ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as established in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR 312.10) and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

EXECUTIVE SUMMARY

Farallon Consulting, L.L.C. (Farallon) has prepared this Phase I Environmental Site Assessment (ESA) Report for the property at 1571, 1581, 1593, and 1617 Industrial Parkway West, and 29469 Ruus Road in Hayward, California (herein referred to as the Subject Property). The Phase I ESA was conducted by Scott Allin and was reviewed and approved by Craig Ware. The Phase I ESA Report was prepared for CenterPoint Properties Trust (User) in accordance with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13). There were no deviations from ASTM E1527-13 during this Phase I ESA.

The Subject Property consists of three Alameda County Parcels: No. 464-100-29-2 on the western portion of the Subject Property totaling approximately 2.09 acres (Western Parcel); No. 464-100-31 on the central and southeastern portion of the Subject Property totaling approximately 4.09 acres (Central Parcel); and No. 464-100-30 on the northeastern portion of the Subject Property totaling 1.44 acres (Northeast Parcel). The Western Parcel is developed with an approximately 17,676-square-foot commercial/industrial building completed in 1993, with the address 1617 Industrial Parkway West (1617 Building). The central portion of the Central Parcel is developed with two metal industrial buildings completed primarily in the early 1970s with additions in the 1980s, with the addresses 1581 and 1593 Industrial Parkway West. The southeastern portion of the Central Parcel is developed with an approximately 17,200-square-foot metal industrial building completed in the early 1970s with the address 1571 Industrial Parkway West (1571 Building). The Northeast Parcel is developed with a 15,600-square-foot metal industrial building completed in 1983, with the address 29469 Ruus Road (29469 Building).

During the site reconnaissance, the Subject Property was occupied primarily by automotive repair and service companies. In general, the majority of the tenants used automotive repair and maintenance chemicals, and generated automotive chemical wastes. Many tenant representatives were not knowledgeable about the history of Subject Property use, or were not willing to be interviewed.

Historically, the Subject Property appeared to be undeveloped and used for limited agricultural purposes from 1899 through 1960. By 1968, some scarring and material storage appeared to exist on the northern portion of the Subject Property. By 1974, the 1593 Building and the central and southern portions of the 1571 Building were present, and some material storage was apparent on the western portion of the Subject Property. Also in 1974, the northeastern portion of the Subject Property appeared to contain numerous trucks and truck trailers, and non-distinguishable materials and a darkened area, potentially staining or stormwater accumulation, at the present location of the 1617 Building. By 1980, the northern portion of the 1581 Building was present; the building was completed in its current configuration by 1982. By 1987, an addition to the northern portion of the 1571 Building was evident, and the 29469 Building was present. By 1993, the 1617 Building was present, with the northern portion of the Western Parcel remaining unpaved through 2016. City

directories listed various automotive repair and maintenance entities and other light-industrial businesses for the Subject Property.

Based on the historical use of the Subject Property for agricultural purposes, residual agricultural chemicals potentially are present in Subject Property soil. However, based on the absence of evidence of concentrated agricultural chemical storage, the potential presence of residual agricultural chemicals in soil represents a de minimis condition under continued commercial use of the Subject Property. Further evaluation of soil removed from the Subject Property may be warranted.

Adjoining properties at the time of Farallon's site reconnaissance included Pacific Highway Rentals and V&V Auto Body to the north; Popeye Auto Collision 2, Golden Gate Petroleum (GGP), an automotive fueling station, and Ruus Road, followed by residences to the east; Industrial Parkway West followed by Manaheim, an automobile auction yard to the south; and mixed retail, residences, and Pacific Highway Rentals to the west.

Historically, adjoining properties appeared to be undeveloped and used for agricultural purposes from 1899 through 1960, with Industrial Parkway West and Ruus Road present, but appearing unimproved; early topographic maps showed some residential-style buildings east of Ruus Road. The 1939 aerial photograph depicted residential or farm-style developments on the north-adjoining property and to the northeast across Ruus Road. By 1968, several small- to medium-sized commercial/industrial buildings were present to the north and east, with their configuration changing over time, and Industrial Parkway West and Ruus Road appeared improved. Also by 1968, the south-adjoining property across Industrial Parkway West appeared to be used for significant material storage and industrial activities. Some potential material storage was apparent on the northwest-adjoining property in 1974. By 1980, the north-adjoining property contained several commercial/industrial buildings similar to present. By 1993, further commercial development was apparent on the northwest-adjoining property. By 2003, the east-adjoining property was developed with the current GGP facility; by 2004, the west-adjoining properties were developed with retail and residential buildings. City directories listed various private parties, and commercial and industrial businesses on surrounding properties.

The Subject Property has a long history of use for automotive repair activities that predate regulatory oversight of hazardous material use, and a history of poor housekeeping practices. The east-adjoining GGP property has been operated as an automotive fueling station since 1960. Several releases of petroleum constituents from USTs historically present at this property have been identified. The UST historically operated by GGP referred to as Tank 6 was located on the eastern portion of the Central Parcel. Based on these findings, investigations were previously performed on the Central and Northeast Parcels. These investigations identified evidence of releases of industrial constituents, including volatile organic compounds and petroleum constituents, primarily at concentrations that do not adversely affect continued commercial use of the Subject Property. However, conditions were identified that may cause regulators to require further actions, which represent recognized environmental conditions in connection with the Subject Property. CenterPoint Properties Trust has entered into a Voluntary Remedial Action

Agreement with the Alameda County Department of Environmental Health to further evaluate environmental releases that have impacted the Subject Property.

The EDR Radius Map Report with GeoCheck prepared for the Subject Property by Environmental Data Resources, Inc. (EDR) dated June 29, 2022 (EDR Report) identified the Subject Property address in several databases, consistent with historical use for automotive repair and service activities.

De minimis petroleum staining associated with long-term automotive repair activities was observed at several locations on interior and exterior portions of the Subject Property.

Based on review of the Subject Property history, interviews with persons knowledgeable about the Subject Property, reconnaissance of the Subject Property, and review of the EDR Report, this Phase I ESA identified the following recognized environmental conditions in connection with the Subject Property:

- The presence of volatile organic compounds in soil gas beneath the 1581 Building;
- The presence of petroleum constituents in soil gas and groundwater beneath the Northeast Parcel, originating from the Subject Property or adjoining properties; and
- The presence of petroleum constituents proximate to Tank 6, formerly present on the Central Parcel and operated by GGP.

1.0 INTRODUCTION

Farallon Consulting, L.L.C. (Farallon) has prepared this Phase I Environmental Site Assessment (ESA) Report for the property at 1571, 1581, 1593, and 1617 Industrial Parkway West, and 29469 Ruus Road in Hayward, California (herein referred to as the Subject Property) (Figure 1). This section discusses the project authorization and scope of work, the qualifications of the Environmental Professional(s) who conducted and reviewed the Phase I ESA work, the project purpose and objective, the shelf life of All Appropriate Inquiries (AAI) documents, deviations, and data gaps.

1.1 PROJECT AUTHORIZATION AND SCOPE OF WORK

This Phase I ESA Report was prepared for CenterPoint Properties Trust (User) in accordance with the *Environmental Site Assessment Work Order* dated June 21, 2022 prepared and authorized by CenterPoint Properties Trust (Authorization). The scope of work for this Phase I ESA included a records review, literature research and review, a site reconnaissance, interviews with individuals familiar with the Subject Property, interviews with local governmental officials, and preparation of this report. The scope of work is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13).

1.2 PROFESSIONAL QUALIFICATIONS

The Phase I ESA was conducted by Scott Allin and was reviewed and approved by Craig Ware. Both have an understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions, and the ability to develop opinions regarding conditions indicative of a release or a threatened release of hazardous substances and petroleum products. AAI has been performed in conformance with the standards and practices set forth in Part 312 of Title 40 of the Code of Federal Regulations. The professional qualifications of the Environmental Professionals are provided in Appendix A.

1.3 PROJECT PURPOSE AND OBJECTIVE

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions at the Subject Property and within the appropriate study area that have caused and/or may cause an adverse environmental impact. ASTM E1527-13 is intended to permit a user to satisfy one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

The objective of the Phase I ESA was to perform an appropriate inquiry into past and present ownership and uses of the Subject Property, consistent with good commercial and/or customary practice. This Phase I ESA Report is to be used as a risk management tool to meet all appropriate inquiry requirements and the Comprehensive Environmental Response, Compensation, and Liability Act liability defense. The Phase I ESA does not guarantee that there are no impacts to the Subject Property.

For the purpose of this Phase I ESA Report, the term "recognized environmental condition" is defined as the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

The term "controlled recognized environmental condition" is defined as a recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities, with hazardous substances or petroleum products allowed to remain in-place subject to implementation of required controls.

The term "historical recognized environmental condition" is defined as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (e.g., activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

1.4 SHELF LIFE OF ALL APPROPRIATE INQUIRIES DOCUMENTS

The AAI rule prepared by the U.S. Environmental Protection Agency (EPA)[1] specifies that AAI must be conducted within 1 year prior to the date of acquisition of the Subject Property. EPA has defined the date of acquisition as the date a person acquires title to the property. To ensure full coverage under the AAI rule, a valid Phase I ESA Report must be completed within 1 year prior to the date of acquisition of title.

Select Phase I ESA Report components and supporting information sources must be updated if they were completed more than 6 months (180 days) prior to acquisition of title. The Phase I ESA components with a 180-day shelf life consist of:

- Subject Property inspection;

[1] Part 312 of Subchapter J of Chapter I of Title 40 of the Code of Federal Regulations.

- Interviews with knowledgeable persons;
- Review of government regulatory records; and
- Declaration/signature of certifying Environmental Professional.

The date on the cover of this Phase I ESA Report is the production date of the written report. The dates various components of this Phase I ESA were completed are as follows:

- Subject Property inspection: July 6, 2022.
- Interviews with knowledgeable persons: July 7, 2022.
- Review of government regulatory records: July 5, 2022.
- Declaration/signature of certifying Environmental Professional: August 2, 2022.

1.5 DEVIATIONS

There were no deviations from ASTM E1527-13 during this Phase I ESA.

1.6 DATA GAPS

Data gaps may affect the ability to identify recognized environmental conditions and Farallon's ability to render opinions and conclusions for presentation in the Phase I ESA Report. Farallon did not identify significant data gaps during this Phase I ESA.

2.0 SUBJECT PROPERTY OVERVIEW

This section presents the Subject Property location, description, and operations. A description of adjoining and surrounding land use also is provided.

2.1 SUBJECT PROPERTY LOCATION

The Subject Property is north of Industrial Parkway West and west of Ruus Road, approximately 570 feet northwest of the intersection of Industrial Parkway West and Ruus Road at 1571, 1581, 1593, and 1617 Industrial Parkway West, and 29469 Ruus Road in Hayward, Alameda County, California. The Subject Property is in a mixed commercial, industrial, and residential area approximately 2.2 miles east of San Francisco Bay marshlands, and 2.3 miles west of the eastern San Francisco Bay foothills. The Subject Property vicinity is shown on Figure 1.

2.2 SUBJECT PROPERTY DESCRIPTION

The Subject Property consists of three Alameda County Parcels: No. 464-100-29-2 on the western portion of the Subject Property totaling approximately 2.09 acres (Western Parcel); No. 464-100-31 on the central and southeastern portion of the Subject Property totaling approximately 4.09 acres (Central Parcel); and No. 464-100-30 on the northeastern portion of the Subject Property totaling 1.44 acres (Northeast Parcel).

The Western Parcel is developed with an approximately 17,676-square-foot commercial/industrial building completed in 1993, with the address 1617 Industrial Parkway West (1617 Building). The southern portion of the building consists of two stories of office space totaling approximately 4,200 square feet; the northern portion consists of warehouse space. A recessed loading dock is present at the northeastern corner of the 1617 Building. The eastern and northern exteriors of the Subject Property consist of asphalt-paved parking and equipment storage areas. Concrete block or chain-linked fencing surrounds the Subject Property boundary, with landscaping along Industrial Parkway West. A stormwater bioswale was observed on the eastern portion of the parcel. Access to the Western Parcel is gained from a driveway off Industrial Parkway West, south of the Subject Property.

The Central Parcel is developed with three metal industrial buildings completed primarily in the early 1970s with additions in the 1980s, with the addresses 1571, 1581, and 1593 Industrial Parkway West. The southeastern portion of the parcel is developed with an approximately 17,200-square-foot industrial building with the address 1571 Industrial Parkway West (1571 Building). The northwestern portion of the parcel is developed with an approximately 18,000-square-foot industrial building with the address 1581 Industrial Parkway West (1581 Building). The southwestern portion of the parcel is developed with an approximately 11,800-square-foot industrial building with the address 1593 Industrial Parkway West (1593 Building). Several metal canopies were present south of the 1581 Building. Remaining portions of the parcel consist primarily of asphalt- and concrete-paved surfaces used for automobile parking and equipment storage; significant patching of asphalt was underway at the time of the site reconnaissance. Access

to the majority of the Central Parcel is gained from Industrial Parkway West, south of the Subject Property; access to the northern portion of the 1571 Building is gained from the east-adjoining property.

The Northeast Parcel is developed with a 15,600-square-foot metal industrial building completed in 1983, with the address 29469 Ruus Road (29469 Building). The building exists on the northern portion of the Subject Property, with the central and southern portions of the Subject Property consisting of paved parking or equipment storage areas. A truck scale was present inside the building, and a recessed concrete loading dock at the northeastern corner of the building. Remaining portions of the Northeast Parcel consisted of degraded asphalt with numerous patched areas surrounded by chain-link fencing. Paving on the Northeast Parcel was in poor condition; the occupant was using trench plates to improve driving conditions. Access to the Northeast Parcel is gained from Ruus Road, at the northeastern corner of the Subject Property.

Figure 2 presents a plan map of the Subject Property. Additional details pertaining to the Subject Property are provided in Section 9, Site Reconnaissance. Subject Property photographs are presented in Appendix B.

2.3 SUBJECT PROPERTY OPERATIONS

During the site reconnaissance, the Subject Property was occupied primarily by automotive repair and service companies. The following occupants and uses were observed:

BUILDING	OCCUPANT	USE
1571 Building	Carstar (aka Hayward Collision)	Autobody repair
	All Bay Tire (aka AMPM Tire & Service)	Tire and automotive/truck servicing
1581 Building	Carstar (aka Hayward Collision)	Autobody repair
	Manada Roofing	Roofing contractor
	Bhooja King	Food products preparation
	Oceanside Auto	Wholesale automotive dealer and automotive detailing
	Royal Motors	Wholesale automotive dealer and automotive detailing
	Vacant (previously DDM)	Former truck and drill rig repair and maintenance
Canopies south of 1581 Building	Manada Roofing	Roofing contractor

BUILDING	OCCUPANT	USE
1593 Building	D&A Bumper	Automotive bumper repair
	A&R Tool	Towing company
	Mission Tire	Automotive tire replacement
1617 Building	Dragon Fly	Manufacturing modular homes and interior spaces
	Manaheim	Automobile storage
29469 Building	All Bay Tire (aka AMPM Tire & Service)	Vacant, future tire storage
	Jose Ruiz	Manufacturing pallets

In general, the majority of the tenants used automotive repair and maintenance chemicals, and generated automotive chemical wastes. General observations of the buildings made during Farallon's site reconnaissance are summarized below, with more detail provided in Section 9, Site Reconnaissance. Many tenant representatives were not knowledgeable about the history of Subject Property use, or were not willing to be interviewed.

- **Carstar (1571 Building)**. The interior of the Carstar-occupied space included epoxy-coated floors. Several aboveground lifts, an oil-water separator connected to a floor drain, a parts-cleaner that uses non-chlorinated solvents, and full-sized automobile paint booths were observed.
- **All Bay Tire (1571 Building)**. Entrance to this tenant space is gained from the east-adjoining Golden Gate Petroleum (GGP) property. All Bay Tire uses the GGP address of 1565 Industrial Parkway West, likely for convenience. Poor housekeeping practices were observed, and an occupied trailer and several used cars were present along the northern exterior of the 1571 Building. Farallon observed two approximately 500-gallon waste-oil aboveground storage tanks (ASTs), and a trench drain that appeared to contain a sheen inside this tenant space. This drain is believed to be connected to the sanitary sewer system, but confirmation was not obtained.
- **Manada Roofing (canopies south of Building 1581)**. This area appeared to be used throughout for general contractor storage, with multiple unoccupied mobile trailers present. Farallon observed a sump and pump that appeared to be connected to the sanitary sewer, with pipes leading to one former trailer storage location that appeared to be used for sewage discharge from the former trailer. Farallon also observed an improvised paint booth

constructed of plastic. An open polyvinyl chloride drain that appeared to be connected to the sanitary sewer was observed on the western exterior of this area.

- **Carstar (1581 Building).** A large system to manage dust generated from paint-sanding operations was observed in this occupied space.
- **Bhooja King (1581 Building)**. Access to this tenant space was not available during the site reconnaissance. Previous inspections by Farallon identified an aboveground oil-water separator used to manage grease from cooking operations. Vent pipes that are believed to be used for sanitary discharge from several sinks in the facility were observed on the western exterior of this tenant space.
- **Oceanside (1581 Building).** Aboveground lifts were observed in this tenant space.
- **Royal Motors (1581 Building).** Poor housekeeping practices, including oil storage in containers within a damaged wall, moderate oil staining on the concrete floors, and a heavily stained wash sink, were observed in this tenant space. Metal shavings from grinding operations are generated, and aboveground lifts were observed in the space. Automobiles are washed on exterior asphalt, with water and detergents discharged via sheet flow to storm drains that contained significant sediments. A sheen was observed on car wash water.
- **Vacant (1581 Building, former DDM)**. Staining was observed at various locations throughout this vacant tenant space on the northern portion of the 1581 Building that previously was occupied by DDM.
- **D&A Bumpers (1593 Building):** Sanding of painted surfaces in the D&A Bumper space results in significant dust generation, with no dust-management system. The interior was extremely cluttered with materials, and had poor lighting for inspection during the site reconnaissance. Painting operations were being performed in a separate room.
- **A&R Tool (1593 Building).** Access was not available to the A&R Tool tenant space during the site reconnaissance. During previous inspections by Farallon, small containers of automotive maintenance chemicals were observed.
- **Mission Tires (1593 Buildings)**. Access to this tenant space was not available during the site reconnaissance. During previous inspections by Farallon, a large number of tires and small containers of automotive maintenance chemicals were observed.

The Subject Property is owned by CenterPoint 1571 Industrial LLC, and CenterPoint Ruus LLC, a Delaware Limited Liability Company.

2.4 ADJOINING AND SURROUNDING LAND USE

Adjoining properties at the time of Farallon's site reconnaissance included Pacific Highway Rentals and V&V Auto Body to the north; Popeye Auto Collision 2, GGP and Ruus Road, followed by residences to the east; Industrial Parkway West followed by Manaheim, an automobile auction yard to the south; and mixed retail, single-family residences, and Pacific Highway Rentals to the west.

No visual evidence of recognized environmental conditions was observed on abutting or nearby properties during the site reconnaissance, with the exception of GGP, which is an open Leaking Underground Storage Tank (LUST) facility, discussed in Section 7.2, Adjoining Facility Listings. Observations were restricted to areas readily observable from the Subject Property.

3.0 PHYSICAL SETTING

The topography, geology, and hydrogeology of the Subject Property are described in this section. Farallon's assessment of sensitive receptors in the area also is discussed. Farallon reviewed the following physical setting sources as part of this Phase I ESA:

- U.S. Geological Survey topographic maps of Hayward, California and San Leandro, California dated 1899, 1915, 1947, 1948, 1959, 1968, 1973, 1980, 1996, 1997, and 2015 obtained from Environmental Risk Information Services (ERIS);
- *The EDR Radius Map Report with GeoCheck* prepared for the Subject Property by Environmental Data Resources, Inc. (EDR) dated June 29, 2022 (EDR Report); and/or
- Documentation of previous environmental studies referenced in Section 4.5, Previous Environmental Studies, and/or documents cited in Section 7, Records Review.

3.1 TOPOGRAPHY

Farallon reviewed the U.S. Geological Survey topographic map for Hayward, California dated 2015. The map depicts the Subject Property at an elevation of approximately 14 feet above mean sea level. The Subject Property topography is relatively flat. Regional topography is generally flat, with a slight slope down to the south-southwest toward San Francisco Bay.

3.2 GEOLOGY AND HYDROGEOLOGY

The geology in Hayward, California is dominated by the effects of the active Hayward fault, which extends from Berkeley to south of Fremont. Areas west of the fault have been lowered to at least 1,000 feet below sea level; areas east of the fault have been uplifted to produce the Diablo Range. The area west of the fault zone consists of three coalescing alluvial fans known as the San Lorenzo Cone, which extend from Oakland to Fremont. The geology at the Subject Property consists of Quaternary unconsolidated alluvial sediments. The upper 400 feet consists predominantly of blue or yellow silts and clays with variable amounts of sand and gravel.

According to the ERIS Physical Setting Report prepared for the Subject Property dated July 28, 2021 (ERIS PSR), soil in the area consists of Clear Lake clay, which is characterized as having a high runoff potential when saturated, and restricted or very restricted water movement.

According to California State Water Resources Control Board GeoTracker database (GeoTracker database) data for the east-adjoining property at 1565 Industrial Parkway West, first-encountered groundwater occurs at a depth of approximately 15 feet below ground surface, and static groundwater in the monitoring wells at the property was measured at depths of approximately 8 to 13 feet below ground surface. Based on topography, groundwater flow proximate to the Subject Property is expected to be generally to the south-southwest, toward San Francisco Bay. However, according to GeoTracker database data for the east-adjoining property at 1565 Industrial Parkway West, groundwater flow has varied from west to northeast.

3.3 OIL AND GAS RECORDS

According to the California Department of Conservation, Geologic Energy Management Division Well Finder online database, no permitted oil or gas wells are present on the Subject Property or adjoining properties.

3.4 SENSITIVE RECEPTORS

Sensitive receptors are areas such as hospitals, schools, daycare facilities, and elderly housing or convalescent facilities where occupants are more susceptible to the adverse effects of exposure to toxic chemicals, pesticides, and other pollutants. Extra care must be taken when dealing with contaminants and pollutants proximate to areas recognized as sensitive receptors. Farallon's limited assessment for sensitive receptors on or adjoining the Subject Property consisted of a review of properties where occupants are more susceptible to adverse effects of exposure to toxic chemicals, pesticides, and other pollutants. It also included observation of apparent features such as surface water bodies (e.g., low-lying wet areas, streams, ponds) and residential and recreational areas, and review of readily ascertainable information relating to the presence of private, semiprivate, public, and industrial water-supply wells on or in the vicinity of the Subject Property.

No hospitals, schools, daycare facilities, or elderly housing or convalescent facilities were identified on or adjoining the Subject Property during the review of sensitive receptors conducted at the time of the site reconnaissance. According to the EDR Report, the Subject Property is in a special flood hazard area with a 1 percent chance of annual flooding. The nearest federally designated wetlands were identified approximately 0.6 mile southwest of the Subject Property. No public water-supply wells were identified within 1 mile of the Subject Property. The water body nearest the Subject Property was identified as a stormwater drainage canal approximately 0.2 mile southeast of the Subject Property.

4.0 USER-PROVIDED INFORMATION

Farallon understands that the User of this report is seeking to follow the standards set forth in ASTM E1527-13 to complete an environmental assessment of the Subject Property. The User has specific responsibilities for fulfilling ASTM E1527-13 requirements to help identify the possibility of recognized environmental conditions in connection with the Subject Property. These responsibilities do not require the technical expertise of an Environmental Professional, and were not performed by Farallon.

To facilitate fulfillment of the ASTM E1527-13 requirements identified below, Farallon provided the User with a copy of the *Phase I Environmental Site Assessment User Questionnaire* (User Questionnaire) to complete. The completed User Questionnaire is provided in Appendix C of this Phase I ESA Report.

4.1 TITLE AND LIEN RECORDS

The User stated that it was not aware of environmental liens against the Subject Property.

4.2 EXPERIENCE AND SPECIALIZED KNOWLEDGE

The User stated that it has no experience or specialized knowledge regarding the Subject Property.

4.3 COMMONLY KNOWN INFORMATION

The User stated that it is not aware of commonly known information that would lead to identification of recognized environmental conditions in connection with the Subject Property.

4.4 PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT USERS

The User will rely on this Phase I ESA Report.

4.5 PREVIOUS ENVIRONMENTAL STUDIES

Farallon previously prepared the following environmental reports for the Subject Property:

- *Phase I Environmental Site Assessment Report, 1617 Industrial Parkway West, Hayward, California* dated May 21, 2018 prepared for CenterPoint Properties Trust (CenterPoint) (Western Parcel Phase I Report).

- *Phase I Environmental Site Assessment Report, 1571, 1581, and 1593 Industrial Parkway West, Hayward, California* dated August 30, 2021 prepared for CenterPoint (Central Parcel Phase I Report).

- *Phase II Environmental Site Assessment Report, 1571, 1581, and 1593 Industrial Parkway West, Hayward, California* dated December 1, 2021 prepared for CenterPoint 1571 Industrial LLC (Central Parcel Phase II Report).

- *Phase I Environmental Site Assessment Report, 29469 Ruus Road, Hayward, California* dated December 8, 2021 prepared for CenterPoint (Northeast Parcel Phase I Report).

- *Phase II Environmental Site Assessment Report, 29469 Ruus Road, Hayward, California* dated January 14, 2022 prepared for CenterPoint (Northeast Parcel Phase II Report).

At the time of the Western Parcel Phase I Report, the Western Parcel building was occupied by Dragon Fly and used for the manufacture of aluminum framing for modular homes. The northern portion of the Western Parcel was being used by Manaheim for automobile storage. Farallon observed de minimis petroleum staining on select paved areas of the Subject Property that appeared to be from parked vehicles and stored equipment. Hazardous material use and storage consisted of retail-sized quantities of paints and maintenance products. The materials were properly labeled and stored in designated areas of the building. No staining was observed on or around the containers. The Western Parcel Phase I Report did not identify recognized environmental conditions in connection with the Western Parcel.

At the time of the Central Parcel Phase I Report, the Central Parcel buildings were occupied primarily by automotive repair and service companies. In general, the majority of the tenants used automotive repair and maintenance chemicals, and generated automotive chemical wastes. The east-adjoining property had been occupied by GGP, an automotive fueling station, since 1960; several historical releases from underground storage tanks (USTs) had occurred at the property. The release cases remained open under oversight by the Alameda County Water District. The UST historically operated by GGP referred to as Tank 6 was located on the eastern portion of the Central Parcel. The Central Parcel Phase I Report identified the following recognized environmental conditions in connection with the Central Parcel:

- The historical use of the Subject Property for automotive repair and other industrial purposes dating back to the early 1970s, which predates regulatory oversight of hazardous material use;
- Poor housekeeping practices observed in the AMPM Tire & Service-occupied tenant space in the northern portion of the 1571 Building;
- An aged clarifier in the southeastern interior of the 1571 Building; and
- Petroleum releases associated with the east-adjoining property and Tank 6 on the Subject Property.

In response to the identified recognized environmental conditions, Farallon performed a Phase II ESA, described in the Central Parcel Phase II Report. The investigation was performed over several phases, and included advancing 26 borings for collection of soil, soil gas, and/or groundwater samples for laboratory analysis. The findings from the Phase II ESA identified

various industrial constituents in subsurface media. The Central Phase II Report concluded that evidence of releases to Subject Property subsurface media from historical use and from the east-adjoining GGP property was identified. However, with the exception of impacts to soil gas, the magnitude of the impact did not appear to adversely affect continued commercial/industrial use of the Subject Property, and the relative absence of impact to groundwater suggested that releases were isolated to the Subject Property. Additional conclusions provided in the Central Parcel Phase II Report included the following:

- The detection of total petroleum hydrocarbons (TPH) as oil-range organics in groundwater collected from boring F-8, located proximate to the former location of Tank 6, suggested that impact from the UST remained in the area. However, it was not practicable to remove under current development. Tank 6 is part of the cleanup action currently being performed by GGP; any required action would fall to the responsible party.
- The detection of TPH as gasoline-range organics (GRO), benzene, and other petroleum constituents in soil gas beneath various locations across the Subject Property was suspected to be related to releases at the adjoining GGP property. GRO is a minor constituent of concern for current and historical use of the Subject Property, but a major constituent of concern for the adjoining GGP property, further supporting the origin of GRO in soil gas as being off the Subject Property.
- Evidence of a release warranting further action from the oil-water separator (clarifier) in the central portion of the 1571 Building was not identified or detected.
- Detections of volatile organic compounds (VOCs) in subslab soil gas samples beneath the 1581 Building suggested that a release had occurred at the Subject Property, which should be further investigated and evaluated to determine whether remedial actions are warranted.

At the time of the Northeast Parcel Phase I Report, the Northeast Parcel was vacant, and had been most-recently occupied by Rich Doss Trucking and used for storing and hauling rolled steel. Records reviewed indicated the Northeast Parcel was occupied by GGP and used for petroleum warehousing in the 1990s. The quantity of combustible material stored in 1994 was 150,000 gallons. Farallon observed staining on the western portion of the Subject Property. The surface of stormwater ponding proximate to the staining contained sheen and/or product. The Northeast Parcel Phase I Report identified the following recognized environmental conditions in connection with the Subject Property:

- Potential releases related to historical use of the Subject Property for storing significant quantities of hazardous material, and observed exterior staining; and
- Potential impact to the Subject Property from historical use on or releases on or from east- and southeast-adjoining properties.

In response to the identified recognized environmental conditions, Farallon performed a Phase II ESA, described in the Northeast Parcel Phase II Report. The investigation was performed over several phases, and included advancing 12 borings for collection of soil, soil gas, and/or groundwater samples for laboratory analysis. The findings from the Phase II ESA identified

evidence of releases to subsurface media beneath the Subject Property from historical Subject Property operations, the east-adjoining property, and/or the southeast-adjoining GGP property. However, with the exception of a single detection of naphthalene in soil gas, the magnitude of the impact did not appear to adversely affect continued commercial/industrial use of the Subject Property. Additional conclusions provided in the Northeast Parcel Phase II Report included the following:

- The detection of TPH in groundwater potentially was related to releases at the Subject Property, the east-adjoining property, or the southeast-adjoining GGP property.
- The detection of naphthalene in the subslab soil gas sample collected beneath the 29469 Building suggested that a limited release had occurred at the Subject Property, which may require further evaluation.

Based on the findings from the previous environmental studies, Farallon provides the following conclusions:

- The presence of VOCs in soil gas beneath the 1581 Building represents a recognized environmental condition in connection with the Subject Property;
- The presence of petroleum constituents in soil gas and groundwater beneath the Northeast Parcel, originating from the Subject Property or adjoining properties, represents a recognized environmental condition in connection with the Subject Property; and
- The presence of petroleum constituents proximate to former Tank 6, operated by GGP on the Central Parcel, represents a recognized environmental condition in connection with the Subject Property.

5.0 SUBJECT PROPERTY AND ADJOINING PROPERTY HISTORY

Farallon reviewed the historical sources listed below as part of this Phase I ESA. The historical sources documented were reasonably ascertainable and practically reviewable during this Phase I ESA. Farallon is not responsible for the accuracy or completeness of the historical sources reviewed.

- Aerial photographs of the Subject Property and its vicinity dated 1939, 1949, 1954, 1958, 1960, 1968, 1970, 1974, 1980, 1982, 1987, 1993, 2003 through 2006, 2009, 2010, 2012, 2014, 2016, 2018, and 2020, obtained from ERIS; and dated 1985, 1993, 2002, and 2003 through 2021 obtained from Google Earth;
- City directories dated 1925, 1929-1930, 1934, 1948, 1956, 1962, 1969, 1976, 1981, 1985, 1990, 1995-1996, 2001-2002, 2006, 2008, 2012, 2016, and 2020 obtained from ERIS; and
- U.S. Geological Survey topographic maps of Hayward, California and San Leandro, California dated 1899, 1915, 1947, 1948, 1959, 1968, 1973, 1980, 1996, 1997, and 2015 obtained from ERIS.

A search for fire insurance maps resulted in notification that there was no coverage for the Subject Property.

5.1 SUBJECT PROPERTY

The Subject Property appeared to be undeveloped and used for limited agricultural purposes from 1899 through 1960. By 1968, some scarring and material storage appeared to exist on the northern portion of the Subject Property. By 1974, the 1593 Building and the central and southern portions of the 1571 Building were present, and some material storage was apparent on the western portion of the Subject Property. Also in 1974, the northeastern portion of the Subject Property appeared to contain numerous trucks and truck trailers, and non-distinguishable materials and a darkened area, potentially staining or stormwater accumulation, at the present location of the 1617 Building. By 1980, the northern portion of the 1581 Building was present; the building was completed in its current configuration by 1982. By 1987, an addition to the northern portion of the 1571 Building was present at the current AMPM Tire & Service-occupied space, and the 29469 Building was present. By 1993, the 1617 Building was present, with the northern portion of the Western Parcel remaining unpaved through 2016.

City directories for the Central Parcel listed the following: for the 1571 address: G&G Enterprises between 1976 and 2012, and Hayward Collision Repair between 2016 and 2020; for the 1581 address: California Brake and Clutch between 1981 and 1996, Creative Touch in 1981, Rago Neon between 1981 and 1985, Smith and Denison between 1981 and 1990, Thels Tire between 1981 and 1985, Labor Sales in 1985, C and J Mechanical in 1990, Alloy Trailers in 1996, DDM between 2001 and 2020, Recycling Research and Development in 2001, Bhooja King between 2006 and 2020, Signature Auto Wholesale between 2006 and 2008, Unique Container in 2008, and Gogee Auto Repair between 2008 and 2020; for the 1593 address: G&G Truck Repair between 1976 and

1996, Dees Trucking in 1976, Middleton Welders Supply between 1976 and 1990, Ultima Plastics in 1981, R and R Oil in 1985, Print USA in 1990, Airgas between 1996 and 2002, Hayward City Tow in 2002, Manada Roofing between 2006 and 2020, Stones and Traditions between 2008 and 2020, DNA Bumpers Plating between 2012 and 2020, and Workshop Pro between 2016 and 2020.

City directories listed Grainger Industrial Supply or an affiliated entity for the Western Parcel address between 1995 and 2016. No other entities were listed under the 1617 Building address in the city directories reviewed.

City directories listed Rich Doss Inc for the Northeast Parcel address in 2001, 2002, 2006, and 2012; and Bay Area Diablo Petroleum Co in 2008.

Based on the Subject Property's historical use for agricultural purposes, residual agricultural chemicals potentially are present in Subject Property soil. However, based on the absence of evidence of concentrated agricultural chemical storage, the potential presence of residual agricultural chemicals in soil represents a de minimis condition under continued commercial use of the Subject Property. Further evaluation may be warranted for soil removed from the Subject Property.

5.2 ADJOINING PROPERTIES

Adjoining properties appeared to be undeveloped and used for agricultural purposes from 1899 through 1960, with Industrial Parkway West and Ruus Road present, but appearing unimproved; early topographic maps showed some residential-style buildings east of Ruus Road. The 1939 aerial photograph depicted residential or farm-style developments on the north-adjoining property and to the northeast across Ruus Road. By 1968, several small- to medium-sized commercial/industrial buildings were present to the north and east, with their configuration changing over time, and Industrial Parkway West and Ruus Road appeared improved. Also by 1968, the south-adjoining property across Industrial Parkway West appeared to be used for significant material storage and industrial activities. Some potential material storage was apparent on the northwest-adjoining property in 1974. By 1980, the north-adjoining property contained several commercial/industrial buildings similar to present. By 1993, further commercial development was apparent on the northwest-adjoining property. By 2003, the east-adjoining property was developed with the current GGP facility; by 2004, the west-adjoining properties are developed with retail and residential buildings.

City directories listed private parties on surrounding properties between 1956 and 1962, and commercial/industrial businesses from 1969 to the present. Several petroleum-related entities were listed for the east-adjoining 1565 Industrial Parkway West address, including Holdener Petroleum Company dating back to 1969, and Bay Area Petroleum in 1990, pre-dating the current GGP. Additional information on surrounding properties, including the east-adjoining GGP property, is provided in Section 7.2, Adjoining Facility Listings.

6.0 STATE AND LOCAL GOVERNMENT AGENCY INTERVIEWS

The objective of interviews with state and/or local government agencies is to obtain information related to recognized environmental conditions in connection with the Subject Property. The interviews consist of questions asked in person, or by email, telephone, and/or online request for records.

6.1 REGIONAL AND STATE AGENCIES

Farallon searched the California Department of Toxic Substances Control EnviroStor database on July 7, 2022, but found no listings for the Subject Property.

Farallon searched the GeoTracker database on July 7, 2022, which contained documents associated with the Central Parcel. According to the documents, previous reports documenting environmental studies conducted at the Central Parcel, summarized in Section 4.5, Previous Environmental Studies, were provided to the Alameda County Department of Environmental Health (ACDEH) for evaluation, which determined that further investigation under ACDEH oversight was required. CenterPoint subsequently entered into a Voluntary Remedial Action Agreement with ACDEH. CenterPoint is evaluating next steps for the Subject Property, which include a data gap investigation, and potential inclusion of findings from the Northeast Parcel into a site-wide investigation.

As part of the previous Phase I ESAs conducted at the Subject Property, referenced in Section 4.5, Previous Environmental Studies, Farallon requested files for the Subject Property from the Bay Area Air Quality Management District, who either was non-responsive, or responded that no files were maintained for the Subject Property.

6.2 COUNTY

Information from ACDEH was obtained from the GeoTracker database, summarized above. As part of previous Phase I ESAs conducted for the Subject Property, records were requested from ACDEH. ACDEH responded with files for the Central Parcel related to waste tire inspections conducted for Mission Tire at the 1593 Building in 2011 and 2015. Both inspections identified violations for inadequate access, and not maintaining waste-tire disposal manifests. A re-inspection in 2015 found the violations had been corrected. ACDEH responded that no files were maintained for the Western Parcel or the Northeast Parcel.

6.3 CITY

Farallon requested files for the Subject Property from the City of Hayward on June 28, 2022 for information subsequent to previous environmental studies. The City of Hayward responded that it had no records for the Central or Northeast Parcels. Records provided for the Western Parcel consisted of a notice of violation for excessive weed growth along the sidewalk and frontage road in 2022 that had been corrected.

During previous Phase I ESAs, Farallon contacted the City of Hayward for files related to the Subject Property. The files provided are described below, presented by parcel.

6.3.1 Western Parcel

The owner of the Western Parcel at the time of its development in 1993 was Balch Enterprises. A Certificate of Occupancy was issued for the Subject Property on December 21, 1993, which identified WW Grainger, Inc. as the occupant.

6.3.2 Central Parcel

City of Hayward files for the Central Parcel consisted of numerous permits dating back to 1971, when initial development plans were submitted for construction of the Subject Property buildings. The majority of the permits were related to tenant improvements over time, and had no environmental implications. Spray booth permits for the 1571 Building address were identified in 2000 for G&G Enterprises, in 2014 for Amaral Trucking, and in 2016 for Hayward Collision.

City of Hayward Fire Department records contained information on hazardous material use at the Central Parcel dating back to 1986. Inspections revealed primarily administrative violations for hazardous material use such as lacking labeling or secondary containment. Most tenants had notices of violation at one point for not renewing permits or submitting required documentation. Brief summaries of tenant information obtained are provided below.

- G&G Enterprises occupied the southern portion of the 1571 Building for automotive body repair from at least 1986 until approximately 2012. Hazardous materials used consisted of various automotive maintenance chemicals. Parts washers and cleaning solvents were referenced, but no indication of chlorinated solvent use was identified. References were made to use of paint thinner, acetone, and methyl ethyl ketone. Two paint-spray booths were used in the southwestern portion of the 1571 Building, as at the present.

- Bay Area Petroleum was referenced on figures from G&G Enterprises documentation as occupying the northern portion of the 1571 Building, with an entrance on the eastern side of the building, similar to the present. The specific use of this portion of the 1571 Building by Bay Area Petroleum was not indicated.

- Eds Repair and Machine was referenced as occupying the central portion of the 1571 Building for automotive repair between 1987 and 1994. Parts washers were used and waste oil was generated by this tenant's operations. A figure included in the file referenced use of up to five cold or hot solvent tanks ranging in size from 15 to 30 gallons.

- California Brake and Clutch was referenced as occupying the 1581 Building (Unit 4) between 1991 and 1998. A dip tank containing methyl ethyl ketone was referenced as in use.

- Smith and Dennison, a construction company, was referenced as occupying the 1581 Building between 1986 and 1993, with waste oil being generated by operations.

- Recycle Research and Development was referenced as occupying a parking area proximate to the 1581 Building. This tenant reportedly stored and blended latex paints for resale. Activities apparently occurred in truck trailers. The operator reportedly went bankrupt and abandoned the paints, which prompted an inspection by the Hayward Fire Department and the California Department of Toxic Substances Control in 2004. The final disposition of the paints was not indicated; no reference to a release was identified.

- Hayward City Tow was referenced as occupying the 1593 Building (Unit 5) between 1999 and 2004, with waste oil being generated during operations.

- R&R Oil Distribution was identified as occupying the 1593 Building (Unit 5) between 1989 and 1998 for distribution of oil products. Activities reportedly included use of a solvent tank, the type of solvent not indicated. An initial inspection of the facility in 1989 indicated "heavy staining" under vehicles, the specific location not indicated.

- Middleton Welders Supply and various similar entities were referenced as occupying the southern portion of the 1593 Building for retail sale of various gases and welding supplies between 1987 and 2002.

6.3.3 Northeast Parcel

City of Hayward Building Department records included original plans for the 29469 Building dated 1983, and a plumbing permit dated 1993. City of Hayward Fire Department records contained information on hazardous material use at the Northeast Parcel dating back to 1992. Early records for the Northeast Parcel contained information for GGP at 1565 Industrial Parkway West, the southeast-adjoining property, but also indicated that GGP was occupying the Northeast Parcel for petroleum warehousing. Records indicated that the Northeast Parcel was occupied by Bay Area Diablo Petroleum in 1992, 1994, and 1995; by GGP in 1995, 1996, and 1997; and Rich Doss in 2017. The quantity of combustible material indicated in 1994 was 150,000 gallons. The Northeast Parcel was noted as vacant in 1999. The only violation identified in the City of Hayward Fire Department files was a formal notice to comply issued to Rich Doss in 2017 to prepare a hazardous material business plan.

7.0 RECORDS REVIEW

EDR conducted a review of environmental regulatory agency database listings to identify reported environmental issues related to the Subject Property and facilities in the Subject Property vicinity. Pertinent regulatory files and/or records associated with the listings were reviewed by Farallon. Farallon used the greater of each approximate minimum search distance from the Subject Property for each of the referenced federal and state environmental databases, as specified in ASTM E1527-13.

Farallon reviewed the EDR Report to note reported facilities in the vicinity of the Subject Property that were considered to have a potential to adversely impact the Subject Property (i.e., are known to have resulted in or are expected to result in a recognized environmental condition). Reported facilities were evaluated with respect to the nature and extent of a given release, the distance of the reported facility from the Subject Property, the geology of the area, and the topographic position of a reported facility with respect to known or expected local and/or regional groundwater flow direction. According to Farallon's knowledge of groundwater flow direction in the region, the groundwater flow direction in the vicinity of the Subject Property likely is west-southwest, toward San Francisco Bay. Farallon cannot determine the actual direction of groundwater flow or the depth to groundwater at the Subject Property without the installation of monitoring wells.

The complete database names for the abbreviations used in this Phase I ESA Report, the descriptions of the databases searched, and the associated search distances from the Subject Property are provided in the EDR Report presented in Appendix D.

7.1 SUBJECT PROPERTY LISTINGS

The EDR Report identified the following facilities on the Subject Property at the address(es) shown:

- **Holdener Petroleum** at 1575 Industrial Parkway West, within the Subject Property address range, was listed in the PRP database. The database identified the company name and address as Holdener Petroleum, 1575 Industrial Parkway, but the site name as Lorentz Barrel & Drum Company with an EPA ID of CAD029295706. An online search of the site name and EPA ID number revealed the listing relates to a National Priority List property at the intersection of Alma Avenue and 10th Street in San Jose, California. Based on this information, the listing appears to apply to a former occupant of the Subject Property, not to the Subject Property.
- **Centerpoint 1571 Industrial Property** at 1571, 1581, 1593 Industrial Parkway West, located on the Subject Property, was identified in the CPS-SLIC database, which relates to the Subject Property inclusion in the Voluntary Remedial Action Agreement with ACDEH for releases identified during previous environmental studies.

- **Caliber Collision** at 1571 Industrial Parkway West, located on the Subject Property, was identified in the HAZNET and HWTS databases for disposal of off-specification, aged, or surplus organics in 2018, with no violations indicated.
- **JRH Mission Tires** at 1593 Industrial Parkway West, located on the Subject Property, was identified in the HAULERs database, with no details provided.
- **Ed's Repair Shop** at 1571 Industrial Parkway West, located on the Subject Property, was identified in the HWTS database for generation of unspecified hazardous waste between 1990 and 1995, with no violations indicated.
- **G&G Enterprises** at 1571 Industrial Parkway West, located on the Subject Property, was identified in the RCRA SQG, CHMIRS, FINDS, ECHO, HAZNET, CERS, EMI, and HTWS databases. The listings are for air emissions due to automotive body, paint, and interior repair, and generation and disposal of oxygenated solvents and unspecified solvent mixtures between 1993 and 2007, with no violations indicated.
- **Hayward Collision Repair** at 1571 Industrial Parkway West, located on the Subject Property, was identified in the EMI, HAZNET, RCRA NonGen, and HWTS databases. The listings relate to disposal of oxygenated solvents, unspecified solvents, waste oil, and mixed oil; and aqueous solutions with total organic residues less than 10 percent in 2013 and 2015; air emissions due to automotive body, paint, and interior repair; and oversight of hazardous material use by the City of Hayward. No violations were indicated in the databases.
- **Hayward City Tow and Repair** at 1593 Industrial Parkway West, located on the Subject Property, was identified in the HWTS, HAZNET, RCRA SQG, ECHO, and FINDS databases as a small quantity generator, with no violations indicated. Waste codes indicated in the databases referenced tetrachloroethene and benzene as constituents generated.
- **Bhamra LLC DBA The Workshop Pro** at 1593 Industrial Parkway West, located on the Subject Property, was identified in the HWTS database for disposal of unspecified wastes. No violations were indicated.
- **AC Complete Auto Repair** at 1593 Industrial Parkway West, located on the Subject Property, was identified in the HWTS database for disposal of unspecified wastes. No violations were indicated.
- **G&G PM Service Truck Repair** at 1593 Industrial Parkway West, located on the Subject Property, was identified in the EDR Hist Auto, HAZNET, and HWTS databases for historical automotive repair between 1975 and 2012, and for disposal of unspecified wastes. No violations were indicated.
- **The Auto Care Shop, also referred to as Caliber Collision**, at 1593 Industrial Parkway West, located on the Subject Property, was identified in the HWTS database for disposal of unspecified wastes. No violations were indicated.

- **Recycling Research and Dev Inc.** at 1581 Industrial Parkway West, located on the Subject Property, was identified in the RCRA VSQG, ECHO, and FINDS databases, with no significant details provided and no violations indicated.
- **Cal Brake** at 1581 Industrial Parkway West, located on the Subject Property, was identified in the HWTS database for disposal of unspecified wastes. No violations were indicated.
- **Gogee Auto Repair** at 1581 Industrial Parkway West, located on the Subject Property, was identified in the HTS database for disposal of unspecified wastes. No violations were indicated.
- **DDM Enterprises** at 1581 Industrial Parkway West, located on the Subject Property, was identified in the HWTS database for disposal of unspecified wastes. No violations were indicated.
- **Royal Motors Wholesale** at 1581 Industrial Parkway West, located on the Subject Property, was identified in the FINDS, ECHO, HWTS, and RCRA NonGen databases for general automotive repair, with no violations indicated.
- **WW Grainger, Inc.** at 1617 Industrial Parkway West, located on the Subject Property, was identified in the FINDS, RCRA NonGen, HWTS, FINDS, ECHO, and HAZNET databases. The listings related to storage of retail-sized quantities of hazardous materials for resale by WW Grainger, Inc., a former occupant, and for disposal of alkaline solutions and an unspecified solvent mixture in 2014. No violations were reported in the databases.
- **Roadstar Trucking** at 1617 Industrial Parkway West, located on the Subject Property, was identified in the HAZNET, and HWTS databases for disposal of other organic solids in 2012, with no violations reported. No corroborating evidence for occupancy of the Western Parcel by Roadstar Trucking was identified during this Phase I ESA, and the listing is considered likely erroneous.
- **Rich Doss Hayward Terminal** at 29469 Ruus Road, located on the Subject Property was listed on the CERS database. The database identified the facility as a Chemical Storage Facility, with no violations indicated.

7.2 ADJOINING FACILITY LISTINGS

ASTM defines “adjoining” as “any real property or properties the border of which is contiguous or partially contiguous with that of the Subject Property, or that would be contiguous or partially contiguous with that of the Subject Property but for a street, road, or other public thoroughfare separating them.” The EDR Report identified the following adjoining facilities in the databases reviewed:

- **Golden Gate Petroleum, Bay Area Holdener Petroleum Company, Bay Area Diablo Petroleum Company, and Eastgate Petroleum DBA Hayward GGP** at 1565 Industrial Parkway West, east-adjoining the Subject Property and up-gradient with respect to assumed groundwater flow in the region, were identified in the AST, CERS HAZ WASTE,

CERS TANKS, CERS, Alameda County CS, SWEEPS UST, FID UST, WDS, LUST, Cortese, EMI, HIST CORTESE, RCRA NonGen, and UST databases. According to the GeoTracker database, the property reportedly has been used as a retail gasoline service station since 1960, and investigations have identified historical releases of gasoline and diesel related to nine USTs removed between 1998 and 1999. The nine USTs contained gasoline, diesel, kerosene, Stoddard solvent, and waste oil. During removal, extensive free-floating petroleum product generally was encountered on the groundwater surface beneath the USTs, and over-excavation of soil was performed. Also during UST removal, free-product recovery trenches were installed on the property, apparently as a remedial measure, although Farallon could not locate reports describing any product-removal actions over time. In 2002, up to nine groundwater monitoring wells were installed to monitor groundwater quality over time. Numerous requests for low-threat closure have been refused by regulators, and several additional investigations have been performed. The latest correspondence on the GeoTracker database consisted of an approved work plan dated January 2022 to install two monitoring wells: one in Industrial Parkway West south of the 1593 Building; and one on the up-gradient portion of the adjoining property.

One of the nine USTs, referred to as Tank 6, was located on the Subject Property. Tank 6 was a 1,000-gallon waste-oil UST. TPH as diesel-range organics was detected at a concentration of 1,300 milligrams per kilogram in a soil sample collected during removal of Tank 6. Soil samples were not analyzed for all constituents of concern typically associated with waste oil such as VOCs and metals. According to documents reviewed in the GeoTracker database, impacted soil proximate to Tank 6 could not be removed due to concerns about the foundation integrity of the 1571 Building. Groundwater was not encountered in the Tank 6 excavation; no groundwater sampling proximate to or down-gradient of this UST was identified in the regulatory record. Monitoring well MW-5 was installed on the Subject Property north of the 1571 Building, generally up-gradient of the former Tank 6 location, which historically has had low to non-detect concentrations of petroleum constituents. Additional testing performed proximate to Tank 6 and associated conclusions are summarized in Section 4.5, Previous Environmental Studies.

- **Automobile & Truck Pros** at 29501 Ruus Road, east-adjoining the Subject Property and up-gradient with respect to documented groundwater flow in the region, was identified in the RCRA-SQG, FINDS, ECHO, and EDR HIST AUTO databases. The database listings relate to hazardous material use or hazardous waste generation related to automotive repair activities, which are ongoing at this location.

7.3 SURROUNDING FACILITY LISTINGS

Reported facilities within 0.25 mile up-gradient or 0.125 mile cross-gradient of the Subject Property are considered to have a potential to have impacted the Subject Property, depending on the depth and the directional flow of groundwater. Facilities that were listed in the EDR Report but not identified as a reported facility (e.g., a facility listed as a hazardous waste generator but not

as having had a release), and facilities that were listed as "Closed" were not considered to have a potential to have impacted the Subject Property.

Based on the information provided in the EDR Report and regulatory files, their topographic location and distance relative to the Subject Property, and/or known or presumed soil and groundwater conditions in the vicinity of the Subject Property, none of the surrounding facilities identified was considered to represent a recognized environmental condition in connection with the Subject Property.

7.4 UNMAPPABLE LISTINGS

EDR identified two facilities as "unplottable" that EDR was unable to map due to inaccurate or inadequate address information. Farallon located these unplottable facilities as practicable and, according to the information provided by EDR, they are not located within the respective search radii. The unplottable facilities located do not represent a recognized environmental condition in connection with the Subject Property.

8.0 SUBJECT PROPERTY INTERVIEWS

Farallon attempted to interview individuals familiar with the Subject Property, including owners, operators, and occupants, to obtain additional Subject Property information. Interviews were conducted in person, in writing, or by telephone. The individuals interviewed and their responses are discussed in the following sections.

8.1 INTERVIEW WITH SUBJECT PROPERTY REPRESENTATIVE

On July 7, 2022, Farallon interviewed Paul Olarte, representative of the Subject Property owner. The following information was obtained from this interview:

- Paul Olarte has managed the Subject Property on behalf of the owner since July 2021.
- No USTs are present at the Subject Property.
- With the exception of environmental conditions identified in previous environmental studies, Paul Olarte was not aware of any reportable spills or releases at the Subject Property.

Paul Olarte stated as owner representative of the Subject Property that there have not been any pending, threatened, or past:

- Litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property;
- Administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property, with the exception of conditions being evaluated under the oversight of ACDEH; or
- Notices from a governmental entity regarding violations of environmental laws or liability relating to hazardous substances or petroleum products.

8.2 INTERVIEW WITH SUBJECT PROPERTY TENANT(S)

On July 6, 2022, Farallon interviewed various tenant representatives during the reconnaissance of the Subject Property. The tenant representatives indicated they were not aware of hazardous material releases on the Subject Property.

9.0 SITE RECONNAISSANCE

Farallon conducted a site reconnaissance on July 6, 2022 to observe the Subject Property for physical evidence of recognized environmental conditions. The methodology used for the site reconnaissance and the observations made and limiting conditions encountered are discussed below. Photographs taken during the site reconnaissance are presented in Appendix B.

9.1 SITE RECONNAISSANCE METHODOLOGY

Weather conditions at the time of the reconnaissance were cloudy, with a temperature of approximately 65 degrees Fahrenheit. Farallon conducted a walk around the entire perimeter of the Subject Property and inspected accessible interior portions of the Subject Property buildings.

9.1.1 Limiting Conditions

Limiting conditions encountered during this Phase I ESA were the presence of vehicles and equipment on exterior portions of the Subject Property that prevented Farallon from observing the entire ground surface of the Subject Property, and the presence of vehicles, furniture, and equipment in the Subject Property buildings that prevented Farallon from observing entire interior floor surfaces. Farallon also could not access the Bhooja King-occupied tenant space in the 1581 Building, or the A&R Tools and Mission Tires occupied tenant spaces in the 1593 Building. Based on information obtained from the Subject Property representative and recent previous environmental studies, these limiting conditions are not expected to affect the conclusions of this Phase I ESA Report.

9.2 INTERIOR OBSERVATIONS

Farallon's comments related to observations of the interior of the Subject Property buildings during the site reconnaissance are provided in Section 9.2.1.

INTERIOR OBSERVATIONS	YES	NO
Odor		X
Heating/Cooling System		X
Drain(s) and/or Sump(s)	X	
Staining and/or Corrosion	X	
Storage Tank(s), Vent Pipe(s), Fuel Port(s), and/or Fill Pipe(s)	X	
Clarifier(s)	X	
Discharge Area		X
Drum(s) and/or Other Container(s)	X	

INTERIOR OBSERVATIONS	YES	NO
Pool(s) of Liquid		X
Automobile Lift(s)	X	
Monitoring Well(s)		X
Hazardous Material(s) and/or Petroleum Product(s)	X	
Hazardous Waste	X	
Transformer(s)		X

9.2.1 Interior Observation Comments

Drain(s) and/or Sump(s)

Farallon observed a trench drain in the AMPM Tire & Service-occupied tenant space that appeared to contain petroleum staining. This drain is believed to be connected to the sanitary sewer system, but confirmation was not obtained. A drain connected to a clarifier was observed in the Carstar-occupied space in the 1571 Building. It should be noted that significant clutter was observed in numerous tenant spaces that may have obscured other interior drains at the Subject Property.

Staining and/or Corrosion

A stained oily sink was observed in the Royal Motors-occupied space. Significant staining was observed proximate to waste oil storage in the AMPM Tire & Service-occupied tenant space. De minimis staining on concrete was observed at numerous locations in the Subject Property buildings, with absorbent being used on some stained areas.

Storage Tank(s), Vent Pipe(s), Fuel Port(s), and/or Fill Pipes

Farallon observed two approximately 500-gallon waste-oil ASTs in the AMPM Tire & Service-occupied tenant space. Significant staining on the concrete foundation was observed around the tanks.

Clarifier(s)

A clarifier or oil-water separator was observed in the southeastern interior of the 1571 Building. The clarifier consisted of a metal-capped single-stage sump that was not accessible during the site reconnaissance. According to Carstar representatives, the clarifier is connected to a nearby drain and is periodically cleaned of sediments by an outside contractor. Previous investigations of this clarifier are summarized in Section 4.5, Previous Environmental Studies.

Drum(s) and Other Container(s)

Farallon observed numerous drums containing new and used automotive chemicals in the majority of the tenant spaces. In general, secondary containment was not being used, and de minimis

staining was observed proximate to the drums and containers. Open 5-gallon containers of waste oil were observed in the AMPM Tire & Service-occupied tenant space. Retail-sized containers of automotive maintenance chemicals also were observed in most tenant spaces.

Automobile Lift(s)

Farallon observed several aboveground automobile lifts in buildings on the Subject Property. No evidence of below-ground automobile lifts was observed.

Hazardous Material(s) and/or Petroleum Product(s)

Farallon observed petroleum product storage in most tenant spaces, with larger-quantity storage in the 1571 Building. Parts cleaners containing petroleum-based solvents were observed in the 1571 and 1593 Buildings. Isocyanate foam products used for insulating structures were observed in the 1617 Building.

Hazardous Waste

Hazardous wastes observed were summarized in various sections above.

9.3 EXTERIOR OBSERVATIONS

Farallon's comments related to observations of the exterior of the Subject Property during the site reconnaissance are provided in Section 9.3.1.

EXTERIOR OBSERVATIONS	YES	NO
Odor		X
Staining and/or Corrosion	X	
Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)		X
Drum(s) and/or Other Container(s)	X	
Pool(s) of Liquid		X
Hazardous Material(s) and/or Petroleum Product(s)		X
Hazardous Waste		X
Pit(s), Pond(s), and/or Lagoon(s)		X
Stressed Vegetation		X
Solid (Nonhazardous) Waste—Evidence of Dumping	X	
Wastewater/Clarifier	X	
Domestic Water	X	
Water Well(s)	X	

EXTERIOR OBSERVATIONS	YES	NO
Septic/Sewer System	X	
Stormwater	X	
Transformer(s)	X	
Significant Amount of Fill Material		X

9.3.1 Exterior Observation Comments

Staining and/or Corrosion

Farallon observed de minimis staining throughout the Subject Property that appeared to be from parked vehicles, equipment, or incidental spills. More-significant staining was observed on the western exterior of the AMPM Tire & Service-occupied tenant space.

Drum(s) and/or Other Container(s)

Farallon observed an open oil pan and 5-gallon bucket of waste oil adjacent to the Manada Roofing exterior storage area; oil-stained asphalt was observed adjacent to the open containers. Several other drums and containers of vehicle maintenance products were observed at various tenant spaces throughout the Subject Property. No evidence of significant release from these containers was observed.

Solid (Nonhazardous) Waste—Evidence of Dumping

Farallon observed exterior storage of scrap automotive body parts and used tires at numerous locations throughout the Subject Property.

Wastewater

Farallon observed automobile-washing activities on the eastern exterior of the Royal Motors-occupied tenant space. Wastewater generated from the washing activities traveled via sheet flow to a stormwater catch basin east of the 1581 Building. The catch basin receiving the wastewater appeared heavily silted from the washing activities, and a slight sheen was observed on the wastewater.

Domestic Water

Domestic water is supplied to the Subject Property by the East Bay Municipal Utility District.

Water Well(s)

Farallon observed a groundwater monitoring well on the eastern portion of the Central Parcel, north of the 1571 Building, which was installed during investigation of releases on the east-adjoining property. The interior of the monitoring well box was not accessible during the site reconnaissance.

Septic/Sewer System

Sanitary sewage generated at the Subject Property discharges to the municipal sanitary sewer system.

Stormwater

Stormwater travels via sheet flow to several catch basins throughout the Subject Property that discharge to the municipal storm sewer system. A stormwater bioswale consisting of a recessed vegetation area with surrounding concrete berm was observed on the Western Parcel. The bioswale receives stormwater via sheet flow that enters gaps in the concrete berm. Stormwater ponding was observed in the recessed dock on the Northeast Parcel.

Transformer(s)

Farallon observed pole-mounted transformers along Industrial Parkway West, south of the Subject Property.

10.0 FINDINGS AND OPINIONS

Based on the Subject Property historical use for agricultural purposes, residual agricultural chemicals potentially are present in Subject Property soil. However, based on the absence of evidence of concentrated agricultural chemical storage, the potential presence of residual agricultural chemicals in soil represents a de minimis condition under continued commercial use of the Subject Property. Further evaluation may be warranted for soil removed from the Subject Property.

De minimis petroleum staining associated with long-term automotive repair activities was observed at several interior and exterior locations at the Subject Property.

The Subject Property has a long history of automotive repair activities that predate regulatory oversight of hazardous material use, and a history of poor housekeeping practices. The east-adjoining GGP property has been operated as an automotive fueling station since 1960; several releases of petroleum constituents from USTs historically present at this property have been identified. The UST historically operated by GGP referred to as Tank 6 was located on the eastern portion of the Central Parcel. Based on these findings, investigations were previously performed on the Central and Northeast Parcels, which identified evidence of releases of industrial constituents, primarily at concentrations that do not adversely affect continued commercial use of the Subject Property. However, conditions were identified that may cause regulators to require further actions, which represent recognized environmental conditions in connection with the Subject Property. CenterPoint has entered into a Voluntary Remedial Action Agreement with ACDEH to further evaluate environmental releases that have impacted the Subject Property.

11.0 CONCLUSIONS

Farallon conducted a Phase I ESA for the property at 1571, 1581, 1593, and 1617 Industrial Parkway West, and 29469 Ruus Road in Hayward, California in conformance with the scope and limitations of ASTM E1527-13. Any exceptions to or deletions from this practice are described in Section 1.5, Deviations.

This assessment identified the following recognized environmental conditions in connection with the Subject Property:

- The presence of VOCs in soil gas beneath the 1581 Building;
- The presence of petroleum constituents in soil gas and groundwater beneath the Northeast Parcel, originating from the Subject Property or adjoining properties; and
- The presence of petroleum constituents proximate to Tank 6 formerly on the Central Parcel and operated by GGP.

13.0 LIMITATIONS

13.1 GENERAL LIMITATIONS

The conclusions contained in this report/assessment are based on professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location. The conclusions contained herein are subject to the following inherent limitations:

- **Accuracy of Information.** Farallon obtained, reviewed, and evaluated certain information used in this report/assessment from sources that were believed to be reliable. Farallon's conclusions, opinions, and recommendations are based in part on such information. Farallon's services did not include verification of its accuracy or authenticity. Should the information upon which Farallon relied prove to be inaccurate or unreliable, Farallon reserves the right to amend or revise its conclusions, opinions, and/or recommendations.
- **Reconnaissance and/or Characterization.** Farallon performed a reconnaissance and/or characterization of the Subject Property that is the subject of this report/assessment to document current conditions. Farallon focused on areas deemed more likely to exhibit hazardous materials conditions. Contamination may exist in other areas of the Subject Property that were not investigated or were inaccessible. Subject Property activities beyond Farallon's control could change at any time after the completion of this report/assessment.

For the foregoing reasons, Farallon cannot and does not warrant or guarantee that the Subject Property is free of hazardous or potentially hazardous substances or conditions, or that latent or undiscovered conditions will not become evident in the future. Farallon's observations, findings, and opinions can be considered valid only as of the date of the report.

This report/assessment has been prepared in accordance with the contract for services between Farallon and CenterPoint Properties Trust and currently accepted industry standards. No other warranties, representations, or certifications are made.

13.2 LIMITATION ON RELIANCE BY THIRD PARTIES

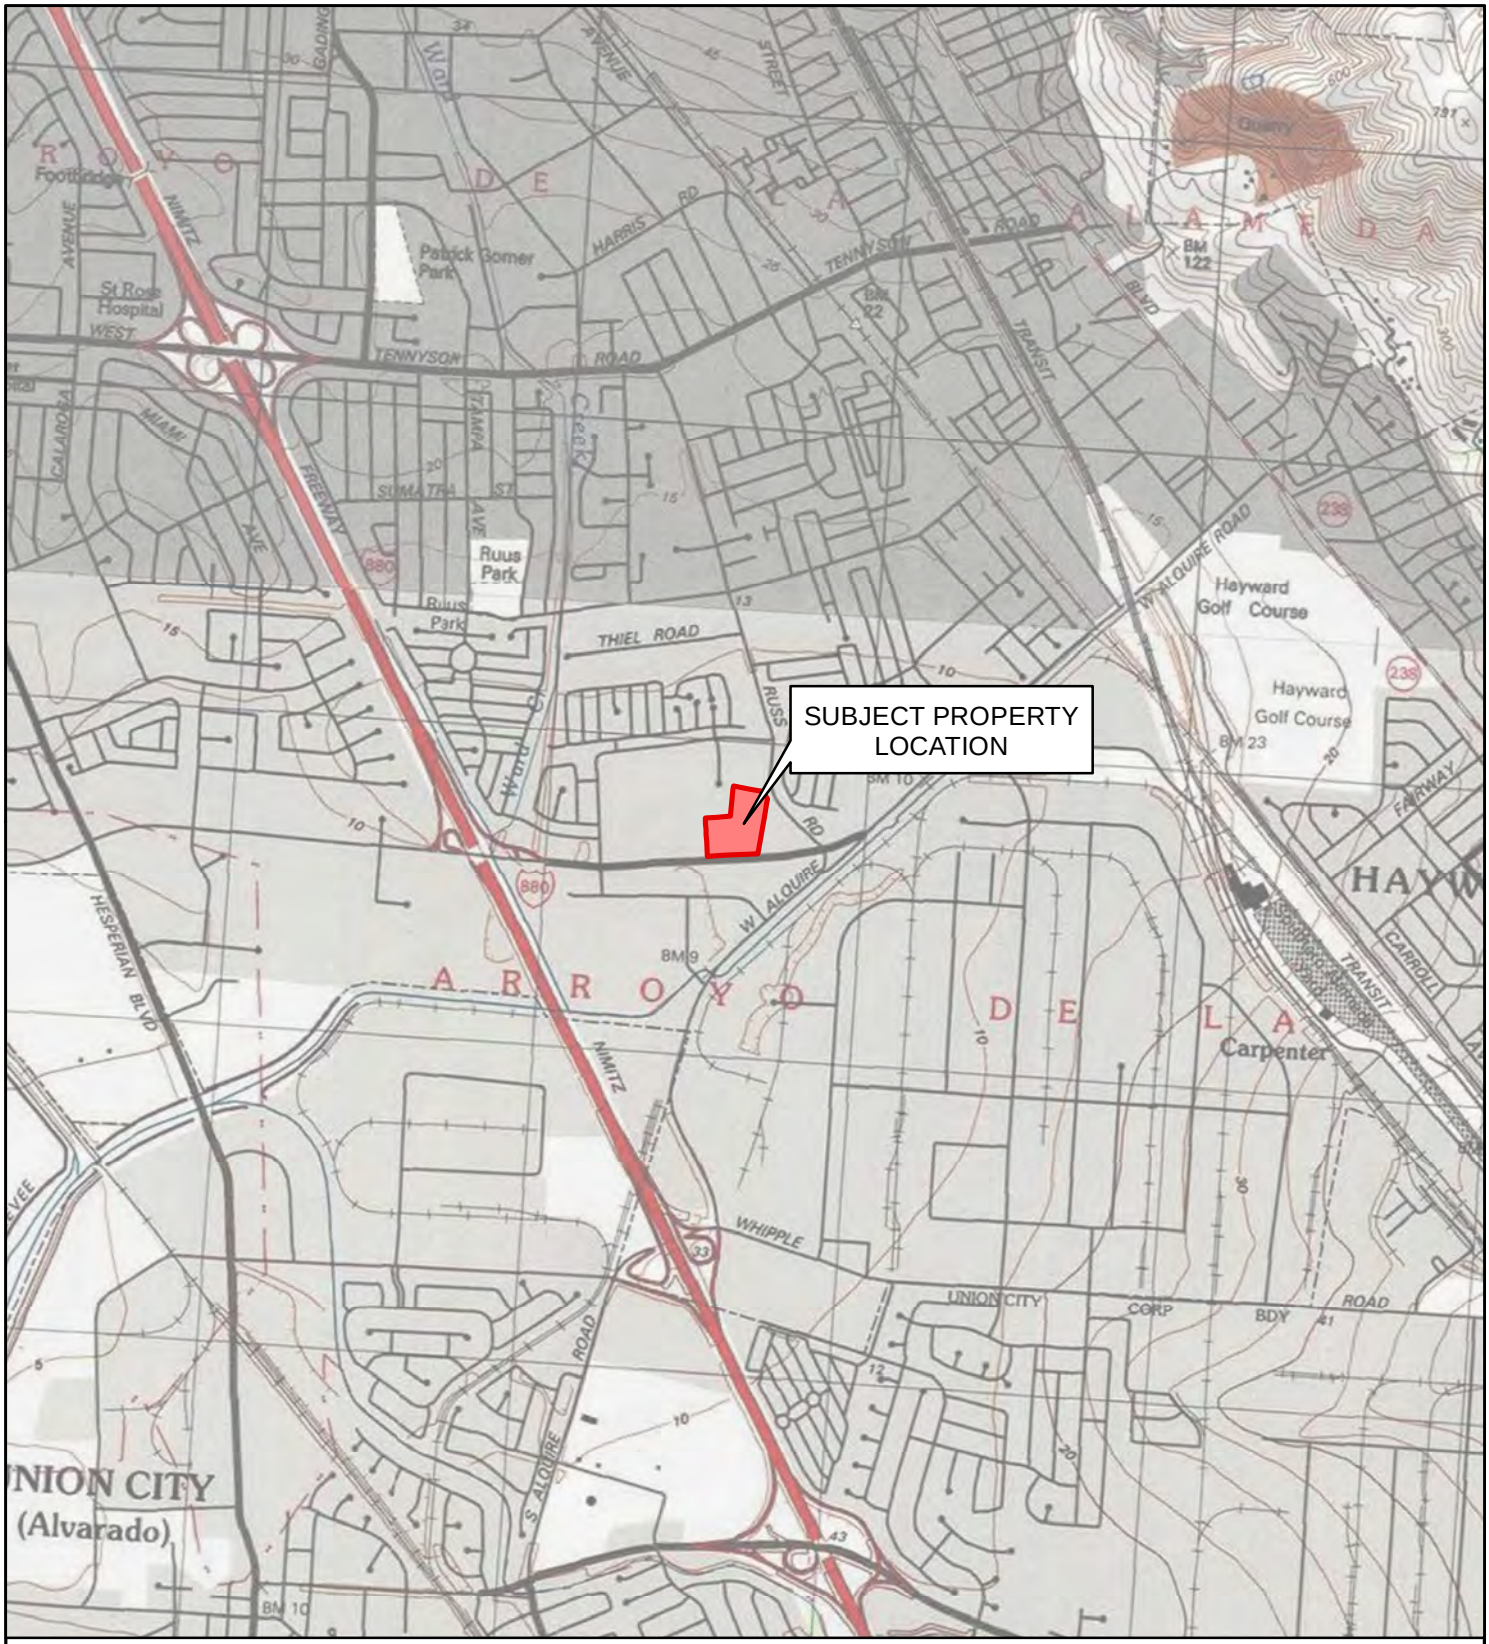

Reliance by third parties is prohibited. This report/assessment has been prepared for the exclusive use of CenterPoint Properties Trust to address the unique needs of CenterPoint Properties Trust at the Subject Property at a specific point in time.

This is not a general grant of reliance. No one other than CenterPoint Properties Trust may rely on this report unless Farallon agrees in advance to such reliance in writing. Any unauthorized use, interpretation, or reliance on this report/assessment is at the sole risk of that party, and Farallon will have no liability for such unauthorized use, interpretation, or reliance.

Farallon PN: 1353-070

SCOTT ALLIN, R.E.P.A. BS Physical Science (Hydrology)
Principal Environmental Scientist 30 years' experience

Scott Allin has 30 years of project and program management experience in the evaluation and reporting of environmental liability associated with the sale or Brownfields redevelopment of impaired properties. He has supported the needs of developers and others in the acquisition of Cost Cap and Finite Risk environmental insurance to manage long-term environmental risks. Scott has provided clients with value-added due diligence services for single properties and large multimillion-dollar mixed-use portfolios, both nationally and internationally. He has provided guidance for evaluating environmental risks during complex mergers and acquisitions, and management services for implementation of remedial actions, asbestos abatement, environmental audit programs, and environmentally sensitive property improvements.

CRAIG WARE, R.G., L.G. BA Geology
Principal Hydrogeologist 30 years' experience

Craig Ware has 30 years of experience in the geological and environmental consulting field, successfully working with clients along the West Coast and nationwide. For over 22 years, Craig has focused his expertise on the Pacific Northwest, teaming with both private and public sector clients on a wide variety of acquisition, cleanup, reclamation, and redevelopment projects. Specialty areas include environmental due diligence; Remedial Investigation and Feasibility Studies; human health and ecological risk assessment; remedial action and removal action planning and implementation; landfill redevelopment and methane mitigation; redevelopment planning and Brownfield investigation and cleanup; and reclamation planning, permitting, and habitat improvements.

APPENDIX C
USER QUESTIONNAIRE

PHASE I
ENVIRONMENTAL SITE ASSESSMENT REPORT
1571, 1581, 1593, and 1617 Industrial Parkway West, and 29469 Ruus Road,
Hayward, California

Farallon PN: 1353-070

PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the Phase I Environmental Site Assessment (Phase I ESA) Report user must provide the following information (if available) to the Environmental Professional (Farallon Consulting, L.L.C. [Farallon]). Failure to provide this information could result in the determination that "all appropriate inquiry" has not been completed.

This Phase I Environmental Site Assessment (ESA) was prepared in accordance with ASTM E1527 (herein defined as "the ASTM Standard"). Please state any additional scope items outlined in the Phase I ESA proposal, if applicable:

Farallon understands that the User of the Phase I ESA Report is seeking to follow the standards set forth in the ASTM Standard to complete an environmental assessment of the Subject Property. The User is defined as the party seeking to use the ASTM Standard to complete a Phase I ESA of the Subject Property. The User has specific responsibilities for fulfilling the ASTM Standard requirements to help identify the possibility of recognized environmental conditions in connection with the Subject Property. These responsibilities do not require the technical expertise of an Environmental Professional, and are to be provided by the User. The completed User Questionnaire will be included in the Phase I ESA Report.

■ USER INFORMATION

Client (**User**) Name: CenterPoint Properties Address: 1808 Swift Drive, Oak Brook, IL 60523	Client Telephone: 224-315-2809

Reliance: The Phase I ESA Report will be prepared for the sole use of the User. Please be advised that Farallon limits third parties' right to rely on the Phase I ESA Report. Farallon may issue a letter granting the right to rely on terms Farallon has pre-approved. However, in no case will Farallon grant reliance to the Small Business Administration.
Farallon is not obligated to provide reliance. All requests for the right to rely should be discussed prior to commencement of the Phase I ESA.

Please identify all parties who intend to use the Phase I ESA Report for informational purposes:
CenterPoint Properties

■ SUBJECT PROPERTY INFORMATION

Subject Property Name (if any):
Subject Property Address: 29469 Ruus Road, Hayward, Ca

Parcel No(s).:

Client Project/Asset #: 101447

Subject Property Contact Information Name: Email: Relation to the Subject Property:	Phone:

What is the reason this Phase I ESA is required?

Property Transaction: ☐ Sale ☐ Purchase ☐ Exchange
Other (specify):

The U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries Final Rule (40 CFR Part 312) requires that the below tasks and questions be performed by or on behalf of a party (i.e., User) seeking to qualify for an LLP to the Comprehensive Environmental Response, Compensation, and Liability Act (CERLA) liability. This purpose of this questionnaire is to assist the User in gathering and providing information that may be material to identifying recognized environmental conditions. The User should provide the following information to the Environmental Professional. Failure to conduct these tasks and inquiries could result in a determination that All Appropriate Inquiries is not complete.

(1) Environmental cleanup liens that have been filed or recorded against the Subject Property (Part 312.25 of Title 40 of the Code of Federal Regulations [40 CFR 312.25])

Any environmental liens and activity and use limitations (AULs) known to the **User** should be reported to the Environmental Professional conducting a Phase I ESA. The **User** should either (1) engage a title company, real estate attorney, or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens and AULs currently recorded against or relating to the Subject Property, or (2) negotiate such an engagement of a title company, real estate attorney, or title professional as an addition to the scope of work of the Environmental Professional.

A lien search obtained through a database company at the request of the User does not replace the User obligations to review Land Title and Judicial records for the Subject Property as described in ASTM E1527.

Are you aware of any environmental cleanup liens against the Subject Property that have been filed or recorded under federal, tribal, state, or local law? If yes, please provide details to the best of your knowledge.

No

(2) Activity and use limitations that are in place on the Subject Property or that have been filed or recorded in a registry against the Subject Property (40 CFR 312.26)

ASTM E1527 does not impose on the Environmental Professional the responsibility to undertake review of recorded land title records or judicial records for environmental liens and activity use limitations.

Are you aware of any activity and use limitation (such as engineering controls, land use restrictions, or institutional controls) that are in place at the Subject Property and/or have been filed or recorded in a registry under federal, tribal, state, or local law? If yes, please provide details to the best of your knowledge.

No

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the User of the Phase I ESA Report, please indicate any specialized knowledge or experience you have related to the Subject Property or nearby properties. For example, are you involved in the same line of business as the current or former occupant(s) of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

(4) Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property?

Yes, Fair

If you conclude that there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?

No

(5) Commonly known or reasonably ascertainable information about the Subject Property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help Farallon Consulting, L.L.C. to identify conditions indicative of a chemical or other release or threatened release? For example, as user of the Phase I ESA Report:

Do you know the past use(s) of the Subject Property? (If yes, please specify.)

No

Do you know of a specific chemical(s) present at the Subject Property, or present at one time? (If yes, please specify.)

No

Do you know of a chemical and/or other spill(s) or release(s) that has taken place at the Subject Property? (If yes, please specify.)

No

Do you know of any environmental cleanup(s) that has taken place at the Subject Property? (If yes, please specify.)

No

(6) The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the Subject Property, is there any obvious indicator(s) that points to the presence or likely presence of contamination at the Subject Property? (If yes, please specify.)

No

This User Questionnaire was completed by:

Name: Nathalie Henry

Address: 1808 Swift Drive, Oak Brook, IL 60523

Phone: 224-315-2809

Relationship to User:

☐ User ☐ Legal Counsel ☐ Lender ☐ Other (specify):

Additional information about the Subject Property, if known.

■ OWNERS

Current Owner(s): CenterPoint properties

Previous Owner(s):

■ OCCUPANTS/TENANTS AND OPERATIONS

Current Occupant(s)/Tenant(s): All Bay Tire 3/1/22 - MTM

Current Operations:

Previous Occupant(s)/Tenant(s):

Former Operations:

■ PREVIOUS INVESTIGATIONS

Have previous environmental investigations been conducted at Subject Property?
If yes, have they been provided to Farallon Consulting, L.L.C.?

■ SUBJECT PROPERTY ENVIRONMENTAL CONDITIONS

Are you aware of any of the following environmental conditions at the Subject Property, either current or former?

Environmental Condition/Issue	**Response**	**Comment if Yes Response**
Aboveground Storage Tank	☐ Yes x☐ No	
Underground Storage Tank	☐ Yes x☐ No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

MERCURY TECHNOLOGIES EPA ID:: CAD981641319	***30677 HUNTWOOD AVE***	***E 1/2 - 1 (0.516 mi.)***	***Q124***	***645***

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 2

RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 6 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, has revealed that there is 1 WA SWF/LF site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 33 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

C & J AUTOMOTIVE REP	29559 RUUS RD	E 0 - 1/8 (0.061 mi.)	F65	171

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Description: Failure to obtain a valid permit to operate from the UPA including but not limited to unpaid permit fees.
Violation Notes: Returned to compliance on 04/01/2020. Facitiy does not have a valid permit to operate due to open violations that need to be corrected no

EASTGATE PETROLEUM DBA HAYWARD GGP (Continued) **S121739410**

later than March 27, 2020.
Violation Division: Hayward City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 113443
Site Name: EASTGATE PETROLEUM DBA HAYWARD GGP
Violation Date: 02-27-2020
Citation: HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)
Violation Description: Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes: Returned to compliance on 03/31/2020. About a cup of red diesel was observed at the red diesel sump (T4) at the time of the inspection on February 10,2020. Technician removed the diesel from the sump before leaving the facility that day. This is a repeated violation noted in previous inspection report/pictures. Facility is to investigate the source of the red diesel in this sump and indicate the actions taken to correct this issue.
Violation Division: Hayward City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 113443
Site Name: EASTGATE PETROLEUM DBA HAYWARD GGP
Violation Date: 02-21-2019
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 02/21/2019. The West Diesel (T-1) Tank Sump senor(model 208) L-10 had a loose wire and when pulled out of the sump came out of the sensor. The Veeder Root did not read the unconnected sensor. When investigated it was determined that the L-10 sensor was not programmed into the veeder root. The service technician changed replaced the old sensor and reprogrammed the L-10 sensor into the Veeder Root. The sensor was then retested and went into alarm at the Veeder Root panel and is functioning normally.
Violation Division: Hayward City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 113443
Site Name: EASTGATE PETROLEUM DBA HAYWARD GGP
Violation Date: 02-27-2020
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain

EASTGATE PETROLEUM DBA HAYWARD GGP (Continued) **S121739410**

	records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 03/26/2020. 1. During the first attempt on February 10,2020 the spill bucket of tank 3 (91) failed the lake test due to a bad drain valve. Technician replaced the drain valve and retested the spill bucket and test passed. This spill bucket was tested again during the second attempt on February 26, 2020 and passed the test. All spill buckets, except the red diesel, were tested again during the second attempt with passing results. No further action required . 2. During the first attempt on February 10, 2020 was observed that the spill bucket of the red diesel tank does not hold 5 gallons and needs to be replaced within 30 daysn no later than March 27, 2020. A permit from the Hayward Fire Department is required to be obtained prior to do the work.

Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 03/06/2018. 2/2/18- All Line leak detectors are Mechanical Line leak Detector (MLLD). Inspection: Only the T1 Diesel West MLLD was tested and functionality confirmed (Passed). All other MLLD's not tested due to time restraints. All other MLLD's will be tested on 2/26/18. 2/26/18- NO MLLD's were tested on 2/26/18 due to manufacturer parts did not come in on time. This was rescheduled for 3/2/18. 3/2/18- The following MLLD's were tested and functionality was confirmed T1 Diesel East, T2 87, T3 91, T4 Red Diesel, all Passed. T5 87 and T6 91 detected leak but upon retuning from slow flow did not hold leak rate (Failed) and needed to be adjusted. Due to time restraints this was not done until 3/6/18. 3/6/18- The last two MLLD's were tested and functionality was confirmed. T5 87 and T6 91 after adjustment both Passed.

Eval Notes: 1. Underground Storage Tank inspection failed. See inspection report for more details. All current violations shall be corrected by March 27, 2020. 2. This is a pressurized Underground Storage Tank (UST) System which comprises six double walled Trusco tanks installed on Jan 1, 1990. T1 (Diesel) is the only stand-alone tank of 20,000 Gallons with two turbines sumps noted as East and West. T2, T3 & T4 are compartmentalized; T2 (87):8,000 gallons T3 (91):6,000 Gallons, T4(RD):6,000 gallons. T5 &T6 is a split tank. T5(87):12,000 gallons and &T6(91):8,000 gallons. All Line Leak Detectors are mechanical (MLLDs). Five spill buckets are OPW direct buried. All annular sensors are 420 (Dry), all liquid sensors are (208). All annular sensors, all liquid sensors and all emergency shut off switches (three) provide turbine positive shut down of all tanks. There are 23 sensors set up as L1: Annular T5(87) and T6(91), L2: Annular T4(RD), L3: Annular T1 (Diesel) [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOLDEN GATE PETROLEUM (Continued) **S103633190**

RB Case Number: 01-2466
Local Agency: ALAMEDA COUNTY WATER DISTRICT
File Location: Not reported
Local Case Number: TT0730
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Benzene, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates
Site History: The subject property (Site) is currently an operating gasoline and diesel fuel station located along the north side of Industrial parkway West in an industrial and commercial zone of Hayward, California. The Site is surrounded by developed, paved, asphalt-covered parking lots and driveways for commercial use. 300 feet to the north, across Ruus Road is an extensive residential mobile-home park. The Site has been used for gasoline retail since 1960. Three (3) 20,000-gal fiberglass USTs (underground storage tanks) are located on Site for the use of diesel and gasoline storage. Gasoline, total petroleum hydrocarbons as diesel (TPHd), MTBE (methyl tert butyl ethylene)/or TAME (tertiary amyl methyl ether) were reported in one or more water samples collected from shallow depths of exploratory drilling by cone penetrometer testing (CPT). One sample contained 1,020 ug/L of MTBE, while another at shallow depth 3,690 ug/L MTBE.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	149544
Site Name:	Ruus Road Flood Control Pump Station
Violation Date:	05-29-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes,

RUUS ROAD FLOOD CONTROL PUMP STATION (Continued) **S121746172**

engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: Returned to compliance on 11/20/2019. three out of four spill buckets failed to hold 5 gallons test liquid
Violation Division: Hayward City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 149544
Site Name: Ruus Road Flood Control Pump Station
Violation Date: 05-14-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill

PETROLEUM & CONVENIENCE, INC. (Continued) **S121788175**

prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 10/19/2021. These are the comments noted in the 2019 UST Inspection Report: Facility conducted the overfill prevention inspection on 10/8/18 and only inspected the Automatic Tank Gage (ATG) for the audio/visual alarm and not the flapper valve. Per facilities CERS submittal only one overfill prevention was tested when both should have been tested. All tanks in CERS list both fill tube shut-off valve (Flapper valve) and external audio/visual alarm to satisfy the overfill prevention requirements of section 2635(c)(1) and are listed in the tank construction section on the tank information page of the CERS submittal. Both must be inspected or the CERS submittal must be correct to reflect which overfill prevention type is being used ***This is an open violation which has not yet been corrected*** Facility is to complete the inspection of the flapper valves installed in the tanks as part of the overfill prevention no later than 12/15/2020. If this inspection has been conducted, [Truncated]

Violation Date: 10-03-2019
Citation: 23 CCR 16 2665(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665(b)
Violation Description: "Failure to submit a copy of the overfill prevention equipment inspection results on the Overfill Prevention Equipment Inspection Report Form to the UPA within 30 days after the inspection. "
Violation Notes: Returned to compliance on 10/19/2021. Facility conducted the overfill prevention inspection on 10/8/18 and only inspected the Automatic Tank Gage (ATG) for the audio/visual alarm and not the flapper valve. Per facilities CERS submittal only one overfill prevention was tested when both should have been tested. All tanks in CERS list both fill tube shut-off valve (Flapper valve) and external audio/visual alarm to satisfy the overfill prevention requirements of section 2635(c)(1) and are listed in the tank construction section on the tank information page of the CERS submittal. Both must be inspected or the CERS submittal must be correct to reflect which overfill prevention type is being used. Complete by 11/2/2019.

Description:	Caller states a battery used to start a pump ruptured which resulted in battery acid being released to the floor. Caller states approximately 2 gallons of the release went into the wet well used for run-off. Caller states the well contains approximately 100,000 gallons of run-off water. Caller states two employees secured the pumps and placed baking soda on the

ACFC-INDUSTRIAL PUMP STATION (Continued) **S106229860**

floor and evacuated as a precaution. Caller states a contractor is on scene conducting clean-up.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: IGNITABLE WASTE

AERC ACQUISITION CORP DBA AERC RECYCLING SOLUTIONS, A CLEAN (Continued) **1000182234**

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D011
Waste Description: SILVER

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U151
Waste Description: MERCURY

Commercial Offsite Facility Types:	Battery Recyclers, EW / PC / Plastics, Fluorescent Lighting
Quarterly Update:	QUARTERLY UPDATE September 2021 to December 2021 In December 2020, AERC Recycling Solutions (AERC) was assigned a Violation Scoring Procedure (VSP) compliance tier assignment of "Conditionally Acceptable". As a result, they are required to retain the services of an independent auditor to evaluate facility compliance, and submit audit reports to DTSC. AERC has submitted the first third-party auditor report followed by a compliance implementation plan which the Department has approved on October 14, 2021. AERC must now submit the second third-party auditor report no later than one year after the first report was submitted. FACILITY DESCRIPTION/ HISTORY The AERC.COM, INC. facility (Facility) is located at 30677 Huntwood Avenue, Hayward, in Alameda County, California. Mercury Technology Inc (MTI), owned by AERC, started operating this Facility in 1989. In February 2001, AERC changed MTI's name to AERC.COM, INC. AERC.COM, INC. (AERC) operates a destination facility to reclaim mercury from spent fluorescent and high intensity discharge (HID) lamps. AERC receives, collects, and transports spent fluorescent lamps on a standard bill of lading to the Facility. The spent lamps are unloaded manually and by forklift and placed in the lamp storage areas in the Facility. This Permit authorizes the Permittee to store only non-RCRA hazardous waste in the lamp storage areas. In the spent fluorescent lamp treatment process, AERC crushes the spent lamps and separates the phosphor powder (containing mercury) from the lamps nonhazardous components (i.e., the outer glass and metal end caps) and reclaims and recycles mercury at offsite permitted treatment, storage and disposal facilities (TSDFs). In the spent HID lamp treatment process, AERC separates the inner HID capsule containing mercury from the outer glass and metal components and reclaims and recycles mercury at

AERC ACQUISITION CORP DBA AERC RECYCLING SOLUTIONS, A CLEAN (Continued) **1000182234**

offsite permitted TSDFs. When the outer glass from the disassembled lamps (fluorescent and HID) exceeds regulatory thresholds for mercury concentrations, the waste is ma

Quarterly Update:	4/30/2018- Only found RD&D Variance for this EPA ID number in the DTSC filerooms. HWTS has an infinitesimal amount of TSDF data in 1994, 1995, 2002, and 2003, which are all after expiration of the variance on 12/31/1993. This can be explained by remaining wastes facility shipped off from when it had a variance. Furthermore, no other information indicating TSDF status could be found. Therefore, this facility is being administrative closed due to never being regulated as a TSDF.

Completed Sub Area Name: Not reported
Completed Document Type: Post HARP Form
Completed Date: 10/21/2020
Comments: Post HARP to document 10/15/2020 site visit.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Post HARP Form
Completed Date: 01/15/2021
Comments: Post HARP documenting site activities and potential exposures during site visit on 1/14/2021.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/07/2021
Comments: Letter notifying RP of projected costs for DTSC oversight over fiscal year 2021-2022.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 01/11/2021
Comments: Workplan for additional sampling approved. Additional soil and soil

SOHAY (Continued) **S123300346**

gas samples will be collected.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	01/15/2021
Comments:	Fieldwork conducted on 1/14/2021. Overseen by Alex Woodward, GSU. Site Visit Report and Post HARP are in attachments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2022

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/03/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

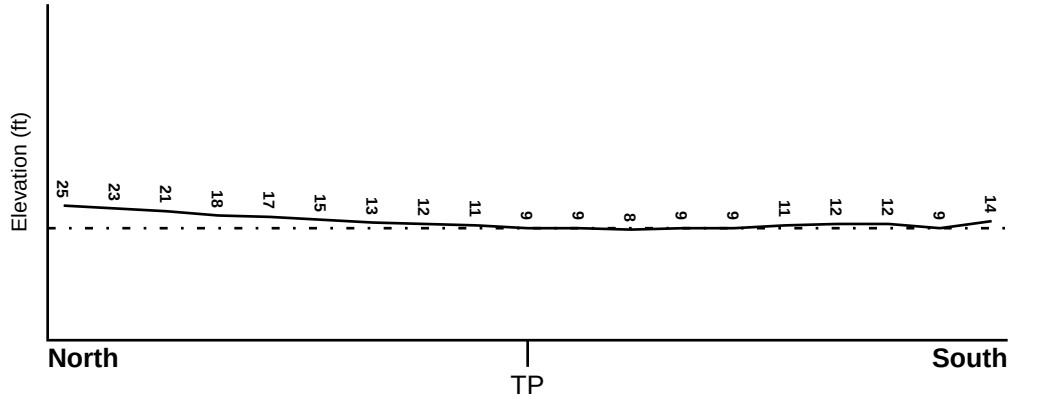

TOPOGRAPHIC INFORMATION

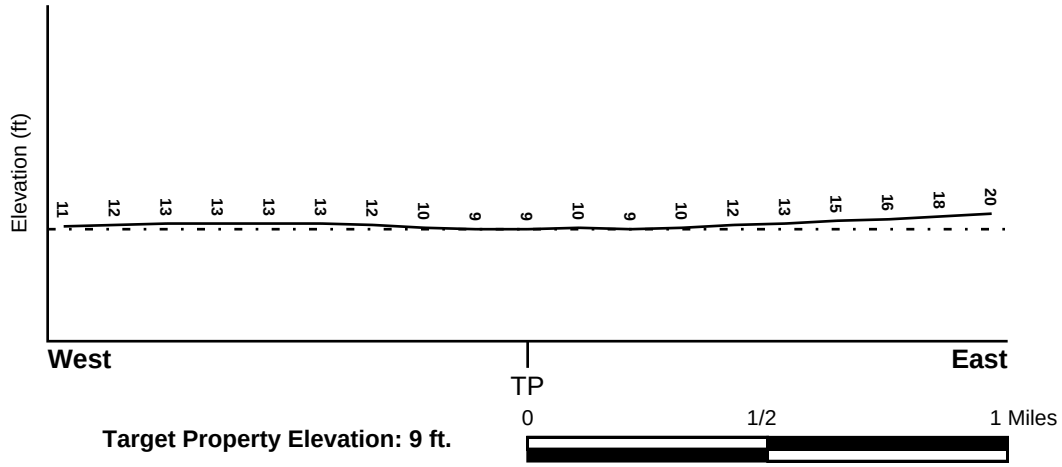

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

0 1/2 1 Miles

Target Property Elevation: 9 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0427G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06001C0289G	FEMA FIRM Flood data

06001C0431G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NEWARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Clear Lake

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	25 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	25 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Sycamore

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	18 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Willows

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5
2	18 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

WELL SEARCH DISTANCE INFORMATION

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
