Attention: Mr. Zack Osko

Subject: Phase I and Limited Phase II Environmental Site Assessment, Proposed Multi-Family Residential Development 432 South San Vicente Boulevard Los Angeles, California

Leighton and Associates, Inc. (Leighton) is pleased to present this Phase I and Limited Phase II Environmental Site Assessment (ESA) of the proposed multi-family residential development, located at the address of 432 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California (subject site). Leighton declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and ASTM International Standards E1527-13, and the newly released E1527-21.

Leighton has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. Leighton has developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

If you have questions regarding this report, please contact us. We appreciate the opportunity to be of service to Oklahoma Rock, LLC.

Respectfully submitted,
LEIGHTON AND ASSOCIATES, INC.

Brynn McCulloch, PG
Principal Geologist

1.0 INTRODUCTION

1.1 Authorization

Leighton and Associates, Inc. (Leighton) performed a Phase I and Limited Phase II Environmental Site Assessment (ESA) of the site of the proposed multi-family residential development, located at the address of 432 South San Vicente, Los Angeles, California (subject site – Figure 1), in accordance with the authorization of Oklahoma Rock, LLC (Oklahoma Rock).

1.2 Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible and pursuant to the processes prescribed in ASTM International (ASTM) Standards E1527-13 and E1527-21, recognized environmental conditions (RECs), historical RECs (HRECs), or controlled RECs (CRECs) in connection with the subject site.

RECs are defined, according to ASTM E1527-13 as "*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs.*"

HRECs are defined, according to ASTM E1527-13 as "*a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.*"

CRECs are defined, according to ASTM E1527-13 as "*a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.*" (ASTM E1527-13, 2013).

The purpose of this limited Phase II ESA was to determine what, if any, environmental impacts are present in the subsurface soil, soil gas, and

groundwater, from historic releases on or near the site that could impact future redevelopment.

1.3 Scope of Work

The scope of work was performed in accordance with Leighton's Phase I ESA and Limited Phase II ESA proposals dated April 13, 2022. The proposals included the following tasks:

- A reconnaissance-level visit of the subject site for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for onsite releases of hazardous materials and petroleum products;
- Records review (including review of previous environmental reports, selected governmental databases, and historical review);
- Interviews;
- Limited soil, soil gas, and groundwater sampling to assess the presence of contamination that may be attributed to the historic release(s) onsite; and
- Preparation of a report presenting our findings.

1.4 Understandings and Assumptions

Leighton understands that the purpose of this Phase I and Limited Phase II ESA is to provide all appropriate inquiry into the environmental conditions at the subject site for purposes of assessing potential liability for site contamination, including potential contamination associated with prior ownership and use of the subject site so that the Client may qualify for the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) landowner liability protections as defined in CERCLA, 42 USC §9601(35)(B) in connection with its proposed residential development.

Leighton assumes that the information provided by the Client and its agents, regulatory database provider, and regulatory agencies is true and reliable.

1.5 Limitations and Exceptions

Leighton performed the Phase I ESA in conformance with the scope and limitations of ASTM Standard E1527-13 and E1527-21 of the subject site. Other

than the non-scope items shown in Section 1.6 that were not applicable, there were no exceptions to, or deletions from, this practice.

Property specific activities performed by Leighton and information collected regarding these activities are summarized within this report. The findings of the Phase I and Limited Phase II ESA are presented in Section 8.0. Opinions, and conclusions drawn by Leighton, based on the information collected as part of the Phase I and Limited Phase II ESA, are presented in Sections 9.0 and 10.0, respectively. References are included as Appendix A. Subject site photographs are presented in Appendix B. The EDR Environmental Lien and AUL Search report is included in Appendix C. The Environmental Radius Report and Vapor Encroachment Screening Report are included as Appendix D. Historical documentation is provided in Appendix E. Soil boring logs are included in Appendix F. The laboratory report and chain of custody forms are included in Appendix G.

This Phase I and Limited Phase II ESA was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the Phase I and Limited Phase II ESA described herein. Opinions presented herein apply to property conditions existing at the time of our study and cannot necessarily be taken to apply to property conditions or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the amount, type, distribution, and integrity of the information collected at the time of the investigation, the methods utilized to collect and evaluate the data, and that a full and complete determination of environmental risks cannot be made. Although Leighton has taken steps to obtain true copies of available information, we make no representation or warranty with respect to the accuracy or completeness of any information not prepared by Leighton.

This practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the landowner liability protections including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations, or the duty to take reasonable steps

to prevent releases, or the duty to comply with legally required release reporting obligations. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the subject site that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

1.6 Special Terms and Conditions

The scope of work for this Phase I and Limited Phase II ESA did not include testing of electrical equipment for the presence of polychlorinated biphenyls (PCBs) or collection of environmental samples, other than the limited soil sampling described in Section 7.0, such as building materials, paint, or other media; assessment of natural hazards such as naturally occurring asbestos or radon gas; assessment of the potential presence of radionuclides; or assessment of nonchemical hazards such as the potential for damage from earthquakes or floods, or the presence of endangered species or wildlife habitats. This Phase I and Limited Phase II ESA also did not include an extensive assessment of the environmental compliance status of the subject site or of businesses operating at the subject site or a health-based risk assessment.

1.7 User Reliance

This report is for the exclusive use of Oklahoma Rock. Use of this report by any other party shall be at such party's sole risk.

1.8 Important Information about Geoenvironmental Reports

The User is referred to Appendix H regarding important information provided by Geoprofessional Business Association (GBA) on geoenvironmental studies and reports.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject site is located on the east side of South San Vicente Boulevard, north of Colgate Avenue, at the address of 432 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California (Figure 1). The Los Angeles County Assessor's Office designates the subject site as Assessor Parcel Number (APN) 5511-044-013.

2.2 Subject Site and Vicinity General Characteristics

The subject site vicinity is primarily residential and commercial use.

2.3 Current Use of the Subject Site

The subject site is rectangular and encompasses approximately 0.11 acres. The subject site is currently occupied by commercial businesses (Appendix B, Photos 1 through 7). Onsite businesses include a dispensary and a natural birth center.

2.4 Descriptions of Structures, Roads and Other Improvements

The subject site is currently developed with a one two-story, multi-tenant, commercial structure. The structure was built circa 1965 and is approximately 5,038 square feet. The subject site is also improved with asphalt-paved parking lot, concrete walkways, and landscaping.

The following utilities will provide future service to the subject site:

Natural Gas:	The Southern California Gas Company
Source of Potable Water:	Los Angeles Department of Water and Power
Electric:	Los Angeles Department of Water and Power
Sewage Disposal:	City of Los Angeles, LA Sanitation and the Environment
Solid Waste Disposal:	City of Los Angeles Bureau of Sanitation

2.5 Current Uses of Adjoining Properties

The subject site is currently bordered to the north by a multi-tenant commercial property; to the east by an alleyway, followed by a parking lot and residences; to the south by a medical center, followed by Colgate Avenue; and to the west by South San Vicente Boulevard, followed by commercial and residential properties.

3.0 USER PROVIDED INFORMATION

The User of this Phase I and Limited Phase II ESA is identified as Oklahoma Rock. As a part of the ASTM E1527-13/-21 process, Mr. Scott Rynders, a representative of Oklahoma Rock, provided information regarding the subject site.

3.1 Environmental Liens or Activity and Use Limitations

Mr. Rynders indicated that he was not aware of any environmental liens or AULs filed or recorded for the subject site.

According to the EDR Environmental Lien and AUL Search, there are no environmental liens or AULs listed for the subject site (Appendix C).

3.2 Specialized Knowledge

Oklahoma Rock does not have specialized knowledge of the subject site or nearby properties.

3.3 Commonly Known or Reasonably Ascertainable Information

Oklahoma Rock was aware of the current and prior commercial use of the subject site. The Client had no information about potential releases or threatened releases at the subject site.

3.4 Valuation Reduction for Environmental Issues

Oklahoma Rock indicated that the proposed purchase price for the subject site is based on fair market value without any discount or offset based on environmental conditions.

3.5 Owner, Property Manager, and Occupant Information

According to the EDR Environmental Lien and AUL Search, the subject site is owned and managed by San Vicente Holdings, LLC. Two commercial tenants, a dispensary and a natural birth center, currently occupy the subject site.

3.6 Reason for Performing Phase I and Limited Phase II ESA

Oklahoma Rock commissioned this Phase I ESA as part of due diligence related to the potential acquisition of the subject site. Moreover, Leighton understands that the purpose of this Phase I and Limited Phase II ESA is to provide all appropriate inquiry into the environmental conditions at the subject site for purposes of assessing potential liability for site contamination, including potential contamination associated with prior ownership and use of the subject site so that the Client may qualify for the CERCLA landowner liability protections as defined in CERCLA, 42 USC §9601(35)(B) in connection with its proposed residential development.

3.7 Other

No other information for the subject site was provided by Oklahoma Rock.

4.0 RECORDS REVIEW

4.1 Physical Setting Source(s)

Leighton reviewed pertinent maps and readily available literature for information on the physiography and hydrogeology of the subject site. A summary of this information is presented in the following subsections.

4.1.1 Topography

The subject site is located in Section 20 of Township 1 South, Range 14 West of the San Bernardino Baseline and Meridian. Topographic map coverage of the subject site vicinity is provided by the United States Geological Survey (USGS) Beverly Hills Quadrangle (2018). The elevation of the subject site is approximately 150 feet above mean sea level (bmsl). The topography of the subject site is relatively flat.

4.1.2 Surface Water

Surface water was not observed on the subject site. Ballona Creek is located approximately 2 miles south of the subject site. The Pacific Ocean is located approximately 8.1 miles southwest of the subject site.

4.1.3 Geology and Soils

The subject site is located in the Peninsular Ranges Geomorphic Province of Southern California within the Central Block of the Los Angeles Basin. Based on a review of published and unpublished geologic maps and literature, it is expected that the subject site is underlain by soils composed generally of clay, silt and sand. The subject site is located in the area of the Salt Lake, Beverly Hills and San Vicente oil fields. The Cheviot Hills are to the southwest and are the surface expression of the results of faulting along the Newport-Inglewood Fault Zone, which trends from Newport Beach north to Beverly Hills.

According to our concurrent Phase II ESA of the subject site, the subject site is underlain by Quaternary-aged alluvial deposits consisting of grayish brown to medium brown, lean to fat clay (CL-CH) with trace amounts of sand in some areas.

4.1.4 Hydrogeology

During our concurrent Limited Phase II ESA, groundwater was encountered at a depth of between 15.50 feet below ground surface (bgs). Groundwater was measured by Environmental Managers & Auditors, Inc. (EMA) on the adjacent property to the north in September 2020 at depths of between 15.18 feet bgs and 17.22 feet bgs. The groundwater flow direction in the subject site vicinity is reported to be to the southwest (EMA, 2020).

4.1.5 Oil and Gas Fields

Leighton reviewed the California Geologic Energy Management Division (CalGEM) Well Finder online mapping system on April 28, 2022. No oil and gas wells were identified on the subject site and surrounding properties. The subject site is located in the Salt Lake Oil/Gas Field and mapped within a City of Los Angeles designated Methane Zone.

4.2 Standard Environmental Record Sources

A search of selected government databases was conducted by Leighton using the EDR Radius Map Report environmental database report system. Details and descriptions of the database search are provided in the EDR report dated . The report meets the government records search requirements of ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The database listings were reviewed within the specified radii established by the ASTM E1527-13/-21. A copy of this report is included in Appendix D.

4.2.1 Subject Site

The subject site was not identified in the EDR database report.

See EDR Radius Report (Appendix D) for list of acronyms and data sources

4.2.2 Offsite

The regional groundwater flow direction in the vicinity of the subject site is assumed to be to the southwest. Potential hydraulically up-gradient facilities are considered to be primarily located to the northeast of the Site.

Information in the EDR database report was reviewed for facilities of potential environmental concern to the subject site. Additionally, the State Water Resources Control Board (SWRCB) Geotracker website and Department of Toxic Substances Control (DTSC) Envirostor website were used to supplement the information in the EDR database report.

The database search results for offsite properties, including those found within the "orphaned" unmapped listings, with potential to adversely impact the subject site are listed in the table below:

Table 1 - Databases Searched

Database	Search Distance (radius)	Properties of Potential Concern

See EDR Radius Report (Appendix D) for list of acronyms and data sources

Best Quality Cleaners, La Vista Cleaners, and H&J America, Inc., located adjacent to the north of the subject site at the address of 430 San Vicente Boulevard, are listed in the Resource Conservation and Recovery Act Non Generators / No Longer Regulated (RCRA-Nongen/NLR) and dry cleaners databases. These facilities generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. Non-Generators do not presently generate hazardous waste. Best Quality Cleaners, La Vista Cleaners, and H&J America, Inc. are also listed in the EDR historic cleaner database from 1989 to 2014. The facilities are listed as inactive. Best Quality Cleaners is also listed in the California Environmental Reporting System (CERS) hazardous waste database as a hazardous waste generator. Violations were not found during inspections. La Vista Cleaners is listed in the Los Angeles County Site Mitigation Database. Additional information regarding the former dry cleaners to the north of the subject site is included in Section

Three petroleum pipelines are located within the alley adjacent to the east of the subject site. The pipelines are used to transport fluids consisting of a mixture of oil, natural gas, and produced water. On December 13, 2015, a rupture in one of the pipelines occurred approximately 100 feet east of San Vicente Boulevard and 30 feet north of Colgate Avenue (approximately 25 feet southeast of the subject site). Freeport-McMoRan Oil & Gas (FM O&G) responded to the incident, exposed and repaired the pipeline. Once the pipeline was repaired, petroleum-impacted soils were excavated and confirmation samples were collected resulting excavation. A total of 71.13 tons of petroleum-impacted soil were excavated and transported offsite (Catalyst, 2021).

Soil with elevated concentrations of hydrocarbons was encountered at the base of the final excavation. Additional soil borings were advanced to determine if the impacted soil was associated with the pipeline leak or if it was associated with historic, deeper hydrocarbon impacts in the area. The nature and extent of the impacts associated with the release have been characterized and delineated through the soil excavation activities and the two rounds of GeoProbe-based site assessments (Catalyst, 2021). The 95% upper confidence limit (UCL) of total petroleum hydrocarbons (TPH) concentrations in the residual soils meet the applicable Los Angeles Regional Water Quality Control Board (LARWQCB) 1996 Interim Guidance

cleanup standards for soils situated within 20-150 feet above drinking water aquifers. Based on the sampling results, Catalyst concluded that the potential risks to human health and the environment through impacts to soil and groundwater are *de minimis*. It should also be noted that the soil and groundwater samples located closest to the subject site contained either very low concentration results or no detected concentrations of petroleum hydrocarbons. Based on this information, the pipeline leak is not considered an offsite REC with potential to significantly affect the subject site.

The remaining listings identified in the EDR database report were reviewed and not interpreted to represent an adverse effect to the subject site at the time of this report preparation based on one or more of the following:

- No record of a release;
- Type of release (soil only);
- Closure received from regulatory agency;
- Distance of the facility to the subject site; and
- Direction of groundwater flow (southwest) and location of the facility to the Site (cross-gradient or down-gradient).

4.2.3 Vapor Encroachment

Leighton searched for sources of contamination that have the potential to cause a vapor encroachment condition in accordance with the practices outlined in the ASTM E2600-10 Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions.

Based on the results of concurrent Phase II ESA, soil gas beneath the subject site contains several chlorinated volatile organic compounds (VOCs), primarily PCE, at concentrations that present a vapor encroachment and vapor intrusion concern to future tenants of the subject site. The source of the VOCs appears to be related to the documented release of PCE associated with the drycleaners to the north of the subject site.

4.2.4 Regulatory Agency Contacts

On April 12, 2022, Leighton reviewed online regulatory databases for the subject site and/or requested regulatory records from the agencies listed below for the address and APN associated with the subject site.

- DTSC Cypress and Chatsworth offices:
- LARWQCB/SWRCB:
- Los Angeles County Department of Public Works (LACDPW)
- Los Angeles County Fire Department (LACoFD)
- City of Los Angeles Fire Department (LAFD)
- South Coast Air Quality Management District

No records of environmental concern were found for the subject site.

National Pipeline Mapping System

Leighton reviewed records posted on the National Pipeline Mapping System's (NPMS) Public Map Viewer on April 28, 2022. Searches were conducted by reviewing a map of the subject site and surrounding areas. No oil or gas pipelines were mapped within the subject site limits. A hazardous liquid pipeline is located adjacent to the north and east of the subject site, within the adjacent alley. The system name is San Vicente Line Crude Oil Line. The commodity description is crude oil and the status code is listed as active. A release was reported in 2015 in the alleyway adjacent to the east of the subject site. A summary of the release on clean-up activities are summarized in section 4.2.2 above.

Radon

Radon is not regulated within the State of California. Nonetheless, the California Department of Health Services (CDPH) and the United States Environmental Protection Agency (US EPA) both recommend a threshold of 4 picocuries per liter (pCi/L) above which certain precautions be taken to mitigate radon buildup in structures.

The California Department of Health Services maintains a database of indoor radon levels that are sorted by zip code. According to the most recent update prepared in February 2016, 54 tests were completed in the subject site zip code of 90048 and 5 tests exceeded 4pCi/L; with a maximum result of 9.5 pCi/L. Given this data, there is low potential for elevated levels of radon at the subject site.

4.2.5 Other Reports

Leighton reviewed various previous reports completed for the adjacent property to the north of the subject site. The reports are summarized below:

Cal Waste Remediations, Inc. (CWR) conducted a Limited Subsurface Investigation at the adjacent property address of 430 South San Vicente Boulevard in April 2005. CWR advanced four borings inside the former dry-cleaning facility using hand auger drilling equipment. Soil samples were collected at depths of 2, 5, and 10 feet bgs. The soil samples collected at 5 feet were analyzed for PCE and TCE. PCE and TCE were not detected above laboratory reporting limits in any of the 5-foot soil samples. CWR concluded that no contamination was found and no further environmental assessment was necessary (CWR, 2005).

CWR conducted a Phase I ESA for the adjacent property located at 400 through 430 South San Vicente Boulevard in May 2008. CWR noted that the property was a commercial and retail/professional service center. CWR also noted that the property had been historically used as a service station and dry cleaners. CWR recommended conducting a Limited Subsurface Soil Investigation in the northwestern corner of the property where the service station was previously located.

JMK Environmental Solutions, Inc. (JMK) conducted a Phase II ESA for the adjacent property to the north in July 2008. Three borings were advanced in the northern portion of the property to a maximum depth of 25 feet bgs. Soil samples were collected at 5 and 10 feet intervals. Two groundwater samples and three soil vapor samples were also collected. Analysis of the samples included VOCs by EPA Method 8260B and TPH-gasoline (TPHg) range organics by EPA method 8015(M). No detectable

amounts of TPHg and VOCs were reported in the soil and soil vapor samples. PCE and cis-1,2-Dichloroethene (cis-1,2-DCE) were detected in the two groundwater samples at trace concentrations slightly above the State of California Maximum Contaminant Levels (MCLs) of 5 micrograms per liters (µg/L) and 6 µg/L, respectively. None of the soil, groundwater, or soil vapor samples contained any detectable levels of petroleum or benzene compounds suggesting that there was no release of petroleum hydrocarbons to the subsurface and that the former USTs have not adversely affected the soils and groundwater at the property (JMK, 2008). JMK concluded that the levels of PCE and cis-1,2-DCE exceeded the MCLs but the likelihood of further groundwater remediation was low. To be conservative, they provided the option of additional characterization of the dissolved compounds in the future in order to verify if natural attenuation of the dissolved compounds had occurred (JMK, 2008).

Partner Engineering and Science, Inc. (Partner) conducted a Phase II Subsurface Investigation of the adjacent property to the north in August 2019 in order to identify the location of on-site USTs, former tankholds, and/or other associated features and to investigate the potential impact of petroleum hydrocarbons, VOCs, and/or polycyclic aromatic hydrocarbons (PAHs) to soil and groundwater as a consequence of a release or releases from the former on-site gasoline station and dry cleaning operations (Partner, 2019a). During their geophysical survey, one large anomaly was identified in the northwest portion of the property that was consistent with a soil disturbance and/or backfilled excavation. Partner concluded that this confirmed that the USTs associated with the former service station had been removed. Partner oversaw the advancement of four borings to depths of between 10 and 25 feet bgs, based on refusal. Soil samples were collected from each boring at depths of 2, 5, 10, 15, 20, and 25 feet bgs, where applicable. Additionally, grab groundwater samples were collected from two boring locations. The two grab groundwater samples were analyzed for VOCs by EPA Method 8260B. The six soil samples collected from each boring were analyzed for VOCs by EPA Method 8260B, PAHs by EPA Method 8270, TPH-diesel (TPHd) and TPH-oil (TPHo) by EPA Method 8015M, and TPHg by EPA Method 8260B.

All analytes detected in soil samples were below respective residential screening levels. Methylene chloride, PCE, cis-1,2-DCE, and TCE were detected in groundwater samples at concentration exceeding their respective MCLs. Based on the results of the subsurface investigation, Partner concluded that no significant release of petroleum hydrocarbons was identified and no additional investigation with respect to the former on-site gasoline station is warranted. Partner also recommended additional investigation to further evaluate the extent of the identified release of chlorinated solvents (Partner, 2019a).

Environmental Managers and Auditors, Inc. (EMA) produced a Site Characterization Report for the adjacent property to the north in October 2019 in order to address data gaps, delineate the lateral extent of impacted soil, delineate the lateral extent of impacts to the groundwater quality beneath the property, evaluate the potential risk of vapor intrusion at the property, and conduct a human health risk assessment (HHRA). EMA oversaw the advancement of two borings in the southern portion of the property to a depth of 10 feet bgs. Soil samples were collected at depths of 5 and 10 feet bgs and were analyzed for VOCs by EPA Method 8260B. Groundwater samples were collected from three separate locations in the southern portion of the property and were analyzed for VOCs by EPA Method 8260B. Five permanent soil vapor probes were installed in the southern portion of the property at depths ranging from 0.5 to 10 feet bgs. The soil vapor samples collected were analyzed for VOCs by EPA Method 8260B (EMA, 2019a).

VOCs were not detected at concentrations that exceeded their respective residential screening limits in any of the soil samples. PCE was detected in two of the three groundwater samples collected at concentrations slightly above the MCLs. No other VOCs were detected at concentrations that exceeded their respective MCLs in the groundwater samples collected. PCE was detected at high concentrations that exceeded the residential screening level in each of the soil vapor samples. TCE was also detected at a concentration that exceeded residential screening limits in one soil vapor sample. Based on the findings, EMA concluded that no further investigation or remediation would be required for soil and that no remediation would be required for groundwater. EMA did note that in order to evaluate trends in contaminant concentrations in groundwater and

observe the natural attenuation/biodegradation in mitigating VOCs impact over time, installation of permanent groundwater monitoring wells and implementation of a quarterly groundwater monitoring/sampling program for at least a period of one year was recommended. EMA also recommended an indoor air quality assessment as subsurface contaminant concentrations posed a potential risk of vapor intrusion (EMA, 2019a).

Based on the above recommendation, EMA conducted an Indoor Air Quality Assessment for the adjacent property to the north in December 2019 (Round 1 of sampling). Four indoor air samples were collected during this assessment form the vicinity of the La Vista dry cleaner unit. Elevated concentration of PCE and TCE were detected in three of the four indoor air samples. Based on the findings, EMA concluded that the results indicated evidence of vapor intrusion and therefore, interim mitigation measures would be required to alleviate the potential health risk to the workers inside the dry cleaner unit from exposure to VOCs (EMA, 2019b). EMA recommended that institutional controls be implemented while redevelopment of the property was being planned.

Based on the results of EMA's Site Characterization Report (2019), four groundwater monitoring wells (MW-1 through MW-4) were installed at the on the adjacent property to the north in December 2019. The groundwater wells were monitored quarterly for one year. During the most recent sampling event in September 2020, groundwater was encountered at depths of between 15.18 and 17.22 feet bgs at that property. The wells were purged using low-flow methods. Groundwater samples were collected from each monitoring well and analyzed for VOCs by EPA Method 8260B. Over the four quarters of sampling, high levels of PCE, TCE, and cis-1,2-DCE that exceeded their respective MCLs were found in well MW-4. Wells MW-1 through MW-3 did not have detected concentrations of VOCs that exceeded their respective MCLs in the four quarterly monitoring events. EMA submitted a groundwater monitoring and sampling program suspension request to the LACoFD on January 18, 2021 based on the low levels of VOCs in wells MW-1 through MW-3 (EMA, 2020a). The LACoFD agreed with EMA's recommendation for the suspension of groundwater monitoring/sampling program on January 22, 2021.

EMA conducted their second round of their Indoor Air Quality Assessment for the property in December 2020. PCE was detected at a concentration that slightly exceeded the residential screening level for one soil vapor sample inside the dry cleaner facility (EMA, 2020b). PCE was not detected above the residential screening level in the remaining indoor air samples. TCE was not detected above the reporting limit in any of the indoor air samples. Based on these results, EMA believed the building was safe for human occupancy (EMA, 2020b).

Lastly, EMA conducted an offsite soil vapor investigation within the sidewalk and alley adjacent to the east, south, and west of the adjacent property to the north in order to evaluate the soil vapor analytical data for the potential offsite migration of PCE and its breakdown products (EMA, 2021). EMA oversaw the advancement of eight soil vapor borings on offsite locations (one being within the limits of the subject site) at depths of 2, 5, and 10 feet bgs. The soil vapor samples were analyzed for VOCs by EPA Method 8260B. No VOCs were detected above the laboratory reporting limits in the soil vapor samples collected during the investigation. EMA concluded that no further investigation was necessary for the property, as both onsite and offsite soil vapor assessment was complete (EMA, 2021).

The LACoFD reviewed the Summary Report Offsite Soil Vapor Investigation, dated March 17, 2021, prepared by EMA. LACoFD concurred with the findings of the report indicating that the former onsite dry cleaner PCE release had not significantly affected the soil vapor beneath offsite properties. However, LACoFD noted that previous soil vapor sampling and indoor air sampling does indicate that potential VOC vapor intrusion (VI) could be an issue for future onsite residential developments if VI mitigation measures were not considered. The LACoFD indicated that additional assessment of VI should be conducted prior to pursuing any residential developments at the property. In addition, the LACoFD requires the preparation and implementation of a soil management plan (SMP) prior to and during redevelopment of the property and the filing of an Environmental Notice on the property.

4.3 Historical Use Information on the Property

Leighton reviewed selected historical information on the subject site. These references were reviewed for evidence of activities, which would suggest the presence of hazardous substances at the subject site and to evaluate the potential for the subject site to be impacted by offsite sources of contamination. The following paragraphs are a chronological summary of the review.

4.3.1 Aerial Photographs

Historical aerial photographs were reviewed for information regarding past subject site uses. Aerial photographs dated 1923, 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 were reviewed. Copies of the aerial photographs are included in Appendix E.

In the **1923** aerial photograph, the subject site and surrounding properties are observed to be vacant land. A railroad and present day San Vicente Boulevard is observed to the west of the subject site.

In the **1928** aerial photograph, the subject site is observed to be vacant land. The surrounding properties are observed to be vacant land and residential properties. A railroad and present day La Cienega Boulevard and San Vicente Boulevard are observed to the west of the subject site. Present day Colgate Avenue is observed to the south of the subject site. An alley is observed adjacent to the east of the subject site.

In the **1938** aerial photograph, the subject site is observed to be vacant land. The surrounding properties are observed to be vacant land and residential properties. A railroad and present day La Cienega Boulevard and San Vicente Boulevard are observed to the west of the subject site. Present day Colgate Avenue is observed to the south of the subject site. An alley is observed adjacent to the east of the subject site.

In the **1948** and **1952** aerial photographs, the subject site is observed to be vacant land. The surrounding properties are observed to be residential properties to the east, commercial properties to the north, and vacant land to the south. A railroad and present day La Cienega Boulevard and San Vicente Boulevard are observed to the west of the subject site. Present day

Colgate Avenue is observed to the south of the subject site. An alley is observed adjacent to the east of the subject site.

In the **1964, 1970,** and **1977** aerial photographs, the present day commercial structure is observed onsite. Commercial properties are observed to the north and south of the subject site. Residential properties are observed to the east of the subject site. Present day San Vicente Boulevard are observed to the west of the subject site. Present day Colgate Avenue is observed to the south of the subject site. An alley is observed adjacent to the east of the subject site.

In the **1983** aerial photograph, significant land use changes are not observed on the subject site and surrounding properties with the exception that the surrounding property to the north is observed to be vacant land.

In the **1989, 1994, 2002, 2005, 2009, 2012,** and **2016** aerial photographs, the subject site and surrounding properties are observed in their present day configuration.

4.3.2 Historical Topographic Maps

Historical topographic maps were reviewed to obtain information regarding past site uses. Topographic map coverage of the subject site vicinity is provided by the following quadrangles: Los Angeles (1894 and 1900), Santa Monica (1896, 1898, 1902, 1920, and 1921), Hollywood (1924 and 1926), and Beverly Hills (1950, 1966, 1972, 1981, 1994, 1995, 2012, 2015, and 2018). Copies of the topographic maps are included in Appendix E.

1894, 1896, 1898, 1900, and **1902:** Structures, tanks, or wells are not depicted on the subject site and surrounding properties. An unnamed street is depicted to the west of the subject site.

1920 and **1921:** The subject site is depicted as vacant land. The Salt Lake Oil Field and oil wells are depicted to the north and east of the subject site. Vacant land is depicted to the south and west of the subject site. The Pacific Electric Railroad is depicted adjacent to the west of the subject site.

1924 and **1926:** Significant land use changes are not depicted on the

subject site or surrounding properties with the exception of scattered residences to the southwest of the subject site.

1950, 1966, 1972, 1981, 1994, 1995, 2012, 2015, and **2018**: The subject site and surrounding properties are depicted in a densely populated red-shaded area in which only landmark buildings are shown. No buildings are depicted on the subject site and surrounding properties. San Vicente Boulevard are depicted to the west of the subject site. Colgate Avenue is depicted to the south of the subject site. An alley is depicted to the east of the subject site.

4.3.3 Fire Insurance Maps

Fire insurance maps, or Sanborn® maps, are detailed city plans showing building footprints, construction details, use of structure, street address, etc. The maps were designed to assist fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn Maps were produced from approximately 1867 to the present for commercial, industrial, and residential sections of approximately 12,000 cities and towns in the United States. Historical Sanborn maps provided by EDR were reviewed for information regarding past Site uses and are included in Appendix E.

1926: The subject site is depicted as vacant land. Colgate Avenue is depicted to the south of the subject site, followed by vacant lots. An alleyway is depicted to the east of the subject site, followed by dwellings and vacant lots. Vacant lots are depicted to the north and south of the subject site. San Vicente Boulevard and the Pacific Electric Railway right-of-way are depicted to the west of the subject site, followed by vacant lots.

1950: The subject site is depicted as vacant land. The surrounding property to the north is occupied by a furniture shop, a drapery shop, a storage area, auto parking, and the Church of Religious Science of Beverly Hills. An alley, followed by residences is depicted to the east of the subject site. A vacant lot, followed by Colgate Avenue, are depicted to the south of the subject site. San Vicente Boulevard and the Pacific Electric Railway right-of-way are depicted to the west of the subject site, followed by offices and stores.

1969: The present day commercial building is depicted on the subject site. The surrounding property to the north is depicted as stores, storage, auto parking, and the Church of Religious Science of Beverly Hills. An alley, followed by residences is depicted to the east of the subject site. Offices are depicted to the south of the subject site, followed by Colgate Avenue. San Vicente Boulevard is depicted to the west of the subject site, followed by offices and stores.

4.3.4 Historical City Directories

City Directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the City Directory developed into a tool for locating individuals and businesses in particular. For each street address listed, the directory recorded the name of the resident or business that operated from this addresses. While City Directory coverage is usually comprehensive for major cities, it may be sporadic for rural areas and small towns. The purpose of the City Directory research was to attempt to determine the businesses that were historically located at the subject site and adjacent addresses.

Leighton reviewed the EDR City Directory Standard Report dated January 25, 2022 (Appendix E). Records were reviewed from 1920 to 2014 at approximate 5-year intervals. The subject site address of 432 South San Vicente Boulevard were identified as various commercial businesses, including but not limited to a clinical lab, CPA offices, attorney offices, and health services, from 1962 through 2014.

4.3.5 Building Permits

Building permit records for the subject site address were reviewed in the EDR Building Permit Report dated April 28, 2022. Various building permits were listed for the address associated with the subject site. The building permit the construction of the existing structure was dated March 1961. No permits of environmental concern were found.

4.3.6 Summary of Historical Land Use

Based on historical records, land usage is summarized as follows:

Time Period	Land Usage	Reference
Prior to 1894	Unknown	None Available
1894 until approximately 1961	Vacant land	Topographic Maps Sanborn Maps Aerial Photographs
Approximately 1961 until present	One commercial building with onsite businesses including a clinical lab, CPA offices, attorney offices, and health services	Aerial Photographs City Directory Previous Reports Site Reconnaissance

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

On April 19, 2022, a Leighton representative conducted a reconnaissance–level assessment of the subject site. The property reconnaissance consisted of observing and documenting existing conditions of the subject site and nature of the adjacent properties within 0.25-mile of the subject site. Photographs of the subject site are presented in Appendix B and their view directions are noted on Figure 2, Site Plan. Items noted during the subject site reconnaissance are also depicted on Figure 2.

5.2 General Subject Site Setting

The subject site vicinity is primarily residential and commercial use.

The subject site is rectangular and encompasses approximately 0.11 acres. The subject site is currently occupied by commercial businesses (Appendix B, Photos 1 through 7). Onsite businesses include a dispensary and a natural birth center.

The subject site is currently developed with a one two-story, multi-tenant, commercial structure. The structure was built circa 1965 and is approximately 5,038 square feet. The subject site is also improved with asphalt-paved parking lot, concrete walkways, and landscaping.

5.3 Exterior and Interior Observations

5.3.1 Hazardous Substances, Drums, and Other Chemical Containers

Several 1-quart and 5-gallon containers of general cleaning supplies were observed within the commercial suites located onsite. These chemicals were properly stored and were not of significant quantity to present a risk to the subject site.

5.3.2 Storage Tanks

Evidence of USTs, such as vent lines, fill or overfill ports, was not observed on the subject site. No aboveground fuel storage tanks (ASTs) were observed onsite.

5.3.3 Polychlorinated Biphenyls (PCBs)

PCBs were once used as industrial chemicals whose high stability contributed to both their commercial usefulness and their long-term deleterious environmental and health effects. PCBs can be present in coolants or lubricating oils used in older electrical transformers, hydraulic systems, and other similar equipment. In 1979, the USEPA generally prohibited the domestic manufacture of PCBs in electrical capacitors, electrical transformers, vacuum pumps, hydraulic pumps, and gas turbines.

Three pole-mounted transformers were observed in the northeast corner of the subject site. No staining was observed on the ground beneath the transformers.

5.3.4 Waste Disposal

General non-hazardous waste produced onsite is storage in trash bins located in the southeast corner of the subject site. Trash is routinely removed from the subject site by City of Los Angeles services.

5.3.5 Dumping

Evidence of dumping was not observed on the subject site.

5.3.6 Pits, Ponds, Lagoons, Septic Systems, Wastewater, Drains, Cisterns, and Sumps

Evidence of pits, ponds, lagoons, septic systems, wastewater, and cisterns were not observed on the subject site.

One concrete storm water collection sump was observed in the uncovered area located along the northern boundary of the Site. This sump collects storm water runoff and pumps it to the sewer. This sump is not considered a REC.

Several floor drains were observed within the onsite structure. The drains were observed to be dry and free of debris. These drains are not considered a REC.

5.3.7 Pesticide Use

The storage and use of pesticides was not observed on the subject site.

5.3.8 Staining, Discolored Soils, Corrosion

Stained or discolored soil and/or corrosion were not observed on the subject site.

5.3.9 Stressed Vegetation

Evidence of stressed vegetation was not observed on the subject site.

5.3.10 Unusual Odors

Unusual odors were not detected on the subject site.

5.3.11 Onsite Wells

Evidence of onsite groundwater, oil, or gas wells was not observed onsite.

5.3.12 Other Observations

No other observations of environmental concern were noted on the subject site.

6.0 INTERVIEWS

Leighton conducted interviews with persons having knowledge of current or past subject site usage. Interviews were conducted either orally or in the form of a written questionnaire.

6.1 Interview with Owner

Mr. John Shayefar, a representative of the subject site owner, was interviewed during the site reconnaissance completed on April 19, 2022. Mr. Shayefar was aware of the release of dry cleaning chemicals associated with the former dry cleaners located on the adjacent property to the north. Mr. Shayefar was not aware of any USTs, ASTs, clarifiers, or other underground features of concern located onsite. Additionally, he was not aware of any other environmental concerns associated with the subject site or neighboring properties.

6.2 Interview with Site/Property Manager

Interviews with property managers, other than those noted in 6.1, were not conducted.

6.3 Interviews with Occupants

Subject site occupants were not interviewed as part of this Phase I ESA.

6.4 Interviews with Local Government Officials

Leighton did not interview employees with local government agencies to request information regarding historic and current uses of the subject site with the exception of those noted in Section 4.2.

6.5 Interviews with Others

Leighton did not conduct additional interviews for this Phase I ESA with the exception of the User interview discussed in Section 3.

7.0 LIMITED PHASE II ESA

On April 19 and 22 and May 10, 2022, Leighton completed a Limited Phase II ESA of the subject site, collecting soil, soil gas, and groundwater samples to be evaluated for potential environmental impacts resulting from the documented release of VOCs at the neighboring dry-cleaning facility to the north of the subject site.

The scope of work for the Limited Phase II ESA is described below.

7.1 Pre-field Activities

Health and Safety Plan

Leighton prepared a site-specific Health and Safety Plan (HSP) for the fieldwork to be performed. The HSP documented the safety aspects of the work and complied with Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1910.120. The HSP was onsite with Leighton personnel at all times. The HSP outlined all site procedures, potential hazards, and contained a hospital location map. All onsite Leighton personnel acknowledged acceptance of the plan by signing the HSP.

Utility Clearance

Leighton notified Underground Service Alert (USA) a minimum of 48 hours prior to starting subsurface intrusive work.

7.2 Subsurface Exploration

The following investigation activities were completed on April 19 and 22 and May 10, 2022.

7.2.1 Soil Borings

On April 19 and May 10, 2022, Leighton oversaw the advancement of nine soil borings (LB1 through LB9) to depths between 10 and 15 feet bgs. Groundwater was encountered at depths between 11 and 15 feet bgs. The location of each boring is shown on Figure 3, *Boring Location Map*. The borings were advanced using either a limited-access direct push drill rig or hand auger drilling equipment, operated by Millennium

Environmental Inc. (Millennium), of Anaheim, California. Millennium is a State of California licensed drilling contractor.

Soil samples were collected from each boring at 2, 5, and 10 feet bgs and the terminal depth of the boring or 15 feet bgs, whichever was deeper, for lithologic description and chemical analysis. Soil samples were logged and described under direct supervision of the California Professional Geologist. At a minimum, soil descriptions included the Unified Soil Classification System name, color, density, moisture content, grain size, and if staining or hydrocarbon odors were detected.

Soil samples were retained in laboratory-supplied glass jars or 6-inch stainless steel sleeves capped with Teflon® paper and plastic end caps. The samples were clearly marked with sample identification, placed in an ice-cooled chest for temporary storage, and transported to Jones Environmental Laboratories, Inc. (Jones) of Santa Fe Springs, California, a State of California Certified laboratory, for chemical analysis. Jones is a National Environmental Laboratory Accreditation Program-certified (NELAP) laboratory. Laboratory Chain-of-custody (COC) protocol was followed throughout all phases of the sample handling process.

Each soil sample was field screened using a photoionization detector (PID) to evaluate the soil sample for the presence of VOC vapors. PID readings were obtained by placing an aliquot of soil, collected adjacent from the portion retained for chemical analysis, into a clean plastic bag, and placing it in the sun or a warm area for 5 to 10 minutes. The reading was then collected from the headspace of the plastic bag by inserting the tip of the PID. PID readings were recorded for each soil sample on the field boring logs. The PID was calibrated to factory specifications within three months of testing and calibrated daily to the manufacturer's specifications. Boring logs are included in Appendix F.

Soil boring locations were accurately measured to a fixed reference point, noted on field maps, and surveyed using a Trimble Geo7X Mobile Global Positioning System (GPS) unit. The Trimble GPS unit provides the latitude and longitude of each boring within 3 feet.

7.2.2 Soil Gas Probe Installation and Sampling

A soil gas survey was performed at the subject site to evaluate the presence of VOCs in soil gas. The soil gas survey was performed in general conformance with the California Environmental Protection Agency – DTSC and California Regional Water Quality Control Board – Los Angeles and San Francisco Region's (LARWQCB and SFRWQCB) Advisory – Active Soil Gas Investigations, July 2015 and the Los Angeles Department of Building and Safety Information Bulletin (IB) P/BC 2020-101 (January 1, 2020).

A set of two soil gas probes were installed at depths between 3.5 and 10 feet bgs in borings LB1 through LB9. The soil gas probes consisted of inert ¼-inch nylaflow tubing fitted with a porous airstone at the terminus, which were set within one foot of sand, one foot of dry bentonite above, followed by hydrated bentonite to the next sand pack/nested probe depth or ground surface. This procedure was followed for the multiple probes depths, in that one foot of dry granular bentonite was emplaced on top of the sand pack encasing each probe, followed by hydrated bentonite. The surface end of the probe was fitted with a gas-tight leurlock to prevent infiltration of water or air. A temporary well box was installed in order to preserve the probes for future sampling. Soil gas probes were allowed to equilibrate for a minimum of 2 hours prior to sampling.

A shut-in test was conducted along the sampling train setup at each soil gas sampling depth and location, prior to purging each probe. If a leak was detected, the sampling train was reset and adjusted until no leaks are detected. At each sampling location an electric vacuum pump (set to draw 0.200 liters per minute of soil gas at a maximum vacuum of 100-inches of water) was attached to the probe and purged prior to sample collection. A default of three purge volumes was removed from the soil gas probe prior to sampling. Soil gas samples were obtained by drawing the sample through the luerlock connection, which connects the sampling probe to the sample container.

A tracer gas mixture of n-pentane, n-hexane, and n-heptane was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points included the top of the

sampling probe where the tubing meets the probe connection and the surface bentonite seals. Tracer gas was not detected in the soil gas samples collected from the Site indicating that ambient air had not compromised the soil gas samples. One duplicate soil gas sample was collected and analyzed during this investigation.

Two sequential methane measurements were taken from the soil gas probes with a minimum 24-hour interval between the two measurements and pressure was measured utilizing a pressure transducer on the GEM-2000 Plus or a magnahelic gauge. Methane testing was conducted in accordance with Los Angeles Department of Building and Safety IB P/BC 2020-101.

7.2.3 Grab Groundwater Sampling

A grab groundwater sample was collected from boring LB1. Groundwater was encountered at a depth of 15.5 bgs in boring LB1. Approximately 10 feet of slotted PVC was installed within the open borehole to a depth of approximately 5 feet below first encountered groundwater. Grab groundwater samples were collected using new dedicated tubing lowered through the PVC. A peristaltic pump was used to bring the groundwater samples to the surface through the tubing and into laboratory-supplied containers with proper preservative.

An attempt was made to collect grab groundwater samples from borings LB1 and LB4; however, due to tight clayey soils and lack of sufficient groundwater, grab sampling was unsuccessful in these locations.

7.2.4 Backfill Procedures

Each boring was backfilled with sand and hydrated bentonite for the installation of multi-nested soil gas probes as described in Section 7.2.2. Upon completion of soil gas sampling activities, the probes were removed from the boreholes and the borings were backfilled with hydrated bentonite chips to a depth of approximately 4 inches bgs. The surface was returned to its original finish.

7.2.5 Decontamination Procedures

Reusable down-hole sampling tools were appropriately decontaminated between sampling depths by washing in a solution of non-phosphate soap and water, double-rinsing with potable water, and allowing to air-dry.

7.2.6 Investigation Derived Waste

Upon completion of soil and groundwater sampling activities, the soil cuttings and decontamination water were placed in Department of Transportation (DOT)-approved 55-gallon drums, stored onsite in an approved location pending sample analysis and profiling for eventual offsite disposal at a properly licensed facility.

7.3 Laboratory Analysis

Select soil samples collected from the subject site on April 19, 2022 were analyzed for VOCs by EPA Method 8260B, TPH as gasoline, diesel, and oil by EPA Method 8015M, and Title 22 Metals by EPA Methods 6010B/7471A.

Soil samples analyzed for VOCs were collected using EPA Method 5035 preparation procedures. Soil sub-cores were pulled directly from the sample sleeve using a laboratory-supplied disposable syringe. The soil sub-cores of appropriate mass were then transferred into laboratory-supplied 40-milliliter glass vials preserved with methanol and sodium bisulfate and properly capped, forming an airtight seal.

Soil gas samples collected on April 22 and May 10, 2022 were either immediately injected into an onsite mobile laboratory gas chromatograph/purge and trap system, operated by Jones, after collection or collected in Summa canisters and transported to a stationary laboratory operated by Jones for analysis. Each soil gas sample, including the duplicate, was analyzed for the tracer gas and VOCs by modified EPA Method 8260B. Additionally, methane measurements were recorded from each probe utilizing a RKI Eagle 4 Gas Meter on April 19 and 22, 2022.

The grab groundwater sample collected from boring LB1 was analyzed for VOCs by EPA Method 8260B.

7.4 Soil Laboratory Results

The laboratory results of the soil samples are summarized in the following sub-sections and are presented in Tables 1 and 2. Copies of the laboratory reports are presented in Appendix H.

Results of the chemical analyses of the soil samples were compared to the following screening levels for soil in a residential setting:

- The EPA Residential Regional Screening Levels (RSLs, November 2021);
- DTSC Human Health Risk Assessment Note Number 3, DTSC-modified Screening Levels for Residential Soil (DTSC-SL, May 2022); and
- The DTSC Southern California Background concentration of 12 milligrams per kilogram (mg/kg) for arsenic.

7.4.1 Metals

Title 22 Metals were detected in all of the soil samples analyzed with the exception of antimony, beryllium, selenium, silver, and thallium. No soil samples contained metals that exceeded their respective screening criteria for residential soils or background concentrations established for southern California.

7.4.2 TPH

TPH as gasoline or gasoline range organics (GRO) was detected in one sample at a concentration of 4.17 mg/kg. This concentration of TPH as gasoline did not exceed the RSL of 82 mg/kg.

TPH as diesel was detected in two of the 31 samples at concentrations of 83.1 mg/kg and 473 mg/kg. The concentration of TPH as diesel in one sample, LB2-10' did exceed the RSL of 97 mg/kg. This is likely residual impacts to soil at depth in connection with the oil pipeline release that occurred within the adjacent alley to the east. This soil will be removed during redevelopment of the property and is not considered a REC.

TPH as motor oil was detected in three of the 31 samples at concentration ranging from 28.3 mg/kg to 1,970 mg/kg. The concentrations of TPH as motor oil did not exceed the USEPA – SL of 2,400 mg/kg.

7.4.3 VOCs

Nine VOCs were detected above the laboratory reporting limits in the soil samples selected for analysis during this investigation. The maximum concentrations of VOCs detected during this investigation are presented below:

VOC	Maximum Concentration	Sample ID
Benzene	25.7 µg/kg	LB4-2'
Ethylbenzene	2.0 µg/kg	LB4-2'
Isopropyltoluene	1.6 µg/kg	LB2-2'
Naphthalene	112 µg/kg	LB2-10'
Sec-Butylbenzene	20.8 µg/kg	LB2-10'
Tetrachloroethene (PCE)	291 µg/kg	LB4-2'
Trichloroethene (TCE)	23.2 µg/kg	LB2-2'
Toluene	17.8 µg/kg	LB4-2'
Xylenes	2.6 µg/kg	LB4-2'

Note: µg/kg = micrograms per kilogram

The concentrations of VOCs detected in soil samples analyzed during this investigation did not exceed the regulatory screening levels for residential soil.

7.5 Soil Gas Laboratory Results

The laboratory results of the soil gas samples are summarized in the following sub-sections and are presented in Table 4. A copy of the laboratory report is presented in Appendix H.

Due to tight, clayey soils, no flow conditions were encountered in borings LB1 and LB7 at 10 feet bgs, LB2 and LB3 at 5 and 10 feet bgs, and LB9 at 3.5 feet

bgs. Soil gas samples were not collected from these borings at these depths.

Results of the chemical analyses of the soil gas samples were compared to the USEPA RSLs (November 2021) and the DTSC-SLs (May 2022). These screening levels were adjusted for indoor air in a residential setting assuming a slab attenuation factor of 0.001 according to Table 2 of the DTSC 2011 Final Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air and a more conservative slab attenuation factor typically applied to existing buildings of 0.03 presented in the Draft Supplement Guidance: Screening and Evaluating Vapor Intrusion Supplement Guidance issued by the DTSC in February 2020.

7.5.1 VOCs

Twelve VOCs were detected above the laboratory reporting limits in the soil gas samples selected for analysis during this investigation. The maximum concentrations of VOCs detected in soil gas are presented below:

VOC	Maximum Concentration	Boring and Sample Depth
Benzene	54 μg/m^3	LB1-5' REP
Ethylbenzene	119 μg/m^3	LB7-4.5'
Bromodichloromethane	34 μg/m^3	LB7-4.5'
Chloroform	92 μg/m^3	LB5-10'
Isopropyltoluene	8 μg/m^3	LB5-5'
4-Isopropyltoluene	379 μg/m^3	LB7-4.5'
Trichlorofluoromethane	159 μg/m^3	LB5-10'
Toluene	80 μg/m^3	LB7-4.5'
Xylenes	721 μg/m^3	LB7-4.5'
1,2,4-Trimethylbenzene	113 μg/m^3	LB7-4.5'/LB7-4.5 REP
Tetrachloroethene (PCE)	55,700 μg/m^3	LB5-10'
Trichloroethylene (TCE)	157 μg/m^3	LB5-10'

Note: μg/m^3 = micrograms per cubic meter

No VOCs, except PCE, were detected at concentrations that did not exceed their respective residential screening limits using the 0.001 attenuation factors.

PCE was detected in each (including a duplicate sample) soil gas sample analyzed during this investigation at concentrations ranging from 77 $\mu g/m^3$ to 55,700 $\mu g/m^3$. Concentrations of PCE exceeded the Residential Indoor Air Screening Level using the currently accepted attenuation factor of 0.001 for future residential structures and the more conservative attenuation factor of 0.03 in boring except LB6.

The exceedances of PCE in soil gas are shown on Figure 5.

7.5.2 Methane

Methane was detected in soil gas samples during this investigation at concentrations ranging from 15 parts per million by volume (ppmv) to 490 ppmv. No significant soil gas pressures, exceeding 2 inches of water, were observed during the soil gas testing.

7.6 Groundwater Laboratory Results

Groundwater analytical results were compared to the California MCLs for drinking water. The results of the laboratory analyses of the groundwater sample collected during this investigation are summarized in Table 5 and below.

7.6.1 Grab Groundwater Results

Two VOCs were detected above the laboratory reporting limits in the groundwater sample collected from boring LB1. The concentrations were detected as follows:

Analyte	Concentration	Boring
PCE	10.6 µg/L	LB1-GW
TCE	0.6 µg/L	LB1-GW

The concentration of PCE detected in the grab groundwater sample

collected during this investigation exceeded the MCLs for drinking water.

8.0 FINDINGS

Leighton performed a Phase I and Limited Phase II ESA of the proposed multi-family residential development located at the address of 432 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California in accordance with Oklahoma Rock's authorization.

8.1 Onsite

Historically, the subject site was vacant land until 1961, when the present day commercial structure was built onsite. Various commercial businesses have occupied the site since the present day building was constructed, including a clinical lab, CPA offices, attorney offices, and health services.

Currently, the subject site is occupied by commercial businesses (Appendix B, Photos 1 through 7). Onsite businesses include a dispensary and a natural birth center. The subject site is currently developed with a one two-story, multi-tenant, commercial structure. The structure was built circa 1965 and is approximately 5,038 square feet. The subject site is also improved with asphalt-paved parking lot, concrete walkways, and landscaping.

No environmental concerns in connection with the historical use of the subject site were identified during this Phase I ESA.

The subject site is located within a City of Los Angeles Methane Zone. Methane was detected in soil gas at a maximum concentration of 490 ppmv at the subject site. Methane levels between 101 ppmv and 1,000 ppmv with pressure readings ≤2 inches of water correspond to Site Design Level II in the Los Angeles Municipal Code Ordinance No. 175790.

8.2 Offsite

Historically, the adjacent properties were vacant until approxiamtely 1928 when residential developemnt began in the surrounding proerties to the north and east. Properties to the south and west have been mostly commerical with some residential.

The subject site is currently bordered to the north by West 4th Street, followed by a flower shop and residences; to the east by an alleyway, followed by residences and a parking lot; to the south by a medical center, followed by Colgate Avenue; and to the west by South San Vicente Boulevard, followed by commercial and residential properties.

A documented release of chlorinated solvents has occurred on the neighboring property to the north of the subject site and is associated with the operation of a former dry cleaners. Various site assessments have been completed on this property and have identified chlorinated solvents (VOCs), primarily PCE and TCE, at the property affecting soil, soil gas, and groundwater. A Voluntary Cleanup Agreement (VCA) was entered into between LACoFD and the previous owner YVF Investments in February 2020. LACoFD provides oversight of the assessment and cleanup of chlorinated solvents affecting soil, soil gas, and groundwater beneath the property. The LACoFD suspended a one-year groundwater monitoring/sampling program on January 22, 2021 based on the low levels of VOCs detected in wells MW-1 through MW-3. The highest concentrations of chlorinated solvents detected during the routine monitoring were identified in well MW-4, the well furthest north of the subject site and former onsite dry cleaners. The LACoFD is aware that previous soil vapor sampling and indoor air sampling does indicate that potential VOC VI could be an issue for future residential developments if VI mitigation measures are not considered. The LACoFD also indicated that additional assessment of VI should be conducted prior to pursuing any residential development of the property to the north. In addition, the LACoFD requires the preparation and implementation of a SMP prior to redevelopment of the property and the filing of an Environmental Notice on the property.

Based on the results of our concurrent Limited Phase II ESA, elevated concentrations of PCE were detected in groundwater and soil gas samples collected from the subject site. Distribution of PCE in soil gas indicates that the neighboring former dry cleaner to the north has affected the subject site. The release of PCE to the subsurface at the neighboring property to the north is considered an offsite REC and vapor encroachment concern.

8.3 Data Gaps

No significant data gaps were identified by Leighton.

9.0 OPINION

It is Leighton's opinion that the presence of PCE in soil gas and groundwater beneath the subject site at concentrations exceeding unrestricted land use (residential) limits and MCLs, respectively, is considered a REC and vapor encroachment concern. The source of the PCE in soil gas and groundwater beneath the subject site is likely the documented release of chlorinated solvents originating from the former dry cleaners adjacent to the north of the subject site.

It is Leighton's opinion that no HRECs or CRECs were identified for the subject site.

10.0 CONCLUSIONS

Leighton has performed a Phase I and Limited Phase II ESA in conformance with the scope and limitations of ASTM E1527-13/-21 of the proposed multi-family residential development, located at the address of 432 South San Vicente Boulevard in the city of Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report. This assessment revealed no evidence of RECs or CRECs in connection with the subject site except for the following:

- The presence of PCE in soil gas and groundwater beneath the subject site at concentrations exceeding unrestricted land use (residential) limits and MCLs, respectively, is considered a REC and vapor encroachment concern. The source of the PCE in soil gas and groundwater beneath the subject site is likely the documented release of chlorinated solvents originating from the former dry cleaners adjacent to the north of the subject site.

Although not considered a REC, the following item should be addressed prior to redevelopment of the subject site:

- The subject site is located within a City of Los Angeles Methane Zone. Methane was detected in soil gas at a maximum concentration of 490 ppmv at the subject site. Methane levels between 101 ppmv and 1,000 ppmv with pressure readings ≤2 inches of water correspond to Site Design Level II in the Los Angeles Municipal Code Ordinance No. 175790. The methane mitigation requirements for Site Design Level II properties within the city of Los Angeles include, but are not limited to, the installation of a passive vented sub-slab ventilation system, vent risers, perforated horizontal pipes, trench dams, conduit seals, and dewatering (if necessary). A methane survey report should be prepared and submitted to the city of Los Angeles Building and Safety Department with your development plans that include the appropriate mitigation for review and approval.

In general, observations should be made during future subject site development for areas of possible contamination such as, but not limited to, the presence of former groundwater wells, underground facilities, buried debris, waste drums, and tanks, stained soil or odorous soils. Should such materials be encountered, further investigation and analysis may be necessary at that time.

11.0 DEVIATIONS

Leighton did not deviate from or alter the scope of work, as defined in Section 1.3 of this report. Significant data gaps were not identified that affect the ability of Leighton to identify RECs at the subject site.

12.0 ADDITIONAL SERVICES

Leighton did not perform work outside the scope of work as defined in Section 1.3 and 1.6 of this report.

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

13.1 Corporate

Leighton is a California corporation, providing geotechnical and environmental consulting services throughout California. We are solely a consulting firm without interests in real property other than our office locations in Southern California. We provide professional environmental consulting services including application of science and engineering to environmental compliance, hazardous materials/waste assessment and cleanup, and management of hazardous, solid and industrial waste. Phase I and Limited Phase II ESAs are a part of this practice area and have been conducted by us.

13.2 Individual

The qualifications of the Principal Geologist and the other Leighton environmental professionals involved in this Phase I ESA meet the Leighton corporate requirements for performing Phase I ESAs as specified by ASTM E1527-13. In addition, Ms. Brynn McCulloch is an Environmental Professional as identified by ASTM E1527-13.

13.3 Environmental Professional Statement

I declare on May 24, 2022 tthat, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional, as defined by §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Brynn McCulloch
Principal Geologist

Notes:
GRO = Gasoline Range Organics
DRO = Diesel Range Organics
ORO = Oil Range Organics
mg/kg = Milligrams per Kilogram
µg/kg = Micrograms per Kilogram
HERO Note 3 = Department of Toxic Substances Control (DTSC) Office of Human and Ecological Risk (HERO) Note Number 3 Screening Levels (SLs) (May 2022)
RSL = USEPA Regional Screening Levels (RSLs) for Soil (November 2021)
<0.20 = Not Detected Above Laboratory Reporting Limits
* = Dilutions for these compound(s); first number for all others
-- = Not Analyzed or Not Applicable
Lowest aromatic/aliphatic TPH RSL selected for screening criteria
Bold concentrations were detected above laboratory reporting limit
Highlighted concentrations exceed one or more regulatory screening limit

TABLE 3
Groundwater Analytical Results for VOCs
432 South San Vicente Boulevard, Los Angeles, California

Boring ID	Sample ID	Sample Date	Depth to Water (feet bgs)	VOCs (ug/L)		
				Tetrachloroethene	Trichloroethene	All other VOCs
			California MCLs (ug/L)	**5.0**	**5.0**	**--**
LB1	**LB1-GW**	04/19/22	15.50	**10.6**	**0.6**	**ND**

MCL = California Maxiumum Contaminant Levels for Regulated Drinking Water (September 2021)
VOCs = Volatile Organic Compounds by EPA Method 8260B
ug/L = micrograms per liter
ND = Not detected above laboratory reporting limit as shown
bgs = Below ground surface
-- = Not analyzed or not applicable
Bold concentrations were detected above laboratory reporting limit
RED concentrations exceed regulatory limits for drinking water

TABLE 4
Soil Gas Analytical Results for VOCs
432 South San Vicente Boulevard, Los Angeles, California

Boring ID	Sample ID	Probe Depth (feet bgs)	Date	Volatile Organic Compounds (VOCs) by EPA Method 8260 (µg/m3)												
				Benzene	Bromodichloromethane	Chloroform	Isopropylbenzene	4-Isopropyltoluene	Ethylbenzene	Tetrachloroethene	Toluene	Trichloroethene	Trichlorofluoromethane	1,2,4-Trimethylbenzene	Xylenes (total)	All Other VOCs
Regulatory Limits

Note:

16 = A bold number indicates that the chemical compound has exceeded the laboratory report limit.

bgs: below ground surface

PCE: Tetrachloroethylene or Tetrachloroethene

µg/m3: micrograms per meter cubed

<8: Not detected above the laboratory detection limit

USEPA RSLs = Environmental Protection Agency Regional Screening Levels (RSLs) for residential indoor air (November 2021)

DTSC-SL = Department of Toxic Substances Control (DTSC) Office of Human and Ecological Risk (HERO) Note Number 3 (May 2022)

AF = Attenuation factor for existing structures. Indoor air screening level is divided by the AF to obtain the soil vapor screening level (DTSC, 2011)

Highlisted concentrations exceed one or more regulatory screeing limits

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List

US INST CONTROLS ..... Institutional Controls Sites List

Federal ERNS list

ERNS ..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ..... State Response Sites

Lists of state and tribal leaking storage tanks

INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST ..... Underground Storage Tank Listing
AST ..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST ..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ..... Voluntary Cleanup Priority Listing
VCP ..... Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS ..... Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY ..... Recycler Database
HAULERS ..... Registered Waste Tire Haulers Listing
INDIAN ODI ..... Report on the Status of Open Dumps on Indian Lands
ODI ..... Open Dump Inventory
DEBRIS REGION 9 ..... Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS ..... Open Dumps on Indian Land

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 11 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Facility Id: 24396

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no

longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 8 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 46 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/18/2022 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 01/10/2022 has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR

researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 04/21/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Failure to test overfill prevention by 10/13/18. Tested 1/29/19, results to be reviewed by LAFD upon receipt. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification. Test results to be reviewed by LAFD upon submittal.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

LA MIRAGE CLEANERS (Continued) **1000596998**

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	162489
Site Name:	TJ Maxx 1326
Violation Date:	07-09-2019
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 07/30/2019. OBSERVATION: Uniform Hazardous Waste Manifests for all hazardous wastes were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for all hazardous wastes and submit copies to the CUPA.

Name: ROSS DRESS FOR LESS #1165
Address: 8487 W. 3RD ST, BLDG D
City,State,Zip: LOS ANGELES, CA 90048
Site ID: 62979
CERS ID: 10509409
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 62979
Site Name: Ross Dress For Less #1165
Violation Date: 10-30-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 11/16/2017. OBSERVATION: Uniform Hazardous Waste Manifests for all hazardous wastes were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for all hazardous wastes and submit copies to the CUPA.
Violation Division: Los Angeles County Fire Department

Latitude:	34.073003
Longitude:	-118.373003
Case Type:	Cleanup Program Site
Case Worker:	TA
Local Agency:	Not reported
RB Case Number:	1218
File Location:	Regional Board
Potential Media Affected:	Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	This Site is a 10,970 square feet area with a single-story building and paved asphalt parking in a mixed commercial and residential area of Los Angeles. Based on the information provided, a dry cleaning facility has continuously occupied the Site for at least 56 years, and a reported use of chlorinated solvent, from as early as 1971 through at least 2001. Wardrobe Cleaners currently uses a natural organic solvent for dry cleaning. In November 2005, AEI conducted subsurface investigation that included collection of soil and discrete groundwater samples. The investigation concluded that the soil beneath the Site had been impacted due to the release of tetrachloroethylene (PCE) and trichloroethylene (TCE) which is consistent with solvent used in dry cleaning operations. AEI also identified the dry cleaning machine and waste storage area as potential contaminant sources. The soil analytical data show PCE concentrations as high as 586,000 micrograms per kilogram (g/Kg) at 2-feet below ground surface (bgs) and as high as 1,030 micrograms per liter (g/L) in groundwater at the Site. Based on the Site assessment conducted, AEC proposed a RAP for soil and groundwater. The soil RAP is proposing excavation of impacted soil to 10 feet bgs and in-situ chemical oxidation using Fenton s reagent for groundwater remediation. Additional groundwater monitoring wells are being proposed to monitor the remediation at the Site. According to the Department of Water Resources Bulletin No. 104, the Site is located in the Santa Monica Basin of the Coastal Plain of Los Angeles. The Site is underlain by the Lakewood Formation and the top of the uppermost Exposition Aquifer occurs at approximately 60 feet bgs. Based on the soil boring log, the soil beneath the Site consists of silty clay, clayey sand and clayey silt. Groundwater at the Site is encountered between 20 and 26 feet bgs.

Eval Date:	04-02-2019
Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Second Notice of Violation Inspection Report Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on 2/14/19, that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than [Truncated]

inspection. Consent to enter and inspect was given by Dave Suber, owner, email: dave@perfectcleaners.com. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Potential Media Affected:	Aquifer used for drinking water supply, Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	A dry cleaners facility occupied a portion of the Site for approximately 39 years, between February 1967 and February 2006. The on-site building was constructed in 1963. Prior to that time the Site was used as residential property. Dry cleaners facilities that operated at the Site has included Norge Village Cleaners (1967 to 1969), Norge Village Cleaning Center (1969 to 1978), and Merry Go Round Cleaners (1978 to 2006). The former Merry Go Round Cleaners was a tenant of the Francell Trusts and operated aton the Site. The former Merry Go Round Cleaners was owned and operated by Lloyd, Chizuko and Day Suehiro. Somito is the current property owner of the Site. Somito purchased the Site from the Living Trusts of John R. and Betty J. Franscell, George J. and Billie M. Franscell, and Joseph J. and Donna J. Franscell Trusts (Franscells) in January 2007. Prior to January 2007, Franscell Trusts the Franscells owned the property for approximately 40 years.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: D013
Waste Description: LINDANE (1,2,3,4,5,6-HEXA-CHLOROCYCLOHEXANE, GAMMA ISOMER)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D019
Waste Description: CARBON TETRACHLORIDE

CEDARS SINAI MEDICAL CTR (Continued) **1000156119**

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D028
Waste Description: 1,2-DICHLOROETHANE

Waste Code: D033
Waste Description: HEXACHLOROBUTADIENE

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, &

CEDARS SINAI MEDICAL CTR (Continued) **1000156119**

SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: P087
Waste Description: OSMIUM OXIDE OSO4, (T-4)- (OR) OSMIUM TETROXIDE

Waste Code: P105
Waste Description: SODIUM AZIDE

Waste Code: P106
Waste Description: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

Waste Code: U001
Waste Description: ACETALDEHYDE (I) (OR) ETHANAL (I)

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U003
Waste Description: ACETONITRILE (I,T)

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U017
Waste Description: BENZAL CHLORIDE (OR) BENZENE, (DICHLOROMETHYL)-

Waste Code: U021
Waste Description: [1,1'-BIPHENYL]-4,4'-DIAMINE (OR) BENZIDINE

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U048
Waste Description: O-CHLOROPHENOL (OR) PHENOL, 2-CHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

CEDARS SINAI MEDICAL CTR (Continued) **1000156119**

Waste Code: U075
Waste Description: DICHLORODIFLUOROMETHANE (OR) METHANE, DICHLORODIFLUORO-

Waste Code: U081
Waste Description: 2,4-DICHLOROPHENOL (OR) PHENOL, 2,4-DICHLORO-

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U133
Waste Description: HYDRAZINE (R,T)

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U181
Waste Description: 5-NITRO-O-TOLUIDINE (OR) BENZENAMINE, 2-METHYL-5-NITRO

Waste Code: U182
Waste Description: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U237
Waste Description: 2,4-(1H,3H)-PYRIMIDINEDIONE, 5-[BIS(2-CHLOROETHYL)AMINO]- (OR) URACIL MUSTARD

Waste Code: U239

CEDARS SINAI MEDICAL CTR (Continued) **1000156119**

Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Waste Code: U248
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYL-BUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2022
Date Data Arrived at EDR: 02/03/2022
Date Made Active in Reports: 02/22/2022
Number of Days to Update: 19

Source: EPA
Telephone: N/A
Last EDR Contact: 05/05/2022
Next Scheduled EDR Contact: 07/11/2022
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022
Date Data Arrived at EDR: 02/03/2022
Date Made Active in Reports: 02/22/2022

Next Scheduled EDR Contact: 07/11/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/25/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021
Date Data Arrived at EDR: 06/24/2021
Date Made Active in Reports: 09/20/2021
Number of Days to Update: 88

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.
Daycare Centers: Licensed Facilities
Source: Department of Social Services

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Leighton and Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

	Los Angeles, CA		

ANALYSES REQUESTED

Soil:

1. EPA 8015M – Extended Range Hydrocarbons
2. EPA 8260B by 5035 – Volatile Organics by GC/MS + Oxygenates/Gasoline Range Organics
3. EPA 6010B by 3050B and EPA 7471A – CAM 17 Metals

Water:

1. EPA 8260B by 5030B – Volatile Organics by GC/MS + Oxygenates/Gasoline Range Organics

Approval: 

Douglas A. Fowler, B.S.
Stationary Lab Chemist

JONES ENVIRONMENTAL LABORATORY RESULTS

Client:	Leighton and Associates	**Report date:**	4/22/2022
Client Address:	17781 Cowan	**Jones Ref. No.:**	G-0438
	Irvine, CA 92614	**Client Ref. No.:**	13401.002
Attn:	Sabrina Gonzalez	**Date Sampled:**	4/21/2022
		Date Received:	4/21/2022
Project:		**Date Analyzed:**	4/21/2022
Project Address:	400 San Vicente Blvd	**Physical State:**	Soil Gas
	Los Angeles, CA 90048		

ANALYSES REQUESTED

1. EPA 8260B – Volatile Organics by GC/MS + Oxygenates

Sampling – Soil Gas samples were collected in glass gas-tight syringes equipped with Teflon plungers.

A tracer gas mixture of n-pentane, n-hexane, and n-heptane was placed at the tubing-surface interface before sampling. These compounds were analyzed during the 8260B analytical run to determine if there were surface leaks into the subsurface due to improper installation of the probe. No tracer was detected in any of the samples reported herein.

The sampling rate was approximately 200 cc/min, except when noted differently on the chain of custody record, using a glass gas-tight syringe. Purging was completed using a pump set at approximately 200 cc/min, except when noted differently on the chain of custody record. A default of 3 purge volumes was used as recommended by July 2015 DTSC/RWQCB guidance documents.

Prior to purging and sampling of soil gas at each point, a shut-in test was conducted to check for leaks in the above ground fittings. The shut-in test was performed on the above ground apparatus by evacuating the line to a vacuum of 100 inches of water, sealing the entire system and watching the vacuum for at least one minute. A vacuum gauge attached in parallel to the apparatus measured the vacuum. If there was any observable loss of vacuum, the fittings were adjusted as needed until the vacuum did not change noticeably. The soil gas sample was then taken.

No flow conditions occur when a sampling rate greater than 10 mL/min cannot be maintained without applying a vacuum greater than 100 inches of water to the sampling train. The sampling train is left at a vacuum for no less than three minutes. If the vacuum does not subside appreciably after three minutes, the sample location is determined to be a no flow sample.

Analytical – Soil Gas samples were analyzed using EPA Method 8260 that includes extra compounds required by DTSC/RWQCB (such as Freon 113). Instrument Continuing Calibration Verification, QC Reference Standards, Instrument Blanks and Sampling Blanks were analyzed every 12 hours as prescribed by the method. In addition, a Laboratory Control Sample (LCS) and Laboratory Control Sample Duplicate (LCSD) were analyzed with each batch of Soil Gas samples. A duplicate/replicate sample was analyzed each day of the sampling activity. All samples were injected into the GC/MS system within 30 minutes of collection.

Approval:

Colby Wakeman

Important Information about This

Geoenvironmental Report

Geoenvironmental studies are commissioned to gain information about environmental conditions on and beneath the surface of a site. The more comprehensive the study, the more reliable the assessment is likely to be. But remember: Any such assessment is to a greater or lesser extent based on professional opinions about conditions that cannot be seen or tested. Accordingly, no matter how many data are developed, risks created by unanticipated conditions will always remain. *Have realistic expectations.* Work with your geoenvironmental consultant to manage known and unknown risks. Part of that process should already have been accomplished, through the risk allocation provisions you and your geoenvironmental professional discussed and included in your contract's general terms and conditions. This document is intended to explain some of the concepts that may be included in your agreement, and to pass along information and suggestions to help you manage your risk.

Beware of Change; Keep Your Geoenvironmental Professional Advised

The design of a geoenvironmental study considers a variety of factors that are subject to change. Changes can undermine the applicability of a report's findings, conclusions, and recommendations. *Advise your geoenvironmental professional about any changes you become aware of.* Geoenvironmental professionals cannot accept responsibility or liability for problems that occur because a report fails to consider conditions that did not exist when the study was designed. Ask your geoenvironmental professional about the types of changes you should be particularly alert to. Some of the most common include:

- modification of the proposed development or ownership group,
- sale or other property transfer,
- replacement of or additions to the financing entity,
- amendment of existing regulations or introduction of new ones, or
- changes in the use or condition of adjacent property.

Should you become aware of any change, *do not rely on a geoenvironmental report.* Advise your geoenvironmental professional immediately; follow the professional's advice.

Recognize the Impact of Time

A geoenvironmental professional's findings, recommendations, and conclusions cannot remain valid indefinitely. The more time that passes, the more likely it is that important latent changes will occur. *Do not rely on a geoenvironmental report if too much time has elapsed since it was completed.* Ask your environmental professional to define "too much time." In the case of Phase I Environmental Site Assessments (ESAs), for example, more than 180 days after submission is generally considered "too much."

Prepare To Deal with Unanticipated Conditions

The findings, recommendations, and conclusions of a Phase I ESA report typically are based on a review of historical information, interviews, a site "walkover," and other forms of noninvasive research. When site subsurface conditions are not sampled in any way, the risk of unanticipated conditions is higher than it would otherwise be.

While borings, installation of monitoring wells, and similar invasive test methods can help reduce the risk of unanticipated conditions, *do not overvalue the effectiveness of testing.* Testing provides information about actual conditions only at the precise locations where samples are taken, and only when they are taken. Your geoenvironmental

professional has applied that specific information to develop a general opinion about environmental conditions. *Actual conditions in areas not sampled may differ (sometimes sharply) from those predicted in a report.* For example, a site may contain an unregistered underground storage tank that shows no surface trace of its existence. *Even conditions in areas that were tested can change*, sometimes suddenly, due to any number of events, not the least of which include occurrences at adjacent sites. Recognize, too, that *even some conditions in tested areas may go undiscovered,* because the tests or analytical methods used were designed to detect only those conditions assumed to exist.

Manage your risks by retaining your geoenvironmental professional to work with you as the project proceeds. Establish a contingency fund or other means to enable your geoenvironmental professional to respond rapidly, in order to limit the impact of unforeseen conditions. And to help prevent any misunderstanding, identify those empowered to authorize changes and the administrative procedures that should be followed.

Do Not Permit Any Other Party To Rely on the Report

Geoenvironmental professionals design their studies and prepare their reports to meet the specific needs of the clients who retain them, in light of the risk management methods that the client and geoenvironmental professional agree to, and the statutory, regulatory, or other requirements that apply. The study designed for a developer may differ sharply from one designed for a lender, insurer, public agency...or even another developer. *Unless the report specifically states otherwise, it was developed for you and only you.* Do not unilaterally permit any other party to rely on it. The report and the study underlying it may not be adequate for another party's needs, and you could be held liable for shortcomings your geoenvironmental professional was powerless to prevent or anticipate. Inform your geoenvironmental professional when you know or expect that someone else—a third-party—will want to use or rely on the report. *Do not permit third-party use or reliance until you first confer with the geoenvironmental professional who prepared the report.* Additional testing, analysis, or study may be required and, in any event, appropriate terms and conditions should be agreed to so both you and your geoenvironmental professional are protected from third-party risks. *Any party who relies on a geoenvironmental report without the express written permission of the professional who prepared it and the client for whom it was prepared may be solely liable for any problems that arise.*

Avoid Misinterpretation of the Report

Design professionals and other parties may want to rely on the report in developing plans and specifications. They need to be advised, in writing, that their needs may not have been considered when the study's scope was developed, and, even if their needs were considered, they might misinterpret geoenvironmental findings, conclusions, and recommendations. *Commission your geoenvironmental professional to explain pertinent elements of the report to others who are permitted to rely on it, and to review any plans, specifications or other instruments of professional service that incorporate any of the report's findings, conclusions, or recommendations.* Your geoenvironmental professional has the best understanding of the issues involved, including the fundamental assumptions that underpinned the study's scope.

Give Contractors Access to the Report

Reduce the risk of delays, claims, and disputes by giving contractors access to the full report, *providing that it is accompanied by a letter of transmittal that can protect you* by making it unquestionably clear that: 1) the study was not conducted and the report was not prepared for purposes of bid development, and 2) the findings, conclusions, and recommendations included in the report are based on a variety of opinions, inferences, and assumptions and are subject to interpretation. Use the letter to also advise contractors to consult with your geoenvironmental professional to obtain clarifications, interpretations, and guidance (a fee may be required for this service), and that—in any event—they should conduct additional studies to obtain the specific type and extent of information each prefers for preparing a bid or cost estimate. Providing access to the full report, with the appropriate caveats, helps prevent formation of adversarial attitudes and claims of concealed or differing conditions. If a contractor elects to ignore the warnings and advice in the letter of transmittal, it would do so at its own risk. Your geoenvironmental professional should be able to help you prepare an effective letter.

Do Not Separate Documentation from the Report

Geoenvironmental reports often include supplemental documentation, such as maps and copies of regulatory files, permits, registrations, citations, and correspondence with regulatory agencies. If subsurface explorations were performed, the report may contain final boring logs and copies of laboratory data. If remediation activities occurred on site, the report may include: copies of daily field reports; waste manifests; and information about the disturbance of subsurface materials, the type and thickness of any fill placed on site, and fill placement practices, among other types of documentation. *Do not separate supplemental documentation from the report. Do not, and do not permit any other party to redraw or modify any of the supplemental documentation for incorporation into other professionals' instruments of service.*

Understand the Role of Standards

Unless they are incorporated into statutes or regulations, standard practices and standard guides developed by the American Society for Testing and Materials (ASTM) and other recognized standards-developing organizations (SDOs) are little more than aspirational methods agreed to by a consensus of a committee. The committees that develop standards may not comprise those best-qualified to establish methods and, no matter what, no standard method can possibly consider the infinite client- and project-specific variables that fly in the face of the theoretical "standard conditions" to which standard practices and standard guides apply. In fact, these variables can be so pronounced that geoenvironmental professionals who comply with every directive of an ASTM or other standard procedure could run afoul of local custom and practice, thus violating the standard of care. Accordingly, when geoenvironmental professionals indicate in their reports that they have performed a service "in general compliance" with one standard or another, it means they have applied professional judgement in creating and implementing a scope of service designed for the specific client and project involved, and which follows some of the general precepts laid out in the referenced standard. To the extent that a report indicates "general compliance" with a standard, you may wish to speak with your geoenvironmental professional to learn more about what was and was not done. *Do not assume a given standard was followed to the letter.* Research indicates that that seldom is the case.

Realize That Recommendations May Not Be Final

The technical recommendations included in a geoenvironmental report are based on assumptions about actual conditions, and so are preliminary or tentative. Final recommendations can be prepared only by observing actual conditions as they are exposed. For that reason, you should retain the geoenvironmental professional of record to observe construction and/or remediation activities on site, to permit rapid response to unanticipated conditions. *The geoenvironmental professional who prepared the report cannot assume responsibility or liability for the report's recommendations if that professional is not retained to observe relevant site operations.*

Understand That Geotechnical Issues Have Not Been Addressed

Unless geotechnical engineering was specifically included in the scope of professional service, a report is not likely to relate any findings, conclusions, or recommendations about the suitability of subsurface materials for construction purposes, especially when site remediation has been accomplished through the removal, replacement, encapsulation, or chemical treatment of on-site soils. The equipment, techniques, and testing used by geotechnical engineers differ markedly from those used by geoenvironmental professionals; their education, training, and experience are also significantly different. If you plan to build on the subject site, but have not yet had a geotechnical engineering study conducted, your geoenvironmental professional should be able to provide guidance about the next steps you should take. The same firm may provide the services you need.

Read Responsibility Provisions Closely

Geoenvironmental studies cannot be exact; they are based on professional judgement and opinion. Nonetheless, some clients, contractors, and others assume geoenvironmental reports are or certainly should be unerringly precise. Such assumptions have created unrealistic expectations that have led to wholly unwarranted claims and disputes. To help prevent such problems, geoenvironmental professionals have developed a number of report provisions and contract terms that explain who is responsible for what, and how risks are to be allocated. Some people mistake these for "exculpatory clauses," that is, provisions whose purpose is to transfer one party's rightful responsibilities and liabilities to someone else. Read the responsibility provisions included in a report and in the contract you and your geoenvironmental professional agreed to. *Responsibility provisions are not "boilerplate."* They are important.

Rely on Your Geoenvironmental Professional for Additional Assistance

Membership in the Geoprofessional Business Association exposes geoenvironmental professionals to a wide array of risk management techniques that can be of genuine benefit for everyone involved with a geoenvironmental project. Confer with your GBA-member geoenvironmental professional for more information.
