Attention: Mr. Zack Osko

Subject: Phase I and Limited Phase II Environmental Site Assessment, Proposed Multi-Family Residential Development 400 South San Vicente Boulevard Los Angeles, California

Leighton and Associates, Inc. (Leighton) is pleased to present this Phase I and Limited Phase II Environmental Site Assessment (ESA) of the proposed multi-family residential development, located at the address of 400 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California (subject site). Leighton declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and ASTM International Standards E1527-13, and the newly adopted E1527-21.

Leighton has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. Leighton has developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

If you have questions regarding this report, please contact us. We appreciate the opportunity to be of service to Oklahoma Rock, LLC.

Respectfully submitted,
LEIGHTON AND ASSOCIATES, INC.

Brynn McCulloch, PG
Principal Geologist

1.0 INTRODUCTION

1.1 Authorization

Leighton and Associates, Inc. (Leighton) performed a Phase I and Limited Phase II Environmental Site Assessment (ESA) of the proposed multi-family residential development, located at the address of 400 South San Vicente, Los Angeles, California (subject site – Figure 1), in accordance with the authorization of Oklahoma Rock, LLC (Oklahoma Rock).

1.2 Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible and pursuant to the processes prescribed in ASTM International (ASTM) Standards E1527-13 and E1527-21, recognized environmental conditions (RECs), historical RECs (HRECs), or controlled RECs (CRECs) in connection with the subject site.

RECs are defined, according to ASTM E1527-13 as "*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs.*"

HRECs are defined, according to ASTM E1527-13 as "*a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.*"

CRECs are defined, according to ASTM E1527-13 as "*a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.*" (ASTM E1527-13, 2013).

The purpose of this limited Phase II ESA was to determine what, if any, environmental impacts are present in the subsurface soil, soil gas, and

groundwater, from historic releases on or near the site that could impact future redevelopment.

1.3 Scope of Work

The scope of work was performed in accordance with Leighton's Phase I ESA proposal dated December 8, 2021 and subsequent Limited Phase II ESA proposal dated December 21, 2021. The proposals included the following tasks:

- A reconnaissance-level visit of the subject site for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for onsite releases of hazardous materials and petroleum products;
- Records review (including review of previous environmental reports, selected governmental databases, and historical review);
- Interviews;
- Limited soil, soil gas, and groundwater sampling to assess the presence of contamination that may be attributed to the historic release(s) onsite; and
- Preparation of a report presenting our findings.

1.4 Significant Assumptions

Leighton assumes that the purpose of this Phase I and Limited Phase II ESA is to provide appropriate inquiry into the previous ownership and use of the subject site so that the Client may qualify for the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) landowner liability protections as defined in CERCLA, 42 USC §9601(35)(B) in connection with its proposed residential development. Leighton also assumes that the information provided by the Client and its agents, regulatory database provider, and regulatory agencies is true and reliable.

1.5 Limitations and Exceptions

Leighton performed the Phase I ESA in conformance with the scope and limitations of ASTM Standard E1527-13 and E1527-21 of the subject site. Other than the non-scope items shown in Section 1.6 that were not applicable, there were no exceptions to, or deletions from, this practice.

Property specific activities performed by Leighton and information collected regarding these activities are summarized within this report. The findings of the Phase I and Limited Phase II ESA are presented in Section 8.0. Opinions, and conclusions drawn by Leighton, based on the information collected as part of the Phase I and Limited Phase II ESA, are presented in Sections 9.0 and 10.0, respectively. References are included as Appendix A. Subject site photographs are presented in Appendix B. The EDR Environmental Lien and AUL Search report is included in Appendix C. The Environmental Radius Report and Vapor Encroachment Screening Report are included as Appendix D. Historical documentation is provided in Appendix E. Soil boring logs are included in Appendix F. The groundwater monitoring logs are included in Appendix G. The laboratory report and chain of custody forms are included in Appendix H.

This Phase I and Limited Phase II ESA was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the Phase I and Limited Phase II ESA described herein. Opinions presented herein apply to property conditions existing at the time of our study and cannot necessarily be taken to apply to property conditions or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the amount, type, distribution, and integrity of the information collected at the time of the investigation, the methods utilized to collect and evaluate the data, and that a full and complete determination of environmental risks cannot be made. Although Leighton has taken steps to obtain true copies of available information, we make no representation or warranty with respect to the accuracy or completeness of this information.

This practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the landowner liability protections including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations, or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products

discovered on the subject site that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

1.6 Special Terms and Conditions

The scope of work for this Phase I and Limited Phase II ESA did not include testing of electrical equipment for the presence of polychlorinated biphenyls (PCBs) or collection of environmental samples, other than the limited soil sampling described in Section 7.0, such as building materials, paint, or other media; assessment of natural hazards such as naturally occurring asbestos, radon gas or methane gas; assessment of the potential presence of radionuclides; or assessment of nonchemical hazards such as the potential for damage from earthquakes or floods, or the presence of endangered species or wildlife habitats. This Phase I and Limited Phase II ESA also did not include an extensive assessment of the environmental compliance status of the subject site or of businesses operating at the subject site or a health-based risk assessment.

1.7 User Reliance

This report is for the exclusive use of Oklahoma Rock. Use of this report by any other party shall be at such party's sole risk.

1.8 Important Information about Geoenvironmental Reports

The User is referred to Appendix I regarding important information provided by Geoprofessional Business Association (GBA) on geoenvironmental studies and reports.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject site is located east of the intersection of South La Cienega Boulevard and South San Vicente Boulevard, south of West 4th Street, in the city of Los Angeles, Los Angeles County, California (Figure 1). The Los Angeles County Assessor's Office designates the subject site as Assessor Parcel Number (APN) 5511-044-038. The addresses 400 through 430 (even only) South San Vicente Boulevard and 8482 4th Street are associated with the subject site.

2.2 Subject Site and Vicinity General Characteristics

The subject site vicinity is primarily residential and commercial use.

2.3 Current Use of the Subject Site

The subject site is irregular in shape and encompasses approximately 0.65 acres. The subject site is currently occupied by several commercial businesses (Appendix B, Photos 1 through 10). Onsite businesses include retail stores, restaurants, personal care services, financial services, and dental and healthcare services. One unoccupied suite, located in the southwest portion of the subject site, was formerly occupied by a dry cleaner.

2.4 Descriptions of Structures, Roads and Other Improvements

The subject site is currently developed with a one partial two-story, multi-tenant, commercial structure. The structure was built circa 1985/1986 and is approximately 17,228 square feet. The subject site is also improved with asphalt-paved parking lots, concrete walkways, and landscaping.

The following utilities will provide future service to the subject site:

Natural Gas:	The Southern California Gas Company
Source of Potable Water:	Los Angeles Department of Water and Power
Electric:	Los Angeles Department of Water and Power
Sewage Disposal:	City of Los Angeles, LA Sanitation and the Environment
Solid Waste Disposal:	City of Los Angeles Bureau of Sanitation

2.5 Current Uses of Adjoining Properties

The subject site is currently bordered to the north by West 4th Street, followed by a flower shop and residences; to the east by an alleyway, followed by residences and a parking lot; to the south by a medical center, followed by Colgate Avenue; and to the west by South San Vicente Boulevard, followed by commercial and residential properties.

3.0 USER PROVIDED INFORMATION

The User of this Phase I and Limited Phase II ESA is identified as Oklahoma Rock. As a part of the ASTM E1527-13/-21 process, Mr. Scott Rynders, a representative of Oklahoma Rock, provided information regarding the subject site.

3.1 Environmental Liens or Activity and Use Limitations

Oklahoma Rock indicated that he was not aware of any environmental liens or AULs filed or recorded for the subject site.

According to the EDR Environmental Lien and AUL Search, there are no environmental liens or AULs listed for the subject site (Appendix C).

3.2 Specialized Knowledge

Oklahoma Rock does not have specialized knowledge of the subject site or nearby properties.

3.3 Commonly Known or Reasonably Ascertainable Information

Oklahoma Rock was aware of the historic use of the subject site as a dry cleaner and the documented release of tetrachloroethylene (PCE) to the subsurface soil, soil gas, and groundwater beneath the subject site.

3.4 Valuation Reduction for Environmental Issues

Oklahoma Rock indicated that the purchase price being paid for the subject site is based on fair market value without any discount or offset based on environmental conditions.

3.5 Owner, Property Manager, and Occupant Information

According to the EDR Environmental Lien and AUL Search, the subject site is owned and managed by YVF Investment Corporation. Multiple commercial tenants currently occupy the subject site.

3.6 Reason for Performing Phase I and Limited Phase II ESA

According to Oklahoma Rock, the reason for requesting this Phase I ESA was for due diligence related to the potential acquisition of the subject site.

3.7 Other

Several previous site assessment reports completed for the subject site were provided by Oklahoma Rock and are summarized in Section 4.2.5 of this report.

4.0 RECORDS REVIEW

4.1 Physical Setting Source(s)

Leighton reviewed pertinent maps and readily available literature for information on the physiography and hydrogeology of the subject site. A summary of this information is presented in the following subsections.

4.1.1 Topography

The subject site is located in Section 20 of Township 1 South, Range 14 West of the San Bernardino Baseline and Meridian. Topographic map coverage of the subject site vicinity is provided by the United States Geological Survey (USGS) Beverly Hills Quadrangle (2018). The elevation of the subject site is approximately 150 feet above mean sea level (bmsl). The topography of the subject site is relatively flat.

4.1.2 Surface Water

Surface water was not observed on the subject site. Ballona Creek is located approximately 2 miles south of the subject site. The Pacific Ocean is located approximately 8.1 miles southwest of the subject site.

4.1.3 Geology and Soils

The subject site is located in the Peninsular Ranges Geomorphic Province of Southern California within the Central Block of the Los Angeles Basin. Based on a review of published and unpublished geologic maps and literature, it is expected that the subject site is underlain by soils composed generally of clay, silt and sand. The subject site is located in the area of the Salt Lake, Beverly Hills and San Vicente oil fields. The Cheviot Hills are to the southwest and are the surface expression of the results of faulting along the Newport-Inglewood Fault Zone, which trends from Newport Beach north to Beverly Hills.

According to our concurrent Phase II ESA of the subject site, the subject site is underlain by Quaternary-aged alluvial deposits consisting of grayish brown to medium brown, lean to fat clay (CL-CH) with trace amounts of sand in some areas.

4.1.4 Hydrogeology

During our concurrent Phase II ESA, groundwater was encountered in the existing groundwater wells onsite at depths of between 11.50 feet below ground surface (bgs) and 13.39 feet bgs surface. Groundwater was measured by Environmental Managers & Auditors, Inc. (EMA) in September 2020 at depths of between 15.18 feet bgs and 17.22 feet bgs. The groundwater flow direction is reported to be to the southwest (EMA, 2020).

4.1.5 Oil and Gas Fields

Leighton reviewed the California Geologic Energy Management Division (CalGEM) Well Finder online mapping system on January 31, 2022. No oil and gas wells were identified on the subject site and surrounding properties. The subject site is located in the Salt Lake Oil/Gas Field and a City of Los Angeles designated Methane Zone.

4.2 Standard Environmental Record Sources

A search of selected government databases was conducted by Leighton using the EDR Radius Map Report environmental database report system. Details and descriptions of the database search are provided in the EDR report. The report meets the government records search requirements of ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The database listings were reviewed within the specified radii established by the ASTM E1527-13/-21. A copy of this report is included in Appendix D.

4.2.1 Subject Site

The Site was identified in the EDR database report in the following databases:

Business	Database(s) and Summary
Hollyhills Drain Unit 5 300-400 South San Vicente Blvd	Hollyhills Drain Unit 5 is listed in the Facility Index System/Facility Registry System (**FINDS**) database. The description code is listed as water, sewer, pipeline, and communications and power line construction.

Business	Database(s) and Summary
MESSERSCHMITT H E 400 South San Vicente Blvd	Messerschmitt H E is listed in the **EDR historic auto** database. The subject site is listed as a gasoline and oil service station in 1942.
Best Quality Cleaners 430 South San Vicente Blvd	Best Quality Cleaners is listed in the Resource Conservation and Recovery Act Non Generators / No Longer Regulated (**RCRA-Nongen/NLR**) database. These facilities generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. Best Quality Cleaners is also listed in the **EDR historic cleaner** database from 1989 to 2014. Best Quality Cleaners is also listed in the **drycleaner** database. The facility is listed as inactive. Best Quality Cleaners is also listed in the California Environmental Reporting System **(CERS)** haz waste database as a hazardous waste generator. Violations were not found during inspections.
LA Vista Cleaners 430 South San Vicente Blvd	LA Vista Cleaners is listed in the **RCRA-Nongen/NLR** database. These facilities generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. La Vista Cleaners is also listed in in the hazardous waste tracking system (**HWTS**) database. The inactive date is listed as June 2020.It is also listed in the drycleaners database and has the description of Power Laundries, Family and Commercial. La Vista Cleaners is listed in the Los Angeles County Site Mitigation Database. The site status is listed as active.
400 South San Vicente Boulevard	The address for the subject site is listed in the (ERNS) incident commons database. The description is listed as “The caller is reporting a discharge of crude oil due to unknown causes at this time. The caller stated the material was coming from a transmission pipeline. The impacts are roadway and into a storm drain.” The incident was reported on December 13, 2015. Based on information obtained from local agencies and summarized in the section below, this record corresponds to the release of petroleum hydrocarbons in the alley adjacent to the east of the subject site and is considered offsite.

See EDR Radius Report (Appendix D) for list of acronyms and data sources

4.2.2 Offsite

The regional groundwater flow direction in the vicinity of the subject site is assumed to be to the southwest. Potential hydraulically up-gradient facilities are considered to be primarily located to the northeast of the Site.

Information in the EDR database report was reviewed for facilities of potential environmental concern to the subject site. Additionally, the State Water Resources Control Board (SWRCB) Geotracker website and

Department of Toxic Substances Control (DTSC) Envirostor website were used to supplement the information in the EDR database report.

The database search results for offsite properties, including those found within the “orphaned” unmapped listings, with potential to adversely impact the subject site are listed in the table below:

Table 1 - Databases Searched

Database	Search Distance (radius)	Properties of Potential Concern
Federal NPL List	1.0-mile	No
Delisted NPL List	1.0-mile	No
Federal CERCLIS List	0.5-mile	No
CERCLIS – No Further Action	0.5-mile	No

See EDR Radius Report (Appendix D) for list of acronyms and data sources

Three petroleum pipelines are located within the alley adjacent to the east of the subject site. The pipelines are used to transport fluids consisting of a mixture of oil, natural gas, and produced water. On December 13, 2015, a rupture in one of the pipelines occurred approximately 100 feet east of San Vicente Boulevard and 30 feet north of Colgate Avenue (approximately 25 feet southeast of the subject site). Freeport-McMoRan Oil & Gas (FM O&G) responded to the incident, exposed and repaired the pipeline. Once the pipeline was repaired, petroleum-impacted soils were excavated and confirmation samples were collected resulting excavation. A total of 71.13 tons of petroleum-impacted soil were excavated and transported offsite (Catalyst, 2021).

Soil with elevated concentrations of hydrocarbons was encountered at the base of the final excavation. Additional soil borings were advanced to determine if the impacted soil was associated with the pipeline leak or if it was associated with historic, deeper hydrocarbon impacts in the area. The nature and extent of the impacts associated with the release have been characterized and delineated through the soil excavation activities and the two rounds of GeoProbe-based site assessments (Catalyst, 2021). The 95% upper confidence limit (UCL) of total petroleum hydrocarbons (TPH) concentrations in the residual soils meet the applicable Los Angeles Regional Water Quality Control Board (LARWQCB) 1996 Interim Guidance cleanup standards for soils situated within 20-150 feet above drinking water aquifers. Based on the sampling results, Catalyst concluded that the potential risks to human health and the environment through impacts to soil and groundwater are *de minimis*. It should also be noted that the soil and groundwater samples located closest to the subject site contained either very low concentration results or no detected concentrations of petroleum hydrocarbons. Based on this information, the pipeline leak is not considered an offsite REC with potential to significantly affect the subject site.

The remaining listings identified in the EDR database report were reviewed and not interpreted to represent an adverse effect to the subject site at the time of this report preparation based on one or more of the following:

- No record of a release;

- Type of release (soil only);
- Closure received from regulatory agency;
- Distance of the facility to the subject site; and
- Direction of groundwater flow (southwest) and location of the facility to the Site (cross-gradient or down-gradient).

4.2.3 Vapor Encroachment

Leighton searched for sources of contamination that have the potential to cause a vapor encroachment condition in accordance with the practices outlined in the ASTM E2600-10 Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions.

Based on the results of concurrent Phase II ESA, soil gas beneath the subject site contains several chlorinated volatile organic compounds (VOCs), primarily PCE and trichloroethylene (TCE), at concentrations that present a vapor encroachment and vapor intrusion concern to future tenants of the subject site. No offsite sources of VOCs were identified that present significant vapor encroachment risk to the subject site.

4.2.4 Regulatory Agency Contacts

Leighton reviewed online regulatory databases for the subject site and/or requested regulatory records from the agencies listed below for the addresses and APN associated with the subject site.

Department of Toxic Substances Control

A records request was submitted via email to the DTSC Cypress office and DTCS Chatsworth office on January 24, 2022. The DTSC Cypress and Chatsworth offices responded on January 25 and 31, 2022, respectively. Both DTSC offices indicated that records were not identified for the subject site.

EnviroStor, an online database maintained by the DTSC which can be used to identify facilities with known or potential contamination and facilities where DTSC's environmental oversight or review has been requested or

required, was reviewed on January 31, 2022. Releases of hazardous materials regulated by the DTSC were not identified on or immediately adjacent to the subject site.

State Water Resources Control Board

A records request was submitted via email to the LARWQCB on January 24, 2022. The LARWQCB responded on January 8, 2022, that records were not identified for the subject site.

GeoTracker, an online database maintained by the SWRCB which tracks regulatory data about underground fuel tanks, land disposal sites, and releases of hazardous materials that may threaten the public drinking water supply, was reviewed on January 31, 2022. Releases of hazardous materials regulated by Geotracker were not identified on the subject site. There was a release from a hazardous liquid pipeline located adjacent to the east of the subject site. A summary of the release and clean-up activities can be found in section 4.2.2 above.

Los Angeles County Department of Public Works (LACDPW)

The LACDPW Online File Review website was reviewed on January 24, 2022. Records were not identified for the addresses associated with the subject site.

Los Angeles County Fire Department (LACoFD)

On January 24, 2022, Leighton submitted public records requests for each address on LACoFD's online database. Records were not identified for the addresses associated with the subject site; however, Leighton has obtained records that should be located at the LACoFD through the property owner. A summary of these reports is provided in Section 4.2.5 of this report.

City of Los Angeles Fire Department (LAFD)

On January 24, 2022, Leighton reviewed LAFD's online records for active/inactive/historical underground storage tanks (USTs) and hazardous materials facilities. Records were not identified for the associated with the subject site.

South Coast Air Quality Management District

Leighton reviewed records for the subject site on the South Coast Air Quality Management District's (SCAQMD) online Facility Information Detail (FIND) database on January 24, 2022. Searches were conducted by reviewing a map of the subject site and surrounding areas. Records of environmental concern were not found for the subject site.

National Pipeline Mapping System

Leighton reviewed records posted on the National Pipeline Mapping System's (NPMS) Public Map Viewer on January 31, 2022. Searches were conducted by reviewing a map of the subject site and surrounding areas. No oil or gas pipelines were mapped within the subject site limits. A hazardous liquid pipeline is located adjacent to the north and east of the subject site, within the adjacent alley. The system name is San Vicente Line Crude Oil Line. The commodity description is crude oil and the status code is listed as active. A release was reported in 2015 in the alleyway adjacent to the east of the subject site. A summary of the release on clean-up activities are summarized in section 4.2.2 above.

Radon

Radon is not regulated within the State of California. Nonetheless, the California Department of Health Services (CDPH) and the United States Environmental Protection Agency (US EPA) both recommend a threshold of 4 picocuries per liter (pCi/L) above which certain precautions be taken to mitigate radon buildup in structures.

The California Department of Health Services maintains a database of indoor radon levels that are sorted by zip code. According to the most recent update prepared in February 2016, 54 tests were completed in the subject site zip code of 90048 and 5 tests exceeded 4pCi/L; with a maximum result of 9.5 pCi/L. Given this data, there is low potential for elevated levels of radon at the subject site.

4.2.5 Other Reports

Leighton reviewed various previous reports conducted for the subject site. The reports are summarized below:

Cal Waste Remediations, Inc. (CWR) conducted a Limited Subsurface Investigation at the subject site address of 430 South San Vicente Boulevard in April 2005. CWR advanced four borings inside the former dry-cleaning facility using hand auger drilling equipment. Soil samples were collected at depths of 2, 5, and 10 feet bgs. The soil samples collected at 5 feet were analyzed for PCE and TCE. PCE and TCE were not detected above laboratory reporting limits in any of the 5-foot soil samples. CWR concluded that no contamination was found and no further environmental assessment was necessary (CWR, 2005).

CWR conducted a Phase I ESA for the entire subject site (400-430 S San Vicente Blvd) in May 2008. CWR noted that the subject site was a commercial and retail/professional service center. CWR also noted that the subject site had been historically used as a service station and dry cleaners. CWR recommended conducting a Limited Subsurface Soil Investigation in the northwestern corner of the subject site where the service station was previously located.

JMK Environmental Solutions, Inc. (JMK) conducted a Phase II ESA for the subject site in July 2008. Three borings were advanced in the northern portion of the subject site to a maximum depth of 25 feet bgs. Soil samples were collected at 5 and 10 feet intervals. Two groundwater samples and three soil vapor samples were also collected. Analysis of the samples included VOCs by EPA Method 8260B and TPH-gasoline (TPHg) range organics by EPA method 8015(M). No detectable amounts of TPHg and VOCs were reported in the soil and soil vapor samples. PCE and cis-1,2-Dichloroethene (cis-1,2-DCE) were detected in the two groundwater samples at trace concentrations slightly above the State of California Maximum Contaminant Levels (MCLs) of 5 micrograms per liters (µg/L) and 6 µg/L, respectively. None of the soil, groundwater, or soil vapor samples contained any detectable levels of petroleum or benzene compounds suggesting that there was no release of petroleum hydrocarbons to the subsurface and that the former USTs have not adversely affected the soils and groundwater at the subject site (JMK, 2008). JMK concluded that the levels of PCE and cis-1,2-DCE exceeded the MCLs but the likelihood of further groundwater remediation was low. To be conservative, they provided the option of additional characterization

of the dissolved compounds in the future in order to verify if natural attenuation of the dissolved compounds had occurred (JMK, 2008).

Partner Engineering and Science, Inc. (Partner) conducted a Phase II Subsurface Investigation of the subject site in August 2019 in order to identify the location of on-site USTs, former tankholds, and/or other associated features and to investigate the potential impact of petroleum hydrocarbons, VOCs, and/or polycyclic aromatic hydrocarbons (PAHs) to soil and groundwater as a consequence of a release or releases from the former on-site gasoline station and dry cleaning operations (Partner, 2019a). During their geophysical survey, one large anomaly was identified in the northwest portion of the subject site that was consistent with a soil disturbance and/or backfilled excavation. Partner concluded that this confirmed that the USTs associated with the former service station had been removed. Partner oversaw the advancement of four borings to depths of between 10 and 25 feet bgs, based on refusal. Soil samples were collected from each boring at depths of 2, 5, 10, 15, 20, and 25 feet bgs, where applicable. Additionally, grab groundwater samples were collected from two boring locations. The two grab groundwater samples were analyzed for VOCs by EPA Method 8260B. The six soil samples collected from each boring were analyzed for VOCs by EPA Method 8260B, PAHs by EPA Method 8270, TPH-diesel (TPHd) and TPH-oil (TPHo) by EPA Method 8015M, and TPHg by EPA Method 8260B.

All analytes detected in soil samples were below respective residential screening levels. Methylene chloride, PCE, cis-1,2-DCE, and TCE were detected in groundwater samples at concentration exceeding their respective MCLs. Based on the results of the subsurface investigation, Partner concluded that no significant release of petroleum hydrocarbons was identified and no additional investigation with respect to the former on-site gasoline station is warranted. Partner also recommended additional investigation to further evaluate the extent of the identified release of chlorinated solvents (Partner, 2019a).

Environmental Managers and Auditors, Inc. (EMA) produced a Site Characterization Report for the subject site in October 2019 in order to address data gaps, delineate the lateral extent of impacted soil, delineate the lateral extent of impacts to the groundwater quality beneath the

subject site, evaluate the potential risk of vapor intrusion at the subject site, and conduct a human health risk assessment (HHRA). EMA oversaw the advancement of two borings in the southern portion of the subject site to a depth of 10 feet bgs. Soil samples were collected at depths of 5 and 10 feet bgs and were analyzed for VOCs by EPA Method 8260B. Groundwater samples were collected from three separate locations in the southern portion of the subject site and were analyzed for VOCs by EPA Method 8260B. Five permanent soil vapor probes were installed in the southern portion of the subject site at depths ranging from 0.5 to 10 feet bgs. The soil vapor samples collected were analyzed for VOCs by EPA Method 8260B (EMA, 2019a).

VOCs were not detected at concentrations that exceeded their respective residential screening limits in any of the soil samples. PCE was detected in two of the three groundwater samples collected at concentrations slightly above the MCLs. No other VOCs were detected at concentrations that exceeded their respective MCLs in the groundwater samples collected. PCE was detected at high concentrations that exceeded the residential screening level in each of the soil vapor samples. TCE was also detected at a concentration that exceeded residential screening limits in one soil vapor sample. Based on the findings, EMA concluded that no further investigation or remediation would be required for soil and that no remediation would be required for groundwater. EMA did note that in order to evaluate trends in contaminant concentrations in groundwater and observe the natural attenuation/biodegradation in mitigating VOCs impact over time, installation of permanent groundwater monitoring wells and implementation of a quarterly groundwater monitoring/sampling program for at least a period of one year was recommended. EMA also recommended an indoor air quality assessment as subsurface contaminant concentrations posed a potential risk of vapor intrusion (EMA, 2019a).

Based on the above recommendation, EMA conducted an Indoor Air Quality Assessment for the subject site in December 2019 (Round 1 of sampling). Four indoor air samples were collected during this assessment form the vicinity of the La Vista dry cleaner unit. Elevated concentration of PCE and TCE were detected in three of the four indoor air samples. Based on the findings, EMA concluded that the results indicated evidence

of vapor intrusion and therefore, interim mitigation measures would be required to alleviate the potential health risk to the workers inside the dry cleaner unit from exposure to VOCs (EMA, 2019b). EMA recommended that institutional controls be implemented while redevelopment of the subject site was being planned.

Based on the results of EMA's Site Characterization Report (2019), four groundwater monitoring wells (MW-1 through MW-4) were installed at the subject site in December 2019. The groundwater wells were monitored quarterly for one year. During the most recent sampling event in September 2020, groundwater was encountered at depths of between 15.18 and 17.22 feet bgs at that subject site. The wells were purged using low-flow methods. Groundwater samples were collected from each monitoring well and analyzed for VOCs by EPA Method 8260B. Over the four quarters of sampling, high levels of PCE, TCE, and cis-1,2-DCE that exceeded their respective MCLs were found in well MW-4. Wells MW-1 through MW-3 did not have detected concentrations of VOCs that exceeded their respective MCLs in the four quarterly monitoring events. EMA submitted a groundwater monitoring and sampling program suspension request to the LACoFD on January 18, 2021 based on the low levels of VOCs in wells MW-1 through MW-3 (EMA, 2020a). The LACoFD agreed with EMA's recommendation for the suspension of groundwater monitoring/sampling program on January 22, 2021.

EMA conducted their second round of their Indoor Air Quality Assessment for the subject site in December 2020. PCE was detected at a concentration that slightly exceeded the residential screening level for one soil vapor sample inside the dry cleaner facility (EMA, 2020b). PCE was not detected above the residential screening level in the remaining indoor air samples. TCE was not detected above the reporting limit in any of the indoor air samples. Based on these results, EMA believed the building was safe for human occupancy (EMA, 2020b).

Lastly, EMA conducted an offsite soil vapor investigation within the sidewalk and alley adjacent to the east, south, and west of the subject site in order to evaluate the soil vapor analytical data for the potential offsite migration of PCE and its breakdown products (EMA, 2021). EMA oversaw the advancement of eight soil vapor borings on offsite locations at depths

of 2, 5, and 10 feet bgs. The soil vapor samples were analyzed for VOCs by EPA Method 8260B. No VOCs were detected above the laboratory reporting limits in the soil vapor samples collected during the investigation. EMA concluded that no further investigation was necessary for the subject site, as both onsite and offsite soil vapor assessment was complete (EMA, 2021).

The LACoFD reviewed the Summary Report Offsite Soil Vapor Investigation, dated March 17, 2021, prepared by EMA. LACoFD concurred with the findings of the report indicating that the former onsite dry cleaner PCE release had not significantly affected the soil vapor beneath offsite properties. However, LACoFD noted that previous onsite soil vapor sampling and indoor air sampling does indicate that potential VOC vapor intrusion (VI) could be an issue for future onsite residential developments if VI mitigation measures were not considered. The LACoFD indicated that additional assessment of VI should be conducted prior to pursuing any residential developments at the subject site. In addition, the LACoFD requires the preparation and implementation of a soil management plan (SMP) prior to and during redevelopment of the subject site and the filing of an Environmental Notice on the property.

4.3 Historical Use Information on the Property

Leighton reviewed selected historical information on the subject site. These references were reviewed for evidence of activities, which would suggest the presence of hazardous substances at the subject site and to evaluate the potential for the subject site to be impacted by offsite sources of contamination. The following paragraphs are a chronological summary of the review.

4.3.1 Aerial Photographs

Historical aerial photographs were reviewed for information regarding past subject site uses. Aerial photographs dated 1923, 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 were reviewed. Copies of the aerial photographs are included in Appendix E.

In the **1923** aerial photograph, the subject site and surrounding properties are observed to be vacant land. Present day San Vicente Boulevard is observed to the west of the subject site.

In the **1928** aerial photograph, the subject site is observed to be vacant land. The surrounding properties are observed to be vacant land and residential properties. Present day La Cienega Boulevard and San Vicente Boulevard are observed to the west of the subject site. Present day West 4th Street is observed to the north of the subject site. An alley is observed adjacent to the east of the subject site.

In the **1938** aerial photograph, a gasoline service station is observed in the northern portion of the subject site and a residence is observed in the west central portion of the subject site. The surrounding properties are mostly residential properties. La Cienega Boulevard and San Vicente Boulevard are observed to the west of the subject site. West 4th Street is observed to the north of the subject site. An alley is observed adjacent to the east of the subject site.

In the **1948** and **1952** aerial photographs, the southern portion of the subject site is observed to be a small commercial building and associated parking. The northern portion of the subject site is observed be the Church of Religious Science of Beverly Hills and associated parking. Significant changes are not observed on the surrounding properties.

In the **1964, 1970,** and **1977** aerial photographs, significant changes are not observed on the subject site or surrounding properties with the exception of a commercial building now observed to the south of the subject site.

In the **1983** aerial photograph, the subject site is observed as vacant land. Significant changes are not observed on the surrounding properties.

In the **1989, 1994, 2002, 2005, 2009,** and **2012** aerial photographs, the present day commercial buildings and associated parking lot are observed on the subject site. Significant changes are not observed on the surrounding properties.

In the **2016** aerial photograph, the subject site and surrounding properties are observed in their present day configuration.

4.3.2 Historical Topographic Maps

Historical topographic maps were reviewed to obtain information regarding past site uses. Topographic map coverage of the subject site vicinity is provided by the following quadrangles: Los Angeles (1894 and 1900), Santa Monica (1896, 1898, 1902, 1920, and 1921), Hollywood (1924 and 1926), and Beverly Hills (1950, 1966, 1972, 1981, 1994, 1995, 2012, 2015, and 2018). Copies of the topographic maps are included in Appendix E.

1894, 1896, 1898, 1900, and **1902:** Structures, tanks, or wells are not depicted on the subject site and surrounding properties. An unnamed street is depicted to the west of the subject site.

1920 and **1921:** The subject site is depicted as vacant land. The Salt Lake Oil Field and oil wells are depicted to the north and east of the subject site. Vacant land is depicted to the south and west of the subject site. The Pacific Electric Railroad is depicted adjacent to the west of the subject site.

1924 and **1926:** Significant land use changes are not depicted on the subject site or surrounding properties with the exception of scattered residences to the southwest of the subject site.

1950, 1966, 1972, 1981, 1994, 1995, 2012, 2015, and **2018**: The subject site and surrounding properties are depicted in a densely populated red-shaded area in which only landmark buildings are shown. No buildings are depicted on the subject site and surrounding properties. La Cienega Boulevard and San Vicente Boulevard are depicted to the west of the subject site. West 4th Street is depicted to the north of the subject site. An alley is depicted to the east of the subject site.

4.3.3 Fire Insurance Maps

Fire insurance maps, or Sanborn® maps, are detailed city plans showing building footprints, construction details, use of structure, street address, etc. The maps were designed to assist fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn Maps were produced from approximately 1867 to the present for commercial, industrial, and residential sections of approximately 12,000

cities and towns in the United States. Historical Sanborn maps provided by EDR were reviewed for information regarding past Site uses and are included in Appendix E.

1926: The subject site is depicted as vacant land. West 4th Street is depicted to the north of the subject site, followed by vacant lots. An alleyway is depicted to the east of the subject site, followed by dwellings and vacant lots. Vacant lots are depicted to the south of the subject site, followed by Colgate Avenue. San Vicente Boulevard and the Pacific Electric Railway right-of-way are depicted to the west of the subject site, followed by vacant lots.

1950: The southern portion of the subject site is occupied by a furniture shop, a drapery shop, and storage area. The center portion of the subject site is depicted as auto parking. The northern portion of the subject site is depicted as a large, unnamed structure (most likely the Church of Religious Science of Beverly Hills). West 4th Street is depicted to the north of the subject site followed by stores and residences. An alley, followed by residences is depicted to the east of the subject site. Vacant lots, followed by Colgate Avenue, are depicted to the south of the subject site. San Vicente Boulevard and the Pacific Electric Railway right-of-way are depicted to the west of the subject site, followed by offices and stores.

1969: The southern portion of the subject site is depicted as stores and storage. The center of the subject site is depicted as auto parking. The northern portion of the subject site is depicted as the Church of Religious Science of Beverly Hills and associated parking. West 4th Street is depicted to the north of the subject site, followed by stores and residences. An alley, followed by residences is depicted to the east of the subject site. Offices and associated parking are depicted to the south of the subject site, followed by Colgate Avenue. San Vicente Boulevard is depicted to the west of the subject site, followed by offices and stores.

4.3.4 Historical City Directories

City Directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the City Directory developed into a tool for locating individuals and businesses in particular. For each

street address listed, the directory recorded the name of the resident or business that operated from this addresses. While City Directory coverage is usually comprehensive for major cities, it may be sporadic for rural areas and small towns. The purpose of the City Directory research was to attempt to determine the businesses that were historically located at the subject site and adjacent addresses.

Leighton reviewed the EDR City Directory Standard Report dated January 25, 2022 (Appendix E). Records were reviewed from 1920 to 2014 at approximate 5-year intervals. The subject site addresses of 400-430 (even) South San Vicente Boulevard were identified as various commercial properties and a church (1965-1981). Commercial properties of concern are Messerschmitt Herman E Hilda gas station (1942) and Best Quality Cleaners and Shoe Repair (1991-2014).

4.3.5 Building Permits

Building permit records for the subject site address were reviewed in the EDR Building Permit Report dated January 25, 2022. Various building permits were listed for the addresses associated with the subject site. Building permits of importance are summarized below and are included in Appendix E.

Address	Description	Date
400 South San Vicente Blvd	Building Permit – New Building	11/06/1936
	Building Permit – Bldg Demo (Church)	08/16/1983
	Building Demo – (Single story)	01/29/1985
	Building Permit – New Construction (Retail)	10/03/1985
	Mechanical Permit – Elevator/Pressure Vessel	01/30/1986
	Zoning – Sale/Dispensing Alcoholic Beverages (Restaurant)	06/06/1986
	Cert of Occupancy – Retail/TGI Yogurt	10/01/1986
	Cert of Occupancy – Retail/Restaurant	11/21/1986
	Cert of Occupancy – Retail	12/10/1987

	Cert of Occupancy – Retail/Restaurant Shopping	02/03/1989
410 South San Vicente Blvd	Building Permit – New Building	03/23/1937
	Cert of Occupancy – Church, offices, and Sunday school	07/31/1963
	Building Addition - Church	06/10/1971
	Cert of Occupancy – Chapel assembly room addition	05/12/1972
	Cert of Occupancy – Restaurant	03/12/1987
	Cert of Occupancy – Restaurant	02/27/1992
418 South San Vicente Blvd	Building Permit – Dwelling relocated from offsite to onsite	06/16/1927
424 South San Vicente Blvd	Building Permit – New Construction	11/15/1984
	Cert of Occupancy – From Deli to Retail	03/24/1999
426 South San Vicente Blvd	Building Permit – New Building	05/23/1940
	Building Demo - Office	08/16/1983
	Building Permit – New Construction	11/15/1984
428 South San Vicente Blvd	Cert of Occupancy – From Retail to Restaurant	06/25/1999

Numerous residential and commercial building permits were identified for the surrounding properties, none of which were interpreted to be associated with a feature or business that presents an offsite concern to the subject site.

4.3.6 Summary of Historical Land Use

Based on historical records, land usage is summarized as follows:

Time Period	Land Usage	Reference
Prior to 1894	Unknown	None Available
1894 until approximately 1936	Vacant land	Topographic Maps Sanborn Maps Aerial Photographs

Time Period	Land Usage	Reference
1936 until approximately 1942	Gasoline service station and residence	Sanborn Maps Aerial Photographs City Directory
1942 until approximately 1983	Small commercial building consisting of stores and the Church of Religious Science of Beverly Hills with associated parking	Sanborn Maps Aerial Photographs City Directory
1983 until approximately 1985	Vacant land	Aerial Photographs
Approximately 1985 until Present	One commercial building with onsite businesses include a dry cleaner, retail stores, restaurants, personal care services, financial services, and dental and healthcare services	Aerial Photographs City Directory Previous Reports Site Reconnaissance

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

On January 17, 2022, a Leighton representative conducted a reconnaissance–level assessment of the subject site. The property reconnaissance consisted of observing and documenting existing conditions of the subject site and nature of the adjacent properties within 0.25-mile of the subject site. Photographs of the subject site are presented in Appendix B and their view directions are noted on Figure 2, Site Plan. Items noted during the subject site reconnaissance are also depicted on Figure 2.

5.2 General Subject Site Setting

The subject site vicinity is primarily residential and commercial use.

The subject site is irregular in shape and encompasses approximately 0.65 acres. The subject site is currently occupied by several commercial businesses (Appendix B, Photos 1 through 18). Onsite businesses include retail stores, restaurants, personal care services, financial services, and dental and healthcare services. One unoccupied suite, located in the southwest portion of the subject site, was formerly occupied by a dry cleaner.

The subject site is currently developed with a one partial two-story, multi-tenant, commercial structure. The structure was built circa 1985/1986 and is approximately 17,228 square feet. The subject site is also improved with asphalt-paved parking lots, concrete walkways, and landscaping.

5.3 Exterior and Interior Observations

5.3.1 Hazardous Substances, Drums, and Other Chemical Containers

Several 1-quart and 5-gallon containers of general cleaning supplies were observed within several of the commercial suites located onsite. These chemicals were properly stored and were not of significant quantity to present a risk to the subject site.

One approximately 50-gallon steel container of food grade grease was observed within a fenced storage area located in the southeast onsite

parking lot. Since this container is known to contain food grade grease, it is not considered a REC.

One approximately 50-gallon steel container of used cooking oil and one 5-gallon bucket of hydraulic oil were observed within the elevator equipment room located in the northeast corner of the onsite structure. The container of used cooking oil is not considered a REC. No staining or evidence of a release was observed beneath the bucket of hydraulic oil; therefore, it is not considered a REC.

5.3.2 Storage Tanks

Evidence of USTs, such as vent lines, fill or overfill ports, was not observed on the subject site. No aboveground fuel storage tanks (ASTs) were observed onsite.

One elevator room was observed within the northeast corner of onsite structure. The elevator room included hydraulically-powered elevator equipment that contained approximately 20 to 50 gallons of hydraulic oil. Minor staining was observed on the concrete beneath the elevator equipment; however, the concrete flooring appeared to be intact and free of cracks. This minor release is considered *de minimis*.

5.3.3 Polychlorinated Biphenyls (PCBs)

PCBs were once used as industrial chemicals whose high stability contributed to both their commercial usefulness and their long-term deleterious environmental and health effects. PCBs can be present in coolants or lubricating oils used in older electrical transformers, hydraulic systems, and other similar equipment. In 1979, the USEPA generally prohibited the domestic manufacture of PCBs in electrical capacitors, electrical transformers, vacuum pumps, hydraulic pumps, and gas turbines.

Three pole-mounted transformers were observed in the southeast corner of the subject site. No staining was observed on the ground beneath the transformers.

5.3.4 Waste Disposal

General non-hazardous waste produced onsite is storage in trash bins located in the southeast corner of the subject site. Trash is routinely removed from the subject site by City of Los Angeles services.

Grease and used cooking oil are routinely removed and disposed offsite.

5.3.5 Dumping

Evidence of dumping was not observed on the subject site.

5.3.6 Pits, Ponds, Lagoons, Septic Systems, Wastewater, Drains, Cisterns, and Sumps

Evidence of pits, ponds, lagoons, septic systems, wastewater, and sumps were not observed on the subject site.

Several floor drains were observed within the onsite structure. The drains were observed to be dry and free of debris. These drains are not considered a REC; however, it should be noted that one floor drain was observed within the former dry cleaner suite. This drain would be a common release point for VOCs to the subject surface if products were previously improperly disposed.

5.3.7 Pesticide Use

The storage and use of pesticides was not observed on the subject site.

5.3.8 Staining, Discolored Soils, Corrosion

Stained or discolored soil and/or corrosion were not observed on the subject site.

5.3.9 Stressed Vegetation

Evidence of stressed vegetation was not observed on the subject site.

5.3.10 Unusual Odors

Unusual odors were not detected on the subject site.

5.3.11 Onsite Wells

Evidence of onsite oil or gas wells was not observed onsite.

Four groundwater monitoring wells and soil vapor sampling points associated with the open site assessment case related to the former onsite dry cleaner were observed onsite.

5.3.12 Other Observations

No other observations of environmental concern were noted on the subject site.

6.0 INTERVIEWS

Leighton conducted interviews with persons having knowledge of current or past subject site usage. Interviews were conducted either orally or in the form of a written questionnaire.

6.1 Interview with Owner

Mr. Sean Samadi, a representative of the subject site owner, was interviewed during the site reconnaissance completed on January 17, 2022. Mr. Samadi was aware of the release of dry cleaning chemicals associated with the former onsite dry cleaners and the ongoing assessment activities being completed under the oversight of the LACoFD. Mr. Samadi was not aware of any USTs, clarifiers, or other underground features of concern located onsite. Additionally, he was not aware of any other environmental concerns associated with the subject site or neighboring properties.

6.2 Interview with Site/Property Manager

Interviews with property managers, other than those noted in 6.1, were not conducted.

6.3 Interviews with Occupants

Subject site occupants were not interviewed as part of this Phase I ESA.

6.4 Interviews with Local Government Officials

Leighton did not interview employees with local government agencies to request information regarding historic and current uses of the subject site with the exception of those noted in Section 4.2.

6.5 Interviews with Others

Leighton did not conduct additional interviews for this Phase I ESA with the exception of the User interview discussed in Section 3.

7.0 LIMITED PHASE II ESA

On February 17, 18, and 20, 2022, Leighton completed a Limited Phase II ESA of the subject site, collecting soil, soil gas, and groundwater samples to be evaluated for potential environmental impacts resulting from the historical use of the subject site as a dry-cleaning facility and/or gasoline service station.

The scope of work for the Limited Phase II ESA is described below.

7.1 Pre-field Activities

Health and Safety Plan

Leighton prepared a site-specific Health and Safety Plan (HSP) for the fieldwork to be performed. The HSP documented the safety aspects of the work and complied with Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1910.120. The HSP was onsite with Leighton personnel at all times. The HSP outlined all site procedures, potential hazards, and contained a hospital location map. All onsite Leighton personnel acknowledged acceptance of the plan by signing the HSP.

Utility Clearance

Leighton notified Underground Service Alert (USA) a minimum of 48 hours prior to starting subsurface intrusive work.

7.2 Subsurface Exploration

The following investigation activities were completed on February 17, 18, and 20, 2022.

7.2.1 Soil Borings

Leighton oversaw the advancement of 12 soil borings to depths between 10 and 25 feet bgs, depending on refusal and the depth at which groundwater was encountered. Groundwater was encountered at depths between 10 and 12 feet bgs in the borings located throughout the Site. The location of each boring is shown on Figure 3, *Boring Location Map*. The borings were advanced using either a limited-access direct push drill

rig or hand auger drilling equipment, operated by Millennium Environmental Inc. (Millennium), of Anaheim, California. Millennium is a State of California licensed drilling contractor.

Soil samples were collected from each boring at 2 feet bgs, 5 feet bgs, and 10 feet bgs for lithologic description and chemical analysis. Soil samples were logged and described under direct supervision of the California Professional Geologist. At a minimum, soil descriptions included the Unified Soil Classification System name, color, density, moisture content, grain size, and if staining or hydrocarbon odors were detected.

Soil samples were retained in laboratory-supplied glass jars or 6-inch stainless steel sleeves capped with Teflon® paper and plastic end caps. The samples were clearly marked with sample identification, placed in an ice-cooled chest for temporary storage, and transported to Jones Environmental Laboratories, Inc. (Jones) of Santa Fe Springs, California, a State of California Certified laboratory, for chemical analysis. Jones is a National Environmental Laboratory Accreditation Program-certified (NELAP) laboratory. Laboratory Chain-of-custody (COC) protocol was followed throughout all phases of the sample handling process.

Each soil sample was field screened using a photoionization detector (PID) to evaluate the soil sample for the presence of VOC vapors. PID readings were obtained by placing an aliquot of soil, collected adjacent from the portion retained for chemical analysis, into a clean plastic bag, and placing it in the sun or a warm area for 5 to 10 minutes. The reading was then collected from the headspace of the plastic bag by inserting the tip of the PID. PID readings were recorded for each soil sample on the field boring logs. The PID was calibrated to factory specifications within three months of testing and calibrated daily to the manufacturer's specifications. Boring logs are included in Appendix F.

Soil boring locations were accurately measured to a fixed reference point, noted on field maps, and surveyed using a Trimble Geo7X Mobile Global Positioning System (GPS) unit. The Trimble GPS unit provides the latitude and longitude of each boring within 3 feet.

7.2.2 Soil Gas Probe Installation and Sampling

A soil gas survey was performed at the subject site to evaluate the presence of VOCs in soil gas. The soil gas survey was performed in general conformance with the California Environmental Protection Agency – DTSC and California Regional Water Quality Control Board – Los Angeles and San Francisco Region's (LARWQCB and SFRWQCB) Advisory – Active Soil Gas Investigations, July 2015 and the Los Angeles Department of Building and Safety Information Bulletin (IB) P/BC 2020-101 (January 1, 2020).

Soil gas probes were installed at depths of 5 and 10 feet bgs in each boring. The soil gas probes installed at 10 feet bgs were to be utilized in the VOC soil gas study. Both the 5 and 10-foot soil gas probes were utilized in the methane survey. Groundwater was encountered at depths between 10 and 12 feet bgs in the borings located throughout the Site; therefore, the deeper soil gas probes could not be installed.

The soil gas probes consisted of inert ¼-inch nylaflow tubing fitted with a porous airstone at the terminus, which were set within one foot of sand, one foot of dry bentonite above, followed by hydrated bentonite to the next sand pack/nested probe depth or ground surface. This procedure was followed for the multiple probes depths, in that one foot of dry granular bentonite was emplaced on top of the sand pack encasing each probe, followed by hydrated bentonite. The surface end of the probe was fitted with a gas-tight leurlock to prevent infiltration of water or air. A temporary well box was installed in order to preserve the probes for future sampling. Soil gas probes were allowed to equilibrate for a minimum of 2 hours prior to sampling.

A shut-in test was conducted along the sampling train setup at each soil gas sampling depth and location, prior to purging each probe. If a leak was detected, the sampling train was reset and adjusted until no leaks are detected. At each sampling location an electric vacuum pump (set to draw 0.200 liters per minute of soil gas at a maximum vacuum of 100-inches of water) was attached to the probe and purged prior to sample collection. A default of three purge volumes was removed from the soil gas probe prior to sampling. Soil gas samples were obtained by drawing the sample

through the luerlock connection, which connects the sampling probe to the sample container.

A tracer gas mixture of n-pentane, n-hexane, and n-heptane was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points included the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. Tracer gas was not detected in the soil gas samples collected from the Site indicating that ambient air had not compromised the soil gas samples. One duplicate soil gas sample was collected and analyzed during this investigation.

Two sequential methane measurements were taken from the soil gas probes with a minimum 24-hour interval between the two measurements and pressure was measured utilizing a pressure transducer on the GEM-2000 Plus or a magnahelic gauge. Methane testing was conducted in accordance with Los Angeles Department of Building and Safety IB P/BC 2020-101.

7.2.3 Grab Groundwater Sampling

Grab groundwater samples were collected from borings LB-7 and LB-12. Groundwater was encountered at depths between 10 and 12 feet bgs in the borings located throughout the Site. Approximately 10 feet of slotted PVC was installed within the open borehole to depths approximately 5 feet below first encountered groundwater. Grab groundwater samples were collected using new dedicated tubing lowered through the PVC. A peristaltic pump was used to bring the groundwater samples to the surface through the tubing and into laboratory-supplied containers with proper preservative.

7.2.4 Groundwater Well Sampling

Groundwater samples were collected from the four existing onsite wells, MW-1 through MW-4. Each well was purged and sampled using low-flow sampling methods. Prior to purging and sampling, water levels (depth to water from top of casing) were measured with an accuracy of 0.01 foot using an electronic water-level meter. Groundwater monitoring wells were

then sampled using low-flow sampling methods. The low-flow sampling procedures are outlined as follows:

- A submersible bladder pump was used to purge and sample the wells. Prior to use at each monitoring well, reusable sampling equipment was decontaminated using Alconox and distilled water.

- Tubing was attached to a low-flow bladder pump. The bladder pump was installed slowly into the well to minimize the mixing of casing water and the suspension of any silt at the bottom of the well. The bladder pump was placed near the middle of the water column. The well was purged at a rate between 100 to 500 milliliters per minute (ml/min) to minimize drawdown in the well to less than 10 centimeters.

- Groundwater temperature, pH, specific conductance, dissolved oxygen (DO), oxidation reduction potential (ORP), and turbidity readings were measured using an in-line flow cell. Readings were collected approximately every 3 to 5 minutes according to manufacturer specifications and pumping rates.

- Purging ceased when at least one well casing volume had been purged or when the following parameters had stabilized for three successive readings:

  - Temperature: ± 3% (minimum ± 0.2 degrees Celsius);
  - pH: ± 0.1 unit;
  - Specific conductance: ± 3%;
  - DO: ± 10%, down to the level of accuracy at 0.2 milligram per liter (mg/L);
  - Turbidity: <50 NTU and ± 10% or lowest possible stable turbidity for three readings; and
  - ORP: ± 10 millivolts.

- After purging the in-line flow cell was disconnected and groundwater samples were collected from the pump discharge.

- At the completion of sampling activities, the pump was removed from the well, disposable tubing discarded, and the pump was

decontaminated.

The groundwater parameters recorded during purging activities are presented in Groundwater Sampling Logs included in Appendix G.

Immediately after collection, each groundwater sample was labeled and placed in a cooler containing ice for delivery, under chain-of-custody, to Jones for chemical analysis.

7.2.5 Backfill Procedures

Each boring was backfilled with sand and hydrated bentonite for the installation of multi-nested soil gas probes as described in Section 7.2.2. Upon completion of soil gas sampling activities, the probes were removed from the boreholes and the borings were backfilled with hydrated bentonite chips to a depth of approximately 4 inches bgs. The surface was returned to its original finish.

7.2.6 Decontamination Procedures

Reusable down-hole sampling tools were appropriately decontaminated between sampling depths by washing in a solution of non-phosphate soap and water, double-rinsing with potable water, and allowing to air-dry.

7.2.7 Investigation Derived Waste

Upon completion of soil and groundwater sampling activities, the soil cuttings, purged groundwater, and decontamination water were placed in Department of Transportation (DOT)-approved 55-gallon drums, stored onsite in an approved location pending sample analysis and profiling for eventual offsite disposal at a properly licensed facility.

7.3 Laboratory Analysis

Select soil samples collected from the subject site on February 17 and 18, 2022 were analyzed for VOCs by EPA Method 8260B, TPH as gasoline, diesel, and oil by EPA Method 8015M, and Title 22 Metals by EPA Methods 6010B/7471A.

Soil samples analyzed for VOCs were collected using EPA Method 5035 preparation procedures. Soil sub-cores were pulled directly from the sample sleeve using a laboratory-supplied disposable syringe. The soil sub-cores of appropriate mass were then transferred into laboratory-supplied 40-milliliter glass vials preserved with methanol and sodium bisulfate and properly capped, forming an airtight seal.

Soil gas samples collected on February 20, 2022 were immediately injected into an onsite mobile laboratory gas chromatograph/purge and trap system, operated by Jones, after collection. Each soil gas sample, including the duplicate, was analyzed for the tracer gas and VOCs by modified EPA Method 8260B. Additionally, methane measurements were recorded from each probe utilizing a RKI Eagle 4 Gas Meter on February 18 and 20, 2022.

Grab groundwater samples were analyzed for VOCs by EPA Method 8260B.

7.4 Soil Laboratory Results

The laboratory results of the soil samples are summarized in the following sub-sections and are presented in Tables 1 and 2. Copies of the laboratory reports are presented in Appendix H.

Results of the chemical analyses of the soil samples were compared to the following screening levels for soil in a residential setting:

- The EPA Residential Regional Screening Levels (RSLs, November 2021);
- DTSC Human Health Risk Assessment Note Number 3, DTSC-modified Screening Levels for Residential Soil (DTSC-SL, June 2020) and;
- The DTSC Southern California Background concentration of 12 milligrams per kilogram (mg/kg) for arsenic.

7.4.1 Metals

Title 22 Metals were detected in all of the soil samples analyzed with the exception of antimony and beryllium. No soil samples contained metals that exceeded their respective screening criteria for residential soils or background concentrations established for southern California, with the exception of arsenic and thallium.

- Arsenic was detected in 12 of the 31 soil samples analyzed during this investigation at concentrations ranging from 6.1 mg/kg to 35.1 mg/kg. The arsenic concentrations exceeded the background concentration established for southern California of 12 mg/kg in seven soil samples (LB-6-5', LB-6-10', LB-7-2', LB-7-5', LB-7-10', LB-8-2', and LB-8-5').
- Thallium was detected in seven of the 31 soil samples analyzed during this investigation at concentrations ranging from 8.9 mg/kg to 26.2 mg/kg. The thallium concentrations exceeded the DTSL-SL of 0.78 mg/kg in six soil samples (LB-6-5', LB-6-10', LB-7-2', LB-7-5', LB-7-10', LB-8-2', and LB-8-5').

The arsenic and thallium data for the seven samples (LB-6-5', LB-6-10', LB-7-2', LB-7-5', LB-7-10', LB-8-2', and LB-8-5') with exceedances was reviewed and determined to be questionable based on the observed concentrations, distribution of the samples across the subject site, and the depths of the samples. Aliquots of the seven samples were sent to SunStar Laboratories, Inc. for re-analysis using EPA Method 6020, which allows for a lower reporting limit and produces more reliable arsenic and thallium results. Using EPA Method 6020, arsenic was not detected above the southern California background concentrations of 12 mg/kg and thallium was not detected above the laboratory reporting limit of 0.25 mg/kg.

One soil sample (LB-6-2') containing a total lead concentration of 74.2 mg/kg, above 10 times the soluble threshold limit concentration (STLC) was analyzed using the STLC waste extraction test. The lead STLC in sample LB-6-2' was below the reporting limit of 0.50 milligrams per liter (mg/L).

7.4.2 TPH

TPH as gasoline and TPH as diesel were not detected above laboratory reporting limits in the samples analyzed during this investigation.

TPH as motor oil was detected in three of the 31 samples at concentration ranging from 116 mg/kg to 218 mg/kg. The concentrations of TPH as motor oil did not exceed the USEPA – SL of 2,400 mg/kg.

7.4.3 VOCs

Seven VOCs were detected above the laboratory reporting limits in the soil samples selected for analysis during this investigation. The maximum concentrations of VOCs detected during this investigation are presented below:

VOC	Maximum Concentration	Sample ID
Benzene	18.9 µg/kg	LB-9-5'
Ethylbenzene	3.0 µg/kg	LB-9-5'
1,3,5-Trimethylbenzene	1.1 µg/kg	LB-8-2'
Tetrachloroethene (PCE)	5,440 µg/kg	LB-11-5'
Trichloroethene (TCE)	55 µg/kg	LB-5-2'
Toluene	18.0 µg/kg	LB-9-5'
Xylenes	3.1 µg/kg	LB-9-5'

Note: µg/kg = micrograms per kilogram

The concentrations of VOCs detected in soil samples analyzed during this investigation did not exceed the regulatory screening levels for residential soil. It should be noted that although soil concentrations did not exceed residential use limits, significant concentrations of PCE in soil were detected in the soil samples collected from boring LB-11, advanced adjacent to the floor drain within the former dry cleaner unit. The exceedances of PCe and TCE in soil are shown on Figure 4.

7.5 Soil Gas Laboratory Results

The laboratory results of the soil gas samples are summarized in the following sub-sections and are presented in Table 4. A copy of the laboratory report is presented in Appendix H.

Due to tight, clayey soils, no flow conditions were encountered in borings LB-1 through LB-4. Samples were not collected from these borings.

Results of the chemical analyses of the soil gas samples were compared to the

USEPA RSLs (November 2021) and the DTSC-SLs (June 2020). These screening levels were adjusted for indoor air in a residential setting assuming a slab attenuation factor of 0.001 according to Table 2 of the DTSC 2011 Final Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air and a more conservative slab attenuation factor typically applied to existing buildings of 0.03 presented in the Draft Supplement Guidance: Screening and Evaluating Vapor Intrusion Supplement Guidance issued by the DTSC in February 2020.

7.5.1 VOCs

Ten VOCs were detected above the laboratory reporting limits in the soil gas samples selected for analysis during this investigation. The maximum concentrations of VOCs detected in soil gas are presented below:

VOC	Maximum Concentration	Boring and Sample Depth
Benzene	35 $\mu g/m^3$	LB-8-10'
Ethylbenzene	27 $\mu g/m^3$	LB-8-10'
Freon 113	30 $\mu g/m^3$	LB-6-10'
Trichlorofluoromethane	361 $\mu g/m^3$	LB-5-10'
Toluene	205 $\mu g/m^3$	LB-8-10'
Xylenes	123 $\mu g/m^3$	LB-5-10' REP
1,2,4-Trimethylbenzene	23 $\mu g/m^3$	LB-5-10' REP
4-Isopropyltoluene	38 $\mu g/m^3$	LB-5-10' REP
Tetrachloroethene (PCE)	95,800 $\mu g/m^3$	LB-5-10' REP
Trichloroethylene (TCE)	1,700 $\mu g/m^3$	LB-5-10'

Note: $\mu g/m^3$ = micrograms per cubic meter

Ethylbenzene, Freon 113, trichlorofluoromethane, toluene, xylenes, 1,2,4-Trimethylbenzene, and 4-Isopropyltoluene were detected at concentrations that did not exceed their respective residential screening limits using both the 0.001 and 0.03 attenuation factors.

Benzene was detected in five of the nine (including a duplicate sample)

soil gas samples analyzed during this investigation at concentrations ranging from 12 μg/m^3 to 35 μg/m^3. The concentrations of benzene in five samples (LB-5-10', LB-5-10' REP, LB-8-10', LB-11-10', and LB-12-10') exceed the Residential Indoor Air Screening Level using the more conservative 0.03 attenuation factor. It should be noted that the concentrations of benzene do not exceed the screening level using the currently accepted attenuation factor of 0.001 for future residential structures.

PCE was detected in each (including a duplicate sample) soil gas sample analyzed during this investigation at concentrations ranging from 841 μg/m^3 to 95,800 μg/m^3. All concentrations of PCE exceed the Residential Indoor Air Screening Level using the currently accepted attenuation factor of 0.001 for future residential structures and the more conservative attenuation factor of 0.03.

TCE was detected in seven of the nine (including a duplicate sample) soil gas samples analyzed during this investigation at concentrations ranging from 11 μg/m^3 to 1,700 μg/m^3. The concentrations of TCE in six samples (LB-5-10', LB-5-10' REP, LB-6-10', LB-7-10', LB-10-10' and LB-11-10') exceed the Residential Indoor Air Screening Level using the more conservative 0.03 attenuation factor. It should be noted that the concentrations of TCE do not exceed the screening level using the currently accepted attenuation factor of 0.001 for future residential structures.

The exceedances of PCE and TCE in soil gas are shown on Figure 5.

7.5.2 Methane

Methane was detected in each soil gas probe tested during this investigation (with the exception of borings LB-1 through LB-4 which had no flow conditions) at concentrations ranging from 45 parts per million by volume (ppmv) to 2,400 ppmv. No significant soil gas pressures, exceeding 2 inches of water, were observed during the soil gas testing.

7.6 Groundwater Laboratory Results

Groundwater analytical results were compared to the California MCLs for drinking water. The results of the laboratory analyses of groundwater samples collected during this investigation are summarized in Table 5 and below.

7.6.1 Grab Groundwater Results

Six VOCs including benzene, chloroform, cis-1,2-DCE, PCE, TCE, and toluene were detected in one or both of the of two grab groundwater samples analyzed during this investigation (LB-7-GW and LB-12-GW). Maximum concentrations were detected as follows:

Analyte	Concentration	Boring
Benzene	0.6 µg/L	LB-12-GW
Chloroform	0.7 µg/L	LB-12-GW
cis-1,2-DCE	18.8 µg/L	LB-7-GW
PCE	32.5 µg/L	LB-12-GW
TCE	6.4 µg/L	LB-7-GW
Toluene	0.7 µg/L	LB-12-GW

Concentrations of cis-1,2-DCE, PCE, and TCE detected in the one or both of the grab groundwater samples collected during this investigation exceeded the MCLs for drinking water. The exceedances of PCE and TCE in groundwater are shown on Figure 6.

7.6.2 Groundwater Well Results

Three VOCs including cis-1,2-DCE, PCE, and TCE were detected in one or more of the four groundwater well samples analyzed during this investigation (MW-1 through MW-4). Maximum concentrations were detected as follows:

Analyte	Concentration	Boring
cis-1,2-DCE	48.3 µg/L	MW-4
PCE	14.6 µg/L	MW-3

TCE	9.9 µg/L	MW-3

Concentrations of cis-1,2-dichloroethene, PCE, and TCE were detected above the California MCLs in groundwater samples from wells MW-3 and MW-4. The exceedances of PCE and TCE in groundwater are shown on Figure 6.

8.0 FINDINGS

Leighton performed a Phase I and Limited Phase II ESA of the proposed multi-family residential development located at the address of 400 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California in accordance with Oklahoma Rock's authorization.

8.1 Onsite

Historically, the subject site was used as a residence, commercial property, gasoline service station (1936 until roughly 1942), and a church. In approximately 1983, buildings previously erected onsite were demolished and the present day commercial building was constructed onsite in approximately 1985. Various commercial businesses have occupied the site since the present day building was constructed, including a dry cleaner (1991 through 2020), retail stores, restaurants, personal care services, financial services, and dental and healthcare services.

Currently, the subject site is occupied by several commercial businesses (Appendix B, Photos 1 through 10). Onsite businesses include retail stores, restaurants, personal care services, financial services, and dental and healthcare services. One unoccupied suite, located in the southwest portion of the subject site, was formerly occupied by a dry cleaner. The subject site is currently developed with a one partial two-story, multi-tenant, commercial structure. The structure was built circa 1985/1986 and totals approximately 17,228 square feet. The subject site is also improved with asphalt-paved parking lots, concrete walkways, and landscaping.

Various site assessments have been completed for the subject site by others and identified the release of chlorinated solvents (VOCs), primarily PCE and TCE, at the site affecting soil, soil gas, and groundwater. A Voluntary Cleanup Agreement (VCA) was entered into between LACoFD and the current owner YVF Investments in February 2020. LACoFD provides oversight of the assessment and cleanup of chlorinated solvents affecting soil, soil gas, and groundwater beneath the subject site. The LACoFD suspended a one-year groundwater monitoring/sampling program on January 22, 2021 based on the low levels of VOCs detected in wells MW-1 through MW-3. The highest concentrations of chlorinated solvents detected during the routine monitoring were identified in well

MW-4, the well furthest north of the former onsite dry cleaners. The LACoFD is aware that previous onsite soil vapor sampling and indoor air sampling does indicate that potential VOC VI could be an issue for future onsite residential developments if VI mitigation measures were not considered. The LACoFD also indicated that additional assessment of VI should be conducted prior to pursuing any residential developments at the subject site. In addition, the LACoFD requires the preparation and implementation of a SMP prior to redevelopment of the subject site and the filing of an Environmental Notice on the property.

Based on the results of our concurrent Limited Phase II ESA, elevated concentrations of cis-1,2-DCE, PCE, and TCE were detected in groundwater samples throughout the subject site. Additionally, elevated concentrations of benzene, PCE and TCE were detected in the soil gas samples collected throughout the subject site. It should be noted that one floor drain was observed within the former dry cleaner suite. Based on results of our Limited Phase II ESA, the shallow soil in the vicinity of the floor drain contains elevated concentrations of PCE. This could be indicative of improper disposal of PCE (historically) and may be a significant release point of PCE to the subsurface.

The subject site is located within a City of Los Angeles Methane Zone. Methane was detected in soil gas at a maximum concentration of 2,400 ppmv at the subject site. Methane levels between 1,000 ppmv and 5,000 ppmv with pressure readings ≤2 inches of water correspond to Site Design Level III in the Los Angeles Municipal Code Ordinance No. 175790.

8.2 Offsite

Historically, the adjacent properties were vacant until approxiamtely 1928 when residential developemnt began in the surrounding proerties to the north and east. Properties to the south and west have been mostly commerical with some residential.

The subject site is currently bordered to the north by West 4th Street, followed by a flower shop and residences; to the east by an alleyway, followed by residences and a parking lot; to the south by a medical center, followed by Colgate Avenue; and to the west by South San Vicente Boulevard, followed by commercial and residential properties.

Surrounding properties with potential to significantly affect the subject site were not identified during this Phase I and Limited Phase II ESA.

8.3 Data Gaps

No significant data gaps were identified by Leighton.

9.0 OPINION

9.1 Onsite

It is Leighton's opinion that the documented release of chlorinated solvents (VOCs) to the subsurface affecting the soil, soil gas and groundwater beneath the subject site is considered a REC and vapor intrusion concern.

Although not considered a REC, the subject site was occupied by a gasoline service station circa 1936 to 1942. Tank removal records have not been found. A previous geophysical survey identified an anomaly in the northwest portion of the subject site, which is assumed to be the resulting tank excavation cavity (in the vicinity of boring LB-1). Based on the result of our Limited Phase II ESA, the northern portion of the subject site has not been significantly impacted with TPH or gasoline related VOCs (BTEX). However, it should be noted that due to the current configuration of the onsite building, a complete assessment of this area of the subject site could not be completed. Additionally, concentrations of chlorinated solvents detected in groundwater and soil gas samples collected from borings LB-7 and LB-8 may be indicative of a secondary release in this portion of the subject site.

9.2 Offsite

No offsite RECs, HRECs, or CRECs were identified that would adversely affect the subject site.

10.0 CONCLUSIONS

Leighton has performed a Phase I and Limited Phase II ESA in conformance with the scope and limitations of ASTM E1527-13/-21 of the proposed multi-family residential development, located at the address of 400 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report. This assessment has revealed no evidence of RECs or CRECs in connection with the subject site except for the following:

- The documented release of chlorinated solvents (VOCs) to the subsurface soil, soil gas, and groundwater beneath the subject site and the known vapor intrusion concern.

Although not considered RECs, the following items should be addressed prior to redevelopment of the subject site:

- The subject site was occupied by a gasoline service station circa 1936 to 1942. Tank removal records have not been found. A previous geophysical survey identified an anomaly in the northwest portion of the subject site, which is assumed to be the resulting tank excavation cavity (in the vicinity of boring LB-1). Based on the result of our Limited Phase II ESA, the northern portion of the subject site has not been significantly impacted with TPH or gasoline related VOCs (BTEX). However, it should be noted that due to the current configuration of the onsite building, a complete assessment of this area of the subject site could not be completed. Additionally, concentrations of chlorinated solvents detected in groundwater and soil gas samples collected from borings LB-7 and LB-8 may be indicative of a secondary release in this portion of the subject site.

- Prior to the redevelopment of the subject site for residential use, the LACoFD will require additional assessment of vapor intrusion, the preparation and implementation of a SMP, and the filing of an Environmental Notice on the property.

- The subject site is located within a City of Los Angeles Methane Zone. Methane was detected in soil gas at a maximum concentration of 2,400 ppmv at the subject site. Methane levels between 1,000 ppmv and 5,000 ppmv with pressure readings ≤2 inches of water correspond to Site Design Level III in the Los Angeles Municipal Code Ordinance No. 175790. The methane mitigation requirements for Site Design Level III properties within the city of Los Angeles

include, but are not limited to, the installation of an active vented sub-slab ventilation system equipped with a gas detection system, mechanical ventilation, alarm system,, vent risers, perforated horizontal pipes, trench dams, conduit seals, and dewatering (if necessary). A methane survey report should be prepared and submitted to the city of Los Angeles Building and Safety Department with your development plans that include the appropriate mitigation for review and approval.

In general, observations should be made during future subject site development for areas of possible contamination such as, but not limited to, the presence of former groundwater wells, underground facilities, buried debris, waste drums, and tanks, stained soil or odorous soils. Should such materials be encountered, further investigation and analysis may be necessary at that time.

11.0 DEVIATIONS

Leighton did not deviate from or alter the scope of work, as defined in Section 1.3 of this report. Significant data gaps were not identified that affect the ability of Leighton to identify RECs at the subject site.

12.0 ADDITIONAL SERVICES

Leighton did not perform work outside the scope of work as defined in Section 1.3 and 1.6 of this report.

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

13.1 Corporate

Leighton is a California corporation, providing geotechnical and environmental consulting services throughout California. We are solely a consulting firm without interests in real property other than our office locations in Southern California. We provide professional environmental consulting services including application of science and engineering to environmental compliance, hazardous materials/waste assessment and cleanup, and management of hazardous, solid and industrial waste. Phase I and Limited Phase II ESAs are a part of this practice area and have been conducted by us.

13.2 Individual

The qualifications of the Principal Geologist and the other Leighton environmental professionals involved in this Phase I ESA meet the Leighton corporate requirements for performing Phase I ESAs as specified by ASTM E1527-13. In addition, Ms. Brynn McCulloch is an Environmental Professional as identified by ASTM E1527-13.

13.3 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional, as defined by §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Brynn McCulloch

Notes:

RSL = USEPA Regional Screening Levels (RSLs) for Soil (November 2021)
HERO Note 3 = Department of Toxic Substances Control (DTSC) Office of Human and Ecological Risk (HERO) Note Number 3 Screening Levels (SLs) (June 2020)
SoCal Background = DTSC Determination of a Southern California Regional Background Arsenic Concentration in Soil (DTSC, 2008)
mg/kg = Milligrams per Kilogram
-- = not analyzed or not applicable
<0.5 = not detected above laboratory reporting limit as shown
Bold concentrations were detected above laboratory reporting limit
Highlighted concentrations exceed one or more regulatory screening value

mg/L = Milligrams per Liter
TTLC = Total threshold limit concentration
STLC = Soluble threshold limit concentration
TCLP = Toxicity characteristic leaching procedure
* = Analyzed by EPA Method 6020

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

QUITCLAIM DEED

THE UNDERSIGNED GRANTOR(s) DECLARE(s) DOCUMENTARY TRANSFER TAX $NONE
[ ] computed on full value of property conveyed, or
[ ] computed on full value less value of liens or encumbrances remaining at time of sale,
[ ] unincorporated area; [ ] City of Los Angeles, and

FOR A VALUABLE CONSIDERATION, Receipt of which is hereby acknowledged,
FARSHAD SAMADI, a single man, as to 50% interest and YADOLLAH SAMADI and VAJIEH SOUFERIAN SAMADI, Trustees of THE SAMADI FAMILY TRUST, dated February 16,2000, as to 50% interest

hereby remise, release and forever quitclaim to
YVF INVESTMENT CORP., A California Corporation

the following described property in the City of **Los Angeles**, County of **Los Angeles** State of California;

LOTS 13,14,15,16,17 AND 18 IN BLOCK 37 OF TRACT NO. 7555, IN THE CITY OF LOS ANGELES AS PER MAP RECORDED IN BOOK 88 PAGES 79 THROUGH 84 INCLUSIVE OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

EXCEPT from Lots 13, 14, and 15 all Oil, Gas, Minerals and other Hydrocarbon substances in and under that portion of said land lying below a depth of 500 feet from the surface thereof, without, however any right to enter upon the surface of said land.

This is a bonafide gift and the Grantor received nothing in return, R&T 1911.

The EDR FieldCheck®System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). LEIGHTON AND ASSOCIATES, INC. used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by LEIGHTON AND ASSOCIATES, INC.. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the RCRA-SQG list, as provided by EDR, has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the ENVIROSTOR list, as provided by EDR, has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the SWEEPS UST list, as provided by EDR, has revealed that there are 8 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 46 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the LOS ANGELES CO LF METHANE list, as provided by EDR, has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by LEIGHTON AND ASSOCIATES, INC. of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 04/21/2019. OBSERVATION: Owner/Operator

SLS HOTEL (Continued) **S112979665**

failed to meet one or more of the requirements applicable to overfill prevention equipment. Failure to test overfill prevention by 10/13/18. Tested 1/29/19, results to be reviewed by LAFD upon receipt. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification. Test results to be reviewed by LAFD upon submittal.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 11/27/2019. OBSERVATION: Uniform Hazardous Waste Manifests for all hazardous wastes were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for all hazardous wastes and submit copies to the CUPA.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 360604
Site Name: PetSmart #2195
Violation Date: 01-20-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 09/20/2018. OBSERVATION: This facility s EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. -CAL000411270 is inactive in HWTS. CORRECTIVE ACTION: Immediately contact DTSC and reactivate your EPA ID number and submit evidence to the cupa by 2/19/17.

Site Name: BEVERLY HILLS AUTO BODY CRP
Violation Date: 05-10-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.

BEVERLY HILLS AUTO BODY GROUP INC (Continued) **1000216062**

Violation Notes: Returned to compliance on 08/29/2017. OBSERVATION: An Emergency Response Plan and procedures has not been completed and submitted electronically to the CUPA. CORRECTIVE ACTION: Complete the emergency response plan and procedures to include all required content and submit electronically in the California Environmental Reporting System (CERS).
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 98497
Site Name: BEVERLY HILLS AUTO BODY CRP
Violation Date: 05-10-2016
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 12/13/2017. OBSERVATION: Copies of hazardous waste disposal records for 2014, 2015 and 2016. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 06/10/2016.

CERS HAZ WASTE:
Name: ROSS DRESS FOR LESS #1165
Address: 8487 W. 3RD ST, BLDG D
City,State,Zip: LOS ANGELES, CA 90048
Site ID: 62979
CERS ID: 10509409
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 62979
Site Name: Ross Dress For Less #1165
Violation Date: 10-30-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 11/16/2017. OBSERVATION: Uniform Hazardous Waste Manifests for all hazardous wastes were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for all hazardous wastes and submit copies to the CUPA.

Case Type: Cleanup Program Site
Case Worker: CW
Local Agency: Not reported
RB Case Number: 1846800
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil Vapor
Potential Contaminants of Concern: Not reported
Site History: A dry cleaners facility occupied a portion of the Site for approximately 39 years, between February 1967 and February 2006. The on-site building was constructed in 1963. Prior to that time the Site was used as residential property. Dry cleaners facilities that operated at the Site has included Norge Village Cleaners (1967 to 1969), Norge Village Cleaning Center (1969 to 1978), and Merry Go Round Cleaners (1978 to 2006). The former Merry Go Round Cleaners was a tenant of the Francell Trusts and operated aton the Site. The former Merry Go Round Cleaners was owned and operated by Lloyd, Chizuko and Day Suehiro. Somito is the current property owner of the Site. Somito purchased the Site from the Living Trusts of John R. and Betty J. Franscell, George J. and Billie M. Franscell, and Joseph J. and Donna J. Franscell Trusts (Franscells) in January 2007. Prior to January 2007, Franscell Trusts the Franscells owned the property for approximately 40 years.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-18-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Dave Suber, owner, email: dave@perfectcleaners.com. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

City,State,Zip: LOS ANGELES, CA 90048
Region: STATE
Facility Status: **Open - Site Assessment**
Status Date: 12/30/2008
Global Id: SL0603740571
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.073003
Longitude: -118.373003
Case Type: Cleanup Program Site
Case Worker: TA
Local Agency: Not reported
RB Case Number: 1218
File Location: Regional Board
Potential Media Affected: Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: This Site is a 10,970 square feet area with a single-story building and paved asphalt parking in a mixed commercial and residential area of Los Angeles. Based on the information provided, a dry cleaning facility has continuously occupied the Site for at least 56 years, and a reported use of chlorinated solvent, from as early as 1971 through at least 2001. Wardrobe Cleaners currently uses a natural organic solvent for dry cleaning. In November 2005, AEI conducted subsurface investigation that included collection of soil and discrete groundwater samples. The investigation concluded that the soil beneath the Site had been impacted due to the release of tetrachloroethylene (PCE) and trichloroethylene (TCE) which is consistent with solvent used in dry cleaning operations. AEI also identified the dry cleaning machine and waste storage area as potential contaminant sources. The soil analytical data show PCE concentrations as high as 586,000 micrograms per kilogram (a%g/Kg) at 2-feet below ground surface (bgs) and as high as 1,030 micrograms per liter (a%g/L) in groundwater at the Site. Based on the Site assessment conducted, AEC proposed a RAP for soil and groundwater. The soil RAP is proposing excavation of impacted soil to 10 feet bgs and in-situ chemical oxidation using Fentons reagent for groundwater remediation. Additional groundwater monitoring wells are being proposed to monitor the remediation at the Site. According to the Department of Water Resources Bulletin No. 104, the Site is located

WARDROBE CLEANERS (Continued) **S108724714**

in the Santa Monica Basin of the Coastal Plain of Los Angeles. The Site is underlain by the Lakewood Formation and the top of the uppermost Exposition Aquifer occurs at approximately 60 feet bgs.

Based on the soil boring log, the soil beneath the Site consists of silty clay, clayey sand and clayey silt. Groundwater at the Site is encountered between 20 and 26 feet bgs.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: D013
Waste Description: LINDANE (1,2,3,4,5,6-HEXA-CHLOROCYCLOHEXANE, GAMMA ISOMER)

Waste Code: D018
Waste Description: BENZENE

RAD/ENV SAFETY DEPARTMENT (Continued) **1000156119**

Waste Code: D019
Waste Description: CARBON TETRACHLORIDE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D028
Waste Description: 1,2-DICHLOROETHANE

Waste Code: D033
Waste Description: HEXACHLOROBUTADIENE

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RAD/ENV SAFETY DEPARTMENT (Continued) **1000156119**

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: P087
Waste Description: OSMIUM OXIDE OSO4, (T-4)- (OR) OSMIUM TETROXIDE

Waste Code: P105
Waste Description: SODIUM AZIDE

Waste Code: P106
Waste Description: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

Waste Code: U001
Waste Description: ACETALDEHYDE (I) (OR) ETHANAL (I)

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U003
Waste Description: ACETONITRILE (I,T)

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U017
Waste Description: BENZAL CHLORIDE (OR) BENZENE, (DICHLOROMETHYL)-

Waste Code: U021
Waste Description: [1,1'-BIPHENYL]-4,4'-DIAMINE (OR) BENZIDINE

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U048
Waste Description: O-CHLOROPHENOL (OR) PHENOL, 2-CHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-

RAD/ENV SAFETY DEPARTMENT (Continued) **1000156119**

7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U075
Waste Description: DICHLORODIFLUOROMETHANE (OR) METHANE, DICHLORODIFLUORO-

Waste Code: U081
Waste Description: 2,4-DICHLOROPHENOL (OR) PHENOL, 2,4-DICHLORO-

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U133
Waste Description: HYDRAZINE (R,T)

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U181
Waste Description: 5-NITRO-O-TOLUIDINE (OR) BENZENAMINE, 2-METHYL-5-NITRO

Waste Code: U182
Waste Description: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U237
Waste Description: 2,4-(1H,3H)-PYRIMIDINEDIONE, 5-[BIS(2-CHLOROETHYL)AMINO]- (OR) URACIL

RAD/ENV SAFETY DEPARTMENT (Continued) **1000156119**

MUSTARD

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Waste Code: U248
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYL-BUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS

Enforcement Action Type: Notice of Violation
Facility County: LOS ANGELES
Program System Acronym: AIR
Enforcement Action Forum Desc: Administrative - Informal
EA Type Code: NOV
Facility SIC Code: 9999
Federal Facility ID: Not reported
Latitude in Decimal Degrees: 34.076654
Longitude in Decimal Degrees: -118.380601
Permit Type Desc: Not reported
Program System Acronym: CASCA00006037CA102
Facility NAICS Code: 622110
Tribal Land Code: Not reported

US AIRS (AFS):
Envid: 1000156119
Region Code: 09
County Code: CA037

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

RAD/ENV SAFETY DEPARTMENT (Continued) **1000156119**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

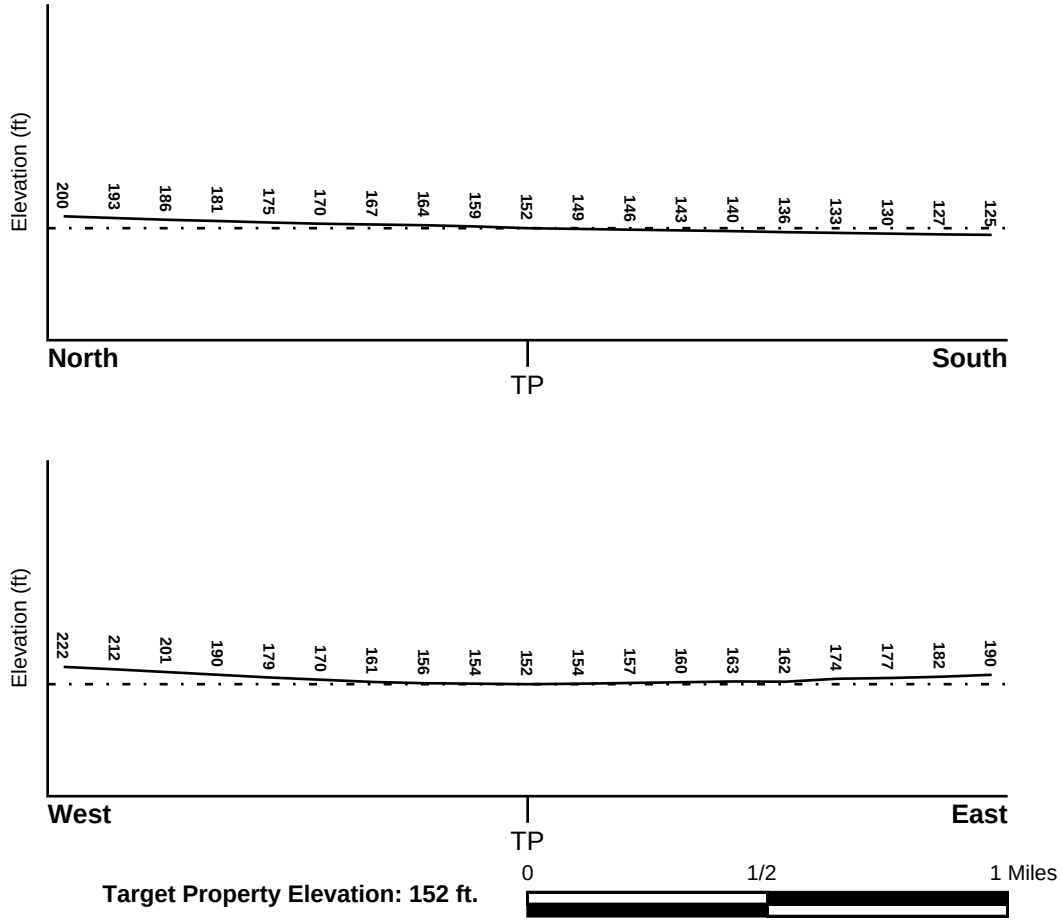

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1585F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Leighton and Associates, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Leighton and Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Leighton and Associates, Inc. on Jan 25, 2022.

TARGET PROPERTY

400-430 San Vicente Boulevard
Los Angeles, CA 90048

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

SOIL BORING LOG

PROJECT NUMBER	13401.002	**BORING/WELL NUMBER**	LB-1
PROJECT NAME	Oklahome Rock/SanVincent/EnvPh II	**DATE DRILLED**	1/17/2022
LOCATION	400 South San Vicente Boulevard, Los Angeles, CA	**CASING TYPE/DIAMETER**	N/A / N/A
DRILLING METHOD	Direct Push	**SCREEN TYPE/SLOT**	N/A / N/A
SAMPLING METHOD	SPT	**FILTER PACK TYPE**	N/A
GROUND ELEVATION		**GROUT TYPE**	N/A
TOP OF CASING ELEV.	N/A	**DEPTH TO WATER**	ft.
LOGGED BY	YTN	**TOTAL DRILL DEPTH**	10 ft.
REMARKS	Drilling completed by Millenium Environmental, Inc.	**HOLE DIAMETER**	3.25 inch

DEPTH (ft. BGL)	BLOW COUNTS	RECOVERY (inches)	SAMPLE ID.	EXTENT	PID (ppm)	U.S.C.S.	LITHOLOGIC DESCRIPTION
							@Surface: 4" Concrete
							@2': Lean to fat CLAY with sand, grayish brown, moist, stiff, no s/o.
			LB-1-2'		2.0		@5': Lean CLAY with trace silt, pale brown, moist, stiff, no s/o.
5			LB-1-5'		0.7		@10': Lean to fat CLAY with trace sand, medium brown, moist, stiff, fine to medium grained, no s/o.
10			LB-1-10'		0.2		@11.5': Lean to fat CLAY with trace sand, medium brown, wet, stiff, fine to medium grained, no s/o.
15							Total Depth: 12 feet bgs Groundwater encountered: 11.5 feet Probes installed at 5 and 10 feet

SOIL BORING LOG

PROJECT NUMBER	13401.002	**BORING/WELL NUMBER**	LB-10
PROJECT NAME	Oklahome Rock/SanVincent/EnvPh II	**DATE DRILLED**	1/18/2022
LOCATION	400 South San Vicente Boulevard, Los Angeles, CA	**CASING TYPE/DIAMETER**	N/A / N/A
DRILLING METHOD	Hand Auger, Direct Push	**SCREEN TYPE/SLOT**	N/A / N/A
SAMPLING METHOD	8oz Glass Jar, SPT	**FILTER PACK TYPE**	N/A
GROUND ELEVATION		**GROUT TYPE**	N/A
TOP OF CASING ELEV.	N/A	**DEPTH TO WATER**	ft.
LOGGED BY	YTN	**TOTAL DRILL DEPTH**	10 ft.
REMARKS	Drilling completed by Millenium Environmental, Inc.	**HOLE DIAMETER**	3.25 inch

DEPTH (ft. BGL)	BLOW COUNTS	RECOVERY (inches)	SAMPLE ID.	EXTENT	PID (ppm)	U.S.C.S.	LITHOLOGIC DESCRIPTION
							@Surface: 4" Concrete Hand Auger to 4.5 feet.
							@2': Lean to fat CLAY with trace sand, dark brown, moist, stiff, fine to medium grained, no s/o.
			LB-10-2'		0.0		@5': Lean to fat CLAY, dark brown, moist, stiff, no s/o.
5			LB-10-5'		0.5		@10': Lean CLAY with sand and trace gravel, brown, moist, stiff, no s/o.
10			LB-10-10'		2.3		Total Depth: 10.0 feet bgs No groundwater encountered due to limitations Probes installed at 5 and 10 feet
15

SAMPLE NON-CONFORMANCE

Jones ID: ~~ST-19003~~ ~~ST-1900~~ ST-19003

CLIENT: Leighton

PROJECT: San Vicente

DATE/TIME: 1/18/22 1500

REPORTED BY: TA

Non-Conformance ID:

TEMPERATURE: (Temp criteria = 6°C > Temp > 0°C)

- □ Sample Temp(s)
- □ Cooler Temp(s)
- □ Temperature Blank(s)
- □ Cooler not received
- □ Cooler leaking / damaged
- ☒ Other (see comments)

CHAIN OF CUSTODY (COC):

- □ Not relinquished by client
- □ No date/time relinquished
- □ Incomplete information provided
- □ COC not received – notify PM

SAMPLES:

- □ Incorrect sample ID
- □ Incorrect sampling Date/Time
- □ Improper container used
- □ Samples not received but listed on COC
- □ Samples received but not listed on COC
- □ Logged in, on hold until further notice
- □ Logged based on Label Information and not COC
- □ Logged according to Work Plan and not COC
- □ Other (see comments)
- □ Mislabeled as to tests, preservatives, etc.
- □ Holding time expired – list sample ID and test

LABELS:

- □ Not the same sample ID / info as on the COC
- □ Incomplete information
- □ Markings / Info illegible

CONTAINERS:

- □ Extra
- □ Missing
- □ Leaking
- □ Broken
- □ Insufficient quantities for analysis

PRESERVATION:

- □ Not preserved/Improper preservative used

CUSTODY SEALS:

- □ None
- □ Not intact

Comments: Samples not received on day of sampling

Version 2.0 – 8.28.20

	Irvine, CA 92614	**Client Ref. No.:**	13401.002
Attn:	Yvonne Nguyen	**Date Sampled:**	1/20/2022
		Date Received:	1/20/2022
Project:	Oklahoma Rock/San Vicente/EnvPh II	**Date Analyzed:**	1/20/2022
Project Address:	400 South San Vicente Boulevard	**Physical State:**	Soil Gas
	Los Angeles, CA		

ANALYSES REQUESTED

1. EPA 8260B – Volatile Organics by GC/MS + Oxygenates

Sampling – Soil Gas samples were collected in glass gas-tight syringes equipped with Teflon plungers.

A tracer gas mixture of n-pentane, n-hexane, and n-heptane was placed at the tubing-surface interface before sampling. These compounds were analyzed during the 8260B analytical run to determine if there were surface leaks into the subsurface due to improper installation of the probe. No tracer was detected in any of the samples reported herein.

The sampling rate was approximately 200 cc/min, except when noted differently on the chain of custody record, using a glass gas-tight syringe. Purging was completed using a pump set at approximately 200 cc/min, except when noted differently on the chain of custody record. A default of 3 purge volumes was used as recommended by July 2015 DTSC/RWQCB guidance documents.

Prior to purging and sampling of soil gas at each point, a shut-in test was conducted to check for leaks in the above ground fittings. The shut-in test was performed on the above ground apparatus by evacuating the line to a vacuum of 100 inches of water, sealing the entire system and watching the vacuum for at least one minute. A vacuum gauge attached in parallel to the apparatus measured the vacuum. If there was any observable loss of vacuum, the fittings were adjusted as needed until the vacuum did not change noticeably. The soil gas sample was then taken.

No flow conditions occur when a sampling rate greater than 10 mL/min cannot be maintained without applying a vacuum greater than 100 inches of water to the sampling train. The sampling train is left at a vacuum for no less than three minutes. If the vacuum does not subside appreciably after three minutes, the sample location is determined to be a no flow sample.

Analytical – Soil Gas samples were analyzed using EPA Method 8260 that includes extra compounds required by DTSC/RWQCB (such as Freon 113). Instrument Continuing Calibration Verification, QC Reference Standards, Instrument Blanks and Sampling Blanks were analyzed every 12 hours as prescribed by the method. In addition, a Laboratory Control Sample (LCS) and Laboratory Control Sample Duplicate (LCSD) were analyzed with each batch of Soil Gas samples. A duplicate/replicate sample was analyzed each day of the sampling activity. All samples were injected into the GC/MS system within 30 minutes of collection.

Approval: 

Douglas A. Fowler, B.S.
Stationary Lab Chemist

Notes and Definitions

QM-PS	The percent recovery and/or RPD are outside acceptance criteria. Results accepted based upon percent recovery results in the post spike and/or serial dilution.
QB-01	The method blank contains analyte at a concentration above the MRL; however, concentration is less than 10% of the sample result, which is negligible according to method criteria.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Important Information about This

Geoenvironmental Report

Geoenvironmental studies are commissioned to gain information about environmental conditions on and beneath the surface of a site. The more comprehensive the study, the more reliable the assessment is likely to be. But remember: Any such assessment is to a greater or lesser extent based on professional opinions about conditions that cannot be seen or tested. Accordingly, no matter how many data are developed, risks created by unanticipated conditions will always remain. *Have realistic expectations.* Work with your geoenvironmental consultant to manage known and unknown risks. Part of that process should already have been accomplished, through the risk allocation provisions you and your geoenvironmental professional discussed and included in your contract's general terms and conditions. This document is intended to explain some of the concepts that may be included in your agreement, and to pass along information and suggestions to help you manage your risk.

Beware of Change; Keep Your Geoenvironmental Professional Advised

The design of a geoenvironmental study considers a variety of factors that are subject to change. Changes can undermine the applicability of a report's findings, conclusions, and recommendations. *Advise your geoenvironmental professional about any changes you become aware of.* Geoenvironmental professionals cannot accept responsibility or liability for problems that occur because a report fails to consider conditions that did not exist when the study was designed. Ask your geoenvironmental professional about the types of changes you should be particularly alert to. Some of the most common include:

- modification of the proposed development or ownership group,
- sale or other property transfer,
- replacement of or additions to the financing entity,
- amendment of existing regulations or introduction of new ones, or
- changes in the use or condition of adjacent property.

Should you become aware of any change, *do not rely on a geoenvironmental report.* Advise your geoenvironmental professional immediately; follow the professional's advice.

Recognize the Impact of Time

A geoenvironmental professional's findings, recommendations, and conclusions cannot remain valid indefinitely. The more time that passes, the more likely it is that important latent changes will occur. *Do not rely on a geoenvironmental report if too much time has elapsed since it was completed.* Ask your environmental professional to define "too much time." In the case of Phase I Environmental Site Assessments (ESAs), for example, more than 180 days after submission is generally considered "too much."

Prepare To Deal with Unanticipated Conditions

The findings, recommendations, and conclusions of a Phase I ESA report typically are based on a review of historical information, interviews, a site "walkover," and other forms of noninvasive research. When site subsurface conditions are not sampled in any way, the risk of unanticipated conditions is higher than it would otherwise be.

While borings, installation of monitoring wells, and similar invasive test methods can help reduce the risk of unanticipated conditions, *do not overvalue the effectiveness of testing.* Testing provides information about actual conditions only at the precise locations where samples are taken, and only when they are taken. Your geoenvironmental

professional has applied that specific information to develop a general opinion about environmental conditions. *Actual conditions in areas not sampled may differ (sometimes sharply) from those predicted in a report.* For example, a site may contain an unregistered underground storage tank that shows no surface trace of its existence. *Even conditions in areas that were tested can change*, sometimes suddenly, due to any number of events, not the least of which include occurrences at adjacent sites. Recognize, too, that *even some conditions in tested areas may go undiscovered,* because the tests or analytical methods used were designed to detect only those conditions assumed to exist.

Manage your risks by retaining your geoenvironmental professional to work with you as the project proceeds. Establish a contingency fund or other means to enable your geoenvironmental professional to respond rapidly, in order to limit the impact of unforeseen conditions. And to help prevent any misunderstanding, identify those empowered to authorize changes and the administrative procedures that should be followed.

Do Not Permit Any Other Party To Rely on the Report

Geoenvironmental professionals design their studies and prepare their reports to meet the specific needs of the clients who retain them, in light of the risk management methods that the client and geoenvironmental professional agree to, and the statutory, regulatory, or other requirements that apply. The study designed for a developer may differ sharply from one designed for a lender, insurer, public agency...or even another developer. *Unless the report specifically states otherwise, it was developed for you and only you.* Do not unilaterally permit any other party to rely on it. The report and the study underlying it may not be adequate for another party's needs, and you could be held liable for shortcomings your geoenvironmental professional was powerless to prevent or anticipate. Inform your geoenvironmental professional when you know or expect that someone else—a third-party—will want to use or rely on the report. *Do not permit third-party use or reliance until you first confer with the geoenvironmental professional who prepared the report.* Additional testing, analysis, or study may be required and, in any event, appropriate terms and conditions should be agreed to so both you and your geoenvironmental professional are protected from third-party risks. *Any party who relies on a geoenvironmental report without the express written permission of the professional who prepared it and the client for whom it was prepared may be solely liable for any problems that arise.*

Avoid Misinterpretation of the Report

Design professionals and other parties may want to rely on the report in developing plans and specifications. They need to be advised, in writing, that their needs may not have been considered when the study's scope was developed, and, even if their needs were considered, they might misinterpret geoenvironmental findings, conclusions, and recommendations. *Commission your geoenvironmental professional to explain pertinent elements of the report to others who are permitted to rely on it, and to review any plans, specifications or other instruments of professional service that incorporate any of the report's findings, conclusions, or recommendations.* Your geoenvironmental professional has the best understanding of the issues involved, including the fundamental assumptions that underpinned the study's scope.

Give Contractors Access to the Report

Reduce the risk of delays, claims, and disputes by giving contractors access to the full report, *providing that it is accompanied by a letter of transmittal that can protect you* by making it unquestionably clear that: 1) the study was not conducted and the report was not prepared for purposes of bid development, and 2) the findings, conclusions, and recommendations included in the report are based on a variety of opinions, inferences, and assumptions and are subject to interpretation. Use the letter to also advise contractors to consult with your geoenvironmental professional to obtain clarifications, interpretations, and guidance (a fee may be required for this service), and that—in any event—they should conduct additional studies to obtain the specific type and extent of information each prefers for preparing a bid or cost estimate. Providing access to the full report, with the appropriate caveats, helps prevent formation of adversarial attitudes and claims of concealed or differing conditions. If a contractor elects to ignore the warnings and advice in the letter of transmittal, it would do so at its own risk. Your geoenvironmental professional should be able to help you prepare an effective letter.

Do Not Separate Documentation from the Report

Geoenvironmental reports often include supplemental documentation, such as maps and copies of regulatory files, permits, registrations, citations, and correspondence with regulatory agencies. If subsurface explorations were performed, the report may contain final boring logs and copies of laboratory data. If remediation activities occurred on site, the report may include: copies of daily field reports; waste manifests; and information about the disturbance of subsurface materials, the type and thickness of any fill placed on site, and fill placement practices, among other types of documentation. *Do not separate supplemental documentation from the report. Do not, and do not permit any other party to redraw or modify any of the supplemental documentation for incorporation into other professionals' instruments of service.*

Understand the Role of Standards

Unless they are incorporated into statutes or regulations, standard practices and standard guides developed by the American Society for Testing and Materials (ASTM) and other recognized standards-developing organizations (SDOs) are little more than aspirational methods agreed to by a consensus of a committee. The committees that develop standards may not comprise those best-qualified to establish methods and, no matter what, no standard method can possibly consider the infinite client- and project-specific variables that fly in the face of the theoretical "standard conditions" to which standard practices and standard guides apply. In fact, these variables can be so pronounced that geoenvironmental professionals who comply with every directive of an ASTM or other standard procedure could run afoul of local custom and practice, thus violating the standard of care. Accordingly, when geoenvironmental professionals indicate in their reports that they have performed a service "in general compliance" with one standard or another, it means they have applied professional judgement in creating and implementing a scope of service designed for the specific client and project involved, and which follows some of the general precepts laid out in the referenced standard. To the extent that a report indicates "general compliance" with a standard, you may wish to speak with your geoenvironmental professional to learn more about what was and was not done. *Do not assume a given standard was followed to the letter.* Research indicates that that seldom is the case.

Realize That Recommendations May Not Be Final

The technical recommendations included in a geoenvironmental report are based on assumptions about actual conditions, and so are preliminary or tentative. Final recommendations can be prepared only by observing actual conditions as they are exposed. For that reason, you should retain the geoenvironmental professional of record to observe construction and/or remediation activities on site, to permit rapid response to unanticipated conditions. *The geoenvironmental professional who prepared the report cannot assume responsibility or liability for the report's recommendations if that professional is not retained to observe relevant site operations.*

Understand That Geotechnical Issues Have Not Been Addressed

Unless geotechnical engineering was specifically included in the scope of professional service, a report is not likely to relate any findings, conclusions, or recommendations about the suitability of subsurface materials for construction purposes, especially when site remediation has been accomplished through the removal, replacement, encapsulation, or chemical treatment of on-site soils. The equipment, techniques, and testing used by geotechnical engineers differ markedly from those used by geoenvironmental professionals; their education, training, and experience are also significantly different. If you plan to build on the subject site, but have not yet had a geotechnical engineering study conducted, your geoenvironmental professional should be able to provide guidance about the next steps you should take. The same firm may provide the services you need.

Read Responsibility Provisions Closely

Geoenvironmental studies cannot be exact; they are based on professional judgement and opinion. Nonetheless, some clients, contractors, and others assume geoenvironmental reports are or certainly should be unerringly precise. Such assumptions have created unrealistic expectations that have led to wholly unwarranted claims and disputes. To help prevent such problems, geoenvironmental professionals have developed a number of report provisions and contract terms that explain who is responsible for what, and how risks are to be allocated. Some people mistake these for "exculpatory clauses," that is, provisions whose purpose is to transfer one party's rightful responsibilities and liabilities to someone else. Read the responsibility provisions included in a report and in the contract you and your geoenvironmental professional agreed to. *Responsibility provisions are not "boilerplate."* They are important.

Rely on Your Geoenvironmental Professional for Additional Assistance

Membership in the Geoprofessional Business Association exposes geoenvironmental professionals to a wide array of risk management techniques that can be of genuine benefit for everyone involved with a geoenvironmental project. Confer with your GBA-member geoenvironmental professional for more information.
