1.0 INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) prepared by FREY Environmental, Inc. (FREY) for the property consisting of two lots on the southeast corner of Brotherton Road and Felicita Road in Escondido, California, identified by Assessor's Parcel Numbers (APNs) 236-333-41-00 and 236-333-53-00 (known as "the Site" throughout the rest of this document). The Site is depicted on Figures 1 and 2.

This Phase I ESA was conducted in accordance with a proposal and an agreement between FREY and Multi-Family Land CA, L.P. (Client and User), signed and dated by the Client on August 29, 2022. It is FREY's understanding, based on information provided by the Client, that the Site is proposed to be redeveloped for residential use.

1.1 TERMINOLOGY

For the purposes of discussion, the following terms are used in this report:

- *Site* refers to the subject property described in Sections 3.1 and 3.2 and shown on Figures 1 and 2.

- *Immediate Site Vicinity (ISV)* refers to adjoining properties. Adjoining properties are defined as any real property or properties with a border that is contiguous or partially contiguous with that of the Site, or that would be contiguous or partially contiguous with that of the Site but for a street, road, or other public thoroughfare separating them. The ISV with respect to the Site is described in Section 3.3.

- *Recognized Environmental Condition (REC),* as defined in ASTM 1527-21, means (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- *De Minimis Condition (DMC)*, as defined in ASTM 1527-21, is a condition related to a release that generally does not present a threat to human health of the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a DMC is not considered a REC nor a CREC.

- *Controlled Recognized Environmental Condition (CREC),* as defined in ASTM 1527-21, is a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- *Historical Recognized Environmental Condition (HREC),* as defined in ASTM 1527-21, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls.

- *Vapor Encroachment Condition (VEC),* as defined in ASTM E2600-15, is the presence or likely presence of vapor phase chemical(s) of concern (COC) in the subsurface of the target property (Site) as identified during the vapor encroachment screening process.

- *Chemical(s) of Concern (COC),* as defined in ASTM E2600-15, is a chemical that is present in the subsurface environment, has a vapor pressure greater than 1 mm of mercury, or a Henry's Law Constant greater than 1×10-5 atm m3/mole at ambient temperature and pressure, and can potentially migrate as a vapor into the vadose zone of the Site.

- *Area of Concern (AOC),* as defined in ASTM E2600-15, for potential contaminated facilities with non-petroleum hydrocarbon COCs is equal to 1,760 feet around the Site and 528 feet around the Site for facilities with petroleum hydrocarbon COC.

- The term *"hazardous"* is used in general accordance with its definition in Title 22, Division 4, Chapter 30, California Code of Regulations (CCR). The terms substance, material, and waste are used interchangeably, and no legal distinction is implied between the two terms as used herein.

- *Non-Scope Considerations (NSC)* are additional environmental issues or conditions at the subject property that may warrant discussion or consideration but are outside the ASTM Standard practices of inquiry and do not qualify as RECs.

1.2 OBJECTIVES

The objectives of the scope of work described below were to assess past and present land use practices, Site operations and conditions, and to identify the potential presence of hazardous substances in the soil, soil vapor, and groundwater beneath the Site to the extent feasible, pursuant to the processes described in the American Society for Testing and Materials (ASTM) Standard practices and guidelines (ASTM, 2013, 2015, & 2021) and the All Appropriate Inquires (AAI) rule promulgated by the United States Environmental Protection Agency on November 1, 2005 (EPA, 2005) except whereby noted.

1.3 SCOPE OF WORK

The scope of work designed to provide the information needed to meet the objectives of the investigation was as follows:

- Inspect the Site.
- Conduct a reconnaissance to compile a list of companies and/or businesses that may utilize potentially hazardous materials in the ISV.
- Photograph the Site.
- Interview personnel familiar with the history of the Site, if available.
- Review building permits/environmental files for the Site maintained by the City of Escondido Building Department (EBD) and the City of Escondido Fire Department (EFD), if available.
- Review building permits/environmental files for the Site maintained by the San Diego County Building Division (SDCBD), and Department of Environmental Health and Quality (DEHQ), if available.
- Review the California State Water Resources Control Board's (SWRCB) GeoTracker and Department of Toxic Substance Control (DTSC) EnviroStor databases for properties listed within the ASTM Standard minimum search distance.
- Review Sanborn maps, historical aerial photographs, topographic maps, phone directories, environmental lien and activity use limitation (AUL) reports, and a government agency database report specifically prepared for the Site by Environmental Data Resources Inc. (EDR).
- Review the EDR Radius Map and the California Department of Conservation Geologic Energy Management Division (CalGEM) Well Finder Website for oil and gas wells, fields, and zones in within a one-mile radius of the Site and review the EDR Radius Map for radon information in the Site zip code and county area.
- Prepare a report summarizing the findings of the information presented above.

1.4 SPECIAL TERMS, CONDITIONS, AND NON-SCOPE CONSIDERATIONS

There are no special terms and conditions associated with this Phase I ESA.

The scope of work did not include NSCs, as defined by ASTM, such as but not limited to: the identification of suspected polychlorinated biphenyls (PCBs) containing and asbestos containing materials (ACMs); a screening for lead in water; identification of moisture conditions in existing structures; assessment of regulatory compliance; assessment of cultural, historic, and ecological resources and endangered species; a Site-specific wetlands delineation or a review of flood zone maps; nor the sampling of soil, soil vapor, groundwater, lead-based paint, radon gas, or air.

1.5 ASSUMPTIONS

Findings presented in this report are based upon the following assumptions:

- FREY assumes the Site, as identified in Section 1.0, has been correctly identified by the User (or a designated representative of the User) in agreements, contracts, and/or proposals signed by the User and FREY.

- FREY assumes information regarding the Site history is provided in good faith by the User, designated representative of the User, Site owner, designated representative of the Site owner, and/or Site operator.

- FREY assumes no responsibility for errors or omissions of information provided by the User, designated representative of the User, Site owner, designated representative of the Site owner, and/or Site operator.

- FREY assumes the hydrogeologic conditions (depth to groundwater and groundwater flow direction) beneath the Site, used in the evaluation and determination of environmental concerns for the Site, are similar to those described in Section 2.3.

- FREY assumes the information sourced from the third-party historical information and environmental database provider (EDR) and regulatory agencies obtained and reviewed for this report consist of adequate and accurate information.

1.6 USER RELIANCE

This Phase I ESA was conducted on behalf of and for the exclusive use of the Client (User) and may be relied upon by, and is intended exclusively for, the User, and its members, affiliates, related entities, subsidiaries, equity partners, lenders, title insurers, or regulatory/city agencies or current property owner(s) and their agent. FREY is not liable for any unintended usage of this report by any other parties.

This Phase I ESA shall not, in whole or part, be disseminated or conveyed to or used by any other party without the prior written consent of FREY. Any unauthorized party using or relying upon this Phase I ESA shall be liable to FREY for equitable compensation and appropriate punitive damages and shall be responsible to reimburse FREY for and indemnify, defend, and hold FREY harmless from and against any and all costs, claims, liabilities, expenses, lost profits, and damages arising as a direct or indirect result of such unauthorized use or reliance.

2.0 PHYSICAL SETTING

Information regarding topography, geology, and hydrology are used to evaluate the likelihood of hazardous substances/petroleum hydrocarbons to migrate through soil and/or groundwater onto, within, or from the Site.

2.1 TOPOGRAPHIC SETTING

The Site slopes to the south and has an elevation range of approximately 640 feet above mean sea level (feet msl) to 660 feet msl. Topography in the vicinity of the Site is relatively hilly with incised stream channels (USGS, 1948). The Site location, depicted on a topographic map, is included as Figure 1.

2.2 GEOLOGY

The Site is located in the Peninsular Ranges Geomorphic Province of Southern California, within the San Diego Embayment, which is bound to the north by the Santa Ana Mountains, on the east by several northwest trending fault zones, to the south by the US – Mexico border, and to the west by the Pacific Ocean (RWQCB, 1994). The Site is located in an area underlain by Mesomorphic granitic rocks consisting of tonalite and diorite (Rogers, 1965).

2.3 HYDROGEOLOGY

The Site is located in the Del Dios Hydrologic Subarea of the Hodges Hydrologic Area of the San Dieguito Hydrologic Unit in the San Diego Basin Region (905.21) as designated by the San Diego Regional Water Quality Control Board (RWQCB). The San Dieguito Hydrologic Unit contains three reservoirs, Lake Hodges, Sutherland, and San Dieguito Reservoirs. According to the San Diego Basin Plan, groundwater within this unit is designated as having existing municipal, agricultural, and industrial beneficial use (RWQCB, 1994).

Data collected from the nearby former Arco Facility No. 1948 located at 2306 S. Escondido Boulevard and from the former Chatham Brothers Barrel Yard located at 2257 Bernardo Avenue (SWRCB, 2022), depth to groundwater beneath the Site is expected to be encountered between 15 feet below ground surface (bgs) and 20 feet bgs. Groundwater is anticipated to flow to the southeast (Stantec, 2021 & H+A, 2019).

2.4 GAS AND MINERALS

2.4.1 Oil and Gas Wells

No oil or gas wells were identified within one mile of the Site in a review of the EDR Radius Map Report (Appendix A) and the CalGEM Well Finder Website (CalGEM, 2022).

2.4.2 Radon

The EDR Radius Map report (Appendix A) indicates that the Site is located in a low radon exposure zone according to a generalized assessment of radon potential in San Diego County. The USEPA lists San Diego County as Radon Zone Level 3, for areas where the indoor average radon level is less than 2 pCi/L (EPA, 2002). According to the California radon database, radon in excess of the USEPA action level of 4 picocuries per liter (pCi/L) was detected in seven (7) of forty-three (43) tests conducted in the 92025 zip code area.

3.0 SITE DESCRIPTION AND RECONNAISSANCE

3.1 LEGAL SITE DESCRIPTION

Details of the Site listed below are from the San Diego Geographic Information Source (SanGIS, 2022). The Site parcels are shown on Figure 2 and on tax maps provided by EDR (Appendix F).

Parcel #/ Property Identifier:	236-333-41-00
Address:	0 Felicita Road, Escondido CA 92025
Parcel Size:	2.05 acres
Property Use Type:	Vacant
Legal Description:	BLK 3*LOT 1*(EX ST WID)WLY 150 FT OF\

Parcel #/ Property Identifier:	236-333-53-00
Address:	855 Brotherton Road, Escondido, CA 92025
Parcel Size:	12.78 acres
Property Use Type:	Religious Facility
Legal Description:	BLK 3*LOT 4*(EX ST&WLY 150 FT)LOT 1&(*EX ST&SELY 264 FT)\

3.2 SITE INSPECTION

FREY conducted a Site inspection on September 14, 2022. The Site inspection consisted of visual observations of the Site and the adjoining properties as viewed from the Site boundaries or from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless noted otherwise. Representative areas of the Site, where safely accessible, where observed, unless noted otherwise. The Site inspection included a visual review of the Site for past or present use, storage, handling, and disposal of potentially hazardous substances, and possible future releases of such substances. Photographs of the Site are attached in Appendix B.

The Site is approximately 14.83 acres, consisting of two parcels, APNs 236-333-41-00 and 236-333-53-00, the former of which is largely undeveloped and the latter is developed with three buildings. The Site is situated on the southeast corner of Brotherton Road and Felicita Road. The buildings on the Site consist of a main church building and two buildings used for the Balboa School.

The undeveloped parcel (APN 236-333-41-00) is roughly 2.05 acres and is situated at the western portion of the Site at the southeast corner of Felicita Road and Brotherton Road. The only developments on the parcel are a groundwater well at the northwest corner that is reportedly used only for landscape irrigation at the Site, a power pole, electrical transformer and electrical control box at the southwest corner, and a drainage pipe that empties from the north into the northern portion of the parcel, along Brotherton Road.

The developed parcel (APN 236-333-53-00) is roughly 12.78 acres and is located adjacent to the east of the undeveloped parcel, along the south side of Brotherton Road. The main building on the parcel is the church building, which consists of a central sanctuary room with two stories of offices, multipurpose rooms, classrooms, and storage rooms around its perimeter. To the east of the church

building is the Balboa School, which consists of two rectangular two-story buildings, one to the north and one to the south. FREY did not have access to the Balboa School buildings since school was in session at the time of the Site visit. The main church building and the two Balboa School buildings are separated by grass courtyards and concrete pathways. To the east of the Balboa School, there are two playground structures.

The main entrance to the church is on the northwest side of the main building. The entrance leads to a foyer with two flights of stairs leading to the second story of the building, one on each side of the foyer. There is a hallway on the second floor which circles the perimeter of the sanctuary room and provides access to various multipurpose rooms and storage rooms on the second floor. The foyer leads straight back to the sanctuary room. There is a hallway to the left and right of the entrance to the sermon room, which circles the perimeter of the sermon room and provides access to the various offices, multipurpose rooms, and storage rooms on the first floor of the building. There are no elevators in the building.

Surrounding the main church building, Balboa School, and the playground, there is an asphalt parking lot and driveways. FREY personnel observed multiple exploratory soil borings throughout the parking lot, most likely geotechnical borings to collect subsurface data for future Site redevelopment. Beyond the parking lot to the south and east, the land is undeveloped except for a drainage culvert south of the church building that drains runoff from the parking lot and basketball court southeast of the buildings. The land fronting Brotherton Road north of the church and Balboa School is landscaped with grass and trees.

No RECs were observed during the Site inspection on September 14, 2022.

3.3 IMMEDIATE SITE VICINITY RECONNAISSANCE

FREY visually reviewed the exterior of properties surrounding the Site on September 14, 2022. The Site is located in a mainly residential area. Properties in the ISV are labeled on Figure 2 and are shown on photographs included in Appendix B. A description of the properties in the ISV, as identified from the Site walk, is as follows:

North: The Site is bound to the north by Brotherton Road. Beyond Brotherton Road there are single-family residential properties. To the northeast there is Miller Elementary, and to the northwest, across the intersection of Brotherton and Felicita Road, there is Felicita Montessori School.

East: The Site is bound to the east by single-family residential homes

South: The Site is bound to the south by single-family residential homes. To the southeast, there is a small farm with agriculture product sales, identified as The Farmstand.

West: The Site is bound to the west by Felicita Road, with single-family residential homes beyond. To the southwest, the Site is bound by Interstate 15.

No RECs were identified by the property use in the ISV

4.0 USER RESPONSIBILITIES

4.1 SUMMARY OF USER PROVIDED INFORMATION

FREY provided a copy of a User transaction screen questionnaire to the Client to obtain information related to the User responsibilities as outlined in the ASTM Standard (ASTM, 2021). Tony Ditteaux of Maple Multi-Family Land completed the ASTM User transaction questionnaire on September 6, 2022 and a copy is provided in Appendix C.

Reason for Performing Phase I ESA

The purpose of this Phase I ESA is for the purchase of the property.

Named User(s) of the Report

Maple Multi Family Land is the named User who may rely on this Phase I ESA.

Environmental Liens or AULs

According to the Client, a search of land title records (or judicial records where appropriate) did not identify any environmental liens or AULs filed or recorded against the Site.

Specialized Knowledge

The Client does not have any specialized knowledge regarding the Site or nearby properties.

Relationship of the Purchase Price to the Fair Market Value

The Client believes the purchase price being paid for the Site reasonably reflects the fair market value.

Commonly Known or Reasonably Ascertainable Information

The Client is unaware of the past uses of the Site.

Degree of Obviousness of the Presence or Likely Presence of Contamination

Based on the Client's knowledge, there are no obvious indicators that point to the presence or likely presence of releases at the Site.

4.2 USER PROVIDED DOCUMENTS

According to the User transaction screen questionnaire completed by the Client on May 2, 2022 (Appendix C), the Client is unaware any documents for the Site that would be pertinent to the purpose of this Phase I ESA.

FREY was not provided copies of land title or judicial records, regulatory agency documents (permits, plans, registrations, letters, etc.) or other environmental documents related to the Site by the Client.

5.0 INTERVIEW

An interview with the current Site tenant, Mr. Raymond Owens, was completed on September 11, 2022. Mr. Raymond Owens has been involved with the Site for 3.5 years. A copy of the interview form completed by Mr. Raymond Owens is provided in Appendix C. Neither the owner nor manager of the Site were interviewed.

Historical Site Use

According to information provided by the tenant, the Site has been a church since its construction. Mr. Owens also reports that previously, there was a fully functioning preschool.

Hazardous Substances

The tenant does not have knowledge of the presence of hazardous substances or contamination in connection with the former and current Site use nor in connection with the adjacent properties.

Documents for the Site

The tenant is not aware if documents existed for the Site, such as but not limited to environmental reports and permits, hazardous material permits and registrations, cleanup reports, safety plans, government violation notices, geotechnical studies, etc.

Litigation, Administrative Proceedings, and Government Notices for the Site

The tenant is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances in, on, or at the Site and is not aware of any government notices regarding possible violation of environmental laws or possible liability relating to hazardous substances.

Utilities And Service Providers

Electricity:	San Diego Gas and Electric
Gas:	San Diego Gas and Electric
Potable Water:	Rincon Water
Wells:	One, for irrigation only
Sanitary Sewer:	City of Escondido
Septic System:	None
Storm Water:	Runoff diverted to storm drains on property
Non-Hazardous Waste Disposal:	Escondido Disposal
Hazardous Waste Disposal:	Escondido Disposal

6.0 RECORDS REVIEW

6.1 CITY OF ESCONDIDO

FREY submitted a request with the City of Escondido for a records search with the EBD and EFD. The only record the EFD provided was the current permit required by the California Fire Code for the operation of a school at the Site. The EBD responded with numerous permits for various renovations and maintenance of the Site church and school buildings. Copies of the City of Escondido response dated September 1, 2022 is provided in Appendix D. No RECs were identified in the City of Escondido file review.

6.2 SAN DIEGO COUNTY

6.2.1 Building Division (SDCBD)

FREY searched the San Diego County Citizen Access website for Site Records (SDC, 2022). No records for the Site were identified.

6.2.2 Department of Environmental Health (DEH)

FREY submitted a request for Site records on file with the DEH. The DEH responded in an email dated September 1, 2022 that no requested records were found. A copy of the DEH response is included in Appendix E.

6.3 STATE OF CALIFORNIA

6.3.1 DTSC EnviroStor

FREY researched environmental cleanup sites and hazardous waste permitted facilities using the DTSC EnviroStor website (DTSC, 2022). FREY reviewed information for the Site and off-Site properties to assess potential on-Site and off-Site sources of chemicals of concern in soil, soil vapor and groundwater beneath the Site.

Site Facility Listings

The DTSC EnviroStor website does not show any facility listings for the Site.

Off-Site Facility Listings

The DTSC EnviroStor website shows six (6) facilities identified as Cleanup Sites within a one-mile search radius. All of the Sites identified are located outside the AOC for non-petroleum hydrocarbons (1,760 feet) and petroleum hydrocarbons (528 feet). These facilities are not considered RECs.

6.3.2 SWRCB GeoTracker

FREY researched Leaking Underground Storage Tank (LUST) cleanup, cleanup program, military cleanup, discharge requirement, UST, DTSC hazardous waste, land disposal, and oil/gas permitted facilities using the SWRCB GeoTracker website (SWRCB, 2022). FREY reviewed information for the Site and off-Site properties to assess potential on-Site and off-Site sources of chemicals of concern in soil, soil vapor and groundwater beneath the Site. A summary of the information gathered from GeoTracker is presented below.

Site Facility Listings

The SWRCB GeoTracker website does not show any listings for the Site.

Off-Site Facility Listings

The SWRCB GeoTracker website shows ten (10) closed LUST cleanup cases for properties located within a one-mile search distance from the Site. All cases are beyond the AOC for petroleum hydrocarbons (528 feet). These LUST cases are not considered RECs or VECs.

The SWRCB GeoTracker website shows seven (7) facilities identified as cleanup program sites (CPS) located within a one-mile search distance from the Site. The majority of the identified facilities are closed, and all of the facilities are located outside the AOC for non-petroleum hydrocarbons (1,760 feet) and petroleum hydrocarbons (528 feet). These facilities are not considered RECs.

6.4 HISTORICAL SITE USE INFORMATION

6.4.1 Sanborn Maps

The EDR provided a Certified Sanborn® Map Report (included in Appendix F) which provides a search for historical fire insurance maps. The report lists the Site as an “unmapped property”.

6.4.2 Topographic Maps

EDR provided historical topographic maps from 1893, 1901, 1947, 1948, 1949, 1968, 1975, 1996, 2012, 2015, and 2018 (included in Appendix F). A summary of details from the topographic maps is below.

- In the 1893 and 1901 maps, the Site and ISV are undeveloped.
- In the maps from 1947 to 1949, Brotherton Road and Felicita Road are developed and a structure is shown at the Site. Various properties in the ISV are developed.
- In the maps from 1947 to 1968, the Site is depicted with row crops.

- In the 1968 map, additional properties to the north and the south of the Site are developed. An additional structure is shown at the Site. The Site and ISV remained in this configuration through the 1975 map.

- By 1996, the Site and ISV were developed to their current configuration, and remained in that configuration through the 2018 map.

With the exception of the use of the Site for growing crops, which is discussed further in section 6.4.3, no RECs were identified on the Site in review of the historical topographic maps.

6.4.3 Aerial Photographs

EDR provided aerial photographs from 1939, 1946, 1949, 1953, 1964, 1967, 1970, 1979, 1985, 1989, 1995, 1996, 2002, 2005, 2009, 2012, and 2016 (included in Appendix F). A summary of information derived from the photos is below.

Site Details

1939: The Site is developed for agricultural use with rows of trees covering the approximate eastern half of the Site, and low-lying crops in the western half.

1946-1953: A single building appears in the center of the Site, and all of the Site except for a small western portion (what appears to be the currently undeveloped parcel) is developed for agricultural use.

1964-1970: A single building and what appears to be the groundwater well are present in the western portion of the Site.

1979: The church building and parking lot is developed in the center of the Site as it appears today. The eastern third of the Site remains developed for agricultural use. The building in the western third of the Site is no longer present.

1985-1989: The rows of trees in the eastern portion of the Site are no longer present and building is present adjacent east of the church.

1995-2016: The Site is developed to its current configuration.

The use of the Site as an agricultural field, as depicted in the 1939 through 1979 photos, is a REC due to the likely application of arsenical pesticides and herbicides and organochloride pesticides (OCPs) to irrigated crops. Pesticides such as these are COCs that accumulate in near surface soils.

Off-Site Details

North: From 1939 to 1953, properties to the north are developed for agricultural use. Between 1964 and 1970, the properties adjacent to the north are developed with residential properties and an elementary school. By 1970, the properties appear to be developed as they currently exist.

East: From 1939 to 1953, properties to the east are developed for agricultural use. In 1964, multiple buildings are present. In 1979, additional buildings are present and appear to be developed as they currently exist.

South: From 1939 to 1953, properties to the south are developed for agricultural use. In 1964, multiple buildings are present. In 1979, Interstate 15 is present, and the properties appear to be developed as they currently exist.

West: From 1939 to 2005, properties to the west are developed for agricultural use. In 2009, the properties are developed as they currently exist.

No RECs were identified on properties in the ISV in the historical aerial photos.

6.4.4 City Directory

EDR provided a City Directory Abstract Report which is provided in Appendix F. The City Directory Abstract Report included a search for address listings from 1903 through 2017 for the Site and the Site Vicinity. The EDR search identified listings for the Site from 1976 to 2017 and identified listings for properties in the Site Vicinity on Brotherton Road, Felicita Road, Miller Avenue, and Rockwell Springs Court from 1962 to 2017.

In 1976, the Site was identified as Escon Development Inc. From 1980 to 2017, the Site was identified as Bethel Baptist Church. All of the listings for properties in the Site Vicinity were for private residents.

No RECs were identified in the city directory listings provided in the EDR City Directory Abstract Report.

6.4.5 Environmental Lien and AUL Search

EDR conducted a search of deed records for environmental liens and AULs for the Site. According to a deed information recorded on March 1, 2018 with the San Diego County Recorder's Office, the Site's titles are listed as vested in Walter Ian Lipkin Trustee as received from Walter Ian Lipkin. No liens or AULs are reported for the Site in the deed information located by EDR. A copy of the EDR Environmental Lien and AUL Search is provided in Appendix F.

6.5 STANDARD REGULATORY DATABASE SEARCH

6.5.1 Regulatory Database Summary

The EDR Radius Map Report, included in Appendix A, provides a summary of standard records information sourced from federal, state, tribal, and local databases containing known and suspected facilities with environmental contamination and known and suspected facilities of potential environmental significance due to hazardous materials handling. The number of listed facilities identified within the approximate minimum search distance from the federal and state environmental records database listings specified in the ASTM Standard is summarized in the table below.

Database		Search Distance (mile)	# of Listings	Site Listed
FEDERAL	NPL (Superfund)	1.0	0	No
	Delisted NPL	0.5	0	No
	CERCLA	0.5	0	No
	CERCLA with NFRAP	0.5	0	No
	RCRA with Corrective Action	1.0	0	No
	RCRA non-CORRACTS TSD	0.5	0	No
	RCRA Generators	Site & ISV	0	No
	Institutional /Engineering Control	Site	0	No
	ERNS	Site	0	No
STATE & TRIBAL	Superfund equivalent	1.0	1	No
	Hazardous Waste	1.0	3	No
	Landfill and/or Solid Waste Disposal	0.5	0	No
	Leaking Storage Tank	0.5	8	No
	Registered Storage Tanks	0.25	0	No
	Institutional /Engineering control	Site	0	No
	Voluntary Cleanup	0.5	1	No
	Brownfields	0.5	0	No
	Additional Environmental Record Sources/ EDR Exclusive Records	Varies	22	No
	Orphan	Not applicable	1	No

6.5.2 Regulatory Database Findings

FREY reviewed the regulatory agency database listings in the EDR Radius Map Report (Appendix A) to identify facilities involved in the storage, use, generation, disposal, and/or release of COCs and evaluated the potential for releases at the Site or the migration of contaminants onto the Site from off-site sources via soil, groundwater, or vapor.

In evaluating if a listed facility is a potential environmental concern to the Site, FREY generally applies the following criteria to determine if a facility is of lower potential environmental concern: 1) the facility information does not indicate the handling of COCs, 2) the facility information does not imply the handling of hazardous substances in quantities to be of concern, 3) the facility information does not imply a release of hazardous substances, 4) the facility was recently granted "No Further Action" by the appropriate regulatory agency for a cleanup case, and/or 5) the facility distance from the Site and the hydrogeologic position relative to the Site present a situation in which the likelihood is low that a potential release of hazardous substances from the facility would migrate onto the Site.

When evaluating a facility listing based on hydrogeologic criteria, the depth to groundwater and groundwater flow direction (whether the facility is located up-, cross- or down-gradient of the Site) provides an indication of the potential for contaminants to migrate from the facility and onto the Site. First groundwater beneath the Site is estimated to be present at depths below 15 to 20 feet bgs and is estimated to have an overall flow direction to the southeast.

Evaluation of regulatory agency database listings for the Site and facilities identified within the approximate minimum search distance, as shown on the above table, is provided below.

Site Listings

The Site was not identified in any database listings in the EDR Radius Map Report.

Off-Site Listings

State and Tribal (Superfund) Equivalent Sites

One (1) facility was listed as a Superfund equivalent site was identified within the one-mile ASTM Standard search distance from the Site. Chatham Brothers Barrel Yard, located at 2257 Bernardo Road (1,703 feet west-southwest of the Site), is listed as having a past use of recycling used oil, halogenated solvents, unspecified solvent mixtures, and PCBs. This facility is listed on Geotracker with a status of Open-Remediation as of 8/1/2000. The Site is located in the estimated hydrogeologic upgradient direction from this facility. Based on the distance and hydrogeologic location relative to the Site and historical data, this facility is not a REC or VEC.

State and Tribal Hazardous Waste Facilities

Nine (9) facilities listed as state and federal hazardous waste facilities were identified within the one-mile ASTM standard search distance from the Site. The facilities and their distance from the Site are listed in the table below.

Facility	Address	Distance/Direction from Site
Camp Escondido	Escondido, CA	1,473 feet north-northwest
Redwood Terrace	710 West 13th Avenue	3,664 feet north
Amanda Lane	2115 Amanda Lane	5,031 feet west-northwest
Chatham Brothers Barrel Yard	2257 Bernardo Road	1,703 feet west-southwest
New Urban West/Escondido Site	815 Hamilton Lane	2,043 feet south-southwest
Brotherton Plaza	2250 S. Escondido Boulevard	2,709 feet east
Bernardo Elementary	Bernardo Avenue/Mountain Heights Road	3,627 feet southwest
Elderlink	1151 Redwood Street	4,229 feet north
Vacant Lot	1401 S. Escondido Boulevard	4,668 feet north-northeast

Camp Escondido, a former military encampment from World War II comprising of approximately seven blocks spanning northwest to southeast from 5th street to 11th street and northeast to southwest from Quince Street to Tulip Street, is listed as having explosives as a potential COC. There are no records indicating the presence or use of explosives at the facility. Additionally, there are no records indicating that fuel tanks were used or installed at the facility. Based on the information provided, this listing is not a REC.

Chatham Brothers Barrel Yard, discussed in the previous section, is not a REC.

The rest of the facilities listed as state or tribal waste facilities are outside the AOC for petroleum (528 feet) and non-petroleum (1,760 feet) hydrocarbons and are not considered RECs.

State and Tribal Leaking Storage Tanks

Eight (8) state and tribal leaking storage tank cases (two LUST, three SAM, and three CPS-SLIC cases) were identified for three facilities within the 0.5-mile ASTM Standard search distance from the Site. The facilities, their distance from the Site, and type of case are listed in the table below.

Facility	Address	Distance from Site	Type
Citracado Exxon/CDR Shell	825 Citracado Parkway	702 feet south	LUST, SAM
Chatham Brothers Barrel Yard	2257 Bernardo Road	1,703 feet west-southwest	SAM, CPS-SLIC
Centax Homes	0 Citracado	2,144 feet east-southeast	SAM, CPS-SLIC

Based on the distances and hydrogeologic locations relative to the Site and case information review, these facilities are not considered RECs.

State and Tribal Voluntary Cleanup Sites

One (1) facility is listed as a state or tribal voluntary cleanup site within the 0.5-mile ASTM Standard Search distance. New Urban West/Escondido Site, located at 815 Hamilton Lane (2,043 feet south-southwest of the Site), is listed as having arsenic and TPH-motor oil as COCs. This facility is outside of the AOC for petroleum hydrocarbons (528 feet), and is not considered a REC.

Additional Environmental Records

In review of the twenty-two (22) additional environmental facility listings, no RECs were identified.

Orphaned Facility Listing

FREY reviewed the information for the one listed orphaned (unplottable) facility identified in the EDR Radius Map Report. Based on the information reviewed for the facility and its apparent location, it is not considered a REC.

7.0 FINDINGS AND CONCLUSIONS

FREY has prepared this Phase I ESA in general conformance with the scope and limitations of the ASTM and AAI guidelines. Any exceptions to, or deletions from, this practice are described in Section 1.4.

Site Development and Use

The Site is approximately 14.83 acres consisting of two parcels of land located at the southeast corner of Brotherton Road and Felicita Road in Escondido, California. The smaller of the two parcels is approximately 2.05 acres and is mainly undeveloped with the exception of a groundwater well in the northwest portion of the lot, a power pole, electrical transformer, and electric control box in the southwest corner of the lot, and a drainage pipe in the northern portion of the lot. The larger of the two parcels is approximately 12.78 acres and consists of a two-story church building and two two-story school buildings. The three buildings on the parcel are surrounded by an asphalt parking lot and driveways. The south and east portions of the parcel are undeveloped and covered with low-lying plants. The current Site development was completed between 1989 and 1995.

Prior to the current Site development, the Site was used for agriculture (row crops) from before 1939 to at least 1979.

Development and Use of Properties in the Immediate Site Vicinity

Properties in the ISV were used for agriculture production since before 1939 to sometime between 1953 and 1964. From 1964 to 1979, most of properties in the ISV began to be developed as residential properties with the exception of the property adjacent to the southeast, which remained as an agriculture production property to current day. Miller Elementary to the northeast was constructed sometime between 1967 and 1970. By 2009, all the properties in the ISV had been developed to their current configuration.

Data Gaps

No significant data gaps were encountered in the preparation of this Phase I ESA.

On-Site Concerns

The use of the Site as an agricultural field from at least 1939 through 1979 is a REC due to the likely application of arsenical pesticides and herbicides and organochloride pesticides (OCPs) to irrigated crops. Pesticides such as these are COCs that accumulate in near surface soils.

No other on-Site RECs, CRECs, or HRECs were identified.

Off-Site Concerns

No off-Site RECs, CRECs, or HRECs were identified.

8.0 RECOMENDATIONS

FREY recommends shallow soil sampling and laboratory analyses of soil samples to investigate the potential presence of arsenical pesticides and herbicides and organochloride pesticides (OCPs) at the Site.

9.0 LIMITATIONS

This Phase I ESA report is compliant and consistent with the US EPA's 40 CFR Part 312 Standards and Practices for AAIs and the ASTM Standard Practice for ESAs: Phase I Environmental Site Assessment Process. Please note that the report does not address whether other requirements in addition to all appropriate inquiry have been met. Other requirements may include, but are not limited to, the continuing obligation not to impede the integrity and effectiveness of existing activity and use limitations (AULs), the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting information.

This report was designed to reduce uncertainty regarding the existence of RECs in a manner that recognizes reasonable limits of time and cost. FREY assumes no responsibility for conditions that did not come to our attention despite reasonable care, or for conditions which were not generally recognizable as environmentally unacceptable at the time of this report. An ESA may not wholly eliminate uncertainty regarding the potential for RECs in connection with a Site.

Opinions and judgments expressed herein are based on our professional understanding and interpretations of currently available regulatory standards and should not be construed as legal opinions or advice. This report is not intended to be nor interpreted as legal advice.

The findings, conclusions, and recommendations in this report are based on Site conditions as they existed at the time of our assessment. Our review of all documents, lists, databases, and public agency files has been conducted with due diligence. The conclusions represent FREY's professional judgment based on information obtained and reviewed during the course of this assessment. However, our conclusions are based on available information and are further subject to constraints imposed by public agencies on review procedures and information retrieval. As a result, FREY may have been unable to identify potential concerns that it was not made aware of due to such constraints. FREY shall have no on-going obligation to obtain information that was not reasonably ascertainable, practically reviewable, or provided to FREY in a reasonable timeframe to formulate an opinion and complete the assessment by the agreed upon due date.

Future conditions may differ from those described herein, and this report is not intended for future evaluations of this Site unless an update is conducted by a consultant familiar with environmental assessments and the update is completed within the ASTM Standard guidelines and designated time frame.

The factual data and interpretations contained herein pertain to the specific project described in this report and are not applicable to any other project or site.

Our investigation was performed using the standard of care and level of skill ordinarily exercised under similar circumstances by reputable environmental assessors, geologists, and engineers currently practicing in these or similar localities. No other warranty, express or implied, is made as to the conclusions and professional advice included in this report.

This report was compiled partially of information supplied to FREY from third party sources, other information that is in the public domain, and from a visual inspection of the Site. Third party information is accepted and used solely on the basis of the certifications, registrations, and/or reputation of the parties providing the information. However, FREY does not verify the data, findings, or conclusions of third-party sources, or attest to the completeness, accuracy, or adequacy of their work, and makes no warranty and accepts no liability or responsibility to the accuracy of any data, representations, or conclusions made by third parties.

This report is not intended as, shall not be interpreted as, and cannot be considered a verification of regulatory permitting and compliance. FREY assumes no responsibility or liability respecting regulatory permitting or compliance issues. The Site may or may not be subject to regulation and permitting under environmental and health and safety laws, such as, but not limited to, the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Occupational Safety and Health Act, and other federal, state and local regulations, depending upon historic, current or intended future use.

10.0 PROFESSIONAL STATEMENTS

We declare that, to the best of our professional knowledge and belief, we meet the definition of an environmental professional as defined in section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Should you have any questions regarding this report, please contact us.

Sincerely,
FREY Environmental, Inc.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within

approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that

there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/18/2022 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto

site within approximately 0.125 miles of the target property.

Property History:	A military camp was established during World War II in Escondido, California. However, no files were identified which specifically refer to the Escondido encampment as Camp Escondido. In December 1941, the Headquarters Battery, 222nd Field Artillery, Battery A was stationed in Escondido. These troops lived in temporary quarters provided by private citizens. These temporary quarters included men bivouacked at Grape Day Park and Lincoln School, and use of recreational and shower facilities at the Lemon House, Trinity Guild Hall and the Eagles Hall (private facilities). This field artillery group left Escondido by 25 May 1942. Their exact mission or destination is unknown. On June 19, 1942 a battalion of 615 men and 14 officers came to Escondido from San Luis Obispo. They erected barracks and graded a parade ground. Records reviewed did not indicate the presence or use of ordnance at Camp Escondido. Additionally, no records were found indicating that fuel tanks were installed or used at Camp Escondido. Remains of one apparent military structure exists in the vicinity of 5th and 11th Avenues and Tulip and Pine Streets. This structure is a quonset hut that is used by Rick's Concrete. The owner of the building was not available for comment and on-site staff did not allow Ebasco staff to photograph the building. Six blocks of the seven block site area is residential housing. one block, between 5th and 6th Avenues and Redwood and Quince Streets, is a commercial district. Available files at the Escondido Fire Department indicate that one propane and four fuel tanks have been installed in the one block commercial area. These records indicate that the tanks were installed after DOD use. No records were available indicating the presence of fuel tanks being installed and used during DOD possession of the site.

Alternate City,St,Zip:	ESCONDIDO, CA 92029
Background Info:	continued until 1981 when the Chathams sold the property, which eventually reverted back to the Chathams when the buyer filed for bankruptcy. Not reported In 1982, the California Department of Health Services (DHS), the predecessor agency of the California Department of Toxic Substances Control (DTSC), and other governmental agencies became aware of the existence of hazardous chemicals at the Yard and began various phases of site investigation and remedial activities. The Yard was fenced in 1984. In June 1985, Chatham Brothers Barrel Yard Site (Site) was listed in the Bond Expenditure Plan making it a "State Superfund Site." Not reported On January 23, 1986, DHS issued an administrative Remedial Action Order to the Chathams requiring them to complete the Remedial Investigation and Feasibility Study and identify the final cleanup options in a remedial action plan. The Chathams did not comply with the Order, claiming lack of funds. DTSC made a Determination of Non-Compliance and commenced a State funded remediation program. Not reported In 1986, a Site Remedial Investigation was performed to determine the nature and extent of soil contamination, and whether the groundwater contamination beneath the Yard existed. The soils inside the Yard were found to be contaminated with polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), semi-volatile organic compounds and metals. Ground-water contamination was found beneath the Yard. Forty cubic yards of contaminated soil was removed from different areas along Bernardo Avenue on April 21 and 22, 1987. Further soils and hydrogeologic investigations were conducted in 1988 and 1989 to define concentrations and quantities of soil

CHATHAM SITE PRP GROUP (Continued) **1000857048**

contamination, and to determine whether groundwater contamination has migrated outside of the Yard. Groundwater contamination was found to have migrated outside of the Yard and soil contamination was determined to be a source of groundwater contamination.
Not reported
Commencing in March 1990, DHS conducted a Removal Action (RA) at the Yard to reduce the potential for further degradation of groundwater. The work included excavation, removal, and offsite disposal of 11,430 tons of highly contaminated soils; removal of 208 surface drums and 10 buried drums; and rehabilitation of a 5-foot diameter, 68-foot deep hand dug well located inside the Yard into a 12-inch diameter well. The RA, performed under an imminent or Substantial Endangerment Order issued in November 1989, was completed in June of 1990, and cost approximately $3 million. The soils at the Yard are now considered stabilized. Surface water contamination migration was decreased by the RA activities.
Not reported
Seven groundwater monitoring wells and three 100-foot monitoring wells were installed in September of 1990 and May 1991 to determine the extent of vertical and horizontal contamination. Groundwater contamination has been identified both inside and outside the Yard. In 1991, DTSC determined that significant VOCs contamination existed up to depths of 50 feet and 100 feet in the groundwater beneath the Yard.
Not reported
In December 1990, DTSC began sending Information Request Letters to approximately 180 Generator Potentially Responsible Parties (PRPs) who may have sent waste materials to the Yard. DTSC evaluated the responses of the 180 PRPs, and identified 96 to whom Special Notice Letters were sent. In January 1992, DTSC notified the 96 PRPs that they should form a steering committee to begin "good faith" negotiations to remediate the Site and to reimburse DTSC for past costs.
Not reported
As a result of these negotiations, an administrative Imminent and Substantial Endangerment Order & Consent Order was signed on November 16, 1992 between DTSC and approximately 55 PRPs. Two "Cash Buy-Out" Consent Decrees were signed between DTSC and 16 additional PRPs and lodged in a federal court on October 12, 1993.
Not reported
The Consent Order called for, among other things, immediate construction and operation of a pump and treat system to remove the highly contaminated groundwater beneath the Yard; completion of the Remedial Investigation and Feasibility Study; preparation of a Remedial Action Plan; and payment of $4 million to DTSC for past costs. Settling PRPs and DTSC negotiated another agreement for the implementation of the RAP.
Not reported
Signatories to the two "Cash Buy-Out" Consent Decrees, who are de minimis PRPs, paid DTSC approximately $328,000 and $128,000 respectively, for DTSC's past costs in accordance with their volumetric share of waste sent to the Yard. Also, these PRPs established an approximately $1.7 million escrow account

CHATHAM SITE PRP GROUP (Continued) **1000857048**

for their share of future Site remediation costs.
Not reported
Since the signing of and pursuant to the November 16, 1992 Consent Order, the following major activities were completed:
Not reported
1) $4,000,000 paid for DTSC's past costs;
2) The interim Groundwater Removal Facility was tested in December 1993 and became fully operational in February 1994;
3) Field activities for the RI were completed on February 7, 1995, site investigation of Robert Chatham's property located at 1261 Gamble Lane, Escondido, occurred during the period of April 3-13, 1995;
4) The RI Report was approved in March 1996. Results of groundwater sampling indicate that substances of concern have migrated to downgradient areas outside of the Yard and the contaminated groundwater plume extends approximately 5,000 feet southeast of the Yard, in the area of Felicita Park.
5) The Human Health Risk Assessment and Screening Ecological Evaluation Report was approved on August 7, 1996.
6) The Feasibility Study (FS) was approved on Dec. 20, 1996.
Commencing in the early 1940s, Chatham Brothers Barrel Yard (Yard) was operated as a waste oil and solvent recycling and bulk petroleum facility. In later years, the facility handled
7) The Remedial Action Plan (RAP) was approved on January 20, 1998.
Not reported
A very low concentration of trichloroethylene (below MCLs) was detected in the farthest water table monitoring well located at Felicita Park.
Not reported
Lake Hodges, a drinking water source, is more than a mile away from the known leading edge of the groundwater plume. Moreover, no reported private and public production well & are being used for drinking.
Not reported
Based on the sampling results, the Human Health Risk Assessment and Screening Ecological Evaluation (HHRASEE) was conducted. The goal of the HHRASEE was to determine the potential impacts that contaminants from the Yard could have on human health and the environment. Health effects were evaluated for cancer-causing and non-cancer causing effects.
Not reported
Results of the human health risk assessment indicated that the potential increase of risk for residents living outside the Yard is negligible, even when assuming that ingestion of soil and groundwater would occur. The screening ecological evaluation indicated that a wide variety of plants and animals live within a one-mile radius of the Yard. While some special and sensitive species may occasionally live on the Yard, this evaluation concluded that no wildlife was found to be affected by contamination from the Yard.
Not reported
The FS evaluated remedial alternatives for the Site. Cleanup alternatives were evaluated using the nine criteria of the US Environmental Protection Agency. The soil alternatives selected for evaluation included no action, excavation, treatment, covering the soil with a cap, disposal of excavated soil outside

CHATHAM SITE PRP GROUP (Continued) **1000857048**

the Yard, fencing, and monitoring and maintaining the cap. The groundwater alternatives selected for evaluation included no action, pumping and treating areas with high concentrations of contaminants, air sparging, monitoring groundwater to demonstrate whether areas of low concentrations of contaminants would be cleaned up by natural attenuation, remedy evaluation, proper disposal of treated water and deed restrictions.
Not reported
The approved RAP included the following remedies, for the soil: 1) soil cap, 2) soil vapor excavation; 3) excavation and offsite disposal of contaminated sediments outside of the Yard and 4) deed restrictions. The selected groundwater remedy includes: 1) extraction of groundwater inside and outside of the Yard, 2) groundwater treatment using air stripping or UV/Chemical oxidation, 3) natural attenuation of low concentrations down a gradient plume 4) institution controls such as a deed restriction, wellhead treatment, and public notifications, 5) development of a Monitoring and Contingency Plan to address any "unstable" contaminated groundwater/surface water, 6) a remedy evaluation after three years, and 7) operation and maintenance of the implemented remedies.
Not reported
Not reported
chlorinated solvents and waste oil that were sent to the Yard mostly by local businesses in the area. These operations

CA BOND EXP. PLAN:

Reponsible Party:	DETAILED SITE EXPENDITURE PLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	It appears at this time that it will continue to be necessary to utilize Bond funds to remediate this site. The Department will undertake appropriate cost recovery action. This site has not been identified as a National Priorities List (NPL) site, nor does it appear to be a likely NPL candidate in the future. Therefore, it appears unlikely that federal funds are a viable source of revenue for this site.
Site Description:	The site was formerly a permitted industrial waste recycling and disposal

CHATHAM BROTHERS BARRELS (Continued) **S100833381**

facility that closed in 1982. Various industrial solvents and waste oil were brought to the facility by local businesses in the area.

Hazardous Waste Desc: Soils are contaminated by heavy metals, polychlorinated biphenyls (PCBs), volatile organics (VOCs) and base/neutral organic compounds. VOCs were detected in samples collected from an onsite ground water monitoring wells.

Threat To Public Health & Env: There is a threat of ground water contamination. Although the use of the upper aquifer in the immediate area is limited to irrigation, there is a potential for migration of site contaminants. There is also a threat of human exposure by direct contact to contaminated soils onsite and to runoff during rainfall.

Site Activity Status: DHS issued a remedial action order to potentially responsible parties (PRPs) in January, 1986. The PRPs failed to respond and were found in noncompliance with the order in April, 1986. The Department is preparing an engineering and cost analysis foran expedited response involving soil removal, removal of buried drums and surface water removal which is planned for the early Spring/Summer of 1989 depending upon weather conditions. In addition, ground water remedial investigation activities are also ongoing.

Status Date: 08/01/2000
Global Id: SL209094184
Lead Agency: SAN DIEGO RWQCB (REGION 9)
Lead Agency Case Number: 37490029
Latitude: 33.0929826133862
Longitude: -117.090379661076
Case Type: Cleanup Program Site
Case Worker: SM
Local Agency: DEPARTMENT OF TOXIC SUBSTANCES CONTROL
RB Case Number: 2090900
File Location: Regional Board
Potential Media Affected: Surface water, Well used for drinking water supply
Potential Contaminants of Concern: 1,4-Dioxane, Dichloroethene (DCE), Trichloroethylene (TCE), Polychlorinated biphenyls (PCBs), Other Metal, Polynuclear aromatic hydrocarbons (PAHs)
Site History: Commencing in the early 1940s, Chatham Brothers Barrel Yard (Yard) was operated as a waste oil and solvent recycling and bulk petroleum facility. In later years, the facility handled chlorinated solvents and waste oil that were sent to the Yard mostly by local businesses in the area. These operations continued until 1981 when the Chathams sold the property, which eventually reverted back to the Chathams when the buyer filed for bankruptcy. In 1982, the California Department of Health Services (DHS), the predecessor agency of the California Department of Toxic Substances Control (DTSC), and other governmental agencies became aware of the existence of hazardous chemicals at the Yard and began various phases of site investigation and remedial activities. The Yard was fenced in 1984. In June 1985, Chatham Brothers Barrel Yard Site (Site) was listed in the Bond Expenditure Plan making it a "State Superfund Site." On January 23, 1986, DHS issued an administrative Remedial Action Order to the Chathams requiring them to complete the Remedial Investigation and Feasibility Study and identify the final cleanup options in a remedial action plan. The Chathams did not comply with the Order, claiming lack of funds. DTSC made a Determination of Non-Compliance and commenced a State funded remediation program. In 1986, a Site Remedial Investigation was performed to determine the nature and extent of soil contamination, and whether the groundwater contamination beneath the Yard existed. The soils inside the Yard were found to be contaminated with polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), semi-volatile organic compounds and metals. Ground- water contamination was found beneath the Yard. Forty cubic yards of contaminated soil was removed from different areas along Bernardo Avenue on April 21 and 22, 1987. Further soils and hydrogeologic investigations were conducted in 1988 and 1989 to

CHATHAM BROTHERS BARREL Y (Continued) **S104750005**

define concentrations and quantities of soil contamination, and to determine whether groundwater contamination has migrated outside of the Yard. Groundwater contamination was found to have migrated outside of the Yard and soil contamination was determined to be a source of groundwater contamination. Commencing in March 1990, DHS conducted a Removal Action (RA) at the Yard to reduce the potential for further degradation of groundwater. The work included excavation, removal, and offsite disposal of 11,430 tons of highly contaminated soils; removal of 208 surface drums and 10 buried drums; and rehabilitation of a 5-foot diameter, 68-foot deep hand dug well located inside the Yard into a 12-inch diameter well. The RA, performed under an imminent or Substantial Endangerment Order issued in November 1989, was completed in June of 1990, and cost approximately $3 million. The soils at the Yard are now considered stabilized. Surface water contamination migration was decreased by the RA activities. Seven groundwater monitoring wells and three 100-foot monitoring wells were installed in September of 1990 and May 1991 to determine the extent of vertical and horizontal contamination. Groundwater contamination has been identified both inside and outside the Yard. In 1991, DTSC determined that significant VOCs contamination existed up to depths of 50 feet and 100 feet in the groundwater beneath the Yard. In December 1990, DTSC began sending Information Request Letters to approximately 180 Generator Potentially Responsible Parties (PRPs) who may have sent waste materials to the Yard. DTSC evaluated the responses of the 180 PRPs, and identified 96 to whom Special Notice Letters were sent. In January 1992, DTSC notified the 96 PRPs that they should form a steering committee to begin "good faith" negotiations to remediate the Site and to reimburse DTSC for past costs. As a result of these negotiations, an administrative Imminent and Substantial Endangerment Order & Consent Order was signed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/26/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 04/30/2022

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Date Data Arrived at EDR: 04/15/2020
Date Made Active in Reports: 07/02/2020

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

USGS TOPOGRAPHIC MAP

Target Property Map:	12014840 ESCONDIDO, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

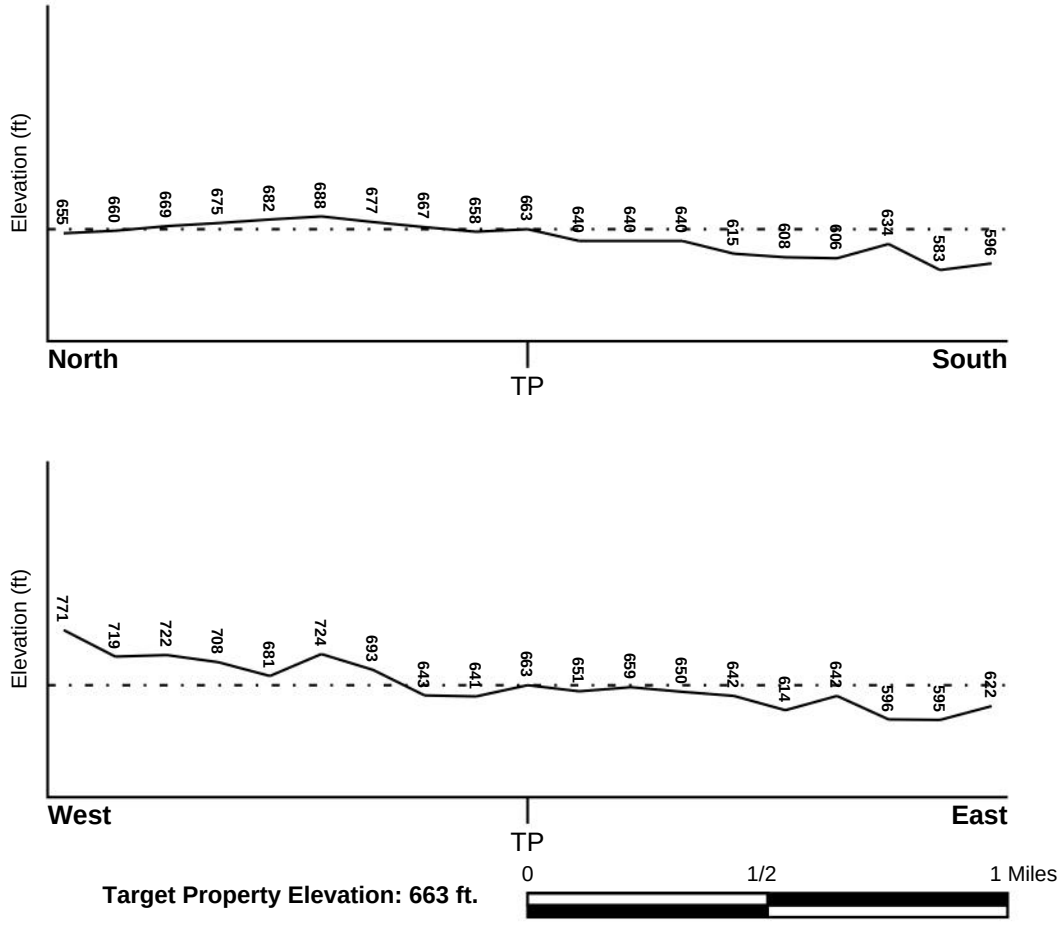

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
C8	1/2 - 1 Mile East	Varies
1G	1/2 - 1 Mile East	Varies

For additional site information, refer to Physical Setting Source Map Findings.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

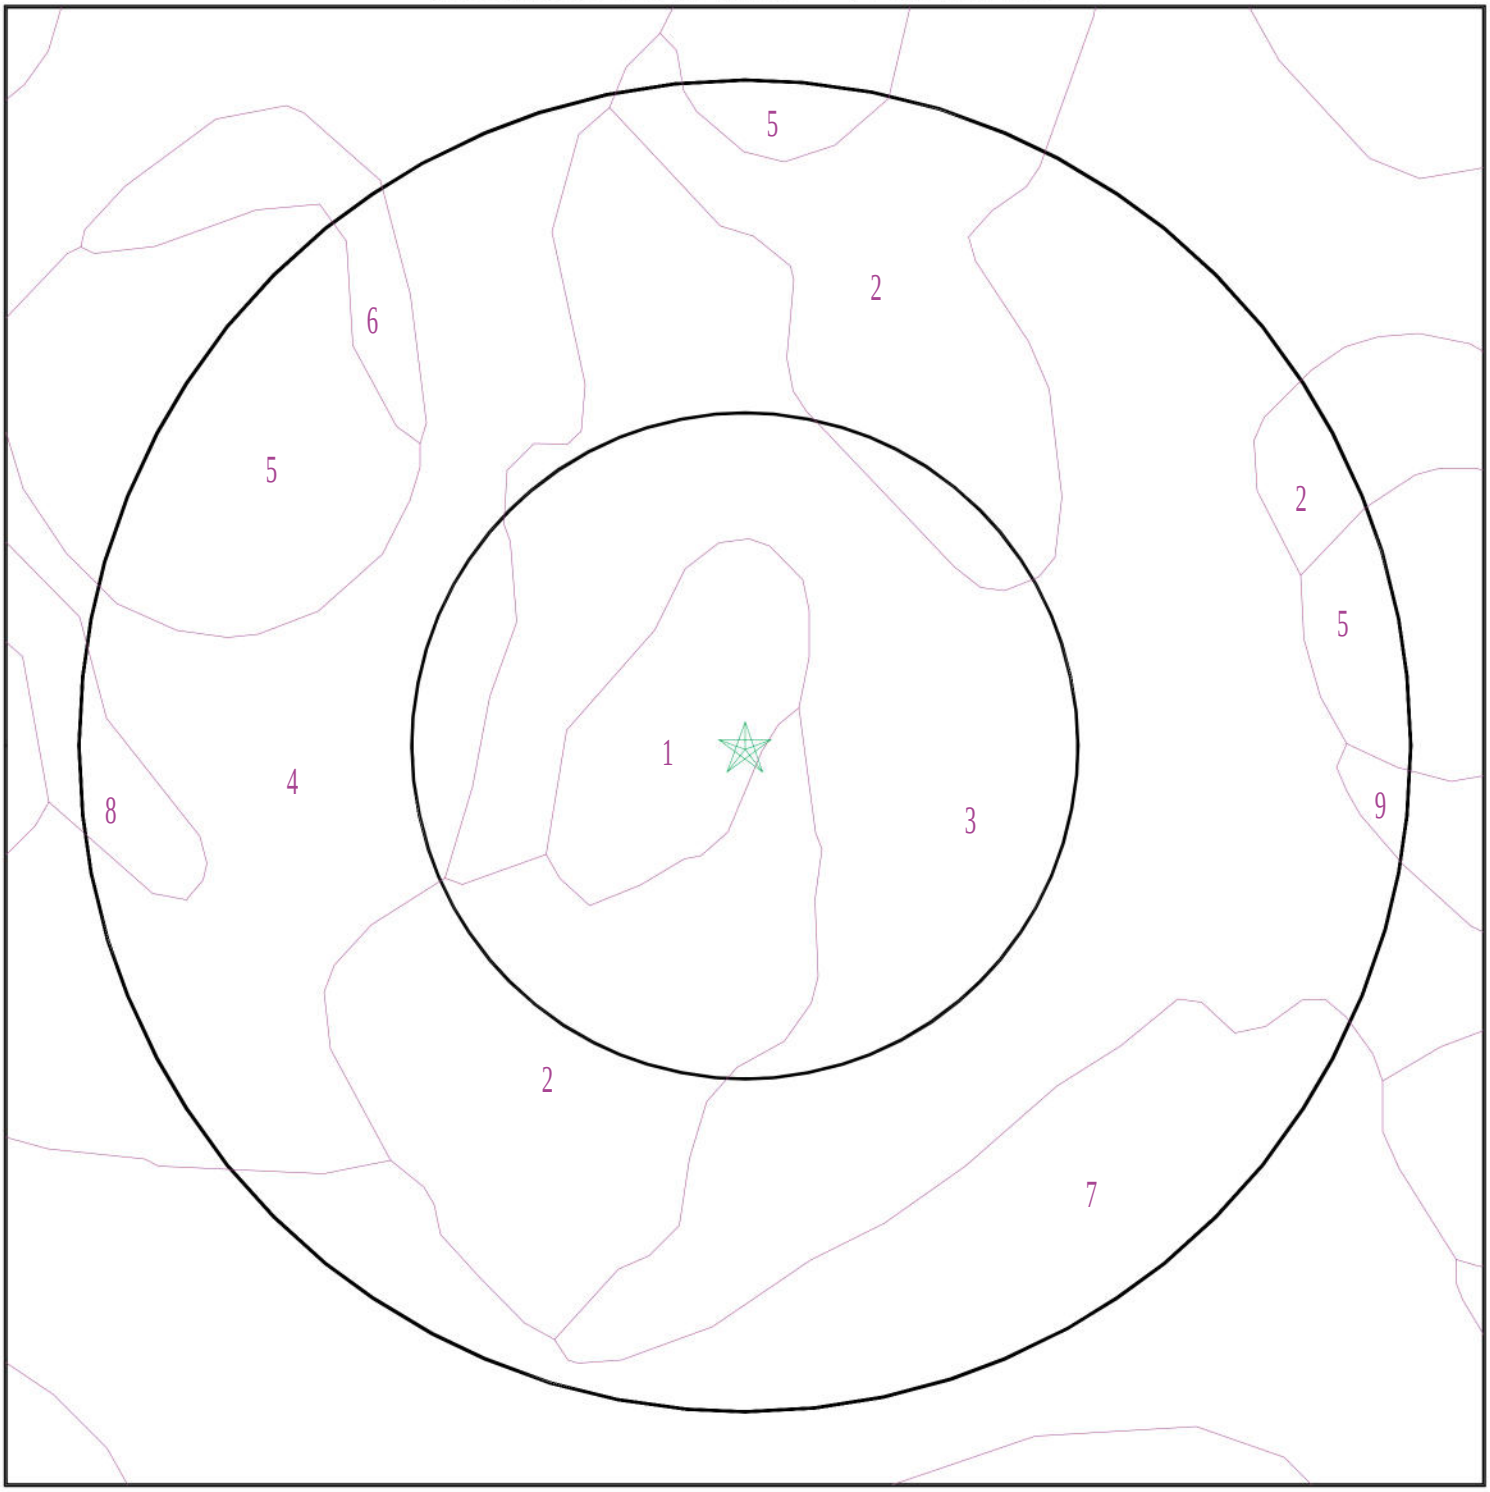

Era:	Mesozoic
System:	Cretaceous

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: FALLBROOK

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	5 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	11 inches	27 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX C

USER QUESTIONNAIRE
AND INTERVIEW FORM

USER
TRANSACATION SCREEN QUESTIONNAIRE
FOR PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA)

To qualify for one of the *Landowner Liability Protections (LLPs)*247 offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), 248 the *user* must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

Site Address: 855 Brotherton Road

Escondido, CA 92025

Site APN(s): 236-333-41-00 and 236-333-53-00

(1.) What is the purpose for which this Phase I ESA is being performed (ex., sale, purchase, exchange, etc)?

Purchase

(2.) Please identify all parties (name/company) who will rely on the Phase I ESA report including additional users: Maple Multi-Family Land

(3.) Environmental liens that are filed or recorded against the subject property (40 C.F.R. § 312.25).

Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?

NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records shall be searched for environmental liens and AULs.

Yes / No

If Yes, Please Explain:

(4.) Activity and use limitations that are in place on the subject property or that have been filed or recorded against the subject property.

Did a search of land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

Yes / No

If Yes, Please Explain:

(5.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 C.F.R. § 312.28).

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes / No

If Yes, Please Explain:

(6.) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 C.F.R. § 312.29).

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

Yes / No

If Yes, Please Explain: Purchase Price reflects fair market value.

(7.) Commonly known or reasonably ascertainable information about the subject property (40 C.F.R. § 312.30).

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the subject property? Yes / No

If Yes, Please Explain:

(b.) Do you know of specific chemicals that are present or once were present at the subject property? Yes / No

If Yes, Please Explain:_____

(c.) Do you know of spills or other chemical releases that have taken place at the subject property? Yes / No

If Yes, Please Explain:_____

(d.) Do you know of any environmental cleanups that have taken place at the subject property? Yes / No

If Yes, Please Explain:_____

(8.) The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

Yes / No_____

If Yes, Please Explain:_____

_____

(9.) Are you aware if any of the following documents exists?

- Environmental site investigation reports - Yes / No
- Environmental compliance audit reports - Yes / No
- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits, air permits) - Yes / No
- Registrations for underground storage tanks and aboveground storage tanks - Yes / No
- Registrations for underground injection systems - Yes / No
- Safety data sheets - Yes / No
- Community right-to-know plans - Yes / No
- Safety plans; preparedness and prevention plans; Spill prevention, countermeasure, and control plans; Facility response plans, etc. - Yes / No
- Reports regarding hydrogeologic conditions at the subject property or surrounding area - Yes / No
- Reports regarding any self-directed or other cleanup activities conducted at the subject property - Yes / No
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the subject property or relating to environmental liens encumbering the subject property - Yes / No

- Hazardous waste generator notices or reports - Yes / No
- Geotechnical studies - Yes / No
- Risk assessments - Yes / No

(10.) Are you aware of any of the following?

- Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property - Yes / No
- Any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property - Yes / No
- Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products - Yes / No

Please attach copies of documents to support the answers provided above as needed, such as but not limited to:

- **Land Title and Judicial Records** (ie, Transaction-Related Title Insurance Documentation Such as Preliminary Title Reports and Title Commitments or Title Search Information Reports Such a Condition of Title, Title Abstracts, and AUL/Environmental)
- **Permits, Plans, Registrations, etc**
- **Other Regulatory Agency Documents**
- **Letters**
- **Environmental Reports**

ARCHITECT: PHONE #:	CONTACT: PHONE:

NOTICE - DEVELOPERS FEES: California Government Code Section 66020 (d)(1) requires each local agency to provide the applicant a statement in writing at the time of imposition of fees or project approval of the amount of fees, description of dedications, reservations, or other exactions and a notification that the 90-day approval period in which the applicant may protest such fees has begun. This will serve to notify you that the 90-day approval period in which you may protest any imposed fees, dedications, reservations or other exactions will begin to run from the issued date on this building permit. However, if you have previously been notified that the 90-day approval period has begun, the earlier notice supersedes this notice.

IMPORTANT: Expiration: Every permit issued by the Building Official under the provisions of this Code shall expire by limitation and become null and void if the building or work authorized by such permit is not commenced within 180 days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned at any time after the work is commenced for a period of 180 days. OSHA PERMIT: An OSHA permit is required for excavations over 5 feet in depth and demolition or construction of structures over 3 stories in height.

I have carefully examined the completed "PERMIT" and do hereby certify under penalty of perjury that all information hereon, including the declarations are true and correct and I further certify and agree if a permit is issued: To comply with all City, County and State laws governing building construction, whether specified herein or not and do hereby authorize representatives of this City to enter upon the above-mentioned property for inspection purposes. I also agree to save, indemnify and keep harmless the City of Escondido against all liabilities, judgements, costs

APPLICANT'S SIGNATURE _____ (PRINT NAME) _____ DATE _____

CHECK ONE: ☐ BUILDING OWNER ☐ OWNER'S AGENT ☐ CONTRACTOR ☐ CONTRACTOR'S AGENT

DECLARATIONS

(Required per CA Health & Safety Code Section 19825)

CONTRACTOR

☐ I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER/BUILDER

☐ I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code). Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by an applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 70044, Business and Professions Code: the Contractor's License law does not apply to an owner of property who builds or improves thereon and who does such work himself or herself through his or her own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044 Business and Professions Code: the Contractor's License law does not apply to an owner of property who builds or improves thereon and who contracts for such projects with a contractor(s) license pursuant to the Contractor's Law).

I am exempt under Sec. _____ B & P.C.

☐ for this reason _____

WORKERS' COMPENSATION

I hereby affirm under penalty of perjury one of the following declarations:
I have and will maintain a certificate of consent to self-insure for workers compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____

☐ Policy Number: _____

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with these provisions.

☐ **WARNING:** FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000). IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

LENDER

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097 Civil Code).

Lender'sName: _____

Lender's Address: _____

I HAVE CAREFULLY EXAMINED THE COMPLETED "PERMIT APPLICATION" AND DO HEREBY CERTIFY UNDER PENALTY OF PERJURY THAT ALL INFORMATION HEREON INCLUDING THE DECLARATIONS ARE TRUE AND CORRECT AND I FURTHER CERTIFY AND AGREE IF A PERMIT IS ISSUED: TO COMPLY WITH ALL CITY, COUNTY AND STATE LAWS GOVERNING BUILDING CONSTRUCTION, WHETHER SPECIFIED HEREIN OR NOT AND DO HEREBY AUTHORIZE REPRESENTATIVES OF THIS CITY TO ENTER UPON THE ABOVE-MENTIONED PROPERTY FOR INSPECTION PURPOSES. I ALSO AGREE TO SAVE, INDEMNIFY AND KEEP HARMLESS THE CITY OF ESCONDIDO AGAINST ALL LIABILITIES, JUDGMENTS, COSTS AND EXPENSES WHICH MAY IN ANY WAY ACCRUE AGAINST SAID CITY IN CONSEQUENCE OF THE GRANTING OF THIS PERMIT. AN OSHA PERMIT IS REQUIRED FOR EXCAVATIONS OVER 5' DEEP AND DEMOLITION OR CONSTRUCTION OF STRUCTURES OVER 3 STORIES IN HEIGHT.

APPLICANT: BUILDING OWNER ☐ CONTRACTOR ☐ AGENT ☐ — SIGNATURE — C. FRANK JORDAN — PRINT NAME — DATE 18 FEB 1997

CONTRACTOR

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

I hereby affirm under penalty of perjury that I am exempt from the Contractor's License Law for the following reason: (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by an applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License law does not apply to an owner of property who builds or improves thereon and who does such work himself or herself through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

OWNER / BUILDER

☒ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044 Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) license pursuant to the Contractor's Law).

☐ I am exempt under Sec. _____, B & P.C. for this reason: _____

DECLARATIONS

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____

Policy Number _____

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WORKERS' COMPENSATION

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

LENDER

☐ I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name _____

Lender's Address _____

Expiration. Every permit issued by the Building Official under the provisions of this Code shall expire by limitation and become null and void, if the building or work authorized by such permit is not commenced within 180 days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned at any time after the work is commenced for a period of 180 days.

LLOYD "J" HOLT, JR.
DIRECTOR OF PUBLIC WORKS
CITY ENGINEER

Pastor John J. Swartz
Bethel Baptist Church
855 Brotherton Road
Escondido, Ca. 92025

Subj: Bethel Baptist Church
Felicita and Brotherton Road

Dear Pastor Swartz:

We received your letter requesting that a waiver be granted for waiving the requirements of constructing street improvements on Brotherton Road.

I discussed the matter with the City Attorney and was advised that since the property is now in the city it is subject to the benefits and also to complying with local ordinances and policies.

When you take out a Building Permit and it is referred to this department we would require that street improvements be constructed for your frontage. Should you then request a waiver, this department would not grant it.

It is our policy to consider granting waivers for single family residences where no street improvements are in for that block and we have previously granted waivers for less than 50% of the frontage.

In your letter you mentioned an improvement district. If you wished to pursue that method of constructing the improvements this department would be pleased to explain to your representative the time and costs involved.

Very truly yours,

Howard Gesley
Assistant City Engineer

GENE ERVIN
DIRECTOR
BUILDING DEPARTMENT

November 6, 1975

TO WHOM IT MAY CONCERN:

Concerning the Bethel Baptist Church under construction at 855 Brotherton Road, Escondido, Calif.

Construction of the above structure was started while the property was still in the unincorporated area of San Diego County. The San Diego County Building Inspection Department performed the plan check and issued the permits on this structure. The County also inspected the foundations, all underground plumbing and electrical under the main structure, the steel and concrete in the exterior tilt-up walls, and a partial rough electrical, venting and framing in the one story portion of the building inside. About the first of November, 1975 the County Building Department delivered all applicable permits and records to the Escondido City Building Department and stated they were not to make any more inspections on this property.

After careful study of the records and the County-approved construction plans on this job it is evident that the plans were submitted as a non-fire rated building and the County plan checker had as one of his correction notes that the building must be a minimum of one-hour fire reisstant construction throughout; but he did not require all the fire resistant details to be shown on the plans before he stamped them "approved". According to the contractor on the job the one story part of the building including all the ground floor corridors had been approved by the County building inspector.

After extensive research and a considerable amount of discussion among the Escondido Building Department personnel and contact with other agencies and some of the subcontractors on the job the following decision has been made as the minimum fire-resistive requirement this department can accept on this structure:

1. All heating/air conditioning ducts with openings into the corridors must be protected with fire dampers plus one hour fire resistant material provided around the duct from its outlet at the ceiling up to the damper.

LORRAINE H. BOYCE, MAYOR JERRY C. HARMON, MAYOR PRO-TEM GEORGE M. LINTHICUM KENNETH M. ROBERTS ALAN B. SKUBA

2. Construct a one hour fire resistant canopy around and over each light fixture which pierces the one hour fire resistant ceiling in all corridors.

3. All steel columns and beams which are structural elements of the building must be fire protected.

The balance of the building will have inspection by the Escondido Building Department and will be expected to comply with the approved plans and applicable codes.

If there is any further questions in this matter it is suggested the contractor on the job meet with the Escondido Building Inspector to determine specifically what will be required to complete the building.

GENE ERVIN
Building Department Director

March 24, 1982

GENE ERVIN
DIRECTOR
BUILDING DEPARTMENT

Dr. John Swartz, Pastor
Bethel Baptist Church
855 Brotherton Road
Escondido CA 92025

Dear John:

This really isn't a "Dear John" letter! This is written in response to your request for relief from installing an elevator or ramp to the second floor classrooms now under construction at your church plant.

At the 1981 Annual Business Meeting of I.C.B.O., Code Change #212 was approved which reads as follows: "When the floor closest to grade offers the same programs and activities available on other floors, access to the other floors may be by stairs only, except when the only available toilet facilities are on other levels." This change will be in the 1982 edition of the Uniform Building Code.

Even though the City has not yet adopted the 1982 Uniform Building Code, the Building Official has the prerogative to grant requests such as this under provisions of Section 106 of the currently adopted Building Code.

You are hereby granted permission to eliminate the elevator or ramp to the second floor of the Sunday School rooms at the church at 855 Brotherton Rd. now under construction. Of course, you will still be required to have all stairs/exits comply with the Building Code.

Sincerely,

Gene Ervin

Escondido, CA 92025

Dear Mr. Erwin:

We of the Bethel Baptist Church, 855 Brotherton Rd., Escondido, California respectfully request a variance of the requirement of a handicap access to the second floor of our building under construction at the above address for the following reasons:

1. The second floor will be used primarily one day weekly for Sunday School Sunday morning and Christian training on Sunday evening.

2. Our proposed use for week day preschool child care would be legal on ground floor only.

3. There are no bathroom facilities on second floor.

4. All activities provided on the second floor will also be provided at ground level.

5. To provide access to an area that is not necessary presents an additional financial burden to the already high cost of building.

6. Should at anytime in the future our church be led to begin a day school we would expect to provide handicap access to all areas where students meet.

Our sincere thanks for your cooperation in the above request.

Sincerely yours,

John J. Swartz

SUBJECT: Access to Second Floor Classrooms for the Handicapped, Table No. 33-A, 1979 Uniform Building Code

Dear Mr. Exley:

We have reviewed your letter of March 16, 1982, and the attached letter from John Swartz, the pastor of the Bethel Southern Baptist Church in Escondido, and agree with your contention that access to the second story is required by Table No. 33-A. You may be interested in a code change which was approved by our membership at the last annual meeting which would add a new Footnote 11 referring to classrooms which would state, "When the floor closest to grade offers the same programs and activities available on other floors, access to other floors may be by stairs only, except when the only available toilet facilities are on other levels." The reason given for the change by the Code Changes Committee was, "It is reasonable to exempt access to school classrooms on other floors where the accessible floor offers the same programs and activities available on all other floors."

As indicated in the previous paragraph, the proposed change was approved by the membership at our last annual meeting and will appear in the 1982 edition of the Uniform Building Code. It would seem to us that if you wish to approve the request from Mr. Swartz you could do so on the basis of Section 106 of the code. This recommendation is based upon the fact that the building is not the usual educational occupancy such as a full-blown school but rather a Sunday school use where the use is only for one day per week. Because of the very limited use of the building, we would classify it as a Group B, Division 2 Occupancy and as the children are there for only a limited time period, feel that the school can adequately take care of those handicapped individuals desirous of Sunday school and Christian training and that practical difficulties would result from enforcing the letter of the code.

Sincerely,

Vincent R. Bush, P.E.
Assistant Technical Director

GENE ERVIN
DIRECTOR
BUILDING DEPARTMENT

March 16, 1982

ICBO
5360 S. Workman Mill Rd.
Whittier CA 90601

Dear Sirs:

Enclosed is a request for relief from handicapped access to the second floor of a church educational building (E-1 occupancy) under construction at this time. The two-story building is a series of classrooms, first and second floor, with all the toilet facilities located on the first floor. Plans have been approved showing a ramp to the second floor for handicapped access, per Table 33-A, 1979 UBC requirements. It is our contention that this is required by Code and no differentiation is made due to number of days per week use for classrooms.

The pastor of the church has asked us to obtain your interpretation of this Code requirement.

Yours truly,

Paul Exley

DECLARATIONS

CONTRACTOR

☐ I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Section 7000 of Division 3 of the Business and Professions Code) or that is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by an applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

OWNER/BUILDER

☑ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) license pursuant to the Contractor's License Law).

☐ I am exempt under Sec. _____ B & P C for this reason _____

WORKER'S COMPENSATION

☐ I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Labor Code)

POLICY NO. _____

COMPANY _____

☐ Copy is filed with the city.

☐ Certified copy is hereby furnished

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE
(This section need not be completed if the permit is for one hundred dollars ($100) or less)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

LENDER

☐ I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

5-1-78 & DEVELOPED WITHIN 5 YEARS OF ANNEXATION	
TOTAL FEES PAYABLE TO CITY OF ESCONDIDO	$102,090.94

I HAVE CAREFULLY EXAMINED THE COMPLETED PERMIT APPLICATION AND DO HEREBY CERTIFY UNDER PENALTY OF PERJURY THAT ALL INFORMATION HEREIN, INCLUDING THE DECLARATIONS ARE TRUE AND CORRECT AND I EITHER OWN AND AGREE TO A PERMIT TO BUILD TO COMPLY WITH ALL CITY, COUNTY AND STATE LAWS GOVERNING BUILDING CONSTRUCTION. WHETHER I AM OWNER OR AGENT I ALSO AGREE TO SAVE HOLD HARMLESS AND INDEMNIFY THE CITY OF ESCONDIDO AGAINST ALL LIABILITIES, JUDGMENTS, COSTS AND EXPENSES WHICH MAY IN ANY WAY ACCRUE AGAINST SAID CITY IN CONSEQUENCE OF THE GRANTING OF THIS PERMIT.

Important: Every person issued by the Building Official a permit for the construction, alteration or demolition of any building, structure or appurtenance shall be subject to the provisions of the Labor Code of the State of California relating to Workmen's Compensation. Before a permit is issued, the applicant therefor shall sign a statement or shall furnish a certificate of insurance or a certificate of consent to self-insure or a certificate of the exemption therefrom, as required by Section 3700 of the Labor Code.

* ANY DEMOLITION PERMIT IS REQUIRED FOR EXCAVATIONS OVER 5' OF DEPTH AND DEMOLITION OF CONSTRUCTION OF STRUCTURES OVER 2 STORIES IN HEIGHT

SIGNATURE OF APPLICANT — OWNER OR CONTRACTOR — DATE 12-5-89

CONTRACTOR

I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License No. — Classification — Date

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds improvements thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. I am exempt under Sec. B & P.C. for this reason

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workmen's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

My Workmen's Compensation Insurance carrier and policy number are

Carrier — Policy No.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workmen's Compensation Laws of California.

WARNING TO APPLICANT: If you employ any person, you must comply with the Labor Code, which requires that you secure the payment of compensation to your employees. Failure to secure such compensation is a misdemeanor, punishable by imprisonment in the county jail not exceeding one year, or in the state prison, or by a fine not exceeding $1,000, or by both. In addition, a stop order may be issued requiring you to cease all work until you secure the payment of compensation. In the event you should become subject to the Workmen's Compensation provisions of the Labor Code after signing this certificate, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workmen's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

My Workmen's Compensation Insurance carrier and policy number are

Carrier — Policy No.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workmen's Compensation Laws of California.

WARNING TO APPLICANT: If you employ any person, you must comply with the Labor Code, which requires that you secure the payment of compensation to your employees. Failure to secure such compensation is a misdemeanor, punishable by imprisonment in the county jail not exceeding one year, or in the state prison, or by a fine not exceeding $1,000, or by both. In addition, a stop order may be issued requiring you to cease all work until you secure the payment of compensation. In the event you should become subject to the Workmen's Compensation provisions of the Labor Code after signing this certificate, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License No. — Classification — Date

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds improvements thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. I am exempt under Sec. B & P.C. for this reason

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workmen's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

My Workmen's Compensation Insurance carrier and policy number are

Carrier — Policy No.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workmen's Compensation Laws of California.

WARNING TO APPLICANT: If you employ any person, you must comply with the Labor Code, which requires that you secure the payment of compensation to your employees. Failure to secure such compensation is a misdemeanor, punishable by imprisonment in the county jail not exceeding one year, or in the state prison, or by a fine not exceeding $1,000, or by both. TYPE OF COMPACTOR

DATE	REMARKS
5-14	Observed the placement and installation of reinforcement in excavations to be placed against undocumented fill and natural soils. Footing excavations were observed, were determined adequate to carry design loads placed as anticipated and are considered adequate for the support of 1500 psf. Footing dimensions and reinforcing meet the recommendations of the approved plans. Concrete placement and reinforcing also complies with the recommendations. (Many trenches have been excavated by contractor, removals appears adequate. This daily report pertains to the observations and compliance with recommendations made by our field personnel. Tests have not been collected to verify compliance with the Approved Recommendations.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
