Summary Form for Electronic Document Submittal

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2023090505

Project Title: Honby Tanks Pipeline Project

Lead Agency: Santa Clarita Valley Water Agency

Contact Name: Wai Lan Lee, P.E., Engineer

Email: wlee@scvwa.org Phone Number: (661) 259-2737

Project Location: Santa Clarita (*City*) Los Angeles (*County*)

Project Description (Proposed actions, location, and/or consequences).

The Modified Project would consist of installing approximately 15 linear feet of new 30-inch and approximately 215 linear feet of upsized 14-inch to 30-inch pipeline along Cedarcreek Street and Santa Clara Street. The new pipeline would be installed via open-trench excavation. The Modified Project would be installed at a maximum depth of eight feet and would require the export of 211 cubic yards of soil. The Modified Project would not involve any new operation and maintenance activities, and no new employees would be required. The purpose of the additional pipeline extension is to connect the Honby Tanks pipeline to the Santa Clara Well pressure distribution zone directly, and to upsize the existing pipeline to alleviate the pressure bottleneck with the existing 14-inch potable water line. The Modified Project would involve the additional pipeline to be installed via open-trench excavation and construction would occur over two to three weeks between October 2024 and January 2026. Construction activities would typically occur between 7:00 A.M. and 4:00 PM Monday through Friday. No nighttime or weekend construction is anticipated to be required. Construction equipment would be parked along Furnivall Avenue as well as on the SCV Water-owned pump station located on the northeast corner of Santa Clara Street and Furnivall Avenue, as needed.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Modified Project would result in potentially significant effects to air quality, biological resources, cultural resources, hazards and hazardous materials, and tribal cultural resources. However, implementation of mitigation measures would reduce these impacts to less than significant levels. Please see the Summary Form for Electronic Document Submittal Attachment below for a list of proposed mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

-US Army Corps of Engineers (USACE)
-California Department of Fish and Wildlife (CDFW)
-Los Angeles Regional Water Quality Control Board (LACRWQB)
-United States Fish and Wildlife Service (USFWS)

Honby Tanks Pipeline Project Summary Form for Electronic Document Submittal Attachment

Mitigation Measures

- AQ-1: Construction Particulate Matter Emissions Reduction
- BIO-1: General Best Management Practices
- BIO-2: Worker Environmental Awareness Program
- BIO-3: Special Status Plant Surveys
- BIO-4: Special Status Plant Avoidance Measures
- BIO-5: Special Status Plant Mitigation and Monitoring Plan
- BIO-6: Pre-activity Survey
- BIO-7: Qualified Biological Monitor
- BIO-8: Dry Season Construction
- BIO-9: Nesting Birds
- BIO-10: Habitat Revegetation, Restoration, and Monitoring Program
- BIO-11: Jurisdictional Habitat Best Management Practices
- CR-1: Worker Environmental Awareness Program
- CR-2: Unanticipated Discovery of Cultural Resources
- HAZ-1: Hazardous Materials Management and Spill Control Plan
- HAZ-2: Soil and Groundwater Management Plan
- HAZ-3: Subsurface Investigation
- HAZ-4: Remediation
- HAZ-5: Disposal of Groundwater
- HAZ-6: Traffic Control Plan
- TCR-1: Tribal Cultural Resources Construction Monitoring
- TCR-2: Unanticipated Discovery of Tribal Cultural Resources
- TCR-3: Unanticipated Discovery of Human Remains
