equivalent sound level, $L_{eq(h)}$, is the energy average of the A-weighted sound levels occurring during a 1-hour period, and is the basis for most of the County Noise Ordinance standards.

People are generally more sensitive to and thus potentially more annoyed by noise occurring during the evening and nighttime hours. Hence, another noise descriptor used in community noise assessments—the community noise equivalent level (CNEL)—represents a time-weighted, 24-hour average noise level based on the A-weighted sound level. However, unlike an unmodified 24-hour L_{eq} value, the CNEL descriptor accounts for increased noise sensitivity during the evening (7 p.m. to 10 p.m.) and nighttime (10 p.m. to 7 a.m.) by adding 5 dBA and 10 dBA, respectively,

to the average sound levels occurring during these defined hours within a 24-hour period. Whereas CNEL is used mostly in California, the L_{dn} descriptor (day-night average noise level, which is the same as CNEL with the only exception of not including the 5 dBA evening correction) is used more often for environmental noise evaluations for federal projects.

1.4.6 Sound Propagation

Sound propagation (i.e., the traverse of sound from a noise emission source position to a receiver location) is influenced by multiple factors that include geometric spreading, ground absorption, atmospheric effects, and occlusion by natural terrain and/or features of the built environment.

Sound levels attenuate (or diminish) geometrically at a rate of approximately 6 dBA per doubling of distance from an outdoor stationary point-type source due to the spherical spreading of sound energy with increasing distance travelled. The effects of atmospheric conditions such as humidity, temperature, and wind gradients are typically distance-dependent and can also temporarily either increase or decrease sound levels measured or perceived at a receptor location. In general, the greater the distance the receiver is from the source of sound emission, the greater the potential for variation in sound levels at the receptor due to these atmospheric effects. Additional attenuation can result from sound path occlusion and diffraction due to intervention of natural (ridgelines, dense forests, etc.) and built features (such as solid walls, buildings, and other structures).

1.4.7 Groundborne Vibration Fundamentals

Groundborne vibration is fluctuating or oscillatory motion transmitted through the ground mass (i.e., soils, clays, and rock strata). The strength of groundborne vibration attenuates rapidly over distance. Some soil types transmit vibration quite efficiently; other types (primarily sandy soils) do not. Several basic measurement units are commonly used to describe the intensity of ground vibration. The descriptors used by the Federal Transit Administration (FTA) are peak particle velocity (PPV), in units of inches per second (ips), and velocity decibel (VdB) that is based on a root-mean square (RMS) of the vibration signal magnitude. The calculation to determine PPV at a given distance is as follows:

$$PPV_{distance} = PPV_{ref} * (25/D)^{1.5}$$

Where:

$PPV_{distance}$ = the peak particle velocity in inches per second of the equipment adjusted for distance

PPV_{ref} = the reference vibration level in inches per second at 25 feet

D = the distance from the equipment to the receiver

2 Regulatory Setting

2.1 Federal

2.1.1 Federal Transit Administration

In its Transit Noise and Vibration Impact Assessment guidance manual, the FTA recommends a daytime construction noise level threshold of 80 dBA L_{eq} over an 8-hour period (FTA 2018) when detailed construction noise assessments are performed to evaluate potential impacts to community residences surrounding a project. Although this FTA guidance is not a regulation, it can serve as a quantified standard in the absence of such noise limits at the state and local jurisdictional levels.

2.1.2 Federal Interagency Committee on Noise

Some guidance regarding the determination of a substantial permanent increase in ambient noise levels in the project vicinity above existing levels is provided by the 1992 findings of the Federal Interagency Committee on Noise (FICON 1992), which assessed the annoyance effects of changes in ambient noise levels resulting from aircraft operations. The FICON recommendations are based upon studies that relate aircraft and traffic noise levels to the percentage of persons highly annoyed by the noise. Annoyance is a qualitative measure of the adverse reaction of people to noise that generates speech interference, sleep disturbance, or interference with the desire for a tranquil environment.

The rationale for the FICON recommendations is that it is possible to consistently describe the annoyance of people exposed to transportation noise in terms of L_{dn}. The changes in noise exposure that are shown below are expected to result in equal changes in annoyance at sensitive land uses. Although the FICON recommendations were specifically developed to address aircraft noise impacts, they are used in this analysis to define a substantial increase in community noise levels related to all transportation noise sources and permanent non-transportation noise sources.

- Outdoor ambient sound level without the project is less than 60 dBA L_{dn}, then a project-attributed increase of 5 dBA or more would be considered significant;
- Outdoor ambient sound level without the project is between 60 and 65 dBA L_{dn}, project-attributed increase of 3 dBA or more would be considered significant; and
- Outdoor ambient sound level without the project is greater than 65 dBA L_{dn}, then project-attributed increase of 1.5 dBA or more would be considered significant.

2.2 State

2.2.1 California Code of Regulations, Title 24

Title 24 of the California Code of Regulations sets standards that new developments in California must meet. According to Title 24, interior noise levels are not to exceed 45 dBA CNEL in any habitable room (ICC 2019).

2.2.2 California Department of Health Services Guidelines

The California Department of Health Services has developed guidelines of community noise acceptability for use by local agencies (OPR 2017). Selected relevant levels are listed here:

- Below 60 dBA CNEL: normally acceptable for low-density residential use
- 50 to 70 dBA CNEL: conditionally acceptable for low-density residential use
- Below 65 dBA CNEL: normally acceptable for high-density residential use and transient lodging
- 60 to 70 dBA CNEL: conditionally acceptable for high-density residential, transient lodging, churches, educational, and medical facilities

The normally acceptable exterior noise level for high-density residential use is up to 65 dBA CNEL. Additionally, this exterior noise level limit is consistent with the City of Santee General Plan Noise Element, which considers multi-family unit noise-sensitive land uses.

2.2.3 California Department of Transportation

In its Transportation and Construction Vibration Guidance Manual (Caltrans 2020), the California Department of Transportation (Caltrans) recommends 0.5 ips PPV as a threshold for the avoidance of structural damage to typical newer residential buildings exposed to continuous or frequent intermittent sources of groundborne vibration. For transient vibration events, such as blasting, the damage risk threshold would be 1.0 ips PPV (Caltrans 2020) at the same type of newer residential structures. For older structures, these guidance thresholds would be more stringent: 0.3 ips PPV for continuous/intermittent vibration sources, and 0.5 ips PPV for transient vibration events. With respect to human annoyance, Caltrans guidance indicates that building occupants exposed to continuous groundborne vibration in the range of 0.2-0.6 ips PPV would find it “unpleasant or “annoying” and thus a likely significant impact. Although these Caltrans guidance thresholds are not regulations, they can serve as quantified standards in the absence of such limits at the local jurisdictional level.

2.3 Local

2.3.1 City of Santee Noise Level Compatibility Standards

The Noise Element of the City’s General Plan (City of Santee 2003) establishes target maximum noise levels in the City, categorized by land use. The Noise Element sets the following limitations on noise levels for receiving properties adjacent to the project site. Figure 3 contains the Noise / Land Use Compatibility Guide from the General Plan Noise Element, which establishes a maximum noise level of 65 dBA L_{dn} for noise-sensitive land uses and 75 dBA L_{dn} for industrial land uses.

2.3.2 Transportation-Related Noise Standards

The City's Noise Element establishes a policy for exterior sensitive areas to be protected from high traffic noise levels. The Noise Element sets 65 dBA L_{dn} for exterior noise levels and 45 dBA L_{dn} for interior noise levels as the "normally acceptable" level.

For interior noise, the Noise Element also establishes 45 dBA L_{dn} as the maximum acceptable level for habitable rooms when exterior predicted noise levels due to traffic are 65 dBA L_{dn} or more. If windows and doors are required to be closed to meet this standard, then mechanical ventilation (i.e., air conditioning) shall be included in the project design.

2.3.3 Noise Element Objectives and Policies

The Noise Element contains a section on the noise abatement and control objectives and policies for the City, a selection of which are presented here.

Objective 1.0 Control noise from sources adjacent to residential, institutional and other noise-sensitive receptors.

Policy 1.1. The City shall support a coordinated program to protect and improve the acoustical environment of the City including development review for new public and private development and code compliance for existing development.

Policy 1.2. The City shall utilize noise studies and noise contour maps when evaluating development proposals during the discretionary review process.

Policy 1.3. The City shall enforce motor vehicle laws and standards as appropriate, related to traffic flow and speed, in an effort to reduce noise along roadways experiencing high noise levels.

Policy 1.4. The City shall promote alternative sound attenuation measures rather than traditional wall barriers wherever feasible; these may include glass or polycarbonate walls, berms, landscaping, and the siting of noise-sensitive uses on a parcel away from the roadway or other noise source.

Policy 1.5. The City shall review future projects with particular scrutiny regarding the reduction of unnecessary noise near noise-sensitive areas such as hospitals, schools, parks, etc.

Policy 1.6. The City shall continue to monitor noise throughout Santee and enforce the standards and regulations of the City's Noise Ordinance.

Policy 1.15. The City shall encourage Caltrans to recognize and implement the City's noise standards for planned and future freeway projects in the City.

Policy 1.16. The City shall ensure that appropriate regulations and standards are incorporated into the City's development policies and ordinances, including the use of noise evaluations in Environmental Impact Reports and statements, which take all aspects of noise into consideration.

Policy 1.17. The City shall officially support the control of noise through legal regulations and cooperative government efforts.

Objective 2.0 Ensure that future developments will be constructed to minimize interior and exterior noise levels.

Policy 2.1. The City shall adhere to planning guidelines and building codes which include noise control for the exterior and interior living space of all new residential developments within noise impacted areas.

Policy 2.2. The City should require new development to mitigate noise impacts to existing uses resulting from new development when: 1) such development adds traffic to existing City streets that necessitates the widening of the street; and 2) the additional traffic generated by the new development causes the noise standard or significance thresholds to be exceeded.

Policy 2.3. The City should not require new development to mitigate noise impacts to existing uses when the new development only adds traffic already anticipated by the City's General Plan to an existing street, but does not necessitate widening of that street.

City of Santee Noise Ordinance

Construction activities are subject to Section 5.04.090 of the City's Noise Ordinance, which specifically prohibits the operation of any single or combination of powered construction equipment at any construction site on Mondays through Thursday except between the hours of 7:00 a.m. and 7:00 p.m. Further, construction equipment with a manufacturer's noise rating of 85 dBA L_{max} or greater may only operate at a specific location for 10 consecutive workdays. A notice must be provided to all property owners within 300 feet if work is scheduled for more than 10 days and must be provided no later than 10 days prior to the start of the construction.

3 Existing Conditions

3.1 Noise Measurement Surveys

Sound pressure level (SPL) measurements were conducted near the proposed project site on March 25, 2023, to quantify and characterize the existing outdoor ambient sound levels. Another set of SPL measurements were conducted near the proposed project site on March 18 and 19, 2024, to help further characterize the existing outdoor noise levels for the single-family residences located north of the San Diego River.

Table 2 provides the location and time period at which these baseline noise level measurements were performed by an attending Dudek field investigator. The March 2023 measurements were conducted using a Rion-branded Model NL-52 sound level meter (SLM) equipped with a 0.5-inch, pre-polarized condenser microphone with pre- amplifier. The SLM meets the current American National Standards Institute standard for a Type 1 (Precision Grade) sound level meter, while the March 2024 measurements were made using a a SoftdB "Piccolo" model sound level meter equipped with a windscreen-protected, 0.5-inch diameter pre-polarized condenser microphone with pre-amplifier. The sound level meter meets the current American National Standards Institute (ANSI) standard for a Type 2 (General Use) sound level meter.

The accuracy of the SLM was verified using a field calibrator before and after the measurements, and the measurements were conducted with the microphone positioned approximately 5 feet above the ground.

Five (5) short-term (ST) noise level measurement locations (ST1–ST5) that represent existing noise-sensitive receivers were selected on and near the proposed project site. These locations are depicted as receivers ST1–ST5 on Figure 4. The measured L_{eq} and L_{max} noise levels are provided in Table 2. The primary noise sources at the sites identified in Table 2 consisted of traffic along adjacent roadways, aircraft, the sounds of leaves rustling, conversations, and birdsong during the daytime, and frog noise at night. As shown in Table 2, the measured daytime SPL ranged from 53.1 dBA L_{eq} at ST4 to 76.8 dBA L_{eq} at ST1 and the measured nighttime SPL ranged from 50.2 at ST2 to 51.2 at ST5. Beyond the summarized information presented in Table 2, detailed noise measurement data is included in Appendix A.

Table 2. Measured Baseline Outdoor Ambient Noise Levels

Site	Location/Address	Time	L_{eq} (dBA)	L_{max} (dBA)
ST1	East of Woodside Avenue at Shadow Hill Apartments	2023-03-25, 9:01 AM to 9:06 AM	76.8	84.3
ST2	Cul-de-sac of Hillcreek Way	2023-03-25, 9:25 AM to 9:35 AM	55.6	66.8
	South from the cul-de-sac of Hillcreek Way, along Walker Preserve Trail	2024-03-19, 1:14 PM to 2:14 PM	53.8	75.5
		2024-03-18, 8:21 PM to 9:21 PM	50.2	73.9
ST3	Southern project boundary	2023-03-25, 10:25 AM to 10:35 AM	60.3	75.5
ST4	Walker Preserve Trail, northwest of project boundary	2023-03-25, 9:45 AM to 10:00 AM	53.1	71.2

Table 2. Measured Baseline Outdoor Ambient Noise Levels

Site	Location/Address	Time	L_{eq} (dBA)	L_{max} (dBA)
		2024-03-19, 1:22 PM to 2:22 PM	54.1	75.4
		2024-03-18, 8:28 PM to 9:28 PM	50.5	64.1
ST5	Walker Preserve Trail, north of project boundary	2024-03-19, 1:29 PM to 2:29 PM	55.2	75.9
		2024-03-18, 8:40 PM to 9:40 PM	51.2	58.2

Source: Appendix A.
Notes: L_{eq} = equivalent continuous sound level (time-averaged sound level); L_{max} = maximum sound level during the measurement interval; dBA = A-weighted decibels; ST = short-term noise measurement locations.

Generally, the measured samples of daytime L_{eq} agree with expectations: ST1 and ST3 L_{eq} values are above 60 dBA due largely to their proximity to Highway 67. ST2, ST4, and ST5, however, are in residential and trail areas north of the proposed project and are more distant from these sources of traffic noise, which results in a substantially lower sampled L_{eq} value. Noise measurements were not conducted during time periods when the drive-in/swap meet was operating. Therefore, the ambient noise level measurements conducted for the project are likely lower than ambient noise levels when the drive-in is operational.

3.2 Sensitive Receptors

Noise- and vibration-sensitive land uses are locations where people reside or where the presence of unwanted sound could adversely affect the use of the land. Residences, schools, hospitals, guest lodging, libraries, and some passive recreation areas would be considered noise and vibration sensitive and may warrant unique measures for protection from intruding noise.

The closest sensitive receptors in the vicinity of the Project site are the nearest existing residences located as close as 310 feet from the Project driveway south of North Woodside Avenue and 650 feet north of the Project boundary.

4 Thresholds of Significance

The following significance criteria are based on Appendix G of the California Environmental Quality Act Guidelines (14 CCR 15000 et seq.) and will be used to determine the significance of potential noise and vibration impacts. Impacts associated with noise and vibration would be significant if the proposed project would result in:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.
- Generation of excessive groundborne vibration or groundborne noise levels.
- Exposing people residing or working in the project area to excessive noise levels (for a project located within the vicinity of a private airstrip or an airport land use plan, or where such a plan has not been adopted, within 2 miles of a public airport or public use airport).

In light of these above significance criteria, this analysis uses the following standards to evaluate potential noise and vibration impacts.

- Construction noise –The apparent proximity of existing residential receptors located south of the North Woodside Avenue suggests that source-to-receiver distances are a minimum of approximately 310 feet. Additionally, most construction equipment and vehicles on a project site do not operate continuously. Therefore, consistent with the FTA guidance mentioned in Section 2 (Regulatory Setting), this analysis will use 80 dBA L_{eq} over an 8-hour period as the construction noise impact criterion during daytime hours (7:00 a.m. to 7:00 p.m.).
- Off-site project-attributed transportation noise – For purposes of this analysis, a noise impact due to transportation noise would be considered significant if predicted noise levels exceeded the FICON thresholds noted in Section 2.1.2. More specifically, an impact due to the project contribution to existing and future predicted ambient noise levels would be considered significant if it meets the following criteria:
    - Outdoor ambient sound level without the project is less than 60 dBA L_{dn}, then a project-attributed increase of 5 dBA or more would be considered significant;
    - Outdoor ambient sound level without the project is between 60 and 65 dBA L_{dn}, project-attributed increase of 3 dBA or more would be considered significant; and
    - Outdoor ambient sound level without the project is greater than 65 dBA L_{dn}, then project-attributed increase of 1.5 dBA or more would be considered significant.
- Off-site project-attributed stationary noise – For purposes of this analysis, a noise impact would be considered significant if noise from typical operation of heating, ventilation, and air conditioning (HVAC), truck movements, and other electro-mechanical systems associated with the proposed project exceeded 75 dBA L_{dn} at the property line. Note that these are the City's thresholds for the industrial zones that characterize the proposed project site. For residential land uses near the project site, a noise impact would be considered significant if noise from typical operations exceeds 65 dBA L_{dn}.
- Construction vibration – Guidance from Caltrans indicates that a vibration velocity level of 0.2 ips PPV received at a structure would be considered annoying by occupants within (Caltrans 2013). As for the

receiving structure itself, aforementioned Caltrans guidance from Section 2 recommends that a vibration level of 0.3 ips PPV would represent the threshold for building damage risk.

5 Impact Discussion

Potential noise and vibration impacts attributed to project construction and operation are studied in the following subsections that are categorized by the CEQA Guidelines Appendix G significance for noise.

a) Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Short-Term On-Site Construction Noise

Less Than Significant. Construction noise and vibration are temporary phenomena, with emission levels varying from hour to hour and day to day, depending on the equipment in use, the operations performed, and the distance between the source and receptor. Equipment that would be in use during construction would include, in part, graders, backhoes, rubber-tired dozers, loaders, cranes, forklifts, pavers, rollers, and air compressors. The typical maximum noise levels at a distance of 50 feet from various pieces of construction equipment and activities anticipated for use on the proposed project site are presented in Table 3. Note that the equipment noise levels presented in Table 3 are maximum noise levels. Usually, construction equipment operates in alternating cycles of full power and low power, producing average noise levels over time that are less than the maximum noise level. The average sound level of construction activity also depends on the amount of time that the equipment operates and the intensity of construction activities during that time.

Table 3. Typical Construction Equipment Maximum Noise Levels

Equipment Type	Typical Equipment (L_{max}, dBA at 50 Feet)
All Other Equipment > 5 HP	85
Backhoe	78
Compressor (air)	78
Concrete Saw	90
Crane	81
Dozer	82
Excavator	81
Flat Bed Truck	74
Front End Loader	79
Generator	72
Grader	85
Man Lift	75
Paver	77
Roller	80
Scraper	84
Welder / Torch	73

Source: DOT 2006.
Note: L_{max} = maximum sound level; dBA = A-weighted decibels.

Aggregate noise emission from proposed project construction activities, broken down by sequential phase, was predicted at two evaluation distances to the nearest existing noise-sensitive receptor: 1) from the nearest position of the construction site boundary and 2) from the geographic center of the construction site, which serves as the time-averaged location or geographic *acoustical centroid* of active construction equipment for the phase under study. The intent of the former distance is to help evaluate anticipated construction noise from equipment or vehicle activity expected to be at the boundary for some period of time, which would be most appropriate for phases such as site preparation, grading, and paving. The latter distance is used in a manner similar to the general assessment technique as described in the FTA guidance for construction noise assessment, when the location of individual equipment for a given construction phase is uncertain over some extent of (or the entirety of) the construction site area. In this studied scenario, because of the equipment location uncertainty, all the equipment for a construction phase is assumed to operate—on average—from the acoustical centroid position. Table 4 summarizes these two distances to the apparent closest noise-sensitive receptor for each of the six sequential construction phases. At the site boundary, this analysis assumes that all equipment of each listed type per phase will be involved in the construction activity for the full 8-hour period. For the acoustical centroid case, which intends to be a geographic average position for all equipment during the indicated phase, this analysis assumes that the equipment may be operating up to all 8 hours per day.

Table 4. Estimated Distances between Construction Activities and the Nearest Noise-sensitive Receptors

Construction Phase (and Equipment Types Involved)	Distance from Nearest Noise-Sensitive Receptor to Construction Site Boundary (Feet)	Distance from Nearest Noise-Sensitive Receptor to Acoustical Centroid of Site (Feet)
Demolition (concrete saw, excavator, dozer)	310	990
Site Preparation (dozer, front end loader)	310	990
Grading (excavator, grader, dozer, scraper backhoe)	310	990
Building construction (crane, man-lift, generator, backhoe, welder)	310	990
Paving (paver, roller, concrete mixer truck)	310	990
Architectural Coating (compressor)	310	990

A Microsoft Excel–based noise prediction model emulating and using reference data from the Federal Highway Administration Roadway Construction Noise Model (RCNM) (FHWA 2008) was used to estimate construction noise levels at the nearest occupied noise-sensitive land use. Although the RCNM was funded and promulgated by the Federal Highway Administration, it is often used for non-roadway projects, because the same types of construction equipment used for roadway projects are often used for other types of construction. Input variables for the predictive modeling consist of the equipment type and number of each (e.g., two graders, a loader, a tractor), the duty cycle for each piece of equipment (e.g., percentage of time within a specific time period, such as an hour, when

the equipment is expected to operate at full power or capacity and thus make noise at a level comparable to what is presented in Table 3), and the distance from the noise-sensitive receiver. The predictive model also considers how many hours that equipment may be on-site and operating (or idling) within an established work shift. Conservatively, no topographical or structural shielding was assumed in the modeling. The RCNM has default duty-cycle values for the various pieces of equipment, which were derived from an extensive study of typical construction activity patterns. Those default duty-cycle values were used for this noise analysis, which is detailed in Appendix B, and produced the predicted results displayed in Table 5.

Table 5. Predicted Construction Noise Levels per Activity Phase

Construction Phase (and Equipment Types Involved)	8-Hour L_{eq} at Nearest Noise-Sensitive Receptor to Construction Site Boundary (dBA)	8-Hour L_{eq} at Nearest Noise-Sensitive Receptor to Acoustical Centroid of Site (dBA)
Demolition (concrete saw, excavator, dozer)	66.5	55.3
Site Preparation (dozer, front end loader)	64.3	53.1
Grading (excavator, grader, dozer, scraper backhoe)	67.0	55.8
Building construction (crane, man-lift, generator, backhoe, welder)	60.8	49.5
Paving (paver, roller, concrete mixer truck)	60.6	49.3
Architectural Coating (compressor)	52.5	41.2

Notes: L_{eq} = equivalent noise level; dBA = A-weighted decibels.

As presented in Table 5, the highest estimated construction noise levels are predicted to stay below 67 dBA L_{eq} over an 8-hour period at the nearest existing residences (located south of North Woodside Avenue and as close as 310 feet from the project driveway) when grading activities take place near the project driveway. Residences further afield, such as those to the north of the project site, would be predicted to have lower construction noise levels than those shown in Table 5. Additionally, the nearest existing residences to the south are dominated by traffic noise from SR-67, and intervening barriers and terrain were not considered in the model. As a result, short-term construction noise is predicted to be well below the FTA guidance of 80 dBA L_{eq} over an 8-hour period, and therefore is less than significant.

Short-Term Off-Site Construction Noise

Less Than Significant. The project would result in local, short-term increases in roadway noise as a result of construction traffic. Based on information developed as part of the project's air quality analysis, project-related traffic would include workers commuting to and from the project site as well as vendor and haul trucks bringing or removing materials. The highest number of average daily worker trips would be 122 trips, occurring during the building construction phase. The highest number of average daily vendor truck trips would be 48 trips, also occurring during the building construction phase. The highest number of total haul truck trips would be 6675 trips, occurring during the demolition phase over a period of 25 days. Based upon available data provided in the project Transportation Technical Memorandum, existing Average Daily Traffic (ADT) volumes were

combined with the construction truck haul trips (an average of 275 haul trucks per day) and truck percentages found in the project Transportation Technical Memorandum were derived to include the increase in heavy trucks and applied to all of the studied roadway ADTs to determine the potential noise level increase due to construction noise. Aside from the project driveway, it is not known which roadways will be used to route construction traffic. Therefore, applying the average of 275 haul trucks per day to all studied project roadway ADTs represents an extremely conservative prediction methodology.

The change in roadway noise levels was predicted for two conditions: existing and existing plus average daily haul truck construction traffic. Traffic noise levels were calculated for roadway segments bounded by intersections within the project area and are listed as follows:

- Project Driveway – From N. Woodside Avenue to the Project;
- Wheatlands Avenue – From N. Woodside Avenue to Wheatlands Road;
- N. Woodside Avenue – From Wheatlands Avenue to Woodside Avenue (combined north/south split);
- Woodside Avenue – From Magnolia Avenue to the Woodside Avenue north/south split;
- Magnolia Avenue – From Woodside Avenue to SR-52; and
- SR-67.

Based upon the FICON thresholds presented in Section 2.1.2 above, an increase of less than 5 dBA when the ambient sound level is less than 60 dBA L_{dn}/CNEL, less than 3 dBA when the ambient sound level is between 60 and 65 dBA L_{dn}/CNEL, or less than 1.5 dBA when the ambient sound level is greater than 65 dBA L_{dn}/CNEL would not be significant. Utilizing the traffic noise modeling worksheets found in Appendix C, Table 6 shows that the highest predicted change in traffic noise level (the project driveway) combined with the roadways surrounding the immediate project site are predicted to experience an aggregate total traffic noise level of 85 dBA at 50 feet for the existing condition with a predicted increase of less than 1 dBA due to the project contribution. Although the aggregate predicted "with project construction traffic" condition is greater than the City limit as summarized in Section 2.3.3.1, the predicted "without project construction traffic" level at the nearest sensitive receivers is also greater than the City limit, with a predicted "with project" increase of less than 1 dBA, which is less than the FICON 1.5 dBA threshold when the ambient sound level is greater than 65 dBA L_{dn}/CNEL, and would be considered imperceptible to the average person. Additionally, although the increase in noise level for the project driveway is greater than 5 dBA and therefore higher than the FICON thresholds and perceptible to the average person, there are no noise-sensitive receptors adjacent to the project driveway; the nearest noise-sensitive receptors to the south of the project are already dominated by much higher levels of traffic noise from nearby adjacent roadways such as SR-67. Therefore, potential impacts at existing off-site noise-sensitive land uses along roadway segments identified in Table 6 and with respect to project-generated temporary construction traffic to existing traffic noise would be less than significant.

Table 6. Predicted Construction Traffic Noise Levels

Modeled Roadway Segment	From	To	Existing (dBA CNEL)	Existing Plus Project Construction Traffic (dBA CNEL)	Delta (dBA)
Project Driveway	N. Woodside Avenue	Project	50.38	60.26	9.88
Wheatlands Avenue	N. Woodside Avenue	Wheatlands Road	61.82	63.93	2.11
N. Woodside Avenue	Wheatlands Avenue	Woodside Avenue - Combined	67.76	68.70	0.95
Woodside Avenue	Magnolia Avenue	Woodside Avenue - Combined	77.40	77.54	0.14
Magnolia Avenue	Woodside Avenue	SR-52	77.15	77.27	0.12
SR-67			83.50	83.55	0.05
Aggregate Total @ 50 Feet			**85.29**	**85.41**	**0.12**
Project Driveway, Wheatlands Avenue, SR-67 Segment Aggregate Total @ 50 Feet			**83.64**	**83.76**	**0.11**

Best Practices for Limiting Construction Noise

Despite the construction noise analysis above showing that the impact to noise-sensitive receivers would be less than significant, the following is a list of best practices for limiting construction noise that should be implemented by the contractor:

- The project contractor shall, to the extent feasible, schedule construction activities to avoid concurrent operation of several pieces of construction equipment proximate to an offsite noise-sensitive receptor.
- All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers.
- Construction noise reduction methods such as shutting off idling equipment, maximizing the distance between construction equipment staging areas and adjacent residences, and use of electric air compressors and similar power tools, rather than diesel equipment, shall be used where feasible.
- Construction hours, allowable workdays, and the phone number of the job superintendent shall be clearly posted at all construction entrances to allow surrounding property owners to contact the job superintendent if necessary. In the event the City receives a complaint, appropriate corrective actions shall be implemented, and a report of the action provided to the reporting party.

Long-Term Operational Noise

Off-Site Traffic Noise Exposure

The project is expected to generate an additional 1,440 average daily trips to the roadway system, as shown in Table 1 of the project's Transportation Technical Memorandum. During the afternoon (PM) peak-hour (the highest of the AM and PM peak hours), approximately 148 passenger car equivalent vehicles are estimated to enter or exit the project site. Utilizing this information as well as additional traffic data provided in Appendix C, of this technical report, the FHWA's Highway Traffic Noise Prediction Model RD-77-108 was used to estimate potential noise impacts at adjacent noise-sensitive uses. Information used in the model included Average Daily Traffic (ADT), posted traffic speeds, truck mix percentage, and day/evening/night mix percentage.

Consistent with Caltrans guidance (Caltrans 2013), this analysis assumes 80% of the ADT occurs during daytime hours (7:00 a.m. to 7:00 p.m.), 5% during the evening (7:00 p.m. to 10:00 p.m.), and 15% during the nighttime (10:00 p.m. to 7:00 a.m.). The future modeled traffic speed was assumed to be the anticipated speed limit for the studied future roads, which is 45 miles per hour (mph) for Woodside Avenue, 40 mph for N. Woodside Avenue and Magnolia Avenue, and 25 mph for Wheatlands Avenue and the project driveway. The truck percentages used in the noise model were 4.6% medium trucks and 22.9% heavy trucks. This truck mix is based on the project trip truck percentages from Table 1 of the project's Transportation Technical Memorandum.

The change in roadway noise levels was predicted for two conditions: existing, near-term, and horizon year 2035 plus project. Traffic noise levels were calculated for roadway segments bounded by intersections within the project area and are listed as follows:

Project Driveway – From N. Woodside Avenue to the Project;
- Wheatlands Avenue – From N. Woodside Avenue to Wheatlands Road;
- N. Woodside Avenue – From Wheatlands Avenue to Woodside Avenue (combined north/south split);
- Woodside Avenue – From Magnolia Avenue to the Woodside Avenue north/south split;
- Magnolia Avenue – From Woodside Avenue to SR-52; and
- SR-67 (project trip traffic was not available for this roadway).

Based upon the FICON thresholds presented in Section 2.1.2 above, an increase of less than 5 dBA when the ambient sound level is less than 60 dBA L_{dn}/CNEL, less than 3 dBA when the ambient sound level is between 60 and 65 dBA L_{dn}/CNEL, or less than 1.5 dBA when the ambient sound level is greater than 65 dBA L_{dn}/CNEL would not be significant. Utilizing the traffic noise modeling worksheets found in Appendix C, Table 7 shows that the highest predicted change in traffic noise level (the project driveway) combined with the roadways surrounding the immediate project site are predicted to experience an aggregate total traffic noise level of 84 dBA at 50 feet for the horizon year 2035 condition with a predicted increase of less than 1 dBA due to the project contribution. Although the aggregate predicted "with project" condition is greater than the City limit as summarized in Section 2.3.3.1, the predicted "without project" level at the nearest sensitive receivers is also greater than the City limit, with a predicted "with project" increase of less than 1 dBA, which is less than the FICON 1.5 dBA threshold when the ambient sound level is greater than 65 dBA L_{dn}/CNEL, and would be considered imperceptible to the average person. Additionally, although the increase in noise level for the project driveway is greater than 5 dBA and therefore higher than the FICON thresholds and perceptible to the average person, there are no noise-sensitive receptors adjacent to the project driveway; the nearest noise-sensitive receptors to the south of the project are already dominated by much

higher levels of traffic noise from nearby adjacent roadways such as SR-67, while noise-sensitive receptors to the north of the project are occluded from the project driveway by intervening buildings and terrain. Therefore, potential impacts at existing off-site noise-sensitive land uses along roadway segments identified in Table 7 and with respect to project-generated changes to future traffic noise would be less than significant.

Table 7. Predicted Traffic Noise Levels

Project Sound Sources

On-site Outdoor Mechanical Equipment

The completion of the building will add a variety of noise-producing mechanical equipment that include those presented and discussed in the following paragraphs. Most of these noise-producing equipment or sound sources would be considered stationary or limited in mobility to a defined area.

Prediction Method and Parameters

The aggregate noise emission from these outdoor-exposed sound sources has been predicted with the Datakustik CadnaA sound propagation program. CadnaA is a commercially available software program for the calculation, presentation, assessment, and prediction of environmental noise based on algorithms and reference data per International Organization of Standardization (ISO) Standard 9613-2, "Attenuation of Sound During Propagation Outdoors, Part 2: General Method of Calculation" (ISO 1996). The CadnaA computer software allows one to position sources of sound emission in a simulated three-dimensional (3-D) space having heights and footprints consistent with project architectural plans and elevations. In addition to the above-mentioned sound source inputs and building-block structures that define the three-dimensional sound propagation model space, the following assumptions and parameters are included in this CadnaA-supported stationary noise source assessment:

- Ground effect acoustical absorption coefficient equal to 0.5, which intends to represent an average or blending of ground covers that are characterized largely by hard reflective pavements and existing building surfaces across the project site and the surroundings;
- Reflection order of 1, which allows for a single reflection of sound paths on encountered structural surfaces such as the modeled building masses;
- Off-site residential structures and buildings have not been rendered in the model;
- An 8' tall, 568' long overlapped barrier was modeled on the northern perimeter of the project site;
- Calm meteorological conditions (i.e., no wind) with 68 degrees Fahrenheit and 50% relative humidity; and
- All of the modeled noise sources are operating concurrently and continuously for a minimum period of 1 hour.

Based on the available plans and other design information, the proposed project building would be served by roof-mounted air-conditioning equipment that includes outdoor-exposed packaged air-handling units and air-cooled condensers (ACC) that provide the expected cooling demand (expressed as refrigeration "tonnage") for a building. The following are descriptions of modeled sound sources, with Table 8 exhibiting modeled sound power level (PWL) data at octave-band center frequency (OBCF) resolution. Detailed information supporting these summary descriptions and quantities appear in Appendix D.

Table 8. Modeled Sound Power Levels (PWL) for Stationary Sources (HVAC)

Building	Sound Source	Overall L_{eq} (dBA)	A-Weighted dB at Octave Band Center Frequency (OBCF, Hz)								
			32.5	63	125	250	500	1000	2000	4000	8000
1	Air Handling	93	74	74	86	87	88	85	78	72	67
	Air Conditioning	98	74	74	81	88	92	91	91	89	80

The HVAC reference sound levels were calculated from a combination of inputs that include square footage values for the proposed project's proposed office spaces, project applicant response to data requests, and manufacturer sound power level data. For the analysis of noise from HVAC equipment operation, eight air conditioning units were modeled on the rooves of the project building.

Other Stationary Noise Sources

The proposed project building may feature other noise emitters, but their contributions would tend to be sporadic or otherwise occur infrequently and thus be expected to have no greater acoustic contribution to an hourly L_{eq} than the continuous-type HVAC noise studied herein.

Loading Dock Noise Sources

The proposed project building also features loading dock areas for the loading and unloading of heavy trucks. Onsite loading dock noise was calculated for a single heavy truck pass by (Salter 2014) and extrapolated based upon the number of heavy trucks entering or exiting the facility during the peak hour. Backup alarms are also included in the truck noise level calculations. Loading dock data were subsequently entered into the CadnaA model for the prediction of stationary operations noise levels. Detailed information supporting the calculation of daytime and nighttime loading dock noise be found in Appendix D.

Prediction Results

An operational scenario of the proposed project was modeled that assumes all the HVAC equipment is operating simultaneously for a minimum period of one hour along with peak hour truck movements in the loading dock areas. Figure 5, Predicted Daytime Onsite Operations Noise Contours, displays the predicted noise contours associated with aggregate sound propagation from operating HVAC and peak daytime loading dock sound sources. An additional operational scenario of the proposed project was modeled to predict a hypothetical nighttime scenario, where all the HVAC equipment is operating simultaneously for a minimum period of one hour, but the peak hour truck movement is reduced to 25% of the peak for each docking area. Figure 6, Predicted Nighttime Onsite Operations Noise Contours, displays the predicted noise contours associated with aggregate sound propagation from operating HVAC and nighttime loading dock sound sources.

Figures 5 and 6 illustrate predicted aggregate SPL propagation solely from operation of the proposed project stationary sound sources as described herein. The color-coded annular bands of SPL are calculated across a field parallel with and five (5) feet above local grade.

Based on the noise level contours appearing in Figures 5 and 6, the proposed project is predicted to be up to 67 dBA L_{eq} in the daytime and 60 dBA L_{eq} in the nighttime for a calculated L_{dn} of 68 dBA at the adjacent industrial land uses and is therefore expected to be lower than and thus comply with the City's 75 dBA L_{dn} threshold for industrial land uses. Further, the proposed project is predicted to be up to 40 dBA L_{eq} in the daytime and 35 dBA L_{eq} in the nighttime for a calculated L_{dn} of 43 dBA at the noise-sensitive receptors to the north of the project site and up to 43 dBA L_{eq} in the daytime and 38 dBA L_{eq} in the nighttime for a calculated L_{dn} of 46 dBA at the noise-sensitive receptors to the south of the project site, both of which are therefore predicted to be lower than and thus comply with the City's 65 dBA L_{dn} threshold for residential land uses.

Table 2 shows existing background sound levels in the natural habitat area to the north of the project site in the 50 to 56 dBA L_{eq} range, while Figures 5 and 6 show maximum predicted operational noise levels in the 35 to 45 dBA range in the same area. Therefore, project-related operational noise levels are predicted to be less than the current sound levels in the natural habitat area closest to the project site by a factor of 5 to 21 dBA. It should be noted that these predictions include the assumption of an 8' tall, 568' long overlapped barrier on the northern perimeter of the project site.

On-site Parking Activity

Less Than Significant Impact. A comprehensive study of noise levels associated with surface parking lots was published in the Journal of Environmental Engineering and Landscape Management (Baltrënas et al. 2004). The study found that average noise levels for parking lots of similar size during the peak period of use of the parking lot (generally in the morning with arrival of commuters, and in the evening with the departure of commuters), was 47 dBA L_{eq} at 1 meter (3.28 feet) from the outside boundary of the parking lot. The parking areas would function as point sources for noise, which means that noise would attenuate at a rate of 6 dBA with each doubling of distance. Employee parking spaces are proposed to be distributed throughout the project site adjacent to the warehouse/office building, no closer than 700 feet from the edge of the closest parking space to the nearest residences to the north. At a distance of 700 feet, parking space noise levels would not be audible to the human ear at the nearest residences. The combination of the parking space noise (<2 dBA L_{eq}) and the predicted stationary operation level (43 dBA L_{eq} at the nearest receptor) would be 43 dBA L_{eq}[1], which would be well below the applicable limits (i.e. 65 dBA L_{dn} for residential receptors). Therefore, impacts associated with parking noise would be less than significant.

b) Would the project result in generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact. Construction activities may expose persons to excessive groundborne vibration or groundborne noise, causing a potentially significant impact. Caltrans has collected groundborne vibration information related to construction activities (Caltrans 2020). Information from Caltrans indicates that continuous vibrations with a PPV of approximately 0.2 ips is considered annoying. For context, heavier pieces of construction equipment, such as a bulldozer that may be expected on the project site, have peak particle velocities of approximately 0.089 ips or less at a reference distance of 25 feet (DOT 2006).

Groundborne vibration attenuates rapidly, even over short distances. The attenuation of groundborne vibration as it propagates from source to receptor through intervening soils and rock strata can be estimated with expressions found in FTA and Caltrans guidance. By way of example, for a bulldozer operating on-site and as close as the northern project boundary (i.e., 310 feet from the nearest occupied property), the estimated vibration velocity would be 0.0006 ips per the equation as follows (FTA 2006):

$$PPV_{rcvr} = PPV_{ref} * (25/D)^{1.5} = 0.002 = 0.089 * (25/310)^{1.5}$$

In the above equation, PPV_{rcvr} is the predicted vibration velocity at the receiver position, PPV_{ref} is the reference value at 25 feet from the vibration source (the bulldozer), and D is the actual horizontal distance to the receiver. Therefore,

1 Because noise levels are summed in the energy (that is, the logarithmic) domain, a noise level that is 10 decibels or more lower than another noise level becomes negligible, because the sound energy from the higher noise source is completely dominant.

at this predicted PPV, the impact of vibration-induced annoyance to occupants of nearby existing homes would be less than significant.

Construction vibration, at sufficiently high levels, can also present a building damage risk. However, anticipated construction vibration associated with the proposed project would yield a maximum amplitude of 0.002 ips, which does not surpass the guidance limit of 0.2 to 0.3 ips PPV for preventing damage to residential structures (Caltrans 2020). Because the predicted vibration level at 310 feet is less than this guidance limit, the risk of vibration damage to nearby structures is considered less than significant.

Once operational, the proposed project would not be expected to feature major producers of groundborne vibration. Anticipated mechanical systems like heating, ventilation, and air-conditioning units are designed and manufactured to feature rotating (fans, motors) and reciprocating (compressors) components that are well-balanced with isolated vibration within or external to the equipment casings. On this basis, potential vibration impacts due to proposed project operation would be **less than significant**.

C) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

There are no private airstrips within the vicinity of the project site. The closest airport to the proposed project site is the Gillespie Field regional airport, approximately 1.5 miles west of the project boundary. According to the Gillespie Field Community Relations Traffic Pattern Review Appendix C: Noise Analysis, the project falls outside the studied noise contours. Impacts would be **less than significant.**

6 Summary of Findings

This noise report was conducted for the proposed project. The results indicate that potential impacts during construction would **be less than significant**; nevertheless, best practices that incorporate construction noise reduction techniques would be incorporated into the project construction process. Noise impacts due to operation of the proposed project (including traffic noise) would be **less than significant**. No noise and vibration mitigation measures are anticipated at this time.

SITE PLAN GENERAL NOTES

1. THE SITE PLAN SHALL MEET ALL ENGINEERING & NPDES REQUIREMENTS.
2. GENERAL CONTRACTOR TO REVIEW THE SOILS REPORT AND ALL AMENDMENTS LISTED ON THE TITLE SHEET AND FOLLOW ALL RECOMMENDATIONS.
3. U.O.N., ALL DIMENSIONS TO CONCRETE WALLS AND CURBS ARE EITHER TO THE CENTER (SHOWN WITH A CENTERLINE) OR FACE OF THE WALL OR CURB. ALL DIMENSIONS TO FRAMED WALLS ARE EITHER TO THE CENTER LINE OF THE WALL FRAMING (SHOWN WITH A CENTERLINE) OR THE FACE OF THE WALL FINISH.
4. REFER TO CIVIL, AND MEP PLANS TO CONFIRM UTILITY INFORMATION SHOWN ON THE ARCHITECT'S SITE PLAN AND FOR ADDITIONAL UTILITY INFORMATION. GENERAL CONTRACTOR TO COORDINATE ALL POINTS OF CONNECTION.
5. REFER TO CIVIL DRAWINGS FOR ALL FINISHED GRADES AND SLOPES. ALL FINISHED GRADES TO PROVIDE POSITIVE DRAINAGE AWAY FROM THE BUILDING. GENERAL CONTRACTOR TO FIELD VERIFY.
6. ALL ACCESSIBLE ROUTES IDENTIFIED ON THE SITE PLAN DRAWINGS SHALL CONFORM TO THE FOLLOWING:
   a) SLOPES IN THE DIRECTION OF TRAVEL DO NOT EXCEED 5%. CROSS SLOPES DO NOT EXCEED 2%.
   b) THE CLEAR WIDTH OF ALL WALKWAYS IS 4'-0" MIN.
   c) CHANGES IN LEVEL UP TO 1/2" COMPLY w/ 11/A0.2.1. CHANGES IN LEVEL GREATER THAN 1/2" IF THEY OCCUR ARE RAMPED. SEE PLANS.
   d) THE VERTICAL CLEARANCE ALONG THE ACCESSIBLE ROUTE IS 80" MIN.
7. ALL PAVED AND LANDSCAPED AREAS TO BE BOUND BY A MIN. 6" HIGH, 6" WIDE CONCRETE CURB U.O.N.
8. A CONCRETE MOW STRIP EXTENDING 12" BEYOND EA END OF THE OPENING SHALL BE PROVIDED @ ALL EXTERIOR GLAZING WHERE THE SILL IS WITHIN 3' VERTICAL OF THE FINISHED GRADE. SEE 2/AD1.1
10. PROVIDE PIPE BOLLARD PROTECTION POSTS AS REQUIRED BY UTILITY COMPANIES AND OR FIRE AUTHORITIES AT ALL EXTERIOR ELECTRICAL EQUIPMENT AND FIRE PREVENTION DEVICES. IF PIPE BOLLARD PROTECTION POST DETAILS ARE NOT PROVIDED BY UTILITY COMPANIES AND OR FIRE AUTHORITY SEE DETAIL 3/AD1.1
11. ALL EXPOSED BIORETENSION DEVICE COVERINGS SHALL BE PAINTED FOREST GREEN.
12. WHERE OCCURS, GENERAL CONTRACTOR TO PROVIDE FLUID APPLIED DAMP PROOFING AT ALL RETAINING AND PLANTER WALLS WHERE THE SIDE OF THE WALL OPPOSITE THE SOIL SIDE IS EXPOSED TO VIEW AND ALL EXTERIOR WALLS WHERE THE ADJACENT FLOOR SLAB IS BELOW GRADE. SEE 6/AD1.2
13. PROVIDE A HOSE BIB NEAR THE MAIN ENTRANCE AND IN THE TRASH ENCLOSURE. SEE PLAN FOR LOCATION.

Notes	BM Kris Jerpseth areived at Santee warehouse project at 0800, using SN 2606 piccolo II noise meter. It took some time to get correct coordinates, starting at the wrong side of the highway then doubling back to Site 1. Swap meet, the highway and many planes flying overhead were the main source of noise. Site 1, Meter set up in front of apartment complex highway 0900 start, recording 364, 76.8 dB 100 cars counted in less than a minute and a half. Site 2, 0920 start, recording 368, 55.6 dB Airplane overhead at 0922, 0926, 0932, Site 4, 0944 start, recording 372, 53.1 dB Airplane overhead at 0947, 0948, 0952, 0956, 0957, 0958, 0959. Site 3, 1020 start, recording 377, 60.3 dB Airplane overhead at 1023, 1032, cars passed on road ahead of meter after selling wares at swap meet. BM collected equipment and left at 1100.
Number of Nests Observed	0

1 Introduction

1.1 Purpose and Scope

The purpose of this Transportation Impact Study (TIS) is to identify impacts associated with a proposed 300,145 square foot (SF) industrial/warehousing building (proposed project or project) in the City of Santee (City). Pursuant to Senate Bill (SB) 743, the focus of transportation analyses has shifted from vehicle delay (and level of service [LOS]) to vehicle miles traveled (VMT) under the California Environmental Quality Act (CEQA). Given the need to prepare VMT-based CEQA transportation impact analyses per SB 743, the City's VMT guidelines were released in April 2022. The need to evaluate the performance of the roadway system based on delay and LOS is for General Plan consistency requirements. The objectives of this study are to provide both, CEQA and non-CEQA assessments of the project per analysis methodology and guidelines adopted by the City. Therefore, this TIS has been prepared consistent with the City of Santee VMT Analysis Guidelines (April 13, 2022), Guidelines for Transportation Impact Studies in the San Diego Region (May 2019) and the City of Santee Mobility Element (October 2017).

The scope of the analysis was submitted to the City for approval prior to preparing this study. The approved scope is included in Appendix A.

CEQA Assessment

- Provide a VMT analysis per SB 743, CEQA requirements, and City's VMT Analysis Guidelines.
- Identify mitigation measures for any significant transportation impacts.

The study area for the CEQA analysis is the San Diego region, and the SANDAG SB 743 VMT maps have been used in the project's VMT analysis.

Non-CEQA Assessment

- Estimate trip generation, distribution, and assignment characteristics of the project.
- Document existing roadway, pedestrian, bicycle, and transit facilities in the study area.
- Document Existing, Near Term, and Horizon Year traffic conditions (without and with project), including intersection LOS and roadway segment capacity analysis.
- Analyze the potential for LOS and capacity effects to occur as a result of the project under the Existing Near Term and Horizon Year conditions.
- Provide evaluation of left turn at the project access driveway at Woodside Avenue.
- Describe if any operational or physical network improvements are needed.
- Provide findings and recommendations based on the non-CEQA assessment of the project.

The study area for the LOS analysis is generally based on the threshold of 50 or more AM or PM peak-hour project trips that pass through an intersection. Based on the project's trip generation (Table 1) and trip distribution shown on Figure 3, the following roadway segments and intersections are proposed for the project's LOS analysis:

Roadway Segments

1. N. Woodside Avenue, between Project Driveway and Woodside Avenue
2. Woodside Avenue, between Magnolia Avenue and N. Woodside Avenue – Woodside Avenue
3. Magnolia Avenue, between Woodside Avenue-Mission Gorge Road and State Route (SR)-52 westbound on-ramp-SR-67 southbound on-ramp

Intersections

1. Magnolia Avenue/SR-52 eastbound off-ramp
2. Magnolia Avenue/SR-52 westbound on-ramp - SR-67 southbound on-ramp
3. Magnolia Avenue-Mission Gorge Road/Woodside Avenue
4. N. Woodside Avenue/Woodside Avenue – SR-67 southbound off-ramp
5. Hartley Road/N. Woodside Avenue
6. Wheatlands Avenue/N. Woodside Avenue
7. Project Access Roadway/N. Woodside Avenue

Figure 1, Project Location and Study Area, shows the project location and study area selected to assess the project's potential traffic effects.

Analysis Scenarios

Roadway segment and intersection LOS analyses were prepared for the weekday 24-hour average daily traffic (ADT) condition and AM and PM peak hours at the study area roadway segments and intersections, respectively, for the following analysis scenarios:

Existing Conditions

The TIS includes a description of existing traffic conditions in the site vicinity, including existing roadway system, existing weekday AM and PM peak-hour traffic volumes, and operational analysis of the study area roadway segments and intersections. The existing condition is representative of the year 2023.

Existing plus Project

This condition includes analysis of traffic operations under existing conditions with project traffic added to the existing ADT and AM and PM peak hour intersection traffic volumes. The traffic effects specific to the project under this condition were used as the basis for determining the project's direct effects.

Near Term Conditions

This condition includes analysis of traffic operations under Near Term conditions within a short-term horizon period of approximately three years where the proposed project is constructed and fully occupied. Near Term traffic volumes (ADT and AM and PM peak hour) include existing traffic volumes and traffic generated by other approved and pending projects in the study area. The approved or pending projects are developments in the review process, but not fully approved; or projects that have been approved, but not fully constructed or occupied.

Near Term plus Project

This condition includes analysis of traffic operations under Near Term conditions with project traffic added to the Near-Term ADT and AM and PM peak hour intersection traffic volumes. The traffic effects specific to the project under this condition were used as the basis for determining the project's short-term cumulative effects.

Horizon Year Conditions

This condition includes analysis of traffic operations under Horizon Year conditions within a long-term period and is generally consistent with Year 2035. The horizon Year traffic volumes (ADT and AM and PM peak hour) have been estimated using the recently approved Fanita Ranch Traffic Impact Study (LLG 2020).

Horizon Year plus Project

This condition includes analysis of traffic operations under Horizon Year conditions with project traffic added to the Horizon Year ADT and AM and PM peak hour intersection traffic volumes. Based on review of the SANDAG land use and trip rate used in the General Plan Mobility Element for the traffic analysis zone (TAZ) the project is located within, it was noted that the project trip generation exceeded the TAZ trip generation for allowable light industrial use by approximately 33.6%. Therefore, to account for the additional project trip generation, approximately, 33.6% of the project traffic was added to the Horizon Year intersections and roadway segments. The Horizon Year intersection volumes were not available for the entire study area along Woodside Avenue. Therefore, to provide a conservative analysis, 100% of the project trips were assigned to the project driveways and intersections along Woodside Avenue near the project site. The traffic effects specific to the project under this condition were used as the basis for determining the project's long-term cumulative effects.

1.2 Project Description and Location

The proposed project includes the demolition of the existing drive-in theater and the construction of a 300,145 SF industrial/warehousing building as well as associated improvements including loading docks, trailer stalls, passenger vehicle parking spaces, and street, sidewalk, and landscape improvements. The building could be used for multiple tenants for warehousing and distribution, manufacturing, assembly, research and development, and related office uses. The project is located at 10990 Woodside Avenue in the City. The Assessor Parcel Number (APN) of the Project site is 381-070-5200. The City's General Plan Land Use Map designates the project site the entire site as Light Industrial.

Figure 1 illustrates the project's location. Regional access to the project site is available from SR-52 and SR-67 via Magnolia Avenue, Woodside Avenue, and Riverford Road. The Project would be accessed via a dedicated drive aisle on Woodside Avenue which leads to two 40-foot-wide driveways. These driveways and an on-site roadway would provide access to the vehicle parking lots and two truck courts. Vehicle parking for employees would be in parking lots along the periphery of the project site. The site plan of the proposed project is shown on Figure 2.

1.3 Analysis Methodology

1.3.1 Vehicle Miles Traveled Analysis for CEQA

On September 27, 2013, SB 743 was signed into law, which creates a process to change the way that transportation impacts are analyzed under CEQA. SB 743 required the Governor's Office of Planning and Research (OPR) to amend the CEQA Guidelines to provide an alternative to LOS for evaluating transportation impacts. Under the new transportation guidelines, LOS, or vehicle delay, will no longer be considered an environmental impact under CEQA. The updates to the CEQA Guidelines required under SB 743 were approved on December 28, 2018. These guidelines identify VMT as the most appropriate measure of transportation impacts under CEQA and were required to be implemented on July 1, 2020.

The requirements to prepare a detailed transportation VMT analysis apply to all discretionary land development projects that are not exempt from CEQA, except those that meet at least one of the transportation screening criteria. A project that meets at least one of the screening criteria below would be presumed to have a less than significant VMT impact due to project characteristics and/or location.

Per the City's TIA guidelines, for project's that do not screen out VMT should include analysis using the SANDAG Regional Travel Demand Model. The model outputs can be used to produce VMT/capita, VMT/employee, and Total VMT. For employment projects (Industrial/Non-industrial), the City's VMT guidelines the following criteria:

- For projects that generate fewer than 2,400 daily unadjusted driveway trips: Identify the location of the project on the City's VMT/employee map. The project's VMT/employee will be considered the same as the VMT/capita of the TAZ as shown on the VMT/employee map. Compare the project's VMT/employee to the threshold to determine if the impact is significant, or, if desired or requested by the City, input the project into the SANDAG Regional Travel Demand Model to determine the project's VMT/employee.
- For projects that generate 2,400 or greater daily unadjusted driveway trips: Larger projects will typically be analyzed using a custom model run by inputting the project into the SANDAG Regional Travel Demand Model. To perform the analysis, all project land uses should be inputted, and the VMT/employee should be determined using the same method/scripts that SANDAG utilizes to calculate the VMT/employee threshold. There may be some circumstances where the use of screening maps or other sketch modeling tools are appropriate for larger projects, especially if the project has the same characteristics of the land uses that are already contained in the TAZ where the project is located or if the project is unique in nature and project specific travel behavior information is available.

As shown in Section 2 Project Traffic, the project would generate less than 2,400 daily trips. As shown in Section 3.0, the project would not meet any VMT screening criteria, therefore, the project's VMT evaluation has been conducted using the SANDAG SB 743 VMT maps.

SITE PLAN GENERAL NOTES

1. THE SITE PLAN SHALL MEET ALL ENGINEERING & NPDES REQUIREMENTS.
2. GENERAL CONTRACTOR TO REVIEW THE SOILS REPORT AND ALL AMENDMENTS LISTED ON THE TITLE SHEET AND FOLLOW ALL RECOMMENDATIONS.
3. U.O.N., ALL DIMENSIONS TO CONCRETE WALLS AND CURBS ARE EITHER TO THE CENTER (SHOWN WITH A CENTERLINE) OR FACE OF THE WALL OR CURB. ALL DIMENSIONS TO FRAMED WALLS ARE EITHER TO THE CENTER LINE OF THE WALL FRAMING (SHOWN WITH A CENTERLINE) OR FACE OF THE WALL FRAMING.
4. REFER TO CIVIL AND MEP PLANS TO CONFIRM UTILITY INFORMATION SHOWN ON THE ARCHITECT'S SITE PLAN AND FOR ADDITIONAL UTILITY INFORMATION. GENERAL CONTRACTOR TO COORDINATE ALL POINTS OF CONNECTION.
5. REFER TO CIVIL DRAWINGS FOR ALL FINISHED GRADES AND SLOPES. ALL FINISHED GRADES TO PROVIDE POSITIVE DRAINAGE AWAY FROM THE BUILDING. GENERAL CONTRACTOR TO FIELD VERIFY.
6. ALL ACCESSIBLE ROUTES IDENTIFIED ON THE SITE PLAN DRAWINGS SHALL CONFORM TO THE FOLLOWING:
   a) SLOPES IN THE DIRECTION OF TRAVEL DO NOT EXCEED 5%, CROSS SLOPES DO NOT EXCEED 2%.
   b) THE CLEAR WIDTH OF ALL WALKWAYS IS 4'-0" MIN.
   c) CHANGES IN LEVEL UP TO 1/2" COMPLY w/ 11A\D.2.1. CHANGES IN LEVEL GREATER THAN 1/2" IF THEY OCCUR ARE RAMPED. SEE PLANS.
   d) THE VERTICAL CLEARANCE ALONG THE ACCESSIBLE ROUTE IS 80" MIN.
7. ALL PAVED AND LANDSCAPED AREAS TO BE BOUND BY A MIN. 6" HIGH, 6" WIDE CONCRETE CURB U.O.N.
8. A CONCRETE MOW STRIP EXTENDING 12" BEYOND EA END OF THE OPENING SHALL BE PROVIDED @ ALL EXTERIOR GLAZING WHERE THE SILL IS WITHIN 3' VERTICAL OF THE FINISHED GRADE. SEE 2/AD1.1
10. PROVIDE PIPE BOLLARD PROTECTION POSTS AS REQUIRED BY UTILITY COMPANIES AND OR FIRE AUTHORITIES AT ALL EXTERIOR ELECTRICAL EQUIPMENT AND FIRE PREVENTION DEVICES. IF PIPE BOLLARD PROTECTION POST DETAILS ARE NOT PROVIDED BY UTILITY COMPANIES AND OR FIRE AUTHORITY SEE DETAIL 3/AD1.1
11. ALL EXPOSED BIORETENSION DEVICE COVERINGS SHALL BE PAINTED FOREST GREEN.
12. WHERE OCCURS, GENERAL CONTRACTOR TO PROVIDE FLUID APPLIED DAMP PROOFING AT ALL RETAINING AND PLANTER WALLS WHERE THE SIDE OF THE WALL OPPOSITE THE SOIL SIDE IS EXPOSED TO SPACE. WALLS SHALL BE DAMP PROOFED FROM ADJACENT FLOOR SLAB IN BELOW GRADE. SEE 6/AD1.2
13. PROVIDE A HOSE BIB NEAR THE MAIN ENTRANCE AND IN THE TRASH ENCLOSURE. SEE PLAN FOR LOCATION.

1.3.2 Level of Service Analysis for Non-CEQA

In addition to a VMT analysis required under CEQA, the City determines the need for a transportation analysis in conformance with the land use and transportation elements of the General Plan. The City uses the criteria from the *Guidelines for Transportation Impact Studies in the San Diego Region* (May 2019).

Per the regional guidelines, a traffic analysis would be required if a project exceeds 500 ADT and is inconsistent with the adopted General Plan or exceeds 1,000 ADT and is consistent with the adopted General Plan.

As discussed in Section 2, the project is forecast to generate 1,440 passenger car equivalent [PCE] daily trips. Therefore, this study provides a traffic analysis discussing operations of selected roadway segments and intersections, under existing, near-term, and horizon year conditions.

LOS is commonly used as a qualitative description of intersection operations and roadway segments and is based on the design capacity of the intersection configuration and roadway facility, compared to the volume of traffic using the facility. The acceptable LOS for the City is LOS D.

1.3.2.1 Roadway Segments

Roadway segment analysis is based upon the comparison of ADT to the City of Santee Mobility Element Roadway Classification LOS and Standards Table. This table provides level of service thresholds for different street classifications, based on traffic volumes, and roadway characteristics. Table 1 presents guidance on the levels of ADT that can be accommodated on various types of roadways, based on level of service.

Table 1. City of Santee Roadway Classifications and Standards

Class	Lanes	Level of Service (LOS)				
		A	B	C	D	E
Prime Arterial	6	25,000	35,000	50,000	55,000	60,000
Major Arterial	4	15,000	21,000	30,000	35,000	40,000
Parkway	4	15,000	21,000	30,000	35,000	40,000
	2 lanes w/TWLTL	5,000	7,000	10,000	13,000	15,000
	2	4,000	5,500	7,500	9,000	10,000
Collector	2 lanes w/TWLTL	5,000	7,000	10,000	13,000	15,000

Notes:
* Represents design capacity of non-CE road. LOS does not apply to non-CE roads.

1.3.2.2 Intersections

The *Highway Capacity Manual, 6th Edition* (HCM 6) methodology (Transportation Research Board 2016) was used to analyze the operation of the signalized study intersections. The HCM analysis methodology describes the operation of an intersection using a range of LOS from LOS A (free-flow conditions) to LOS F (severely congested conditions), based on the corresponding control delay experienced per vehicle. The Synchro 11 LOS software was used to determine intersection LOS. Synchro is consistent with the HCM 6 methodology.

Table 2 shows the LOS values by delay ranges for unsignalized and signalized intersections under the HCM methodology.

Table 2. Levels of Service for Intersections using HCM Methodology

Level of Service	Unsignalized Intersections Control Delay (in seconds per vehicle)	Signalized Intersections Control Delay (in seconds per vehicle)
A	< 10.0	< 10.0
B	> 10.0 to < 15.0	> 10.0 to < 20.0
C	> 15.0 to < 25.0	> 20.0 to < 35.0
D	> 25.0 to < 35.0	> 35.0 to < 55.0
E	> 35.0 to < 50.0	> 55.0 to < 80.0
F	> 50.0	> 80.0

Source: HCM 6 (TRB 2016).

A queuing analysis using SimTraffic 11 software was conducted was conducted to determine the 95th percentile (design) queue and the average queue of the existing and proposed storage lanes at the N. Woodside Avenue/S. Woodside Avenue – SR-67 SB Off-Ramp intersection. The 95th percentile and average queues are then compared to the provided storage lane lengths to determine whether the queue can be adequately stored.

1.4 Need for Roadway Improvements and Mitigation Measures

Table 3 indicates when a project's effect on the roadway system is considered to justify the need for roadway improvements. That is, if a project's traffic effect causes the values in this table to be exceeded, roadway improvements should be considered.

Table 3. Determination of the Need for Roadway Improvements

Level of Service with Project	Allowable change Due to Project Effect				
	Freeways		Roadway Segments		Intersections
	V/C	Speed (mph)	V/C	Speed (mph)	Delay (Seconds)
LOS E and F	0.01	1	0.02	1	2

Source: Table 7-1 Determination of the Need for Roadway Improvements, Guidelines for San Diego Region. Guidelines for Transportation Impact Studies in the San Diego Region (May 2019).
Notes: V/C = Volume-to-Capacity, mph = miles per hour

The San Diego region guidelines state that not all improvement measures can feasibly consist of roadway widening (new lanes or new capacity). Therefore, financing toward a defined Intelligent Transportation System project, enhanced traffic signal communications project, or active transportation projects should be considered.

Additionally, per City of Santee Mobility Element Policy 2.1, “The City shall encourage an automobile Level of Service “D” on street segments and at intersections throughout the circulation network while also maintaining or improving the effectiveness of the non-automotive components of the circulation system (i.e. pedestrians, bicyclists, and public transit). The City may approve a lower automobile Level of Service if it finds that the effectiveness of non-automotive components of the circulation system would be maintain ed or improved as a result. In other cases, the City shall not approve any development that causes a drop in the level of service at a street segment or an intersection to LOS "E" or "F", after feasible mitigation, without overriding social, economic, or other benefits.

For impacts related to CEQA analysis, i.e., VMT analysis, mitigation measures may include Transportation Demand Management recommendations – transit facilities, bike facilities, telecommuting, rideshare programs, flex-time, carpool incentives, parking cash-out, complete or partial subsidization of transit passes, etc.

INTENTIONALLY LEFT BLANK

2 Project Traffic

This section documents the trip generation, distribution, and assignment of project traffic in the study area. Due to discrepancies between industrial trip rates provided in SANDAG and ITE trip generation sources, the City allowed Dudek to conduct a Trip Generation Survey to determine the appropriate trip generation rates for the project. A trip generation survey of existing, similar industrial land uses was conducted to substantiate the use of trip rates from the current edition of the Institute of Transportation Engineers (ITE) Trip Generation, 11th Edition (2021). See Appendix A for details on the Trip Generation Survey and selection of ITE Industrial Park trip rate for the proposed project.

2.1 Trip Generation

Based on the driveway traffic count results, and the trip generation observed at all three industrial use sites (see Appendix A), the City approved the use of the ITE trip generation rate for the Industrial Park use (ITE Code 130) to estimate the project's daily, AM peak hour, and PM peak hour trip generation. The ITE daily trip rate (3.37 trips/TSF) is higher than Site 1 which had the highest surveyed empirical rate (3.15 trips/TSF). Additionally, to provide a conservative estimate of truck trips, the warehouse truck fleet mix from the South Coast Air Quality Management District's (SCAQMD) Warehouse Truck Trip Study Data Results and Usage (2014) was used to estimate project-related truck traffic. Based on the SCAQMD data, passenger cars would account for 72.5% trips of the total trips generated by a warehouse facility, and truck trips would account for approximately 27.5% of the total trips. The ITE and SCAQMD trip generation data are widely used for other industrial projects in southern California.

The total percentage of truck trips were further divided by 2-axle, 3-axle, and 4+ axle trucks per the SCAQMD study. These truck trips generated by the project are provided in passenger car equivalence (PCE) trips by using appropriate PCE factors. PCE factors consistent with the standard practice were used to estimate the total PCE trips for the project.

Using the trip rate for an Industrial Park contained in the ITE Trip Generation Manual, the project's daily, AM peak hour, and PM peak hour trips were estimated. As shown in Table 4, the proposed project would generate approximately 1,011 daily non-PCE trips, 102 AM peak hour trips (83 inbound and 19 outbound), and 103 PM peak hour trips (23 inbound and 80 outbound). Adjusting for PCE, the proposed project would generate approximately 1,440 daily PCE trips, 148 AM PCE peak hour trips (121 inbound and 27 outbound), and 146 PM PCE peak hour trips (30 inbound and 116 outbound).

2.2 Trip Distribution and Assignment

Project trip distribution percentages are based on logical travel paths to and from the project site, review of traffic studies conducted for nearby projects, and consideration of the traffic distribution patterns in the area. Figure 3 illustrates the proposed project trip distribution. As shown in the figure, approximately 80% of the passenger cars would west and 20% would travel east along Woodside Avenue from the project site. A majority of project-related trucks (approximately 90%) would travel west on Woodside Avenue to access the SR-52 ramps from Magnolia Avenue. The remaining 10% of project trucks would travel east on Woodside Avenue.

Based on the distribution percentage, Figures 4, 5, and 6 illustrate the project trip assignment for cars, trucks, and total trips (in PCE), respectively.

Table 4. Project Trip Generation Summary

Land Use	Daily Trip Rate/Unit		AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Trip Rates and Trip Generation								
Industrial Park1	3.37 trips/TSF		0.28	0.06	0.34	0.07	0.27	0.34

3 Existing Conditions

Characteristics of the adjacent existing street system roadways within the study area are described below. The existing traffic controls and geometrics at the study area intersections are shown in Figure 7.

3.1 Roadway System

Regional access to the project would be provided by SR-52 and SR-67. Local access to the project would be provided by Magnolia Avenue and Mission Gorge Road-Woodside Avenue. Both of these roadways are designated truck routes within the City.

Roadways

Characteristics of the adjacent existing street system roadways within the study area are described below.

Woodside Avenue

Woodside Avenue is an east-west roadway from Magnolia Avenue (where Mission Gorge Road ends) to Chestnut Street in Lakeside. Between Magnolia Avenue and SR-67 southbound-off ramp-Woodside Avenue intersection, Woodside Avenue is a Major Arterial, with four lanes and a center-two-way-left-turn lane (TWLTL). There are Class II bike lanes are provided on both sides of Woodside Avenue. The posted speed limit is 45 miles per hour (MPH).

Woodside Avenue splits into N. Woodside Avenue and Woodside Avenue east of the intersection with the SR-67 southbound off-ramp with N. Woodside Avenue paralleling SR-67 on the north and Woodside Avenue paralleling SR-67 on the south. N. Woodside Avenue is the segment between the SR-67 southbound-off ramp-Woodside Avenue intersection to Riverford Road in the Lakeside community of San Diego, and is designated as a Collector Road with a TWLTL. It is currently constructed with one lane in each direction with a center TWLTL and dedicated left-turn lanes at its intersections with Harley Road and Wheatlands Avenue. North of Wheatlands Avenue, the roadway is one lane in each direction without a TWLTL or dedicated left-turn lanes at intersections. There are Class II bike lanes on both sides of the N. Woodside Avenue. On-street parking is permitted along north side of N. Woodside Avenue. There are intermittent sidewalks along the roadway. The posted speed limit in the vicinity of the project is 40 MPH.

Magnolia Avenue

Magnolia Avenue is a north-south roadway. It is classified as a Major Arterial north of Mission Gorge Road and Prime Arterial from Mission Gorge Road to Prospect Avenue. On-street parking is not permitted along the roadway from Mission Gorge Road to Prospect Avenue. There is paved sidewalk along Magnolia Avenue. The posted speed limit along the roadway is 45 miles per hour.

3.2 Transit System

The San Diego Metropolitan Transit System (MTS) provides public transportation throughout Santee and northern San Diego County. Figure 8a illustrates the transit facilities in the vicinity of the proposed project. The nearest MTS bus routes serving the project are described below.

- Route 832 runs clockwise from Santee Town Center to northern Santee and back to Santee Town Center via Cuyamaca Street, and Magnolia Avenue. The route operates between 6:17am and 6:56pm on weekdays, with 30-minute headways, and between 8:25am and 4:45pm on weekends with 60-minute headways. The nearest bus stop is located west of the Magnolia Avenue and Mission Gorge Road – Woodside Avenue intersection, approximately 0.90 miles from the project site.
- Route 833 runs from the Santee Transit Center to the El Cajon Transit Center, via Mission Gorge Road, Magnolia Avenue, and Graves Avenue. The route operates between 5:52am and 6:12pm on weekdays, with 45-minute headways, and between 8:53am and 5:10pm on weekends, with 60-minute headways. The nearest bus stop is located west of Magnolia Avenue and Mission Gorge Road – Woodside Avenue intersection, approximately 0.90 miles from the project site.
- Route 834 runs in a loop, connecting the Santee Transit Center to the West Hills Parkway area, via Prospect Avenue and Carlton Oaks. The route operates only on weekdays from 6:33am to 3:30pm with 60-minuite headways. The nearest bus stop to the project site is approximately 2 miles away.

The City of Santee is served by the Green Line Trolley (Route 530), with the sole station within the City located at the Santee Transit Center. The Green Line connects Santee to the larger San Diego region and provides service into Downtown San Diego. The route operates from 5:00am to 1:00am with 15-minute headways on weekdays, and 30-minute headways on weekends. MTS ACCESS provides complementary, on-demand paratransit service to fulfill the unmet needs of residents such as seniors and persons with disabilities.

3.3 Pedestrian and Bicycle Facilities

The General Plan Circulation Element identifies the following bicycle facility classifications, as defined by Caltrans:

- **Class I Bikeway (Bike Path)** provide a completely separated right-of-way designated for the exclusive use of bicycles and pedestrians with crossflows by motor vehicles minimized.
- **Class II Bikeway (Bike Lane)** provides a striped lane designed for the exclusive or semi-exclusive use of bicycles with through travel by motor vehicles or pedestrians prohibited, but with pedestrian and motor vehicle crossflows permitted.
- **Class III Bikeway (Bike Route)** provides shared use of traffic lanes with cyclists and motor vehicles, identified by signage and street marking such as sharrows.
- **Class IV Bikeway (Cycle Track)** are separated bikeways that provide right-of-way designated exclusively for bicycle travel within the roadway and physically protected from vehicular traffic.

A Class II Bike Lane runs along Woodside Avenue; the bike lane along Woodside Avenue connects to bike route along Shadow Hill Road and Northcote Road, however, it does not connect to any other bicycle facility in the City. The Planned Bicycle Network in the Mobility Element is based on Active Santee Plan (2021). It recommends Class II bike lanes along Mission Gorge Road between Riverview Parkway and Magnolia Avenue and along Magnolia

Avenue between Mast Boulevard and Mission Gorge Road. Figure 8b illustrates the existing and proposed bike facilities near the project.

Sidewalks and pedestrian facilities are provided along one side of Woodside Avenue, and adjacent roadways within one-half mile of the project site. While pedestrian facilities such are crosswalks are missing within the immediate project area, the Santee Active Transportation Plan has identified this area as in need and is committed to improve the area by installing missing segments of sidewalks, adding pedestrian ramps and crosswalks, and relocating utility facilities as needed.

4 Vehicle Miles Traveled

This section documents the VMT screening, analysis, and mitigation measures applicable to the project per City of Santee VMT Analysis Guidelines (April 13, 2022).

4.1 VMT Screening Analysis

The requirements to prepare a detailed transportation VMT analysis apply to all discretionary land development projects that are not exempt from CEQA, except those that meet at least one of the transportation screening criteria described below. A project that meets at least one of the screening criteria per City's VMT guidelines below would be presumed to have a less than significant VMT impact due to project characteristics and/or location.

Projects Located in a Transit-Accessible Area

Projects located within a half-mile radius of an existing major transit stop or an existing stop along a high quality transit corridor[1] may be presumed to have a less-than-significant impact absent substantial evidence to the contrary. A map of existing major transit stops and existing stops along high-quality transit corridors is provided in Appendix D of the City's guidelines. The proposed project is not located within a half-mile radius of an existing transit priority area or an existing stop along a high-quality transit route, therefore it cannot be screened out using this criteria.

Small Projects

Projects generating 500 or fewer net new daily vehicle trips may be presumed to have a less-than significant impact absent substantial evidence to the contrary. Trips are based on the number of vehicle trips calculated using SANDAG's (Not So) Brief Guide of Vehicular Traffic Generation Rates for the San Diego Region or ITE trip generation rates with any alternative modes/location-based adjustments applied. As shown in Section 2, the project would generate 1440 PCE daily trips, therefore would not be considered a small project and cannot be screened out using this criteria.

Local Serving Retail Projects

Local serving retail generally improves the convenience of shopping close to home and has the effect of reducing vehicle travel. Local serving retail projects less than 50,000 square feet that are expected to draw approximately 75% of customers from the local area (roughly 3-miles) are presumed to have a less than significant impact absent substantial evidence to the contrary. Retail projects that are between 50,000 square feet and 125,000 square feet with similar customer attraction (approximately 75% from local area) may also be presumed locally-serving. The project does not propose retail uses, therefore it cannot be screened out using this criteria.

Local Serving Public Facilities

Public facilities that serve the surrounding community or public facilities that are passive use may be presumed to have a less-than-significant impact absent substantial evidence to the contrary. Transit centers, public schools,

[1] Major transit stop: a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods. High quality transit corridor: a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute periods.

libraries, post offices, park-and-ride-lots, police and fire facilities, parks and trailheads, government offices, passive public uses and other public uses are considered local serving public facilities. The project does not propose local serving public facilities, therefore it cannot be screened out using this criteria.

Redevelopment Projects with Lower Total VMT

A redevelopment project may be presumed to have a less-than-significant impact absent substantial evidence to the contrary if the proposed project's total project VMT is less than the existing land use's total VMT and the CEQA action includes closing the existing land use. Although the project would redevelop an existing site, this criterion was not applied to the project.

Infill Affordable Housing

City of Santee presumes deed-restricted affordable housing projects that meet the following conditions meet the City's screening criteria and would not require a VMT analysis.

- Is an infill project (note that most of the City of Santee is presumed to be an infill location);
- Consists of a minimum of 52% affordable housing;
- Is within ½ mile radius of a transit stop or station; and
- Project-provided parking does not exceed parking required by the City's Municipal Code

The project does not propose infill affordable housing; therefore it cannot be screened out using this criteria.

Projects in a VMT-Efficient Area

A VMT-efficient area is any area within the City with an average VMT/capita or VMT/employee below the thresholds as compared to the baseline City/Regional VMT per capita for the TAZ that the project is located within. VMT efficient areas are accessed through SANDAG's SB743 VMT maps[2].

The project site is within Census Tract 166.07 under the current SANDAG Travel Demand model. Based on the San Diego Region SB743 VMT Maps and using City's criteria for evaluation of Industrial projects, the project is within a high-VMT generating area for VMT per employee (i.e., greater than or equal to the regional mean). Compared to the regional mean of 18.9 VMT per employee, the VMT per employee of the project's census tract is 22.2 VMT.

Therefore, it can be inferred that the proposed project is not located in a VMT-efficient area and would result in a significant VMT impact.

The significance threshold, project VMT, and mitigation measures are discussed below.

[2] San Diego Region SB 743 VMT Map accessed at San Diego Region SB743 VMT Maps (arcgis.com)

4.2 VMT Threshold of Significance

The significant thresholds and specific VMT metrics used to measure VMT are described by land use type below:

> **Industrial Employment projects** located within a VMT-efficient area may be presumed to have a less than-significant impact absent substantial evidence to the contrary. A VMT-efficient area for industrial employment projects is any area with an average VMT/employee at or below the baseline regional average for the TAZ that the project is located within.

4.3 Project VMT Analysis

Since the project's daily trip generation estimate would be below 2,400 average daily trips, and the project's census tract includes other employee-based uses, a project-specific model run by SANDAG would not be required. The results of the SANDAG SB 743 VMT maps have been used in the project's VMT analysis. Compared to the regional mean of 18.9 VMT per employee, the VMT per employee of the project's census tract is 22.2 VMT. Because the project's VMT is higher than the regional average of the census tract it is located within, the project would result in a significant VMT impact. Table 5 provides project's VMT summary. Figure 9 illustrates the SANDAG SB 743 VMT Map for the project site.

Table 5. Project VMT Summary

Criteria	VMT/per Employee
Baseline Regional VMT/employee	18.9
VMT Threshold (at or below Baseline)	18.9
Project TAZ VMT/Employee	22.2
% Reduction Required	15%

Note: VMT = vehicle miles traveled

4.4 Cumulative VMT Impact

If a project is consistent with the assumptions in the SANDAG 2021 Regional Plan, the existing conditions project-level analysis is sufficient to determine cumulative impacts. If a project is not consistent with the assumptions in the SANDAG 2021 Regional Plan, a cumulative analysis may be necessary. A project effect on VMT under cumulative conditions would be considered significant if the cumulative VMT/capita or VMT/employee under the future year "plus project" condition exceeds the base year thresholds (i.e., 18.9).

The project is consistent with the General Plan land use of the project site and would provide employment as proposed in the traffic analysis zone. The VMT/employee under Year 2035 or cumulative conditions is 20.1, which exceeds the existing threshold of 18.9 VMT per employee. Therefore, it can be concluded that the project would also result in a significant cumulative impact.

4.5 Mitigation Measures

To mitigate project's VMT impacts, the project applicant must reduce VMT, which can be done by either reducing the number of automobile trips generated by the project or by reducing the distance that people drive. The following strategies are available to achieve this:

1. Modify the project's built environment characteristics to reduce VMT generated by the project.
2. Implement TDM measures to reduce VMT generated by the project

Strategies that reduce single-occupant automobile trips or reduce travel distances are called Transportation Demand Management (TDM) strategies. The City VMT guidelines recommend using strategies from the California Air Pollution Control Officers Association (CAPCOA) Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity (2021) (GHG Reduction Handbook) and the SANDAG Mobility Management Guidebook/VMT Reduction Calculator Tool.

The following table includes TDM strategies from CAPCOA 2021 and their applicability to the project.

Table 6. Transportation Demand Management Measures

Trip Reduction Program	Description	Maximum Reduction Possible	Project Reduction Possible
T-5	Implement Commute Trip Reduction Program (CTR) (Voluntary): CTR programs discourage single-occupancy vehicle trips and encourage alternative modes of transportation such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions.	4%	Assuming 100% employees are eligible for program, a 4% reduction can be achieved.
T-6	Implement Commute Trip Reduction Program (Mandatory Implementation and Monitoring) (Must include T-6 - T-10)	26%	Selected measures from T-6 to T-10 are included in this measure.
T-7	Implement Commute Trip Reduction Marketing: This measure will implement a marketing strategy to promote the project site employer's CTR program. Information sharing and marketing promote and educate employees about their travel choices to the employment location beyond driving such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions.	4%	Assuming 100% employees are eligible for program, a **4%** reduction can be achieved by the project. See Appendix B for details on project VMT reduction.
T-8	Provide Ridesharing Program: This measure will implement a ridesharing program and establish a permanent transportation management association with funding requirements for employers. Ridesharing encourages carpooled vehicle trips in place of single-occupied	8%	Assuming sub-urban location of the project, 100% employees are eligible for program, a **4%** reduction can be achieved by the project. See Appendix B for details on project VMT reduction.

Table 6. Transportation Demand Management Measures

Trip Reduction Program	Description	Maximum Reduction Possible	Project Reduction Possible
	vehicle trips, thereby reducing the number of trips, VMT, and GHG emissions.		
T-9	Implement Subsidized or Discounted Transit Program: This measure will provide subsidized or discounted, or free transit passes for employees and/or residents. Reducing the out-of-pocket cost for choosing transit improves the competitiveness of transit against driving, increasing the total number of transit trips and decreasing vehicle trips. This decrease in vehicle trips results in reduced VMT and thus a reduction in GHG emissions.	5.5%	Assuming average transit fare of $2.50 would be subsidized and 100% of the employees would be eligible to participate in this program. Because 72.5% of the project trips are from employees, approximately 72.5% of project-generated VMT can be as assumed to be from employees. Based on the above inputs, a **0.74%** VMT reduction can be achieved by the project. See Appendix B for details on project VMT reduction.
T-10	Provide End of Trip Bicycle Facilities: This measure will install and maintain end-of-trip facilities for employee use. End-of-trip facilities include bike parking, bike lockers, showers, and personal lockers. The provision and maintenance of secure bike parking and related facilities encourages commuting by bicycle, thereby reducing VMT and GHG emissions.	4.4%	For San Diego-Carlsbad area, a **0.57%** reduction can be achieved. See Appendix B for details on project VMT reduction.
T-11	Provide Employer-Sponsored Van pool: This measure will implement an employer-sponsored vanpool service. Vanpooling is a flexible form of public transportation that provides groups of 5 to 15 people with a cost-effective and convenient rideshare option for commuting. The mode shift from long-distance, single-occupied vehicles to shared vehicles reduces overall commute VMT, thereby reducing GHG emissions.	20.4%	It is likely that individual tenants may have employees that sign up with the SANDAG Sustainable Transportation Services program, formerly known as iCommute through ride-sharing program. Therefore, only T-8 has been included as reduction measure.
T-12	Price Workplace Parking: This measure will price on-site parking at workplaces. Because free employee parking is a common benefit, charging employees to park on site increases the cost of choosing to drive to work. This is expected to reduce single-occupancy vehicle commute trips, resulting in decreased VMT, thereby reducing associated GHG emissions.	20%	Not a suitable measure due to sub-urban project setting that provides few alternate transportation options for employees.

Table 6. Transportation Demand Management Measures

Trip Reduction Program	Description	Maximum Reduction Possible	Project Reduction Possible
T-13	Implement Employee Parking Cash-Out: This measure will require project employers to offer employee parking cash-out. Cash-out is when employers provide employees with a choice of forgoing their current subsidized/free parking for a cash payment equivalent to or greater than the cost of the parking space. This encourages employees to use other modes of travel instead of single occupancy vehicles. This mode shift results in people driving less and thereby reduces VMT and GHG emissions.	12%	Not a suitable measure due to sub-urban project setting that provides few alternate transportation options for employees.
T-18	Provide Pedestrian Network Improvement:	6.4%	The project would add sidewalks along its access road from Woodside Avenue and at the Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection. This would result in approximately 0.6 miles from existing 0.4 mile of sidewalk between project driveway and the Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection. Based on the above inputs, a **2.51%** VMT reduction can be achieved by the project. See Section 8.3.3. for more details on proposed sidewalk improvement. See Appendix B for details on project VMT reduction.

Source: CAPCOA 2021 and Appendix B
Note: VMT = vehicle miles traveled

Based on the review of applicable trip reduction measures to the project, following measures as part of T-5 Commute Trip Reduction Program have been selected to calculate possible reduction:

T-5 Implement Commute Trip Reduction (CTR) Program to include the following measure and estimated project VMT reduction (in %):

- T-7 Implement Commute Trip Reduction Marketing (4%)
- T-8 Provide Ridesharing Program (4%)
- T-9 Implement Subsidized or Discounted Transit Program (0.74%)
- T-10 Provide End of Trip Bicycle Facilities (0.57%)
- T-18 Provide Pedestrian Network Improvements (2.51%)

See Appendix B for calculation of project VMT reduction % corresponding to measures T-7, T-8, T-9, and T-10.

To calculate VMT reduction under each component, the following formula is used:

$$\text{VMT Reduction\%} = 1 - [(1 - 4\%) * (1 - 4\%) * (1 - 0.74\%) * (1 - 0.57\%) * (1 - 2.51\%)] = 11.3\%$$

A VMT reduction of 11.3% would be achieved through the implementation of CTR measures. A reduction of 15% is required to reduce the VMT per employee to at or below regional level. As shown in Section 9, **MM-TRA-1 Trip Reduction Program** would be implemented by the project's tenants to reduce the project's VMT. Because the project's VMT would not be reduced to below significance threshold even with the implementation of **MM-TRA-1 and MM-TRA-2 Construction of Sidewalk** (see Chapter 9 below for details), the project's VMT impact would remain **significant and unavoidable**.

5 Existing Traffic Conditions

This section details the traffic volumes and the roadway segment and intersection operations within the study area under Existing and Existing plus Project conditions.

5.1 Existing Traffic Volumes

Existing weekday peak hour turn movement counts at the study intersections and roadway segments were conducted in May 2023 during a typical non-holiday week while area schools were in-session. The traffic counts were collected for the AM (7:00 a.m. to 9:00 a.m.) and the PM (4:00 p.m. to 6:00 p.m.) peak periods and 24-hour average daily traffic conditions, for the study area intersections and roadway segments, respectively. The peak periods represent the highest volume of traffic for the adjacent street system. To provide a conservative analysis, existing PCE trips were used in the traffic analysis of the proposed project.

Raw traffic count worksheets are provided in Appendix C. Signal timing sheets for the signalized study intersections provided by Caltrans are included in Appendix D.

5.2 Existing Operations

5.2.1 Existing Roadway Operations

A roadway segment LOS analysis was prepared for the existing conditions using the roadway segment LOS methodologies as discussed in Section 1.3, Analysis Methodology. Table 7 shows the results of the existing conditions LOS analysis for the study roadway segments. As shown in the table, the study area roadway segments are currently operating LOS C or better under existing conditions.

Table 7. Existing Roadway Segment Analysis

No.	Roadway Segment	Capacity	Existing		
			ADT	V/C	LOS
1	Magnolia Avenue, south of Mission Gorge - Woodside Avenue	60,000	32,381	0.54	B
2	Woodside Avenue, between Magnolia Avenue and Woodside Avenue	40,000	27,134	0.68	C
3	N. Woodside Avenue, between Woodside Avenue to Project Driveway	10,000	3,725	0.37	A
4	Project Driveway, north of Woodside Avenue	2,200	117	NA	NA

Notes: ADT = Average daily traffic; V/C = Volumes to Capacity ratio; LOS = Level of Service; NA = Not Applicable because LOS does not apply to non-CE roads

[1] Classification and LOS determined from City of Santee Mobility Element, Adopted by City Council October 25, 2017 (Resolution No. 114-2017)

5.2.2 Existing Intersection Operations

The Existing (PCE) peak hour traffic volumes are shown in Figure 10.

An intersection LOS analysis was prepared for the Existing conditions using HCM 6 methodology via the Synchro LOS software as discussed in Section 1.3. Table 8 shows the results of the Existing conditions analysis. LOS worksheets are provided in Appendix E.

As shown in the table, all intersections are currently operating with satisfactory levels of service (LOS D or better) under Existing conditions.

Table 8. Existing Peak Hour Intersection Level of Service

No.	Intersection	LOS Method	Existing			
			AM Peak		PM Peak

5.3 Existing plus Project Traffic Operations

This section details the Existing plus Project traffic volumes and intersection operations within the study area.

The Existing plus Project traffic volumes were estimating by adding the appropriate percentage of average daily and peak hour project trips (shown in Table 4) to the existing traffic volumes for the study area roadway segments and intersections. Figure 11 illustrates the Existing plus Project Peak Hour Traffic Volumes.

5.3.1 Roadway Operations

A roadway segment LOS analysis was prepared for the Existing plus Project conditions using the roadway segment LOS methodologies as discussed in Section 1.3, Analysis Methodology. Table 9 shows the results of the Existing plus Project conditions LOS analysis for the study roadway segments. As shown in the table, the study area roadway segments of Woodside Avenue and Magnolia Avenue would continue to operate at LOS C or better under Existing plus Project conditions.

A project's traffic effect is determined if it exceeds the volume to capacity ratio by 0.02 or more at roadway segments operating at LOS E or F. Because the roadway segments operate at LOS C or better and not at LOS E or F, the proposed project would not exceed the City's criteria for project-specific traffic effect, which determines the needs for roadway improvements. Hence, no roadway improvements are proposed.

5.3.2 Intersection Operations

The total project trip assignments shown in Figure 6 were added to the Existing peak hour traffic volumes shown in Figure 10 to derive the Existing plus Project peak hour traffic condition. Figure 11 shows the Existing plus Project peak hour traffic volumes.

An intersection LOS analysis was prepared for the Existing plus Project condition using the HCM 6 methodology, and Table 10 summarizes the results of the Existing plus Project intersection analysis for the AM and PM peak hours. Detailed LOS calculation worksheets are included in Appendix E.

As shown in the table, with the exception of the Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection, all study area intersections would continue to operate at satisfactory levels of service (LOS D or better) under Existing plus Project conditions. The Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection would operate at LOS E in the AM and PM peak hour. The proposed project would increase the delay by more than 2 seconds at this intersection. Therefore, the proposed project would exceed the City's criteria for project-specific traffic effect under Existing plus Project conditions. See Section 8 for project-specific improvements.

6 Near Term Conditions

This section presents the analysis of Near-Term traffic conditions when the project would be constructed and fully operational. The Near Term conditions are based on the addition of traffic from approved and pending projects added to the existing 2023 traffic volumes.

6.1 Cumulative Projects

The cumulative projects are projects that are proposed and in the review process, but not yet fully approved; or projects that have been approved, but not fully constructed or occupied. A review of cumulative projects list available at the City's website was conducted. Per discussion with the City, eight cumulative projects were identified that would potentially add traffic to the study area. In addition to these development projects, the SR-67/Riverford Road interchange improvements, a transportation project which would consolidate three intersections into two roundabouts on Riverford Road on both sides of SR-67, is proposed approximately one mile north of the project site. The project's study area does not include Riverford Road and its intersections with SR-67 because the project would not add 50 or more peak hour trips to those facilities. However, as shown in the State Route 67 and Riverford Road Intersection Control Evaluation Report, submitted to Caltrans in 2020, with the construction of proposed roundabouts, the closely spaced intersections of the SR-67 northbound off-ramp/Woodside Avenue, Woodside Avenue/Riverford Road, the and SR-67 southbound ramps/Riverford Road would operate at LOS D or better for all movements with no spillback onto SR-67 mainline. Therefore, the SR-67/Riverford Road interchange project will improve LOS and traffic operations in the vicinity of the project.

Figure 12 shows the locations of, and Table 11 provides a brief description of, the cumulative projects.

Table 11. Description of Cumulative Projects

No.	Cumulative Project	Location	Description
1	Southwest Signal Building	10756 Rockvill Street	20,000 SF industrial building
2	Lantern Crest Ridge II	11000 Sunset Trail	62-unit memory care facility
3	Habitat for Humanity Townhomes	8932 First Street	17-unit residential condominiums
4	Santee Auto Center	10335 Mission Gorge Road	Two-car dealerships, auto body shop, and car wash
5	Popeyes	10308 Mission Gorge Road	1,740 SF drive-through restaurant
6	Super Star Car Wash	8837 Magnolia Avenue	4,980 SF car wash tunnel
7	Extra Space Storage	10815 Woodside Avenue	88,390 SF (3-story) storage building
8	Hillside Meadows/Parkside	North and south of the western terminus of Mast Boulevard, and south of El Nopal, Lakeside 92040	143 residential units and two industrial lots
9	Riverford Road Interchange	SR-67 and Riverford Road in the unincorporated area of San Diego County within the Community of Lakeside and a portion in the City of Santee	Consolidate three intersections into two roundabouts along Riverford Road on either side of the SR-67

Source: City of Santee, 2024

6.1.1 Trip Generation

The trip generation for the cumulative projects is shown in Table 12. As shown in the table, cumulative projects are forecast to generate approximately 7,612 daily trips, 518 AM peak hour trips, and 603 PM peak hour trips. Figure 12 also shows the cumulative project traffic volumes.

Table 12. Cumulative Projects Trip Generation Summary

No.	Cumulative Project	Land Use	Daily Trips	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
1	Southwest Signal Building[1]	Industrial	100	9	4	13	6	9	15
2	Lantern Crest Ridge II[2]	Residential	155	4	2	6	6	6	12
3	Habitat for Humanity Townhomes[1]	Residential	136	2	9	11	10	4	14
4	Santee Auto Center[3]	Service	3,336	135	61	196	110	144	254
5	Popeyes[1]	Service	1,218	66	44	110	26	25	51
6	Super Star Car Wash[1]	Auto	900	18	18	36	41	40	81
7	Extra Space Storage[1]	Industrial	177	6	5	11	8	8	16
8	Hillside Meadows[4]	DU	1,590	50	85	135	105	55	160
		Total Trip Generation	**7,612**	**290**	**228**	**518**	**312**	**291**	**603**

Notes:

1 Trip generation estimated using trip rates from SANDAG's Brief Guide of Vehicular Traffic Generation Rates for the San Diego Region, April 2002.

2 Trip generation updated to reflect revised unit numbers compared to the Lantern Crest Ridge II Senior Care Project, Traffic Impact Study, prepared by Darnell & Associates, April 30, 2018

3 Trip generation from Traffic Impact Analysis for Santee Auto Center, prepared by LLG, April 20, 2023

4 Trip generation from Traffic Impact Analysis for Hillside Meadows, prepared by LLG, September 6, 2000

6.1.2 Trip Distribution and Assignment

Trip distributions and assignments for the cumulative projects were developed using the traffic study or assessment for these projects or by using professional judgment based on logical travel corridors. The trips generated by the cumulative projects were distributed and assigned through the study area network. Information on the cumulative projects regarding their trip generation and distribution is included in Appendix F.

6.2 Traffic Volumes

The Near-Term traffic volumes were estimating by adding the average daily and peak hour trips from the cumulative projects (shown in Table 12) to the existing traffic volumes for the study area roadway segments and intersections.

6.3 Near Term Operations

6.3.1 Near Term Roadway Operations

A roadway segment LOS analysis was prepared for the Near-Term conditions using the roadway segment LOS methodologies as discussed in Section 1.3, Analysis Methodology. Table 13 shows the results of the Near Term conditions LOS analysis for the study roadway segments. As shown in the table, the study area roadway segments of Woodside Avenue and Magnolia Avenue are estimated to operate at LOS C or better under Near Term conditions.

6.3.2 Near Term Intersection Operations

Near Term traffic volumes include existing traffic and traffic from the addition of cumulative projects (Figure 12) in the vicinity of the project. Figure 13 illustrates the Near Term (no project) traffic volumes for peak hour conditions.

An intersection LOS analysis was prepared for the Near Term conditions using HCM 6 methodology via the Synchro LOS software as discussed in Section 1.3. Table 14 shows the results of the Near-Term conditions analysis. LOS worksheets are provided in Appendix G. As shown in the table, all intersections would continue to operate at satisfactory levels of service (LOS D or better) under Near Term conditions.

6.4 Near Term plus Project Traffic Operations

This section details Near Term plus Project traffic volumes and intersection operations within the study area. The total project trip assignments shown in Figure 6 were added to the Near Term peak hour traffic volumes shown in Figure 13 to derive the Near Term plus Project peak hour traffic condition. Figure 14 shows the Near Term plus Project peak hour traffic volumes.

6.4.1 Roadway Operations

A roadway segment LOS analysis was prepared for the Near Term plus Project conditions using the roadway segment LOS methodologies as discussed in Section 1.3, Analysis Methodology. Table 13 shows the results of the Near Term plus Project conditions LOS analysis for the study area roadway segments. As shown in the table, the study area roadway segments of Woodside Avenue and Magnolia Avenue would continue to operate at LOS C or better under Near Term plus Project conditions.

A project's traffic effect is determined if it exceeds the volume to capacity ratio by 0.02 or more at roadway segments operating at LOS E or F. Because the roadway segments operate at LOS C or better and not at LOS E or F, the proposed project would not exceed the City's criteria for project-specific traffic effect, which determines the needs for roadway improvements. Hence, no roadway improvements are proposed.

6.4.2 Intersection Operations

An intersection LOS analysis was prepared for the Near Term plus Project condition using the HCM 6 methodology, and Table 14 summarizes the results of the Near Term plus Project intersection analysis for the AM and PM peak hours. Detailed LOS calculation worksheets are included in Appendix G.

As shown in the table, with the exception of the Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection, all study area intersections would continue to operate at satisfactory levels of service (LOS D or better) under Near Term plus Project conditions. The Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection would operate at LOS E in the AM peak hour and LOS F in the PM peak hour. The proposed project would increase the delay by more than 2 seconds at this intersection. Therefore, the proposed project would exceed the City's criteria for project-specific traffic effect under Near Term plus Project conditions. See Section 8 for project-specific improvements.

7 Horizon Year Conditions

This section presents the analysis of Horizon Year traffic conditions when the project would be constructed and fully operational. The horizon year conditions are based on the year 2035 conditions that would exist in the study area.

7.1 Roadway Conditions

The roadway segment of Magnolia Avenue and Woodside Avenue are built out under existing conditions. Therefore, the capacity was assumed to be same as existing conditions. N. Woodside Avenue, between Woodside Avenue to Project Driveway was assumed to be improved to the standards of a Parkway (i.e., two lanes with a TWLTL). All intersection configurations, have been assumed to be preserved under the Horizon Year conditions, as shown in Figure 7. The Proposed Update to Existing Circulation Element Technical Report and Traffic Impact Study (July 2017) prepared for the City of Santee Mobility Element proposes a roundabout[3] at the N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection, in its Preferred Circulation Plan. However, per discussions with the City staff, the proposed roundabout has been removed from their Capital Improvement Program. Therefore, the existing stop control operation has been assumed at the N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection in the Horizon Year roadway conditions.

7.2 Traffic Volumes

The Horizon Year traffic volumes (ADT and AM and PM peak hour) have been estimated based on review of forecast traffic volumes in the Fanita Ranch Traffic Impact Study (LLG 2020). The Horizon Year intersection volumes were not available for the entire study area along Woodside Avenue, therefore, for Intersection 4 through 7, a growth factor was estimated by comparing the existing ADT with the horizon year ADT along Woodside Avenue near the project site. Figure 15 illustrates the Horizon Year traffic volumes for the peak hour conditions.

7.3 Horizon Year Operations

7.3.1 Roadway Operations

A roadway segment LOS analysis was prepared for the Horizon Year conditions using the roadway segment LOS methodologies as discussed in Section 1.3, Analysis Methodology. Table 15 shows the results of the Horizon Year conditions LOS analysis for the study roadway segments. As shown in the table, the study area roadway segments of Woodside Avenue between Magnolia Avenue and N. Woodside Avenue and between N. Woodside Avenue and Project Driveway would operate at LOS E under Horizon Year conditions.

7.3.2 Intersection Operations

Figure 15 illustrates the Horizon Year traffic volumes for peak hour conditions. An intersection LOS analysis was prepared for the Horizon Year conditions using HCM 6 methodology via the Synchro LOS software as discussed in

[3] Existing Circulation Element Technical Report and Traffic Impact Study (July 2017) pg. 159 "SR-67 Southbound Off-Ramp & Woodside Avenue - Convert this intersection to a roundabout with a northbound left-turn lane, a northbound right-turn bypass lane, an eastbound shared through/right-turn lane, and a westbound shared left/through-turn lane."

Section 1.3. Table 15 shows the results of the Horizon Year conditions analysis. LOS worksheets are provided in Appendix H.

As shown in the table, the Magnolia Avenue - Mission Gorge Road/Woodside Avenue intersection would operate at LOS E in the AM and PM peak hour conditions under Horizon year conditions. The Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection would operate at LOS F in the AM peak hour and LOS F in the PM peak hour. All other intersections operate at acceptable LOS conditions.

7.4 Horizon Year plus Project Operations

This condition includes analysis of traffic operations under Horizon Year conditions with project traffic added to the Horizon Year ADT and AM and PM peak hour intersection traffic volumes. Based on review of SANDAG land use and trip rate used in the General Plan Mobility Element for the traffic analysis zone (TAZ) the project is located within, it was noted that the project trip generation exceeded the TAZ trip generation for allowable light industrial use by 33.%. Therefore, to account for the additional project trip generation, approximately, 33.6% of the project traffic was added to the Horizon Year intersections and roadway segments. The Horizon Year intersection volumes were not available for the entire study area along Woodside Avenue, therefore, to provide a conservative analysis, a 100% of the project trips were assigned to the project driveways and intersections along Woodside Avenue near the project site. The traffic effects specific to the project under this condition were used as the basis for determining the project's long-term effects.

7.4.1 Roadway Operations

A roadway segment LOS analysis was prepared for the Horizon-Year conditions using the roadway segment LOS methodologies as discussed in Section 1.3, Analysis Methodology. Table 15 shows the results of the Horizon Year conditions LOS analysis for the study roadway segments. As shown in the table, the study area roadway segments of Woodside Avenue between Magnolia Avenue and N. Woodside Avenue and between N. Woodside Avenue and Project Driveway would operate at LOS E under Horizon Year plus conditions. Because the roadway segments operates at LOS E and the increase is greater than 0.02, the proposed project would exceed the City's criteria for project-specific traffic effect at the roadway segment of N. Woodside Avenue between Woodside Avenue and Project Driveway. Since the roadway segment is constructed at buildout classification per the City's Mobility Element, no further improvements to this roadway segment are recommended.

7.4.2 Intersection Operations

Figure 16 illustrates the Horizon Year traffic volumes for peak hour conditions. An intersection LOS analysis was prepared for the Horizon Year conditions using HCM 6 methodology via the Synchro LOS software as discussed in Section 1.3. Table 16 shows the results of the Horizon Year conditions analysis. LOS worksheets are provided in Appendix H.

As shown in the table, the Magnolia Avenue - Mission Gorge Road/Woodside Avenue intersection would operate at LOS E in the AM and PM peak hour conditions under Horizon year plus Project conditions. However, the proposed project would not increase the delay by more than 2 seconds and therefore, not exceed the City's criteria for project-specific traffic effect under Horizon Year plus Project conditions. No improvements are required. The Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection would operate at LOS F in the AM peak hour and PM peak hour conditions. The proposed project would increase the delay by more than 2 seconds at this intersection. Therefore, the proposed project would exceed the City's criteria for project-specific traffic effect under Horizon Year plus Project conditions. See Section 8 for project-specific improvements.

8 Project Access, On-Site Circulation and Improvement Measures

This section documents the project access evaluation to provide an eastbound left-turn lane along Woodside Avenue. The section also provides improvement measure for the N. Woodside Avenue/S. Woodside Avenue – SR-67 SB Off-Ramp intersection.

8.1 Project Access Evaluation

As mentioned in Section 1, the access to the proposed project would be from N. Woodside Avenue via the project access driveway (Intersection 7). Per City's request, an evaluation for eastbound left turn lane at this access driveway was conducted. The left-turn lane evaluation was conducted using the methodology from the American Association of State Highway Transportation Officials' (AASHTO, 2018) – Geometric Design of Highways and Streets ("Green Book"). Per Section 9.7.3 Design Treatments for Left-Turn Maneuvers, 9.7.3.1 Guidelines for Providing and Design of Left-Turn and Bypass Lanes, many factors enter into the choice of type of intersection and the extent of design of a given type, but the principal controls are the design-hour traffic volume, the character or composition of traffic, and the design speed. The character of traffic and design speed affects many details of design, but in choosing the type of intersection they are not as significant as the traffic volume. Of particular significance are the actual and relative volumes of traffic involved in various turning and through movements.

Traffic-volume-based guidelines for where left-turn lanes should be provided are presented in Table 9-24 and Figure 9-35 for arterials in urban areas (see Appendix I). This table and figure are applicable at unsignalized intersection with streets and driveways where the major road is uncontrolled and the minor-road approaches are stop- or yield-controlled.

Additionally, the HCM indicates that exclusive left-turn lanes should be considered where left-turn volumes exceed 100 vehicles/hour (veh/hr). As shown on Figures 5 and 6, during the AM peak hour, there are approximately 109 eastbound left turn vehicles from N. Woodside Avenue into the project site. Of the total 103 vehicles, 55 vehicles (in PCE) or 53% are trucks. Because the left-turning volumes at the exceed the AASHTO suggested left-tun lane guidance of 50 or more veh/hr (see Appendix I) and HCM guidance of 100 veh/hr and due to high truck volume, it is recommended that a dedicated eastbound left turn lane be constructed at the Project Access Driveway/Woodside Avenue.

8.2 On-Site Circulation and Parking

On-site circulation and access to the project will be provided by a circuitous roadway (see Figure 2) that would also serve as fire lane. The width of the internal roadway is between 30 feet to 40 feet. The on-site driveway will be designed per City's Standard Drawings and requirements of the Fire Code to provide turn radii for fire truck and apparatus to access all parts of the site.

The parking ratio used to calculate on-site parking requirements is consistent with the Section 13.24.040 Parking requirements of the City of Santee Municipal Code[4]. Per code, for industrial uses that include warehousing and

[4] City of Santee. https://library.qcode.us/lib/santee_ca/pub/municipal_code/item/title_13-chapter_13_24-13_24_040

distribution, one parking space for 1,000 square feet of gross floor area should be provided. The project would require and proposes a total of 301 parking spaces for 301,445 square feet of industrial space.

Parking designated for electric vehicles (EV), including spaces associated with clean air vehicles have been provided per code requirement. Long-term and short-term bicycle parking[5] would be provided per City's code requirement.

As such, the project would provide adequate parking spaces.

8.3 Improvement Measures

8.3.1 Project Access Driveway/N Woodside Avenue

The following improvement measures would be constructed by the project to improve traffic flow near the project site:

- The project would construct a dedicated eastbound left turn lane at the Project Access Driveway/ Woodside Avenue.
- The project access driveway will be designed per City specifications for commercial driveway per City of Santee standard PW-21[6].
- The project would be responsible for constructing frontage improvements including sidewalks along the northern side of N. Woodside Avenue and connect to the existing sidewalk along N. Woodside Avenue that lies to the west of the project's driveway. No sidewalk exists to the east and accordingly no new sidewalk is required to be constructed.
- The project would also install a crosswalk to improve pedestrian circulation at the Project Access Driveway/N. Woodside Avenue.

8.3.2 N. Woodside Avenue Roadway Segment

Although the roadway segment of N. Woodside Avenue near Project Driveway is forecast to operate at LOS E, as shown in Section 7, with the frontage and project access improvements described above, the operation of the Project Access Driveway/N. Woodside Avenue would facilitate traffic flow and truck turn movement along Woodside Avenue near the project site. Since the roadway segment is constructed at buildout classification per the City's Mobility Element, no further improvements to this roadway segment are recommended.

---

5 Bicycles. All commercial and office areas shall provide adequate locking facilities for bicycle parking at any location convenient to the facility for which they are designated. Whenever possible, weatherproofing or facility covering should be used.
Short-Term Bicycle Parking. If the project is anticipated to generate visitor traffic, provide permanently anchored bicycle racks within 200 feet of the visitors' entrance, readily visible to passers-by, for five percent of visitor motorized vehicle parking capacity, with a minimum of one two-bike capacity rack.
Long-Term Bicycle Parking. For buildings with over 10 tenant-occupants, provide secure bicycle parking for five percent of motorized vehicle parking capacity, with a minimum of one space. Acceptable parking facilities shall be convenient from the street and may include:
i. Covered, lockable enclosures with permanently anchored racks for bicycles;
ii. Lockable bicycle rooms with permanently anchored racks; and
iii. Lockable, permanently anchored bicycle lockers.

6 City of Santee. https://www.cityofsanteeca.gov/home/showpublisheddocument/18044/637048465192800000

8.3.3 N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp Intersection

The proposed project would result in a traffic effect at the N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection, under Existing plus Project, Near Term plus Project conditions, and Horizon Year plus Project conditions.

Based on the Proposed Update to Existing Circulation Element Technical Report and Traffic Impact Study (July 2017) prepared for the City of Santee Mobility Element, a roundabout is proposed at this intersection in its Preferred Circulation Plan. However, per discussions with the City staff, the proposed roundabout has been removed from the City's Capital Improvement Program. Therefore, the roundabout is not considered to be a feasible improvement for this intersection. Furthermore, Caltrans would not accept any lane addition (such as a dedicated right turn lane along N. Woodside Avenue adjacent to the current shared through-right turn lane) at this intersection, Therefore, no improvements to intersection lane geometry or control can be recommended at this time.

Based on discussions with the City staff, the project would construct a missing segment of sidewalk along N. Woodside Avenue near the N. Woodside Avenue/Woodside Avenue - SR-67 SB Off-Ramp intersection and near the project driveway, for a total of 990 linear feet or approximately 0.2 miles. The project would also be responsible for pavement rehabilitation and restriping of N. Woodside Avenue to the satisfaction of the City Engineer from Caltrans right-of-way at the intersection of the SR-67 to the easternmost edge of the project driveway's intersection with N. Woodside Avenue. In addition, the project would install approximately 1,240 SF of new roadway to fill in an unpaved area between the edge of the existing roadway and the new proposed sidewalk. Although this improvement would not reduce delay or improve LOS at the Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection, it would improve non-vehicular circulation and pavement conditions along Woodside Avenue and would be considered an acceptable improvement by the City in lieu of improving delay or LOS.

A conceptual exhibit prepared by the applicant illustrating the proposed sidewalk and pavement rehabilitation at the N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection is included in Appendix J.

Per City's request, an intersection lane queuing analysis was also conducted for informational purposes and is summarized in Section 8.3.4.

8.3.4 N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp Intersection Queuing Analysis

An intersection lane queuing analysis, using SimTraffic 11 software, was conducted to determine the 95th percentile (design) queue of the existing storage lanes at the N. Woodside Avenue/ Woodside Avenue – SR-67 SB Off-Ramp intersection. The intersection's queues were calculated for the Existing, and Existing plus Project= = conditions. To account for actual vehicular volume with mix of traffic (cars and trucks) observed in the field, queuing analysis was conducted using non-PCE traffic volumes and heavy vehicle percentage for each turn movement. It should be noted that nominal pedestrian and bicycle activity was observed at this intersection as shown in Appendix C, Traffic Counts. The SimTraffic queuing reports and non-PCE peak hour intersection volumes, heavy vehicle percentages are provided in Appendix K.

This analysis determined whether potential queuing and spillback would impact the SR-67 mainline as well as Woodside Avenue. The geometric configuration of the intersection was assumed to be the same under Existing conditions without the project and with Project conditions,

Intersection Queuing Analysis

Tables 17 summarize the 95th percentile queuing analysis conducted for the intersection under Existing and Near-Term conditions. The 95th percentile (design) queue is the maximum queue that would only occur during a smaller portion of the peak hour and the analysis is provided for informational purposes.

As shown in Table 17, under Existing conditions, there are no movements where the 95th percentile queues would exceed their storage lengths during the weekday AM or weekday PM peak hours. Under Existing plus Project conditions, all movements would experience an increase in vehicular queues however, most queues would be accommodated in the storage length available. except for the eastbound left turn lane (during AM peak hour).

For the eastbound left turn lane queue, it should be noted that while the next intersection to the west, the entrance to the Mission Del Magnolia mobile home community, is approximately 820 feet away, there is still adequate length available along Woodside Avenue for vehicles to queue in the AM peak hour. The queue is likely to exceed 850 feet or one car length, as shown in Table 17, only 5 percent of the time during the AM peak hour. On an average, this queue length would be approximately 434 feet (see Appendix K). It should be noted that there is no specific criteria for assessing queuing impacts. However, it is recommended that “KEEP CLEAR’” pavement markings be installed west of this intersection to maintain vehicular ingress and egress to/from the Mission Del Magnolia community to eastbound Woodside Avenue.

Caltrans Off-Ramp Queues

Additionally, it should be noted that under Existing and Existing plus Project conditions analyzed, the westbound turn movements at the SR-67 off-ramp do not exceed the storage length available. The analysis indicates there are currently no queuing issues that may potentially spill back onto the SR-67 mainline.

Table 17. Queuing Summary for Existing Conditions (95th Percentile Queue)

Intersection	Movement	Storage Length[1]	Existing (w/o improvement)				Existing plus Project			
			AM Peak Hour		PM Peak Hour		AM Peak Hour		PM Peak Hour	
			95th percentile Queue[2]	Exceeds Storage Length	Queue[2]	Exceeds Storage Length	Queue[2]	Exceeds Storage Length	Queue[2]	Exceeds Storage Length
N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp	EBL[3]	820	208	No	410	No	850	**Yes**	257	No
	EBR[3]	820	49	No	822	No	474	No	640	No
	WBLT[4]	775	352	No	108	No	356	No	124	No
	WBTR	265	245	No	69	No	278	No	77	No
	NBLT[3]	725	259	No	159	No	344	No	154	No
	SBTR[3]	480	83	No	465	No	98	No	464	No

Notes: SR = State Route; EBL = Eastbound left; EBR = Eastbound right; WBLT = Westbound Left-Through; WBLT = Westbound Through-Right; NBLR = Shared Northbound Left-Right; SBTR = Shared Southbound Through-Right; SBR = Southbound Right

1 Storage length is exceeded if the calculated distance is less than or equal to the storage length provided.
2 Based on 95th percentile queue length in SimTraffic 11.
3 Length measured from nearest driveway or intersection.
4 Length measured from the gore point of SR-67.

8.3.5 Social, Economic and Pedestrian Safety Benefits of Proposed Improvement Measures

The applicant has prepared a detailed memorandum (Appendix L) describing project's consistency, with the City's Mobility Element goals and policies as well as outlining its social and economic benefits. The memorandum provides reasons to accept deficient LOS at this intersection which include the following:

- **Feasibility of proposed improvement:** The free-right turn proposed by the project to the City and Caltrans would have improved the LOS to D; however, Caltrans has denied this request. The only improvement measure acceptable to Caltrans is the installation of the full roundabout. The construction of a roundabout was deemed economically infeasible, as described in the memo.
- **The effectiveness of non - automotive components of the circulation system would be maintained or improved as a result:** The project proposes to improve pedestrian circulation by installing a continuous sidewalk from N. Woodside Avenue on the east, through the street's intersection with the SR-67 Southbound Off-ramp and then connect to the existing sidewalk on Woodside Avenue on the west. Currently the sidewalk is discontinuous through the intersection, leaving pedestrians to traverse approximately 130 feet of unimproved shoulder between sidewalks. **Overriding economic benefits:** The project would generate substantial economic and social benefits to the City, its residents, and its businesses. In summary, the project would generate approximately $1.8M direct income to the City over a 10 year period. In addition, economically, the project would generate $23.5M in wages paid to construction workers and then upon completion $42.9M of labor income annually. See Appendix L for detailed calculation of these benefits.

  In addition, the project proposes to rehabilitate the pavement of N. Woodside Avenue starting from, on the west, where it meets the Caltrans right-of-way at the intersection of the SR-67 to the easternmost edge of the project driveway's intersection with N. Woodside Avenue, to the satisfaction of the City Engineer. In addition, the project will install approximately 1,240 SF of new roadway to fill in an unpaved area between the edge of the existing roadway and the new proposed sidewalk.

This section of Woodside Avenue has deteriorated over decades of use by local and through traffic, as well as from the truck traffic servicing the industrial park to the north of N. Woodside Avenue. By funding and performing the repaving work, the project will create a significant public benefit, improving street conditions for both City residents and businesses in the industrial park and relieving this financial burden from the City of Santee. Refer to Appendix J for a conceptual exhibit prepared by the applicant illustrating the proposed sidewalk and pavement rehabilitation at the N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection and Appendix L for a detailed discussion on project's consistency with Mobility Element policies.

9 Project Design Feature and Mitigation Measure

The proposed project would result in a traffic effect at the N. Woodside Avenue/S. Woodside Avenue - SR-67 SB Off-Ramp intersection, under Existing plus Project, Near Term plus Project and Buildout plus Project conditions, As explained in Section 8.3, **PDF-TRA-1 Multi-modal Intersection Improvements** will be implemented, consistent with City's Mobility Element goals and policies as well as social and economic benefits in lieu of improving delay at the intersection:

PDF-TRA-1 Multi-modal Intersection Improvements: Prior to the issuance of a building permit, the project applicant will pay its traffic impact fees to the satisfaction of the City Engineer. Prior to the Certificate of Occupancy, the project will construct a new on-site sidewalk to connect the main entrance of the building with the existing sidewalk on N. Woodside Avenue. The project applicant will also rehabilitate the pavement with a full width and adequate structural section of N. Woodside Avenue starting from, on the west, where it meets the Caltrans right of way at the intersection of the SR-67 to the eastern most edge of the project driveway's intersection with N. Woodside Avenue, to the satisfaction of the City Engineer. The project applicant will also install approximately 1,240 SF of new roadway to fill in an unpaved area between the edge of the existing roadway and the new proposed sidewalk near N. Woodside Avenue's intersection with the SR-67. The project will install "KEEP CLEAR'" pavement markings west of this intersection to maintain vehicular ingress and egress to/from the Mission Del Magnolia community to eastbound Woodside Avenue.

The following mitigation measures would be implemented to reduce the project's VMT impact described in Section 4:

MM TRA 1 Trip Reduction Program: Prior to the issuance of first Certificate of Occupancy, the project tenant will prepare a Trip Reduction program. The program shall include the following components:

1. **Implement Commute Trip Reduction Marketing:**
    a. Set-up a Transportation Kiosk, either physically on-site or online, with transportation information that employees could access at work or on their smart phones or personal computers. If an online kiosk, information can be available on the company's website (or intranet, or internal website). The project developer or property manager will have responsibility for setting up and maintaining the information center. The Transportation Kiosk will have site-specific information about all the measures, services, and facilities discussed in this Program. In addition, the information center will include:
    b. A summary of local bus routes and local bicycle facilities to provide further information about their routes and schedules and the incentive programs available to transit users.
    c. Information about ride matching services (SANDAG - Bike Services) and on-site ride matching) and the incentive programs available to carpools.
    d. Information about services such as Uber, Lyft, and other on-demand transportation services.
    e. A local bikeways map and bicycling resources
    f. Availability of bicycle parking such as lockers and amenities including bike pumps, repair stations, full coverage lighting and security cameras.

g. Information about bicycle education classes taught by certified league instructors from the San Diego County Bicycle Coalition.

2. **Provide Ridesharing Program:** The project tenant will promote ride-sharing programs through a multi-faceted approach, such as designating a certain percentage of parking spaces for ride-sharing vehicles, designating adequate passenger loading and unloading and waiting areas for ride-sharing vehicles, and/or providing a website or message board for coordinating rides. A designated employee may partner with SANDAG to use programs such as SANDAG Vanpool, Employer Commuter Program and Guaranteed Ride Home.
3. **Implement Subsidized or Discounted Transit Program:** The project tenant would provide or reimburse the cost of monthly transit passes (such as Pronto card or mobile app) to the employees who use bus or rail transit to work to create incentive programs that reward employees for utilizing non-single occupancy vehicles to commute.
4. **Provide End of Trip Bicycle Facilities:** The project will provide at least 15 bicycle parking spaces per City's parking code requirement[7]. Where possible, appropriate designed electrical outlets will be included near the bicycle racks for charging electric bicycles (E-bikes).

MM TRA 2 Construction of Sidewalk: The Project will construct a new on-site sidewalk to connect the main entrance of the building with the existing sidewalk on N. Woodside Avenue. Together, with the sidewalk constructed per **PDF-TRA-1**, this will be a total of 990 linear feet of new sidewalk.

[7] Per City's code 5% of motorized parking should be bicycle parking, therefore 5% of 301 car parking spaces = 15 bicycle parking spaces.

10 Findings and Recommendations

Based on the transportation analysis of the proposed project, the following findings on VMT analysis, study area roadway and intersection levels of service, and project effects and mitigation and improvement measures are made:

Project Description and Trip Generation

- The proposed project includes the demolition of the existing drive-in theater and the construction of a 300,145 SF industrial/warehousing building as well as associated improvements at 10990 Woodside Avenue in the City.
- The proposed project would generate approximately 1,011 daily non-PCE trips, 102 AM peak hour trips (83 inbound and 19 outbound), and 103 PM peak hour trips (23 inbound and 80 outbound). Adjusting for PCE, the proposed project would generate approximately 1,440 daily PCE trips, 148 AM peak hour trips (121 inbound and 27 outbound), and 146 PM peak hour trips (30 inbound and 116 outbound).

VMT Analysis and Mitigation Measures

- The proposed project would generate less than 2,400 ADT. Therefore, the project's VMT analysis was conducted using the SANDAG SB 743 maps. Compared to the regional mean of 18.9 VMT per employee, the VMT per employee of the project's census tract is 22.2 VMT. Because the project's VMT is higher than the regional average of the census tract it is located within, the project would result in a significant VMT impact.
- A VMT reduction of 11.3% would be achieved through the implementation of Commute Trip Reduction Program measures and construction of sidewalk facilities along Woodside Avenue. A reduction of 15% is required to reduce the VMT per employee to at or below regional level. **As shown in Section 9, MM-TRA-1 Trip Reduction Program** would be implemented by the project's tenants to reduce the project's VMT and **MM-TRA-2 Construction of Sidewalk** would improve pedestrian network connectivity in the area. Because the project's VMT would not be reduced to below significance threshold even with the implementation of MM-TRA-1 and MM-TRA-2, the project's VMT impact would remain **significant and unavoidable**.

Traffic Analysis and Improvement Measures

- Under Existing plus Project conditions and Near Term plus Project conditions, all the study area roadway segments would operate at LOS D or better. Under Horizon Year and Horizon Year plus Project conditions, the roadway segment of Woodside Avenue between Magnolia Avenue and N. Woodside Avenue and N. Woodside Avenue between Woodside Avenue to Project Driveway would operate at LOS E. A project's traffic effect is determined if it exceeds the volume to capacity ratio by 0.02 or more at roadway segments operating at LOS E or F. Based on that criterion, the proposed project would exceed the City's criteria for traffic effect at N. Woodside Avenue and N. Woodside Avenue between Woodside Avenue to Project Driveway, which determines the needs for roadway improvements. Project access driveway improvements and frontage improvements along N. Woodside Avenue would facilitate traffic flow and truck turn movement along Woodside Avenue near the project site. Since Woodside Avenue is constructed at buildout classification per the City's Mobility Element, no further improvements to this roadway segment are recommended.

  The proposed project would result in a traffic effect at the N. Woodside Avenue/S. Woodside Avenue – SR-67 SB Off-Ramp intersection, under Existing plus Project, Near Term plus Project and Buildout plus

Project conditions, **PDF-TRA-1 Multi-modal Intersection Improvements (see Section 9)** will be implemented, consistent with City's Mobility Element goals and policies as well as social and economic benefits in lieu of improving delay at the intersection:

- The project would construct a dedicated eastbound left turn lane at the Project Access Driveway/ N. Woodside Avenue. The project access driveway will be designed per City specifications for commercial driveways. The project would be responsible for constructing frontage improvements including sidewalks along the northern side of Woodside Avenue and connect to the existing sidewalk along N. Woodside Avenue. The project would also install crosswalks to improve pedestrian circulation at the Project Access Driveway/N. Woodside Avenue.

MEMORANDUM

To:	Minjie Mei, Principal Traffic Engineer, City of Santee
From:	Sabita Tewani, AICP, PTP, Transportation Planner
Subject:	Revised Transportation Impact Study (TIS) Scoping for the Palisade Santee Commerce Center Project, City of Santee
Date:	August 16, 2023, Updated September 2024
cc:	Kristen Stoner, Dudek Dennis Pascua, Dudek
Attachments:	Figures 1-3 A – Observed Trip Rate Summary and Driveway Count Sheets B – Cumulative Projects and Santee Active Projects Map (~~June 2023~~ August 2024) C –VMT Scoping Form

The following memorandum provides the revised scope of work for the Transportation Impact Study (TIS) for the Palisade Commerce Santee Commerce Center Project (project). The scope revisions incorporate the City's comments from April 2023 (April 19, 2023, Inter-Office Memo) as well as item discussed in subsequent calls with the City's Traffic Engineers, Minjie Mei and Jeff Morgan, and include the following:

- An increase in square footage from 291,290 square feet (SF) to 300,145 SF (+8,855 SF).
- A trip generation survey of existing, similar industrial land uses to substantiate the use of trip rates from the current edition of the Institute of Transportation Engineers (ITE) Trip Generation, 11th Edition (2021).
- Revised vehicle miles traveled (VMT) findings based on use of the ITE trip rates for the project.

The proposed project site is located at 10990 N. Woodside Avenue in the City of Santee (City) on a site currently occupied by the Santee Drive In Theater. The following memorandum has been prepared consistent with the City of Santee Vehicle Miles Traveled (VMT) Analysis Guidelines (April 13, 2022) and the ITE Guidelines for Transportation Impact Studies in the San Diego Region (May 2019) which provide guidance on the requirements to evaluate transportation impacts using VMT and level of service (LOS) metrics for projects in the City. This memorandum provides the documentation related to selection of appropriate trip rates for the project, the resulting trip generation, proposed traffic study area and analysis scenarios, cumulative projects list, and the SANDAG VMT summary for the proposed project.

1 Project Description

The proposed project includes the demolition of the existing drive-in theater and the construction of a 300,145 SF industrial/warehousing building as well as associated improvements including loading docks, trailer stalls, passenger vehicle parking spaces, and street, sidewalk, and landscape improvements. The Assessor Parcel

Number (APN) of the Project site is 381-070-5200. The City's General Plan Land Use Map designates the project site the entire site as Light Industrial.

Figure 1 illustrates the project's location. Regional access to the project site is available from State Route (SR) 52 and SR 67 via Magnolia Avenue, Woodside Avenue, and Riverford Road. The Project would be accessed via a dedicated drive aisle on Woodside Avenue which leads to two 40-foot-wide driveways. These driveways and an on-site roadway would provide access to the vehicle parking lots and two truck courts. Vehicle parking for employees would be in parking lots along the periphery of the project site. The site plan of the proposed project is shown on Figure 2.

2 Project Traffic

The project would include construction of a 300,145 SF industrial building with approximately 10,000 SF of mezzanine space and up to 42 dock high doors. The building could be used for multiple tenants for warehousing and distribution, manufacturing, assembly, research and development, and related office uses. Therefore, Dudek reviewed available trip generation rates in SANDAG (2002) Brief Guide of Vehicular Trip Generation Rates for the San Diego Region and also compared them to the trip rates of industrial uses in the Institute of Transportation Engineers (ITE) Trip Generation, 11th Edition (2021). The SANDAG trip rates are significantly higher for warehousing (5 trips/TSF) and an industrial park use (8 trips/TSF) when compared to the current ITE Trip Generation Manual. Therefore, as directed by the City, Dudek conducted trip generation surveys of existing, similar industrial uses in the San Diego region. The surveys were conducted since there are large discrepancies between industrial land use trip rates reported in the SANDAG (2002) and ITE (2021) trip generation rate sources.

2.1 Trip Generation Survey

Dudek identified three industrial sites with warehousing, manufacturing, and/or research and development uses, in similar size and location to the proposed project and collected empirical data at those sites to establish an appropriate trip generation rates for the proposed project. The selected sites were representative of uses that might occupy the project site. If found to be appropriate by the City, the use of this empirical data to estimate daily and peak hour project traffic volumes for passenger cars and trucks would be utilized for the project's transportation analysis. In discussion with the City, the following sites were selected for the trip generation surveys:

- Site 1. Vision Systems, Inc: an approximately 140,000 SF manufacturing/warehousing use (including outdoor materials yard) located at 11322 N. Woodside Avenue in the City of Santee. (see Attachment A, Figure a)
- Site 2. MagnaFlow: an approximately 330,000 SF research & development/manufacturing/warehousing use in two adjacent buildings (240,000 SF and 90,000 SF) located at 1901 Corporate Center Drive and 3937 Ocean Ranch Boulevard, respectively, in the City of Oceanside. (see Attachment A, Figure b)
- Site 3. Veritiv Distribution Warehouse: an approximately 212,275 SF warehousing use located at 2005 Harmony Grove Rd in the City of Escondido. (see Attachment A, Figure c)

24-hour traffic counts were collected at the driveways of the sites listed above for two consecutive weekdays in the month of June 2023. The counts included all vehicles, bicyclists, and pedestrians that entered or exited these

sites. The driveway counts were classified by vehicle type (i.e., passenger-cars and light, medium, and heavy trucks) and by the time of the day for a period of two days. The driveway counts were summed and averaged over the two-day period and used to establish a vehicular trip rate for passenger cars and trucks per TSF of building area for the daily, AM peak hour and PM peak hour of the generator and the peak hour of adjacent street traffic for each site. See Attachment A for details on Observed Trip Rate Summary and Driveway Count Sheets.

As shown in Attachment A, the summary of Observed Trip Generation Rates at the sites surveyed in the San Diego region, the highest trip generation rate was at Site 1 (3.15 daily trips per TSF) and the lowest trip generation site was at Site 3 (0.41 daily trips per TSF). The percentage of truck trips of the total daily trips was also observed to be low at Site 1 (0.21 truck trips/TSF, or 6.8% of 3.15 daily trips/TSF) and Site 2 (0.15 truck trips/TSF, or 6.3% of 2.43 daily trips/TSF). The truck trips were noted to be higher at Site 3 (0.10 trips/TSF, or 25% of 0.41 daily trips/TSF).

2.2 Project Trip Generation

Based on the driveway counts results, and the low trip generation observed at all three industrial use sites, Dudek recommends using the ITE trip generation rate for the Industrial Park use (ITE Code 130) at 3.37 daily trips/TSF to estimate the project's daily, AM peak hour, and PM peak hour trip generation. The ITE daily trip rate (3.37 trips/TSF) is higher than Site 1 which had the highest surveyed empirical rate (3.15 trips/TSF). Additionally, to provide a conservative estimate of truck trips, the warehouse truck fleet mix from the South Coast Air Quality Management District's (SCAQMD) Warehouse Truck Trip Study Data Results and Usage (2014) be used to estimate project-related truck traffic. Based on the SCAQMD data, passenger cars would account for 72.5% trips of the total trips generated by a warehouse facility, and truck trips would account for approximately 27.5% of the total trips. The ITE and SCAQMD trip generation data are widely used for other industrial projects in southern California.

The total percentage of truck trips were further divided by 2-axle, 3-axle, and 4+ axle trucks per the SCAQMD study. These truck trips generated by the project are provided in PCE trips by using appropriate PCE factors. PCE factors consistent with the standard practice were used to estimate the total PCE trips for the project. Table 1 provides the project's trip generation summary.

Table 1. Project Trip Generation Summary

Land Use	Daily Trip Rate/Unit		AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Trip Rates and Trip Generation								
Industrial Park [1]	3.37 trips/TSF		0.28	0.06	0.34	0.07	0.27	0.34
Land Use	**Units**	**Daily**						
Project (300.145 TSF)	Total Trips (non-PCE)	1,011	83	19	102	23	80	103
	Passenger Cars	*733*	*60*	*14*	*74*	*16*	*58*	*74*
	Trucks (non-PCE)	*278*	*24*	*5*	*29*	*6*	*23*	*29*
Trucks (PCE)								
Vehicle Mix[2]	Passenger Cars (72.5%)	733	60	14	74	16	58	74

Table 1. Project Trip Generation Summary

Land Use	Daily Trip Rate/Unit		AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
and PCE Trips	2-axle Trucks (4.6%)	46	*4*	*1*	*5*	*1*	*4*	*5*
	3-axle Trucks (5.7%)	58	*5*	*1*	*6*	*1*	*5*	*6*
	4+axle Trucks (17.2%)	174	*15*	*3*	*18*	*4*	*14*	*18*
	Non - PCE Trips	**1,011**	**83**	**19**	**102**	**23**	**80**	**103**
Trip Generation (PCE)								
Vehicle Mix[2] and PCE Trips	Passenger Cars (72.5%)	733	60	14	74	16	58	74
	2-axle Trucks (4.6%)	70	6	1	7	1	6	7
	3-axle Trucks (5.7%)	115	10	2	12	2	10	12
	4+axle Trucks (17.2%)	522	45	9	54	11	42	53
	PCE Trips	**1,440**	**121**	**27**	**148**	**30**	**116**	**146**

Notes: TSF = thousand square feet, PCE = passenger car equivalent Some of the totals may not match exactly due to rounding.
1 Trip rates from the ITE.
2 Vehicle Mix from the SCAQMD 2014.

As shown in Table 1, using the ITE and SCAQMD trip generation data, the proposed project would generate approximately 1,011 daily trips, 102 AM peak hour trips (83 inbound and 19 outbound), and 103 PM peak hour PCE trips (23 inbound and 80 outbound). With PCE conversion, the proposed project would generate approximately 1,440 daily PCE trips, 148 AM peak hour PCE trips (121 inbound and 27 outbound), and 146 PM peak hour PCE trips (30 inbound and 116 outbound).

3 LOS Analysis

3.1 Study Area

Per the ITE San Diego Regional guidelines, the study area for the LOS analysis should be based on the threshold of 50 or more AM or PM peak-hour project trips that pass through an intersection. Based on the project's trip generation (Table 1) and trip distribution shown on Figure 3, the following intersections (shown on Figure 1) are proposed for the project's LOS analysis:

1. Magnolia Avenue/SR-52 eastbound off-ramp
2. Magnolia Avenue/SR-52 westbound on-ramp - SR-67 southbound on-ramp
3. Magnolia Avenue-Mission Gorge Road/Woodside Avenue
4. N. Woodside Avenue/Woodside Avenue – SR 67 southbound off-ramp
5. Hartley Road/N. Woodside Avenue
6. Wheatlands Avenue/N. Woodside Avenue
7. Project Access Roadway/N. Woodside Avenue

The following roadway segments are proposed for the analysis:

1. N. Woodside Avenue, between Project Driveway and Woodside Avenue
2. Woodside Avenue, between Magnolia Avenue and N. Woodside Avenue – Woodside Avenue
3. Magnolia Avenue, between Woodside Avenue-Mission Gorge Road and SR-52 westbound on-ramp-SR-67 southbound on-ramp

3.2 Study Scenarios

The following scenarios will be analyzed in the LOS analysis:

- Existing Conditions
- Existing Plus Project Conditions
- Near-Term Conditions
- Near-Term plus Project Conditions
- Horizon Year Conditions
- Horizon year plus Project Conditions

~~A buildout horizon year analysis is not proposed since the project is consistent with the City's land use/zoning and is not proposing any roadway network changes that are not accounted for in the General Plan. Additionally, the project trip generation would not exceed the threshold of 2,400 ADT requiring a buildout SANDAG model run.~~

3.3 ~~Existing and Near-Term~~ Traffic Volumes

New traffic counts were collected during the AM and PM peak hours at the proposed study area intersections, and 24-hour daily counts at the roadway segments were collected on one typical weekday in May 2023 while nearby schools were in session. The Near-Term traffic volumes will be developed using information on cumulative projects in the vicinity of the project within the City. Dudek reviewed the currently available map of approved/pending projects. In consultation with the City, Dudek has prepared a list of six projects which would be included in the Near-Term conditions traffic analysis. See Attachment B for details on cumulative projects. The horizon Year traffic volumes (ADT and AM and PM peak hour) will be estimated using the recently approved Fanita Ranch Traffic Impact Study (LLG 2020).

3.4 Traffic Analysis

Intersection LOS and roadway segment capacity analyses will be analyzed consistent with the Highway Capacity Manual (HCM) methodology for the Existing and Near-Term conditions (with and without project). For any operational deficiencies found, per Table 7-1 – Determination of the Need for Roadway Improvements provided in the ITE guidelines, site or operational improvements will be provided to lessen the project's LOS effects.

Dudek will qualitatively analyze the transit, pedestrian, and bicycle facilities that serve the project site. Project access and on-site circulation will be based on the City's Standard Plans/Drawings for access and on-site circulation design requirements. Vehicular queuing at the project's driveway intersection (Project Access Roadway/Woodside Avenue) will

be analyzed for adequacy based on the 95th percentile (design) queues. As requested by the City, Dudek will evaluate the need for a dedicated eastbound left turn into the Project Access Roadway from Woodside Avenue.

For any project related traffic effects found, Dudek will determine appropriate and feasible improvement measures.

4 VMT Analysis and Impact Determination

The City's VMT scoping form is attached to this memorandum (Attachment C). The project site is within Census Tract 166.07 under the current SANDAG Travel Demand model. Since the project's daily trip generation estimate would be below 2,400 average daily trips, and the project's census tract includes other employee-based uses, a project-specific model run by SANDAG would not be required. Based on the San Diego Region SB743 VMT Maps and using City's criteria for evaluation of Industrial projects, the project is within a high-VMT generating area for VMT per employee (i.e., greater than or equal to the regional mean). Compared to the regional mean of 18.9 VMT per employee, the VMT per employee of the project's census tract is 22.2 VMT. Therefore, it can be inferred that the proposed project would result in a significant VMT impact.

To mitigate project's VMT impacts, TDM strategies from the California Air Pollution Control Officers Association (CAPCOA) Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity (2021) (GHG Reduction Handbook) and the SANDAG Mobility Management Guidebook/VMT Reduction Calculator Tool will be provided in the TIS.

SITE PLAN GENERAL NOTES

1. THE SITE PLAN SHALL MEET ALL ENGINEERING & NPDES REQUIREMENTS.
2. GENERAL CONTRACTOR TO REVIEW THE SOILS REPORT AND ALL AMENDMENTS LISTED ON THE TITLE SHEET AND FOLLOW ALL RECOMMENDATIONS.
3. U.O.N., ALL DIMENSIONS TO CONCRETE WALLS AND CURBS ARE EITHER TO THE CENTER (SHOWN WITH A CENTERLINE) OR FACE OF THE WALL OR CURB. ALL DIMENSIONS TO FRAMED WALLS ARE EITHER TO THE CENTER LINE OF THE WALL FRAMING (SHOWN WITH A CENTERLINE) OR FACE OF THE WALL FRAMING.
4. REFER TO CIVIL AND MEP PLANS TO CONFIRM UTILITY INFORMATION SHOWN ON THE ARCHITECT'S SITE PLAN AND FOR ADDITIONAL UTILITY INFORMATION. GENERAL CONTRACTOR TO COORDINATE ALL POINTS OF CONNECTION.
5. REFER TO CIVIL DRAWINGS FOR ALL FINISHED GRADES AND SLOPES. ALL FINISHED GRADES TO PROVIDE POSITIVE DRAINAGE AWAY FROM THE BUILDING. GENERAL CONTRACTOR TO FIELD VERIFY.
6. ALL ACCESSIBLE ROUTES IDENTIFIED ON THE SITE PLAN DRAWINGS SHALL CONFORM TO THE FOLLOWING:
   a) SLOPES IN THE DIRECTION OF TRAVEL DO NOT EXCEED 5%, CROSS SLOPES DO NOT EXCEED 2%.
   b) THE CLEAR WIDTH OF ALL WALKWAYS IS 4'-0" MIN.
   c) CHANGES IN LEVEL UP TO 1/2" COMPLY w/ 11A\D.2.1. CHANGES IN LEVEL GREATER THAN 1/2" IF THEY OCCUR ARE RAMPED. SEE PLANS.
   d) THE VERTICAL CLEARANCE ALONG THE ACCESSIBLE ROUTE IS 80" MIN.
7. ALL PAVED AND LANDSCAPED AREAS TO BE BOUND BY A MIN. 6" HIGH, 6" WIDE CONCRETE CURB U.O.N.
8. A CONCRETE MOW STRIP EXTENDING 12" BEYOND EA END OF THE OPENING SHALL BE PROVIDED @ ALL EXTERIOR GLAZING WHERE THE SILL IS WITHIN 3' VERTICAL OF THE FINISHED GRADE. SEE 2/A01.1
9. PROVIDE PIPE BOLLARD PROTECTION POSTS AS REQUIRED BY UTILITY COMPANIES AND OR FIRE AUTHORITIES AT ALL EXTERIOR ELECTRICAL EQUIPMENT AND FIRE PREVENTION DEVICES. IF PIPE BOLLARD PROTECTION POST DETAILS ARE NOT PROVIDED BY UTILITY COMPANIES AND OR FIRE AUTHORITY SEE DETAIL 3/A01.1
10. ALL EXPOSED BIORETENSION DEVICE COVERINGS SHALL BE PAINTED FOREST GREEN.
11. WHERE OCCURS, GENERAL CONTRACTOR TO PROVIDE FLUID APPLIED DAMP PROOFING AT ALL RETAINING AND PLANTER WALLS WHERE THE SIDE OF THE WALL OPPOSITE THE SOIL SIDE IS EXPOSED TO INTERIOR SPACE OR WHERE THE SOIL SIDE IS ADJACENT FLOOR SLAB IN BELOW GRADE. SEE 6/A01.2
12. PROVIDE A HOSE BIB NEAR THE MAIN ENTRANCE AND IN THE TRASH ENCLOSURE. SEE PLAN FOR LOCATION.

Cumulative Projects Information

List of Cumulative Projects to be included in Near Term Analysis of Proposed Project

ID No.	City ID.	Project	Status	Address	Location	Landuse/Description
1	25	Southwest Signal Building	Pending entitlement	10756 Rockvill Street	southest quadrant of Magnolia Avenue and Woodside Avenue	20,000 SF industrial building
2	23	Lantern Crest Ridge II	Under construction	11000 Sunset Trail	north of Sunset trail	62-unit memory care facility
3	38	Habitat for Humanity Townhomes	Pending entitlement	8932 First Street	Northwest quadrant of Magnolia Avenue and Woodside Avenue	17 residential condominium units
4	36	Santee Auto Center	Pending entitlement	10335 Mission Gorge Road	southeast quadrant of Cottonwood Avenue and Woodside Avenue	two-car dealerships, auto body shop, and car wash
5	21	Popeyes	Under construction	10308 Mission Gorge Road	northeast quadrant of Cottonwood Avenue and Woodside Avenue	1,740 SF drive-through restaurant
6	39	Super Star Car Wash	Pending entitlement	8837 Magnolia Avenue	northeast quadrant of Magnolia Avenue and Rockwill Street	4,980 sq. ft car wash tunnel
7	20	Extra Space Storage	Pending entitlement	10815 Woodside Avenue	north of Woodside Avenue and Riderwood Terrace intersection	88,390 sq ft (3-story) storage building
8	County/ PDS2022-TM-5023TE	Hillside Meadows/Parkside	To be confirmed	Lakeside 92040	north and south of the western terminus of Mast Boulevard, east of the City of Santee, and south of El Nopal,	143 residential units and two industrial lots
9	County/ EA 11-43118	Riverford Interchange	Pending entitlement- The project anticipates delivering the Project Approval and Environmental Document (PA&ED) on 1/17/25	SR-67 and Riverford Road	unincorporated area of San Diego County within the Community of Lakeside and a portion in the City of Santee	Consolidate three intersections into two roundabouts along Riverford Road on either side of the SR-67

VMT Scoping Form

Appendix A: CEQA Transportation Analysis Screening Form

CEQA Transportation Analysis Screening

The Project Information Form (PIF) is to be completed by the applicant. The PIF is subject to change as new project information arises.

General Project Information and Description

Owner/Applicant Information

Name:	William Jacobs
Address:	
Phone Number:	(626) 840-7570
Email:	william.jacobs@northpalisade.com

Project Information

Project Name:	Palisade Santee Commerce Center Project		
Project Address:	10990 N. Woodside Avenue		
APN:	381-070-5200		
Land Use Designation:	Light Industrial	Zoning Designation:	Light Industrial

CEQA Transportation Analysis Screening

To determine if your project is screened from VMT analysis, review the Project Type Screening and the Project Location Screening tables below. If no "Yes" is checked for any project type or land use applicable to your project, the project is not screened out and must complete VMT analysis in accordance with the analysis requirements outline in the City of Santee *SB 743 Guidelines*. Trip generation should be supported by a memo prepared by a traffic engineer.

Project Type Screening

	Screened Out	Not Screened Out
1. Select the Screening Criteria that applies to your project 2. Answer the questions for each screening criteria that applies to your project *(if "Yes" is indicated in any land use category below, then that land use (or a portion of the land use) is screened from CEQA Transportation Analysis)* *Note: All responses must be documented and supported by substantial evidence.*	Yes	No
☐ **1. Project located in a transit accessible area** a. Is the project in a transit priority area or within ½ mile of a stop along a high-quality transit corridor, and has the following project characteristics? i. Has a Floor Area Ratio (FAR) of more than 0.75 ii. Includes no more than the minimum parking for use by residents, customers, or employees of the project than required by the jurisdiction iii. Is consistent with the City of Santee General Plan iv. Does not replace affordable residential units with moderate- or high-income residential units. v. Have basic walking and biking access to transit	☐	☐ No
☐ **2. Small Project** a. The project generates 500 or fewer net new daily vehicle trips	☐	☐ No

☐	**3. Projects in VMT-Efficient area (Provide SANDAG screening map showing project location)** a. Residential Projects: Is the project located in a VMT-efficient area (15% or more below the baseline citywide average) using the SANDAG screening maps for VMT/Capita? b. Employment Projects: Is the project located in a VMT-efficient area (15% or more below the baseline citywide average) using the SANDAG screening maps for VMT/Employee? c. Industrial Projects: Is the project located in a VMT-efficient area (at or below the baseline citywide average) using the SANDAG screening maps for VMT/Employee? d. Mixed-use Projects: refer to the appropriate section for each land-use included as part of the mixed-use project	☐	☐ No
☐	**4. Locally Serving Retail Projects** a. Is the project less than 125 ksf and serving the local community?The City may request a market capture study that identifies local market capture to the City's satisfaction. (for Retail Projects above 50 ksf, market studies may be required to demonstrate that at least 75% of customers are local customers)	☐	☐ No
☐	**5. Locally Serving Public Facility or Community Purpose Facility** a. Is the project a public facility or Community Purpose Facility that serves the local community? (see section 2.3 of VMT analysis guidelines for a list of public facilities)	☐	☐ No
☐ Yes	**6. Redevelopment Project** a. Is the proposed project's total project VMT less than the existing land use's total VMT? And the CEQA action includes closing the existing land use?	☐ Yes	☐
☐	**7. Infill affordable housing** a. Is the proposed project a deed restricted affordable housing project that meet the following criteria? i. Is an infill project; ii. Consists of a minimum of 52% affordable housing; iii. Is within ½ mile radius of a transit stop or station; and iv. Project provided parking does not exceed parking required by the City of Santee	☐	☐

Appendix B
VMT Mitigation Measures

FEHR & PEERS

Trip Reduction Programs - T-7. Implement Commute Trip Reduction Marketing

Locational Context	**Urban, Suburban**
Scale of Application	**Project/Site**
Type of VMT affected:	**Employee commute trips**
Max VMT reduction:	**4.00%**

This measure will implement a marketing strategy to promote the project site employer's CTR program. Information sharing and marketing promote and educate employees about their travel choices to the employment location beyond driving such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions.

The following features (or similar alternatives) of the marketing strategy are essential for effectiveness.

- Onsite or online commuter information services.
- Employee transportation coordinators.
- Onsite or online transit pass sales.
- Guaranteed ride home service.

Percent of employees eligible for program	100.0%	**percent**	user input (default value = 0-1)
Percent reduction in employee commute vehicle trips	-4.0%	**percent**	constant (default value = -0.04)
Adjustment from vehicle trips to VMT	1.000	**unitless**	constant (default value = 1)
Change in VMT	**-4.00%**	**percent reduction**	

Formula: % Change in VMT = Percent of employees eligible for program * Percent reduction in employee commute vehicle trips

FEHR & PEERS

Trip Reduction Programs - T-8. Provide Ridesharing Program

Locational Context	**Urban, Suburban**
Scale of Application	**Project/Site**
Type of VMT affected:	**Employee commute trips**
Max VMT reduction:	**8.00%**

This measure will implement a ridesharing program and establish a permanent transportation management association with funding requirements for employers. Ridesharing encourages carpooled vehicle trips in place of single-occupied vehicle trips, thereby reducing the number of trips, VMT, and GHG emissions.

Ridesharing must be promoted through a multi-faceted approach.
Examples include the following.

- Designating a certain percentage of desirable parking spaces for ridesharing vehicles.
- Designating adequate passenger loading and unloading and waiting areas for ridesharing vehicles.
- Providing an app or website for coordinating rides.

Select the Place Type for the project.	Suburban		Appendix C. T-7.1
Percent of employees eligible for program	100.0%	**percent**	user input (default value = 0-1)
Percent reduction in employee commute VMT	-4.0%	**percent**	constant (default value = -0.04--0.08)
Change in VMT	**-4.00%**	**percent reduction**	

Formula: % Change in VMT = Percent of employees eligible for program * Percent reduction in employee commute VMT

FEHR & PEERS

Trip Reduction Programs - T-9-B. Implement Subsidized or Discounted Transit Program - Work Trips Only

Locational Context **Urban, Suburban**
Scale of Application **Project/Site**
Type of VMT affected: **Employee commute trips**
Max VMT reduction: **5.50%**

This measure will provide subsidized or discounted, or free transit passes for employees. Reducing the out-of-pocket cost for choosing transit improves the competitiveness of transit against driving, increasing the total number of transit trips and decreasing vehicle trips. This decrease in vehicle trips results in reduced VMT and thus a reduction in GHG emissions. The project should be accessible either within 1 mile of high-quality transit service (rail or bus with headways of less than 15 minutes), 0.5 mile of local or less frequent transit service, or along a designated shuttle route providing last-mile connections to rail service. If a well-established bikeshare service (Measure T-22-A) is available, the site may be located up to 2 miles from a high-quality transit service.

Select the Core-Based Statistical Area for the project.	San Diego-Carlsbad		Appendix C. T-8.1
Average transit fare without subsidy	$2.50	dollar	user input (default value = 0-1000)
Subsidy amount	$2.50	dollar	user input (default value = 0-1000)
Percent of employees/residents eligible for subsidy	100.0%	percent	user input (default value = 0-1)
Percent of project-generated VMT from employees/residents	72.5%	percent	user input (default value = 0-1)
Transit mode share of all work trips	4.7%	percent	optional (default value = 0.0112-0.256)
Elasticity of transit boardings with respect to transit fare price	-0.430	unitless	constant (default value = -0.43)
Percent of transit trips that would otherwise be made in a vehicle	50.0%	percent	constant (default value = 0.5)
Conversion factor of vehicle trips to VMT	1.000	unitless	constant (default value = 1)
Change in VMT	**-0.74%**	**percent reduction**	

Formula: % Change in VMT = (Subsidy amount / Average transit fare without subsidy * Elasticity of transit boardings with respect to transit fare price) * Percent of employees/residents eligible for subsidy * Percent of project-generated VMT from employees/residents * Transit mode share of all work trips * Percent of transit trips that would otherwise be made in a vehicle * Conversion factor of vehicle trips to VMT

FEHR & PEERS

Trip Reduction Programs - T-10. Provide End-of-Trip Bicycle Facilities

Locational Context **Urban, Suburban**
Scale of Application **Project/Site**
Type of VMT affected: **Employee commute trips**
Max VMT reduction: **4.40%**

This measure will install and maintain end-of-trip facilities for employee use. End-of-trip facilities include bike parking, bike lockers, showers, and personal lockers. The provision and maintenance of secure bike parking and related facilities encourages commuting by bicycle, thereby reducing VMT and GHG emissions.

Select the Core-Based Statistical Area for the project.	San Diego-Carlsbad		Appendix C. T-9.1
Bike mode adjustment factor	4.860	**unitless**	constant (default value = 1.78-4.86)
Existing bicycle trip length for all trips in region	2.0	**mile**	optional (default value = 1.7-2.9)
Existing vehicle trip length for all trips in region	19.1	**mile**	optional (default value = 9.7-19.1)
Existing bicycle mode share for work trips in region	1.3%	**percent**	optional (default value = 0.004-0.041)
Existing vehicle mode share for work trips in region	91.8%	**percent**	optional (default value = 0.671-0.953)
Change in VMT	-0.57%	**percent reduction**	

Formula: % Change in VMT = (Existing bicycle trip length for all trips in region * (Existing bicycle mode share for work trips in region - (Bike mode adjustment factor * Existing bicycle mode share for work trips in region))) / (Existing vehicle trip length for all trips in region * Existing vehicle mode share for work trips in region)

FEHR PEERS

Neighborhood Design - T-18. Provide Pedestrian Network Improvement

Locational Context	**Urban, Suburban, Rural**
Scale of Application	**Plan/Community**
Type of VMT affected:	**Household trips**
Max VMT reduction:	**6.40%**

This measure will increase the sidewalk coverage to improve pedestrian access. Providing sidewalks and an enhanced pedestrian network encourages people to walk instead of drive. This mode shift results in a reduction in VMT and GHG emissions. The 'study area' should be based on a 1 KM buffer around the area where the pedestrian network is being improved. The VMT reduction is limited to household VMT.

Existing sidewalk length in study area	0.4	**mile**	user input (default value = 0-9999)
Sidewalk length in study area with measure	0.6	**mile**	user input (default value = 0-9999)
Elasticity of VMT with respect to the ratio of sidewalks-to-streets	-0.050	**unitless**	constant (default value = -0.05)
Change in VMT	**-2.51%**	**percent reduction**	

Formula: % Change in VMT = ((Sidewalk length in study area with measure / Existing sidewalk length in study area) - 1) * Elasticity of VMT with respect to the ratio of sidewalks-to-streets

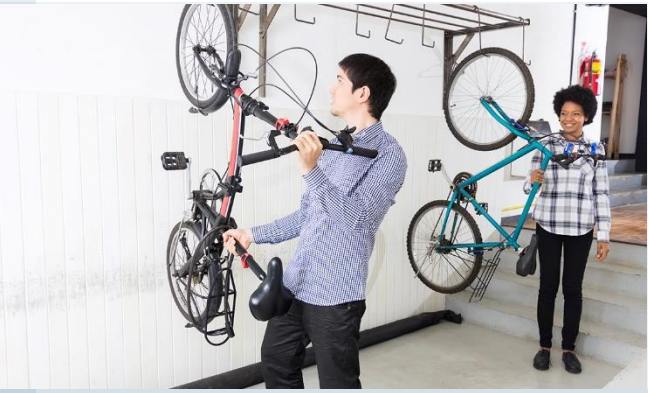
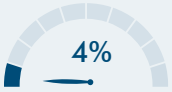
T-5. Implement Commute Trip Reduction Program (Voluntary)



GHG Mitigation Potential



Up to 4.0% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

CTR programs could result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site. Lower transportation costs would also increase community resilience by freeing up resources for other purposes.

Health and Equity Considerations

Design of CTR programs need to ensure equitable access and benefits to all employees are provided considering disparate existing mobility options in diverse communities.

Measure Description

This measure will implement a voluntary commute trip reduction (CTR) program with employers. CTR programs discourage single-occupancy vehicle trips and encourage alternative modes of transportation such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions. Voluntary implementation elements are described in this measure.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

Voluntary CTR programs must include the following elements to apply the VMT reductions reported in literature.

- Employer-provided services, infrastructure, and incentives for alternative modes such as ridesharing (Measure T-8), discounted transit (Measure T-9), bicycling (Measure T-10), vanpool (Measure T-11), and guaranteed ride home.
- Information, coordination, and marketing for said services, infrastructure, and incentives (Measure T-7).

Cost Considerations

Employer costs may include recurring costs for transit subsidies, capital and maintenance costs for the alternative transportation infrastructure, and labor costs for staff to manage the program. Where the local municipality has a VMT reduction ordinance, costs may include the labor costs for government staff to track the efficacy of the program.

Expanded Mitigation Options

Other strategies may also be included as part of a voluntary CTR program, though they are not included in the VMT reductions reported by literature and thus are not incorporated in the VMT reductions for this measure.

This program typically serves as a complement to the more effective workplace CTR measures such as pricing workplace parking (Measure T-12) or implementing employee parking "cash-out" (Measure T-13).

GHG Reduction Formula

$A = B \times C$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from project/site employee commute VMT	0–4.0	%	calculated
User Inputs				
B	Percent of employees eligible for program	0–100	%	user input
Constants, Assumptions, and Available Defaults				
C	Percent reduction in commute VMT from eligible employees	-4	%	Boarnet et al. 2014

Further explanation of key variables:

- (B) – This refers to the percent of employees that would be able to participate in the program. Employees who might not be able to participate could include those who work nighttime hours when transit and rideshare services are not available or employees who are required to drive to work as part of their job duties. This input does not refer to the percent of employees who participate in the program.
- (C) – A policy brief summarizing the results of employer-based trip reduction studies concluded that these programs reduce total commute VMT for employees at participating work sites by 4 to 6 percent (Boarnet et al. 2014). To be conservative, the low end of the range is cited.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The maximum GHG reduction from this measure is 4 percent. This maximum scenario is presented in the below example quantification.

Subsector Maximum

($\sum A_{max_{\text{T-5 through T-13}}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for Measure T-6, which represents the same implementation activities as Measure T-5, except that the CTR program would be mandatory. Users should select either Measure T-5 or T-6.

If this measure is selected, the user may not also take credit for Measures T-7 through T-11. Measure T-5 accounts for the combined GHG reductions achieved by each of these individual measures. To combine the GHG reductions from T-5 with any of these measures would be considered double counting. However, the user may take credit for Measures T-12 through T-13 within the larger CTR subcategory, so long as the combined VMT reduction does not exceed 45 percent, as noted above.

Example GHG Reduction Quantification

The user reduces employee commute VMT by requiring that employers of a project offer a voluntary commute trip reduction program to their employees. In this example, the percent of employees eligible (B) is 100 percent, which would reduce GHG emissions from employee commute VMT by 4 percent.

$$A = 100\% \times -4\% = -4\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

Available: https://ww2.arb.ca.gov/sites/default/files/2020-06/Impacts_of_Employer-Based_Trip_Reduction_Programs_and_Vanpools_on_Passenger_Vehicle_Use_and_Greenhouse_Gas_Emissions_Policy_Brief.pdf. Accessed: January 2021.

T-6. Implement Commute Trip Reduction Program (Mandatory Implementation and Monitoring)

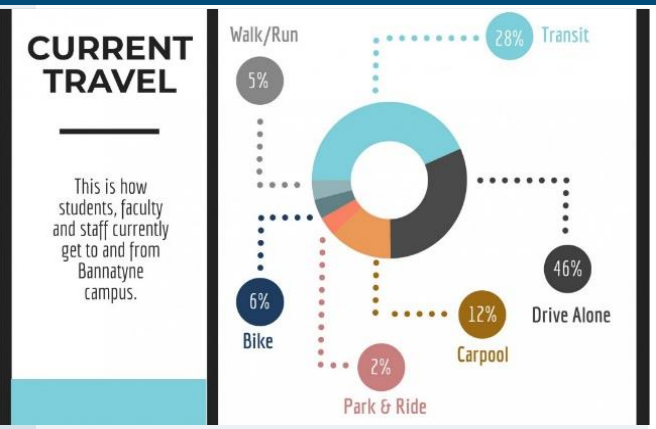

Photo Credit: University of Manitoba, 2018

GHG Mitigation Potential

Up to 26.0% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

Commute trip reduction programs could result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site. Lower transportation costs would also increase community resilience by freeing up resources for other purposes.

Health and Equity Considerations

Design of CTR programs needs to consider existing mobility options in diverse communities and ensure equitable access and benefit to all employees.

Measure Description

This measure will implement a mandatory CTR program with employers. CTR programs discourage single-occupancy vehicle trips and encourage alternative modes of transportation such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

The mandatory CTR program must include all other elements (i.e., Measures T-7 through T-11) described for the voluntary program (Measure T-5) plus include mandatory trip reduction requirements (including penalties for non-compliance) and regular monitoring and reporting to ensure the calculated VMT reduction matches the observed VMT reduction.

Cost Considerations

Employer costs may include recurring, direct costs for transit subsidies, capital and maintenance costs for alternative transportation infrastructure, and labor costs for staff to manage the program. If the local municipality has a mandatory VMT reduction ordinance, additional employer costs could include non-compliance penalties if the municipality fines CTR programs that do not meet a VMT goal. Municipal costs may include the labor costs for government staff to track the efficacy of the program, which may be outweighed by revenue generated from fines collected from non-compliant businesses.

Expanded Mitigation Options

This program typically serves as a complement to the more effective workplace CTR measures, such as pricing workplace parking (Measure T-12) or implementing employee parking "cash-out" (Measure T-13).

GHG Reduction Formula

$A = B \times C \times D$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from project/site employee commute VMT	0–26.0	%	calculated
User Inputs				
B	Percent of employees eligible for program	0–100	%	user input
Constants, Assumptions, and Available Defaults				
C	Percent reduction in vehicle mode share of employee commute trips	-26	%	Nelson\Nygaard Consulting Associates 2015
D	Adjustment from vehicle mode share to commute VMT	1	unitless	assumed

Further explanation of key variables:

- (B) – This refers to the percent of employees that would be able to participate in the program. This will usually be 100 percent. Employees who might not be able to participate could include those who work nighttime hours when transit and rideshare services are not available or employees who are required to drive to work as part of their job duties. This input does not refer to the percent of employees who participate in the program.
- (C) – A multiyear study of mode share on Genentech's South San Francisco campuses tracked the long-run change in employee commute mode share with implementation of mandatory CTR. Between 2006 and 2014, employee vehicle mode share (includes single-occupied vehicles and carpools) decreased from approximately 90 percent to 64 percent, which is a 26 percent reduction (Nelson\Nygaard Consulting Associates 2015).
- (D) – The adjustment factor from vehicle mode share to commute VMT is 1. This assumes that all vehicle trips will average out to typical trip length. Thus, it can be assumed that a percentage reduction in vehicle trips will equal the same percentage reduction in VMT.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The maximum GHG reduction from this measure is 26 percent. This maximum scenario is presented in the below example quantification.

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for Measure T-5, which represents the same implementation activities as Measure T-5, except that the CTR program would be mandatory. Users should select either Measure T-5 or T-6.

If this measure is selected, the user may not also take credit for Measures T-7 through T-11. Measure T-6 accounts for the combined GHG reductions achieved by each of these individual measures. To combine the GHG reductions from T-6 with any of these measures would be considered double counting. However, the user may take credit for Measure T-12 and T-13 within the larger CTR subcategory, so long as the combined VMT reduction does not exceed 45 percent, as noted above.

Example GHG Reduction Quantification

The user reduces employee commute VMT by requiring that the employer of the proposed project offer a mandatory CTR program to their employees. In this example, the percent of employees eligible (B) is 100 percent, which would reduce GHG emissions from employee commute VMT by 26 percent.

$$A = 100\% \times -26\% \times 1 = -26\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

Sources

- Nelson/Nygaard Consulting Associates. 2015. *Genentech–South San Francisco Campus TDM and Parking Report*. June. Available: http://ci-ssf-ca.granicus.com/MetaViewer.php?view_id=2&clip_id=859&meta_id=62028. Accessed: January 2021.

T-7. Implement Commute Trip Reduction Marketing

Photo Credit: Sacramento Area Council of Governments, 2012

GHG Mitigation Potential

Up to 4.0% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

Commute trip reduction programs could result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site. Lower transportation costs would also increase community resilience by freeing up resources for other purposes.

Health and Equity Considerations

Design of CTR programs needs to consider existing mobility options in diverse communities and ensure equitable access and benefit to all employees. CTR programs may need to include multi-language materials.

Measure Description

This measure will implement a marketing strategy to promote the project site employer's CTR program. Information sharing and marketing promote and educate employees about their travel choices to the employment location beyond driving such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

The following features (or similar alternatives) of the marketing strategy are essential for effectiveness.

- Onsite or online commuter information services.
- Employee transportation coordinators.
- Onsite or online transit pass sales.
- Guaranteed ride home service.

Cost Considerations

Employer costs include labor and materials for development and distribution of survey and marketing materials to promote the program and educate potential participants.

Expanded Mitigation Options

This measure could be packaged with other commute trip reduction measures (Measures T-8 through T-13) as a comprehensive CTR program (Measure T-5 or T-6).

GHG Reduction Formula

$A = B \times C \times D$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from project/site employee commute VMT	0–4.0	%	calculated
User Inputs				
B	Percent of employees eligible for program	0–100	%	user input
Constants, Assumptions, and Available Defaults				
C	Percent reduction in employee commute vehicle trips	-4	%	TRB 2010
D	Adjustment from vehicle trips to VMT	1	unitless	assumed

Further explanation of key variables:

- (B) – This refers to the percent of employees that would be able to participate in the program. This will usually be 100 percent. Employees who might not be able to participate could include those who work nighttime hours when transit and rideshare services are not available or employees who are required to drive to work as part of their job duties. This input does not refer to the percent of employees who actually participate in the program.
- (C) – A review of studies measuring the effect of transportation demand management measures on traveler behavior notes that the average empirically-based estimate of reductions in vehicle trips for full-scale, site-specific employer support programs is 4 to 5 percent. To be conservative, the low end of the range is cited (TRB 2010).
- (D) – The adjustment factor from vehicle trips to VMT is 1. This assumes that all vehicle trips will average out to typical trip length ("assumes all trip lengths are equal"). Thus, it can be assumed that a percentage reduction in vehicle trips will equal the same percentage reduction in VMT.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The maximum GHG reduction from this measure is 4 percent. This maximum scenario is presented in the below example quantification.

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for either Measure T-5 or T-6. However, this measure may be implemented alongside other individual CTR measures (Measures T-8 through T-13). The efficacy of individual programs may vary highly based on individual employers and local contexts.

Example GHG Reduction Quantification

The user reduces employee commute VMT by requiring that employers of a project market to employees travel options for modes alternative to single-occupied vehicles. In this example, the percent of employees eligible (B) is 100 percent, which would reduce GHG emissions from employee commute VMT by 4 percent.

$$A = 100\% \times -4\% \times 1 = -4\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

Sources

- Transportation Research Board (TRB). 2010. *Traveler Response to Transportation System Changes Handbook, Third Edition: Chapter 19, Employer and Institutional TDM Strategies*. June. Available: http://www.trb.org/Publications/Blurbs/163781.aspx. Accessed: January 2021.

T-8. Provide Ridesharing Program

GHG Mitigation Potential

Up to 8.0% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

Ridesharing programs could result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site. Lower transportation costs would also increase community resilience by freeing up resources for other purposes.

Health and Equity Considerations

Program should include all onsite workers, such as contractors, interns, and service workers. Because ridesharing is vehicle-based, and some employees may not be in areas with feasible rideshare networks, design of programs need to ensure equitable benefits to those with and without access to rideshare opportunities.

Measure Description

This measure will implement a ridesharing program and establish a permanent transportation management association with funding requirements for employers. Ridesharing encourages carpooled vehicle trips in place of single-occupied vehicle trips, thereby reducing the number of trips, VMT, and GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

Ridesharing must be promoted through a multifaceted approach. Examples include the following.

- Designating a certain percentage of desirable parking spaces for ridesharing vehicles.
- Designating adequate passenger loading and unloading and waiting areas for ridesharing vehicles.
- Providing an app or website for coordinating rides.

Cost Considerations

Costs of developing, implementing, and maintaining a rideshare program in a way that encourages participation are generally borne by municipalities or employers. The beneficiaries include the program participants saving on commuting costs, the employer reducing onsite parking expenses, and the municipality reducing cars on the road, which leads to lower infrastructure and roadway maintenance costs.

Expanded Mitigation Options

When providing a ridesharing program, a best practice is to establish funding by a non-revocable funding mechanism for employer-provided subsidies. In addition, encourage use of low-emission ridesharing vehicles (e.g., shared Uber Green).

This measure could be paired with any combination of the other commute trip reduction strategies (Measures T-7 through T-13) for increased reductions.

GHG Reduction Formula

$A = B \times C$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from project/site employee commute VMT	0–8.0	%	calculated
User Inputs				
B	Percent of employees eligible for program	0–100	%	user input
Constants, Assumptions, and Available Defaults				
C	Percent reduction in employee commute VMT	Table T-8.1	%	SANDAG 2019

Further explanation of key variables:

- (B) – This refers to the percent of employees that would be able to participate in the program. This will usually be 100 percent. Employees who might not be able to participate could include those who work nighttime hours when transit and rideshare services are not available or employees who are required to drive to work as part of their job duties. This input does not refer to the percent of employees who actually participate in the program.
- (C) – The percent reduction in employee commute VMT by place type is provided in Table T-8.1 in Appendix C. The reduction differs by place type because the willingness and ability to participate in carpooling is higher in urban areas than in suburban areas. Note that this measure is not applicable for implementation in rural areas (SANDAG 2019).

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The maximum GHG reduction from this measure is 8 percent.

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for either Measure T-5 or T-6. However, this measure may be implemented alongside other individual CTR measures (Measures T-7 and T-9 through T-13). The efficacy of individual programs may vary highly based on individual employers and local contexts.

Example GHG Reduction Quantification

The user reduces employee commute VMT by requiring that employers of a project provide a ridesharing program to their employees. In this example, the percent of employees eligible (B) at a packaging and distribution center is 50 percent and the place type of the project is urban (C). GHG emissions from employee commute VMT would be reduced by 4 percent.

$A = 50\% \times -8\% = -4\%$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

T-9. Implement Subsidized or Discounted Transit Program

GHG Mitigation Potential

Up to 5.5% of emissions from employee/resident vehicles accessing the site

Co-Benefits (icon key on pg. 34)

Climate Resilience

Subsidized and discounted transit programs increase the capacity of low-income populations to use transit to evacuate or access resources during an extreme weather event. They could also incentivize more people to use transit, resulting in less traffic and better allowing emergency responders to access a hazard site during an extreme weather event. Lower overall out-of-pocket costs would also help increase community resilience by freeing up resources for other purposes.

Health and Equity Considerations

Program should include all onsite workers, such as contractors, interns, and service workers.

Measure Description

This measure will provide subsidized or discounted, or free transit passes for employees and/or residents. Reducing the out-of-pocket cost for choosing transit improves the competitiveness of transit against driving, increasing the total number of transit trips and decreasing vehicle trips. This decrease in vehicle trips results in reduced VMT and thus a reduction in GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

The project should be accessible either within 1 mile of high-quality transit service (rail or bus with headways of less than 15 minutes), 0.5 mile of local or less frequent transit service, or along a designated shuttle route providing last-mile connections to rail service. If a well-established bikeshare service (Measure T-22-A) is available, the site may be located up to 2 miles from a high-quality transit service.

If more than one transit agency serves the site, subsidies should be provided that can be applied to each of the services available. If subsidies are applied for only one service, all variable inputs below should also pertain only to the service that is subsidized.

Cost Considerations

The employer cost is the recurring, direct cost for transit subsidies. The subsidies will lower the per capita income of the transit service, decreasing the revenue of the local transit agency. This cost may be offset by increased revenue from increased ridership. The beneficiaries include the program participants saving on commuting cost, the employer reducing onsite parking expenses, and the municipality reducing cars on the road, which leads to lower infrastructure and roadway maintenance costs.

Expanded Mitigation Options

This measure could be paired with any combination of the other commute trip reduction strategies (Measures T-7 through T-13) for increased reductions.

GHG Reduction Formula

$$A = \frac{C}{B} \times G \times D \times E \times F \times H \times I$$

GHG Calculation Variables

If subsidies or discounts target employees, the GHG reduction from this measure may be limited to work-related employee trips only (i.e., home-to- work) and work-to-other, where at least one trip end is work). If residents are targeted, the GHG reductions extend to all trips.

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from employee/resident vehicles accessing the site	0–5.5	%	calculated
User Inputs				
B	Average transit fare without subsidy	[ ]	$	user input
C	Subsidy amount	[ ]	$	user input
D	Percent of employees/residents eligible for subsidy	0–100	%	user input
E	Percent of project-generated VMT from employees/residents	0–100	%	user input
Constants, Assumptions, and Available Defaults				
F	Transit mode share of all trips or work trips	Table T-3.1 or Table T-9.1	%	FHWA 2017
G	Elasticity of transit boardings with respect to transit fare price	-0.43	unitless	Taylor et al. 2008
H	Percent of transit trips that would otherwise be made in a vehicle	50	%	Handy & Boarnet 2013
I	Conversion factor of vehicle trips to VMT	1.0	unitless	assumption

Further explanation of key variables:

- (B and C) – The average transit fare and subsidy amount can be presented as either a fare per ride, or the cost of a monthly pass for typical transit service near the site. Pricing should be based on the expected means of subsidy implementation; for instance, if a monthly pass is provided to all residents, prices should be input on a monthly basis.
- (D) – The percentage of employees/residents associated with the site who have access to the subsidy. If subsidy is provided as an employee benefit, care should be taken to account for any contract or temporary workers who do not receive such benefits.
- (E) – The percentage of project-generated VMT from employees/residents is used to adjust the percent reduction in GHG emissions from the scale of employee and/or resident-generated VMT to project-generated VMT. If subsidies or discounts target employees at an office development, this value would simply be 100 percent. If the project site is a multifamily development with no onsite workers, this value would also be

100 percent. If the project site is a retail development, this value would be less than 100 percent, as it does not account for retail shopper trips to the site. The share of total VMT generated by employees for visitor-intensive uses, such as retail or medical offices, can be roughly estimated by multiplying the total number of employees by two (to account for both arrival and departure), divided by the total number of daily trips.

- (F) – Ideally, the user will calculate transit mode share for work trips or all trips of a Project/Site at a scale no larger than a census tract. Potential data sources include the U.S. Census, California Household Travel Survey (preferred), or local survey efforts. Care should be taken *not* to present the reported commute mode share as retrieved from the American Community Survey (ACS), unless the land use is office or employment based and the tables are based on work location (rather than home location). If the subsidies or discounts target employees and their commute trips, then the mode share should use the home-to-work trip purpose. If the user is not able to provide a project-specific value using one of the data sources described above, they have the option to input the transit mode share for one of the six most populated CBSAs in California. The transit mode share for work trips by CBSA is presented in Table T-9.1 in Appendix C (FHWA 2017). The transit mode share for all trips is provided in Table T-3.1 in Appendix C.
- (G) – A cross-sectional analysis of transit use in 265 urbanized areas in the U.S. found that a 0.43 percent decrease in transit boardings occurs for every 1 percent increase in transit fare price (Taylor et al. 2008). A policy brief summarizing the results of transit service strategies found this analysis to fall in the mid-point of observed, short-term values (Handy & Boarnet 2013). Price elasticities of transit demand vary based on both long-term and short-term demand, service type, and service location (Litman 2020 and Handy & Boarnet 2013).
- (H) – Not all new transit trips replace a vehicle trip. The share of transit trips that would otherwise be made by private vehicle ranges from less than 5 percent to 50 percent across studies. This assumption is based on observed values for high quality BRT service under the assumption that this measure is implemented alongside marketing measures and is targeted primarily at reducing vehicle commute trips. (Handy & Boarnet 2013). Note that this study looked at service improvements rather than fare changes and is used as a proxy variable. If project-specific or location-specific information is available, it should be substituted for this assumptive variable.
- (I) – The adjustment factor from vehicle trips to VMT is 1. This assumes that all vehicle trips will average out to typical trip length ("assumes all trip lengths are equal"). Thus, it can be assumed that a percentage reduction in vehicle trips will equal the same percentage reduction in VMT. Subsidies or discounts targeting commute trips may have a higher factor as they are generally longer than the trip lengths for other purposes.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The GHG reduction is capped at 5.5 percent, which is based on the following assumptions:

- (C=B) – The subsidy coverage is capped at 100 percent of the typical transit fare.
- (D) – All employees are eligible for the subsidy.

- (E) – All project-generated VMT is from employee-generated VMT.
- (F) – Employees at an office development in the San Francisco-Oakland-Hayward CBSA have a default transit mode share for work trips of 25.60 percent.

Subsector Maximum

$(\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%)$ This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for either Measure T-5 or T-6. However, this measure may be implemented alongside other individual CTR measures (Measures T-7, T-8, T-10 through T-13). The efficacy of individual programs may vary highly based on individual employers and local contexts.

Example GHG Reduction Quantification

In this example, the user reduces VMT by providing all employees (D) of a proposed office development in the San Francisco-Oakland-Hayward CBSA a 100 percent transit subsidy in the form of a $100 monthly transit pass (C=B). The user would reduce GHG emissions from VMT by 5.5 percent.

$$A = \left(\frac{\$100}{\$100} \times -0.43\right) \times 100\% \times 100\% \times 25.60\% \times 50\% \times 1 = -5.5\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

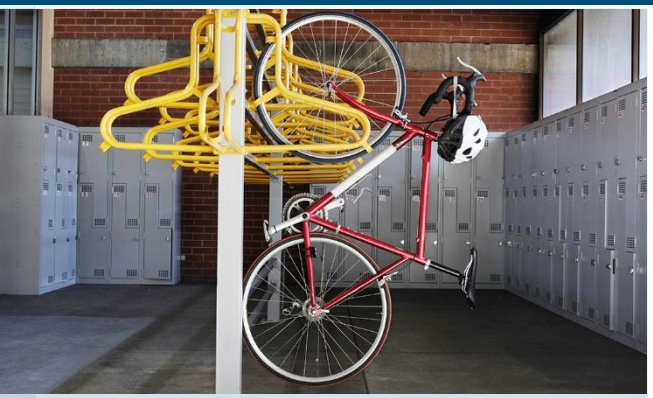
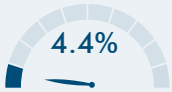
T-10. Provide End-of-Trip Bicycle Facilities



GHG Mitigation Potential



Up to 4.4% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

End-of-trip bicycle facilities could take more cars off the road, resulting in less traffic and better allowing emergency responders to access a hazard site during an extreme weather event. They could also make it easier for bicycle users to access resources in an extreme weather event.

Health and Equity Considerations

Facilities should be inclusive of all gender identities and expressions. Consider including gender-neutral, single-occupancy options to allow for additional privacy for those who want it.

Measure Description

This measure will install and maintain end-of-trip facilities for employee use. End-of-trip facilities include bike parking, bike lockers, showers, and personal lockers. The provision and maintenance of secure bike parking and related facilities encourages commuting by bicycle, thereby reducing VMT and GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

End-of-trip facilities should be installed at a size proportional to the number of commuting bicyclists and regularly maintained.

Cost Considerations

Employer costs include capital and maintenance costs for construction and maintenance of facilities and potentially labor and materials costs for staff to monitor facilities and provide marketing to encourage use of new facilities. The beneficiaries include the program participants saving on commuting cost, the employer reducing onsite parking expenses, and the municipality reducing cars on the road, which leads to lower infrastructure and roadway maintenance costs.

Expanded Mitigation Options

Best practice is to include an onsite bicycle repair station and post signage on or near secure parking and personal lockers with information about how to reserve or obtain access to these amenities.

This measure could be paired with any combination of the other commute trip reduction strategies (Measures T-7 through T-13) for increased reductions.

GHG Reduction Formula

$$A = \frac{C \times (E - (B \times E))}{D \times F}$$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from employee project/site commute VMT	0.1–4.4	%	calculated
User Inputs				
	None			
Constants, Assumptions, and Available Defaults				
B	Bike mode adjustment factor	1.78 or 4.86	unitless	Buehler 2012
C	Existing bicycle trip length for all trips in region	Table T-10.1	miles	FHWA 2017a
D	Existing vehicle trip length for all trips in region	Table T-10.1	miles	FHWA 2017a
E	Existing bicycle mode share for work trips in region	Table T-10.2	%	FHWA 2017b
F	Existing vehicle mode share for work trips in region	Table T-10.2	%	FHWA 2017b

Further explanation of key variables:

- (B) – The bike mode adjustment factor should be provided by the user based on type of bike facility. A study found that commuters with showers, lockers, and bike parking at work are associated with 4.86 times greater likelihood to commute by bicycle when compared to individuals without any bicycle facilities at work. Individuals with bike parking, but no showers and lockers at the workplace, are associated with 1.78 times greater likelihood to cycle to work than those without trip-end facilities (Buehler 2012).
- (C and D) – Ideally, the user will calculate bicycle and auto trip length for a Project/Site at a scale no larger than a census tract. Potential data sources include the U.S. Census, California Household Travel Survey (preferred), or local survey efforts. If the user is not able to provide a project-specific value using one of these data sources, they have the option to input the trip lengths for bicycles and vehicles for one of the six most populated CBSAs in California, as presented in Table T-10.1 in Appendix C (FHWA 2017a). Trip lengths are likely to be longer for areas not covered by the listed CBSAs, which represent the denser areas of the state.
- (E and F) – Ideally, the user will calculate bicycle and auto mode share for work trips for a Project/Site at a scale no larger than a census tract. Potential data sources include the U.S. Census, California Household Travel Survey (preferred), or local survey efforts. If the user is not able to provide a project-specific value using one of these data sources, they have the option to input the regional average mode shares for bicycle and vehicle

work trips for one of the six most populated CBSAs in California, as presented in Table T-10.2 in Appendix C (FHWA 2017b). If the project study area is not within the listed CBSAs or the user is able to provide a project-specific value, the user should replace these regional defaults in the GHG reduction formula. For areas not covered by the listed CBSAs, which represent the denser areas of the state, bicycle mode share is likely to be lower and vehicle share higher than presented in Table T-10.2.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The maximum GHG reduction from this measure is 4.4 percent. This maximum scenario is presented in the below example quantification.

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for either Measure T-5 or T-6. However, this measure may be implemented alongside other individual CTR measures (Measures T-7, T-8, T-9, and T-11 through T-13). The efficacy of individual programs may vary highly based on individual employers and local contexts.

Example GHG Reduction Quantification

The user reduces VMT by providing end-of-trip facilities for the project's employees, which encourages bicycle trips in place of vehicle trips. In this example, the type of bike facility provided by the project is parking with showers, bike lockers, and personal lockers (B). The project is within San Jose-Sunnyvale-Santa Clara CBSA, and the user does not have project-specific values for trip lengths and mode shares and for bicycles and vehicles. Per Tables T-10.1 and T-10.2 in Appendix C, inputs for these variables are 2.8 miles, 11.5 miles, 4.1 percent, and 86.6 percent, respectively (C, D, E, and F). GHG emissions from employee commute VMT would be reduced by 4.4 percent.

$$A = \frac{2.8 \text{ miles} \times \left(4.1\% - (4.86 \times 4.1\%)\right)}{11.5 \text{ miles} \times 86.6\%} = -4.4\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be

calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

T-11. Provide Employer-Sponsored Vanpool

Photo Credit: UCLA Transportation/Flickr, 2021

GHG Mitigation Potential

Up to 20.4% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

Employer-sponsored vanpools could result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site.

Health and Equity Considerations

Consider using zero-emission or plug-in electric vehicles (PHEVs) for additional emission reduction benefits.

Measure Description

This measure will implement an employer-sponsored vanpool service. Vanpooling is a flexible form of public transportation that provides groups of 5 to 15 people with a cost-effective and convenient rideshare option for commuting. The mode shift from long-distance, single-occupied vehicles to shared vehicles reduces overall commute VMT, thereby reducing GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban, rural

Scale of Application

Project/Site

Implementation Requirements

Vanpool programs are more appropriate for the building occupant or tenant (i.e., employer) to implement and monitor than the building owner or developer.

Cost Considerations

Employer costs primarily include the capital costs of vehicle acquisition and the labor costs of drivers, either through incentives to current employees or the hiring of dedicated drivers. The beneficiaries include the program participants saving on commuting cost, the employer reducing onsite parking expenses, and the municipality reducing cars on the road, which leads to lower infrastructure and roadway maintenance costs.

Expanded Mitigation Options

When implementing a vanpool service, best practice is to subsidize the cost for employees that have a similar origin and destination and provide priority parking for employees that vanpool.

This measure could be paired with any combination of the other commute trip reduction strategies (Measures T-7 through T-13) for increased reductions.

GHG Reduction Formula

$$A = \frac{((1 - B) \times C \times F) + \left(B \times \frac{D}{E} \times G\right)}{((1 - B) \times C \times F) + (B \times D \times F)} - 1$$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from project/site employee commute VMT	3.4–20.4	%	calculated
User Inputs				
	None			
Constants, Assumptions, and Available Defaults				
B	Percent of employees that participate in vanpool program	2.7	%	SANDAG 2019
C	Average length of one-way vehicle commute trip in region	Table T-11.1	miles per trip	FHWA 2017
D	Average length of one-way vanpool commute trip	42.0	miles per trip	SANDAG 2019
E	Average vanpool occupancy (including driver)	6.25	occupants	SANDAG 2019
F	Average emission factor of average employee vehicle	307.5	g CO_2e per mile	CARB 2020
G	Vanpool emission factor	763.4	g CO_2e per mile	CARB 2020

Further explanation of key variables:

- (B) – The percent of employees that would participate in a vanpool program is based on a survey of commuters in San Diego County (SANDAG 2019). If the project is not within San Diego County or the user is able to provide a project-specific value for within San Diego County, the user should replace the default employee participation rate in the GHG reduction formula.
- (C) – Ideally, the user will calculate auto commute trip lengths for a Project/Site at a scale no larger than a census tract. Potential data sources include the U.S. Census, California Household Travel Survey (preferred), or local survey efforts. If the user is not able to provide a project-specific value using one of these data sources, they have the option to input the regional average one-way auto commute trip length for one of the six most populated CBSAs in California, as presented in Table T-11.1 in Appendix C (FHWA 2017). Trip lengths are likely to be longer for areas not covered by the listed CBSAs, which represent the denser areas of the state.
- (D and E) – The average one-way vanpool commute trip length and occupancy are based on data from the San Diego Association of Government's regional vanpool program (SANDAG 2019). If the project is not within San Diego County or the user is

able to provide a project-specific value for within San Diego County, the user should replace these defaults in the GHG reduction formula.

- (F and G) – The average GHG emission factors for employee commute and vanpool vehicles were calculated in terms of CO_2e per mile using EMFAC2017 (v1.0.3). The model was run for a 2020 statewide average using diesel and gasoline fuel. The average of the light-duty automobile (LDA) and light duty truck (LDT1/LDT2) vehicle categories represents employee non-vanpool vehicles and the light-heavy duty truck (LHDT1) vehicle category conservatively represents a large cargo vanpool vehicle. The running emission factors for CO_2, CH_4, and N_2O (CARB 2020) were multiplied by the corresponding 100-year GWP values from the IPCC's Fourth Assessment Report (IPCC 2007). If the user can provide a project-specific value (i.e., for a future year and project location), the user should run EMFAC to replace the defaults in the GHG reduction formula.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) For projects in San Diego County that use default CBSA data from Table T-11.1 and (B_{max}), the maximum percent reduction in GHG emissions (A) is 20.4 percent. This maximum scenario is presented in the below example quantification.

(B_{max}) The percent of employees that participate in the vanpool program is capped at 15 percent, which is based on the high end of vanpool participation survey data for several successful programs in the U.S. (SANDAG 2019).

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for either Measure T-5 or T-6. However, this measure may be implemented alongside other individual CTR measures (Measures T-7 through T-10, T-12, and T-13). The efficacy of individual programs may vary highly based on individual employers and local contexts.

Example GHG Reduction Quantification

The user reduces employee commute VMT by requiring that the employer of the project to sponsor a vanpool program. In this example, the project is in the San Diego-Carlsbad CBSA and would have an average vehicle commute trip length of 14.52 miles (C). The percent of employees that participate in the vanpool program is 15 percent (B_{max}). GHG emissions from employee commute would be reduced by 20.4 percent.

$$A = \frac{\left((1-15\%) \times 14.52 \frac{\text{miles}}{\text{trip}} \times 307.5 \frac{\text{g } CO_2e}{\text{miles}}\right) + \left(15\% \times \frac{42 \frac{\text{miles}}{\text{trip}}}{6.25 \text{ occupants}} \times 763.4 \frac{\text{g } CO_2e}{\text{miles}}\right)}{\left((1-15\%) \times 14.52 \frac{\text{miles}}{\text{trip}} \times 307.5 \frac{\text{g } CO_2e}{\text{miles}}\right) + \left(15\% \times 42 \frac{\text{miles}}{\text{trip}} \times 307.5 \frac{\text{g } CO_2e}{\text{miles}}\right)} - 1 = -20.4\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption (H) can be calculated using the GHG reduction formula except that (F) and (G) should be replaced by (I) and (J), as follows.

Fuel Use Reduction Formula

$$H = \frac{\left((1-B) \times C \times I\right) + \left(B \times \frac{D}{E} \times J\right)}{\left((1-B) \times C \times I\right) + (B \times D \times I)} - 1$$

Fuel Use Reduction Calculation Variables

ID	Variable	Value	Unit	Source
Output				
H	Percent reduction in fuel use from project/site employee commute VMT	4.7–21.4	%	calculated
User Inputs				
	None			
Constants, Assumptions, and Available Defaults				
I	Fuel efficiency of average employee vehicle	0.03639	gallon (gal) per mile	CARB 2020
J	Fuel efficiency of vanpool vehicle	0.08328	gal per mile	CARB 2020

Further explanation of key variables:

- (I and J) – The average fuel efficiencies for employee commute and vanpool vehicles were calculated using EMFAC2017 (v1.0.3). The model was run for a 2020 statewide average using diesel and gasoline fuel. The average of the LDA,

LDT1, and LDT2 vehicle categories represents employee non-vanpool vehicles, and the LHDT1 vehicle category conservatively represents a large cargo vanpool vehicle. If the user can provide a project-specific value (i.e., for a future year and project location), the user should run EMFAC to replace the defaults in the fuel use reduction formula.

- Please refer to the GHG Calculation Variables table above for definitions of variables that have been previously defined.

VMT Reductions

The percent reduction in VMT can be calculated using a modified version of the GHG reduction formula, as shown below.

$$\%\ \text{VMT Reduction} = \frac{((1 - B) \times C) + \left(B \times \frac{D}{E}\right)}{C} - 1$$

T-12. Price Workplace Parking

GHG Mitigation Potential

Up to 20.0% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

Priced workplace parking could incentivize increased use of public transit and thus result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site.

Health and Equity Considerations

Parking pricing should include hourly and daily options so part-time staff do not need a monthly pass. If the project includes low-waged employees that have fewer transportation choices or time and resource constraints, it is instead recommended to consider implementing Measure T-13, *Implement Employee Parking Cash-Out*, or other transportation subsidy.

Measure Description

This measure will price onsite parking at workplaces. Because free employee parking is a common benefit, charging employees to park onsite increases the cost of choosing to drive to work. This is expected to reduce single-occupancy vehicle commute trips, resulting in decreased VMT, thereby reducing associated GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

Implementation may include the following.

- Explicitly charging for employee parking.
- Implementing above-market rate pricing.
- Validating parking only for invited guests (or not providing parking validation at all).
- Not providing employee parking and transportation allowances.

In addition, this measure should include marketing and education regarding available alternatives to driving.

Cost Considerations

Parking fees would be a direct, recurring cost for employees. Employer costs include labor costs for program management and monitoring, but this may be offset by revenue generated by the program.

Expanded Mitigation Options

Best practice is to ensure that other transportation options are available, convenient, and have competitive travel times (i.e., transit service near the project site, shuttle service, or a complete active transportation network serving the site and surrounding community), and that there is not alternative free parking available nearby (such as on-street). This measure is substantially less effective in environments that do not have other modes available or where unrestricted street parking or other offsite parking is available nearby and has adequate capacity to accommodate project-related vehicle parking demand.

GHG Reduction Formula

For calculating effectiveness of pricing residential parking, see Measure T-16, *Unbundle Residential Parking Costs from Property Cost*. For calculating effectiveness of pricing parking at visitor-intensive land uses, see Measure T-24, *Implement Market Price Public Parking (On-Street)*.

$$A = \frac{B - C}{C} \times E \times D \times F$$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from employee commute VMT	0–20.0	%	calculated
User Inputs				
B	Proposed parking price	[ ]	$	user input
C	Baseline parking price	[ ]	$	user input
D	Share of employees paying for parking	[ ]	%	user input
Constants, Assumptions, and Available Defaults				
E	Elasticity of parking demand with respecting to parking price	-0.4	unitless	Lehner & Peer 2019
F	Ratio of vehicle trip reduction to VMT	1	unitless	assumption

Further explanation of key variables:

- (B) – Parking price can be provided on an hourly, daily, or monthly basis. Monthly pricing is less effective than requiring daily or hourly payment since the price signal is diluted to only once a month.
- (C) – If baseline parking price is $0 (that is, if parking is typically free), set C = ¼ B, allowing for the maximum 50 percent increase in price. Alternatively, for locations that are located within 0.5 mile of transit service, set C = average transit fare to/from the location.
- (D) – Many organizations allow some employees free parking benefits. VMT reductions should be adjusted based on the share of employees that would be paying for parking.
- (E) – A meta-analysis of parking price studies found that a 0.40 percent decrease in parking demand occurs for every 1 percent increase in parking price (Lehner & Peer 2019). Price elasticity of parking demand varies by location, day of the week, and time of day.
- (F) – The adjustment factor from vehicle trips to VMT is 1. This assumes that all vehicle trips will average out to typical trip length ("assumes all trip lengths are equal"). Thus, it can be assumed that a percentage reduction in vehicle trips will equal the same percentage reduction in VMT. Subsidies or discounts targeting commute trips may have a higher factor as they are generally longer than the trip lengths for other purposes.

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The GHG reduction from priced workplace parking is capped at 20 percent. This maximum scenario is presented in the below example quantification.

($\left(\frac{B-C}{C}\right)_{max}$) The percent increase in parking price is capped at 50 percent.

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for Measure T-13, *Implement Employee Parking Cash-Out*. While both measures focus on providing a price signal for employees to consider other modes for their work commute, this measure actively charges all employees to park, while Measure T-13 reimburses employees who do not park. Users should select either Measure T-12 or T-13.

Example GHG Reduction Quantification

The user reduces VMT by increasing the price of a monthly parking permit. In this example, the permit fee is increased from $50 (C) to $75 (B). If 100 percent of employees are subject to parking pricing (D), the user would reduce GHG emissions from VMT by 20 percent.

$$A = \frac{\$75 - \$50}{\$50} \times -0.4 \times 100\% \times 1 = -20\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

Sources

- Lehner, S., Peer, S. 2019. *The Price Elasticity of Parking: A Meta-analysis*. Transportation Research Part A: Policy and Practice 121 2019. Available: http://sustainabletransportationsc.org/garage/pdf/parking_elasticity.pdf. Accessed: January 2021.

T-13. Implement Employee Parking Cash-Out

GHG Mitigation Potential

Up to 12.0% of GHG emissions from project/site employee commute VMT

Co-Benefits (icon key on pg. 34)

Climate Resilience

Employee parking cash-out could incentivize increased use of public transit and thus result in less traffic, potentially reducing congestion or delays on major roads during peak AM and PM traffic periods. When this reduction occurs during extreme weather events, it better allows emergency responders to access a hazard site.

Health and Equity Considerations

Non-applicable

Measure Description

This measure will require project employers to offer employee parking cash-out. Cash-out is when employers provide employees with a choice of forgoing their current subsidized/free parking for a cash payment equivalent to or greater than the cost of the parking space. This encourages employees to use other modes of travel instead of single occupancy vehicles. This mode shift results in people driving less and thereby reduces VMT and GHG emissions.

Subsector

Trip Reduction Programs

Locational Context

Urban, suburban

Scale of Application

Project/Site

Implementation Requirements

To prevent spill-over parking and continued use of single occupancy vehicles, residential parking in the surrounding area must be permitted, and public on-street parking must be market rate.

Cost Considerations

Employer costs include the recurring, direct cost for payment to program participants and labor costs for program management. Employees that participate in the program would achieve cost savings through the cash-out benefit and potentially through reduced vehicle ownership and usage.

Expanded Mitigation Options

This measure could be paired with many other commute trip reduction strategies (Measures T-7 through T-11) for increased reductions.

GHG Reduction Formula

$A = B \times C$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from project/site commute VMT	0–12.0	%	calculated
User Inputs				
B	Percentage of employees eligible	[ ]	%	user input
Constants, Assumptions, and Available Defaults				
C	Percent reduction in commute VMT from implementation of measure	-12	%	Shoup 2005

Further explanation of key variables:

- (B) – The percentage of employees eligible refers to the employees that would be able to participate in the program. This will usually be 100 percent. Employees who might not be able to participate could include those who work nighttime hours when transit and rideshare services are not available or employees who are required to drive to work as part of their job duties. This does not refer to the percentage of employees who end up participating in the program.
- (C) – A study of eight California firms that complied with California's 1992 parking cash-out law found employee commute VMT decreased by an average of 12 percent (Shoup 2005).

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The maximum percent reduction in GHG emissions (A) is 12.0 percent. This maximum scenario is presented in the below example quantification.

Subsector Maximum

($\sum A_{max_{T\text{-}5 \text{ through } T\text{-}13}} \leq 45\%$) This measure is in the Trip Reduction Programs subsector. This subcategory includes Measures T-5 through T-13. The employee commute VMT reduction from the combined implementation of all measures within this subsector is capped at 45 percent.

Mutually Exclusive Measures

If this measure is selected, the user may not also take credit for Measure T-12, *Price Workplace Parking*. While both measures focus on providing a price signal for employees to consider other modes for their work commute, this measure reimburses employees who

do not park, while Measure T-12 actively charges all employees to park. Users should select either Measure T-12 or T-13.

Example GHG Reduction Quantification

The user reduces project/site VMT by offering commuters the option to choose a cash payment equal to or greater than the current parking subsidy offered by their employer. In this example, all employees (i.e., 100 percent) are eligible to participate (B), which would reduce GHG emissions from employee commute VMT by 12 percent.

$$A = 100\% \times -12\% = -12\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in VMT would be the same as the percent reduction in GHG emissions (A).

T-18. Provide Pedestrian Network Improvement

GHG Mitigation Potential

Up to 6.4% of GHG emissions from vehicle travel in the plan/community

Co-Benefits (icon key on pg. 34)

Climate Resilience

Improving pedestrian networks increases accessibility of outdoor spaces, which can provide health benefits and thus improve community resilience. This can also improve connectivity between residents and resources that may be needed in an extreme weather event.

Health and Equity Considerations

Ensure that the improvements also include accessibility features to allow for people of all abilities to use the network safely and conveniently. Ensure that sidewalks connect to nearby community assets, such as schools, retail, and healthcare.

Measure Description

This measure will increase the sidewalk coverage to improve pedestrian access. Providing sidewalks and an enhanced pedestrian network encourages people to walk instead of drive. This mode shift results in a reduction in VMT and GHG emissions.

Subsector

Neighborhood Design

Locational Context

Urban, suburban, rural

Scale of Application

Plan/Community

Implementation Requirements

The GHG reduction of this measure is based on the VMT reduction associated with expansion of sidewalk coverage expansion, which includes not only building of new sidewalks but also improving degraded or substandard sidewalk (e.g., damaged from street tree roots). However, pedestrian network enhancements with non-quantifiable GHG reductions are encouraged to be implemented, as discussed under *Expanded Mitigation Options*.

Cost Considerations

Depending on the improvement, capital and infrastructure costs may be high. However, improvements to the pedestrian network will increase pedestrian activity, which can increase businesses patronage and provide a local economic benefit. The local municipality may achieve cost savings through a reduction of cars on the road leading to lower infrastructure and roadway maintenance costs.

Expanded Mitigation Options

When improving sidewalks, a best practice is to ensure they are contiguous and link externally with existing and planned pedestrian facilities. Barriers to pedestrian access and interconnectivity, such as walls, landscaping buffers, slopes, and unprotected crossings should be minimized. Other best practice features could include high-visibility crosswalks, pedestrian hybrid beacons, and other pedestrian signals, mid-block crossing walks, pedestrian refuge islands, speed tables, bulb-outs (curb extensions), curb ramps, signage, pavement markings, pedestrian-only connections and districts, landscaping, and other improvements to pedestrian safety (see Measure T-35, *Provide Traffic Calming Measures*).

GHG Reduction Formula

$$A = \left(\frac{C}{B} - 1\right) \times D$$

GHG Calculation Variables

ID	Variable	Value	Unit	Source
Output				
A	Percent reduction in GHG emissions from household vehicle travel in plan/community	0–6.4	%	calculated
User Inputs				
B	Existing sidewalk length in study area	[ ]	miles	user input
C	Sidewalk length in study area with measure	[ ]	miles	user input
Constants, Assumptions, and Available Defaults				
D	Elasticity of household VMT with respect to the ratio of sidewalks-to-streets	-0.05	unitless	Frank et al. 2011

Further explanation of key variables:

- (B and C) – Sidewalk length should be measured on both sides of the street. For example, if one 0.5-mile-long street has full sidewalk coverage, the sidewalk length would be 1.0 mile. If there is only sidewalk on one side of the street, the sidewalk length would be 0.5 mile. The recommended study area is 0.6 mile around the pedestrian network improvement. This represents a 6- to 10-minute walking time.
- (D) – A study found that a 0.05 percent decrease in household vehicle travel occurs for every 1 percent increase in the sidewalk-to-street ratio (Frank et al. 2011; Handy et al. 2014).

GHG Calculation Caps or Maximums

Measure Maximum

(A_{max}) The percent reduction in GHG emissions (A) is capped at 3.4 percent, which is based on the following assumptions:

- 35.2 percent of vehicle trips are short trips (2 mile or less, average of 1.29 miles) and thus could easily shift to walking (FHWA 2019).
- 64.8 percent of vehicle trips are longer trips that are unlikely to shift to walking (2 miles or more, average of 10.93 miles) (FHWA 2019).
- So $A_{max} = \frac{35.2\% \times 1.29 \text{ miles}}{64.8\% \times 10.93 \text{ miles}} = 6.4\%$

Subsector Maximum

($\sum A_{max_{T\text{-}18 \text{ through } T\text{-}22\text{-}C}} \leq 10\%$) This measure is in the Neighborhood Design subsector. This subcategory includes Measures T-18 through T-22-C. The VMT reduction from the combined implementation of all measures within this subsector is capped at 10 percent.

Example GHG Reduction Quantification

The user reduces household VMT by improving the pedestrian network in the study area. In this example, the existing sidewalk length (B) is 9 miles, and the sidewalk length with the measure (C) would be 10 miles. With these conditions, the user would reduce GHG emissions from household VMT within the study area by 0.6 percent.

$$A = \left(\frac{10 \text{ miles}}{9 \text{ miles}} - 1\right) \times -0.05 = -0.6\%$$

Quantified Co-Benefits

Improved Local Air Quality

The percent reduction in GHG emissions (A) would be the same as the percent reduction in NO_X, CO, NO_2, SO_2, and PM. Reductions in ROG emissions can be calculated by multiplying the percent reduction in GHG emissions (A) by an adjustment factor of 87 percent. See *Adjusting VMT Reductions to Emission Reductions* above for further discussion.

Energy and Fuel Savings

The percent reduction in vehicle fuel consumption would be the same as the percent reduction in GHG emissions (A).

VMT Reductions

The percent reduction in household VMT would be the same as the percent reduction in GHG emissions (A).

Improved Public Health

Users are directed to the Integrated Transport and Health Impact Model (ITHIM) (CARB et al. 2020). The ITHIM can quantify the annual change in health outcomes associated with active transportation, including deaths, years of life lost, years of living with disability, and incidence of community and individual disease.

Re: Request for Finding of Overriding Social, Economic, and Pedestrian Safety Benefit (Rev. 2)
10990 N. Woodside Avenue Santee, CA

Dear Mr. Coyne,

After considerable study and analysis, we are writing to respectfully make an appeal to the City of Santee (the City) to accept a Level of Service (LOS) of E at the CA-67 and N. Woodside Ave. intersection ("the intersection"). The Mobility Element of the General Plan dated October 25, 2017 requires under Policy 2.1, "the City shall encourage an automobile Level of Service "D" on street segments and at intersections throughout the circulation network while also maintaining or improving the effectiveness of the non - automotive components of the circulation system (i.e. pedestrians, bicyclists, and public transit), especially in the Town Center area."

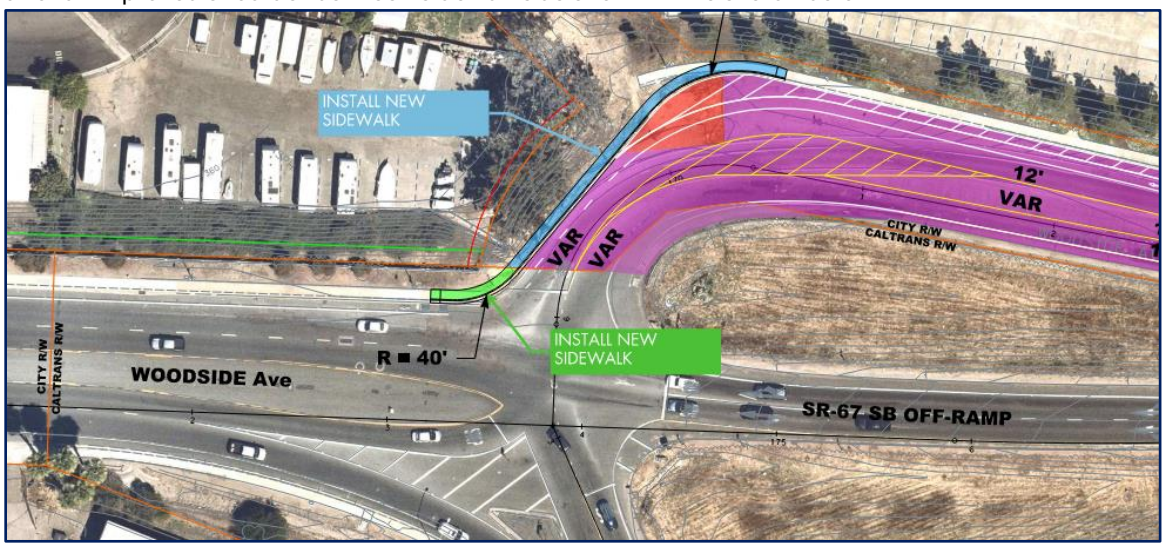
Over the past year, we have engaged in discussions with Caltrans, the City of Santee, our traffic engineer Dudek, our roadway engineer Dokken Engineering, and our Caltrans consultant The Tait Group, Inc. The conclusion to this extensive negotiation and review process is that the only improvement that Caltrans might accept at the intersection is the construction of a roundabout as documented in the Intersection Control Evaluation (ICE) dated December 1, 2017. Alternatively, a new ICE may be prepared, but would very likely yield the same result as the ICE dated December 1, 2017 and take up to a full year to complete.

We have obtained pricing for the construction of the roundabout proposed in the ICE dated December 1, 2017 and the cost of construction is in excess of $6,000,000. If conditioned to construct the roundabout, the economic burden and schedule uncertainty of Caltrans regulatory oversight would preclude development of the project.

We see no other path forward than to request that the City consider a substandard LOS at the intersection. Per the Mobility Element Policy 2.1, "the City may approve a lower automobile Level of Service if it finds that the effectiveness of non - automotive components of the circulation system would be maintained or improved as a result. In other cases, the City shall not approve any development that causes a drop in the level of service at a street segment or an intersection to LOS "E" or "F", after feasible mitigation, without overriding social, economic, or other benefits." We believe that the project meets the criteria described in Policy 2.1 and is eligible for consideration for a LOS of E at the intersection as described below:

- **The proposed improvements are feasible mitigation:** The only mitigation measure that we have identified that would be acceptable to Caltrans is the installation of the roundabout. As described above, the roundabout is economically infeasible and would preclude development of the project.

- **The effectiveness of non - automotive components of the circulation system would be maintained or improved as a result:** The project proposes to improve pedestrian circulation by installing a continuous sidewalk from N. Woodside Ave. on the east, through the street's intersection with the CA-67 offramp, and then join the existing sidewalk on Woodside Ave. on the west. Currently the sidewalk is discontinuous through this area, requiring pedestrians to traverse approximately 130'-0" of unimproved shoulder between sidewalks as shown in the sketch below:

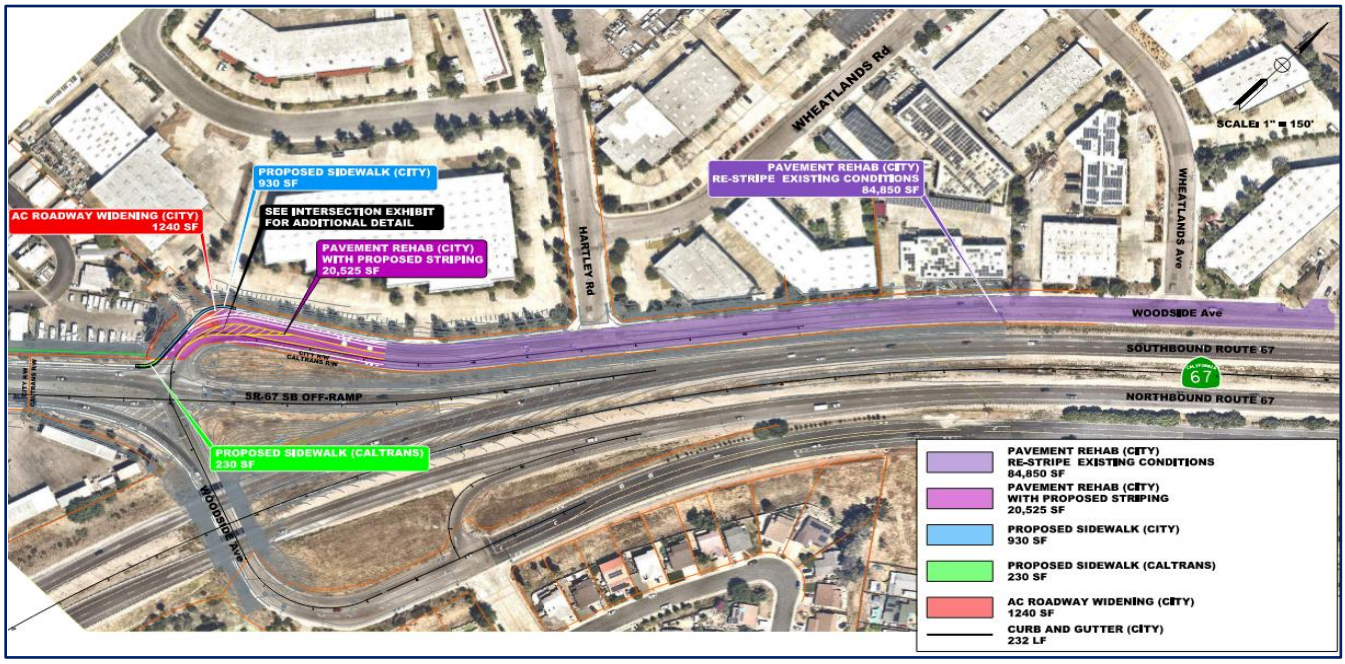


- **There are overriding economic benefits:** The project would generate substantial economic and social benefits to the City, its residents, and its businesses. In summary, the project would generate approximately $1.8M direct income to the City over a 10 year period. In addition, economically, the project would generate $23.5M in wages paid to construction workers and then upon completion $42.9M of labor income annually.

  In addition, the project proposes to repave to the satisfaction of the City Engineer N. Woodside Ave. starting from, on the west, where it meets the Caltrans right of way at the intersection of the CA-67 to, on the east, the eastern most edge of the project driveway's intersection with N. Woodside Ave. In addition, the project would install approximately 1,240 SF of new roadway to fill in an unpaved area between the edge of the existing roadway and the new proposed sidewalk.

  This section of Woodside Ave. has deteriorated over decades of use by local and through traffic, as well as from the truck traffic servicing the industrial park to the north of N. Woodside Ave. By funding and performing the repaving work, this project will create a significant public benefit, improving street conditions for both City residents and businesses in the industrial park and relieving this financial burden from the City of Santee.

  A sketch showing the conceptual scope of the work is shown below:



Please note that the section of sidewalk and section of street resurfacing shown below fall within the jurisdiction of Caltrans. The project will make commercially reasonable efforts to secure encroachment permits from Caltrans, however it may not be possible.

To further demonstrate compliance with the Mobility Element, we have described how the project complies with each Policy in the pages that follow.

Complete Streets

Objective 1.0: Ensure that the existing and future transportation system is accessible, safe, reliable, efficient, integrated, convenient, well connected and multimodal. The system will accommodate active transportation, and accommodate people of all ages and abilities, including pedestrians, disabled, bicyclists, users of mass transit, motorists, emergency responders, freight providers and adjacent land uses.

Policy 1.1: The City shall provide integrated transportation and land use decisions that enhance smart growth development served by complete streets, which facilitate multimodal transportation opportunities.

Not applicable.

Policy 1.2: The City should design streets in a manner that is sensitive to the local context and recognizes that needs vary between mixed use, urban, suburban, and rural settings.

Not applicable.

Policy 1.3: The City shall ensure that the entire right-of-way is designed to accommodate appropriate modes of transportation.

Complies; the project is providing a 6'-0" wide right of way dedication along Woodside Ave.

Policy 1.4: The City should create a vibrant town center by developing a connected system of multi-modal corridors that encourage walking, biking, and riding transit. A mobility hub should be considered at the existing Santee Trolley Square providing features such as bikeshare, bike parking, carshare, neighborhood electric vehicles, real- time traveler information, demand-based shuttle services, wayfinding signage, bicycle and pedestrian improvements, urban design enhancements, etc.

Not applicable.

Policy 1.5: The City should regularly review, update and collect adequate transportation impact fees (TIF) and ensure the efficient allocation of state and regional funding sources for the development and maintenance of local transportation (across all modes) improvements and operations.

Complies; the project will pay its required TIF prior to issuance of a building permit.

Streets and Freeway System

Objective 2.0: Develop an efficient, safe and multi-modal transportation network, consisting of local roads, collectors, arterials, freeways and transit services, in a manner that promotes the health and mobility of Santee residents and that meets future circulation needs, provides access to all sectors of the City, and supports established and planned land uses.

The project will widen and improve N. Woodside Avenue to its designated ROW width where the project site boundary abuts the N. Woodside Avenue right-of-way. The project will then install a dedicated left turn pocket to allow northbound traffic on N. Woodside Avenue to turn into the project's driveway.

In addition, the project proposes to repave to the satisfaction of the City Engineer N. Woodside Ave. starting from, on the west, where it meets the Caltrans right of way at the intersection of the CA-67 to, on the east, the eastern most edge of the project driveway's intersection with N. Woodside Ave. In addition, the project would

install approximately 1,240 SF of new roadway to fill in an unpaved area between the edge of the existing roadway and the new proposed sidewalk.

Policy 2.1: The City shall encourage an automobile Level of Service "D" on street segments and at intersections throughout the circulation network while also maintaining or improving the effectiveness of the non-automotive components of the circulation system (i.e. pedestrians, bicyclists, and public transit), especially in the Town Center area. The City may approve a lower automobile Level of Service if it finds that the effectiveness of non-automotive components of the circulation system would be maintained or improved as a result. In other cases, the City shall not approve any development that causes a drop in the level of service at a street segment or an intersection to LOS "E" or "F", after feasible mitigation, without overriding social, economic, or other benefits.

The N. Woodside Avenue and CA-67 off-ramp intersection currently functions at acceptable levels of service. With the addition of the project, this intersection falls to a level of service E as shown in the table below:

No.	Intersection	LOS Method	Without Project				Plus Project				Change in Delay		Above Allowable Change for Project Traffic Effect	
			AM Peak		PM Peak		AM Peak		PM Peak					
			Delay [1]	LOS [2]	Delay [1]	LOS [2]	Delay [1]	LOS [2]	Delay [1]	LOS [2]	AM	PM	AM	PM

Notes: HCM = Highway Capacity Manual; **X** – Unsatisfactory operating conditions/LOS; AWSC – All-Way Stop Control
[1] Delay in seconds per vehicle
[2] Level of Service (LOS)

The project proposes off-set these impacts by first improving pedestrian circulation by installing a continuous sidewalk from N. Woodside Ave. on the east, through the street's intersection with the CA-67 offramp, and then join the existing sidewalk on Woodside Ave. on the west. Currently the sidewalk is discontinuous through this area, requiring pedestrians to traverse approximately 130'-0" of unimproved shoulder between sidewalks. Second, the project proposes to repave to the satisfaction of the City Engineer N. Woodside Ave. starting from, on the west, where it meets the Caltrans right of way at the intersection of the CA-67 to, on the east, the eastern most edge of the project driveway's intersection with N. Woodside Ave. In addition, the project would install approximately 1,240 SF of new roadway to fill in an unpaved area between the edge of the existing roadway and the new proposed sidewalk.

The project's fiscal and economic benefits are summarized in the excerpt from the study prepared by London Moeder Advisors below:

Total Fiscal Impact

- *The gross annual property tax will increase from approximately $32,548 to approximately $780,809, creating a net increase in property tax revenue of $748,262.*
- *The operation of the building is projected to generate gross annual sales tax revenue of $51,850.*

Fiscal Impact to City Upon project Completion

- *The gross annual sales tax to the City of Santee is projected to increase to $4,683.*
- *The gross annual property tax revenue to the City of Santee will increase from approximately $6,392 to $153,351.*
- *Over a 10-year period, the City is expected to receive $1,640,342 in combined sales and property tax revenue. (Based on property taxes paid, of which the City receives 19.64%.)*
- *After deducting projected City expenses, total annual net surplus for the City of approximately $164,034 annually ($1,640,342 over a ten-year period).*
- *The project will pay to the City approximately $634,206 in project development impact fees.*
- *In total, over a 10-year period, the net benefit to the City is $1,640,342 (sales & property tax) + $634,203 (development fees) - $452,407 (city expenses) = $1,822,141 (net benefit).*

Construction Economic Impact

- *On-site construction is expected to generate 312 direct full-time equivalent jobs during an approximately 12-month construction period.*
- *These 312 full-time equivalent jobs will generate $23,560,802 million in wages paid to local and regional workers. This equates to an annual labor income of $75,515 per employee.*
- *Spending by construction workers and local construction material procurement is projected to generate $16,108 in sales tax revenue to the City of Santee.*

Permanent Economic Impact

- *Employment at the completed building is expected to generate 185 direct new jobs.*
- *The business activity at the completed building is expected to generate 297 indirect and induced permanent jobs.*
- *In total, the business activity at the completed building is expected to generate 482 direct, indirect and induced permanent jobs.*
- *Total direct, indirect and induced labor income of $42.9 million annually.*
- *Business activity at the completed building is expected to generate $4,683 in sales tax revenue to the City of Santee.*
- *Total annual economic output of $132.8 million, which is defined as the total annual production value of each industry or commodity. This is important to the City of Santee because it details the sum of value added and intermediate inputs. Value added is essentially a company's GDP. Intermediate inputs are commodities that require further processing or distribution before they are ready for sale to the final user.*

Policy 2.2: The City should ensure adequate accessibility for all modes to the northern undeveloped area of the City by designating a functional network of public streets for future dedication either prior to, or concurrent with anticipated need.
Not applicable.

Policy 2.3: The City shall establish minimum design standards for streets, which include grade, widths, alignment and public improvement requirements in a City design manual.
Where applicable, the design of the off-site improvements proposed by the project will comply with the standards of the City design manual.
Policy 2.4: The City shall manage the existing truck route network for use by City serving heavy commercial and industrial traffic to provide for a safe circulation system for all drivers.
Confirmed, the project is located along a designated truck route.
Policy 2.5: The City should not allow city streets to be used for through-City truck traffic.
Confirmed, the project is located along a designated truck route.
Policy 2.6: The City should encourage traffic circulation improvements such as, but not limited to, enhanced roadway markings, synchronized traffic signals, and Intelligent Transportation System (ITS) network management.
The design of the proposed off-site improvements will incorporate the latest roadway marking standards.
Policy 2.7: The City should coordinate with Caltrans, SANDAG, MTS, and other responsible agencies to identify, plan, and implement needed transportation improvements.
One segment of sidewalk and one area of repaving fall within the jurisdiction of Caltrans and the project will make commercial reasonable efforts to obtain approval from Caltrans prior to starting any work.
Policy 2.8: The City shall actively pursue local, state and federal funding for circulation and safety related public improvement projects.
Not applicable.
Policy 2.9: The City should work with the region to develop traffic and congestion management programs to improve commute times and improve air quality.
Not applicable.
Objective 3.0: Upgrade and maintain Santee transportation corridors to meet the safety needs of all roadway users – including youth and elderly and travelers of varying physical abilities – and to provide a well-connected system throughout the City.
The project proposes to improve pedestrian circulation by installing a continuous sidewalk from N. Woodside Ave. on the east, through the street's intersection with the CA-67 offramp, and then join the existing sidewalk on Woodside Ave. on the west. Currently the sidewalk is discontinuous through this area, requiring pedestrians to traverse approximately 130'-0" of unimproved shoulder between sidewalks.
Policy 3.1: The City shall encourage the development of improved signalization and intersection design while taking into consideration the safety of all modes.
Caltrans has indicated that the installation of a signal at intersection of N. Woodside Ave. and CA-67 would not be acceptable.

Policy 3.2: The City should encourage the utilization of traffic control devices, such as center medians and/or left-turn pockets where appropriate and that do not conflict with safety, and discourage the installation of median cuts where traffic safety cannot be assured.

The project will then install a dedicated left turn pocket to allow northbound traffic on N. Woodside Avenue to turn into the project's driveway.

Policy 3.3: The City shall ensure that newly constructed roadways are designed to permit rapid access for emergency vehicles.

Not applicable.

Policy 3.4: The City shall provide adequate traffic control devices throughout the City to ensure safe and efficient mobility.

The design of the proposed off-site improvements will incorporate the traffic control devices where required.

Policy 3.5: The City shall encourage the use of innovative methods for traffic control (such as roundabouts, curb extensions, and traffic circles) where appropriate that add character, slow vehicle speeds, and create opportunity for improved aesthetics while effectively managing traffic.

Due to the complexities and cost associated with installing a roundabout at the intersection of N. Woodside Ave. and CA-67, the project cannot feasibly or economically construct this improvement.

Policy 3.6: Based on available funding, the City shall assure all City streets are maintained in a safe condition through implementation of the Pavement Management System. Policy 3.7: The City should review high crash locations, injuries and fatalities by mode on an annual basis and seek feasible solutions.

Not applicable.

Objective 4.0: Maximize the utilization of site planning techniques to improve traffic safety.

The project will widen and improve N. Woodside Avenue to its designated ROW width where the project site boundary abuts the N. Woodside Avenue right-of-way. The project will then install a dedicated left turn pocket to allow northbound traffic on N. Woodside Avenue to turn into the project's driveway.

Policy 4.1: The City shall encourage new subdivision development be designed in a manner where driveways do not take direct access from prime arterials, major roads or collector streets.

Not applicable.

Policy 4.2: The City should encourage the use of Neighborhood Traffic Management controls to lower residential speeds and discourage cut-through traffic. The City should prepare a traffic calming policy manual to guide City efforts in managing these neighborhood traffic safety concerns.

Not applicable.

Policy 4.3: The City shall promote design standards that allow for safe and efficient transport, delivery, loading and unloading of goods from service vehicles within commercial and industrial areas.

Complies, all loading and unloading activities on occurs on the project site and out of the public right-of-way.

Policy 4.4: The City should pursue minimization of the number of entrances and exits to strategic locations along major thoroughfares by requiring the establishment of shared driveways and reciprocal access between adjoining properties.

Not applicable.

Policy 4.5: The City should establish and implement appropriate setback and off-street parking requirements.

Complies, the project complies with the set-back and off-street parking requirements for the Light Industrial zone.

Parking Objective 5.0: Allow parking reductions around transit and affordable housing.

Not applicable.

Policy 5.1: The City should consider reducing parking requirements in the town center area and at transit stations as transit ridership increases over time due to increased development intensities and a broader mix of land uses.

Not applicable.

Policy 5.2: The City should maximize shared parking opportunities for uses with varied peak parking periods.

Not applicable.

Policy 5.3: The City should exercise flexibility in the application of parking standards to support transit-oriented development.

Not applicable.

Public Transit Objective 6.0: Increase the use of public transit systems.

Policy 6.1: The City should coordinate with SANDAG and MTS to maintain and enhance transit services in the City so that they are efficient, cost-effective, and responsive to growth and redevelopment.

Not applicable.

Policy 6.2: The City should coordinate with SANDAG and MTS to improve bus stop and shelter facilities to increase the comfort of users.

Not applicable.

Policy 6.3: The City should coordinate with SANDAG and MTS to provide multi-modal support facilities and adequate access near and to/from transit stops for bicyclists and pedestrians, including children and youth, seniors, and persons with disabilities.

Not applicable.

Policy 6.4: The City should coordinate with SANDAG and MTS to post route maps and pick-up/drop-off times at each stop.

Not applicable.

Policy 6.5: The City should coordinate with MTS to encourage establishing transit stops in areas of concentrated activity such as near senior housing projects, medical facilities, major employment centers, and mixed use areas.

Not applicable.

Policy 6.6: The City should coordinate with MTS to accommodate transit centers and major stops with adequate bicycle and pedestrian access and secure bicycle storage where appropriate. Include facilities that are well designed, provide appropriate lighting and are safe, comfortable, and attractive.

Not applicable.

Policy 6.7: The City should provide incentives for transit-oriented development, such as a parking reduction consistent with regional standards, for more intense development and higher density residential uses along major transportation corridors or in areas accessible to transit use.

Not applicable.

Bicycling Objective 7.0: Develop, maintain, and support a safe, comprehensive and integrated bikeway system that encourages bicycling, as documented in the City's Bicycle Master Plan (BMP).

The current level of bicycle access and lanes would be maintained. On-site, the project would provide bicycle parking to encourage the use of bicycles by commuters.

Policy 7.1: The City shall continue to implement and maintain a comprehensive bicycle route system, and to designate appropriate bikeways through the regular update of the City's Bicycle Master Plan.

Not applicable.

Policy 7.2: The City should strive to achieve objectives and policies identified in the Bicycle Master Plan including those related to bicycle safety awareness, bicycle promotion, maintenance and monitoring. Educational awareness programs shall include an environmental component that teaches bicycle users the importance of staying on designated trails to minimize impacts to wildlife resources.

Not applicable.

Policy 7.3: The City should promote the development of hiking and bicycle trails along the San Diego River in conjunction with the San Diego River Plan. Any plans for trails along the San Diego River shall be accompanied by a site-specific analysis, as required under CEQA, to confirm that such trails are consistent with the Subarea Plan (SAP) and located in the least environmentally sensitive areas.

Not applicable.

Policy 7.4: The City should require new development and redevelopment to provide connections to existing and proposed bicycle routes, where appropriate.

Confirmed, the project driveway will connect with the existing bicycle lane along N. Woodside Ave.

Policy 7.5: The City should keep abreast of bicycle facility innovations in other cities and regions, and seek to incorporate these into the bicycle network.

Not applicable.

Pedestrian Environment Objective 8.0: Develop and maintain an accessible, safe, complete and convenient pedestrian system that encourages walking.

The project proposes to improve pedestrian circulation by installing a continuous sidewalk from N. Woodside Ave. on the east, through the street's intersection with the CA-67 offramp, and then join the existing sidewalk on Woodside Ave. on the west. Currently the sidewalk is discontinuous through this area, requiring pedestrians to traverse approximately 130'-0" of unimproved shoulder between sidewalks.

Policy 8.1: The City should require the incorporation of pedestrian-friendly design concepts where feasible including separated sidewalks and bikeways, landscaped parkways, traffic calming measures, safe intersection designs and access to transit facilities and services into both public and private developments.

The project proposes to improve pedestrian circulation by installing a continuous sidewalk from N. Woodside Ave. on the east, through the street's intersection with the CA-67 offramp, and then join the existing sidewalk

on Woodside Ave. on the west. Currently the sidewalk is discontinuous through this area, requiring pedestrians to traverse approximately 130'-0" of unimproved shoulder between sidewalks.

Policy 8.2: The City should provide for the connectivity of wide, well-lit sidewalks and environments with safety buffers between pedestrians and vehicular traffic, where feasible.

The installation of a safety buffer between the sidewalk and N. Woodside Ave. is not feasible due to the right-of-way width constraint.

Policy 8.3: The City should pursue the elimination of physical barriers around public facilities and commercial centers to improve access and mobility of the elderly and disabled in a manner consistent with the Title 24 of the California Code of Regulations and the federal Americans with Disabilities Act (ADA).

Not applicable.

Policy 8.4: The City shall require non-contiguous sidewalks on all streets with a residential collector classification or higher, as appropriate.

The project proposes to improve pedestrian circulation by installing a continuous sidewalk from N. Woodside Ave. through its intersection with the CA-67 offramp. Currently the sidewalk is discontinuous through the intersection, leaving pedestrians to traverse approximately 130'-0" of unimproved shoulder between sidewalks. The project also proposes to install a crosswalk from the north side of the intersection to the south side, with two pedestrian areas of refuge.

Policy 8.5: The City should identify and implement pedestrian improvements with special emphasis on providing safe access to schools, parks, community and recreation centers, and shopping districts.

Not applicable.

Policy 8.6: The City should promote walking and improve the pedestrian experience by requiring pedestrian facilities along all classified streets designated on the Circulation Plan; by implementing streetscape improvements along pedestrian routes that incorporate such elements as shade trees, street furniture, and lighting; by orienting development toward the street; by employing traffic calming measures; and by enforcing vehicle speeds on both residential and arterial streets.

Not applicable.

Policy 8.7: The City should promote walking as the primary travel mode for the school trip through implementing the citywide Safe Route to School Plan. Policy 8.8: The City should improve pedestrian safety at intersections and mid-block crossings, where appropriate.

Not applicable.

Policy 8.9: On all primary pedestrian corridors, the City shall ensure adequate green time, based on established standards, at all crosswalks that allow the elderly and disabled to cross City streets on a single green light.

Not applicable.

Policy 8.10: The City should provide connected network of safe pedestrian crossings throughout the City.

Not applicable.

Policy 8.11: The City should enhance pedestrian visibility by enforcing parking restrictions at intersection approaches, improving street lighting, and minimizing obstructions.

Not applicable.

Transportation Demand Management

Objective 9.0: Increased use of alternative modes of travel to reduce peak hour vehicular trips, save energy, and improve air quality.

The project is proposing a variety of mitigation measures that address transportation demand management:

- *Implement Commute Trip Reduction Marketing: The project's tenant will provide information to its employees about local bus routes, bicycle routes, ride sharing services, on-demand transportation services, and on-site bicycle facilities.*
- *Provide Ridesharing Program: The project tenant will promote ride-sharing programs through a multi-faceted approach, such as designating a certain percentage of parking spaces for ride-sharing vehicles, designating adequate passenger loading and unloading and waiting areas for ride-sharing vehicles, and/or providing a website or message board for coordinating rides.*
- *Implement Subsidized or Discounted Transit Program: The project tenant would provide or reimburse the cost of monthly transit passes (such as Pronto card or mobile app) to the employees who use bus or rail transit to work to create incentive programs that reward employees for utilizing non-single occupancy vehicles to commute.*
- *Provide End of Trip Bicycle Facilities: The project will provide at least 15 bicycle parking spaces per City's parking code requirement.*

Policy 9.1: The City shall encourage and provide for Ride Sharing, Park 'n Ride, and other similar commuter programs that eliminate vehicles from freeways and arterials.

The project is proposing a variety of mitigation measures that address transportation demand management as described above.

Policy 9.2: The City should encourage businesses to provide flexible work schedules for employees.

Noted, however the project's tenant will be responsible for determining the final employee schedules.

Policy 9.3: The City should encourage employers to offer shared commute programs and/or incentives for employees to use transit.

The project is proposing a variety of mitigation measures that address transportation demand management as described above.

Policy 9.4: The City should encourage the use of alternative transportation modes, such as walking, cycling and public transit. The City should maintain and implement the policies and recommendations of the Bicycle Master Plan and Safe Routes to School Plan to improve safe bicycle and pedestrian access to major destinations.

The project is proposing a variety of mitigation measures that address transportation demand management as described above.

Policy 9.5: The City should improve safety of walking and biking environment around schools to reduce school-related vehicle trips.

Not applicable.

Regional Transportation Coordination Objective 10.0: The City shall remain actively involved in regional issues.

Not applicable.

Policy 10.1: The City should promote and support the continued expansion of the San Diego Trolley system which benefits residents of Santee, especially in higher density areas.

Not applicable.

Policy 10.2: The City supports necessary improvements to regional airport facilities, excluding any proposal to site a new regional airport at the Marine Corps Air Station Miramar.

Not applicable.

Policy 10.3: Any future extension of SR-125 north of SR-52 shall utilize the existing SR-52 bridge over the San Diego River and no such alignment shall occur within the City's limits.

Not applicable.

Policy 10.4: The City supports the widening of SR-52 and SR-67.

Not applicable.

Policy 10.5: The City shall oppose the installation of freeway on-ramp meters unless appropriate mitigation is provided by Caltrans for impacts to City streets caused by such metering.

Not applicable.

Policy 10.6: The City supports the connection of Caltrans traffic signals on City streets to the City's interconnected traffic signal system to maintain traffic flow.

Not applicable. The CA-67 exit at N. Woodside Ave. is not signalized.

Thank you for considering this request. Please kindly let us know if we can provide any additional information.

Respectfully submitted,

William Jacobs

Water Study

Technical Memoradum

Date:	Tuesday, April 11, 2023
Project:	Water Study for Development at 10990 North Woodside Drive
To:	Vincent De Anda, Lewis Clapp, Padre Dam Municipal Water District
From:	Joel Engleson, HDR
Subject:	**Water Study for Development at 10990 North Woodside Drive**

1 Introduction

A development is planned near 10990 North Woodside Drive in Santee, California (Development) located within the Padre Dam Municipal Water District (District) service area. The Development is proposed to be connected to the District's potable water distribution system for services including fire flow.

This study uses the District's current potable distribution system hydraulic model to estimate the available fire flow at the development location and investigates potential connection points and system improvement alternatives for supplying required fire flow while satisfying the District's distribution system evaluation criteria.

2 Hydraulic Analysis

The hydraulic analysis was performed using the District's distribution system hydraulic model which was last updated as part of the District's 2022 Master Plan Update (Master Plan). The analysis was performed using the hydraulic modeling software package InfoWater Pro® 3.0 by Innovyze®, an Autodesk® company.

2.1 Criteria

The hydraulic analysis was based on existing District criteria as defined in the Master Plan as well as specific fire flow criteria for the Development. Specifically, this analysis focuses on fire flow criteria, including:

Development Specific Criteria:

- Fire flow required: 4,000 gallons per minute (gpm)
- Fire flow duration: 4 hours
    - Model run as extended period simulation (EPS) to represent fire flow duration
    - Fire flow modeled during high demand hours between 6 and 10 am

Mater Plan Criteria:

- Minimum Pressure Criteria:
    - Maximum day demand (MDD) + fire flow (FF) conditions: 20 pounds per square inch (psi)

- Maximum Velocity Criteria:
  - MDD + FF conditions: 10 feet per second (fps) for existing pipes
  - MDD + FF conditions: 15 feet per second (fps) for new pipes
- Pump Station Operation:
  - Largest capacity pump in each pump station offline

2.2 Modeled Available Fire Flow

For this analysis, the existing maximum day demand plus fire flow (2019_MDD_FF) scenario in the District's hydraulic model was used to estimate available fire flow at the Development location with various connection points to the existing distribution system. Three alternatives were considered for connection points to the Development, including:

1. Connection to the looped 12-inch pipe in Woodside Avenue
2. Connection to both the 8-inch and the 12-inch pipes in Woodside Avenue
3. Upsizing a dead-end 12-inch pipe in Woodside Avenue to 16-inch and connecting

These three scenarios were added to the District's hydraulic model and analyzed per the Master Plan evaluation criteria. This section discusses the model results.

2.2.1 Alternative 1: Connection to the Looped 12-inch pipe in Woodside Avenue

Fire flow for the Development was modeled off an existing 12-inch pipe in Woodside Avenue, as shown in Figure 1. This 12-inch pipe is part of a loop that also includes 8-inch diameter pipe which loops into an additional 8-inch pipe in Wheatlands Avenue. Model results indicate approximately 4,100 gpm available fire flow at the location.

Pipeline velocities are the limiting factor to the available fire flow for this alternative with the highest velocities of approximately 10 fps in the connecting 12-inch pipe. Model results indicate system residual pressures remain well above the 20 psi minimum per the criteria. Model results indicate a residual pressure of 94 psi at the connection point under MDD plus the 4,100 gpm fire flow conditions.

2.2.2 Alternative 2: Connection to both the 8- and 12-inch pipes in Woodside Avenue

Fire flow for the Development was modeled off the existing 8-inch and 12-inch pipes in Woodside Avenue, as shown in Figure 2. Model results indicate approximately 6,600 gpm available fire flow combined with these two connection points with 4,100 gpm available off the 12-inch pipe and 2,500 gpm available off the 8-inch pipe. The model was run with both fire flow demands pulling water off the system at the same time.

Pipeline velocities in the 8- and 12-inch pipes in Woodside Avenue are the limiting factor to the available fire flow for this alternative with the highest velocities of approximately 10 fps in both pipelines. Model results indicate system residual pressures remain well above the 20 psi minimum per the criteria. Model results indicate residual pressures of 74 psi and 70 psi at the 12-inch and 8-inch connection points, respectively, under MDD plus the 6,600 gpm fire flow conditions.

2.2.3 Alternative 3: Upsize Dead-End 12-inch in Woodside Avenue to 16-inch

Fire flow for the Development was modeled with an existing dead-end pipe off the 12-inch pipe in Woodside Avenue upsized to 16-inch and a single connection at the end of the upsized pipe, as shown in Figure 3. Model results indicate approximately 4,100 gpm available fire flow at the connection location.

Pipeline velocities are the limiting factor to the available fire flow for this alternative with the highest velocities of approximately 10 fps in the connecting 12-inch pipe. Model results indicate system residual pressures remain well above the 20 psi minimum per the criteria. Model results indicate a residual pressure of 94 psi at the connection point under MDD plus the 4,100 gpm fire flow conditions.

Figure 1. Alternative 1: Connection to the 12-inch pipes in Woodside Avenue

Figure 2. Alternative 2: Connection to both the 8- and 12-inch pipes in Woodside Avenue

Figure 3. Alternative 3: Upsize Dead-End 12-inch in Woodside Avenue to 16-inch with Connection

3 Conclusions and Recommendations

Model results indicate that any of the three alternatives tested in the molded are projected to supply the required 4,000 gpm fire flow over a four hour period under MDD conditions while satisfying the system evaluation criteria from the Master Plan.

The modeled available Development fire flow for the three alternatives is:

- Alternative 1: Connection to the 12-inch pipe in Woodside Avenue
    - Total Available Fire Flow: 4,100 gpm with 94 psi Residual Pressure at Connection
- Alter native 2: Connection to both the 8-inch and the 12-inch pipes in Woodside Avenue
    - Total Available Fire Flow: 6,600 gpm combined
        - 8-inch pipe connection: 2,500 gpm with 70 psi Residual Pressure
        - 12-inch pipe connection: 4,100 gpm with 74 psi Residual Pressure
- Alternative 3: Upsizing the 12-inch pipe in Woodside Avenue to 16-inch and connecting
    - Available Fire Flow: 4,100 gpm with 94 psi Residual Pressure at Connection

1 Project Introduction

1.1 Description of the Warehouse/Distribution Facility

The project will be a new one-story plus mezzanine warehouse/distribution facility construction of Type IIIB construction, protected by an automatic sprinkler system throughout, and an automatic addressable fire alarm system. The building will not be used for hazardous materials storage. The building will contain primarily moderate-hazard storage uses (Group S-1) and accessory business/office uses (Group B).

1.2 Report Purpose and Objectives

The purpose of this comprehensive report is to conduct a thorough Building Code Analysis and Preliminary Fire Protection Assessment for the proposed development of a new one-story plus mezzanine concrete tilt-up warehouse/distribution facility situated at 10990 Woodside Ave., Santee, CA 92071. This report aims to document the facility's adherence to applicable building codes, regulations, and fire protection standards, ensuring its compliance with relevant safety requirements.

This report will provide stakeholders, including the project developer, design team, authorities having jurisdiction, and emergency responders, with a comprehensive overview of the facility's compliance status, facilitating informed decision-making throughout the project's development.

2 Applicable Codes and Standards

The following codes and standards referenced in this report are applicable to this project:

- 2022 California Building Code (CBC)
- 2022 California Fire Code (CFC)
- NFPA 10-2018 Standard for Portable Fire Extinguishers
- NFPA 13-2022 Standard for Installation of Sprinkler Systems as amended by the CBC and CFC
- NFPA 14-2019 Standard for the Installation of Standpipe and Hose System, as amended by the CBC and CFC
- NFPA 20-2019 Standard for the Installation of Stationary Pumps for Fire Protection
- NFPA 24-2019 Standard for Installation of Private Fire Service Mains and Their Appurtenances, as amended by the CBC and CFC
- NFPA 72-2022 National Fire Alarm and Signaling Code, as amended by the CBC and CFC

3 Site Analysis

3.1 Location and Address

The project will be located at 10990 Woodside Ave., Santee, CA 92071. The site was previously the home of the Santee Drive-in Theatre (Figure 1).

Figure 1 - Aerial View of Existing Santee Drive-in Theatre Site

3.2 Description of the Surrounding Area

The site is surrounded on the West, South and East sides by existing commercial businesses and pond/wetlands on the north side of the site. There is one vehicular access point to the site via a street connection from the southeast corner of the site to N. Woodside Avenue.

3.3 Access for Fire Department Services

Fire apparatus access to the site will be provided from N. Woodside Avenue via an improved driveway, 60-feet in width, which terminates at a cul-de-sac at the southeast corner of the site. From the cul-de-sac, a 40-feet wide fire apparatus roadway will extend along the east side of the building and continue approximately 1/3 the length of the north side of the building where it will transition to a minimum 30-feet wide fire apparatus roadway for the remainder of the north building perimeter, the west side of the building and approximately ½ the length of the south side of the building where it will transition back to a minimum 40-feet wide fire apparatus roadway to rejoin the cul-de-sac. The entire building perimeter will be surrounded by a fire apparatus roadway, with the closest edge of the fire apparatus roadway located not less than 15-feet and not more than 30-feet from the building exterior walls, except at the north and south loading courts which are exclusively designated for tractor trailer loading and unloading (Figure 2).

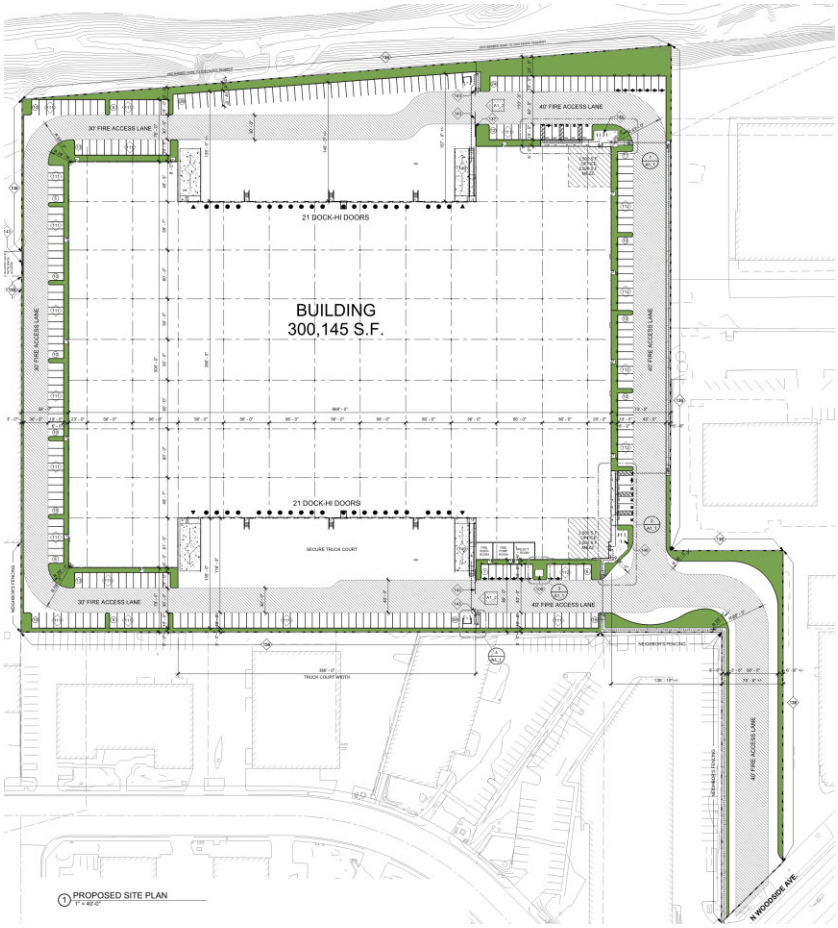

Figure 2 - Fire Apparatus Access Roadway

3.3.1 Single Fire Apparatus Access Roadway in Lieu of Two Separate Fire Apparatus Access Roadways

In accordance with CFC D104.2 buildings or facilities having a gross building area of more than 62,000 square feet shall be provided with two separate and approved fire apparatus access roads. Based on the existing site access constraints and infeasibility of obtaining a right-of-way easement through an adjoining property, providing two separated fire apparatus access roads is not feasible or practical for this project.

Through collaboration with the Santee Fire Department, the single fire apparatus access road to the project site will be mitigated by the following site and building design features:

- **Enhanced Fire Access Roads:** Fire apparatus access from Woodside Avenue is proposed to be via an approximately 60'-0" wide, two-way, privately maintained driveway that will enhance the reliability of fire access to the building. The drive width is made as wide as possible and terminates in a cul-de-sac. The driveway access points to the site from the cul-de-sac are 30'-40' wide, which are both wider than the 26' aerial access road minimum requirement. The driveway terminates in a cul-de-sac with a radius of 50' allowing ample maneuvering and turn-around for fire apparatus and emergency responder vehicles. The

fire access roadway that extends onsite would be provided on all sides of the building giving fire personnel full access to the structure. In addition, exit doors would be installed at 125' on center around the perimeter of the building.

- **Additional Fire Hydrants:** Eight (8) on-site private fire hydrants will be provided in lieu of a minimum of two (2) fire hydrants required by the CFC (refer to ***Section 5.7*** of this report).
- **Additional FDC:** An additional FDC will be installed on the opposite side of the building to provide additional firefighting capability and a redundancy for the first FDC at the main entrance to the building.
- **Two Fire Water Supply Connections:** The on-site looped fire main will be provided with two points of connection to the public water source.
- **Enhanced Fire Flow:** A minimum fire flow requirement of 4,000 gallons per minute at 20 psi for a 4-hour duration will be provide as calculated in accordance with the CFC and required by the City of Santee Fire Department (refer to ***Section 5.7*** of this report).
- **ESFR Fire Sprinklers:** An Early Suppression Fast Response (ESFR) fire sprinkler system will be installed in the building. The base code requirement is a fire sprinkler system meeting the requirements of NFPA 13. The ESFR system is a more robust fire sprinkler system that will enhance the fire and life safety of the building by extinguishing fires faster, allowing occupants more time to exit, and slowing fire and smoke spread in the building and further mitigating the lack of a second point of access.
- **Diesel Fire Pump:** We will voluntarily upgrade the fire pump from an electric pump relying on electricity from the grid to a diesel engine-based system. The diesel pump adds resiliency to the firefighting efforts by not relying on power from the grid, which may be compromised in an emergency.

3.3.2 Fire Access Gates

The site includes three vehicular access gates. Two gates are located on the east side of the Secure Truck (Loading) Courts, positioned on the north and south sides of the building. The third gate is in the west chain-link fence, which separates the project site from the adjacent property to the west.

Each vehicular access gate will be equipped with Knox Key Switches (#3500 series with dust covers) for gate override, ensuring swift access for emergency responders. These electronically locked gates are also designed with battery backup systems to ensure continuous operation in the event of a power outage. In addition, each gate includes a manual release device or other mechanical means to allow manual opening should there be a power failure.

To further enhance emergency access, strobe sensors will be installed on all electronically locked gates, allowing automatic gate opening upon the approach of emergency vehicles. These sensors meet the requirement for all electric gates serving commercial buildings. The strobe sensors' installation and functionality will be verified and approved by the Fire Code Official at the time of installation.

All Knox Box and Key Switch installations will comply with Santee Fire Department standards, with Knox Boxes required on exterior riser/fire alarm room doors and at all key locations specified by the Fire Department for building and site access. Key tags will be weather-resistant, and alert decals will be mounted on doors nearest to each Knox Box.

4 Building Description

4.1 Building Occupancy

The primary occupancy of this building will be moderate-hazard storage, Group S-1, and will contain accessory business, Group B uses.

4.2 Building Height, Number of Stories and Building Area

The building will have an interior minimum clear height of 36-feet and a maximum parapet height of less than 50-feet. The building will be one-story plus mezzanine, and 300,145 square feet in area.

4.3 Type of Construction

In accordance with CBC Section 507.4, the area of this Group B and S building no more than one story above grade plane is permitted to be of any construction type, and not be limited since the building will be provided with an automatic sprinkler system throughout in accordance with Section 903.3.1.1 and will be surrounded and adjoined by public ways or yards not less than 60 feet in width.

5 Fire Protection Systems

5.1 Fire Detection and Alarm System

CFC Table 3206.2 does not require a fire detection system for buildings containing high-piled storage areas of 12,001-500,000 square feet and containing Class I-IV commodities, or high-piled storage areas 2,501-300,000 square feet and containing high hazard commodities.

An approved audible device, located on the exterior of the building in an approved location, will be connected to the automatic sprinkler system. Such sprinkler waterflow alarm devices will be activated by water flow equivalent to the flow of a single sprinkler of the smallest orifice size installed in the system. Where a fire alarm system is installed, actuation of the automatic sprinkler system will actuate the building fire alarm system.

5.2 Fire Suppression Systems

5.2.1 Type of Fire Suppression Systems

Warehouse Areas: To provide more flexibility in warehouse operations, an early suppression fast response (EFSR) sprinkler system will be installed throughout the warehouse areas. ESFR were developed as an alternative to in-rack systems and can be used in warehouses with storage that do not exceed 40-feet in overall height, and with a ceiling height of less than 45 feet. The clear height of this warehouse will be 36 feet. The ESFR sprinkler system will be designed and installed in accordance with NFPA 13, 2022 Edition.

Office Areas: The office areas of the warehouse building will be protected by a conventional wet pipe sprinkler system designed and installed in accordance with NFPA 13, 2022 Edition.

5.2.2 Occupancy and Commodity Classification

Warehouse Areas: When it comes to occupancy classifications, the warehouse areas primarily used for storage are subject to specific requirements outlined in NFPA 13. These requirements depend largely on the type of commodities they house and how these commodities are stored.

Office Areas: In the context of sprinkler design for office areas within the warehouse, these spaces will be categorized as Light Hazard occupancy, following the guidelines set forth in NFPA 13.

5.2.3 ESFR Design Criteria

Storage Limitations:

- ESFR sprinklers are not permitted for the protection of storage on solid shelf racks unless these racks are equipped with in-rack sprinklers.
- ESFR sprinklers are not permitted for the protection of storage with open-top containers.

Hydraulic Design Criteria:

- All design areas should comprise the twelve most hydraulically demanding sprinklers, with four sprinklers on each of three branch lines, unless otherwise specified in NFPA 13, 2022 Edition.
- The ESFR sprinkler system safeguarding warehouse areas that store palletized, solid-piled, or rack storage of Class I through Class IV and Group A commodities will be designed following Table 23.3.1 of NFPA 13. This table outlines ESFR sprinkler ceiling-only options for protecting different types of stored commodities at maximum ceiling heights. For a warehouse with a 36-foot ceiling/roof height, ESFR sprinklers with a K-factor of K-25.2 and a minimum operating pressure of 60 psi will enable the storage of the following commodities:
  - Class I through IV and cartooned non-expanded Group A plastics.
  - Cartoned expanded Group A plastics.
  - Exposed non-expanded Group A plastics.
  - Exposed expanded Group A plastics.

5.2.4 Light Hazard Occupancy (Offices) Design Criteria

The water demand for sprinklers protecting Light Hazard areas within the warehouse, such as office spaces, shall be determined using a Occupancy Hazard Fire Control Approach of Light Hazard using the density/area method of 0.10 gpm/square feet over a minimum design area of 1,500 square feet. The minimum water supply and durations for this hydraulically calculated system must include a combined inside and outside hose stream of 100 gpm with a minimum duration of 30 minutes.

5.3 Standpipe System

The building will be provided with a Class I manual wet standpipe system. Class I standpipe hose connections will be provided such that all portions of the floor area of the warehouse are located not more than 200 feet from a Class I standpipe hose connection. The distances from a hose connection shall be measured along the path of travel.

5.4 Fire Department Connection(s)

Although this building requires a single fire department connection (FDC), to mitigate the fire apparatus points of access to the site, two (2) FDCs are proposed for the project. One FDC is proposed in the vicinity of the southeast corner of the building and the second FDC is proposed in the vicinity of the northeast corner of the building. Each FDC will be located within 50 feet of an on-site fire hydrant. Providing two remotely located FDCs will provide redundancy should an FDC become compromised by parked vehicles, damaged hose threads, debris in the intake piping, and other conditions such as falling debris from a fire above.

5.5 Fire Pump Design

A diesel fire pump will serve the automatic sprinkler system protecting this building. The fire pump for this project will be sized according to the computed flow rate necessary for the ESFR sprinkler system. This calculation takes into account factors such as density requirements, coverage area, and hazard classification.

5.6 Smoke and Heat Removal

In accordance with CFC Table 3206.2, footnote h, smoke and heat removal vents are not required in this building since the storage areas within the building will be protected by an ESFR sprinkler system.

5.7 Fire Flow and Hydrant Locations

Fire Flow Requirements: In accordance with CFC Section B105.2, The minimum fire-flow and flow duration for this building shall be as specified in Tables B105.2 and B105.1(2). In accordance with Table B105.1(1), the baseline fire flow for a 300,145 square feet Type IIIB building is 8,000 gpm for a minimum 4-hour duration.

In accordance with Table B105.2, since the building is protected by an NFPA 13 automatic sprinkler system, the fire flow has the potential for a substantial 75% reduction, which would bring the requirement down to 2,000 GPM.

Referring to Appendix B, Section B103.2, it is important to note that the fire code official possesses the authority to increase the fire-flow requisites, albeit not exceeding double the necessity for the specific building. In our case, this would translate to a requirement of 4000 GPM.

Additionally, it's essential to consider that the demand from the fire sprinkler system might negatively affect the availability of fire flow. Recent fire incidents in warehouses have demonstrated a propensity for significant fire flow demands, crucial for the control and extinguishing of fires.

Furthermore, it's worth mentioning that the lack of two separate access roads to the site is an additional factor to consider.

To summarize, the project's mandated fire flow stands at 4000 GPM, with a pressure requirement of 20 PSI for a duration of 4 hours.

Fire Hydrant Locations: Based on the City of Santee Fire Department requirements, the number and location of fire hydrants will be based on the baseline fire flow value of 4,000 gpm. In accordance with CFC Table C102.1, a building with a minimum fire flow requirement of 3,251-4,000 GPM requires a minimum of 4 fire hydrants, spaced an average of 350-feet, with a maximum distance from any point on a street or road frontage to a hydrant of 210-feet.

A minimum of eight (8) fire hydrants will be provided on-site in order to comply with these requirements.

6 Life Safety Measures

6.1 Fire Department Access Doors

The exterior walls of the warehouse buildings will be provided with fire department access doors. These fire department access doors will be able to be accessed without the use of a ladder.

Fire department access doors shall be labeled on the exterior side with the following sign or other approved sign:

FIRE DEPARTMENT ACCESS DOOR
DO NOT BLOCK

The lettering shall be in a contrasting color to the background. Letters shall have a minimum height of 2 inches with a minimum stroke of $^{3}/_{8}$ inch.

The required fire department access doors will be distributed such that the lineal distance between adjacent fire department access doors does not exceed 125 feet measured center to center.

Fire department access doors shall be not less than 3 feet in width and 6 feet 8 inches in height. Roll-up doors shall not be considered fire department access doors unless approved. Locking devices on fire department access doors shall be approved.

A Knox box will be installed at the main entry lobby to the building and will contain keys to allow for entry through the fire department access doors.

6.2 Maximum Common Path of Egress Travel Distance

The maximum common path of egress travel distance within the warehouse storage areas and business/office areas will be 100 feet.

6.3 Number of Exits and Exit Access Travel Distance

The occupant load of the building will be more than 1,000 occupants and will be provided with a minimum of 4 exits such that all portions of the floor area will be located within a minimum of 250 feet of at least one exit.

6.4 Minimum Aisle Widths

In accordance with CBC 1018.5, the minimum clear aisle width will be not less than that required for corridors. As such, the minimum aisle width within the warehouse storage areas will be 44-inches.

6.5 Emergency Means of Egress Illumination

In the event of power supply failure, an emergency electrical system will automatically illuminate the following areas:

- Aisles
- Corridors
- Exit access stairways and ramps
- Exterior landings for exit doorways that lead directly to the exit discharge
- Electrical equipment rooms.
- Fire pump room.
- Generator room (if provided).
- Public restrooms with an area greater than 300 square feet.

6.6 Exit Signs

Exits and exit access doors shall be marked by an approved exit sign readily visible from any direction of egress travel. The path of egress travel to exits and within exits shall be marked by readily visible exit signs to clearly indicate the direction of egress travel in cases where the exit or the path of egress travel is not immediately visible to the occupants. Intervening means of egress doors within exits shall be marked by exit signs. Exit sign placement shall be such that any point in an exit access corridor or exit passageway is within 100 feet (30 480 mm) or the listed viewing distance of the sign, whichever is less, from the nearest visible exit sign.

7 Hazards Analysis and Mitigation

Potential fire hazards in this warehouse/distribution building where hazardous materials are not anticipated to be used or stored have been assessed, and recommendations provided to mitigate these risks.

1. **Electrical Issues:**
   Risk: Faulty wiring, inadequate circuitry, or outdated electrical systems can lead to electrical fires.
   Mitigation: The building's electrical systems will be designed and installed by qualified professionals following current electrical codes. After the building is occupied, regularly inspect and maintain the electrical infrastructure. Implement ground fault circuit interrupters (GFCIs)

and arc-fault circuit interrupters (AFCIs) to prevent overloads and short circuits where required by code.

2. **Combustible Materials:**
   Risk: Flammable materials like cardboard, packaging, and pallets can accelerate fires.
   Mitigation: Storage areas will be designed with sufficient space between racks and stacks to minimize the risk of fire spreading. Consider using non-combustible pallets and shelving. A racking plan, if required by the user, will be submitted to the City of Santee and approved under a separate permit.

3. **Heating Equipment:**
   Risk: Malfunctioning or poorly maintained heating equipment can cause fires.
   Mitigation: Installed heating systems will comply with current safety standards. Implement regular maintenance and inspections for heating equipment. Use automatic shut-off devices that activate in case of overheating where required by code.

4. **Flammable Liquids:**
   Risk: Even if not anticipated, flammable liquids might be used for cleaning or maintenance.
   Mitigation: Store any potential flammable liquids in designated areas with proper ventilation and fire-resistant storage cabinets. Implement strict control over the presence and use of flammable liquids.

5. **Smoking and Open Flames:**
   Risk: Smoking or open flames could lead to accidental fires.
   Mitigation: Establish a strict no-smoking policy inside the building. If welding or open flames are necessary, create designated areas with proper ventilation and fire-resistant barriers.

6. **Lighting Equipment:**
   Risk: Overheating light fixtures could ignite nearby combustibles.
   Mitigation: Install LED or other energy-efficient lighting that generates less heat. Keep lighting fixtures clean and free from debris. Maintain adequate clearance between lighting and stored materials.

7. **Blocked Exits and Aisles:**
   Risk: Cluttered aisles and blocked exits impede evacuation.
   Mitigation: The layout and clear widths of access to exits aisles throughout the building will be designed in accordance with the applicable requirements of the CBC. After building occupancy, regularly inspect and enforce the clearing of aisles and exits.

8. **Inadequate Fire Suppression Systems:**
   Risk: Insufficient fire suppression systems can hinder fire control.
   Mitigation: An automatic fire sprinkler system will be provided throughout the building. Fire extinguishers and standpipe hose connections will be placed throughout the facility in accordance with the CBC and CFC. Ensure proper maintenance and regular testing.

9. **Faulty Machinery:**
   Risk: Industrial equipment can malfunction and cause fires.

Mitigation: Implement a rigorous maintenance schedule for all machinery. Regularly inspect equipment for signs of wear, overheating, or other potential fire triggers.

10. **Arson and Vandalism:**
    Risk: Unauthorized individuals may intentionally start fires.
    Mitigation: Implement robust security measures, including surveillance cameras, access control systems, and security personnel. Secure entrances and exits to prevent unauthorized entry.

11. **Lack of Fire Safety Training:**
    Risk: Untrained employees might not respond effectively during a fire.
    Mitigation: Provide comprehensive fire safety training to all employees. Conduct regular fire drills to ensure familiarity with evacuation procedures and assembly points.

By addressing these fire risks through careful design, proper construction, and ongoing maintenance, you can significantly reduce the chances of fires in this warehouse/distribution building can be significantly reduced.

8 Conclusion

In conclusion, the design of this new warehouse and distribution facility prioritizes stringent code compliance by incorporating a comprehensive array of fire protection and life safety features. These features include an encircling fire apparatus roadway, secure Knox box access, dual fire department connections, reliable water supply arrangements, strategically placed fire department access points, ample on-site fire hydrants, an advanced ESFR sprinkler system, a diesel fire pump, a Class I manual wet standpipe system, well-placed exits with illumination and signage, readily accessible fire extinguishers, and the implementation of recommended fire hazard mitigation strategies. Together, these measures not only meet but exceed the necessary codes and standards, ensuring the utmost safety and protection for the building occupants, firefighters and assets within the facility.

Subject: Palisade Santee Commerce Center (Conditional Use Permit CUP-2023-0001; Environmental Impact Report ENV-2023-0003; Development Review Permit DR-2023-0002) – AB52 Formal Notice (APN 381-070-52)

Dear Mr. Bunce:

This letter is in response to your request for formal notification of projects for which the City of Santee is the lead agency under California Public Resources Code section 21080.3.1, subdivision (b) of the California Environmental Quality Act. Pursuant to Public Resources Code section 21080.3.1, subdivision (d), the City of Santee Planning & Building Department (City) has received an application for the Palisade Santee Commerce Center Conditional Use Permit ("Project") located at 10990 N. Woodside Avenue (APN 381-070-52).

The 13.5-acre project site is currently developed with a two-screen, drive-in theatre and a building containing restrooms, concession facilities, and a projection house, which collectively are in the process of ceasing operations. The project consists of redevelopment of the project site as a commerce center with an approximately 300,145 square foot (gross area, inclusive of mezzanines and 10,000 sf of office space) one-story industrial building. The building would be up to 50 feet in height and would accommodate warehousing and distribution, manufacturing, assembly, and/or research and development operations, and related office uses. In addition to the industrial building, the project would include up to 42 dock-high doors, four grade-level doors, two truck courts, and up to 301 passenger-vehicle parking spaces, 30- and 40-foot-wide fire access lanes along the building perimeter, landscaping, and fencing along portions of the developed perimeter with automated gates at certain driveway locations. The project would also include associated utility, stormwater treatment, and roadway improvements. The project is consistent with the site's existing land use designation (IL-Light Industrial) and zoning (Light Industrial-IL).

As a condition of project approval, the applicant will have a Native American monitor(s) and an archaeological monitor present during the initial grubbing, site grading, excavation, or disturbance of the ground surface. Additional mitigation will be proposed if a situation arises in which resources are discovered.

In accordance with Public Resources Code section 21080.3.1, subdivisions (b) and (d), the Barona Band of Mission Indians has 30 days from receipt of this formal notification to request in writing consultation regarding the Project. Such request should be directed to:

Michael Coyne, Principal Planner
