# 1 EXECUTIVE SUMMARY

ADR Environmental Group, Inc. (ADR) was retained by Rexford Industrial Realty, L. P. to perform a Phase I Environmental Site Assessment (ESA) for the site located at 1500 South Raymond Avenue in Fullerton, California (subject Property).

This ESA was performed in conformance with the scope and limitations of ASTM International (ASTM) Standard Practice E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312), and the scope of services identified in the July 30, 2014, Master Environmental Consulting Services Agreement (MSA) between Rexford Industrial Realty, L. P. and ADR. This ESA has identified no evidence of recognized environmental conditions (RECs) as defined by ASTM in connection with the subject Property with the exception of:

- The subject Property is located within the boundaries of the Orange County North Basin (OCNB) Superfund site. This area contains a comingled groundwater plume of chlorinated solvents (contaminated with tetrachloroethylene (PCE), trichloroethene (TCE), 1,1-dichloroethene (1,1-DCE), and 1,4-dioxane) covering approximately five square miles beneath parts of the cities of Anaheim, Fullerton and Placentia. Due to the reported depth to groundwater in the area of the subject Property (ranging between 56 and 66 feet below ground surface) it is unlikely that vapor intrusion is occurring on the subject Property. Since the storage and/or usage of the identified contaminants have not been reported on the subject Property, it is unlikely that the owner(s) of the subject Property would be required to participate in any future investigation or clean-up efforts related to the impacted groundwater. Therefore, no additional investigation is warranted at this time.

# 2 INTRODUCTION

## 2.1 Purpose

The purpose of this ESA is to identify recognized environmental conditions in connection with the subject Property. The term *recognized environmental conditions*, as defined in *ASTM Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process (*ASTM Standard Practice E1527-21) means the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release to the environment*; (2) the likely presence of *substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or *likely release to the environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release to the environment*. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. In addition, this ESA will identify *historical recognized environmental conditions, controlled recognized environmental conditions* and *business environmental risks.* A *historical recognized environmental condition* is defined as a release of any hazardous substances or petroleum products affecting the property and has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the *subject Property* to any controls (for example, *activity and use limitations* or *other property use limitations*). A *controlled recognized environmental condition* is a *recognized environmental condition* affecting the subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, *activity and use limitations* or other *property use limitations)*. A *business environmental risk* is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate but is not considered a *recognized environmental condition.*

This ESA was performed in a manner that complies with the Scope and Limitations of the ASTM Standard Practice E1527-21, AAI and ADR's contractual obligations to the Client, identified in the Master Environmental Consulting Services Agreement (MSA) dated July 30, 2014.

The procedure for this ESA was to perform in practical and reasonable steps an investigation to ascertain the possibility, presence, or absence of recognized environmental conditions as delineated by the Scope of Work. This was accomplished by employing currently available technology, existing regulations, and generally acceptable engineering practices.

## 2.2 Significant Assumptions

The following assumptions are made by ADR in this report. ADR relied on information derived from secondary sources including government agencies, the client, designated representatives of the client, property contacts, property owner, property owner's representatives, computer databases, and/or personal interviews. Although ADR has evaluated the thoroughness and reliability of the provided information (consistent with the requirements of 40 CFR 312.20(f)(2)), ADR can neither warrant nor guarantee the

thoroughness and reliability of information derived from secondary sources including the government agencies, the client, designated representatives of the client, property contacts, property owner, property owner's representatives, computer databases, and/or personal interviews. Groundwater flow and depth to groundwater, unless otherwise specified by on-property well data or off-site subsurface investigation, are assumed based on contours depicted on the United States Geological Survey topographic maps. ADR assumes the subject Property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and/or property owner's representative.

## 2.3 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in the methodologies referred to in ASTM Standard Practice E1527-21 that are intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property. Other specific limitations and exceptions (also known as Data Gaps) to the ESA are more specifically set forth below:

- None

## 2.4 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard Practice E1527-21, AAI and the *MSA* document. ADR warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

## 2.5 Environmental Assessment Report Special Terms and Conditions

This ESA was performed in accordance with the Scope of Services set forth in the contract document. No other warranty or guarantee, expressed or implied, is made or offered.

The conclusions and recommendations (if applicable) stated in this ESA are based upon observations made by employees of ADR and also upon information obtained by ADR. While reasonable attempts have been made to verify this information, we cannot guarantee its accuracy.

The observations contained within this ESA are based upon site conditions readily visible and present at the time of our site inspection. These site observations are unable to specifically address conditions of subsurface soil, groundwater, or underground storage tanks, if applicable, unless specifically mentioned.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the master services agreement between Rexford Industrial Realty, L. P. and ADR (the "MSA), the MSA shall control.

## 2.6 User Reliance

The enclosed ESA has been performed for the exclusive use of Rexford Industrial Realty, L.P., and/or its subsidiaries, as their interest may appear, for the transaction at issue concerning the subject Property located at 1500 South Raymond Avenue in Fullerton, California.

## 2.7 General Information

Mr. Charles Yang, Vice President with Huoyen International, Inc. (owner) and familiar with the subject Property since 1995, was identified as the "Key Site Manager." The Key Site Manager is that person having the most reliable knowledge as to the previous uses and current conditions of the subject Property, and in a position to provide reasonably accurate information for the Environmental Site Assessment Questionnaire (Questionnaire). Mr. Yang completed the Questionnaire subsequent to the site visit. A completed copy of the Questionnaire is included in the appendix of this report.

Mr. Steven Kerchner, Environmental Assessor with ADR, conducted the on-site inspection on February 25, 2022. Mr. Macario Rosas, Maintenance Supervisor at The Fullerton Hotel Anaheim and Mr. Tomas Narbutas and Ms. Megan Bartyczak, both with Rexford Industrial Realty, L. P. accompanied the ADR Assessor during the site visit. Weather conditions for the site inspection consisted of clear skies with temperatures in the 80s.

The following individuals were interviewed to obtain information relevant to the historical development and/or issues associated with possible recognized environmental conditions associated with the subject Property.

| Name | Title or Position/Employer |
|---|---|
| Mr. Charles Yang | Vice President/Huoyen International, Inc. (owner) |
| Mr. Macario Rosas | Maintenance Supervisor/The Fullerton Hotel Anaheim |
| Mr. Tomas Narbutas | Senior Analyst, Acquisitions/Rexford Industrial Realty, L. P. |
| Ms. Megan Bartyczak | Acquisitions/Rexford Industrial Realty, L. P. |
| Ms. Mea Klein | City Clerk/City of Fullerton Clerks Office |
| Ms. Karissa Russell | Permit Technician/City of Fullerton Community and Economic Development Department |
| Ms. Julie Johnson | Regional Records Coordinator/Department of Toxic Substances Control |
| Name not provided | File Review Desk/Regional Water Quality Control Board-Santa Ana Region |
| Ms. Lora Trapp | Public Records Coordinator/South Coast Air Quality Management District |
| Ms. Suzanne Peralta | Records/Orange County Health Care Agency |
| Ms. Tina Knapp | Assistant Clerk of the Board/Orange County Sanitation District |

# 3 USER PROVIDED INFORMATION

Mr. Tomas Narbutas, Senior Analyst, Acquisitions with Rexford Industrial Realty, L. P., was identified as the best candidate to complete the User Questionnaire. The User Questionnaire consists of inquiries as to specific knowledge regarding the purchase of a site as specified by ASTM Standard Practice E1527-21. This knowledge consists of environmental liens against the subject Property, purchase price, limitations at a site, and spills. A copy of this Questionnaire is included in the appendix.

## 3.1 Title Records

A copy of a February 10, 2022, "Preliminary Report" prepared by Chicago Title Company was provided to ADR. A review of this document did not identify any environmental issues. A copy of this document is included in the appendix.

## 3.2 Environmental Liens or Activity and Use Limitations (AUL)

Mr. Narbutas is unaware of any environmental liens or AULs such as engineering controls, land use restrictions, or institutional controls associated with the subject Property.

## 3.3 Specialized Knowledge

Mr. Narbutas has no specialized knowledge of the operations associated with the subject Property.

## 3.4 Commonly Known or Reasonably Ascertainable Information

Mr. Narbutas is unaware of any commonly known or reasonably ascertainable information of any environmental issues associated with the subject Property.

## 3.5 Valuation Reduction for Environmental Issues

Mr. Narbutas indicated that the price to be paid for the subject Property is based on fair market value and its value was not reduced due to environmental issues.

## 3.6 Owner, Property Manager, and Occupant Information

The following information regarding the Owner, Property Manager and Occupant(s) was provided by the User and Key Site Manager.

| | |
|---|---|
| ***Property Owner:*** | Huoyen International Inc., a California corporation |
| ***Property Manager:*** | Not provided |
| ***Occupant:*** | The Fullerton Hotel Anaheim |

## 3.7 Reason for Performing ESA

The purpose of this ESA was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard Practice E1527-21) in connection with the subject Property. This ESA was also performed to permit the *User* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard Practice E1527-21 constitutes "*all appropriate inquiries* into the previous ownership and uses of the *property"* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35) (B).

ADR understands that the findings of this study will be used by Rexford Industrial Realty, L. P. to evaluate a pending financial transaction in connection with the subject Property.

# 4 GENERAL SITE CHARACTERISTICS

## 4.1 Location and Legal Description

The subject Property is located at 1500 South Raymond Avenue in Fullerton, California, and its location is shown on maps included in the appendix of this ESA. In addition, an aerial site plan of the subject Property is included in the appendix.

For further geographic reference, the subject Property is located immediately east of the intersection of South Raymond Avenue and East Burton Street as identified on the Orange County Assessor's Parcel Map. A copy of this map is included in the appendix of this ESA.

Legal Description:

A copy of the legal description is contained in the appendix.

## 4.2 Site and Vicinity Characteristics

The subject Property is located in a light-industrial, commercial and residential area of Fullerton. Light-industrial and commercial properties are to the north, east, and west of the subject Property. State Route 91 is to the south with a church and residential development beyond. An abandoned railroad right-of-way is to the immediate north of the subject Property. A gas station is approximately 120 feet northwest of the subject Property. No other gas stations, active dry cleaners, major manufacturing or heavy industrial facilities were located in the immediate vicinity of the site. No pits, ponds, lagoons, swales, dry wells, or wetlands were observed on the subject Property or in the general vicinity.

## 4.3 Site Description and Current Site Uses/Operations

At the time of the site inspection, the subject Property consisted of two contiguous parcels of land totaling approximately 7.15 acres that was developed with six buildings totaling approximately 144,700 square feet. These structures comprise The Hotel Fullerton Anaheim complex. The remaining portions of the subject Property consisted of asphalt- and concrete-paved parking areas and drives, a swimming pool and associated decking, concrete sidewalks, and landscaping. Vehicle access onto the subject Property is provided by three drives off East Burton Street to the west and south. The subject Property appeared to be in good condition and well maintained.

### 4.3.1 Surface Characteristics

The subject Property consists almost entirely of relatively impermeable surfaces including the hotel buildings and the asphalt- and concrete-paved areas. The remaining portion of the subject Property's surface consists of modest landscaped areas. No significant surface staining was observed on the subject Property during the site inspection. No significant surface staining was observed on the subject Property during the site inspection. The overall topography of the subject Property appears to slope very gently to the southwest.

### 4.3.2 Structure Construction

The subject Property is developed with a hotel complex consisting of six attached structures that total approximately 144,700 square feet. The buildings consist of a L-shaped patio building with restaurant-lounge attached and a 6-story tower building containing guest rooms. The L-shaped patio building is a 3-story concrete block building with concrete floors and cantilevered, concrete walkways on both sides, from which the guest rooms are accessed. The restaurant-lounge area is a conventional wood-frame structure. The tower appears to be a concrete building with a steel framed mechanical penthouse. All structures have slab on grade foundations. The low-pitched roofs of the structures are covered with composite roof materials. Finished areas have framed partitions covered with finished gypsum wallboard. Finished ceilings are finished gypsum board and suspended acoustic ceiling tile. Floor coverings are vinyl tile, carpeting, vinyl floor products; other floors are exposed concrete. Fluorescent and incandescent fixtures provide lighting.

### 4.3.3 Interior Configuration

The subject Property buildings consist of 250 guest rooms, a lobby area, a ball room, office areas, and storage areas and common areas. A swimming pool is located in the center courtyard.

### 4.3.4 Potable Water Supply, Sewer, and Other Utilities

At the time of the site inspection, the City of Fullerton provided potable water service and the Orange County Sanitation District (OCSD) provided sanitary sewer service to the subject Property. During the course of the on-site inspection, no evidence of active or abandoned water supply wells was observed. No septic systems were observed on the subject Property. Southern California Edison (SCE) provided electricity to the subject Property for air conditioning and Southern California Gas provided natural gas service for heating and hot water.

Since the subject Property is serviced by a municipally operated, public water system, it is regulated by the Safe Drinking Water Act of 1974. This Act requires that public water supplies be tested for the presence of various metals, microbiological bacteria and organic chemicals. Information supplied by the City of Fullerton states that the water quality delivered to the subject Property complies with applicable regulatory requirements and the water is routinely tested.

## 4.4 Environmental Liens

A specific search for environmental liens and activity and use limitations was not included in the scope of work for this ESA. However, based on information obtained from the Key Site Manager, User and the Environmental Data Resources (EDR) Radius Map Report, no evidence of environmental liens recorded against the subject Property was found. In addition, according to the EDR-provided information for the subject Property, no evidence of institutional controls, land use restrictions and/or engineering control requirements recorded against the subject Property was reported.

## 4.5 Current Site Uses

At the time of the site inspection, the subject Property was occupied by The Hotel Fullerton Anaheim. According to information from the City of Fullerton Planning Department, the subject Property is zoned M-P-40 (manufacturing park).

## 4.6 Physical Setting Sources

The subject Property's physical location was researched employing the current United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad Map) section relevant to the subject Property. The Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features such as wetlands, water bodies, roadways, mines, and buildings. A portion of this map showing the subject Property is included in the appendix of this ESA.

The Anaheim and La Habra, CA (both dated 1981) Quad Maps show the following pertinent features: a structure similar to the present-day hotel building is identified on the subject Property; a railroad spur is identified along the northern boundary of the subject Property; a light-duty roadway (East Burton Street) is along the western and southern boundaries of the subject Property; intermittent Carbon Creek is to the southeast; the present-day commercial and light-industrial structures are identified on the westernmost north and eastern adjoining properties; Raymond Avenue is identified as a medium-duty roadway to the west; State Route 91 is identified to the south; urban developed land (pink shaded) is approximately 800 feet southeast; several aboveground water tanks are approximately 2,000 feet west; a water well is approximately 2,200 feet north; and the Raymond Retarding Basin is approximately 2,300 feet southwest. There are no mines, oil wells, wetlands, pipelines or other environmentally sensitive features present in the general vicinity of the subject Property. The elevation of the subject Property is approximately 175 feet above mean sea level with a topographic gradient to the southwest.

### 4.6.1 Soil Conditions

According to the September 1978, *Soil Survey of Orange County and the Western Part of Riverside County), California,* prepared by the United States Department of Agriculture, Soil Conservation Service in cooperation with the Agricultural Experiment Station, the soil underlying the subject Property is identified as Metz sandy loam. The Metz series consists of somewhat excessively drained soils on flood plains and alluvial fans. These soils formed in mixed alluvium. In a typical profile, the surface layer is pale brown and brown sandy loam sandy about 17 inches thick. The underlying material is stratified pale brown and very pale brown loamy sand, sandy loam, and very fine sandy loam to a depth of 63 inches or more. The soil is moderately alkaline and calcareous throughout. It is moderately permeable.

It should be noted that the characterization previously described is extrapolated from available regional soil data. In actuality, the subsurface of the subject Property has likely been modified by cuts and fills for underground utilities.

### 4.6.2 Geologic Conditions

The subject Property is located in the south-central portion of the Central Plain of the Los Angeles Basin, in the Transverse Ranges Geomorphic Province of Southern California. The south-central portion of the Central Plain is located southwest of the Santa Ana Mountains, north of the San Joaquin Hills and northeast of the Newport Mesa. This area is a depositional basin underlain by up to 20,000 feet of Tertiary age sedimentary rocks and Quaternary age shallow marine and alluvial deposits. According to the California Division of Mines and Geology, this area is underlain by Quaternary age alluvium that consists of silt, sand, clay and gravel.

### 4.6.3 Groundwater Conditions

No site-specific groundwater information for the subject Property was obtained. However, according to the June 12, 2008, "Underground Storage Tank Case Summary/Closure Rationale" document (obtained from the State Water Resources Control Board's (SWRCB) *GeoTracker* website) prepared by the City of Anaheim Public Utilities Department for the Cardlock Fuels System (CFS 9) located at 1431 North Raymond Avenue (approximately 120 feet northwest of the subject Property), groundwater at that site ranged between 56 and 66 feet below ground surface (bgs) with a flow direction to the east. A copy of the referenced case closure report is included in the appendix.

# 5 HISTORICAL USE INFORMATION

From a review of available historical information, it can be concluded that the subject Property was structurally undeveloped orchard land from as early as 1938 until sometime between 1963 and 1968. During this time period, a canal transected the subject Property from east to west, which was later re-routed to the southeast and south. By 1968, the southern, western and eastern buildings of the present-day hotel complex were constructed. By 1977, the northern building of the present-day hotel complex was constructed. Since its development, the subject Property has been utilized as a hotel with an on-site restaurant.

From a review of available historical information, it can be concluded that the adjoining properties were structurally undeveloped orchard land from as early as 1938 until sometime between 1953 and 1963. By 1963, a railroad spur line was located along the northern boundary of the subject Property and State Route 91 was constructed to the south. In addition, the present-day light industrial structure was constructed to the northwest and present-day residential developed was to the southeast, beyond State Route 91. By 1972, the westernmost north adjoining property was developed with the parking area observed during the site inspection, the western adjoining property beyond Raymond Avenue was developed with the light-industrial structure observed during the site inspection, and the eastern adjoining properties were developed with the two of the three light-industrial structures observed during the site inspection. By 1977, the easternmost north adjoining property was cleared of the previously-identified orchard trees and was vacant. By 1987, the easternmost north adjoining property was developed with the commercial structure observed during the site inspection and a third light-industrial structure was constructed on the southernmost east adjoining property.

## 5.1 Aerial Photographs

Aerial photographs were reviewed to determine information on past land use patterns of the subject Property. These photographs date back to 1938 and were supplied by EDR Aerial Photography. Copies of the EDR provided aerial photographs are included in the appendix. From this search, the following information was gathered:

1938: The majority of the subject Property consists of an orchard. A creek or canal transects the subject Property from east to west. A light-duty roadway is along the southern boundary of the subject Property. All adjoining properties are developed with orchards. A roadway (South Raymond Avenue) is visible to the west. Residential-type structures are visible to the northwest and south.

1947: The subject Property and the adjoining properties are similar to their appearances in the 1938 aerial photograph.

1953: The subject Property and the adjoining properties are similar to their appearances in the 1947 aerial photograph.

1963: The orchard trees have been removed from the western portion of the subject Property and the previously-identified creek or canal on the subject Property is no longer visible. A railroad spur is visible along the northern boundary of the subject Property with a second spur line running north. The westernmost north adjoining property has been cleared of previously-identified orchard trees. The light-industrial structure observed during the site inspection is visible further northwest. The easternmost north and the eastern adjoining properties are occupied by

orchard trees. Undeveloped land followed by State Route 91 is to the south. An unidentified commercial-type structure and residential development are further south. Undeveloped land followed by South Raymond Avenue is to the west, followed by undeveloped land.

1972: The subject Property is developed with the southern, western and eastern portions of the hotel complex observed during the site inspection. Parking areas are visible surrounding this structure. A railroad spur is visible along the northern boundary of the subject Property. The northern parcel of the subject Property is structurally undeveloped. The westernmost north adjoining property has been developed as a parking area. The easternmost north adjoining property is structurally undeveloped orchard land. A light-duty roadway (East Burton Street) is visible along the western and southern boundaries of the subject Property. A multi-lane highway with on/off-ramps (State Route 91) is visible to the south, followed by a commercial structure and residential development. The northernmost east adjoining property is developed with the light-industrial structure observed during the site inspection. The southernmost east adjoining property is developed with the eastern portion of the light-industrial structure observed during the site inspection. The western adjoining property beyond East Burton Street is structurally undeveloped, followed by South Raymond Avenue and further by the light-industrial structure observed during the site inspection. A structure similar to a gas station is located approximately 200 feet northwest beyond South Raymond Avenue.

1977: The subject Property is similar to its appearance in the 1972 aerial photograph with the exception that the northern addition has been added to the present-day hotel complex and the northern parcel is developed as a parking lot and contains an unidentifiable storage-type structure. The adjoining properties are similar to their appearances in the 1972 aerial photograph with the exception that the orchard trees have been removed from the easternmost north adjoining property and an addition is visible on the commercial-type structure on the westernmost south adjoining property beyond State Route 91.

1987: The subject Property is similar to its appearance in the 1977 aerial photograph with the exception that the storage structure previous identified on the northern parcel of the subject Property has been removed. The adjoining properties are similar to their appearances in the 1977 aerial photograph with the exception that the easternmost north adjoining property has been developed with the commercial structure observed during the site inspection and the structure on the southernmost east adjoining property has been expanded to its present-day configuration.

1990: The subject Property is similar to its appearance in the 1977 aerial photograph with the exception that an unidentifiable structure is visible near the northeast corner of the subject Property. The adjoining properties are similar to their appearances in the 1987 aerial photograph.

1995: The subject Property and the adjoining properties are similar to their appearances in the 1990 aerial photograph.

2005: The subject Property is similar to its appearance in the 1995 aerial photograph with the exception that the structure at the northeast corner is no longer visible. The adjoining properties are similar to their appearances in the 1995 aerial photograph.

2009: The subject Property and the adjoining properties are similar to their appearances in the 2005 aerial photograph.

2012: The subject Property and the adjoining properties are similar to their appearances in the 2009 aerial photograph.

2016: The subject Property and the adjoining properties are similar to their appearances in the 2012 aerial photograph. The railroad spur along the northern boundary of the subject Property appears to have been decommissioned since the Allen Avenue railroad grade crossing has been asphalted over.

## 5.2 Building Permits

In an attempt to determine the prior uses and date of initial development of the subject Property, the ADR Assessor obtained permit information on file with the City of Fullerton Community and Economic Development Department website portal. From this search, the following information was obtained:

| Date | Permit/Document Number | Issued To | Description |
|---|---|---|---|
| 1968 | Not identified | G.L. Harbour | Grading permit |
| 6/24/1968 | 79750-A | G.L. Harbour | Building permit for construction of an 84,000 square foot three-story structure used as a hotel |
| 4/7/1969 | Not identified | Holiday Inn | Building permit and inspection report for fire sprinkler system for 21,128 square foot single-story structure |
| 4/9/1969 | 1307 | H.O. Corporation | Certificate of occupancy permit for a hotel |
| 4/14/1969 | Not identified | Holiday Inn | Swimming pool permit |
| 11/12/1973 | Not identified | Hilton Inn | Sewer Permit and inspection record |
| 6/20/1974 | Not identified | Hilton Inn | Electric Permit and inspection record for a new 6-story structure |
| 8/7/1974 | 1807 | H & O Company | Certificate of occupancy permit for addition to hotel |
| 7/3/2002 | BLD02-04726 | Four Points Sheraton | Building permit for a commercial rooftop telephone cabinet for Cingular Wireless |
| 7/3/2002 | ELE02-04441 | Four Points Sheraton | Electrical permit for upgrade to a cell site |

In addition, other documents were contained in the file; however, these permits are not pertinent to this ESA. The permits reviewed contain no information regarding potential environmental impacts to the subject Property. No permits pertaining to significant demolitions, installation of underground storage tanks (USTs), or oil/water separators were located. Copies of the permits and related records obtained from the City of Fullerton Building and Safety Department website portal are included in the appendix.

## 5.3 Fire Insurance Information

The ADR Assessor attempted to review Sanborn Maps for the area of the subject Property. Sanborn Maps are detailed drawings that show the location and use of structures on a given property during specific years. These maps were originally utilized by insurance companies to assess fire risk but are now utilized as a valuable source of historical and environmental risk information. However, no Sanborn Maps were available that covered the subject Property. A copy of the "Certified Sanborn Map Report" provided by EDR indicating that the subject Property is an "unmapped property" is included in the appendix.

## 5.4 City Street Directories

To determine the prior uses and occupants of the subject Property, the ADR Assessor reviewed city directory information provided by EDR which is compiled in *The EDR-City Directory Abstract*. City street directories list property occupants by address, allowing an historical search of tenants on the subject Property and neighboring properties. Selected directories from the years between 1920 and 2014 (in approximate 5-year intervals) were researched and identified the following information:

| Address | Year | Listing |
|---|---|---|
| 1500 South Raymond Avenue (subject Property) | 1920 – 1969 | Address not listed |
| | 1970 | Holiday Inn |
| | 1975 | Hilton Hotels Fullerton Anaheim, Jacks Gourmet Restaurant |
| | 1980 | Griswold's Hotel Fullerton, Room For Hair, Ruby Begonias Restaurant |
| | 1986 | Griswold's Fullerton Anaheim, Room For Hair, Ruby Begonias Restaurant |
| | 1991 | Griswold's Hotels & Convention Center, Lindos Rent A Car, Airtours, Auto Rentals by Lndos |
| | 1994 | Days Inn, Guest Serze System |
| | 1995 | Days Inn, Griswold, Ruby Begonias |
| | 1999 | American Freight Lines, Days Inn, Four Points Sheraton Griswold, Ruby Begonias Restaurant, Valencia Cafe |
| | 2004 | Lake Gregory Community Church, Sheraton Four Points |
| | 2009 | Cingular Wireless, Crowne Plaza Fullerton, Four Points by Sheraton Hotel, Huoyen International Inc. |
| | 2014 | Crowne Plaza Fullerton, Hotel Fullerton, Rudy Begonias Restaurant |
| 1424 South Raymond Avenue (westernmost north adjoining property) | 1920 – 1959 | Address not listed |
| | 1960 | St. Regis Paper |
| | 1965 | Saint Regis Paper Co. |
| | 1970 | Hoerner Waldorf Corp. of Calif. |
| | 1980 | Hoerner Waldorf Champion International |
| | 1981 - 2003 | Address not listed |
| | 2004 | Occupant unknown |
| | 2014 | Address not listed |
| 1421 S. Manhattan Avenue (easternmost north adjoining property) | 1920 – 1985 | Address not listed |
| | 1986 | Fullerton |
| | 1991 | Hewlett Packard Company |
| | 1995 | Sales and Support Offices, Hewlett Packard Company |
| | 1999 | Hewlett Packard Company |
| | 2004 | Super Saver, Sav On Pharmacy |
| | 2009 | Sav On Pharmacy, New Albertsons Inc., QTVIP Catering, Dean Foods |
| | 2014 | Albertsons |

| Address | Year | Listing |
|---|---|---|
| 1451 S. Manhattan Avenue (northernmost east adjoining property) | 1920 – 1974<br>1975<br>1980<br>1995 - 1999<br>2004 - 2009<br>2014 | Address not listed<br>April Company, Strange Co.<br>Strange Co. spices, April Company<br>Gold Coast Sportswear<br>Cook Equipment of Orange Co. Inc., occupant unknown<br>Ware Disposal |
| 1225 East Burton Street (southernmost east adjoining property) | 1920<br>1922 – 1950<br>1951 - 2008<br>2009<br>2014 | Address not listed<br>Residential occupants*<br>Address not listed<br>Door Tech Industries<br>New Wind USA |
| 1251 East Burton Street (southernmost east adjoining property) | 1920 – 1985<br>1986<br>2004<br>2009 - 2014 | Address not listed<br>Holiday Cups, Inc.<br>Occupant unknown<br>Sundog International Inc. |
| 1415 North Raymond Avenue (western adjoining property) | 1920 – 1993<br>1994<br><br>1999<br>2004<br>2009<br><br>2014 | Address not listed<br>Naturipe Berry Grow, International Food & Beverage, Packers Cold Storage, Lassen County Nursery Inc.<br>Salvation Army North County<br>Saputo Cheese USA Inc., CS Integrated LLC<br>Versacold Logistics LLC, Saputo Cheese USA Inc., Dannon Co. Inc, P&O Cold Logistics, CS Integrated<br>Versacold, Americold, P&O Cold Logistics |

* These entries likely are erroneous as this property was not yet structurally developed.

A copy of *The EDR-City Directory Abstract* is contained in the appendix.

### 5.5 Interviews

According to Mr. Yang, familiar with the subject Property since 1995, the hotel buildings located on the subject Property totals approximately 133,000 square feet and were constructed in 1967 and 1974. Mr. Yang was unaware of any adverse environmental conditions associated with the subject Property including chemical or hazardous materials spills or active underground storage tanks.

### 5.6 Assessors Tax Records

To determine the prior uses of the subject Property, the ADR Assessor reviewed available records from the Orange County Assessor's Office. Tax assessment records typically identify adjustments in property tax, which possibly indicate property development, or contain records of building permits or other useful information regarding a property. No structural development information was provided.

### 5.7 Historical Topographic Maps

ADR reviewed historical topographic maps provided in the EDR Historical Topo Map Report. From this review, the following pertinent information was obtained. A copy of the EDR Historical Topo Map Report is included in the appendix.

| Year(s) | Issues Noted | Subject Property | Adjoining Properties |
|---|---|---|---|
| 1896, 1898, 1901, and 1902 | No | Structurally undeveloped | Structurally undeveloped with a roadway and residential-type structures north and west of the subject Property |
| 1935 | No | Structurally undeveloped; Carbon Creek transects the subject Property | Structurally undeveloped with the exception of residential-type structures to the northwest, west, and southwest along a medium-duty roadway (South Raymond Avenue); a light-duty roadway is to the immediate south of the subject Property. |
| 1942 | No | Structurally undeveloped; Carbon Creek transects the subject Property | Structurally undeveloped with the exception of residential-type structures to the west and east; a medium-duty roadway is to the immediate north of the subject Property [erroneously marked]. |
| 1949 | No | Structurally undeveloped; Carbon Creek transects the subject Property | Structurally undeveloped with the exception of residential-type structures to the northwest, west, and southwest along a medium-duty roadway (South Raymond Avenue); a light-duty roadway is to the immediate south of the subject Property. |
| 1950 | No | Structurally undeveloped; Carbon Creek transects the subject Property | Structurally undeveloped with the exception of residential-type structures to the northwest, west, and southwest along a medium-duty roadway (South Raymond Avenue); a light-duty roadway is to the immediate south of the subject Property. |
| 1965 | No | Orchard land | A railroad spur line is along the northern boundary; the present-day light-industrial structure is to the northwest; State Route 91 to the immediate south; orchard land to the east; Undeveloped land is to the west beyond South Raymond Avenue |
| 1972 | No | The northern parcel identified as orchard land; the southern parcel developed with a portion of the present-day hotel structure | Same as 1965 with the addition of the present-day light-industrial structures to the east |
| 1981 | No | The southern parcel developed with the present-day hotel structure | Same as 1972 with the addition of the light-industrial structure to the west and the elimination of orchard land to the northeast |
| 2012 | No | Structurally developments not detailed on this map | Structurally development not detailed on this map; a light-duty roadway (Burton Street) is to the immediately south of the subject Property |
| 2015 | No | Structurally developments not detailed on this map | Structurally development not detailed on this map; a light-duty roadway (East Burton Street) is to the immediately south of the subject Property |
| 2018 | No | Structurally developments not detailed on this map | Same as 2015 |

## 5.8 Recorded Land Title Records

Recorded land titles are records usually maintained by the municipal clerk or county recorder of deeds which detail ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against the subject Property in the local jurisdiction having control for or reporting responsibility to the subject Property. Due to state land trust regulations and laws, land title records will often only provide trust names, bank trust numbers, owner's names, or easement holders, and not information concerning previous uses or occupants of the subject Property. For these reasons, this ESA has relied upon other standard historical information sources assumed to be either more accurate or informative than recorded land titles.

# 6 INFORMATION FROM SITE RECONNAISSANCE AND INTERVIEWS

## 6.1 Hazardous Materials Handling and Storage

At the time of the site inspection, hazardous materials stored at the subject Property included approximately two 5-gallon containers containing chlorine and two 5-gallon containers containing muriatic acid, both used in swimming pool maintenance activities. No significant staining or evidence of improper material handling was observed in the area where these materials are stored. No access was provided to the cell tower mechanical room to inspect the batteries associated with this operation. Other hazardous materials on site were limited to small amounts of cleaners, office supplies such as toner cartridges, small amounts of janitorial products used for cleaning the facility. These materials are stored in quantities that are unlikely to represent an environmental concern to the subject Property. The grounds of the subject Property appeared free of staining or evidence of poor material handling procedures.

## 6.2 Wastestream Processing and Disposal

No improper wastestream processing or disposal practices were observed on the subject Property. No unidentified suspect containers that might be used for the storage or disposal of hazardous materials or regulated substances were observed. No signs of improper material disposal were observed at the subject Property.

One approximately 35-gallon metal container of waste cooking grease was observed in the restaurant work area on the subject Property. According to information provided by the site contact, this container is owned and serviced by Baker Commodities, a local tallow company. No significant stains were observed in the vicinity of this container at the time of the site inspection.

## 6.3 Wastewater and Stormwater Discharges

Interior wastewater at the subject Property structures is limited to effluent from the hotel restrooms and restaurant fixtures and floor drains in the restaurant food prep areas. This wastewater flows into the municipal sanitary sewer system. At the time of the site visit, no spills or staining were observed in the interior portions of the buildings. No subsurface wastewater features were observed in the subject Property structures.

Three exterior surface drains were observed on the subject Property. The pavement where these surface drains are located was designed to direct surface water run-off into the drains. Collected surface water then flows into the municipal stormwater sewer system. These stormwater drains were inspected and appeared to be in good visible condition, with no staining observed around their perimeter or interior. Stormwater drainage is also expected to flow onto the adjoining surface street. No catch basins, clarifiers, or drip pads were observed. In addition, there was no evidence observed of major spills around gutters or downspouts.

## 6.4 Local/State Waste Disposal Compliance

At the time of the site visit, the subject Property appeared to comply with local and state waste disposal regulations.

## 6.5 Storage Tanks

### 6.5.1 Aboveground Storage Tanks (ASTs)

No ASTs or evidence of past ASTs was observed on the subject Property at the time of the site inspection.

### 6.5.2 Underground Storage Tanks (USTs)

During the site inspection, no evidence of USTs was noted on the subject Property. In particular, the Assessor searched for: fill pipes, vent pipes, areas of abnormal or heavy staining, manways, manholes, access covers, concrete pads not homogeneous with surrounding surfaces, concrete build-up areas potentially indicating pump islands, abandoned pumping equipment, or fuel pumps. In addition, the ADR Assessor contacted the City of Glendale, the City of Fullerton Fire Department (FFD) and Regional Water Quality Control Board (RWQCB) and searched the RWQCB's online *GeoTracker* website to determine whether USTs have been reported at the subject Property. These agencies responded and indicated they have no such records pertaining to the subject Property. In addition, the subject Property is not identified in the *GeoTracker* database.

## 6.6 Indications of Polychlorinated Biphenyls (PCBs)

### 6.6.1 PCB-Containing Exterior Electrical Transformers

At the time of the site inspection, one pad-mounted electrical transformer was observed on the subject Property. This transformer appeared to be in good condition, showing no signs of damage or past leakage. Based on the age of construction of the structures on the subject Property (pre-1978), this transformer may contain PCBs. Historically, Southern California Edison has assumed responsibility for the cleanup of contamination that has arisen from a leak or release of the dielectric fluid from their equipment.

### 6.6.2 PCB-Containing Fluorescent Light Fixture Ballasts

Fluorescent light fixtures were observed on the subject Property. Based upon the age of the structures observed on the subject Property (pre-1978), it is possible that the ballasts inside the light fixtures contained PCBs. If these ballasts were found to be leaking, require replacement, or are subject to disposal, it would be prudent to identify their chemical content.

### 6.6.3 PCB-Containing Interior Capacitors, Equipment, or Electrical Transformers

Two hydraulically-operated passenger elevators each with an approximately 100-gallon capacity hydraulic oil system, are located in the hotel room tower structure on the subject Property. According to Mr. Macario Rosas, Maintenance Supervisor/The Fullerton Hotel Anaheim, these elevators are regularly serviced by the Amtech Elevator Service Company. No evidence of releases was observed in the elevator equipment rooms. In addition, it should be noted that the casings for the elevator pistons is above the groundwater table and there is a low potential for the casings to release hydraulic oil to the subsurface. Further, hydraulic elevators are required to be inspected quarterly and "full load" tests are required to be performed every five years. Since the elevators are

operating, is likely to have had their required inspections since construction, and there is no evidence that there has been a casing replacement at the subject Property, it is unlikely these hydraulic systems have released oil to the subsurface. However, based on the age of construction of the building (pre-1978), it is possible that the elevator hydraulic fluid contains or has previously contained PCBs.

## 6.7 Solid Waste Disposal

At the time of the inspection, three municipal waste dumpsters were observed on the subject Property. According to stenciled information on these dumpsters, the dumpsters are owned and serviced by Waste Management. At the time of the site inspection, these dumpsters were filled with recyclable materials and municipal trash and appeared to comply with local and state solid waste disposal regulations. At the time of the inspection, an inspection of the ground surface around these units was conducted to search for evidence of chemical or liquid waste staining or improper disposal; however, none was observed.

## 6.8 Other Conditions of Potential Concern

### 6.8.1 Lead-Based Paint

Based upon the age (pre-1978) of the buildings observed on the subject Property, it is possible that painted building surfaces contain lead-based paint. No peeling, chipping, flaking or other failure or damage to these materials was observed during the site inspection. Pursuant to federal and state regulations, all suspect lead-based paint should either be presumed to contain lead or adequate rebuttal sampling should be conducted prior to renovation, including maintenance, or demolition if these activities will cause a disturbance of any suspect lead-based paint or otherwise create a lead hazard.

### 6.8.2 Air Quality: Indoor and Visible Emissions

No unusual smells, noxious odors, or visual emissions were observed during the inspection of the subject Property.

### 6.8.3 Radon

According to the US Environmental Protection Agency, the county in which the subject Property is located has a Radon Zone Level of 3, which has a predicted average indoor screening level of less than 2.0 picocuries per liter (pCi/L). This level is below the EPA response level of 4.0 pCi/L. The subject Property exhibited an unlikely potential for radon contamination based upon the geological characteristics of the area and subject Property buildings construction (concrete slab-on-grade floors).

### 6.8.4 Limited Mold Evaluation

During on-site observations, a limited mold evaluation was conducted to identify mold growth in the buildings on the subject Property. This evaluation concentrated on the identification of readily visible mold growth and areas of water intrusion that may present optimal conditions for mold growth. No areas of significant water intrusion were observed. Based on these observations, no suspect mold growth was observed in the structures on the subject Property.

### 6.8.5 Railroad Right-of-Way

No railroad right-of-way, spurs, or other railroad-related features were observed or identified on the subject Property during the site inspection.

### 6.8.6 Underground Pipelines

No indicators or evidence of underground petroleum pipelines were observed on the subject Property during the site inspection.

### 6.8.7 Wetlands

Wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plants and animal communities living in the soil and on its surface. Wetlands can be further defined through classification according to the length of time that an area is inundated or saturated by water, and the type of plants and animals an area supports. There are five major wetland classifications: marine, estuarine, lacustrine, riverine, and palustrine. Marine and estuarine wetlands are associated with the ocean and include coastal wetlands, such as tidal marshes. Lacustrine wetlands are associated with lakes, while riverine wetlands are found along rivers and streams. Palustrine wetlands may be isolated or connected wet areas and include marshes, swamps, vernal pools, and bogs. At the time of the site inspection, no visual or physical indicators of wetlands were observed on the subject Property.

### 6.8.8 Agricultural Usage

ADR's historical review revealed that the subject Property and surrounding properties were utilized as farmland from at least 1938 until sometime between 1963 and 1972. The agricultural industry currently utilizes non-persistent pesticides and herbicides, but it is possible that the more persistent pesticides (such as DDT) were historically used on the subject Property.

It has been ADR's experience that low levels of persistent pesticides are sometimes detected in former agricultural areas; however, these levels are generally below levels of regulatory concern and are often further diminished during grading activities. Since the subject Property has been developed with the current light-industrial structure and asphalt parking areas, ADR concludes that the former agricultural use of the subject Property is unlikely to represent an environmental concern because the length of time since active cultivation makes pesticide degradation likely, and because pesticides in soil at the subject Property (if any) would have been significantly diluted based on the earth movement activities performed in connection with historical site development activities. Therefore, the historical presence of agricultural use at the subject Property does not represent an environmental concern or a human health risk, and ADR recommends no further investigation.

# 7 CURRENT USES OF ADJOINING PROPERTIES

For the scope of this ESA, properties are defined and categorized based upon their physical proximity to the subject Property. An adjoining property is any real property whose border is contiguous or partially contiguous with the subject Property or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream. A neighboring property is any real property located within 0.25 mile of the subject Property's border.

## 7.1 Adjoining and Neighboring Properties - General Description

At the time of the site inspection, the general area surrounding the subject Property was occupied by light-industrial, commercial and residential properties. The subject Property is bordered by the following:

North: immediately by an abandoned railroad spur line, then by, from west to east, a light-industrial building and storage yard (1424 South Raymond Avenue) occupied by South Coast Transport and a commercial building (1421 Manhattan Avenue) occupied by Albertsons corporate offices, and further by additional light-industrial and commercial development.

South: immediately by East Burton Street, then by State Route 91, and further by, from west to east, the Anaheim First Church of the Nazarene (1340 North Candlewood Street) and residential development.

East: immediately by, from north to south, a light-industrial building (1451 Manhattan Avenue) occupied by Ware Disposal, then by a light-industrial structure (1225 East Burton Street) occupied by West State Billiards and a light-industrial structure (1251 East Burton Street) occupied by Sun Apparel) and further by Manhattan Avenue and additional industrial and commercial development.

West: immediately by Burton Street, then by an undeveloped parcel, then by South Raymond Avenue, and further by a light-industrial building (1415 North Raymond Avenue) occupied by Americold Logistics.

## 7.2 Adjoining and Neighboring Properties Materials Storage

No unusual or suspicious materials handling or storage practices were observed on the publicly accessible portions of the adjoining and neighboring properties. The adjoining properties and neighboring properties are unlikely to utilize/store hazardous materials in noteworthy quantities, although the adjoining properties appear to store routine office and cleaning materials in quantities that are unlikely to represent an environmental concern to the subject Property.

## 7.3 Adjoining and Neighboring Properties Wastestream Disposal

No unusual or suspicious wastestream disposal activities were observed on the adjoining and neighboring properties. A cursory inspection of the adjoining properties did not reveal any improper disposal practices at the sites.

## 7.4 Railroad Right-of-Way

An abandoned railroad spur is located along the northern boundary of the subject Property. No evidence of this siding was observed during the ADR site inspection. This siding was constructed sometime between 1953 and 1963 and removed sometime between 1987 and 1990. There are potential environmental risks associated with railroad rights-of-way. These risks include the use of pesticides, herbicides, and rodenticides to maintain the tracks, potential spills of transported substances, and the use of creosote in the railroad ties. At the time of the site visit, an inspection was performed on the railroad siding to look for signs of improper chemical or liquid waste staining that could potentially impact the subject Property; however, no improper staining was observed. Therefore, ADR recommends no further action or investigation at this time.

# 8 RECORDS REVIEW

## 8.1 Standard Environmental Records Sources

ADR states that all databases reviewed as part of this ESA were determined to be sufficiently complete and sufficiently current to serve as the basis for ADR's opinions expressed. The subject Property is listed on the HWTS database reviewed by EDR. Refer to the respective sub-section of section 8.1.2 for information regarding this listing. A detailed listing and a map showing all sites supplied by EDR are included in the appendix.

### 8.1.1 Review of Federally Reported Environmental Data

Results of the federal regulatory records search follow. Each section begins with a description of the database searched and the agency that compiles it.

**National Priorities List (NPL) of Superfund Sites:**

The NPL is the EPA's database of over 1,200 hazardous waste sites currently identified and targeted for priority cleanup action under the Superfund Program. A search of the 2022 Environmental Protection Agency (EPA) National Priorities List identified one (1) Superfund site within the 1.0-mile database search range. The subject Property is located within the Orange County North Basin (OCNB) Superfund site. This area contains a comingled groundwater plume of chlorinated solvents (contaminated with PCE, trichloroethene (TCE), 1,1-dichloroethene (1,1-DCE), and 1,4-dioxane) covering approximately five square miles beneath parts of the cities of Anaheim, Fullerton and Placentia. Those solvents were widely used in a number of industries including aerospace and defense manufacturing, machinery degreasing, dry cleaning, and metal plating. Some contaminants currently affecting the basin's water supply can be traced as far back as the 1940s, when chemical waste disposal was unregulated throughout the Valley. In 2014 and 2015, several state and local agencies asked that EPA commit resources to help clean up the area of groundwater contamination in northern Orange County. The California Department of Toxic Substances Control and the RWQCB continue to actively initiate and oversee facility-led investigation and remediation of surface contamination (soil and shallow groundwater) at several of the facilities identified as responsible parties as possible contributors to the plume. The area of concern for this NPL site includes groundwater beneath the subject Property. Due to the reported depth to groundwater in the area of the subject Property (ranging between 56 and 66 feet below ground surface) it is unlikely that vapor intrusion is occurring on the subject Property. In addition, since the storage and/or usage of the identified contaminants have not been reported on the subject Property, it is unlikely that the owner(s) of the subject Property would be required to participate in any future investigation or clean-up efforts.

**Superfund Enterprise Management System (SEMS):**

The SEMS list tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities in support of the EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed SEMS by the EPA in 2016. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 1003 of the Comprehensive Environmental Response,

Compensation and Liability Act (CERCLA). This dataset also contains sites that are either proposed to or on the NPL and the sites that are in the screening and assessment phase for possible inclusion on the NPL. A search of the 2022 SEMS database identified five (5) sites within the 0.5-mile database search range. It is unlikely that that these sites represent an environmental concern to the subject Property based on their distance (>0.21) from the subject Property, their down- or cross-gradient location with respect to groundwater flow direction, and/or regulatory status (under agency guidance).

**Superfund Enterprise Management Systems Archive (SEMS-Archive):**

SEMS-Archive tracks sites that, based on available information, have no further interest under the Federal Superfund Program. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS-Archive by the EPA in 2016. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the NPL unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site. A search of the 2022 SEMS-Archive database identified two (2) sites within the 0.5-mile database search range. It is unlikely that these sites represent an environmental concern to the subject Property based on their distance (>395 feet) from the subject Property, their cross- or down-gradient location with respect to groundwater flow direction, and/or their regulatory status (archived).

**Emergency Response Notification System (ERNS):**

The ERNS database is the historical record of all reported releases of oil and other hazardous substances. A search of the 2021 ERNS database did not identify the subject Property.

**Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposals (TSD) Facilities:**

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA-TSD facilities database is the composite of reporting facilities that store, transport, treat, or dispose of controlled or hazardous waste. Identification on this list does not indicate that a site has impacted the environment. A search of the 2021 RCRA-TSD facilities database identified two (2) sites within the 0.5-mile database search range. It is unlikely that these sites represent an environmental concern to the subject Property due to their distance (>0.14 miles) from the subject Property, their cross- or down-gradient locations with respect to groundwater flow direction, and/or their regulatory status (under regulatory guidance).

**Resource Conservation and Recovery Act (RCRA) Facilities:**

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA facilities database is the composite of reporting facilities that generate hazardous waste. Identification on this list does not indicate that a site has impacted the environment. A search of the 2021 RCRA facilities database identified one (1) large quantity generator site, fifteen (15) small quantity generator sites including the northernmost east adjoining property (Golden Coast Sportswear (2x) at 1451 South Manhattan Avenue), two (2) very small quantity generator sites including the easternmost north adjoining property (Albertsons 6769 at 1421 South Manhattan Avenue), and thirty-one (31) former generator sites including the easternmost south adjoining property (Screen Printers Resolutions at 1251 Burton Street), the northernmost east adjoining property (Cook Equipment Company and Ware Disposal Inc. at 1451 Manhattan Avenue), the westernmost north adjoining property (Stone Container Corp. and South Coast Trans Dist Inc. dba Western Regional at 1424 South Raymond Avenue), and the western adjoining property (Americold Logistics at 1415 North Raymond Avenue) within the 0.25-mile database search range.

According to information provided by EDR, no violations are on record for Golden Coast Sportswear, Albertsons 6769, Screen Printers Resolutions, Cook Equipment Company, Ware Disposal Inc., Stone Container Corp. and South Coast Trans Dist Inc. dba Western Regional. Based on their regulatory status (no violations and not identified on a database that indicates an adverse impact to the environment), it is unlikely that these adjoining property listings represent an environmental concern to the subject Property.

It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>260 feet) from the subject Property, their regulatory status (no violations and/or not identified on a database that indicates an adverse impact to the environment and/or no longer generating hazardous waste) and/or their cross- or down-gradient location with respect to groundwater flow direction.

**RCRA Corrective Action (RCRA-CA) Sites:**

The RCRA-CA (CORRACTS database) report contains information pertaining to facilities that have conducted, or are currently conducting, corrective actions as regulated by the Resource Conservation and Recovery Act. A search of the 2021 RCRA-CA list identified four (4) sites within the 1.0-mile database search range. It is unlikely that that these sites represent an environmental concern to the subject Property due to their distance (>0.47 miles) from the subject Property, their regulatory status (no violations and/or not identified on a database that indicates an adverse impact to the environment and/or under regulatory guidance) and/or their cross- or down-gradient location with respect to groundwater flow direction.

**2020 Corrective Action Universe (2020 CORR ACTION):**

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 CORR ACTION universe includes a wide variety of sites: sites that are heavily contaminated, sites that were contaminated but have been cleaned up, sites that are not yet fully investigated, and

sites that may require little or no remediation. A search of the 2017 "2020 CORR ACTION" database identified no sites within the 0.25-mile database search range.

**Facility Index System (FINDS) Report:**

The FINDS Report is a computerized inventory of all facilities that are regulated or tracked by the U.S. Environmental Protection Agency. These facilities are assigned a unique identification number that serves as a cross-reference for databases in the EPA's program system. A search of the 2021 FINDS database did not identify the subject Property.

**Enforcement and Compliance History Information Database (ECHO):**

The EPA's ECHO system incorporates data from the Facility Registry Service (FRS) to link records representing data about the same facility across different programmatic database systems. ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. Identification on this database does not indicate that a site has impacted the environment. A search of the 2021 ECHO database did not identify the subject Property.

**Integrated Compliance Information System (ICIS):**

The ICIS system supports the information needs of the national enforcement and compliance system as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program. A search of the 2006 ICIS database did not identify the subject Property.

**Risk Management Plans (RMP):**

When Congress passed the Clean Air Act Amendments of 1980, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule was written to implement Section 112 (r) of these amendments. The rule requires companies of all sizes that use certain flammable and toxic substances to develop RMPs. A search of the 2021 RMP database did not identify the subject Property.

### 8.1.2 Review of California Reported Environmental Data

Results of the California regulatory records search follow. Each section begins with a description of the database searched and the state agency that compiles it.

**Hist CalSites Database:**

The Historic CalSites database contains potential or confirmed hazardous substance release properties and includes the former ASPIS (Abandoned Sites Program Information System) database. This database was created since the Department of Toxic Substances and Control (DTSC) no longer updates the CalSites database. A search of the 2005 Hist CalSites database identified no sites within the 1.0-mile database search range.

**Response Database (Response):**

The Response database identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk sites. A search of the 2021 Response database identified nine (9) sites within the 1.0-mile database search range. It is unlikely that these sites represent an environmental concern to the subject Property due to their distance (>0.23 miles) from the subject Property, their cross- or down-gradient locations with respect to groundwater flow direction, and/or their regulatory status (under regulatory guidance).

**EnviroStor Database:**

The DTSC's Site Mitigation and Brownfields Reuse Program's (SMBRP's) *EnviroStor* database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including military facilities, and State Superfund; Voluntary Clean-up sites; and school sites. *EnviroStor* provides similar information to the information that was available in CalSites, and provides additional site information including, but not limited to, identification of formerly contaminated properties that have been released for re-use, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. A search of the 2021 *EnviroStor* Database identified fifty-six (56) sites including the regional OCNB Superfund site. Refer to the NPL sub-section above for discussion of the OCNB Superfund site.

It is unlikely the remaining sites represent an environmental concern to the subject Property due to their distance (>400 feet) from the subject Property, their cross- or down-gradient locations with respect to groundwater flow direction, and/or their regulatory status (no action required, no further action).

**California Bond Expenditure Plan (BEP):**

The BEP database identifies sites for which a site-specific expenditure plan has been prepared as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. A search of the 1989 BEP database identified no sites within the 1.0-mile database search range.

**Leaking Underground Storage Tanks (LUSTs):**

The California Water Resources Control Board, in cooperation with the Office of Emergency Services, maintains an inventory of LUSTs in a statewide database. A search of the 2021 LUST database identified forty (40) reported LUST sites including the westernmost north adjoining property (Stone Container Corp. at 1424 South Raymond Avenue) within the 0.5-mile database search range. According to information provided by EDR, the majority of the other sites have received case closure including the Stone Container Corp. site. According to information obtained from the *GeoTracker* website, seven underground storage tanks were removed from the Stone Container Corp. site in 1987 under oversight by the Orange County Health Care Agency where no groundwater was encountered. Low levels of total petroleum hydrocarbons (TPH) as diesel were detected in confirmation soil samples. In August

2008, borings were advanced to a depth of 30 feet bgs to delineate any remaining petroleum contamination. This assessment showed TPH as oil isolated to one of the removed USTs and low levels of TPH as diesel. Based on this information, the site received case closure in November 2008. The case closure information for this site is included in the appendix. It is unlikely that this site represents an environmental concern to the subject Property due to its regulatory status (case closed).

It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>120 feet) from the subject Property, regulatory status (case closed, under regulatory guidance), and/or their down- or cross-gradient locations with respect to groundwater flow.

**Cortese Database:**

The Cortese list contains hazardous waste and substance sites compiled pursuant to Assembly Bill 3750 (Cortese, Chapter 1048, Statutes of 1986). The information included in this list comes from the State Department of Health Services (public drinking water wells with detectable levels of contamination; hazardous substance sites selected for remedial action; historic Cortese sites; and sites with known toxic material identified through the abandoned site assessment program). This includes the State Water Resources Control Board (sites with known USTs having a reportable release), and the California Waste Management Board (solid waste disposal facilities from which there is a known migration). A search of the 2001 Historic Cortese database and the 2021 Cortese database identified thirty-four (34) sites including the westernmost north adjoining property (Stone Container Corp. at 1424 South Raymond Avenue) within the 0.5-mile database search range. Several of these listings are redundant. Refer to the LUST subsection above for discussion of the Stone Container Corp. site). According to information provided by EDR, the majority of the other sites have received case closure. It is unlikely that these sites represent an environmental concern to the subject Property due to their distance (>120 feet) from the subject Property, regulatory status (case closed, under regulatory guidance), and/or their down- or cross-gradient locations with respect to groundwater flow.

**Solid Waste Facilities/Landfill Database (SWF/LF):**

Solid Waste Facilities/Landfill Database (SWF/LF) records comprise an inventory of solid waste disposal facilities or landfills. A search of the 2021 SWF/LF database identified one (1) site within the 0.5-mile database search range. This site is the northernmost east adjoining property, Cook Equipment Company at 1451 Manhattan Avenue. It is unlikely that this site represents an environmental concern to the subject Property due to its regulatory status (under regulatory guidance), and its cross-gradient location with respect to groundwater flow.

**Solid Waste Assessment Test Database (SWAT):**

The SWAT database comprises an inventory of landfills investigated for potential groundwater impacts. A search of the 2000 SWAT database identified no sites within the 0.5-mile database search range.

**Aboveground Storage Tanks (ASTs):**

The AST database is a listing of aboveground storage tank petroleum storage tank locations maintained by the California Environmental Protection Agency. A search of the 2016 AST database did not identify the subject Property.

**Underground Storage Tanks (USTs):**

USTs are regulated under Subtitle I of the RCRA and must be registered with the state of California. These are registered USTs only, and identification on this list does not indicate that the site has impacted the environment. A search of the 2021 California State Water Resources Control Board (SWRCB), the 1994 California Environmental Protection Agency UST, 1994 SWEEPS UST, and the 1990 SWRCB historical UST databases identified forty-seven (47) sites including the westernmost north adjoining property (Stone Container Corp./Champion Packaging at 1424 South Raymond Avenue) and the easternmost north adjoining property (Albertsons/Hewlett Packard 6769 at 1421 South Manhattan Avenue) within the 0.25-mile database search range. Several of these listings are redundant. According to the EDR Radius Report, the USTs located on the Stone Container Corp. property were removed in 1987 and two USTs exist on the Albertsons/Hewlett Packard site. No releases are on record for the USTs on the Albertsons/Hewlett Packard property. Based on their regulatory status (case closed, no releases known), it is unlikely the northern adjoining property listings represent an environmental concern to the subject Property. It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>120 feet) from the subject Property, regulatory status (no release reported), and/or their down- or cross-gradient locations with respect to groundwater flow.

**Waste Discharger System (WDS) Report:**

The WDS report contains information for all regulated wastewater and hazardous waste discharges to public waterways, groundwater or sewer systems in California. Identification on this list does not necessarily indicate that a site has impacted the environment. A search of the 2007 WDS database did not identify the subject Property.

**Cleanup Program Sites Spills, Leaks, Investigations and Cleanups (CPS-SLIC) Database:**

The CPS-SLIC database is maintained by the State Water Resources Control Board and contains information for all reported hazardous material/waste surface or groundwater contamination investigations in California. A search of the 2021 CPS-SLIC database identified nine (9) CPS-SLIC sites including the regional OCNB Superfund site within the 0.5-mile database search range. Refer to the NPL sub-section above for discussion of the OCNB Superfund site. It is unlikely the remaining sites represent an environmental concern to the subject Property due to their distance (>0.24 miles) from the subject Property, their cross-or down-gradient locations with respect to groundwater flow, and/or their regulatory status (case closed).

**Facility and Manifest Data (HAZNET):**

The HAZNET database is information extracted from the copies of hazardous waste manifests received each year by the DTSC. Inclusion on this list identifies a site as a likely generator of hazardous waste. However, identification on this list does not indicate that a site has impacted the environment. A search of the 2019 HAZNET database did not identify the subject Property.

**Hazardous Waste Tracking System (HWTS):**

The HWTS is the DTSC's data repository for hazardous waste Identification (ID) numbers and manifest information. HWTS generates reports on hazardous waste shipments for generators, transporters, and TSDFs. Inclusion on this list identifies a site as a likely generator of hazardous waste. However, identification on this list does not indicate that a site has impacted the environment. A search of the 2021 HWTS database identified the subject Property, specifically Huoyen International.

In addition, ADR also reviewed the online HWTS database. Information obtained from the online HWTS is summarized in the table below.

| Name and Address | Generator No. | Additional Information |
|---|---|---|
| Huoyen International<br>1500 S. Raymond Avenue | CAC002849772 | The generator number was entered into the HWTS in February 2016 and was inactive by May 2016. No details of the wastes generated were provided. |

Since these waste materials were properly removed from the site, generated in a time of heightened environmental awareness, were one-time events, no release related violations have been reported, and/or no significant staining or other evidence of improper waste handling procedures was observed, it is unlikely this former generator represents a significant environmental concern to the subject Property. A copy of the EPA ID Profile report obtained from the DTSC HWTS database is included in the appendix.

**Cleaners:**

The Department of Toxic Substances Control maintains a list of dry cleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaning agents; linen supply; coin-operated laundries and cleaning; dry cleaning plants, except rugs; carpet and upholstery cleaning; industrial launderers; laundry and garment services. A search of the 2021 Cleaners database did not identify the subject Property.

**California Hazardous Material Incident Reporting System (CHMIRS):**

CHMIRS contains information on reported hazardous material incidents (accidental releases or spills). A search of the 2021 CHMIRS database did not identify the subject Property.

**Voluntary Cleanup Sites Database (VCP):**

The VCP database identifies sites with either confirmed or unconfirmed releases and the project proponents have requested the DTSC oversee investigation and/or cleanup activities, and have agreed to pay the DTSC's costs. A search of the 2021 VCP database identified no sites within the 0.5-mile database search range.

**National Pollutant Discharge Elimination System (NPDES):**

The NPDES database contains information regarding NPDES permits, including stormwater permits, issued by the California State Water Resources Control Board (SWRCB). A search of the 2021 NPDES database did not identify the subject Property.

**California Integrated Water Quality System (CIWQS):**

The CIWQS database is a computer-based system maintained by the Regional Water Quality Control Board (RWQCB) that tracks information about places of environmental interest, manages permits and other orders, tracks inspections, and manages violations and enforcement activities. A search of the 2021 CIWQS database did not identify the subject Property.

**CERS Database:**

The CERS database is maintained by the California Environmental Protection Agency (CalEPA) and combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. A search of the 2021 CERS database did not identify the subject Property.

**CERS Hazardous Waste (CERS HAZ WASTE) Database:**

The CERS HAZ WASTE database is maintained by the California Environmental Protection Agency (CalEPA) and tracks sites that fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA Large Quantity Hazardous Waste Generator programs. A search of the 2021 CERS HAZ WASTE database did not identify the subject Property.

**Emissions Inventory (EMI):**

The EMI database contains information for all reported air quality related emissions in California. A search of the 2019 EMI database did not identify the subject Property.

### 8.1.3 County/Local Agency Records Search

Following is a discussion of records searches performed or personal/telephone contacts made with the appropriate local government agencies for environmental issues, relative to the subject Property.

**Orange County Health Care Agency, Environmental Health (OCHCA):**

The ADR Assessor contacted the OCHCA in an effort to determine whether any responses to incidents involving the spill or release of hazardous materials or whether any USTs had been reported at the subject Property. According to Ms. Suzanne Peralta, OCHCA point of contact, the OCHCA has no records for the subject Property address. The OCHCA responded and stated that the City of Fullerton Fire Department is the repository for environmental documents.

**City of Fullerton Fire Department (FFD):**

The ADR Assessor contacted the FFD in an effort to determine whether USTs, hazardous material storage/usage, and/or responses to incidents involving spills or releases have been reported at the subject Property address. According to Ms. Mea Klein with the City of Fullerton Clerks Office, no site clean-up, chemical inventory hazardous materials, USTs or AST records were found for the subject Property address. Information provided by the FFD consisted mainly of fire safety issues including fire sprinkler and alarm documents, fire code permits and life safety documents. Environmental information provided by the FFD consisted of the following:

- An October 26, 2009, "Facility Information Business Activities" documents for the on-site cell tower indicated that approximately 21 gallons of electrolyte gel used in batteries and 852 pounds of lead are associated with the cell tower operations.

Documents obtained from the FFD are included in the appendix.

**Regional Water Quality Control Board (RWQCB):**

The ADR Assessor contacted the RWQCB and searched the on-line *GeoTracker* database in an effort to determine if USTs/LUSTs or hazardous material incidents have been reported at the subject Property address. According to a response from the RWQCB, no records were found for the subject Property address. The subject Property is not identified on the *GeoTracker* database.

**California Department of Toxic Substances Control (DTSC):**

The ADR Assessor submitted a public records request to the DTSC and searched the DTSC's on-line *EnviroStor* database in an effort to determine whether spills, cleanup actions, or other hazardous material incidents have been reported at the subject Property address. According to Ms. Julie Johnson with the DTSC, no records were found for the subject Property address. In addition, the subject Property was not identified on the *EnviroStor* database.

**Stormwater Multiple Application and Report Tracking System (SMARTS):**

The ADR Assessor searched the State Water Resources Control Board's SMARTS database in an effort to determine whether stormwater permits had been obtained for the subject Property. The subject Property is not identified on the SMARTS database.

**South Coast Air Quality Management District (SCAQMD):**

The ADR Assessor contacted the SCAQMD and searched the on-line FIND database in an effort to determine whether any permits involving air pollution control technology had been reported at the subject Property. Information provided by the SCAQMD consisted of the following:

- A "SCAQMD Facility Equipment List Report" that indicated that a 1989 permit for natural gas fired internal combustion engine (ICE) and charbroiler were cancelled. This document indicated that former tenant Days Inn was out of business.

- A "SCAQMD Facility Equipment List Report" that indicated that a 1994 permit for an ICE (natural gas) expired for California Cogeneration Corporation.

- A March 12, 1992, Notice to Comply (NC) issued to Days Inn (formerly Griswold's) regarding documentation issues.

- A 1994 permit to operate an ICE associated with a natural gas fired generator

No release issues were on record. Information provided by the SCAQMD is included in the appendix of this report.

**Orange County Sanitation District (OCSD):**

The ADR Assessor contacted the OCSD in an effort to determine whether any wastewater issues or clarifiers have been reported on the subject Property. According to Ms. Tina Knapp with the OCSD, no records were found for the subject Property address.

**California Department of Conservation, Geologic Energy Management Division (GEM):**

The Department of Conservation, Geologic Energy Management Division (GEM) prepares and publishes oil, gas, and geothermal maps for the State of California. The GEM updates these comprehensive maps weekly with the most current well data and post the information on its website at https://www.conservation.ca.gov/calgem. According to the GEM online well finder database, no active or plugged oil wells are located on the subject Property.

## 8.2 Vapor Encroachment Conditions

ADR has performed a Vapor Encroachment Screening (Tier 1) in general accordance with the scope of work and limitations of ASTM Standard Practice E 2600-15 for the subject Property. The purpose of this Vapor Encroachment Screening (Tier 1) was to identify existing or potential Vapor Encroachment Conditions (VEC) (as defined by ASTM Standard E 2600-15) affecting the subject Property. No releases on the subject Property or adjoining properties were identified that would represent a VEC in connection with the subject Property. As such, no further assessment is recommended.

## 8.3 Synopsis of Previous Environmental Investigations

ADR was provided the text of an April 28, 1995, “Phase I Environmental Site Assessment” prepared by Jungren & Duran, Inc. (J&D) for client Huo-Yen Yang. The J&D investigation revealed no evidence of contamination associated with the subject Property. J&D identified that the subject Property is located in an industrial area with known “hazardous contamination incidents”, but stated that these are controlled. J&D referenced a 1991 asbestos inspection prepared by TRC Environmental Consultants, Inc. The TRC report identified asbestos-containing materials on the subject Property, but was not specific to their type or locations and recommended an Operations and Maintenance (O&M) Plan be developed for the management of these materials. J&D recommended no further investigations regarding the subject Property or adjoining properties. The J&D report as provided to ADR is included in the appendix.

# 9 FINDINGS, OPINIONS AND CONCLUSIONS

This section presents a summary of available information on known or suspected *recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, business environmental risks,* non-scope ASTM environmental concerns, environmental concerns not considered *recognized environmental conditions,* and *de minimis conditions* (if any) at the subject Property. It also includes ADR's opinion and rationale for concluding that a condition is, or is not, currently a *recognized environmental condition.*

Recognized environmental conditions:

- The subject Property is located within the boundaries of the OCNB Superfund site. This area contains a comingled groundwater plume of chlorinated solvents (contaminated with PCE, TCE, 1,1-DCE, and 1,4-dioxane) covering approximately five square miles beneath parts of the cities of Anaheim, Fullerton and Placentia. Due to the reported depth to groundwater in the area of the subject Property (ranging between 56 and 66 feet below ground surface) it is unlikely that vapor intrusion is occurring on the subject Property. Since the storage and/or usage of the identified contaminants have not been reported on the subject Property, it is unlikely that the owner(s) of the subject Property would be required to participate in any future investigation or clean-up efforts related to the impacted groundwater. Therefore, no additional investigation is warranted at this time.

Historical recognized environmental conditions:

- None

Controlled recognized environmental conditions:

- None

Business environmental risks:

- None

Non-ASTM scope environmental concerns:

- None

*De minimis* environmental conditions:

- None

ADR has performed an ESA on the site located at 1500 South Raymond Avenue in Fullerton, California. This ESA was performed in conformance with the scope and limitations of ASTM Standard Practice E1527-21, AAI and the scope of services identified in the July 30, 2014, Master Environmental Consulting Services Agreement (MSA) between Rexford Industrial Realty, L. P., and ADR. This ESA has identified no evidence of recognized environmental conditions as defined by ASTM in connection with the subject Property with the exception of:

- The subject Property is located within the boundaries of the OCNB Superfund site. This area contains a comingled groundwater plume of chlorinated solvents (contaminated with PCE, TCE, 1,1-DCE, and 1,4-dioxane) covering approximately five square miles beneath parts of the cities of Anaheim, Fullerton and Placentia. Due to the reported depth to groundwater in the area of the subject Property (ranging between 56 and 66 feet below ground surface) it is unlikely that vapor intrusion is occurring on the subject Property. Since the storage and/or usage of the identified contaminants have not been reported on the subject Property, it is unlikely that the owner(s) of the subject Property would be required to participate in any future investigation or clean-up efforts related to the impacted groundwater. Therefore, no additional investigation is warranted at this time.

## 10 RECOMMENDATIONS

Based upon the conclusions of this ESA, ADR recommends no further investigation or additional action for the subject Property.

## 11 SIGNATURE PAGE

This ESA was prepared in accordance with generally accepted environmental practices and procedures, employing the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental professionals practicing in this area, as of the date of this ESA.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and the individuals conducting this ESA have the specific qualifications based on education, training, and experience to assess a *property* of nature, history, and setting of the subject Property. ADR has developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ADR Environmental Group, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

## RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

| Site | Database(s) | EPA ID |
|---|---|---|
| HUOYEN INTERNATIONAL<br>1500 S RAYMOND AVE<br>FULLERTON, CA 92831 | HWTS | N/A |

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

### *Lists of Federal Delisted NPL sites*

Delisted NPL ---------- National Priority List Deletions

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

| Lower Elevation | Address | Direction / Distance | Map ID | Page |
|---|---|---|---|---|
| ORANGE COUNTY NORTH | 1012 EAST ELM AVENUE | NNW 1/2 - 1 (0.631 mi.) | AL215 | 1101 |

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2022 has revealed that there are 5 SEMS sites within approximately 0.5 miles of the target property.

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

### *Lists of Federal RCRA facilities undergoing Corrective Action*

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

### *Lists of Federal RCRA TSD facilities*

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 15 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 56 ENVIROSTOR sites within approximately 1 mile of the target property.

***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

***Lists of state and tribal leaking storage tanks***

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 40 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 9 CPS-SLIC sites within approximately 0.5 miles of the target property.

### *Lists of state and tribal registered storage tanks*

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 16 UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 31 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 29 HAZNET sites within approximately 0.125 miles of the target property.

# EXECUTIVE SUMMARY

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.25 miles of the target property.

| Equal/Higher Elevation | Address | Direction / Distance | Map ID | Page |
|---|---|---|---|---|
| HEADS UP PERFORMANCE | 1246 E ORANGETHORPE | N 1/8 - 1/4 (0.212 mi.) | N110 | 520 |
| COOK STRATTON & CO | 1330 E ORANGETHORPE | N 1/8 - 1/4 (0.216 mi.) | Q112 | 553 |

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

| Eval Notes: | INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Rodney Hulse, safety officer. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed for the parts washer. Employees are reported to be trained. Emergency plan is posted near front of the store. The dumpster/enclosure was inspected and no indication of illegal disposal was observed. Facility conducts distribution and mixing of screen printing plastisol inks. Rodney Hulse stated that the waste inks are hauled away on a non-hazardous waste manifest. He has made the waste determination that the waste inks are not hazardous waste. |

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

| Violations Found: | Yes |
| Eval Type: | Routine done by local agency |
| Eval Notes: | On site for the annual hazardous waste inspection. Conducted the inspection and permission granted for inspection by Ware/Manny Gonzalez. Manifests reviewed for waste oil, oil filters, oil/absorbent, clarifier waste (bill of lading) and universal waste (truck headlights). Most are being hauled 2x-3x/year. The universal waste has not been hauled in over 1 1/2 years. Storage is OK. Universal waste storage drum is 1/2 full. All storage clean, no leaks. All drums/tanks properly labeled except for the used oil filters drum (see violations). This violation was corrected during the inspection. Numerous trash roll off bins on site. Review of some shows only municipal trash. No HW. This is a trash truck maintenance yard and no trash disposal/sorting takes place. On the job training for employees. Fire department emergency plan on site. No spills or disposal of HW seen. |

| Eval Type: | Construction Storm Water Compliance Evaluation |
| Eval Notes: | Regional Board staff conducted a drive-by inspection of the above facility on December 5, 2018. The purpose of the inspection was to determine whether or not the facility was discharging storm water from the actively occurring storm event. Staff observed discharge from the parking lots south of the facility, at the driveway towards the curb and gutter. Staff expect the discharger to submit an Ad Hoc report within 30 days of their receipt of the laboratory report. Failure to do so is a violation of the IGP. |

| Eval Source: | CERS, |
| Eval General Type: | Other/Unknown |
| Eval Date: | 12-05-2018 |
| Violations Found: | No |
| Eval Type: | Construction Storm Water Compliance Evaluation |
| Eval Notes: | Regional Board staff conducted a drive-by inspection of the above facility on December 5, 2018. The purpose of the inspection was to determine whether or not the facility was discharging storm water from the actively occurring storm event. Staff observed discharge from the parking lots south of the facility, at the driveway towards the curb and gutter. Staff expect the discharger to submit an Ad Hoc report within 30 days of their receipt of the laboratory report. Failure to do so is a violation of the IGP. |

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historic Generators:
- Receive Date: 19990623
- Handler Name: UNI FILTER
- Federal Waste Generator Description: Not a generator, verified
- State District Owner: Not reported
- Large Quantity Handler of Universal Waste: No
- Recognized Trader Importer: No
- Recognized Trader Exporter: No
- Spent Lead Acid Battery Importer: No
- Spent Lead Acid Battery Exporter: No
- Current Record: Yes
- Non Storage Recycler Activity: Not reported
- Electronic Manifest Broker: Not reported

List of NAICS Codes and Descriptions:
- NAICS Code: 33635
- NAICS Description: MOTOR VEHICLE TRANSMISSION AND POWER TRAIN PARTS MANUFACTURING

Facility Has Received Notices of Violations:
- Violations: No Violations Found

Evaluation Action Summary:
- Evaluations: No Evaluations Found

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

|---|---|
| Eval General Type: | Compliance Evaluation Inspection |
| Eval Date: | 02-05-2020 |
| Violations Found: | No |
| Eval Type: | Industrial Storm Water Compliance Evaluation |
| Eval Notes: | Regional Board staff conducted a compliance inspection of the above facility on February 5, 2020. Staff met with Ricardo Magana, Quality Control Supervisor. The SWPPP and employee training records were reviewed. The SWPPP was up-to-date and employee training was last conducted August 2019. The facility collects samples from two outfalls. Monthly Visual Observations were last conducted October 2019 and Mr. Magana stated he would begin the observations again in February. A site walk was then conducted and housekeeping is conducted daily. Hazardous waste 55-gal drums are stored on secondary containment. Paints and aerosol cans are stored in a closed seacrate. Pallet storage was observed outdoors, and lumber is stored outdoors under tarps and/or a permanent storm-resistant shelter. No violations were observed during the inspection. |

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

**STONE CONTAINER CORP (Continued)** **U001577078**

dairy waste ponds.

Commercial Offsite Facility Types: Not reported
Quarterly Update: America Diversified Silver (ADS) was a silver recycling facility originally located at 1431 North Daly, Anaheim, CA under EPA ID number CAD981449689. The North Daly facility received an RCRA ISD on 5/19/87. On 4/4/89, ADS sent a notification to DHS and EPA that facility was moving from 1431 North Daly to 1004 East Orangefair, Anaheim. The EPA ID number was changed to CAD982524613 with new address. A letter dated 3/2/90 from DHS told ADS that move will cause ISD termination at the 1431 North Daly location and they will need to close the North Daly facility. Additionally, letter stated, the operation at 1004 East Orangefair location will have to obtain a hazardous waste permit to operate. On 6/1/93, an interim status for standardized permit was issued by DTSC to the new location E Orangefair Lane. There is no further permitting or closure information in file. No corrective action files exist for this facility. For Silver recovery only facility originally authorized under the Standardized Permit Interim Status tier, a 1997 statute deregulated all these silver recovery facilities and this facility has been deemed administratively clean closed per Region 2 office.

| Quarterly Update: | America Diversified Silver (ADS) was a silver recycling facility originally located at 1431 North Daly, Anaheim, CA under EPA ID number CAD981449689 (This site's EPA #). On 5/19/87, interim status was issued to ADS. Part A application was not available in file. Therefore, no unit specific information could be found. On 4/4/89, ADS sent a notification to DHS and EPA that facility was moving from 1431 North Daly to 1004 East Orangefair, Anaheim. The EPA ID number was changed to CAD982524613 with new address. (12/6/2017) Due to this facility being a duplicate it is being administratively closed. All TSDF data and status will be kept under CAD982524613. There is a letter dated 3/2/90 from DHS telling ADS that move will cause ISD termination at the 1431 North Daly location and they will need to close the North Daly facility. Additionally, letter stated, the operation at the new location will have to obtain a haz waste permit to operate. A closure report with Engineer certification is in the file. The date of the closure report is 9/15/92. No other closure |

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**AMERICOLD LOGISTICS LLC (Continued)** **S113801228**

Site Name: Americold
Violation Date: 02-14-2012
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: E-waste left out exposed; broken flourescent bulbs on ground under a chiller (exposed to storm flow under the unit); failure to contain wash water from clean out of floor scrubber wastewater tray during servicing.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 526182
Site Name: Americold
Violation Date: 02-14-2012
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SWPPP
Violation Notes: Site plan is missing some drainage features of the site; i.e. under-building culvert and related ribbon gutters. Some areas of industrial activities are also not shown: trash compactor.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Site ID: 526182
Site Name: Americold
Violation Date: 07-16-2017
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit 2016 - 2017 Annual Report by due date
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-14-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: partly cloudy and cool. Last rained on Sunday and Monday (2/13). SWPPP is missing relevant drainage features and sources of potential pollutants in the site plan. Observed undocumented trash compactor, ribbon gutter and related culvert beneath building, and N-side drainage areas. No industrial activities observed on N or W sides. E-side has truck well/dock; reported cleaned/maintained annually. Haz-mat storage in uncovered, enclosed area; found two metal secondary containers for drums with heavy layer of rust on bottom; recommend clean/inspect. Found uncovered e-waste and new light fixtures with broken flourescent bulbs under cooling unit. Observed floor scrubber being maintained outside; wastewater tray had been hosed out onto the ground; evaporating on-site.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

| Comments: | Not reported |
| Description: | RP states that two one-gallon containers of sodium hypochlorite broke initial containment and mixed with and open container of floor cleaner resulting in a white cloud which resembled fire smoke. The release is contained and cleanup is complete. All substances have been placed in new containers and old containers have been disposed of. No waterways have been impacted. |

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA Waste Code: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.4

Year: 2011
Gepaid: CAD980895098
TSD EPA ID: CAT000613976
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 1.4784

Year: 2011
Gepaid: CAD980895098
TSD EPA ID: CAT000613893
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 2.562

Year: 2011
Gepaid: CAD980895098
TSD EPA ID: TXD077603371
CA Waste Code: -
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.2

Year: 2011
Gepaid: CAD980895098
TSD EPA ID: TXD077603371
CA Waste Code: 343 - Unspecified organic liquid mixture
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.125

Year: 2011
Gepaid: CAD980895098
TSD EPA ID: TXD077603371
CA Waste Code: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method: -
Tons: 0.175

| Violation Description: | Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or |

**FULLERTON PETROLEUM AND MART INC. (Continued)** **U001576978**

triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 12/13/2018. FAILURE TO PERFORM OVERFILL TESTING AS REQUIRED. 1/2/2019: OVERFILL TESTING PERFORMED AND ALL 3 TANKS FAILED.

| Eval Notes: | On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by store manager. This is a gas station. It generates waste gas station solids (absorbent, hoses etc.) and liquids |

**FULLERTON PETROLEUM AND MART INC. (Continued)** **U001576978**

(UST sump testing). The facility is a Conditionally Exempt Small Quantity Generator (CESQG). EPA ID # is correct. The HW must be disposed within 90 days of reaching 220 lbs/27 gallons. The business is currently on an annual HW haul away cycle. Manifests were reviewed. OK. (2) 55 gallon drums on site. Both are stored closed and properly labeled with HW labels and beginning accumulation dates (4-1-16). HMBEP is on file with the FFD. No HW in the municipal trash nor on the facility perimeter.

Eval Date: 10-04-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site inspection for follow up to the 7-1-13 hazardous waste inspection. Permission to inspect granted by Mike Kough. The 7-1-13 inspection listed violation # W002/W010 and W013. To date, the business has not labeled the 2 55-gallon drums of waste fuel/absorbent, no beginning accumulation date nor reactivated the EPA ID #. Discussed with the owner. He has made arrangements for the drums to be disposed as HW but has been unable to obtain his EPA ID #. He had been mistakenly calling the DTSC waste minimization unit. I gave him the DTSC, EPA ID # unit. Have your EPA ID # obtained, have the drums labeled and properly disposed of within 15 days or you may receive a civil penalty. Have all violations abated by 10-23-13.

Alias Type: Envirostor ID Number

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: PA/SI Site Screening
Completed Date: 05/29/2015
Comments: Final report available July 2015 from USEPA data base and uploaded. SSA report Confidential attachments located in Confidential field, see drop down menu.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 08/21/2017
Comments: EPA Decision

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 08/24/2017
Comments: The deliverable was created to upload the EPA PA report. DTSC will be reviewing the PA to determine if further work is required at the facility.

| Citation: | 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16 |
| Violation Description: | Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position. |
| Violation Notes: | Returned to compliance on 01/20/2021. Per Jordan Teramae of Associated Environmental Management and Roberto Diaz, employee of Universal Molding Company annual hazardous waste employee training has not been conducted since February 2019. Additionally the following training documentation was unavailable for review on this date: -Job title for each person who is required to receive hazardous waste training -name of each employee filling each job title -written job description for each position -written description of the type/amount of introductory and continuing training Provide a copy of the most recent training documentation to this agency immediately. If training has not been conducted within the last year facility is required to provide all training for employees hired over 6 months ago immediately. |

| Site Name: | Universal Molding Company |
| Violation Date: | 11-12-2020 |
| Citation: | 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11 |
| Violation Description: | Failure to determine if the waste generated is a hazardous waste. |
| Violation Notes: | Returned to compliance on 12/11/2020. Per Roberto Pretreatment Tank #5 has the following process: -Pretreatment Tank #4 is emptied and placed into one or both batch tanks for treatment -the clean liquid from the top of Pretreatment Tank #5 is used to replenish Pretreatment Tank #4 -the dirty liquid/sludge from the bottom of Pretreatment Tank #5 is placed into one of the bath tanks for treatment Facility has not tested the dirty liquid/sludge from the bottom of Pretreatment Tank #5 for California or federally regulated heavy metals before performing treatment. Have a representative sample of the dirty liquid/sludge waste from the bottom of Pretreatment Tank #5 tested by a state-certified laboratory for Title 22 CCR heavy metals. Perform a total threshold limit concentration (TTLC) analysis, and if necessary, a soluble threshold limit concentration (STLC) analysis. Please submit the test results to this Agency within 30 days. If the waste is hazardous this process may be subject to regulation under [Truncated] |

Eval Notes: During the 05/09/2018 on site inspection, the following was observed:

**UNIVERSAL MOLDING CO (Continued)** **U001577068**

-Facility recycles approximately 55 gallons of solvent contaminated with pant on a weekly basis. As a facility that recycles more than 100kg/month of hazardous waste/excluded recyclable material you are required to submit a Recyclable Materials Report (RMR) to the California Environmental Reporting System (CERS) by July 1st of every even numbered year. To date facility has not submitted the RMR to CERS, violation R004 remains outstanding. Complete and submit the RMR to CERS immediately.
